TOLL BROTHERS, INC.

(Exact name of Registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or
organization)

23-2416878

(I.R.S. Employer Identification No.)

250 Gibraltar Road, Horsham, Pennsylvania

(Address of principal executive offices)

19044

(Zip Code)

Registrant's telephone number, including area code (215) 938-8000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock (par value \$.01)*	New York Stock Exchange and NYSE ARCA (formerly the Pacific Exchange) New York Stock Exchange
Guarantee of Toll Brothers Finance Corp. 6.875% Senior Notes due 2012	New York Stock Exchange
Guarantee of Toll Brothers Finance Corp. 5.95% Senior Notes due 2013	New York Stock Exchange
Guarantee of Toll Brothers Finance Corp. 4.95% Senior Notes due 2014	New York Stock Exchange
Guarantee of Toll Brothers Finance Corp. 5.15% Senior Notes due 2015	New York Stock Exchange

* Includes associated Right to Purchase Series A Junior Participating Preferred Stock.

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the Registrant is a well known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Edgar Filing: TOLL BROTHERS INC - Form 10-K

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 30, 2006, the aggregate market value of the Common Stock held by non-affiliates (all persons other than executive officers and directors of Registrant) of the Registrant was approximately \$4,053,426,000.

As of December 31, 2006, there were approximately 154,456,000 shares of Common Stock outstanding.

Documents Incorporated by Reference: Portions of the proxy statement of Toll Brothers, Inc. with respect to the 2007 Annual Meeting of Stockholders, scheduled to be held on March 14, 2007, are incorporated by reference into Part III of this report.

PART I

ITEM 1. BUSINESS

General

Toll Brothers, Inc., a Delaware corporation formed in May 1986, began doing business through predecessor entities in 1967. When this report uses the words "we," "us," and "our," they refer to Toll Brothers, Inc. and its subsidiaries, unless the context otherwise requires.

We design, build, market and arrange financing for single-family detached and attached homes in luxury residential communities. We are also involved, directly and through joint ventures, in projects where we are building, or converting existing rental apartment buildings into, high-, mid- and low-rise luxury homes. We cater to move-up, empty-nester, active-adult, age-qualified and second-home buyers in 21 states of the United States. In the five years ended October 31, 2006, we delivered 33,338 homes from 570 communities, including 8,601 homes from 350 communities in fiscal 2006.

Our traditional, single-family communities are generally located on land we have either developed or acquired fully approved and, in some cases, improved. Currently, we operate in the major suburban and urban residential areas of:

- the Philadelphia, Pennsylvania metropolitan area
- the Lehigh Valley area of Pennsylvania
- central and northern New Jersey
- the Virginia and Maryland suburbs of Washington, D.C.
- the Baltimore, Maryland metropolitan area
- the Eastern Shore of Maryland and Delaware
- the Boston, Massachusetts metropolitan area
- the Providence, Rhode Island metropolitan area
- Fairfield, Hartford and East Hampton Counties, Connecticut
- Westchester, Dutchess, Putnam, Orange and Rockland Counties of New York
- the boroughs of Manhattan, Brooklyn and Queens in New York City
- the Los Angeles and San Diego, California metropolitan areas
- the San Francisco Bay, Sacramento and San Jose areas of northern California
- the Palm Springs, California area
- the Phoenix and Tucson, Arizona metropolitan areas
- the Raleigh and Charlotte, North Carolina metropolitan areas
- the Dallas, Austin and San Antonio, Texas metropolitan areas
- the southeast and southwest coasts and the Jacksonville, Orlando and Tampa areas of Florida
- the Las Vegas and Reno, Nevada metropolitan areas
- the Detroit, Michigan metropolitan area

Edgar Filing: TOLL BROTHERS INC - Form 10-K

- the Chicago, Illinois metropolitan area
- the Denver, Colorado metropolitan area
- the Hilton Head area of South Carolina
- the Minneapolis/St. Paul, Minnesota metropolitan area
- the Martinsburg, West Virginia area

1

[Back to Contents](#)

We continue to explore additional geographic areas for expansion.

We operate our own land development, architectural, engineering, mortgage, title, security monitoring, landscaping, lumber distribution, house component assembly, and manufacturing operations. We also develop, own and operate golf courses and country clubs associated with several of our master planned communities.

At October 31, 2006, we were operating from 398 communities containing approximately 31,910 home sites that we owned or controlled through options. Of the 31,910 home sites, 25,377 were available for sale and 6,533 were under agreement of sale but not yet delivered (backlog). Of the 398 communities, 300 were offering homes for sale, 14 had been offering homes for sale but were temporarily closed due to the lack of availability of improved home sites or were in the process of preparing to open for sale and 84 were sold out but not all homes had been completed and delivered. At October 31, 2006, we also owned or controlled through options approximately 41,858 home sites in 300 proposed communities. We expect to be selling from approximately 340 communities by October 31, 2007. Of the approximately 73,800 total home sites that we owned or controlled through options at October 31, 2006, we owned approximately 41,800.

At October 31, 2006, we were offering single-family detached homes in 207 communities at prices, excluding customized options and lot premiums, generally ranging from \$280,000 to \$2,128,000, with an average base sale price of \$688,000. At that date, we were offering attached homes in 93 communities at prices, excluding customized options and lot premiums, generally ranging from \$200,000 to \$2,577,000, with an average base sale price of \$498,000 and with some units offered at prices significantly higher than \$2,577,000. On average, our home buyers added approximately 21%, or \$121,000 per home, in customized options and lot premiums to the base price of homes delivered in fiscal 2006.

We had backlogs of \$4.49 billion (6,533 homes) at October 31, 2006 and \$6.01 billion (8,805 homes) at October 31, 2005. Backlog at October 31, 2006 has been reduced by \$170.1 million for revenue we recognized using the percentage of completion accounting method. We expect to deliver by October 31, 2007 approximately 92% of the homes in backlog at October 31, 2006.

In recognition of our achievements, we have received numerous awards from national, state and local home builder publications and associations. We are the only publicly traded national home builder to have won all three of the industry's highest honors: America's Best Builder (1996), the National Housing Quality Award (1995), and Builder of the Year (1988).

We attempt to reduce certain risks by: controlling land for future development through options whenever possible, thus allowing us to obtain the necessary governmental approvals before acquiring title to the land; generally commencing construction of a home only after executing an agreement of sale with a buyer; and using subcontractors to perform home construction and land development work on a fixed-price basis. In order to obtain better terms or prices, or due to competitive pressures, we may purchase properties outright, or acquire an underlying mortgage, prior to obtaining all of the governmental approvals necessary to commence development.

For information and analyses of recent trends in our operations and financial condition, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Item 7 below, and for financial information about our revenues, earnings, assets, liabilities, stockholders' equity and cash flows, please see the accompanying consolidated financial statements and notes thereto in Item 8 below.

[Back to Contents](#)**Our Communities**

Our communities are generally located in affluent suburban areas near major highways providing access to major cities. We are also operating in the affluent urban markets of Hoboken and Jersey City, New Jersey; New York City, New York; and Philadelphia, Pennsylvania. We currently operate in 21 states around the country. The following table lists the states in which we operate and the fiscal years in which we or our predecessors commenced operations:

State	Fiscal Year of Entry
Pennsylvania	1967
New Jersey	1982
Delaware	1987
Massachusetts	1988
Maryland	1988
Virginia	1992
Connecticut	1992
New York	1993
California	1994
North Carolina	1994
Texas	1995
Florida	1995
Arizona	1995
Nevada	1998
Illinois	1998
Michigan	1999
Rhode Island	2000
Colorado	2001
South Carolina	2002
Minnesota	2005
West Virginia	2006

We market our high-quality single-family homes to "upscale" luxury home buyers, generally comprised of those persons who have previously owned a principal residence and who are seeking to buy a larger home — the so-called "move-up" market. We believe our reputation as a developer of homes for this market enhances our competitive position with respect to the sale of our smaller, more moderately priced detached homes, as well as our attached homes.

We also market to the 50+ year-old "empty-nester" market and believe that this market has strong growth potential. We have developed a number of home designs with features such as one-story living and first floor master bedroom suites, as well as communities with recreational amenities such as golf courses, marinas, pool complexes, country clubs and recreation centers, that we believe appeal to this category of home buyer. We have integrated these designs and features in our other home types and communities.

In 1999, we opened for sale our first active-adult, age-qualified community for households in which at least one member is 55 years of age. We are currently selling from 18 such communities and expect to open additional age-qualified communities during the next few years. In fiscal 2006, approximately 7% of the value of new contracts signed was in active-adult communities.

We also sell homes in the second-home market. We have been selling homes in this market for several years and currently offer them in Arizona, California, Delaware, Florida, Maryland, Nevada, Pennsylvania and South Carolina.

In order to serve a growing market of affluent move-up families, empty-nesters and young professionals seeking to live in or close to major cities, we have developed and/or are developing a number of high-density, high-, mid- and low-rise urban luxury communities and are in the process of converting several for-rent apartment buildings

Edgar Filing: TOLL BROTHERS INC - Form 10-K

to condominiums. These communities, which we are currently developing on our own or through joint ventures, are located in Phoenix, Arizona; Dublin, California; Singer Island, Florida; Bloomingdale, Illinois; North Bethesda, Maryland; Hoboken and Jersey City, New Jersey; Philadelphia, Pennsylvania and its suburbs; the boroughs of Manhattan, Brooklyn and Queens, New York; and Leesburg, Virginia.

We continue to believe that the demographics of our move-up, empty-nester, active-adult, age-qualified and second-home up-scale markets will provide us with the potential for growth in the coming decade. According to the U.S. Census Bureau, the number of households earning \$100,000 or more (in constant 2005 dollars) now stands at 19.7 million households, approximately 17.2% of all households. This group has grown at six times the rate of increase of all U.S. households since 1980. According to Claritas, Inc., a

[Back to Contents](#)

provider of demographic information, approximately 9.1 million of these households are located in our current markets. According to Harvard University, the number of projected new household formations over the next ten years will be approximately 14.6 million. In addition, American Demographics Magazine predicts that, as the baby boomers mature and become more affluent, second-home ownership will grow from approximately 6.4 million homes in 2000 to an estimated 10 million homes in 2010.

The largest group of baby boomers, the more than four million born annually between 1954 and 1964, are now in their peak move-up home buying years. The leading edge of the baby boom generation is now in its late 50's and early 60's and part of the empty-nester market. The number of households with persons 55 to 64 years old, the focus of our age-qualified communities, is projected to increase by over 47% between the year 2000 and the year 2010 according to the U.S. Census Bureau.

We develop individual stand-alone communities as well as multi-product master planned communities. We currently have 27 master planned communities and expect to open several additional such communities during the next few years. Our master planned communities, many of which include golf courses and other country club-type amenities, enable us to offer multiple home types and sizes to a broad range of move-up, empty-nester, active-adult and second-home buyers. We realize efficiencies from shared common costs such as land development and infrastructure over the several communities within the master planned community. We currently have master planned communities in Arizona, California, Florida, Illinois, Maryland, Michigan, Nevada, New Jersey, North Carolina, Pennsylvania, South Carolina, Texas and Virginia.

Each of our single-family detached-home communities offers several home plans, with the opportunity for home buyers to select various exterior styles. We design each community to fit existing land characteristics. We strive to achieve diversity among architectural styles within an overall planned community by offering a variety of house models and several exterior design options for each house model, by preserving existing trees and foliage whenever practicable, and by curving street layouts which allow relatively few homes to be seen from any vantage point. Normally, homes of the same type or color may not be built next to each other. Our communities have attractive entrances with distinctive signage and landscaping. We believe that our added attention to community detail avoids a "development" appearance and gives each community a diversified neighborhood appearance that enhances home values.

Our traditional attached home communities generally offer one- to four-story homes, provide for limited exterior options and often include commonly-owned recreational facilities such as playing fields, swimming pools and tennis courts.

Our Homes

In most of our single-family detached-home communities, we offer at least four different house floor plans, each with several substantially different architectural styles. In addition, the exterior of each basic floor plan may be varied further by the use of stone, stucco, brick or siding. Our traditional attached home communities generally offer two or three different floor plans with two, three or four bedrooms.

In all of our communities, a wide selection of options is available to purchasers for additional charges. The number and complexity of options typically increase with the size and base selling price of our homes. Major options include additional garages, guest suites and other additional rooms, finished lofts and extra fireplaces. On average, options purchased by our home buyers, including lot premiums, added approximately 21%, or \$121,000 per home, to the base price of homes delivered in fiscal 2006.

Edgar Filing: TOLL BROTHERS INC - Form 10-K

[Back to Contents](#)

The general range of base sales prices for our different lines of homes at October 31, 2006, was as follows:

Detached homes		
Move-up	\$ 280,000	☐ \$ 1,072,000
Executive	280,000	☐ 1,002,000
Estate	378,000	☐ 2,128,000
Active-adult, age-qualified	286,000	☐ 579,000
Attached homes		
Flats	\$ 214,000	☐ \$ 729,000
Townhomes/Carriage homes	200,000	☐ 712,000
Active-adult, age-qualified	232,000	☐ 723,000
High-Rise/Mid-Rise	276,000	☐ 2,577,000

We offer some of our single-family attached units at prices that are considerably higher than \$2.6 million.

Contracts for the sale of homes are at fixed-prices. The prices at which homes are offered in a community generally have increased during the period in which that community is offering homes for sale; however, there can be no assurance that sales prices will increase in the future.

We offer some of the same basic home designs in similar communities. However, we are continuously developing new designs to replace or augment existing ones to ensure that our homes reflect current consumer tastes. We use our own architectural staff, and also engage unaffiliated architectural firms, to develop new designs. During the past year, we introduced 112 new single-family detached models, 82 new single-family attached models and 81 new condominium models.

We operate in the following four geographic segments around the United States: the North, consisting of Connecticut, Illinois, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio and Rhode Island; the Mid-Atlantic, consisting of Delaware, Maryland, Pennsylvania, Virginia and West Virginia; the South, consisting of Florida, North Carolina, South Carolina, Tennessee and Texas; and the West, consisting of Arizona, California, Colorado and Nevada. We stopped selling homes in Tennessee, New Hampshire and Ohio in fiscal 2004, 2004 and 2005, respectively, and delivered our last home in each of those states in fiscal 2004, 2004 and 2006, respectively. The operations in these states were immaterial to the applicable geographic segment.

The following table summarizes by each geographic segment closings and new contracts signed during fiscal 2006, 2005 and 2004, and backlog at October 31, 2006, 2005 and 2004 (dollars in millions):

Geographic Segment	Closings					
	2006 Units	2005 Units	2004 Units	2006 (a)	2005	2004
North	1,983	1,870	1,494	\$ 1,444.2	\$ 1,126.3	\$ 846.9
Mid-Atlantic	2,697	3,290	2,398	1,777.5	2,056.6	1,252.5
South	2,017	1,312	964	1,184.6	701.4	462.5
West	1,904	2,297	1,771	1,709.0	1,875.0	1,277.6
Total	8,601	8,769	6,627	\$ 6,115.3	\$ 5,759.3	\$ 3,839.5

(a) Includes percentage of completion revenues of \$110.3 million and \$59.8 million in the North and South, respectively.

Geographic Segment	Contracts					
	2006 Units	2005 Units	2004 Units	2006	2005	2004

Edgar Filing: TOLL BROTHERS INC - Form 10-K

North	1,673	2,297	1,742	\$ 1,177.3	\$ 1,517.8	1,048.2
Mid-Atlantic	1,942	3,405	2,969	1,262.8	2,263.6	1,787.8
South	1,294	2,329	1,356	800.3	1,306.3	746.4
West	1,255	2,341	2,617	1,220.3	2,064.7	2,059.1
	<u>6,164</u>	<u>10,372</u>	<u>8,684</u>	<u>\$ 4,460.7</u>	<u>\$ 7,152.4</u>	<u>\$ 5,641.5</u>

[Back to Contents](#)**Backlog at October 31,**

Geographic Segment	2006 Units	2005 Units	2004 Units	2006	2005	2004
North	1,756	1,901	1,474	\$ 1,247.1	\$ 1,275.3	\$ 883.9
Mid-Atlantic	1,605	2,360	2,245	1,064.7	1,579.4	1,372.4
South	1,667	2,390	880	1,010.4	1,334.9	542.3
West	1,505	2,154	2,110	1,336.3	1,825.0	1,635.3
less, revenue recognized				(170.1)		
Total	6,533	8,805	6,709	\$ 4,488.4	\$ 6,014.6	\$ 4,433.9

Included in our backlog at October 31, 2006 is \$440.0 million (732 units) in buildings that are accounted for under the percentage of completion accounting method or in high-, mid- and low-rise buildings that have a construction period substantially in excess of our normal building cycle. The \$440.0 million of backlog is net of \$170.1 million of revenue recognized under the percentage of completion accounting method.

The following table summarizes certain information with respect to our residential communities under development (excluding joint ventures) at October 31, 2006:

Geographic Segment	Total Number of Communities	Number of Selling Communities	Homes Approved	Homes Closed	Homes Under Contract and Not Closed	Homesites Available
North	106	77	12,693	5,049	1,756	5,888
Mid-Atlantic	116	91	17,669	7,647	1,605	8,417
South	92	70	12,329	3,759	1,667	6,903
West	84	62	9,689	4,015	1,505	4,169
Total	398	300	52,380	20,470	6,533	25,377

At October 31, 2006, significant site improvements had not commenced on approximately 10,700 of the 25,377 available home sites. Of the 25,377 available home sites, 3,916 were not yet owned by us but were controlled through options.

