A. Description of Business

Summary

Dynabazaar was incorporated in the State of Delaware in February 1997 as Fairmarket, Inc. Through September 3, 2003, we were an online auction and promotions technology service provider that enabled marketers to create results-oriented rewards programs and helped commerce companies automate the process of selling their excess inventory online to wholesale and retail buyers. On September 4, 2003, we sold substantially all of our operating assets to eBay, Inc. (eBay) for consideration of \$4.5 million in cash under the terms and conditions of an asset purchase agreement we entered into with eBay on June 20, 2003. Following the closing of the asset sale, we changed our name from Fairmarket, Inc. to Dynabazaar, Inc.

In connection with the cessation of our online auction business, we relocated our principal executive offices as of January 1, 2004 to 888 Seventh Avenue, 17th Floor, New York, New York 10019, an office maintained by Barington Capital Group, L.P., a limited partnership whose general partner is a corporation of which James Mitarotonda is Chairman, President and Chief Executive Officer. Mr. Mitarotonda is our President and Chief Executive Officer and sits on our Board of Directors.

From January 2003 until the completion of the Acquisition, we have not operated any business and have been settling our remaining claims and liabilities while reviewing alternatives for the use or disposition of our remaining assets.

Our common stock trades on the NASDAQ OTC bulletin board under the symbol FAIM.OB . Our common stock was quoted on the NASDAQ National Market, but was delisted on June 24, 2004.

In May 2006, William Fox resigned as Dynabazaar s President and Chief Executive Officer and from its Board of Directors. Simultaneously, James Mitarotonda became the Company s President and Chief Executive Officer.

Additional information with respect to the Description of Business of Dynabazaar is hereby incorporated by reference to Item I of Part I of Registrant s Annual Report on Form 10-K for the fiscal year ended December 31, 2005 and to the subsection entitled The Company in Note 1 to the Notes to Condensed Consolidated Financial Statements of Dynabazaar s Quarterly Report on Form 10-Q for the period ended March 31, 2006.

Acquisition

On June 20, 2006, Costar and Video Solutions, direct and indirect wholly owned subsidiaries of the Registrant, completed the acquisition of substantially all of the assets of Southern Imaging and Video Solutions, pursuant to the transactions contemplated by the Asset Purchase Agreement. Costar, a wholly owned subsidiary of the Registrant, acquired the assets of Southern Imaging and VSTC, a wholly owned subsidiary of Costar, acquired the assets of Video Solutions.

Business

Costar designs, sources and distributes video and imaging products for the security and industrial markets. The product line for the security market consists primarily of closed circuit television (CCTV) cameras, while the product line for the industrial market is comprised of cameras and lenses utilized by biomedical and manufacturing companies.

The production of all units distributed by Costar is outsourced to contract manufacturers, and the majority of revenues are derived from sales of products under the CostarTM brand. The balance of Costar s business is generated from (a) a private label business and (b) the distribution of other companies branded products.

Video Solutions provides product design and development, technical support and repair services for Costar.

Plan of Operation

The Registrant's plan of operation is for Costar to design, source and distribute video and imaging products for the security and industrial markets and for VSTC to provide product design and development, technical support and repair services for Costar, in each case under a business model intended to deliver the highest levels of technology and support services to its customers at competitive prices.

Financial Information about Geographic and Business Segments

Over 97% of Costar's revenues are attributable to customers located within the United States. The remaining 3% of revenues are generated from customers found in Portugal, Canada, Singapore, South Korea and France.

Industry

We believe that the fear of terrorism and conventional crime, coupled with the increased effectiveness and affordability of available countermeasures, has contributed to the ongoing expansion of the security industry. The Registrant believes that growth of CCTV equipment will continue, driven by technological innovations such as the adoption of more efficient, low cost, networked digital technologies.

Stimulated by the demand for increased efficiency, we believe that the market for industrial vision products is growing larger as well. Industrial cameras, for example, can be employed to increase the efficiency of a diverse set of manufacturing operations including those that produce semiconductors, automobiles, pharmaceuticals, chemicals and food.

Strategy and Marketing Efforts

The security and industrial divisions will continue their analogous strategies—increasing business with systems integrators and original equipment manufacturers (OEM) while targeting independent distributors and large systems integrators to cultivate additional channels of distribution.

