Findex.com, Inc.
Notes to Condensed Consolidated Financial Statements
March 31, 2005
(Unaudited)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with Generally Accepted Accounting Principles for interim financial information and with the instructions to Form 10-QSB and Item 310 of Regulation S-B. Accordingly, they do not include all of the information and footnotes required by Generally Accepted Accounting Principles for complete financial statements. The accompanying unaudited condensed consolidated financial statements reflect all adjustments that, in the opinion of management, are considered necessary for a fair presentation of the financial position, results of operations, and cash flows for the periods presented. The results of operations for such periods are not necessarily indicative of the results expected for the full fiscal year or for any future period. The accompanying financial statements should be read in conjunction with the audited consolidated financial statements of Findex.com, Inc. included in our Form 10-KSB/A for the fiscal year ended December 31, 2004.

USE OF ESTIMATES

The preparation of consolidated financial statements in conformity with Generally Accepted Accounting Principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Significant estimates used in the consolidated financial statements include the estimates of (i) doubtful accounts, sales returns, price protection and rebates, (ii) provision for income taxes and realizability of the deferred tax assets, (iii) the life and realization of identifiable intangible assets, and (iv) provisions for obsolete inventory. The amounts we will ultimately incur or recover could differ materially from current estimates.

RESTRICTED CASH

Restricted cash represents cash held in reserve by our merchant banker to allow for a potential increase in credit card chargebacks from increased consumer purchases.

INVENTORY

Inventory, including out on consignment, consists primarily of software media, manuals and related packaging materials and is recorded at the lower of cost or market value, determined on a first-in, first-out, and adjusted on a per-item, basis.

ACCOUNTING FOR LONG-LIVED ASSETS

We review property and equipment and intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability is measured by comparison of our carrying amount to future net cash flows the assets are expected to generate. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds its fair market value. Property and equipment to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

INTANGIBLE ASSETS (Restated)

In accordance with Statement of Financial Accounting Standards (“SFAS”) No. 142, *Goodwill and Other Intangible Assets*, intangible assets with an indefinite useful life are not amortized. Intangible assets with a finite useful life are amortized on the straight-line method over the estimated useful lives. The software license is being amortized over a 10 year useful life.

F-4

Table of Contents

SOFTWARE DEVELOPMENT COSTS

In accordance with SFAS No. 86, *Accounting for the Costs of Computer Software to Be Sold, Leased, or Otherwise Marketed*, software development costs are expensed as incurred until technological feasibility and marketability has been established, generally with release of a beta version for customer testing. Once the point of technological feasibility and marketability is reached, direct production costs (including labor directly associated with the development projects), indirect costs (including allocated fringe benefits, payroll taxes, facilities costs, and management supervision), and other direct costs (including costs of outside consultants, purchased software to be included in the software product being developed, travel expenses, material and supplies, and other direct costs) are capitalized until the product is available for general release to customers. We amortize capitalized costs on a product-by-product basis. Amortization for each period is the greater of the amount computed using (i) the straight-line basis over the estimated product life (generally from 12 to 18 months), or (ii) the ratio of current revenues to total projected product revenues. Total cumulative capitalized software development costs were \$2,013,383, less accumulated amortization of \$1,230,133 at March 31, 2005.

Capitalized software development costs are stated at the lower of amortized costs or net realizable value. Recoverability of these capitalized costs is determined at each balance sheet date by comparing the forecasted future revenues from the related products, based on management's best estimates using appropriate assumptions and projections at the time, to the carrying amount of the capitalized software development costs. If the carrying value is determined not to be recoverable from future revenues, an impairment loss is recognized equal to the amount by which the carrying amount exceeds the future revenues. To date, no capitalized costs have been written down to net realizable value.

SFAS No. 2, *Accounting for Research and Development Costs*, establishes accounting and reporting standards for research and development. In accordance with SFAS No. 2, costs we incur to enhance our existing products after general release to the public (bug fixes) are expensed in the period they are incurred and included in research and development costs. Research and development costs incurred prior to determination of technological feasibility and marketability and after general release to the public and charged to expense were \$37,080 and \$16,174 for the three months ended March 31, 2005 and 2004, respectively.

We capitalize costs related to the development of computer software developed or obtained for internal use in accordance with the American Institute of Certified Public Accountants Statement of Position ("SOP") 98-1, *Accounting for the Costs of Computer Software Developed or Obtained for Internal Use*. Software obtained for internal use has generally been enterprise level business and finance software that we customize to meet our specific operational needs. We have not sold, leased, or licensed software developed for internal use to our customers and have no intention of doing so in the future.

We capitalize costs related to the development and maintenance of our Website in accordance with Financial Accounting Standard Board's Emerging Issues Task Force ("EITF") Issue No. 00-2, *Accounting for Website Development Costs*. Under EITF Issue No. 00-2, costs expensed as incurred are as follows:

- planning the Website,
- developing the applications and infrastructure until technological feasibility is established,
- developing graphics such as borders, background and text colors, fonts, frames, and buttons, and
- operating the site such as training, administration and maintenance.

Table of Contents

Capitalized costs include those incurred to:

- obtain and register an Internet domain name,
- develop or acquire software tools necessary for the development work,
- develop or acquire software necessary for general Website operations,
- develop or acquire code for web applications,
- develop or acquire (and customize) database software and software to integrate applications such as corporate databases and accounting systems into web applications
- develop HTML web pages or templates,
- install developed applications on the web server,
- create initial hypertext links to other Websites or other locations within the Website, and
- test the Website applications.