Of the 398 communities under development at October 31, 2006, 300 were offering homes for sale, 14 had been offering homes but were temporarily closed at October 31, 2006 due to the unavailability of improved home sites or were in the process of preparing to open, and 84 were sold out but not all homes had been completed and delivered. Of the 300 communities in which homes were being offered for sale at October 31, 2006, 207 were single-family detached-home communities containing a total of 426 homes (exclusive of model homes) under construction but not under contract, and 93 were attached-home communities containing a total of 1,234 homes (exclusive of model homes) under construction but not under contract. Due to the high number of cancellations of contracts by home buyers in fiscal 2006, we have a higher than normal number of homes under construction but not under contract at October 31, 2006. Of the 1,234 homes under construction but not under contract in attached-home communities, 280 were in high- and mid-rise projects, 350 were in two communities that we acquired and were converting to condominium units and 222 were in a large condominium building under construction.

For information regarding revenues, income before income taxes and assets by geographic segment, see Note 13 of the [Notes to Consolidated Financial Statements], [Information on Business Segments].

Land Policy

Before entering into an agreement to purchase a land parcel, we complete extensive comparative studies and analyses on detailed company-designed forms that assist us in evaluating the acquisition. We generally attempt to

Edgar Filing: TOLL BROTHERS INC - Form 10-K

enter into option agreements to purchase land for future communities. However, in order to obtain better terms or prices, or due to competitive pressures, we may acquire property outright from time to time. In addition, we have, at times, acquired the underlying mortgage on a property and subsequently obtained title to that property.

[Back to Contents](#)

We generally enter into agreements to purchase land, referred to herein as "land purchase contracts," "options" or "option agreements," on a non-recourse basis, thereby limiting our financial exposure to the amounts expended in obtaining any necessary governmental approvals, the costs incurred in the planning and design of the community and, in some cases, some or all of our deposit. The use of options or purchase agreements may increase the price of land that we eventually acquire, but significantly reduces our risk by allowing us to obtain the necessary development approvals before acquiring the land or allowing us to delay the acquisition to a later date. As approvals are obtained, the values of the options, purchase agreements and land generally increase. We have the ability to extend many of these options for varying periods of time, in some cases by making an additional payment and, in other cases, without any additional payment. Our purchase agreements are typically subject to numerous conditions including, but not limited to, our ability to obtain necessary governmental approvals for the proposed community. Our initial payment on an agreement may be returned to us if all approvals are not obtained, although pre-development costs may not be recoverable. We generally have the right to cancel any of our agreements to purchase land by forfeiture of some or all of the money we have paid on the agreement.

We also have investments in four joint ventures that are developing large tracts of land in Arizona and Nevada. Under the terms of the joint venture agreements, we will receive our proportionate share of home sites upon the completion of the development work on the land. For more information regarding these joint ventures, see Note 3 of the "Notes to the Consolidated Financial Statements," "Investments in and Advances to Unconsolidated Entities."

Our ability to continue development activities over the long-term will be dependent upon our continued ability to locate and enter into options or agreements to purchase land, obtain governmental approvals for suitable parcels of land, and consummate the acquisition and complete the development of such land.

We believe that there is significant diversity in our existing markets and that this diversity provides some protection from the vagaries of individual local economies. We also believe that greater geographic diversification will provide additional protection and more opportunities for growth and, accordingly, we continue to search for new markets.

The following is a summary of the parcels of land that we either owned or controlled through options or purchase agreements at October 31, 2006 for proposed communities, as distinguished from those currently under development:

Geographic Segment	Number of Communities	Number of Homes Planned
North	61	7,422
Mid-Atlantic	113	12,848
South	57	6,138
West	69	15,450
Total	300	41,858

Of the 41,858 planned home sites, at October 31, 2006, we owned 13,814 and controlled through options and purchase agreements 28,044. At October 31, 2006, the aggregate purchase price of land parcels under option and purchase agreements was approximately \$2.96 billion (including \$1.22 billion of land to be acquired from joint ventures which we have invested in, made advances to or made loan guarantees on behalf of), of which we had paid or deposited approximately \$173.1 million and had investments in unconsolidated entities of \$164.4 million.

We evaluate all of the land under our control for proposed communities on an ongoing basis for continued economic and market feasibility. During the year ended October 31, 2006, such feasibility analyses resulted in approximately \$90.9 million of capitalized costs related to proposed communities being charged to expense because they were no longer deemed to be recoverable.

We have substantial land currently under control for which we have obtained approvals or are seeking approvals (as set forth in the tables above). We devote significant resources to locating suitable land for future development

and to obtaining the required approvals on land under our control. There can be no

[Back to Contents](#)

assurance that we will be successful in securing the necessary development approvals for the land currently under our control or for land which we may acquire control of in the future or that, upon obtaining such development approvals, we will elect to complete the purchases of land under option or complete the development of land that we own. We generally have been successful in obtaining governmental approvals in the past. Failure to locate sufficient suitable land or to obtain necessary governmental approvals may impair our ability over the long-term to maintain current levels of development activities.

We believe that we have an adequate supply of land in our existing communities and proposed communities (assuming that all properties are developed) to maintain our operations at current levels for several years.

Community Development

We expend considerable effort in developing a concept for each community, which includes determining the size, style and price range of the homes, the layout of the streets and individual home sites, and the overall community design. After obtaining the necessary governmental subdivision and other approvals, which may take several years, we improve the land by clearing and grading it; installing roads, underground utility lines and recreational amenities; erecting distinctive entrance structures; and staking out individual home sites.

Each community is managed by a project manager who is usually located at the site. Working with sales staff, construction managers, marketing personnel and, when required, other in-house and outside professionals such as accountants, engineers, architects and legal counsel, the project manager is responsible for supervising and coordinating the various developmental steps from the approval stage through land acquisition, marketing, selling, construction and customer service, and for monitoring the progress of work and controlling expenditures. Major decisions regarding each community are made in consultation with senior members of our management team.

Since we build single-family detached and attached homes that generally take less than one year to build, we recognize revenue from these home sales only when title and possession of a home is transferred to the buyer, which usually occurs shortly after home construction is substantially completed. For high-rise/mid-rise projects where the construction time is substantially more than one year and which qualify under Statement of Financial Accounting Standard No. 66 for percentage of completion accounting, revenues and costs of individual communities are recognized on the individual projects' aggregate value of units for which the home buyers have signed binding agreements of sale, less an allowance for cancellations, and is based on the percentage of total estimated construction costs which have been incurred.

The most significant variable affecting the timing of our revenue stream, other than housing demand, is receipt of final land regulatory approvals. Receipt of approvals permits us to begin the process of obtaining executed sales contracts from home buyers. Although our sales and construction activities vary somewhat by season, which affects the timing of closings, any such seasonal effect is relatively insignificant compared to the effect of the timing of receipt of final governmental approvals on the timing of closings.

Subcontractors perform all home construction and land development work, generally under fixed-price contracts. We act as a general contractor and directly purchase some, but not all, of the building supplies we require. See "Manufacturing/Distribution Facilities" in Item 2. While we have experienced some shortages, from time to time, in the availability of subcontractors in some markets, we do not anticipate any material effect from these shortages on our home building operations.

Our construction managers and assistant construction managers coordinate subcontracting activities and supervise all aspects of construction work and quality control. One of the ways in which we seek to achieve home buyer satisfaction is by providing our construction managers with incentive compensation arrangements based on each home buyer's satisfaction as expressed by their responses on pre-closing and post-closing questionnaires.

We maintain insurance, subject to deductibles and self-insured amounts, to protect us against various risks associated with our activities, including, among others, general liability, "all-risk" property, workers' compensation, automobile and employee fidelity. We accrue for our expected costs associated with the deductibles and self-insured amounts.

[Back to Contents](#)

Marketing and Sales

We believe that our marketing strategy, which emphasizes our more expensive "Estate" and "Executive" lines of homes, has enhanced our reputation as a builder-developer of high-quality upscale housing. We believe this reputation results in greater demand for all of our lines of homes. To enhance this image, we generally include attractive decorative features such as chair rails, crown moldings, dentil moldings, vaulted and coffered ceilings and other aesthetic elements, even in our less expensive homes, based on our belief that this additional construction expense improves our marketing and sales effort.

In determining the prices for our homes, we utilize, in addition to management's extensive experience, an internally developed value analysis program that compares our homes with homes offered by other builders in each local marketing area. In our application of this program, we assign a positive or negative dollar value to differences between our product features and those of our competitors, such as house and community amenities, location and reputation.

We expend great effort in designing and decorating our model homes, which play an important role in our marketing. In our models, we create an attractive atmosphere, with bread baking in the oven, fires burning in fireplaces, and music playing in the background. Interior decorating varies among the models and is carefully selected to reflect the lifestyles of prospective buyers. During the past several years, we have received numerous awards from various home builder associations for our interior merchandising.

We typically have a sales office in each community that is staffed by our own sales personnel. Sales personnel are generally compensated with both salary and commission. A significant portion of our sales is derived from the introduction of customers to our communities by local cooperating realtors.

We advertise extensively in newspapers, other local and regional publications, and on billboards. We also use videotapes and attractive color brochures to market our communities. The Internet is also an important resource we use in marketing and providing information to our customers. A visitor to our award winning web site, www.tollbrothers.com, can obtain detailed information regarding our communities and homes across the country, take panoramic or video tours of our homes and design their own homes based upon our available floor plans and options.

All our homes are sold under our limited warranty as to workmanship and mechanical equipment. Many homes also come with a limited ten-year warranty as to structural integrity.

We have a two-step sales process. The first step takes place when a potential home buyer visits one of our communities and decides to purchase one of our homes, at which point the home buyer signs a non-binding deposit agreement and provides a small, refundable deposit. This deposit will reserve, for a short period of time, the home site or unit that the home buyer has selected and will lock in the base price of the home. Deposit rates are tracked on a weekly basis to help us monitor the strength or weakness in demand in each of our communities. If demand for homes in a particular community is strong, senior management will determine whether the base selling prices in that community should be increased, whereas if demand for the homes in a particular community is weak, we may determine whether sales incentives and/or discounts on home prices should be added to the community's sales effort. Because these deposit agreements are non-binding, they are not recorded as signed contracts, nor are they recorded in backlog (homes under contract but not yet delivered to home buyers as of the reporting date).

The second step in the sales process occurs when the home buyer and we actually sign a binding agreement of sale and the home buyer typically gives us a cash down payment which, historically, has been approximately 7%, on average, of the total purchase price of the home. Between the time that the home buyer signs the non-binding deposit agreement and the agreement of sale, he or she is required to complete a financial questionnaire that gives us the ability to evaluate whether the home buyer has the financial resources necessary to purchase the home. If we determine that the home buyer is not financially qualified, we will not enter into an agreement of sale with the home buyer. Of the agreements of sale that home buyers executed during fiscal 2006, 2005 and 2004, they canceled approximately 17.1%, 4.6% and 4.6%, of them during fiscal 2006, 2005 and 2004, respectively. When we report contracts signed, the number and value of contracts signed is reported net of any cancellations occurring during the reporting period, whether signed in that reporting period or in a prior period. Only outstanding agreements of sale that have been signed by both the

[Back to Contents](#)

home buyer and us as of the end of the period on which we are reporting are included in backlog. Of the value of backlog reported on October 31, 2005, 2004 and 2003, home buyers subsequently canceled approximately 10.0%, 3.7% and 3.0% of it, respectively.

At October 31, 2006, we had \$4.49 billion of backlog, net of \$170.1 million of revenues recognized under the percentage of completion accounting method. Based on the expected delivery dates, we expect to deliver approximately 92% of the value of homes in backlog by October 31, 2007, including homes accounted for under the percentage of completion accounting method.

Competition

The homebuilding business is highly competitive and fragmented. We compete with numerous home builders of varying sizes, ranging from local to national in scope, some of which have greater sales and financial resources than we have. Sales of existing homes also provide competition. We compete primarily on the basis of price, location, design, quality, service and reputation; however, we believe our financial stability, relative to most others in our industry, has become an increasingly favorable competitive factor.

Regulation and Environmental Matters

We are subject to various local, state and federal statutes, ordinances, rules and regulations concerning zoning, building design, construction and similar matters, including local regulations which impose restrictive zoning and density requirements in order to limit the number of homes that can eventually be built within the boundaries of a particular property or locality. In a number of our markets, there has been an increase in state and local legislation authorizing the acquisition of land as dedicated open space, mainly by governmental, quasi-public and non-profit entities. In addition, we are subject to various licensing, registration and filing requirements in connection with the construction, advertisement and sale of homes in our communities. Although these laws have increased our overall costs, they have not had a material effect on us, except to the extent that their application may have delayed the opening of communities or caused us to conclude that development of particular communities would not be economically feasible, even if any or all necessary governmental approvals were obtained. See [Land Policy] in this Item 1. We also may be subject to periodic delays or may be precluded entirely from developing communities due to building moratoriums in one or more of the areas in which we operate. Generally, such moratoriums relate to insufficient water or sewage facilities or inadequate road capacity.

In order to secure certain approvals, in some areas, we may be required to provide affordable housing at below market rental or sales prices. The impact on us depends on how the various state and local governments in the areas in which we engage, or intend to engage, in development implement their programs for affordable housing. To date, these restrictions have not had a material impact on us.

We also are subject to a variety of local, state and federal statutes, ordinances, rules and regulations concerning protection of public health and the environment ([environmental laws]). The particular environmental laws that apply to any given community vary greatly according to the location and environmental condition of the site, and the present and former uses of the site. Complying with these environmental laws may result in delays, may cause us to incur substantial compliance and other costs, and/or may prohibit or severely restrict development in certain environmentally sensitive regions or areas.

We maintain a policy of engaging independent environmental consultants to evaluate land for the potential of hazardous or toxic materials, wastes or substances before consummating an acquisition. Because we generally have obtained such assessments for the land we have purchased, we have not been significantly affected to date by the presence of such materials.

Employees

At October 31, 2006, we employed 5,542 persons full-time; of these, 245 were in executive management positions, 524 were engaged in sales activities, 574 were in project management activities, 2,252 were in administrative and clerical activities, 1,159 were in construction activities, 203 were in architectural and engineering activities, 350 were in golf course operations, and 235 were in manufacturing and distribution. At

[Back to Contents](#)

October 31, 2006, we were subject to one collective bargaining agreement that covered approximately 2% of our employees. We consider our employee relations to be good.

Available Information

We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (the "SEC"). These filings are available to the public over the Internet at the SEC's web site at <http://www.sec.gov>. You may also read and copy any document we file at the SEC's public reference room located at 100 F Street, N.E., Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room.

Our principal Internet address is www.tollbrothers.com. We make available free of charge on or through www.tollbrothers.com our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC.

Our Board of Directors has an audit committee, an executive compensation committee and a nominating and corporate governance committee. Each of these committees has a formal charter. We also have Corporate Governance Guidelines, a Code of Ethics for Principal Executive Officer and Senior Financial Officers, and a Code of Ethics and Business Conduct for Directors, Officers and Employees. Copies of these charters, guidelines and codes, and any waivers or amendments to such codes which are applicable to our executive officers, senior financial officers or directors, can be obtained free of charge from our web site, www.tollbrothers.com.

In addition, you may request a copy of the foregoing filings (excluding exhibits), charters, guidelines and codes, and any waivers or amendments to such codes which are applicable to our executive officers, senior financial officers or directors, at no cost by writing to us at Toll Brothers, Inc., 250 Gibraltar Road, Horsham, PA 19044, Attention: Director of Investor Relations, or by telephoning us at (215) 938-8000.

ITEM 1A. RISK FACTORS

Factors That May Affect Our Future Results (Cautionary Statements Under the Private Securities Litigation Reform Act of 1995)

Certain information included in this report or in other materials we have filed or will file with the SEC (as well as information included in oral statements or other written statements made or to be made by us) contains or may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended. You can identify these statements by the fact that they do not relate strictly to historical or current facts. They contain words such as "anticipate," "estimate," "expect," "project," "intend," "plan," "believe," "may," "can," "could," and other words or phrases of similar meaning in connection with any discussion of future operating or financial performance. Such statements include information relating to anticipated operating results, financial resources, changes in revenues, changes in profitability, changes in margins, changes in accounting treatment, interest expense, land-related write-downs, effects of homebuyer cancellations, growth and expansion, anticipated income to be realized from our investments in unconsolidated entities, the ability to acquire land, the ability to gain approvals and to open new communities, the ability to sell homes and properties, the ability to deliver homes from backlog, the ability to secure materials and subcontractors, the ability to produce the liquidity and capital necessary to expand and take advantage of opportunities in the future, industry trends, and stock market valuations. From time to time, forward-looking statements also are included in our other periodic reports on Forms 10-Q and 8-K, in press releases, in presentations, on our web site and in other material released to the public.

Any or all of the forward-looking statements included in this report and in any other reports or public statements made by us are not guarantees of future performance and may turn out to be inaccurate. This can occur as a result of incorrect assumptions or as a consequence of known or unknown risks and uncertainties. Many factors mentioned in this report or in other reports or public statements made by us, such as government regulation and the competitive environment, will be important in determining our future

[Back to Contents](#)

performance. Consequently, actual results may differ materially from those that might be anticipated from our forward-looking statements.

Forward looking statements speak only as of the date they are made. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. However, any further disclosures made on related subjects in our subsequent reports on Forms 10-K, 10-Q and 8-K should be consulted. The following cautionary discussion of risks, uncertainties and possible inaccurate assumptions relevant to our business includes factors we believe could cause our actual results to differ materially from expected and historical results. Other factors beyond those listed below, including factors unknown to us and factors known to us which we have not determined to be material, could also adversely affect us. This discussion is provided as permitted by the Private Securities Litigation Reform Act of 1995, and all of our forward-looking statements are expressly qualified in their entirety by the cautionary statements contained or referenced in this section.

An adverse change in economic conditions could reduce the demand for homes and, as a result, could reduce our earnings and adversely affect our financial condition.

Changes in national and regional economic conditions, as well as local economic conditions where we conduct our operations and where prospective purchasers of our homes live, can have a negative impact on our business. Adverse changes in employment levels, job growth, consumer confidence, interest rates and population growth, and an oversupply of homes for sale, may reduce demand, depress prices for our homes and cause homebuyers to cancel their agreements to purchase our homes. This, in turn, can reduce our earnings and adversely affect our financial condition.

