PART I

FORWARD-LOOKING INFORMATION

This annual report includes forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Statements in this Annual Report on Form 10-K that are based on other than historical information, or that express the Bank's expectations regarding future events or determinations, are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations or forecasts of future events and include, among others:

statements with respect to the beliefs, plans, objectives, goals, targets, commitments, designs, guidelines, expectations, anticipations, and future financial condition, results of operations and performance of Zions Bancorporation, National Association and its subsidiaries (collectively "Zions Bancorporation, N.A.," "the Bank," "we," "our," "us"); and

statements preceded by, followed by, or that include the words "may," "could," "should," "would," "believe," "anticipate," "estimate," "expect," "intend," "target," "commit," "design," "plan," "projects," and the negative thereof and similar words and expressions.

Zions Bancorporation, National Association is the successor to Zions Bancorporation by merger of Zions Bancorporation into ZB, N.A. on September 30, 2018. References to "Zions Bancorporation, N.A.," "the Bank," "we," "our," and "us" are intended to refer to Zions Bancorporation and its subsidiaries for periods prior to the merger and to Zions Bancorporation, National Association, and its subsidiaries for periods on and after the merger.

These forward-looking statements are not guarantees of future performance, nor should they be relied upon as representing management's views as of any subsequent date. Forward-looking statements by their nature address matters that are, to different degrees, uncertain, including without limitation, future financial and operating results. Actual results may differ materially from those presented, either expressed or implied, including, but not limited to, those presented in Management's Discussion and Analysis ("MD&A"). Important risk factors that may cause such material differences include, but are not limited to:

the Bank's ability to successfully execute its business plans, manage its risks, and achieve its objectives, including its operating leverage;

the impact of acquisitions, dispositions, and corporate restructurings;

increases in the levels of losses, customer bankruptcies, bank failures, claims, and assessments;

the ability of the Bank to retain and recruit executives and other personnel necessary for their businesses and competitiveness;

changes in local, national and international political and economic conditions, including without limitation the political and economic effects of the fiscal imbalance in the United States ("U.S.") and other countries, potential or actual downgrades in ratings of sovereign debt issued by the United States and other countries, and other major developments, including wars, military actions, and terrorist attacks;

changes in financial and commodity market prices and conditions, either internationally, nationally or locally in areas in which the Bank conducts its operations, including without limitation rates of business formation and growth, commercial and residential real estate development, real estate prices, agricultural-related commodity prices, and oil and gas-related commodity prices;

changes in markets for equity, fixed income, commercial paper and other securities, commodities, including availability, market liquidity levels, and pricing;

changes in interest rates, the quality and composition of the loan and securities portfolios, demand for loan products, deposit flows and competition;

the rate of change of the Bank's interest-sensitive assets and liabilities relative to changes in benchmark interest rates;

changes in fiscal, monetary, regulatory, trade and tax policies and laws, and regulatory assessments and fees, including policies of the U.S. Department of Treasury, the Office of the Comptroller of the Currency ("OCC"),

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation (“FDIC”), the Securities and Exchange Commission (“SEC”), and the Consumer Financial Protection Bureau (“CFPB”);

- changes in consumer spending and savings habits;
- inflation and deflation;
- increased competitive challenges and expanding product and pricing pressures among financial institutions;
- legislation or regulatory changes which adversely affect the Bank’s operations or business;
- the Bank’s ability to comply with applicable laws and regulations;
- costs of deposit insurance and changes with respect to FDIC insurance coverage levels;
- any impairment of our goodwill or other intangibles, or any adjustment of valuation allowances on our deferred tax assets (“DTAs”) due to adverse changes in the economic environment, declining operations of the reporting unit, or a change to the corporate statutory tax rate or other similar changes if and as implemented by local and national governments, or other factors;
- the impact of rules and regulations on our required regulatory capital and liquidity levels, governmental assessments on us, the scope of business activities in which we may engage, the manner in which we engage in such activities, and the fees we may charge for certain products and services;
- uncertainties related to the application of the National Bank Act of 1863, 12 U.S.C. 38 (the “National Bank Act”) and OCC regulations to the Bank’s corporate affairs as more fully described under “Risk Factors”;
- changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board (“FASB”) or regulatory agencies;
- risks and uncertainties related to the ability to obtain shareholder and regulatory approvals when required, or the possibility that such approvals may be delayed;
- new legal claims against the Bank, including litigation, arbitration and proceedings brought by governmental or self-regulatory agencies, or changes in existing legal matters;
- economies of scale attendant to the development of digital and other technologies by much larger bank and non-bank competitors, and the possible entry of technology “platform” companies into the financial services business;
- the Bank’s ability to develop and maintain secure and reliable information technology systems, including as necessary to guard against fraud, cybersecurity and privacy risks; and
- the Bank’s implementation of new technologies.

Except to the extent required by law, the Bank specifically disclaims any obligation to update any factors or to publicly announce the result of revisions to any of the forward-looking statements included herein to reflect future events or developments.

ITEM 1. BUSINESS

DESCRIPTION OF BUSINESS

Zions Bancorporation, National Association and its subsidiaries (collectively “Zions Bancorporation, N.A.,” “the Bank,” “we,” “our,” “us”) is a national commercial bank headquartered in Salt Lake City, Utah. The Bank owns and operates 433 branches at year-end 2018. The Bank provides a full range of banking and related services, primarily in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Oregon, Texas, Utah, Washington, and Wyoming. The Bank conducts its operations through seven separately managed and branded segments, which we sometimes refer to as “affiliates” or by reference to their respective brands. Full-time equivalent employees totaled 10,201 at December 31, 2018. For further information about the Bank’s industry segments, see “Business Segment Results” on page 43 in MD&A and Note 21 of the Notes to Consolidated Financial Statements. For information about the Bank’s foreign operations, see “Foreign Exposure and Operations” on page 50 in MD&A. The “Executive Summary” on page 31 in MD&A provides further information about the Bank.

PRODUCTS AND SERVICES

The Bank focuses on providing community banking services by continuously strengthening its core business lines of (1) small- and medium-sized business and corporate banking; (2) commercial and residential development, construction and term lending; (3) retail banking; (4) treasury cash management and related products and services; (5) residential mortgage lending and servicing; (6) trust and wealth management; (7) limited capital markets activities, including municipal finance advisory and underwriting; and (8) investment activities. It operates primarily through seven geographic regions, each with its own local branding, chief executive officer and management team.

In addition to providing a wide variety of commercial products and services, the Bank provides a range of personal banking services to individuals, including home mortgages, bankcard, other installment loans, home equity lines of credit, checking accounts, savings accounts, certificates of deposit of various types and maturities, trust services, safe deposit facilities, and Internet and mobile banking. The Bank provides services to key market segments through its Private Client Services and Executive Banking Groups. It offers self-directed brokerage services through Zions Direct and also offers comprehensive and personalized wealth management and investment services.

The Bank has built specialized lines of business in capital markets and public finance and is a leader in small business administration (“SBA”) lending. The Bank is one of the nation’s largest providers of SBA 7(a) and SBA 504 financing to small businesses. It owns an equity interest in FAMC and is its top originator of secondary market agricultural real estate mortgage loans. The Bank provides finance advisory and corporate trust services for municipalities. The Bank also provides bond transfer, stock transfer, and escrow services nationally in its corporate trust business.

COMPETITION

The Bank operates in a highly competitive environment. The Bank’s most direct competition for loans and deposits comes from other commercial banks, credit unions, and thrifts, including institutions that do not have a physical presence in our market footprint but solicit via the Internet and other means. In addition, the Bank competes with finance companies, mutual funds, insurance companies, brokerage firms, securities dealers, investment banking companies, financial technology and other non-traditional lending and banking companies, and a variety of other types of companies. These companies may have fewer regulatory constraints and some have lower cost structures or tax burdens.

The primary factors in competing for business include the quality of service delivered, our local community knowledge, convenience of office locations, online banking functionality and other delivery methods, range of products offered, pricing and the overall relationship with our clients. The Bank must compete effectively along all of these dimensions to remain successful.

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

SUPERVISION AND REGULATION

This section describes the material elements of selected laws and regulations applicable to the Bank. The descriptions are not intended to be complete and are qualified in their entirety by reference to the full text of the statutes and regulations described. Changes in applicable laws or regulations, and in their application by regulatory agencies, cannot be predicted, but they may have a material effect on the business and results of the Bank.

On September 30, 2018, we completed the merger of Zions Bancorporation, the Bank's former holding company, with and into Zions Bancorporation, N.A., sometimes referred to herein as the "restructuring." More information about the restructuring and its effects can be found in the proxy statement filed by Zions Bancorporation with the SEC on July 24, 2018. In connection with completing the restructuring, we also received approval of an application filed with the Financial Stability Oversight Council ("FSOC") seeking a determination that the Bank is not "systemically important" as defined by provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act"). As a result of the restructuring and FSOC approval:

¶The Bank is the top-level publicly-traded entity within our corporate structure.

¶The Bank is no longer subject to:

Examinations by the Board of Governors of the Federal Reserve System ("FRB"). The Bank's primary regulator is the OCC and continues to be subject to examinations by the Bureau for Consumer Finance Protection, commonly referred to as the CFPB, with respect to consumer financial regulations;

Certain requirements of the Dodd-Frank Act, as more fully described below;

The Securities Act of 1933, as amended (the "Securities Act"), but remains subject to the requirements of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), including the reporting requirements thereunder. However, this will not inhibit the Bank's ability to raise capital. The Bank is subject to OCC regulations governing securities offerings and continues to make filings required under the Exchange Act with the SEC as a voluntary filer.

The banking and financial services business in which we engage is and remains highly regulated. Such regulation is intended, among other things, to improve the stability of banking and financial companies and to protect the interests of customers, including both loan customers and depositors, and taxpayers. These regulations are not, however, generally intended to protect the interests of our shareholders or creditors, and in fact may have the consequence of reducing returns to our shareholders. Banking laws and regulations promulgated thereunder have given financial regulators expanded powers over many aspects of the financial services industry, which have reduced and may continue to reduce returns earned by shareholders.

Legislative changes to laws governing the financial industry occur frequently; some of this legislation materially affects the manner in which we and other financial institutions operate, including increasing the costs and other burdens of conducting our businesses. In addition, the banking agencies regularly promulgate new regulations or modify existing regulations, which also have significant impact on the financial industry. The content and impact of such regulatory changes cannot presently be determined. The Bank is committed to both satisfying regulatory expectations and providing attractive shareholder returns. However, given the ever-evolving regulatory environment, the results of these efforts cannot yet be known.

General

The Bank is subject to the provisions of the National Bank Act and other statutes governing national banks, as well as the rules and regulations of the OCC, the CFPB, and the FDIC. It is also subject to examination and supervision by the OCC and examination by the CFPB in respect of federal consumer financial regulations. The Bank, as well as some of its subsidiaries, is also subject to regulation by other federal and state agencies. These regulatory agencies may exert considerable influence over our activities through their supervisory and examination roles. Our brokerage and investment advisory subsidiaries are regulated by the SEC, Financial Industry Regulatory Authority ("FINRA") and/or state securities regulators.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The National Bank Act

Prior to the restructuring, Zions Bancorporation's corporate affairs were governed by Utah state law and securities law matters were governed by the federal securities laws, including the Securities Act and Exchange Act, as administered by the SEC. Each of these legal regimes is well-developed and used widely by public companies.

Following the restructuring, the Bank's corporate affairs are governed by the National Bank Act and related regulations administered by the OCC. With respect to securities matters, the Bank is not subject to the Securities Act, but is subject to OCC regulations governing securities offerings. The Bank's common stock and certain other securities are registered or deemed registered under the Exchange Act, which vests the OCC with the power to administer and enforce certain sections of the Exchange Act applicable to banks such as the Bank, though the Bank continues to make filings required by the Exchange Act with the SEC as a voluntary filer. These statutory and regulatory regimes are not as well developed as the corporate and securities law regimes applicable to many other publicly held corporations. See discussion under "Risk Factors."

The Dodd-Frank Act

The Dodd-Frank Act and related regulations broadly affect the financial services industry. Among other things, the Dodd-Frank Act involves mandatory divestiture of certain equity investments, increasing regulation of executive and incentive-based compensation, requiring banks to pay increased fees to regulatory agencies, and requiring numerous other provisions aimed at strengthening the sound operation of the financial services sector.

Regulations promulgated under the Dodd-Frank Act require many banks to maintain greater levels of capital and liquid assets than was generally the case prior to the enactment of the Dodd-Frank Act and limit the forms of capital that such banks rely upon for regulatory purposes. Certain bank holding companies and other financial institutions, known as systemically important financial institutions, or SIFIs, are required to adhere to "enhanced prudential supervision" requirements of the Dodd-Frank Act and the annual Comprehensive Capital Analysis ("CCAR") process administered by the FRB, which in effect requires SIFIs to maintain capital based on hypothetical scenarios dictated by the FRB. As a result of the restructuring and FSOC approval, the Bank is no longer subject to these requirements (including the prior non-objection requirement under CCAR for declaring any dividends or share repurchases), or the liquidity and capital requirements applicable to SIFIs. However, the Bank continues to be subject to the OCC's heightened standard guidelines, which establish enhanced requirements for national banks with assets of \$50 billion or more, and other regulatory requirements that reduce its flexibility to return capital to shareholders and respond to market developments and opportunities in such areas as capital raising and acquisitions. Additionally, in May 2018, the Economic Growth, Regulatory Relief, and Consumer Protection Act, also known as "the Crapo Bill," was signed into law, reducing regulatory requirements for many banking institutions and exempting the Bank from the capital planning actions as required by the Dodd-Frank Act.

The Dodd-Frank Act's provisions and related regulations also affect the fees we must pay to regulatory agencies and the pricing of certain products and services, including the following:

• The assessment base for federal deposit insurance was changed to consolidated assets less tangible capital instead of the amount of insured deposits.

• The federal prohibition on the payment of interest on business transaction accounts was repealed.

• The FRB was authorized to issue and did issue regulations governing debit card interchange fees.

The Dodd-Frank Act also created the CFPB, which is responsible for promulgating regulations designed to protect consumers' financial interests and examining large financial institutions for compliance with, and enforcing, those regulations. The Dodd-Frank Act adds prohibitions on unfair, deceptive or abusive acts and practices to the scope of consumer protection regulations overseen and enforced by the CFPB. The Dodd-Frank Act subjected national banks to the possibility of further regulation by restricting the preemption of state laws by federal laws. Restricting the scope of federal preemption could burden national banks with the requirement that they also comply with certain state laws covering matters already covered by federal law. In addition, the Dodd-Frank Act gives greater power to state attorneys general to pursue legal actions against banking organizations for violations of federal law.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The Bank and other companies subject to the Dodd-Frank Act are subject to a number of requirements regarding the time, manner and form of compensation given to its key executives and other personnel receiving incentive compensation, which are being imposed through the supervisory process as well as published guidance and proposed rules. These restrictions imposed by the Dodd-Frank Act include documentation and governance, deferral, risk-balancing, and clawback requirements. Any deficiencies in compensation practices that are identified may be incorporated into the organization's supervisory ratings, which can affect its ability to make acquisitions or engage in other activities, or could result in regulatory enforcement actions.

During the second quarter of 2016, the U.S. financial regulators, including the FRB and the SEC, proposed revised rules on incentive-based payment arrangements at specified regulated entities having at least \$1 billion in total assets (including the Bank). The proposed revised rules would establish general qualitative requirements applicable to all covered entities, additional specific requirements for entities with total consolidated assets of at least \$50 billion, such as the Bank, and further, more stringent requirements for those with total consolidated assets of at least \$250 billion. The general qualitative requirements include: (i) prohibiting incentive arrangements that encourage inappropriate risks by providing excessive compensation; (ii) prohibiting incentive arrangements that encourage inappropriate risks that could lead to a material financial loss; (iii) establishing requirements for performance measures to appropriately balance risk and reward; (iv) requiring board of director oversight of incentive arrangements; and (v) mandating appropriate record-keeping. For larger financial institutions, including the Bank, the proposed revised regulations would also introduce very prescriptive requirements relating to the types and percentages, the timing of the realization, and the risk of forfeiture of incentive compensation awarded to "senior executive officers" and "significant risk-takers." The regulators have not yet issued any final rules.

Capital Standards - Basel Framework

In 2013, the FRB, FDIC, and OCC published final rules (the "Basel III capital rules") establishing a new comprehensive capital framework for U.S. banking organizations. The Basel III capital rules effectively replaced the Basel I capital rules and implemented the Basel Committee's December 2010 framework, commonly referred to as Basel III, for strengthening international capital standards as well as certain provisions of the Dodd-Frank Act. The Basel III capital rules substantially revised the risk-based capital requirements applicable to bank holding companies and depository institutions, including the Bank, compared to the Basel I U.S. risk-based capital rules. The Basel III capital rules became effective for the Bank on January 1, 2015 and were subject to phase-in periods for certain of their components. In November 2017, the FRB, FDIC and OCC published a final rule that extended the 2017 transition provisions for certain U.S. Basel III capital rules for non-advanced approaches banks, such as the Bank. Effective January 1, 2018, the final rule retains the 2017 Basel III transitional treatment of certain DTAs and mortgage servicing assets, among others. As a result, since January 1, 2018, our DTAs and mortgage servicing assets retained their 2017 risk weight treatment until the federal banking regulators revise the extended transitional treatment under the November 2017 transitional rule.

The Basel III capital rules define the components of capital and address other issues affecting the numerator in banking institutions' regulatory capital ratios. The Basel III capital rules also address risk weights and other issues affecting the denominator in banking institutions' regulatory capital ratios and replaced the risk-weighting approach derived from Basel I capital accords of the Basel Committee, with a more risk-sensitive approach based, in part, on the standardized approach in the Basel Committee's 2004 Basel II capital accords. The Basel III capital rules also implemented the requirements of Section 939A of the Dodd-Frank Act to remove references to credit ratings from the federal banking agencies' rules.

The Basel III capital rules, among other things, (i) introduced a new capital measure called "Common Equity Tier 1" ("CET1"), (ii) specified that Tier 1 capital consists of CET1 and "Additional Tier 1 capital" instruments meeting specified requirements, (iii) applied most deductions/adjustments to regulatory capital measures to CET1 and not to the other components of capital, thus potentially requiring higher levels of CET1 in order to meet minimum ratios, and (iv) expanded the scope of the deductions/adjustments from capital as compared to prior regulations.

Under the Basel III capital rules, the minimum capital ratios are as follows:

4.5% CET1 to risk-weighted assets;

9

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

6.0% Tier 1 capital (i.e., CET1 plus Additional Tier 1) to risk-weighted assets;

8.0% Total capital (i.e., Tier 1 plus Tier 2) to risk-weighted assets; and

4.0% Tier 1 capital to average consolidated assets as reported on consolidated financial statements (known as the “leverage ratio”).

As of January 1, 2019, the Basel III capital rules also require the Bank to maintain a 2.5% “capital conservation buffer” designed to absorb losses during periods of economic stress, composed entirely of CET1, on top of the minimum risk-weighted asset ratios, effectively resulting in minimum ratios of (i) CET1 to risk-weighted assets of at least 7.0%, (ii) Tier 1 capital to risk-weighted assets of at least 8.5%, and (iii) Total capital to risk-weighted assets of at least 10.5%. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum but below the capital conservation buffer face constraints on dividends, equity repurchases, and compensation based on the amount of the shortfall. The severity of the constraint depends on the amount of the shortfall and the institution’s “eligible retained income” (that is four quarter trailing net income, net of distributions and tax effect not reflected in net income).

The Basel III capital rules also prescribed a standardized approach for calculating risk-weighted assets that expanded the risk-weighting categories from Basel I-derived categories (0%, 20%, 50% and 100%) to a much larger and more risk-sensitive number of categories, depending on the nature of the assets, generally ranging from 0% for U.S. Government and agency securities, to 600% for certain equity exposures, to 1,250% for certain securitization exposures, and resulting in higher risk weights for a variety of asset categories. In addition, the Basel III capital rules provided more advantageous risk weights for derivatives and repurchase-style transactions cleared through a qualifying central counterparty and increased the scope of eligible guarantors and eligible collateral for purposes of credit risk mitigation.

The Basel III capital rules provided for a number of deductions from and adjustments to CET1. These include, for example, the requirement that mortgage servicing rights, DTAs dependent upon future taxable income, and significant investments in common equity issued by nonconsolidated financial entities be deducted from CET1 to the extent that any one such category exceeds 10% of CET1 or all such categories in the aggregate exceed 15% of CET1. The application of this part of the rule did not result in any deductions from CET1 for us.

Under prior Basel I capital standards, the effects of accumulated other comprehensive income (“AOCI”) items included in capital were excluded for purposes of determining regulatory capital and capital ratios. As a “non-advanced approaches banking organization,” we made a one-time permanent election as of January 1, 2015 to continue to exclude these items, as allowed under the Basel III capital rules.

Basel III also required additional regulatory capital disclosures to be made that are commonly referred to as “Pillar 3” disclosures. These disclosures require the Bank to make prescribed regulatory disclosures on a quarterly basis regarding its capital structure adequacy and risk-weighted assets. The Bank began publishing these Pillar 3 disclosures in 2015, and such disclosures are available on the Bank’s website.

The Basel Committee has issued a series of updates that propose other changes to capital regulations. In one of these, the Basel Committee finalized a revised framework for calculating minimum capital requirements for market risk, which is expected to increase market risk capital requirements for most banking organizations. The Basel Committee has set an effective date for reporting under the revised framework for market risk capital of January 1, 2022. The U.S. federal bank regulatory agencies have not yet proposed rules implementing these revisions for U.S. banking organizations. The Bank met all capital adequacy requirements under the Basel III capital rules as of December 31, 2018.

Capital Planning and Stress Testing

As a result of the successful completion of the restructuring and FSOC approval described elsewhere in this report, and the enactment of the Crapo Bill, the Bank is no longer required to participate in the FRB’s CCAR process or publicly disclose the results of stress testing or the Bank’s proposed capital actions. However, the Bank intends to continue to release the results of its internal stress tests, published to its website, as stress testing is the Bank’s

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

primary method of assessing capital adequacy. Prior to elimination of this requirement, however, the Bank submitted its 2018 capital plan and stress test results to the FRB. In its capital plan, the Bank was required to forecast for nine quarters, under a variety of hypothetical economic scenarios, its estimated regulatory capital ratios, and its generally accepted accounting principles (“GAAP”) tangible common equity ratio. On June 21, 2018, we filed a Form 8-K with the SEC presenting the results of the Bank’s 2018 Dodd-Frank Act stress tests (“DFAST”). The results of the stress test demonstrated that the Bank had sufficient capital to withstand a severe hypothetical economic downturn. Detailed disclosure of the Bank’s 2018 DFAST results can also be found on our website. The Bank expects to continue to utilize its internal stress testing as an important mechanism to inform its decisions on the appropriate level of capital, based upon actual and hypothetically-stressed economic conditions.

Liquidity

Historically, regulation and monitoring of bank liquidity has been addressed as a supervisory matter, both in the United States and internationally, without required formulaic measures. However, in January 2016, the FRB and other banking regulators adopted final rules (“Final Liquidity Coverage Ratio (“LCR”) Rule”) implementing a U.S. version of the Basel Committee’s LCR requirement. The LCR is intended to ensure that banks hold sufficient amounts of securities and other liquid assets to cover the anticipated net cash outflows during a hypothetical acute 30-day stress scenario. The Final LCR Rule applies to large, internationally active banking organizations (those with at least \$250 billion in total assets or at least \$10 billion in on-balance sheet foreign exposure) and a modified, less stringent rule applies to bank holding companies and savings and loan holding companies that have at least \$50 billion in total assets but are not internationally active banking organizations.

Following the restructuring, the Bank is no longer subject to the Final LCR Rule, despite having greater than \$50 billion in total assets. The Bank continues to maintain strong on-balance sheet liquidity and a portfolio of liquid assets comparable to requirements in the rule.

Financial Privacy and Cyber Security

The federal banking regulators have adopted rules that limit the ability of banks and other financial institutions to disclose non-public information about consumers to non-affiliated third parties. These limitations require disclosure of privacy policies to consumers and, in some circumstances, allow consumers to prevent disclosure of certain personal information to a non-affiliated third party. These regulations affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors. In addition, consumers may also prevent disclosure of certain information among affiliated companies that is assembled or used to determine eligibility for a product or service, such as that shown on consumer credit reports and asset and income information from applications.

Consumers also have the option to direct banks and other financial institutions not to share information about transactions and experiences with affiliated companies for the purpose of marketing products or services. Federal law makes it a criminal offense, except in limited circumstances, to obtain or attempt to obtain customer information of a financial nature by fraudulent or deceptive means.

In October 2016, the federal banking regulators jointly issued an advance notice of proposed rulemaking on enhanced cyber risk management standards that are intended to increase the operational resilience of large and interconnected entities under their supervision. The advance notice of proposed rulemaking addressed five categories of cyber standards: (1) cyber risk governance; (2) cyber risk management; (3) internal dependency management; (4) external dependency management; and (5) incident response, cyber resilience, and situational awareness. The comment period expired in February 2017; however, the regulators have not yet issued any revised proposed rules or final rules.

State regulators have been increasingly active in implementing privacy and cybersecurity standards and regulations. Recently, several states have adopted regulations requiring certain financial institutions to implement cybersecurity programs and providing detailed requirements with respect to these programs, including data encryption requirements. Many states have also recently implemented or modified their data breach notification and data privacy requirements. In June 2018, the California legislature passed the California Consumer Privacy Act of 2018 (the “CCPA”), which is scheduled to take effect on January 1, 2020. The CCPA, which covers businesses that obtain or access personal information on California resident consumers, grants consumers enhanced privacy rights and

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

control over their personal information and imposes significant requirements on covered companies with respect to consumer data privacy rights. We expect this trend of state-level activity to continue and are continually monitoring developments in the states in which we operate. Other states have implemented, or are considering, similar privacy laws.

In May 2018, the General Data Protection Regulation (the “GDPR”) established new requirements regarding the handling of personal data. We believe the applicability of the GDPR to us is minimal as we do not offer goods or services to EU residents or monitor their behaviors.

Prompt Corrective Action

The Federal Deposit Insurance Corporation Improvement Act (“FDICIA”) requires each federal banking agency to take prompt corrective action to resolve the problems of insured depository institutions, including but not limited to those that fall below one or more prescribed minimum capital ratios. Pursuant to FDICIA, the FDIC promulgated regulations defining the following five categories in which an insured depository institution will be placed, based on the level of its capital ratios: well-capitalized, adequately capitalized, under-capitalized, significantly under-capitalized, and critically under-capitalized. Under the prompt corrective action provisions of FDICIA as modified by the Basel III capital rules, an insured depository institution generally will be classified as well-capitalized if it has a CET1 ratio of at least 6.5%, a Tier 1 risk-based capital ratio of at least 8%, a total capital ratio of at least 10% and a Tier 1 leverage ratio of at least 5%, and an insured depository institution generally will be classified as under-capitalized if its CET1 ratio is under 4.5%, its total risk-based capital ratio is less than 8%, its Tier 1 risk-based capital ratio is less than 6%, or its Tier 1 leverage ratio is less than 4%. An institution that, based upon its capital levels, is classified as “well-capitalized,” “adequately capitalized,” or “under-capitalized,” may be treated as though it were in the next lower capital category if the appropriate federal banking agency, after notice and opportunity for hearing, determines that an unsafe or unsound condition or an unsafe or unsound practice warrants such treatment. At each successive lower capital category, an insured depository institution is subject to more restrictions and prohibitions, including restrictions on growth, restrictions on interest rates paid on deposits, restrictions or prohibitions on payment of dividends and restrictions on the acceptance of brokered deposits. Furthermore, if a bank is classified in one of the under-capitalized categories, it is required to submit a capital restoration plan to the Federal bank regulator.

Other Regulations

The Bank is subject to a wide range of other requirements and restrictions contained in both the laws of the United States and the states in which its banks and other subsidiaries operate. These regulations include but are not limited to the following:

• Limitations on dividends payable to shareholders. The Bank’s ability to pay dividends on both its common and preferred stock is subject to regulatory restrictions. See discussion under “Liquidity Management Actions” on page 66.

• Safety and soundness requirements. Federal law requires that the Bank be operated in a safe and sound manner. We are subject to additional safety and soundness standards prescribed in the FDICIA, including standards related to internal controls, information systems, internal audit, loan documentation, credit underwriting, interest rate exposure, asset growth and compensation, as well as other operational and management standards deemed appropriate by the federal banking agencies. The safety and soundness requirements give bank regulatory agencies significant latitude in their supervisory authority over us.

• Requirements for approval of acquisitions and activities and restrictions on other activities. The National Bank Act requires regulatory and shareholder approval of all mergers between a national bank and another national or state bank and do not allow for the direct merger into a national bank of a non-affiliated non-bank. See discussion under “Risk Factors.” Other laws and regulations governing national banks contain similar provisions concerning acquisitions and activities.

• Limits on bank organization activities, which are more limited than activities that can be conducted by bank holding company organizations.

• Limitations on the amount of loans to a borrower and its affiliates.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

• Limitations on transactions with affiliates, as expanded by the Dodd-Frank Act.

• Restrictions on the nature and amount of any investments and ability to underwrite certain securities.

• Requirements for opening of branches and the acquisition of other financial entities.

• Fair lending and truth in lending requirements to provide equal access to credit and to protect consumers in credit transactions.

• Broker-dealer and investment advisory regulations. One of our subsidiaries is a broker-dealer that is authorized to engage in securities underwriting and other broker-dealer activities. This company is registered with the SEC and is a member of FINRA. Another subsidiary is a registered investment adviser under the Investment Advisers Act of 1940, as amended, and as such is supervised by the SEC. Certain of our subsidiaries are also subject to various U.S. federal and state laws and regulations. These laws and regulations generally grant supervisory agencies broad administrative powers, including the power to limit or restrict the carrying on of business for failure to comply with such laws.

• Provisions of the Gramm-Leach-Bliley Act and other federal and state laws dealing with privacy for non-public personal information of individual customers.

• Community Reinvestment Act (“CRA”) requirements. The CRA requires banks to help serve the credit needs in their communities, including providing credit to low and moderate income individuals. If the Bank fails to adequately serve its communities, penalties may be imposed including denials of applications to add branches, relocate, add subsidiaries and affiliates, and merge with or purchase other financial institutions.

• Anti-money laundering regulations. The Bank Secrecy Act, Title III of the Uniting and Strengthening of America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA Patriot Act”), and other federal laws require financial institutions to assist U.S. Government agencies in detecting and preventing money laundering and other illegal acts by maintaining policies, procedures and controls designed to detect and report money laundering, terrorist financing, and other suspicious activity.

• The Bank is subject to the Sarbanes-Oxley Act of 2002, the Dodd-Frank Act, and other federal and state laws and regulations which address, among other issues, corporate governance, auditing and accounting, executive compensation, and enhanced and timely disclosure of corporate information. The National Association of Securities Dealers Automated Quotations (“NASDAQ”) has also adopted corporate governance rules, which are intended to allow shareholders and investors to more easily and efficiently monitor the performance of companies and their directors. The Board of Directors of the Bank has overseen management’s establishment of a comprehensive system of corporate governance and risk practices. This system includes policies and guidelines such as Corporate Governance Guidelines, a Code of Business Conduct and Ethics for Employees, a Directors Code of Conduct, a Related Party Transaction Policy, Stock Ownership and Retention Guidelines, a Compensation Clawback Policy, an insider trading policy including provisions prohibiting hedging and placing restrictions on the pledging of bank stock by insiders, and charters for the Executive, Audit, Risk Oversight, Compensation, and Nominating and Corporate Governance Committees. More information on the Bank’s corporate governance practices is available on the Bank’s website at www.zionsbancorporation.com. (The Bank’s website is not part of this Annual Report on Form 10-K).

• The Bank has adopted policies, procedures and controls to address compliance with the requirements of the banking, securities and other laws and regulations described above or otherwise applicable to the Bank. The Bank intends to make appropriate revisions to reflect any changes required.

• Regulators, Congress, state legislatures, and international consultative bodies continue to enact rules, laws, and policies to regulate the financial services industry and public companies and to protect consumers and investors. The nature of these laws and regulations and the effect of such policies on future business and earnings of the Bank cannot be predicted.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

GOVERNMENT MONETARY POLICIES

The earnings and business of the Bank are affected not only by general economic conditions, but also by policies adopted by various governmental authorities. The Bank is particularly affected by the monetary policies of the FRB, which affect both short-term and long-term interest rates and the national supply of bank credit.

In view of the changing conditions in the economy and the effect of the FRB's monetary policies, it is difficult to predict future changes in loan demand, deposit levels and interest rates, or their effect on the business and earnings of the Bank. FRB monetary policies have had a significant effect on the operating results of commercial banks in the past and are expected to continue to do so in the future.

ITEM 1A. RISK FACTORS

The Bank's growth strategy is driven by key factors while adhering to defined risk parameters. The key elements of the Bank's strategy reflect its prudent risk-taking philosophy. The Bank generates revenue by taking prudent and appropriately priced risks. These factors are outlined in the Bank's Risk Appetite Framework.

The Bank's Board of Directors has established a Risk Oversight Committee of the Board, approved an Enterprise Risk Management Framework, and appointed an Enterprise Risk Management Committee ("ERMC") to oversee and implement the Framework. The ERMC is comprised of senior management of the Bank and is chaired by the Chief Risk Officer. The Bank's most significant risk exposure has traditionally come from the acceptance of credit risk inherent in prudent extension of credit to relationship customers. In addition to credit risk, these committees also monitor the following level one risk areas: market and interest rate risk, liquidity risk, strategic, business and corporate governance risk, operational/technology risk, cyber risk, model risk, capital/financial reporting risk, legal/compliance risk (including regulatory risk), and reputational risk as outlined in the bank's risk taxonomy.

Additional governance and oversight includes Board-approved policies and management committees with direct focus on these specific risk categories. Incorporated into each of these level one risks mentioned previously is third party vendor risk, which the Bank views as critical in the management and oversight of vendors.

Although not comprehensive, the following describes several risk factors that are significant to the Bank:

Credit Risk

Credit quality has adversely affected us in the past and may adversely affect us in the future.

Credit risk is one of our most significant risks. A decline in the strength of the U.S. economy in general or the local economies in which we conduct operations could result in, among other things, deterioration in credit quality and/or reduced demand for credit, including a resultant adverse effect on the income from our loan portfolio, an increase in charge-offs and an increase in the allowance for loan and lease losses ("ALLL").

We have concentrations of risk in our loan portfolio, including loans secured by real estate, leveraged and enterprise value lending, and oil and gas-related lending, which may have unique risk characteristics that may adversely affect our results.

Concentration or counterparty risk could adversely affect the Bank. Concentration risk across our loan and investment portfolios could pose significant additional credit risk to the Bank due to exposures which perform in a similar fashion. Counterparty risk could also pose additional credit risk.

We engage in commercial construction and land acquisition and development lending, as well as commercial term lending, primarily in our western states footprint. The Bank, as a whole, has relatively larger concentrations of such lending than many other peer institutions. In addition, we have a concentration in oil and gas-related lending, primarily in Texas. Both commercial real estate ("CRE") and oil and gas-related lending are subject to specific risks, including volatility and potential significant and prolonged declines in collateral-values and activity levels. In addition, our real estate lending is concentrated in the western states, and values there may behave differently than in other parts of the United States. We may have other unidentified concentrated or correlated risks in our loan portfolio.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Our business is highly correlated to local economic conditions in a specific geographic region of the United States. The Bank provides a full range of banking and related services through its local management teams and unique brands in Arizona, California, Colorado, Idaho, Nevada, New Mexico, Oregon, Texas, Utah, Washington, and Wyoming. Approximately 79% and 78% of the Bank's total net interest income relates to our banking operations in Utah, Texas, and California for the years ended December 31, 2018 and December 31, 2017, respectively. As a result of this geographic concentration, our financial results depend largely upon economic conditions in these market areas. Accordingly, adverse economic conditions affecting these three states in particular could significantly affect our consolidated operations and financial results. For example, our credit risk could be elevated to the extent that our lending practices in these three states focus on borrowers or groups of borrowers with similar economic characteristics, which are similarly affected by the same adverse economic events. At December 31, 2018, loan balances associated with our banking operations in Utah, Texas, and California comprised 79% of the Bank's commercial lending portfolio, 73% of the CRE lending portfolio, and 69% of the consumer lending portfolio. We have been and could continue to be negatively affected by adverse economic conditions.

Adverse economic conditions negatively affect the Bank's assets, including its loan and securities portfolios, capital levels, results of operations, and financial condition. The most recent financial crisis resulted in significant regulatory changes that continue to affect the Bank. Although economic conditions have improved since the most recent financial crisis, it is possible that economic conditions may weaken. Economic and fiscal conditions in the United States and other countries may directly or indirectly adversely impact economic and market conditions faced by the Bank and its customers. Any sustained weakness or further weakening in economic conditions would adversely affect the Bank.

Market and Interest Rate Risks

Failure to effectively manage our interest rate risk and prolonged periods of low interest rates could adversely affect us.

Net interest income is the largest component of the Bank's revenue. Interest rate risk is managed by the Asset Liability Management Committee, which is established by the Bank's Board of Directors. Failure to effectively manage our interest rate risk could adversely affect the Bank. Factors beyond the Bank's control can significantly influence the interest rate environment and increase the Bank's risk. These factors include competitive pricing pressures for our loans and deposits, adverse shifts in the mix of deposits and other funding sources, and volatile market interest rates resulting from general economic conditions and the policies of governmental and regulatory agencies, in particular the FRB.

Over the course of the last year, we have maintained a moderate level of asset-sensitivity as the market rates seemed more likely to increase than to decrease. As risks shifted at the end of the year to be more balanced between higher or lower rates in the future, the Asset/Liability Committee ("ALCO") has undertaken strategies to reduce the level of asset-sensitivity, such as entering into rate floor agreements and increasing the use of interest rate swaps designated as cash flow hedges to synthetically convert floating-rate assets to fixed-rate. We anticipate moving towards a less asset-sensitive interest rate risk position over the course of 2019.

Interest rates on the Bank's financial instruments might be subject to change based on developments related to LIBOR, which could adversely impact the Bank's revenue, expenses, and value of those financial instruments.

