(Registrant's Telephone Number, including Area Code)

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

None

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:

Common Stock, \$0.01 par value

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes ☐ No ☐

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 ("Exchange Act") during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☐ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☐ No ☐

Indicate by check mark if disclosure of delinquent filings pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy

Edgar Filing: ASURE SOFTWARE INC - Form 10-K

or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company, as defined in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer	Non-accelerated filer	Smaller reporting company
Emerging growth company			

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

The aggregate market value of the 12,140,141 shares of the registrant's Common Stock held by non-affiliates on June 30, 2018, the last business day of the registrant's most recently completed second quarter, was approximately \$193,635,249. For purposes of this computation all officers, directors and 5% beneficial owners of the registrant are deemed to be affiliates. Such determination should not be deemed an admission that such officers, directors and beneficial owners are, in fact, affiliates of the registrant.

At March 12, 2019, there were 15,404,865 shares of the registrant's Common Stock, \$.01 par value, issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive Proxy Statement relating to its 2018 Annual Meeting of Shareholders are incorporated by reference into Part III of this Annual Report on Form 10-K where indicated. Such Proxy Statement, or an amendment to this report containing the Items comprising Part III, will be filed with the U.S. Securities and Exchange Commission within 120 days after the end of the fiscal year to which this report relates.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements contained in this report other than statements of historical fact, including statements regarding our future results of operations and financial position, our business strategy and plans, and our objectives for future operations, are forward-looking statements. The words “believe,” “may,” “will,” “estimate,” “continue,” “anticipate,” “intend,” “expect,” “seek,” “plan,” and similar expressions are intended to identify forward-looking statements. We have based these forward-looking statements largely on our current expectations and projections about future events and trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives, and financial needs. These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including those described in the “Risk Factors” section. Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the future events and trends discussed in this report may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

You should not rely upon forward-looking statements as predictions of future events. The events and circumstances reflected in the forward-looking statements may not be achieved or occur. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activities, performance, or achievements. We are under no duty to update any of these forward-looking statements after the date of this report or to conform these statements to actual results or revised expectations.

As used in this report, the terms “Asure,” “Registrant,” “we,” “us,” and “our” mean Asure Software, Inc. and its subsidiaries unless the context indicates otherwise.

PART I

ITEM 1. BUSINESS

GENERAL

Asure Software, Inc., a Delaware Corporation, headquartered in Austin, Texas, is a leading provider of Human Capital Management (“HCM”) and Workspace Management, offering intuitive and innovative cloud-based solutions designed to help organizations of all sizes and complexities build companies of the future. Our cloud platforms enable clients worldwide to better manage their people and space in a mobile, digital, multi-generational, and global landscape. Asure’s offerings include a fully-integrated HCM platform, flexible benefits and compliance administration, HR consulting, and time and labor management as well as a full suite of Agile Workspace solutions for conference room scheduling, desk sharing programs, and real estate optimization.

Asure’s platform vision is to help clients proactively manage costs associated with their three most expensive assets, real estate, labor and technology, while creating an employee experience that fosters efficiency, productivity and engagement. Asure serves approximately 10,000 direct clients in 80 countries, ranging from global Fortune 500 clients to small and mid-sized businesses (“SMB”). Some of our current clients include Aetna, Apple Inc., Baker & McKenzie, Fannie Mae, Wells Fargo, Citigroup, Deutsche Bank, KPMG UK, La Trobe University, Merck and Co., Inc., Mondelez, Pfizer, Inc., Pearson, PSSI, Salesforce.com, Inc., State Street and Thomson Reuters. Our mission guides the work we do each day; it is “To deliver innovative technology with the passion to empower every client’s workspace and the commitment to make their workdays easier.”

The Asure product strategy is driven by three primary trends in the market: mobilization, globalization and technology. Asure offers four product lines: AsureSpace™, AsureForce®, AsureHCM and AsureEvolution. AsureHCM and AsureEvolution are our Mid-market and SMB/Channel HCM platforms respectively, which include AsureBenefits and AsureConsulting. AsureSpace™ Agile Workspace solutions enable organizations to optimize their real estate investment and create a digital workspace that empowers mobile and virtual employees, while streamlining internal operations. AsureForce® Time and Labor Management helps organizations optimize their workforce while controlling labor administration costs and activities.

Table of Contents

For all of the Asure product lines, support and professional services are key elements of our value proposition and overall solution. In addition to state-of-the-art hosting platforms and regular software upgrades and releases, Asure gives our clients easy access to our skilled support team. Our services and support representatives are knowledgeable not just in the Asure solution, but also in their respective industries and provide advice and guidance on best practices and change management strategies. From installation to training and post-live support, our professional services team delivers a proficient customer experience on a global scale.

Our sales and marketing strategy targets a wide range of audiences, from small and medium-sized businesses to enterprise organizations throughout the United States, Europe and Asia/Pacific. Our unique blend of products allow us to compete in every industry, and we generate sales and opportunities through our direct sales team and our channel partners.

Asure was incorporated in 1985 and our principal executive offices are located at 3700 N. Capital of Texas Highway, Suite 350, Austin, Texas 78746. Our telephone number is (888) 323-8835 and our website is www.asuresoftware.com. Information on our website is not part of this Annual Report on Form 10-K.

Asure makes available free of charge, on or through its website, our annual report on Form 10-K, our quarterly reports on Form 10-Q and our current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after we electronically file these materials or furnish them to the Securities and Exchange Commission.

RECENT DEVELOPMENTS

In January 2018, we acquired all of the outstanding shares of common stock of Pay Systems of America, Inc. (“Pay Systems”), a provider of HR, payroll and employee benefits services.

In April 2018, we also purchased a portfolio of customer accounts and the related contracts for payroll processing services (known as “Evolution Payroll”) from Wells Fargo.

In July 2018, we acquired all of the capital stock of USA Payroll, Inc. and assets of its affiliates (“USA Payroll”), a payroll processing company based in Rochester, New York and a licensee of our Evolution software.

In addition, we made other acquisitions during 2018 that were not material to our results of operations, financial position or cash flows.

PRODUCTS AND SERVICES

Asure's SaaS solutions are uniquely designed to help companies more effectively manage their global, mobile, flexible workforces. Companies use Asure's solutions to more effectively deploy and engage a modern workforce in pursuit of their goals in three ways:

1. Attract and retain talent – Companies use Asure's solutions to implement flexible co-working and mobile worker strategies that not only are attractive to top talent but also provide access to new pools of talent since employees can work anywhere at anytime. Additionally, Asure's HCM Recruiting software helps streamline the entire recruiting process.
2. Cut labor and real estate expense – By executing mobile worker strategies, companies can access talent in more remote – less expensive – markets beyond the reach of a typical commute. And because these modern workers don't require as much dedicated office space, companies are able to substantially cut real estate expense.
3. Productivity – Studies show that employees who have more flexibility in their work are more engaged. So, by hiring the best talent who spend more time working, less time commuting, and are more engaged, companies improve productivity.

With a suite of workforce and workspace products called the Asure Smart Office, Asure is well-positioned to deliver innovative, scalable solutions across industries and around the world. With an emphasis on the modern workforce, the Asure product team aims to create and deliver easy-to-use solutions that help attract talent, cut labor and real estate costs, and improve productivity. Within the Asure Smart Office suite, product groupings include cloud revenue, hardware revenue, maintenance and support revenue, on premises software license revenue, professional services revenue, and consulting revenue.

Table of Contents

AsureSpace™ workspace management solutions offer clients significant costs savings and Return on Investment (“ROI”) gains by maximizing their real estate with a full portfolio of innovative and intuitive SaaS solutions. The AsureSpace platform offers three core products, each of which can stand alone or be bundled together for a comprehensive solution. SmartView® occupancy sensors and analytics platform offers unique insights into how space is being used, allowing companies to make proactive, strategic decisions about real estate investments and workspace design. SmartMove® move management software helps companies design floorplans and track permanent seat assignments as well as manage assets such as telephones, laptops, desks, chairs, and virtually any item assigned to an employee. AsureSpace™ Resource Scheduler is the foundation of the AsureSpace platform with a sophisticated yet intuitive approach to workspace management. Featuring conference room and desk reservations, service management, interactive floorplans, visitor management, calendar and web conference integrations and robust reporting, Resource Scheduler is a comprehensive solution for the digital workspace. NowSpace®, a mobile app for Apple and Android devices empowers mobile workers to find and reserve desks and conference rooms directly from their smart phones. AsureSpace™ touch panels and kiosks are placed outside busy areas for on-the-fly desk and space reservations, while lending a high-tech presence to a standard office and enhancing the visitor experience. Finally, workspace business intelligence (“WBI”) tools offer invaluable reporting and data visualizations for executives to understand space utilization and further optimize their real estate investments.

AsureHCM is an integrated cloud-based solution that provides a foundation for our clients’ digital HR strategy. From traditional human resource (“HR”) management and payroll to benefits, talent acquisition and performance management, AsureHCM provides an easy-to-use platform for HR professionals and employees alike. Our emphasis on employee self-service and automated processes reflects the growing trend of workforce mobilization while empowering HR teams to focus on more strategic initiatives. Our HCM suite of solutions are easy-to-use with fully integrated HR/payroll applications uniquely designed to help companies recruit, manage, pay, and analyze their workforce more effectively. Combined with the AsureBenefits offering of COBRA administration and consumer spending accounts, and AsureHR Help for professional guidance on HR challenges, AsureHCM is a comprehensive platform that delivers a cohesive and engaging experience throughout the employee life cycle.

Asure’s SMB HCM Channel product, Evolution HCM, was developed with the channel market in mind. Its fully integrated Payroll, HR, and Tax Management suite offers service providers a path to growth and success with unparalleled accuracy, productivity, and financial control. Evolution HCM provides its users the flexibility and best practices to handle clients of all size and complexity levels, as well as meet the ever-evolving needs of the industry.

AsureConsulting allows our SMB clients to run their businesses because we take on the responsibility for all the traditional Human Resource functions. Our suite of services assists organizations through the entire employee lifecycle – from finding the right people, to on-boarding, to development and performance management and finally, to exit strategies and separation. Everything for the SMB market, seamlessly integrated.

Cost savings and additional ROI gains come in the form of a more strategic use of labor dollars and the elimination of time theft with AsureForce® workforce management solutions. Mobile time tracking with AsureForce Mobile helps executives better understand where and when their employees are working, providing insight into labor schedules and

labor costs. With AsureForce Mobile, employees can punch in and out from remote locations, and geo-positioning verifies the physical coordinates. Biometric time clocks, including facial recognition, reduce time theft and help combat buddy punching, which can cost companies millions of dollars per year. Automated system notifications, real-time dashboards, and flexible configuration options all work to streamline operations. Finally, employees, supervisors and executives have real-time access to data and business intelligence to optimize labor costing, improve labor scheduling, and ultimately control labor costs.

Our acquisitions have enabled us to disrupt the HCM market by offering a comprehensive solution that brings workforce and workspace management together. Empowering HR professionals to partner with real estate management teams and take a more strategic role in company initiatives ultimately results in a work environment that is productive, efficient and most importantly, engaging for employees. An optimized employee experience delivered through a unified, cloud-based management platform increases company bottom-line performance and gives executives new insight into their most costly assets: people and real estate.

PRODUCT DEVELOPMENT

Asure strives to bring quickly to market innovative, cloud-based solutions that capture the convergence of workspace and workforce technologies in order to elevate the employee experience. First-to-market mobile applications are a testament to our success in innovation. Additionally, Asure is committed to co-innovation, working in partnership with industry leaders, resellers, partners and clients around the globe to develop technology solutions that meet the needs of a rapidly shifting workspace.

Table of Contents

Our industry is characterized by continuing improvements in technology, resulting in the frequent introduction of new products, short product life cycles, changes in customer needs and continual improvement in product performance characteristics. Asure strives to be cost-effective and timely in enhancing our software applications, developing new innovative software solutions that address the increasingly sophisticated and varied needs of an evolving range of customers, and anticipating technological advances while adhering to industry standards.

Asure development teams around the globe are staffed with software developers, quality assurance engineers and support specialists who work closely with our customers and sales and marketing teams to build products and services based on market requirements and customer feedback. We develop our new product and service roadmaps based on inputs from customers, competitive comparisons and relevant technology innovations.

Our research and development strategy is rooted in innovation and flexibility. The development team enhances the functionality of our software and hardware products through continuous improvement and new feature releases, with a particular focus on SaaS solutions and products for the mobile workforce and the digital workspace. Asure will continue to evaluate opportunities for developing new software so that organizations can further streamline and automate the tasks associated with administering their businesses. We seek to simultaneously allow organizations to improve their productivity while reducing the costs associated with those business tasks.

We also actively search for potential product, service or business acquisitions that we believe will complement our existing and planned product and service offerings. We cannot guarantee that we will make future acquisitions or that we can successfully integrate acquired assets or businesses profitably into Asure.

Despite our efforts, we also cannot guarantee that we will complete our existing and future development efforts or that our new and enhanced software products will adequately meet the requirements of the marketplace and achieve market acceptance. Additionally, Asure may experience difficulties that could delay or prevent the successful development or introduction of new or enhanced software products. In the case of acquiring new or complementary software products or technologies, we may not be able to integrate the acquisitions into our current product lines. Furthermore, despite extensive testing, errors may be found in new software products or releases after shipment, resulting in a diversion of development resources, increased service costs, loss of revenue and/or delay in market acceptance.

SALES AND DISTRIBUTION

Asure sells its software products and services through both a direct and channel (partner) model, which enables us to sell our software solutions in an efficient, cost-effective manner. Prospective customers learn about Asure through a variety of ways, including advertising, web site searches, sales calls, public relations, direct marketing and social

media. When prospective customers show an interest in Asure, we connect them with a sales representative via our web site, phone, or a face-to-face meeting to discuss their needs and the solutions they are interested in and make the sale. We track our marketing and sales activities to provide immediate preview into activities, leads and pipeline opportunities. Asure account management teams also work with existing customers to promote and sell additional solutions that are relevant for each customer. In addition to this direct sales model, we supplement these efforts with our partner programs described below. By working with our partners, we expand the reach of our direct sales force and gain access to key opportunities in major market segments worldwide. Asure has two distinct levels of partners in our Partner Program: Reseller Partners and Referral Partners.

