Notes to Consolidated Financial Statements (Unaudited)

(1) Basis of Presentation

The accompanying unaudited consolidated financial statements of Pathfinder Bancorp, Inc. (the “Company”) and its wholly owned subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information, the instructions for Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all of the information and footnotes necessary for a complete presentation of consolidated financial condition, results of operations and cash flows in conformity with generally accepted accounting principles. In the opinion of management, all adjustments, consisting of normal recurring accruals considered necessary for a fair presentation, have been included. Certain amounts in the 2013 consolidated financial statements may have been reclassified to conform to the current period presentation. These reclassifications had no effect on net income or comprehensive income as previously reported.

Although the Company owns, through its subsidiary Pathfinder Risk Management Company, Inc., 51% of the membership interest in Fitzgibbons Agency, LLC (“Agency”), the Company is required to consolidate 100% of the Agency within the consolidated financial statements. The 49% of which the Company does not own is accounted for separately as noncontrolling interests within the consolidated financial statements.

On June 11, 2014, Pathfinder Bancorp, Inc. (“Pathfinder-Federal”), the holding company of Pathfinder Bank (the “Bank”), announced that Pathfinder Bancorp, Inc., a Maryland corporation and the proposed new holding company of the Bank (“New Pathfinder”), filed a registration statement on June 11, 2014, with the Securities and Exchange Commission in connection with the previously announced mutual-to-stock conversion of Pathfinder Bancorp, MHC.

In connection with the conversion, New Pathfinder expects to offer for sale between 1,700,000 and 2,645,000 shares of common stock at a purchase price of \$10.00 per share in the offering. The shares to be offered for sale represent the 60.8% of the outstanding shares of common stock of Pathfinder-Federal currently owned by Pathfinder Bancorp, MHC, as adjusted for the assets of Pathfinder Bancorp, MHC. In addition, at the conclusion of the conversion, the existing shares of common stock held by the public stockholders of Pathfinder-Federal will be exchanged for new shares of common stock of New Pathfinder at an exchange ratio estimated to be between 1.0552 and 1.6417.

For further information, see the press release filed on form 8-K dated June 11, 2014.

The following material under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations" is written with the presumption that the users of the interim financial statements have read, or have access to, the Company's latest audited financial statements and notes thereto, together with Management's Discussion and Analysis of Financial Condition and Results of Operations as of December 31, 2013 and 2012 and for the two years then ended. Therefore, only material changes in financial condition and results of operations are discussed in the remainder of Part I.

Operating results for the three and six months ended June 30, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014.

(2) New Accounting Pronouncements

On May 28, 2014, the FASB and IASB issued their final standard on revenue from contracts with customers. The standard, issued as ASU 2014-09 – Revenue from Contracts with Customers by the FASB and as IFRS 152 by the IASB, outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes most current revenue recognition guidance, including industry specific guidance. The new

requirements are the default guidance for any contracts (or parts of a contract) with customers that are not within the scope of other literature (e.g., guidance on leases or financial instruments). As a result, entities that have entered into contracts with customers may need to analyze those contracts or parts thereof in accordance with the ASU. For contracts within the scope of the new standard, management will be required to apply the new guidance in the ASU. An entity will need to carefully assess the ASU's impact on all types of variable consideration and performance-based fees in particular, especially when such fees are based on future market performance. To meet the new accounting and disclosure requirements, an entity may have to gather information from contracts with customers that currently is not readily available. For public entities, the ASU is effective for annual reporting periods (including interim reporting periods within those periods) beginning after December 15, 2016. Early application is not permitted. The Company does not expect a material impact on its consolidated statements of condition, results of operations, or cash flows.

Table of Contents

In June 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-12 – Stock Compensation (Topic 718) Accounting for Share Based Payments when the terms of an award provide that a performance target could be achieved after the requisite service period. Entities commonly issue share-based payment awards that require a specific performance target to be achieved in order for employees to become eligible to vest in the awards. Examples of performance targets include an entity attaining a specified profitability metric or selling shares in an initial public offering. Generally, an award with a performance target also requires an employee to render service until the performance target is achieved. In some cases, however, the terms of an award may provide that the performance target could be achieved after an employee completes the requisite service period. That is, the employee would be eligible to vest in the award regardless of whether the employee is rendering service on the date the performance target is achieved. This ASU is intended to resolve the diverse accounting treatment of those awards in practice. The amendments in this ASU are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015, with earlier adoption permitted. The Company does not expect a material impact on its consolidated statements of condition, results of operations, or cash flows.

## (3) Earnings per Common Share

Basic earnings per share are calculated by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Net income available to common shareholders is net income less the total of preferred dividends declared. Diluted earnings per share include the potential dilutive effect that could occur upon the assumed exercise of issued stock options that are not anti-dilutive using the treasury stock method. Anti-dilutive stock options, not included in the computation below, were 10,000 in the three and six month periods ended June 30, 2014 and - and 53,000 in the three and six month periods ended June 30, 2013, respectively. Unallocated common shares held by the ESOP are not included in the weighted-average number of common shares outstanding for purposes of calculating earnings per common share until they are committed to be released to plan participants.

The following table sets forth the calculation of basic and diluted earnings per share:

(In thousands, except per share data)	Three months ended		Six months ended	
	June 30,		June 30,	
	2014	2013	2014	2013
<b>Basic Earnings Per Common Share</b>				
Net income available to common shareholders	\$646	\$823	\$1,135	\$1,328
Weighted average common shares outstanding	2,533	2,515	2,532	2,514
Basic earnings per common share	\$0.26	\$0.33	\$0.45	\$0.53
<b>Diluted Earnings Per Common Share</b>				
Net income available to common shareholders	\$646	\$823	\$1,135	\$1,328
Weighted average common shares outstanding	2,533	2,515	2,532	2,514
Effect of assumed exercise of stock options	26	16	24	8
Diluted weighted average common shares outstanding	2,559	2,531	2,556	2,522
Diluted earnings per common share	\$0.25	\$0.33	\$0.44	\$0.53

The Company conducts a formal review of investment securities on a quarterly basis for the presence of other-than-temporary impairment ("OTTI"). The Company assesses whether OTTI is present when the fair value of a debt security is less than its amortized cost basis at the statement of condition date. Under these circumstances, OTTI is considered to have occurred (1) if we intend to sell the security; (2) if it is "more likely than not" we will be required to sell the security before recovery of its amortized cost basis; or (3) the present value of expected cash flows is not anticipated to be sufficient to recover the entire amortized cost basis. The guidance requires that credit-related OTTI is recognized in earnings while non-credit-related OTTI on securities not expected to be sold is recognized in other comprehensive income ("OCI"). Non-credit-related OTTI is based on other factors, including illiquidity and changes in the general interest rate environment. Presentation of OTTI is made in the consolidated statement of income on a gross basis, including both the portion recognized in earnings as well as the portion recorded in OCI. The gross OTTI

would then be offset by the amount of non-credit-related OTTI, showing the net as the impact on earnings.

Management does not believe any individual unrealized loss in other securities within the portfolio as of June 30, 2014 represents OTTI. All securities are rated A3 or better by Moody's, with the exception of two Corporate securities and all have been in unrealized loss positions for seven months or less, with the exception of the two previously mentioned Corporate holdings, eleven US agency securities, one municipal security, seven mortgage-backed securities and five collateralized mortgage obligations. The agency and municipal securities have relatively insignificant unrealized loss positions. The unrealized losses reflected in the mortgage-backed security holdings and collateralized mortgage obligations are primarily attributable to changes in interest rates. The two corporate securities are floating rate notes which adjust quarterly based on 3-month Libor. The securities are reflecting unrealized losses due to current similar offerings being originated at higher spread to Libor, as the market currently demands a greater pricing premium for the associated risk. The Company does not intend to sell these securities, nor is it more likely than not that the Company will be required to sell these securities prior to the recovery of the amortized cost.

In determining whether OTTI has occurred for equity securities, the Company considers the applicable factors described above and the length of time the equity security's fair value has been below the carrying amount. Management has determined that we have the intent and ability to retain the equity securities for a sufficient period of time to allow for recovery. All of the Company's equity securities had a fair value greater than the book value at June 30, 2014.

Table of Contents

Gross realized gains (losses) on sales of securities for the indicated periods are detailed below:

(In thousands)	For the three months ended June 30,		For the six months ended June 30,	
	2014	2013	2014	2013
Realized gains	\$24	\$65	\$26	\$104
Realized losses	-	(5)	-	(5)
	\$24	\$60	\$26	\$99

As of June 30, 2014 and December 31, 2013, securities with a fair value of \$79.0 million and \$58.6 million, respectively, were pledged to collateralize certain municipal deposit relationships. As of the same dates, securities with a fair value of \$20.7 million and \$21.6 million were pledged against certain borrowing arrangements.

Management has reviewed its loan and mortgage-backed securities portfolios and determined that, to the best of its knowledge, little or no exposure exists to sub-prime or other high-risk residential mortgages. The Company is not in the practice of investing in, or originating, these types of investments or loans.

**(5) Pension and Postretirement Benefits**

The Company had a non-contributory defined benefit pension plan that covered substantially all employees. On May 14, 2012, the Company informed its employees of its decision to freeze participation and benefit accruals under the plan, primarily to reduce some of the volatility in earnings that can accompany the maintenance of a defined benefit plan. The freeze became effective June 30, 2012. Compensation earned by employees up to June 30, 2012 is used for purposes of calculating benefits under the plan but there will be no future benefit accruals after this date. Participants as of June 30, 2012, who continue to be employed by Pathfinder Bank, a wholly owned subsidiary of the Company, continue to earn vesting credit with respect to their frozen accrued benefits.

Prior to being frozen, the plan provided defined benefits based on years of service and final average salary. Although the plan was frozen, the Company maintains the responsibility for funding the plan, and its funding practice is to contribute at least the minimum amount annually to meet minimum funding requirements. The funded status of the plan has and will continue to be affected by market conditions. The Company expects to continue to fund this plan on an as needed basis and does not foresee any issues or conditions that could negatively impact the payment of benefit obligations to plan participants. In addition, the Company provides certain health and life insurance benefits for eligible retired employees. The healthcare plan is contributory with participants' contributions adjusted annually; the life insurance plan is noncontributory. Employees with less than 14 years of service as of January 1, 1995, are not eligible for the health and life insurance retirement benefits.