In July 2017, the Financial Conduct Authority, the authority regulating the London Interbank Offered Rate ("LIBOR"), along with various other regulatory bodies, announced that LIBOR would likely be discontinued at the end of 2021. LIBOR makes up the most liquid and common interest rate index in the world and is commonly referenced in financial instruments. We have exposure to LIBOR in various aspects through our financial contracts. Instruments that may be impacted include loans, securities, and derivatives, among other financial contracts indexed to LIBOR and that mature after December 31, 2021.

While there is no consensus on what rate or rates may become accepted alternatives to LIBOR, the Alternative Reference Rates Committee, a steering committee comprised of U.S. financial market participants, selected by the

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Federal Reserve Bank of New York, started in May 2018 to publish the Secured Overnight Financing Rate (“SOFR”) as an alternative to LIBOR. SOFR is a broad measure of the cost of overnight borrowings collateralized by Treasury securities that was selected by the Alternative Reference Rate Committee due to the depth and robustness of the U.S. Treasury repurchase market. At this time, it is impossible to predict whether SOFR will become an accepted alternative to LIBOR.

The market transition away from LIBOR to an alternative reference rate, such as SOFR, is complex and could have a range of adverse effects on our business, financial condition and results of operations. In particular, any such transition could:

- adversely affect the interest rates paid or received on, the revenue and expenses associate with, and the value of our floating-rate obligations, loans, deposits, derivatives, and other financial instruments tied to LIBOR rates, or other securities or financial arrangements given LIBOR’s role in determining market interest rates globally;
- prompt inquiries or other actions from regulators in respect of our preparation and readiness for the replacement of LIBOR with an alternative reference rate;
- result in disputes, litigation or other actions with counterparties regarding the interpretation and enforceability of certain fallback language in LIBOR-based securities; and
- require the transition to or development of appropriate systems and analytics to effectively transition our risk management processes from LIBOR-based products to those based on the applicable alternative pricing benchmark, such as SOFR.

The manner and impact of this transition, as well as the effect of these developments on our funding costs, loan and investment and trading securities portfolios, asset-liability management, and business, is uncertain.

Liquidity Risk

As a regulated entity, we are subject to capital and liquidity requirements that may limit our operations and potential growth.

The Bank is subject to the comprehensive, consolidated supervision and regulation of the OCC and the FDIC, including risk-based and leverage capital ratio requirements, and Basel III liquidity requirements. Capital needs may rise above normal levels when we experience deteriorating earnings and credit quality, and our banking regulators may increase our capital requirements based on general economic conditions and our particular condition, risk profile and growth plans. Compliance with the capital requirements, including leverage ratios, may limit operations that require the intensive use of capital and could adversely affect our ability to expand or maintain present business levels. Although the Bank is not currently subject to the Final LCR Rule or the net stable funding ratio (“NSFR”), it is possible that the Bank may become subject to a liquid coverage ratio requirement or other heightened liquidity requirements in the future if the OCC or another banking regulator apply such a requirement to the Bank as a supervisory matter. In addition, the Bank may become subject to any rule implementing the NSFR that is promulgated in the future. As a result, the Bank could be required to hold a higher portion of its assets in securities and other liquid assets and a lower portion of its assets in loans. Securities and other liquid assets generally have lower yields than loans of the type made by the Bank. For a summary of the capital rules to which we are subject, see “Capital Standards – Basel Framework” on page 9 of this Annual Report on Form 10-K.

We and/or the holders of our securities could be adversely affected by unfavorable rating actions from rating agencies. Our ability to access the capital markets is important to our overall funding profile. This access is affected by the ratings assigned by rating agencies to us and particular classes of securities that we issue. The rates that we pay on our securities are also influenced by, among other things, the credit ratings that we and/or our securities receive from recognized rating agencies. Ratings downgrades to us or our securities could increase our costs or otherwise have a negative effect on our results of operations or financial condition or the market prices of our securities.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Strategic, Business and Corporate Governance Risks

Problems encountered by other financial institutions could adversely affect financial markets generally and have indirect adverse effects on us.

The commercial soundness of many financial institutions may be closely interrelated as a result of credit, trading, clearing or other relationships between the institutions. As a result, concerns about, or a default or threatened default by, one institution could lead to significant market-wide liquidity and credit problems, losses or defaults by other institutions. This is sometimes referred to as “systemic risk” and may adversely affect financial intermediaries, such as clearing agencies, clearing houses, banks, securities firms and exchanges, with which we interact on a daily basis, and therefore could adversely affect us. Information security and vendor management processes are in place to actively identify, manage and monitor actual and potential impacts.

The regulation of incentive compensation under the Dodd-Frank Act may adversely affect our ability to retain our highest performing employees.

The bank regulatory agencies have published guidance and proposed regulations which limit the manner and amount of compensation that banking organizations provide to employees. These regulations and guidance may adversely affect our ability to attract and retain key personnel. If we were to suffer such adverse effects with respect to our employees, our business, financial condition and results of operations could be adversely affected, perhaps materially. We have made, and are continuing to make, significant changes to the Bank that include, among other things, organizational restructurings, efficiency initiatives, and replacement or upgrades of certain core technological systems to improve our control environment, and operating efficiency. The ultimate success and completion of these changes, and their effect on the Bank, may vary significantly from initial planning, which could materially adversely affect the Bank.

Over the last several years, the Bank has completed numerous improvement projects, including the merger of its bank holding company into the Bank, combining the legal charters of our seven affiliate banks into one, consolidating 15 loan operations sites into two, upgrading our accounting systems, installing a credit origination work flow system, streamlining our small business and retail lending, mortgage, wealth management and foreign exchange businesses, and investing in data quality and information security. Ongoing investment continues in a multi-year project to replace our core loan and deposit systems, a collection of customer-facing digital capabilities and a variety of other projects to simplify how we do business.

These changes continue to be implemented; some of the projects are fully completed, and some projects are in their early stages. By their very nature, projections of duration, cost, expected savings, expected efficiencies, and related items are subject to change and significant variability.

We may encounter significant adverse developments in the completion and implementation of these changes. These may include significant time delays, cost overruns, loss of key people, technological problems, processing failures, and other adverse developments. Any or all of these issues could result in disruptions to our systems, processes, control environment, procedures, and employees, which may adversely impact our customers and our ability to conduct business.

We have plans, policies and procedures designed to prevent or limit the negative effect of these potential adverse developments. However, there can be no assurance that any such adverse developments will not occur or, if they do occur, that they will be adequately remediated. The ultimate effect of any adverse development could subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could materially affect the Bank, including its control environment, operating efficiency, and results of operations.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Operational/Technology Risks

Catastrophic events including, but not limited to, hurricanes, tornadoes, earthquakes, fires, floods, and prolonged drought, may adversely affect the general economy, financial and capital markets, specific industries, and the Bank. The Bank has significant operations and a significant customer base in Utah, Texas, California and other regions where natural and other disasters may occur. These regions are known for being vulnerable to natural disasters and other risks, such as hurricanes, tornadoes, earthquakes, fires, floods, and prolonged drought. These types of natural catastrophic events at times have disrupted the local economy, the Bank's business and customers, and have posed physical risks to the Bank's property. In addition, catastrophic events occurring in other regions of the world may have an impact on the Bank's customers and in turn on the Bank. Although we have business continuity and disaster recovery programs in place, a significant catastrophic event could materially adversely affect the Bank's operating results.

We could be adversely affected by failure in our internal controls.

A failure in our internal controls could have a significant negative impact not only on our earnings, but also on the perception that customers, regulators and investors may have of the Bank. We continue to devote a significant amount of effort, time and resources to improving our controls and ensuring compliance with complex accounting standards and regulations. These efforts also include the management of controls to mitigate operational risks for programs and processes across the Bank.

We could be adversely affected by financial technology advancements and other non-traditional lending and banking sources.

The ability to successfully remain competitive is dependent upon our ability to maintain a critical technological capability and to identify and develop new, value-added products for existing and future customers. Failure to do so could impede our time to market, reduce customer product accessibility, and weaken our competitive position.

Cyber Risk

We are subject to a variety of system failure and cyber security risks that could adversely affect our business and financial performance.

We rely heavily on communications and information systems to conduct our business. We, our customers, and other financial institutions with which we interact, are subject to ongoing, continuous attempts to penetrate key systems by individual hackers, organized criminals, and in some cases, state-sponsored organizations. Information security risks for large financial institutions such as the Bank have increased significantly in recent years in part because of the proliferation of new technologies, such as Internet and mobile banking to conduct financial transactions, and the increased sophistication and activities of organized crime, hackers, terrorists, nation-states, activists and other external third parties. Third parties with whom we or our customers do business also present operational and information security risks to us, including security breaches or failures of their own systems. The possibility of employee error, failure to follow security procedures, or malfeasance also presents these risks. In addition, to access our products and services, our customers may use personal computers, smartphones, tablets, and other mobile devices that are beyond our control environment. Any failure, interruption or breach in security of our information systems could result in failures or disruptions in our customer relationship management, general ledger, deposit, loan and other systems, misappropriation of funds, and theft, disclosure or misuse of proprietary Bank or customer data. While we have significant internal resources, policies and procedures designed to prevent or limit the effect of the possible failure, interruption or security breach of our information systems, there can be no assurance that any such failure, interruption or security breach will not occur or, if they do occur, that they will be adequately addressed.

As cyber threats continue to evolve, we may be required to expend significant additional resources to continue to modify or enhance our layers of defense or to investigate or remediate any information security vulnerabilities. System enhancements and updates may also create risks associated with implementing new systems and integrating them with existing ones. Due to the complexity and interconnectedness of information technology systems, the process of enhancing our layers of defense can itself create a risk of systems disruptions and security issues. In

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

addition, addressing certain information security vulnerabilities, such as hardware-based vulnerabilities, may affect the performance of our information technology systems. The ability of our hardware and software providers to deliver patches and updates to mitigate vulnerabilities in a timely manner can introduce additional risks, particularly when a vulnerability is being actively exploited by threat actors. The occurrence of any failure, interruption or security breach of our information systems could damage our reputation, result in a loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability.

Model Risk

We use models in the management of the Bank. There is risk that these models are incorrect or inaccurate in various ways, which can cause us to make non-optimal decisions, and this risk causes the Bank to hold additional capital as a buffer against that risk.

We attempt to carefully develop, document, back test, and validate the models used in the management of the Bank, including, for example, models used in the management of interest rate and liquidity risk, and those used in projecting stress losses in various segments of our credit and securities portfolios, and projecting net revenue under stress.

Models are inherently imperfect for a number of reasons, however, and cannot perfectly predict outcomes.

Management decisions based in part on such models, therefore, can be suboptimal. In addition, in determining the Bank's capital needs under stress testing, we attempt to specifically quantify the amounts by which model results could be incorrect, and we hold material additional amounts of capital as a buffer against this "model risk."

Capital/Financial Reporting Risks

Internal stress testing and capital management, as well as provisions of the National Bank Act and OCC regulations, may limit our ability to increase dividends, repurchase shares of our stock, and access the capital markets.

Although we are no longer subject to the CCAR regime, we are required to submit stress tests to the OCC because the Bank has assets in excess of \$10 billion, and we expect to continue to utilize stress testing as an important mechanism to inform our decisions on the appropriate level of capital, based upon actual and hypothetically-stressed economic conditions. The stress testing and other applicable regulatory requirements may, among other things, require us to increase our capital levels, limit our dividends or other capital distributions to shareholders, modify our business strategies, or decrease our exposure to various asset classes.

Under the National Bank Act and OCC regulations, certain capital transaction may be subject to the approval of the OCC. These requirements may limit our ability to respond to and take advantage of market developments.

Economic and other circumstances may require us to raise capital at times or in amounts that are unfavorable to the Bank.

The Bank must maintain certain risk-based and leverage capital ratios, as required by its banking regulators, which can change depending upon general economic conditions, and the particular conditions, risk profiles and growth plans of the Bank. Compliance with capital requirements may limit the Bank's ability to expand and has required, and may require, the Bank or its subsidiaries to raise additional capital. These uncertainties and risks, including those created by legislative and regulatory uncertainties, may increase the Bank's cost of capital and other financing costs.

We could be adversely affected by accounting, financial reporting, and regulatory/compliance risk.

The Bank is exposed to accounting, financial reporting, and regulatory/compliance risk. The Bank provides to its customers, invests in, and uses for its own capital, funding, and risk management needs, a number of complex financial products and services. Estimates, judgments, and interpretations of complex and changing accounting and regulatory policies are required in order to provide and account for these products and services. Changes in our accounting policies or in accounting standards could materially affect how we report our financial results and conditions. The level of regulatory/compliance oversight has been heightened in recent periods as a result of rapid changes in regulations that affect financial institutions. The administration of some of these regulations and related changes has required the Bank to comply before their formal adoption. Therefore, identification, interpretation and

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

implementation of complex and changing accounting standards as well as compliance with regulatory requirements pose an ongoing risk.

The value of our goodwill may decline in the future.

As of December 31, 2018, the Bank had \$1 billion of goodwill that was allocated to Amegy Bank (“Amegy”), California Bank & Trust (“CB&T”) and Zions Bank. If the fair value of a reporting unit is determined to be less than its carrying value, the Bank may have to take a charge related to the impairment of its goodwill. Such a charge would occur if the Bank were to experience increases in the book value of a reporting unit in excess of the increase in the fair value of equity of a reporting unit. A significant decline in the Bank’s expected future cash flows, a significant adverse change in the business climate, slower economic growth or a significant and sustained decline in the price of the Bank’s common stock, any or all of which could be materially impacted by many of the risk factors discussed herein, may necessitate the Bank taking charges in the future related to the impairment of its goodwill. Future regulatory actions could also have a material impact on assessments of the appropriateness of the goodwill carrying value. If the Bank was to conclude in the future that a write-down of its goodwill is necessary, it would record the appropriate charge, which could have a material adverse effect on the Bank’s results of operations.

The Bank may not be able to utilize the significant DTA recorded on its balance sheet.

The Bank’s balance sheet includes a significant DTA. We had net DTAs of \$130 million at December 31, 2018, compared with \$93 million at December 31, 2017. The largest component of this asset results from additions to our ALLL for purposes of GAAP in excess of loan losses actually taken for tax purposes. Our ability to continue to record this DTA is dependent on the Bank’s ability to realize its value through net operating loss carrybacks or future projected earnings. Loss of part or all of this asset would adversely impact tangible capital. In addition, inclusion of this asset in determining regulatory capital is subject to certain limitations. Currently, no DTAs are disallowed for regulatory purposes at the Bank.

Legal Risks

The Dodd-Frank Act imposes significant limitations on our business activities and subjects us to increased regulation and additional costs.

The Dodd-Frank Act implementing regulations place significant additional regulatory oversight and requirements on financial institutions. Among other things, the Dodd-Frank Act:

- impacts the Bank’s ability to invest in certain types of entities or engage in certain activities;
- impacts a number of the Bank’s business strategies;
- requires us to incur the cost of developing substantial heightened risk management policies and infrastructure;
- regulates the pricing of certain of our products and services and restricts the revenue that the Bank generates from certain businesses;
- subjects the Bank to supervision by the CFPB, with very broad rule-making and enforcement authorities;
- grants authority to state agencies to enforce state and federal laws against national banks; and
- subjects the Bank to new and different litigation and regulatory enforcement risks;

The Bank and the entire financial services industry have incurred and will continue to incur substantial personnel, systems, consulting, and other costs in order to comply with regulations promulgated under the Dodd-Frank Act. Some aspects of the Dodd-Frank Act continue to be subject to rulemaking, many of the rules that have been adopted will take effect over several additional years, and many of the rules that have been adopted may be subject to interpretation and clarification, and accordingly, the impact of such regulatory changes cannot be presently determined. Individually and collectively, regulations adopted under the Dodd-Frank Act may materially adversely affect the Bank’s and the financial services industry’s business, financial condition (including the Bank’s ability to compete effectively with less regulated financial services providers), and results of operations.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Other legislative and regulatory actions taken now or in the future may have a significant adverse effect on our operations and earnings.

In addition to the Dodd-Frank Act described previously, bank regulatory agencies and international regulatory consultative bodies have proposed or are considering new regulations and requirements, some of which may be imposed without formal promulgation. Our deposits are insured by the FDIC up to legal limits and, accordingly, we are subject to FDIC insurance assessments.

There can be no assurance that any or all of these regulatory changes or actions will ultimately be adopted. However, if adopted, some of these proposals could adversely affect the Bank by, among other things: impacting after-tax returns earned by financial services firms in general; limiting the Bank's ability to grow; increasing taxes or fees on some of the Bank's funding or activities; limiting the range of products and services that the Bank could offer; and requiring the Bank to raise capital at inopportune times.

Recent political developments could result in substantial changes in tax, international trade, immigration, and other policies. The extent and timing of any such changes are uncertain, as are the potential direct and indirect impacts, whether beneficial or adverse. Regulations and laws may be modified or repealed, and new legislation may be enacted that will affect us and our subsidiaries.

The ultimate impact of these proposals cannot be predicted as it is unclear which, if any, may be adopted.

We could be adversely affected by legal and governmental proceedings.

We are subject to risks associated with legal claims, litigation, and regulatory and other government proceedings. The Bank's exposure to these proceedings has increased and may further increase as a result of stresses on customers, counterparties and others arising from the past or current economic environments, new regulations promulgated under recently adopted statutes, the creation of new examination and enforcement bodies, and increasingly aggressive enforcement and legal actions against banking organizations. Any such matters may result in material adverse consequences to our results of operations, financial condition or ability to conduct our business, including adverse judgments, settlements, fines, penalties (including civil money penalties under applicable banking laws), injunctions, restrictions on our business activities or other relief. Our involvement in any such matters, even if the matters are ultimately determined in our favor, could also cause significant harm to our reputation and divert management attention from the operation of our business. In general, the amounts paid by financial institutions in settlement of proceedings or investigations, including those relating to anti-money laundering matters, have been increasing dramatically. In addition, any enforcement matters could impact our supervisory and CRA ratings, which may restrict or limit our activities.

The corporate and securities laws applicable to the Bank are not as well-developed as those applicable to a state-chartered corporation, and this may impact the ability of the Bank to effect corporate transactions in an efficient and optimal manner.

Prior to the restructuring, the corporate affairs of the Bank's holding company were governed by Utah state law, and securities law matters were governed by the federal securities laws, including the Securities Act and the Exchange Act, as administered by the SEC. Each of these legal regimes is well-developed and used widely by public companies. Post-restructuring, the Bank's corporate affairs are governed by the National Bank Act and related regulations administered by the OCC. With respect to securities matters, the Bank is not subject to the Securities Act, but rather to OCC regulations governing securities offerings. The Bank's common stock and certain other securities are registered or deemed registered under the Exchange Act, which vests the OCC with the power to administer and enforce certain sections of the Exchange Act applicable to banks such as the Bank (though the Bank currently makes and intends to continue to make filings required by the Exchange Act with the SEC as a "voluntary filer"). These OCC statutory and regulatory regimes have been used by publicly-traded banking organizations relatively rarely and are not as well-developed as the corporate and securities law regimes applicable to corporations. While certain specific risks associated with operating under these regimes are discussed below, unless and until these regimes are further developed and established over time, the uncertainty of how these regimes might apply to any

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

given corporate or securities matters may prevent us from effecting transactions in an efficient and optimal manner or perhaps at all.

Differences between the National Bank Act and state law requirements in respect of mergers could result in the Bank not being able to execute acquisitions as efficiently and advantageously as bank holding companies or other financial institutions.

Unlike state corporate law, the National Bank Act requires shareholder approval of all mergers between a national bank and another national or state bank and does not allow for exceptions in the case of various “minor” mergers, such as a parent company’s merger with a subsidiary or an acquirer’s merger with an unaffiliated entity in which the shares issued by the acquirer do not exceed a designated percentage. The National Bank Act and related regulations do not allow for the direct merger into a national bank of a non-affiliated non-bank.

These differences could adversely affect the Bank’s, and other banks registered under the National Bank Act, ability to efficiently consummate acquisition transactions. In addition, such differences could make the Bank less competitive as a potential acquirer in certain circumstances given that the Bank’s acquisition proposal may be conditioned on Bank shareholder approval while the Bank’s competitors’ proposals will not have such a condition.

Differences between the National Bank Act and state law could result in the Bank’s capacity to pay dividends and repurchase shares at any given time being different from the capacity that existed for Zions Bancorporation prior to the restructuring.

The regulations and limitations applicable to the Bank relating to the payment of dividends and repurchases or redemptions of outstanding common and preferred shares differ from the limitations and considerations that applied to the Bank’s holding company prior to the recent restructuring. While the Bank does not believe this change in legal restrictions resulting from the restructuring will constrain the Bank from executing any capital plans that are currently contemplated or otherwise reasonably foreseeable in the near term, there can be no assurance that the change in legal restrictions will not have an adverse effect on the Bank’s ability to pay dividends and repurchase or redeem stock in the future.

Shares of common stock of a national bank are assessable and this may cause investors to view the Bank’s common stock less favorably than that of Zions Bancorporation prior to the restructuring.

The National Bank Act provides that under certain circumstances the common stock of a national bank is assessable, i.e., holders may be subject to a levy for more funds if so determined by the OCC. In contrast, the common stock of state corporations is not subject to assessment. However, the OCC has confirmed that under the applicable provisions of the National Bank Act, assessability is limited to the par value of a national bank’s stock. The Bank’s common stock has a par value of \$0.001. Moreover, according to the OCC, it has not exercised its authority to levy assessments since 1933 and views the assessability authority as a mechanism for addressing capital deficiency that has long been overtaken by developments in statute and regulation, including robust capital standards, prompt corrective action requirements and supervisory and enforcement authorities requiring an institution to maintain capital at a particular level. Nonetheless, potential investors may be unfamiliar with the concept of assessment and, as a result, view the Bank less favorably as an investment.

The ability of investors to access financial and other reports filed by the Bank readily could be adversely affected if such reports were not able to be made available publicly through the SEC or a system operated by the OCC comparable to that of the SEC.

The Bank has been permitted and currently makes its Exchange Act filings as a “voluntary filer” with the SEC. There can be no assurance, however, that the OCC or SEC will continue to allow the Bank to make filings as a voluntary filer or that the OCC will develop a comparable system for making Exchange Act filings publicly available. If the Bank’s Exchange Act filings ceased to be as readily available as those of bank holding companies, investors could view the Bank less favorably.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The Bank's ability to issue securities in an optimal manner may be adversely affected by the fact that the OCC's securities offering regulations and organizational structure are less well-developed than those of the SEC, which applied to the Bank's holding company prior to the restructuring.

The SEC maintains a well-developed regulatory regime and well-staffed organization relating to securities offerings under or exempt from the Securities Act. For example, the SEC has developed integrated disclosure rules, which allow Exchange Act filings to be incorporated by reference into prospectuses distributed as required by the Securities Act. In addition, under the SEC's rules seasoned issuers who are timely in their filings are permitted to use "automatic shelf registration," allowing them to offer securities under a registration statement that is automatically effective upon filing. The OCC maintains its own securities offering regime applicable to national banks and their securities offerings, which the Bank will need to comply with in order to access the public capital markets. Similar to the SEC's offering rules, the OCC's regime requires that registration statements be reviewed and declared or become effective. However, given that there are currently no other nationally-chartered banks whose common stock has been issued under the OCC's securities offering regime, it is unknown at this point whether and how the OCC staff would review registration statements, and unclear whether the OCC would apply the same mechanics for automatic shelf registration filings used by SEC-filers, or how, more generally, the OCC will function as a securities regulator. Given the extent to and manner in which the Bank has accessed capital markets historically, or to which it currently contemplates accessing such markets, the Bank does not believe there will be a material adverse impact on the Bank's ability to access capital markets effectively, although there can be no assurance that this will be the case and it is possible that operating under the OCC's securities offering regime could impede the Bank's ability to sell securities at the most advantageous times or to achieve optimum pricing in offerings.

The Bank is subject to restrictions on permissible activities that would limit the types of business it may conduct and that may make acquisitions of other financial companies more challenging.

Under applicable laws and regulations, bank holding companies and banks are generally limited to business activities and investments that are related to banking or are financial in nature. The range of permissible financial activities is set forth in the Gramm-Leach-Bliley Act and is more limited for banks than for bank holding company organizations. The differences relate mainly to insurance underwriting (but not insurance agency activities) and merchant banking (but not broker-dealer and investment advisory activities). Merchant banking authority is an important power for financial institutions that desire to engage in a full-scale investment banking business and can also be important for institutions that wish to engage in private equity and proprietary investment business lines. While historically the Bank's holding company did not seek to engage in activities available only to bank holding companies under the Gramm-Leach-Bliley Act, the Bank is not able to engage in these activities. Loss of the bank holding company status resulting from the restructuring will make future acquisitions by the Bank of financial institutions that have such operations more challenging.

The Bank's common stock is not an insured deposit.

Shares of the Bank's common stock are not a bank deposit and, therefore, losses in value are not insured by the FDIC, any other deposit insurance fund or by any other public or private entity. Investment in shares of the Bank's common stock is inherently risky and is subject to the same market forces and investment risks that affect the price of common stock in any other company, including the possible loss of some or all principal invested.

Reputational Risk

The Bank is presented with various reputational risk issues that could stem from operational, regulatory/compliance and legal risks.

A Reputational Risk Council was established to monitor, manage and develop strategies to effectively manage reputational risk which includes, but is not limited to, addressing communication logistics, legal and regulatory issues.

ITEM 1B. UNRESOLVED STAFF COMMENTS

There are no unresolved written comments that were received from the SEC's or OCC's staff 180 days or more before the end of the Bank's fiscal year relating to its periodic or current reports filed under the Securities Exchange Act of 1934.

ITEM 2. PROPERTIES

At December 31, 2018, the Bank operated 433 branches, of which 276 are owned and 157 are leased. The Bank also leases its headquarters in Salt Lake City, Utah. Other operations facilities are either owned or leased. The annual rentals under long-term leases for leased premises are determined under various formulas and factors, including operating costs, maintenance and taxes. For additional information regarding leases and rental payments, see Note 15 of the Notes to Consolidated Financial Statements.

ITEM 3. LEGAL PROCEEDINGS

The information contained in Note 15 of the Notes to Consolidated Financial Statements is incorporated by reference herein.

ITEM 4. MINE SAFETY DISCLOSURES

None.

5. ISSUER PURCHASES OF EQUITY SECURITIES

PREFERRED STOCK

We have 4,400,000 authorized shares of preferred stock without par value and with a liquidation preference of \$1,000 per share. As of December 31, 2018, 66,139, 138,391, 126,221, 98,555, and 136,368 of preferred shares series A, G, H, I, and J respectively, are outstanding. See Note 13 of the Notes to Consolidated Financial Statements for further information regarding the Bank's preferred stock.

COMMON STOCK

Market Information

The Bank's common stock is traded on the NASDAQ Global Select Market under the symbol "ZION." The last reported sale price of the common stock on NASDAQ on February 8, 2019 was \$49.04 per share.

Common Stock Warrants

As of December 31, 2018, 29.3 million common stock warrants (NASDAQ: ZIONW) with an exercise price of \$34.82 were outstanding. These warrants expire on May 22, 2020. See Note 13 of the Notes to Consolidated Financial Statements for further information about the warrants and warrant exercises during 2018.

Equity Capital and Dividends

As of February 8, 2019, there were 4,161 holders of record of the Bank's common stock. The Bank's Board of Directors approved a dividend of \$0.30 per common share payable on February 21, 2019 to shareholders of record on February 14, 2019. The Bank expects to continue its policy of paying regular cash dividends on a quarterly basis, although there is no assurance as to future dividends because they depend on future earnings, capital requirements, financial condition, and regulatory approvals.

Share Repurchases

The Bank continued its common stock repurchase program during 2018 and repurchased 12.9 million shares of common shares outstanding, which is equivalent to 6.6% of common stock outstanding as of December 31, 2017,

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

with a fair value of \$670 million at an average price of \$51.77 per share. In February 2019, the Bank announced that the Board approved a plan to repurchase \$275 million of common stock during the first quarter of 2019. During 2017, the Bank repurchased 7.0 million shares of common shares outstanding with a fair value of \$320 million at an average price of \$45.66 per share. The following schedule summarizes the Bank's share repurchases for the fourth quarter of 2018:

Period	Total number of shares repurchased ¹	Average price paid per share	Shares purchased as part of publicly announced plans or programs	Approximate dollar value of shares that may yet be purchased under the share repurchase plan (in millions)
October	419,583	\$ 47.78	418,632	\$ 230
November	4,723,543	48.69	4,723,363	—
December	5,006	46.87	—	—
Fourth quarter	5,148,132	48.62	5,141,995	

¹ Represents common shares acquired from employees in connection with our stock compensation plan in addition to shares acquired under previously reported share repurchase plans. Shares were acquired from employees to pay for their payroll taxes and stock option exercise cost upon the vesting of restricted stock and restricted stock units, and the exercise of stock options, under provisions of an employee share-based compensation plan.

Performance Graph

The following stock performance graph compares the five-year cumulative total return of Zions Bancorporation's common stock with the Standard & Poor's 500 Index and the Keefe, Bruyette & Woods Inc. ("KBW"), Regional Bank Index ("KRX"). The KRX is a modified market capitalization-weighted regional bank and thrift stock index developed and published by KBW, a nationally recognized brokerage and investment banking firm specializing in bank stocks. The index is composed of 50 geographically diverse stocks representing regional banks or thrifts. The stock performance graph is based upon an initial investment of \$100 on December 31, 2013 and assumes reinvestment of dividends.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

MANAGEMENT'S DISCUSSION AND ANALYSIS

GAAP to NON-GAAP RECONCILIATIONS

This Form 10-K presents non-GAAP financial measures, in addition to GAAP financial measures, to provide investors with additional information. The adjustments to reconcile from the applicable GAAP financial measures to the non-GAAP financial measures are presented in the following schedules. The Bank considers these adjustments to be relevant to ongoing operating results and provide a meaningful base for period-to-period and company-to-company comparisons. These non-GAAP financial measures are used by management to assess the performance and financial position of the Bank and for presentations of Bank performance to investors. The Bank further believes that presenting these non-GAAP financial measures will permit investors to assess the performance of the Bank on the same basis as that applied by management.

Non-GAAP financial measures have inherent limitations and are not required to be uniformly applied by individual entities. Although non-GAAP financial measures are frequently used by stakeholders to evaluate a company, they have limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of results reported under GAAP. The following are the non-GAAP financial measures presented in this Form 10-K and a discussion of why management and investors use these non-GAAP measures.

Return on Average Tangible Common Equity ("ROTCE") – this schedule also includes "net earnings applicable to common shareholders, excluding the effects of the adjustments, net of tax" and "average tangible common equity." ROTCE is a non-GAAP financial measure that management believes provides useful information about the Bank's use of shareholders' equity. Management believes the use of ratios that utilize tangible equity provides additional useful information about performance because they present measures of those assets that can generate income.

Schedule 1

RETURN ON AVERAGE TANGIBLE COMMON EQUITY (NON-GAAP) – ANNUAL

(Dollar amounts in millions)	Year Ended December 31,		
	2018	2017	2016
Net earnings applicable to common shareholders (GAAP)	\$850	\$550	\$411
Amortization of core deposit and other intangibles, net of tax	1	4	5
Net earnings applicable to common shareholders, excluding amortization of core deposits and intangibles, net of tax (non-GAAP)	(a) \$851	\$554	\$416
Average common equity (GAAP)	\$7,024	\$7,148	\$6,915
Average goodwill and intangibles	(1,015)	(1,019)	(1,027)
Average tangible common equity (non-GAAP)	(b) \$6,009	\$6,129	\$5,888
Return on average tangible common equity (non-GAAP)	(a/b) 14.2 %	9.0 %	7.1 %

Tangible Equity Ratio, Tangible Common Equity Ratio, and Tangible Book Value per Common Share – this schedule also includes "tangible equity," "tangible common equity," and "tangible assets." Tangible equity ratio, tangible common equity ratio, and tangible book value per common share are non-GAAP financial measures that management believes provide additional useful information about the levels of tangible assets and tangible equity between each other and in relation to outstanding shares of common stock. Management believes the use of ratios that utilize tangible equity provides additional useful information about capital adequacy because they present measures of those assets that can generate income.

Schedule 2

TANGIBLE EQUITY (NON-GAAP) AND TANGIBLE COMMON EQUITY (NON-GAAP)

(Dollar amounts in millions, except per share amounts)	December 31,		
	2018	2017	2016
Total shareholders' equity (GAAP)	\$7,578	\$7,679	\$7,634
Goodwill and intangibles	(1,015)	(1,016)	(1,022)

Tangible equity (non-GAAP)	(a)	6,563	6,663	6,612
Preferred stock		(566)	(566)	(710)
Tangible common equity (non-GAAP)	(b)	\$5,997	\$6,097	\$5,902
Total assets (GAAP)		\$68,746	\$66,288	\$63,239
Goodwill and intangibles		(1,015)	(1,016)	(1,022)
Tangible assets (non-GAAP)	(c)	\$67,731	\$65,272	\$62,217
Common shares outstanding (thousands)	(d)	187,554	197,532	203,085
Tangible equity ratio (non-GAAP)	(a/c)	9.7 %	10.2 %	10.6 %
Tangible common equity ratio (non-GAAP)	(b/c)	8.9 %	9.3 %	9.5 %
Tangible book value per common share (non-GAAP)	(b/d)	\$31.97	\$30.87	\$29.06

Efficiency Ratio – this schedule also includes “adjusted noninterest expense,” “taxable-equivalent net interest income,” “adjusted taxable-equivalent revenue,” “pre-provision net revenue (“PPNR”),” and “adjusted PPNR.” The methodology of determining the efficiency ratio may differ among companies. Management makes adjustments to exclude certain items as identified in the subsequent schedule which it believes allows for more consistent comparability among periods. Management believes the efficiency ratio provides useful information regarding the cost of generating revenue. Adjusted noninterest expense provides a measure as to how well the Bank is managing its expenses, and adjusted PPNR enables management and others to assess the Bank’s ability to generate capital to cover credit losses through a credit cycle. Taxable-equivalent net interest income allows management to assess the comparability of revenue arising from both taxable and tax-exempt sources.

Schedule 3

EFFICIENCY RATIO

(Dollar amounts in millions)

		2018	2017	2016
Noninterest expense (GAAP)	(a)	\$1,678	\$1,649	\$1,585
Adjustments:				
Severance costs		3	7	5
Other real estate expense, net		1	(1)	(2)

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Bank Overview

Zions Bancorporation, National Association and its subsidiaries (collectively “Zions Bancorporation, N.A.,” “the Bank,” “we,” “our,” “us”) together comprise a \$69 billion commercial bank headquartered in Salt Lake City, Utah.

At December 31, 2018, the Bank had banking operations through 433 branches in eleven western states, with strong market share in many of the markets in which it operates. Additionally, the Bank currently has, and continues to develop its digital delivery capabilities. Revenues and profits are primarily derived from commercial customers, and the Bank also emphasizes retail banking, mortgage banking, wealth management, municipal finance, and brokerage services. The Bank is included in the Standard and Poor’s (“S&P”) 500 and NASDAQ Financial 100 indices.

The Bank is consistently ranked among the best banks in the country to work with by its small and middle-market customers, as measured by the Greenwich Associates annual survey. Since the inception of the awards in 2009, only five other U.S. banks have consistently received as many Greenwich Excellence Awards as Zions Bancorporation, N.A.

The Bank consistently wins awards for the best bank within its geography. Examples include the best bank awards given by local newspapers, business journals, or similar publications in Nevada, Arizona, and California: Orange County (five consecutive years) and San Diego County (eight consecutive years).

• The Bank’s objectives include:

Continuing revenue growth (net interest income plus noninterest income) in excess of noninterest expense—so-called positive operating leverage—which should result in annual PPNR growth in the high-single digit rate and further improvement to the efficiency ratio;

Improving profitability ratios. Improved operating efficiency coupled with low credit costs as experienced in 2018 should lead to improved profitability ratios, such as the returns on assets and equity.

Maintaining or increasing capital distributions due to stronger earnings and a lower risk profile than seen in prior years.

• The long-term strategy of the Bank to achieve these objectives includes the following:

Continuing to execute on our community bank business model by doing business on a “local” basis, with significant local decision making for customer-facing elements of our business including product offerings, marketing, and pricing. We believe our scale gives us superior access to capital markets, more robust treasury management, and other product capabilities than smaller community banks. We also believe that our model provides a meaningful competitive advantage and an opportunity for growth over larger national banks whose loan and deposit products are often homogeneous. We are actively engaged in community events and charitable efforts designed to give back to the people within our communities. In 2018, we believe this local, customized approach led to a strong showing with commercial customers as reflected in the Greenwich Awards referenced earlier, as well as a loan growth rate of 4% for the year;

Maintaining a strong approach to risk management, having meaningfully improved our operational, credit, and financial risk management in the past several years;

Continuing to invest in a diverse team of knowledgeable and experienced bankers, known for their integrity. We are committed to building our employees’ capabilities, so they can become trusted partners of our customers and leaders in their communities; and

Continuing to invest in technology. Looking forward for the next several years, we believe that digital delivery of products, including mobile banking, online banking and having a core processing system that is robust and prevents outages, is critical to remaining competitive. We have rolled out a wide range of improvements and additions to our customer interfaces including a redesigned website, mobile applications, and an upgraded treasury internet banking platform for our commercial customers.

• During the past several years we have taken significant actions to improve the Bank’s risk profile, which include:

The reduction of an above-average concentration in CRE loans. CRE loans as a percentage of total loans has declined from 35% at December 31, 2007 to 24% at December 31, 2018;

Numerous changes made to the credit administration organization and processes to facilitate improved data collection on loans and monitoring of potential default and loss risk;

28

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The significant increase of liquidity and flexibility to reposition the securities portfolio with the purchase of moderate duration securities with limited duration extension risk; i.e., management has generally purchased securities that within the context of a rising interest rate environment would not experience interest rate related losses;

The addition of five members to the Board of Directors during the past five years that have strong financial and risk management experience;

The replacement and upgrade of management information and accounting systems to allow for a more complete view of the Bank's risks and opportunities; and

The ongoing evaluation and classification of all known risks into approximately sixty unique risk categories, which are regularly monitored and reported in a process that flows from line-level employees through executive management to the Board of Directors;

We have also taken significant actions to improve the Bank's efficiency during the past several years, which include the streamlining or elimination of redundant or inefficient processes, and the reduction of unnecessary complexity in product types. We intend to continue improving our efficiency by creating value through the adoption of common practices, automation, and simplification of our front, middle and back-office processes.