Reseller Partners. Reseller Partners are companies that represent us globally, as well as before the Federal government, and often offer complementary products to either the workspace management product line or the workforce product line. Reseller Partners commit to a minimum level of business per year with us and receive a channel discount for that commitment. Our Reseller Partners outside the United States include JLL, Red River Technology and Kathea, which represent the workspace product line. We also have several Reseller Partners that represent our software in the Federal government space. Resellers of our workforce product line in the United States include Oasis Outsourcing, a large provider of human resource outsourcing solutions.

Referral Partners. Referral Partners provide us with the name and particular information about a prospective customer and its needs as a sales lead. If we accept the sales lead, we register it for the Referral Partner. If we make a sale as a direct result of such a lead, we will pay the Referral Partner a sales lead referral fee. Currently, we have a number of Referral Partners, including Atmosphere Interiors PPI, BuildingI, Martek and SHI for the workspace management product and our workforce product line.

Table of Contents

COMPETITION

We believe we have a unique position in the market place as the only technology provider in the world that offers cloud-based workspace and workforce management solutions from a single partner. Additionally, Asure has been first-to-market with mobile apps in the workspace management industry, and we are the only known company to have both geospatial and facial recognition technology working together for mobile time tracking.

Specific to the AsureSpace™ line of workspace management software solutions, we have a competitive advantage in the breadth of our complementary workspace management solutions and the scope of our analytics as well as our resources available for product development, client services, and client support. The primary competitors to AsureSpace™ include Dean Evans & Associates, Inc., AgilQuest Corporation and Condeco Ltd. (UK). In addition to our features and available services, we believe the principal competitive advantages of AsureSpace™ include its cloud-based service model, extensive product integration options and partner channel, scalable deployments, configurable interfaces, mobile access and price. Our expert services team, proven implementation methodology and “partner v. vendor” approach have also shown to be critical differentiators.

The AsureForce® line of workforce management software solutions has a competitive advantage in the marketplace in serving organizations seeking specific point-solutions as well as organizations desiring an integrated suite of solutions, particularly in the area of mobile time collection. The AsureForce Mobile and AirClock™ products are first-to-market technology solutions with significant market demand. By competing tactically with point-solutions and strategically with an integrated suite of solutions, Asure can serve the needs of a broad spectrum of companies. Primary competitors to AsureForce® include Kronos, Replicon, and Time Simplicity.

Our key competitive advantage in the HCM product line is our single database architecture. Many HCM providers offer ‘integrated’ solutions meaning multiple databases and redundant data entry. AsureHCM offers a single employee record throughout the entire employee life cycle, starting with an online job application. Other differentiating factors include our intuitive user interface with mobile accessibility, an integrated time and labor solution, and streamlined workflows with automated notifications and self-service options throughout. With a complementary suite of HR products such as consumer spending accounts and HR Help, AsureHCM offers a comprehensive platform to advance an organization’s HR strategy. Within the Evolution SBO channel, differentiators include a robust back-end solution for payroll and tax management and with the Asure acquisition, access to a full suite of ancillary products and the long-term advantage of our Partner-For-Life mentality. SBOs can continue as an Asure licensee with the opportunity to expand their available offerings, or they can come under the Asure umbrella and experience the full benefit of a forward-thinking technology company.

Competitors in the HCM market tend to fluctuate, however, our main competitors are ADP, Kronos, Paylocity, Ultimate Software, Ceridian, Ascentis and Infinisource.

While Asure has the advantage of a flexible, easy to use, cloud-based, SaaS-delivered software model, affordability and proven deployment methodology, we face several categories of competitive challenges:

Vendors with face-to-face sales contact. In this highly relationship-based sales process, vendors with large, dispersed field-based sales teams who meet and consult with prospects have an advantage. Key U.S. vendors who approach the market in this manner include ADP, Kronos, PeopleSoft and Condeco. Asure has recently launched a field-based approach to sales and also focuses on high-touch marketing campaigns and leveraging relationships with channel partners to build relationships with prospects.

National payroll processors with loss-leader products. Large brand and market share payroll processing vendors (such as ADP, Inc.) offer equivalent point solutions at little or no cost to prospects when in a competitive engagement because these loss leader products become inconsequential next to their core business offerings.

Single application vendors. Vendors that offer similar point-solutions, such as room scheduling, office hoteling management, time and attendance, employee/manager self-service and paystub management, can be perceived as better meeting an immediate and specific need.

Table of Contents

Because the market for our products and services is subject to rapid technological change and there are relatively low barriers to entry in the workspace management software market, we routinely encounter new entrants or competition from vendors in some or all aspects of our product lines. Competition from these potential market entrants may take many forms. Some of our competitors, both current and future, may have greater financial, technical and marketing resources than us and therefore may be able to respond more quickly to new or emerging technologies and changes in customer requirements. As a result, they may compete more effectively on price and other terms. Additionally, those competitors may devote greater resources in developing products or in promoting and selling their products to achieve greater market acceptance. Asure is actively taking measures designed to address our competitive challenges, and clients tend to recognize the benefits of working with an established and publicly-traded partner versus a start-up or transitional vendor. However, we cannot assure that we will be able to achieve or maintain a competitive advantage with respect to any of the competitive factors.

MARKETING

Asure's marketing strategy relies on a comprehensive integrated plan rooted in our business objectives. Our marketing plan includes four primary objectives: 1) build brand awareness, 2) develop lead generation programs that drive revenue, 3) launch products in a meaningful way and 4) develop an infrastructure that supports and measures marketing activities. We deploy multi-faceted, multi-series direct marketing programs to drive awareness, interest and revenue. Marketing vehicles include our web site, organic and paid search, advertising, public relations, direct marketing, events, social media, content marketing and eMarketing. In 2019, we are expanding our strategy to include Account Based Marketing and vertical-specific marketing. Our marketing plan addresses growth and retention goals for all target audiences, from small and medium-sized businesses to Fortune 500 companies and divisions of enterprise organizations throughout the United States, Europe and Asia/Pacific.

SALES ENABLEMENT

We continue to focus on our comprehensive Sales Enablement plan which we developed in 2017, to drive revenue through the education and development of direct and channel sales teams. With an emphasis on social selling, sales enablement tools DiscoverOrg and LinkedIn Navigator are elevating prospecting and top of funnel sales activity with meaningful connections, targeted research and the distribution of relevant content. Sales teams also have access to a sophisticated ROI calculator that enhances the discovery process and creates a demonstrable ROI with interactive components that allow prospect champions to build a case internally, expediting the sales cycle. In conjunction with our marketing and product management team, our sales enablement team is promoting a consultative sales approach that demonstrates our commitment as a partner with a focus on in-depth understanding of products, use cases and industries.

INDUSTRY REGULATION

Our business is subject to a wide range of complex U.S. and foreign laws and regulations. In addition, many of our solutions are designed to assist clients with their compliance with certain U.S. and foreign laws and regulations that apply to them. Failure to comply with, or changes in, laws and regulations applicable to our businesses could have a materially adverse effect on our reputation, results of operations or financial condition, or have other adverse consequences.

As a provider of HR outsourcing solutions, we process personal and sensitive data related to clients, employees of our clients, vendors and our employees. We are, therefore, subject to compliance obligations under federal, state and foreign privacy and data security-related laws. For instance, in the United States, the Health Insurance Portability and Accountability Act of 1996 applies to our COBRA, flexible spending account, and health savings account benefits administration services businesses. We are also subject to federal, state and foreign security breach notification laws with respect to both our own employee data and client employee data.

Some of our solutions assist our clients in complying with certain U.S. and foreign laws and regulations that apply to them. For example, our HCM solutions help clients manage their compliance with certain requirements of the Patient Protection and Affordable Care Act in the United States. Our COBRA administration services and flexible spending account services in the United States are designed to help our clients comply with relevant federal guidelines relating to, respectively, employers' benefits continuation obligations and certain requirements of the Internal Revenue Code. Although these laws and regulations apply to our clients and not to us, changes in such laws or regulations may affect our operations, products and services.

Table of Contents

Additionally, the changing nature of privacy laws in the United States, Canada, the European Union and elsewhere may impact our processing of personal information of our employees and on behalf of our clients. For example, the European Union adopted a comprehensive general data privacy regulation (the “GDPR”) in May 2016 that will replace the current EU Data Protection Directive and related country-specific legislation. The GDPR became fully effective in May 2018. Complying with the enhanced obligations imposed by the GDPR may result in significant costs to our business and require us to amend certain of our business practices. Further, enforcement actions and investigations by regulatory authorities related to data security incidents and privacy violations continue to increase. The future enactment of more restrictive laws, rules or regulations and/or future enforcement actions or investigations could have a materially adverse impact on us through increased costs or restrictions on our businesses and noncompliance could result in regulatory penalties and significant legal liability. Failure to comply with data privacy laws and regulations could have a materially adverse effect on our reputation, results of operations or financial condition, or have other adverse consequences

The foregoing description does not include an exhaustive list of the laws and regulations governing and impacting our business.

TRADEMARKS

We have registered Asure Software® as a federal trademark with the U.S. Patent and Trademark Office. Our other core federally registered trademarks include AsureForce®, AsureSpace® and Evolution®. We also use common law trademarks including Resource Scheduler™, Meeting Room Manager™, Work Space Manager™, Workplace BI™, iEmployee™, Netsimplicity™, ADI™, and Legiant Express™.

EMPLOYEES

As of December 31, 2018, we had a total of 564 employees (550 of which are full-time employees) in the following departments:

FUNCTION	NUMBER OF EMPLOYEES
Research and development	66
Sales and marketing	93
Customer service and technical support	292
Finance, human resources and administration	113
Total	564

We continually evaluate and adjust the size and composition of our workforce. We also periodically retain contractors to support our sales and marketing, information technology and administrative functions. None of our employees are represented by a collective bargaining agreement. Asure has not experienced any work stoppages and we consider our relations with our employees to be good. Additionally, we augment our workforce capacity in research and development and customer service and technical support by contracting for services through third parties.

Table of Contents

ITEM 1A. RISK FACTORS

The following risk factors and other information included in this Annual Report on Form 10-K should be carefully considered. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties not presently known to us or that we presently deem less significant may also impair our business operations. Please see Item 1. “Business—Forward Looking Statements” for a discussion of the forward-looking statements that are qualified by these risk factors. If any of the events or circumstances described in the following risk factors actually occurs, our business, operating results and financial condition could be materially adversely affected.

We have a history of losses, and we cannot be certain that we will achieve or sustain profitability.

We have incurred losses since our inception. We experienced net losses of \$7.5 million and \$5.7 million in the fiscal years ended December 31, 2018, and 2017, respectively. At December 31, 2018, our accumulated deficit was \$283.6 million and total stockholders’ equity was \$102.5 million. We expect to continue to incur operating losses as a result of expenses associated with the continued development and expansion of our business. Such expenses include among others, transaction costs associated with acquisitions, sales and marketing, research and development, consulting and support services and other costs relating to the development, marketing and sale and service of our products that may not generate revenue until later periods, if at all. Any failure to increase revenue or manage our cost structure as we implement initiatives to grow our business could prevent us from achieving or sustaining profitability. In addition, our ability to achieve profitability is subject to a number of the risks and uncertainties discussed below, many of which are beyond our control. We cannot be certain that we will be able to achieve or sustain profitability on a quarterly or annual basis.

Our common stock has traded in low volumes. We cannot predict whether an active trading market for our common stock will ever develop.

Historically, our common stock has experienced a lack of trading liquidity. In the absence of an active trading market:

- an investor may have difficulty buying and selling our common stock at all or at the price you consider reasonable; and
- market visibility for shares of our common stock may be limited, which may have a depressive effect on the market price for shares of our common stock and on our ability to raise capital or make acquisitions by issuing our common stock.

Our stock price has been, and likely will continue to be, volatile.

The market price of our common stock has in the past been, and is likely to continue in the future to be, volatile. During the fiscal year ended December 31, 2017, the Nasdaq closing price of one share of our common stock fluctuated from a low of \$9.00 to a high of \$16.44. During the fiscal year ended December 31, 2018, the Nasdaq closing price of one share of our common stock fluctuated from a low of \$4.39 to a high of \$19.06. The market price of our common stock may be influenced by many factors, some of which are beyond our control, including:

- announcements regarding the results of expansion or development efforts by us or our competitors;
- announcements regarding the acquisition of businesses or companies by us or our competitors;
- technological innovations or new products and services developed by us or our competitors;
- changes in domestic or foreign laws and regulations affecting our industry
- issuance of new or changed securities analysts' reports and/or recommendations applicable to us or our competitors;
- changes in financial or operational estimates or projections;
- additions or departure of our key personnel;
- actual or anticipated fluctuations in our quarterly financial and operating results and degree of trading liquidity in our common stock; and
- political or economic uncertainties.

Table of Contents

In addition, stock markets generally have experienced significant price and volume volatility. This volatility has had a substantial effect on the market prices of securities of many public companies for reasons frequently unrelated or disproportionate to the operating performance of the specific companies.

Sales, or the potential for sales, of a substantial number of shares of our common stock in the public market by us or our existing stockholders could cause our stock price to fall.

The sale of substantial amounts of shares of our common stock in the public market, or the perception that such sales could occur, could harm the prevailing market price of shares of our common stock. These sales, or the possibility that these sales may occur, also might make it more difficult for us to raise capital through the sale of equity securities in the future at a time and at a price that we deem appropriate. As of March 12, 2019, we had 15,404,865 shares of common stock outstanding.

Our level of indebtedness and the terms of our indebtedness, including the indebtedness under our Second Restated Credit Agreement and subordinated promissory notes, could adversely affect our operations and limit our ability to plan for or respond to changes in our business or acquire additional businesses. If we are unable to comply with restrictions in, or cannot repay or refinance our indebtedness, the repayment of our indebtedness could be accelerated.