The composition of net periodic pension plan and postretirement plan costs for the indicated periods is as follows:

(In thousands)	Pension Benefits		Postretirement Benefits		Pension Benefits		Postretirement Benefits	
	For the three months ended June 30,		For the six months ended June 30,		For the three months ended June 30,		For the six months ended June 30,

Municipal	3,122	5,122
Total commercial loans	162,304	147,777
Consumer loans:		
Home equity and junior liens	21,554	21,110
Other consumer	4,144	4,166
Total consumer loans	25,698	25,276
Total loans	358,541	341,333
Net deferred loan costs	235	300
Less allowance for loan losses	(5,166 )	(5,041 )
Loans receivable, net	\$353,610	\$336,592

The Company originates residential mortgage, commercial, and consumer loans largely to customers throughout Oswego and Onondaga counties. Although the Company has a diversified loan portfolio, a substantial portion of its borrowers' abilities to honor their loan contracts is dependent upon the counties' employment and economic conditions.

As of June 30, 2014 and December 31, 2013, residential mortgage loans with a carrying value of \$117.7 million and \$114.8 million, respectively, have been pledged by the Company to the Federal Home Loan Bank of New York ("FHLBNY") under a blanket collateral agreement to secure the Company's line of credit and term borrowings.

#### Loan Origination / Risk Management

The Company's lending policies and procedures are presented in Note 5 to the consolidated financial statements included in the 2013 Annual Report filed on Form 10-K on March 17, 2014 as amended March 25, 2014, and have not changed.

To develop and document a systematic methodology for determining the allowance for loan losses, the Company has divided the loan portfolio into three portfolio segments, each with different risk characteristics but with similar methodologies for assessing risk. Each portfolio segment is broken down into loan classes where appropriate. Loan classes contain unique measurement attributes, risk characteristics, and methods for monitoring and assessing risk that are necessary to develop the allowance for loan losses. Unique characteristics such as borrower type, loan type, collateral type, and risk characteristics define each class.

Table of Contents

The following table illustrates the portfolio segments and classes for the Company's loan portfolio:

Portfolio Segment	Class
Residential Mortgage Loans	1-4 family first-lien residential mortgages Construction
Commercial Loans	Real estate Lines of credit Other commercial and industrial Municipal
Consumer Loans	Home equity and junior liens Other consumer

The following tables present the classes of the loan portfolio, not including net deferred loan costs, summarized by the aggregate pass rating and the classified ratings of special mention, substandard and doubtful within the Company's internal risk rating system as of the dates indicated:

(In thousands)	As of June 30, 2014				Total
	Pass	Special Mention	Substandard	Doubtful

Total loans	\$324,986	\$4,112	\$ 11,970	\$265	\$341,333

Management has reviewed its loan portfolio and determined that, to the best of its knowledge, no exposure exists to sub-prime or other high-risk residential mortgages. The Company is not in the practice of originating these types of loans.

Table of Contents

## Nonaccrual and Past Due Loans

Loans are placed on nonaccrual when the contractual payment of principal and interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan may be currently performing.

Loans are considered past due if the required principal and interest payments have not been received within thirty days of the payment due date.

An age analysis of past due loans, segregated by portfolio segment and class of loans, as of June 30, 2014 and December 31, 2013, are detailed in the following tables:

(In thousands)	As of June 30, 2014

Table of Contents

Nonaccrual loans, segregated by class of loan, were as follows:

(In thousands)	June 30, 2014	December 31, 2013
Residential mortgage loans:		
1-4 family first-lien residential mortgages	\$2,475	\$2,194
	2,475	2,194
Commercial loans:		
Real estate	2,810	1,934
Lines of credit	468	381
Other commercial and industrial	380	394
	3,658	2,709
Consumer loans:		
Home equity and junior liens	306	402
Other consumer	10	45
	316	447
Total nonaccrual loans	\$6,449	\$5,350

There were no loans past due ninety days or more and still accruing interest at June 30, 2014 or December 31, 2013.

The Company is required to disclose certain activities related to Troubled Debt Restructurings (“TDRs”) in accordance with accounting guidance. Certain loans have been modified in a TDR where economic concessions have been granted to a borrower who is experiencing, or expected to experience, financial difficulties. These economic concessions could include a reduction in the loan interest rate, extension of payment terms, reduction of principal amortization, or other actions that it would not otherwise consider for a new loan with similar risk characteristics.

The Company is required to disclose new TDRs for each reporting period for which an income statement is being presented. The Company has determined that there were no new TDRs for the three and six month periods ended June 30, 2014 and June 30, 2013.

Accordingly, the Company has determined that there were no payment defaults as there were no new TDRs that occurred within the prior twelve months.

When the Company modifies a loan within a portfolio segment, a potential impairment is analyzed either based on the present value of the expected future cash flows discounted at the interest rate of the original loan terms or the fair value of the collateral less costs to sell. If it is determined that the value of the loan is less than its recorded investment, then impairment is recognized as a component of the provision for loan losses, an associated increase to the allowance for loan losses or as a charge-off to the allowance for loan losses in the current period.

At June 30, 2014, the Company valued seven performing TDR loans, classified as impaired, across five relationships totaling \$1.9 million based on the present values of the expected future cash flows discounted at the pre-modification interest rate (also known as the effective interest rate), resulting in an aggregate specific reserve of \$48,000. These loans were formerly valued at the fair value less costs to sell at March 31, 2014, at which time they were also performing. Had the loans continued to be evaluated at their fair value less costs to sell at June 30, 2014, their aggregate specific reserve would have been \$221,000. As a result of the Company’s change in the evaluation process for these seven performing TDRs, the aggregate specific reserve was reduced by this difference of \$173,000. This change better reflects the value of these performing TDRs as the receipt of contractual principal and interest payments is no longer in doubt at June 30, 2014.

The Company also classified three nonperforming loans with an aggregate balance of \$450,000 within one relationship as impaired at June 30, 2014. As all three loans were nonperforming, they are categorized as collateral dependent and therefore valued at the fair value less costs to sell, resulting in a total specific reserve of \$264,000.

Table of Contents

## Impaired Loans

The following tables summarize impaired loan information by portfolio class at the indicated dates:

(In thousands)	June 30, 2014			December 31, 2013

## (7) Allowance for Loan Losses

Summarized in the tables below are changes in the allowance for loan losses for the indicated periods and information pertaining to the allocation of the allowance for loan losses, balances of the allowance for loan losses, loans receivable based on individual, and collective impairment evaluation by loan portfolio class. An allocation of a portion of the allowance to a given portfolio class does not limit the Company's ability to absorb losses in another portfolio class.

## (8) Guarantees

The Company does not issue any guarantees that would require liability recognition or disclosure, other than its standby letters of credit. Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Generally, all letters of credit when issued have expiration dates within one year of issuance. The credit risk involved in issuing letters of credit is essentially the same as those that are involved in extending loan facilities to customers. The Company generally holds collateral and/or personal guarantees supporting these commitments. The Company had \$4.8 million of standby letters of credit outstanding as of June 30, 2014. Management believes that the proceeds obtained through a liquidation of collateral and the enforcement of guarantees would be sufficient to cover the potential amount of future payments required under the corresponding guarantees. The fair value of standby letters of credit was not significant to the Company's consolidated financial statements.

## (9) Fair Value Measurements

Accounting guidance related to fair value measurements and disclosures specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. These two types of inputs have created the following fair value hierarchy:

Level 1 – Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2 – Quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 – Model-derived valuations in which one or more significant inputs or significant value drivers are unobservable.

An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

Table of Contents

In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs, minimize the use of unobservable inputs, to the extent possible, and considers counterparty credit risk in its assessment of fair value.

The Company used the following methods and significant assumptions to estimate fair value:

**Investment securities:** The fair values of securities available-for-sale are obtained from an independent third party and are based on quoted prices on nationally recognized securities exchanges where available (Level 1). If quoted prices are not available, fair values are measured by utilizing matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2). Management made no adjustment to the fair value quotes that were received from the independent third party pricing service.

**Interest rate swap derivative:** The fair value of the interest rate swap derivative is calculated based on a discounted cash flow model. All future floating cash flows are projected and both floating and fixed cash flows are discounted to the valuation date. The curve utilized for discounting and projecting is built by obtaining publicly available third party market quotes for various swap maturity terms.

**Impaired loans:** Impaired loans are those loans in which the Company has measured impairment based on the fair value of the loan's collateral or the discounted value of expected future cash flows. Fair value is generally determined based upon market value evaluations by third parties of the properties and/or estimates by management of working capital collateral or discounted cash flows based upon expected proceeds. These appraisals may include up to three approaches to value: the sales comparison approach, the income approach (for income-producing property), and the cost approach. Management modifies the appraised values, if needed, to take into account recent developments in the market or other factors, such as, changes in absorption rates or market conditions from the time of valuation and anticipated sales values considering management's plans for disposition. Such modifications to the appraised values could result in lower valuations of such collateral. Estimated costs to sell are based on current amounts of disposal costs for similar assets. These measurements are classified as Level 3 within the valuation hierarchy. Impaired loans are subject to nonrecurring fair value adjustment upon initial recognition or subsequent impairment. A portion of the allowance for loan losses is allocated to impaired loans if the value of such loans is deemed to be less than the unpaid balance.

**Foreclosed real estate:** Fair values for foreclosed real estate are initially recorded based on market value evaluations by third parties, less costs to sell ("initial cost basis"). Any write-downs required when the related loan receivable is exchanged for the underlying real estate collateral at the time of transfer to foreclosed real estate are charged to the allowance for loan losses. Values are derived from appraisals, similar to impaired loans, of underlying collateral or discounted cash flow analysis. Subsequent to foreclosure, valuations are updated periodically and assets are marked to current fair value, not to exceed the initial cost basis. In the determination of fair value subsequent to foreclosure, management also considers other factors or recent developments, such as, changes in absorption rates and market conditions from the time of valuation and anticipated sales values considering management's plans for disposition. Either change could result in adjustment to lower the property value estimates indicated in the appraisals. These measurements are classified as Level 3 within the fair value hierarchy.

