See accompanying notes to consolidated financial statements.

Notes to Consolidated Financial Statements (Unaudited)

Note 1 - Principles of presentation

Village Bank and Trust Financial Corp. (the "Company") is the holding company of Village Bank (the "Bank"). The consolidated financial statements include the accounts of the Company, the Bank and the Bank's three wholly-owned subsidiaries, Village Bank Mortgage Company, Village Insurance Agency, Inc., and Village Financial Services Company. All material intercompany balances and transactions have been eliminated in consolidation.

The Company's financial statements are prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") which, effective for all interim and annual periods ending after September 15, 2009, principally consist of the Financial Accounting Standards Board Accounting Standards Codification ("FASB Codification"). FASB Codification Topic 105 *Generally Accepted Accounting Principles* establishes the FASB codification as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with generally accepted accounting principles. Rules and interpretive releases of the Securities and Exchange Commission ("SEC") under authority of federal securities laws are also sources of authoritative guidance for SEC registrants. All guidance contained in the FASB Codification carries an equal level of authority. All non-grandfathered, non-SEC accounting literature not included in the FASB Codification is superseded and deemed non-authoritative.

In the opinion of management, the accompanying condensed consolidated financial statements of the Company have been prepared on the accrual basis in accordance with generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. However, all adjustments that are, in the opinion of management, necessary for a fair presentation have been included. The results of operations for the three and nine month periods ended September 30, 2009 are not necessarily indicative of the results to be expected for the full year ending December 31, 2009. The unaudited interim financial statements should be read in conjunction with the audited financial statements and notes to financial statements that are presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2008 as filed with the Securities and Exchange Commission.

Note 2 - Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the balance sheets and statements of income for the period. Actual results could differ significantly from those estimates.

Note 3 - Earnings per common share

Basic earnings per common share are computed by dividing the net income by the weighted-average number of common shares outstanding during the period. For the three month periods ended September 30, 2009 and 2008, the weighted-average number of common shares totaled 4,230,628 and 2,627,814, respectively. For the nine month periods ended September 30, 2009 and 2008, the weighted-average number of common shares totaled 4,230,406 and 2,604,814, respectively. Diluted earnings per share reflect the potential dilution of securities that could share in

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

the net income of the Company. Outstanding options and warrants to purchase common stock were considered in the computation of diluted earnings per share for the periods presented. For the three month periods ended September 30, 2009 and 2008, the weighted-average number of common shares on a fully diluted basis totaled 4,230,875 and 2,628,241, respectively For the nine month periods ended September 30, 2009 and 2008, the weighted-average number of common shares on a fully diluted basis totaled 4,230,516 and 2,612,577, respectively. Options and warrants to acquire 333,255 shares of common stock were anti-dilutive for the three and nine month periods ended September 30, 2009 and options to acquire 177,275 shares and 110,600 shares were anti-dilutive for the three and nine month periods ended September 30, 2008 and thus excluded from the computation of fully diluted earnings per share.

Note 4 – Incentive plans

The company has a stock incentive plan which authorizes the issuance of up to 455,000 shares of common stock to assist the Company in recruiting and retaining key personnel.

The following table summarizes stock options outstanding under the stock incentive plan at the indicated dates:

	Nine Months Ended September 30,				2008			
	Options	Weighted Average Exercise Price	Fair Value Per Share	Intrinsic Value	Options	Weighted Average Exercise Price	Fair Value Per Share	Intrinsic Value
Options outstanding, beginning of period	333,955	\$ 9.63	\$ 4.77		247,410	\$ 10.26	\$ 4.70	
Granted	3,000	4.45	2.86		-	-	-	
Forfeited	(700)	10.42	6.12		(2,250)	11.77	5.29	
Exercised	-	-	-		(59,885)	-	4.46	
Options outstanding, end of period	336,255	\$ 9.58	\$ 4.75	\$ -	185,275	\$ 10.25	\$ 4.77	\$ -
Options exercisable, end of period	300,900				167,775			

During the first quarter of 2009, we granted to certain officers 26,592 restricted shares of common stock with a weighted average fair market value of \$4.60 at the date of grant. These restricted stock awards have three-year graded vesting. Prior to vesting, these shares are subject to forfeiture to us without consideration upon termination of employment under certain circumstances. The total number of shares underlying non-vested restricted stock and performance share awards was 22,238 and 9,069 at September 30, 2009 and 2008, respectively.

Stock-based compensation expense was \$123,129 and \$49,914 for the nine months ended September 30, 2009 and 2008, respectively. Unamortized stock-based compensation related to nonvested share based compensation arrangements granted under the Incentive Plan as of September 30, 2009 and 2008 was \$360,247 and \$173,031, respectively. Of the \$360,247 of unamortized compensation at September 30, 2009, \$91,055 relates to performance based restricted stock awards. The time based unamortized compensation of \$269,192 is expected to be recognized over a weighted average period of 2.17 years.

Note 5 – Trust preferred securities

During the first quarter of 2005, Southern Community Financial Capital Trust I, a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable securities. On February 24, 2005, \$5.2 million of Trust Preferred Capital Notes were issued through a pooled underwriting. The securities have a LIBOR-indexed floating rate of interest (three-month LIBOR plus 2.15%) which adjusts, and is payable, quarterly. The interest rate at September 30, 2009 was 2.45%. The securities may be redeemed at par beginning on March 15, 2010 and each quarter after such date until the securities mature on March 15, 2035. The principal asset of the Trust is \$5.2 million of the Company's junior subordinated debt securities with like maturities and like interest rates to the Trust Preferred Capital Notes.

During the third quarter of 2007, Village Financial Statutory Trust II, a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable securities. On September 20, 2007, \$3.6 million of Trust Preferred Capital Notes were issued through a pooled underwriting. The securities have a five year fixed income rate of 6.29% payable quarterly, converting after five years to a LIBOR-indexed floating rate of interest (three-month LIBOR plus 1.40%) which adjusts, and is also payable, quarterly. The securities may be redeemed at par at any time commencing in December 2012 until the securities mature in 2037. The principal asset of the Trust is \$3.6 million of the Company's junior subordinated debt securities with like maturities and like interest rates to the Trust Preferred Capital Notes.

The Trust Preferred Capital Notes may be included in Tier 1 capital for regulatory capital adequacy determination purposes up to 25% of Tier 1 capital after its inclusion. The portion of the Trust Preferred Capital Notes not considered as Tier 1 capital may be included in Tier 2 capital.