We amortize Website development costs on a straight-line basis over the estimated life of the site, generally 36 months. Total cumulative Website development costs, included in other assets on our condensed consolidated balance sheets, were \$89,140, less accumulated amortization of \$25,799 at March 31, 2005.

NET REVENUE (Restated)

We derive revenues from the sale of packaged software products, product support and multiple element arrangements that may include any combination of these items. We recognize software revenue for software products and related services in accordance with SOP 97-2, *Software Revenue Recognition*, as modified by SOP 98-9, *Modification of SOP 97-2, With Respect to Certain Transactions*. We recognize revenue when persuasive evidence of an arrangement exists (generally a purchase order), we have delivered the product, the fee is fixed or determinable and collectibility is probable.

In some situations, we receive advance payments from our customers. We defer revenue associated with these advance payments until we ship the products or offer the support.

In accordance with EITF Issue No. 01-9, *Accounting for Consideration Given by a Vendor to a Customer or a Reseller of the Vendor's Product*, we generally account for cash considerations (such as sales incentives - rebates and coupons) that we give to our customers as a reduction of revenue rather than as an operating expense.

Product Revenue

We typically recognize revenue from the sale of our packaged software products when we ship the product. We sell some of our products on consignment to a limited number of resellers. We recognize revenue for these consignment transactions only when the end-user sale has occurred. Revenue for software distributed electronically via the Internet is recognized when the customer has been provided with the access codes that allow the customer to take immediate possession of the software on its hardware and evidence of the arrangement exists (web order).

Some of our software arrangements involve multiple copies or licenses of the same program. These arrangements generally specify the number of simultaneous users the customer may have (multi-user license), or may allow the customer to use as many copies on as many computers as it chooses (a site license). Multi-user arrangements, generally sold in networked environments, contain fees that vary based on the number of users that may utilize the software simultaneously. We recognize revenue when evidence of an order exists and upon delivery of the authorization code to the consumer that will allow them the limited simultaneous access. Site licenses, generally sold

in non-networked environments, contain a fixed fee that is not dependent on the number of simultaneous users. Revenue is recognized when evidence of an order exists and the first copy is delivered to the consumer.

Many of our software products contain additional content that is “locked” to prevent access until a permanent access code, or “key,” is purchased. We recognize revenue when evidence of an order exists and the customer has been provided with the access code that allows the customer immediate access to the additional content. All of the programs containing additional locked content are fully functional and the keys are necessary only to access the additional content. The customer’s obligation to pay for the software is not contingent on delivery of the “key” to access the additional content.

We reduce product revenue for estimated returns and price protections that are based on historical experience and other factors such as the volume and price mix of products in the retail channel, trends in retailer inventory and economic trends that might impact customer demand for our products. We also reduce product revenue for the estimated redemption of end-user rebates on certain current product sales. Our rebate reserves are estimated based on the terms and conditions of the specific promotional rebate program, actual sales during the promotion, the amount of redemptions received and historical redemption trends by product and by type of promotional program. We did not offer any rebate programs to our customers during the three months ended March 31, 2005 and 2004 and maintain a reserve for rebate claims remaining unpaid from 2000.

Table of Contents

Service Revenue

We offer several technical support plans and recognize support revenue over the life of the plans, generally one year.

Multiple Element Arrangements

We also enter into certain revenue arrangements for which we are obligated to deliver multiple products or products and services (multiple elements). For these arrangements, which include software products, we allocate and defer revenue for the undelivered elements based on their vendor-specific objective evidence (“VSOE”) of fair value. VSOE is generally the price charged when that element is sold separately.

In situations where VSOE exists for all elements (delivered and undelivered), we allocate the total revenue to be earned under the arrangement among the various elements, based on their relative fair value. For transactions where VSOE exists only for the undelivered elements, we defer the full fair value of the undelivered elements and recognize the difference between the total arrangement fee and the amount deferred for the undelivered items as revenue (residual method). If VSOE does not exist for undelivered items that are services, we recognize the entire arrangement fee ratably over the remaining service period. If VSOE does not exist for undelivered elements that are specified products, we defer revenue until the earlier of the delivery of all elements or the point at which we determine VSOE for these undelivered elements.

We recognize revenue related to the delivered products or services only if: (i) the above revenue recognition criteria are met, (ii) any undelivered products or services are not essential to the functionality of the delivered products and services, (iii) payment for the delivered products or services is not contingent upon delivery of the remaining products or service, and (iv) we have an enforceable claim to receive the amount due in the event that we do not deliver the undelivered products or services.

Shipping and Handling Costs

We record the amounts we charge our customers for the shipping and handling of our software products as product revenue and we record the related costs as cost of sales on our condensed consolidated statements of operations.

Customer Service and Technical Support

Customer service and technical support costs include the costs associated with performing order processing, answering customer inquiries by telephone and through Websites, e-mail and other electronic means, and providing technical support assistance to our customers. In connection with the sale of certain products, we provide a limited amount of free technical support assistance to customers. We do not defer the recognition of any revenue associated with sales of these products, since the cost of providing this free technical support is insignificant. The technical support is provided within one year after the associated revenue is recognized and free product enhancements (bug fixes) are minimal and infrequent. We accrue the estimated cost of providing this free support upon product shipment and include it in cost of sales.