We believe we have achieved even greater operating efficiencies than currently reflected in our financial statements, since our profitability has improved while at the same time investing a substantial amount to upgrade and replace core systems and applications. We announced in 2013 that we had started a project to replace our core loan and deposit banking systems ("Core Transformation Project"). We successfully implemented the first phase of the TCS B NCS® core servicing system in mid-2017, replacing our consumer lending system. The second phase of the Core Transformation Project, which replaces the Bank's primary commercial lending systems, was deployed in the February of 2019 and we are in the process of finalizing the full implementation. The replacement of the deposit system is expected to be the third phase of the Core Transformation Project, and is still in the preliminary stages of development. As of December 31, 2018, the Bank had \$196 million of capitalized expenses associated with the Core Transformation Project. B NCS® is a real time, parameter-driven servicing system that will provide long-term benefits to the Bank by improving accessibility and functionality, allowing our bankers to better serve customers.

As part of our ongoing simplification and efficiency efforts, on September 30, 2018, the Bank completed the merger of Zions Bancorporation, its former bank holding company, with, and into, the Bank formerly known as ZB, N.A., in order to further reduce organizational complexity. The restructuring eliminated the bank holding company structure and associated regulatory framework, and resulted in ZB, N.A. being renamed Zions Bancorporation, National Association and becoming the top-level entity within our corporate structure. The merger eliminates duplicative regulatory efforts, leaving the OCC as the Bank's primary regulator. As a result of the merger and the Financial Stability Oversight Council's action on September 12, 2018, the Bank is no longer considered a systemically important financial institution under the Dodd-Frank Act. See "Capital Management" on page 69 for more information regarding the merger. In December 2015, the Bank consolidated its various banking charters into a single charter.

In May 2018, the Crapo Bill was signed into law, reducing regulatory requirements for many banking institutions and exempting the Bank from the capital planning actions as required by the Dodd-Frank Act.

With the improvement in profitability and our risk profile, the Bank's capital stress test results have markedly improved during the past few years, and as such, we have increased the return on- and of-capital to shareholders, including increasing the common dividend from \$0.16 per share in 2014 to \$1.04 per share in 2018. Additionally, we repurchased \$670 million of common stock during 2018, which is 7% of common stock outstanding as of December 31, 2017. We believe we are carrying excess capital, informed primarily by our stress test results, and have indicated that we intend to reduce our capital ratios to levels more consistent with our significantly reduced risk profile. The magnitude, timing and form of capital return will be determined by the Board.

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

RESULTS OF OPERATIONS

Executive Summary

The Bank reported net earnings applicable to common shareholders for 2018 of \$850 million or \$4.08 per diluted common share compared with \$550 million or \$2.60 per diluted common share for 2017. Although a reduction in the statutory tax rate contributed significantly to the improved earnings, adjusted PPNR increased by \$141 million, or 14%, to \$1.1 billion. The increase in adjusted PPNR was primarily the result of increased interest income due to loan growth and continued expense control. Additionally, net income was positively impacted by improving credit quality, as discussed in more detail below. The Bank's efficiency ratio improved to 59.6% in 2018 from 62.3% in 2017. We expect to achieve a high single-digit rate of growth in PPNR during the next several years without assuming the benefit of further benchmark interest rate increases and continue to strive for improvements to our efficiency ratio going forward.

The Bank's net interest margin ("NIM") expanded 16 basis points ("bps") for the full year of 2018 versus 2017, which was largely attributable to the favorable effects of higher interest rates on our moderately "asset sensitive" balance sheet – where asset yields repriced faster and/or to a greater degree than liabilities (see Schedule 6).

Asset quality improved considerably in 2018, reflecting strong improvements in the oil and gas-related portfolio and generally stable to moderate improvements in other loan portfolios. Relative to 2017, total criticized, classified, and nonaccrual loans declined by 37%, 38%, and 39%, respectively. Net loan recoveries, expressed as a percentage of average loans held for investment, improved to net recoveries of 0.04% in 2018 from net charge-offs of 0.17% in 2017, largely the result of loan recoveries in the oil and gas portfolio.

Specifically for 2018 relative to 2017, the improved financial performance reflects:

Moderate net interest income growth resulting from loan growth and a generally stable securities portfolio, combined with the benefit of rising benchmark interest rates on a balance sheet that consists of assets that generally reprice faster and to a greater degree than the liabilities.

- Modest adjusted noninterest income growth due to continued focus on this source of revenue; we experienced notable successes such as generating strong growth in trust and wealth management income, increasing loan syndication arrangement fees, and arranging interest rate hedges for our loan customers.

A slight increase in noninterest expense while we remain focused on expense controls and continue to invest in technology and simplification initiatives. We delivered on our commitment to limit adjusted noninterest expense growth in 2018 to increase only slightly relative to our 2017 results. Adjusted noninterest expense increased \$31 million in 2018, or 2%, to \$1.7 billion in 2018.

A decline in the provision for credit losses from \$17 million in 2017, to \$(40) million in 2018 as the credit quality of loans improved.

Net earnings applicable to common shareholders increased by 55% over the prior year, and earnings per diluted share increased by 57%, a slightly stronger rate of growth than net earnings due to the repurchase of 12.9 million shares of Bank common stock during 2018.

Areas Experiencing Challenges in 2018

Although loan growth was generally consistent with the targeted levels we had established for 2018, we experienced increased competition during the year. Some of this competition came from non-bank financial institutions such as debt funds, debt capital markets, and covenant-light structures. Additionally, some larger customers elected to refinance loans through the issuance of debt in the capital markets – an option that is not readily available to most of our customers.

Loan growth of \$1.9 billion, or 4%, exceeded deposit growth of \$1.5 billion, or 3%, in 2018. Consequently, we relied more on wholesale funding to finance incremental balance sheet growth, increasing our funding cost.

Noninterest income from customer-related fees increased 3% in 2018 from the prior year period, which was less than the targeted growth goal. We experienced strength in corporate investment services and wealth management

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

income, loan syndication fees and bankcard fees. This growth was partially offset by declines in mortgage-related fees and deposit service charges.

Focus for 2019

In 2019, we are focused on the ongoing initiatives related to Bank profitability and returns on- and of-equity. Major areas of emphasis include the following:

▲ Achieve positive operating leverage

Achieve broad-based loan growth (i.e. low- to mid-single digit growth rate) within acceptable concentration limits

Achieve similar or improve upon growth rates in noninterest income, emphasizing customer-related fee income

Achieve greater sales volumes and revenue growth through enhanced use of data

Manage noninterest expense growth linked to revenue growth, profitability and digital delivery strategies

◐ Target high single-digit annual percentage growth rate for PPNR

◑ Demonstrate reduced volatility in financial performance than previously experienced

• Implement technology upgrade and digital strategies, automation and simplification of front, middle and bank office processes

† Increase the return on- and of- capital

Maintain top quartile credit risk profile and superior risk management posture leading to increasing returns of capital

Moderately increase financial leverage through the reduction of surplus common equity as informed by stress testing Schedule 4

KEY DRIVERS OF PERFORMANCE

2018 COMPARED TO 2017

Driver	2018	2017	Change better/(worse)	
	(In billions)			
Average net loans and leases	\$45.4	\$43.5	4	%
Average money market investments	1.4	1.5	(7)
Average total securities	15.6	15.7	(1)
Average noninterest-bearing deposits	23.8	23.8	—	
Average total deposits	53.2	52.2	2	
	(In millions)

¹ Includes the following income statement line items: service charges and fees on deposit accounts, other service charges, commissions and fees, wealth management and trust income, loan sales and servicing income and capital markets and foreign exchange income.

² Includes loans held for sale.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Net Interest Income

Net interest income is the difference between interest earned on interest-earning assets and interest paid on interest-bearing liabilities and is more than three-quarters of our revenue. Net interest income is derived from both the volume of interest-earning assets and interest-bearing liabilities and the net yield earned on the assets and paid on the liabilities.

Net interest income improved by \$165 million during 2018 compared with 2017 to \$2.2 billion, an increase of 8%. For 2018, taxable-equivalent net interest income was \$2.3 billion, compared with \$2.1 billion and \$1.9 billion, in 2017 and 2016, respectively. The tax rate used for calculating all taxable-equivalent adjustments was 21% for 2018 and 35% for all prior periods. The increase over 2017, and the previous increase over 2016, were driven by several factors, including average loan growth, noninterest-bearing deposit stability, disciplined deposit pricing and increases in benchmark interest rates. The increase from 2016 to 2017 was further impacted by a larger average securities portfolio balance. We are not assuming any further increases in benchmark rates in our forecasts. However, because of loan growth and the benefit of our noninterest-bearing deposits, we expect net interest income to increase at a moderate pace in 2019 when compared with 2018.

Net Interest Margin and Interest Rate Spreads in 2018 vs. 2017

The NIM was 3.61% and 3.45% for 2018 and 2017, respectively. When comparing 2018 with 2017, changes in asset mix resulted in higher average loans, lower average securities and money market investments, and higher average interest-bearing deposits and wholesale borrowings balances to fund overall balance sheet growth. A significant source of NIM expansion is the increasing value of noninterest-bearing demand deposit accounts in the rising interest rate environment. Expansion of NIM reflects a higher loan yield with only a moderate increase in funding costs. Funding balance sheet growth with wholesale borrowings reduced spreads and negatively impacted NIM, although it was accretive to net interest income. The NIM was also positively impacted by increases in the federal funds target rate during 2018. Average interest-earning assets increased \$1.6 billion from 2017, with average rates improving 35 bps. Average interest-bearing liabilities increased \$1.5 billion and average rates also increased 35 bps over the same period.

The average balance of our investment securities portfolio decreased \$0.1 billion, while year-end balances decreased \$0.5 billion. Our average lending portfolio increased \$1.9 billion to \$45.4 billion, an increase of 4%. The net earning asset growth was funded through a mix of deposits and wholesale borrowings.

Interest expense increased \$124 million compared to 2017 results, attributable to both an increase in the cost and quantity of deposits and wholesale funding. Interest expense on deposits increased \$76 million on \$29.4 billion of average interest-bearing deposits.

The increase in the average loan portfolio was due to growth in 1-4 family residential, commercial and industrial, and municipal lending. Yields on average balances increased by 43 bps, 45 bps, and 20 bps in the commercial, CRE and consumer portfolios, respectively. Much of the consumer growth was in consumer 1-4 family residential, where our yields are generally lower than on commercial loans. The federal funds target rate increased nine times beginning in the fourth quarter of 2015, which has had a positive impact on NIM and spreads, as our earning assets generally reprice more quickly than our funding sources. A portion of our variable-rate loans were not affected by these changes primarily due to longer reset frequency, or because a substantial portion of our earning assets are tied to longer-term rates indices, which rates were impacted by a relatively flat yield curve for much of 2018. Additionally, NIM benefited from FDIC-supported loans by 1 and 3 bps in 2018 and 2017, respectively. We expect moderate to strong growth in 1-4 family, municipal, commercial and industrial, and owner-occupied loans and stable-to-moderate growth in CRE and oil and gas-related loans.

Average noninterest-bearing demand deposits provided us with low-cost funding and comprised 45% of average total deposits, which totaled \$53.2 billion in 2018, compared with 46% of average total deposits, which totaled \$52.2 billion, for 2017. Average interest-bearing deposits increased 3% in 2018, compared with 2017. Over the past 12 months the Federal Reserve has increased the overnight benchmark federal funds rate by 100 bps, while the rate

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

paid on the Bank's interest-bearing deposits increased 25 bps, implying a deposit beta of 25%. We have been selectively increasing deposit pricing in certain markets and with certain clients, but we have not generally experienced significant pressure to broadly increase deposit rates. Although we consider a wide variety of sources when determining our funding needs, we benefit from access to deposits from a significant number of small to mid-sized business customers, which provide us with a low cost of funds and have a positive impact on our NIM. Including wholesale borrowings, the rate paid on interest-bearing liabilities increased 35 bps.

The average balance of long-term debt increased \$118 million compared with 2017, while the average rate decreased 58 bps. During the third quarter 2018, the Bank issued a \$500 million senior note with an interest rate of 3.5%. Overall interest expense on long-term debt increased \$4 million. The Bank has used short-term Federal Home Loan Bank ("FHLB") borrowings to fund some of its balance sheet growth during the past couple of years. Average short-term debt grew \$0.5 billion and the rate paid increased 88 bps. Further changes in short-term borrowings will be driven by balancing changes in deposits and loans as we do not foresee significant increases in investment security balances.

The spread on average interest-bearing funds was 3.28% in 2018 and 3.27% in 2017, respectively. The spread on average interest-bearing funds for these periods was affected by the same factors that had an impact on the NIM. Interest rate spreads and margin are impacted by the mix of assets we hold, the composition of our loan and securities portfolios and the type of funding used. We expect the yield of the loan portfolio to increase somewhat due to the effects of rising interest rates in 2018, partially offset by a continued modest change in the mix of the portfolio (increasing concentration in lower-yielding residential mortgages), as well as reduced income from higher-yielding loans purchased from the FDIC in 2009.

Our estimates of the Bank's interest rate risk position are highly dependent upon a number of assumptions regarding the repricing behavior of various deposit and loan types in response to changes in both short-term and long-term interest rates, balance sheet composition, and other modeling assumptions, as well as the actions of competitors and customers in response to those changes. Although the federal funds target rate has increased 225 bps since the fourth quarter of 2015, we have not experienced significant migration of our noninterest-bearing deposits which we attribute to the operating nature of many of our deposit accounts. Further detail on interest rate risk is discussed in "Interest Rate and Market Risk Management" on page 62.

Refer to the "Liquidity Risk Management" section beginning on page 65 for more information on how we manage liquidity risk.

Net Interest Margin and Interest Rate Spreads in 2017 vs. 2016

The NIM was 3.45% and 3.37% for 2017 and 2016, respectively. Compared with 2016, changes in asset mix resulted in higher securities and loan balances, lower balances in money market investments, and higher balances of wholesale borrowings to fund overall balance sheet growth. Moving funds from money market investments to loans and securities had a positive impact on NIM. The NIM was also positively impacted by several increases in short-term interest rates. Average interest-earning assets increased \$4.7 billion from 2016, with average rates improving 14 bps. Average interest-bearing liabilities increased \$3.6 billion and average rates increased 8 bps over the same period. The average loan portfolio increased \$1.4 billion, or 3% from 2016, with the majority of growth coming from 1-4 family residential, commercial and industrial, and municipal lending. Yields on average balances increased overall, buoyed by increases of 16 bps and 26 bps in the commercial and CRE portfolios, respectively; yields on average consumer balances were relatively flat during 2017. Additionally, NIM benefited from FDIC-supported loans by approximately 3 bps and 4 bps in 2017 and 2016, respectively.

Average available-for-sale ("AFS") securities balances increased \$5.4 billion during 2017 and yields were also up 17 bps due to the effect of rising interest rates on variable-rate securities, moderation in the amount of prepayments on agency-guaranteed, mortgage-backed securities, and investment in products providing a higher yield than the

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

average portfolio. The purchases were funded by using lower-yielding average money market investments, which were reduced by \$2.1 billion, and wholesale borrowing from the FHLB.

Average noninterest-bearing demand deposits provided us with low-cost funding and comprised 45.6% of average total deposits, which totaled \$52.2 billion in 2017, compared with 44.4% of average total deposits, which totaled \$50.6 billion, for 2016. Average interest-bearing deposits increased only 1% in 2017, compared with 2016. The average balance of long-term debt decreased \$286 million compared with 2016 and the average rate increased 61 bps in the current year while interest expense decreased \$13 million from 2016. The rate increased because the remaining debt was at a higher average rate than the rate on debt that matured and was available to be called.

The spread on average interest-bearing funds was 3.27% and 3.23% for 2017 and 2016, respectively. The spread on average interest-bearing funds for these periods was affected by the same factors that had an impact on the NIM. Refer to the “Liquidity Risk Management” section beginning on page 65 for more information on how we manage liquidity risk.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Schedule 6 analyzes the year-to-year changes in net interest income on a fully taxable-equivalent basis for the years indicated. For purposes of calculating the yields in these schedules, the average loan balances also include the principal amounts of nonaccrual and restructured loans. However, interest received on nonaccrual loans is included in income only to the extent that cash payments have been received and not applied to principal reductions. In addition, interest on restructured loans is generally accrued at reduced rates.

Schedule 6

ANALYSIS OF INTEREST CHANGES DUE TO VOLUME AND RATE

(In millions)	2018 over 2017			2017 over 2016		
	Changes due to Volume	Rate ¹	Total changes	Changes due to Volume	Rate ¹	Total changes

Time	8	26	34	3	5	8
Total interest-bearing deposits	7	69	76	3	7	10
Borrowed funds:						
Federal funds purchased and other short-term borrowings	4	40	44	31	12	43
Long-term debt	6	(2)	4	(15)	2	(13)
Total borrowed funds	10	38	48	16	14	30
Total interest-bearing liabilities	17	107	124	19	21	40
Change in taxable-equivalent net interest income	\$60	\$92	\$152	\$137	\$71	\$208

¹ Taxable-equivalent rates used where applicable.

² Net of unearned income and fees, net of related costs. Loans include nonaccrual and restructured loans.

In the analysis of interest changes due to volume and rate, changes due to the volume/rate variance are allocated to volume with the following exceptions: when volume and rate both increase, the variance is allocated proportionately to both volume and rate; when the rate increases and volume decreases, the variance is allocated to rate.

Provision for Credit Losses

The provision for credit losses is the combination of both the provision for loan losses and the provision for unfunded lending commitments. The provision for loan losses is the amount of expense that, in our judgment, is required to maintain the ALLL at an adequate level based on the inherent risks in the loan portfolio. The provision for unfunded lending commitments is used to maintain the reserve for unfunded lending commitments (“RULC”) at an adequate level based on the inherent risks associated with such commitments. In determining adequate levels of the ALLL and

RULC, we perform periodic evaluations of our various loan portfolios, the levels of actual charge-offs, credit quality trends, and external factors. See Note 6 of the Notes to Consolidated Financial Statements and

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

“Credit Risk Management” on page 52 for more information on how we determine the appropriate level for the ALLL and the RULC.

The provision for loan losses was \$(39) million in 2018, compared with \$24 million in 2017. Credit quality was strong throughout 2018, with continued significant improvement in the oil and gas-related portfolio. Classified and nonaccrual loans in the total portfolio declined by \$435 million and \$162 million, respectively. Net recoveries totaled \$16 million in 2018, compared with \$73 million in net charge-offs in 2017. These improvements in both credit quality and net charge-offs resulted in the lower provision.

The provision for unfunded lending commitments was \$(1) million in 2018, compared with \$(7) million in 2017. The change in the provision in 2018 from 2017 was primarily due to increased unfunded lending commitments, partially offset by credit quality improvements in the oil and gas-related portfolio. The negative provision in 2017 was primarily due to improved credit quality assessments related to obligations for credits outside the oil and gas-related portfolio, along with declining oil and gas-related exposure. From quarter to quarter, the provision for unfunded lending commitments may be subject to sizable fluctuations due to changes in the timing and volume of loan commitments, originations, fundings, and changes in credit quality.

The allowance for credit losses (“ACL”), which is the combination of both the ALLL and the RULC, decreased by \$24 million during 2018. Strong credit quality in 2018, highlighted by improvement in the oil and gas-related portfolio, was responsible for much of this reduction. Further, increasing non-oil and gas-related commercial and industrial and 1-4 family residential mortgage exposure, also improved the risk profile of the total portfolio.

Noninterest Income

Noninterest income represents revenues we earn for products and services that have no associated interest rate or yield. Noninterest income accounted for 18% and 20% of total revenue during 2018 and 2017, respectively. For 2018, noninterest income was \$552 million compared with \$544 million in 2017 and \$516 million in 2016.

During 2018, we experienced strength in corporate investment services and wealth management income, loan syndication fees, bankcard fees and merchant account fees while experiencing declines in deposit-related service charges and mortgage-related fees. The improvement in corporate investment services income was primarily due to increases in the revenue share received from the higher balances in money market mutual funds. Rising interest rates resulted in improved returns for money market mutual funds, thus driving the increase in balances. Deposit service charge income experienced slight resistance due, in part, to rising interest rates as discussed below. Rising interest rates also adversely impacted mortgage banking activity.

We believe a subtotal of customer-related fees provides a better view of income over which we have more direct control. It excludes items such as dividends, insurance-related income, mark-to-market adjustments on certain derivatives, and securities gains and losses.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Schedule 7 presents a comparison of the major components of noninterest income for the past three years.

Schedule 7

NONINTEREST INCOME

(Dollar amounts in millions)	2018	Amount change	Percent change	2017	Amount change	Percent change	2016
Service charges and fees on deposit accounts	\$166	\$ (5)	(3)%	\$171	\$ —	—	\$171
Other service charges, commissions and fees	228	11	5	217	9	4	208
Wealth management and trust income	51	9	21	42	5	14	37
Loan sales and servicing income	25	—	—	25	(10)	(29)	35
Capital markets and foreign exchange	31	1	3	30	8	36	22
Customer-related fees	501	16	3	485	12	3	473
Dividends and other investment income	43	3	8	40	16	67	24
Securities gains, net	1	(13)	(93)	14	7	(100)	7
Other	7	2	40	5	(7)	(58)	12
Total noninterest income	\$552	\$ 8	1	\$544	\$ 28	5	\$516

Service charges and fees on deposit accounts decreased by \$5 million, or 3%, during 2018 and has been static or slightly decreasing for the last several years. A primary driver of the decline in service charges and fees was softening of high transaction volume customers. A secondary driver of this decline could be attributed to rising interest rates, which may influence increases in the earning credit rate due to customer expectations. The earnings credit rate (ECR) is a daily calculation of soft dollar credit that a bank pays on customer's noninterest-bearing deposits on Account Analysis. This credit can be used to offset service charges on a customer's analyzed account. As the ECR increases, customers offset more of their deposit service charges, thus the potential softening in noninterest income.

Other service charges, commissions and fees, which are comprised of automated teller machine ("ATM") fees, insurance commissions, bankcard merchant fees, debit and credit card interchange fees, cash management fees, and other miscellaneous fees, increased by \$11 million, or 5%, compared with 2017. The increase relates mainly to higher credit card interchange fees and exchange and other fees. In 2017 other service charges, commissions and fees increased by \$9 million compared with 2016. The increase was primarily a result of the same items mentioned previously.

Wealth management and trust income increased by \$9 million, or 21%. The change was due to trust income, with improvement in both corporate and personal trust revenue due to platform and product simplifications. Wealth management and trust income increased \$5 million between 2017 and 2016 for the same reasons.

Securities gains, net, decreased \$13 million during 2018 as a result of \$13 million of increases in the market value of the Bank's Small Business Investment Company ("SBIC") investments in 2017 that did not reoccur to the same magnitude in 2018. Securities gains, net in 2017 increased from 2016 as a result of higher increases in the market values of the Bank's SBIC investments.

Dividends and other investment income increased \$16 million between 2017 and 2016, primarily due to \$14 million of gains across many of our cost and equity method investments.

Loan sales and servicing income decreased \$10 million between 2017 and 2016. During 2017, we ceased selling servicing-released mortgage loans to Freddie Mac, and therefore no longer received the associated servicing premiums for doing so, which decreased income by \$11 million. In general, servicing income increased slightly in 2017. We also had particularly large valuation gains during 2016 on agricultural loan servicing assets accounted for at fair value, which did not repeat to the same extent in 2017.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Noninterest Expense

As mentioned previously, we delivered on our commitment to limit adjusted noninterest expense growth in 2018 to increase only slightly relative to our 2017 results. Both noninterest expense and adjusted noninterest expense were \$1.7 billion in 2018 compared to \$1.6 billion in both 2017 and 2016. Noninterest expense increased \$29 million, or 2%, and adjusted noninterest expense increased \$31 million, also 2%, in 2018. (see “GAAP to Non-GAAP Reconciliations” on page 27 for more information regarding the calculation of adjusted noninterest expense).

We have developed a culture that continually seeks to streamline and make more simple and efficient the processes required to operate. To this end, in 2018 we successfully completed the merger of the holding company with and into the bank subsidiary. The consolidation of our seven bank charters at the end of 2015 almost entirely eliminated the need for the holding company; the consolidation of the holding company into the bank reduced duplicative regulatory examinations and certain regulatory requirements. The Bank remains focused on expense control efforts, while continuing to invest in technology initiatives.

Schedule 8 presents a comparison of the major components of noninterest expense for the past three years.

Schedule 8

NONINTEREST EXPENSE

(Dollar amounts in millions)	2018	Amount change	Percent change	2017	Amount change	Percent change	2016
Salaries and employee benefits	\$1,070	\$ 64	6 %	\$1,006	\$ 28	3 %	\$978
Occupancy, net	132	3	2	129	4	3	125
Furniture, equipment and software, net	126	(4)	(3)	130	5	4	125

Credit-related expense	25	(4)	(14)	29	4	16	25
Provision for unfunded lending commitments	(1)	6	(86)	(7)	3	(30)	(10)
Professional and legal services	52	(5)	(9)	57	1	2	56
Advertising	26	4	18	22	—	—	22
FDIC premiums	50	(3)	(6)	53	13	33	40
Other	197	(34)	(15)	231	5	2	226
Total noninterest expense	\$1,678	\$ 29	2	\$1,649	\$ 64	4	\$1,585

Salaries and employee benefits increased by \$64 million, or 6%, in 2018, compared with 2017. Salaries and employee benefits increased primarily due to a \$29 million increase in base salaries resulting from salary increases related to the Tax Cuts and Jobs Act, merit increases and increased headcount, and a \$19 million increase in incentive compensation, of which \$7 million relates to the Tax Cuts and Jobs Act. The remaining \$16 million increase was primarily a result of an \$8 million increase in the Bank’s medical plans and a \$7 million increase in the Bank’s contribution to the employee 401(k) plan, as a result of improved financial performance, including the profit sharing contribution which increased to 2.5% of eligible compensation in 2018 from 1.75% in 2017. Our investment in major systems projects has led to headcount increases in more highly compensated roles.

Salaries and employee benefits increased by \$28 million, or 3%, in 2017, compared with 2016. Base salaries were up in 2017, as employee salary expense rose roughly in line with inflation. Employee bonuses were up, partially due to lower incentive compensation for management in 2016 and larger commission expense in 2017. Benefits expense increased \$11 million, or 8%, in 2017, primarily due to higher costs in the Bank’s medical plans and an increase in profit sharing expense.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Schedule 9

SALARIES AND EMPLOYEE BENEFITS

(Dollar amounts in millions)	2018	Amount/quantity change	Percent change	2017	Amount/quantity change	Percent change	2016
Salaries and bonuses	\$895	\$ 46	5 %	\$849	\$ 17	2 %	\$ 832

Total benefits	175	18	11	157	11	8	146
Total salaries and employee benefits	\$1,070	\$ 64	6	\$1,006	\$ 28	3	\$ 978
Full-time equivalent employees at December 31	10,201	118	1	10,083	26	—	10,057

Occupancy expense was up \$3 million, or 2%, in 2018 primarily due to increased property taxes and depreciation expense, partially offset by increased rental income. Occupancy expense was up \$4 million in 2017 when compared to 2016. We placed a newly constructed office building into operation during the first quarter of 2017 and increased rental income from higher occupancies of leased space began in the latter-half of 2017 and 2018.

Furniture and equipment expense decreased \$4 million, or 3%, in 2018 primarily from decreased maintenance expense, partially offset by increased amortization of capitalized software. Furniture and equipment expense increased \$5 million in 2017 mainly due to increased amortization expense. During 2017, we successfully implemented the first phase of the TCS B NCS core servicing system. The second phase of the Core Transformation Project, which replaces the Bank's primary commercial lending systems, was deployed in the February of 2019 and we are in the process of finalizing the full implementation.

The provision for unfunded lending commitments was \$(1) million in 2018 compared to \$(7) million in 2017 and \$(10) million in 2016, and is discussed previously in the Provision for Credit Losses section.

Professional and legal services decreased \$5 million from 2017 to \$52 million in 2018. The decrease was primarily a result of lower consulting fees related to our simplification and technology initiatives.

FDIC premiums were \$50 million, \$53 million, and \$40 million, in 2018, 2017, and 2016, respectively. The decrease in 2018 is primarily due to the elimination of the FDIC surcharge for large banks because the required Deposit Insurance Fund reserve ratio has been met. The increase during 2017 when compared to 2016 was due to higher deposit bases and the FDIC's increase in deposit insurance assessments that occurred in the third quarter of 2016. This increase during 2017 was somewhat offset by a reduction in the Bank's overall rate resulting from the consolidation of the individual bank charters.

Other noninterest expense was \$197 million in 2018, compared with \$231 million in 2017. This decrease was primarily due to the one-time \$12 million charitable contribution made at the end of 2017 and a decrease in employee and operational expenses resulting from the Bank's simplification and efficiencies initiatives.

In October 2018, the Bank decided to terminate its pension plan subject to obtaining necessary regulatory approval. Completion of this termination is expected in early 2020. Plan participant benefits will not be disadvantaged because of this decision. At the time of final liquidation additional noninterest expense will be recognized for pension amounts remaining in other comprehensive income ("OCI"), as well as expense related to purchasing annuities for participants who elect that distribution method. As of December 31, 2018, the pension plan was overfunded by \$19 million, compared with \$14 million as of December 31, 2017. The qualified pension OCI balance at December 31, 2018 was a \$27 million loss before adjusting for tax effects. The expense related to purchasing annuities is highly dependent on individual participant elections between lump-sum distribution options

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

and an annuity option, in addition to market competitiveness in the annuity bid process. The current estimate of this expense is \$5 million to \$15 million, and is subject to change depending upon the previously mentioned factors.

Income Taxes

Income tax expense was \$259 million in 2018, \$344 million in 2017, and \$236 million in 2016. Our effective income tax rates were 22.7% in 2018, 36.8% in 2017, and 33.5% in 2016. The income tax rates for all tax years were reduced by nontaxable municipal interest income and nontaxable income from certain bank-owned life insurance. The income tax rate for 2018 was positively impacted by the decrease in the corporate federal income tax rate to 21% from 35% due to the Tax Cuts and Jobs Act, which was effective January 1, 2018. This rate benefit was partially reduced by the non-deductibility of FDIC premiums, certain executive compensation and other fringe benefits as enacted by the new tax law.

The tax rate for 2017 was also impacted by a one-time \$18 million benefit to tax expense related to the reevaluation of state tax positions, an excess tax benefit of \$9 million from the implementation of new accounting guidance related to share-based compensation, and an estimated net DTA write-off of \$47 million through income tax expense associated with the decrease in the federal income tax rate from the passage of new legislation.

The Bank continued to invest in technology initiatives and increased investment in municipal securities during 2018, 2017, and 2016, generating tax credits and nontaxable income that benefited the tax rate each year.

We had a net DTA balance of \$130 million at December 31, 2018, compared with \$93 million at December 31, 2017. The increase in the net DTA resulted primarily from the increase in accrued compensation and unrealized losses in OCI related to securities, and the decrease in deferred tax liabilities related to the deferred gain on a prior period debt exchange. Net charge-offs exceeding the provision for loan losses, an increase in deferred loan fees and accelerated tax deductions on certain technology initiatives and depreciable property during 2018 offset some of the overall increase in DTA. We did not record any additional valuation allowance for GAAP purposes as of December 31, 2018. Note 19 of the Notes to Consolidated Financial Statements discloses more information about the Bank's evaluation of its DTA, including any potential additional valuation allowances, and the impact of the Tax Cuts and Jobs Act on the Bank.

Preferred Stock Dividends and Redemption

In 2018 preferred stock dividends were \$34 million, a decrease of \$6 million from \$40 million in 2017. In 2017 preferred stock dividends decreased by \$8 million from 2016. We completed tender offers of \$144 million of Series F, and \$118 million of Series I, J, and G in the second quarters of 2017, and 2016, respectively. Preferred dividends are expected to be \$34 million for 2019. See further details in Note 13 of the Notes to Consolidated Financial Statements.

BUSINESS SEGMENT RESULTS

We manage our operations and prepare management reports and other information with a primary focus on geographical area. Our banking operations are managed under their own individual brand names, including Zions Bank, Amegy Bank, California Bank & Trust, National Bank of Arizona ("NBAZ"), Nevada State Bank ("NSB"), Vectra Bank Colorado ("Vectra"), and The Commerce Bank of Washington ("TCBW"). Performance assessment and resource allocation are based upon this geographical structure. Most of the lending and other decisions affecting customers are made at the local level. The accounting policies of the individual segments are the same as those of the Bank. We allocate the cost of centrally provided services to the business segments based upon estimated or actual usage of those services. We also use an internal Funds Transfer Pricing ("FTP") allocation system to report results of operations for business segments. This process is continually refined. The operating segment identified as "Other" includes certain nonbank financial service subsidiaries, centralized back-office functions, and eliminations of transactions between segments. See Note 21 of the Notes to Consolidated Financial Statements for more information on the Other segment.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

During 2018, our banking operations experienced improved financial performance when compared with 2017.

Common areas of financial performance experienced at various levels of the segments include:

• increased loan balances across all geographies;

• improvements in credit quality resulted in reductions of the provision for loan losses; and

• growth in customer deposit balances across almost all segments.

Schedule 10 shows selected financial information for our business segments. Ratios are calculated based on amounts in thousands.

net loans and
leases

Zions Bank

Zions Bank is headquartered in Salt Lake City, Utah, and is primarily responsible for conducting operations in Utah, Idaho, and Wyoming. If it were a separately chartered bank, it would be the largest full-service commercial bank in Utah and the 4th largest in Idaho, as measured by domestic deposits in these states.

Zions Bank's income before income taxes increased by \$35 million, or 10%, during 2018. The loan portfolio increased by \$518 million during 2018, which consisted of an increase of \$354 million in commercial loans and increases of \$51 million and \$113 million in CRE and consumer loans, respectively. The ratio of allowance for loan losses to net loans and leases increased to 1.07% at December 31, 2018 from 1.04% at December 31, 2017. Nonperforming lending-related assets declined 17% from the prior year due primarily to decreases in nonaccrual loans in the commercial owner-occupied portfolio. Deposits remained stable from 2017 to 2018.

Amegy Bank

Amegy Bank is headquartered in Houston, Texas. If it were a separately chartered bank, it would be the 9th largest full-service commercial bank in Texas as measured by domestic deposits in the state.

Amegy's income before income taxes increased by \$143 million, or 60%, during 2018. The increase in income before income taxes is mainly due to a \$100 million decrease in the provision for loan losses. Amegy has been able to achieve loan portfolio growth, resulting in a \$100 million increase from the prior year. During 2018, commercial and CRE loans decreased by \$42 million and \$244 million, respectively, while consumer loans increased by \$386 million. The credit quality of Amegy's loan portfolio improved during 2018, mainly due to improvements in the oil and gas-related portfolio; the ratio of the ALLL to net loans and leases decreased to 1.67% at December 31, 2018 from 2.24% a year earlier. During 2018, nonperforming lending-related assets decreased \$161 million, or 68%. Deposits increased by 5% from 2017 to 2018.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

California Bank & Trust

California Bank & Trust is headquartered in San Diego, California. If it were a separately chartered bank, it would be the 15th largest full-service commercial bank in California as measured by domestic deposits. Its core business is built on relationship banking by providing commercial, real estate and consumer lending, depository services, international banking, cash management, and community development services.

CB&T's income before income taxes increased by \$35 million, or 13%, during 2018 primarily from an increase in net interest income due to loan growth. CB&T's loan portfolio increased by \$596 million in 2018 from the prior year.

During 2018, CRE, commercial, and consumer loans increased by \$43 million, \$507 million, and \$46 million, respectively. The credit quality of CB&T's loan portfolio continues to be strong as the ratio of the ALLL to net loans for 2018 was 0.79%. Deposits decreased by 1% from 2017 to 2018.

National Bank of Arizona

National Bank of Arizona is headquartered in Phoenix, Arizona. If it were a separately chartered bank, it would be the 5th largest full-service commercial bank in Arizona as measured by domestic deposits in the state.

NBAZ's income before income taxes increased by \$6 million, or 6%, during 2018 due to increased net interest income from loan growth and improved fee revenue. The loan portfolio increased during 2018 by \$232 million, composed of increases in commercial, consumer, and CRE loans of \$70 million, \$54 million, and \$108 million, respectively. The credit quality of NBAZ's loan portfolio remained strong, the ratio of ALLL to net loans and leases being 0.76% in 2018. Deposits increased by 3% from 2017 to 2018.

Nevada State Bank

Nevada State Bank is headquartered in Las Vegas, Nevada. If it were a separately chartered bank, it would be the 4th largest full-service commercial bank in Nevada as measured by domestic deposits in the state. NSB focuses on serving small and mid-sized businesses as well as retail consumers, with an emphasis on relationship banking.

In 2018, NSB's income before income taxes increased by \$5 million, or 12%. NSB's loans increased by \$146 million during 2018, including increases of \$96 million in commercial loans, \$43 million in CRE loans, and \$7 million in consumer loans. The credit quality of NSB's loan portfolio remained strong, and the ratio of the ALLL to net loans and leases was 0.61% at December 31, 2018. Deposits increased by 2% from 2017 to 2018.

Vectra Bank Colorado

Vectra Bank Colorado is headquartered in Denver, Colorado. If it were a separately a chartered bank, it would be the 11th largest full-service commercial bank in Colorado as measured by domestic deposits in the state.

In 2018, Vectra's income before income taxes increased by \$1 million, or 2%. During 2018, total loans increased by \$249 million, including \$123 million in commercial loans, \$67 million in consumer loans, and \$59 million in CRE loans. The credit quality of Vectra's loan portfolio was strong, and the ratio of ALLL to net loans and leases was 0.99% at December 31, 2018. Deposits increased by 2% from 2017 to 2018.

