Notes

1. CORPORATE INFORMATION

The Company is a joint stock company limited by shares incorporated in the People's Republic of China (the "PRC") on 14 April 1995. The address of the Company's registered office is 66 Airport Street, Pudong International Airport, Shanghai, the PRC. The Group is principally engaged in the operation of civil aviation, including the provision of passenger, cargo, and mail delivery and other extended transportation services.

The Company is majority owned by China Eastern Air Holding Company ("CEA Holding"), a state-owned enterprise incorporated in the PRC.

The Company's shares are traded on The Stock Exchange of Hong Kong Limited, The New York Stock Exchange and The Shanghai Stock Exchange.

During the year ended 31 December 2009, the Company issued total 2,787,375,000 A Shares to CEA Holding (1,927,375,000 Shares) and other investors (860,000,000 Shares), and 1,927,375,000 H Shares to CES Global Holding (Hong Kong) Limited, a wholly owned subsidiary of CEA Holding incorporated in Hong Kong.

2. BASIS OF PREPARATION

The financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (“IFRS”) and the disclosure requirements of the Hong Kong Companies Ordinance. The financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

In preparing the financial statements, the Board has given careful consideration to the going concern status of the Group in the context of the Group’s current working capital deficit.

As at 31 December 2009, the Group’s accumulated losses were approximately RMB17.91 billion and its current liabilities exceeded its current assets by approximately RMB28.65 billion.

Against this background, the Board has taken active steps to seek additional sources of finance and improve the Group’s liquidity position. As at 31 December 2009, the Group had total credit facilities of RMB50.9 billion from certain banks. The Board believes that, based on experience to date, it is likely that these facilities will be rolled over in future years if required.

With the credit facilities and based on the Group’s history of obtaining finance and its relationships with its bankers and creditors, the Board considers that the Group will be able to obtain sufficient financing to enable it to operate, as well as to meet its liabilities as and when they become due and the capital expenditure requirements. Accordingly, the Board believes that it is appropriate to prepare these financial statements on a going concern basis without including any adjustments that would be required should the Company and the Group fail to continue as a going concern.

3. ACCOUNTING POLICIES

Except as described in note 3(a) below, the accounting policies adopted are consistent with those of the annual financial statements for the year ended 31 December 2008, as described therein.

(a) The Group has adopted the following new and amended IFRS as at 1 January 2009:

IFRS 7 ‘Financial Instruments – Disclosures’ (amendment) – effective 1 January 2009. The amendment requires enhanced disclosures about fair value measurement and liquidity risk. In particular, the amendment requires disclosure of fair value measurements by level of a fair value measurement hierarchy. As the change in accounting policy only results in additional disclosures, there is no impact on earnings per share.

IAS 1 (revised). ‘Presentation of financial statements’ – effective 1 January 2009. The revised standard prohibits the presentation of items of income and expenses (that is, ‘non-owner changes in equity’) in the statement of changes in equity, requiring ‘non-owner changes in equity’ to be presented separately from owner changes in equity in a statement of comprehensive income. As a result, the Group presents in the consolidated statement of changes in equity all owner changes in equity, whereas all non-owner changes in equity are presented in the consolidated statement of comprehensive income. Comparative information has been re-presented so that it also conforms with the revised standard. Since the change in accounting policy only impacts presentation aspects, there is no impact on earnings per share.

IFRS 8, ‘Operating segments’ (effective 1 January 2009). IFRS 8 replaces IAS 14, ‘Segment reporting’, and aligns segment reporting with the requirements of the US standard SFAS 131, ‘Disclosures about segments of an enterprise and related information’. The new standard requires a ‘management approach’, under which segment information is presented on the same basis as that used for internal reporting purposes. The segments are reported in a manner that is

more consistent with the internal reporting provided to the chief operating decision-maker (“CODM”).

– 5 –

With effective from 1 January 2009, the Group has redefined its operating segments so that to present the segment information in the same manner as management's internal reporting. The Group is principally engaged in the operation of civil aviation, including the provision of passenger, cargo and other extended transportation services and are managed as a single business unit. From a service perspective and pursuant to the above re-segmentation, the Group has only one reportable operating segment, reported as "airline operations". Comparative amounts of the year 2008 have been restated to reflect the re-segmentation.