INCOME TAXES

We utilize SFAS No. 109, *Accounting for Income Taxes*. SFAS No. 109 requires the use of the asset and liability method of accounting for income taxes. Under this method, deferred income taxes are provided for the temporary differences between the financial reporting basis and the tax basis of our assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

F-7

Table of Contents**EARNINGS PER SHARE**

We follow SFAS No. 128, *Earnings Per Share*, to calculate and report basic and diluted earnings per share (“EPS”). Basic EPS is computed by dividing income available to common shareholders by the weighted average number of shares of common stock outstanding for the period. Diluted EPS is computed by giving effect to all dilutive potential shares of common stock that were outstanding during the period. For us, dilutive potential shares of common stock consist of the incremental shares of common stock issuable upon the exercise of stock options and warrants for all periods, convertible notes payable and the incremental shares of common stock issuable upon the conversion of convertible preferred stock.

When discontinued operations, extraordinary items, and/or the cumulative effect of an accounting change are present, income before any of such items on a per share basis represents the “control number” in determining whether potential shares of common stock are dilutive or anti-dilutive. Thus, the same number of potential shares of common stock used in computing diluted EPS for income from continuing operations is used in calculating all other reported diluted EPS amounts. In the case of a net loss, it is assumed that no incremental shares would be issued because they would be anti-dilutive. In addition, certain options and warrants are considered anti-dilutive because the exercise prices were above the average market price during the period. Anti-dilutive shares are not included in the computation of diluted EPS, in accordance with SFAS No. 128.

RECLASSIFICATIONS

Certain accounts in the 2004 financial statements have been reclassified for comparative purposes to conform with the presentation in the 2005 financial statements.

NOTE 2 - INVENTORIES

At March 31, 2005, inventories consisted of the following:

Raw materials	\$ 134,070
Finished goods	113,977
Inventories	\$ 248,047

During the three months ended March 31, 2004, we wrote-off obsolete inventory with a carried cost totaling \$32,396. This has been included in cost of sales.

NOTE 3 - INCOME TAXES (Restated)

The provision (benefit) for taxes on net income for the three months ended March 31, 2005 and 2004 consisted of the following:

	2005	2004
Current:		
Federal	\$ ---	\$ ---
State	180	---
	180	---
Deferred:		
Federal	(141,093)	25,001
State	(8,576)	5,310
	(149,669)	30,311

Total tax provision (benefit)	\$	(149,489)	\$	30,311
-------------------------------	----	-----------	----	--------

F-8

Table of Contents**NOTE 4 - EARNINGS PER COMMON SHARE (Restated)**

Earnings per common share are computed by dividing net income by the weighted average number of shares of common stock and common stock equivalents outstanding during the year. Common stock equivalents are the net additional number of shares that would be issuable upon the exercise of the outstanding common stock options and warrants, assuming that we reinvested the proceeds to purchase additional shares at market value.

The following table shows the amounts used in computing earnings per common share and the effect on income and the average number of shares of dilutive potential common stock:

For the Three Months Ended March		
31	2005	2004
Net Income	\$ 104,676	\$ 116,863
Preferred stock dividends	---	---
Net income available to common shareholders	\$ 104,676	\$ 116,863
Basic weighted average shares outstanding	48,619,855	21,011,438
Dilutive effect of:		
Stock options	480,790	---
Convertible notes payable	---	1,800,000
Convertible Preferred Series A	---	114,000
Convertible Preferred Series B	---	40,000
Warrants	250,156	---
Diluted weighted average shares outstanding	49,350,801	22,965,438

A total of 24,285,000 and 4,075,283 dilutive potential securities for the three months ended March 31, 2005 and 2004, respectively, have been excluded from the computation of diluted earnings per common share, as their inclusion would be anti-dilutive.

NOTE 5 - COMMITMENTS AND CONTINGENCIES (Restated)

We are subject to legal proceedings and claims that arise in the ordinary course of our business. In the opinion of management, the amount of ultimate liability with respect to these actions will not materially affect our financial position.

Our employment agreements with our management team each contain a provision for an annual bonus equal to 1% of our net income (3% total). We accrue this bonus on a quarterly basis.

In 2004, we reduced our reserve for rebates payable based, in part, on our ability to meet the financial obligation of claims carried forward from our last rebate program in 2001. As such, we may have a legal obligation to pay rebates in excess of the liability recorded.

As part of a July 2004 financing transaction, we entered into a certain Registration Rights Agreement with a New York based private investment partnership pursuant to which we committed to registering all of the shares issued as part of such transaction, including those issuable under each of the two warrants. Under the terms of the Registration Rights Agreement, as amended, we had until November 12, 2004 to file a registration statement covering the shares

already issued in the transaction, and we have another 150 days thereafter to have caused such registration statement to become effective. Upon receipt of the requisite stockholder approval to increase the number of authorized common shares so as to be able to deliver the warrants, which was effectively obtained as of November 10, 2004 (and which increase was effectuated on November 10, 2004), we had 30 days in which to file a registration statement covering such shares (which was filed November 22, 2004), and another 150 days thereafter to cause such registration statement to become effective. Any delays in meeting these obligations will result in our being liable to the New York based private investment partnership in an amount equal to \$630,000 per year, pro-rated as appropriate for the duration of any such delay.

F-9

Table of Contents

NOTE 6 - RISKS AND UNCERTAINTIES

Our future operating results may be affected by a number of factors. We depend upon a number of major inventory and intellectual property suppliers. If a critical supplier had operational problems or ceased making material available to us, operations could be adversely affected.