The Commerce Bank of Washington

The Commerce Bank of Washington is headquartered in Seattle, Washington. It operates in Washington under The Commerce Bank of Washington name and in Portland, Oregon, under The Commerce Bank of Oregon name. Its business strategy focuses on serving the financial needs of commercial businesses, including professional services firms. TCBW has been successful in serving the greater Seattle/Puget Sound and Portland regions without requiring extensive investments in a traditional branch network. It has been innovative in effectively utilizing couriers, bank by mail, remote deposit image capture, and other technologies.

TCBW's income before income taxes increased \$7 million, or 24%, during 2018. The loan portfolio increased by \$60 million, including increases of \$94 million in commercial loans and \$25 million in consumer loans, partially

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

offset by a decrease of \$59 million in CRE loans. Nonperforming lending-related assets decreased \$2 million, and the ratio of ALLL to net loans and leases was at 0.98% in 2018. Deposits increased by 6% from 2017 to 2018.

BALANCE SHEET ANALYSIS

Interest-Earning Assets

Interest-earning assets are those assets that have interest rates or yields associated with them. One of our goals is to maintain a high level of interest-earning assets relative to total assets while keeping nonearning assets at a minimum. Interest-earning assets consist of money market investments, securities, loans, and leases.

Schedule 5, which we referenced in our discussion of net interest income, includes the average balances of our interest-earning assets, the amount of revenue generated by them, and their respective yields. Another goal is to maintain a higher-yielding mix of interest-earning assets, such as loans, relative to lower-yielding assets, while maintaining adequate levels of highly liquid assets. As a result of this goal we redeployed funds from lower-yielding money market investments, in addition to using wholesale borrowings, to purchase agency securities.

Average interest-earning assets were \$62.4 billion in 2018 compared with \$60.9 billion in the previous year. Average interest-earning assets as a percentage of total average assets were 94% in both 2018 and 2017.

Average loans were \$45.4 billion in 2018 and \$43.5 billion in 2017. Average loans as a percentage of total average assets were 68% in 2018 compared with 67% in 2017.

Average money market investments, consisting of interest-bearing deposits and federal funds sold and security resell agreements, decreased by 12% to \$1.4 billion in 2018 compared with \$1.5 billion in 2017. Average securities decreased by 1% from 2017. Average total deposits increased by 2%; average total loans also increased by 4% in 2018 when compared with 2017.

Total investment securities	\$ 15,376	\$ 15,814	\$ 15,504	\$ 15,528	\$ 16,083	\$ 15,923

The amortized cost of investment securities at December 31, 2018 decreased by 2% from the balance at December 31, 2017.

The investment securities portfolio includes \$438 million of net premium that is distributed across various asset classes as illustrated in the preceding schedule. Premium amortization for 2018 was approximately \$129 million, compared with approximately \$125 million in 2017, reducing the yield on securities in those years by 92 bps in both 2018 and 2017. For more information on the accounting for premiums and discounts for investment securities see Note 5 to the Consolidated Financial Statements.

As of December 31, 2018, under the GAAP fair value accounting hierarchy, 0.3% of the \$14.7 billion fair value of the AFS securities portfolio was valued at Level 1, 99.7% was valued at Level 2, and there was no Level 3 AFS securities. At December 31, 2017, 1% of the \$15.2 billion fair value of AFS securities portfolio was valued at Level 1, 99% was valued at Level 2, and there were no Level 3 AFS securities. See Note 3 of the Notes to Consolidated Financial Statements for further discussion of fair value accounting.

Schedule 12 presents the maturities of the different types of investments that we owned and the corresponding average yields as of December 31, 2018 based on amortized cost. Expected maturities, rather than contractual maturities, are shown for SBA securities, agency guaranteed mortgage-backed securities, and certain agency and municipal securities. See "Liquidity Risk Management" on page 65 and Notes 1, 5 and 7 of the Notes to Consolidated Financial Statements for additional information about our investment securities and their management.

Exposure to State and Local Governments

We provide multiple products and services to state and local governments (referred to collectively as “municipalities”), including deposit services, loans, and investment banking services, and we invest in securities issued by the municipalities.

Schedule 13 summarizes our exposure to state and local municipalities:

Schedule 13

MUNICIPALITIES

(In millions)	December 31,	
	2018	2017
Loans and leases	\$1,661	\$1,271
Held-to-maturity – municipal securities	774	770
Available-for-sale – municipal securities ¹	1,291	1,334
Trading account – municipal securities	89	146
Unfunded lending commitments	144	152
Total direct exposure to municipalities	\$3,959	\$3,673

At December 31, 2018, one municipal loan with a balance of \$1 million was on nonaccrual. A significant amount of the municipal loan and lease portfolio is secured by real estate and equipment, and 75% of the outstanding credits were originated by CB&T, Zions Bank, and Vectra. See Note 6 of the Notes to Consolidated Financial Statements for additional information about the credit quality of these municipal loans.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Foreign Exposure and Operations

Our credit exposure to foreign sovereign risks and total foreign credit exposure is not significant. We also do not have significant foreign exposure to derivative counterparties. We had no foreign deposits at December 31, 2018 and December 31, 2017.

Loans Held for Sale

Loans held for sale were \$93 million at December 31, 2018, compared with \$44 million at December 31, 2017, and are generally consumer mortgage and small business loans to be sold in the secondary market. As of December 31, 2018, the majority of the loans held for sale consisted primarily of a small amount of commercial loans.

Loan Portfolio

As of December 31, 2018 and December 31, 2017, net loans and leases accounted for 68% of total assets. Schedule 14 presents our loans outstanding by type of loan as of the five most recent year-ends. The schedule also includes a maturity profile for the loans that were outstanding as of December 31, 2018. However, while this schedule reflects the contractual maturity and repricing characteristics of these loans, in a small number of cases, we have hedged the repricing characteristics of our variable-rate loans as more fully described in "Interest Rate Risk" on page 62.

Total	\$6,356	\$16,346	\$24,012	\$46,714				

As of December 31, 2018, net loans and leases were \$47 billion, reflecting a 4% increase from the prior year. The increase is primarily attributable to new loan originations.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Loan portfolio growth during 2018 was widespread across loan products and geographies with particular strength in consumer 1-4 family residential, commercial and industrial, municipal, and commercial owner-occupied loans. The growth in the loan portfolio was primarily at CB&T and Zions Bank.

Of the significant increases within the portfolio, consumer 1-4 family residential loans increased \$514 million, commercial and industrial loans increased \$510 million, municipal loans increased \$390 million, and commercial owner-occupied loans increased \$373 million. The impact of these increases was partially offset by a decrease of \$164 million in our CRE term portfolio.

We expect moderate total loan and lease growth during 2019, primarily in consumer 1-4 family residential, municipal, commercial and industrial, and commercial owner-occupied (non-NRE). We expect stable to moderate growth in oil and gas and CRE loans, partially offset by a moderate decline in the National Real Estate (“NRE”) loan portfolio.

Loans serviced for the benefit of others increased to \$3.9 billion during 2018 from \$3.7 billion in 2017.

Other Noninterest-Bearing Investments

During 2018, the Bank increased its short-term borrowings with the FHLB by \$900 million. This increase required a further investment in FHLB activity stock, which consequently increased by \$36 million during the year. Aside from this increase, other noninterest-bearing investments remained relatively stable as set forth in the following schedule. Schedule 15 summarizes our other noninterest-bearing investments.

Schedule 15

OTHER NONINTEREST-BEARING INVESTMENTS

(In millions)	December 31,	
	2018	2017
Bank-owned life insurance	\$516	\$507
Federal Home Loan Bank stock	190	154
Federal Reserve stock	139	184
Farmer Mac stock	54	43
SBIC investments	132	127
Non-SBIC investment funds	12	12
Other	3	2
Total other noninterest-bearing investments	\$1,046	\$1,029

Premises, Equipment and Software, Net

Net premises, equipment, and software increased \$30 million, or 3%, from the prior year. The Bank continues to capitalize certain costs related to its technology initiatives, which has resulted in associated depreciation of approximately \$2 million per quarter following the successful implementation, in 2017, of the first phase of our Core Transformation Project that replaced the Bank’s primary consumer lending systems. The second phase of the Core Transformation Project, which replaces the Bank’s primary commercial lending systems, was deployed in the February of 2019 and we are in the process of finalizing the full implementation. The replacement of the deposit system is expected to be the third phase of the Core Transformation Project, and is still in the preliminary stages of development. The total core replacement project spend amount is comprised of both capitalized amounts and amounts that are expensed as incurred. The useful life for most of the capitalized costs is 10 years. The following schedule shows the total amount of costs capitalized by phase for the Core Transformation Project.

(In millions)	December 31, 2018

Deposits

Deposits, both interest-bearing and noninterest-bearing, are a primary source of funding for the Bank. Average total deposits increased by 2% during 2018, compared with 2017, with average interest-bearing deposits increasing by 3% and average noninterest-bearing deposits increasing by 0.2%. The average interest rate paid for interest-bearing deposits was 25 bps higher in 2018 compared with 2017.

Demand, savings, and money market deposits were 92% and 94% of total deposits at December 31, 2018, and December 31, 2017, respectively. At December 31, 2018 and December 31, 2017, total deposits included \$2.2 billion and \$1.6 billion, respectively, of brokered deposits.

See Notes 11 and 12 of the Notes to Consolidated Financial Statements and “Liquidity Risk Management” on page 65 for additional information on funding and borrowed funds.

RISK ELEMENTS

Since risk is inherent in substantially all of the Bank’s operations, management of risk is an integral part of its operations and is also a key determinant of its overall performance. The Board of Directors has appointed a Risk Oversight Committee (“ROC”) that consists of appointed Board members who oversee the Bank’s risk management processes. The ROC meets on a regular basis to monitor and review Enterprise Risk Management (“ERM”) policies and activities. As required by its charter, the ROC performs oversight for various ERM activities and approves ERM policies and activities as detailed in the ROC charter.

Management applies various strategies to reduce the risks to which the Bank’s operations are exposed, including credit, interest rate and market, liquidity, and operational risks. These risks are overseen by the various management committees of which the Enterprise Risk Management Committee is the focal point for the monitoring and review of enterprise risk.

Credit Risk Management

Credit risk is the possibility of loss from the failure of a borrower, guarantor, or another obligor to fully perform under the terms of a credit-related contract. Credit risk arises primarily from our lending activities, as well as from off-balance sheet credit instruments.

The Board of Directors, through the ROC, is responsible for approving the overall credit policies relating to the management of the credit risk of the Bank. In addition, the ROC oversees and monitors adherence to key credit policies and the credit risk appetite as defined in the Risk Appetite Framework. Additionally, the Board has established the Credit Risk Committee, chaired by the Chief Credit Officer and consisting of members of management, to which it has delegated the responsibility for managing credit risk for the Bank and approving changes to the Bank’s credit policies.

Centralized oversight of credit risk is provided through credit policies, credit risk management, and credit examination functions. Our credit policies place emphasis on strong underwriting standards and early detection of potential problem credits in order to develop and implement action plans on a timely basis to mitigate any potential losses. These formal credit policies and procedures provide the Bank with a framework for consistent underwriting and a basis for sound credit decisions at the local banking affiliate level. Credit examinations related to the ACL are reported to both the Audit Committee and the ROC.

Our credit risk management function is separate from the lending function and strengthens control over, and the independent evaluation of, credit activities. In addition, we have a well-defined set of standards for evaluating our loan portfolio, and we utilize a comprehensive loan risk-grading system to determine the risk potential in the portfolio. Furthermore, the internal credit examination department, which is independent of the lending function, periodically conducts examinations of the Bank’s lending departments and credit activities. These examinations are designed to review credit quality, adequacy of documentation, appropriate loan risk-grading administration, and compliance with credit policies. New, expanded, or modified products and services, as well as new lines of business, are approved by the New Initiative Review Committee.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Our credit risk management strategy includes diversification of our loan portfolio. We attempt to avoid the risk of an undue concentration of credits in a particular collateral type or with an individual customer or counterparty. Generally, our loan portfolio is well diversified; however, due to the nature of our geographical footprint, there are certain significant concentrations primarily in CRE and oil and gas-related lending. We have adopted and adhere to concentration limits on leveraged lending, municipal lending, oil and gas-related lending, and various types of CRE lending, particularly construction and land development lending. All of these limits are continually monitored and revised as necessary. The recent growth in construction and land development loan commitments is within the established concentration limits. Our business activity is primarily with customers located within the geographical footprint of our banking affiliates.

As we continue to monitor our concentration risk, the composition of our loan portfolio has slightly changed. Total commercial loans were 52% of the total portfolio, compared with 51% at December 31, 2017. CRE loans declined to 24% of the total portfolio, compared with 25% at December 31, 2017. Consumer loans remained at 24% of the total loan portfolio at December 31, 2018 and 2017.

Government Agency Guaranteed Loans

We participate in various guaranteed lending programs sponsored by U.S. government agencies, such as the SBA, Federal Housing Authority, Veterans' Administration, Export-Import Bank of the U.S., and the U.S. Department of Agriculture. As of December 31, 2018, the principal balance of these loans was \$560 million, and the guaranteed portion of these loans was \$425 million. Most of these loans were guaranteed by the SBA.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Approximately 13% of the CRE term loans consist of mini-perm loans as of December 31, 2018. For such loans, construction has been completed and the project has stabilized to a level that supports the granting of a mini-perm loan in accordance with our underwriting standards. Mini-perm loans generally have initial maturities of three to five years. The remaining 87% of CRE loans are term loans with initial maturities generally of 5 to 20 years. The stabilization criteria for a project to qualify for a term loan differ by product type and include criteria related to the cash flow generated by the project, loan-to-value ratio, and occupancy rates.

Approximately \$134 million, or 9%, of the commercial construction and land development portfolio at December 31, 2018 consists of acquisition and development loans. Most of these acquisition and development loans are secured by specific retail, apartment, office, or other projects.

Underwriting on commercial properties is primarily based on the economic viability of the project with heavy consideration given to the creditworthiness and experience of the sponsor. We generally require that the owner's equity be injected prior to bank advances. Remargining requirements (required equity infusions upon a decline in value or cash flow of the collateral) are often included in the loan agreement along with guarantees of the sponsor.

Recognizing that debt is paid via cash flow, the projected cash flows of the project are critical in the underwriting because these determine the ultimate value of the property and its ability to service debt. Therefore, in most projects (with the exception of multifamily and hospitality construction projects), we require substantial pre-leasing/leasing in our underwriting and we generally require a minimum projected stabilized debt service coverage ratio of 1.20 or higher, depending on the project asset class.

Within the residential construction and development sector, many of the requirements previously mentioned, such as creditworthiness and experience of the developer, up-front injection of the developer's equity, principal curtailment requirements, and the viability of the project are also important in underwriting a residential development loan. Significant consideration is given to the forecasted market acceptance of the product, location, strength of the developer, and the ability of the developer to stay within budget. Progress inspections by qualified independent inspectors are routinely performed before disbursements are made.

Real estate appraisals are ordered in accordance with regulatory guidelines and are validated independently of the loan officer and the borrower, generally by our internal appraisal review function, which is staffed by licensed appraisers. In some cases, reports from automated valuation services are used or internal evaluations are performed. A new appraisal or evaluation is required when a loan deteriorates to a certain level of credit weakness.

Advance rates (i.e., loan commitments) will vary based on the viability of the project and the creditworthiness of the sponsor, but our guidelines generally limit advances to 50% for raw land, 65% for land development, 65% for finished commercial lots, 75% for finished residential lots, 80% for pre-sold homes, 75% for models and homes not under contract, and 75% for commercial properties. Exceptions may be granted on a case-by-case basis.

Loan agreements require regular financial information on the project and the sponsor in addition to lease schedules, rent rolls and, on construction projects, independent progress inspection reports. The receipt of this financial information is monitored, and calculations are made to determine adherence to the covenants set forth in the loan agreement.

The existence of a guarantee that improves the likelihood of repayment is taken into consideration when analyzing CRE loans for impairment. If the support of the guarantor is quantifiable and documented, it is included in the potential cash flows and liquidity available for debt repayment, and our impairment methodology takes this repayment source into consideration.

When we modify or extend a loan, we also give consideration to whether the borrower is in financial difficulty, and whether we have granted a concession. In determining if an interest rate concession has been granted, we consider whether the interest rate on the modified loan is equivalent to current market rates for new debt with similar risk characteristics. If the rate in the modification is less than current market rates, it may indicate that a concession was granted and impairment exists. However, if additional collateral is obtained, or if a guarantor exists who has the

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

capacity and willingness to support the loan on an extended basis, we also consider the nature and amount of the additional collateral and guarantees in the ultimate determination of whether a concession has been granted.

In general, we obtain and consider updated financial information for the guarantor as part of our determination to extend a loan. The quality and frequency of financial reporting collected and analyzed varies depending on the contractual requirements for reporting, the size of the transaction, and the strength of the guarantor.

Complete underwriting of the guarantor includes, but is not limited to, an analysis of the guarantor's current financial statements, leverage, liquidity, global cash flow, global debt service coverage, contingent liabilities, etc. The assessment also includes a qualitative analysis of the guarantor's willingness to perform in the event of a problem and demonstrated history of performing in similar situations. Additional analysis may include personal financial statements, tax returns, liquidity (brokerage) confirmations, and other reports, as appropriate.

A qualitative assessment is performed on a case-by-case basis to evaluate the guarantor's experience, performance track record, reputation, and willingness to work with us. We also utilize market information sources, rating, and scoring services in our assessment. This qualitative analysis coupled with a documented quantitative ability to support the loan may result in a higher-quality internal loan grade, which may reduce the level of allowance we estimate.

Previous documentation of the guarantor's financial ability to support the loan is discounted if there is any indication of a lack of willingness by the guarantor to support the loan.

In the event of default, we evaluate the pursuit of any and all appropriate potential sources of repayment, which may come from multiple sources, including the guarantee. A number of factors are considered when deciding whether or not to pursue a guarantor, including, but not limited to, the value and liquidity of other sources of repayment (collateral), the financial strength and liquidity of the guarantor, possible statutory limitations (e.g., single action rule on real estate) and the overall cost of pursuing a guarantee compared with the ultimate amount we may be able to recover. In other instances, the guarantor may voluntarily support a loan without any formal pursuit of remedies.

A decrease in oil and gas prices could potentially produce an adverse impact on our CRE loan portfolio within Texas. However, based upon generally strong equity and cash flow coverage levels, and sponsor support for the various properties, we do not expect a material amount of losses within this portfolio in 2019. Our largest CRE credit exposures in Texas are to the multi-family, office, and retail sectors. At December 31, 2018, the CRE loan portfolio mix in Texas was 71% commercial term, 17% commercial construction, 10% residential construction, and 2% land development.

Consumer Loans

We have mainly been an originator of first and second mortgages, generally considered to be of prime quality. We generally hold variable-rate loans in our portfolio and sell "conforming" fixed-rate loans to third parties, including Federal National Mortgage Association and Federal Home Loan Mortgage Corporation, for which we make representations and warranties that the loans meet certain underwriting and collateral documentation standards.

We are engaged in Home Equity Credit Line ("HECL") lending. At December 31, 2018 and December 31, 2017, our HECL portfolio totaled \$2.9 billion and \$2.8 billion, respectively. The following schedule describes the composition of our HECL portfolio by lien status.

Schedule 20

HECL PORTFOLIO BY LIEN STATUS

(In millions)	December 31,	
	2018	2017
Secured by first deeds of trust	\$1,458	\$1,406
Secured by second (or junior) liens	1,479	1,371
Total	\$2,937	\$2,777

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

At December 31, 2018, loans representing less than 1% of the outstanding balance in the HECL portfolio were estimated to have combined loan-to-value ratios (“CLTV”) above 100%. An estimated CLTV ratio is the ratio of our loan plus any prior lien amounts divided by the estimated current collateral-value. At origination, underwriting standards for the HECL portfolio generally include a maximum 80% CLTV with high credit scores at origination. Approximately 89% of our HECL portfolio is still in the draw period, and approximately 18% of those loans are scheduled to begin amortizing within the next five years. We regularly analyze the risk of borrower default in the event of a loan becoming fully amortizing and the risk of higher interest rates. The analysis indicates that the risk of loss from this factor is minimal in the current economic environment. The ratio of net charge-offs to average balances at year-end 2018 and 2017 for the HECL portfolio was (0.02)%. See Note 6 of the Notes to Consolidated Financial Statements for additional information on the credit quality of this portfolio.

Nonperforming Assets

Nonperforming assets as a percentage of loans and leases and other real estate owned (“OREO”) decreased to 0.55% at December 31, 2018, compared with 0.93% at December 31, 2017.

Total nonaccrual loans at December 31, 2018 decreased to \$252 million from \$414 million at December 31, 2017, primarily in the commercial and industrial loan portfolio. However, nonaccrual loans slightly increased in the commercial real estate term loan portfolio. The largest total decrease in nonaccrual loans occurred at Amegy, mainly due to improvements in the oil and gas-related portfolio.

The balance of nonaccrual loans can decrease due to paydowns, charge-offs, and the return of loans to accrual status under certain conditions. If a nonaccrual loan is refinanced or restructured, the new note is immediately placed on nonaccrual. If a restructured loan performs under the new terms for at least a period of six months, the loan can be considered for return to accrual status. See “Restructured Loans” following for more information. Bank policy does not allow for the conversion of nonaccrual construction and land development loans to CRE term loans. See Note 6 of the Notes to Consolidated Financial Statements for more information on nonaccrual loans.

Ratio of accruing loans past due 90 days or more to net loans and leases ¹	0.02 %	0.05 %	0.08 %	0.08 %	0.07 %

¹ Includes loans held for sale.

Restructured Loans

Troubled debt restructurings (“TDRs”) are loans that have been modified to accommodate a borrower who is experiencing financial difficulties, and for whom we have granted a concession that we would not otherwise consider. TDRs decreased \$24 million, or 11%, during 2018, primarily due to payments and payoffs. Commercial loans may be modified to provide the borrower more time to complete the project, to achieve a higher lease-up percentage, to sell the property, or for other reasons. Consumer loan TDRs represent loan modifications in which a concession has been granted to the borrower who is unable to refinance the loan with another lender, or who is experiencing economic hardship. Such consumer loan TDRs may include first-lien residential mortgage loans and home equity loans.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

If the restructured loan performs for at least six months according to the modified terms, and an analysis of the customer's financial condition indicates that we are reasonably assured of repayment of the modified principal and interest, the loan may be returned to accrual status. The borrower's payment performance prior to and following the restructuring is taken into account to determine whether a loan should be returned to accrual status.

Schedule 22

ACCRUING AND NONACCRUING TROUBLED DEBT RESTRUCTURED LOANS

	December	
	31,	
(In millions)	2018	2017

Restructured loans – accruing	\$ 112	\$ 139
Restructured loans – nonaccruing	90	87
Total	\$ 202	\$ 226

In the periods following the calendar year in which a loan was restructured, a loan may no longer be reported as a TDR if it is on accrual, is in compliance with its modified terms, and yields a market rate (as determined and documented at the time of the modification or restructure). See Note 6 of the Notes to Consolidated Financial Statements for additional information regarding TDRs.

Schedule 23

TROUBLED DEBT RESTRUCTURED LOANS ROLLFORWARD

Balance at beginning of year	\$ 226	\$ 251
New identified troubled debt restructuring and principal increases	142	190
Payments and payoffs	(131)	(157)
Charge-offs	(7)	(25)
No longer reported as troubled debt restructuring	(20)	(4)
Sales and other	(8)	(29)
Balance at end of year	\$ 202	\$ 226

Allowance for Credit Losses

In analyzing the adequacy of the ALLL, we utilize a comprehensive loan grading system to determine the risk potential in the portfolio and also consider the results of independent internal credit reviews. To determine the adequacy of the allowance, our loan and lease portfolio is broken into segments based on loan type.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The following schedule shows the changes in the allowance for loan losses and a summary of loan loss experience:
Schedule 24

SUMMARY OF LOAN LOSS EXPERIENCE

(Dollar amounts in millions)	2018	2017	2016	2015	2014
Loans and leases outstanding (net of unearned income)	\$46,714	\$44,780	\$42,649	\$40,650	\$40,064
Average loans and leases outstanding, (net of unearned income)	\$45,425	\$43,501	\$42,062	\$40,171	\$39,522
Allowance for loan losses:					
Balance at beginning of year	\$518	\$567	\$606	\$605	\$746
Provision charged to earnings	(39)	24	93	40	(98)
Adjustment for FDIC-supported/PCI loans	—	—	—	—	(1)
Charge-offs:					
Commercial	46	118	170	111	77
Commercial real estate	5	9	12	14	15
Consumer	18	17	16	14	14
Total	69	144	198	139	106
Recoveries:					
Commercial	68	46	43	55	41
Commercial real estate	9	14	14	35	12
Consumer	8	11	9	10	11
Total	85	71	66	100	64
Net loan and lease charge-offs	(16)	73	132	39	42
Balance at end of year	\$495	\$518	\$567	\$606	\$605
Ratio of net charge-offs to average loans and leases	(0.04)%	0.17 %	0.31 %	0.10 %	0.11 %
Ratio of allowance for loan losses to net loans and leases, on December 31,	1.06 %	1.16 %	1.33 %	1.49 %	1.51 %
Ratio of allowance for loan losses to nonaccrual loans, on December 31,	196 %	129 %	107 %	173 %	197 %
Ratio of allowance for loan losses to nonaccrual loans and accruing loans past due 90 days or more, on December 31,	193 %	122 %	101 %	159 %	180 %

ALLOCATION OF THE ALLOWANCE FOR LOAN LOSSES

At December 31,

(Dollar amounts in millions)	2018		2017		2016		2015		2014	
	% of total loans	Allocation of allowance	% of total loans	Allocation of allowance	% of total loans	Allocation of allowance	% of total loans	Allocation of allowance	% of total loans	Allocation of allowance
Loan segment										
Commercial	51.7 %	\$ 331	51.2 %	\$ 371	50.6 %	\$ 420	52.9 %	\$ 454	53.5 %	\$ 413
Commercial real estate	23.8	110	24.8	103	26.6	116	25.5	114	25.3	145
Consumer	24.5	54	24.0	44	22.8	31	21.6	38	21.2	47
Total	100.0%	\$ 495	100.0%	\$ 518	100.0%	\$ 567	100.0%	\$ 606	100.0%	\$ 605

The total ALLL decreased by \$23 million during 2018, primarily as a result of continued credit quality improvements in the total loan portfolio.

The RULC represents a reserve for potential losses associated with off-balance sheet commitments and standby letters of credit. The reserve is separately shown in the balance sheet and any related increases or decreases in the

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

reserve are shown separately in the statement of income. At December 31, 2018, the reserve decreased by \$1 million, compared with December 31, 2017, also as a result of credit quality improvements in the total loan portfolio. See Note 6 of the Notes to Consolidated Financial Statements for additional information related to the ACL and credit trends experienced in each portfolio segment.

Interest Rate and Market Risk Management

Interest rate and market risk are managed centrally. Interest rate risk is the potential for reduced net interest income and other rate sensitive income resulting from adverse changes in the level of interest rates. Market risk is the potential for loss arising from adverse changes in the fair value of fixed income securities, equity securities, other earning assets, and derivative financial instruments as a result of changes in interest rates or other factors. As a financial institution that engages in transactions involving an array of financial products, we are exposed to both interest rate risk and market risk.

The Bank's Board of Directors is responsible for approving the overall policies relating to the management of the financial risk of the Bank, including interest rate and market risk management. The Board has established ALCO consisting of members of management, to which it has delegated the responsibility of managing interest rate and market risk for the Bank. ALCO establishes and periodically revises policy limits and reviews with the ROC the limits and limit exceptions reported by management.

Interest Rate Risk

Interest rate risk is one of the most significant risks to which we are regularly exposed. In general, our goal in managing interest rate risk is to manage the balance sheet to reduce net income volatility due to changes in interest rates.

Over the course of the last year, we have maintained a moderate level of asset-sensitivity as the market rates seemed more likely to increase than to decrease. As risks shifted at the end of the year to be more balanced between higher or lower rates in the future, ALCO has undertaken strategies to reduce the level of asset sensitivity, such as entering into rate floor agreements and increasing the use of interest rate swaps designated as cash flow hedges to synthetically convert floating-rate assets to fixed-rate. We anticipate moving towards a less asset-sensitive interest rate risk position over the course of 2019.

Interest Rate Risk Measurement

We monitor interest rate risk through the use of two complementary measurement methods: net interest income simulation, or Earnings at Risk ("EaR"), and Economic Value of Equity at Risk ("EVE"). EaR analyzes the expected change in near term (one year) net interest income in response to changes in interest rates. In the EVE method, we measure the expected changes in the fair value of equity in response to changes in interest rates.

EaR is an estimate of the change in total net interest income that would be recognized under different rate environments over a one-year period. EaR is measured simulating net interest income under several different scenarios including parallel and nonparallel interest rate shifts across the yield curve, taking into account deposit repricing assumptions and estimates of the possible exercise of embedded options within the portfolio (e.g., a borrower's ability to refinance a loan under a lower-rate environment). Our policy contains a trigger for a 10% decline in rate-sensitive income as well as a risk capacity of a 13% decline if rates were to immediately rise or fall in parallel by 200 bps. As of December 31, 2018 the EaR declined by 12% for a 200 bps decline in rates. This trigger violation informed our decision to move to a less asset-sensitive position throughout 2019.

EVE is calculated as the fair value of all assets minus the fair value of liabilities. We measure changes in the dollar amount of EVE for parallel shifts in interest rates. Due to embedded optionality and asymmetric rate risk, changes in EVE can be useful in quantifying risks not apparent for small rate changes. Examples of such risks may include out-of-the-money interest rate caps (or limits) on loans, which have little effect under small rate movements but may become important if large rate changes were to occur, or substantial prepayment deceleration for low-rate mortgages

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

in a higher-rate environment. Our policy contains a trigger for an 8% decline in EVE as well as a risk capacity of a 10% decline if rates were to immediately rise or fall in parallel by 200 bps. Exceptions to the EVE limits are subject to notification and approval by the ROC.

Estimating the impact on net interest income and EVE requires that we assess a number of variables and make various assumptions in managing our exposure to changes in interest rates. The assessments address deposit withdrawals and deposit product migration (e.g., customers moving money from checking accounts to certificates of deposit), competitive pricing (e.g., existing loans and deposits are assumed to roll into new loans and deposits at similar spreads relative to benchmark interest rates), loan and security prepayments, and the effects of other similar embedded options. As a result of uncertainty about the maturity and repricing characteristics of both deposits and loans, we also calculate the sensitivity of EaR and EVE results to key assumptions. As most of our liabilities are comprised of indeterminate maturity and managed rate deposits, the modeled results are highly sensitive to the assumptions used for these deposits, such as checking, savings and money market accounts, and also to prepayment assumptions used for loans with prepayment options. We use historical regression analysis as a guide for setting such assumptions; however, due to the current low interest rate environment, which has little historical precedent, estimated deposit behavior may not reflect actual future results. Additionally, competition for funding in the marketplace has and may again result in changes to deposit pricing on interest-bearing accounts that are greater or less than changes in benchmark interest rates such as LIBOR or the federal funds rate.

Under most rising interest rate environments, we would expect some customers to move balances from demand deposits to interest-bearing accounts such as money market, savings, or certificates of deposit. The models are particularly sensitive to the assumption about the rate of such migration.

In addition, we assume certain correlation rates, often referred to as a “deposit beta,” of interest-bearing deposits, wherein the rates paid to customers change at a different pace when compared to changes in benchmark interest rates. Generally, certificates of deposit are assumed to have a high correlation rate, while interest-on-checking accounts are assumed to have a lower correlation rate. Actual results may differ materially due to factors including competitive pricing, money supply, credit worthiness of the Bank, and so forth; however, we use our historical experience as well as industry data to inform our assumptions.

The aforementioned migration and correlation assumptions result in deposit durations presented in Schedule 26.

Schedule 26

DEPOSIT ASSUMPTIONS

Product	December 31, 2018	
	Effective duration (unchanged)	Effective duration (+200 bps)
Demand deposits	3.1 %	3.0 %
Money market	1.6 %	1.5 %
Savings and interest-on-checking	2.8 %	2.5 %

As of the dates indicated and incorporating the assumptions previously described, the following schedule shows EaR, or percentage change in net interest income, based on a static balance sheet size, in the first year after the interest rate change if interest rates were to sustain immediate parallel changes ranging from -100 bps to +300 bps.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Schedule 27

INCOME SIMULATION – CHANGE IN NET INTEREST INCOME

December 31, 2018

Parallel shift in rates (in bps)¹

Repricing scenario -100 0 +100 +200 +300

Earnings at Risk (5.3)% ~~%~~ 3.4% 5.1% 10.1%¹ Assumes rates cannot go below zero in the negative rate shift.

For non-maturity interest-bearing deposits, the weighted average modeled beta is 46%. If the weighted average deposit beta increased to 56% it would decrease the EaR in the +200bp shock from 5.1% to 2.8%.

The EaR analysis focuses on parallel rate shocks across the term structure of rates. The yield curve typically does not move in a parallel manner. During the past year, an increase in short-term rates has led to a flatter yield curve as longer-term rates have not increased at the same pace as short-term rates. If we consider a flattening rate shock where the short-term rate moves +200bp but the ten-year rate only moves +30bp, the increase in earnings is 43% lower over 12 months compared with the parallel +200bp rate shock.

For comparative purposes, the December 31, 2017 measures as presented in the following schedule.

December 31, 2017

Parallel shift in rates (in bps)¹

Repricing scenario -100 0 +100 +200 +300

Earnings at Risk (2.7)% ~~%~~ 2.8% 5.4% 7.8%¹ Assumes rates cannot go below zero in the negative rate shift.

The asset-sensitivity as measured by EaR increased slightly year-over-year due to changes in the investment securities and funding compositions.

Schedule 28

CHANGES IN ECONOMIC VALUE OF EQUITY

As of the dates indicated, the following schedule shows our estimated percentage change in EVE under parallel interest rate changes ranging from -100 bps to +300 bps. For non-maturity interest-bearing deposits, the weighted average modeled beta is 46%. If the weighted average deposit beta increased to 56% it would decrease the EVE in the +200bp shock from -5.6% to -7.7%.

December 31, 2018

Parallel shift in rates (in bps)¹

Repricing scenario	-100	0	+100	+200	+300
	bps	bps	bps	bps	bps

Economic Value of Equity (2.5)% ~~%~~ (2.1)% (5.6)% (5.4)%¹ Assumes rates cannot go below zero in the negative rate shift.

For comparative purposes, the December 31, 2017 measures are presented in the following schedule. The changes in EVE measures from December 31, 2017 are driven by increases in interest rates which increase the expected life of certain assets and decrease the expected life of certain liabilities.

December 31, 2017

Parallel shift in rates (in bps)¹

Repricing scenario	-100	0	+100	+200	+300
	bps	bps	bps	bps	bps

Economic Value of Equity 0.2% ~~%~~ 0.5% 0.3% 0.2%¹ Assumes rates cannot go below zero in the negative rate shift.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Our focus on business banking also plays a significant role in determining the nature of the Bank's asset-liability management posture. At December 31, 2018, \$20.4 billion of the Bank's commercial lending and CRE loan balances were scheduled to reprice in the next six months. Of these variable-rate loans approximately 98% are tied to either the prime rate or LIBOR. For these variable-rate loans we have executed \$688 million of cash flow hedges by receiving fixed rates on interest rate swaps. Additionally, asset-sensitivity is reduced due to \$48 million of variable-rate loans being priced at floored rates at December 31, 2018, which were above the "index plus spread" rate by an average of 74 bps. At December 31, 2018, we also had \$3.3 billion of variable-rate consumer loans scheduled to reprice in the next six months. Of these variable-rate consumer loans approximately \$9 million were priced at floored rates, which were above the "index plus spread" rate by an average of 81 bps.

See Notes 3 and 7 of the Notes to Consolidated Financial Statements for additional information regarding derivative instruments.

Market Risk – Fixed Income

We engage in the underwriting and trading of municipal securities. This trading activity exposes us to a risk of loss arising from adverse changes in the prices of these fixed income securities.

At December 31, 2018, we had a relatively small amount, \$106 million, of trading assets and \$85 million of securities sold, not yet purchased, compared with \$148 million and \$95 million, respectively, at December 31, 2017.

We are exposed to market risk through changes in fair value. We are also exposed to market risk for interest rate swaps used to hedge interest rate risk. Changes in the fair value of AFS securities and in interest rate swaps that qualify as cash flow hedges are included in AOCI for each financial reporting period. During 2018, the after-tax change in AOCI attributable to AFS securities decreased by \$114 million, due largely to changes in the interest rate environment, compared with a \$22 million decrease in the same prior year period.

Market Risk – Equity Investments

Through our equity investment activities, we own equity securities that are publicly-traded. In addition, we own equity securities in companies and governmental entities, e.g., Federal Reserve Bank and an FHLB, that are not publicly-traded. The accounting for equity investments may use the cost, fair value, equity, or full consolidation methods of accounting, depending on our ownership position and degree of involvement in influencing the investees' affairs. Regardless of the accounting method, the value of our investment is subject to fluctuation. Because the fair value of these securities may fall below our investment costs, we are exposed to the possibility of loss. Equity investments in private and public companies are approved, monitored, and evaluated by the Bank's Equity Investments Committee consisting of members of management.

We hold both direct and indirect investments in predominantly pre-public companies, primarily through various SBIC venture capital funds. Our equity exposure to these investments was approximately \$132 million and \$127 million at December 31, 2018 and December 31, 2017, respectively. On occasion, some of the companies within our SBIC investments may issue an initial public offering. In this case, the fund is generally subject to a lockout period before liquidating the investment, which can introduce additional market risk.

Liquidity Risk Management

Overview

Liquidity refers to our capacity to meet our cash and collateral obligations and to manage both expected and unexpected cash flows without adversely impacting the operations or financial strength of the Bank. Sources of liquidity include both traditional forms of funding, such as deposits, borrowings, and equity and unencumbered assets, such as marketable loans and securities.