In order to consummate our acquisitions in 2018 and January of 2019, we incurred approximately \$11.0 million of subordinated indebtedness in connection with the notes issued to the sellers. In addition, as of December 31, 2018, we have approximately \$115.0 million in gross senior, secured debt outstanding under our Second Restated Credit Agreement. Our high level of indebtedness could adversely affect our business in the following ways, among others:

- make it more difficult for us to satisfy our financial obligations under our current debt obligations, or other indebtedness, as well as our contractual and commercial commitments, and could increase the risk that we may default on our debt obligations;
- require us to use a substantial portion of our cash flow from operations to pay interest and principal on our current debt obligations or other indebtedness, which would reduce the funds available for working capital, capital expenditures and other general corporate purposes;
- limit our ability to obtain additional financing for working capital, capital expenditures, acquisitions and other investments or general corporate purposes, which may limit the ability to execute our business strategy;

- heighten our vulnerability to downturns in our business, our industry or in the general economy, and restrict us from exploiting business opportunities or making acquisitions;
- place us at a competitive disadvantage compared to those of our competitors that may have proportionately less debt;
- limit management's discretion in operating our business;
- limit our flexibility in planning for, or reacting to, changes in our business, the industry in which we operate or the general economy; and
- result in higher interest expense if interest rates increase.

Our ability to make scheduled payments on or to refinance our indebtedness depends on our future performance, which is subject to economic, financial, competitive and other factors that may be beyond our control. Our business may not generate cash flow from operations in the future sufficient to service our debt and support our growth strategies. If we are unable to generate sufficient cash flow, we may be required to pursue one or more alternatives, such as selling assets, restructuring debt or obtaining additional equity capital on terms that may be onerous or dilutive. Our ability to refinance our indebtedness will depend on the capital markets and our financial condition at such time. We may not be able to engage in any of these activities or on desirable terms, which could result in a default on our debt obligations, including under our current debt obligations. In addition, if for any reason we are unable to meet our debt service and repayment obligations, we would be in default under the terms of our Second Restated Credit Agreement, which would allow our creditors at that time to declare all outstanding indebtedness to be due and payable. Under these circumstances, our lenders could compel us to apply all of our available cash to repay our indebtedness.

Table of Contents

Further, the interest rate on the debt we have incurred under our Second Restated Credit Agreement is calculated with reference to LIBOR. LIBOR is an interest rate used in lending transactions between banks on the London interbank market. On July 27, 2017, the United Kingdom's Financial Conduct Authority, which regulates LIBOR, announced that it intends to phase out LIBOR by the end of 2021. The maturity date of our indebtedness under our Second Restated Credit Agreement is after December 31, 2021, and, as a result, we may be required to renegotiate our Second Restated Credit Agreement in order to address the phase-out of the LIBOR rate, which may result in terms that are not as favorable to us, which may affect our ability to meet our debt service and repayment obligations or have an adverse effect on our operations.

Our ability to incur debt and the use of our funds could be limited by the restrictive covenants in our loan agreement for our term loan and revolving credit facility.

Our Second Restated Credit Agreement with Wells Fargo Bank, N.A. and Goldman Sachs provides for a term loan and revolving credit facility that contains restrictive covenants, including restrictions on our ability to pay dividends to stockholders, as well as requirements to comply with certain leverage ratios and other financial maintenance tests. These restrictive covenants and requirements limit the amount of borrowings that are available to us. The Second Restated Credit Agreement covenants may also affect our ability to obtain future financing and to pursue attractive business opportunities and our flexibility in planning for, and reacting to, changes in business conditions. These covenants could place us at a disadvantage compared to some of our competitors, who may have fewer restrictive covenants and may not be required to operate under these restrictions.

We may be required to incur further debt to meet future capital requirements of our business. Should we be required to incur additional debt, the restrictions imposed by the terms of such debt could adversely affect our financial condition and our ability to respond to changes in our business.

If we incur additional debt, we may be subject to the following risks:

- our vulnerability to adverse economic conditions may be heightened;
- our flexibility in planning for, or reacting to, changes in our business may be limited;
- our debt covenants may affect our flexibility in planning for, and reacting to, changes in the economy and in our industry;

- higher levels of debt may place us at a competitive disadvantage compared to our competitors or prevent us from pursuing opportunities;
- covenants contained in the agreements governing our indebtedness may limit our ability to borrow additional funds and make certain investments;
- a significant portion of our cash flow could be used to service our indebtedness; and
- our ability to obtain additional financing in the future for working capital, capital expenditures, acquisitions or other general corporate purposes may be impaired.

We cannot assure you that our leverage and such restrictions will not materially and adversely affect our ability to finance our future operations or capital needs or to engage in other business activities.

Volatility and weakness in bank and capital markets may adversely affect credit availability and related financing costs for us.

Banking and capital markets can experience periods of volatility and disruption. If the disruption in these markets is prolonged, our ability to refinance, and the related cost of refinancing, some or all of our debt could be adversely affected. Although we currently can access the bank and capital markets, there is no assurance that such markets will continue to be a reliable source of financing for us. These factors, including the tightening of credit markets, could adversely affect our ability to obtain cost-effective financing. Increased volatility and disruptions in the financial markets also could make it more difficult and more expensive for us to refinance outstanding indebtedness and to obtain financing. In addition, the adoption of new statutes and regulations, the implementation of recently enacted laws, or new interpretations or the enforcement of older laws and regulations applicable to the financial markets or the financial services industry could result in a reduction in the amount of available credit or an increase in the cost of credit. Disruptions in the financial markets can also adversely affect our lenders, insurers, customers, and other counterparties. Any of these results could have a material adverse effect on our business, financial condition, and results of operations.

Table of Contents

We depend on data centers and computing infrastructure operated by third parties and any disruption in these operations could adversely affect our business.

We host our applications and serve our customers through a number of external data centers. While we control and have access to our servers and all the components of the networks that are located in our external data centers, we do not control the operations of these facilities. The owners of such facilities have no obligation to renew their agreements with us on commercially reasonable terms. If we are not able to renew these contracts on commercially reasonable terms, we may be required to transfer our servers and other infrastructure to new data facilities, and we may incur significant costs and possible service interruption in doing so. Additionally, we rely on certain hosted infrastructure partners, such as Amazon Web Services (“AWS”) to provide a third party hosted environment for certain of our applications. Any disruption or interference at our hosted infrastructure partners would impact our operations and our business could be adversely impacted. Problems faced by our third-party data center operations or hosted infrastructure partners could adversely affect the experience of our customers. Breaches of our clients’ data caused by errors, omissions or hostile acts of third parties within the third party hosted environment are beyond our control yet we would remain responsible for such data security incidents from a regulatory standpoint, in some instances. Our third-party data center operators or hosted infrastructure partners could decide to close their facilities without adequate notice. In addition, any financial difficulties, such as bankruptcy, faced by our third-party data center operators, our hosted infrastructure partners or any of the other service providers with whom we or they contract may have negative effects on our business, the nature and extent of which are difficult to predict.

If our security measures or those of our third-party data center hosting facilities, cloud computing platform providers or third-party service partners are compromised or breached, our services may be perceived as not being secure, our brand could be damaged, our services may be disrupted, and customers may curtail or stop using our services, all of which could reduce our revenue and earnings, increase our expenses, and exposure us to legal claims and regulatory actions.

Our services involve the collection, transmission, processing and storing of our customers’ and our customers’ customers’ proprietary and other sensitive data, including financial information and other personal information. While we have security measures in place, they may be breached as a result of third-party action, including intentional misconduct by computer hackers, employee error, malfeasance or otherwise and result in someone obtaining unauthorized access to our information technology systems, our customers’ data or our data, including our intellectual property and other confidential business information. In addition, third parties may attempt to fraudulently induce employees or customers into disclosing sensitive information such as user names, passwords or other information in order to gain access to our customers’ data, our data or our information technology systems. Because the techniques used to obtain unauthorized access, or to sabotage systems, change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. In addition, our customers may authorize third-party technology providers to access their customer data, and some of our customers may not have adequate security measures in place to protect their data that is stored on our services. Because we do not control our customers or third-party technology providers, or the processing of such data by third-party technology providers, we cannot ensure the integrity or security of such transmissions or processing. Malicious third parties may also conduct attacks designed to temporarily deny customers access to our services. Any security breach could result in a loss of confidence in the security of our services, damage our reputation, negatively

impact our future sales, disrupt our business and lead to legal liability. Moreover, if a high profile security breach occurs with respect to another SaaS provider, our clients and potential clients may lose trust in the security of the SaaS business model generally, which could adversely impact our ability to retain existing clients or attract new ones.

Some of our key components are procured from a single or limited number of suppliers. Thus, we are at risk of shortage, price increases, tariffs, changes, delay, or discontinuation of key components, which could disrupt and materially and adversely affect our business.

Some of the key components used to manufacture our products, such as the Gen2 Smartview sensors and AsureForce time clocks and air clocks, come from limited or single sources of supply. We do not have contractual commitments or guaranteed supply arrangements with our suppliers. As a result, we are subject to the risk of shortages and long lead times in the supply of our components or products. Further, our suppliers may experience financial or other difficulties as a result of uncertain and weak worldwide economic conditions. Other factors which may affect our suppliers' ability or willingness to supply components to us include internal management or reorganizational issues, such as roll-out of new equipment which may delay or disrupt supply of previously forecasted components, or industry consolidation and divestitures, which may result in changed business and product priorities among certain suppliers. It could be difficult, costly and time consuming to obtain alternative sources for these components, or to change product designs to make use of alternative components. In addition, difficulties in transitioning from an existing supplier to a new supplier could create delays in component availability that would have a significant impact on our ability to fulfill orders for our products.

Table of Contents

Additionally, various sources of supply-chain risk, including strikes or shutdowns at delivery ports or loss of or damage to our products while they are in transit or storage, intellectual property theft, losses due to tampering, third-party vendor issues with quality or sourcing control, failure by our suppliers to comply with applicable laws and regulation, potential tariffs or other trade restrictions, or other similar problems could limit or delay the supply of our products or harm our reputation. In the event of a shortage or supply interruption from suppliers of these components, we may not be able to develop alternate sources quickly, cost-effectively, or at all. Any interruption or delay in manufacturing, component supply, any increases in component costs, or the inability to obtain these parts or components from alternate sources at acceptable prices and within a reasonable amount of time, would harm our ability to provide our products to customers on a timely basis. This could harm our relationships with our customers, damage our reputation in the market, prevent us from acquiring new customers, and materially and adversely affect our business.

As we acquire and invest in companies or technologies, we may not realize the expected business or financial benefits. These acquisitions could prove difficult to integrate, disrupt our business, dilute stockholder value and ownership and adversely affect our operating results and financial condition.

As part of our business strategy, we have in the past and may in the future seek to acquire or invest in other businesses, products or technologies that we believe could complement or expand our existing platform, enhance our technical capabilities or otherwise offer growth opportunities. Acquisitions and investments involve numerous risks, including:

- potential failure to achieve the expected benefits of the combination or acquisition;
- difficulties in, and the cost of, integrating operations, technologies, services, platforms and personnel;
- diversion of financial and managerial resources from existing operations;
- the potential entry into new markets in which we have little or no experience or where competitors may have stronger market positions;
- potential write-offs of acquired assets or investments, and potential financial and credit risks associated with acquired customers;

- potential loss of key employees of the acquired company;
- inability to generate sufficient revenue to offset acquisition or investment costs;
- inability to maintain relationships with customers and partners of the acquired business;
- difficulty of transitioning the acquired technology onto our existing platforms and customer acceptance of multiple platforms on a temporary or permanent basis;
- augmenting the acquired technologies and platforms to the levels that are consistent with our brand and reputation;
- increasing or maintaining the security standards for acquired technology consistent with our other services;
- potential unknown liabilities associated with the acquired businesses;
- unanticipated expenses related to acquired technology and its integration into our existing technology;
- negative impact to our results of operations because of the depreciation and amortization of amounts related to acquired intangible assets, fixed assets and deferred compensation;
- additional stock based compensation;
- the loss of acquired deferred revenue and unbilled deferred revenue;
- delays in customer purchases due to uncertainty related to any acquisition;
- ineffective or inadequate controls, procedures and policies at the acquired company;

Table of Contents

- challenges caused by integrating operations over distance, and across different languages and cultures in the case of any international acquisitions;
- currency and regulatory risks associated with foreign countries and potential additional cybersecurity and compliance risks resulting from entry into new markets; and
- the tax effects of any such acquisitions.

Any of these risks could have an adverse effect on our business, operating results and financial condition.

In addition, to facilitate these acquisitions or investments, we may seek additional equity or debt financing, which may not be available on terms favorable to us, or at all, which may affect our ability to complete acquisitions or investments. If we finance acquisitions by issuing equity or convertible or other debt securities or loans, or issue equity as consideration for an acquisition, our existing stockholders may be diluted, or we could face constraints related to the terms of, and repayment obligations related to, the incurrence of indebtedness. See also the risk factor below titled “We may require additional capital to support business growth, and this capital may not be available on acceptable terms, or at all.”

Privacy regulations, existing and evolving regulation of cloud computing, cross-border transfer restrictions and other United States and foreign regulations could limit the use of our services and adversely affect our business.

Regulatory focus on privacy issues continues to increase, as federal, state and foreign governments continue to adopt new laws and regulations addressing data privacy and the collection, processing, storage and use of personal information. As these laws expand and become more complex, potential risks related to our handling of our clients’ personal information will intensify. These measures include the General Data Protection Regulation (“GDPR”), effective in May, 2018, which replaces the current EU Data Protection Directive 95/46/EC and which applies to all EU member states. This law governs the processing of personal information within the EU and the processing of personal information of EU citizens generally and applies directly to our operations as a data processor. The GDPR imposes new security and privacy standards and contractual obligations on data processors and provides for significant fines and new private rights of actions in the event of breach of a data security or data privacy obligation or non-compliance in general. Non-compliance with the GDPR may result in monetary penalties of up to 4% of worldwide revenue. The GDPR and other changes in foreign and domestic laws or regulations associated with the enhanced protection of certain types of sensitive data, such as healthcare data, biometric data, or any personal information, could increase our cost of providing our services or prevent us from offering services in jurisdictions in which we operate. These and other requirements could reduce demand for our services or restrict our ability to store and process data or, in some cases, impact our ability to offer our services in certain locations impacting our clients’

ability to deploy our solutions globally. Additionally, the law relating to the ability to exchange data outside of jurisdiction borders is complex and subject to change. For example, in October 2015, the European Court of Justice invalidated the U.S.-EU Safe Harbor framework that had been in place since 2000, which allowed companies to meet certain European legal requirements for the transfer of personal data from the European Economic Area to the United States. While other adequate legal mechanisms to lawfully transfer such data remain, the invalidation of the U.S.-EU Safe Harbor framework may result in different European data protection regulators applying differing standards for the transfer of personal data, which could result in increased regulation, cost of compliance and limitations on data transfer for us and our customers. The costs of compliance with and other burdens imposed by laws, regulations and standards may limit the use and adoption of our services, reduce overall demand for our services, lead to significant fines, penalties or liabilities for noncompliance, or slow the pace at which we close sales transactions, any of which could harm our business. In addition to governmental regulation, self-regulatory standards may place additional burdens on us. Many of our customers expect us to meet voluntary certification or other standards established by third parties, such as the International Trade Administration Privacy Shield as well as other audited measures and controls. If we are unable to maintain these certifications or meet these standards, it could adversely affect our ability to provide our solutions to certain customers and could harm our business. Even the perception that the privacy of personal information is not satisfactorily protected or does not meet regulatory requirements could inhibit sales of our products or services, and could limit adoption of our cloud-based solutions.