NOTE 7 - SUBSEQUENT EVENTS

As of April 22, 2005, this registration statement had not yet been declared effective. Pursuant to an agreement reached with the New York based private investment partnership in relation to the associated accruing penalties, we have agreed to pay the New York based private investment partnership an amount in cash equal to \$100,000 in two equal installments of \$50,000 between April 22, 2005 and May 22, 2005, with no additional penalty obligations accruing for at least 60 days from April 22, 2005. Although there can be no assurance, management is hopeful that we will be to cause the registration statement to be declared effective by June 21, 2005. If we are unsuccessful in causing the registration statement to be declared effective by the SEC by June 21, 2005, however, and depending on how long any such delay in causing effectiveness to be declared by the SEC continues thereafter, it is likely to have a very material adverse effect on our business, our financial condition, including liquidity and profitability, and our results of operations.

NOTE 8 - REVISION AND RECLASSIFICATION

The company has revised its financial statements for the three months ended March 31, 2005 to reflect changes in judgment resulting from a regulatory review of our financial statements associated with our Form SB-2 filing. There was no net effect on cash provided by operating activities or cash used by investing and financing activities as a result of these revisions.

During the three month period ended June 30, 2002, we offset the remaining unpaid installment of \$1,051,785 under a certain software license we originally acquired in July 1999 (the "software license") from The Learning Company ("TLC") against the carrying amount of that software license in accordance with the terms of a tentative settlement agreement reached with TLC. Although paragraph 6 of SFAS No. 141, *Business Combinations*, which guides the recognition and measurement of intangible assets, provides that the measurement of assets in which the consideration given is cash are measured by the amount of cash paid, we have determined that too much time had passed between the date of the software license agreement (June 1999) and the date of the tentative settlement (May 2002) for such an offset to be proper. We have revised the consolidated balance sheet as of December 31, 2002 and the consolidated statements of operations, stockholders' equity, and cash flows for the year then ended. This revision returned the software license to its historical cost for determination of amortization and adjusted retained earnings for the prior year's effects of the additional amortization and reclassification of the debt extinguishment as revenue.

Also during the three month period ended June 30, 2002, we extended the estimated life of the software license from 10 years to 50 years in accordance with the terms of the tentative settlement agreement with TLC. During the year ended December 31, 2003, we extended the estimated life of the software license from 50 years to indefinite based on the terms of our final settlement with The Zondervan Corporation and TLC and our assessment of the estimated future direct and indirect cash flows from the software license, as provided by paragraphs 53 and 11 of SFAS No. 142, *Goodwill and Other Intangible Assets*. Although the software license provides for the unlimited and exclusive use of the trademarks related to the software programs, and management originally assessed the useful life of the software license as indefinite, we have determined that a 10 year life is appropriate based on the going concern opinion issued on our 2000 through 2003 financial statements. We have revised the consolidated balance sheets as of December 31, 2002, 2003, and 2004 and the consolidated statements of operations, consolidated statements of stockholders' equity, and consolidated statements of cash flows for the years then ended to reflect amortization of the software license

agreement over a 10 year useful life.

A summary of the effects of these changes is as follows:

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Cautionary Statement Regarding Forward-Looking Statements

This Form 10-QSB/A, press releases and certain information provided periodically in writing or orally by our officers or our agents contain statements which constitute forward-looking. The words "may", "would", "could", "will", "expect", "estimate", "anticipate", "believe", "intend", "plan", "goal" and similar expressions and variations thereof are intended to specifically identify forward-looking statements. These statements appear in a number of places in this Form 10-QSB/A and include all statements that are not statements of historical fact regarding the intent, belief or current expectations of us, our directors or our officers, with respect to, among other things: (i) our liquidity and capital resources, (ii) our financing opportunities and plans, (iii) our ability to attract customers to generate revenues, (iv) market and other trends affecting our future financial condition or results of operations, (v) our growth strategy and operating strategy, and (vi) the declaration and/or payment of dividends.

Investors and prospective investors are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those projected in the forward-looking statements as a result of various factors. The factors that might cause such differences include, among others, those set forth in Part I, Item 2 of this quarterly report on Form 10-QSB/A, entitled Management's Discussion and Analysis of Financial Condition and Results of Operations, including without limitation the risk factors contained in the company's annual report on Form 10-KSB/A for the period ending December 31, 2004. Except as required by law, we undertake no obligation to update any of the forward-looking statements in this Form 10-QSB/A after the date of this report.

This information should be read in conjunction with the financial statements and the notes thereto included in Item 1 of Part I of this Quarterly Report and the audited financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the company's Annual Report on Form 10-KSB/A for the fiscal year ended December 31, 2004.

MANAGEMENT OVERVIEW

During the first quarter of 2005, and for the second consecutive year, we released an upgrade to our top-selling financial and data management software, Membership Plus®. As a result of this release, as well as our release in December 2004 of our most recent upgrade to QuickVerse®, our first quarter 2005 revenues were slightly higher than those during the first quarter of 2004. Also during the first quarter of 2005, we introduced two new QuickVerse® editions, QuickVerse® 2005 Essentials and QuickVerse® 2005 Platinum. QuickVerse® 2005 Essentials appeals to those customers who are seeking their first Bible study software and it is a great way to begin a Bible study software collection. It has a suggested retail price of \$49.95. QuickVerse® 2005 Platinum is the most comprehensive Bible study edition we have to offer and appeals to scholars who are serious about Bible study. It has a suggested retail price of \$799.95. We believe that the unique features of these two new editions will provide us with an opportunity to broaden our customer base as they appeal not only to those just beginning their journey into Bible study but also to the scholars who are searching for an in-depth knowledge of the Bible. Our performance during the first quarter of 2005 marks the third straight year in which we have increased our gross revenues during our first quarter. Although there can be no assurance, we believe that we can sustain our revenue growth through the second and third quarters based upon our anticipated introduction during the second quarter of our QuickVerse® Macintosh edition, which was announced during the first quarter 2005. We believe that this introduction will make us the only publisher of Bible reference software for each of Windows®, Macintosh®, Pocket PC® and Palm OS®.