4. REVENUES

The Group is principally engaged in the operation of civil aviation, including the provision of passenger, cargo, mail delivery and other extended transportation services.

	Group	
	2009	2008
	RMB'000	RMB'000
Traffic revenues	36,924,830	38,844,269
– Passenger	32,800,411	33,486,459
– Cargo and mail	4,124,419	5,357,810
Ground service income	974,732	1,252,468
Cargo handling income	296,827	337,773
Commission income	206,137	183,129
Others	587,133	454,918
	38,989,659	41,072,557

Note:

Pursuant to the relevant tax rules and regulations in the PRC, the major elements of the Group's traffic revenues, commission income, ground service income, cargo handling income and other revenues are subject to business tax levied at rates of 3% or 5%. The business tax incurred and set off against the above Group's revenues for the year ended 31 December 2009 amounted to approximately RMB1,019 million (2008: RMB891 million).

5. SEGMENT INFORMATION

(a) CODM, office of the General Manager, reviews the Group's internal reporting in order to assess performance and allocate resources.

The Group has one reportable operating segment, reported as "airline operations", which is structured and managed separately. The "airline operations" comprises the provision of air passenger, air cargo services, mail and ground logistics.

Other services including aviation training, air catering and other miscellaneous services are not included within the reportable operating segment, as they are not included in the internal report provided to the CODM. The results of these operation are included in the "other segments" column.

Inter-segment transactions are entered into under normal commercial terms and conditions that would be available to unrelated third parties.

In accordance with IFRS 8, segment disclosure has been presented in a manner that is consistent with the information used by the Group's CODM. The Group's CODM monitors the results, assets and liabilities attributable to each reportable segment based on financial results prepared under the PRC Accounting Standards for Business Enterprises (the "PRC Accounting Standards"), which differ from IFRS in certain aspects. As such, the amount of each material reconciling items from the Group's reportable segment revenue, profit or loss, assets and liabilities arising from different accounting policies are set out in note 5(c) below.

The segment results for the year ended 31 December 2009 are as follows:

*Unallocated assets primarily represent investments in associates and jointly controlled entities, and available-for-sale financial assets. Unallocated results primarily represent the share of results of associates and jointly controlled entities.

– 7 –

- (b) The Group's business segments operate in three main geographical areas, even though they are managed on a worldwide basis.

The Group's revenues by geographical are analysed based on the following criteria:

- (1) Traffic revenue from services within the PRC (excluding the Hong Kong Special Administrative Region ("Hong Kong"), Macau Special Administrative Region ("Macau") and Taiwan, (collectively known as "Regional") is classified as domestic operations. Traffic revenue from inbound and outbound services between the PRC, regional or overseas markets is attributed to the segments based on the origin and destination of each flight segment.
- (2) Revenue from ticket handling services, airport ground services and other miscellaneous services are classified on the basis of where the services are performed.

	Group	
	2009	2008
	RMB'000	RMB'000
Domestic (the PRC, excluding Hong Kong, Macau and Taiwan)	27,482,611	24,810,917
Regional (Hong Kong, Macau and Taiwan)	1,986,964	2,496,303
International	10,361,756	14,535,141
Total	39,831,331	41,842,361

The major revenue-earning assets of the Group are its aircraft, all of which are registered in the PRC. Since the Group's aircraft are deployed flexibly across its route network, there is no suitable basis of allocating such assets and the related liabilities by geographic and hence segment assets and capital expenditure by geographic have not been presented.

- (c) Reconciliation of reportable segment revenue, profit or loss, assets and liabilities to the consolidated figures as reported in the consolidated financial statements.

– Gains on disposal of property, plant and equipment	–	267,084

Note:

(a) Pursuant to Cai Jian (2009) No. 4 issued by Ministry of Finance and Civil Aviation Administration of China in 2009, the civil aviation infrastructure levies collected from PRC domestic airlines for the period from 1 July 2008 to 30 June 2009 will be refunded. The amount for the year ended 31 December 2009 represents the refunds of civil aviation infrastructure levies received by the Group.

(b) Other government subsidies represent (i) subsidies granted by local governments to the Group; and (ii) other subsidies granted by various local municipalities to encourage the Group to operate certain routes to cities where these municipalities are located.

