Notes to Unaudited Consolidated Financial Statements

### Note 1 - Basis of Presentation

On July 3, 2007, Quaint Oak Savings Bank completed its conversion from a Pennsylvania chartered mutual savings bank to a Pennsylvania chartered stock savings bank and changed its name to Quaint Oak Bank ("Bank"). In connection with the conversion, Quaint Oak Bank formed Quaint Oak Bancorp, Inc., a Pennsylvania chartered corporation (the "Company" or "Quaint Oak Bancorp"), which offered and sold 1,388,625 shares of its common stock at a price of \$10.00 per share to eligible depositors of the Bank. Upon completion of the conversion and the offering, all of Quaint Oak Bank's common stock is owned by Quaint Oak Bancorp, and all of Quaint Oak Bancorp's common stock is, in turn, owned by the public. The Company sold 1,388,625 shares of its common stock, raising \$13,886,250 of gross proceeds. Costs incurred in connection with the conversion and offering totaled \$535,000 and were recorded as a reduction of the proceeds from the offering. The Company invested approximately \$7.1 million or 53.0% of the net proceeds in Quaint Oak Bank. All remaining proceeds were retained by Quaint Oak Bancorp for future capital needs. The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, Quaint Oak Bank. All significant intercompany balances and transactions have been eliminated.

Prior to the conversion, Quaint Oak Savings Bank operated under a state bank charter as a mutual savings bank. Upon completion of the conversion and the offering, the Bank changed its name to Quaint Oak Bank and began to operate as a stock savings bank. The Bank is subject to regulation of the Pennsylvania Department of Banking and the Federal Deposit Insurance Corporation. Pursuant to the Bank's election under Section 10(1) of the Home Owners' Loan Act, the Company is a savings and loan holding company regulated by the Office of Thrift Supervision. The area served by the Bank is principally Bucks County, Pennsylvania. The principal deposit products offered by the Bank are certificates of deposits, passbook savings accounts, statement savings accounts and e-savings accounts. Loan products offered are fixed and adjustable rate residential and commercial mortgages, home equity loans, and lines of credit.

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United State of America (GAAP) for interim information and with the instructions to Form 10-Q, as applicable to a smaller reporting company. Accordingly, they do not include all the information and footnotes required by GAAP for complete financial statements.

The foregoing consolidated financial statements are unaudited; but in the opinion of management include all adjustments (consisting only of normal recurring adjustments) necessary for a fair presentation thereof. The balances as of December 31, 2007 have been derived from the audited financial statements. These financial statements should be read in conjunction with the financial statements and notes thereto included in Quaint Oak Bancorp's 2007 Annual Report on Form 10-K. The results of operations for the three months March 31, 2008 are not necessarily indicative of the results that may be expected for the year ending December 31, 2008.

Note 2 - Recent Accounting Pronouncements

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements," which defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measurements. The new guidance is effective for financial statements issued for fiscal years beginning after November 15, 2007, and for interim periods within those fiscal years. FASB Statement No. 157 became effective for the Company on January 1, 2008. See Note 9 to the unaudited consolidated financial statements for fair value measurement disclosures.

Notes to Unaudited Consolidated Financial Statements (Continued)

### Note 2 - Recent Accounting Pronouncements (Continued)

In February 2008, the FASB issued FASB Staff Position (FSP) FAS 157-2, "Effective Date of FASB Statement No. 157," that would permit a one-year deferral in applying the measurement provisions of Statement No. 157 to non-financial assets and non-financial liabilities (non-financial items) that are not recognized or disclosed at fair value in an entity's financial statements on a recurring basis (at least annually). Therefore, if the change in fair value of a non-financial item is not required to be recognized or disclosed in the financial statements on an annual basis or more frequently, the effective date of application of Statement 157 to that item is deferred until fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. This deferral does not apply, however, to an entity that applied Statement 157 in interim or annual financial statements before FSP FAS 157-2 is effective. The adoption of FSP FAS 157-2 did not have a significant impact on the Company.