Results Of Operations for Quarters Ending March 31, 2005 and March 31, 2004

Our software products are highly seasonal. More than 50% of our annual sales are expected to occur in the five months of September through January; the five months of April through August are generally our weakest, generating only about 33% of our annual sales.

-1-

Table of Contents

During the three months ended March 31, 2004, we wrote down a distinct category of obsolete inventory of approximately \$32,000 which is included in cost of sales. This write down item had no effect on the cash flow statement. Our net income decreased approximately \$12,000 from a net income of approximately \$117,000 for the three months ended March 31, 2004 to a net income of approximately \$105,000 for the three months ended March 31, 2005. For the three months ended March 31, 2004 and 2005 we did not recognize any non-cash expenses related to common shares of stock and warrants issued for services.

Revenues

We derive revenues from the sale of packaged software products, product support and multiple element arrangements that may include any combination of these items. Revenue is recognized when persuasive evidence of an arrangement exists (generally a purchase order), we have delivered the product, the fee is fixed or determinable and collectibility is probable. For our packaged software products, we typically recognize revenue from the sale when we ship the product. We sell some of our products on consignment to a limited number of resellers. We recognize revenue for these consignment transactions only when the end-user sale has occurred. Service revenue resulting from technical support plans is recognized over the life of the plan which is generally one year. Revenue associated with advance payments from our customers is deferred until we ship the product or offer the support service. Revenue for software distributed electronically via the Internet is recognized when the customer has been provided with the access codes that allow the customer to take immediate possession of the software on its hardware and evidence of the arrangement exists. For revenue arrangements involving multiple products or products and services, we allocate and defer revenue for the undelivered products or products and services based on their vendor-specific objective evidence of fair value, which is generally the price charged when that product or product and service is sold separately.

We reduce product revenue for estimated returns and price protections that are based on historical experience and other factors such as the volume and price mix of products in the retail channel, trends in retailer inventory and economic trends that might impact customer demand for our products. Estimated returns are also based upon a percentage of total retail and direct sales. Direct sales accounted for approximately 65% of our 2004 fiscal year revenue. We account for cash considerations (such as sales incentives - rebates and coupons) that we give our customers as a reduction of revenue rather than as an operating expense. Product revenue is also reduced for the estimated redemption of end-user rebates on certain current product sales. We did not have any rebate programs during the three months ended March 31, 2004 and 2005, respectively.

Trends that our returns typically follow include (i) the seasonality of sales, and (ii) the fact that, generally, relatively higher return rates occur during periods of new title or title version releases. Historically, actual returns have been within management's prior estimates, however, we cannot be certain that any future write-offs exceeding reserves will not occur or that amounts written off will not have a material adverse effect on our business, our financial condition, including liquidity and profitability, and our results of operations. Management continually monitors and adjusts these allowances to take into account actual developments and sales results in the marketplace. In the past, particularly during title and title version transitions, we have had to increase price concessions to our retail customers.

Product returns from distributors and Christian bookstores are allowed primarily in exchange for new products or for credit towards purchases as part of a stock-balancing program. These returns are subject to certain limitations that may exist in the contract in each case. Under certain circumstances, such as termination or when a product is defective, distributors and bookstores could receive a cash refund if returns exceed amounts owed. Returns from sales made directly to the consumer are accepted within 45 days of purchase and are issued a cash refund. Product returns, price protections or price concessions that exceed our reserves could materially adversely affect our business and operating results and could increase the magnitude of quarterly fluctuations in our operating and financial results.

Software products are sold separately, without an obligation of future performance such as upgrades, enhancements or additional software products, and are sold with post contract customer support services such as customer service and technical support assistance. In connection with the sale of certain products, we provide a limited amount of free technical support assistance to our customers. We do not defer the recognition of any revenue associated with sales of these products, since the cost of providing this free technical support is insignificant. The technical support is provided within one year after the associated revenue is recognized and free product enhancements (bug fixes) are minimal and infrequent. We accrue the estimated cost of providing this free support upon product shipment and include it in cost of sales.

Shipping and handling costs in connection with our software products are expensed as incurred and included in cost of sales.

-2-

Table of Contents

Gross revenues increased approximately \$269,000 from approximately \$1,715,000 for the three months ended March 31, 2004 to approximately \$1,984,000 for the three months ended March 31, 2005. Such increase is due to our release of an enhanced version of Membership Plus® during the first quarter of 2005 and an enhanced version of QuickVerse® during late fourth quarter of 2004. During the fourth quarter of 2004 when QuickVerse® 2005 was released, it was available in three editions ranging in price from \$99.95 to \$299.95. During the first quarter of 2005, we released an enhanced version of the QuickVerse® Essentials edition which retails for \$49.95. In addition, we released a new edition to the QuickVerse® family, the QuickVerse® Platinum edition, which contains the most Bible translations and reference titles of any QuickVerse® edition and retails for \$799.95. Comparatively, during the three months ended March 31, 2004, we had the product release of Membership Plus® 8.0 which ranged in price from \$199.95 to \$299.95 and the late December 2003 release of QuickVerse® 8.0 which ranged in price from \$99.95 to \$299.95.