If we are not able to develop enhancements and new features, keep pace with technological developments or respond to future technologies, our business, operating results and financial will be adversely affected.

Our future success will depend on our ability to adapt and innovate. To attract new clients and increase revenue from existing clients, we will need to enhance and improve our existing products and introduce new features. The success of any enhancement or new feature depends on several factors, including timely completion, introduction and market acceptance. If we are unable to enhance our existing products to meet client needs or successfully develop or acquire new features or products, or if such new features or products fail to be successful, our business, operating results and financial condition will be adversely affected.

Table of Contents

Our products are designed to operate on a variety of network, hardware and software platforms using Internet tools and protocols, and we must continuously modify and enhance our products to keep pace with changes in Internet-related hardware, software, communication, browser and database technologies. In addition, if new technologies emerge that are able to deliver a workforce management software at lower prices, more efficiently or more conveniently, we may be unable to compete with these technologies. If we are unable to respond in a timely and cost-effective manner to these rapid technological developments, our products may become less marketable and less competitive or obsolete, and our business, operating results and financial condition will be adversely affected.

Our business depends substantially on clients renewing their agreements with us, purchasing additional products from us or adding additional users. If our customers do not renew their subscriptions for our services or reduce the number of paying subscriptions at the time of renewal, our revenue will decline and our business, operating results and financial condition may be adversely affected. If we cannot accurately predict subscription renewals or upgrade rates, we may not meet our revenue targets, which may adversely affect the market price of our common stock.

In order for us to improve our operating results, it is important that our clients renew their agreements with us when the initial contract term expires and also purchase additional products or add additional users.

Our customers have no obligation to renew their subscriptions for our services after the expiration of their contractual subscription period, which is typically one to three years, and in the normal course of business, some customers have elected not to renew. Even if customers elect to renew, they may renew for fewer subscriptions, renew for shorter contract lengths, or switch to lower cost offerings of our services. Moreover, certain of our clients have the right to cancel their agreements for convenience, subject to certain notice requirements and, in some cases, early termination fees. It is difficult to predict attrition rates given our varied customer base of enterprise, varied sizes of our customers and the number of multi-year subscription contracts. Our client renewal rates may decline or fluctuate as a result of a number of factors, including their satisfaction or dissatisfaction with our products, our pricing, the prices of competing products or services, mergers and acquisitions affecting our client base, reduced hiring by our clients or reductions in our clients' spending levels.

Our future success also depends in part on our ability to sell additional features and services, more subscriptions or enhanced editions of our services to our current customers. This may also require increasingly sophisticated and costly sales efforts that are targeted at senior management. Similarly, the rate at which our customers purchase new or enhanced services depends on a number of factors, including general economic conditions and that our customers do not react negatively to any price changes related to these additional features and services.

In addition, if we cannot accurately predict subscription renewals or upgrade rates, we may not meet our revenue targets, which may adversely affect the market price of our common stock.

We may require additional capital to support business growth, and this capital may not be available on acceptable terms, or at all.

We intend to continue to make investments, including the acquisition of complementary businesses, to support our business growth and may seek additional funds to respond to business challenges, including the need to develop new features or enhance our existing products, improve our operating infrastructure or acquire complementary businesses and technologies. Accordingly, we may need to engage in additional equity or debt financings to secure additional funds. If we raise additional funds through issuances of equity or debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our common stock. In addition, we may not be able to obtain additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us, when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly impaired.

Our ability to make scheduled payments of the principal of, to pay interest on or to refinance our indebtedness, including subordinated promissory notes we issued in connection with our acquisitions, depends on our future performance, which is subject to economic, financial, competitive and other factors beyond our control. Our business may not generate cash flow from operations in the future sufficient to satisfy our obligations under the notes and any future indebtedness we may incur and to make necessary capital expenditures. If we are unable to generate such cash flow, we may be required to adopt one or more alternatives, such as reducing or delaying investments or capital expenditures, selling assets, refinancing or obtaining additional equity capital on terms that may be onerous or highly dilutive. Our ability to refinance the notes or future indebtedness will depend on the capital markets and our financial condition at such time. We may not be able to engage in any of these activities or engage in these activities on desirable terms, which could result in a default on the notes or future indebtedness.

Table of Contents

Unfavorable conditions in our industry or the global economy, or reductions in information technology spending, could adversely affect our business, operating results and financial condition.

Our operating results may vary based on changes in our industry or the impact of changes in the global economy on us or our clients. The revenue growth and potential profitability of our business depends on demand for enterprise application software and services generally and for workspace and workforce management solutions in particular. We sell our software products and services primarily to large, mid-sized and small business organizations whose businesses fluctuate based on general economic and business conditions. In addition, a portion of our revenue is attributable to the number of users of our products at each of our clients, which in turn is influenced by the employment and hiring patterns of our clients and potential clients. To the extent that economic uncertainty or weak economic conditions cause our clients and potential clients to freeze or reduce their headcount, demand for our products may be negatively affected. Historically, economic downturns have resulted in overall reductions in spending on information technology and workforce management software as well as pressure from clients and potential clients for extended billing terms. If economic conditions deteriorate, our clients and potential clients may elect to decrease their information technology and workforce management budgets by deferring or reconsidering product purchases, which would adversely affect our business, operating results and financial condition.

The market for workforce management in which we participate is intensely competitive, and if we do not compete effectively, our business, operating results and financial condition could be adversely affected.

The market for workforce management software is highly competitive, rapidly evolving and fragmented. Many of our competitors and potential competitors are larger and have greater brand name recognition, longer operating histories, larger marketing budgets and significantly greater resources than we do. These competitors may be able to respond more quickly to new or emerging technologies and changes in customer requirements, and they may be able to compete more effectively on price and other terms. In addition, with the introduction of new technologies and market entrants, we expect competition to intensify in the future. If we fail to compete effectively, our business will be harmed. Some of our principal competitors offer their products or services at a lower price, which has resulted in pricing pressures on our products. Similarly, some competitors offer different billing terms, which has resulted in pressures on our billing terms. If we are unable to maintain our pricing levels and billing terms, our operating results could be negatively impacted. In addition, pricing pressures and increased competition generally could result in reduced sales, reduced margins, losses or the failure of our products to achieve or maintain more widespread market acceptance, any of which could adversely affect our business, operating results and financial condition.

We face competition from paper-based processes and desktop software tools. We also face competition from custom-built software that is designed to support the needs of a single organization, as well as from third-party talent and human resource application providers. These vendors include, without limitation, Dean Evans & Associates, Inc., Emergingsoft Corporation, AgilQuest Corporation and Condecro Ltd. (UK) as competitors to the AsureSpace™ line and Kronos, Replicon and Time Simplicity as competitors to the AsureForce® line. In addition, some of the parties with which we maintain business alliances offer or may offer products or services that compete with our products or services.

Many of our competitors are able to devote greater resources to the development, promotion and sale of their products and services. In addition, many of our competitors have established marketing relationships, access to large client bases and major distribution agreements with consultants, system integrators and distributors. Moreover, many software vendors can bundle human resource products or offer such products at a lower price as part of a larger product sale. In addition, some competitors may offer software that addresses one or a limited number of workforce management functions at a lower price point or with greater depth than our products. For all of these reasons, we may not be able to compete successfully against our current and future competitors.

Existing or future laws and regulations could increase the cost of our products and negatively affect our reputation, results of operations or financial condition, or have other adverse consequences.

Our business is subject to a wide range of complex U.S. and foreign laws and regulations. As a provider of human resources outsourcing solutions, we process personal and sensitive data related to clients, employees of our clients, and our employees, and are subject to compliance obligations under federal, state and foreign privacy and data security-related laws. For instance, in the United States, the Health Insurance Portability and Accountability Act of 1996 applies to our COBRA, flexible spending account and health savings account benefits administration services businesses. We are also subject to federal, state and foreign security breach notification laws with respect to both our own employee data and client employee data.

Table of Contents

Some of our solutions assist our clients in complying with certain U.S. and foreign laws and regulations that apply to them. For example, our HCM solutions help clients manage their compliance with certain requirements of the Patient Protection and Affordable Care Act in the United States. Our COBRA administration services and flexible spending account services in the United States are designed to help our clients comply with relevant federal guidelines relating to, respectively, employers' benefits continuation obligations and certain requirements of the Internal Revenue Code. Changes in such laws or regulations could require us to make significant modifications to our products or delay or cease sales of certain products, which could result in reduced revenues, increased expenses and write-offs.

As part of our payroll processing solutions, we move client funds to taxing authorities, our clients' employees, and other payees via electronic transfer and direct deposit. Some elements of our money transmission activities may be subject to licensing requirements under money transmitter statutes in some jurisdictions. The adoption of new money transmitter statutes in other jurisdictions, changes in regulators' interpretation of existing state and federal money transmitter or money services business statutes or regulations, or disagreement by a regulatory authority with our interpretation of such statutes or regulations, could require additional registration or licensing, limit certain of our business activities until they are appropriately licensed, and expose us to financial penalties. These occurrences could also require changes to the manner in which we conduct some aspects of our money movement business or client funds investment strategy.

Failure to comply with laws and regulations applicable to our operations or client solutions and services could result in the suspension or revocation of licenses or registrations, the limitation, suspension or termination of services, and the imposition of consent orders or civil and criminal penalties, including fines, that could damage our reputation and have a materially adverse effect on our results of operation or financial condition. In addition, changes in laws or regulations, or changes in the interpretation of laws or regulations by a regulatory authority, may decrease our revenues and earnings and may require us to change the manner in which we conduct some aspects of our business.

Evolving regulation of the Internet, changes in the infrastructure underlying the Internet or interruptions in Internet access may adversely affect our business, operating results and financial condition by increasing our expenditures and causing client dissatisfaction.

Our services depend on the ability of our registered users to access the Internet. Currently, this access is provided by companies that have significant market power in the broadband and Internet access marketplace, including incumbent telephone companies, cable companies, mobile communications companies and government-owned service providers. Laws or regulations that adversely affect the growth, popularity or use of the Internet, including changes to laws or regulations impacting Internet neutrality, could decrease the demand for our products, increase our operating costs, require us to alter the manner in which we conduct our business and/or otherwise adversely affect our business. For example, the Federal Communications Commission (the "FCC") recently adopted an order repealing rules that prohibit Internet service providers ("ISPs") from blocking or throttling Internet traffic, and from engaging in practices that prioritize particular Internet content in exchange for payment (also known as "paid prioritization"). The order is not yet effective and has been challenged in court, which could result in further changes to the governing law. There is also uncertainty regarding how the FCC's new framework, if upheld, and new oversight by the Federal Trade Commission

(“FTC”) will be applied. Depending on ongoing appellate proceedings and future action by the FCC and FTC, we could experience discriminatory or anti-competitive practices that could cause us to incur additional expense or otherwise adversely affect our business, operating results and financial condition. In particular, the repeal of restrictions on paid prioritization could enable ISPs to impose higher fees and otherwise adversely affect our business.

In addition, the rapid and continual growth of traffic on the Internet has resulted at times in slow connection and download speeds of Internet users. Our business may be harmed if the Internet infrastructure cannot handle our clients’ demands or if hosting capacity becomes insufficient. If our clients become frustrated with the speed at which they can utilize our products over the Internet, our clients may discontinue the use of our software and choose not to renew their contracts with us. Further, the performance of the Internet has also been adversely affected by viruses, worms, hacking, phishing attacks, denial of service attacks and other similar malicious programs, as well as other forms of damage to portions of its infrastructure, which have resulted in a variety of Internet outages, interruptions and other delays. These service interruptions could diminish the overall attractiveness of our products to existing and potential users and could cause demand for our products to suffer.

Table of Contents

Our business and operations are experiencing growth and organizational change. If we fail to effectively manage such growth and change, our business, operating results and financial condition could be adversely affected.

We have experienced, and may continue to experience, growth and organizational change, which has placed, and may continue to place, significant demands on our management, operational and financial resources. For example, our headcount has grown from 325 employees (315 full-time) on December 31, 2017 to 564 employees (550 full-time) on December 31, 2018. We may continue to expand our operations in the future, either organically or through additional acquisitions. We have also experienced significant growth in the number of users, transactions and data that our SaaS hosting infrastructure supports. We will require significant capital expenditures and the allocation of valuable management resources to manage this growth. If we fail to manage our anticipated growth and change in an effective manner, our ability to retain and attract clients may suffer and our business, operating results and financial condition may be adversely affected.

Our clients could have insufficient funds to cover payments we have made on their behalf, resulting in financial loss to us.

As part of the payroll processing service, we are authorized by our clients to transfer money from their accounts to fund amounts owed to their employees and various taxing authorities. It is possible that we could be held liable for such amounts in the event the client has insufficient funds to cover them. We have in the past, and may in the future, make payments on our clients' behalf for which we may not be reimbursed, resulting in a loss to us. Further, if we are required to advance substantial amounts of funds to cover payment obligations of our clients, we may need to seek additional sources of short-term liquidity, which may not be available on reasonable terms, which could have a material; adverse effect on our business, financial condition and results of operations.