The obligations of the Company with respect to the issuance of the Trust Preferred Capital Notes constitute a full and unconditional guarantee by the Company of the Trust's obligations with respect to the Trust Preferred Capital Notes. Subject to certain exceptions and limitations, the Company may elect from time to time to defer interest payments on the junior subordinated debt securities, which would result in a deferral of distribution payments on the related Trust Preferred Capital Notes and require a deferral of common dividends.

Note 6 – Deposits

Deposits as of September 30, 2009 and December 31, 2008 were as follows:

	September 30, 2009		December 31, 2008

Note 7 – Business Combination

On September 30, 2008 the Company acquired River City Bank for approximately \$20,720,000. The total consideration included approximately \$16,269,000 of common stock, representing approximately 1,441,000 shares, and cash of \$3,962,244 paid to shareholders of River City Bank. The transaction requires no future contingent consideration payments. The merger of the Company and River City Bank resulted in a combined company with approximately \$572 million in assets and increases the Company's presence in Henrico County and establishes a presence in Hanover County continuing our goal of expanding our franchise into other counties in the Richmond metropolitan area.

Goodwill of \$6.7 million has been recorded in this transaction which will not be amortizable and is not deductible for tax purposes. The Company also recorded \$809,318 in core deposits intangibles which is being amortized over eight years using the straight line method.

The acquisition of River City Bank constituted a business combination and was accounted for using the purchase method of accounting. Accordingly the purchase price was allocated to the respective assets acquired and liabilities assumed based on their estimated fair values on the date of acquisition. The excess of purchase price over the fair value of net assets was recorded as goodwill. The purchase price allocation as of December 31, 2008, is subject to revision in future periods, including adjustments that may be necessary upon the filing of the final tax returns of River City Bank.

Note 8 — Fair value

Effective January 1, 2008, the Company adopted the provisions of FASB Codification Topic 820: *Fair Value Measurements* which defines fair value, establishes a framework for measuring fair value under U.S GAAP, and expands disclosures about fair value measurements.

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are independent, knowledgeable, able to transact and willing to transact.

FASB Codification Topic 820: *Fair Value Measurements and Disclosures* establishes a hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair values hierarchy is as follows:

- *Level 1 Inputs*— Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.
- *Level 2 Inputs* — Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

- *Level 3 Inputs* - Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company used the following methods to determine the fair value of each type of financial instrument:

Investment securities: The fair values for investment securities are determined by quoted prices for similar assets or liabilities (Level 2).

Residential loans held for sale: The fair value of loans held for sale is determined using quoted prices for a similar asset, adjusted for specific attributes of that loan (Level 2).

Impaired loans: The fair values of impaired loans are measured for impairment using the fair value of the collateral for collateral-dependent loans on a nonrecurring basis. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The use of discounted cash flow models and management's best judgment are significant inputs in arriving at the fair value measure of the underlying collateral and are therefore classified within (Level 3).

Real estate owned: Real estate owned assets are adjusted to fair value upon transfer of the loans to foreclosed assets. Subsequently, real estate owned assets are carried at net realizable value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the foreclosed asset as nonrecurring Level 3.

Assets and liabilities measured at fair value under Topic 820 on a recurring and non-recurring basis, including financial assets and liabilities for which the Company has elected the fair value option, are summarized below:

Fair Value Measurement at September 30, 2009 Using (In Thousands)			
	Carrying Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2) Significant Unobservable Inputs (Level 3)
Financial Assets-Recurring

Financial Assets-Non-Recurring				
Impaired loans	\$ 8,528	-	-	\$ 8,528
Real estate owned				2,932

(1) Excludes restricted stock.

In general, fair value of securities is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon market prices determined by an outside, independent entity that primarily uses as inputs, observable market-based parameters. Fair value of loans held for sale is based upon internally developed models that primarily use as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, the Company's creditworthiness, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

A more detailed description of the valuation methodologies used for assets and liabilities measured at fair value is set forth in the 2008 Form 10-K.

Cash and cash equivalents – The carrying amount of cash and cash equivalents approximates fair value.

Investment securities – The fair value of investment securities available-for-sale is estimated based on bid quotations received from independent pricing services for similar assets. The carrying amount of other investments approximates fair value.

Loans – For variable rate loans that reprice frequently and have no significant change in credit risk, fair values are based on carrying values. For all other loans, fair values are calculated by discounting the contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loans, or by using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Deposits – The fair value of deposits with no stated maturity, such as demand, interest checking and money market, and savings accounts, is equal to the amount payable on demand at year-end. The fair value of certificates of deposit is based on the discounted value of contractual cash flows using the rates currently offered for deposits of similar remaining maturities.

Borrowings – The fair value of FHLB borrowings is based on the discounted value of contractual cash flows using the rates currently offered for borrowings of similar remaining maturities. The carrying amounts of federal funds purchased approximate their fair values. Other borrowings are short-term in nature and the carrying amounts approximate fair value.

Accrued interest – The carrying amounts of accrued interest receivable and payable approximate fair value.

Off-balance-sheet instruments – The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of commitments to extend credit, including letters of credit, is estimated to approximate their aggregate book balance and is not considered material and therefore not included in the following table.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

	September 30, 2009		December 31, 2008	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Financial assets

Commitments to extend or originate credit		24,338,000		30,195,000
Standby letters of credit		4,382,782		5,413,000

Note 9 – Capital Purchase Program

On May 1, 2009, as part of the Capital Purchase Program established by the U.S. Department of the Treasury (the “Treasury”) under the Emergency Economic Stabilization Act of 2008 (“EESA”), the Company entered into a Letter Agreement and Securities Purchase Agreement—Standard Terms (collectively, the “Purchase Agreement”) with the Treasury, pursuant to which the Company sold (i) 14,738 shares of the Company’s Fixed Rate Cumulative Perpetual Preferred Stock, Series A, par value \$4.00 per share, having a liquidation preference of \$1,000 per share (the “Preferred Stock”) and (ii) a warrant (the “Warrant”) to purchase 499,029 shares of the Company’s common stock at an initial exercise price of \$4.43 per share, subject to certain anti-dilution and other adjustments, for an aggregate purchase price of \$14,738,000 in cash. The fair value of the preferred stock was estimated using discounted cash flow methodology at an assumed market equivalent rate of 13%, with 20 quarterly payments over a five year period. The fair value of the warrant was estimated using the Black-Scholes option pricing model, with assumptions of 25% volatility, a risk-free rate of 2.03%, a yield of 6.162% and an estimated life of 5 years. The value attributed to the warrant is being accreted as a discount on the preferred stock using the effective interest rate method over five years.