Sales returns and allowances increased approximately \$102,000 from approximately \$209,000 for the three months ended March 31, 2004 to approximately \$311,000 for the three months ended March 31, 2005 and increased as a percentage of gross sales from approximately 12% for the three months ended March 31, 2004 to approximately 16% for the three months ended March 31, 2005. The upward trend in sales returns and allowances as a percentage is attributable to our release of enhanced versions of QuickVerse® and Membership Plus® in December of 2004 and February of 2005, respectively. The release of these two enhanced products resulted in an increased quantity of sales returns and allowances of prior versions as distributors and stores made shelf space during the first quarter of 2005. Furthermore, the timeframe between the last enhancements for both of these titles was approximately one year. In the past, product enhancements were typically extended over two to three years. Although we expect to continue to release enhanced versions of our products annually, we anticipate the sales return and allowances as a percentage to follow a downward trend due to the increased focus of our sales efforts to the end-user and our decreased presence in the retail market because incidents of return are lower for sales direct to end-users than sales into the retail stores.

Cost of Sales

Cost of sales consists primarily of royalties to third party providers of intellectual property and the direct costs and manufacturing overhead required to reproduce, package, fulfill and ship the software products. Direct costs and manufacturing overhead also include the amortized software development costs and the non-capitalized technical support wages. The direct costs and manufacturing overhead decreased approximately \$15,000 from approximately \$389,000 for the three months ended March 31, 2004 to approximately \$374,000 for the three months ended March 31, 2005 and decreased as a percentage of gross revenues approximately 4% from approximately 23% for the three months ended March 31, 2004 to approximately 19% for the three months ended March 31, 2005. The three months ended March 31, 2004 include the write down of a distinct category of obsolete inventory of approximately \$32,000. Furthermore, fulfillment costs from a third-party warehouse and included in the manufacturing overhead costs noted above decreased approximately \$20,000 from approximately \$35,000 for the three months ended March 31, 2004 to approximately \$15,000 for the three months ended March 31, 2005 as we moved our retail fulfillment to a new outside entity in late October 2004. Both the write down of obsolete inventory and the fulfillment costs explain the decrease of the direct costs and manufacturing overhead when compared as a percentage of gross revenues. The amortization costs recognized during the three months ended March 31, 2004 resulted from several new software releases in late 2003 and early 2004 including QuickVerse® 8.0 and Membership Plus® 8.0. Similarly, the amortization costs recognized during the three months ended March 31, 2005 resulted from the December 2004 release of QuickVerse® 2005 and the February 2005 release of Membership Plus® 2005. The direct costs and manufacturing overhead percentage are expected to continue at the 2005 levels as working capital remains more consistent and as more development projects are implemented in a shortened timeframe.

Royalties to third party intellectual property content providers increased approximately \$55,000 from approximately \$80,000 for the three months ended March 31, 2004 to approximately \$135,000 for the three months ended March 31, 2005. Royalties also increased as a percentage of gross revenues from approximately 4.7% for the three months ended March 31, 2004 to approximately 6.8% for the three months ended

Edgar Filing: FINDEX COM INC - Form 10QSB/A

March 31, 2005. The increase of royalties reflects the release of the QuickVerse® 2005 editions in early December 2004, and the two additional QuickVerse® editions, specifically QuickVerse® Essentials and QuickVerse® Platinum, which were released in early March of 2005. Furthermore, we sold some of the older QuickVerse® versions to liquidators at a reduced price throughout the first quarter of 2005 but had no such sales during the first quarter of 2004. During the year ended 2004, we renegotiated several royalty contracts which resulted in some cases in a higher royalty rate along with access to more content. The royalty rate as a percentage of gross sales is expected to increase in the future as sales to new users are expected to increase and as more development projects are implemented for new and/or enhanced products. However, upgrade sales will continue to be subject to royalties only on content additions of the upgraded version.

-3-

Table of Contents

Software development costs are expensed as incurred until technological feasibility and marketability has been established, at which time development costs are capitalized until the software title is available for general release to customers. Development costs include direct production costs (including labor directly associated with the development projects), indirect costs (including allocated fringe benefits, payroll taxes, facilities costs and management supervision), and other direct costs (including costs of outside consultants, purchased software to be included in the software product being developed, travel expenses, material and supplies, and other direct costs). Software development is segregated by title and technology platform. Once a product has been successfully released, subsequent revisions and upgrades are considered development and the costs of the revision and upgrade are capitalized. Capitalized costs are amortized on a product-by-product basis using the greater of (i) the straight-line amortization over the estimated life of the product (generally from 12 to 18 months) or (ii) the ratio of current revenues from the product to the total projected revenue over the life of the product. Generally, we consider technological feasibility to have been established with the release of a beta version for testing.

Software development costs are summarized in the table below. The software development costs, consisting primarily of direct and indirect labor and related overhead charges, capitalized during the three months ended March 31, 2004 and 2005 were approximately \$74,000 and approximately \$265,000, respectively. Accumulated amortization of these development costs included in cost of sales totaled approximately \$152,000 and approximately \$183,000 for the three months ended March 31, 2004 and 2005, respectively. The increase in both the capitalization and amortization is a direct result of the increase in the number of development projects and the consistent one year turn around on enhanced versions of our two best-selling product lines QuickVerse® and Membership Plus®.