Client funds that we hold in trust are subject to market, interest rate, credit and liquidity risk. The loss of these funds could have a material adverse effect on our business, financial condition and results of operations .

We invest our funds held for clients in high quality, investment-grade marketable securities, money markets, and other cash equivalents. However, these funds held for clients are subject to general market, interest rate, credit, and liquidity risks. These risks may be exacerbated during periods of unusual financial market volatility. Any loss or inability to access client funds could have an adverse impact on our cash position and could require us to obtain additional sources of liquidity, and could have a material adverse effect on our business, financial condition and results of operations.

The markets in which we participate are highly competitive, and if we do not compete effectively, our operating results could be adversely affected.

The market for payroll and HCM solutions is fragmented, highly competitive and rapidly changing. Our competitors vary for each of our solutions, and include (i) enterprise-focused software providers, such as Ultimate Software Group, Inc., Workday, Inc., SAP AG, Oracle Corporation and Ceridian Corporation, (ii) payroll service providers, such as Automatic Data Processing, Inc., Paychex, Inc., Paycom Software, Inc., Paycor, Inc. and (iii) other regional providers, and HCM point solutions, such as Cornerstone OnDemand, Inc.

Several of our competitors are larger, have greater name recognition, longer operating histories and significantly greater resources than we do. Many of these competitors are able to devote greater resources to the development, promotion and sale of their products and services. Furthermore, our current or potential competitors may be acquired by third parties with greater available resources and the ability to initiate or withstand substantial price competition. As a result, our competitors may be able to develop products and services better received by our markets or may be able to respond more quickly and effectively than we can to new or changing opportunities, technologies, regulations or client requirements.

In addition, current and potential competitors have established, and might in the future establish, partner or form other cooperative relationships with vendors of complementary products, technologies or services to enable them to offer new products and services, to compete more effectively or to increase the availability of their products in the marketplace. New competitors or relationships might emerge that have greater market share, a larger client base, more widely adopted proprietary technologies, greater marketing expertise, greater financial resources, and larger sales forces than we have, which could put us at a competitive disadvantage. In light of these advantages, current or potential clients might accept competitive offerings in lieu of purchasing our offerings. We expect intense competition to continue for these reasons, and such competition could negatively impact our sales, profitability or market share.

Table of Contents

If we lose key personnel, including key management personnel, or are unable to attract and retain additional personnel as needed in the future, it could disrupt the operation of our business, delay our product development and harm our growth efforts.

Our future performance depends largely on our ability to continually and effectively attract, train, retain, motivate and manage highly qualified and experienced technical, sales, marketing, managerial and executive personnel. Our future development and growth depend on the efforts of key management personnel and technical employees. We cannot guarantee that we will continue to attract and retain personnel with the requisite capabilities and experience. The loss of one or more of our key management or technical personnel could have a material and adverse effect on our business, operating results and financial condition.

Any significant disruption in our SaaS hosting network infrastructure could harm our reputation, require us to provide credits or refunds, result in early terminations of client agreements or a loss of clients, and adversely affect our business, operating results and financial condition.

Our SaaS hosting network infrastructure is a critical part of our business operations. Our clients access our workforce management software through a standard web browser and depend on us for fast and reliable access to our products. Our software is proprietary, and we rely on third-party data center hosting facilities and the expertise of members of our engineering and software development teams for the continued performance of our software. We have experienced, and may in the future experience, disruptions in our computing and communications infrastructure. Factors that may cause such disruptions include:

- human error;
- security breaches;
- telecommunications outages from third-party providers;
- computer viruses;
- acts of terrorism, sabotage or other intentional acts of vandalism, including cyber attacks;
- unforeseen interruption or damages experienced in moving hardware to a new location;
- fire, earthquake, flood and other natural disasters; and
- power loss.

Although we generally back up our client databases hourly, store our data in more than one geographically distinct location at least weekly and perform real-time mirroring of data to disaster recovery locations, we do not currently offer immediate access to disaster recovery locations in the event of a disaster or major outage. Thus, in the event of any of the factors described above, or other failures of our computing infrastructure, clients may not be able to access their data for lengthy periods of time and it is possible that client data from recent transactions may be permanently lost or otherwise compromised. In addition, we may not have adequate insurance coverage to compensate for losses from a major interruption. Moreover, some of our agreements include performance guarantees and service level standards that obligate us to provide credits, refunds or termination rights in the event of a significant disruption in our SaaS hosting network infrastructure or other technical problems that relate to the functionality or design of our software.

Even if demand for workforce management products and services increases generally, there is no guarantee that demand for SaaS products generally or our products in particular will increase to a corresponding degree, or at all.

The widespread adoption of our products depends not only on strong demand for workforce management products and services generally, but also for products and services delivered via a SaaS business model in particular. A significant number of organizations do not use workforce management products, and it is unclear whether such organizations will ever use these products and, if they do, whether they will choose to use a SaaS workforce management software service or our products in particular. As a result, we cannot assure you that our SaaS workforce management software products will achieve and sustain the high level of market acceptance that is critical for the success of our business.

Because of how we recognize revenue with respect to our workforce management products, a significant downturn in our business may not be immediately reflected in our operating results.

Our revenues consist of SaaS offerings, time-based software subscriptions, and perpetual software license sale arrangements. We recognize revenue from our SaaS arrangements and time-based software subscription agreements monthly over the terms of these arrangements, which typically range from one to three years. As a result, a significant portion of the revenue we report in each quarter is generated from arrangements entered into during previous periods. Consequently, a decline in new subscriptions or SaaS arrangements in any one quarter may not have a significant impact on our revenue and financial performance in that quarter, but will negatively affect our revenue, or rate of revenue growth, and financial performance in future quarters.

Table of Contents

In addition, if subscription or SaaS arrangements expire and are not renewed in the same quarter, our revenue and financial performance in that quarter and subsequent quarters will be negatively affected. However, the revenue impact may not be immediately reflected in our operating results to the extent there is an offsetting increase in revenue from perpetual license sales in that same quarter.

Finally, we may be unable to adjust our fixed costs in response to reduced revenue. Accordingly, the effect of significant declines in sales and market acceptance of our products may not be reflected in our short-term operating results.

Because we generally recognize subscription revenue from our clients over the terms of their agreements but incur most costs associated with generating such agreements up front, rapid growth in our client base may put downward pressure on our operating income in the short term.

The expenses associated with generating client agreements are generally incurred up front, while the resulting subscription revenue is generally recognized over the life of the agreements. Accordingly, increased growth in the number of our clients will result in our recognition of more costs than revenue during the early periods covered by such agreements, even in cases where the agreements are expected to be profitable for us over their full terms.

If we fail to adequately protect our proprietary rights, our competitive advantage and brand could be impaired and we may lose valuable assets, generate reduced revenue and incur costly litigation to protect our rights.

Our success is dependent, in part, upon protecting our proprietary technology. We rely on a combination of trademarks, service marks, trade secret laws and contractual restrictions to establish and protect our proprietary rights in our products and services. However, the steps we take to protect our intellectual property may be inadequate. We will not be able to protect our intellectual property if we are unable to enforce our rights or if we do not detect unauthorized use of our intellectual property. Despite our precautions, it may be possible for unauthorized third parties to copy our products and use information that we regard as proprietary to create products and services that compete with ours. Some license provisions protecting against unauthorized use, copying, transfer and disclosure of our licensed products may be unenforceable under the laws of certain jurisdictions and foreign countries. Further, the laws of some countries do not protect proprietary rights to the same extent as the laws of the United States. To the extent we expand our international activities, our exposure to unauthorized copying and use of our products and proprietary information may increase. While our general practice is to enter into confidentiality and invention assignment agreements with our employees and consultants and confidentiality agreements with the parties with whom we have strategic relationships and business alliances, these agreements may not be effective in controlling access to and distribution of our products and proprietary information. Further, these agreements do not prevent our competitors from independently developing technologies that are substantially equivalent or superior to our products. Litigation brought to protect and enforce our intellectual property rights could be costly, time consuming and distracting to management and could result in the impairment or loss of portions of our intellectual property. If we fail to secure,

protect and enforce our intellectual property rights, we may lose valuable assets, generate reduced revenue and incur costly litigation to protect our rights, which could adversely affect our business, operating results and financial condition.

We may be sued by third parties for infringement of their proprietary rights.

There is considerable intellectual property development activity in our industry. Our success depends upon our not infringing upon the intellectual property rights of others. Third parties, including our competitors, may own or claim to own intellectual property relating to our products or services and may claim that we are infringing their intellectual property rights. We may be found to be infringing upon such rights, even if we are unaware of their intellectual property rights. Any claims or litigation could cause us to incur significant expenses and, if successfully asserted against us, could require that we pay substantial damages or ongoing royalty payments, obtain licenses, modify applications, prevent us from offering our services, or require that we comply with other unfavorable terms. We may also be obligated to indemnify our customers, vendors or partners in connection with any such claim or litigation. Even if we were to prevail in such a dispute, any litigation regarding our intellectual property could be costly and time-consuming and divert the attention of our management and key personnel from our business operations. Any such events could have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

We are exposed to the credit risks of our customers; if we have inadequately assessed their creditworthiness, we may have more exposure to accounts receivable risk than we anticipate. Failure to collect our accounts receivable in amounts that we anticipate could adversely affect our operating results and financial condition.

We grant credit to customers in the ordinary course of business, exposing us to the credit risk of our customers. In the course of our sales to customers, we may encounter difficulty collecting accounts receivable, which could adversely impact our operating results and financial condition. We maintain reserves for potential credit losses. However, these reserves are based on our judgment and a variety of factors and assumptions.

We perform credit evaluations of our customers' financial condition. However, our evaluation of the creditworthiness of customers may not be accurate if they do not provide us with timely and accurate financial information or if their situations change after we evaluate their credit. While we attempt to monitor these situations carefully, adjust our allowances for doubtful accounts as appropriate and take measures to collect accounts receivable balances, we have written down accounts receivable and written off doubtful accounts in prior periods and may be unable to avoid additional write-downs or write-offs of doubtful accounts in the future. Such write-downs or write-offs could negatively affect our operating results for the period in which they occur, and could harm our financial condition.

Our effective tax rate may fluctuate as a result of new tax laws and our interpretations of those new tax laws, which are subject to significant judgments and estimates. The ongoing effects of the new tax laws and the refinement of provisional estimates could make our results difficult to predict.

Our effective tax rate may fluctuate as a result of new tax laws and our interpretations of those new tax laws, which are subject to significant judgments and estimates. The ongoing effects of the new tax laws and the refinement of provisional estimates could make our results difficult to predict.

Our effective tax rate may fluctuate in the future as a result of the U.S. Tax Cuts and Jobs Act (the Act), which was enacted on December 22, 2017. The Act introduces significant changes to U.S. income tax law that will have a meaningful impact on our provision for income taxes once we release our valuation allowance. Accounting for the income tax effects of the Act requires significant judgments and estimates in the interpretation and calculations of the provisions of the Act.

Due to the timing of the enactment and the complexity involved in applying the provisions of the Act, we made reasonable estimates of the effects and recorded provisional amounts in our consolidated financial statements for the year ended December 31, 2017. The U.S. Treasury Department, the Internal Revenue Service (IRS), and other standard-setting bodies may issue guidance on how provisions of the Act will be applied or otherwise administered that is different from our interpretation. As we collect and prepare necessary data, and interpret the Act and any

additional guidance issued by the IRS or other standard-setting bodies, we may make adjustments to the provisional amounts that could materially affect our financial position and results of operations as well as our effective tax rate in the period in which the adjustments are made. Further, foreign governments may enact local tax laws in response to the Act which may result in additional changes that could materially affect our financial position and results of operations.

We face risks associated with expanding our sales outside of the United States.

We believe that our future growth depends in part upon our ability to increase sales in international markets. These sales are subject to a variety of risks, including fluctuations in currency exchange rates, tariffs, import restrictions and other trade barriers, unexpected changes in regulatory requirements, longer accounts receivable payment cycles, potentially adverse tax consequences and export license requirements. In addition, we are subject to the risks inherent in conducting business internationally, including political and economic instability and unexpected changes in diplomatic and trade relationships. Currency fluctuations may also increase the relative price of our products in international markets and thereby could also cause our products to become less affordable or less price competitive than those of international competitors. These risks associated with international operations may have a material adverse effect on our revenue from or costs associated with international sales.

Table of Contents

The results of the United Kingdom's referendum on withdrawal from the European Union may have a negative effect on global economic conditions, financial markets and our business.

In June 2016, a majority of voters in the United Kingdom elected to withdraw from the European Union in a national referendum. In March 2017, the United Kingdom formally notified the European Union of its intention to withdraw pursuant to Article 50 of the Lisbon Treaty. The referendum was advisory, and the terms of withdrawal are subject to a negotiation period that could last until March 2019. The referendum and the ensuing process of the United Kingdom's withdrawal from the European Union has created significant uncertainty about the future relationship between the United Kingdom and the European Union, including with respect to the laws and regulations that will apply as the United Kingdom determines which European Union laws to replace or replicate in the event of a withdrawal. The referendum has also given rise to calls for the governments of other European Union member states to consider withdrawal. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have a material adverse effect on our business, operating results and financial condition.

We may be subject to claims, lawsuits, governmental investigations and other proceedings that could adversely affect our business, financial condition and results of operations.

We are sometimes the subject of claims, lawsuits, governmental investigations and other legal and regulatory proceedings in the ordinary course of business, including those involving, among others, breach of contract, tortious conduct and employment law matters. The results of any such claims, lawsuits, or other legal or regulatory proceedings cannot be predicted with certainty. Any claims against us, whether meritorious or not, could be time-consuming, result in costly litigation, be harmful to our reputation, require significant management attention and divert significant resources. It is possible that a resolution of one or more such proceedings could result in substantial damages, settlement costs, fines and penalties that could adversely affect our business, financial condition and results of operations.

Changes in financial accounting standards or practices may cause adverse, unexpected financial reporting fluctuations and affect our reported operating results.

A change in accounting standards or practices can have a significant effect on our reported results and may even affect our reporting of transactions completed before the change is effective. New accounting pronouncements and varying interpretations of accounting pronouncements have occurred and may occur in the future. Changes to existing rules or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business.