The Preferred Stock will qualify as Tier 1 capital and will pay cumulative dividends at a rate of 5% per annum for the first five years, and thereafter at a rate of 9% per annum. The Preferred Stock is generally non-voting, other than on certain matters that could adversely affect the Preferred Stock.

The Warrant is immediately exercisable. The Warrant provides for the adjustment of the exercise price and the number of shares of common stock issuable upon exercise pursuant to customary anti-dilution provisions, such as upon stock splits or distributions of securities or other assets to holders of common stock, and upon certain issuances of common stock at or below a specified price relative to the then-current market price of common stock. The Warrant expires ten years from the issuance date. If, on or prior to December 31, 2009, the Company receives aggregate gross cash proceeds of not less than the purchase price of the Preferred Stock from one or more “Qualified Equity Offerings” announced after October 13, 2008, the number of shares of common stock issuable pursuant to the Treasury’s exercise of the Warrant will be reduced by one-half of the original number of shares, taking into account all adjustments, underlying the Warrant. Pursuant to the Purchase Agreement, the Treasury has agreed not to exercise voting power with respect to any shares of common stock issued upon exercise of the Warrant.

Note 10- Investment portfolio

At September 30, 2009 and December 31, 2008, all of our securities were classified as available-for-sale. The following table presents the composition of our investment portfolio at the dates indicated.

Management does not believe that any individual unrealized loss as of September 30, 2009 and December 31, 2008 is other than a temporary impairment. These unrealized losses are primarily attributable to changes in interest rates. The Company has the ability to hold these securities for a time necessary to recover the amortized cost or until maturity when full repayment would be received.

Note 11 – Recent accounting pronouncements

In June 2009, the FASB issued ASU 2009-01 — Topic 105 *Generally Accepted Accounting Principles—amendments based on Statement of Financial Accounting Standards No. 168 — The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles (formerly FASB Statement No. 168)*. Under the ASU The FASB Accounting Standards Codification (Codification) became the source of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. On the effective date of this ASU of September 15, 2009, the Codification superseded all then-existing non-SEC accounting and reporting standards. All other non-grandfathered non-SEC accounting literature not included in the Codification will become non-authoritative. In the FASB’s view, the issuance of this ASU and the Codification will not change GAAP, except for those nonpublic nongovernmental entities that must now apply the American Institute of Certified Public Accountants Technical Inquiry Service Section 5100, “Revenue Recognition,” paragraphs 38-76. The adoption of ASU 2009-01 did not have a material impact on the Company’s consolidated financial statements.

The FASB Accounting Standards Codification (Codification) is the single source of authoritative nongovernmental U.S. generally accepted accounting principles. An Accounting Standards Update (ASU) is not authoritative; it only provides background information about an issue, updates the Codification and provides the basis for conclusions for the Board’s decisions to update the Codification.

On January 12, 2009, the FASB amended Topic 820 Fair Value Measurement and Disclosures of The FASB Accounting Standards Codification (ASC) to reduce complexity and achieve more consistent determinations as to whether other-than-temporary impairments of available for sale or held to maturity debt securities have occurred. The ASU was effective for interim and annual reporting periods ending after December 15, 2008. The adoption of this ASU did not have an impact on the Company’s consolidated financial statements. This ASU was formerly FASB Staff Position EITF 99-20-1, Amendments to the Impairment Guidance of EITF Issue No. 99-20 (FSP).

In April 2009, the FASB issued three amendments to provide additional guidance and disclosures regarding fair value measurements and impairments of securities. These three amendments were effective for interim and annual periods ending after June 15, 2009. The adoption of these amendments did not have a material impact on the Company’s consolidated financial statements. These amendments were formerly:

FSP FAS 157-4, “Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly”, provides guidance for estimating fair value when the volume and level of activity for an asset or liability have significantly decreased. This amendment is included in ASC 820-10-35.

FSP FAS 115-2 and FAS 124-2 Recognition and Presentation of Other-Than-Temporary Impairment provided guidance for impaired debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in financial statements. This amendment is included in ASC 320-10-25.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, required disclosure about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This amendment is included in ASC 825-10-50.

In May 2009, the FASB issued guidance on subsequent events that standardizes accounting for and disclosures of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. As a public entity, the Company is required to evaluate subsequent events through the date its financial statements are issued. Accordingly, the Company has completed an evaluation of subsequent events through November 13, 2009. These rules became effective for the Company during its interim period ending after June 15, 2009, and did not have a material impact on its consolidated financial statements.

In June 2009, the FASB issued standards on accounting for transfers of financial assets, removing the concept of qualifying special-purpose entities as an accounting criteria that had provided an exception to consolidation, and provided additional guidance on requirements for consolidation. This guidance is effective for annual periods ending after November 15, 2009, and is not expected to have a material impact on the Company's consolidated financial statements.

FASB Codification Topic 825: Financial Instruments now requires enhanced disclosures about the fair value of financial instruments in interim reporting periods of publicly traded companies that were previously only required to be disclosed in annual financial statements. The provisions of these amendments were effective for the Company's interim period ending on June 30, 2009. Since the new requirements only enhance disclosure about fair value of financial instruments in interim periods, the adoption of these amendments did not have a material impact on the Company's financial statements.

FASB Codification Topic 320: Investments-Debt and Equity Securities was amended to make the other-than-temporary impairment guidance more operational and to improve the presentation and disclosure of other-than-temporary impairment on debt and equity securities in the financial statements. Existing U.S. GAAP regarding the recognition and measurement of other-than-temporary impairment of equity securities remains unchanged. The amendments were effective for the Company's interim period ending on June 30, 2009, and their adoption did not have a material impact on the Company's financial statements.