Since liquidity risk is closely linked to both credit risk and market risk, many of the previously discussed risk control mechanisms also apply to the monitoring and management of liquidity risk. We manage our liquidity to provide adequate funds for our customers' credit needs, capital plan actions, anticipated financial and contractual obligations, which include withdrawals by depositors, debt and capital service requirements, and lease obligations.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Overseeing liquidity management is the responsibility of ALCO, which implements a Board-approved corporate Liquidity and Funding Policy. This policy addresses monitoring and maintaining adequate liquidity, diversifying funding positions, and anticipating future funding needs. The policy also includes liquidity ratio guidelines, such as a 30-day liquidity coverage ratio, that are used to monitor the liquidity positions of the Bank as well as various stress test and liquid asset measurements for the Bank.

The management of liquidity and funding is performed by the Treasury Department under the direction of the Corporate Treasurer, with oversight by ALCO. The Treasurer is responsible for recommending changes to existing funding plans, as well as to the Bank's Liquidity Policy. These recommendations must be submitted for approval to ALCO, and changes to the Policy also must be approved by the Bank's ERMC and the Board of Directors. The Bank has adopted policy limits that govern liquidity risk. The policy requires the Bank to maintain a buffer of highly liquid assets sufficient to cover cash outflows in the event of a severe liquidity crisis. Throughout 2018 and as of December 31, 2018, the Bank complied with this policy.

Liquidity Regulation

Upon passage of the Economic Growth, Regulatory Relief, and Consumer Protection Act, the Bank is no longer subject to the Enhanced Prudential Standards for liquidity management (Reg. YY). However, the Bank continues to perform liquidity stress tests and assess its portfolio of highly liquid assets (sufficient to cover 30-day funding needs under the stress scenarios). Although the Bank is no longer subject to the regulations of the Final LCR Rule, it exceeds the regulatory requirements that mandates a buffer of securities and other liquid assets to cover 70% of 30-day cash outflows under the assumptions mandated therein.

Liquidity Management Actions

The Bank's consolidated cash, interest-bearing deposits held as investments, and security resell agreements was \$2.4 billion at December 31, 2018 compared to \$1.6 billion at December 31, 2017. During 2018 the primary sources of cash were from (1) a net increase in deposits, (2) net cash provided by operating activities, (3) short-term borrowings, (4) a net decrease in investment securities, and (5) the issuance of long-term debt. The primary uses of cash during the same period were primarily from (1) loan originations, (2) repurchases of our common stock, and (3) dividends on common and preferred stock.

The Bank's loan to total deposit ratio has remained consistent and was 86% at December 31, 2018 compared with 85% at December 31, 2017. The Bank's core deposits, consisting of noninterest-bearing demand deposits, savings and money market deposits, and time deposits under \$250,000, was \$51.2 billion at December 31, 2018 compared with \$50.7 billion at December 31, 2017.

Total deposits were \$54.1 billion at December 31, 2018, compared with \$52.6 billion at December 31, 2017. The increase during 2018 was a result of a \$1.2 billion and \$0.5 billion increase in time deposits and savings and money market, respectively, partially offset by a \$241 million decrease in noninterest-bearing deposits.

During 2018, the Bank issued a \$500 million senior note with an interest rate of 3.5% and a maturity date of August 27, 2021. At December 31, 2018, maturities of our long-term senior and subordinated debt ranged from August 2021 to September 2028. Also, during 2018, the Bank called and redeemed \$162 million of 5.65% subordinated notes maturing November 15, 2023.

The Bank's cash payments for interest, reflected in operating expenses, increased to \$237 million during 2018 from \$118 million during 2017 primarily due to an increase in deposits, short-term borrowings, and long-term debt and an increase in interest rates. Additionally, the Bank paid approximately \$236 million of total dividends on preferred stock and common stock during 2018 compared with \$129 million during 2017. Dividends paid per common share have increased gradually from \$0.12 in the third quarter of 2017 to \$0.30 in the fourth quarter of 2018. In February 2019, the Board approved a quarterly common dividend of \$0.30 per share.

General financial market and economic conditions impact our access to, and cost of, external financing. Access to funding markets for the Bank is also directly affected by the credit ratings received from various rating agencies.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The ratings not only influence the costs associated with the borrowings, but can also influence the sources of the borrowings. All of the credit rating agencies rate the Bank's debt at an investment-grade level. The Bank's credit ratings have continued to improve during 2018 and are presented in the following schedule.

CREDIT RATINGS

as of February 8, 2019:

Rating agency	Outlook	Long-term issuer/senior debt rating	Subordinated debt rating	Short-term debt rating
S&P	Stable	BBB+	BBB	A-2
Fitch	Positive	BBB	BBB-	F2
Kroll	Stable	A-	BBB+	K2

The FHLB system and Federal Reserve Banks have been and are a source of back-up liquidity, and from time to time, have been a significant source of funding. Zions Bancorporation, N.A. is a member of the FHLB of Des Moines. The FHLB allows member banks to borrow against their eligible loans and securities to satisfy liquidity and funding requirements. The Bank is required to invest in FHLB and Federal Reserve stock to maintain their borrowing capacity. At December 31, 2018, the amount available for additional FHLB and Federal Reserve borrowings was approximately \$13.8 billion, compared with \$14.7 billion at December 31, 2017. Loans with a carrying value of approximately \$22.6 billion at December 31, 2018 have been pledged at the FHLB of Des Moines and the Federal Reserve as collateral for current and potential borrowings compared with \$25.6 billion at December 31, 2017. At December 31, 2018, we had \$4.5 billion of short-term FHLB borrowings outstanding and no long-term FHLB or Federal Reserve borrowings outstanding, compared with \$3.6 billion of short-term FHLB borrowings and no long-term FHLB or Federal Reserve borrowings outstanding at December 31, 2017. At December 31, 2018, our total investment in FHLB and Federal Reserve stock was \$190 million and \$139 million, respectively, compared with \$154 million and \$184 million at December 31, 2017.

Our investment activities can provide or use cash, depending on the asset-liability management posture taken. During 2018, held-to-maturity ("HTM") and AFS investment securities' activities resulted in a net decrease in investment securities and a net \$130 million increase in cash, compared with a net \$2.2 billion decrease in cash for 2017.

Maturing balances in the Bank's loan portfolios also provide additional flexibility in managing cash flows. Lending activity during 2018 resulted in a net cash outflow of \$1.9 billion compared with a net cash outflow of \$2.1 billion during 2017.

During 2018, we paid income taxes of \$207 million, compared to \$246 million during 2017.

We may also, from time to time, issue additional preferred stock, senior or subordinated notes or other forms of capital or debt instruments, depending on our capital, funding, asset-liability management or other needs as market conditions warrant and subject to any required regulatory approvals. Management believes that the sources of available liquidity are adequate to meet all reasonably foreseeable short-term and intermediate-term demands.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Contractual Obligations

Schedule 29 summarizes our contractual obligations at December 31, 2018.

Schedule 29

CONTRACTUAL OBLIGATIONS

(In millions)	One year or less	Over one year through three years	Over three years through five years	Over five years	Indeterminable maturity ¹	Total
Deposits	\$3,791	\$432	\$113	\$—	\$49,765	\$54,101
Net unfunded commitments to extend credit	6,302	5,727	3,770	5,655	—	21,454
Standby letters of credit:						
Financial	411	79	15	150	—	655
Performance	166	30	3	—	—	199
Commercial letters of credit	15	3	—	—	—	18
Commitments to make venture and other noninterest-bearing investments ²	30	—	—	—	—	30
Federal funds and other short-term borrowings	5,653	—	—	—	—	5,653
Long-term debt	—	502	135	87	—	724
Operating leases, net of subleases	31	82	64	86	—	263
Unrecognized tax benefits	—	—	—	—	8	8
Total contractual obligations	\$16,399	\$6,855	\$4,100	\$5,978	\$49,773	\$83,105

¹ Indeterminable maturity deposits include noninterest-bearing demand, savings and money market. Unrecognized tax benefits also have an indeterminable maturity.

² Commitments to make venture and other noninterest-bearing investments do not have defined maturity dates. They have therefore been considered due on demand, maturing in one year or less.

In addition to the commitments specifically noted in Schedule 29, we enter into a number of contractual commitments in the ordinary course of business. These include software licensing and maintenance, telecommunications services, facilities maintenance and equipment servicing, supplies purchasing, and other goods and services used in the operation of our business. Some of these contracts are renewable or cancelable at least annually, and in certain cases, to secure favorable pricing concessions, we have committed to contracts that may extend to several years.

We also enter into derivative contracts under which we are required either to receive or pay cash, depending on changes in interest rates. These contracts are carried at fair value on the balance sheet with the fair value representing the net present value of the expected future cash receipts and payments based on market rates of interest. The fair value of the contracts changes daily as interest rates change. See Note 7 of the Notes to Consolidated Financial Statements for further information on derivative contracts.

Operational Risk Management

Operational risk is the risk to current or anticipated earnings or capital arising from inadequate or failed internal processes or systems, human errors or misconduct, or adverse external events. In our ongoing efforts to identify and manage operational risk, we have an ERM department whose responsibility is to help employees, management and the Board of Directors to assess, understand, measure, manage, and monitor risk in accordance with our Risk Appetite Framework. We have documented both controls and the Control Self-Assessment related to financial reporting under the 2013 framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) and the FDICIA.

To manage and minimize our operational risk, we have in place transactional documentation requirements; systems and procedures to monitor transactions and positions; systems and procedures to detect and mitigate attempts to commit fraud, penetrate our systems or telecommunications, access customer data, and/or deny normal access to

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

those systems to our legitimate customers; regulatory compliance reviews; and periodic reviews by the Bank's Compliance Risk Management, Internal Audit and Credit Examination departments. Reconciliation procedures have been established to ensure that data processing systems consistently and accurately capture critical data. In addition, the Data Governance department has key governance surrounding data integrity and availability oversight. Further, we have key programs and procedures to maintain contingency and business continuity plans for operational support in the event of natural or other disasters. We also mitigate certain operational risks through the purchase of insurance, including errors and omissions and professional liability insurance.

We are continually improving our oversight of operational risk, including enhancement of risk identification, risk and control self-assessments, and antifraud measures, which are reported on a regular basis to enterprise management committees. The Operational Risk Committee reports to the ERM, which reports to the ROC. Key measures have been established to increase oversight by ERM and Operational Risk Management through the strengthening of new initiative reviews, enhancements to the Enterprise Procurement and Third Party Risk Management framework, enhancements to the Business Continuity and Disaster Recovery programs and Enterprise Security programs, and the establishment of Fraud Risk Oversight, Incident Response Oversight and Technology Project Oversight programs. Significant enhancements have also been made to governance, technology, and reporting, including the establishment of Policy and Committee Governance programs, the implementation of a governance, risk and control solution, and the creation of an Enterprise Risk Profile and an Operational Risk Profile along with business line risk profiles. In addition, the establishment of an Enterprise Exam Management department has standardized our response and reporting, and increased our effectiveness and efficiencies with regulatory examinations, communications and issues management.

The number and sophistication of attempts to disrupt or penetrate our critical systems, sometimes referred to as hacking, cyber fraud, cyber attacks, cyber terrorism, or other similar names, also continue to grow. Given the importance and increasing sophistication of cyber attacks, the Bank has designated cyber risk a level one risk in its risk taxonomy, which places it at the highest level of oversight with its other top risks.

CAPITAL MANAGEMENT

Overview

The Board of Directors is responsible for approving the policies associated with capital management. The Board has established the Capital Management Committee ("CMC"), chaired by the Chief Financial Officer and consisting of members of management, whose primary responsibility is to recommend and administer the approved capital policies that govern the capital management of the Bank. Other major CMC responsibilities include:

Setting overall capital targets within the Board-approved capital policy, monitoring performance compared to the Bank's Capital Policy limits, and recommending changes to capital including dividends, common stock repurchases, subordinated debt, and changes in major strategies to maintain the Bank at well-capitalized levels;

- Maintaining an adequate capital cushion to withstand adverse stress events while continuing to meet the borrowing needs of its customers, and to provide reasonable assurance of continued access to wholesale funding, consistent with fiduciary responsibilities to depositors and bondholders; and

Reviewing agency ratings of the Bank.

The Bank has a fundamental financial objective to consistently produce superior risk-adjusted returns on its shareholders' capital. We believe that a strong capital position is vital to continued profitability and to promoting depositor and investor confidence. Specifically, it is the policy of the Bank to:

• Maintain sufficient capital to support current needs;

• Maintain an adequate capital cushion to withstand future adverse stress events while continuing to meet borrowing needs of its customers; and

• Meet fiduciary responsibilities to depositors and bondholders while managing capital distributions to shareholders through dividends and repurchases of common stock so as to be consistent with Federal Reserve guidelines SR 09-04 and 12 U.S.C §§ 56 and 60.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Merger of Bank Holding Company into Bank

On September 30, 2018, the Bank completed the merger of Zions Bancorporation, its former bank holding company, with, and into the Bank, formerly known as ZB, N.A. in order to reduce organizational complexity. The restructuring eliminated the bank holding company structure and associated regulatory framework, and resulted in ZB, N.A. being renamed Zions Bancorporation, National Association and becoming the top-level entity within our corporate structure. The Bank's primary regulator is now the OCC. The Bank continues to be subject to examinations by the CFPB with respect to consumer financial regulations. Under the National Bank Act and OCC regulations, certain capital transaction may be subject to the approval of the OCC.

Stress Testing

As a result of the Financial Stability Oversight Council's action on September 12, 2018 and the merger of the holding company into the Bank on September 30, 2018, the Bank is no longer considered a systemically important financial institution under the Dodd-Frank Act. The Bank expects to have greater flexibility in the active management of shareholders' equity. The Bank expects to continue to utilize stress testing as the primary mechanism to inform its decisions on the appropriate level of capital, based upon actual and hypothetically-stressed economic conditions. Therefore, the timing and amount of capital actions will be subject to various factors, including the Bank's financial performance and prevailing and anticipated economic conditions.

Capital Management Actions

During 2018, the Bank repurchased 12.9 million shares of common stock for \$670 million at an average price of \$51.77 per share. In February 2019, the Bank announced that the Board approved a plan to repurchase \$275 million of common stock during the first quarter of 2019. The timing and amount of additional common share repurchases will be subject to various factors, including the Bank's financial performance, business needs, prevailing economic conditions, and OCC approval. Shares may be repurchased occasionally in the open market, through privately negotiated transactions, utilizing Rule 10b5-1 plans or otherwise.

The Bank paid common dividends of \$202 million, or \$1.04 per share, during 2018 compared to \$89 million, \$0.44 per share, during 2017. In February 2019, the Board of Directors declared a quarterly dividend of 0.30 per common share payable on February 21, 2019 to shareholders of record on February 14, 2019. We paid dividends on preferred stock of \$34 million during 2018 compared with \$40 million during 2017. See Note 8 for additional detail about capital management transactions during 2018.

Total shareholders' equity decreased slightly and was \$7.6 billion at December 31, 2018 compared with \$7.7 billion at December 31, 2017. This decrease was primarily a result of (1) \$670 million from repurchases of Bank common stock, (2) \$236 million from common and preferred dividends paid and (3) \$111 million from a decrease in the fair value of our AFS securities due largely to changes in the interest rate environment. These decreases were partially offset by net income of \$884 million.

During 2018 and 2017, the market price of our common stock was higher than the exercise price of common stock warrants on our common stock and had a dilutive effect upon earnings per share. Weighted average diluted shares decreased by 3.2 million compared with 2017, primarily due to share repurchases, partially offset by the dilutive impact of an increased common share price on warrants that have been outstanding since 2008 (Troubled Asset Relief Program or "TARP" warrants - NASDAQ: ZIONZ) and 2010 (NASDAQ: ZIONW) and employee equity grants. During 2018, 1.8 million shares of common stock were issued from the cashless exercise of 5.8 million ZIONZ common stock warrants which expired on November 14, 2018. As of December 31, 2018, the Bank had 29.3 million ZIONW warrants outstanding with an exercise price of \$34.82 which expire on May 22, 2020.

The following schedule presents the diluted shares from the remaining common stock warrants at various Zions Bancorporation, N.A. common stock market prices as of February 8, 2019, excluding the effect of changes in exercise cost and warrant share multiplier from the future payment of common stock dividends.

Basel III

In 2013, the FRB, FDIC, and OCC published final rules (the “Basel III Capital Rules”) establishing a new comprehensive capital framework for U.S. banking organizations. The rules implemented the Basel Committee’s December 2010 framework, commonly referred to as Basel III, for strengthening international capital standards as well as certain provisions of the Dodd-Frank Act. The Basel III capital rules became effective for the Bank on January 1, 2015 and were subject to phase-in periods for certain of their components. In November 2017, the FRB, FDIC and OCC published a final rule that extended the 2017 transition provisions for certain U.S. Basel III capital rules for non-advanced approaches banks, such as the Bank. Effective January 1, 2018, the final rule retains the 2017 Basel III transitional treatment of certain DTAs and mortgage servicing assets, among others. A detailed discussion of Basel III requirements, including implications for the Bank, is contained on page 9 in “Capital Standards – Basel Framework” under Part 1, Item 1 in our 2018 Annual Report on Form 10-K.

We met all capital adequacy requirements under the Basel III Capital Rules based upon phase-in rules as of December 31, 2018, and believe that we would meet all capital adequacy requirements on a fully phased-in basis if such requirements were currently effective.

Capital Ratios

Banking organizations are required by capital regulations to maintain adequate levels of capital as measured by several regulatory capital ratios. Zions will continue to utilize stress testing as its primary mechanism to inform its decisions on the appropriate level of capital, based upon actual and hypothetically-stressed economic conditions. The following schedule shows the Bank’s capital and performance ratios as of December 31, 2018, December 31, 2017 and December 31, 2016.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

CAPITAL RATIOS AND CAPITAL DISTRIBUTIONS

	December 31, 2018		December 31, 2017		December 31, 2016	
Tangible common equity ratio ¹	8.9	%	9.3	%	9.5	%

² Based on the applicable phase-in periods.

At December 31, 2018, Basel III regulatory tier 1 risk-based capital and total risk-based capital was \$6.8 billion and \$7.4 billion, respectively, compared with \$6.8 billion and \$7.6 billion, respectively, at December 31, 2017.

CRITICAL ACCOUNTING POLICIES AND SIGNIFICANT ESTIMATES

Note 1 of the Notes to Consolidated Financial Statements contains a summary of the Bank's significant accounting policies. Discussed below are certain significant accounting policies that we consider critical to the Bank's financial statements. These critical accounting policies were selected because the amounts affected by them are significant to the financial statements. Any changes to these amounts, including changes in estimates, may also be significant to the financial statements. We believe that an understanding of these policies, along with the related estimates we are required to make in recording the financial transactions of the Bank, is important to have a complete picture of the Bank's financial condition. In addition, in arriving at these estimates, we are required to make complex and subjective judgments, many of which include a high degree of uncertainty. The following discussion of these critical accounting policies includes the significant estimates related to these policies. We have discussed each of these accounting policies and the related estimates with the Audit Committee of the Board of Directors.

We have included, where applicable in this document, sensitivity schedules and other examples to demonstrate the impact of the changes in estimates made for various financial transactions. The sensitivities in these schedules and examples are hypothetical and should be viewed with caution. Changes in estimates are based on variations in assumptions and are not subject to simple extrapolation, as the relationship of the change in the assumption to the change in the amount of the estimate may not be linear. In addition, the effect of a variation in one assumption is in reality likely to cause changes in other assumptions, which could potentially magnify or counteract the sensitivities.

Fair Value Estimates

We measure or monitor many of our assets and liabilities on a fair value basis. Fair value is the price that could be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. To increase consistency and comparability in fair value measurements, GAAP has established a three-level hierarchy to prioritize the valuation inputs among (1) observable inputs that reflect quoted prices in active markets, (2) inputs

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

other than quoted prices with observable market data, and (3) unobservable data such as the Bank's own data or single dealer nonbinding pricing quotes.

When observable market prices are not available, fair value is estimated using modeling techniques such as discounted cash flow analysis. These modeling techniques use assumptions that market participants would consider in pricing the asset or the liability, including assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset, the life of the asset and applicable growth rate, the risk of nonperformance, and other related assumptions.

The selection and weighting of the various fair value techniques may result in a fair value higher or lower than the carrying value of the item being valued. Considerable judgment may be involved in determining the amount that is most representative of fair value.

For assets and liabilities recorded at fair value, the Bank's policy is to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements for those items where there is an active market. In certain cases, when market observable inputs for model-based valuation techniques may not be readily available, the Bank is required to make judgments about the assumptions market participants would use in estimating the fair value of the financial instrument. The models used to determine fair value adjustments are regularly evaluated by management for relevance under current facts and circumstances.

Changes in market conditions may reduce the availability of quoted prices or observable data. For example, reduced liquidity in the capital markets or changes in secondary market activities could result in observable market inputs becoming unavailable. When market data is not available, the Bank uses valuation techniques requiring more management judgment to estimate the appropriate fair value.

Fair value is used on a recurring basis for certain assets and liabilities in which fair value is the primary measure of accounting. Fair value is used on a nonrecurring basis to measure certain assets or liabilities (including HTM securities, loans held for sale, and OREO) for impairment or for disclosure purposes in accordance with current accounting guidance.

Impairment analysis also relates to long-lived assets, goodwill, and core deposit and other intangible assets. An impairment loss is recognized if the carrying amount of the asset is not likely to be recoverable and exceeds its fair value. In determining the fair value, management uses models and applies the techniques and assumptions previously discussed.

Investment securities are valued using several methodologies, which depend on the nature of the security, availability of current market information, and other factors. Investment securities in an unrealized loss position are formally reviewed on a quarterly basis for the presence of other-than-temporary impairment ("OTTI"). OTTI is considered to have occurred if the instrument's fair value is below its amortized cost and (1) we intend to sell the security, or (2) it is "more likely than not" we will be required to sell the security before recovery of its amortized cost basis, or (3) the present value of expected cash flows is not sufficient to recover the entire amortized cost basis. The "more likely than not" criterion is a lower threshold than the "probable" criterion.

Notes 1, 3, 5, 7, and 9 of the Notes to Consolidated Financial Statements and the "Investment Securities Portfolio" on page 48 contain further information regarding the use of fair value estimates.

Allowance for Credit Losses

The ACL includes the ALLL and the RULC. The ALLL represents management's estimate of probable losses believed to be inherent in the loan portfolio. The determination of the appropriate level of the allowance is based on periodic evaluations of the portfolios. This process includes both quantitative and qualitative analyses, as well as a qualitative review of the results. The qualitative review requires a significant amount of judgment, and is described in more detail in Note 6 of the Notes to Consolidated Financial Statements.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The RULC provides for potential losses associated with off-balance sheet lending commitments and standby letters of credit. The reserve is estimated using the same procedures and methodologies as for the ALLL, plus assumptions regarding the probability and amount of unfunded commitments being drawn.

Although we believe that our processes for determining an appropriate level for the allowance adequately address the various components that could potentially result in credit losses, the processes and their elements include features that may be susceptible to significant change. Any unfavorable differences between the actual outcome of credit-related events and our estimates could require an additional provision for credit losses. As an example, if the probability of default risk grade for all pass-graded commercial and CRE loans was immediately downgraded one grade on our internal risk-grading scale, the quantitatively determined amount of the ALLL at December 31, 2018 would increase by approximately \$89 million. This sensitivity analysis is hypothetical and has been provided only to indicate the potential impact that changes in risk grades may have on the allowance estimate.

Although the qualitative process is subjective, it represents the Bank's best estimate of qualitative factors impacting the determination of the ACL. We believe that given the procedures we follow in determining the ACL, the various components used in the current estimation processes are appropriate.

Note 6 of the Notes to Consolidated Financial Statements and "Credit Risk Management" on page 52 contains further information and more specific descriptions of the processes and methodologies used to estimate the ACL.

Accounting for Goodwill

Goodwill is initially recorded at fair value in the financials of a reporting unit at the time of its acquisition and is subsequently evaluated at least annually for impairment in accordance with current accounting guidance. We perform this test at the beginning of the fourth quarter annually, or more often if events or circumstances indicate that the carrying value of any of our reporting units, inclusive of goodwill, is less than fair value. The goodwill impairment test for a given reporting unit compares its fair value with its carrying value. If the carrying amount, inclusive of goodwill, is more likely than not to exceed its fair value, additional quantitative analysis must be performed to determine the amount, if any, of goodwill impairment. Our reporting units with goodwill are Amegy, CB&T and Zions Bank.

To determine the fair value of a reporting unit, we historically have used a combination of up to three separate quantitative methods: comparable publicly-traded commercial banks in the western and southwestern states ("Market Value"); where applicable, comparable acquisitions of commercial banks in the western and southwestern states ("Transaction Value"); and the discounted present value of management's estimates of future cash flows. Critical assumptions that are used as part of these calculations include:

- selection of comparable publicly-traded companies based on location, size, and business focus and composition;
- selection of market comparable acquisition transactions based on location, size, business focus and composition, and date of the transaction;
- the discount rate, which is based on the Bank's estimate of its cost of equity capital;
- the projections of future earnings and cash flows of the reporting unit;
- the relative weight given to the valuations derived by the three methods described; and
- the control premium associated with reporting units.

We apply a control premium in the Market Value approach to determine the reporting units' equity values. Control premiums represent the ability of a controlling shareholder to change how the Bank is managed and can cause the fair value of a reporting unit as a whole to exceed its market capitalization. Based on a review of historical bank acquisition transactions within the Bank's geographic footprint, and a comparison of the target banks' market values 30 days prior to the announced transaction to the deal value, we have determined that a control premium ranging from 0% to 15% for the reporting units was appropriate.

Since estimates are an integral part of the impairment computations, changes in these estimates could have a significant impact on any calculated impairment amount. Estimates include economic conditions, which impact the

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

assumptions related to interest and growth rates, loss rates, and imputed cost of equity capital. The fair value estimates for each reporting unit incorporate current economic and market conditions, including Federal Reserve monetary policy expectations and the impact of legislative and regulatory changes. Additional factors that may significantly affect the estimates include, among others, competitive forces, customer behaviors and attrition, loan losses, changes in growth trends, cost structures and technology, changes in equity market values and merger and acquisition valuations, and changes in industry conditions.

Weakening in the economic environment, a decline in the performance of the reporting units, or other factors could cause the fair value of one or more of the reporting units to fall below carrying value, resulting in a goodwill impairment charge. Additionally, new legislative or regulatory changes not anticipated in management's expectations may cause the fair value of one or more of the reporting units to fall below the carrying value, resulting in a goodwill impairment charge. Any impairment charge would not affect the Bank's regulatory capital ratios, tangible common equity ratio, or liquidity position.

During the fourth quarter of 2017, we performed a full quantitative analysis of the reporting units' fair value as described above. Our evaluation process determined that the fair values of Amegy, CB&T, and Zions Bank exceeded their carrying values by 35%, 54%, and 78%, respectively. Additionally, we performed a hypothetical sensitivity analysis on the discount rate assumption to evaluate the impact of an adverse change to this assumption. If the discount rate applied to future earnings were increased by 100 bps, the fair values of Amegy, CB&T, and Zions Bank would exceed their carrying values by 33%, 52%, and 72%, respectively.

During the fourth quarter of 2018, we performed our annual goodwill impairment evaluation, effective October 1, 2018. The Bank elected to perform a qualitative analysis to determine if the quantitative analysis performed in prior years as described above was required. The Bank's qualitative analysis assessed factors related to each reporting unit to determine if it was more likely than not that the carrying value of any reporting unit was greater than the unit's fair value. The qualitative factors considered in our assessment for each reporting unit included (1) economic, industry and market conditions, (2) regulatory or political developments that could negatively impact operating costs and overall financial performance of any of our specific reporting units, and (3) any changes in management, key personnel, strategy, customers, and any new or evolving litigation.

None of the factors considered in our qualitative assessment gave any indication that the reporting units' fair values decreased during the 2018 fiscal year. Additionally, as evidenced in the Business Segment Analysis section of the MD&A, each reporting unit's key performance metrics remained materially unchanged or improved in 2018 compared to 2017. Considering the improved performance of each reporting unit and the lack of any significant concerns being identified in our qualitative assessment, we concluded that it is more likely than not that the fair value of each reporting unit continues to be greater than its carry amount making further quantitative impairment testing unnecessary. As a result, none of our reporting units were subject to goodwill impairment during 2018 or were determined to be at-risk for a potential goodwill impairment in the near future based on information known at this time.

RECENT ACCOUNTING PRONOUNCEMENTS AND DEVELOPMENTS

Note 2 of the Notes to Consolidated Financial Statements discusses recently issued accounting pronouncements that we will be required to adopt. Also discussed is our expectation of the impact these new accounting pronouncements will have, to the extent they are material, on our financial condition, results of operations, or liquidity.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information required by this Item is included in "Interest Rate and Market Risk Management" in MD&A beginning on page 62 and is hereby incorporated by reference.

ITEM 8. FINANCIAL STATEMENTS AND
SUPPLEMENTARY DATA

REPORT ON MANAGEMENT’S ASSESSMENT OF INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Zions Bancorporation, National Association and subsidiaries (“the Bank”) is responsible for establishing and maintaining adequate internal control over financial reporting for the Bank as defined by Exchange Act Rules 13a-15 and 15d-15.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Although any system of internal control can be compromised by human error or intentional circumvention of required procedures, we believe our system provides reasonable assurance that financial transactions are recorded and reported properly, providing an adequate basis for reliable financial statements.

The Bank’s management has used the criteria established in Internal Control – Integrated Framework (2013 framework) issued by the COSO to evaluate the effectiveness of the Bank’s internal control over financial reporting.

The Bank’s management has assessed the effectiveness of the Bank’s internal control over financial reporting as of December 31, 2018 and has concluded that such internal control over financial reporting is effective. There are no material weaknesses in the Bank’s internal control over financial reporting that have been identified by the Bank’s management.

Ernst & Young LLP, an independent registered public accounting firm, has audited the consolidated financial statements of the Bank for the year ended December 31, 2018 and has also issued an attestation report, which is included herein, on internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (“PCAOB”).

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

REPORTS OF ERNST & YOUNG LLP, INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Shareholders and the Board of Directors of Zions Bancorporation, National Association and Subsidiaries
Opinion on Internal Control over Financial Reporting

We have audited Zions Bancorporation, National Association and subsidiaries' internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Zions Bancorporation, National Association and subsidiaries ("the Bank") maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the 2018 consolidated financial statements of the Bank and our report dated February 25, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

The Bank's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Assessment of Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Bank's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Bank in accordance with the US federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

REPORT ON CONSOLIDATED FINANCIAL STATEMENTS

To the Shareholders and the Board of Directors of Zions Bancorporation, National Association and Subsidiaries
Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Zions Bancorporation, National Association and subsidiaries (“the Bank”) as of December 31, 2018 and 2017, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2018, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Bank at December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Bank’s internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework), and our report dated February 25, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of the Bank’s management. Our responsibility is to express an opinion on the Bank’s financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Bank in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Bank’s auditor since 2000.

ZIONS BANCORPORATION, N.A. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2018

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business

Zions Bancorporation, National Association, (“Zions Bancorporation, N.A.,” “the Bank,” “we,” “our,” “us”) is a national commercial bank headquartered in Salt Lake City, Utah. The Bank provides a full range of banking and related services in 11 western and southwestern states through seven separately managed and branded units as follows: Zions Bank, in Utah, Idaho and Wyoming; California Bank & Trust (“CB&T”); Amegy Bank (“Amegy”), in Texas; National Bank of Arizona (“NBAZ”); Nevada State Bank (“NSB”); Vectra Bank Colorado (“Vectra”), in Colorado and New Mexico; and The Commerce Bank of Washington (“TCBW”) which operates under that name in Washington and under the name The Commerce Bank of Oregon (“TCBO”) in Oregon.

Basis of Financial Statement Presentation and Principles of Consolidation

The consolidated financial statements include the accounts of the Zions Bancorporation, National Association and its majority-owned subsidiaries. Unconsolidated investments where we have the ability to exercise significant influence over the operating and financial policies of the respective investee are accounted for using the equity method of accounting; those that are not consolidated or accounted for using the equity method of accounting are accounted for under cost or fair value accounting. All significant intercompany accounts and transactions have been eliminated in consolidation. Assets held in an agency or fiduciary capacity are not included in the Consolidated Financial Statements.

The consolidated financial statements have been prepared in accordance with United States (“U.S.”) generally accepted accounting principles (“GAAP”) and prevailing practices within the financial services industry. References to GAAP, including standards promulgated by the Financial Accounting Standards Board (“FASB”), are made according to sections of the Accounting Standards Codification (“ASC”). Changes to the ASC are made with Accounting Standards Updates (“ASU”) that include consensus issues of the Emerging Issues Task Force (“EITF”). In certain cases, ASUs are issued jointly with International Financial Reporting Standards.

In preparing the consolidated financial statements, we are required to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. Certain prior year amounts have been reclassified to conform with the current year presentation. These reclassifications did not affect net income or shareholders’ equity.

Variable Interest Entities

A variable interest entity (“VIE”) is consolidated when a company is the primary beneficiary of the VIE. Current accounting guidance requires continuous analysis on a qualitative rather than a quantitative basis to determine the primary beneficiary of a VIE. At the commencement of our involvement, and periodically thereafter, we consider our consolidation conclusions for all entities with which we are involved. As of December 31, 2018 and 2017, no VIEs have been consolidated in the Bank’s financial statements.

Statement of Cash Flows

For purposes of presentation in the consolidated statements of cash flows, “cash and cash equivalents” are defined as those amounts included in cash and due from banks in the consolidated balance sheets.

Fair Value Estimates

We measure many of our assets and liabilities on a fair value basis. Fair value is the price that could be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. To improve consistency and comparability in fair value measurements, GAAP has established a hierarchy to prioritize the valuation inputs among three levels. The Bank prioritizes quoted prices in active markets and minimizes reliance on

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

unobservable inputs when possible. When observable market prices are not available, fair value is estimated using modeling techniques such as discounted cash flow analysis. These modeling techniques use assumptions that market participants would consider in pricing the asset or the liability, including assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset, the life of the asset and applicable growth rate, the risk of nonperformance, and other related assumptions. Changes in market conditions may reduce the availability of quoted prices or observable data. When market data is not available, the Bank uses valuation techniques requiring professional judgment to estimate the appropriate fair value. See Note 3 of the Notes to Consolidated Financial Statements for further information regarding the use of fair value estimates.

Security Resell Agreements

Security resell agreements represent overnight and term agreements with the majority maturing within 30 days. These agreements are generally treated as collateralized financing transactions and are carried at amounts at which the securities were acquired plus accrued interest. Either the Bank, or in some instances third parties on its behalf, take possession of the underlying securities. The fair value of such securities is monitored throughout the contract term to ensure that asset values remain sufficient to protect against counterparty default. We are permitted by contract to sell or repledge certain securities that we accept as collateral for security resell agreements. If sold, our obligation to return the collateral is recorded as “securities sold, not yet purchased” and included as a liability in “Federal funds and other short-term borrowings.” At December 31, 2018, we held \$1.2 billion of securities for which we were permitted by contract to sell or repledge. Security resell agreements averaged \$488 million during 2018, and the maximum amount outstanding at any month-end during 2018 was \$1.2 billion.

Investment Securities

We classify our investment securities according to their purpose and holding period. Gains or losses on the sale of securities are recognized using the specific identification method and recorded in noninterest income.

Held-to-maturity (“HTM”) debt securities are carried at amortized cost with purchase discounts or premiums accreted or amortized into interest income over the contractual life of the security. The Bank has the intent and ability to hold such securities until maturity.

Available-for-sale (“AFS”) securities are stated at fair value and generally consist of debt securities held for investment. Unrealized gains and losses of AFS securities, after applicable taxes, are recorded as a component of other comprehensive income (“OCI”).

We review quarterly our investment securities portfolio for any declines in value that are considered to be other-than-temporary impairment (“OTTI”). The process, methodology, and factors considered to evaluate securities for OTTI are discussed further in Note 5.

Trading securities are stated at fair value and consist of securities acquired for short-term appreciation or other trading purposes. Realized and unrealized gains and losses are recorded in trading income, which is included in “Capital markets and foreign exchange.”

The fair values of investment securities, as estimated under current accounting guidance, are discussed in Note 3.

Loans and Allowance for Credit Losses

Loans are reported at the principal amount outstanding, net of unearned income. Unearned income, which includes deferred fees net of deferred direct loan origination costs, is amortized to interest income over the life of the loan using the interest method. Interest income is recognized on an accrual basis.

At the time of origination, we determine whether loans will be held for investment or held for sale. We may subsequently change our intent to hold loans for investment and reclassify them as held for sale. Loans held for sale are carried at the lower of aggregate cost or fair value. A valuation allowance is recorded when cost exceeds fair value based on reviews at the time of reclassification and periodically thereafter. Gains and losses are recorded in noninterest income based on the difference between sales proceeds and carrying value.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

We evaluate loans throughout their lives for signs of credit deterioration, which may impact the loan's status, and potentially impact our accounting for that loan. Loan status categories include past due as to contractual payments, nonaccrual, impaired, and restructured (including troubled debt restructurings "TDRs"). Our accounting policies for these loan statuses and our estimation of the related allowance for loan and lease losses ("ALLL") are discussed further in Note 6.

In the ordinary course of business, we transfer portions of loans under participation agreements to manage credit risk and our portfolio concentration. We evaluate the loan participations to determine if they meet the appropriate accounting guidance to qualify as sales. Certain purchased loans require separate accounting procedures that are also discussed in Note 6.

The allowance for credit losses ("ACL") includes the ALLL and the reserve for unfunded lending commitments ("RULC") and represents our estimate of losses inherent in the loan portfolio that may be recognized from loans and lending commitments that are not recoverable. Further discussion of our estimation process for the ACL is included in Note 6.

Other Noninterest-Bearing Investments

These investments include investments in private equity funds (referred to in this document as private equity investments "PEIs"), venture capital securities, securities acquired for various debt and regulatory requirements, bank-owned life insurance, and certain other noninterest-bearing investments. See further discussions in Notes 5, 15 and 3.

Certain PEIs and venture capital securities are accounted for under the equity method and reported at fair value. Changes in fair value and gains and losses from sales are recognized in noninterest income. The values assigned to the securities where no market quotations exist are based upon available information and may not necessarily represent amounts that will ultimately be realized. Such estimated amounts depend on future circumstances and will not be realized until the individual securities are liquidated.