The homebuilding industry is highly competitive and, if others are more successful, our business could decline.

We operate in a very competitive environment, which is characterized by competition from a number of other homebuilders in each market in which we operate. We compete with large national and regional home building companies and with smaller local homebuilders for land, financing, raw materials and skilled management and labor resources. We also compete with the resale, or "previously owned," home market. Increased competition could cause us to increase our selling incentives and/or reduce our prices. An oversupply of homes available for sale could also depress our home prices and adversely affect our operations. If we are unable to compete effectively in our markets, our business could decline disproportionately to our competitors.

If land is not available at reasonable prices, our sales and earnings could decrease.

Our operations depend on our ability to continue to obtain land for the development of our residential communities at reasonable prices. Changes in the general availability of land, competition for available land, availability of financing to acquire land, zoning regulations that limit housing density and other market conditions may hurt our ability to obtain land for new residential communities. If the supply of land appropriate for development of our residential communities becomes more limited because of these factors, or for any other reason, the cost of land could increase and/or the number of homes that we sell and build could be reduced.

If the market value of our land and homes drops significantly, our profits could decrease.

The market value of our land and housing inventories depends on market conditions. We acquire land for expansion into new markets and for replacement of land inventory and expansion within our current markets. If housing demand decreases below what we anticipated when we acquired our inventory, we may not be able to make profits similar to what we have made in the past, may experience less than anticipated profits and/or may not be able to recover our costs when we sell and build homes. In the face of adverse market conditions, we may have substantial inventory carrying costs, may have to write-down our inventories, and/or may have to sell land or homes at a loss.

[Back to Contents](#)

Government regulations and legal challenges may delay the start or completion of our communities, increase our expenses or limit our homebuilding activities, which could have a negative impact on our operations.

We must obtain the approval of numerous governmental authorities in connection with our development activities, and these governmental authorities often have broad discretion in exercising their approval authority. We incur substantial costs related to compliance with legal and regulatory requirements. Any increase in legal and regulatory requirements may cause us to incur substantial additional costs, as discussed below. Various local, state and federal statutes, ordinances, rules and regulations concerning building, zoning, sales and similar matters apply to and/or affect the housing industry. This governmental regulation affects construction activities as well as sales activities, mortgage lending activities and other dealings with consumers. The industry also has experienced an increase in state and local legislation and regulations which limit the availability or use of land. We may be required to apply for additional approvals or modify our existing approvals because of changes in local circumstances or applicable law. Further, we may experience delays and increased expenses as a result of legal challenges to our proposed communities, whether brought by governmental authorities or private parties.

Expansion of regulation in the housing industry has increased the time required to obtain the necessary approvals to begin construction and has prolonged the time between the initial acquisition of land or land options and the commencement and completion of construction. These delays can increase our costs and decrease our profitability.

Municipalities may restrict or place moratoriums on the availability of utilities, such as water and sewer taps. In some areas, municipalities may enact growth control initiatives, which will restrict the number of building permits available in a given year. If municipalities in which we operate take actions like these, it could have an adverse effect on our business by causing delays, increasing our costs or limiting our ability to operate in those municipalities.

Increases in taxes or government fees could increase our costs, and adverse changes in tax laws could reduce customer demand for our homes.

Increases in real estate taxes and other local government fees, such as fees imposed on developers to fund schools, open space, road improvements, and/or provide low and moderate income housing, could increase our costs and have an adverse effect on our operations. In addition, increases in local real estate taxes could adversely affect our potential customers who may consider those costs in determining whether to make a new home purchase and decide, as a result, not to purchase one of our homes. In addition, any changes in the income tax laws that would reduce or eliminate tax deductions or incentives to homeowners, such as proposed changes limiting the deductibility of interest on home mortgages, could make housing less affordable or otherwise reduce the demand for housing, which in turn could reduce our sales and hurt our operating results.

Adverse weather conditions and conditions in nature beyond our control could disrupt the development of our communities, which could harm our sales and earnings.

Adverse weather conditions and natural disasters, such as hurricanes, tornadoes, earthquakes, floods and fires, can have serious effects on our ability to develop our residential communities. We also may be affected by unforeseen engineering, environmental or geological problems. Any of these adverse events or circumstances could cause delays in the completion of, or increase the cost of, developing one or more of our residential communities and, as a result, could harm our sales and earnings.

If we experience shortages or increased costs of labor and supplies or other circumstances beyond our control, there could be delays or increased costs in developing our communities, which could adversely affect our operating results.

Our ability to develop residential communities may be affected by circumstances beyond our control, including: work stoppages, labor disputes and shortages of qualified trades people, such as carpenters, roofers,

[Back to Contents](#)

electricians and plumbers; lack of availability of adequate utility infrastructure and services; our need to rely on local subcontractors who may not be adequately capitalized or insured; and shortages, or delays in availability, or fluctuations in prices of, building materials. Any of these circumstances could give rise to delays in the start or completion of, or could increase the cost of, developing one or more of our residential communities. We may not be able to recover these increased costs by raising our home prices because the price for each home is typically set months prior to its delivery pursuant to the agreement of sale with the home buyer. If that happens, our operating results could be harmed. Additionally, we may be limited in the amount we can raise sales prices by our customers' unwillingness to pay higher prices.

We are subject to one collective bargaining agreement that covers approximately 2% of our employees. We have not experienced any work stoppages due to strikes by unionized workers, but we cannot assure you that there will not be any work stoppages due to strikes or other job actions in the future. We use independent contractors to construct our homes. At any given point in time, some or all of these contractors may be unionized.

Product liability litigation and warranty claims that arise in the ordinary course of business may be costly, which could adversely affect our business.

As a homebuilder, we are subject to construction defect and home warranty claims arising in the ordinary course of business. These claims are common in the homebuilding industry and can be costly. In addition, the costs of insuring against construction defect and product liability claims are high, and the amount of coverage offered by insurance companies is currently limited. There can be no assurance that this coverage will not be further restricted and become more costly. If we are not able to obtain adequate insurance against these claims, we may experience losses that could hurt our financial results.

If we are not able to obtain suitable financing, our business may decline.

Our business and earnings depend substantially on our ability to obtain financing for the development of our residential communities, whether from bank borrowings or from sales of our debt or equity securities. If we are not able to obtain suitable financing, our costs could increase and our revenues could decrease, or we could be precluded from continuing our operations at current levels.

Increases in interest rates can make it more difficult and/or expensive for us to obtain the funds we need to operate our business. The amount of interest we incur on our revolving bank credit facility fluctuates based on changes in short-term interest rates, the amount of borrowings we incur and the ratings that national rating agencies assign to our outstanding debt securities. Increases in interest rates generally and/or any downgrading in the ratings that national rating agencies assign to our outstanding debt securities could increase the interest rates we must pay on any subsequent issuances of debt securities, and any such ratings downgrade could also make it more difficult for us to sell such debt securities.

If our potential customers are not able to obtain suitable financing, our business may decline.

Our business and earnings also depend on the ability of our potential customers to obtain mortgages for the purchase of our homes. Increases in the cost of home mortgage financing could prevent our potential customers from purchasing our homes. In addition, where our potential customers must sell their existing homes in order to buy a home from us, increases in mortgage costs could prevent the buyers of our customers' existing homes from obtaining the mortgages they need to complete the purchase, which could result in our potential customers' inability to buy a home from us. If our potential customers or the buyers of our customers' current homes are not able to obtain suitable financing, our sales and revenues could decline.

Our principal stockholders may effectively exercise control over matters requiring stockholder approval.

As of December 31, 2006, Robert I. Toll and his affiliates owned, directly or indirectly, or had the right to acquire within 60 days, approximately 18% of the outstanding shares of Toll Brothers, Inc.'s common stock, and his brother Bruce E. Toll and his affiliates owned, directly or indirectly, or had the right to acquire within 60 days, approximately 6% of the outstanding shares of Toll Brothers, Inc.'s common stock. To the

[Back to Contents](#)

extent they and their affiliates vote their shares in the same manner, their combined stock ownership may effectively give them the power to elect all of the directors and control the management, operations and affairs of Toll Brothers, Inc. Their ownership may discourage someone from making a significant equity investment in Toll Brothers, Inc., even if we needed the investment to operate our business. The size of their combined stock holdings could be a significant factor in delaying or preventing a change of control transaction that other stockholders may deem to be in their best interests, such as a transaction in which the other stockholders would receive a premium for their shares over their current trading prices.

Our business is seasonal in nature, so our quarterly operating results fluctuate.

Our quarterly operating results typically fluctuate with the seasons. A significant portion of our agreements of sale are entered into with customers in the winter and spring months. Construction of a customer's home typically proceeds after signing the agreement of sale and can require 12 months or more to complete. Weather-related problems may occur in the late winter and early spring, delaying starts or closings or increasing costs and reducing profitability. In addition, delays in opening new communities or new sections of existing communities could have an adverse impact on home sales and revenues. Because of these factors, our quarterly operating results may be uneven and may be marked by lower revenues and earnings in some quarters than in others.

Changes in accounting principles, interpretations and practices may affect our reported revenues, earnings and results of operations.

Generally accepted accounting principles and their accompanying pronouncements, implementation guidelines, interpretations and practices for certain aspects of our business are complex and may involve subjective judgments, such as, revenue recognition, inventory valuations and income taxes. Changes in interpretations could significantly affect our reported revenues, earnings and operating results, and could add significant volatility to those measures without a comparable underlying change in cash flows from operations.

Changes in tax laws or the interpretation of tax laws may negatively affect our operating results.

We believe that our recorded tax balances are adequate. However, it is not possible to predict the effects of possible changes in the tax laws or changes in their interpretation and whether they could have a material negative effect on our operating results.

Our cash flows and results of operations could be adversely affected if legal claims are brought against us and are not resolved in our favor.

Claims have been brought against us in various legal proceedings which have not had, and are not expected to have, a material adverse effect on our business or financial condition. Should claims be filed in the future, it is possible that our cash flows and results of operations could be affected, from time to time, by the negative outcome of one or more of such matters.

Future terrorist attacks against the United States or increased domestic or international instability could have an adverse effect on our operations.

In the weeks following the September 11, 2001 terrorist attacks, we experienced a sharp decrease in the number of new contracts signed for homes and an increase in the cancellation of existing contracts. Although new home purchases stabilized and subsequently recovered in the months after that initial period, adverse developments in the war on terrorism, future terrorist attacks against the United States, or increased domestic or international instability could adversely affect our business.

[Back to Contents](#)

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable

ITEM 2. PROPERTIES

Headquarters

Our corporate office, which we lease from an unrelated third party, contains approximately 200,000 square feet, and is located in Horsham, Montgomery County, Pennsylvania.

Manufacturing/Distribution Facilities

We own a facility of approximately 300,000 square feet located in Morrisville, Pennsylvania, a facility and warehouse of approximately 186,000 square feet located in Emporia, Virginia and a 134,000 square foot facility in Knox, Indiana. We lease a facility of approximately 144,000 square feet located in Fairless Hills, Pennsylvania. At these facilities, we manufacture open wall panels, roof and floor trusses, and certain interior and exterior millwork to supply a portion of our construction needs. These operations also permit us to purchase wholesale lumber, plywood, windows, doors, certain other interior and exterior millwork and other building materials to supply to our communities. We believe that increased efficiencies, cost savings and productivity result from the operation of these plants and from the wholesale purchase of materials. These plants sell wall panels and roof and floor trusses to us as well as to a small number of outside purchasers.

Office and Other Facilities

We lease other office and warehouse space in various locations, none of which are material to our business.

ITEM 3. LEGAL PROCEEDINGS

We are involved in various claims and litigation arising principally in the ordinary course of business. We believe that the disposition of these matters will not have a material adverse effect on our business or our financial condition.

In January 2006, we received a request for information pursuant to Section 308 of the Clean Water Act from Region 3 of the Environmental Protection Agency (the "EPA") requesting information about storm water discharge practices in connection with our homebuilding projects in the states that comprise EPA Region 3. To the extent the EPA's review were to lead the EPA to assert violations of state and/or federal regulatory requirements and request injunctive relief and/or civil penalties, we would defend and attempt to resolve any such asserted violations. At this time we cannot predict the outcome of the EPA's review.

Other than as set forth above, there are no proceedings required to be disclosed pursuant to Item 103 of Regulation S-K.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders, through the solicitation of proxies or otherwise, during the fourth quarter of the fiscal year ended October 31, 2006.

[Back to Contents](#)**ITEM 4A. EXECUTIVE OFFICERS OF THE REGISTRANT**

The following table includes information with respect to all of our executive officers at October 31, 2006. All executive officers serve at the pleasure of our Board of Directors.

Name	Age	Positions
Robert I. Toll	65	Chairman of the Board, Chief Executive Officer and Director
Zvi Barzilay	60	President, Chief Operating Officer and Director
Joel H. Rassman	61	Executive Vice President, Treasurer, Chief Financial Officer and Director

Robert I. Toll, with his brother Bruce E. Toll, the Vice Chairman of the Board and a Director of Toll Brothers, Inc., co-founded our predecessors' operations in 1967. Robert I. Toll has been our Chief Executive Officer and Chairman of the Board since our inception.

Zvi Barzilay joined us as a project manager in 1980 and has been an officer since 1983. Mr. Barzilay was elected a Director of Toll Brothers, Inc. in 1994. He has held the position of Chief Operating Officer since May 1998 and the position of President since November 1998.

Joel H. Rassman joined us as Senior Vice President, Chief Financial Officer and Treasurer in 1984. Mr. Rassman has been a Director of Toll Brothers, Inc. since 1996. He has held the position of Executive Vice President since May 2002.

[Back to Contents](#)**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is principally traded on the New York Stock Exchange (Symbol: TOL). It is also listed on NYSE ARCA (formerly the Pacific Exchange). Our Board of Directors has approved an application to delist our common stock from NYSE ARCA and that application was submitted to NYSE ARCA on December 14, 2006.

The following table sets forth the price range of our common stock on the New York Stock Exchange for each fiscal quarter during the two years ended October 31, 2006.

	Three Months Ended			
	October 31	July 31	April 30	January 31
2006				
High	\$ 30.90	\$ 32.10	\$ 36.05	\$ 41.65
Low	\$ 23.82	\$ 22.22	\$ 28.70	\$ 33.04
2005				
High	\$ 56.50	\$ 58.67	\$ 45.58	\$ 39.07
Low	\$ 34.60	\$ 37.14	\$ 36.05	\$ 23.13

During the three months ended October 31, 2006, we repurchased the following shares under our repurchase program (amounts in thousands, except per share amounts):

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Plan or Program	Maximum Number of Shares that May Yet be Purchased Under the Plan or Program (a)
August 1, 2006 - August 31, 2006	4	\$ 26.05	4	12,112
September 1, 2006 - September 30, 2006	5	\$ 27.25	5	12,107
October 1, 2006 - October 31, 2006	3	\$ 29.25	3	12,104
Total	12	\$ 27.29	12	

(a) On March 20, 2003, our Board of Directors authorized the repurchase of up to 20 million shares of our common stock, par value \$.01, from time to time, in open market transactions or otherwise, for the purpose of providing shares for our various employee benefit plans. The Board of Directors did not fix an expiration date for the repurchase program.

Except as set forth above, we did not repurchase any of our equity securities during the three-month period ended October 31, 2006.

We have not paid any cash dividends on our common stock to date and expect that, for the foreseeable future, we will not do so; rather, we will follow a policy of retaining earnings in order to finance the continued growth of our business and, from time to time, repurchase shares of our common stock. The payment of dividends is within the discretion of our Board of Directors and any decision to pay dividends in the future will depend upon an

evaluation of a number of factors, including our earnings, capital requirements, our operating and financial condition, and any contractual limitation then in effect. In this regard, our senior subordinated notes contain restrictions on the amount of dividends we may pay on our common stock. In addition, our bank credit agreement requires us to maintain a minimum tangible net worth (as defined in the agreement), which restricts the amount of dividends we may pay. At October 31, 2006, under the most restrictive of these provisions, we could have paid up to approximately \$1.05 billion of cash dividends.

At December 31, 2006, there were approximately 1,547 record holders of our common stock.

[Back to Contents](#)**ITEM 6. SELECTED FINANCIAL DATA**

The following tables set forth selected consolidated financial and housing data at and for each of the five fiscal years in the period ended October 31, 2006. It should be read in conjunction with the Consolidated Financial Statements and Notes thereto, included in this report beginning at page F-1, and Management's Discussion and Analysis of Financial Condition and Results of Operations, included in Item 7 of this report.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

On December 5, 2006, we filed a Current Report on Form 8-K with the SEC that provided financial guidance related to our expected results of operations for our fiscal year ending October 31, 2007. The guidance contained in this report is the same guidance given in the Form 8-K filed on December 5, 2006, and we are not reconfirming or updating that guidance.

OVERVIEW

Beginning in the fourth quarter of fiscal 2005 and continuing throughout fiscal 2006, we experienced a slowdown in new contracts signed. We believe this slowdown is attributable to a decline in consumer confidence, an overall softening of demand for new homes, and an oversupply of homes available for sale. We attribute the reduction in demand to concerns on the part of prospective home buyers about the direction of home prices, due in part to many home builders' advertising price reductions and increased sales incentives, and concerns by the prospective home buyers about being able to sell their existing homes. In addition, we believe speculators and investors are no longer helping to fuel demand. We try to avoid selling homes to speculators, and we generally do not build detached homes without having a signed agreement of sale and receiving a substantial down payment from a buyer. Nonetheless, we have been impacted by an overall increase in the supply of homes available for sale in many markets, as speculators attempt to sell the homes they previously purchased or cancel contracts for homes under construction, and as builders, who, as part of their business strategy, were building homes in anticipation of capturing additional sales in a demand-driven market, attempt to reduce their inventories by lowering prices and adding incentives. In addition, based on the high cancellation rates reported by us and other builders, non-speculative buyer cancellations are also adding to the supply of homes in the marketplace. Of the agreements of sale that home buyers executed during fiscal 2006, 2005 and 2004, they canceled approximately 17.1%, 4.6% and 4.6% of them during fiscal 2006, 2005 and 2004, respectively. When we report contracts signed, the number and value of contracts signed are reported net of any cancellations occurring during the reporting period, whether signed in that reporting period or in a prior period. Only outstanding agreements of sale that have been signed by both the home buyer and us as of the end of the period on which we are reporting are included in backlog. Of the value of backlog reported on October 31, 2005, 2004 and 2003, home buyers subsequently canceled approximately 10.0%, 3.7% and 3.0% of them, respectively.