FASB Codification Topic 805: Business Combinations was amended to require that assets acquired and liabilities assumed in a business combination that arise from contingencies be recognized at fair value if fair value can be reasonably estimated. If fair value of such an asset or liability cannot be reasonably estimated, the asset or liability would generally be recognized in accordance with FASB Codification Topic 450: Contingencies. Certain guidance on accounting for contingencies in a business combination is no longer provided by U.S. GAAP. Instead, entities are required to develop a systematic and rational basis for subsequently measuring and accounting for assets and liabilities arising from contingencies. The amendments eliminate the requirement to disclose and estimate the range of outcomes of recognized contingencies at the acquisition date. For unrecognized contingencies, entities are required to include only the disclosures specified in FASB Codification Topic 805. Under these amendments, contingent consideration arrangements of an acquiree that are assumed by the acquirer in a business combination should be treated as contingent consideration of the acquirer and should be initially and subsequently measured at fair value in accordance with U.S. GAAP on business combinations. The amendments to FASB Codification Topic 805: Business Combinations are

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

effective for assets or liabilities arising from contingencies the Company acquires in business combinations occurring after January 1, 2009.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Forward-Looking Statements

Certain information contained in this discussion may include “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are generally identified by phrases such as “we expect,” “we believe” or words of similar import. Such forward-looking statements involve known and unknown risks including, but not limited to, the following factors:

- risk inherent in making loans such as repayment risks and fluctuating collateral values;
- economic conditions in the Richmond metropolitan area;
- the ability to continue to attract low cost core deposits to fund asset growth;
- changes in general economic and business conditions;
- interest rate fluctuations;
- changes in laws and regulations applicable to us;
- competition within and from outside the banking industry;
- the ability to successfully manage the Company’s growth or implement its growth strategies if it is unable to identify attractive markets, locations or opportunities to expand in the future;
- maintaining capital levels adequate to support the Company’s growth;
- reliance on the Company’s management team, including its ability to attract and retain key personnel;
- new products and services in the banking industry;
- problems with our technology;
- changing trends in customer profiles and behavior;
- negative developments in the financial services industry and U.S. and global credit markets may adversely impact our results of operations and our stock price; and
- soundness of other financial institutions could adversely affect us.

Although we believe that our expectations with respect to the forward-looking statements are based upon reliable assumptions within the bounds of our knowledge of our business and operations, there can be no assurance that actual results, performance or achievements of the Company will not differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements.

General

The Company was organized under the laws of the Commonwealth of Virginia as a bank holding company whose activities consist of investment in its wholly-owned subsidiary, the Bank. The Bank is engaged in commercial and retail banking. We opened to the public on December 13, 1999. We place special emphasis on serving the financial needs of individuals, small and medium sized businesses, entrepreneurs, and professional concerns.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

The Bank has three subsidiaries: Village Bank Mortgage Company, Village Insurance Agency, Inc., and Village Financial Services Company. Through our combined companies, we offer a wide range of banking and related financial services, including checking, savings, certificates of deposit and other depository services, and commercial, real estate and consumer loans. We are a community-oriented and locally owned and managed financial institution focusing on providing a high level of

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

responsive and personalized services to our customers, delivered in the context of a strong direct relationship with the customer. We conduct our operations from our main office/corporate headquarters location and fourteen branch offices.

Net interest income is our primary source of earnings and represents the difference between interest and fees earned on interest-earning assets and the interest paid on interest-bearing liabilities. The level of net interest income is affected primarily by variations in the volume and mix of those assets and liabilities, as well as changes in interest rates when compared to previous periods of operation. In addition, revenues are generated from fees charged on deposit accounts and gains from sale of mortgage loans to third-party investors.

Our total assets increased to \$620,006,000 at September 30, 2009 from \$572,408,000 at December 31, 2008, an increase of \$47,598,000, or 8.3%. The increase in assets resulted primarily from increases in investment securities of \$21,747,000, federal funds sold of \$11,947,000, other real estate owned of \$8,317,000 and bank owned life insurance of \$4,075,000. The net increase in assets was funded by a \$41,587,000 increase in deposits and the receipt of the capital investment under the government's Capital Purchase Program of \$14,738,000, offset by a decrease in borrowings of \$7,488,000.

The following presents management's discussion and analysis of the financial condition of the Company at September 30, 2009 and December 31, 2008, and results of operations for the Company for the three and nine month periods ended September 30, 2009 and 2008. This discussion should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2008 as filed with the Securities and Exchange Commission as well as the third quarter 2009 financial statements and notes thereto appearing elsewhere in this report.

Results of operations

For the three months ended September 30, 2009, the Company had a loss totaling \$(2,771,000), and a net loss available to common shareholders of \$(2,956,000), or \$(0.70) per fully diluted share, compared to net income of \$219,000, or \$0.08 per fully diluted share, for the same period in 2008. For the nine months ended September 30, 2009, the Company had a loss totaling \$(4,628,000), and a net loss available to common shareholders of \$(4,937,000), or \$(1.17) per share on a fully diluted basis, compared to \$491,000 or \$0.19 per share on a fully diluted basis, for the same period in 2008.

The decline in net earnings during the quarter ended September 30, 2009 compared to the same period in 2008 is primarily a result of:

- an increase in net interest income of \$1,229,000,
- an increase in the provision for loan losses of \$5,485,000,
- an increase in gain on sale of loans of \$1,124,000, and
- an increase in noninterest expenses of \$1,369,000.

The increase in net interest income is primarily attributable to the merger with River City Bank that was effective October 1, 2008. The increase in the provision for loan losses is attributable to deteriorating asset quality and is discussed following under *Asset Quality and Provision for Loan Losses*. The increase in gain on sale of loans is attributable to increased loan production by the mortgage banking subsidiary of the Bank. The mortgage subsidiary closed \$61,795,000 in mortgage loans in the third quarter of 2009 compared to \$28,422,000 in the third quarter of 2008. And the increase in noninterest expenses is primarily attributable to the merger with River City Bank, with the largest increase in salaries and benefits of \$851,000, as well as an increase in the FDIC

insurance assessment of \$156,000.

On October 1, 2008, River City Bank was merged into Village Bank adding approximately \$157.7 million in assets at the time of merger. The financial statements of the Company for the third quarter of 2009 reflect the combined operations of the Company and River City Bank whereas the financial statements for the third quarter of 2008 do not. This merger has had a significant affect on the Company's results of operations. A significant, and in certain instances dominant, component of the changes in the Company's results of operations between the third quarter of 2008 and the third quarter of 2009 is attributable to the merger.

Net interest income and net interest margin

Net interest income is our primary source of earnings and represents the difference between interest and fees earned on interest-earning assets and the interest paid on interest-bearing liabilities. The level of net interest income is affected primarily by variations in the volume and mix of those assets and liabilities, as well as changes in interest rates when compared to previous periods of operation.

Net interest income for the third quarter of \$4,325,000 represents an increase of \$1,229,000, or 40%, compared to the third quarter of 2008, and an increase of \$157,000, or 4%, compared to the second quarter of 2009. The reason for the increase from prior year is primarily a result of the merger with River City Bank. The increase from the second quarter of 2009 to the third quarter of 2009 is a result of a decline in the Company's cost of funds.

Net interest income for the nine months ended September 30, 2009 of \$12,399,000 represents an increase of \$3,329,000 or 27%, compared to the nine months ended September 30, 2008 of \$9,070,000. The reason for the increase is due primarily to the merger with River City Bank.

