**Cumberland Shares Listed on the American Stock Exchange**

**CUMBERLAND RESOURCES LTD. (CBD:TSX)** is pleased to announce that it has received approval for the listing of its common shares on the American Stock Exchange® (Amex®). Cumberland expects to commence trading on Amex on Tuesday, February 3, 2004 under the symbol CLG. Cumberland will continue to trade on the Toronto Stock Exchange (TSX) but will trade under the new stock symbol CLG instead of its previous stock symbol CBD.

We are very excited about the exposure the Amex offers to the Company and its shareholders, and we believe it is a tremendous opportunity to increase share liquidity and broaden our base of investors, remarked Kerry Curtis, President and Chief Executive Officer. We also see the move to Amex as yet another milestone, as Cumberland evolves from a successful exploration company to a mid-tier gold producer.

Cumberland is focused on the development of its 100% owned Meadowbank Gold Project, located in Nunavut, Canada.

Meadowbank is ranked as the third largest undeveloped gold resource in Canada. The Company is well financed and is currently evaluating the feasibility of a 10 year open pit mine plan at a forecast production rate of approximately 250,000 ounces of gold per year.

**Meadowbank Project Resources Q1/2004\***

<b>Resource Category</b>	<b>Tonnes</b>	<b>Grade (g/t)</b>	<b>Ounces Gold</b>
Measured and Indicated	21,685,100	4.30	2,998,000
Inferred	5,699,700	4.30	788,000

Cumberland is a mineral exploration and development company which holds interests in two undeveloped gold properties in Canada: Meadowbank (100%) and Meliadine West (22% carried to production).

**CUMBERLAND RESOURCES LTD.**

\* Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not account for mineability, selectivity, mining loss and dilution. These mineral resource estimates include inferred mineral resources that are normally considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is also no certainty that these inferred resources will be converted to measured and indicated categories through further drilling, or into mineral reserves once economic considerations are applied. The standards employed by AMEC in estimating the mineral resources differ significantly from the requirements of the United States Securities and Exchange Commission and the resource information reported by United States companies. The term resources does not equate to reserve and normally may not be included in documents filed with the Securities and Exchange Commission.

Resources are sometimes referred to as mineralization or mineral deposits .

Resource estimates were prepared in conformance with the requirements set out in National Instrument 43-101 by AMEC independent qualified persons as defined by NI 43-101. All resource estimates (except for the PDF deposit which is not included in the current feasibility study) have been prepared by AMEC independent qualified persons as defined by NI 43-101 under the direction of Steve Blower, P.Geol.
