#### (1) MARKETABLE SECURITIES

Upon adoption of FASB No. 115, management has determined that the company's portfolio is best characterized as "Available-For-Sale". This has resulted in the balance sheet carrying value of the company's marketable securities investments, as of March 31, 2004 and December 31, 2003 being increased approximately 121.91 % and 112.48 % respectively over its historical cost. A corresponding increase in shareholders' equity has been effectuated. In accordance with the provisions of FASB No. 115, the adjustment in shareholders' equity to reflect the company's unrealized gains has been made net of the tax effect had these gains been realized.

The following tables summarize the Company's investments as of:

# MANAGEMENT'S DISCUSSION AND ANALYSIS RESULTS OF OPERATIONS AND FINANCIAL CONDITION

#### ITEM 2. RESULTS OF OPERATIONS

Three months ended March 31, 2004 as compared with three months ended March 31,

2003

For the three months ended March 31, 2004 total revenues increased by 53% to \$1,130,526 from \$737,617 in 2003. Operating revenues increased by 87% to \$408,248 in 2004 from \$218,683 in 2003. There were capital gains in 2004 of \$225,066 up from \$35,902 in 2003. Dividend income was \$493,569 with a net interest expense of \$19,443 in 2004, as compared to dividend income of \$479,889 with a net interest expense of \$14,507 in 2003. In 2004, the Company had a net income before income taxes of \$38,769 versus a net loss before income taxes of (\$253,035) in 2003. Total Costs and Expenses increased by 10% in 2004 to \$1,091,757 vs. \$990,652 in 2003. This was related to increased marketing efforts and research and development expenses. The Company has increased research expenses for additional features to the BVA-100. The Company's new sales team began marketing in the fourth quarter of 2002. The increase in operating revenues can be attributable to these sales efforts. The sales cycles from initial contact to a sale can be 6 to 12 months. The Company anticipates that the sales of the BVA-100 Blood Volume Analyzers and kits will become the major source of income for the Company. The Company plans to continue expanding its sales and marketing force, which currently consists of 12 salesmen and 4 support personnel.

#### LIQUIDITY AND CAPITAL RESOURCES

At March 31,2004 the Company had total assets of \$50,130,886 with shareholders' equity of \$37,537,441 as compared to total assets of \$39,272,928 with shareholders' equity of \$31,529,228 at March 31,2003. Despite increasing its expenses, the Company has significantly increased its financial base as compared to one year ago. The Company has a net pre-taxed unrealized gain of \$26,991,066 and \$17,814,104 of net after tax unrealized capital gains on available-for-sale securities in its portfolio. This amount is included in the calculation of Total Shareholders' Equity. The Company's stock portfolio had a market value of \$49,131,109 with short-term loans of \$2,863,201 with 4,629,426 shares outstanding. The Company has current liabilities of \$12,593,445. Included in these liabilities are deferred taxes of \$9,176,962. These deferred taxes would occur if the Company chose to sell its entire portfolio. Current liabilities minus these deferred taxes equals \$3,416,483.

The Company has adequate resources for the current marketing level of its Blood Volume Analyzer as well as capital to sustain its localized semen and blood banking services. The Company anticipates hiring additional regional managers to the existing sales/marketing team. It is the goal of the marketing team to develop an individual sales team for each regional manager. The Company is also expanding its support services personnel. The decision to develop the marketing team was partially based on the anticipation of new publications in peer reviewed medical journals by current users of the Blood Volume Analyzer.

The Company's goal is to establish blood volume measurement as a standard of care in multiple areas of medicine and surgery. It is hoped that the publication of research studies from leading medical facilities will result in an increase in sales in both the Blood Volume Analyzer and its associated kits.

The Company sells, as well as offers to lease or rent the BVA-100 as part of the overall marketing plan. The Company also loans the instrument for a limited time period, however facilities evaluating the instrument must pay for the kits. Daxor Capital was established through a relationship with De Lage Landen (DLL). The significance of this relationship is as sales through leases increases, Daxor will not have to diminish its capital outlay for equipment as DLL will fund the net present value of the lease upon installation of the equipment. In an effort to obtain the best rates for our clients, the Company will also work with other independent leasing firms.

3

The Company is evaluating blood volume instrumentation management programs for hospitals. Under such a plan, the Company would provide equipment and personnel on a sub-contract basis. The Company will use its current financial reserves primarily for developing and marketing the Blood Volume Analyzer. The Company is evaluating various options to expand blood banking services in conjunction with the use of the Blood Volume Analyzer. Additional information on the Company is available on our website www.daxor.com.

#### Item 3. Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of our disclosure controls and procedures as defined by the Securities and Exchange Commission (SEC), as of the end of the period covered by this report. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in timely alerting them to information required to be included in our periodic Securities and Exchange Commission filings.