The Company's net interest margin is not a measurement under accounting principles generally accepted in the United States, but it is a common measure used by the financial services industry to determine how profitably earning assets are funded. Net interest margin is calculated by dividing net interest income by average earning assets. Net interest margin may be affected by interest on nonaccrual loans as any accrued but unpaid interest is deducted from interest income when a loan is placed on nonaccrual status. Conversely, if a nonaccrual loan is returned to performing status, the accrued but unpaid interest is added back to interest income. As our nonaccrual loans have increased, the effect on nonaccrual interest has been more significant (see discussion of nonaccrual loans under *Asset Quality and Provision for Loan Losses*). Management believes presenting our actual net interest margin and our net interest margin adjusted for nonaccrual interest for the indicated periods is meaningful to the reader in understanding operating performance. Our net interest margin over the last several quarters is provided in the following table:

Quarter Ended	Actual	Adjusted for Interest On Non- Accrual Loans
September 30, 2008	3.35%	3.39%
December 31, 2008	3.10%	3.14%
March 31, 2009	3.04%	3.17%
June 30, 2009	3.17%	3.27%

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

September 30, 2009

3.14%

3.32%

In the last quarter of 2008, our net interest margin (adjusted for the effect of interest on nonaccrual

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

loans) declined to 3.14% from 3.39% the prior quarter. Our margin in the fourth quarter of 2008 was negatively impacted by the merger with River City Bank. However, the net interest margin (adjusted for the affect of interest on nonaccrual loans) has increased in all three quarters of 2009 as our cost of funds has decreased in response to the overall decline in interest rates and we have been successful in adding interest rate floors to loans acquired in the merger with River City Bank.

Margin compression from declining interest rates over the last two years has been a significant factor in our decline in profitability over that period. As interest rates were reduced by the Federal Reserve during 2007 and 2008 in reaction to the declining economy, our margin was compressed as our deposits generally do not reprice as quickly as our loans. Because our deposits continue to reprice downward and the yield on interest earning assets appears to be stabilizing, we expect the upward trend in our net interest margin experienced the first three quarters of 2009 will continue. However, given the continued depressed economy and the potential impact on interest income from new nonaccrual loans, no assurance can be provided that this will occur.

Average interest-earning assets for the first nine months of 2009 increased by \$166,485,000, or 46%, compared to the first nine months of 2008. The increase in interest-earning assets was due primarily to the merger with River City Bank. The average yield on interest-earning assets decreased to 6.31% for the first nine months of 2009 compared to 7.44% for the first nine months of 2008. Many of our loans are indexed to short-term rates affected by the Federal Reserve's decisions about short-term interest rates, and, accordingly, as the Federal Reserve increases or decreases short-term rates, the yield on interest-earning assets is affected. As the Federal Reserve decreased interest rates starting in 2007 and into 2008, decreasing short-term interest rates by 5% over twelve months, the average yield on our interest-earning assets decreased. In addition, the yield on loans was negatively affected by the merger with River City Bank as it was generally not the practice of River City Bank's management to place floors on loans. As a result, River City Bank's yield on variable rate loans declined with short-term interest rates.

Our average interest-bearing liabilities increased by \$147,004,000, or 42%, for the first nine months of 2009 compared to the first nine months of 2008. The growth in interest-bearing liabilities was primarily due to the merger with River City Bank. The average cost of interest-bearing liabilities decreased to 3.42% for the first nine months of 2009 from 4.31% for the first nine months of 2008. The principal reason for the decrease in liability costs was the reduction in short-term interest rates by the Federal Reserve. See our discussion of interest rate sensitivity below for more information.

The following tables illustrate average balances of total interest-earning assets and total interest-bearing liabilities for the periods indicated, showing the average distribution of assets, liabilities, shareholders' equity and related income, expense and corresponding weighted-average yields and rates. The average balances used in these tables and other statistical data were calculated using daily average balances. We had no tax exempt assets for the periods presented.

Asset Quality and Provision for Loan Losses

Provisions for loan losses for the three months ended September 30, 2009 was \$6,000,000 compared to \$515,000 for the three months ended September 30, 2008. The provision for loan losses for the nine months ended September 30, 2009 was \$10,200,000 compared to \$1,262,000 for the nine months ended September 30, 2008. The increases in the provision for loan losses in 2009 when compared to 2008 reflects a higher level of problems loans, management's concern about the uncertainty in the economy, and the current nationwide credit crisis. Further, as reflected in the following table, our nonperforming assets significantly increased in the third quarter of 2009 necessitating a large increase in the provision to reflect potential losses in those assets.

Nonperforming assets consisting of nonaccrual loans and other real estate owned for the indicated periods is as follows (dollars in thousands):

	September 30, 2009	June 30, 2009	March 31, 2009	December 31, 2008
Nonaccrual loans				
Number	117	96	49	36
Amount	\$ 21,916	\$ 18,795	\$ 13,369	\$ 8,528
Other real estate owned	11,249	4,626	3,967	2,932
	\$ 33,165	\$ 23,421	\$ 17,336	\$ 11,460
Percentage of total assets	5.35%	3.94%	2.99%	2.00%

The increase in nonperforming assets in the third quarter of 2009 reflects the continued decline in the economy and related stress on our lending relationships. To address the asset quality deterioration, in early 2009 additional resources were allocated to bolster collections, workouts and the disposition of nonperforming assets, and those resources were further augmented by the hiring of a Special Assets Officer in the third quarter. Our approach to troubled lending relationships is to work with the borrower to the extent possible and still adhere to strong credit management guidelines. If the economy continues to be depressed at the levels we have experienced in the latter part of 2008 and into 2009, nonperforming assets could continue to increase. See our discussion of the allowance for loan losses under *Allowance for loan losses* and *Critical accounting policies* below.

In addition to the nonperforming assets at September 30, 2009, there were fifteen loans past due 90 days or more and still accruing interest totaling \$1,661,000, down significantly from forty-three loans totaling \$6,197,000 at December 31, 2008, most of which were placed on nonaccrual status during the period. We believe that these assets are adequately collateralized and are currently recorded at realistically recoverable values. However, economic circumstances related to specific credit relationships are changing, which may impact our assessments of collectability.

