PIMCO Floating Rate Income Fund Performance & Statistics

January 31, 2007 (unaudited)

- * For the six months ended January 31, 2007 PIMCO Floating Rate income Fund returned 6.17% on net asset value (NAV) and 10.02% on market price.
- * The three-month London Interbank Offered Rate (LIBOR) held relatively steady, decreasing by only 11 basis points to end the reporting period at 5.36%. The trend was positive for floating-rate securities, which typically pay interest at a spread over LIBOR.
- * An emphasis on the cable/pay TV sector, which outperformed the leveraged loan market during the six-month period, benefited Fund performance.
- * A relatively large weight in B-rated issues (64.0%) added to returns as the middle tier of the leveraged loan market outpaced both the upper and lower rated quality tiers.
- * As the retail sector outperformed the overall leveraged loan market by nearly 50 basis points, a relatively small weighting to this sector detracted from performance.
- * As chemical company issues slightly underperformed, a larger-than-market weighting to the sector hindered somewhat on performance.

Total Return ⁽¹⁾ : Six months 1 Year Commencement of Operations (8/29/03) to 1/31/07		Market Price 10.02% 23.64% 8.87%	Net Asset Value (NAV) 6.17% 9.88% 7.35%
Common Share Market Price/NAV Performance: Commencement of Operations (8/29/03) to 1/31/07 Market Price NAV	Market Price/NAV: Market Price NAV Premium to NAV Market Price Yield ⁽²⁾		\$20.78 \$19.35 7.39% 8.51%

(1) Past performance is no guarantee of future results. Total return is calculated by subtracting the value of an investment in the Fund at the beginning of each specified period from the value at the end of the period and dividing the remainder by the value of the investment at the beginning of the period and expressing the result as a percentage. The calculation assumes that all income dividends and capital gain distributions have been reinvested at prices obtained under the Funds dividend reinvestment plan. Total return does not reflect broker commissions or sales charges. Total return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual total return.

An investment in the Fund involves risk, including the loss of principal. Total return, price, yield and net asset value will fluctuate with changes in market conditions. This data is provided for information only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one-time public offering and, once issued, shares of closed-end funds are sold in the open market through a stock exchange. Net asset value is equal to the total assets applicable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current monthly per share dividend to common shareholders by the market price per common share at January 31, 2007.

PIMCO Floating Rate Strategy Fund Performance & Statistics