Edgar Filing: PATHFINDER BANCORP INC - Form 10-Q

Table of Contents

Pathfinder Bank had the following assets measured at fair value on a nonrecurring basis as of June 30, 2014 and December 31, 2013:

(In thousands)	June 30, 2014			Total Fair Value
	Level 1	Level 2	Level 3	
Impaired loans	\$-	\$-	\$1,067	\$1,067
Foreclosed real estate	\$-	\$-	\$264	\$264

(In thousands)	December 31, 2013			Total Fair Value
	Level 1	Level 2	Level 3	
Impaired loans	\$-	\$-	\$258	\$258
Foreclosed real estate	\$-	\$-	\$69	\$69

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which Level 3 inputs were used to determine fair value at the indicated dates.

Quantitative Information about Level 3 Fair Value Measurements

	Valuation Techniques	Unobservable Input	Range (Weighted Avg.)
At June 30, 2014 (Unaudited)			
Impaired loans	Appraisal of collateral (Sales Approach) (Discounted Cash Flow)	Appraisal Adjustments Costs to Sell	5% - 30% (14%) 4% - 50% (10%)
Foreclosed real estate	Appraisal of collateral (Sales Approach)	Appraisal Adjustments Costs to Sell	15% - 15% (15%) 6% - 8% (7%)

Quantitative Information about Level 3 Fair Value Measurements

	Valuation Techniques	Unobservable Input	Range (Weighted Avg.)
At December 31, 2013			
Impaired loans	Appraisal of collateral (Sales Approach)	Appraisal Adjustments Costs to Sell	5% - 30% (14%) 6% - 50% (12%)
Foreclosed real estate	Appraisal of collateral	Appraisal Adjustments	(15%)

		15% -
		15%
(Sales Approach)	Costs to Sell	6% - 7% (6%)

There have been no transfers of assets into or out of any fair value measurement level during the quarter ended June 30, 2014. Required disclosures include fair value information of financial instruments, whether or not recognized in the consolidated statement of condition, for which it is practicable to estimate that value. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instrument.

Table of Contents

The Company has various processes and controls in place to ensure that fair value is reasonably estimated. The Company performs due diligence procedures over third-party pricing service providers in order to support their use in the valuation process.

While the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective period-ends, and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each period-end.

The following information should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only provided for a limited portion of the Company's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful. The Company, in estimating its fair value disclosures for financial instruments, used the following methods and assumptions:

Cash and cash equivalents – The carrying amounts of these assets approximate their fair value and are classified as Level 1.

Interest earning time deposits – The carrying amounts of these assets approximate their fair value and are classified as Level 1.

Investment securities – The fair values of securities available-for-sale and held-to-maturity are obtained from an independent third party and are based on quoted prices on nationally recognized exchange where available (Level 1). If quoted prices are not available, fair values are measured by utilizing matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for specific securities, but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2). Management made no adjustment to the fair value quotes that were received from the independent third party pricing service.

Federal Home Loan Bank stock – The carrying amount of these assets approximates their fair value and are classified as Level 2.

Net loans – For variable-rate loans that re-price frequently, fair value is based on carrying amounts. The fair value of other loans (for example, fixed-rate commercial real estate loans, mortgage loans, and commercial and industrial loans) is estimated using discounted cash flow analysis, based on interest rates currently being offered in the market for loans with similar terms to borrowers of similar credit quality. Loan value estimates include judgments based on expected prepayment rates. The measurement of the fair value of loans, including impaired loans, is classified within Level 3 of the fair value hierarchy.

Accrued interest receivable and payable – The carrying amount of these assets approximates their fair value and are classified as Level 1.

Deposits – The fair values disclosed for demand deposits (e.g., interest-bearing and noninterest-bearing checking, passbook savings and certain types of money management accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts) and are classified within Level 1 of the fair value hierarchy. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market on certificates of deposits to a schedule of aggregated expected monthly maturities on time deposits. Measurements of the fair value of time deposits are classified within Level 2 of the fair value hierarchy.

Table of Contents

**Borrowings – Fixed/variable term “bullet” structures** are valued using a replacement cost of funds approach. These borrowings are discounted to the FHLBNY advance curve. Option structured borrowings’ fair values are determined by the FHLB for borrowings that include a call or conversion option. If market pricing is not available from this source, current market indications from the FHLBNY are obtained and the borrowings are discounted to the FHLBNY advance curve less an appropriate spread to adjust for the option. These measurements are classified as Level 2 within the fair value hierarchy.

**Junior subordinated debentures** – The Company secures a quote from its pricing service based on a discounted cash flow methodology which results in a Level 2 classification for this borrowing.

**Interest rate swap derivative** – The fair value of the interest rate swap derivative is obtained from a third party pricing agent and is calculated based on a discounted cash flow model. All future floating cash flows are projected and both floating and fixed cash flows are discounted to the valuation date. The curve utilized for discounting and projecting is built by obtaining publicly available third party market quotes for various swap maturity terms, and therefore is classified within Level 2 of the fair value hierarchy.

The carrying amounts and fair values of the Company’s financial instruments as of the indicated dates are presented in the following table:

(Dollars In thousands)	Fair Value Hierarchy	June 30, 2014		December 31, 2013	
		Carrying Amounts	Estimated Fair Values	Carrying Amounts	Estimated Fair Values
<b>Financial assets:</b>

Interest rate swap derivative	2	112	112	135	135

## (10) Interest Rate Derivatives

Derivative instruments are entered into primarily as a risk management tool of the Company. Financial derivatives are recorded at fair value as other liabilities. The accounting for changes in the fair value of a derivative depends on whether it has been designated and qualifies as part of a hedging relationship. For a fair value hedge, changes in the fair value of the derivative instrument and changes in the fair value of the hedged asset or liability are recognized currently in earnings. For a cash flow hedge, changes in the fair value of the derivative instrument, to the extent that it is effective, are recorded in other comprehensive income and subsequently reclassified to earnings as the hedged transaction impacts net income. Any ineffective portion of a cash flow hedge is recognized currently in earnings. See

Note 9 for further discussion of the fair value of the interest rate derivative.

The Company has \$5.0 million of floating rate trust preferred debt indexed to 3-month LIBOR. As a result, it is exposed to variability in cash flows related to changes in projected interest payments caused by changes in the benchmark interest rate. During the fourth quarter of fiscal 2009, the Company entered into an interest rate swap agreement, with a \$2.0 million notional amount, to convert a portion of the variable-rate junior subordinated debentures to a fixed rate for a term of approximately 7 years at a rate of 4.96%. The derivative is designated as a cash flow hedge. The hedging strategy ensures that changes in cash flows from the derivative will be highly effective at offsetting changes in interest expense from the hedged exposure.

Table of Contents

The following table summarizes the fair value of the outstanding derivative and its presentation on the statements of condition:

(In thousands)		June 30, 2014	December 31, 2013
Cash flow hedge:			
	Other liabilities	\$ 112	\$ 135

The change in accumulated other comprehensive loss on a pretax basis and the impact on earnings from the interest rate swap that qualifies as a cash flow hedge for the periods indicated below were as follows:

(In thousands)	Three Months Ended June 30,	
	2014	2013
Balance as of March 31:	\$(123 )	\$(180 )
Amount of (gains) losses recognized in other comprehensive income	(4 )	13
Amount of loss reclassified from other comprehensive income and recognized as interest expense	15	15
Balance as of June 30:	\$(112 )	\$(152 )

(In thousands)	Six Months Ended June 30,	
	2014	2013
Balance as of December 31:	\$(135 )	\$(195 )
Amount of (gains) losses recognized in other comprehensive income	(7 )	13
Amount of loss reclassified from other comprehensive income and recognized as interest expense	30	30
Balance as of June 30:	\$(112 )	\$(152 )

No amount of ineffectiveness has been included in earnings and the changes in fair value have been recorded in other comprehensive income (loss). Some, or all, of the amount included in accumulated other comprehensive income loss would be reclassified into current earnings should a portion of, or the entire hedge no longer be considered effective, but at this time, management expects the hedge to remain fully effective during the remaining term of the swap.

The Company posted cash of \$200,000 under arrangements to satisfy collateral requirements associated with the interest rate swap contract.

Table of Contents

## (11) Accumulated Other Comprehensive Income (Loss)

Changes in the components of accumulated other comprehensive income (loss) (“AOCI”), net of tax, for the periods indicated are summarized in the table below.

(In thousands)	For the three months ended June 30, 2014				
	Retirement Plans	Unrealized Gains and Losses on Financial Derivative	Unrealized Gains and Losses on Available-for-Sale Securities	Securities reclassified from AFS to HTM	Total

1 Amounts in parentheses indicates debits in net income.

2 These items are included in net periodic pension cost.

See Note 5 for additional information.

## (12) Subsequent Event

On August 12, 2014, the U.S. Securities and Exchange Commission declared effective the registration statement filed by Pathfinder Bancorp, Inc., a Maryland corporation, with respect to the conversion described in Note 1. In addition, on August 12, 2014, the Board of Governors of the Federal Reserve System approved Pathfinder Bancorp, Inc., a Maryland corporation, to become a bank holding company by acquiring 100 percent of the shares of Pathfinder Bank and approved the application by Pathfinder Bancorp, MHC to convert from mutual to stock form.

## Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations (Unaudited)

## General

Pathfinder Bancorp, Inc. (the "Company") is a federally chartered mid-tier holding company headquartered in Oswego, New York. The primary business of the Company is its investment in Pathfinder Bank. The Company is majority owned by Pathfinder Bancorp, MHC, a federally-chartered mutual holding company (the "Mutual Holding Company"). At June 30, 2014, the Mutual Holding Company held 60.4% of the Company's common stock and the public and the Employee Stock Ownership Plan ("ESOP"), collectively, held the remaining 39.6% of the outstanding common stock. At June 30, 2014, Pathfinder Bancorp, Inc. and subsidiaries had total assets of \$544.5 million, total liabilities of \$499.9 million and shareholders' equity of \$44.3 million plus noncontrolling interest of \$395,000, which represents the 49% not owned by the Company as a result of the acquisition detailed in Note 23 within the 2013 audited consolidated financial statements filed on Form 10-K on March 17, 2014.

## Table of Contents

The following discussion reviews the Company's financial condition at June 30, 2014 and the results of operations for the three and six month periods ended June 30, 2014 and 2013.