Of the nonperforming assets at September 30, 2009, 67% are associated with loans whose purpose was to acquire, development and construct commercial and residential real estate projects ("ADC loans"). ADC loans amounted to \$127,000,000 at September 30, 2009, or 27% of total loans outstanding at that date. That represents a decrease in ADC loans of \$31 million, or 20%, from September 30, 2008.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

The following table reflects details related to asset quality and allowance for loan losses of Village Bank (dollars in thousands):

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

	Sept. 30, 2009	Dec. 31, 2008	Sept. 30, 2008
Loans 90+ days past due	\$ 1,661	\$ 6,197	\$ 2,522

Nonperforming assets to total assets	5.35%	2.00%	1.65%

Noninterest income

Noninterest income increased from \$1,298,000 for the three months ended September 30, 2008 to \$2,394,000 for the three months ended September 30, 2009, an increase of \$1,096,000 or 84%. Noninterest income also increased from \$2,945,000 for the first nine months of 2008 to \$5,877,000 for the first nine months of 2009, an increase of \$2,932,000 or 100%. These increases in noninterest income are primarily a result of higher gain on loan sales and fees from increased loan production by our mortgage banking subsidiary as well as higher service charges and fees from our branch network. The merger with River City Bank in the fourth quarter of 2008 added four branches to our branch network. Our mortgage banking subsidiary has experienced significant increase in loan production as a result of low mortgage interest rates and tax incentives provided by the government.

Noninterest expense

Noninterest expense for the three months ended September 30, 2009 was \$4,917,000 compared to \$3,547,000 for the three months ended September 30, 2008, an increase of \$1,370,000 or 39%. Noninterest expense for the nine months ended September 30, 2009 totaled \$15,088,000, an increase of \$5,080,000, or 51% from \$10,008,000 for the nine months ended September 30, 2008. The increases were primarily a result of the merger with River City Bank. Salaries and benefits increased by \$851,000 or 47% from \$1,867,000 for the three months ended September 30, 2008 to \$2,718,000 for the three months ended September 30, 2009 and increased from \$5,583,000 for the nine months ended September 30, 2008 to \$7,741,000 for the nine months ended September 30, 2009. Occupancy costs increased by \$97,000, from \$399,000 for the three months ended September 30, 2008 to \$466,000 for the three months ended September 30, 2009, and increased from \$822,285 for the nine months ended September 30, 2008 to \$1,319,000 for the nine months ended September 30, 2009.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

In addition to increases in noninterest expense from the merger with River City bank, expenses related to other real estate owned (as a result of foreclosure) as well as a special FDIC insurance premium assessment in the second quarter of 2009 contributed to the increases. Expenses related to other real estate owned increased by \$937,000 from the first nine months of 2008 to the same period in 2009, from \$120,000 in 2008 to \$1,057,000 in 2009. The significant increase in expenses related to other real estate owned primarily consists of write downs of such real estate due to declining values and related costs to carry. In the second quarter of 2009, the FDIC assessed all banks with a special insurance premium assessment. This special assessment was \$266,000 and was a significant portion of the FDIC insurance premium expense increased by \$442,000 when comparing the nine months ended September 30, 2009 to the same period in 2008.

Income taxes

The benefit for income taxes of \$(2,384,000) for the nine months ended September 30, 2009 is based upon the results of operations. Certain items of income and expense are reported in different periods for financial reporting and tax return purposes. The tax effects of these temporary differences are recognized currently in the deferred income tax provision or benefit. Deferred tax assets or liabilities are computed based on the difference between the financial statement and income tax bases of assets and liabilities using the applicable enacted marginal tax rate.

The Company must also evaluate the likelihood that deferred tax assets will be recovered from future taxable income. If any such assets are not likely to be recovered, a valuation allowance must be recognized. We determined that a valuation allowance was not required for deferred tax assets as of September 30, 2009. The assessment of the carrying value of deferred tax assets is based on certain assumptions, changes in which could have a material impact on the Company's financial statements.

Commercial banking organizations conducting business in Virginia are not subject to Virginia income taxes. Instead, they are subject to a franchise tax based on bank capital. The Company recorded a franchise tax expense of \$260,000 and \$130,000 for the nine months ended September 30, 2009 and 2008, respectively.

Loan portfolio

The following table presents the composition of our loan portfolio (excluding mortgage loans held for sale) at the dates indicated.

**Loan Portfolio, Net
(In thousands)**

	September 30, 2009		December 31, 2008

Total loans, net	\$ 462,094		\$ 464,663	

Allowance for loan losses

The allowance for loan losses at September 30, 2009 was \$9,527,000, compared to \$6,059,000 at December 31, 2008. The ratio of the allowance for loan losses to gross portfolio loans (net of unearned income and excluding mortgage loans held for sale) at September 30, 2009 and December 31, 2008 was 2.02% and 1.29%, respectively. The amount of the loan loss provision is determined by an evaluation of the level of loans outstanding, the level of non-performing loans, historical loan loss experience, delinquency trends, underlying collateral values, the amount of actual losses charged to the reserve in a given period and assessment of present and anticipated economic conditions. See our discussion of the allowance for loan losses under *Critical accounting policies* below.

The following table presents an analysis of the changes in the allowance for loan losses for the periods indicated.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

Goodwill

Goodwill, which represents the excess of purchase price over fair value of net assets acquired, is evaluated at least annually for impairment by comparing its fair value with its recorded amount and is written down when appropriate. Projected net operating cash flows are compared to the carrying amount of the goodwill recorded and, if the estimated net operating cash flows are less than the carrying amount, a loss is recognized to reduce the carrying amount to fair value.

Goodwill of \$7,422,000 at September 30, 2009 was made up of \$689,000 related to the Bank's acquisition of Village Bank Mortgage Corporation in 2003, and \$6,733,000 related to the merger with River City Bank in 2008. There was no impairment of goodwill at September 30, 2009.

Deposits

Total deposits increased by \$41,587,000, or 9%, during the first nine months of 2009 as compared to an increase of \$617,000, or 0.2%, during the first nine months of 2008. Lower cost checking, money market and savings accounts increased by \$109,398,000 while higher cost time deposits declined by \$67,811,000. As a result, the cost of our interest bearing deposits declined to 3.03% for the third quarter of 2009 compared to 4.00% for the fourth quarter of 2008.

While the mix of our deposits continues to be weighted toward time deposits, such deposits represent only 61% of total deposits at September 30, 2009 as compared to 81% at December 31, 2008. As our branch network has increased and is more convenient to a larger segment of our targeted customer base, we have experienced a move to a higher percentage of our deposits in checking accounts. We are emphasizing checking account deposit growth at our existing branches.