7. GAIN/(LOSS) ON FAIR VALUE MOVEMENTS OF FINANCIAL DERIVATIVES

	2009 RMB'000	Group 2008 RMB'000
Gain/(loss) arising from fair value movements of financial derivatives		
– Crude oil option contracts (Note)	3,743,746	(6,255,791)
– Other derivatives	30,942	(145,201)
	3,774,688	(6,400,992)

Note:

In prior years, the Group entered into crude oil option contracts to reduce the risk of changes in market oil/petroleum prices as a hedge against aircraft fuel costs. The crude oil option contracts used by the Group are normally structured to include a combination of both put and call options which allow the Group to lock in fuel prices for specified volumes within a price range. In each option contract, the call options price at which the Group is effectively entitled to buy crude oil will be higher than that at which the counterparty is effectively entitled to sell.

The Group did not enter into crude oil option contracts in 2009. All existing crude oil option contracts as at 31 December 2009 were entered into by the Group prior to 2009. None of the crude oil option contracts entered into by

the Group qualified for hedge accounting, the realised and unrealised mark to market gains/(losses) of the crude oil option contracts during the year were recognised in the consolidated income statement.

Other impairment charge	57,578	306,358
	109,417	2,976,678

Note:

- (a) For the year ended 31 December 2008, the Group recognised an impairment charge of RMB993 million against goodwill which had previously been recognised in connection with the Group's acquisitions of airline businesses.
- (b) In 2008, the Group performed an impairment test on property, plant and equipment as at 31 December 2008, based on which an impairment provision of RMB1,442 million was made against certain aircraft models and the related equipment, reflecting their relatively lower operation efficiency and management's intention to retire them in the near future. In determining the recoverable amounts of the related assets, management has compared the value in use and the fair value less costs to sell of the related assets, primarily determined by reference to estimated market values.
- (c) After assessing the fair value less costs to sell as at the balance sheet date, which was primarily determined by reference to estimated market value, an additional impairment loss of RMB35 million (2008: RMB235 million) was made in 2009 against certain aircraft and related flight equipment that have been classified as "non-current assets held for sale".

REPORT OF THE BOARD

Review of operations

In 2009, the Group operated approximately 6,894 scheduled flights per week, serving a total of 21 countries and regions including 146 domestic and foreign cities. In addition, the Group was able to provide more comprehensive air transportation services to major markets around the world through international cooperation efforts, such as code sharing and special prorated agreements. In 2009, the Group has completed (i) the purchase or finance-lease of a total of 21 aircraft to add to its fleet, including ten A320 aircraft, seven B737-700 aircraft and four B737-800 aircraft; (ii) the operating-lease of two B737-800 aircraft; and (iii) the surrender of the lease of six aircraft (including five B737-300 aircraft and one B737-800 aircraft). As at 31 December 2009, the Group operated a fleet of 257 aircraft, including 231 passenger jets, each with a capacity of over 100 seats and 11 jet freighters.

In 2009, the Group's flights accounted for 37.02% and 28.21% of all flights at Hongqiao Airport and Pudong Airport, respectively, in terms of flight take-off and landing statistics, and accounted for 36.31% and 28.86% of all flights at Hongqiao Airport and Pudong Airport, respectively, in terms of passenger carried. The daily average utilization rate of aircraft was 9.4 hours, representing an increase of 0.3 hours compared to the same period in 2008.

The financial crisis continued its effect in 2009 and substantially impacted the global economy. The global civil aviation industry experienced the most serious recession since World War II, and the international demand for aviation, especially freight transportation, substantially decreased. 2009 was also the most challenging year for the development of the Chinese economy since the turn of the century. With this external environment, the Company adjusted its operating strategies in a timely manner by responding to the needs of the market and re-allocating some of its international capacity to serve domestic routes that were in greater demand. Various departments of the Company worked strenuously towards better operating results.

In terms of passenger traffic, the Group gathered its capacity to focus on core and key markets with high return and of focal importance to adjust the structure of its capacity, build up the brand of express and sub-express routes, strengthened its network sales capability and focused on developing its transit services to a great extent. The number of passengers using its transit services reached 1.56 million for the whole year. It also promoted its website direct-sale and telephone payment business. The “ (Eastern Miles)” frequent flyer program was further developed, and by the end of 2009, the frequent flyer program had approximately 6.03 million members.