As a public company, we are obligated to maintain effective internal control over financial reporting. If our internal control over financial reporting is ineffective, our financial reporting may not be accurate, complete and timely, and our auditors may be unable to attest to its effectiveness when required, thus adversely affecting investor confidence in our company.

We are required, pursuant to Section 404 of the Sarbanes-Oxley Act, to furnish a report by management on the effectiveness of our internal control over financial reporting. Our auditors also need to audit and provide an attestation report on the effectiveness of our internal control over financial reporting.

We have incurred and continue to incur significant costs assessing our system of internal control over financial reporting and processing documentation necessary to perform the evaluation needed to comply with Section 404. We may discover, and may not be able to remediate, future significant deficiencies or material weaknesses, or we may be unable to complete our evaluation, testing or any required remediation in a timely fashion. Failure of our internal control over financial reporting to be effective could cause our financial reporting to be inaccurate, incomplete or delayed. Moreover, even if there is no inaccuracy, incompleteness or delay of reporting results, if we identify one or more material weaknesses in our internal control over financial reporting, we will be unable to assert, and our auditors will be unable to affirm, that our internal control is effective, in which case investors may lose confidence in the accuracy and completeness of our financial reports, which could have a material adverse effect on the price of our common stock.

Table of Contents

To the extent that our pre-tax income or loss becomes relatively modest, our ability to conclude that a control deficiency is not a material weakness or that an accounting error does not require a restatement could be adversely affected.

Under the Sarbanes-Oxley Act of 2002, our management is required to assess the impact of control deficiencies based upon both quantitative and qualitative factors, and depending upon that analysis, we classify such identified deficiencies as either a control deficiency, significant deficiency or a material weakness. One element of our analysis of the significance of any control deficiency is its actual or potential financial impact. This assessment will vary depending on our level of pre-tax income or loss. For example, a smaller pre-tax income or loss will increase the likelihood of a quantitative assessment of a control deficiency as a significant deficiency or material weakness.

To the extent that our pre-tax income or loss is relatively small, if management or our independent registered public accountants identify an error in our interim or annual financial statements, it is more likely that such an error may be determined to be a material weakness or be considered a material error that could, depending upon the complete quantitative and qualitative analysis, result in our having to restate previously issued financial statements.

Our balance sheet includes significant amounts of goodwill and intangible assets. The impairment of a significant portion of these assets would adversely affect our business, operating results and financial condition.

As a result of our acquisitions, a significant portion of our total assets consist of intangible assets, including goodwill. Goodwill and identifiable intangible assets together accounted for approximately 52% of the total assets on our balance sheet as of December 31, 2018. We may not realize the full fair value of our intangible assets and goodwill. We expect to engage in additional acquisitions, which may result in our recognition of additional identifiable intangible assets and goodwill. We will evaluate on a regular basis whether all or a portion of our goodwill and identifiable intangible assets may be impaired. Under current accounting rules, any determination that impairment has occurred would require us to write off the impaired portion of goodwill and such intangible assets, resulting in a charge to our earnings. An impairment of a significant portion of goodwill or intangible assets could have a material adverse effect on our business, operating results and financial condition.

Our directors, officers and principal stockholders have significant voting power and may take actions that may not be in the best interests of our other stockholders.

As of March 12, 2019, our officers, directors and principal stockholders each holding more than 5% of our common stock, collectively, control approximately 13% of our outstanding common stock. As a result, these stockholders, if they were to act together, would be able to exert significant influence over the management and affairs of our company and most matters requiring stockholder approval, including the election of directors and approval of

significant corporate transactions. This significant concentration of ownership may have the effect of delaying or preventing a change of control, including those that you may believe are in your best interests as one of our stockholders. If potential acquirers are deterred, you may lose an opportunity to profit from a possible acquisition premium in our stock price. This significant concentration of stock ownership may also adversely affect the trading price of our common stock due to investors' perception that conflicts of interest may exist or arise.

We do not intend to pay dividends for the foreseeable future, and you must rely on increases in the market price of our common stock for returns on equity investment.

For the foreseeable future, we intend to retain any earnings to finance the development and expansion of our business, and we do not anticipate paying any cash dividends on our common stock. In addition, our Second Restated Credit Agreement contains limitations on our ability to pay dividends and make other distributions. Accordingly, investors must be prepared to rely on sales of their common stock after price appreciation to earn an investment return, which may never occur. Investors seeking cash dividends should not purchase our common stock. Any determination to pay dividends in the future will be made at the discretion of our board of directors and will depend on our results of operations, financial condition, capital requirements, contractual restrictions, restrictions imposed by applicable law and other factors our board deems relevant.

Table of Contents

Our ability to use our net operating loss carryforwards and certain other tax attributes may be limited.

As of December 31, 2018, we had federal net operating loss carryforwards of approximately \$110.0 million and research and development credit carryforwards of approximately \$6.2 million, which begin expiring in 2019. Under Sections 382 and 383 of the Internal Revenue Code of 1986, as amended, or the Code, if a corporation undergoes an “ownership change,” the corporation’s ability to use its pre-change net operating loss carryforwards and other pre-change tax attributes, such as research tax credits, to offset its post-change income and taxes may be limited. In general, an “ownership change” occurs if there is a cumulative change in our ownership by “5% shareholders” that exceeds 50 percentage points over a rolling three-year period. Similar rules apply under state tax laws. In the event that it is determined that we have in the past experienced ownership changes, or if we experience one or more ownership changes as a result of future transactions in our stock, then we may be limited in our ability to use our net operating loss carryforwards and other tax assets to reduce taxes owed on the net taxable income that we earn. Any such limitations on the ability to use our net operating loss carryforwards and other tax assets could adversely impact our business, operating results, and financial condition.

Our stockholder rights plan, or “poison pill,” includes terms and conditions which could discourage a takeover or other transaction that stockholders may consider favorable.

On October 28, 2009, stockholders of record at the close of business on that date received a dividend of one right (a “Right”) for each outstanding share of common stock. Each Right entitles the registered holder to purchase one one-thousandth of a share of Series A junior participating preferred stock of the Company (the “Preferred Stock”), at a price of \$11.63 per one thousandth of a share of Preferred Stock, subject to adjustment (the “Exercise Price”). The Rights are not exercisable until the Distribution Date referred to below. The description and terms of the Rights are set forth in the Amended and Restated Rights Agreement between the Company and American Stock Transfer & Trust Company LLC, dated as of October 28, 2009.

The Amended and Restated Rights Agreement imposes a significant penalty upon any person or group that acquires 4.9% or more (but less than 50%) of our then-outstanding common stock without the prior approval of the board of directors. Stockholders who own 4.9% or more of our then-outstanding common stock as of the close of business on the Record Date will not trigger the Amended and Restated Rights Agreement so long as they do not increase their ownership of the common stock after the Record Date by more than one-half of 1% of the then-outstanding common stock. A person or group that acquires shares of our common stock in excess of the above-mentioned applicable threshold, subject to certain limited exceptions, is called an “Acquiring Person.” Any rights held by an Acquiring Person are void and may not be exercised. The Rights will not be exercisable until 10 days after a public announcement by us that a person or group has become an Acquiring Person. On the date (if any) that the Rights become exercisable (the “Distribution Date”), each Right would allow its holder to purchase one one-thousandth of a share of Preferred Stock for a purchase price of \$11.63. In addition, if a person or group becomes an Acquiring Person after the Distribution Date or already is an Acquiring Person and acquires more shares after the Distribution Date, all holders of Rights, except the Acquiring Person, may exercise their rights to purchase a number of shares of the common stock (in lieu of Preferred Stock) with a market value of twice the Exercise Price, upon payment of the purchase price.

The Rights will expire on the earliest of (a) October 28, 2019, (b) the exchange or redemption of the Rights, (c) consummation of a merger or consolidation or sale of assets resulting in expiration of the Rights, (d) the consummation of a reorganization transaction entered that the board of directors determines will help prevent an “Ownership Change,” as defined in Section 382 of the Code and protect our net operating losses, (e) the repeal of Section 382 of the Internal Revenue Code or any successor statute, or any other change, if the board of directors determines the Amended and Restated Rights Agreement is no longer necessary for the preservation of tax benefits, or (f) the beginning of a taxable year to which the board of directors determines that no tax benefits may be carried forward.

We may, at our option and with the approval of the board of directors, at any time prior to the close of business on the earlier of (i) the tenth day following the first date of public announcement by us or an Acquiring Person that an Acquiring Person has become such or such later date as may be determined by action of a majority of the members of the board of directors then in office and publicly announced by us or (ii) October 28, 2019, redeem all but not less than all the then outstanding Rights at a redemption price of \$0.067 per Right (such redemption price being herein referred to as the “Redemption Price”). We may, at our option, pay the Redemption Price either in common stock (based on the current per share market price thereof) or cash; provided, that if the board of directors authorizes redemption of the Rights on or after the time a person becomes an Acquiring Person, then such authorization shall require the concurrence of a majority of the members of the board of directors then in office. In addition, after a person becomes an Acquiring Person the board of directors may exchange the Rights (other than Rights owned by the Acquiring Person or its affiliates), in whole or in part, at an exchange ratio of one common share per Right (subject to adjustment).

Table of Contents

The Rights have certain anti-takeover effects, including potentially discouraging a takeover that stockholders may consider favorable. The Rights will cause substantial dilution to a person or group that attempts to acquire us on terms not approved by the board of directors. On the other hand, the Rights should not interfere with any merger or other business combination approved by the board of directors since the Rights may be redeemed by us at the Redemption Price prior to the date ten days after the public announcement that a person or group has become the beneficial owner of 4.9% or more of the common stock, and any securities which a person or any of such person's affiliates may be deemed to have the right to acquire pursuant to any merger or other acquisition agreement between us and such person may be excluded from the calculation of their beneficial ownership if such agreement has been approved by the board of directors prior to them becoming an Acquiring Person.

Provisions in our charter documents and under Delaware law could discourage a takeover that stockholders may consider favorable and may lead to entrenchment of our management and board of directors.

Our amended and restated certificate of incorporation and amended and restated bylaws contain provisions that could have the effect of delaying or preventing changes in control or changes in our management or our board of directors. These provisions include:

- no cumulative voting in the election of directors, which limits the ability of minority stockholders to elect director candidates;
- in addition to our current stockholders rights plan, the ability of our board of directors to further issue shares of preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquirer;
- the requirement that a special meeting of stockholders may be called only by the Chairman of the board of directors, the Chief Executive Officer or the Secretary at the request of the board of directors or upon the written request, stating the purpose of the meeting, of stockholders who together own of record 10% of the outstanding shares of each class of stock entitled to vote at such meeting, which may delay the ability of our stockholders to force consideration of a proposal or to take action, including the removal of directors; and
- advance notice procedures that stockholders must comply with in order to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquirer from conducting a solicitation of proxies to elect the acquirer's own slate of directors or otherwise attempting to obtain control of us.

We are also subject to certain anti-takeover provisions under Delaware law. Under Delaware law, a corporation may not, in general, engage in a business combination with any holder of 15% or more of its capital stock unless the holder has held the stock for three years or, among other things, the board of directors has approved the transaction. We have not opted out of this provision of Delaware law.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our principal offices are located in Austin, Texas where we occupy approximately 15,000 square feet of office space under one operating lease that expires in July 2022. We also lease office suites in Alabama, Florida, Massachusetts, Michigan, Oregon, Vermont, Washington, and the United Kingdom. As a result of the 2018 acquisitions, we also have offices in California, Iowa, Tennessee, North Carolina, Georgia and New York.

Management believes that the leased properties described above are adequate to meet Asure's current operational requirements and can accommodate further physical expansion of office space as needed.

ITEM 3. LEGAL PROCEEDINGS

Asure is periodically the defendant or plaintiff in actions arising in the normal course of business. No pending legal proceedings to which we are a party are material to us.

Table of Contents

PART II

ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

MARKET INFORMATION

Our common stock trades on the Nasdaq Capital Market under the symbol “ASUR.”

DIVIDENDS

We did not pay cash dividends on our common stock during fiscal years 2018 and 2017. We presently intend to continue a policy of retaining earnings for reinvestment in our business, rather than paying cash dividends.

HOLDERS

As of March 12, 2019, we had approximately 303 stockholders of record of our common stock.

UNREGISTERED SALE OF EQUITY SECURITIES

Other than sales disclosed in previous quarterly reports on Form 10-Q or current reports on Form 8-K, there were no unregistered sales of equity securities by us during the year ended December 31, 2018.

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLANS

Edgar Filing: ASURE SOFTWARE INC - Form 10-K

The following table provides information as of December 31, 2018 with respect to shares of our common stock that we may issue under our existing equity compensation plans (share amounts in thousands).

Plan Category	A	B	C
			Number of Securities Remaining
	Number of Securities	Weighted Average	Available for Future Issuance
	to be Issued Upon Exercise of	Exercise Price of	Under Equity Compensation
	Outstanding Options	Outstanding Options	Plans (Excluding Securities Reflected in Column A)
Equity Compensation Plan Approved by Stockholders (1)	1,639	\$ 10.02	108
Equity Compensation Plans Not Approved by Stockholders (2)	-0-	\$ -0-	-0-
Total	1,639	\$ 10.02	108

(1) Consists of the 2018 Incentive Award Plan.

(2) Our stockholders have previously approved our existing equity compensation plan.

ITEM 6. SELECTED FINANCIAL DATA

We are a smaller reporting company as defined by Rule 12b-2 of the Exchange Act and are not required to provide the information required under this Item.

Table of Contents**ITEM 7. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

Certain statements in this Report represent forward-looking statements. Forward-looking statements include but are not limited to statements regarding our strategy, future operations, financial condition, results of operations, projected costs, and plans and objectives of management. Actual results may differ materially from those contemplated by the forward-looking statements due to, among others, the risks and uncertainties described in this Report and in our other SEC filings.

Asure has attempted to identify these forward-looking statements with the words “believes,” “estimates,” “plans,” “expects,” “anticipates,” “may,” “will,” “could,” “should” and other similar expressions. Although these forward-looking statements reflect management’s current plans and expectations, which we believe reasonable as of the filing date of this Report, they inherently are subject to certain risks and uncertainties. Additionally, Asure is under no obligation to update any of the forward-looking statements after the date of this Annual Report on Form 10-K to conform such statements to actual results.