The average cost of interest-bearing deposits for the first nine months of 2009 was 3.39% compared to 4.39% for the first nine months of 2008. This decrease in our average cost of interest-bearing deposits has mirrored the overall decrease in interest rates resulting from the actions by the Federal Reserve to decrease short-term interest rates. But just as importantly, our effort to increase checking accounts in our branches is working to reduce our cost of interest-bearing deposits. We expect this decrease in our cost of deposits to continue, primarily due to repricing of time deposits.

The variety of deposit accounts that we offer has allowed us to be competitive in obtaining funds and has allowed us to respond with flexibility to, although not to eliminate, the threat of disintermediation (the flow of funds away from depository institutions such as banking institutions into direct investment vehicles such as government and corporate securities). Our ability to attract and retain deposits, and our cost of funds, has been, and is expected to continue to be, significantly affected by money market conditions.

Borrowings

We use borrowings to supplement deposits when they are available at a lower overall cost to us or they can be invested at a positive rate of return.

As a member of the Federal Home Loan Bank of Atlanta (“FHLB”), the Bank is required to own capital stock in the FHLB and is authorized to apply for borrowings from the FHLB. Each FHLB credit program has its own interest rate, which may be fixed or variable, and range of maturities. The FHLB may prescribe the acceptable uses to which the advances may be put, as well as on the size of the advances and repayment provisions. Borrowings from the FHLB were \$29,000,000 and \$25,000,000 at September 30, 2009 and December 31, 2008 respectively. The FHLB advances are secured by the pledge of first mortgage loans, home equity loans and our FHLB stock.

Capital resources

Stockholders' equity at September 30, 2009 was \$56,362,000, compared to \$46,163,000 at December 31, 2008. The \$10,199,000 increase in equity during the first nine months of 2009 was primarily due to the receipt of a \$14,738,000 investment by the United States Department of the Treasury under its Capital Purchase Program (the TARP Program), offset by a net loss of \$(4,937,000).

Federal regulatory agencies are required by law to adopt regulations defining five capital tiers: well capitalized, adequately capitalized, under capitalized, significantly under capitalized, and critically under capitalized. The Bank meets the criteria to be categorized as a "well capitalized" institution as of September 30, 2009.

During the first quarter of 2005 and the third quarter of 2007, the Company issued \$5.2 and \$3.6 million, respectively in Trust Preferred Capital Notes. The Trust Preferred Capital Notes may be included in Tier 1 capital for regulatory capital adequacy determination purposes up to 25% of Tier 1 capital after its inclusion.

The following table presents the composition of regulatory capital and the capital ratios of the Company at the dates indicated.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

Analysis of Capital
(In thousands)

	September 30, 2009	December 31, 2008
Tier 1 capital		
Preferred stock	\$ 59	\$ -
Warrant surplus	732	-
Common stock	16,923	16,917
Additional paid-in capital	40,534	25,737
Retained earnings	(1,542)	3,454
Accumulated other comprehensive income	329	54
Total equity	57,035	46,162
Less: Net unrealized gains (losses) on available for sale securities	(72)	54
Qualifying restricted core capital elements	8,500	8,500
Less: goodwill	(7,422)	(7,422)
Total Tier 1 capital	58,185	47,186
Tier 2 capital		
Allowance for loan losses includible in Tier 2 (1)	6,231	6,059
Total Tier 2 capital	6,231	6,059
Total risk-based capital	64,416	53,245

Company's gross risk weighted assets

Liquidity

Liquidity provides us with the ability to meet normal deposit withdrawals, while also providing for the credit needs of customers. We are committed to maintaining liquidity at a level sufficient to protect depositors, provide for reasonable growth, and fully comply with all regulatory requirements.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

At September 30, 2009, cash, cash equivalents and investment securities available for sale totaled \$84,900,000, or 13.7% of total assets, which we believe is adequate to meet short-term liquidity needs.

At September 30, 2009, we had commitments to originate \$83,350,000 of loans as compared to \$115,648,000 at December 31, 2008. The decrease is primarily attributable to commitments to make mortgage loans by our mortgage company which will be sold in the secondary market. Fixed commitments to incur capital expenditures were less than \$25,000 at September 30, 2009. Time

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

deposits scheduled to mature in the 12-month period ending September 30, 2010 totaled \$238,994,000 at September 30, 2009. Based on past experience, we believe that a significant portion of such deposits will remain with us. We further believe that loan repayments and other sources of funds such as deposit growth will be adequate to meet our foreseeable short-term and long-term liquidity needs.

On May 1, 2009, the Company received a \$14,738,000 investment by the United States Department of the Treasury under its Capital Purchase Program (the TARP Program). The TARP Program is a voluntary program designed to provide capital for healthy banks to improve the flow of funds from banks to their customers. Under the TARP Program, the Company issued to the Treasury \$14,738,000 of preferred stock and warrants to purchase 499,030 shares of the Company's common stock at a purchase price of \$4.43 per share. The preferred stock issued by the Company under the TARP Capital Purchase Program carries a 5% dividend for each of the first 5 years of the investment, and 9% thereafter, unless the shares are redeemed by the Company.

Interest rate sensitivity

An important element of asset/liability management is the monitoring of our sensitivity to interest rate movements. In order to measure the effects of interest rates on our net interest income, management takes into consideration the expected cash flows from the securities and loan portfolios and the expected magnitude of the repricing of specific asset and liability categories. We evaluate interest sensitivity risk and then formulate guidelines to manage this risk based on management's outlook regarding the economy, forecasted interest rate movements and other business factors. Our goal is to maximize and stabilize the net interest margin by limiting exposure to interest rate changes.

Contractual principal repayments of loans do not necessarily reflect the actual term of our loan portfolio. The average lives of mortgage loans are substantially less than their contractual terms because of loan prepayments and because of enforcement of due-on-sale clauses, which gives us the right to declare a loan immediately due and payable in the event, among other things, the borrower sells the real property subject to the mortgage and the loan is not repaid. In addition, certain borrowers increase their equity in the security property by making payments in excess of those required under the terms of the mortgage.

The sale of fixed rate loans is intended to protect us from precipitous changes in the general level of interest rates. The valuation of adjustable rate mortgage loans is not as directly dependent on the level of interest rates as is the value of fixed rate loans. As with other investments, we regularly monitor the appropriateness of the level of adjustable rate mortgage loans in our portfolio and may decide from time to time to sell such loans and reinvest the proceeds in other adjustable rate investments.

The data in the following table reflects repricing or expected maturities of various assets and liabilities at September 30, 2009. The gap analysis represents the difference between interest-sensitive assets and liabilities in a specific time interval. Interest sensitivity gap analysis presents a position that existed at one particular point in time, and assumes that assets and liabilities with similar repricing characteristics will reprice at the same time and to the same degree.