Despite this slowdown, we remain cautiously optimistic about the future of our business. Our industry demographics remain strong due to the continuing regulation-induced constraints on lot supplies and the growing number of affluent households. We continue to believe that the excess supply of available homes is a short-term phenomenon and that the market environment of tight supply and growing demand will eventually return.

We believe geographic and product diversification, access to lower-cost capital, a versatile and abundant home mortgage market, and improving demographics have in the past and will in the future promote demand for those builders who can control land and persevere through the increasingly difficult regulatory approval process. We believe that this evolution in our industry favors the large publicly traded home building companies with the capital and expertise to control home sites and gain market share. We believe that as the approval process continues to become more difficult, and as the political pressure from no-growth proponents continues to increase, our expertise in taking land through the approval process and our already approved land positions will allow us to grow in the years to come.

Because of the length of time that it takes to obtain the necessary approvals on a property, complete the land improvements on it, and deliver a home after a home buyer signs an agreement of sale, we are subject to many risks. We attempt to reduce certain risks by controlling land for future development through options whenever possible, thus allowing us to obtain the necessary governmental approvals before acquiring title to the land; generally commencing construction of a detached home only after executing an agreement of sale and receiving a substantial down payment from a buyer; and using subcontractors to perform home construction and land development work on a fixed-price basis. In response to current market conditions, we are reevaluating and renegotiating many of our optioned land positions. As a result, we have reduced our land

[Back to Contents](#)

position and ended fiscal 2006 with approximately 73,800 lots controlled, a decline of approximately 19% from our high of approximately 91,200 lots at April 30, 2006. In fiscal 2006, we recognized \$90.9 million of write-downs attributable to land under option related to future communities. In addition, due to the slowdown of home sales, we were required to take impairment charges of approximately \$61.1 million in fiscal 2006 on several communities in which we are currently selling and on land owned.

In the ordinary course of doing business, we must make estimates and judgments that affect decisions on how we operate and on the reported amounts of assets, liabilities, revenues and expenses. These estimates include, but are not limited to, those related to the recognition of income and expenses; impairment of assets; estimates of future improvement and amenity costs; capitalization of costs to inventory; provisions for litigation, insurance and warranty costs; and income taxes. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. On an ongoing basis, we evaluate and adjust our estimates based on the information currently available. Actual results may differ from these estimates and assumptions or conditions.

Fiscal 2006 revenues of \$6.12 billion increased 6% over fiscal 2005 revenues and fiscal 2006 net income of \$687.2 million declined 15% as compared to fiscal 2005 net income. New contracts signed in fiscal 2006 amounted to \$4.46 billion, a decline of 38% compared to fiscal 2005, and backlog at October 31, 2006 declined 25% compared to the backlog at October 31, 2005. Projecting earnings and revenues is difficult, particularly in the current environment. Due to the decline in backlog at October 31, 2006, and the number of agreements we expect to sign in the first half of fiscal 2007, we expect to deliver in fiscal 2007 between 6,300 and 7,300 homes at an average delivered price of between \$660,000 and \$670,000, recognize between \$180 million and \$200 million of revenues using the percentage of completion method of accounting related to several qualifying projects that are under construction, earn net income of between \$260 million and \$340 million, and achieve diluted earnings per share of between \$1.58 and \$2.08.

At October 31, 2006, we were selling from 300 communities compared to 230 communities at October 31, 2005. We expect to be selling from approximately 340 communities at October 31, 2007.

Our revenues have grown on average over 20% per year in the last decade. We have funded this growth through the reinvestment of profits, bank borrowings and capital market transactions. At October 31, 2006, we had \$632.5 million of cash and cash equivalents and approximately \$1.1 billion available under our \$1.5 billion bank revolving credit facility, which extends to March 17, 2011. In March 2006, we entered into a five-year, \$300 million term loan with our banks, and in June 2005, we issued \$300 million of 5.15% Senior Notes due 2015. With our history of success in accessing the bank and public debt markets and our strong cash flow from operations, we believe we have the resources available to grow in years to come.

CRITICAL ACCOUNTING POLICIES

We believe the following critical accounting policies reflect the more significant judgments and estimates used in the preparation of our consolidated financial statements.

Inventory

Inventory is stated at the lower of cost or fair value in accordance with Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (SFAS 144). In addition to direct land acquisition, land development and home construction costs, costs include interest, real estate taxes and direct overhead related to development and construction, which are capitalized to inventories during the period beginning with the commencement of development and ending with the completion of construction.

Once a parcel of land has been approved for development, it generally takes four to five years to fully develop, sell and deliver all the homes in one of our typical communities. Longer or shorter time periods are possible depending on the number of home sites in a community and the sales and delivery pace of the homes in a community. Our master planned communities, consisting of several smaller communities, may take up to 10 years or more to complete. Because our inventory is considered a long-lived asset under U.S. generally accepted accounting principles, we are required, under SFAS 144, to regularly review the carrying

[Back to Contents](#)

value of each of our communities and write down the value of those communities for which we believe the values are not recoverable. When the profitability of a current community deteriorates, the sales pace declines significantly or some other factor indicates a possible impairment in the recoverability of the asset, the asset is reviewed for impairment by comparing the estimated future undiscounted cash flow for the community to its carrying value. If such cash flow is less than the community's carrying value, the carrying value is written down to its estimated fair value by charging cost of revenues in the period the impairment is determined. Fair value is determined by the use of estimates made by management including estimate of future revenues and costs.

In addition, we review all land held for future communities or future sections of current communities, whether owned or under contract, to determine whether or not we expect to proceed with the development of the land as originally contemplated. Based upon this review, we decide (a) as to land that is under a purchase contract but not owned, whether the contract will likely be terminated or renegotiated, and (b) as to land we own, whether the land will likely be developed as contemplated or in an alternative manner, or should be sold. We then further determine which costs that have been capitalized to the property are recoverable and which costs should be written off. We recognized \$152.0 million of write-offs of costs related to current and future communities in fiscal 2006, \$5.1 million in fiscal 2005 and \$7.5 million in fiscal 2004. The write-offs in fiscal 2006 were attributable to the write-off of land deposits and predevelopment costs of land optioned for future communities primarily in California and Florida and the write-down of the carrying cost of several communities primarily located in California and Michigan.

We have a significant number of land purchase contracts, sometimes referred to herein as "options" or "option agreements," and several investments in unconsolidated entities which we evaluate in accordance with the Financial Accounting Standards Board ("FASB") Interpretation No. 46 "Consolidation of Variable Interest Entities, an interpretation of ARB No. 51", as amended by FIN 46R ("FIN 46"). Pursuant to FIN 46, an enterprise that absorbs a majority of the expected losses or receives a majority of the expected residual returns of a variable interest entity ("VIE") is considered to be the primary beneficiary and must consolidate the operations of the VIE. A VIE is an entity with insufficient equity investment or in which the equity investors lack some of the characteristics of a controlling financial interest. For land purchase contracts with sellers meeting the definition of a VIE, we perform a review to determine which party is the primary beneficiary of the VIE. This review requires substantive judgment and estimation. These judgments and estimates involve assigning probabilities to various estimated cash flow possibilities relative to the entity's expected profits and losses and the cash flows associated with changes in the fair value of the land under contract. Because, in most cases, we do not have any ownership interests in the entities with which we contract to purchase land, we generally do not have the ability to compel these entities to provide assistance in our review. At October 31, 2006, we had determined that we were the primary beneficiary of one VIE related to a land purchase contract and had recorded \$74.6 million as inventory and recorded \$67.1 million as a loan payable.

Revenue and Cost Recognition

Traditional Home Sales

Because the construction time for one of our traditional homes is generally less than one year, revenues and cost of revenues from traditional home sales are recorded at the time each home is delivered and title and possession are transferred to the buyer. Closing normally occurs shortly after construction is substantially completed.

Land, land development and related costs, both incurred and estimated to be incurred in the future, are amortized to the cost of homes closed based upon the total number of homes to be constructed in each community. Any changes resulting from a change in the estimated number of homes to be constructed or in the estimated costs subsequent to the commencement of delivery of homes are allocated to the remaining undelivered homes in the community. Home construction and related costs are charged to the cost of homes closed under the specific identification method. The estimated land, common area development and related costs of master planned communities, including the cost of golf courses, net of their estimated residual value, are allocated to individual communities within a master planned community on a relative sales value basis.

[Back to Contents](#)

Any changes resulting from a change in the estimated number of homes to be constructed or in the estimated costs are allocated to the remaining home sites in each of the communities of the master planned community.

Percentage of Completion

We are developing several high-rise/mid-rise projects that will take substantially more than one year to complete. Revenues from these projects are recognized in accordance with SFAS No. 66, "Accounting for Sales of Real Estate" (SFAS 66). Under the provisions of SFAS 66, revenues and costs are recognized using the percentage of completion method of accounting when construction is beyond the preliminary stage, the buyer is committed to the extent of being unable to require a refund except for non-delivery of the unit, sufficient units in the project have been sold to ensure that the property will not be converted to rental property, the sales proceeds are collectible and the aggregate sales proceeds and the total cost of the project can be reasonably estimated. Revenues and costs of individual projects are recognized on the individual project's aggregate value of units for which the home buyers have signed binding agreements of sale, less an allowance for cancellations, and are based on the percentage of total estimated construction costs that have been incurred. Total estimated revenues and construction costs are reviewed periodically, and any change is applied prospectively. The Emerging Issues Task Force (the EITF) recently issued an interpretation of SFAS 66 regarding the evaluation of the collectibility of the sales price from the buyer. See "New Accounting Pronouncements" in Note 1 of the "Notes to Consolidated Financial Statements" for further information.

Land Sales

Land sales revenues and cost of revenues are recorded at the time that title and possession of the property have been transferred to the buyer. We recognize the pro rata share of revenues and cost of revenues of land sales to entities in which we have a 50% or less interest based upon the ownership percentage attributable to the non-Company investors. Any profit not recognized in a transaction reduces our investment in the entity.

OFF-BALANCE SHEET ARRANGEMENTS

We have investments in and advances to several joint ventures, to Toll Brothers Realty Trust Group ("Trust") and to Toll Brothers Realty Trust Group II ("Trust II"). At October 31, 2006, we had investments in and advances to these entities of \$245.7 million, were committed to invest or advance an additional \$369.4 million in the aggregate to these entities if needed and had guaranteed approximately \$150.7 million of these entities' indebtedness and/or loan commitments. See Notes 3 and 12 of the "Notes to the Consolidated Financial Statements", "Investments in and Advances to Unconsolidated Entities" and "Related Party Transactions," for more information regarding these entities. We do not believe that these arrangements, individually or in the aggregate, have or are reasonably likely to have a current or future material effect on our financial condition, results of operations, liquidity or capital resources. Our investments in these entities are accounted for using the equity method.

[Back to Contents](#)**RESULTS OF OPERATIONS**

The following table compares certain income statement items related to our operations (amounts in millions):

Year ended October 31,	2006		2005		2004	
Revenues

Expenses related to early retirement of debt			(4.1)		(8.2)	
	1,126.6		1,323.1		647.4	
Income taxes	439.4		517.0		238.3	
	\$ 687.2		\$ 806.1		\$ 409.1	

Note: Percentages for cost of revenues for traditional home sales, percentage of completion and land sales are based on the corresponding item under revenues. Percentages for interest expense, selling, general and administrative expenses and income from operations are based on total revenues. Amounts may not add due to rounding.

FISCAL 2006 COMPARED TO FISCAL 2005**Traditional Home Sales Revenues and Costs**

Home sales revenues for fiscal 2006 were higher than those for fiscal 2005 by approximately \$185.9 million, or 3%. The increase in revenues was attributable to a 5% increase in the average price of the homes delivered offset in part by a 2% decrease in the number of homes delivered. The increase in the average price of the homes delivered in fiscal 2006 was the result of higher selling prices of homes in backlog at October 31, 2005 compared to the homes in backlog at October 31, 2004 and the delivery in fiscal 2006 of fewer attached homes and age-qualified homes, which have lower average selling prices, as compared to 2005. The decrease in the number of homes delivered was primarily due to the slowdown in new contracts signed in the fourth quarter of fiscal 2005 and the first quarter of fiscal 2006 and a significant number of cancellations of contracts for homes scheduled to be delivered during fiscal 2006 from our backlog at October 31, 2005.

The value of new sales contracts signed was \$4.15 billion (5,812 homes) in fiscal 2006, a 41% decrease compared to the value of contracts signed in fiscal 2005 of \$7.05 billion (10,213 homes). This decrease was primarily attributable to a 43% decrease in the number of new contracts signed despite having a significantly higher number of communities open for sale in fiscal 2006 compared to fiscal 2005. At October 31, 2006 and 2005, we

had 300 and 230 selling communities, respectively. The decrease in the value of new sales contracts signed was partly offset by a 5% increase in the average value of each contract.

[Back to Contents](#)

We believe this slowdown is attributable to a decline in consumer confidence, an overall softening of demand for new homes and an oversupply of homes available for sale. We attribute the reduction in demand to concerns on the part of prospective home buyers about the direction of home prices, due in part to many homebuilders' advertising price reductions and increased sales incentives, and concerns by the prospective home buyer about being able to sell their existing homes. In addition, we believe speculators and investors are no longer helping to fuel demand. We try to avoid selling homes to speculators, and we generally do not build detached homes without having a signed agreement of sale. Nonetheless, we have been impacted by an overall increase in the supply of homes available for sale in many markets as speculators attempt to sell the homes they previously purchased or cancel contracts for homes under construction, and as builders, who, as part of their business strategy, were building homes in anticipation of capturing additional sales in a demand-driven market attempt to reduce their inventories by lowering prices and adding incentives. In addition, based on the high cancellation rates reported by us and by other builders, non-speculative buyer cancellations are also adding to the supply of homes in the marketplace.

Despite this slowdown, we remain cautiously optimistic about the future growth of our business. Our industry demographics remain strong due to the continuing regulation-induced constraints on lot supplies and the growing number of affluent households. We believe that the excess supply of available homes is a short-term phenomenon and that the market environment of tight supply and growing demand will return.

At October 31, 2006, our backlog of traditional homes under contract was \$4.05 billion (5,801 homes), 31% lower than the \$5.84 billion (8,590 homes) backlog at October 31, 2005. The decrease in backlog at October 31, 2006 compared to the backlog at October 31, 2005 was primarily attributable to the decrease in the value of new contracts signed in fiscal 2006 as compared to fiscal 2005 and to the \$185.9 million more of deliveries in fiscal 2006 as compared to fiscal 2005, offset, in part, by a higher backlog at October 31, 2005 as compared to the backlog at October 31, 2004.

Cost of revenues before interest expense as a percentage of home sales revenue was higher in fiscal 2006 as compared to fiscal 2005. The increase was primarily the result of higher inventory write-offs, the costs of land and construction increasing faster than selling prices, higher sales incentives given on the homes delivered in fiscal 2006 as compared to those delivered in fiscal 2005 and higher overhead costs. We recognized \$152.0 million of write-downs and/or write-offs of costs related to current and future communities in fiscal 2006 as compared to \$5.1 million in fiscal 2005. The fiscal 2006 write-offs were attributable primarily to the write-off of deposits and predevelopment costs attributable to a number of land purchase contracts that we decided not to go forward with (primarily in California and Florida) and the write-down of the carrying cost of several active communities (primarily in California and Michigan.)

As we stated in the guidance we provided on December 5, 2006 (which is not being reconfirmed or updated in this report), based on the size of our current backlog and the expected demand for our product, we believe that in fiscal 2007 we will deliver between 6,300 and 7,300 homes and the average delivered price of those homes will be between \$660,000 and \$670,000, and the cost of revenues before interest expense as a percentage of revenues will be between 77.9% and 77.0% as compared to 71.7% for fiscal 2006. Included in the estimate of the costs of revenues in fiscal 2007 is \$60 million for the write-down and/or write-off of costs related to current and future communities although we currently do not know of any required write-downs.

Percentage of Completion Revenues and Costs

We are developing several projects for which we are recognizing revenues and costs using the percentage of completion method of accounting. Revenues and costs of individual projects are recognized on the individual project's aggregate value of units for which home buyers have signed binding agreements of sale and are based on the percentage of total estimated construction costs that have been incurred. Total estimated revenues and construction costs are reviewed periodically and any change is applied to current and future periods. We began recognizing revenue and costs using percentage of completion accounting on several projects in fiscal 2006. In the fiscal 2006, we recognized \$170.1 million of revenues and \$132.3 million of costs before interest expense on these projects. At October 31, 2006, our backlog of homes in communities that we account for using the percentage of completion method of accounting was \$154.3 million (net of \$170.1 million of revenue recognized) compared to \$152.5 million at October 31, 2005.

[Back to Contents](#)

The guidance we gave on December 5, 2006 stated that for fiscal 2007, we believe that revenues recognized under the percentage of completion accounting method will be between \$180 million and \$200 million and costs before interest expense will be approximately 75% of revenues. Due to an expected change in the application of the accounting rules regarding the evaluation of the collectibility of the sales price of a home under SFAS 66, expected revenues under the percentage of completion accounting method will shift from fiscal 2007 to subsequent years. We have estimated that revenues that we had expected to recognize in fiscal 2007 of between \$275 million and \$350 million will be shifted to fiscal 2008 and beyond and that this shift will have the effect of reducing diluted earnings per share in fiscal 2007 of between \$0.22 and \$0.29. See "New Accounting Pronouncements" in Note 1 of "Notes to Consolidated Financial Statements" for further information.