### Statement Regarding Forward-Looking Statements

This report contains forward-looking statements that are based on assumptions and may describe future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words “believe,” “expect,” “intend,” “anticipate,” “estimate,” “project” or similar expressions. The Company’s ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to:

- general economic conditions, either nationally or in our market area, that are worse than expected;
- inflation and changes in the interest rate environment that reduce our interest margins or reduce the fair value of financial instruments;
  - increased competitive pressures among financial services companies;
  - changes in consumer spending, borrowing and savings habits;
- our ability to enter new markets successfully and take advantage of growth opportunities, and the possible dilutive effect of potential acquisitions or de novo branches, if any;
  - legislative or regulatory changes that adversely affect our business;
    - adverse changes in the securities markets;
- changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board or the Securities and Exchange Commission;
  - inability of third-party providers to perform their obligations to us; and
    - changes in our organization, compensation and benefit plans.

Management’s ability to predict results or the effect of future plans or strategies is inherently uncertain. These factors include, but are not limited to, general economic conditions, changes in the interest rate environment, legislative or regulatory changes that may adversely affect our business, changes in accounting policies and practices, changes in competition and demand for financial services, adverse changes in the securities markets and changes in the quality or composition of the Company’s loan or investment portfolios. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, the Company does not undertake, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.

### Application of Critical Accounting Policies

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States and follow practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions, and judgments are based

on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions, and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions, and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions, and judgments are necessary when assets and liabilities are required to be recorded at fair value or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and information used to record valuation adjustments for certain assets and liabilities are based on quoted market prices or are provided by other third-party sources, when available. When third party information is not available, valuation adjustments are estimated in good faith by management.

Table of Contents

The most significant accounting policies followed by the Company are presented in Note 1 to the annual audited consolidated financial statements included in the 2013 Annual Report filed with the Securities and Exchange Commission on Form 10-K on March 17, 2014, as amended March 25, 2014, (“the consolidated financial statements”). These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the consolidated financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, management has identified the allowance for loan losses, deferred income taxes, pension obligations, the evaluation of investment securities for other than temporary impairment, the evaluation of goodwill for impairment, and the estimation of fair values for accounting and disclosure purposes to be the accounting areas that require the most subjective and complex judgments. These areas could be the most subject to revision as new information becomes available.

The allowance for loan losses represents management's estimate of probable loan losses inherent in the loan portfolio. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment on the use of estimates related to the amount and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The Company establishes a specific allowance for all commercial loans in excess of the total related credit threshold of \$100,000 and single borrower residential mortgage loans in excess of the total related credit threshold of \$300,000 identified as being impaired which are on nonaccrual and have been risk rated under the Company's risk rating system as substandard, doubtful, or loss. In addition, an accruing substandard loan could be identified as being impaired. The measurement of impaired loans is generally based upon the present value of future cash flows discounted at the historical effective interest rate, except that all collateral-dependent loans are measured for impairment based on the fair value of the collateral, less costs to sell. The majority of the Company's impaired loans are collateral-dependent. For all other loans and leases, the Company uses the general allocation methodology that establishes an allowance to estimate the probable incurred loss for each risk-rating category. The loan portfolio also represents the largest asset type on the consolidated statement of condition. Note 1 to the consolidated financial statements describes the methodology used to determine the allowance for loan losses and a discussion of the factors driving changes in the amount of the allowance for loan losses.

Deferred income tax assets and liabilities are determined using the liability method. Under this method, the net deferred tax asset or liability is recognized for the future tax consequences. This is attributable to the differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases as well as net operating and capital loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. The affect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period that includes the enactment date. If current available evidence about the future raises doubt about the likelihood of a deferred tax asset being realized, a valuation allowance is established. The judgment about the level of future taxable income, including that which is considered capital, is inherently subjective and is reviewed on a continual basis as regulatory and business factors change. A valuation allowance of \$458,000 was maintained at June 30, 2014, as management believes it may not generate sufficient capital gains to offset its capital loss carry forward. The Company's effective tax rate differs from the statutory rate due primarily to non-taxable income from investment securities and bank owned life insurance.

We maintain a noncontributory defined benefit pension plan covering substantially all employees. The plan provides defined benefits based on years of service and final average salary. On May 14, 2012, we informed our employees of our decision to freeze participation and benefit accruals under the plan, primarily to reduce some of the volatility in earnings that can accompany the maintenance of a defined benefit plan. Pension and post-retirement benefit plan liabilities and expenses are based upon actuarial assumptions of future events; including fair value of plan assets, interest rates, and the length of time the Company will have to provide those benefits. The assumptions used by

management are discussed in Note 12 to the consolidated annual financial statements.

### Table of Contents

Management performs an annual evaluation of our goodwill for possible impairment. Based on the results of the December 31, 2013 evaluation, management has determined that the carrying value of goodwill was not impaired as of that date. The evaluation approach is described in Note 9 of the audited consolidated financial statements. Further information on the estimation of fair values can be found in Note 20 to the consolidated financial statements.

The Company carries all of its available-for-sale investments at fair value with any unrealized gains or losses reported net of tax as an adjustment to shareholders' equity and included in accumulated other comprehensive income (loss), except for the credit-related portion of debt security impairment losses and other-than-temporary impairment ("OTTI") of equity securities which are charged to earnings. The Company's ability to fully realize the value of its investments in various securities, including corporate debt securities, is dependent on the underlying creditworthiness of the issuing organization. In evaluating the debt security (both available-for-sale and held-to-maturity) portfolio for other-than-temporary impairment losses, management considers (1) if we intend to sell the security; (2) if it is "more likely than not" we will be required to sell the security before recovery of its amortized cost basis; or (3) if the present value of expected cash flows is not sufficient to recover the entire amortized cost basis. When the fair value of a held-to-maturity or available-for-sale security is less than its amortized cost basis, an assessment is made as to whether other-than-temporary impairment ("OTTI") is present. The Company considers numerous factors when determining whether a potential OTTI exists and the period over which the debt security is expected to recover. The principal factors considered are (1) the length of time and the extent to which the fair value has been less than the amortized cost basis, (2) the financial condition of the issuer and (guarantor, if any) and adverse conditions specifically related to the security, industry or geographic area, (3) failure of the issuer of the security to make scheduled interest or principal payments, (4) any changes to the rating of the security by a rating agency, and (5) the presence of credit enhancements, if any, including the guarantee of the federal government or any of its agencies.

The estimation of fair value is significant to several of our assets; including investment securities available-for-sale, the interest rate derivative, intangible assets, foreclosed real estate, and the value of loan collateral when valuing loans. These are all recorded at either fair value, or the lower of cost or fair value. Fair values are determined based on third party sources, when available. Furthermore, accounting principles generally accepted in the United States require disclosure of the fair value of financial instruments as a part of the notes to the consolidated financial statements. Fair values on our available-for-sale securities may be influenced by a number of factors; including market interest rates, prepayment speeds, discount rates, and the shape of yield curves.

Fair values for securities available-for-sale are obtained from an independent third party pricing service. Where available, fair values are based on quoted prices on a nationally recognized securities exchange. If quoted prices are not available, fair values are measured using quoted market prices for similar benchmark securities. Management made no adjustments to the fair value quotes that were provided by the pricing source. The fair values of foreclosed real estate and the underlying collateral value of impaired loans are typically determined based on evaluations by third parties, less estimated costs to sell. When necessary, appraisals are updated to reflect changes in market conditions.

### Recent Events

On June 11, 2014, Pathfinder Bancorp, Inc. announced that Pathfinder Bancorp, Inc., a Maryland corporation and the proposed new holding company for Pathfinder Bank, filed a registration statement on June 11, 2014 with the Securities and Exchange Commission in connection with the previously announced conversion of Pathfinder Bancorp, MHC from a mutual holding company to a stock holding company.

Additionally, the Company announced on June 26, 2014 that its Board of Directors declared a quarterly dividend of \$0.03 per common share payable on August 4, 2014 to shareholders of record on July 15, 2014.

### Overview and Results of Operations

Edgar Filing: PATHFINDER BANCORP INC - Form 10-Q

We had net income of \$676,000 for the three months ended June 30, 2014 compared to net income of \$823,000 for the three months ended June 30, 2013. The decrease in the net income of \$147,000, or 17.9%, was due primarily to the sale of \$8.8 million in residential mortgage loans during the second quarter of 2013 which resulted in a net gain of \$288,000 after tax. We had net income of \$1.2 million for the six months ended June 30, 2014 compared to net income of \$1.3 million for the six months ended June 30, 2013. The decrease in net income was due primarily to the \$288,000 after tax gain from the \$8.8 million in residential loans sold during the second quarter of 2013.

Table of Contents

Return on average assets was 0.49% for the three month period ended June 30, 2014 compared to 0.66% for the corresponding period in 2013. The decrease was due to the decrease in net income and an increase in average assets, the latter due principally to increased levels of commercial real estate loans and investment securities between the year over year second quarter periods. Return on average assets was 0.44% for the six month period in 2014 as compared to 0.53% for the comparable prior year period. This decrease was also due to an increase in average assets.

Net interest margin, on a tax-equivalent basis, improved 3 basis points to 3.43% through the first quarter of 2014 as compared to the same prior year period. For the six month period ended June 30, 2014, net interest margin improved by 5 basis points to 3.45% as compared to the same prior year period.

Net Interest Income

Net interest income is the Company's primary source of operating income for payment of operating expenses and providing for loan losses. It is the amount by which interest earned on loans, interest-earning deposits, and investment securities, exceeds the interest paid on deposits and other interest-bearing liabilities. Changes in net interest income and net interest margin result from the interaction between the volume and composition of interest-earning assets, interest-bearing liabilities, related yields, and associated funding costs.

The following table sets forth information concerning average interest-earning assets and interest-bearing liabilities and the average yields and rates thereon for the periods indicated. Interest income and resultant yield information in the table is on a fully tax-equivalent basis using marginal federal income tax rates of 34%. Averages are computed on the daily average balance for each month in the period divided by the number of days in the period. Yields and amounts earned include loan fees. Nonaccrual loans have been included in interest-earning assets for purposes of these calculations.

Net interest margin			3.45	%			3.40	%
Ratio of average interest-earning assets to average interest-bearing liabilities			115.82	%			115.27	%

Net interest income, on a tax-equivalent basis, increased \$216,000, or 5.4%, to \$4.2 million for the three months ended June 30, 2014 as compared to \$4.0 million for the three months ended June 30, 2013. The increase in net interest income was principally due to the decrease in average rates paid on time deposits and FHLBNY borrowings. When comparing the three months end June 30, 2014 to the three months ended June 30, 2013, the average yield on average interest-earning assets declined by 13 basis points, whereas the average rates paid on interest-bearing liabilities declined by 19 basis points. As a result, our interest spread for the three months ended June 30, 2014 increased to 3.35% from 3.29% during the three months ended June 30, 2013.