Costar's sales and marketing strategy is focused on measures aimed at generating both product innovations and market recognition of the Costar™ brand. Such innovations will likely include the continued shift from analog to digital devices.

Costar is working to merge various existing technologies in an effort to enhance the performance capabilities of its security and industrial products for its customers. Product improvements are largely driven by the unique needs of Costar's customers. Advancements result from integrating a multitude of existing technologies for performance in a given environment. The ensuing innovations create unique value for our customers.

Products

The security product line, comprised of cameras, lenses, digital video recorders and high speed domes, is marketed under the Costar™ brand name. We expect to introduce new products for inclusion in integrated systems and distribution to Costar's evolving customer base.

The industrial product line, consisting of cameras, monitors, cables, lenses and video printers, are distributed under brand names, such as Sony, Panasonic and Hitachi, the Costar™ brand name and, for OEM customers, private labels.

Competition

In the security market, Costar competes with General Electric, Honeywell and smaller companies like Pelco, GVI, Mace and Vicon. In the industrial market, we believe that Costar is considered one of the top three distributors (the other two being AEGIS and Industrial Vision Source), selling cameras from manufacturers such as Sony, Panasonic, Hitachi, JVC, Toshiba and JAI. In addition, Costar markets industrial products under the Costar™ brand name and under private labels for certain OEM's competing in this sector with other manufacturers.

Employees

Costar currently employs fourteen (14) people: five (5) in development and technical support, five (5) in sales and marketing, and the remainder in administrative support. All employees are located in the United States and none are represented by a union or labor group.

Facilities

Costar's primary facilities are located in Carrollton, Texas and Anaheim, California. Both facilities are leased.

Legal Proceedings

The information with respect to Legal Proceedings of Registrant is hereby incorporated by reference to the subsection entitled Contingencies and Legal Proceedings in Note 5 to the Notes to Condensed Consolidated Financial Statements in Registrant's Form 10-Q for the quarter ended March 31, 2006 filed with the SEC on May 15, 2006.

B. Risk Factors

Reliance on Manufacturing Sources

We outsource production of our products to contract manufacturers. Our manufacturers' ability to complete our orders on a timely basis while maintaining high product quality is important to our operational success. The manufacturers' failure to live up to the production standards might cause brand equity damage and legal liability exposure. Such events could have a material adverse effect on our financial performance. Despite the precautionary measures we have taken to avoid manufacturing defects and delays, replacing an existing manufacturer with a new one is a complicated and a time intensive process.

Rapid Technology Changes within Industry

Vision imaging products are subject to technology changes, causing the industry to set new standards and practices. Such changes could substantially decrease the demand for our current product lines, thus hindering our operational and financial performance.

Intensifying Competition

Competitiveness has intensified in recent years. Larger competitors may respond more quickly to rapid technological changes, as they have more capital and resources available to devote to research and development, manufacturing changes and marketing. Increased competition could force us to decrease our prices thus eroding our margins, which could negatively impact our operational and financial performance.

Retaining Quality Personnel

The key to our success is dependant on the dedication, talents and hard work of our personnel. In order to fulfill our growth targets we must retain and attract high quality employees and management. Losing key personnel would likely be detrimental to our success.

Merger and Acquisition Costs

Our growth strategy may include the acquisition of complimentary businesses. The integration of an acquired business might have difficult consequences. Transaction and integration costs could affect operational and financial performance of our business as a whole. Synergies identified pre-closing may not materialize. Management's attention might be temporarily diverted from running our business.

Delisted from The NASDAQ National Market

Registrant's common stock was delisted from trading on The NASDAQ National Market in 2004 by reason of not maintaining listing requirements due to the lack of tangible business operations and significantly reduced market price of the common stock. As a result, Registrant's common stock currently trades over the counter on the NASDAQ OTC Bulletin Board, and the ability of Registrant's stockholders to obtain liquidity and consistent market prices for Registrant's shares has been significantly impaired.