Land Sales Revenues and Costs

We are developing several communities in which we expect to sell a portion of the land to other builders or entities. The amount and profitability of land sales will vary from period to period depending upon the timing of the sale and delivery of the specific land parcels. Land sales were \$8.2 million in fiscal 2006 as compared to \$34.1 million in fiscal 2005. Cost of land sales before interest expense was approximately \$7.0 million in fiscal 2006 as compared to \$24.4 million in fiscal 2005.

The guidance we gave on December 5, 2006 stated that for fiscal 2007, land sales are expected to be approximately \$5 million, and cost of land sales before interest expense is expected to be approximately 80% of land sales revenue.

Interest Expense

We determine interest expense on a specific lot-by-lot basis for our traditional homebuilding operations and on a parcel-by-parcel basis for land sales. As a percentage of total revenues, interest expense varies depending on many factors, including the period of time that we owned the land, the length of time that the homes delivered during the period were under construction, and the interest rates and the amount of debt carried by us in proportion to the amount of our inventory during those periods. Interest expense for projects using the percentage of completion method of revenue recognition is determined based on the total estimated interest for the project and the percentage of total estimated construction costs that have been incurred to date. As a percentage of total revenues, interest was 2.0% in fiscal 2006 as compared to 2.2% in fiscal 2005.

The guidance we gave on December 5, 2006 stated that for fiscal 2007, we expect interest expense as a percentage of total revenues to be approximately 2.1%.

Selling, General and Administrative Expenses ("SG&A")

SG&A spending increased by \$90.6 million, or 19%, in fiscal 2006 as compared to fiscal 2005. The increased spending was principally due to the costs associated with the increase in the number of selling communities that we had during fiscal 2006 as compared to fiscal 2005 and the expensing of stock option awards pursuant to SFAS No. 123 (revised 2004), "Share-Based Payment" in fiscal 2006 of \$26.8 million, which expense we did not have in fiscal 2005.

The guidance we gave on December 5, 2006 stated that we expect that SG&A as a percentage of revenues will be between 11.65% and 11.15% of revenues in fiscal 2007.

Income from Operations

Income from operations decreased \$232.7 million in fiscal 2006 compared to fiscal 2005. As a percentage of total revenues, income from operations was 16.7% in fiscal 2006 as compared to 21.7% in fiscal 2005.

Equity Earnings from Unconsolidated Entities

We are a participant in several joint ventures with unrelated parties and in the Trust and Trust II. We recognize our proportionate share of the earnings from these entities. See Note 3 of "Notes to the

[Back to Contents](#)

Consolidated Financial Statements, Investments in and Advances to Unconsolidated Entities and Note 12, Related Party Transactions for more information regarding our investments in and commitments to these entities. Many of our joint ventures are land development projects or high-rise/mid-rise construction projects and do not generate revenues and earnings for a number of years during the development of the property. Once development is complete, the joint ventures will generally, over a relatively short period of time, generate revenues and earnings until all the assets of the entities are sold. Because there is not a steady flow of revenues and earnings from these entities, the earnings recognized from these entities will vary significantly from year to year. In fiscal 2006, we recognized \$48.4 million of earnings from unconsolidated entities as compared to \$27.7 million in fiscal 2005.

The guidance we gave on December 5, 2006 stated that we expect to recognize approximately \$21.5 million of earnings from our investments in these joint ventures and in Trust and Trust II in fiscal 2007.

Interest and Other Income

Interest and other income was \$52.7 million in fiscal 2006, an increase of \$11.5 million from the \$41.2 million recognized in fiscal 2005. The increase was primarily the result of higher forfeited customer deposits and higher interest income, offset, in part, by lower broker fees and lower income realized from our ancillary businesses.

The guidance we gave on December 5, 2006 stated that for fiscal 2007, we expect interest and other income to be approximately \$36.0 million.

Income Before Income Taxes

Fiscal 2006 income before income taxes was \$1.13 billion, a 15% decrease from the \$1.32 billion realized in fiscal 2005.

Income Taxes

Income taxes were provided at an effective rate of 39.0% for fiscal 2006 compared to 39.1% for fiscal 2005. The difference in rate in fiscal 2006 as compared to fiscal 2005 was primarily due to a manufacturing tax credit that we first became eligible for in fiscal 2006, the reversal of prior year tax provisions in the fiscal 2006 period that we no longer need due to the expiration of tax statutes, offset in part by an increase in the blended state income tax rate in fiscal 2006 compared to fiscal 2005, the recognition of a higher amount of estimated interest expense (net of estimated interest income) in fiscal 2006 compared to fiscal 2005 on expected tax assessments and recoveries due to ongoing tax audits and the effect on the fiscal 2005 rate due to recomputing our net deferred tax liability to reflect the increase in our fiscal 2005 state tax rate.

The guidance we gave on December 5, 2006 stated that we expect that our effective tax rate will be approximately 39.0 % in fiscal 2007.

Geographic Segments

Based on our revised aggregation of operating segments, we have restated fiscal 2005 and 2004 amounts to conform to the fiscal 2006 presentation.

We operate in four geographic segments around the United States: the North, consisting of Connecticut, Illinois, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio and Rhode Island; the Mid-Atlantic, consisting of Delaware, Maryland, Pennsylvania, Virginia and West Virginia; the South, consisting of Florida, North Carolina, South Carolina, Tennessee and Texas; and the West, consisting of Arizona, California, Colorado and Nevada. We stopped selling homes in Tennessee, New Hampshire and Ohio in fiscal 2004, 2004 and 2005, respectively, and delivered its last home in each of those states in fiscal 2004, 2004 and 2006, respectively. The operations in these states were immaterial to the applicable geographic segment.

Edgar Filing: TOLL BROTHERS INC - Form 10-K

[Back to Contents](#)

The following table summarizes by geographic segment total revenues and income before income taxes for each of the years ended October 31, 2006 and 2005 (dollars in millions):

	Revenues				Income before income taxes	
	2006 units	2005 units	2006	2005	2006	2005
North (a)	1,983	1,870	\$ 1,444.2	\$ 1,134.5	\$ 281.9	\$ 240.2
Mid-Atlantic (b)	2,697	3,290	1,777.9	2,062.8	491.8	679.1
South (c)	2,017	1,312	1,192.4	721.1	161.8	81.6
West	1,904	2,297	1,709.0	1,875.0	338.5	450.8
Corporate and other					(147.4)	(128.6)
Total	8,601	8,769	\$ 6,123.5	\$ 5,793.4	\$ 1,126.6	\$ 1,323.1

(a) Includes percentage of completion revenues of \$110.3 million in fiscal 2006 and land revenues of \$0.4 million and \$8.2 million in fiscal 2006 and 2005, respectively.

(b) Includes land revenues of \$0.2 million and \$6.2 million in fiscal 2006 and 2005, respectively.

(c) Includes percentage of completion revenues of \$59.8 million in fiscal 2006 and land revenues of \$7.4 million and \$19.8 million in fiscal 2006 and 2005, respectively.

North

Revenues in fiscal 2006 were higher than those for fiscal 2005 by approximately \$309.7 million, or 27%. The increase in revenues was attributable to the initial recognition of revenue using percentage of completion accounting in two communities of \$110.3 million in fiscal 2006, and a 12% and 6% increase in fiscal 2006 as compared to fiscal 2005 in the average sales price and the number of traditional homes delivered, respectively. The increase in the average price of the homes delivered in fiscal 2006 was primarily the result of higher selling prices of homes in backlog at October 31, 2005 compared to those in backlog at October 31, 2004. The value of new contracts signed in fiscal 2006 was approximately \$1.18 billion, a 22% decline from the \$1.52 billion of contracts signed in fiscal 2005. This decrease is attributable to a 27% decrease in the number of net new contracts signed, despite an increase in the number of selling communities that we had in fiscal 2006 compared to fiscal 2005, offset in part by a 7% increase in the average value of each contract. We had 77 selling communities at October 31, 2006 compared to 60 selling communities at October 31, 2005. The decline in new contracts signed in fiscal 2006 was primarily due to a slowdown in the housing market, which began in the fourth quarter of fiscal 2005 and continued throughout fiscal 2006, and a significantly higher number of contract cancellations in fiscal 2006 than in fiscal 2005.

Income before income taxes in fiscal 2006 was \$281.9 million, an increase of \$41.7 million from the \$240.2 million reported for fiscal 2005. This increase was due to the profits realized on the increased revenues in fiscal 2006, increased income realized from unconsolidated entities in fiscal 2006 compared to fiscal 2005, offset in part by higher costs of revenues, principally from the write-down of communities under development and land owned or controlled for future communities. We recognized inventory write-downs and write-offs of \$46.7 million in fiscal 2006 compared to \$2.7 million in fiscal 2005.

Mid-Atlantic

Revenues in fiscal 2006 were lower than those for fiscal 2005 by approximately \$284.9 million, or 14%. The decrease in revenues was attributable to an 18% decrease in the number of homes delivered (primarily in Virginia), offset in part by a 5% increase in the average sales price of the homes delivered. The decrease in the number of homes delivered was principally due to a 43% decrease in the number of net new contracts signed in fiscal year 2006 as compared to fiscal 2005, partially offset by the higher number of homes in backlog at October 31, 2005 as compared to the backlog at October 31, 2004. The decrease in net new contracts signed in fiscal 2006 as compared to fiscal 2005 was due primarily to weak demand and a significantly higher number of contract cancellations in fiscal 2006 than in fiscal 2005. At October 31, 2006 and 2005, we had 91 and 83 selling

communities, respectively.

[Back to Contents](#)

Income before income taxes in fiscal 2006 was \$491.8 million, a decrease of \$187.3 million from the \$679.1 million reported for fiscal 2005. This decrease was attributable to lower revenues and higher cost of revenues in fiscal 2006 as compared to fiscal 2005. The higher cost of revenues is primarily due to, costs of land and construction increasing faster than selling prices, higher sales incentives given on the homes delivered in fiscal 2006 as compared to those delivered in fiscal 2005 and higher overhead costs. We recognized inventory write-downs and write-offs of \$7.7 million and \$1.4 million in 2006 and 2005, respectively.

South

Revenues in fiscal 2006 were higher than those of fiscal 2005 by approximately \$471.3 million, or 65%. The increase in revenues was attributable to the initial recognition of revenue using percentage of completion accounting for two communities of \$59.8 million in fiscal 2006, and a 54% increase in the number of traditional homes delivered. The increase in the number of homes delivered was primarily due to Florida and Texas, which had a higher number of homes in backlog at October 31, 2005 as compared to October 31, 2004. The value of net new contracts signed in fiscal 2006 was approximately \$800.3 million, a 39% decline from the \$1.3 billion of contracts signed in fiscal 2005. This decline was due to a 44% decrease in the number of new contracts signed, which was primarily the result of weak market conditions in Florida, despite an increase in the number of selling communities in fiscal 2006 as compared to fiscal 2005, and a significantly higher number of contract cancellations in fiscal 2006 than in fiscal 2005, partially offset by a 10% increase in the average selling price of new signed contracts. At October 31, 2006, we had 70 selling communities compared to 49 selling communities at October 31, 2005.

Income before income taxes in fiscal 2006 was \$161.8 million, an increase of \$80.2 million from fiscal 2005 income before income taxes of \$81.6 million. This increase was due to the profits realized on the increased revenues in fiscal 2006, selling, general and administrative costs decreasing as a percentage of revenues as the result of efficiencies gained from the increase in the number of homes delivered and lower cost of revenues as a percentage of total revenues. The lower cost of revenues percentage is principally due to selling prices increasing faster than costs of land and construction, offset in part by higher inventory write-downs and write-offs. We recognized inventory write-downs and write-offs of \$16.6 million in fiscal 2006 compared to \$0.7 million in fiscal 2005.

West

Revenues in fiscal 2006 were lower than those of fiscal 2005 by approximately \$166.0 million, or 9%. The decrease in revenues was attributable to a 17% decrease in the number of homes delivered, offset by a 10% increase in the average sales price. The decrease in the number of homes delivered was primarily due to California which had a lower number of homes in backlog at October 31, 2005 as compared to October 31, 2004, and a significantly higher number of contract cancellations in fiscal 2006 than in fiscal 2005, offset in part by an increase in the number of homes closed in the other states in the geographic segment which had a higher number of homes in backlog at October 31, 2005 as compared to October 31, 2004. At October 31, 2006 and 2005, we had 62 and 38 selling communities, respectively. The increase in the average sales price of the homes delivered in fiscal 2006 was the result of higher selling prices of homes in backlog at October 31, 2005 compared to the homes in backlog at October 31, 2004, and the delivery of fewer lower-priced homes. The value of net new contracts signed in fiscal 2006, approximately \$1.2 billion, decreased 41% from fiscal 2005 new contracts signed of approximately \$2.1 billion. The decline was due primarily to weak demand and higher than normal contract cancellations in fiscal 2006, offset in part by the higher number of selling communities.

Income before income taxes in fiscal 2006 was \$338.5 million, a decrease of \$112.3 million from fiscal 2005 income before income taxes of \$450.8 million. This decrease was due to the decrease in revenues in fiscal 2006, the higher cost of revenues as a percentage of total revenues (principally related to the write-downs and write-offs of communities under development and land owned or controlled for future communities and higher costs related to the inefficiencies related to the slowdown in construction) and higher selling, general and administrative costs, partially offset by increased income realized from unconsolidated entities in fiscal 2006 compared to fiscal 2005. We recognized inventory write-downs and write-offs of \$81.0 million in fiscal 2006 compared to \$0.1 million in fiscal 2005.

[Back to Contents](#)

FISCAL 2005 COMPARED TO FISCAL 2004

Home Sales Revenues and Costs

Home sales revenues in fiscal 2005 of \$5.76 billion (8,769 homes) were higher than the \$3.84 billion (6,627 homes) reported in fiscal 2004 by approximately \$1.92 billion, or 50%. The increase was attributable to a 32% increase in the number of homes delivered and a 13% increase in the average price of the homes delivered. The increase in the number of homes delivered in fiscal 2005 was primarily due to the higher backlog of homes at October 31, 2004 as compared to October 31, 2003, which was primarily the result of a 42% increase in the number of new contracts signed in fiscal 2004 over fiscal 2003, and the 30% increase in the number of new contracts signed in the first six months of fiscal 2005 (5,354 homes) as compared to the first six months of fiscal 2004 (4,107 homes). The increase in the average price of the homes delivered in fiscal 2005 was the result of increased selling prices in our communities and a shift in the location of homes delivered to more expensive areas.

The value of new sales contracts signed in fiscal 2005 was \$7.15 billion (10,372 homes), a 27% increase over the \$5.64 billion (8,684 homes) value of new sales contracts signed in fiscal 2004. The increase in fiscal 2005 was attributable to a 19% increase in the number of new contracts signed and a 6% increase in the average value of each contract, due primarily to the location and size of homes sold and increases in base selling prices. The increase in the number of new contracts signed was attributable to the continued demand for our homes and an increase in the number of communities from which we were selling homes. At October 31, 2005, we were selling from 230 communities compared to 220 communities at October 31, 2004.

The value of new contracts signed in the quarter ended October 31, 2005 increased 4% over the comparable period of fiscal 2004. The increase in the 2005 quarter was attributable to a 3% increase in the average value of each contract signed and a 1% increase in the number of new contracts signed.

We believe that demand for our homes is attributable to an increase in the number of affluent households, the maturation of the baby boom generation, a constricted supply of available new home sites, attractive mortgage rates and the belief of potential customers that the purchase of a home is a stable investment. At October 31, 2005, we had over 83,000 home sites under our control nationwide in markets we consider to be affluent.

At October 31, 2005, our backlog of homes under contract was \$6.01 billion (8,805 homes), 36% higher than the \$4.43 billion (6,709 homes) backlog at October 31, 2004. The increase in backlog at October 31, 2005 compared to the backlog at October 31, 2004 was primarily attributable to a 19% increase in the number of new contracts signed in fiscal 2005 as compared to fiscal 2004, a 6% increase in the average value of each contract signed in fiscal 2005 as compared to fiscal 2004, and the backlog of homes acquired in the acquisition of the Orlando division of Landstar Homes, offset, in part, by a 32% increase in the number of homes delivered in fiscal 2005 compared to fiscal 2004, and a 13% increase in the price of the homes delivered in fiscal 2005 as compared to fiscal 2004.

Home costs as a percentage of home sales revenues decreased by 380 basis points (3.8%) in fiscal 2005 compared to fiscal 2004. The decrease was largely the result of selling prices increasing at a greater rate than costs and efficiencies realized from the increased number of homes delivered.

Land Sales Revenues and Costs

We are developing several communities in which we expect to sell a portion of the land to other builders or entities. The amount of land sales and the profitability of such sales will vary from year to year depending upon the sale and delivery of the specific land parcels. Land sales were \$34.1 million in fiscal 2005 compared to \$22.5 million in fiscal 2004. Cost of land sales was approximately 72% of land sales revenues in fiscal 2005, as compared to approximately 70% in fiscal 2004.

Interest Expense

We determine interest expense on a specific home site-by-home site basis for our home building operations and on a parcel-by-parcel basis for land sales. As a percentage of total revenues, interest expense

[Back to Contents](#)

varies depending upon many factors, including the period of time that we have owned the land, the length of time that the homes delivered during the period were under construction, and the interest rates and the amount of debt carried by us in proportion to the amount of our inventory during those periods.

Interest expense as a percentage of revenues was 2.2% of total revenues in fiscal 2005, slightly lower than the 2.4% of total revenues in fiscal 2004.