Net interest income, on a tax-equivalent basis, increased \$396,000, or 5.0%, to \$8.4 million for the six months ended June 30, 2014 as compared to \$8.0 million for the six months ended June 30, 2013. The increase in net interest income was principally due to the decrease in average rates paid on time deposits and FHLBNY borrowings. When comparing the six months end June 30, 2014 to the six months ended June 30, 2013, the average yield on average interest-earning assets declined by 13 basis points, whereas the average rates paid on interest-bearing liabilities declined by 20 basis points. As a result, our interest rate spread for the six months ended June 30, 2014 increased to 3.36% from 3.29% during the six months ended June 30, 2013.

Table of Contents

Interest income on a tax-equivalent basis increased \$49,000, or 1.0%, to \$4.9 million for the three months ended June 30, 2014 compared to the three months ended June 30, 2013. The increase in our interest income was primarily due to an increase in interest income on investment securities of \$68,000, or 9.6%, to \$775,000 for the three months ended June 30, 2014, partially offset by a slight decrease in interest income from loans of \$15,000, or 0.4%, to \$4.1 million for the three months ended June 30, 2014. The average balance of interest earning assets increased \$21.5 million, or 4.6%, to \$492.6 million for the three months ended June 30, 2014 from \$471.1 million for the three months ended June 30, 2013 as we increased our emphasis on growing our commercial real estate loan portfolio. Our average yield earned on interest earning assets decreased 13 basis points to 3.98% during the three months ended June 30, 2014 from 4.11% during the three months ended June 30, 2013 due to the low continuing interest rate environment.

Interest income on loans remained at \$4.1 million for the three months ended June 30, 2014 and 2013 primarily as a result of the increase in interest income from commercial real estate loans which increased \$264,000, or 22.6%, to \$1.4 million for the three months ended June 30, 2014. The average balance of commercial real estate loans increased \$17.6 million, or 20.2%, to \$105.1 million for the three months ended June 30, 2014 from \$87.5 million for the three months ended June 30, 2013 due to our continued emphasis in our business strategy to expand into the Syracuse market. The average yield earned on our commercial real estate loans increased 10 basis points to 5.45% for the three months ended June 30, 2014. Interest income on all other loan products decreased \$279,000 to \$2.7 million for the three months ended June 30, 2014 primarily as a result of the decrease in the average yields on residential real estate loans and commercial and municipal loans. The average yield earned on our residential mortgage loan portfolio decreased 17 basis points to 4.36% during the three months ended June 30, 2014, as higher rate amortizing mortgages were replaced with new originations reflecting lower current market rates. In addition, the average balance of our residential mortgage loan portfolio decreased by \$5.5 million, or 3.1%, to \$169.2 million for the three months ended June 30, 2014 from \$174.6 million for the three months ended June 30, 2013, primarily due to the \$8.8 million residential loan sale of longer-term lower yielding fixed rate loans in the second quarter of 2013. The average yield earned on our commercial and municipal loans decreased 91 basis points to 3.77% for the three months ended June 30, 2014 as higher interest rate maturing loans were replaced with new loans at the current lower market interest rate.

Interest income on taxable investment securities increased \$59,000 for the three months ended June 30, 2014 due principally to an increase of \$11.3 million, or 11.6%, in the average balance of taxable investment securities for the three months ended June 30, 2014 due to the need for additional collateral in support of our increasing balances of municipal deposits. In addition, the average yield on such securities increased 3 basis points to 1.77% for the three months ended June 30, 2014. Interest income on tax-exempt securities increased \$9,000 to \$293,000 for the three months ended June 30, 2014 when compared to the three months ended June 30, 2013. This slight increase was due to the average balance of tax-exempt securities increasing \$1.3 million to \$27.0 million for the three months ended June 30, 2014, partially offset by the decrease in the average yield earned on the tax-exempt securities, which decreased 8 basis points to 4.35% for the three months ended June 30, 2014.

Interest income on a tax-equivalent basis increased nominally by \$26,000, or 0.3%, to \$9.7 million for the six months ended June 30, 2014 as compared to the prior year period. The increase in our interest income was primarily due to an increase in interest income on investment securities of \$109,000, or 7.7%, to \$1.5 million for the six months ended June 30, 2014, partially offset by a slight decrease in interest income from loans of \$75,000, or 0.9%, to \$8.2 million for the six months ended June 30, 2014. The average balance of interest earning assets increased \$15.9 million, or 3.4%, to \$484.1 million for the six months ended June 30, 2014 from \$468.2 million for the six months ended June 30, 2013 as we increased our emphasis on growing our commercial real estate loan portfolio. Our average yield earned on interest earning assets decreased 13 basis points to 4.01% during the six months ended June 30, 2014 from 4.14% during the six months ended June 30, 2013 due to the low interest rate environment.

Interest income on loans decreased \$75,000 to \$8.2 million for the six months ended June 30, 2014 from \$8.3 million for the six months ended June 30, 2013 primarily as a result of a decrease in interest income from residential real estate loans, primarily offset by an increase in interest income from commercial real estate loans. Interest income on

residential real estate loans decreased \$308,000 for the six months ended June 30, 2014 as compared to the prior year period. The decrease in interest income on residential real estate loans was due to the decrease in the average balance of such loans of \$7.3 million, or 4.2%, to \$169.0 million for the six months ended June 30, 2014 as compared to the prior year period. The decrease in the average balance of residential real estate loans was due principally to the \$8.8 million residential loan sale that occurred in the second quarter of 2013, and, to a lesser extent, the slowdown in growth in residential mortgage loan originations during the first half of 2014 as compared to the same prior year period. Additionally, the average yield on the residential loan portfolio decreased by 17 basis points to 4.41% for the six months ended June 30, 2014 as maturing higher yielding residential mortgage loans were replaced by loans at the current lower interest rates. Interest income from commercial real estate loans increased \$226,000, or 9.9%, to \$2.5 million for the six months ended June 30, 2014. The average balance of commercial real estate loans increased \$17.2 million, or 20.3%, to \$101.9 million for the six months ended June 30, 2014 from \$84.7 million for the six months ended June 30, 2013 due to our continued emphasis in our business strategy to expand into the Syracuse market.

Table of Contents

Interest income on taxable investment securities increased \$94,000 for the six months ended June 30, 2014 due principally to an increase of \$7.0 million in the average balance of taxable investment securities for the six months ended June 30, 2014 due to the need for additional collateral in support of our increasing balances of municipal deposits. In addition, the average yield on such securities increased 6 basis points to 1.82% for the six months ended June 30, 2014. Interest income on tax-exempt securities increased \$15,000 to \$588,000 for the six months ended June 30, 2014 when compared to the six months ended June 30, 2013. This increase was due to the average balance of tax-exempt securities increasing \$1.2 million to \$27.1 million for the six months ended June 30, 2014, partially offset by the decrease in the average yield earned on the tax-exempt securities, which decreased 9 basis points to 4.35% for the six months ended June 30, 2014. The increase in the average balance of tax-exempt securities was the result of the purchase of several in-market municipal securities offerings. The majority of the securities were issued by current municipal deposit customers of the bank. The related reduction in average yield was the result of the new purchased securities carrying yields that are slightly lower than the previously existing average tax-exempt portfolio yield.

Interest expense for the three months ended June 30, 2014 decreased \$167,000, or 20.0%, to \$666,000 from \$833,000 for the three months ended June 30, 2013. The decrease in our interest expense was primarily due to our interest expense on deposits decreasing \$132,000, or 21.0%, to \$497,000 during the three months ended June 30, 2014 and our interest expense on long-term borrowings decreasing \$35,000, or 17.2%, to \$169,000 for the three months ended June 30, 2014. The average rate paid on interest-bearing liabilities decreased 19 basis points to 0.63% during the three months ended June 30, 2014, compared to 0.82% during the three months ended June 30, 2013 as market interest rates remained low.

Interest expense on deposits decreased primarily due to the decrease in the average rate paid on time deposits of 30 basis points to 0.91% as maturing certificates of deposit were either replaced at lower current market rates or invested in lower costing core deposits during the three months ended June 30, 2014. The average balance of lower cost core deposits increased \$24.0 million to \$278.3 million for the three months ended June 30, 2014 as a result of the increase in the average balance of money market deposit accounts whose average balance increased \$17.4 million, or 21.5%, during the three months ended June 30, 2014.

Interest expense on long-term borrowings decreased largely due to our higher rate maturing FHLB NY advances being replaced with advances of a shorter duration and a lower average rate. The average rate of our borrowings decreased 65 basis points to 1.43% for the three months ended June 30, 2014.

Interest expense for the six months ended June 30, 2014 decreased \$370,000, or 21.4%, to \$1.4 million from \$1.7 million for the six months ended June 30, 2013. The decrease in interest expense was primarily due to decreases in interest expense on time deposits and FHLB NY borrowings during the six months ended June 30, 2014. The average rate paid on interest bearing liabilities decreased 20 basis points to 0.65% for the six months ended June 30, 2014 as compared to the six months ended June 30, 2013 as market interest rates remained low.

Interest expense on deposits decreased primarily due to the decrease in the average rate paid on time deposits of 26 basis points to 0.98% as maturing certificates of deposit were either replaced at lower current market rates or invested in lower costing core deposits. Consumers are opting to keep their investments in products of shorter duration and improve their liquidity given the current uncertain rate environment. Accordingly, the average balance of core deposits increased \$23.0 million to \$275.0 million for the six months ended June 30, 2014.

Table of Contents

Interest expense on borrowings decreased largely due to our higher rate FHLB NY maturing advances having been replaced by advances of a shorter duration and a lower average rate. The average rate of our borrowings decreased 81 basis points to 1.45% for the first half of 2014 as compared to the same prior year period.

## Rate/Volume Analysis

Net interest income can also be analyzed in terms of the impact of changing interest rates on interest-earning assets and interest-bearing liabilities and changes in the volume or amount of these assets and liabilities. The following table represents the extent to which changes in interest rates and changes in the volume of interest-earning assets and interest-bearing liabilities have affected the Company's interest income and interest expense during the periods indicated. Information is provided in each category with respect to: (i) changes attributable to changes in volume (change in volume multiplied by prior rate); (ii) changes attributable to changes in rate (changes in rate multiplied by prior volume); and (iii) total increase or decrease. Changes attributable to both rate and volume have been allocated ratably.