Public Company Expenses

As a public company, Registrant incurs significant legal, accounting and other expenses. In addition, the Sarbanes-Oxley Act of 2002, as well as rules subsequently implemented by the Securities and Exchange Commission and NASDAQ, has required changes in corporate governance practices of public companies. These rules and regulations increase legal and financial compliance costs and make some activities more time consuming and costly. In addition, Registrant incurs additional costs associated with its public company reporting requirements. These rules and regulations also may make it more difficult and more expensive for Registrant to obtain director and officer liability insurance, and Registrant may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage.

C. Financial Information**(a) Selected Financial Data**

The information with respect to Registrant's Selected Financial Data is hereby incorporated by reference to Item 6 of Part I of Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2005.

Critical Accounting Policies

The preparation of Registrant's financial statements requires management to make difficult, subjective or complex judgments, including making estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities, based upon information available at the time, historical experience and various other factors that are believed to be reasonable under the circumstances. These estimates are subject to an inherent degree of uncertainty. Registrant's significant accounting policies are described in Note A, Summary of Significant Accounting Policies, to the financial statements of Southern Imaging for the year ended December 31, 2005 included in this Current Report on Form 8-K. No changes to these critical policies have taken place during the year to date period ended March 31, 2006.

Financial Condition, Liquidity and Capital Resources

Registrant:

As of March 31, 2006, Registrant had approximately \$9.0 million of cash and cash equivalents. As previously mentioned, on June 20, 2006, the Registrant purchased the assets of Southern Imaging. The total consideration for the transaction is up to approximately \$9.5 million. Of this amount, approximately \$3 million was paid at closing and approximately \$2.475 million of certain long-term debt and related party notes payable was assumed. The balance of approximately \$4 million will be paid, in cash, during the period 2006 to 2009 subject to the Costar and VSTC achieving certain levels of sales and EBITDA.

Registrant believes that its existing cash and cash equivalents are sufficient to fund the Company's current operations and meet its working capital and capital expenditures needs in the near future. If Registrant grows through acquisitions, Registrant could need to obtain additional financing.

Southern Imaging, Inc.:

Net cash used in operating activities for the three month (13 week) period ended March 31, 2006 was \$264 as compared to net cash used of \$217 for the three month period ended March 31, 2005. This was attributable to an increase in accounts receivable of \$985 and inventory of \$174, offset by an increase in accounts payable of \$566 and net income for the quarter of \$315.

Net cash used by investing activities for the three month (13 week) period ended March 31, 2006 was \$(7) as compared to net cash used of \$(5) for the three month period ended March 31, 2005. This was attributable to the purchase of property and equipment.

Net cash provided by financing activities for the three month (13 week) period ended March 31, 2006 was \$373 as compared to net cash used of \$99 for the three month period ended March 31, 2005. This was attributable to a net increase in the proceeds from the line of credit.

Net cash provided in operating activities for fiscal year ended December 31, 2005 was \$9 as compared to net cash used of \$(225) for the fiscal year ended December 31, 2004. This improvement was attributable to an increase in net income of \$190, a reduction in bad debt write off of \$140, offset by a decrease in accounts receivable and inventory of \$93.

Edgar Filing: DYNABAZAAR INC - Form 8-K

Net cash used in investing activities for fiscal year ended December 31, 2005 was \$(51) as compared to net cash used of \$(10) for the fiscal year ended December 31, 2004. Net cash provided by financing activities for fiscal year ended December 31, 2005 was \$83 as compared to \$247 for the fiscal year ended December 31, 2004. This reflects a decrease in working capital borrowings and an increase in repayment of notes payable in 2005 compared to 2004.

Off-Balance Sheet Arrangements

We do not have any off-balance arrangements required to be disclosed pursuant to Item 303 of Regulation S-K.

In a derivative action, that is one by or in the right of the corporation, indemnification may be made only for expenses actually and reasonably incurred by directors, officers, employees or agents in connection with the defense or settlement of an action or suit, and only with respect to a matter as to which they will have acted in good faith and in a manner they reasonably believed to be in or not opposed to the best interests of the corporation, except that no indemnification will be made if such person will have been adjudged liable to the corporation, unless and only to the extent that the court in which the action or suit was brought will determine upon application that the defendant directors, officers, employees or agents are fairly and reasonably entitled to indemnity for such expenses despite such adjudication of liability.