Selling, General and Administrative Expenses (SG&A)

SG&A spending increased by \$101.7 million, or 27%, in fiscal 2005 compared to fiscal 2004. The increased spending was principally due to the costs incurred to support the increased levels of construction and sales activity in fiscal 2005 as compared to fiscal 2004 and the continued costs incurred in the search for new land to replace the home sites that were sold during the period and to expand our land position to enable us to grow in the future. As a percentage of revenues, SG&A decreased in fiscal 2005 compared to fiscal 2004.

Income from Operations

Based upon the above, income from operations increased \$633.7 million in fiscal 2005 over fiscal 2004. As a percentage of total revenues, income from operations was 21.7% in fiscal 2005 as compared to 16.2% in fiscal 2004.

Equity Earnings from Unconsolidated Entities

We are a participant in several joint ventures and in the Trust and Trust II. We recognize our proportionate share of the earnings from these entities. See Notes 3 and 12 to the Consolidated Financial Statements, [Investments in and Advances to Unconsolidated Entities] and [Related Party Transactions,] for more information regarding our investments in and commitments to these entities. Many of our joint ventures are land development projects or high-rise/mid-rise construction projects and do not generate revenues and earnings for a number of years during the development of the property. Once development is complete, the joint ventures will generally, over a relatively short period of time, generate revenues and earnings until all the assets of the entities are sold. Because there is not a steady flow of revenues and earnings from these entities, the earnings recognized from these entities will vary significantly from year to year. In fiscal 2005, we recognized \$27.7 million of earnings from unconsolidated entities as compared to \$15.7 million in fiscal 2004.

Interest and Other

In fiscal 2005, interest and other was \$41.2 million, an increase of \$25.8 million from the \$15.4 million recognized in fiscal 2004. The increase was primarily the result of higher interest income and higher income recognized from our ancillary businesses.

Expenses Related to Early Retirement of Debt

We recognized a pretax charge of \$4.1 million in fiscal 2005, representing the premium paid on the early redemption of our 8% Senior Subordinated Notes due 2009, the write-off of unamortized bond issuance costs related to those notes, and the bank loan termination charge related to the repayment of our \$222.5 million bank term loan in June 2005. We recognized a pretax charge of \$8.2 million in fiscal 2004, representing the premium paid on the early redemption of our 8 1/8% Senior Subordinated Notes due 2009, the write-off of unamortized bond issuance costs related to those notes, and the write-off of unamortized debt issuance costs related to our \$575 million bank revolving credit agreement that was replaced by a \$1.2 billion bank revolving credit agreement that expires in July 2009.

Income Before Income Taxes

Income before income taxes increased \$675.7 million in fiscal 2005 over fiscal 2004.

[Back to Contents](#)**Income Taxes**

Income taxes were provided at an effective rate of 39.1% and 36.8% in fiscal 2005 and fiscal 2004, respectively. The difference in the rate in fiscal 2005 compared to the rate in fiscal 2004 was due primarily to a change in our estimated combined federal and state income tax rate before providing for the effect of permanent book-tax differences ("Base Rate") for fiscal 2005 and the impact of recalculating our net deferred tax liability using the new Base Rate. The change in the Base Rate was due to the combination of changes in tax legislation and regulations and an expected shift in income to states with higher tax rates in fiscal 2005. See Note 6 to the Consolidated Financial Statements, "Income Taxes," for additional information regarding the change in the income tax rates and the impact on the financial statements.

Geographic Segments

The following table summarizes by geographic segment total revenues and income before income taxes for years ended October 31, 2005 and 2004 (dollars in millions):

	Revenues				Income before income taxes	
	2005 units	2004 units	2005	2004	2005	2004
North (a)	1,870	1,494	\$ 1,134.5	\$ 846.9	\$ 240.2	\$ 152.5
Mid-Atlantic (b)	3,290	2,398	2,062.8	1,261.8	679.1	329.6
South (c)	1,312	964	721.1	475.6	81.6	44.1
West	2,297	1,771	1,875.0	1,277.6	450.8	243.1
Corporate and other					(128.6)	(121.9)
Total	8,769	6,627	\$ 5,793.4	\$ 3,861.9	\$1,323.1	\$ 647.4

(a) Includes land revenues of \$8.2 million in fiscal 2005.

(b) Includes land revenues of \$6.2 million and \$9.3 million in fiscal 2005 and 2004, respectively.

(c) Includes land revenues of \$19.8 million and \$13.2 million in fiscal 2005 and 2004, respectively.

North

Revenues in fiscal 2005 were higher than those of fiscal 2004 by approximately \$287.6 million, or 34%. The increase in revenues was attributable to a 25% increase in the number of homes delivered and a 6% increase in the average sales price of the homes delivered. The increase in the number of homes delivered in fiscal 2005 was the result of the higher backlog of homes at October 31, 2004 as compared to the backlog at October 31, 2003, which was primarily the result of a 19% increase in the number of new contracts signed in fiscal 2004 over fiscal 2003. This increase in net new signed contracts was primarily due to increased demand and to an increase in the number of selling communities in fiscal year 2004 as compared to fiscal 2003. We had 60 selling communities at October 31, 2005, 67 selling communities at October 31, 2004 and 61 selling communities at October 31, 2003.

Income before income taxes in fiscal 2005 was \$240.2 million, an increase of \$87.7 million from fiscal 2004 income before income taxes of \$152.5 million. This increase was due to the profits realized on the increased sales revenues in fiscal 2005, a decrease in cost of revenues as a percentage of total revenues in fiscal 2005 as compared to fiscal 2004 and increased income realized from unconsolidated entities in fiscal 2005 compared to fiscal 2004. The decrease in the cost of revenues percentage was largely the result of selling prices increasing faster than costs and efficiencies realized from the increased number of homes delivered.

Mid-Atlantic

Revenues in fiscal 2005 were higher than those of fiscal 2004 by approximately \$801.0 million, or 63%. The increase in revenues was attributable to a 37% increase in the number of homes delivered and a 20% increase in the average sales price of the homes delivered. The increase in the number of homes delivered in fiscal 2005 was the result of the higher backlog of homes at October 31, 2004 as compared to the backlog at October 31, 2003,

which was primarily the result of a 27% increase in the number of new contracts signed in

[Back to Contents](#)

fiscal 2004 over fiscal 2003. This increase in new signed contracts was primarily due to increased demand and to an increase in the number of selling communities in fiscal year 2004 as compared to fiscal 2003. At October 31, 2005, 2004 and 2003, we had 83, 70 and 59 selling communities, respectively.

Income before income taxes in fiscal 2005 was \$679.1 million, an increase of \$349.5 million from fiscal 2004 income before income taxes of \$329.6 million. This increase was due to the profits realized on the increased sales revenues in fiscal 2005 and a decrease in cost of revenues as a percentage of total revenues in fiscal 2005 as compared to fiscal 2004. The decrease in the cost of revenues percentage was largely the result of selling prices increasing faster than costs and efficiencies realized from the increased number of homes delivered.

South

Revenues in fiscal 2005 were higher than those of fiscal 2004 by approximately \$245.5 million, or 52%. The increase in revenues was attributable to a 36% increase in the number of homes delivered, a 11% increase in the average sales price of the homes delivered and an increase in land sales of \$6.6 million. The increase in the number of homes delivered in fiscal 2005 was primarily the result of a 82% increase in number of new contracts signed in fiscal 2004 over fiscal 2003, resulting in a higher backlog of homes at October 31, 2004 as compared to October 31, 2003, and the acquisition of Landstar Homes, Central Florida Division in June 2005 and its related backlog of homes at the date of acquisition. We had 49 selling communities at October 31, 2005, 44 selling communities at October 31, 2004 and 41 selling communities at October 31, 2003.

Income before income taxes in fiscal 2005 was \$81.6 million, an increase of \$37.5 million from fiscal 2004 income before income taxes of \$44.1 million. This increase was due to the profits realized on the increased sales revenues in fiscal 2005, a decrease in cost of revenues as a percentage of total revenues in fiscal 2005 as compared to fiscal 2004 and increased income realized from unconsolidated entities in fiscal 2005 compared to fiscal 2004. The decrease in the cost of revenues percentage was largely the result of selling prices increasing faster than costs and efficiencies realized from the increased number of homes delivered.

West

Revenues in fiscal 2005 were higher than those of fiscal 2004 by approximately \$597.4 million, or 47%. The increase in revenues was attributable to a 30% increase in number of homes delivered and a 13% increase in average sales price of the homes delivered. The increase in the number of homes delivered in fiscal 2005 was the result of the higher backlog of homes at October 31, 2004 as compared to the backlog at October 31, 2003, which was primarily the result of a 64% increase in the number of new contracts signed in fiscal 2004 over fiscal 2003. The increase in the number of new contracts signed in fiscal 2005 was primarily due to increased demand for our product. At October 31, 2005, 2004 and 2003, we had 38, 39 and 39 selling communities, respectively.

Income before income taxes in fiscal 2005 was \$450.8 million, an increase of \$207.7 million from fiscal 2004 income before income taxes of \$243.1 million. This increase was due to the profits realized on the increased sales revenues in fiscal 2005 and a decrease in cost of revenues as a percentage of total revenues in fiscal 2005 as compared to fiscal 2004, offset by a decrease in income realized from unconsolidated entities in fiscal 2005 compared to fiscal 2004. The decrease in the cost of revenues percentage was largely the result of selling prices increasing faster than costs and efficiencies realized from the increased number of homes delivered.

CAPITAL RESOURCES AND LIQUIDITY

Funding for our business has been provided principally by cash flow from operating activities, unsecured bank borrowings and the public debt and equity markets. We have used our cash flow from operating activities, bank borrowings and the proceeds of public debt and equity offerings to acquire additional land for new communities, fund additional expenditures for land development, fund construction costs needed to meet the requirements of our backlog and the increasing number of communities in which we are offering homes for sale, invest in unconsolidated entities, repurchase our stock, and repay debt.

We were a net user of cash in our operating activities in fiscal 2006 due primarily to increased spending for land and construction in progress. Cash flow from operating activities increased in fiscal 2005 compared to fiscal 2004 and in fiscal 2004 compared to fiscal 2003. These increases were primarily the result of our strong revenue growth in fiscal 2005 and fiscal 2004.

We expect that we will continue to be a net user of cash in our operating activities in fiscal 2007. We expect that our inventory will continue to increase, as we purchase land that we currently have under contract or place under contract in the future. We are currently negotiating and searching for additional opportunities to obtain control of land for future communities. At October 31, 2006, the aggregate purchase price of land parcels under option and purchase agreements was approximately \$2.96 billion (including \$1.22 billion of land to be acquired from joint ventures which we have invested in, made advances to or made loan guarantees on behalf of), of which we had paid or deposited approximately \$173.1 million and have \$164.4 million invested in the joint ventures.

In general, cash flow from operating activities assumes that, as each home is delivered, we will purchase a home site to replace it. Because we own several years' supply of home sites, we do not need to buy home sites immediately to replace the ones delivered. In addition, we generally do not begin construction of our traditional single-family detached homes until we have a signed contract with the home buyer, although in fiscal 2006, due to an extremely high cancellation rate of customer contracts and the increase in the number of attached home communities that we are operating from, the number of speculative homes in our inventory has increased significantly. In fiscal 2006, the value of new contracts signed with home buyers decreased by 38% from fiscal 2005. Should our business continue to decline significantly, we believe that our inventory would decrease, as we complete and deliver the homes under construction but do not commence construction of as many new homes, resulting in a temporary increase in our cash flow from operations. In addition, we might continue to delay or curtail our acquisition of additional land, as we did in the later part of fiscal 2006, which would further reduce our inventory levels and cash needs. We decreased our home sites owned and controlled by approximately 19% from April 30, 2006 to October 31, 2006 in response to the deterioration of the housing market.

During the past three fiscal years, we have had a significant amount of cash invested in either short-term cash equivalents or short-term interest-bearing marketable securities. In addition, we have made a number of investments in unconsolidated entities related to the acquisition and development of land for future home sites or in entities that are constructing or converting apartment buildings into luxury condominiums. Our investment activities related to marketable securities and investments in and distributions of investments from unconsolidated entities are contained in the Consolidated Statements of Cash Flows in the section "Cash flow from investing activities."

We have a \$1.8 billion credit facility consisting of a \$1.5 billion unsecured revolving credit facility and a \$300 million term loan facility (collectively, the "Credit Facility") with 33 banks, which extends to March 2011. At October 31, 2006, interest was payable on borrowings under the revolving credit facility at 0.475% (subject to adjustment based upon our corporate debt rating and leverage ratios) above the Eurodollar rate or at other specified variable rates as selected by us from time to time. At October 31, 2006, we had no outstanding borrowings against the revolving credit facility but had letters of credit of approximately \$408.2 million outstanding under it. Under the term loan facility, interest is payable at 0.50% (subject to adjustment based upon our corporate debt rating and leverage ratios) above the Eurodollar rate or at other specified variable rates as selected by us from time to time. At October 31, 2006, interest was payable on the \$300 million term loan at 5.89%. Prior to our expanding our credit facility to encompass a term loan that provides outstanding borrowings under our Credit Facility, we had periodically maintained a loan balance

[Back to Contents](#)

outstanding on our revolving credit facility; such borrowing was purely elective by us and was not required by the terms of our revolving credit facility.

To reduce borrowing costs, extend the maturities of our long-term debt and raise additional funds for general corporate purposes, during the last four fiscal years we issued four series of senior notes aggregating \$1.15 billion, and used the proceeds to redeem \$470 million of senior subordinated notes and, together with other available cash, to repay a \$222.5 million bank term loan. These financing activities are contained in the Consolidated Statements of Cash Flows in the section Cash flow from financing activities.

We believe that we will be able to continue to fund our operations and meet our contractual obligations through a combination of existing cash resources and our existing sources of credit and the public debt markets.

CONTRACTUAL OBLIGATIONS

The following table summarizes our estimated contractual obligations at October 31, 2006 (amounts in millions):

	2007	2008 - 2009	2010 - 2011	Thereafter	Total
Senior and senior subordinated notes (a)	\$ 94.6	\$ 189.4	\$ 381.1	\$ 1,437.0	\$ 2,102.1
Loans payable (a)	194.0	115.7	556.9	14.0	880.6
Mortgage company warehouse loan (a)	123.6				123.6
Operating lease obligations	18.8	25.5	13.3	26.5	84.1
Purchase obligations (b)	1,234.3	1,035.8	411.9	658.9	3,340.9
Retirement plans (c)	5.3	6.9	6.5	33.4	52.1
Other	0.7	1.4	0.7		2.8
	<u>\$ 1,671.3</u>	<u>\$ 1,374.7</u>	<u>\$ 1,370.4</u>	<u>\$ 2,169.8</u>	<u>\$ 6,586.2</u>

(a) Amounts include estimated annual interest payments until maturity of the debt. Of the amounts indicated, \$1.5 billion of the senior and senior subordinated notes, \$736.9 million of loans payable, \$119.7 million of the mortgage company warehouse loan and \$43.6 million of accrued interest were recorded on the October 31, 2006 Consolidated Balance Sheet.

(b) Amounts represent our expected acquisition of land under options or purchase agreements and the estimated remaining amount of the contractual obligation for land development agreements secured by letters of credit and surety bonds.

(c) Amounts represent our obligations under our 401(k), deferred compensation and supplemental executive retirement plans. Of the total amount indicated, \$31.0 million has been recorded on the October 31, 2006 Consolidated Balance Sheet.

INFLATION

The long-term impact of inflation on us is manifested in increased costs for land, land development, construction and overhead, as well as in increased sales prices. We generally contract for land significantly before development and sales efforts begin. Accordingly, to the extent land acquisition costs are fixed, increases or decreases in the sales prices of homes may affect our profits. Because the sales price of each of our homes is fixed at the time a buyer enters into a contract to acquire a home, and because we generally contract to sell our homes before we begin construction, any inflation of costs in excess of those anticipated may result in lower gross margins. We generally attempt to minimize that effect by entering into fixed-price contracts with our subcontractors and material suppliers for specified periods of time, which generally do not exceed one year.

In general, housing demand is adversely affected by increases in interest rates and housing costs. Interest rates, the length of time that land remains in inventory and the proportion of inventory that is financed affect our interest costs. If we are unable to raise sales prices enough to compensate for higher costs, or if mortgage interest rates increase significantly, affecting prospective buyers' ability to adequately finance home

[Back to Contents](#)

purchases, our revenues, gross margins and net income would be adversely affected. Increases in sales prices, whether the result of inflation or demand, may affect the ability of prospective buyers to afford new homes.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk primarily due to fluctuations in interest rates. We utilize both fixed-rate and variable-rate debt. For fixed-rate debt, changes in interest rates generally affect the fair market value of the debt instrument, but not our earnings or cash flow. Conversely, for variable-rate debt, changes in interest rates generally do not affect the fair market value of the debt instrument but do affect our earnings and cash flow. We do not have the obligation to prepay fixed-rate debt prior to maturity, and, as a result, interest rate risk and changes in fair market value should not have a significant impact on such debt until we are required to refinance such debt.