In February 2007, the FASB issued Statement No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities-Including an amendment of FASB Statement No. 115". Statement No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. Unrealized gains and losses on items for which the fair value option has been elected will be recognized in earnings at each subsequent reporting date. Statement No. 159 is effective for the Company January 1, 2008. The Company adopted FASB Statement No. 159 as of January 1, 2008, and has elected not to measure any assets or liabilities at fair value under the provisions of this statement. The adoption of this statement did not have any effect on the Company's consolidated financial position or results of operations.

Staff Accounting Bulletin No. 109 (SAB 109), "Written Loan Commitments Recorded at Fair Value Through Earnings" expresses the views of the staff regarding written loan commitments that are accounted for at fair value through earnings under generally accepted accounting principles. To make the staff's views consistent with current authoritative accounting guidance, the SAB revises and rescinds portions of SAB No. 105, "Application of Accounting Principles to Loan Commitments." Specifically, the SAB revises the SEC staff's views on incorporating expected net future cash flows related to loan servicing activities in the fair value measurement of a written loan commitment. The SAB retains the staff's views on incorporating expected net future cash flows related to internally-developed intangible assets in the fair value measurement of a written loan commitment. The staff expects registrants to apply the views in Question 1 of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The Company adopted SAB 109 as of January 1, 2008. There was no material impact to the Company's consolidated financial position or results of operations upon adoption.

In June 2007, the Emerging Issues Task Force (EITF) reached a consensus on Issue No. 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards" ("EITF 06-11"). EITF 06-11 states that an entity should recognize a realized tax benefit associated with dividends on nonvested equity shares, nonvested equity share units and outstanding equity share options charged to retained earnings as an increase in additional paid in capital. The amount recognized in additional paid in capital should be included in the pool of excess tax benefits available to absorb potential future tax deficiencies on share-based payment awards. EITF 06-11 should be applied prospectively to income tax benefits of dividends on equity-classified share-based payment awards that are declared in fiscal years beginning after December 15, 2007. The Company expects that EITF 06-11 will not have an impact on its consolidated financial statements.

Notes to Unaudited Consolidated Financial Statements (Continued)

Note 2 - Recent Accounting Pronouncements (Continued)

In December 2007, the FASB issued Statement No. 141(R) "Business Combinations". This Statement establishes principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree. The Statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The guidance will become effective as of the beginning of a company's fiscal year beginning after December 15, 2008. This new pronouncement will impact the Company is accounting for business combinations beginning January 1, 2009.

In December 2007, the FASB issued Statement No. 160 "Noncontrolling Interests in Consolidated Financial Statements-an amendment of ARB No. 51". This Statement establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. The guidance will become effective as of the beginning of a company's fiscal year beginning after December 15, 2008. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In March 2008, the FASB issued Statement No 161, "Disclosures about Derivative Instruments and Hedging Activities-and amendment of FASB Statement No. 133" (Statement 161). Statement No. 161 requires entities that utilize derivative instruments to provide qualitative disclosures about their objectives and strategies for using such instruments, as well as any details of credit-risk-related contingent features contains within derivatives. Statement 161 also requires entities to disclose additional information about the amounts and location of derivatives located within the financial statements, how the provisions of SFAS 133 has been applied, and the impact that hedges have on an equity's financial position, financial performance, and cash flows. Statement 161 is effective for fiscal years and interim periods beginning after November 15, 2008, with earlier application encouraged. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

In February 2008, the FASB issued FASB Staff Position (FSP) FAS 140-3, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions." This FSP addresses the issue of whether or not these transactions should be viewed as two separate transactions or as one "linked" transaction. The FSO includes a "rebuttable presumption" that presumes linkage of the two transactions unless the presumption can be overcome by meeting certain criteria. The FSP will be effective for fiscal years beginning after November 15, 2008 and will apply only to original transfers made after that date; early adoption will not be allowed. The Company is currently evaluating the potential impact the new pronouncement will have on its consolidated financial statements.