(In thousands)	Three Months Ended June 30, 2014 vs. 2013			Six Months Ended June 30, 2014 vs. 2013

## Provision for Loan Losses

We established a provision for loan losses, which is charged to operations, at a level management believes is appropriate to absorb probable incurred credit losses in the loan portfolio. In evaluating the level of the allowance for

loan losses, management considers historical loss experience, the types of loans and the amount of loans in the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available or as future events change. The provision for loan losses represents management's estimate of the amount necessary to maintain the allowance for loan losses at an adequate level.

We recorded \$275,000 in provision for loan losses for the three month period ended June 30, 2014, as compared to \$276,000 for the three month period ended June 30, 2013. The provision for loan losses recorded in the second quarter of 2014, coupled with the decrease of specific reserves on our impaired loans was adequate to offset the \$108,000 in net charge-offs in the second quarter of 2014 and the \$10.6 million growth in gross loans between the first quarter and the second quarter of 2014. The net charge-offs in the second quarter of 2013 were \$98,000. The net charge-offs in the second quarter of 2014 were principally due to a single commercial loan relationship which was largely reserved for in prior periods. As a result, the ratio of the allowance to gross loans was unchanged at 1.44% at June 30, 2014 and June 30, 2013.

Table of Contents

We recorded a \$520,000 provision for loan losses during the first six months of 2014 as compared to \$600,000 for the same prior year period, resulting in a decrease of \$80,000, or 13.3%. Net charge-offs for the six months ended June 30, 2014 were \$395,000 as compared to \$237,000 for the prior year period, an increase of \$158,000, or 66.7%. The year over year increase in net charge-offs was due to certain 2014 non-recurring portfolio charge-offs recorded in order to conform more closely to FDIC guidance. The recorded investment in impaired loans was \$7.9 million at June 30, 2014 as compared to \$5.7 million at December 31, 2013, an increase of \$2.2 million or 38.2%. The increase in impaired loans was due to the addition of two commercial relationships totaling \$2.6 million during the first quarter of 2014. One of the commercial relationships, with a recorded investment of \$1.0 million and an associated specific reserve of \$96,000, was brought current by the borrower at June 30, 2014 but will continue to be categorized as impaired to allow management to closely monitor its performance. The other impaired commercial relationship consists of six loans totaling \$1.5 million at June 30, 2014 with a specific reserve of \$231,000. The specific reserves related to the total impaired loans at June 30, 2014 were \$1.1 million as compared to \$1.0 million at December 31, 2013. The ratio of allowance for loan losses to gross loans was 1.44% at June 30, 2014 and June 30, 2013. Management deems the amount of the provision recorded during the first six months of 2014 to be adequate in support of the current level of allowance for loan losses.

Delinquency trends for loans over 30 days past due improved overall when comparing total past due loans as a percent of total loans at June 30, 2014 as compared to December 31, 2013. Within the over 90 day category, however, the proportion of past due loans to total loans increased as a result of an increase in the commercial loan product segment. Commercial loans past due 90 days increased \$949,000 between December 31, 2013 and June 30, 2014 and principally due to the previously mentioned newly impaired commercial relationships. While the percentage of total past due residential loans at 30 days or greater decreased at June 30, 2014 from December 31, 2013, the percentage of loans past due 90 days and over, which are all nonaccrual loans, increased due to the residential loan facilities within one of the previously mentioned newly impaired relationships. The ratio of the allowance for loan losses to period end loans decreased modestly from 1.48% at December 31, 2013 to 1.44% at June 30, 2014. Management reviews trends in historical loss rates and environmental factors on a quarterly basis, in addition to assessing the specific allowance needs on impaired loans, and judges the current level of allowance for loan losses to be adequate to absorb the estimable and probable losses inherent in the loan portfolio.

Noninterest Income

The Company's noninterest income is primarily comprised of fees on deposit account balances and transactions, loan servicing, commissions, including insurance agency commissions, and net gains on securities, loans, and foreclosed real estate.

Table of Contents

The following table sets forth certain information on noninterest income for the periods indicated:

(Dollars in thousands)	Three Months Ended June 30,			Six Months Ended June 30,				
	2014	2013	Change	2014	2013	Change		
Service charges on deposit accounts	\$305	\$287	\$18	6.3 %	\$584	\$542	\$42	7.7 %
Earnings and gain on bank owned life insurance	66	52	14	26.9 %	126	112	14	12.5 %
Loan servicing fees	67	38	29	76.3 %	120	82	38	46.3 %
Debit card interchange fees	129	122	7	5.7 %	243	228	15	6.6 %
Other charges, commissions and fees	261	124	137	110.5 %	575	266	309	116.2 %
Noninterest income before gains	828	623	205	32.9 %	1,648	1,230	418	34.0 %
Net gains on sales and redemptions of investment securities	24	60	(36 )	-60.0 %	26	99	(73 )	-73.7 %
Net gains on sales of loans and foreclosed real estate	26	421	(395 )	-93.8 %	30	451	(421 )	-93.3 %
Total noninterest income	\$878	\$1,104	\$(226 )	-20.5 %	\$1,704	\$1,780	\$(76 )	-4.3 %

Total noninterest income for the three months ended June 30, 2014 decreased \$226,000, or 20.5%, to \$878,000 from \$1.1 million for the prior year period. During the three months ended June 30, 2013, we recorded \$395,000 in net gains (\$288,000 after tax) from the sale of residential loans as compared to no sales of residential loans during the three months ended June 30, 2014. The sale was undertaken as a means of mitigating interest rate risk. Partially offsetting the decrease in gains on sales was \$121,000 in commissions from Pathfinder Risk Management Company, Inc., which owns a 51% membership interest in FitzGibbons Agency, LLC which we acquired in the fourth quarter of 2013. In addition, service charges on deposit accounts increased \$18,000, or 6.3%, due largely to the service charges associated with the increased number of checking accounts for the three months ended June 30, 2014 as compared to the three months ended June 30, 2013.

Total noninterest income for the six months ended June 30, 2014 decreased \$76,000, or 4.3%, to \$1.7 million as compared to \$1.8 million for the same prior year period. This decrease was principally due to the net gain of \$395,000 (\$288,000 after tax) from the sale of residential mortgage loans that occurred in the second quarter of 2013 in support of our initiative to mitigate interest rate risk. Primarily offsetting this decrease was \$297,000 in commissions from the FitzGibbons Agency, LLC, whose 51% membership interest was acquired in the fourth quarter of 2013. In addition, service charges on deposit accounts increased \$42,000, or 7.7%, due largely to the service charges associated with the increased number of checking accounts between the first half of 2013 and the first half of 2014.

## Noninterest Expense

The following table sets forth certain information on noninterest expense for the periods indicated:

(Dollars in thousands)	Three Months Ended June 30,			Six Months Ended June 30,		
	2014	2013	Change	2014	2013	Change

Edgar Filing: PATHFINDER BANCORP INC - Form 10-Q

Salaries and employee benefits	\$2,187	\$1,941	\$246	12.7	%	\$4,384	\$3,852	\$532	13.8	%
Building occupancy	364	361	3	0.8	%	771	726	45	6.2	%
Data processing	399	343	56	16.3	%	764	711	53	7.5	%
Professional and other services	173	168	5	3.0	%	348	327	21	6.4	%
Amortization of intangible assets	3	-	3		NM	6	-	6		NM
Advertising	99	128	(29)	-22.7	%	231	244	(13)	-5.3	%
FDIC assessments	100	84	16	19.0	%	195	167	28	16.8	%
Audits and exams	61	63	(2)	-3.2	%	125	123	2	1.6	%
Other expenses	377	513	(136)	-26.5	%	846	955	(109)	-11.4	%
Total noninterest expenses	\$3,763	\$3,601	\$162	4.5	%	\$7,670	\$7,105	\$565	8.0	%

Total noninterest expense for the three months ended June 30, 2014 increased \$162,000, or 4.5%, to \$3.8 million from \$3.6 million for the three months ended June 30, 2013.

### Table of Contents

The increase in noninterest expense was due principally to increases in personnel expenses of \$246,000 and data processing charges of \$56,000. Personnel expenses increased due in part to wage increases, increased deferred compensation expenses of \$99,000, reduced salary deferrals of \$34,000 related to reduced residential loan volume and unit deferral amounts, and the inclusion of \$69,000 in personnel expenses of the FitzGibbons Agency, LLC. Included within the net increase of personnel expenses was a \$97,000 improvement in the pension benefit which was able to offset other increases in employee benefits such as payroll taxes and 401(k) contributions. Data processing expenses increased due largely to ATM processing charges. These increases in expenses were partially offset by a \$136,000, or 26.5%, decrease in other operating expenses due in part to the \$65,000 write-off of a repossessed asset in the second quarter of 2013, and a reduction of \$29,000 in advertising expenses as we increased our advertising in the second quarter of 2013 in support of our expansion into the Syracuse marketplace. It is expected that employee and compensation expense will increase with the opening of our new Syracuse branch during the third quarter of 2014.

Total noninterest expense for the six months ended June 30, 2014 increased \$565,000, or 8.0%, to \$7.7 million from \$7.1 million for the same prior year period due largely to the \$532,000 increase in personnel expenses and \$53,000 in data processing expenses between these two time periods.

The increase in personnel expenses reflected wage increases, \$130,000 related to increased deferred compensation costs, \$91,000 in reduced salary deferrals related to reduced residential loan volume and unit deferral amounts, and \$75,000 related to commissions. Additionally, \$153,000 of the increase in personnel expenses related to those of the FitzGibbons Agency, LLC, which was acquired in the fourth quarter of 2013. Included within the net increase in personnel expenses was a \$196,000 improvement in the pension benefit which was able to offset other increases in employee benefits such as payroll taxes, 401(k) contributions and additional health insurance costs recorded in the first half of 2014. Data process expenses increased due primarily to ATM processing charges.

Other operating expenses decreased \$109,000 between the first six months of 2014 and the same period in 2013, due principally to the \$65,000 write-off of a repossessed asset which occurred in the second quarter of 2013.