Three Months Ended March 31,	2005	2004
Beginning balance	\$ 701,289	\$ 584,706
Capitalized	264,649	73,628
Amortized (cost of sales)	182,688	152,213
Ending balance	\$ 783,250	\$ 506,121
Research and development expense (General and administrative)	\$ 37,080	\$ 16,174

Sales, General and Administrative

With gross revenues increasing approximately \$269,000 for the first quarter of 2005 from the first quarter of 2004, sales expenses also increased approximately \$185,000 from approximately \$243,000 for the three months ended March 31, 2004 to approximately \$428,000 for the three months ended March 31, 2005. Included in sales expenses, commissions to a third-party telemarketing firm increased approximately \$105,000 from approximately \$166,000 for the three months ended March 31, 2004 to approximately \$271,000 for the three months ended March 31, 2005. Commissions also increased as a percentage of gross revenues from approximately 9.7% to approximately 13.7% for the three months ended March 31, 2004 and 2005, respectively. This increase is attributed to the increased focus of our sales to the direct consumer along with the number of new and enhanced product releases during the first quarter of 2005 compared with just one product release during the first quarter of 2004. Advertising and direct marketing costs increased approximately \$84,000 from approximately \$73,000 for the three months ended March 31, 2004 to approximately \$157,000 for the three months ended March 31, 2005 and increased as a percentage of gross revenues from approximately 4% to 8%, respectively. This increase is a direct result of continuing to market our products online through multiple sources, continuing to increase and focus more on our direct marketing efforts, and the increased number of publication advertisements due to the new product enhancements of QuickVerse® and Membership Plus®.

Table of Contents

Research and development costs include direct production costs (including labor directly associated with the development projects), indirect costs (including allocated fringe benefits, payroll taxes, facilities costs and management supervision), and other direct costs (including costs of outside consultants, purchased software to be included in the software product being developed, travel expenses, material and supplies, and other direct costs). Software development costs related to third-party developers and direct labor expensed as research and development (see table above) amounted to approximately \$16,000 for the three months ended March 31, 2004 compared to approximately \$37,000 incurred for the three months ended March 31, 2005. The increase in 2005 reflects more research and development costs associated with maintenance issues on titles after they are released to the general public along with exploring new platforms for future products. Research and development expenses are expected to increase in future periods as we add new products and versions to our product mix.

Total personnel costs decreased approximately \$13,000 from approximately \$395,000 for the three months ended March 31, 2004 to approximately \$382,000 for the three months ended March 31, 2005. Direct salaries and wages increased approximately \$64,000 from approximately \$356,000 for the three months ended March 31, 2004 to approximately \$420,000 for the three months ended March 31, 2005 but remained consistent as a percentage of gross revenues at approximately 21%. This includes approximately \$5,000 in expense for upper management year-end bonus accrual. This increase in salaries and wages is a result of increasing our sales and marketing team, technical support staff and development staff. However, the associated health care costs decreased approximately \$15,000 from approximately \$48,000 for the three months ended March 31, 2004 to approximately \$33,000 for the three months ended March 31, 2005 as we restructured our health benefits plans. The capitalization of direct and indirect labor and related overhead charges as software development costs (see "Cost of Sales" above) increased by approximately \$52,000 from approximately \$45,000 for the three months ended March 31, 2004 to approximately \$97,000 for the three months ended March 31, 2005. This increase is due to the addition of development staff and the increased amount of new development projects. It is anticipated that personnel costs will increase in future periods as operating capital is available to fund full staffing of our product development team and expansion of the direct sales staff.

Direct legal costs increased approximately \$30,000 for the three months ended March 31, 2005 as we continue to work through the registration process for our registration statement on Form SB-2. It is anticipated that legal costs will continue to increase as we hold our first annual meeting of stockholders later this year and pursue our business plan for growth by acquiring companies and software title properties that are synergistic with our current product line and customer base. Telecommunications costs decreased approximately \$23,000 for the three months ended March 31, 2005 as we switched our local and long distance carriers in order to take advantage of the provider's current technology. Our increased call volume enabled us to change our service to dedicated T-1 lines which in turn reduced the long distance charges. Furthermore, we invested in Internet protocol phones for our remote locations which reduced the overall local and long distance charges in our Illinois and Iowa locations. The increased call volume in the technical support and customer service departments resulted from the release of the two major product upgrades beginning in December 2004 through March 2005. Corporate service fees increased approximately \$33,000 for the three months ended March 31, 2005. These fees are related to the hiring of an outside consultant and the expense for a 2004 issuance of a warrant to purchase 600,000 shares of common stock allocated over the term of the consulting contract. Interest expense for the three months ended March 31, 2005 decreased by approximately \$11,000 compared to 2004. This is due to our continuing efforts to reduce our trade payables and meet the scheduled terms and the reduced loans and long-term note payables.

Amortization

Amortization expense increased approximately \$7,000 for the three months ended March 31, 2005. The software license acquired from TLC in July of 1999 is amortized over a 10 year useful life. Amortization expense for 2005 reflects the continual amortization of the software license along with the amortization for the launch of our Website, www.quickverse.com, during the second quarter of 2004.

Income Tax Benefits

Our effective tax rate differs from the statutory federal rate due to differences between income and expense recognition prescribed by the Internal Revenue Code and Generally Accepted Accounting Principles. We utilize different methods and useful lives for depreciating property and equipment. Changes in estimates (reserves) are recognized as expense for financial reporting but are not deductible for income tax purposes.

-5-

Table of Contents

We have recognized a net deferred tax asset whose realization depends on generating future taxable income. At March 31, 2005, management established the valuation allowance based on the assessment that we will produce sufficient income in the future to realize our net deferred tax asset. The resulting deferred tax liability reflects income taxes payable in future periods on the net deductible differences related to the software license. We currently have net operating loss carryforwards, for income tax purposes, of approximately \$7,648,000. The carryforwards are the result of income tax losses generated in 2000 (\$2,480,000 expiring in 2020) and 2001 (\$5,168,000 expiring in 2021). We will need to achieve a minimum annual taxable income, before deduction of operating loss carryforwards, of approximately \$450,000 to fully utilize the current loss carryforwards. We believe this is achievable through careful expense management and continued introduction of new products and enhanced versions of our existing products.