Note 3 – Earnings per Share

Basic earnings per share for the three months ended March 31, 2008 has been calculated based on net income of \$97,000 and 1,280,322 weighted average common shares outstanding for the three months ended March 31, 2008. The number of shares outstanding for this calculation excludes unallocated ESOP shares. Because the initial public offering was completed on July 3, 2007, per share results for the three months ended March 31, 2007 would not be meaningful. The Company currently maintains a simple capital structure with no potential dilutive common shares outstanding.

Notes to Unaudited Consolidated Financial Statements (Continued)

Note 4 – Comprehensive Income (Loss)

Accounting principles generally accepted in the United States of America require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available for sale securities, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

The components of other comprehensive income (loss) consist exclusively of unrealized gains and losses on available for sale securities. For the three months ended March 31, 2008, unrealized holding losses were \$6,000 with a related tax benefit of \$3,000 for net other comprehensive loss of \$3,000. The Company had no items of other comprehensive income for the three months ended March 31, 2007.

Note 5 – Cash and Cash Equivalents

Cash and cash equivalents include non-interest and interest-earning demand deposits and money market accounts with various commercial financial institutions.

Note 6 - Investment Securities

The amortized cost and fair value of investments securities available for sale and held to maturity at are summarized below (in thousands):

Held to Maturity:				
U.S. Government agency securities	\$ 2,253	\$ 12	\$ -	\$ 2,265

Notes to Unaudited Consolidated Financial Statements (Continued)

Note 6 - Investment Securities (Continued)

The \$2.0 million of auction market securities is comprised of four securities, each with a par value of \$500,000. In February and March of 2008, each of auction market securities failed to settle at auction and are currently illiquid. Liquidity of these investments is subject to either a successful auction process, redemption of the investment, or sale of the security in a secondary market. In the past, an auction process has generally allowed investors to obtain immediate liquidity if so desired by selling the securities at their face amounts. However, as has been recently reported in the financial press, the current disruptions in the credit markets have adversely affected the auction market for these types of securities. An auction fails when there is insufficient demand for these securities. However, this does not represent a default by the issuer of the auction market security. Upon an auction failure, the interest rate does not reset at a market rate but instead resets based on a predetermined formula contained in the security. The outstanding auction market securities at March 31, 2008 had an average weighted rate of 4.11%.

All of these securities carry an AAA rating and continue to earn interest at the contractual maximum rate with the exception of a Penn Higher Education security held by the Company at March 31, 2008. The interest rate for this security reset to zero at the April 15, 2008 auction date based on a clause in the prospectus that cannot allow a yield higher than 4.0% over any three month period. The previous two months rates for this security was 10.63% and 3.53%.

We cannot predict whether future auctions related to these securities will be successful. As a result, the Company has assessed each failed auction and believes that none of the underlying issuers of its auction market securities are presently at risk for default or that such securities are impaired. As such, the Company currently believes the carrying value of these auction market securities approximates their fair value. If the issuers are unable to successfully close future auctions and their credit rating deteriorate, the Company will consider whether any future lack of liquidity in these securities has resulted in an other than temporary impairment of our auction market securities subsequent to March 31, 2008.

Notes to Unaudited Consolidated Financial Statements (Continued)

Note 7 - Loan Receivable, net and Allowance for Loan Losses

Loans receivable, net consist of the following (in thousands):

	March 31, 2008		December 31, 2007	
Real estate loans:	2000			
One-to four-family residential:				
Owner occupied	\$	16,810	\$	17,248
Non-owner occupied		17,444		15,757
Total one-to-four family residential		34,254		33,005
Multi-family residential		3,781		4,385
Commercial real estate		19,062		17,481

Statement e-savings accounts	5,809		5,630		
Certificates of deposit	48,422		45,972		
Total deposits	\$ 57,778	\$	55,261		

#### Note 9 - Fair Value

In September 2006, the FASB issued Statement No. 157, "Fair Value Measurements" ("SFAS 157"), which defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies to other accounting pronouncements that require or permit fair value measurements. The new guidance is effective for financial statements beginning after November 15, 2007 and for interim periods within those fiscal years.

The primary effect SFAS 157 on the Company was to expand the required disclosures pertaining to the method used to determine fair values.

