NEWS RELEASE

CENTRAL PACIFIC FINANCIAL CORP. REPORTS SECOND QUARTER RESULTS

HONOLULU, July 27, 2004 Central Pacific Financial Corp. (NYSE: CPF), parent company of Central Pacific Bank, today reported second quarter net income grew 8.6% to \$8.7 million, or \$0.53 per share, from the \$8.0 million, or \$0.49 per share, recorded during the same period of 2003. Loan and deposit growth and increases in fee income contributed to the quarter's results.

Second Quarter Highlights

Diluted earnings per share grew 8.2% to \$0.53 compared to \$0.49 in the second quarter of 2003.

Return on average equity (ROE) was 17.05% and return on average assets (ROA) was 1.50%.

Loans increased by \$159 million during the second quarter of 2004.

Return on average stockholders' equity was 17.05% in the second quarter of 2004, up from 15.76% in the first quarter of 2004 and down slightly compared to 17.31% for the second quarter of 2003. Return on average assets for the second quarter of 2004 was 1.50%, up from 1.43% in the first quarter of 2004 and down compared to 1.56% for the second quarter of 2003.

"The Company had an exciting second quarter that began with signing a definitive merger agreement in April to acquire CB Bancshares, Inc.," said Clint Arnoldus, Chairman, President and Chief Executive Officer. "Since the signing, the combined management team has implemented a rigorous and disciplined integration planning process that targets an efficient integration and maximizes the combination's synergies. Throughout this planning process, we have been encouraged by the many employees, from both sides, who are excited about the combination and anxious to start working towards our goal of becoming the Best Community Bank in Hawaii."

For the six months ended June 30, 2004, net income was \$16.6 million, little changed from the same period last year. Diluted earnings per share were \$1.01 for the first six months of 2004, equaling the results for the comparable period last year. The year-to-date return on average equity was 16.41%, compared to 18.23% for the six month period ended June 30, 2003. The year-to-date return on average assets was 1.47%,

compared to 1.64% for the same period last year.

Financial Highlights

Second quarter revenues (net interest income before provision plus other operating income) grew 2.9% to \$26.7 million, compared to \$26.0 million in the second quarter of 2003. Net interest income before provision for loan losses was \$22.6 million, up 1.5% from the second quarter of 2003. The increase in net interest income was the result of a 12.9% increase in average interest-earning assets as the net interest margin declined to 4.31% from the 4.79% reported last year. Repricing within the loan portfolio and the extended period of low market interest rates contributed to the net interest margin

pressure. The pace of margin compression is expected to moderate over the next several quarters as monetary policy is gradually tightened.

Provision for loan losses in the second quarter of 2004 was \$300,000, compared to the \$200,000 reported in the same period last year.

Other operating income increased 11.7% to \$4.1 million in the second quarter of 2004, compared to \$3.7 million reported in the second quarter of 2003. Increases in income from fiduciary activities and service charges on deposit accounts contributed to the improvement.

Other operating expense increased 3.1% to \$14.1 million in the second quarter of 2004, compared to \$13.7 million reported in 2003. Salaries and employee benefits totaled \$7.4 million, a 2.2% increase from the \$7.2 million reported in the second quarter of 2003.

The effective tax rate for the second quarter of 2004 was 29.49%, compared to 33.79% in the prior year. The Company's investments in high-technology businesses in Hawaii generated net tax benefits of \$504,000 in the second quarter of 2004 and \$244,000 in the second quarter of 2003. Assuming no additional high-technology investments are made, the Company expects its effective tax rate to approximate 33% over the coming quarters.

Asset Quality

Nonperforming assets at June 30, 2004 increased to \$8.7 million, or 0.35% of assets, compared to \$7.5 million at March 31, 2004 and \$274,000 a year ago. The increase during the current quarter was primarily due to the addition of \$1.5 million in other real estate in the form of a commercial property, currently in the process of sale. Nonaccrual loans primarily to four borrowers totaling \$7.2 million at June 30, 2004 are primarily secured by commercial property.

Loans delinquent for ninety days or more increased to \$14.4 million at June 30, 2004, or 0.89% of total loans and leases. These loans, primarily to two borrowers, are adequately secured by commercial and residential properties.

Net loan charge-offs totaled \$214,000 in the second quarter of 2004, compared to net loan recoveries of \$116,000 in the year ago period. The allowance for loan and lease losses was \$24.9 million at June 30, 2004. The ratio of the allowance for loan and lease losses to total loans and leases declined to 1.54%, compared to 1.93% a year ago.

Balance Sheet Analysis

Total assets grew to \$2.50 billion, a 19.6% increase over the \$2.09 billion reported a year ago.

Investment securities increased to \$658.4 million, up 15.1% from the \$571.9 million reported last year as net loan growth began the year slower than expected. Investment securities are expected to decline over the coming quarters as assets are redeployed to fund recent loan growth.

Total loans and leases increased by 22.7% to \$1.62 billion, compared to \$1.32 billion at June 30, 2003. The strong increase was driven by organic loan growth and the purchase of a loan portfolio consisting of \$76.1 million in commercial real estate loans secured by Hawaii properties.

Total deposits at June 30, 2004 increased by 13.1%, or \$223.9 million, to \$1.93 billion from \$1.71 billion at June 30, 2003. Noninterest-bearing deposits as of June 30, 2004 includes a short-term deposit of approximately \$80 million that was withdrawn on July 1, 2004. Excluding the short-term deposit, total deposits increased to \$1.85 billion, an increase of 8.4% from June 30, 2003. Excluding the short-term deposit, noninterest-bearing deposits increased by 15.3% to \$375.5 million, compared to \$325.8 million a year ago.

Shareholders' equity increased 8.4% to \$199.7 million, or \$12.40 book value per share at June 30, 2004, compared to \$184.2 million or \$11.49 book value per share a year ago. Shareholders' equity as a percentage of assets stood at 7.99% at June 30, 2004, compared to 8.82% a year ago. While no common shares were repurchased during the second quarter of 2004, the Company maintains a stock repurchase program with available authorization totaling \$12.3 million.

Business and Earnings Outlook

Management currently expects 2004 EPS growth on a standalone basis of approximately 5 to 7 percent, based on projected economic trends and business conditions.