At October 31, 2006, our debt obligations, principal cash flows by scheduled maturity, weighted-average interest rates, and estimated fair value were as follows (amounts in thousands):

Fiscal Year of Expected Maturity	Fixed-Rate Debt		Variable-Rate Debt (a)(b)	
	Amount	Weighted-Average Interest Rate	Amount	Weighted-Average Interest Rate
2007	\$ 154,295	7.24%	\$ 119,855	6.53%
2008	47,131	5.70%	150	3.62%
2009	3,178	6.34%	150	3.62%
2010	800	10.00%	148,086	6.09%
2011	269,150	7.76%	300,150	5.89%
Thereafter	1,300,849	6.01%	12,845	3.62%
Discount	(8,833)			
Total	\$ 1,766,570	6.70%	\$ 581,236	6.02%
Fair value at October 31, 2006	\$ 1,726,453		\$ 581,236	

(a) We have a \$1.8 billion credit facility consisting of a \$1.5 billion unsecured revolving credit facility and a \$300 million term loan facility (collectively, the "Credit Facility") with 33 banks, which extends to March 17, 2011. At October 31, 2006, interest was payable on borrowings under the revolving credit facility at 0.475% (subject to adjustment based upon our corporate debt rating and leverage ratios) above the Eurodollar rate or at other specified variable rates as selected by us from time to time. At October 31, 2006, we had no outstanding borrowings against the revolving credit facility, but had letters of credit of approximately \$408.2 million outstanding under it. Under the term loan facility, interest is payable at 0.50% (subject to adjustment based upon our corporate debt rating and leverage ratios) above the Eurodollar rate or at other specified variable rates as selected by us from time to time. At October 31, 2006, interest was payable on the \$300 million term loan at 5.89%.

(b) Our mortgage subsidiary has a \$125 million line of credit with four banks to fund mortgage originations. The line is due within 90 days of demand by the banks and bears interest at the banks' overnight rate plus an agreed-upon margin. At October 31, 2006, the subsidiary had \$119.7 million outstanding under the line at an average interest rate of 6.53%. Borrowings under this line are included in the fiscal 2007 maturities. Based upon the amount of variable-rate debt outstanding at October 31, 2006, and holding the variable-rate debt balance constant, each 1% increase in interest rates would increase the interest incurred by us by approximately \$5.8 million per year.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Reference is made to the financial statements, listed in Item 15(a)(1) and (2), which appear at pages F-1 through F-35 of this report and which are incorporated herein by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable

ITEM 9A. CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Our chief executive officer and chief financial officer, with the assistance of management, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this report (the "Evaluation Date"). Based on that evaluation, our chief executive officer and chief financial officer concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective to ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Annual Report on Internal Control Over Financial Reporting and Attestation Report of the Independent Registered Public Accounting Firm

Management's Report on Internal Control Over Financial Reporting and the report of our independent registered public accounting firm on our management's assessment of internal control over financial reporting are incorporated herein from pages F-1 and F-2, respectively.

Changes in Internal Control Over Financial Reporting

There has not been any change in our internal control over financial reporting during our quarter ended October 31, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None

[Back to Contents](#)**PART III****ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF REGISTRANT**

The information required by this item for executive officers is set forth under the heading "Executive Officers of the Registrant" in Part I, Item 4A of this report. The other information required by this item will be included in our Proxy Statement for the 2007 Annual Meeting of Stockholders (the "2007 Proxy Statement") and is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required in this item will be included in the 2007 Proxy Statement and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Except as set forth below, the information required in this item will be included in the 2007 Proxy Statement and is incorporated herein by reference.

The following table provides information as of October 31, 2006 with respect to compensation plans (including individual compensation arrangements) under which our equity securities are authorized for issuance. All share and per share information has been adjusted and restated to reflect a two-for-one stock split distributed in the form of a stock dividend on July 8, 2005.

Equity Compensation Plan Information

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (in thousands)	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column(a))(1) (in thousands)
	(a)	(b)	(c)
Equity compensation plans approved by security holders	25,178	\$ 12.70	8,462
Equity compensation plans not approved by security holders			
Total	25,178	\$ 12.70	8,462

(1) Our Stock Incentive Plan (1998) provides for automatic increases each November 1 in the number of shares available for grant by 2.5% of the number of shares issued (including treasury shares.) This plan restricts the number of shares available for grant at any one time to a maximum of ten million shares.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information required in this item will be included in the 2007 Proxy Statement and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required in this item will be included in the 2007 Proxy Statement and is incorporated herein by reference.

**ITEM 8. Financial Statements and Supplementary Data
Management's Annual Report on Internal Control Over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in the Securities Exchange Act Rule 13a-15(f). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our principal executive officer and our principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation under the framework in *Internal Control—Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of October 31, 2006.

Our management's assessment of the effectiveness of internal control over financial reporting as of October 31, 2006 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report, which is included herein.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of Toll Brothers, Inc.

We have audited management's assessment, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting, that Toll Brothers, Inc. maintained effective internal control over financial reporting as of October 31, 2006, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Toll Brothers, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Toll Brothers, Inc. maintained effective internal control over financial reporting as of October 31, 2006, is fairly stated, in all material respects, based on the COSO criteria. Also, in our opinion, Toll Brothers, Inc. maintained, in all material respects, effective internal control over financial reporting as of October 31, 2006, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Toll Brothers, Inc. and subsidiaries as of October 31, 2006 and 2005, and the related consolidated statements of income and cash flows for each of the three years in the period ended October 31, 2006 of Toll Brothers, Inc. and our report dated December 20, 2006 expressed an unqualified opinion thereon.

Ernst & Young LLP

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Toll Brothers, Inc.

We have audited the accompanying consolidated balance sheets of Toll Brothers, Inc. and subsidiaries as of October 31, 2006 and 2005, and the related consolidated statements of income and cash flows for each of the three years in the period ended October 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Toll Brothers, Inc. and subsidiaries at October 31, 2006 and 2005, and the consolidated results of their operations and their cash flows for each of the three years in the period ended October 31, 2006, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 13 to the consolidated financial statements, the Company has restated its segment disclosures for fiscal years ended October 31, 2005 and 2004.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Toll Brothers, Inc.'s internal control over financial reporting as of October 31, 2006, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated December 20, 2006 expressed an unqualified opinion thereon.

As discussed in Note 8 to the consolidated financial statements, the Company changed its method of accounting for stock-based compensation effective November 1, 2005.

Notes to Consolidated Financial Statements

1. Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements include the accounts of Toll Brothers, Inc. (the "Company"), a Delaware corporation, and its majority-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated. Investments in 50% or less owned partnerships and affiliates are accounted for using the equity method unless it is determined that the Company has effective control of the entity, in which case the entity would be consolidated.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Revenue and Cost Recognition

Traditional Home Sales

The Company is primarily engaged in the development, construction and sale of residential homes. Because the construction time of one of the Company's traditional homes is generally less than one year, revenues and cost of revenues are recorded at the time each home sale is closed and title and possession have been transferred to the buyer. Closing normally occurs shortly after construction is substantially completed.

Land, land development and related costs (both incurred and estimated to be incurred in the future) are amortized to the cost of homes closed based upon the total number of homes the Company expects to construct in each community. Any changes resulting from a change in the estimated number of homes to be constructed or a change in estimated costs subsequent to the commencement of delivery of homes are allocated to the remaining undelivered homes in the community. Home construction and related costs are charged to the cost of homes closed under the specific identification method.

The estimated land, common area development and related costs of master planned communities (including the cost of golf courses, net of their estimated residual value) are allocated to individual communities within a master planned community on a relative sales value basis. Any changes resulting from a change in the estimated number of homes to be constructed or a change in estimated costs are allocated to the remaining home sites in each of the communities of the master planned community.

Percentage of Completion

The Company is developing several high-rise/mid-rise projects that will take substantially more than one year to complete. Revenues are recognized in accordance with Statement of Financial Accounting Standards ("SFAS") No. 66, "Accounting for Sales of Real Estate" (SFAS 66). Under the provisions of SFAS 66, revenues and costs are to be recognized using the percentage of completion method of accounting when construction is beyond the preliminary stage, the buyer is committed to the extent of being unable to require a refund except for non-delivery of the unit, sufficient units in the project have been sold to ensure that the property will not be converted to rental property, the sales prices are collectible and the aggregate sales proceeds and the total cost of the project can be reasonably estimated. Revenues and costs of individual projects are recognized on an individual project's aggregate value of units for which home buyers have signed binding agreements of sale, less an allowance for cancellations, and are based on the percentage of total estimated construction costs that have been incurred. Total estimated revenues and construction costs are reviewed periodically and any changes are applied prospectively. The Emerging Issues Task Force (the "EITF") recently issued, and the Financial Accounting Standards Board (the "FASB") has ratified, subject to a comment period, an interpretation of SFAS 66 regarding the evaluation of collectibility of the sales price from the buyer. See "New Accounting Pronouncements" in this Note for further information.

[Back to Contents](#)

Land Sales

Land sales revenues and cost of revenues are recorded at the time that title and possession of the property have been transferred to the buyer. The Company recognizes the pro rata share of revenues and cost of revenues of land sales to entities in which the Company has a 50% or less interest based upon the ownership percentage attributable to the non-Company investors. Any profit not recognized in a transaction reduces the Company's investment in the entity.

Cash and Cash Equivalents

Liquid investments or investments with original maturities of three months or less are classified as cash equivalents. The carrying value of these investments approximates their fair value.

Property, Construction and Office Equipment

Property, construction and office equipment are recorded at cost and are stated net of accumulated depreciation of \$97.8 million and \$78.7 million at October 31, 2006 and 2005, respectively. Depreciation is recorded using the straight-line method over the estimated useful lives of the assets.

Inventory

Inventory is stated at the lower of cost or fair value in accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS 144). In addition to direct land acquisition, land development and home construction costs, costs include interest, real estate taxes and direct overhead related to development and construction, which are capitalized to inventories during the period beginning with the commencement of development and ending with the completion of construction.

Once a piece of land has been approved for development, it generally takes four to five years to fully develop, sell and deliver all the homes in one of the Company's typical communities. Longer or shorter time periods are possible depending on the number of home sites in a community and the sales and delivery pace of the homes in that community. The Company's master planned communities, consisting of several smaller communities, may take up to 10 years or more to complete. Because the Company's inventory is considered a long-lived asset under U.S. generally accepted accounting principles, the Company is required, under SFAS 144, to review the carrying value of each of its communities and write down the value of those communities to the extent to which it believes the values are not recoverable. When the profitability of a current community deteriorates, the sales pace declines significantly or some other factor indicates a possible impairment in the recoverability of the asset, the asset is reviewed for impairment by comparing the estimated future undiscounted cash flow for the community to its carrying value. If such cash flow is less than the community's carrying value, the carrying value is written down to its estimated fair value by charging cost of revenues in the period the impairment is determined. Fair value is determined by the use of estimates made by management, based upon its judgment at the time the estimate is made, including estimate of future sales trends, revenues and costs.

In addition, the Company reviews all the land held for future communities or future sections of current communities, whether owned or under contract, to determine whether or not it expects to proceed with the development of the land, and, if so, whether it will be developed in the manner originally contemplated. Based upon this review, the Company decides (a) as to land that is under a purchase contract but not owned, whether the contract will be terminated or renegotiated, and (b) as to land the Company owns, whether the land will likely be developed as contemplated or in an alternative manner, or should be sold. The Company then further determines which costs that have been capitalized to the property are recoverable and which costs should be written off.

The Company has a significant number of land purchase contracts, sometimes referred to as "options" or "option agreements," and investments in unconsolidated entities which it evaluates in accordance with FASB Interpretation No. 46, "Consolidation of Variable Interest Entities, an interpretation of ARB No. 51" as amended by FIN 46R (FIN 46). Pursuant to FIN 46, an enterprise that absorbs a majority of the expected losses or receives a majority of the expected residual returns of a variable interest entity (VIE) is considered to be the primary beneficiary and must consolidate the operations of the VIE. A VIE is an entity

[Back to Contents](#)

with insufficient equity investment or in which the equity investors lack some of the characteristics of a controlling financial interest. For land purchase contracts with sellers meeting the definition of a VIE, the Company performs a review to determine which party is the primary beneficiary of the VIE. This review requires substantive judgment and estimation. These judgments and estimates involve assigning probabilities to various estimated cash flow possibilities relative to the entity's expected profits and losses and the cash flows associated with changes in the fair value of the land under contract. Because, in most cases, the Company does not have any ownership interests in the entities with which it contracts to purchase land, it generally does not have the ability to compel these entities to provide assistance in its review.

The Company capitalizes certain project marketing costs and charges them against income as homes are closed.

Investments in and Advances to Unconsolidated Entities

The Company is a party to several joint ventures with independent third parties to develop and sell land that was owned by its joint venture partners. The Company recognizes its proportionate share of the earnings from the sale of home sites to other builders. The Company does not recognize earnings from the home sites it purchases from these ventures, but reduces its cost basis in the home sites by its share of the earnings from those home sites.

The Company is also a party to several other joint ventures, effectively owns one-third of the Toll Brothers Realty Trust Group (["Trust"]) and owns 50% of Toll Brothers Realty Trust Group II (["Trust II"]). The Company recognizes its proportionate share of the earnings of these entities.

Mortgage Loans Receivable

Mortgage loans, classified as held for sale, include the value of mortgage loans funded to borrowers plus the deferral of expenses directly associated with the loans less any points collected at closing. The carrying value of these loans approximates their fair value.

Treasury Stock

Treasury stock is recorded at cost. Issuance of treasury shares is accounted for on a first-in, first-out basis. Differences between the cost of treasury shares and the re-issuance proceeds are charged to additional paid-in capital.

Advertising Costs

The Company expenses advertising costs as incurred. Advertising costs were \$36.0 million, \$24.0 million and \$20.8 million for the years ended October 31, 2006, 2005 and 2004, respectively.

Warranty Costs

The Company provides all of its home buyers with a limited warranty as to workmanship and mechanical equipment. The Company also provides many of its home buyers with a limited ten-year warranty as to structural integrity. The Company accrues for expected warranty costs at the time each home is closed and title and possession have been transferred to the buyer. Costs are accrued based upon historical experience.

Insurance Costs

The Company accrues for the expected costs associated with the deductibles and self-insured amounts under its various insurance policies.

Segment Reporting

SFAS No. 131, ["Disclosures about Segments of an Enterprise and Related Information,"] establishes standards for the manner in which public enterprises report information about operating segments. The Company has

determined that its home building operations primarily involve four reportable geographic

F-9

[Back to Contents](#)

segments: North, Mid-Atlantic, South and West. The states comprising each geographic segment are as follows:

North:	Connecticut, Illinois, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio and Rhode Island
Mid-Atlantic	Delaware, Maryland, Pennsylvania, Virginia and West Virginia
South:	Florida, North Carolina, South Carolina, Tennessee and Texas
West:	Arizona, California, Colorado and Nevada

The Company stopped selling homes in Tennessee, New Hampshire and Ohio in fiscal 2004, 2004 and 2005, respectively, and delivered its last home in each of those states in fiscal 2004, 2004 and 2006, respectively. The operations in these states were immaterial to the applicable geographic segment.

Goodwill and Other Intangible Assets

Intangible assets, including goodwill, that are not subject to amortization are tested for impairment and possible write-down on an annual basis. At October 31, 2006 and 2005, the Company had \$12.2 million of goodwill.

Acquisitions

In June 2005, the Company acquired substantially all of the assets of the home building operations of the Central Florida Division of Landstar Homes (□Landstar□). Landstar designed, constructed, marketed and sold homes in the Orlando metropolitan area. For the full calendar year 2005, Landstar anticipated delivering approximately 520 homes and producing revenues of approximately \$150 million. Of the approximately \$209.0 million (566 homes) of homes sold but not delivered at the acquisition date of Landstar, the Company delivered approximately \$66.0 million (202 homes) of homes between the acquisition date and October 31, 2005. Under purchase accounting rules, the Company allocated a portion of the purchase price to the unrealized profit on these homes at the acquisition date. The Company did not recognize revenues on \$21.3 million (73 homes) of home deliveries in the quarter ended July 31, 2005 but reduced the value of the acquired inventory by the \$21.3 million. The acquisition had a minimal impact on the Company□s earnings in fiscal 2005.

In January 2004, the Company entered into a joint venture in which it had a 50% interest with an unrelated party to develop Maxwell Place, a luxury condominium community of approximately 800 units in Hoboken, New Jersey. In November 2005, the Company acquired its partner□s 50% equity ownership interest in this joint venture. As a result of the acquisition, the Company now owns 100% of the joint venture and the joint venture has been included as a consolidated subsidiary of the Company as of the acquisition date. As of the acquisition date, the joint venture had open contracts of sale to deliver 165 units with a sales value of approximately \$128.3 million. The Company□s investment in and subsequent purchase of the partner□s interest in the joint venture was not material to the financial position of the Company. The Company is recognizing revenue and costs related to a portion of this project using the percentage of completion method of accounting.

The acquisition agreements under which the above assets were purchased provide for contingent payments to the respective sellers if post-closing operations exceed specified levels of financial performance as provided in the agreements. The acquisition prices paid at closing, together with any contingent payments we are obligated to make for the acquisitions, were not material to the financial position of the Company.

New Accounting Pronouncements

On December 16, 2004, the FASB issued SFAS No. 123 (revised 2004), □Share-Based Payment□ (□SFAS 123R□). In April 2005, the Securities and Exchange Commission (the □SEC□) adopted a rule permitting implementation of SFAS 123R at the beginning of the fiscal year commencing after June 15, 2005. Under the provisions of SFAS 123R, an entity is required to treat all stock-based compensation as a cost that is reflected in the financial statements. The Company was required to adopt SFAS 123R beginning in its fiscal quarter ended January 31, 2006. The Company adopted SFAS 123R using the modified prospective method

[Back to Contents](#)

whereby the Company recognized the expense only for periods beginning after October 31, 2005. See Note 8, [Stock Based Benefit Plans](#), for information regarding expensing of stock options in fiscal 2006 and for pro forma information regarding the Company's expensing of stock options for fiscal 2005 and 2004.

In June 2005, EITF released Issue No. 04-5 [Determining Whether a General Partner, or the General Partner as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights](#) ([EITF 04-5](#)). EITF 04-5 provides guidance in determining whether a general partner controls a limited partnership and therefore should consolidate the limited partnership. EITF 04-5 states that the general partner in a limited partnership is presumed to control that limited partnership and that the presumption may be overcome if the limited partners have either (1) the substantive ability to dissolve or liquidate the limited partnership or otherwise remove the general partner without cause, or (2) substantive participating rights. The effective date for applying the guidance in EITF 04-5 was (1) June 29, 2005 for all new limited partnerships and existing limited partnerships for which the partnership agreement was modified after that date, and (2) no later than the beginning of the first reporting period in fiscal years beginning after December 15, 2005, for all other limited partnerships. Implementation of EITF 04-5 did not have a material impact on the Company's financial position in fiscal 2005.