The Company uses fair value measurements to record fair value adjustments to certain assets to determine fair value disclosures. Investment securities available for sale are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record fair value other assets on a non-recurring basis, such as impaired loans, real estate owned and certain other assets. These nonrecurring fair value adjustments typically involve application of lower-of-cost-or-market accounting or write down of individual assets.

Under SFAS 157, the Company groups its assets at fair value in three levels, based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 -- Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2 -- Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 -- Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's own estimates of assumptions that market participants would use in pricing the assets.

Notes to Unaudited Consolidated Financial Statements (Continued)

Under SFAS No. 157, the Company bases its fair values on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is our policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy in SFAS No. 157.

Fair value measurements for assets where there exits limited or no observable market data and, therefore, are based primarily upon the Company's or other third-party estimates, are often calculated based on the characteristics of the asset, the economic and competitive environment and other such factors. Therefore, results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, that could significantly affect the results of current or future valuations. At March 31, 2008, the Company did not have any assets that were measured at fair value on a recurring basis that used Level 3 measurements.

The following as a description of valuation methodologies used for assets recorded at fair value.

Investment securities available for sale – Investments securities available for sale are recorded at fair value on a recurring basis. When available, we use quoted market price to measure fair value. If market prices are not available, fair value measurements are typically obtained through third party data service providers or dealer market participants. As of March 31, 2008, Level 1 securities include mutual funds and Level 2 securities include auction market securities.

Impaired loans – Impaired loans are accounted for under SFAS 114, "Accounting by Creditors for Impairment of a Loan," in which the Company has measured impairment generally based on the fair value of the loan's collateral. Fair value is generally determined based upon independent third party appraisals of the properties, or discounted cash flows based upon the expected proceeds. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements. The fair value consists of the loan balance less its valuation allowance as determined under SFAS 114. Impaired loans carried at fair value decreased \$159,000 during the quarter ended March 31, 2008 and the valuation allowance increased \$77,000.

Other Real estate owned – Other real estate owned at March 31, 2008 includes one foreclosed commercial real estate loan. Real estate properties acquired through foreclosure are initially recorded at the fair value of the property at the date of foreclosure. After foreclosure, valuations are periodically performed by the Company and the real estate is carried at the lower of cost or fair value less estimated costs to sell. Fair value is generally based on independent third party appraisals of the properties. These values are determined based on the sales prices of similar properties in the proximate vicinity. Our increase in other real estate owned during the quarter was due solely to additions of \$81,000 to that category of asset. No valuation allowance or changes in value were recognized during the quarter.

The table below presents balances of assets measured at fair value on a recurring basis:

Fair Value Measurements at March 31, 2008 Using

	Quoted Prices in	Significant	Significant

#### Note 10 - Employee Stock Ownership Plan

The Company adopted an Employee Stock Ownership Plan (ESOP) during fiscal 2007 for the benefit of employees who meet the eligibility requirements. Using proceeds from a loan from the Company, the ESOP purchased 8%, or 111,090 shares of the Company's common stock issued in the public offering completed July 3, 2007 in the open market at an average price of \$9.35 totaling \$1.0 million. The Bank makes cash contributions to the ESOP on a quarterly basis sufficient to enable the ESOP to make the required loan payments to the Company. The loan bears an interest rate equal to the Prime Rate as published in the Wall Street Journal, with principal and interest to be paid quarterly in equal installments over 15 years. The loan is secured by the unallocated shares of common stock held by the ESOP.

Shares of the Company's common stock purchased by the ESOP are held in a suspense account and reported as unallocated common stock held by the ESOP in the Consolidated Balance Sheet until released for allocation to participants. As the debt is repaid, shares are released from collateral and are allocated to each eligible participant based on the ratio of each such participant's base compensation to the total base compensation of eligible plan participants. As the unearned shares are committed to be released and allocated among participants, the Company recognizes compensation expense equal to the average market price of the shares, and the shares become outstanding for earnings per share computations. The Company recognized \$17,000 of ESOP expense for the three months ended March 31, 2008.