Although there can be no assurance, management expects the deductible temporary differences (reserves) to reverse sometime beyond the next fiscal year.

Liquidity And Capital Resources

Our primary need for liquidity and capital resources are the funding of our continued operations, which includes the ongoing internal development of new products and expansion and upgrade of existing products and our pursuit of future strategic product line and/or corporate acquisitions and licensing.

As of March 31, 2005, we had \$1,399,623 in current assets, \$1,234,205 in current liabilities and a retained deficit of \$5,774,485. We had a loss before income taxes of \$44,813 for the three months ended March 31, 2005.

Net cash provided by operating activities was approximately \$82,000 for the three months ended March 31, 2004 and approximately \$248,000 for the three months ended March 31, 2005. The increase in cash provided was primarily due to an increase in the amounts received from customers resulting from increased sales.

Net cash used in investing activities was approximately \$92,000 for the three months ended March 31, 2004 and approximately \$279,000 for the three months ended March 31, 2005. The increase in cash used for investing activities results from capitalizing costs associated with software development and upgrading our internal computer equipment and software in order to increase our operating efficiency capabilities.

Net cash used by financing activities was approximately \$1,000 for the three months ended March 31, 2004 and approximately \$27,000 for the three months ended March 31, 2005. Cash used by financing activities reflects payments made on long-term note payables.

On July 19, 2004, we completed an equity financing in the amount of \$1,750,000 through a private placement with Barron Partners, L.P. Under the terms of the agreement, Barron purchased 21,875,000 restricted shares of common stock at a price of \$0.08 per share. In addition, according to the terms of the agreement, Barron received two warrants to purchase common stock. The first warrant entitles the holder to purchase up to 10,937,500 shares of common stock at a price of \$0.18 per share and the second warrant entitles the holder to purchase up to 10,937,500 additional shares of common stock at a price of \$0.60 per share. The original terms of the agreement called for the exercise price associated with each of the warrants to be subject to adjustment based on the occurrence or non-occurrence of certain events. An amendment to the Barron Stock Purchase Agreement was entered into on September 30, 2004 which voided these provisions. See Exhibits 10.10, 10.11, 10.12, and 10.13.

ITEM 3. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures.

Our CEO and CFO have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the fiscal quarter covered by this report on Form 10-QSB. Based on this evaluation, our CEO and CFO have concluded that these disclosure controls and procedures are effective and designed to ensure that the information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the requisite time periods.

(b) Changes In Internal Control over Financial Reporting.

No changes in our disclosure controls and procedures, internal controls over financial reporting or other factors have occurred during the fiscal quarter covered by this report that would materially affect or be reasonably likely to materially affect our disclosure controls and procedures or internal controls over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

As of the date of this report, there were no pending material legal proceedings to which we were a party and we were not aware that any were contemplated. There can be no assurance, however, that we will not be made a party to litigation in the future. Moreover, there can be no assurance that our insurance coverage will prove adequate to cover all liabilities arising out of any claims that may be initiated against us in the future. Any finding of liability imposed against us coupled with a lack of corresponding insurance coverage is likely to have an adverse effect on our business, our financial condition, including liquidity and profitability, and our operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

Subsequent to December 31, 2004, the company restored a stale check that was issued to Business Investor Services, Inc. as payment in full of a note payable. This resulted in the conversion of the note payable into 466,666 shares of common stock. The conversion of such securities was effected without registration under the Securities Act of 1933, as amended, based on their being exempted securities under Section 3(a)(9) thereof. There were no underwriters or placement agents involved in this issuance and no commissions were paid.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

There were no reportable events under this Item 3 during the quarterly period ended March 31, 2005.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There were no reportable events under this Item 4 during the quarterly period ended March 31, 2005.

There were no material changes to the procedures by which security holders may recommend nominees to our board of directors.

ITEM 5. OTHER INFORMATION.

The Annual Meeting of the Stockholders of Findex.com, Inc. will be held on September 8, 2005. Stockholders of record who wish to submit a proposal at the 2005 Annual Meeting must provide written notice to the Secretary of the company in accordance with Article IX of our Articles of Incorporation. Under our Articles of Incorporation, such notice must be received by the Secretary no earlier than July 10, 2005, and no later than August 9, 2005.

There were no material changes to the procedures by which security holders may recommend nominees to our board of directors.

ITEM 6. EXHIBITS.

No. Description of Exhibit

2.1 Share Exchange Agreement between Findex.com, Inc. and the stockholders of Reagan Holdings, Inc. dated March 7, 2000, incorporated by reference to Exhibit 2.1 on Form 8-K filed March 15, 2000.

3(i)(1)

Edgar Filing: FINDEX COM INC - Form 10QSB/A

Articles of Incorporation of Findex.com, Inc., incorporated by reference to Exhibit 3.1 on Form 8-K filed March 15, 2000.

3(i)(2) Amendment to Articles of Incorporation of Findex.com, Inc. dated November 12, 2004 incorporated by reference to Exhibit 3.1(ii) on Form 10-QSB filed November 12, 2004.

3(ii) By-Laws of Findex.com, Inc., incorporated by reference to Exhibit 3.3 on Form 8-K filed March 15, 2000.