Bank-owned life insurance is accounted for at fair value based on the cash surrender values ("CSVs") of the general account insurance policies. A third-party service provides these values.

Other PEIs and those acquired for various debt and regulatory requirements are accounted for at cost. Periodic reviews are conducted for impairment by comparing carrying values with estimates of fair value determined according to the previous discussion.

Premises, Equipment and Software, Net

Premises, equipment and software are stated at cost, net of accumulated depreciation and amortization. Depreciation, computed primarily on the straight-line method, is charged to operations over the estimated useful lives of the properties, generally 25 to 40 years for buildings, 3 to 10 years for furniture and equipment, and 3 to 10 years for software, including capitalized costs related to the Bank's technology initiatives. Leasehold improvements are amortized over the terms of the respective leases or the estimated useful lives of the improvements (including any extension options that are reasonably certain to be exercised), whichever is shorter.

Goodwill and Identifiable Intangible Assets

Goodwill and intangible assets deemed to have indefinite lives are not amortized. We subject these assets to annual specified impairment tests as of the beginning of the fourth quarter and more frequently if changing conditions warrant. Core deposit assets and other intangibles with finite useful lives are generally amortized on an accelerated basis using an estimated useful life of up to 12 years.

Business Combinations

Business combinations are accounted for under the acquisition method of accounting. Upon initially obtaining control, we recognize 100% of all acquired assets and all assumed liabilities regardless of the percentage owned. The assets and liabilities are recorded at their estimated fair values, with goodwill being recorded when such fair values are less than the cost of acquisition. Certain transaction and restructuring costs are expensed as incurred.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Changes to estimated fair values from a business combination are recognized as an adjustment to goodwill over the measurement period, which cannot exceed one year from the acquisition date. Results of operations of the acquired business are included in our statement of income from the date of acquisition.

Other Real Estate Owned

Other real estate owned (“OREO”) consists principally of commercial and residential real estate obtained in partial or total satisfaction of loan obligations. Amounts are recorded initially at fair value (less any selling costs) based on property appraisals at the time of transfer and subsequently at the lower of cost or fair value (less any selling costs).

Derivative Instruments

We use derivative instruments, including interest rate swaps, purchased and sold options such as floors and basis swaps, as part of our overall interest rate risk management strategy. Derivatives are an important tool used in managing our overall asset and liability sensitivities to remain within management’s stated interest rate risk thresholds. Their use allows us to adjust and align our naturally occurring mix of fixed and floating-rate assets and liabilities to manage interest income volatility by synthetically converting variable-rate assets to fixed-rate, or synthetically converting fixed-rate funding instruments to floating rates.

We also execute both interest rate and short-term foreign currency derivative instruments with our commercial banking customers to facilitate their risk management strategies. These derivatives are immediately hedged by offsetting derivatives with third parties such that we minimize our net risk exposure as a result of such transactions. We record all derivatives at fair value in the balance sheet as either other assets or other liabilities. The accounting for changes in value of a derivative depends on whether or not the transaction has been designated and qualifies for hedge accounting. Derivatives that are not designated as hedges are reported and measured at fair value through earnings. See Note 7 for more information.

Derivatives in Designated Accounting Hedge

We apply hedge accounting to certain derivatives executed for risk management purposes, primarily interest rate risk. To qualify for hedge accounting, a derivative must be highly effective at reducing the risk associated with the exposure being hedged and the hedging relationship must be formally documented. We primarily use regression analysis to assess the effectiveness of each hedging relationship, unless the hedge qualifies for other methods of assessing effectiveness (e.g. shortcut or critical terms match), both at inception and on an ongoing basis. We use Accounting Hedges as designated fair value and cash flow hedges and can be a significant aspect of the Bank’s overall interest risk sensitivity management. The Bank may add additional hedging strategies and apply hedge accounting to the strategies as it deems necessary. See Note 7 for more information regarding the accounting for derivatives designated as hedging instruments.

Commitments and Letters of Credit

In the ordinary course of business, we enter into commitments to extend credit, commercial letters of credit, and standby letters of credit. Such financial instruments are recorded in the financial statements when they become payable. The credit risk associated with these commitments is evaluated in a manner similar to the ALLL. The RULC is presented separately in the balance sheet.

Revenue Recognition

Service charges and fees on deposit accounts are recognized in accordance with published deposit account agreements for customer accounts or contractual agreements for commercial accounts. Other service charges, commissions and fees include interchange fees, bank services, and other fees, which are generally recognized at the time of transaction or as the services are performed.

Share-Based Compensation

Share-based compensation generally includes grants of stock options, restricted stock, restricted stock units (“RSUs”), and other awards to employees and non-employee directors. We recognize compensation expense in the statement of income based on the grant-date value of the associated share-based awards. See further discussion in Note 18.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Income Taxes

Deferred tax assets (“DTAs”) and liabilities are determined based on temporary differences between financial statement asset and liability amounts and their respective tax basis and are measured using enacted tax laws and rates. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred tax assets are recognized subject to management’s judgment that realization is more likely than not. Unrecognized tax benefits for uncertain tax positions relate primarily to tax credits on technology initiatives. See further discussion in Note 19.

Net Earnings Per Common Share

Net earnings per common share is based on net earnings applicable to common shareholders, which is net of preferred stock dividends. Basic net earnings per common share is based on the weighted average outstanding common shares during each year. Unvested share-based awards with rights to receive nonforfeitable dividends are considered participating securities and included in the computation of basic earnings per share. Diluted net earnings per common share is based on the weighted average outstanding common shares during each year, including common stock equivalents. Stock options, restricted stock, RSUs, and stock warrants are converted to common stock equivalents using the treasury stock method. Diluted net earnings per common share excludes common stock equivalents whose effect is antidilutive. See further discussion in Note 20.

2. RECENT ACCOUNTING PRONOUNCEMENTS

Standard	Description	Date of adoption	Effect on the financial statements or other significant matters
Standards not adopted by the Bank during 2018			
ASU 2016-02, Leases (Topic 842) and subsequent related ASUs	This Standard requires that a lessee recognize assets and liabilities for leases on the balance sheet. For leases with a term of 12 months or less, however, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee will depend primarily on its classification as a finance or operating lease. The standard also requires disclosures to better understand the amount, timing, and uncertainty of cash flows arising from leases. These disclosures include qualitative and quantitative requirements, providing additional information about the amounts recorded in the financial statements.	January 1, 2019	The Bank has elected the second of two modified retrospective approaches for adoption of the standard. Under this method, upon adoption, we have recorded a right-of-use asset of approximately \$225 million and an offsetting lease liability of \$242 million. The impact to retained earnings upon adoption was not material.
ASU 2017-08, Nonrefundable Fees and Other Costs (Subtopic 310-20). Premium Amortization on Purchased Callable Debt Securities	The amendments in this ASU shorten the amortization period for certain callable debt securities held at a premium. The standard requires the premium to be amortized to the earliest call date. The update does not change the accounting for securities held at a discount.	January 1, 2019	Using a modified retrospective transition approach, we recorded a cumulative-effect adjustment of a \$3 million increase to retained earnings upon adoption of the ASU.

Standard	Description	Date of adoption	Effect on the financial statements or other significant matters
Standards not adopted by the Bank during 2018 (continued)			
ASU 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement	The purpose of this ASU is to improve the effectiveness of disclosures in the notes to the financial statements. This Update removes, modifies, and makes certain additions to the disclosure requirements on fair value measurement.	January 1, 2019	The effective date of this standard is January 1, 2020. However, we have elected to early adopt this ASU as of January 1, 2019. This standard will be applied prospectively after the adoption date. The Bank has determined that the changes to the disclosure requirements for fair value measurements are expected to be immaterial to its financial statements.
ASU 2018-15, Intangibles – Goodwill and Other-Internal-Use Software (Topic 350-40): Customer’s Accounting for Implementation Cost Incurred in a Cloud Computing Arrangement That Is a Service Contract	This ASU provides revised accounting guidance related to the accounting for implementation costs associated with Cloud Computing Arrangements that meet the criteria for a service contract. Some of the main provisions include: -Implementation costs for cloud computing arrangements will be capitalized as an asset or recognized as an expense when incurred on the basis of existing GAAP, specifically guidance already provided around internal-use software. -The amortization period for capitalized amounts will be the noncancelable hosting contract term plus any expected renewal periods. -Entities in a hosting arrangement that is a service contract must provide certain qualitative and quantitative disclosures. -For transition there is an option to either apply guidance retrospectively or prospectively.	January 1, 2019	The effective date of this ASU is January 1, 2020 but we have elected to early adopt this Standard, as of January 1, 2019, prospectively. However, a primary purpose of this ASU was to clarify existing accounting guidance and reduce diversity in practice and the Bank has historically already been applying the guidance as clarified in this ASU. Consequently, adoption will have little, if any, impact on the Bank’s financial statements.
ASU 2016-13, Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments	This ASU significantly changes how entities will measure credit losses for most financial assets and certain other instruments that are not measured at fair value through net income. The standard replaces today’s “incurred loss” approach with an “expected loss” model for instruments such as loans and HTM securities that are measured at amortized	January 1, 2020	We have formed an implementation team led jointly by Credit, Treasury, and the Corporate Controller’s group, that also includes other lines of business and functions within the Bank. The implementation team is developing models that can meet the requirements of the new guidance.

cost. The standard requires credit losses relating to AFS debt securities to be recorded through an ACL rather than a reduction of the carrying amount and replaces the historically required OTTI analysis. It also changes the accounting for purchased credit-impaired debt securities and loans.

The standard retains many of the current disclosure requirements in U.S. GAAP and expands certain disclosure requirements. Early adoption of the guidance is permitted as of January 1, 2019.

While this standard may potentially have a material impact on the Bank's financial statements, we are still in process of conducting our evaluation.

This ASU is required to be applied by means of a cumulative-effect adjustment to the opening retained earnings as of the beginning of the first period of adoption as previously noted. The Bank does not plan to early adopt this new guidance.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Standard	Description	Date of adoption	Effect on the financial statements or other significant matters
Standards not adopted by the Bank during 2018 (continued)			
ASU 2017-04, Intangibles – Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment	<p>This ASU removes the requirements in step two of the current impairment model, eliminating the requirement to calculate and compare the implied fair value of the reporting entity with the carrying amount of that entity, including goodwill, to measure any impairment charge. Instead, entities would record an impairment charge based on the excess of a reporting unit's carrying amount of goodwill over its implied fair value of goodwill (i.e., measure the charge based on step one of the current guidance).</p> <p>The standard also continues to allow entities to perform the optional qualitative goodwill impairment assessment before determining whether to proceed to step one. The standard is effective for the Bank as of January 1, 2020. Early adoption is allowed for any goodwill impairment test performed after January 1, 2017.</p>	January 1, 2020	<p>We do not currently expect this guidance will have a material impact on the Bank's financial statements since the fair values of our reporting units were not lower than their respective carrying amounts of goodwill at the time of our impairment analysis for 2018 and there are no expected decreases in the fair value of the relevant reporting units in the foreseeable future.</p> <p>The Bank is not planning to early adopt this new guidance. The transition and adoption provisions are to be applied prospectively.</p>
Standard	Description	Date of adoption	Effect on the financial statements or other significant matters
Standards adopted by the Bank during 2018			
ASU 2014-09, Revenue from Contracts with Customers (Topic 606) and subsequent related ASUs	<p>The core principle of the new guidance is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. The banking industry does not expect significant changes because major sources of revenue are from financial instruments that have been excluded from the scope of the new standard, (including loans, derivatives, debt and equity securities, etc.). However, these new standards affect other fees charged by banks, such as asset management fees, credit card interchange fees, deposit account fees, etc. Adoption may be made on a full retrospective basis with practical expedients, or on a modified retrospective basis with a cumulative effect adjustment. Additionally, the new guidance significantly increases</p>	January 1, 2018	We adopted this guidance using the modified retrospective transition method. There was no material impact at adoption to the Bank's consolidated financial statements. New disclosures are found in Footnote 16.

the disclosures related to revenue recognition practices.

ASU 2016-01,
Financial
Instruments –
Overall (Subtopic
825-10):
Recognition and
Measurement of
Financial Assets
and Financial
Liabilities

This ASU provides revised accounting guidance related to the accounting for and reporting of financial instruments. Some of the main provisions include:

- Equity investments that do not result in consolidation and are not accounted for under the equity method would be measured at fair value through net income.
- Changes in instrument-specific credit risk for financial liabilities that are measured under the fair value option would be recognized in OCI
- Elimination of the requirement to disclose the methods and significant assumptions used to estimate the fair value of financial instruments carried at amortized cost. However, it will require the use of exit price when measuring the fair value of financial instruments measured at amortized cost for disclosure purposes.

January
1, 2018

The transition adjustment upon adoption was booked through a cumulative-effect adjustment to the balance sheet as of the beginning of the year. Amendments related to equity securities without readily determinable fair values were applied prospectively to equity investments that existed as of the adoption date, if applicable.

The adoption of this guidance was determined to be immaterial in all aspects. We refined our valuation models to better account for the exit price, which does not impact our financial statements, but does have an impact on our disclosures, as provided in Footnote 3.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Standard	Description	Date of adoption	Effect on the financial statements or other significant matters
Standards adopted by the Bank during 2018 (continued)			
ASU 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities	The purpose of this standard is to better align a company's financial reporting for hedging activities with the economic objectives of those activities. The standard is effective for public business entities for fiscal years beginning after December 15, 2018, with early adoption, including adoption in an interim period, permitted. The standard requires a modified retrospective transition method that requires recognition of the cumulative effect of the change on the opening balance of each affected component of equity in the statement of financial position as of the date of adoption.	January 1, 2018	We early adopted this guidance in the first quarter. The adoption of this guidance did not have a material impact on our consolidated financial statements at transition.

3. FAIR VALUE**Fair Value Measurement**

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. To measure fair value, a hierarchy has been established that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs. This hierarchy uses three levels of inputs to measure the fair value of assets and liabilities as follows:

Level 1 – Quoted prices in active markets for identical assets or liabilities in active markets that the Bank has the ability to access;

Level 2 – Observable inputs other than Level 1 including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in less active markets, observable inputs other than quoted prices that are used in the valuation of an asset or liability, and inputs that are derived principally from or corroborated by observable market data by correlation or other means; and

Level 3 – Unobservable inputs supported by little or no market activity for financial instruments whose value is determined by pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The level in the fair value hierarchy within which the fair value measurement is classified is determined based on the lowest level input that is significant to the fair value measurement in its entirety. Market activity is presumed to be orderly in the absence of evidence of forced or disorderly sales, although such sales may still be indicative of fair value. Applicable accounting guidance precludes the use of blockage factors or liquidity adjustments due to the quantity of securities held by an entity.

We use fair value to measure certain assets and liabilities on a recurring basis when fair value is the primary measure for accounting. Fair value is used on a nonrecurring basis to measure certain assets when adjusting carrying values, such as the application of lower of cost or fair value accounting, including recognition of impairment on assets. Fair value is also used when providing required disclosures for certain financial instruments.

Fair Value Policies and Procedures

We have various policies, processes and controls in place to ensure that fair values are reasonably developed, reviewed and approved for use. These include a Securities Valuation Committee, comprised of executive management, that reviews and approves on a quarterly basis the key components of fair value estimation, including

critical valuation assumptions for Level 3 modeling. A Model Risk Management Group conducts model validations, including internal models, and sets policies and procedures for revalidation, including the timing of revalidation.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Third Party Service Providers

We use a third party pricing service to measure fair value for approximately 95% of our AFS Level 2 securities. Fair value measurements for other AFS Level 2 securities generally use certain inputs corroborated by market data and include standard discounted cash flow analysis.

For Level 2 securities, the third party pricing service provides documentation on an ongoing basis that presents market corroborative data, including detail pricing information and market reference data. The documentation includes benchmark yields, reported trades, broker-dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, and reference data, including information from the vendor trading platform. We review, test and validate this information as appropriate. Absent observable trade data, we do not adjust prices from our third party sources.

The following describes the hierarchy designations, valuation methodologies, and key inputs to measure fair value on a recurring basis for designated financial instruments:

Available-for-Sale

U.S. Treasury, Agencies and Corporations

U.S. Treasury securities are measured under Level 1 using quoted market prices when available. U.S. agencies and corporations are measured under Level 2 generally using the previously discussed third party pricing service.

Municipal Securities

Municipal securities are measured under Level 2 using the third party pricing service.

Money Market Mutual Funds and Other

Money market mutual funds and other securities are measured under Level 1 or Level 2. For Level 1, quoted market prices are used which may include net asset values (“NAVs”) or their equivalents. Level 2 valuations generally use quoted prices for similar securities. With the adoption of ASU 2016-01, as of January 1, 2018 our money market mutual funds are no longer classified as AFS and are now recognized in trading.

Trading Account

Securities in the trading account are generally measured under Level 2 using third party pricing service providers as described previously.

Held-to-Maturity

HTM securities are carried at amortized cost, but for disclosure purposes are measured at fair value using a third party pricing service or an internal model. The internal model utilizes observable market yields as inputs.

Bank-Owned Life Insurance

Bank-owned life insurance (“BOLI”) is measured under Level 2 according to CSVs of the insurance policies that are provided by a third party service. Nearly all policies are general account policies with CSVs based on the Bank’s claims on the assets of the insurance companies. The insurance companies’ investments include predominantly fixed income securities consisting of investment-grade corporate bonds and various types of mortgage instruments. Management regularly reviews its BOLI investment performance, including concentrations among insurance providers.

Private Equity Investments

PEIs are generally measured under Level 3. The majority of these PEIs are held in the Bank’s Small Business Investment Company (“SBIC”) and are early-stage venture investments. The fair value measurements of these investments are reviewed at least on a quarterly basis, including whenever a new round of financing occurs. Certain of these investments may be measured using multiples of operating performance. The fair value measurements of PEIs are reviewed on a quarterly basis by the Securities Valuation Committee. The Equity Investments Committee,

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

consisting of executives familiar with the investments, reviews periodic financial information, including audited financial statements when available.

Certain valuation analytics may be employed that include current and projected financial performance, recent financing activities, economic and market conditions, market comparables, market liquidity, sales restrictions, and other factors. A significant change in the expected performance of the individual investment would result in a change in the fair value measurement of the investment. The amount of unfunded commitments to invest is disclosed in Note 15. Certain restrictions apply for the redemption of these investments and certain investments are prohibited by the Volcker Rule. See discussions in Notes 5 and 15.

Agriculture Loan Servicing

This asset results from our servicing of agriculture loans approved and funded by Federal Agricultural Mortgage Corporation (“FAMC”). We provide this servicing under an agreement with FAMC for loans they own. The asset’s fair value represents our projection of the present value of future cash flows measured under Level 3 using discounted cash flow methodologies.

Interest-Only Strips

Interest-only strips are created as a by-product of the securitization process. When the guaranteed portions of Small Business Administration (“SBA”) 7(a) loans are pooled, interest-only strips may be created in the pooling process. The asset’s fair value represents our projection of the present value of future cash flows measured under Level 3 using discounted cash flow methodologies.

Deferred Compensation Plan Assets and Obligations

Invested assets in the deferred compensation plan consist of shares of registered investment companies. These mutual funds are valued under Level 1 at quoted market prices, which represents the NAV of shares held by the plan at the end of the period.

Derivatives

Derivatives are measured according to their classification as either exchange-traded or over-the-counter.

Exchange-traded derivatives consist of foreign currency exchange contracts measured under Level 1 because they are traded in active markets. Over-the-counter derivatives, including those for customers, consist of interest rate swaps and options. These derivatives are measured under Level 2 using third party services. Observable market inputs include yield curves (the London Interbank Offered Rate (“LIBOR”) swap curve and relevant overnight index swap curves), foreign exchange rates, commodity prices, option volatilities, counterparty credit risk, and other related data. Credit valuation adjustments are required to reflect nonperformance risk for both the Bank and the respective counterparty. These adjustments are determined generally by applying a credit spread to the total expected exposure of the derivative.

Securities Sold, Not Yet Purchased

Securities sold, not yet purchased, included in “Federal funds and other short-term borrowings” on the balance sheet, are measured under Level 1 using quoted market prices. If not available, quoted prices under Level 2 for similar securities are used.

Loans

Loans are generally carried at amortized cost, but for disclosure purposes are measured at fair value according to their status as nonimpaired or impaired. For nonimpaired loans, fair value is estimated by discounting future cash flows using the LIBOR yield curve adjusted by a factor which reflects the credit, interest rate risk, and liquidity inherent in the loan. These future cash flows are then reduced by the estimated “life-of-the-loan” aggregate credit losses in the loan portfolio. These adjustments for lifetime future credit losses are derived from the methods used to estimate the ALLL for our loan portfolio and are adjusted quarterly as necessary to reflect the most recent loss experience. Impaired loans that are collateral-dependent are already considered to be held at fair value. Impaired loans that are not collateral-dependent have future cash flows reduced by the estimated “life-of-the-loan” credit loss

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

derived from methods used to estimate the ALLL for these loans. See Impaired Loans in Note 6 for details on the impairment measurement method for impaired loans. Loans, other than those held for sale, are not normally purchased and sold by the Bank, and there are no active trading markets for most of this portfolio.

Quantitative Disclosure by Fair Value Hierarchy

Assets and liabilities measured at fair value by class on a recurring basis are summarized as follows:

(In millions)	December 31, 2018			Total

Reconciliation of Level 3 Fair Value Measurements

The following reconciles the beginning and ending balances of assets and liabilities that are measured at fair value by class on a recurring basis using Level 3 inputs:

(In millions)	Level 3 Instruments			
	December 31, 2018		December 31, 2017	
	Private svcg equity and investments	Ag loan and interest-only strips	Private svcg equity and investments	Ag loan and interest-only strips
Balance at beginning of year	\$95	\$ 18	\$ 73	\$ 20
Securities gains, net	2	—	7	—
Other noninterest income	—	1	—	(1)
Purchases	11	—	20	—

Redemptions and paydowns (6) (1) (5) (1)

Balance at end of year \$102 \$ 18 \$ 95 \$ 18

No transfers of assets or liabilities occurred among Levels 1, 2 or 3 for 2018 and 2017.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The reconciliation of Level 3 instruments includes the following realized gains and losses in the statement of income:

(In millions) Year Ended
December
31,
2018 2017

Securities gains (losses), net \$ (1) \$ 3

Nonrecurring Fair Value Measurements

Included in the balance sheet amounts are the following amounts of assets that had fair value changes measured on a nonrecurring basis:

(In millions)	Fair value at December 31, 2018			Gains (losses) from fair value changes Year Ended December 31, 2018
	Level 2	Level 3	Total	

ASSETS

Private equity investments, carried at cost	\$—	\$ 1	\$ 1	\$ —
Impaired loans	—32	—	32	(13)
Other real estate owned	—	—	—	(1)
Total	\$—32	\$ 1	\$ 33	\$ (14)

(In millions)	Fair value at December 31, 2017			Gains (losses) from fair value changes Year Ended December 31, 2017
	Level 2	Level 3	Total	

ASSETS

Private equity investments, carried at cost	\$—	\$ 1	\$ 1	\$ (1)
Impaired loans	—9	—	9	(5)
Other real estate owned	—	—	—	—
Total	\$—9	\$ 1	\$ 10	\$ (6)

The previous fair values may not be current as of the dates indicated, but rather as of the date the fair value change occurred, such as a charge for impairment. Accordingly, carrying values may not equal current fair value.

We recognized net gains of \$1 million in 2018 and \$2 million in 2017 from the sale of OREO properties that had a carrying value at the time of sale of approximately \$4 million in 2018 and \$6 million in 2017. Previous to their sale in these years, we recognized an insignificant amount of impairment on these properties in 2018 and 2017.

PEIs carried at cost were measured at fair value for impairment purposes according to the methodology previously discussed for these investments. Amounts of PEIs carried at cost were \$10 million at both December 31, 2018 and 2017. Amounts of other noninterest-bearing investments carried at cost were \$329 million and \$338 million at December 31, 2018 and 2017, respectively, which were comprised of Federal Reserve and Federal Home Loan Bank (“FHLB”) stock. PEIs accounted for using the equity method were \$35 million and \$36 million at December 31, 2018 and 2017, respectively.

Impaired (or nonperforming) loans that are collateral-dependent were measured at fair value based on the fair value of the collateral. OREO was measured initially at fair value based on collateral appraisals at the time of transfer and subsequently at the lower of cost or fair value.

Measurement of fair value for collateral-dependent loans and OREO was based on third party appraisals that utilize one or more valuation techniques (income, market and/or cost approaches). Any adjustments to calculated fair value were made based on recently completed and validated third party appraisals, third party appraisal services, automated valuation services, or our informed judgment. Evaluations were made to determine that the appraisal process met the relevant concepts and requirements of applicable accounting guidance.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Automated valuation services may be used primarily for residential properties when values from any of the previous methods were not available within 90 days of the balance sheet date. These services use models based on market, economic, and demographic values. The use of these models has only occurred in a very few instances and the related property valuations have not been sufficiently significant to consider disclosure under Level 3 rather than Level 2. Impaired loans that are not collateral-dependent were measured based on the present value of future cash flows discounted at the expected coupon rates over the lives of the loans. Because the loans were not discounted at market interest rates, the valuations do not represent fair value and have been excluded from the nonrecurring fair value balance in the preceding schedules.

Fair Value of Certain Financial Instruments

Following is a summary of the carrying values and estimated fair values of certain financial instruments:

(In millions)	December 31, 2018			December 31, 2017		
	Carrying value	Estimated fair value	Level	Carrying value	Estimated fair value	Level
Financial assets:						
Held-to-maturity investment securities	\$774	\$ 767	2	\$770	\$ 762	2
Loans and leases (including loans held for sale), net of allowance	46,312	45,251	3	44,306	44,226	3
Financial liabilities:						
Time deposits	4,336	4,319	2	3,115	3,099	2
Long-term debt	724	727	2	383	402	2

This summary excludes financial assets and liabilities for which carrying value approximates fair value and financial instruments that are recorded at fair value on a recurring basis. Financial instruments for which carrying values approximate fair value include cash and due from banks, money market investments, demand, savings and money market deposits, federal funds purchased and other short-term borrowings, and security repurchase agreements. The estimated fair value of demand, savings and money market deposits is the amount payable on demand at the reporting date. Carrying value is used because the accounts have no stated maturity and the customer has the ability to withdraw funds immediately. Time and foreign deposits, and any other short-term borrowings, are measured at fair value by discounting future cash flows using the LIBOR yield curve to the given maturity dates. Long-term debt is measured at fair value based on actual market trades (i.e., an asset value) when available, or discounting cash flows to maturity using the LIBOR yield curve adjusted for credit spreads. The methods used to measure fair value for HTM securities and loans were previously described in this footnote.

These fair value disclosures represent our best estimates based on relevant market information and information about the financial instruments. Fair value estimates are based on judgments regarding current economic conditions, future expected loss experience, risk characteristics of the various instruments, and other factors. These estimates are subjective in nature, involve uncertainties and matters of significant judgment, and cannot be determined with precision. Changes in these methodologies and assumptions could significantly affect the estimates.

4. OFFSETTING ASSETS AND LIABILITIES

Gross and net information for selected financial instruments in the balance sheet is as follows:

(In millions)	December 31, 2018		Gross amounts not offset in the balance sheet			Net amount
	Gross amounts recognized in the balance sheet	Net amounts presented in the balance sheet	Financial instruments	Cash collateral received/pledged		
Assets:						
Federal funds sold and security resell agreements	\$1,461	\$ —	\$1,461	\$ —	\$ —	\$ 1,461
Derivatives (included in other assets)	45	—	45	(35)	(3)	7
Total assets	\$1,506	\$ —	\$1,506	\$(35)	\$(3)	\$ 1,468
Liabilities:						
Federal funds and other short-term borrowings	\$5,653	\$ —	\$5,653	\$ —	\$ —	\$ 5,653
Derivatives (included in other liabilities)	39	—	39	(35)	(1)	3
Total liabilities	\$5,692	\$ —	\$5,692	\$(35)	\$(1)	\$ 5,656

(In millions)	December 31, 2017		Gross amounts not offset in the balance sheet			Net amount
	Gross amounts recognized in the balance sheet	Net amounts presented in the balance sheet	Financial instruments	Cash collateral received/pledged		
Assets:						
Federal funds sold and security resell agreements	\$809	\$(295)	\$ 514	\$ —	\$ —	\$ 514
Derivatives (included in other assets)	38	—	38	(9)	(1)	28
Total assets	\$847	\$(295)	\$ 552	\$(9)	\$(1)	\$ 542
Liabilities:						
Federal funds and other short-term borrowings	\$5,271	\$(295)	\$ 4,976	\$ —	\$ —	\$ 4,976
Derivatives (included in other liabilities)	40	—	40	(9)	(6)	25
Total liabilities	\$5,311	\$(295)	\$ 5,016	\$(9)	\$(6)	\$ 5,001

Security repurchase and reverse repurchase (“resell”) agreements are offset, when applicable, in the balance sheet according to master netting agreements. Security repurchase agreements are included with “Federal funds and other short-term borrowings.” Derivative instruments may be offset under their master netting agreements; however, for accounting purposes, we present these items on a gross basis in the Bank’s balance sheet. See Note 7 for further information regarding derivative instruments.

5. INVESTMENTS

Investment Securities

Securities are classified as HTM, AFS or trading. HTM securities, which management has the intent and ability to hold until maturity, are carried at amortized cost. AFS securities are carried at fair value and unrealized gains and losses are reported as net increases or decreases to accumulated other comprehensive income (“AOCI”). Realized gains

and losses on AFS securities are determined by using the cost basis of each individual security. Trading securities are carried at fair value with gains and losses recognized in current period earnings. The purchase premiums for callable debt securities classified as held-to-maturity HTM or AFS are amortized at a constant effective yield to the earliest call date. The purchase premiums and discounts for all other HTM and AFS securities are amortized and accreted at a constant effective yield to the contractual maturity date and no assumption is made concerning prepayments. As principal prepayments occur, the portion of the unamortized premium or discount associated with the principal reduction is recognized in interest income in the period the principal is reduced. Note 3 discusses the process to estimate fair value for investment securities. The purchase premiums for callable debt securities classified as HTM or AFS are amortized at a constant effective yield to the earliest call date.

At December 31, 2018 and 2017, respectively, 606 and 667 HTM and 2,588 and 2,262 AFS investment securities were in an unrealized loss position.

Other-Than-Temporary Impairment

Ongoing Policy

We review investment securities on a quarterly basis for the presence of OTTI. We assess whether OTTI is present when the fair value of a debt security is less than its amortized cost basis at the balance sheet date. When we do not expect to recover the entire amortized cost basis of a security then the decline in fair value is considered to be other-

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

than-temporary. OTTI is considered to have occurred for debt securities in unrealized loss positions if we have formed a documented intent to sell identified securities or initiated such sales or it is “more likely than not” we will be required to sell the security before recovery of its amortized cost basis. In these scenarios the impairment loss is equal to the full difference between the amortized cost basis and the fair value of the securities. For debt securities in an unrealized loss position that we have the intent and ability to hold, the expected cash flows to be received from the securities are evaluated to determine if a credit loss exists. In the event of a credit loss, only the amount of the impairment associated with the credit loss is recognized in income. Unrealized losses relating to factors other than credit losses are recorded in OCI.

Our OTTI evaluation process takes into consideration current market conditions; fair value in relationship to cost; extent and nature of change in fair value; severity and duration of the impairment; recent events specific to the issuer or industry; our assessment of the creditworthiness of the issuer, including external credit ratings, changes, recent downgrades, and trends; the cash flow priority position of the instrument that we hold in the case of structured securities; volatility of earnings and trends; current analysts’ evaluations; all available information relevant to the collectability of debt securities; and other key measures. In addition, for AFS securities with fair values below amortized cost, we must determine if we intend to sell the securities or if it is more likely than not that we will be required to sell the securities before recovery of their amortized cost basis. For HTM securities, we must determine we have the ability to hold the securities to maturity. We consider any other relevant factors before concluding our evaluation for the existence of OTTI in our securities portfolio.

Other-Than-Temporary Impairment Conclusions

The Bank did not recognize any OTTI on its investment securities portfolio during 2018. Unrealized losses relate to changes in interest rates subsequent to purchase and are not attributable to credit. At December 31, 2018, we did not have an intent to sell identified securities with unrealized losses or initiate such sales, and we believe it is not more likely than not we would be required to sell such securities before recovery of their amortized cost basis.

To determine the credit component of OTTI for all security types, we utilize projected cash flows. These cash flows are credit adjusted using, among other things, assumptions for default probability and loss severity. Certain other unobservable inputs such as prepayment rate assumptions are also utilized. In addition, certain internal models may be utilized. See Note 3 for further discussion. To determine the credit-related portion of OTTI in accordance with applicable accounting guidance, we use the security specific effective interest rate when estimating the present value of cash flows.

Securities gains and losses recognized in income

Investment securities with a carrying value of approximately \$2.6 billion and \$2.1 billion at December 31, 2018 and 2017, respectively, were pledged to secure public and trust deposits, advances, and for other purposes as required by law. Securities are also pledged as collateral for security repurchase agreements.

Private Equity Investments

Effect of Volcker Rule

The Bank's PEIs are subject to the provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act"). The Volcker Rule of the Dodd-Frank Act prohibits banks from holding PEIs, except for SBIC funds and certain other permitted exclusions, beyond a required deadline. The Federal Reserve Board ("FRB") announced in December 2016 that it would allow banks to apply for an additional five-year extension beyond the July 21, 2017 deadline to comply with the Dodd-Frank Act requirement for these investments. The Bank applied for and was granted an extension for its eligible PEIs. All positions in the remaining portfolio of PEIs are subject to the extended deadline or other applicable exclusions.

Of the recorded PEIs of \$147 million at December 31, 2018, approximately \$3 million remain prohibited by the Volcker Rule. At December 31, 2018, we have \$30 million of unfunded commitments for PEIs, of which approximately \$2 million relate to prohibited PEIs. We currently do not believe that this divestiture requirement will ultimately have a material impact on our financial statements. See other discussions related to PEIs in Note 3.

6. LOANS AND ALLOWANCE FOR CREDIT LOSSES

Loans and Loans Held for Sale

Loans are summarized as follows according to major portfolio segment and specific loan class:

(In millions)	December 31,	
	2018	2017
Loans held for sale	\$93	\$44
Commercial:		
Commercial and industrial	\$14,513	\$14,003
Leasing	327	364
Owner-occupied	7,661	7,288
Municipal	1,661	1,271
Total commercial	24,162	22,926
Commercial real estate:		
Construction and land development	2,186	2,021
Term	8,939	9,103
Total commercial real estate	11,125	11,124
Consumer:		
Home equity credit line	2,937	2,777
1-4 family residential	7,176	6,662
Construction and other consumer real estate	643	597
Bankcard and other revolving plans	491	509
Other	180	185
Total consumer	11,427	10,730
Total loans ¹	\$46,714	\$44,780

¹Loans are presented net of unearned income, unamortized purchase premiums and discounts, and net deferred loan fees and costs totaling \$50 million and \$43 million at December 31, 2018 and December 31, 2017, respectively.

Municipal loans generally include loans to municipalities with the debt service being repaid from general funds or pledged revenues of the municipal entity, or to private commercial entities or 501(c)(3) not-for-profit entities utilizing a pass-through municipal entity to achieve favorable tax treatment.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Land development loans included in the construction and land development loan class were \$221 million at December 31, 2018, and \$220 million at December 31, 2017.

Loans with a carrying value of approximately \$22.6 billion at December 31, 2018 and \$25.6 billion at December 31, 2017 have been pledged at the Federal Reserve and the FHLB of Des Moines as collateral for current and potential borrowings.

We sold loans totaling \$0.6 billion in 2018, \$0.9 billion in 2017, and \$1.4 billion in 2016, that were classified as loans held for sale. The sold loans were derecognized from the balance sheet. Loans classified as loans held for sale primarily consist of conforming residential mortgages and the guaranteed portion of SBA loans. The loans are mainly sold to U.S. government agencies or participated to third parties. At times, we have continuing involvement in the transferred loans in the form of servicing rights or a guarantee from the respective issuer. Amounts added to loans held for sale during these same periods were \$0.8 billion, \$0.8 billion, and \$1.4 billion, respectively.

The principal balance of sold loans for which we retain servicing was approximately \$2.2 billion at December 31, 2018, \$2.2 billion at December 31, 2017, and \$2.0 billion at December 31, 2016. Income from loans sold, excluding servicing, was \$12 million in 2018, \$13 million in 2017, and \$18 million in 2016.

Allowance for Credit Losses

The allowance for credit losses (“ACL”) consists of the allowance for loan and lease losses (“ALLL”) and the reserve for unfunded lending commitments (“RULC”).

Allowance for Loan and Lease Losses

The ALLL represents our estimate of probable and estimable losses inherent in the loan and lease portfolio as of the balance sheet date. Losses are charged to the ALLL when recognized. Generally, commercial and commercial real estate (“CRE”) loans are charged off or charged down when they are determined to be uncollectible in whole or in part, or when 180 days past due, unless the loan is well secured and in process of collection. Consumer loans are either charged off or charged down to net realizable value no later than the month in which they become 180 days past due. Closed-end consumer loans that are not secured by residential real estate are either charged off or charged down to net realizable value no later than the month in which they become 120 days past due. We establish the amount of the ALLL by analyzing the portfolio at least quarterly, and we adjust the provision for loan losses so the ALLL is at an appropriate level at the balance sheet date.

We determine our ALLL as the best estimate within a range of estimated losses. The methodologies we use to estimate the ALLL depend upon the impairment status and loan portfolio. The methodology for impaired loans is discussed subsequently. For commercial and CRE loans with commitments greater than \$1 million, we assign internal risk grades using a comprehensive loan grading system based on financial and statistical models, individual credit analysis, and loan officer experience and judgment. The credit quality indicators discussed subsequently are based on this grading system. Estimated losses for these commercial and CRE loans are derived from a statistical analysis of our historical default and loss given default experience over the period of January 2008 through the most recent full quarter.