# ITEM 2.MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Forward-Looking Statements

We make certain statements in this document as to what we expect may happen in the future. These statements usually contain the words "believe," "estimate," "project," "expect," "anticipate," "intend" or similar expressions. Because these statements look to the future, they are based on our current expectations and beliefs. Actual results or events may differ materially from those reflected in the forward-looking statements. You should be aware that our current expectations and beliefs as to future events are subject to change at any time, and we can give you no assurances that the future events will actually occur.

### General

The Company was formed in connection with the Bank's conversion to a stock savings bank completed on July 3, 2007. The Company's results of operations initially are dependent primarily on the results of the Bank, which is now a wholly owned subsidiary of the Company. The Bank's results of operations depend, to a large extent, on net interest income, which is the difference between the income earned on its loan and investment portfolios and the cost of funds, consisting of the interest paid on deposits and borrowings. Results of operations are also affected by provisions for loan losses, fee income and other non-interest income and non-interest expense. Non-interest expense principally consists of operation, directors' fees and expenses, office occupancy and equipment expense, professional fees and other expenses. Our results of operations are also significantly affected by general economic and competitive conditions, particularly changes in interest rates, government policies may materially impact our financial conditions and results of operations.

### Critical Accounting Policies

The accounting and financial reporting policies of the Company conform to accounting principles generally accepted in the United States of America and to general practices within the banking industry. Accordingly, the consolidated financial statements require certain estimates, judgments, and assumptions, which are believed to be reasonable, based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the periods presented. The following accounting policies comprise those that management believes are the most critical to aid in fully understanding and evaluating our reported financial results. These policies require numerous estimates or economic assumptions that may prove inaccurate or may be subject to variations which may significantly affect our reported results and financial condition for the period or in future periods.

Allowance for Loan Losses. The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes that the collectibility of the principal is unlikely. Subsequent recoveries are added to the allowance. The allowance is an amount that management believes will cover known and inherent losses in the loan portfolio, based on evaluations of the collectibility of loans. The evaluations take into consideration such factors as changes in the types and amount of loans in the loan portfolio, historical loss experience, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral, estimated losses relating to specifically identified loans, and current economic conditions. This evaluation is inherently subjective as it requires material estimates including, among others, exposure at default, the amount and timing of expected future cash flows on impaired loans, value of collateral, estimated losses on our commercial and residential loan portfolios and general amounts for historical loss experience. All of these estimates may be susceptible to significant change.

While management uses the best information available to make loan loss allowance evaluations, adjustments to the allowance may be necessary based on changes in economic and other conditions or changes in accounting guidance. Historically, our estimates of the allowance for loan losses have not required significant adjustments from management's initial estimates. In addition, the Pennsylvania Department of Banking and the Federal Deposit Insurance Corporation, as an integral part of their examination processes, periodically review our allowance for loan losses. The Pennsylvania Department of Banking and the Federal Deposit Insurance Corporation may require the recognition of adjustments to the allowance for loan losses based on their judgment of information available to them at the time of their examinations. To the extent that actual outcomes differ from management's estimates, additional provisions to the allowance for loan losses may be required that would adversely impact earnings in future periods.

Income Taxes. Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various assets and liabilities and gives current recognition to changes in tax rates and laws. The realization of our deferred tax assets principally depends upon our achieving projected future taxable income. We may change our judgments regarding future profitability due to future market conditions and other factors. We may adjust our deferred tax asset balances if our judgments change.

Comparison of Financial Condition at March 31, 2008 and December 31, 2007

Total Assets. The Company's total assets increased \$2.6 million, or 3.5%, to \$76.1 million at March 31, 2008 compared to \$73.5 million at December 31, 2007. This increase was driven primarily by a \$2.5 million increase in deposits. Cash and cash equivalents increased \$224,000, investment securities increased \$499,000 and loans receivable, net of allowance for loan losses increased \$1.8 million for the quarter ended March 31, 2008.