In terms of freight transport, we have increased our cargo and freight operations. Such measures include consolidating the management of bellyhold cargo space in passenger aircraft and freight operations with cargo, and implementing a price bidding policy for seat selling. In addition, we increase our efforts in marketing high-revenue cargo operations and strenuously developed connecting flight transfer products. We added truck flights services and pallet shipping services, as well as the signing of strategic cooperation framework agreements with various entities, which contributed to an increase in our cargo marketing capability.

In terms of services, the Group attached importance to implementing a brand strategy and enriching the substance of its service to enhance service quality and win trust in the community. It adhered to the notion of “ (Customer-Oriented and Dedicated Service)”. Promotion of the “ (Ling-yan)” brand was stepped up to meet customer requirements and to create new service products. Differentiated products such as “ ” “ ” “ ”, “ E”, “E” were refined to strengthen its transit services. Punctuality rate was stressed as measures to rectify the problem of flight delays. According to the statistics of the Civil Aviation Administration of China, the punctuality rate of the Group’s flights was 83.45% in the year, ranking the Group No. 1 among civil aviation operators for the second consecutive year.

As the first cooperation partner of the World Expo 2010 Shanghai, the designated carrier for passenger aviation, and the designated airline for the World Expo Shanghai Forum, the Group adheres to the notion of “ (Participating in, Promoting and Serving the World Expo Shanghai)”, and has launched a series of marketing products and service initiatives including “ ” and “ ”.

With respect to environmental protection and technological application, adhering to the social notion of balancing corporate efficiency and environmental protection and the national policy of energy conservation and emission reduction, the Group strived to reduce its fuel consumption and implemented a low-carbon emissions policy, with the aim of achieving both economic and social benefits through corporate social responsibility.

Operational Revenues

Compared to the same period in 2008, the Group’s total traffic volume increased by 9.55% to 7,909 million tonne-kilometers in 2009. Traffic revenues decreased by RMB1,919 million to RMB36,925 million, representing a 4.94% decrease compared to the same period in 2008. This was mainly due to the decrease in per-unit revenue as a result of the decrease in fuel surcharges income, as well as the lack of demand resulting from the financial crisis.

The Group’s passenger revenues amounted to RMB32,800 million in 2009, representing a decrease of 2.05% over the same period in 2008, and accounting for 88.83% of the Group’s total traffic revenues in 2009. The volume of passenger traffic was 60,942 million passenger-kilometers, representing a 13.31% increase compared to the same period in 2008. It was primarily due to the decrease in fuel surcharges income.

The Group’s domestic passenger traffic volume (excluding passenger traffic volume in Hong Kong, Macao and Taiwan routes) was 44,376 million passenger-kilometers, representing a 25.52% increase compared to the same period in 2008. Compared to the same period in 2008, revenues increased by 12.38% to RMB24,038 million, accounting for 73.29% of the Group’s passenger revenues. Such increase in traffic volume and revenue was mainly due to the positive adjustment of our transportation capacity and the remarkable growth in, and allocation to, domestic passenger traffic capacity, which increased by 24.47% compared to the same period in 2008.

The passenger traffic volume on the Group's regional routes (Hong Kong, Macao and Taiwan routes) was 2,573 million passenger-kilometers, representing a 15.87% decrease compared to the same period in 2008. Compared to the same period in 2008, revenues decreased by 16.96% to RMB1,630 million, accounting for 4.97% of the Group's passenger revenues. The passenger traffic capacity on the Group's regional routes decreased by 15.94% compared to the same period in 2008. This was mainly due to the increased competition and a more significant decrease in transport capacity, which led to a slight decrease in the passenger-kilometers yield.

The Group's international passenger traffic volume was 13,994 million passenger-kilometers, representing a 8.98% decrease compared to the same period in 2008. Compared to the same period in 2008, revenues decreased by 29.61% to RMB7,133 million, accounting for 21.74% of the Group's passenger revenues. The passenger traffic capacity on international routes decreased by 10.19% compared to the same period in 2008. This was mainly due to the intensified effect of the global financial crisis on international air transportation, as a result of which the Group continued to reduce the number of flights on long-distance routes to Europe, USA and other destinations, and the substantial decrease in international fuel surcharges.