RESULTS OF OPERATIONS

The following table sets forth, for the fiscal periods indicated, the percentage of total revenues represented by certain items in Asure’s Consolidated Statements of Comprehensive Loss:

	2018	2017
Revenues	100.0 %	100.0 %
Gross margin	65.3	76.8
Selling, general and administrative	53.2	62.2
Research and development	9.4	8.2
Amortization of intangible assets	9.8	8.2
Total operating expenses	72.4	78.7
Total other loss, net	(9.6)	(8.5)
Net loss	(8.5)	(10.5)

Overview

Asure is a leading provider of Human Capital Management (“HCM”) and Workspace Management, offering intuitive and innovative cloud-based solutions designed to help organizations of all sizes and complexities build companies of the future. Our cloud platforms enables clients worldwide to better manage their people and space in a mobile, digital, multi-generational, and global landscape. Asure’s offerings include a fully-integrated HCM platform, flexible benefits and compliance administration, HR consulting, and time and labor management as well as a full suite of Agile Workspace solutions for conference room scheduling, desk sharing programs, and real estate optimization.

Asure’s platform vision is to help clients proactively manage costs associated with their three most expensive assets, real estate, labor and technology, while creating an employee experience that fosters efficiency, productivity and engagement.

The Asure product strategy is driven by three primary trends in the market: mobilization, globalization and technology. Asure offers four product lines: AsureSpace™, AsureForce®, AsureHCM and AsureEvolution. AsureHCM and AsureEvolution are our Mid-market and SMB/Channel HCM platforms respectively, which include AsureBenefits and AsureConsulting. AsureSpace™ Agile Workspace solutions enable organizations to optimize their real estate investment and create a digital workspace that empowers mobile and virtual employees, while streamlining internal operations. AsureForce® Time and Labor Management helps organizations optimize their workforce while controlling labor administration costs and activities.

In January 2018, we acquired all of the outstanding shares of common stock of Pay Systems of America, Inc. (“Pay Systems”), a provider of HR, payroll and employee benefits services.

In July 2018, we acquired all of the capital stock of USA Payroll, Inc. and assets of its affiliates, a payroll processing company based in Rochester, New York and a licensee of our Evolution software. We funded these acquisitions with cash on hand, subordinated promissory notes and shares of Asure common stock.

Table of Contents

We target our sales and marketing efforts to a wide range of audiences, from small to medium-sized businesses and divisions of enterprise organizations throughout the United States, Europe and Asia/Pacific. We generate sales of our solutions through our direct sales teams and indirectly through our channel partners. We are expanding our investment in our direct sales teams to continue to address our market opportunity.

Under the continued guidance and direction of our directors and senior leadership, Asure will continue to implement its corporate strategy for growing its software and services business. However, uncertainties and challenges remain and there can be no assurances that Asure can successfully integrate acquired business operations, grow its revenues or achieve profitability and positive cash flows during calendar year 2019.

Operating Segment

We operate as one operating segment. Operating segments are defined as components of an enterprise for which the chief operating decision maker, who in our case is the chief executive officer, in deciding how to allocate resources and assess performance, evaluates separate financial information regularly. During 2018, and over the last few years, we have completed a number of acquisitions. These acquisitions have allowed us to expand our offerings, presence and reach in various market segments of the human capital management market. Our business operates in one operating segment because our chief operating decision maker evaluates our financial information and resources and assesses the performance of these resources on a consolidated basis. Since we operate as one operating segment, all required financial segment information can be found in the consolidated financial statements.

Comparison of Fiscal 2018 to 2017**Revenue**

Our revenue was derived from the following sources (Amounts in thousands):

Revenue	2018	2017	Increase (Decrease)	%
Cloud revenue	\$68,887	\$39,267	\$ 29,620	75.4
Hardware revenue	6,277	4,703	1,574	33.5
Maintenance and support revenue	5,226	4,453	773	17.4
Professional services revenue	7,847	4,627	3,220	69.6
Other revenue	715	1,392	(677)	(48.6)

Total revenue	\$88,952	\$54,442	\$ 34,510	63.4
---------------	----------	----------	-----------	------

Total revenue represents our consolidated revenues, including sales of our scheduling software, time and attendance and human resource software, as well as complementary hardware devices to enhance our software products. Most product groupings include cloud revenue, hardware revenue, maintenance and support revenue, on premise software license revenue as well as installation and services and other professional services revenue. Revenue mix varies by product.

Our total revenue in 2018 was \$88,952 as compared to \$54,442 in 2017. Total revenue increased by \$34,510, or 63.4%, in 2018 as compared to 2017. Cloud revenue comprised the majority of the increase with an increase of \$29,620, or 75.4%. Hardware and maintenance and support and professional services revenue trended upward, offset by a decrease in on premise software license revenue.

Cloud revenue increased \$29,620, or 75.4%, over 2017. Cloud revenue was \$68,887 in 2018 as compared to \$39,267 in 2017. The increase in cloud revenue is due to a combination of acquisitions, new sales and the accretive nature of recurring cloud revenue.

Hardware revenue increased by \$1,574, or 33.5%, over 2017. Hardware revenue was \$6,277 in 2018 as compared to \$4,703 in 2017. Maintenance and support revenue was \$5,226 in 2018 as compared to \$4,453 in 2017, or a 17.4% increase over 2017. These increases are primarily due to the timing of work performed on contracts.

Professional services revenue increased by \$3,220, or 69.6%, over 2017. This increase is primarily due to the timing of work performed on contracts.

Table of Contents

Other revenue is comprised of on premise software license revenue and interest on funds held for clients. On premise software license revenue was \$636 in 2018 as compared to \$1,392 in 2017. On premise software license revenues decreased \$756, or 54.3%, as compared to 2017. This decrease is primarily a result of movements of clients from on premise to on demand, cloud-based solutions.

Although our total customer base is widely spread across industries, our sales are concentrated in certain industry sectors, including corporate education, healthcare, government, legal and non-profit. We continue to target small and medium sized businesses and divisions of larger enterprises in these same industries as prospective customers. Geographically, we sell our products worldwide, but sales are largely concentrated in the United States, Canada and Europe. Additionally, we have reseller partners in North America, UK, South Africa and Asia Pacific.

In addition to continuing to develop our workforce and Agile Workspace management solutions and release of new software updates and enhancements, we continue to actively explore other opportunities to acquire additional products or technologies to complement our current software and services. Through acquisitions in 2011 of ADI and Legiant, we expanded our cloud computing time and attendance software and management services business. The 2012 acquisition of PeopleCube gave us a product line that includes software to assist customers in driving integrated facility management of offices, conference rooms, video conferencing, events and training, alternative workspaces and lobby use. The 2014 acquisitions of FotoPunch and Roomtag support our vision to deliver innovative cloud-based Agile Workspace technologies. Our March 2016 acquisitions from Mangrove enable us to enter into the human resource management, payroll processing and benefits administration services businesses, which we are integrating into our existing AsureForce® product line. With respect to the three acquisitions closed in January 2017, PSNW and CPI are top regional service bureaus that resell our HCM products (formerly Mangrove) and integrate seamlessly into our business, while PMSI is a leading HCM service company that expands our solution, service, and implementation capabilities. Our May 2017 acquisition of iSystems, a leading national provider of HCM solutions, provides us with additional cross-sell revenue opportunities and cost synergies and our May 2017 acquisition of Compass HRM, an existing reseller of our HCM offerings, provides us with a regional HR and payroll service bureau in the Southeast. Our October 2017 acquisition of ADS, a leading regional human resources and payroll services bureau in the Southeast and a current reseller of our HCM solution, Evolution, was consistent with our vision to deliver a unified SaaS-based HCM platform and workspace solutions to support an evolving mobile workforce.

Gross Profit and Gross Margin

Consolidated gross profit was \$58,122 in 2018 and \$41,823 in 2017, an increase of \$16,299, or 39.0%. Gross margin as a percentage of revenues was 65.3% for 2018 and 76.8% for 2017. Although our gross profit increased, gross margin decreased due to our HCM and Workspace product mix.

Our cost of sales relates primarily to direct product costs, compensation and related consulting expenses, hardware expenses, facilities and related expenses and the amortization of our purchased software development costs. We

include intangible amortization related to developed and acquired technology within cost of sales.

Selling, General and Administrative Expenses

Selling, general and administrative (“SG&A”) expenses were \$47,333 in 2018 and \$33,887 in 2017, an increase of \$13,446, or 39.7%. SG&A expenses as a percentage of revenues were 53.2% and 62.2% for 2018 and 2017, respectively.

SG&A increased due to a full year of 2017 acquisition and integration related expenses and 2018 acquisition related expenses, as well as increased headcount as we continue to expand and increased selling costs as we focus on expanding recognition of our brand. Additionally, we’ve invested into a new ERP system and resources to improve the financial reporting process.

We may incur significant additional legal expenses and/or professional services-related expenses in the future if we pursue further acquisitions of products or businesses, even if we ultimately do not consummate any acquisition.

Research and Development Expenses

Research and development (“R&D”) expenses were \$8,360 in 2018 and \$4,459 in 2017, an increase of \$3,901, or 87.5%. R&D expenses as a percentage of revenues were 9.4% and 8.2% for 2018 and 2017, respectively.

The \$3,901 increase is primarily due to an increase in technical resources, including increased headcount, strategic partnerships and integration development, new hardware products for 2019 as well as investments into our initiative to migrate platforms to Amazon Web Services (“AWS”). Asure has also made significant investment outside of core R&D dollars into compliance and certifications, including SOC II Type 2 certifications, GDPR compliance, FedRamp certification (AsureSpace) and other initiatives.

Table of Contents

Key 2018 product highlights include:

- **AsureHCM:** Aside from significant effort into a series of enhancements in our Applicant Tracking solution (including Resume Parsing, Job Boards and Snag a Job integration), the AsureHCM team also invested heavily in infrastructure improvements for our network of bureaus and partners. This same work also is tied to our improved API and End Point sets and will serve as the basis for our first HCM native mobile application is scheduled to be released in April of 2019.
- **AsureForce:** We have continued to expand the rollout of our new v12 product, adding Dashboards, Single Sign-On and Scheduling features, as well as enhancing our native mobile applications based on client feedback. We have also invested into API development to expand our 3rd party integration portfolio, with key partnerships to be announced in 2019. API integration also includes support for our own EvolutionHCM platform. Finally, 2018 experienced substantial investment in new hardware technologies, which are scheduled to be released in the first two quarters of 2019.
- **AsureSpace:** AsureSpace product development continued to focus on bringing enhanced product features to market in conjunction with our strategic client base through co-innovation. This included launching a new MapView product, which is Asure's single pane of glass view into all areas of a company's space including Managed and Unmanaged space activity and status for traditional and Activity Based work, assigned seating and reverse hoteling features, and in 2019, team based collaboration. In April of 2018, Asure acquired OccuPeye Limited, based in the UK, bringing the utilization and IoT technologies Asure had been reselling in past years in-house, enabling us to build direct integration with our Space Management suite, as well as provide investment into next generation technology. To that end, Asure will be releasing a new IoT sensor in March of 2019, adding key environmental sensors and data collection to its already leading utilization sensing technology. Asure sees expanded opportunity to integrate these controls for both soft-ROI initiatives such as employee satisfaction and engagement, as well as hard-ROI projects such as building management system integration.
- **EvolutionHCM:** A significant initiative for the EvolutionHCM technology group was successfully migrating our Evolution Payroll and HR clients to Asure's AWS infrastructure, building a CICD pipeline to facilitate development integration with AWS. After developing a strategic partnership to create and deploy an integrated HR platform in 2017, Asure purchased the technology outright in the second quarter of 2018 in order to bring the technology in house. This technology was also moved into AWS as mentioned early. Significant product features were built in 2018 for this integrated HR and Payroll platform including ACA, Life events and Benefits. Finally, we have built a new "hub" infrastructure which will serve as a next-generation, API based integrations manager, with initial deployments in the first quarter of 2019 scheduled to include AsureForce and Hartford Insurance.

Asure will finalize migration of its shared hosting infrastructures in the first quarter of 2019, allowing us to then leverage our integrated platform to develop advanced reporting and analytics across our full product suite. This new

infrastructure is expected to allow us to more easily fulfill our vision of a single product user experience with integrated single sign-on and expanded web service endpoints, including TLM integration into our EvolutionHCM product at the end of the first quarter (integration already exists with the mid-market AsureHCM product). Asure also invested heavily in new hardware and IoT technology development in 2018, and should see the fruits of that investment beginning in March 2019 with our new Gen 2 IoT sensors which will include environmental data. This will be followed up in additional new hardware product launches in the second quarter of 2019.

Amortization of Intangible Assets

Amortization expenses in 2018 were \$8,692, an increase of \$4,215, or 94.1%, as compared to \$4,477 in 2017. Amortization expenses as a percentage of revenues were 9.8% and 8.2% for 2018 and 2017, respectively. This increase is due to the amortization related to our acquisitions in 2018 and 2017.

Other Income and Loss

Other Loss was \$8,514 for the year ended 2018 as compared to \$4,626 in the year ended 2017. Other Loss in 2018 and 2017 was primarily comprised of interest expense. The increase is primarily comprised of an increase in interest expense due to the higher debt balances resulting from our Second Restated Credit Agreement and debt incurred in connection with our acquisitions.

Table of Contents

Income Taxes

At December 31, 2018, we had federal net operating loss carryforwards of approximately \$110,136, Federal R&D credit carryforwards of approximately \$6,257 and alternative minimum tax credit carryforwards of approximately \$123. The net operating loss and Federal R&D credit carryforwards will expire in varying amounts from 2019 through 2038, if not utilized. Federal net operating losses generated in 2018 and after are carried forward indefinitely.