Cash and Cash Equivalents. Cash and cash equivalents increased \$224,000, or 4.5%, from \$5.0 million at December 31, 2007 to \$5.2 million at March 31, 2008, as part of the increase in deposits for the quarter were invested into highly liquid money market accounts.

Investment Securities. Available for sale investment securities increased \$500,000, or 25.0% from \$2.0 million at December 31, 2007 to \$2.5 million at March 31, 2008 driven primarily by the increase in deposits for the quarter.

Loans Receivable, Net. Loans receivable, net, increased \$1.8 million, or 2.9%, to \$63.4 million at March 31, 2008 from \$61.7 million at December 31, 2007. This increase was funded primarily by the increase in deposits during the quarter. Increases within the portfolio occurred in the residential mortgage one-to-four family non-owner occupied category, which grew \$1.7 million or 10.7% and commercial real estate loans which increased \$1.6 million or 9.0%. These increases were partially offset by decreases of \$604,000 or 13.8% in multi-family residential, \$438,000 or 2.5% in one-to-four family owner occupied loans, and \$418,000 or 34.6% in commercial lines of credit.

Deposits. Total interest-bearing deposits increased \$2.5 million, or 4.6%, to \$57.8 million at March 31, 2008 compared to \$55.3 million at December 31, 2007. This increase was attributable to a \$2.4 million increase in certificates of deposit and \$179,000 increase in statement savings accounts and our new e-savings accounts, offset by a \$112,000 decrease in passbook accounts.

Stockholders' Equity. Total stockholders' equity increased \$111,000, or 0.6%, to \$17.7 million at March 31, 2008. This increase was primarily the result of the addition of net income for the three months ended March 31, 2008 of \$97,000 combined with a decrease in unallocated shares held by the ESOP of \$17,000 at March 31, 2008 compared to December 31, 2007 offset by an increase in the accumulated other comprehensive loss of \$3,000 for the same period.

### Comparison of Operating Results for the Three Months Ended March 31, 2008 and 2007

Net Income. Net income amounted to \$97,000 for the three months ended March 31, 2008, a decrease of \$14,000, or 12.6% compared to net income of \$111,000 for the same period in 2007. The decrease in net income on a quarter over quarter basis was a result of the increases in net interest income of \$131,000 and non-interest income of \$3,000, and a decline in income tax expense of \$8,000, being offset by increases in the provision for loan losses of \$47,000 and non-interest expense of \$109,000.

Net Interest Income. Net interest income increased \$131,000, or 30%, to \$568,000 for the three months ended March 31, 2008 from \$437,000 for the comparable period in 2007. The increase was primarily attributable to an increase in net average interest-earning assets of \$13.2 million, offset, in part, by a 49 basis point decrease in the Company's average interest rate spread to 2.11% for the three months ended March 31, 2008 from 2.60% for the comparable period in 2007.

Interest Income. Interest income increased \$159,000, or 15.6% for the three months ended March 31, 2008 from \$1.0 million for the three months year ended March 31, 2007. The increase resulted primarily from a \$13.2 million increase in average interest earning assets which had the effect of increasing interest income by \$207,000. This increase was offset by a decrease \$48,000 in interest income resulting from a 36 basis point decrease in the overall yield on interest earning assets to 6.45% for the three months ended March 31, 2008 from 6.81% for the three months ended March 31, 2007. Average short-term investments and investment securities increase in short-term investments and investment securities in short-term investments and investment securities was driven by the investment of the net proceeds received in the stock offering into these interest earning assets. The average yields on short-term investments and investment securities decreased 72 basis points to 4.54% for the three months ended March 31, 2008 from 5.26% for the three months ended March 31, 2007. The average yield on loans decreased to 6.80% from 6.98% for the 2008 and 2007 periods, respectively.

Interest Expense. Interest expense increased by \$28,000, or 4.8%, to \$612,000 for the three months ended March 31, 2008 compared to the same period in 2007. The increase resulted primarily from a \$889,000 increase in average interest-bearing liabilities, which had the effect of increasing interest expense by \$26,000. In addition, a 13 basis point increase in overall cost of interest bearing liabilities to 4.34% for the quarter ended March 31, 2008 from 4.21% for the quarter ended March 31, 2007, increased interest expense by \$2,000.