The Group's cargo and mail traffic volume was 2,474 million tonne-kilometers, representing a 2.23% increase compared to the same period in 2008. Compared to the same period in 2008, the cargo and mail traffic revenues decreased by 23.03% to RMB4,124 million, accounting for 11.17% of the Group's total traffic revenues in 2009. Revenue from air and mail traffic via bellyhold cargo space in passenger aircraft was RMB1,725 million, representing 41.83% of the freight revenue and 4.67% of transportation revenue. The tonne-kilometers yield for cargo and mail traffic decreased by 24.43% compared to the same period in 2008, which was resulted from the financial crisis, which caused a substantial decrease in international and regional freight transportation capacity of the Company and caused a significant decrease in cargo and mail revenue. There were initial signs of recovery for the freight transportation market in the fourth quarter of 2009; however, this was not sufficient to offset the impact of the financial crisis on the Company's freight transportation business.

Operating expenses

In 2009, the Group implemented stringent controls over its capital expenditures and actively adjusted its debt structure to strengthen fund management and reduce finance costs.

Compared to the same period in 2008, the Group's total operating costs decreased by 32.33% to RMB38,456 million.

Expenditure on aviation fuel was RMB12,255 million, representing a decrease of 33.71% compared to the same period in 2008. This was mainly due to a decrease of approximately 38.57% in the average price of aviation fuel compared to the same period in 2008. The Group's total aviation fuel consumption in 2009 was approximately 2.63 million tonnes, representing an increase of 8.23% compared to the same period in 2008. In 2009, the expenditure on aviation fuel accounted for 31.87% of the Group's total operating costs.

Takeoff and landing charges were RMB5,460 million, representing an increase of 3.41% compared to the same period in 2008, primarily due to the increased number of take-offs and landings of approximately 14.87% as compared to the same period in 2008.

Depreciation and amortization was RMB5,203 million, representing an increase of 8.80% compared to the same period in 2008, primarily due to the expansion of the scale of the Group's operations and an increase in the number of aircraft.

Wages, salaries and benefits expenses amounted to RMB5,149 million, representing an increase of 13.29% compared to the same period in 2008, mainly due to the Group continuing to expand its core businesses.

Office, administration and other operating expenses were RMB37.52 million, representing a decrease of 7.50% over the same period in 2008, primarily due to the Group's stepped-up efforts in its control over controllable costs, which led to a general decrease in various costs and expenses.

Maintenance costs amounted to RMB30.19 million, representing a decrease of 7.76% over the same period in 2008. This was primarily due to a decrease in maintenance costs realised by not sending aircraft to foreign countries for maintenance, as a result of the increase in domestic maintenance capacity.

Aircraft operating lease expenses were RMB2,518 million, representing a decrease of 7.93% over the same period in 2008. This was primarily due to the surrender of operating leases for six aircraft.

Impairment losses for assets amounted to RMB109 million, representing a decrease of 96.34% over the same period in 2008. This decrease was primarily due to the impairment provisions made in 2008 for goodwill and certain models of aircraft and relevant flight equipment to be phased out, and the impairment provisions made for the fixed assets held for sale.

Selling and marketing expenses were RMB1,978 million, representing an increase of 26.55% over the same period of 2008. This was mainly a result of an increase in the number of passengers carried and the corresponding increase in agency business handling fees.

Food and beverage expenses were RMB1,201 million, representing a decrease of 9.08% compared to the same period in 2008. This was primarily due to the substantial decrease in the unit cost of food and beverage compared to the same period last year as a result of the Group's stringent control over the procurement costs of food and beverage and related supplies.

The amount of civil aviation infrastructure levies payable to the Civil Aviation Administration of China amounted to RMB890 million, representing an increase of 15.58% compared to the same period in 2008, which was primarily due to the substantial increase in the number of domestic take-off and landing compared to the same period in 2008, as a result of the Group's adjustment of its capacity towards domestic routes.

Other operating leases rentals amounted to RMB407 million, representing an increase of 10.30% over the same period in 2008, which was primarily due to the rentals of the newly leased premises for passenger traffic and freight transport businesses at the Shanghai Pudong Airport.

Ground services and other charges were RMB290 million, representing an increase of 7.81% over the same period in 2008, which was primarily due to the expansion of the Company's logistics business.

Changes in financial derivatives fair value through profit or loss resulted in a reversal of RMB3,775 million, compared to a loss of RMB6,401 million during the same period in 2008. It was mainly due to the increase of 79.54% in international oil prices as at the end of 2009 compared with the end of 2008.

