may include certain non-GAAP financial measures. A "non-GAAP financial measure" is defined as a numerical measure of a company's financial performance, financial position or cash flows that excludes (or includes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP in the Company's financial statements.

Non-GAAP financial measures utilized by the Company include presentations of revenues, operating expenses, operating income, other income and deductions, net income, earnings per share and other GAAP measures of operating performance that exclude or include the effect of litigation settlements, accounting or regulatory changes, the restructuring of selected operations, certain merger activities and other similar events. The Company's management believes these non-GAAP financial measures provide useful information to investors by removing the effect of variances in GAAP reported results of operations that are not indicative of fundamental changes in the earnings capacity of the Company's operations. Management also believes that the presentation of the non-GAAP financial measure is consistent with its past practice, as well as industry practice in general, and will enable investors and analysts to compare current non-GAAP measures with non-GAAP measures presented in prior periods. The non-GAAP financial measures used by the Company should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP.

Limitation on Incorporation by Reference

EXHIBIT 99.1 (Continued)

"New long-term wholesale contracts, the continuing recovery of the wholesale power market following last year's lows, and growing demand in PNM's New Mexico service territory all contributed to our improved second quarter results," said PNM Resources Chairman, President and Chief Executive Officer Jeff Sterba.

PERFORMANCE SUMMARY

Consolidated gross margin (operating revenues less cost of energy) for the quarter increased \$23.1 million, or 16.3 percent, over the comparable period last year.

Edgar Filing: PNM RESOURCES INC - Form 8-K

Retail electric gross margin (operating revenues less cost of energy) decreased by \$466,000, to \$92.7 million compared to \$93.2 million in the same quarter last year. The decrease in revenues was the result of the transfer of a major customer from retail to wholesale status, partially offset by continued growth in residential and commercial sales. The company estimates underlying retail electric growth in the PNM service territory (normalized for weather) at about 2.0 percent for the quarter on an annual basis.

Gas gross margin (operating revenues less cost of gas) increased \$2.2 million, or 8.8 percent, in the most recent quarter compared to the second quarter 2002. The increase in gas gross margin was primarily due to cooler weather in April 2003 compared to the same month last year.

Gross margin on wholesale electric sales improved by \$22.3 million, from \$10.4 million in the second quarter 2002 to \$32.7 million in the second quarter of 2003. The improvement in margin was primarily due to the expansion of existing long-term wholesale contracts and the addition of new long-term contracts.

ONE-TIME AND NON-RECURRING GAINS AND CHARGES

There were no one-time gains or charges recorded in the second quarter 2003. PNM first quarter 2003 income included a non-cash gain (after tax) of \$37.4 million or \$0.95 per share, stemming from the initial adoption of Financial Accounting Standards Board (FASB) Statement No. 143, Accounting for Asset Retirement Obligations. In the same quarter, the company also recorded a one-time charge against earnings (after tax) of \$10.1 million, or \$0.26 per share, to reflect the write-off of regulatory assets.

OTHER RECENT SIGNIFICANT DEVELOPMENTS AFFECTING PNM RESOURCES:

- o In June, PNM agreed to a negotiated settlement of the company's pending gas rate case. If approved by regulators, the agreement will increase PNM revenues by \$22.0 million, with an assumed 10.25 percent return on equity in the PNM gas utility.
- o In May, PNM completed the sale of \$182 million in tax-exempt bonds. The new bonds pay an initial annual interest rate of 2.75 percent, adjustable next year.

Details of these announcements and other PNM Resources news are available at the company's website, pnm.com.