Average Balances, Net Interest Income, and Yields Earned and Rates Paid. The following table shows for the periods indicated the total dollar amount of interest from average interest-earning assets and the resulting yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates, and the net interest margin. All average balances are based on daily balances.

(1)Includes non-accrual loans during the respective periods. Calculated net of deferred fees and discounts, loans in process and allowance for loan losses.

(2)

Equals net interest income divided by average interest-earning assets.

The Company increased its provision for loan losses by \$47,000, from a credit of \$10,000 for the quarter ended March 31, 2007 to \$37,000 for the same period in 2008, based on an evaluation of the allowance relative to such factors as volume of the loan portfolio, concentrations of credit risk, prevailing economic conditions, prior loan loss experience and amount of non-performing loans at March 31, 2008. No loans were charged off during the three months ended March 31, 2008. Non-performing loans amounted to \$2.6 million, or 4.10% of net loans receivable at March 31,

2008, consisting of eight loans, two of which are 90 days or more past due and still accruing interest and six of which are on non-accrual status. The non-performing loans include commercial real estate, one-to-four family owner occupied residential, and multi-family residential loans and all are generally well-collateralized. Impaired loans of \$520,000 included in non-performing loans had a specific valuation allowance of \$93,000. Management does not anticipate any other significant losses on these non-performing loans. During the quarter ended March 31, 2008, three loans were placed on non-accrual status resulting in the reversal of \$23,000 of previously accrued interest income. In addition, the collateral property underlying one commercial real estate loan was acquired as real estate owned at a value of approximately \$81,000. This loan had previously been classified as non-accrual. No loss was recognized in conjunction with this acquisition. The Company had no troubled debt restructurings as of March 31, 2008. The allowance for loan losses as a percent of total loans receivable was 1.10% at March 31, 2008 and 1.07% at December 31, 2007.

In early May 2008, one of the loans on non-accrual totaling \$504,000 as of March 31, 2008 was paid off and previously reversed interest of approximately \$30,000 was taken into income.

Non-interest income, which consists of fees and service charges, amounted to \$11,000 and \$8,000 for the three months ended March 31, 2008 and 2007, respectively.

Non-interest expense increased \$109,000 or 39.9% from \$273,000 for the three months ended March 31, 2007 to \$382,000 for the three months ended March 31, 2008. Salaries and benefits expense accounted for \$25,000 of the change as this expense increased 15.9% from \$157,000 for the three months ended March 31, 2007 to \$182,000 for the three months ended March 31, 2008 due to annual salary increases and the compensation expense associated with the Company's ESOP. In addition, professional fees accounted for \$44,000 of the change as this expense increased 176.0% from \$25,000 to \$69,000 quarter over quarter due primarily to the increase in costs associated with being a publicly held company. Also contributing to the quarter over quarter increase in non-interest expense were increases in director fees and expenses, occupancy and equipment expenses, regulatory and other expenses of \$18,000, \$4,000, \$12,000 and \$9,000, respectively.

The provision for income tax decreased \$8,000 from \$71,000 for the three months ended March 31, 2007 to \$63,000 for the three months ended March 31, 2008 due to the decrease in pre-tax income. The Company's effective tax rate, including federal and state income taxes, was 39.4% and 39.0% for the three months ended March 31, 2008 and 2007, respectively.

### Liquidity and Capital Resources

The Company's primary sources of funds are deposits, amortization and prepayment of loans and to a lesser extent, loan sales and other funds provided from operations. While scheduled principal repayments on loans are a relatively predictable source of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition. The Company sets the interest rates on its deposits to maintain a desired level of total deposits. In addition, the Company invests excess funds in short-term interest-earning assets that provide additional liquidity. At March 31, 2008, the Company's cash and cash equivalents amounted to \$5.2 million. At such date, the Company also had \$1.5 million invested in interest-earning time deposits maturing in one year or less.