Other Operating Income and other gains

The Group's other operating income and other gains primarily includes government subsidies and income from disposal of aircraft and relevant assets. Other operating income and other gains increased from RMB672 million in 2008 to RMB1,288 million in 2009, primarily due to refund of civil aviation infrastructure levies of RMB832 million in 2009. There was no Other Operating Income and other gains in 2008.

Finance Costs

In 2009, the Group's finance revenue was RMB205 million, and finance costs were RMB1,755 million, primarily due to the substantial decrease in foreign exchange gain compared to the same period of last year.

Profit

As a result of the above, the Group's profit attributable to shareholders for the year ended 31 December 2009 was RMB169 million.

Liquidity and Capital Structure

As of 31 December 2008 and 2009, the Group's cash and cash equivalents amounted to RMB3,451 million and RMB1,735 million respectively. In 2008 and 2009, the net cash generated from the Group's operating activities amounted to RMB2,856 million and RMB3,429 million respectively. In 2008 and 2009, the net cash used in the Group's investment activities amounted to RMB925 million and RMB7,236 million respectively. In 2008, the net cash outflow from the Group's financing activities was RMB92 million, mainly for the repayment of long-term loans, finance leases and short-term loans. The net cash inflow from the Group's financing activities in 2009 was RMB20.86 million, mainly bank loans and the issuance of new shares.

The Group generally operates with net current liabilities. As at 31 December 2009, the Group's current liabilities exceeded its current assets by RMB28,648 million.

As of 31 December 2008 and 2009, the total amount of the Group's short-term loans were RMB19,474 million and RMB8,407 million, respectively, and the Group's long-term loans were RMB15,628 million and RMB16,928 million, respectively. As of 31 December 2008, the Group's long-term loans payable within two years, from three to five years and beyond five years were RMB11,187 million, RMB3,666 million and RMB775 million, respectively, as compared to RMB6,637 million, RMB6,166 million and RMB4,125 million respectively, as of 31 December 2009.

The Group's obligations under finance leases as of 31 December 2008 and 2009 were RMB20,809 million and RMB19,370 million, respectively. As of 31 December 2008, the Group's lease obligations payable within two years, from three to five years and beyond five years were RMB3,933 million, RMB6,203 million and RMB10,673 million, respectively, as compared to RMB4,219 million, RMB6,785 million, RMB8,366 million, as of 31 December 2009.

The Group generally finances its purchase of aircraft through finance leases and bank loans secured by its assets. As of 31 December 2009, the total value of the Group's mortgaged assets amounted to RMB13,678 million, representing an increase of 56.80% from RMB8,723 million as at the end of 2008.

RISK ANALYSIS

- Interest Rate Fluctuation Risk

The Group's total interest-bearing liabilities as of 31 December 2008 and 2009 were RMB55,910 million and RMB44,705 million, respectively, (including long-term and short-term loans and finance leases payable), of which short-term liabilities accounted for 50.85% and 32.34% respectively, and part of the long-term interest-bearing liabilities were liabilities with variable interest rates. Both were affected by the fluctuation in current market interest rates.

The Group's interest-bearing liabilities were mainly denominated in US dollars and Renminbi. As of 31 December 2008 and 2009, the Group's liabilities denominated in US dollars accounted for 58.04% and 68.81% of the total liabilities respectively, while the liabilities denominated in Renminbi accounted for 41.56% and 30.94% of the total liabilities respectively. The fluctuations in the US dollar and the Renminbi interest rates significantly affected the Group's financing costs.

- Exchange Rate Fluctuation Risk

Since 21 July 2005, the Chinese government reformed the Renminbi exchange rate system and established a floating exchange rate system in which the exchange rate would be adjusted and managed based on market supply and demand with reference to a basket of foreign currencies. The fluctuation in Renminbi exchange rate is affected by the domestic and international economy, the political situation and the currency supply and demand of the currency, and thus the Renminbi exchange rate in the future may therefore be very different from the current exchange rate.