In June 2006, the FASB issued FASB Interpretation No. 48, [Accounting for Uncertainty in Income Taxes](#) ([FIN 48](#)). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in accordance with SFAS No. 109, [Accounting for Income Taxes](#) and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 will be effective for the Company's fiscal year beginning November 1, 2007. The Company is currently reviewing the effect FIN 48 will have on its financial statements.

In September 2006, the FASB issued SFAS No. 158, [Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132\(R\)](#) ([SFAS 158](#)). SFAS 158 requires the Company to (a) recognize in its statement of financial position the overfunded or underfunded status of a defined benefit postretirement plan measured as the difference between the fair value of plan assets and the benefit obligation, (b) recognize as a component of other comprehensive income, net of tax, the actuarial gains and losses and the prior service costs and credits that arise during the period, (c) measure defined benefit plan assets and defined benefit plan obligations as of the date of the Company's statement of financial position, and (d) disclose additional information about certain effects on net periodic benefit costs in the upcoming fiscal year that arise from the delayed recognition of the actuarial gains and losses and the prior service costs and credits. SFAS 158 is effective for the Company's fiscal year beginning November 1, 2007. The Company does not expect that adoption of SFAS 158 will have a material effect on its financial statements.

In September 2006, the EITF issued EITF Issue No. 06-8, [Applicability of the Assessment of a Buyer's Continuing Investment under SFAS No. 66 for the Sale of Condominiums](#) ([EITF 06-8](#)). EITF 06-8 states that in assessing the collectibility of the sales price pursuant to paragraph 37(d) of SFAS 66, an entity should evaluate the adequacy of the buyer's initial and continuing investment to conclude that the sales price is collectible. If an entity is unable to meet the criteria of paragraph 37, including an assessment of collectibility using the initial and continuing investment tests described in paragraphs 8-12 of SFAS 66, then the entity should apply the deposit method as described in paragraphs 65-67 of SFAS 66. EITF 06-8 is effective for the Company's fiscal year beginning November 1, 2007. In November 2006, the FASB ratified the EITF's recommendation subject to a comment period. The Company expects that EITF 06-8 will be adopted. The application of the continuing investment criteria on the collectibility of the sales price will limit the Company's ability to recognize revenues and costs using the percentage of completion accounting method. The Company does not expect that this change in criteria would affect any revenues or costs reported under percentage of completion accounting in fiscal 2006.

In September 2006, the FASB issued SFAS No. 157, [Fair Value Measurements](#) ([SFAS 157](#)). SFAS 157 provides guidance for using fair value to measure assets and liabilities. The standard also responds to investors' request for expanded information about the extent to which a company measures assets and liabilities at fair value, the information used to measure fair value, and the effect of fair value measurements

[Back to Contents](#)

on earnings. SFAS 157 will be effective for the Company's fiscal year beginning November 1, 2008. The Company is currently reviewing the effect SFAS 157 will have on its financial statements.

Stock Split

On June 9, 2005, the Company's Board of Directors declared a two-for-one split of the Company's common stock in the form of a stock dividend to stockholders of record on June 21, 2005. The additional shares of stock were distributed as of the close of business on July 8, 2005. All share and per share information has been adjusted and restated to reflect this split.

Reclassification

Certain prior year amounts have been reclassified to conform to the fiscal 2006 presentation.

2. Inventory

Inventory at October 31, 2006 and 2005 consisted of the following (amounts in thousands):

	2006	2005
Land and land development costs	\$ 2,193,850	\$ 1,717,825
Construction in progress-completed contract	3,174,483	2,669,148
Construction in progress-percentage of completion	153,452	40,647
Sample homes and sales offices	244,097	202,286
Land deposits and costs of future development	315,041	427,192
Other	14,779	11,526
	\$ 6,095,702	\$ 5,068,624

Construction in progress includes the cost of homes under construction, land and land development costs and the carrying cost of home sites that have been substantially improved.

The Company capitalizes certain interest costs to inventory during the development and construction period. Capitalized interest is charged to cost of revenues when the related inventory is delivered for traditional homes or when the related inventory is charged to cost of revenues under percentage of completion accounting. Interest incurred, capitalized and expensed for each of the three years ended October 31, 2006, 2005 and 2004, were as follows (amounts in thousands):

	2006	2005	2004
Interest capitalized, beginning of year	\$ 162,672	\$ 173,442	\$ 154,314
Interest incurred	135,166	115,449	113,448
Capitalized interest in inventory acquired	6,100		
Interest expensed to cost of sales	(121,993)	(125,283)	(93,303)
Write-off against other income	(480)	(936)	(1,017)
Interest capitalized, end of year	\$ 181,465	\$ 162,672	\$ 173,442

[Back to Contents](#)

Interest included in cost of revenues for each of the three years ended October 31, 2006, 2005 and 2004, were as follows (amounts in thousands):

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Traditional home sales	\$ 116,405	\$ 122,451	\$ 92,825
Percentage of completion	4,552		
Land sales	1,036	2,832	478
	<u>\$ 121,993</u>	<u>\$ 125,283</u>	<u>\$ 93,303</u>

The Company recognized inventory write-downs and the expensing of costs that it believed not to be recoverable for each of the three years ended October 31, 2006, 2005 and 2004, as follows (amounts in thousands):

	<u>2006</u>	<u>2005</u>	<u>2004</u>
Land controlled for future communities	\$ 90,925	\$ 3,279	\$ 5,236
Operating communities	61,120	1,800	2,216
Total	<u>\$ 152,045</u>	<u>\$ 5,079</u>	<u>\$ 7,452</u>

The Company has evaluated its land purchase contracts to determine if the selling entity is a VIE and if it is, whether the Company is the primary beneficiary of the entity. The Company does not possess legal title to the land and its risk is generally limited to deposits paid to the seller. The creditors of the seller generally have no recourse against the Company. At October 31, 2006, the Company had determined that it was the primary beneficiary of one VIE related to a land purchase contract and had recorded \$74.6 million as inventory and recorded \$67.1 million as a loan payable.

3. Investments in and Advances to Unconsolidated Entities

The Company has investments in and advances to several joint ventures with unrelated parties to develop land. Some of these joint ventures develop land for the sole use of the venture partners, including the Company, and others develop land for sale to the venture partners and to unrelated builders. The Company recognizes its share of earnings from the sale of home sites to other builders. The Company does not recognize earnings from home sites it purchases from the joint ventures, but instead reduces its cost basis in these home sites by its share of the earnings on the home sites. At October 31, 2006, the Company had approximately \$165.2 million invested in or advanced to these joint ventures and was committed to contributing additional capital in an aggregate amount of approximately \$238.1 million (net of the Company's \$129.7 million of loan guarantees related to two of the joint ventures' loans) if required by the joint ventures. At October 31, 2006, three of the joint ventures had an aggregate of \$1.33 billion of loan commitments, and had approximately \$1.11 billion borrowed against the commitments, of which the Company's guarantee of its pro-rata share of the borrowings was \$107.9 million.

In October 2004, the Company entered into a joint venture in which it has a 50% interest with an unrelated party to convert a 525-unit apartment complex, The Hudson Tea Buildings, located in Hoboken, New Jersey, into luxury condominium units. At October 31, 2006, the Company had investments in and advances to the joint venture of \$47.4 million, and was committed to making up to \$1.5 million of additional investments in and advances to the joint venture.

The Company has investments in and advances to two joint ventures with unrelated parties to develop luxury condominium projects, including for-sale residential units and commercial space. At October 31, 2006, the Company had investments in and advances to the joint ventures of \$18.1 million, was committed to making up to \$116.8 million of additional investments in and advances to the joint ventures if required by the joint ventures, and guaranteed \$21 million of joint venture loans. At October 31, 2006, these joint ventures had an aggregate of \$292.6 million of loan commitments and had approximately \$119.8 million borrowed against the commitments.

In fiscal 2005, the Company, together with the Pennsylvania State Employees Retirement System ("PASERS"), formed Toll Brothers Realty Trust Group II ("Trust II") to be in a position to take advantage

[Back to Contents](#)

of commercial real estate opportunities. Trust II is owned 50% by the Company and 50% by PASERS. At October 31, 2006, the Company had an investment of \$8.3 million in Trust II. In addition, the Company and PASERS each entered into subscription agreements that expire in September 2007, whereby each agreed to invest additional capital in an amount not to exceed \$11.1 million if required by Trust II. In September 2005, the Company sold a 26-acre commercially zoned parcel of land at its Dominion Valley Country Club in Virginia and a 30-acre commercially zoned parcel of land at its South Riding master planned community in Virginia to Trust II for a total of \$12.3 million. Because the Company owns 50% of Trust II, it recognized only 50% of the profit on the sale. The remaining 50% of the profit on the sale reduced the Company's investment in Trust II. The Company provides development and management services to Trust II and recognized fees for such services under the terms of various agreements in the amounts of \$1.4 million and \$1.1 million in the fiscal years ended October 31, 2006 and 2005, respectively. Prior to the formation of Trust II, the Company used Toll Brothers Realty Trust Group ("Trust") to invest in commercial real estate opportunities. See Note 12, "Related Party Transactions," for a description of the Company's investment in the Trust.

The Company's investments in these entities are accounted for using the equity method.

4. Loans Payable, Senior Notes, Senior Subordinated Notes and Mortgage Company Warehouse Loan Loans Payable

Loans payable at October 31, 2006 and 2005 consisted of the following (amounts in thousands):

	<u>2006</u>	<u>2005</u>
Term loan due March 2011 (a)	\$ 300,000	
Other (b)	436,934	\$ 250,552
	<u>\$ 736,934</u>	<u>\$ 250,552</u>

- (a) The Company has a \$1.8 billion credit facility consisting of a \$1.5 billion unsecured revolving credit facility and a \$300 million term loan facility (collectively, the "Credit Facility") with 33 banks, which extends to March 17, 2011. At October 31, 2006, interest was payable on borrowings under the revolving credit facility at 0.475% (subject to adjustment based upon the Company's debt rating and leverage ratios) above the Eurodollar rate or at other specified variable rates as selected by the Company from time to time. At October 31, 2006, the Company had no outstanding borrowings against the revolving credit facility but had letters of credit of approximately \$408.2 million outstanding under it, of which the Company had recorded \$80.5 million as liabilities under land purchase agreements. Under the term loan facility, interest is payable at 0.50% (subject to adjustment based upon the Company's debt rating and leverage ratios) above the Eurodollar rate or at other specified variable rates as selected by the Company from time to time. At October 31, 2006, interest was payable on the \$300 million term loan at 5.89%. Under the terms of the Credit Facility, the Company is not permitted to allow its maximum leverage ratio (as defined in the agreement) to exceed 2.00 to 1.00 and was required to maintain a minimum tangible net worth (as defined in the agreement) of approximately \$2.32 billion at October 31, 2006. At October 31, 2006, the Company's leverage ratio was approximately 0.53 to 1.00 and its tangible net worth was approximately \$3.45 billion. Based upon the minimum tangible net worth requirement, the Company's ability to pay dividends and repurchase its common stock was limited to an aggregate amount of approximately \$1.05 billion at October 31, 2006.
- (b) The weighted average interest rate on these loans was 5.97% at October 31, 2006 and ranged from 3.62% to 10.0%. At October 31, 2006, \$436.9 million of loans payable were secured by assets of approximately \$654.1 million.

At October 31, 2006, the aggregate estimated fair value of the Company's loans payable was approximately \$737.8 million. The fair value of loans was estimated based upon the interest rates at October 31, 2006 that the Company believed were available to it for loans with similar terms and remaining maturities.

[Back to Contents](#)**Senior Notes**

During fiscal 2005, the Company issued \$300 million of 5.15% Senior Notes due 2015 and used the proceeds from the transaction to redeem its \$100 million outstanding of 8% Senior Subordinated Notes due 2009 and, with additional available funds, to retire its \$222.5 million bank term loan.

During fiscal 2004, the Company issued \$300 million of 4.95% Senior Notes due 2014. The Company used a portion of the proceeds from this transaction to redeem its \$170 million outstanding of 8 1/8% Senior Subordinated Notes due 2009.

At October 31, 2006 and 2005, the Company's senior notes consisted of the following (amounts in thousands):

	<u>2006</u>	<u>2005</u>
Senior notes:		
6.875% Senior Notes due November 15, 2012	\$ 300,000	\$ 300,000
5.95% Senior Notes due September 15, 2013	250,000	250,000
4.95% Senior Notes due March 15, 2014	300,000	300,000
5.15% Senior Notes due May 15, 2015	300,000	300,000
Bond discount	(8,833)	(9,972)
	<u>\$ 1,141,167</u>	<u>\$ 1,140,028</u>

The senior notes are the unsecured obligations of Toll Brothers Finance Corp., a 100%-owned subsidiary of the Company. The payment of principal and interest is fully and unconditionally guaranteed, jointly and severally, by the Company and substantially all of its home building subsidiaries (together with Toll Brothers Finance Corp., the "Senior Note Parties"). The senior notes rank equally in right of payment with all the Senior Note Parties' existing and future unsecured senior indebtedness, including the Credit Facility. The senior notes are structurally subordinated to the prior claims of creditors, including trade creditors, of the subsidiaries of the Company that are not guarantors of the senior notes. The senior notes are redeemable in whole or in part at any time at the option of the Company, at prices that vary based upon the then-current rates of interest and the remaining original term of the notes.

At October 31, 2006, the aggregate fair value of the Company's senior notes, based upon their indicated market prices, was approximately \$1.09 billion.

Senior Subordinated Notes

At October 31, 2006 and 2005, the Company's senior subordinated notes consisted of the following (amounts in thousands):

	<u>2006</u>	<u>2005</u>
Senior subordinated notes:		
8 1/4% Senior Subordinated Notes due February 1, 2011	\$ 200,000	\$ 200,000
8.25% Senior Subordinated Notes due December 1, 2011	150,000	150,000
	<u>\$ 350,000</u>	<u>\$ 350,000</u>

The senior subordinated notes are the unsecured obligations of Toll Corp., a 100%-owned subsidiary of the Company; these obligations are guaranteed on a senior subordinated basis by the Company. All issues of senior subordinated notes are subordinated to all existing and future senior indebtedness of the Company and are structurally subordinated to the prior claims of creditors, including trade creditors, of the Company's subsidiaries other than Toll Corp. The indentures governing these notes restrict certain payments by the Company, including cash dividends and repurchases of Company stock. The senior subordinated notes are redeemable in whole or in part at the option of the Company at various prices, on or after the fifth anniversary of each issue's date of

issuance.

At October 31, 2006, the aggregate fair value of the Company's senior subordinated notes, based upon their indicated market prices, was approximately \$356.9 million.

[Back to Contents](#)**Mortgage Company Warehouse Loan**

A subsidiary of the Company has a \$125 million bank line of credit with four banks to fund home mortgage originations. The line of credit is due within 90 days of demand by the banks and bears interest at the banks' overnight rate plus an agreed-upon margin. At October 31, 2006, the subsidiary had borrowed \$119.7 million under the line of credit at an average interest rate of 6.53%. The line of credit is collateralized by all the assets of the subsidiary, which amounted to approximately \$134.1 million at October 31, 2006.

The annual aggregate maturities of the Company's loans and notes during each of the next five fiscal years are 2007 - \$274.2 million; 2008 - \$47.3 million; 2009 - \$3.3 million; 2010 - \$148.9 million; and 2011 - \$569.3 million.

5. Accrued Expenses

Accrued expenses at October 31, 2006 and 2005 consisted of the following (amounts in thousands):

	2006	2005
Land, land development and construction	\$ 376,114	\$ 385,031
Compensation and employee benefits	127,433	122,836
Insurance and litigation	130,244	92,809
Warranty	57,414	54,722
Interest	43,629	34,431
Other	90,454	101,940
	\$ 825,288	\$ 791,769

The Company accrues expected warranty costs at the time each home is closed and title and possession have been transferred to the home buyer. Changes in the warranty accrual during fiscal 2006, 2005 and 2004 were as follows (amounts in thousands):

	2006	2005	2004
Balance, beginning of year	\$ 54,722	\$ 42,133	\$ 33,752
Additions	36,405	41,771	27,674
Charges incurred	(33,713)	(29,182)	(19,293)
Balance, end of year	\$ 57,414	\$ 54,722	\$ 42,133

6. Income Taxes

Provisions for federal and state income taxes are calculated on reported pre-tax earnings based on current tax law and also include, in the applicable period, the cumulative effect of any changes in tax rates from those used previously in determining deferred tax assets and liabilities. Such provisions differ from the amounts currently receivable or payable because certain items of income and expense are recognized for financial reporting purposes in different periods than for income tax purposes. Significant judgment is required in determining income tax provisions and evaluating tax positions. The Company establishes reserves for income taxes when, despite the belief that its tax positions are fully supportable, it believes that its positions may be challenged and disallowed by various tax authorities. The consolidated tax provision and related accruals include the impact of such reasonably estimable disallowances as deemed appropriate. To the extent that the probable tax outcome of these matters changes, such changes in estimates will impact the income tax provision in the period in which such determination is made.

The Company operates in 21 states and is subject to various state tax jurisdictions. The Company estimates its state tax liability based upon the individual taxing authorities' regulations, estimates of income by taxing jurisdictions and the Company's ability to utilize certain tax-saving strategies. Due primarily to a change in the Company's estimate of the allocation of income among the various taxing jurisdictions and changes in tax regulations and their impact on the Company's tax strategies, the Company's estimated rate for state income taxes was 7.0% for fiscal 2006, 6.3% for fiscal 2005 and 3.0% for fiscal 2004.