For consumer and small commercial and CRE loans with commitments less than or equal to \$1 million, we primarily use roll rate models to forecast probable inherent losses. Roll rate models measure the rate at which these loans migrate from one delinquency category to the next worse delinquency category, and eventually to loss. We estimate roll rates for these loans using recent delinquency and loss experience by segmenting our loan portfolios into separate pools based on common risk characteristics and separately calculating historical delinquency and loss experience for each pool. These roll rates are then applied to current delinquency levels to estimate probable inherent losses.

The current status and historical changes in qualitative and environmental factors may not be reflected in our quantitative models. Thus, after applying historical loss experience, as described above, we review the quantitatively derived level of ALLL for each segment using qualitative criteria, and use those criteria to determine

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

our qualitative estimate. We monitor various risk factors that influence our judgment regarding the level of the ALLL across the portfolio segments. These factors primarily include:

- Changes in lending policies and procedures, including changes in underwriting standards and collection, charge-off, and recovery practices;
- Changes in international, national, regional, and local economic and business conditions;
- Changes in the nature and volume of the portfolio and in the terms of loans;
- Changes in the experience, ability, and depth of lending management and other relevant staff;
- Changes in the volume and severity of past due loans, the volume of nonaccrual loans, and the volume and severity of adversely classified or graded loans;
- Changes in the quality of the loan review system;
- Changes in the value of underlying collateral for collateral-dependent loans;
- The existence and effect of any concentration of credit, and changes in the level of such concentrations;
- The effect of other external factors such as competition and legal and regulatory requirements;

The magnitude of the impact of these factors on our qualitative assessment of the ALLL changes from quarter to quarter according to changes made by management in its assessment of these factors, the extent these factors are already reflected in historical loss rates, and the extent changes in these factors diverge from one to another. We also consider the uncertainty inherent in the estimation process when evaluating the ALLL.

Reserve for Unfunded Lending Commitments

The RULC represents our estimated reserve for potential losses associated with off-balance sheet commitments, including standby letters of credit. We estimate the RULC using the same procedures and methodologies that we use for the ALLL. The loss factors and qualitative adjustments used in the RULC are the same as the loss factors and qualitative adjustments used in the ALLL. We adjust the Bank's unfunded lending commitments that are not unconditionally cancelable to an outstanding amount equivalent using credit conversion factors, and we apply the loss factors to the outstanding equivalents.

Changes in the allowance for credit losses are summarized as follows:

(In millions)	December 31, 2018			
	Commercial	Commercial real estate	Consumer	Total
Allowance for loan losses				
Balance at beginning of year	\$371	\$ 103	\$ 44	\$518

Nonaccrual and Past Due Loans

Loans are generally placed on nonaccrual status when payment in full of principal and interest is not expected, or the loan is 90 days or more past due as to principal or interest, unless the loan is both well secured and in the process of collection. Factors we consider in determining whether a loan is placed on nonaccrual include delinquency status, collateral-value, borrower or guarantor financial statement information, bankruptcy status, and other information which would indicate that the full and timely collection of interest and principal is uncertain.

A nonaccrual loan may be returned to accrual status when all delinquent interest and principal become current in accordance with the terms of the loan agreement; the loan, if secured, is well secured; the borrower has paid according to the contractual terms for a minimum of six months; and analysis of the borrower indicates a reasonable assurance of the ability and willingness to maintain payments. Payments received on nonaccrual loans are applied as a reduction to the principal outstanding.

Closed-end loans with payments scheduled monthly are reported as past due when the borrower is in arrears for two or more monthly payments. Similarly, open-end credits, such as charge-card plans and other revolving credit plans, are reported as past due when the minimum payment has not been made for two or more billing cycles. Other multi-payment obligations (i.e., quarterly, semiannual, etc.), single payment, and demand notes, are reported as past due when either principal or interest is due and unpaid for a period of 30 days or more.

Nonaccrual loans are summarized as follows:

Credit Quality Indicators

In addition to the past due and nonaccrual criteria, we also analyze loans using loan risk-grading systems, which vary based on the size and type of credit risk exposure. The internal risk grades assigned to loans follow our definitions of Pass, Special Mention, Substandard, and Doubtful, which are consistent with published definitions of regulatory risk classifications.

Definitions of Pass, Special Mention, Substandard, and Doubtful are summarized as follows:

Pass – A Pass asset is higher quality and does not fit any of the other categories described below. The likelihood of loss is considered low.

Special Mention – A Special Mention asset has potential weaknesses that deserve management’s close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the Bank’s credit position at some future date.

Substandard – A Substandard asset is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified have well-defined weaknesses and are characterized by the distinct possibility that the Bank may sustain some loss if deficiencies are not corrected.

Doubtful – A Doubtful asset has all the weaknesses inherent in a Substandard asset with the added characteristics that the weaknesses make collection or liquidation in full highly questionable and improbable.

We generally assign internal risk grades to commercial and CRE loans with commitments greater than \$1 million based on financial and statistical models, individual credit analysis, and loan officer experience and judgment. For these larger loans, we assign one of multiple grades within the Pass classification or one of the following four grades: Special Mention, Substandard, Doubtful, and Loss. Loss indicates that the outstanding balance has been charged off. We confirm our internal risk grades quarterly, or as soon as we identify information that affects the credit risk of the loan.

For consumer loans and certain small commercial and CRE loans with commitments less than or equal to \$1 million, we generally assign internal risk grades similar to those described previously based on automated rules that depend on refreshed credit scores, payment performance, and other risk indicators. These are generally assigned either a Pass or Substandard grade and are reviewed as we identify information that might warrant a grade change.

Impaired Loans						

Loans are considered impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due in accordance with the contractual terms of the loan agreement, including scheduled interest payments. If a nonaccrual loan has a balance greater than \$1 million, or if a loan is a TDR, including TDRs that subsequently default, or if the loan is no longer reported as a TDR, we individually evaluate the loan for

105

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

impairment and estimate a specific reserve for the loan for all portfolio segments under applicable accounting guidance. Smaller nonaccrual loans are pooled for ALLL estimation purposes.

When a loan is impaired, we estimate a specific reserve for the loan based on the projected present value of the loan's future cash flows discounted at the loan's effective interest rate, the observable market price of the loan, or the fair value of the loan's underlying collateral. The process of estimating future cash flows also incorporates the same determining factors discussed previously under nonaccrual loans. When we base the impairment amount on the fair value of the loan's underlying collateral, we generally charge-off the portion of the balance that is impaired, such that these loans do not have a specific reserve in the ALLL. Payments received on impaired loans that are accruing are recognized in interest income, according to the contractual loan agreement. Payments received on impaired loans that are on nonaccrual are not recognized in interest income, but are applied as a reduction to the principal outstanding. The amount of interest income recognized on a cash basis during the time the loans were impaired within the years ended December 31, 2018 and 2017 was not significant.

Information on impaired loans individually evaluated is summarized as follows, including the average recorded investment and interest income recognized for the years ended December 31, 2018 and 2017:

Modified and Restructured Loans

Loans may be modified in the normal course of business for competitive reasons or to strengthen the Bank's position. Loan modifications and restructurings may also occur when the borrower experiences financial difficulty and needs temporary or permanent relief from the original contractual terms of the loan. Loans that have been modified to accommodate a borrower who is experiencing financial difficulties, and for which the Bank has granted a concession that it would not otherwise consider, are considered TDRs.

We consider many factors in determining whether to agree to a loan modification involving concessions, and seek a solution that will both minimize potential loss to the Bank and attempt to help the borrower. We evaluate borrowers' current and forecasted future cash flows, their ability and willingness to make current contractual or proposed modified payments, the value of the underlying collateral (if applicable), the possibility of obtaining additional security or guarantees, and the potential costs related to a repossession or foreclosure and the subsequent sale of the collateral.

TDRs are classified as either accrual or nonaccrual loans. A loan on nonaccrual and restructured as a TDR will remain on nonaccrual status until the borrower has proven the ability to perform under the modified structure for a minimum of six months, and there is evidence that such payments can and are likely to continue as agreed. Performance prior to the restructuring, or significant events that coincide with the restructuring, are included in assessing whether the borrower can meet the new terms and may result in the loan being returned to accrual at the time of restructuring or after a shorter performance period. If the borrower's ability to meet the revised payment schedule is uncertain, the loan remains classified as a nonaccrual loan. A TDR loan that specifies an interest rate that at the time of the restructuring is greater than or equal to the rate the Bank is willing to accept for a new loan with comparable risk may not be reported as a TDR or an impaired loan in the calendar years subsequent to the restructuring if it is in compliance with its modified terms.

² Includes TDRs that resulted from a combination of any of the previous modification types.

Unfunded lending commitments on TDRs amounted to approximately \$11 million at December 31, 2018 and \$22 million at December 31, 2017.

The total recorded investment of all TDRs in which interest rates were modified below market was \$88 million at December 31, 2018 and \$120 million at December 31, 2017, respectively. These loans are included in the previous schedule in the columns for interest rate below market and multiple modification types.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The net financial impact on interest income due to interest rate modifications below market for accruing TDRs is summarized in the following schedule:

(In millions)	2018	2017
Consumer:		
1-4 family residential	\$(1)	\$(1)
Total consumer loans	(1)	(1)
Total decrease to interest income ¹	\$(1)	\$(1)

¹ Calculated based on the difference between the modified rate and the premodified rate applied to the recorded investment.

On an ongoing basis, we monitor the performance of all TDRs according to their restructured terms. Subsequent payment default is defined in terms of delinquency, when principal or interest payments are past due 90 days or more for commercial loans, or 60 days or more for consumer loans.

The recorded investment of accruing and nonaccruing TDRs that had a payment default during the period listed below (and are still in default at year-end) and are within 12 months or less of being modified as TDRs is as follows:

(In millions)	December 31, 2018		December 31, 2017	
	Accruing	Total	Accruing	Total
Commercial:				
Commercial and industrial	\$—	\$ 5	\$ 1	\$ 3
Owner-occupied	—	1	—	1
Total commercial	—	6	1	4
Commercial real estate:				
Term	—	2	—	—
Total commercial real estate	—	2	—	—
Total	\$—	\$ 8	\$ 1	\$ 4

Note: Total loans modified as TDRs during the 12 months previous to December 31, 2018 and 2017 were \$105 million and \$94 million, respectively.

At December 31, 2018 the amount of foreclosed residential real estate property held by the Bank was \$2 million and less than \$1 million at December 31, 2017, and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure was approximately \$10 million for both periods, respectively.

Concentrations of Credit Risk

Credit risk is the possibility of loss from the failure of a borrower, guarantor, or another obligor to fully perform under the terms of a credit-related contract. Credit risks (whether on- or off-balance sheet) may occur when individual borrowers, groups of borrowers, or counterparties have similar economic characteristics, including industries, geographies, collateral types, sponsors, etc., and are similarly affected by changes in economic or other conditions. Credit risk also includes the loss that would be recognized subsequent to the reporting date if counterparties failed to perform as contracted. See Note 7 for a discussion of counterparty risk associated with the Bank's derivative transactions.

We perform an ongoing analysis of our loan portfolio to evaluate whether there is any significant exposure to any concentrations of credit risk. Based on this analysis, we believe that the loan portfolio is generally well diversified; however, there are certain significant concentrations in CRE and oil and gas-related lending. Further, we cannot guarantee that we have fully understood or mitigated all risk concentrations or correlated risks. We have adopted and adhere to concentration limits on various types of CRE lending, particularly construction and land development lending, leveraged and enterprise value lending, municipal lending, and oil and gas-related lending. All of these limits are continually monitored and revised as necessary.

7. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Objectives

The Bank maintains an overall interest rate risk management strategy that actively incorporates the use of interest rate derivatives including unleveraged interest rate swaps, purchased options, combinations of options, and may include futures and other forward interest rate contracts. The Bank's objective for using derivatives is to manage risks, primarily interest rate risk. The Bank uses derivatives to manage volatility in interest income, interest expense, earnings, and capital by adjusting our interest rate sensitivity to minimize the impact of fluctuations in interest rates. Derivatives are used to stabilize forecasted interest receipts from variable-rate assets and to modify the coupon or the duration of fixed-rate financial assets or liabilities as we consider advisable.

We also provide certain borrowers access to over-the-counter interest rate derivatives by selling interest rate derivatives to our customers, which we generally offset with interest rate derivatives executed with other dealers or central clearing houses. The Bank also provides commercial clients short-term foreign currency spot trades or forward contracts with a maturity of generally 90 days or less that are also largely offset by foreign currency trades with closely mirroring terms executed with other dealer counterparties or central clearing houses.

We apply hedge accounting to certain derivatives executed for risk management purposes as subsequently described in more detail. However, we do not apply hedge accounting to all the derivatives involved in our risk management activities. Derivatives not designated as accounting hedges are not speculative and are used to economically manage our exposure to interest rate movements and other identified risks, including offsetting customer-facing derivatives. These derivatives either do not require the use of hedge accounting for their economic impact to be accurately reflected in our financial statements or they do not meet the strict hedge accounting requirements.

Accounting

We record all derivatives on the Consolidated Balance Sheet at fair value in Other Assets or Other Liabilities regardless of the accounting designation of each derivative. The Bank enters into International Swaps and Derivatives Association, Inc. (ISDA) master netting agreements, or similar agreements, with substantially all derivative counterparties. See Note 4, "Offsetting Assets and Liabilities" for more information. Where legally enforceable, these master netting agreements give the Bank, in the event of default or the triggering of other specified contingent events by the counterparty, the right to liquidate securities held as collateral and to offset receivables and payables with the same counterparty. For purposes of the Consolidated Balance Sheet, the Bank does not offset derivative assets and liabilities and cash collateral held with the same counterparty where it has a legally enforceable master netting agreement and reports all derivatives on a gross fair value basis. Note 3 discusses the process to estimate fair value for derivatives. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and the resulting accounting designation. Derivatives used to hedge the exposure to changes in the fair value of assets, liabilities, or firm commitments attributable to interest rates or other eligible risks, are considered fair value hedges. Derivatives used to hedge the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges.

Fair Value Hedges - For derivatives designated as fair value hedges, changes in the fair value of the derivative are recognized in earnings together with the change in the fair value of the hedged item due to the risk being hedged. The Bank reports the earnings effect of the hedging instrument in the same Consolidated Income Statement line item in which the earnings effect of the hedged item is reported, generally Interest Income or Expense for hedges of interest rate risk of an interest-bearing financial asset or liability. The amounts from the derivative and hedged item for active fair value hedges and the location where they are recorded are detailed in the schedules below.

We currently have one active fair value hedging strategy that is a hedge of the change in fair value of LIBOR benchmark swap rate component of the contractual coupon cash flows of the Bank's long-term debt. The objective of the hedge is to manage to the interest rate risk associated with changes in the LIBOR benchmark interest rate for \$500 million of fixed-rate bonds issued in August of 2018 and subsequently hedged in September 2018. The swap and bonds mature concurrently in August of 2021. All debt basis adjustments from previously designed fair value

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

hedges were fully amortized prior to 2018. The Bank's existing fair value interest rate hedge is expected to be perfectly effective because the critical terms of the hedging instrument and hedged item match.

Cash flow hedges - For derivatives designated and qualifying as cash flow hedges ineffectiveness is not measured or separately disclosed. The entire change in the fair value of the hedging instrument is deferred in OCI until the hedged transaction affects earnings, at which point amounts deferred in OCI are reclassified to earnings and reported in the same income statement line item used to present the earnings effect of the hedged item or forecasted transactions. We use interest rate swaps, options and combination of options in our cash flow hedging strategy to eliminate or reduce the variable cash flows associated primarily with floating-rate commercial loans due to changes in any separately identifiable and reliably measurable contractual interest rate index. The Bank had 23 interest rate swaps designated as cash flow hedges in existence during 2018. Of these 23, six of the swaps matured during the 2018 fiscal year. The Bank has 17 interest rate swaps designated as cash flow hedges as of December 31, 2018. These swaps have an aggregate notional amount of approximately \$688 million and a weighted average maturity of approximately 1.3 years and a weighted average received-fixed strike rate of approximately 1.59%. We use these receive-fixed and pay-floating rate interest rate swap agreements as cash flow hedges of the variable-rate interest receipts of certain pools of loan assets.

We expect to replace the maturing cash flow hedges and potentially increase cash flow hedging to reduce asset-sensitivity and exposure to falling interest rates throughout 2019. Replacement hedges will likely be a combination of received-fixed and pay-floating interest rate swaps and purchased floors, or combinations of purchased floors and other sold options to help offset the cost of the purchased floors' premium.

During 2016 we closed our branch in Grand Cayman, Grand Cayman Islands B.W.I. and no longer have foreign operations. No derivatives were designated as hedges of investments in foreign operations during 2018.

We assess the effectiveness of each hedging relationship by comparing the changes in fair value or cash flows on the derivative hedging instrument with the changes in fair value or cash flows on the designated hedged item or transaction for the risk being hedged. For derivatives not designated as accounting hedges, changes in fair value are recognized in earnings. The remaining basis adjustments recorded to hedged items in fair value hedging relationships as well as any amounts remaining in AOCI for hedging relationships terminated prior to the maturity date documented in the hedge designation are accreted or amortized to interest income or expense over the originally designated period of the hedging relationship for cash flow hedges as the hedged transactions affect earnings or to the contractual maturity dates of the hedged items in fair value hedges.

Collateral and Credit Risk

Exposure to credit risk arises from the possibility of nonperformance by counterparties. No significant losses on derivative instruments have occurred as a result of counterparty nonperformance. Financial institutions which are well-capitalized and well-established are the counterparties for those derivatives entered into for asset-liability management and to offset derivatives sold to our customers. The Bank reduces its counterparty exposure for derivative contracts by centrally clearing all eligible derivatives.

For those derivatives that are not centrally cleared, the counterparties are typically financial institutions or customers of the Bank. For those that are financial institutions, as noted above, we manage our credit exposure through the use of a Credit Support Annex ("CSA") to an ISDA master agreement with each counterparty. Eligible collateral types are documented by the CSA and controlled under the Bank's general credit policies. Collateral balances are typically monitored on a daily basis. A valuation haircut policy reflects the fact that collateral may fall in value between the date the collateral is called and the date of liquidation or enforcement. In practice, all of the Bank's collateral held as credit risk mitigation under a CSA is cash.

We offer interest rate swaps to our customers to assist them in managing their exposure to changing interest rates. Upon issuance, all of these customer swaps are immediately offset through closely matching derivative contracts, such that the Bank minimizes its interest rate risk exposure resulting from such transactions. Most of these customers do not have the capability for centralized clearing. Therefore, we manage the credit risk through loan underwriting which includes a credit risk exposure formula for the swap, the same collateral and guarantee

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

protection applicable to the loan and credit approvals, limits, and monitoring procedures. Fee income from customer swaps is included in other service charges, commissions and fees. Nevertheless, the related credit risk is considered and measured when and where appropriate. See Notes 6 and 15 for further discussion of our underwriting, collateral requirements, and other procedures used to address credit risk.

Our non-customer facing derivative contracts generally require us to pledge collateral for derivatives that are in a net liability position at a given balance sheet date. Certain of these derivative contracts contain credit-risk-related contingent features that include the requirement to maintain a minimum debt credit rating. We may be required to pledge additional collateral if a credit-risk-related feature were triggered, such as a downgrade of our credit rating. However, in past situations, not all counterparties have demanded that additional collateral be pledged when provided for under their contracts. At December 31, 2018, the fair value of our derivative liabilities was \$39 million, for which we were required to pledge cash collateral of approximately \$45 million in the normal course of business. If our credit rating were downgraded one notch by either Standard & Poor's or Moody's at December 31, 2018, there would likely be no additional collateral required to be pledged. As a result of the Dodd-Frank Act, all newly eligible derivatives entered into are cleared through a central clearinghouse. Derivatives that are centrally cleared do not have credit-risk-related features that require additional collateral if our credit rating were downgraded.

Derivative Amounts

Selected information with respect to notional amounts and recorded gross fair values at December 31, 2018 and 2017, and the related gain (loss) of derivative instruments for the years then ended is summarized as follows:

(In millions)	December 31, 2018			December 31, 2017		
	Notional amount	Fair value assets	Other liabilities	Notional amount	Fair value assets	Other liabilities
Derivatives designated as hedging instruments						
Cash flow hedges:						
Interest rate swaps	\$687	\$—	\$ —	\$1,138	\$—	\$ —
Fair value hedges:						
Interest rate swaps	500	—	—	—	—	—
Total derivatives designated as hedging instruments	1,187	—	—	1,138	—	—
Derivatives not designated as hedging instruments						
Interest rate swaps	253	1	1	223	1	—
Interest rate swaps for customers ¹	5,652	40	36	4,550	28	33
Foreign exchange	389	4	2	913	9	7
Total derivatives not designated as hedging instruments	6,294	45	39	5,686	38	40
Total derivatives	\$7,481	\$45	\$ 39	\$6,824	\$38	\$ 40

¹ Notional amounts include both the customer swaps and the offsetting derivative contracts. The fair values reflect gross termination values of our derivatives prior to netting of variation margin (collateral) postings and other offsetting derivatives with the Bank's Central Counterparty Clearing entities.

	carrying amount of the hedged assets/(liabilities)			
(In millions)	2018	2017	2018	2017
Long-term debt	\$ (505)	\$ —	\$ (5)	\$ —

The fair value of derivative assets was reduced by a net credit valuation adjustment of \$3 million and \$2 million at December 31, 2018 and 2017, respectively. The fair value of derivative liabilities was reduced by a net debit valuation adjustment of \$1 million at both December 31, 2018 and 2017. These adjustments are required to reflect both our own nonperformance risk and the respective counterparty's nonperformance risk.

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

8. PREMISES, EQUIPMENT AND SOFTWARE, NET

Premises, equipment and software, net are summarized as follows:

(In millions)	December 31,	
	2018	2017
Land	\$238	\$234
Buildings	736	720
Furniture and equipment	427	451
Leasehold improvements	145	135
Software	449	401
Total ¹	1,995	1,941
Less accumulated depreciation and amortization	871	847
Net book value	\$1,124	\$1,094

¹ Amounts include \$147 million at December 31, 2018, and \$99 million at December 31, 2017, of costs that have been capitalized but are not yet depreciating because the respective assets have not been placed in service.

9. GOODWILL AND OTHER INTANGIBLE ASSETS

Core deposit and other intangible assets and related accumulated amortization are as follows at December 31:

(In millions)	Gross		Accumulated		Net	
	carrying		amortization		carrying	
	amount		amount		amount	
	2018	2017	2018	2017	2018	2017
Core deposit intangibles	\$167	\$167	\$(166)	\$(165)	\$1	\$2
Customer relationships and other intangibles	28	28	(28)	(28)	—	—
Total	\$195	\$195	\$(194)	\$(193)	\$1	\$2

The amount of amortization expense of core deposit and other intangible assets is separately reflected in the statement of income. Estimated amortization expense for core deposit and other intangible assets is \$1 million in 2019, and nothing thereafter.

Changes in the carrying amount of goodwill for operating segments with goodwill are as follows:

(In millions)	Zions Bank	CB&T	Amegy	Consolidated Bank
Balance at December 31, 2016	\$ 20	\$ 379	\$ 615	\$ 1,014
Impairment losses	—	—	—	—
Balance at December 31, 2017	20	379	615	1,014
Impairment losses	—	—	—	—
Balance at December 31, 2018	\$ 20	\$ 379	\$ 615	\$ 1,014

A bank-wide annual impairment test is conducted as of October 1st of each year and updated on a more frequent basis when events or circumstances indicate that impairment could have taken place. Results of the testing for 2018 and 2017 concluded that no impairment was present in any of the operating segments.

10. DEPOSITS

At December 31, 2018, the scheduled maturities of all time deposits were as follows:

(In millions)

2019	\$3,791
2020	333
2021	99
2022	51
2023	62
Thereafter	—
Total	\$4,336

The contractual maturities of time deposits with a denomination of \$100,000 and over were as follows:

(In millions) December 31,
2018

Three months or less	\$ 1,114
After three months through six months	993
After six months through twelve months	1,060
After twelve months	307
Total	\$ 3,474

Time deposits in denominations that meet or exceed the current Federal Deposit Insurance Corporation (“FDIC”) insurance limit of \$250,000 were \$2.8 billion and \$1.9 billion at December 31, 2018 and 2017, respectively. Time deposits under \$250,000 were \$1.5 billion and \$1.2 billion at December 31, 2018 and 2017, respectively. Deposit overdrafts reclassified as loan balances were \$12 million and \$14 million at December 31, 2018 and 2017, respectively.

11. SHORT-TERM BORROWINGS

Selected information for FHLB advances and other short-term borrowings is as follows:

(Dollar amounts in millions)	2018	2017	2016
Federal Home Loan Bank advances			
Average amount outstanding	\$2,971	\$2,657	\$37
Average rate	2.01 %	1.13 %	0.59 %
Highest month-end balance	\$5,400	\$3,750	\$750
Year-end balance	4,500	3,600	500
Average rate on outstandings at year-end	2.61 %	1.44 %	0.75 %
Other short-term borrowings, year-end balances			
Federal funds purchased	\$541	\$927	\$106
Security repurchase agreements	527	354	196
Securities sold, not yet purchased	85	95	25
Total Federal Home Loan Bank advances and other short-term borrowings	\$5,653	\$4,976	\$827

The Bank may borrow from the FHLB under their lines of credit that are secured under blanket pledge arrangements. The Bank maintained unencumbered collateral with carrying amounts adjusted for the types of collateral pledged, equal to at least 100% of the outstanding advances. At December 31, 2018, the amount available for FHLB advances was approximately \$8.6 billion. The Bank may also borrow from the Federal Reserve based on the amount of collateral pledged to a Federal Reserve Bank. At December 31, 2018, the amount available for additional Federal Reserve borrowings was approximately \$5.2 billion.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Federal funds purchased and security repurchase agreements generally mature in less than 30 days. Our participation in security repurchase agreements is on an overnight or term basis (e.g., 30 or 60 days). The Bank executes overnight repurchase agreements with sweep accounts in conjunction with a master repurchase agreement. When this occurs, securities under the Bank's control are pledged and interest is paid on the collected balance of the customers' accounts. For the non-sweep overnight and term repurchase agreements, securities are transferred to the applicable counterparty. The counterparty, in certain instances, is contractually entitled to sell or repledge securities accepted as collateral. Of the total security repurchase agreements at December 31, 2018, \$298 million were overnight and \$229 million were term.

12. LONG-TERM DEBT

Long-term debt is summarized as follows:

	December 31,	
(In millions)	2018	2017
Subordinated notes	\$87	\$247
Senior notes	637	135
Capital lease obligations	—	1
Total	\$724	\$383

The preceding carrying values represent the par value of the debt adjusted for any unamortized premium or discount, unamortized debt issuance costs, as well as valuation adjustments for fair value swaps. During 2018, the Bank issued \$500 million par value of senior notes with an interest rate of 3.5% and a maturity date of August 27, 2021. Also during 2018, the Bank called and redeemed \$162 million of 5.65% subordinated notes maturing November 15, 2023. During 2017, \$153 million of our senior notes matured.

Subordinated Notes

Subordinated notes were issued by the Bank and consist of the following at December 31, 2018:

(Dollar amounts in millions)	Subordinated notes		
Coupon rate	Balance	Par amount	Maturity
6.95%	\$ 87	\$ 88	Sep 2028

This subordinated note is unsecured and interest is payable quarterly. Interest payments commenced December 15, 2013 to the earliest possible redemption date of September 15, 2023, after which the interest rate changes to an annual floating rate equal to 3mL+3.89%.

Senior Notes

Senior notes were issued by the Bank and consist of the following at December 31, 2018:

(Dollar amounts in millions)	Senior notes		
Coupon rate	Balance	Par amount	Maturity
4.50%	\$135	\$ 136	June 2023
3.50%	502	500	August 2021
Total	\$637	\$ 636	

These notes are unsecured and interest is payable semiannually. The notes were issued under a shelf registration filed with the Securities and Exchange Commission ("SEC") and were sold via the Bank's online auction process and direct sales. The notes are not redeemable prior to maturity.

Maturities of Long-term Debt

Maturities of long-term debt are as follows for the years succeeding December 31, 2018:

(In millions)

2019	\$—
2020	—
2021	502
2022	—
2023	135
Thereafter	87
Total	\$724

These maturities do not include the associated hedges.

13. SHAREHOLDERS' EQUITY

Preferred Stock

We have 4,400,000 authorized shares of preferred stock without par value and with a liquidation preference of \$1,000 per share, or \$25 per depositary share. Except for Series I and J, all preferred shares were issued in the form of depositary shares, with each depositary share representing a 1/40th ownership interest in a share of the preferred stock. All preferred shares are registered with the SEC. In addition, Series A, G, and H preferred stock are listed and traded on the New York Stock Exchange

In general, preferred shareholders may receive asset distributions before common shareholders; however, preferred shareholders have only limited voting rights generally with respect to certain provisions of the preferred stock, the issuance of senior preferred stock, and the election of directors. Preferred stock dividends reduce earnings applicable to common shareholders and are paid on the 15th day of the months indicated in the following schedule. Dividends are approved by the Board of Directors.

Redemption of the preferred stock is at the Bank's option after the expiration of any applicable redemption restrictions and the redemption amount is computed at the per share liquidation preference plus any declared but unpaid dividends. Redemptions are subject to certain regulatory provisions and maintaining well-capitalized minimum requirements.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Preferred stock is summarized as follows:

(Dollar amounts in millions)	Carrying value at December 31,		Authorized (thousands)	Outstanding (thousands)	Rate	Dividends payable	Earliest redemption date	Rate following earliest redemption date (when applicable)	Dividends payable after rate change
	2018	2017							
Series A	\$67	\$67	140,000	66,139	> of 4.0% or 3mL+0.52%	Qtrly Mar,Jun,Sep,Dec	Dec 15, 2011

Series J	136	136	195,152	136,368	7.2%	Semi-annually Mar,Sep	Sep 15, 2023	annual float-ing rate = 3mL+4.44%	Qtrly Mar,Jun,Sep,Dec
Total	\$566	\$566							

Preferred Stock Redemptions

During 2017, we redeemed all outstanding shares of our 7.9% Series F preferred stock for a cash payment of approximately \$144 million. The total reduction to net earnings applicable to common shareholders associated with the preferred stock redemption was \$2 million due to the accelerated recognition of preferred stock issuance costs.

Common Stock

The Bank's common stock is traded on the National Association of Securities Dealers Automated Quotations ("NASDAQ") Global Select Market. As of December 31, 2018, there were 187.6 million shares of \$0.001 par common stock outstanding.

The Bank continued its common stock repurchase program during 2018 and repurchased 12.9 million shares of common shares outstanding with a fair value of \$670 million at an average price of \$51.77 per share. In February 2019, the Bank announced that the Board approved a plan to repurchase \$275 million of common stock during the first quarter of 2019 and begun the repurchases.

During 2017 the Bank repurchased 7.0 million shares of common shares outstanding with a fair value of \$320 million at an average price of \$45.66 per share.

Common Stock Warrants

During 2018, 1.8 million shares of common stock were issued from the cashless exercise of 5.8 million common stock warrants (NASDAQ: ZIONZ) which expired on November 14, 2018. As of December 31, 2018, 29.3 million common stock warrants (NASDAQ: ZIONW) with an exercise price of \$34.82 were outstanding, and each common stock warrant was convertible into 1.05 common shares. These warrants expire on May 22, 2020.

Amounts reclassified from AOCI, net of tax	—	3	2	5
Other comprehensive income (loss)	(114)	2	1	(111)
Balance at December 31, 2018	\$ (228)	\$ (1)	\$ (21)	\$(250)
Income tax expense (benefit) included in other comprehensive income (loss)	\$ (37)	\$ 1	\$ —	\$(36)
2017				
Balance at December 31, 2016	\$ (92)	\$ 1	\$ (31)	\$(122)
Other comprehensive income (loss) before reclassifications, net of tax	(2)	(1)	9	6
Amounts reclassified from AOCI, net of tax	—	(2)	4	2
Effect of new tax rates from Tax Cuts and Jobs Act of 2017	(20)	(1)	(4)	(25)
Other comprehensive income (loss)	(22)	(4)	9	(17)
Balance at December 31, 2017	\$ (114)	\$ (3)	\$ (22)	\$(139)
Income tax expense (benefit) included in other comprehensive income (loss)	\$ 19	\$ (1)	\$ 11	\$29

(In millions)	Amounts reclassified from AOCI ¹			Statement of Income (SI) Balance Sheet (BS)	Affected line item
Details about AOCI components	2018	2017	2016		
Net unrealized gains (losses) on derivative instruments	\$(4)	\$4	\$11	SI	Interest and fees on loans
Income tax expense (benefit)	(1)	2	4		
	\$(3)	\$2	\$7		
Amortization of net actuarial loss	\$(3)	\$(7)	\$(8)	SI	Salaries and employee benefits
Income tax benefit	(1)	(3)	(3)		
	\$(2)	\$(4)	\$(5)		

¹ Negative reclassification amounts indicate decreases to earnings in the statement of income and increases to balance sheet assets. The opposite applies to positive reclassification amounts.

Deferred Compensation

Deferred compensation consists of invested assets, including the Bank's common stock, which are held in rabbi trusts for certain employees and directors. At December 31, 2018 and 2017, the cost of the common stock included in

retained earnings was approximately \$13 million and \$14 million, respectively. We consolidate the fair value trust invested assets along with the total obligations and include them in other assets and other liabilities in the balance sheet. At December 31, 2018 and 2017, total invested assets were approximately \$93 million and \$102 million and total obligations were approximately \$107 million and \$116 million, respectively.

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

14. REGULATORY MATTERS

We are subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory – and possibly additional discretionary – actions by regulators that, if undertaken, could have a direct material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Required capital levels are also subject to judgmental review by regulators.

In 2013, the FRB, FDIC, and the Office of the Comptroller of the Currency (“OCC”) published final rules (the “Basel III Capital Rules”) establishing a new comprehensive capital framework for U.S. banking organizations that implemented the Basel Committee’s December 2010 framework, commonly referred to as Basel III, for strengthening international capital standards as well as certain provisions of the Dodd-Frank Act. The Basel III capital rules became effective for the Bank on January 1, 2015 and were subject to phase-in periods for certain of their components. In November 2017, the FRB, FDIC and OCC published a final rule for non-advanced approaches banks that extends the regulatory capital treatment applicable during 2017 under the regulatory capital rules for certain items. We met all capital adequacy requirements under the Basel III Capital Rules as of December 31, 2018.

Under prior Basel I capital standards, the effects of AOCI items included in capital were excluded for purposes of determining regulatory capital and capital ratios. As a “non-advanced approaches banking organization,” we made a one-time permanent election as of January 1, 2015 to continue to exclude these items, as allowed under the Basel III Capital Rules.

Quantitative measures established by regulation to ensure capital adequacy require us to maintain minimum amounts and ratios of Total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier 1 capital (as defined) to average assets (as defined). “Well-capitalized” levels are also published as a guideline to evaluate capital positions. As of December 31, 2018, all capital ratios of the Bank exceeded the “well-capitalized” levels under the regulatory framework for prompt corrective action.

Dividends declared by the Bank in any calendar year may not, without the approval of the appropriate federal regulators, exceed specified criteria. When determining dividends, the Bank considers current and historical earning levels, retained earnings, and risk-based and other regulatory capital requirements and limitations.

Bank-run stress tests seek to comprehensively measure all risks to which the institution is exposed, including credit, liquidity, market, operating and other risks, the losses that could result from those risk exposures under adverse scenarios, and the institution’s resulting capital levels. These stress tests have both a qualitative and a quantitative component. The qualitative component evaluates the robustness of the Bank’s risk identification, stress risk modeling, policies, capital planning, governance processes, and other components of a Capital Adequacy Process. The quantitative process subjects the Bank’s balance sheet and other risk characteristics to stress testing by using its own models.

The actual capital amounts and ratios at December 31, 2018 and 2017 for the Bank under Basel III are as follows:

(Dollar amounts in millions)	December 31, 2018		To be well-capitalized	
	Amount	Ratio	Amount	Ratio
Basel III Regulatory Capital Amounts and Ratios ¹				
Total capital (to risk-weighted assets)	\$7,450	13.9%	\$5,359	10.0%
Tier 1 capital (to risk-weighted assets)	6,811	12.7	4,287	8.0
Common equity tier 1 capital (to risk-weighted assets)	6,245	11.7	3,483	6.5
Tier 1 capital (to average assets)	6,811	10.3	3,317	5.0

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

(Dollar amounts in millions)	December 31, 2017		To be well-capitalized	
	Amount	Ratio	Amount	Ratio

Total capital (to risk-weighted assets)				
Zions Bancorporation	\$7,628	14.8%	\$5,146	10.0%
ZB, National Association	7,306	14.2	5,130	10.0
Tier 1 capital (to risk-weighted assets)				
Zions Bancorporation	6,805	13.2	4,116	8.0
ZB, National Association	6,730	13.1	4,104	8.0
Common equity tier 1 capital (to risk-weighted assets)				
Zions Bancorporation	6,239	12.1	3,345	6.5
ZB, National Association	5,899	11.5	3,334	6.5
Tier 1 capital (to average assets)				
Zions Bancorporation	6,805	10.5	na	na ²
ZB, National Association	6,730	10.4	3,227	5.0

¹ Basel III regulatory capital amounts and ratios for 2018 are for Zions Bancorporation, National Association.

² There is no Tier 1 leverage ratio component in the definition of a well-capitalized bank holding company.

The Bank is also subject to “capital conservation buffer” regulatory requirements. When fully phased-in, the Basel III capital rules will also require the Bank to maintain a 2.5% “capital conservation buffer” designed to absorb losses during periods of economic stress, composed entirely of Common Equity Tier 1 (“CET1”), on top of the minimum risk-weighted asset ratios, effectively resulting in minimum ratios of (i) CET1 to risk-weighted assets of at least 7.0%, (ii) Tier 1 capital to risk-weighted assets of at least 8.5%, and (iii) Total capital to risk-weighted assets of at least 10.5%. Banking institutions with a ratio of CET1 to risk-weighted assets above the minimum but below the capital conservation buffer will face constraints on dividends, equity repurchases, and compensation based on the amount of the shortfall. The implementation of the capital conservation buffer began on January 1, 2016 at the 0.625% level and progressively increases over time, as determined by regulation. The Bank’s triggers and limits under actual conditions and baseline projections are more restrictive than the capital conservation buffer requirements.