The Company uses its liquidity to fund existing and future loan commitments, to fund deposit outflows, to invest in other interest-earning assets and to meet operating expenses. At March 31, 2008, Quaint Oak Bank had outstanding commitments to originate loans of \$235,000 and commitments under unused lines of credit of \$1.4 million.

At March 31, 2008, certificates of deposit scheduled to mature in less than one year totaled \$35.0 million. Based on prior experience, management believes that a significant portion of such deposits will remain with us, although there can be no assurance that this will be the case.

In addition to cash flow from loan payments and prepayments and deposits, the Company has significant borrowing capacity available to fund liquidity needs. If the Company requires funds beyond its ability to generate them internally, borrowing agreements exist with the Federal Home Loan Bank of Pittsburgh, which provide an additional source of funds. At March 31, 2008, Quaint Oak Bank had no advances from the Federal Home Loan Bank of Pittsburgh and had \$40.3 million in borrowing capacity.

Our stockholders' equity amounted to \$17.7 million at March 31, 2008, an increase of \$111,000 million from December 31, 2007. The increase was due primarily to net income of \$97,000 for the three months ended March 31, 2008.

Quaint Oak Bank is required to maintain regulatory capital sufficient to meet tier 1 leverage, tier 1 risk-based and total risk-based capital ratios of at least 4.00%, 4.00% and 8.00%, respectively. At March 31, 2008, Quaint Oak Bank exceeded each of its capital requirements with ratios of 17.67% 24.55% and 25.82%, respectively. As a savings and loan holding company, the Company is not subject to any regulatory capital requirements.

## **Off-Balance Sheet Arrangements**

In the normal course of operations, we engage in a variety of financial transactions that, in accordance with generally accepted accounting principles are not recorded in our financial statements. These transactions involve, to varying degrees, elements of credit, interest rate, and liquidity risk. Such transactions are used primarily to manage customers' requests for funding and take the form of loan commitments and lines of credit. Our exposure to credit loss from non-performance by the other party to the above-mentioned financial instruments is represented by the contractual amount of those instruments. We use the same credit policies in making commitments and conditional obligations as we do for on-balance sheet instruments. In general, we do not require collateral or other security to support financial instruments with off–balance sheet credit risk.

Commitments. At March 31, 2008, we had unfunded commitments under lines of credit of \$1.4 million and \$235,000 of commitments to originate loans. We had no commitments to advance additional amounts pursuant to outstanding lines of credit or undisbursed construction loans.

Impact of Inflation and Changing Prices

The consolidated financial statements and related financial data presented herein have been prepared in accordance with accounting principles generally accepted in the United States of America which generally require the measurement of financial position and operating results in terms of historical dollars, without considering changes in relative purchasing power over time due to inflation. Unlike most industrial companies, virtually all of Company's assets and liabilities are monetary in nature. As a result, interest rates generally have a more significant impact on the Company's performance than does the effect of inflation. Interest rates do not necessarily move in the same direction or in the same magnitude as the prices of goods and services, since such prices are affected by inflation to a larger extent than interest rates.

# ITEM 3. QUALITATIVE AND QUANTITTAIVE DISCLOSURES ABOUT MARKET RISK

Not Applicable.

# ITEM 4T. CONTROLS AND PROCEDURES

Evaluation of Disclosures Controls and Procedures. Under the supervision and with the participation of our management, including our Chief Executive Officer and our principal financial officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and the principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are effective to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934, is recorded, processed, summarized and reported within the applicable time periods specified by the Securities and

Exchange Commission's rules and forms.

Changes in Internal Control over Financial Reporting. There has been no change in the Company's internal control over financial reporting during the Company's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

### PART II

## ITEM 1. LEGAL PROCEEDINGS

The Company is not involved in any pending legal proceedings other than routine legal proceedings occurring in the ordinary course of business, which involve amounts in the aggregate believed by management to be immaterial to the financial condition and operating results of the Company.

## ITEM 1A. RISK FACTORS

Not applicable.

### ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

- (a) Not applicable.
- (b) Not applicable.
- (c) Not applicable.

## ITEM 3. DEFAULTS UPON SENIOR SECURITIES