### Income Tax Expense

Income tax expense decreased by \$31,000 for the quarter ended June 30, 2014 as compared to the same period in 2013 primarily due to a decrease in pretax income, but partially offset by an increase in the effective tax rate from 27.0% for the second quarter of 2013 to 28.5% for the second quarter of 2014, exclusive of the net income attributable to our controlling interest in Fitzgibbons Agency, LLC. The increase in the effective tax rate between the year over year second quarter periods reflected a smaller proportion of tax-exempt items as a proportion of our taxable income in the second quarter of 2014. We have reduced our effective tax rate from the combined federal and state statutory rate of 38.7% primarily through the ownership of tax-exempt investment securities, bank owned life insurance, and other tax saving strategies.

Income tax expense for the six months ended June 30, 2014 was \$451,000 as compared to \$493,000 for the six months ended June 30, 2013. The decrease in income tax expense was due to the decrease in pretax income, offset in part by an increase in the effective tax rate. Our effective tax rate was 28.5% for the six months ended June 30, 2014, exclusive of the consolidated income from the FitzGibbons Agency, LLC, as compared to an effective tax rate of 27.0% for the six months ended June 30, 2013. The increase in the effective tax rate between the six months ended June 30, 2014 and 2013 reflected a smaller proportion of tax-exempt items as a proportion of our taxable income in the first half of 2014. We have reduced our effective tax rate from the combined federal and state statutory rate of 38.7% primarily through the ownership of tax-exempt investment securities, bank owned life insurance, and other tax saving strategies.

### Earnings per Share

Edgar Filing: PATHFINDER BANCORP INC - Form 10-Q

Basic and diluted earnings per share were \$0.26 and \$0.25, respectively, for the second quarter of 2014, as compared to basic and diluted earnings per share of \$0.33 for the second quarter of 2013. The decrease in basic and diluted earnings per share between these two periods was principally due to the decrease in net income. Basic and diluted earnings per share for the six month period ended June 30, 2014 were \$0.45 and \$0.44, respectively, as compared to basic and diluted earnings per share of \$0.53 for the six month period ended June 30, 2013. This decrease was also due to the decrease in net income.

- 43 -

---

Table of Contents

Changes in Financial Condition

Assets

Total assets increased \$40.7 million, or 8.1%, to \$544.5 million at June 30, 2014 from \$503.8 million at December 31, 2013. The increase in assets was primarily due to increases in investment securities, loans and bank owned life insurance, partially offset by a decrease in total cash and cash equivalents.

Investment securities increased \$26.5 million to \$141.9 million at June 30, 2014 from \$115.4 million at December 31, 2013 as a result of the requirement to provide investment securities as collateral to municipalities for the increase in municipal deposits during the first half of 2014. \$18.2 million, or 68.5%, of the increase in investment securities were securities classified as available-for-sale, primarily consisting of residential mortgage-backed securities and totaled \$99.1 million at June 30, 2014. The remaining increase in investment securities were securities classified as held-to-maturity, which increased \$8.4 million to \$42.8 million at June 30, 2014. The increase in held-to-maturity securities reflected management's evaluation and determination to place securities with greater price sensitivity into this category, thereby mitigating any potential volatility within accumulated other comprehensive income.

Total loans receivable increased \$17.1 million, or 5.0%, to \$358.8 million at June 30, 2014 from \$341.6 million at December 31, 2013 primarily due to a \$13.8 million, or 14.5%, increase in commercial real estate loans. The increase in commercial real estate loans was the result of our continued growth in the Syracuse marketplace. Residential mortgage loans increased \$2.3 million, or 1.3%, between December 31, 2013 and June 30, 2014. During the second quarter of 2014, we achieved modest residential portfolio growth as we gained market share in the Syracuse marketplace.

Bank owned life insurance increased \$1.9 million during the first half of 2014 to \$10.2 million at June 30, 2014 due principally to additional purchases of single premium life insurance policies on selected participants. These purchases will provide income that will assist in the funding of optional deferred compensation and supplemental executive retirement plans.

Total cash and cash equivalents decreased \$6.4 million to \$10.2 million at June 30, 2014 from \$16.6 million at December 31, 2013 in order to fund the increase in investment securities and loans.

Liabilities

Total liabilities increased to \$499.9 million at June 30, 2014 from \$460.7 million at December 31, 2013. Deposits increased \$38.0 million, or 9.3%, to \$448.2 million at June 30, 2014 from \$410.1 million at December 31, 2013 as a result of an \$11.3 million increase in money market deposit accounts and a \$6.1 million increase in savings accounts. Core deposits (consisting of demand accounts, NOW accounts, money market deposit accounts and savings accounts) increased \$26.7 million between December 31, 2013 and June 30, 2014 to \$259.5 million at June 30, 2014. The increase in core deposits was due, in part, to seasonal tax collection activities of our municipal customers, an expansion of our municipal and business customer base and retail customers' preference for increased liquidity during the uncertain interest rate environment. Additionally, brokered deposits increased \$8.3 million, or 20.0%, to \$50.1 million at June 30, 2014 due to the need to fund loan growth in excess of organic deposit growth. Short term FHLB NY borrowings increased \$1.0 million to \$25.0 million at June 30, 2014.

Stockholders' Equity

Stockholders' equity, exclusive of noncontrolling interest, increased \$1.5 million, or 3.6%, to \$44.3 million at June 30, 2014 from \$42.7 million at December 31, 2013. This increase was principally due to a \$1.0 million increase in retained earnings, resulting from \$1.2 million in net income through the first half of 2014 offset by dividends declared

on our common stock totaling \$152,000 (exclusive of dividends paid on unallocated ESOP shares), and a reduction of \$425,000 in accumulated other comprehensive loss due principally to an increase in the market value of our available-for-sale investment portfolio.

We were not required to pay dividends on our SBLF preferred stock during the first quarter of 2014 reflecting an existing credit with the U.S. Treasury. This credit expired in the second quarter of 2014 and we paid \$30,000 in dividends during the second quarter on our SBLF preferred stock. We expect to be obligated to pay the full 1% dividend totaling approximately \$32,000 per quarter beginning in the third quarter of 2014 and continuing through March 2016. If the SBLF preferred stock remains outstanding beyond March 2016, the dividend rate will increase and be fixed at 9.0%. With the approval of the U.S. Treasury, we may redeem the SBLF preferred stock prior to the date the dividend rate increases.

Table of Contents

## Capital

Capital adequacy is evaluated primarily by the use of ratios which measure capital against total assets, as well as against total assets that are weighted based on defined risk characteristics. The Company's goal is to maintain a strong capital position, consistent with the risk profile of its subsidiary banks that supports growth and expansion activities while at the same time exceeding regulatory standards. At June 30, 2014, Pathfinder Bank exceeded all regulatory required minimum capital ratios and met the regulatory definition of a "well-capitalized" institution, i.e. a leverage capital ratio exceeding 5%, a Tier 1 risk-based capital ratio exceeding 6%, and a total risk-based capital ratio exceeding 10%.

Pathfinder Bank's actual capital amounts and ratios as of the indicated dates are presented in the following table.

(Dollars in thousands)	Actual		Minimum For Capital Adequacy Purposes		Minimum To Be "Well- Capitalized" Under Prompt Corrective Provisions			
	Amount	Ratio	Amount	Ratio	Amount	Ratio		
As of June 30, 2014:								
Total Core Capital (to Risk-Weighted Assets)	\$49,520	13.5	% \$29,261	8.0	% \$36,576	10.0	%	
Tier 1 Capital (to Risk-Weighted Assets)	\$44,752	12.2	% \$14,631	4.0	% \$21,946	6.0	%	
Tier 1 Capital (to Assets)	\$44,752	8.6	% \$20,876	4.0	% \$26,095	5.0	%	
As of December 31, 2013:								
Total Core Capital (to Risk-Weighted Assets)	\$47,862	14.1	% \$27,106	8.0	% \$33,883	10.0	%	
Tier 1 Capital (to Risk-Weighted Assets)	\$43,454	12.8	% \$13,553	4.0	% \$20,330	6.0	%	
Tier 1 Capital (to Assets)	\$43,454	8.7	% \$19,928	4.0	% \$24,910	5.0	%	

## Loan and Asset Quality and Allowance for Loan Losses

The following table represents information concerning the aggregate amount of non-performing assets at the indicated dates:

(Dollars In thousands)	June 30, 2014	December 31, 2013	June 30, 2013
Nonaccrual loans:			
Commercial real estate and commercial loans	\$3,658	\$2,709	\$3,844
Consumer	316	447	205
Residential real estate	2,475	2,194	1,751
Total nonaccrual loans	6,449	5,350	5,800
Total nonperforming loans	6,449	5,350	5,800
Foreclosed real estate	770	619	429
Total nonperforming assets	\$7,219	\$5,969	\$6,229
Troubled debt restructurings not included above	\$1,949	\$2,459	\$1,965

Edgar Filing: PATHFINDER BANCORP INC - Form 10-Q

Nonperforming loans to total loans	1.80	%	1.57	%	1.72	%
Nonperforming assets to total assets	1.33	%	1.18	%	1.26	%

### Table of Contents

Nonperforming assets include nonaccrual loans, troubled debt restructurings (“TDR”), and foreclosed real estate. Loans are considered modified in a TDR when, due to a borrower’s financial difficulties, the Company makes a concession(s) to the borrower that it would not otherwise consider. These modifications may include, among others, an extension of the term of the loan, and granting a period when interest-only payments can be made, with the principal payments made over the remaining term of the loan or at maturity. TDRs are included in the above table within the following categories of nonaccrual loans or TDRs not included above (the latter also known as accruing TDRs).

Non-performing assets at June 30, 2014 were \$7.2 million, or 1.33% of total assets, as compared to \$6.0 million, or 1.18% of total assets, at December 31, 2013. The \$1.2 million increase in non-performing assets between December 31, 2013 and June 30, 2014 was principally due to one large commercial relationship becoming non-performing during the second quarter of 2014 whose total aggregate balance was \$1.0 million at June 30, 2014, including related commercial business and personal residential loans extended to this relationship. The borrower brought all loans current within this relationship as of June 30, 2014, but we will maintain this relationship on non-performing status while monitoring the borrower’s payment performance. Once management has concluded that payment of contractual principal and interest is no longer in doubt, the relationship may be reclassified as performing.