The Group operates its business in many countries and territories. The Group generates its revenue in different currencies, and its foreign currency liabilities at the end of the period are much higher than its foreign currency assets. The Group's major liability item (purchases and leases of aircraft) is mainly priced and settled in currencies such as US dollars. In addition, fluctuations in exchange rates will affect the Group's costs incurred from foreign purchases such as aircraft, flight equipment and aviation fuel, and take-off and landing charges in foreign airports. As of 31 December 2009, the Group's total interest-bearing liabilities denominated in foreign currencies converted to Renminbi amounted to RMB30,876 million, of which the US dollar liabilities accounted for 99.63%. Therefore, in circumstances with large fluctuations in exchange rates, the exchange loss arising on the translation of foreign currency denominated liabilities will be greater, which in turn affects the profitability and development of the Group. The Group usually uses hedging contracts for foreign currencies to reduce the risks in exchange rates for foreign currency revenue from ticket sales and expenses which are to be paid in foreign currencies. Foreign currency hedging mainly involves the sales of Japanese Yen or the purchase of US dollars at fixed exchange rates. As of 31 December 2009, the foreign currency hedging contracts held by the Group which are still open amounted to a notional amount of US\$8,200 million (31 December 2008: US\$121 million), which will expire between 2010 and 2017.

The Group recorded a decrease in net exchange gains during the reporting period. As of 31 December 2008 and 2009, the Group's exchange gains were RMB1,958 million and RMB49 million, respectively. Due to the large value of existing net foreign currency liabilities, the Group's results will be adversely affected if the Renminbi depreciates against the US dollar or the rate of appreciation of the Renminbi against the US dollar decreases in the future.

- **Fuel Hedging Risk**

In order to control fuel costs, the Group entered into fuel hedging transactions using financial derivative products linked to the price of underlying assets such as United States WTI crude oil and Singapore jet fuel during previous years. In the face of continuing increases in fuel prices, the Group reduced the impact of the fluctuation in aviation fuel prices through various financial derivative instruments. For the years 2008 and 2009, the Group hedged 41.58% and 52.59% of its annual fuel consumption, respectively.

The Group engaged in aviation fuel hedging for the purpose of locking in aviation fuel costs. By selecting appropriate instruments, the Group locked in costs within a hedged price range. However, high fluctuations in aviation fuel prices exceeding the locked-in price ranges has resulted in the Group incurring actual realised and unrealised settlement losses.

Policy Impact

On 11 November 2009, the National Development and Reform Commission of the People's Republic of China (the "NDRC") and the Civil Aviation Administration of China jointly issued ~~the notice~~ (hereinafter referred to as the "Notice"), which became effective on 14 November 2009. The notice clarified the relationship between fuel surcharges and the consolidated purchase cost of aviation fuel in the PRC, and provided a standard for calculating the cap amount of fuel surcharges. Airline companies may, within a prescribed scope, make its own decision as to whether to impose fuel surcharges, determine the pricing structure for fuel surcharges and determine the time of implementation, all of which shall be implemented upon publication of such decisions to the general public and a filing with the NDRC and the Civil Aviation Administration of China.

Human Resources

As of 31 December 2009, the Group had approximately 45,938 employees, the majority of whom worked in the PRC. The Group's employee compensation is primarily composed of basic salary and performance-based bonus. There were no material labor disputes between the Group and its employees and the Group did not experience a significant loss of employees or encounter any major difficulties in recruiting new employees.

OUTLOOK FOR 2010

The Group would like to caution readers of this announcement that the operations of the Company as an air transport enterprise that performs public service functions is linked closely to the development of the political and economic situations, both internationally and locally. As such, the operation of the Group and of the whole sector is, to a significant extent, subject to the risks associated with geopolitics and the incidence of unexpected events. The 2009 annual results announcement of the Group includes (but is not limited to) certain forward-looking statements, such as those on the economies of the world including the PRC, and the aviation market. Such forward-looking statements are subject to many uncertainties and risks.

The Group expects an ongoing recovery of the global economy in the first half of 2010, in which Asian economies will take the lead in the global recovery. From the perspective of the industry, with the gradual recovery of the international market and the continual rise of the domestic market, it is anticipated that 2010 will witness the stabilisation and improvement of the international market, whilst the freight transportation market will see an overall recovery. From the perspective of the Group, there will be significant opportunities for the Group's development, as the World Expo 2010 Shanghai is expected to draw customers to the Shanghai market; and the synergy resulting from the completion of the absorption of Shanghai Airlines by the Group. In 2010, the operating targets of the Group (including Shanghai Airlines) are to achieve total traffic volume of 11,912 million tonne-kilometers, number of passenger carried of 67.06 million, weight of freight to be transported of 1.4135 million tonnes, passenger load factor of 74.59% and freight load factor of 65.32%.