Ratio of cumulative gap to cumulative rate sensitive assets	(15.1)%	(35.6)%	(46.2)%	(68.6)%	5.2%	

(1) Includes nonaccrual loans of approximately \$21,916,000, which are spread throughout the categories.

(2) Management believes that interest checking and savings accounts are generally not sensitive to changes in interest

rates and therefore has placed such deposits in the "13 to 36 months" category.

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

At September 30, 2009, our liabilities that reprice within one year exceeded assets that reprice within one year by \$110,193,000 and therefore we were in a liability-sensitive position. A negative gap can adversely affect earnings in periods of increasing interest rates. This negative position is due primarily to the short maturity of certificates of deposit and the significant increase in money market accounts.

Critical accounting policies

The financial condition and results of operations presented in the financial statements, accompanying notes to the financial statements and management's discussion and analysis are, to a large degree, dependent upon our accounting policies. The selection and application of these accounting policies involve judgments, estimates, and uncertainties that are susceptible to change.

Presented below is a discussion of those accounting policies that management believes are the most important accounting policies to the portrayal and understanding of our financial condition and results of operations. These critical accounting policies require management's most difficult, subjective and complex judgments about matters that are inherently uncertain. In the event that different assumptions or conditions were to prevail, and depending upon the severity of such changes, the possibility of materially different financial condition or results of operations is a reasonable likelihood. See also Note 1 of the *Notes to Consolidated Financial Statements* filed with the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Allowance for loan losses

We monitor and maintain an allowance for loan losses to absorb an estimate of probable losses inherent in the loan portfolio. We maintain policies and procedures that address the systems of controls over the following areas of maintenance of the allowance: the systematic methodology used to determine the appropriate level of the allowance to provide assurance they are maintained in accordance with accounting principles generally accepted in the United States of America; the accounting policies for loan charge-offs and recoveries; the assessment and measurement of impairment in the loan portfolio; and the loan grading system.

The allowance reflects management's best estimate of probable losses within the existing loan portfolio and of the risk inherent in various components of the loan portfolio, including loans identified as impaired as required by FASB Codification Topic 310: *Receivables*. Loans evaluated individually for impairment include non-performing loans, such as loans on non-accrual, loans past due by 90 days or more, restructured loans and other loans selected by management. The evaluations are based upon discounted expected cash flows or collateral valuations. If the evaluation shows that a loan is individually impaired, then a specific reserve is established for the amount of impairment.

Loans are grouped by similar characteristics, including the type of loan, the assigned loan classification and the general collateral type. A loss rate reflecting the expected loss inherent in a group of loans is derived based upon estimates of default rates for a given loan grade, the predominant collateral type for the group and the terms of the loan. The resulting estimate of losses for groups of loans is adjusted for relevant environmental factors and other conditions of the portfolio of loans and leases, including: borrower and industry concentrations; levels and trends in delinquencies, charge-offs and recoveries; changes in underwriting standards and risk selection; level of experience, ability and depth of lending management; and national and local economic conditions.

The amounts of estimated impairment for individually evaluated loans and groups of loans are added together for a total estimate of loan losses. This estimate of losses is compared to our allowance for loan losses as of the evaluation date and, if the estimate of losses is greater than the allowance, an additional provision to the allowance would be made. If the estimate of losses is less than the allowance, the degree to which the allowance exceeds the estimate is evaluated to determine whether the allowance falls outside a range of estimates. If the estimate of losses is below the range of reasonable estimates, the allowance would be reduced by way of a credit to the

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

provision for loan losses. We recognize the inherent imprecision in estimates of losses due to various uncertainties and variability related to the factors used, and therefore a reasonable range around the estimate of losses is derived and used to ascertain whether the allowance is too high. If different assumptions or conditions were to prevail and it is determined that the allowance is not adequate to absorb the new estimate of probable losses, an additional provision for loan losses would be made, which amount may be material to the financial statements.

Goodwill

The Company has adopted Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142") codified within ASC 350. Accordingly, goodwill is no longer subject to amortization over its estimated useful life, but is subject to at least an annual assessment for impairment by applying a fair value based test. Additionally, under SFAS 142, acquired intangible assets (such as core deposit intangibles) are separately recognized if the benefit of the asset can be sold, transferred, licensed, rented, or exchanged, and amortized over their useful life. Branch acquisition transactions were outside the scope of SFAS 142 and, accordingly, intangible assets related to such transactions continued to amortize upon the adoption of SFAS 142. The cost of purchased deposit relationships and other intangible assets, based on independent valuation, are being amortized over their estimated lives not to exceed eight years. Amortization expense charged to operations was \$73,000 for the nine months ended September 30, 2009.

Income Taxes

Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws. Deferred taxes are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Impact of inflation and changing prices and seasonality

The financial statements in this document have been prepared in accordance with generally accepted accounting principles which require the measurement of financial position and operating results in terms of historical dollars, without consideration of changes in the relative purchasing power of money over time due to inflation.

Unlike industrial companies, most of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution's performance than the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or in the same magnitude as the price of goods and services, since such prices are affected by inflation.

ITEM 3 – QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not Applicable.

ITEM 4 – CONTROLS AND PROCEDURES

Based upon an evaluation as of September 30, 2009 under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer of the effectiveness of the design and operation of the Company's disclosure controls and procedures, they have concluded that our disclosure controls and procedures, as defined in Rule 13a-15 and Rule 15d-15 under the Securities Exchange Act of 1934, as amended, are effective in ensuring that all material information required to be disclosed in reports that it files or submits under such Act is recorded, processed, summarized and is made known to management in a timely fashion.

Our management is also responsible for establishing and maintaining adequate internal control over financial reporting. There were no changes in our internal control over financial reporting identified in connection with the evaluation of it that occurred during the Company's last fiscal quarter that materially affected, or are reasonably likely to materially affect, internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1 – LEGAL PROCEEDINGS

Not applicable.

ITEM 1A – Risk Factors

There have been no material changes to the risk factors disclosed in Item 1A. “Risk Factors” of our Annual Report on Form 10-K for the year ended December 31, 2008. The materialization of any risks and uncertainties identified in our Forward Looking Statements contained in the Quarterly Report together with those previously disclosed in the Form 10-K or those that are presently unforeseen could result in significant adverse effects on our financial condition, results of operations and cash flows. See Item 2. “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Forward Looking Statements” in this Quarterly Report on Form 10-Q.

ITEM 2 – UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3 – DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4 – SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable

ITEM 5 – OTHER INFORMATION

Not applicable.