The largest increase in non-performing assets occurred within the commercial real estate and commercial loan product segments which increased to \$3.6 million at June 30, 2014 from \$2.7 million at December 31, 2013. The principal reason for the increase was the addition of the non-performing commercial relationship described above.

Non-performing residential real estate loans increased to \$2.5 million at June 30, 2014 from \$2.2 million at December 31, 2013. The reason for the \$300,000 increase between December 31, 2013 and June 30, 2014 was principally due to the addition of six non-performing residential mortgage loans as part of the above mentioned loan relationship placed in non-performing status during the second quarter of 2014. We had 34 non-performing residential mortgages at June 30, 2014, a modest increase from the 32 non-performing residential mortgages at December 31, 2013.

Foreclosed real estate at June 30, 2014 totaled \$770,000 as compared to \$619,000 at December 31, 2013, an increase of \$151,000, or 24.4%. The foreclosed real estate owned balance at June 30, 2014 was comprised of six residential properties with a carrying value of \$542,000 and two commercial properties with a carrying value of \$228,000.

The allowance for loan losses represents management’s estimate of the probable losses inherent in the loan portfolio as of the date of the statement of condition. The allowance for loan losses was \$5.2 million and \$5.0 million at June 30, 2014 and December 31, 2013, respectively. The ratio of the allowance for loan losses to gross loans was 1.44% at June 30, 2014 as compared to 1.48% at December 31, 2013. Management performs a quarterly evaluation of the allowance for loan losses based on quantitative and qualitative factors and has determined that the current level of the allowance for loan losses of \$5.2 million is adequate to absorb the losses in the loan portfolio as of June 30, 2014.

The Company generally places a loan on nonaccrual status and ceases accruing interest when loan payment performance is deemed unsatisfactory and the loan is past due 90 days or more. There are no loans that are past due 90 days or more and still accruing interest. The Company considers a loan impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan.

The measurement of impaired loans is generally based upon the fair value of the collateral, with a portion of the impaired loans measured based upon the present value of future cash flows discounted at the historical effective interest rate. A specific reserve is established for an impaired loan if its carrying value exceeds its estimated fair value. The estimated fair values of the majority of the Company’s impaired loans are measured based on the estimated fair value of the loan’s collateral. For loans secured by real estate, estimated fair values are determined primarily through third-party appraisals. When a loan is determined to be impaired Pathfinder Bank will reevaluate the collateral which secures the loan. For real estate, the Company will obtain a new appraisal or broker’s opinion

whichever is considered to provide the most accurate value in the event of sale. An evaluation of equipment held as collateral will be obtained from a firm able to provide such an evaluation. Collateral will be inspected not less than annually for all impaired loans and will be reevaluated not less than every two years. Appraised values are discounted to arrive at the estimated selling price of the collateral, which is considered to be the estimated fair value. The discounts also include estimated costs to sell the property.

- 46 -

---

Table of Contents

At June 30, 2014, the Company valued seven performing TDR loans across five relationships totaling \$1.9 million based on the present values of the expected future cash flows discounted at the pre-modification interest rate (also known as the effective interest rate), resulting in an aggregate specific reserve of \$48,000. These loans were formerly valued at their fair value less costs to sell at March 31, 2014, at which time they were also performing. Had the loans continued to be evaluated at their fair value less costs to sell at June 30, 2014, their aggregate specific reserve would have been \$221,000. As a result of the Company's change in the evaluation process for these seven performing TDRs, the aggregate specific reserve was reduced by this difference of \$173,000. This change better reflects the value of these performing TDRs as the receipt of contractual principal and interest payments is no longer in doubt at June 30, 2014.

The Company also classified three nonperforming loans with an aggregate balance of \$450,000 within one relationship as impaired at June 30, 2014. As all three loans were nonperforming, they are categorized as collateral dependent and therefore valued at the fair value less costs to sell, resulting in a total specific reserve of \$264,000.

At June 30, 2014 and December 31, 2013, the Company had \$7.9 million and \$5.7 million in loans, respectively, which were deemed to be impaired, having established specific reserves of \$1.1 million and \$1.0 million, respectively, on these loans. The increase between these two time periods was centered on commercial real estate, with a smaller portion of the increase within the one to four family first lien residential mortgages. This increase was due to the previously mentioned addition of two newly impaired commercial relationships.

Management has identified potential problem loans totaling \$8.4 million as of June 30, 2014 as compared to \$10.6 million as of December 31, 2013. These loans have been internally classified as special mention, substandard, or doubtful, yet are not currently considered impaired. This definition has been changed from that utilized at December 31, 2013 and December 31, 2012 and included in the 2013 audited consolidated financial statements filed on Form 10-K on March 17, 2014 as amended March 25, 2014. Management has identified potential credit problems which may result in the borrowers not being able to comply with the current loan repayment terms and which may result in it being included in future impaired loan reporting. The reduction in potential problem loans between these two time periods resulted from the conversion of loans from potential problem loans to impaired loans. Within the risk rating levels of potential problems loans, 13 residential mortgages loans with an aggregate recorded investment of \$1.2 million are rated as doubtful at June 30, 2014 as compared to one residential mortgage loan with a recorded investment of \$14,000 at December 31, 2013. The change in the risk rating of the additional 12 residential mortgage loans from substandard to doubtful to more accurately reflect the inherent risk of the credits. This change does not reflect a change of the risk profile of these loans or the estimated potential loss. Management judges the current level of allowance for loan losses to be adequate to cover probable credit losses in the current loan portfolio. As a result, the ratio of the allowance to loan and lease losses to period-end loans at June 30, 2014 was 1.44% as compared to 1.48% at December 31, 2013.

Appraisals are obtained at the time a real estate secured loan is originated. For commercial real estate held as collateral, the property is inspected every two years.

As indicated in the non-performing asset table above and the detailed table below, foreclosed real estate ("FRE") balances increased at June 30, 2014 from December 31, 2013 and nearly doubled from the year ago second quarter period due to two additional residential real estate properties at higher per unit values.

(Dollars in thousands)	#	June 30, 2014	#	December 31, 2013	#	June 30, 2013
Foreclosed real estate	6	\$ 542	5	\$ 341	4	\$ 262

Edgar Filing: PATHFINDER BANCORP INC - Form 10-Q

Foreclosed residential mortgage loans							
Foreclosed commercial real estate	2	228	3	278	2	167	
Total	8	\$ 770	8	\$ 619	6	\$ 429	

- 47 -

### Table of Contents

Fair values for FRE are initially recorded based on market value evaluations by third parties, less costs to sell (“initial cost basis”). Any write-downs required when the related loan receivable is exchanged for the underlying real estate collateral at the time of transfer to foreclosed real estate are charged to the allowance for loan losses. Values are derived from appraisals, similar to impaired loans, of underlying collateral or discounted cash flow analysis. Subsequent to foreclosure, valuations are updated periodically and assets are marked to current fair value, not to exceed the initial cost basis.

In the normal course of business, Pathfinder Bank has sold residential mortgage loans and participation interests in commercial loans. As is typical in the industry, Pathfinder Bank makes certain representations and warranties to the buyer. Pathfinder Bank maintains a quality control program for closed loans and considers the risks and uncertainties associated with potential repurchase requirements to be minimal.

### Liquidity

Liquidity management involves the Company’s ability to generate cash or otherwise obtain funds at reasonable rates to support asset growth, meet deposit withdrawals, maintain reserve requirements, and otherwise operate the Company on an ongoing basis. The Company’s primary sources of funds are deposits, borrowed funds, amortization and prepayment of loans and maturities of investment securities and other short-term investments, and earnings and funds provided from operations. While scheduled principal repayments on loans are a relatively predictable source of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition. The Company manages the pricing of deposits to maintain a desired deposit composition and balance. In addition, the Company invests excess funds in short-term interest-earning and other assets, which provide liquidity to meet lending requirements.

The Company’s liquidity has been enhanced by its ability to borrow from the Federal Home Loan Bank of New York, whose competitive advance programs and lines of credit provide the Company with a safe, reliable, and convenient source of funds. A significant decrease in deposits in the future could result in the Company having to seek other sources of funds for liquidity purposes. Such sources could include, but are not limited to, additional borrowings, brokered deposits, negotiated time deposits, the sale of “available-for-sale” investment securities, the sale of securitized loans, or the sale of whole loans. Such actions could result in higher interest expense costs and/or losses on the sale of securities or loans.

Through the first six months of 2014, as indicated in the Consolidated Statement of Cash Flows, the Company reported net cash flows from financing activities of \$38.8 million generated by increased balances of demand, savings and money market deposit accounts. This was invested in purchases of investment securities of \$26.2 million, net of proceeds from maturities, sales and redemptions of \$8.2 million. In addition, \$18.0 million was invested in new loan generation. The remaining cash needs from investing activities were sourced from a decrease in cash and equivalents of \$6.4 million and funds from operating activities of \$1.5 million. As a recurring source of liquidity, the Company’s investment securities provided \$7.8 million in proceeds from maturities and principal reductions through the first six months of 2014.

The Company has a number of existing credit facilities available to it. At June 30, 2014, total credit available to the Company under the existing lines of credit was approximately \$153.0 million at FHLB NY, the Federal Reserve Bank, and three other correspondent banks. At June 30, 2014, the Company had \$41.0 million outstanding on its existing lines of credit with \$111.8 million available.

The Asset Liability Management Committee of the Company is responsible for implementing the policies and guidelines for the maintenance of prudent levels of liquidity. As of June 30, 2014, management reported to the Board of Directors that the Company is in compliance with its liquidity policy guidelines.

Item 3 – Quantitative and Qualitative Disclosures About Market Risk

A smaller reporting company is not required to provide the information relating to this item.

Item 4 – Controls and Procedures

Under the supervision and with the participation of the Company’s management, including our Chief Executive Officer and Chief Financial Officer, the Company has evaluated the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this quarterly report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company’s disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission’s rules and forms. There has been no change in the Company’s internal control over financial reporting during the most recent fiscal quarter that has materially affected, or is reasonable likely to materially affect, the Company’s internal control over financial reporting.

EXHIBIT 31.1: Rule 13a-14(a) / 15d-14(a) Certification of the Chief Executive Officer

Certification of Chief Executive Officer

Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

I, Thomas W. Schneider, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Pathfinder Bancorp, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

- (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
- (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting, to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
- (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors:

- (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the

registrant's ability to record, process, summarize and report financial information; and  
(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