Based on these strategic targets and by implementing such strategies, the Group has defined seven “battles” that it must win, including the successful completion of the absorption of Shanghai Airlines, provision of the best service to the hub construction and information-based construction for the World Expo 2010 Shanghai. All staff members have already signed their performance-based contracts which clearly define the allocation of work, duties and functions.

To achieve its pre-set goals, the Group will focus on the following aspects in 2010:

1. Maintain continuous safety and uphold the importance of safety;
2. Adhere to efficiency and enhance competitiveness. By meeting industry benchmarks, the Group will strive to improve the profitability of its passenger transportation on an ongoing basis. The Group will enhance its capability on international routes in the earliest possible timeframe. Measures will be taken to enrich and promote the Group’s offerings. The Group will expand its marketing channels, establish new product offerings, build up a marketing system focusing on customers. In addition, the Group will focus on the organisational transformation of its marketing structure. By doing these, the Group is poised to change the situation of its freight transport within a short timeframe;
3. Accelerate structural adjustment and improve cost control. This will include optimising the structure of the Group’s fleet to reduce operating costs; adjusting the structure of assets and liabilities to reduce finance costs; adjusting the structure of resource allocation to enhance the resource utilisation rate; and adjusting the structure of routes in order to increase margins;
4. Foster management on a detailed basis and take a pragmatic approach to consolidating management. This will include measures to enhance rapid improvement of the Group’s management and the overall rationalisation of its management processes. It will systematically focus on more advanced companies, strengthen its risk management and leverage information technology to increase management efficiency; and
5. Highlight strategic themes, consolidate communication and implementation, strengthen strategic communication, focus on handling strategic support and strategic implementation.

MATERIAL MATTERS

1. Dividends

According to the financial statements prepared in accordance with PRC Accounting Standards, as of 31 December 2009, the accumulated profit of the Company is negative. The Board does not recommend payment of any dividend for 2009. The profit appropriation proposal for 2009 will be set forth at the 2009 annual general meeting for consideration.

2. Purchase, sale or redemption of securities

During the 2009 financial year, neither the Company nor its subsidiaries had purchased, sold or redeemed any of its listed securities (“securities”, having the meaning ascribed thereto under Section 1 of Appendix 16 to the Listing Rules), without taking into account any issue of new securities.

3. Material litigation

The family members of certain victims in the aircraft accident (the aircraft was then owned and operated by China Eastern Air Yunnan Company), which occurred in Baotou on 21 November 2004, sued the Company in a U.S. court for compensation. After the case entered the procedures on appeal, the California Court of Appeal, dismissed the appeal of the plaintiff and affirmed the original order. Subsequent to that, on 16 March 2009, the plaintiff sued the Company in the Beijing No. 2 Intermediate People’s Court. On 18 August 2009, Beijing No. 2 Intermediate People’s Court accepted the case. Legal documents including summons, prosecution notifications and others have been served on the Company. Trial is yet to begin. The management of the Group believes that any outcome for this case will not have an adverse effect on the financial condition and results of operations of the Company. The Group intends to provide regular updates to the shareholders regarding the progress of the litigation. As at 31 December 2009, the Group was not involved in any other litigation, arbitration or claim of material importance.

4. Corporate governance practices

The Board has reviewed the relevant provisions and corporate governance practices under the codes of corporate governance practices adopted by the Company, and took the view that the Company’s corporate governance practices for the year ended 31 December 2009 met the requirements under the provisions in the Code on Corporate Governance Practices set out in Appendix 14 to the Listing Rules.

5. Audit and Risk Management Committee

The original Audit Committee has been renamed as the Audit and Risk Management Committee pursuant to the resolution of the Board in its 4th regular meeting 2009 held on 10 August 2009. The Audit and Risk Management Committee has reviewed the accounting principles and methods adopted by the Group with the management of the Company, and has had discussions with the Board regarding the internal controls and financial reporting issues, including a review of the consolidated results prepared under IFRS for the year ended 31 December 2009.

The Audit and Risk Management Committee has no disagreement with the accounting principles and methods adopted by the Group.