15. COMMITMENTS, GUARANTEES, CONTINGENT LIABILITIES, AND RELATED PARTIES**Commitments and Guarantees**

We use certain financial instruments, including derivative instruments, in the normal course of business to meet the financing needs of our customers, to reduce our own exposure to fluctuations in interest rates, and to make a market in U.S. Government, agency, corporate, and municipal securities. These financial instruments involve, to varying degrees, elements of credit, liquidity, and interest rate risk in excess of the amounts recognized in the balance sheet. Derivative instruments are discussed in Notes 7 and 3.

Contractual amounts of the off-balance sheet financial instruments used to meet the financing needs of our customers are as follows:

(In millions)	December 31,	
	2018	2017
Net unfunded commitments to extend credit ¹	\$21,454	\$19,583
Standby letters of credit:		
Financial	655	721
Performance	199	196
Commercial letters of credit	18	31
Total unfunded lending commitments	\$22,326	\$20,531

¹ Net of participations.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. The amount of collateral obtained, if deemed necessary by us upon extension of credit, is based on our initial credit evaluation of the counterparty. Types of collateral vary, but may include accounts receivable, inventory, property, plant and equipment, and income-producing properties.

While establishing commitments to extend credit creates credit risk, a significant portion of such commitments is expected to expire without being drawn upon. As of December 31, 2018, \$6.4 billion of commitments expire in 2019. We use the same credit policies and procedures in making commitments to extend credit and conditional obligations as we do for on-balance sheet instruments. These policies and procedures include credit approvals, limits, and monitoring.

We issue standby and commercial letters of credit as conditional commitments generally to guarantee the performance of a customer to a third party. The guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing, and similar transactions. Standby letters of credit include remaining commitments of \$577 million expiring in 2019 and \$277 million expiring thereafter through 2027. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. We generally hold marketable securities and cash equivalents as collateral when necessary. At December 31, 2018, the Bank recorded \$5 million as a liability for these guarantees, which consisted of \$1 million attributable to the RULC and \$4 million of deferred commitment fees.

Certain mortgage loans sold have limited recourse provisions for periods ranging from three months to one year. The amount of losses resulting from the exercise of these provisions has not been significant.

At December 31, 2018, we had unfunded commitments for PEIs of \$30 million. These obligations have no stated maturity. PEIs related to these commitments prohibited by the Volcker Rule were \$2 million. See the related discussion about these investments in Note 5.

The contractual or notional amount of financial instruments indicates a level of activity associated with a particular financial instrument class and is not a reflection of the actual level of risk. As of December 31, 2018 and 2017, the regulatory risk-weighted values assigned to all off-balance sheet financial instruments and derivative instruments described herein were \$7.6 billion and \$6.8 billion, respectively.

At December 31, 2018, we were required to maintain cash balances of \$303 million with the Federal Reserve Bank to meet minimum balance requirements in accordance with FRB regulations.

Leases

We have commitments for leasing premises and equipment under the terms of noncancelable capital and operating leases expiring from 2019 and 2052. Premises leased under capital leases at December 31, 2018, were \$1 million, and were essentially amortized with accumulated amortization totaling approximately \$1 million. Amortization applicable to premises leased under capital leases is included in depreciation expense.

Future aggregate minimum rental payments under existing noncancelable operating leases at December 31, 2018, are as follows:

(in millions)

2019	\$47
2020	44
2021	38
2022	34
2023	30
Thereafter	86
Total	\$279

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Future aggregate minimum rental payments have been reduced by noncancelable subleases of \$1 million each year from 2019 through 2022. Aggregate rental expense on operating leases amounted to \$59 million in 2018, \$61 million in 2017, and \$65 million in 2016.

Legal Matters

We are subject to litigation in court and arbitral proceedings, as well as proceedings, investigations, examinations and other actions brought or considered by governmental and self-regulatory agencies. Litigation may relate to lending, deposit and other customer relationships, vendor and contractual issues, employee matters, intellectual property matters, personal injuries and torts, regulatory and legal compliance, and other matters. While most matters relate to individual claims, we are also subject to putative class action claims and similar broader claims. Proceedings, investigations, examinations and other actions brought or considered by governmental and self-regulatory agencies may relate to our banking, investment advisory, trust, securities, and other products and services; our customers' involvement in money laundering, fraud, securities violations and other illicit activities or our policies and practices relating to such customer activities; and our compliance with the broad range of banking, securities and other laws and regulations applicable to us. At any given time, we may be in the process of responding to subpoenas, requests for documents, data and testimony relating to such matters and engaging in discussions to resolve the matters.

As of December 31, 2018, we were subject to the following material litigation or governmental inquiries:

a civil suit, *Shou-En Wang v. CB&T*, brought against us in the Superior Court for Los Angeles County, Central District in April 2016. The case relates to our depositor relationships with customers who were promoters of an investment program that allegedly misappropriated investors' funds. This case is in an early phase, with initial motion practice and discovery having been completed, with additional motion practice and expert witness phases being underway.

- a civil suit, *McFarland as Trustee for International Manufacturing Group v. CB&T, et. al.*, brought against us in the United States Bankruptcy Court for the Eastern District of California in May 2016. The Trustee seeks to recover loan payments previously repaid to us by our customer, International Manufacturing Group ("IMG"), alleging that IMG, along with its principal, obtained loans and made loan repayments in furtherance of an alleged Ponzi scheme. Initial motion practice has been completed and discovery is underway.

a civil suit, *JTS Communities, Inc. et. al v. CB&T, Jun Enkoji and Dawn Satow*, brought against us in the Superior Court for Sacramento County, California in June 2017. In this case four investors in IMG seek to hold us liable for losses arising from their investments in that company, alleging that we conspired with and knowingly assisted IMG and its principal in furtherance of an alleged Ponzi Scheme. Initial motion practice has been completed and discovery is underway.

a civil class action lawsuit, *Evans v. CB&T*, brought against us in the United States District Court for the Eastern District of California in May 2017. This case was filed on behalf of a class of up to 50 investors in IMG and seeks to hold us liable for losses of class members arising from their investments in IMG, alleging that we conspired with and knowingly assisted IMG and its principal in furtherance of an alleged Ponzi Scheme. In December 2017, the District Court dismissed all claims against the Bank. In January 2018, the plaintiff filed an appeal with the Court of Appeals for the Ninth Circuit. The appellate briefing process has been completed with a ruling anticipated in 2019.

a Private Attorney General Act ("PAGA") claim under California law, *Lawson v. CB&T*, brought against us in the Superior Court for the County of San Diego, California, in February 2016. In this case, the plaintiff alleges, on behalf of herself and other current or former employees of the Bank who worked in California on a non-exempt basis, violations by the Bank of California wage and hour laws. The case remains in the early stages of motion practice, to date mainly involving questions of venue and scope of employees covered by the PAGA claims. In March 2018, the Supreme Court of California granted review of an appeal from the intermediate appellate court decision requiring all aspects of the case to be heard in state court, rather than in arbitration. The appellate briefing process has been completed with a ruling anticipated in 2019.

a civil case, *Lifescan Inc. and Johnson & Johnson Health Care Services v. Jeffrey Smith, et al.*, brought against us in the United States District Court for the District of New Jersey in December 2017. In this case, certain

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

manufacturers and distributors of medical products seek to hold us liable for allegedly fraudulent practices of a borrower of the Bank which filed for bankruptcy protection in 2017. The case is in early phase, with initial motion practice and discovery underway.

a civil class action lawsuit, Gregory, et. al. v. Zions Bancorporation, was brought against us in the United States District Court in Utah in January 2019. This case was filed on behalf of investors in Rust Rare Coin, Inc. alleging that we aided and abetted a Ponzi scheme fraud perpetrated by Rust Rare Coin, a Zions Bank customer. This case follows civil actions and the establishment of a receivership for Rust Rare Coin by the Commodities Futures Trading Commission and the Utah Division of Securities in November 2018, as well as a separate suit brought by the Securities and Exchange Commission against Rust Rare Coin and its principal Gaylen Rust.

At least quarterly, we review outstanding and new legal matters, utilizing then available information. In accordance with applicable accounting guidance, if we determine that a loss from a matter is probable and the amount of the loss can be reasonably estimated, we establish an accrual for the loss. In the absence of such a determination, no accrual is made. Once established, accruals are adjusted to reflect developments relating to the matters.

In our review, we also assess whether we can determine the range of reasonably possible losses for significant matters in which we are unable to determine that the likelihood of a loss is remote. Because of the difficulty of predicting the outcome of legal matters, discussed subsequently, we are able to meaningfully estimate such a range only for a limited number of matters. Based on information available as of December 31, 2018, we estimated that the aggregate range of reasonably possible losses for those matters to be from \$0 million to roughly \$50 million in excess of amounts accrued. The matters underlying the estimated range will change from time to time, and actual results may vary significantly from this estimate. Those matters for which a meaningful estimate is not possible are not included within this estimated range and, therefore, this estimated range does not represent our maximum loss exposure.

Based on our current knowledge, we believe that our current estimated liability for litigation and other legal actions and claims, reflected in our accruals and determined in accordance with applicable accounting guidance, is adequate and that liabilities in excess of the amounts currently accrued, if any, arising from litigation and other legal actions and claims for which an estimate as previously described is possible, will not have a material impact on our financial condition, results of operations, or cash flows. However, in light of the significant uncertainties involved in these matters, and the very large or indeterminate damages sought in some of these matters, an adverse outcome in one or more of these matters could be material to our financial condition, results of operations, or cash flows for any given reporting period.

Any estimate or determination relating to the future resolution of litigation, arbitration, governmental or self-regulatory examinations, investigations or actions or similar matters is inherently uncertain and involves significant judgment. This is particularly true in the early stages of a legal matter, when legal issues and facts have not been well articulated, reviewed, analyzed, and vetted through discovery, preparation for trial or hearings, substantive and productive mediation or settlement discussions, or other actions. It is also particularly true with respect to class action and similar claims involving multiple defendants, matters with complex procedural requirements or substantive issues or novel legal theories, and examinations, investigations and other actions conducted or brought by governmental and self-regulatory agencies, in which the normal adjudicative process is not applicable. Accordingly, we usually are unable to determine whether a favorable or unfavorable outcome is remote, reasonably likely, or probable, or to estimate the amount or range of a probable or reasonably likely loss, until relatively late in the course of a legal matter, sometimes not until a number of years have elapsed. Accordingly, our judgments and estimates relating to claims will change from time to time in light of developments and actual outcomes will differ from our estimates. These differences may be material.

Related Party Transactions

We have no material related party transactions requiring disclosure. In the ordinary course of business, the Bank and its subsidiary bank extend credit to related parties, including executive officers, directors, principal shareholders, and their associates and related interests. These related party loans are made in compliance with applicable banking regulations.

16. REVENUE RECOGNITION

Adoption of ASC Topic 606, “Revenue from Contracts with Customers”

On January 1, 2018, we adopted the accounting guidance in ASC Topic 606, “Revenue from Contracts with Customers” (“Topic 606”) using the modified retrospective method applied to those contracts with customers for which the performance obligations were not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with our historic accounting under Topic 605, “Revenue Recognition.” Upon adoption, the Bank has elected to use the following optional exemptions that are permitted under the Topic 606, which have been applied consistently to all contracts within all reporting periods presented:

The Bank recognizes the incremental cost of obtaining a contract as an expense, when incurred, if the amortization period of the asset that the Bank would have recognized is one year or less.

For performance obligations satisfied over time, if the Bank has a right to consideration from a customer in an amount that corresponds directly with the value to the customer of the Bank’s performance completed to date, the Bank will generally recognize revenue in the amount to which the Bank has a right to invoice.

The Bank does not generally disclose information about its remaining performance obligations for those performance obligations that have an original expected duration of one year or less, or where the Bank recognizes revenue in the amount to which the Bank has a right to invoice.

The cumulative effect of adopting Topic 606 did not have a material impact to retained earnings as of January 1, 2018. The adoption of Topic 606 resulted in changes to our accounting policies, business processes, and internal controls to support the recognition, measurement and disclosure requirements under Topic 606.

Revenue Recognition

We derive our revenue primarily from interest income on loans and securities, which was more than three-quarters of our revenue for 2018, and is out of scope of ASC 606. Only noninterest income is considered to be revenue from contracts with customers in scope of ASC 606. Revenue from contracts with customers is recognized when control of the promised goods or services is transferred to our customers, in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. The following is a description of revenue from contracts with customers:

Service charges and fees on deposit accounts

Service charges and fees on deposit accounts typically consist of fees charged for providing customers with deposit services. These fees are primarily comprised of account analysis fees, insufficient funds fees, and other various fees on deposit accounts. Service charges on deposit accounts include fees earned in lieu of compensating balances, and fees earned for performing cash management services and other deposit account services. Service charges on deposit accounts in this revenue category are recognized over the period in which the related service is provided. Treasury Management fees are billed monthly based on services rendered for the month.

Other Service charges, commissions, and fees

Other service charges, commissions, and fees primarily consist of credit and debit card interchange fees, automated teller machine (“ATM”) services, and various account services such as wires, safe deposit box, check issuance and cashing services. Revenue is recognized as the services are rendered or upon completion of services.

The Bank’s card fee income includes interchange income from credit and debit cards and net fees earned from processing card transactions for merchants. Card income is recognized as earned. Reward program costs are recorded when the rewards are earned by the customer and presented as a reduction to interchange income.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The major income categories within “Other Service charges, commissions and fees” that are in scope of ASC 606 are summarized as follows:

	Year Ended December 31, 2018
(In millions)	

Card Fee Income	\$ 138
-----------------	--------

ATM Fees	10
----------	----

Other service charges	14
-----------------------	----

Other Commissions and fees	21
----------------------------	----

Ending balance	\$ 183
----------------	--------

Wealth management and trust income

Wealth management and trust income is comprised of a variety of products, including but not limited to: corporate and personal trust income, wealth management commissions, portfolio services, and advisory services. Revenue is recognized as the services are rendered or upon completion of services. Financial planning and estate services typically have performance obligations that are greater than 12 months, although the amount of future performance obligations are not significant.

Capital markets and foreign exchange

Capital markets and foreign exchange fees primarily consist of mutual fund distribution fees, municipal advisory services, and foreign exchange services provided to customers. Revenue is recognized as the services are rendered or upon completion of services.

Other noninterest income from contracts with customers

Other noninterest income from customers primarily consists of trust operations outsourcing and other various income streams. Revenue is recognized as the services are rendered or upon completion of services.

Disaggregation of Revenue

We provide services across different geographical areas, primarily in 11 Western U.S. States, under banking operations that have their own individual brand names, including Zions Bank, Amegy Bank, California Bank & Trust, National Bank of Arizona, Nevada State Bank, Vectra Bank Colorado, and The Commerce Bank of Washington. The operating segment listed as “Other” includes certain nonbank financial services subsidiaries, centralized back-office functions, and eliminations of transactions between the segments.

Revenue from contracts with customers did not generate significant contract assets and liabilities. Contract receivables are included in Other Assets. Payment terms vary by services offered, and the timing between completion of

performance obligations and payment is typically not significant.

17. RETIREMENT PLANS

Defined Benefit Plans

Pension – This qualified noncontributory defined benefit plan is frozen to new participation. No service-related benefits have been accrued since July 1, 2013. All participants in the Plan are currently 100% vested in their benefits. Plan assets consist principally of corporate equity securities, mutual fund investments, real estate, and fixed income investments. Plan benefits are paid as a lump-sum cash value or an annuity at retirement age. Contributions to the plan are based on actuarial recommendation and pension regulations. There was no minimum regulatory contribution required in 2018 and 2017. Currently, it is expected that no minimum regulatory contributions will be required in 2019.

In October 2018, the Bank decided to terminate its pension plan subject to obtaining necessary regulatory approval. Completion of this termination is expected in early 2020. Plan participant benefits will not be disadvantaged because of this decision.

Supplemental Retirement – These unfunded nonqualified plans are for certain current and former employees. Each year, Bank contributions to these plans are made in amounts sufficient to meet benefit payments to plan participants.

Postretirement Medical/Life – This unfunded health care and life insurance plan provides postretirement medical benefits to certain full-time employees who meet minimum age and service requirements. The plan also provides specified life insurance benefits to certain employees. The plan is contributory with retiree contributions adjusted annually, and contains other cost-sharing features such as deductibles and coinsurance. Plan coverage is provided by self-funding or health maintenance organization options. Our contribution towards the retiree medical premium has been permanently frozen at an amount that does not increase in any future year. Retirees pay the difference between the full premium rates and our capped contribution.

Because our contribution rate is capped, there is no effect on the postretirement plan from assumed increases or decreases in health care cost trends. Each year, Bank contributions to the plan are made in amounts sufficient to meet the portion of the premiums that are the Bank's responsibility.

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

The following presents the change in benefit obligation, change in fair value of plan assets, and funded status, of the plans and amounts recognized in the balance sheet as of the measurement date of December 31:

(In millions)	Pension		Supplemental Retirement		Postretirement	
	2018	2017	2018	2017	2018	2017

Accumulated other comprehensive income (loss) consists of:						
Net loss	\$(27)	\$(28)	\$(2)	\$(2)	\$—	\$—

The pension asset and the liability for supplement retirement/postretirement benefits are included in other assets and other liabilities, respectively, in the balance sheet. The accumulated benefit obligation is the same as the benefit obligation shown in the preceding schedule. During the third quarter of 2017, the Bank revised its pension plan to offer certain participants a temporary opportunity to make an election to receive an immediate distribution from the pension plan. The window was available between August 1, 2017 and November 24, 2017. The impact of these distributions is included in “benefits paid” in the preceding schedule and in “settlement loss” shown in the net period benefit cost (credit) schedule.

The amounts in AOCI (loss) at December 31, 2018 expected to be recognized as an expense component of net periodic benefit cost in 2019 for the plans are estimated as follows:

(In millions) Pension Supplemental Retirement Postretirement

Net loss \$ (2) \$ — \$ —

The following presents the components of net periodic benefit cost (credit) for the plans:

(In millions)	Pension			Supplemental Retirement			Postretirement

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

Weighted average assumptions based on the pension plan are the same where applicable for each of the plans and are as follows:

	2018	2017	2016
Used to determine benefit obligation at year-end:			
Discount rate	4.20%	3.50%	4.10%
Used to determine net periodic benefit cost for the years ended December 31:			
Discount rate	3.50	4.10	4.20
Expected long-term return on plan assets	5.75	7.25	7.50

The discount rate reflects the yields available on long-term, high-quality fixed income debt instruments with cash flows similar to the obligations of the pension plan, and is reset annually on the measurement date. The expected long-term rate of return on plan assets is based on a review of the target asset allocation of the plan. This rate is intended to approximate the long-term rate of return that we anticipate receiving on the plan's investments, considering the mix of the assets that the plan holds as investments, the expected return on these underlying investments, the diversification of these investments, and the rebalancing strategies employed. An expected long-term rate of return is assumed for each asset class and an underlying inflation rate assumption is determined.

Benefit payments to the plans' participants are estimated in the following schedule for the years succeeding December 31, 2018. If the necessary regulatory approvals are obtained, and the pension plan is terminated, there would not be payments made by the Bank to plan participants after termination of the plan.

(In millions)	Pension	Supplemental Retirement	Postretirement
2019	\$ 10	\$ 2	\$ —
2020	10	1	—
2021	10	1	—
2022	9	1	—
2023	9	1	—
Years 2024 - 2028	42	3	—

We are also obligated under other supplemental retirement plans for certain current and former employees. Our liability for these plans was \$5 million and \$6 million at December 31, 2018 and 2017, respectively.

For the pension plan, the investment strategy is predicated on its investment objectives and the risk and return expectations of asset classes appropriate for the plan. Investment objectives have been established by considering the plan's liquidity needs and time horizon and the fiduciary standards under the Employee Retirement Income Security Act of 1974. The asset allocation strategy is developed to meet the plan's long-term needs in a manner designed to control volatility and to reflect risk tolerance. Target investment allocation percentages as of December 31, 2018 are 9% in equity, 88% in fixed income and cash, and 3% in real estate assets. During the second quarter of 2018 the asset allocation was changed from primarily equity focused to fixed income focused.

The following presents the fair values of pension plan investments according to the fair value hierarchy described in Note 3, and the weighted average allocations:

(In millions)	December 31, 2018				December 31, 2017

Mutual funds:								
Debt	—	—	—	—	7	—	—	7
Guaranteed deposit account	—	—	\$ 12	12	—	—	\$ 9	9

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

In addition to the investments listed in the previous schedule, as of December 31, 2018, pension plan investments valued using NAV as the practical expedient for fair value consist of \$15 million in equity investments, and \$116 million in debt investments, which are in pooled separate accounts, as well as \$4 million in limited partnerships. As of December 31, 2017, pension plan investments valued using NAV as the practical expedient for fair value consist of \$97 million in equity investments, \$31 million in debt investments, and \$8 million in real estate investments, which are in pooled separate accounts, as well as \$4 million in limited partnerships.

No transfers of assets occurred among Levels 1, 2 or 3 during 2018 or 2017.

The following describes the pension plan investments and the valuation methodologies used to measure their fair value:

Bank common stock – Shares of the Bank’s common stock are valued at the last reported sales price on the last business day of the plan year in the active market where individual securities are traded.

Mutual funds – These funds are valued at quoted market prices which represent the NAVs of shares held by the plan at year-end.

Insurance company pooled separate accounts – These funds are invested in by more than one investor. They are offered through separate accounts of the trustee’s insurance company and managed by internal and professional advisors. Participation units in these accounts are valued at the NAV as the practical expedient for fair value as determined by the insurance company.

Guaranteed deposit account – This account is a group annuity product issued by the trustee’s insurance company with guaranteed crediting rates established at the beginning of each calendar year. The account balance is stated at fair value as estimated by the trustee. The account is credited with deposits made, plus earnings at guaranteed crediting rates, less withdrawals and administrative expenses. The underlying investments generally include investment-grade public and privately traded debt securities, mortgage loans and, to a lesser extent, real estate and other equity investments. Market value adjustments are applied at the time of redemption if certain withdrawal limits are exceeded. Additional fair value quantitative information for the guaranteed deposit account is as follows:

Principal valuation techniques	Significant unobservable inputs	Range (weighted average) of significant input values
For the underlying investments – reported fair values when available for market traded investments; when not applicable, discounted cash flows under an income approach using U.S. Treasury rates and spreads based on cash flow timing and quality of assets.	Earnings at guaranteed crediting rate Composite market value factor	Gross guaranteed crediting rate must be greater than or equal to contractual minimum crediting rate At December 31, 2018 0.962521 - 1.005471 (actual = 0.994488) 0.992941 - 2017 1.037825 (actual = 1.023838)

The Bank’s Benefits Committee evaluates the methodology and factors used, including review of the contract, economic conditions, industry and market developments, and overall credit ratings of the underlying investments.

Limited partnerships – These partnerships invest in limited partnerships, limited liability companies, or similar investment vehicles that consist of PEIs in a wide variety of investment types, including venture and growth capital, real estate, energy and natural resources, and other private investments. The plan’s investments are valued by the limited partnerships at NAV as the practical expedient for fair value. The estimation process takes into account the

plan's proportional interests credited with realized and unrealized earnings from the underlying investments and charged for operating expenses and distributions. Investments are increased by capital calls and are part of an overall capital commitment by the plan of up to approximately \$9 million at December 31, 2018.

Balance at end of year	\$12	\$9

Shares of Bank common stock were 233,849 at both December 31, 2018 and 2017. Dividends received by the plan were not significant in 2018 and 2017.

Defined Contribution Plan

The Bank offers a 401(k) and employee stock ownership plan under which employees select from several investment alternatives. Employees can contribute up to 80% of their earnings subject to the annual maximum allowed contribution. The Bank matches 100% of the first 3% of employee contributions and 50% of the next 2% of employee contributions. Matching contributions to participants, which were shares of the Bank's common stock purchased in the open market, amounted to \$29 million in 2018, \$26 million in 2017 and 2016.

The 401(k) plan also has a noncontributory profit sharing feature which is discretionary and may range from 0% to 4% of eligible compensation based upon the Bank's return on average common equity for the year. The profit sharing expense was computed at a contribution rate of 2.50%, 1.75%, and 1% in 2018, 2017, and 2016 respectively. The profit sharing expense was \$17 million, \$11 million, and \$6 million in 2018, 2017, and 2016 respectively. The profit sharing contribution to participants consisted of shares of the Bank's common stock purchased in the open market.

18. SHARE-BASED COMPENSATION

We have a share-based compensation incentive plan which allows us to grant stock options, restricted stock, RSUs, and other awards to employees and non-employee directors. Total shares authorized under the plan were 9,000,000 at December 31, 2018, of which 4,407,113 were available for future grants.

All share-based payments to employees, including grants of employee stock options, are recognized in the statement of income based on their grant date values. The value of an equity award is estimated on the grant date using a fair value-based model without regard to service or performance vesting conditions, but does consider post-vesting restrictions.

We classify all share-based awards as equity instruments. Compensation expense is included in salaries and employee benefits in the statement of income, with the corresponding increase included in additional-paid-in-

Balance at December 31, 2017	2,560,571	27.06
Granted	194,001	55.13
Exercised	(729,346)	26.79
Expired	(2,000)	25.74
Forfeited	(18,628)	31.11
Balance at December 31, 2018	2,004,598	29.85
Outstanding stock options exercisable as of:		
December 31, 2018	1,448,244	\$ 26.68
December 31, 2017	1,648,367	26.55
December 31, 2016	1,892,136	27.60

We issue new authorized common shares for the exercise of stock options. The total intrinsic value of stock options exercised was approximately \$20 million in 2018, \$17 million in 2017, and \$10 million in 2016. Cash received from the exercise of stock options was \$18 million in 2018, \$23 million in 2017, and \$24 million in 2016.

Additional selected information on stock options at December 31, 2018 follows:

Exercise price range	Outstanding stock options			Exercisable stock options	
	Number of shares	Weighted average exercise price	Weighted average remaining contractual life (years)	Number of shares	Weighted average exercise price
\$ 0.32 to \$19.99	122,882	\$ 16.47	0.4	122,882	\$ 16.47
\$20.00 to \$24.99	486,810	21.10	3.9	262,382	21.18
\$25.00 to \$29.99	992,442	28.33	2.6	977,214	28.38
\$30.00 to \$39.99	32,191	30.10	2.4	32,191	30.10
\$40.00 to \$44.99	178,703	44.15	5.0	53,575	44.10
\$50.00 to \$55.68	191,570	55.13	6.0	—	—
	2,004,598	29.85	3.4	1,448,244	26.68

¹ The weighted average remaining contractual life excludes 21,252 stock options without a fixed expiration date that were assumed with the Amegy acquisition. They expire between the date of termination and one year from the date

of termination, depending upon certain circumstances.

The aggregate intrinsic value of outstanding stock options at December 31, 2018 and 2017 was \$25 million and \$61 million, respectively, while the aggregate intrinsic value of exercisable options was \$21 million and \$40 million at the same respective dates. For exercisable options, the weighted average remaining contractual life was 2.7 years and 2.9 years at December 31, 2018 and 2017, respectively, excluding the stock options previously noted without a fixed expiration date. At December 31, 2018, 556,354 stock options with a weighted average exercise price of

135

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

\$38.08, a weighted average remaining life of 4.9 years, and an aggregate intrinsic value of \$5 million, were expected to vest.

Restricted Stock and Restricted Stock Units

Restricted stock is common stock with certain restrictions that relate to trading and the possibility of forfeiture.

Generally, restricted stock vests over four years. Holders of restricted stock have full voting rights and receive dividend equivalents during the vesting period. In addition, holders of restricted stock can make an election to be subject to income tax on the grant date rather than the vesting date.

RSUs represent rights to one share of common stock for each unit and generally vest over four years. Holders of RSUs receive dividend equivalents during the vesting period, but do not have voting rights.

Compensation expense is determined based on the number of restricted shares or RSUs granted and the market price of our common stock at the issue date.

During 2018, 2017, and 2016, we granted 14,796, 20,711, and 32,310 RSUs, respectively, to non-employee directors. The RSUs vested immediately upon grant.

The following summarizes our restricted stock activity for the three years ended December 31, 2018:

	Number of shares	Weighted average issue price
Nonvested restricted shares at December 31, 2015	59,370	\$ 23.49
Issued	36,594	24.43
Vested	(32,709)	20.80
Nonvested restricted shares at December 31, 2016	63,255	25.43
Issued	314	44.55
Vested	(24,591)	24.90
Nonvested restricted shares at December 31, 2017	38,978	25.91

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets (“DTA”) and deferred tax liabilities are presented below:

(In millions)	December 31, 2018 2017	
Gross deferred tax assets:		
Book loan loss deduction in excess of tax	\$137	\$143
Pension and postretirement	7	8
Deferred compensation	70	48
Security investments and derivative fair value adjustments	78	40
Net operating losses, capital losses and tax credits	2	2
FDIC-supported transactions	—	2
Other	31	34
	325	277
Valuation allowance	—	(2)
Total deferred tax assets	325	275
Gross deferred tax liabilities:		
Premises and equipment, due to differences in depreciation	(61)	(51)
Federal Home Loan Bank stock dividends	(2)	(3)
Leasing operations	(54)	(52)
Prepaid expenses	(6)	(5)
Prepaid pension reserves	(12)	(11)
Mortgage servicing	(8)	(7)
Subordinated debt modification	—	(9)
Deferred loan fees	(27)	(23)
Equity investments	(25)	(21)
Total deferred tax liabilities	(195)	(182)
Net deferred tax assets	\$130	\$93

On December 22, 2017, H.R. 1, known as the Tax Cuts and Jobs Act (“the Act”), was signed into law. The Act made significant changes to the U.S. Internal Revenue Code of 1986, including a decrease in the current corporate federal income tax rate to 21% from 35%, effective January 1, 2018. In conjunction with the enactment of the Act, the SEC issued Staff Accounting Bulletin No. 118 (“SAB 118”) to address the accounting for certain income tax effects of the Act that may not be complete by the time financial statements are issued. The Bank evaluated all available information and made reasonable estimates of the impact of the Act to substantially all components of its net DTA. The provisional impact of the Act on the net DTA resulted in a non-cash charge of \$47 million recorded through income tax expense in 2017 related to items such as foregone interest, equity investments in flow-through entities, certain employee compensation arrangements, FDIC-supported transactions and premises and equipment.

During 2018 after filing its 2017 federal and state tax returns, the Bank finalized its analysis of all net DTAs that existed at December 31, 2017 and made a \$2 million tax benefit adjustment on net DTAs as a result of the Act. This adjustment offset the provisional amount of \$47 million recognized in 2017 to deferred tax expense, resulting in an overall adjustment of \$45 million to net DTAs from the Act. The Bank complied with the requirements of SAB 118 as all impacts of the Act were recognized in the financial statements prior to December 22, 2018.

In 2017, the Bank early adopted the guidance in ASU 2018-02, which allows reclassification from AOCI to retained earnings for the stranded tax effects related to the change in the corporate income tax rate from the Act. The early adoption of the guidance resulted in a \$25 million increase to retained earnings out of AOCI as of December 31, 2017. The amount of net DTAs is included with other assets in the balance sheet. The less than \$1 million and \$2 million valuation allowances at December 31, 2018 and 2017, respectively, were for certain acquired net operating loss

carryforwards included in our acquisition of the remaining interests in a less significant subsidiary. At December 31,

138

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

2018, excluding the less than \$1 million valuation allowance, the tax effect of remaining net operating loss and tax credit carryforwards was \$2 million expiring through 2030.

We evaluate the DTAs on a regular basis to determine whether an additional valuation allowance is required. In conducting this evaluation, we have considered all available evidence, both positive and negative, based on the more likely than not criteria that such assets will be realized. This evaluation includes, but is not limited to: (1) available carryback potential to prior tax years; (2) potential future reversals of existing deferred tax liabilities, which historically have a reversal pattern generally consistent with DTAs; (3) potential tax planning strategies; and (4) future projected taxable income. Based on this evaluation, and considering the weight of the positive evidence compared to the negative evidence, we have concluded that an additional valuation allowance is not required as of December 31, 2018.

We have a liability for unrecognized tax benefits relating to uncertain tax positions for tax credits on technology initiatives. A reconciliation of the beginning and ending amount of gross unrecognized tax benefits is as follows:

(In millions)	2018	2017	2016
Balance at beginning of year	\$ 6	\$ 4	\$ 5
Tax positions related to current year:			
Additions	1	1	1
Reductions	—	—	—
Tax positions related to prior years:			
Additions	1	1	1
Reductions	—	—	—
Settlements with taxing authorities	—	—	—
Lapses in statutes of limitations	—	—	(3)
Balance at end of year	\$ 8	\$ 6	\$ 4

At December 31, 2018 and 2017, the liability for unrecognized tax benefits included approximately \$7 million and \$5 million, respectively (net of the federal tax benefit on state issues) that, if recognized, would affect the effective tax rate. The amount of gross unrecognized tax benefits that may increase or decrease during the 12 months subsequent to December 31, 2018, is dependent on the timing and outcome of various federal and state examinations that are ongoing.

Interest and penalties related to unrecognized tax benefits are included in income tax expense in the statement of income. At December 31, 2018 and 2017, accrued interest and penalties recognized in the balance sheet, net of any federal and/or state tax benefits, were less than \$1 million.

The Bank files income tax returns in U.S. federal and various state jurisdictions. The Bank is no longer subject to income tax examinations for years prior to 2013 for federal returns and 2012 for certain state returns.

Dilutive effect of stock options (in thousands)	953	1,099	414
Weighted average diluted common shares outstanding (in thousands)	206,501	209,653	204,269
Net earnings per common share	\$ 4.08	\$ 2.60	\$ 1.99

The following schedule presents the weighted average shares of stock awards that were anti-dilutive and not included in the calculation of diluted earnings per share.

(In thousands)	2018	2017	2016
Restricted stock and restricted stock units	1,602	1,936	2,216

21. OPERATING SEGMENT INFORMATION

We manage our operations and prepare management reports and other information with a primary focus on geographical area. Our banking operations are managed under their own individual brand names, including Zions Bank, Amegy Bank, California Bank & Trust, National Bank of Arizona, Nevada State Bank, Vectra Bank Colorado, and The Commerce Bank of Washington. Performance assessment and resource allocation are based upon this geographical structure. We use an internal funds transfer pricing (“FTP”) allocation system to report results of operations for business segments. This process is continually refined. Total average loans and deposits presented for the banking segments include insignificant intercompany amounts between banking segments and may also include deposits with the Other segment.

As of December 31, 2018, our banking business is conducted through 7 locally managed and branded segments in distinct geographical areas. Zions Bank operates 97 branches in Utah, 23 branches in Idaho, and 1 branch in Wyoming. CB&T operates 90 branches in California. Amegy operates 75 branches in Texas. NBAZ operates 58 branches in Arizona. NSB operates 50 branches in Nevada. Vectra operates 36 branches in Colorado and 1 branch in New Mexico. TCBW operates 1 branch in Washington and 1 branch in Oregon.

The operating segment identified as “Other” includes certain nonbank financial service subsidiaries, centralized back-office functions, and eliminations of transactions between segments. The major components of net interest income at the Bank’s back-office include the revenue associated with the investments securities portfolio and the offset of the FTP costs and benefits provided to the business segments. Throughout 2016 consolidation efforts continued, which resulted in transitioning full-time equivalent employees from the business segments to the Bank’s

Table of Contents

ZIONS BANCORPORATION, NATIONAL ASSOCIATION AND SUBSIDIARIES

back-office units. Due to the continuing nature and timing of this change, the Bank's back-office units retained more direct expenses in 2016 than in prior years. In the first quarter of 2017 we made changes to the FTP process and internal allocation of central expenses to better reflect the performance of business segments. Prior period amounts have been revised to reflect the impact of these changes had they been instituted in 2016.

The following schedule does not present total assets or income tax expense for each operating segment, but instead presents average loans, average deposits and income before income taxes because these are the metrics that management uses when evaluating performance and making decisions pertaining to the operating segments. The condensed statement of income identifies the components of income and expense which affect the operating amounts presented in the Other segment.

The accounting policies of the individual operating segments are the same as those of the Bank. Transactions between operating segments are primarily conducted at fair value, resulting in profits that are eliminated for reporting consolidated results of operations.

The following is a summary of selected operating segment information:

ITEM CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND
9. FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

The Bank’s management, with the participation of the Bank’s Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Banks’s disclosure controls and procedures as of December 31, 2018. Based on that evaluation, the Bank’s Chief Executive Officer and Chief Financial Officer concluded that the Bank’s disclosure controls and procedures were effective as of December 31, 2018. There were no changes in the Bank’s internal control over financial reporting during the fourth quarter of 2018 that have materially affected, or are reasonably likely to materially affect, the Bank’s internal control over financial reporting. See “Report on Management’s Assessment of Internal Control over Financial Reporting” included in Item 8 on page 76 for management’s report on the adequacy of internal control over financial reporting. Also see “Report on Internal Control over Financial Reporting” issued by Ernst & Young LLP included in Item 8 on page 77.

ITEM 9B. OTHER INFORMATION

None.

ITEM SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND
12. RELATED STOCKHOLDER MATTERS
EQUITY COMPENSATION PLAN INFORMATION

The following schedule provides information as of December 31, 2018 with respect to the shares of the Bank’s common stock that may be issued under existing equity compensation plans.

	(a)	(b)	(c)
	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted average price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Plan category ¹			

Equity compensation plan approved by security holders:

Zions Bancorporation, N.A. 2015 Omnibus Incentive Plan	1,269,127	\$ 31.96	4,407,113
--	-----------	----------	-----------

¹ Column (a) excludes 45,686 shares of unvested restricted stock, 1,400,699 RSUs (each unit representing the right to one share of common stock), and 714,219 shares of common stock issuable upon the exercise of stock options, with a weighted average exercise price of \$26.83, granted under the prior plan. The schedule also excludes 21,252 shares

of common stock issuable upon the exercise of stock options, with a weighted average exercise price of \$5.02, granted under plans assumed in mergers that are outstanding.
Other information required by Item 12 is incorporated by reference from the Bank's Proxy Statement to be subsequently filed.