Income tax expense decreased from \$96 in 2017 to a benefit of \$7,229 in 2018, a \$7,325, or 7630.2%, increase. These figures represent an effective tax rate of 48.9% and (1.7)% in 2018 and 2017, respectively. In 2018 we recorded income taxes that were principally attributable to the release of valuation allowance and state and foreign taxes. A significant portion of the release of valuation allowance is attributable to acquisitions of domestic entities with deferred tax liabilities that, upon acquisition, allowed us to recognize certain deferred tax assets that had previously been offset by a valuation allowance. Additional valuation allowance was released during the year due to the creation of indefinite life deferred tax assets related to net operating loss and disallowed interest carryforwards. The creation of these indefinite life deferred tax assets allowed us to utilize a portion our historic indefinite life deferred tax liability related to tax deductible goodwill to recognize additional deferred tax assets that had previously been offset by a valuation allowance. The foreign provision for income taxes in 2018 is principally attributable to net income generated in the United Kingdom. Because we have not generated domestic net income in any period to date, we have recorded a full valuation allowance against our domestic net deferred tax assets, exclusive of any remaining tax deductible goodwill after application of indefinite life deferred tax assets. Realization of any of our domestic deferred tax assets depends upon future earnings, the timing and amount of which are uncertain.

As a result of our various acquisitions in prior years, utilization of the net operating losses and credit carryforwards may be subject to a substantial annual limitation due to the “change in ownership” provisions of the Internal Revenue Code of 1986. The annual limitation may result in the expiration of net operating losses before utilization.

Due to the uncertainty surrounding the timing of realizing the benefits of our favorable tax attributes in future tax returns, we have placed a valuation allowance against our net deferred tax asset, exclusive of goodwill. During 2018, we decreased the valuation allowance by approximately \$9,332 due primarily to operations, acquisitions and the impact of changes in tax law.

We consider the undistributed earnings of our foreign subsidiaries permanently reinvested and, accordingly, we have not provided for U.S. federal or state income taxes thereon.

Net Income (Loss)

Net loss was \$7,548 in 2018. Net loss was \$5,722 in 2017. The increase in net loss was \$1,826, or 31.9%. Net loss as a percentage of total revenues was 8.5% and 10.5% in 2018 and 2017, respectively.

LIQUIDITY AND CAPITAL RESOURCES (Amounts in thousands)

	2018	2017
Working capital	\$ 11,443	17,026
Cash, cash equivalents and short-term investments	15,444	27,792
Cash used in operating activities	(7,129)	(36)
Cash used in investing activities	(107,228)	(58,492)
Cash provided by financing activities	101,788	73,541

Working Capital. We had working capital of \$11,443 at December 31, 2018, a decrease of \$5,583 from \$17,026 at December 31, 2017. We attribute the decrease in our working capital primarily to a decrease in cash and cash equivalents due to our 2018 acquisitions and net cash used by operations. This is offset by an increase in accounts receivable of \$2,667 due to an increase in revenue and a decrease in short term notes payable of \$4,162. Working capital at December 31, 2018 includes \$11,849 of short term deferred revenue, a decrease from short term deferred revenue of \$13,078 at December 31, 2017. Deferred revenue is an obligation to perform future services. We expect that deferred revenue will convert to future revenue as we perform our services, but this does not represent future payments. Deferred revenue can vary based on seasonality, expiration of initial multi-year contracts and deals that are billed after implementation rather than in advance of service delivery.

Table of Contents

Operating Activities. Net cash used in operating activities was \$7,129 in 2018. The \$7,129 of cash used in operating activities during 2018 was primarily driven by our net loss of \$7,548, increases in inventory and accounts receivable of \$2,948 and \$1,719, respectively, and a decrease in accrued expenses of \$2,410, offset by non-cash adjustments of \$8,571.

Net cash used in operating activities was \$36 in 2017 as compared to cash used in operating activities of \$2,012 in 2016. The \$36 of cash used in operating activities during 2017 was primarily driven by net income (after adjustment for non-cash items) of \$1,424 and an increase in deferred revenue and other liabilities of \$2,643 and \$1,589, respectively, offset by an increase in accounts receivable and other assets of 4,096 and \$1,325, respectively, and a decrease in accounts payable of \$254.

Investing Activities. Cash used in investing activities during 2018 was \$107,228. The cash used in investing activities in 2018 is primarily comprised of the 2018 acquisitions. Cash used in investing activities during 2017 was \$58,492. The cash used in investing activities in 2017 was primarily comprised of the acquisitions of \$45,390 and the net change in funds held for clients of \$10,244

Financing Activities. Net cash provided by financing activities of \$101,788 in 2018 was primarily due to an increase of \$36,750 in our indebtedness and net proceeds of approximately \$39,449 from the issuance of our common stock in an underwritten public offering we completed in June 2018, partially offset by payments on debt of \$11,645 and debt financing fees of \$1,693.

Cash provided by financing activities during 2017 was \$73,541. We recognized net proceeds from the issuance of common stock of \$28,002 in an underwritten public offering in June 2017, as well as incurred \$45,777 of indebtedness in connection with the 2017 acquisitions. This was offset by payments on notes payable of \$8,973 and debt financing fees of \$1,433. In connection with the public offering, we issued 2,185,000 shares of common stock, including 285,000 shares of common stock pursuant to the exercise of the underwriters' over-allotment option, at the public offering price of \$13.50 per share.

Sources of Liquidity. As of December 31, 2018, Asure's principal sources of liquidity consisted of approximately \$15,444 of cash and cash equivalents, cash generated from operations of our business over the next twelve months, and \$5,000 available for borrowing under our Wells Fargo revolver. Based on current internal projections, we believe that we have and/or will generate sufficient cash for our operational needs, including any required debt payments, for at least the next twelve months. We continue to be focused on growing our existing software operations and seeking accretive and complimentary strategic acquisitions as part of our growth strategy. We believe the available sources of liquidity described above will be sufficient to fund such growth activities but may raise additional capital or incur additional indebtedness to supplement those sources as we execute on our growth plan.

Shelf Registration

In April 2018, we filed a universal shelf registration statement on Form S-3 with the Securities and Exchange Commission (“SEC”) to provide access to additional capital, if needed. Pursuant to the shelf registration statement, we may from time to time offer to sell in one or more offerings shares of our common stock or other securities having an aggregate value of up to \$175,000 (which includes approximately \$60,000 of unsold securities that were previously registered on our currently effective registration statements). The shelf registration statement relating to these securities became effective on April 16, 2018. In June 2018, we completed an underwritten public offering in which we sold an aggregate of 2,375,000 shares of our common stock at a public offering price of \$17.50 per share. We realized net proceeds of approximately \$38,900 after deducting underwriting discounts and estimated offering expenses. As of December 31, 2018, there is \$133,400 remaining available under the shelf registration statement.

Credit Agreement

In March 2014, we entered into a credit agreement (the “Credit Agreement”) with Wells Fargo, as administrative agent, and the lenders that are party thereto. The Credit Agreement contains customary events of default, including, among others, payment defaults, covenant defaults, judgment defaults, bankruptcy and insolvency events, cross defaults to certain indebtedness, incorrect representations or warranties, and change of control. In some cases, the defaults are subject to customary notice and grace period provisions. In March 2014 and in connection with the Credit Agreement, we and our wholly-owned active subsidiaries entered into a Guaranty and Security Agreement with Wells Fargo Bank. Under the Guaranty and Security Agreement, we and each of our wholly-owned active subsidiaries have guaranteed all obligations under the Credit Agreement and granted a security interest in substantially all of our and our subsidiaries’ assets.

Table of Contents

In March 2018, we entered into a second amended and restated credit agreement (the “Second Restated Credit Agreement”) with Wells Fargo, and the lenders that are parties thereto, amending and restating the terms of the Amended and Restated Credit Agreement dated as of May 2017.

The Second Restated Credit Agreement provides for a total of \$175,000 in available financing consisting of (a) \$105,000 in the aggregate principal amount of term loans, an increase of approximately \$36,800; (b) a \$5,000 line of credit, (c) a \$25,000 delayed draw term loan commitment for the financing of permitted acquisitions, which is a new financing option for us; and (d) a \$40,000 accordion, an increase of \$30,000. The accordion allows us to increase the amount of financing we receive from our lenders at our option. Financing under the delayed draw term loan commitment and accordion are subject to certain conditions as described in the Second Restated Credit Agreement.

The Second Restated Credit Agreement amends the applicable margin rates for determining the interest rate payable on the loans as follows:

Leverage Ratio	First Out Revolver Base Rate Margin	First Out Revolver LIBOR Rate Margin	First Out TL Base Rate Margin	First Out TL LIBOR Rate Margin	Last Out Base Rate Margin	Last Out LIBOR Rate Margin
≤ 3.25:1	4.25	5.25	1.75	2.75	6.75	7.75
	percentage points	percentage points	percentage points	percentage points	percentage points	percentage points
> 3.25:1	4.75	5.75	2.25	3.25	7.25	8.25
	percentage points	percentage points	percentage points	percentage points	percentage points	percentage points

The outstanding principal amount of the term loans is payable as follows:

\$263 beginning on June 30, 2018 and the last day of each fiscal quarter thereafter up to March 31, 2020, plus an additional amount equal to 0.25% of the principal amount of all delayed draw term loans;
 \$656 beginning on June 30, 2020 and the last day of each fiscal quarter thereafter up to March 31, 2021, plus an additional amount equal to 0.625% of the principal amount of all delayed draw term loans; and
 \$1,300 beginning on June 30, 2021 and the last day of each fiscal quarter thereafter, plus an additional amount equal to 1.25% of the principal amount of all delayed draw term loans.

The outstanding principal balance and all accrued and unpaid interest on the term and revolving loans is due on May 25, 2022.

The Second Restated Credit Agreement also:

- amends our leverage ratio covenant to increase the maximum ratio to 6.50:1 at March 31, 2018 and June 30, 2018, 6.00:1 at September 30, 2018 and December 31, 2018 and then stepping down each quarter-end thereafter;
- amends our fixed charge coverage ratio to be not less than 1.25:1 at March 31, 2018 and each quarter-end thereafter;
- and
- removes the TTM recurring revenue covenant.

In January 2019, we entered into a Consent and Amendment No. 2 to Second Amended and Restated Credit Agreement (the “Consent and Amendment No. 2”), amending and restating the terms of the Second Amended and Restated Credit Agreement.

Consent and Amendment No. 2, the agent and required lenders have consented to our acquisition of Payroll Maxx LLC as a “permitted acquisition” and we borrowed a delayed draw term loan in the aggregate amount of \$8,000.

Table of Contents

The Consent and Amendment No. 2 also amends, among other things, our leverage ratio covenant to increase the maximum ratio to 6.00:1 at March 31, 2019, June 30, 2019 and September 30, 2019 and then stepping down each quarter-end thereafter through December 31, 2020, which is a change from 5.85:1 at March 31, 2019, 5.30:1 at June 30, 2019 and 5.10:1 at September 30, 2019 prior to this amendment.

As of December 31, 2018 and December 31, 2017, \$0 was outstanding and \$5,000 was available for borrowing under the revolver.

As of December 31, 2018, we were in compliance with all covenants and all payments remain current. We expect to be in compliance or be able to obtain compliance through debt repayments with available cash on hand or cash we expect to generate from the ordinary course of operations over the next twelve months.

See Note 6 - Notes Payable in the accompanying consolidated financial statements for more information about the Credit Agreement and Guaranty and Security Agreement.

We cannot assure that we can grow our cash balances or limit our cash consumption and thus maintain sufficient cash balances for our planned operations or future acquisitions. Future business demands may lead to cash utilization at levels greater than recently experienced. We may need to raise additional capital in the future in order to grow our existing software operations and to seek additional strategic acquisitions in the near future. However, we cannot assure that we will be able to raise additional capital on acceptable terms, or at all. Subject to the foregoing, management believes that we have sufficient capital and liquidity to fund and cultivate the growth of our current and future operations for at least the next twelve months and to maintain compliance with the terms of our debt agreements and related covenants or to obtain compliance through debt repayments made with our available cash on hand or anticipated for receipt in the ordinary course of operations.

CRITICAL ACCOUNTING POLICIES

We have prepared our consolidated financial statements in accordance with U.S. generally accepted accounting principles and included the accounts of Asure's wholly owned subsidiaries. We have eliminated all significant intercompany transactions and balances in the consolidation. Preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of the assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates are subjective in nature and involve judgments that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at fiscal year end and the reported amounts of revenues and expenses during the fiscal year. The more significant estimates made by management include the

valuation allowance for our gross deferred tax asset, lease impairment, useful lives of fixed assets, the determination of the fair value of our long-lived assets and the fair value of assets acquired and liabilities assumed during acquisitions. We base our estimates on historical experience and on various other assumptions that management believes are reasonable under the given circumstances. These estimates could be materially different under different conditions and assumptions. Additionally, the actual amounts could differ from the estimates made. Management periodically evaluates estimates used in the preparation of our financial statements for continued reasonableness. We prospectively apply appropriate adjustments, if any, to our estimates based upon our periodic evaluation.

We believe the following are our critical accounting policies:

Revenue Recognition

Our revenue consists of software-as-a-service (“SaaS”) offerings and time-based software subscription license arrangements that also, typically include hardware, maintenance/support, and professional services elements. We recognize revenue on an output basis when control of the promised goods or services is transferred to our customers, in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Our contracts with customers may include multiple performance obligations. For such arrangements, we allocate revenue to each performance obligation based on its relative standalone selling price. We determine standalone selling prices based on the amount that we believe the market is willing to pay determined through historical analysis of sales data as well as through use of the residual approach when we can estimate the standalone selling price for one or more, but not all, of the promised goods or services.

Table of Contents

Effective January 1, 2018, we adopted the Financial Accounting Standards Board (“FASB”) Accounting Standards Update (“ASU”) 2014-09, *Revenue from Contracts with Customers (Topic 606)*, and ASU 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date*, which deferred the effective date of ASU 2014-09 by one year. ASU 2014-09 (“Topic 606”) “Revenue from Contracts with Customers” supersedes the revenue recognition requirements in ASC 605, *Revenue Recognition*, and is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. It also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue, cash flows arising from customer contracts, including significant judgments and changes in judgments, and assets recognized from costs incurred to obtain or fulfill a contract. The adoption of ASU 2014-09, using the modified retrospective approach, had no significant impact on our results of operations, cash flows, or financial position. The initial application was applied to all contracts at the date of initial application. We recognized the cumulative effect of initially applying the new revenue standard as an adjustment to the opening balance of retained earnings. Results of reporting periods after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with our historic accounting under Topic 605.

We recorded a \$1,500 cumulative effect adjustment to opening retained earnings as of January 1, 2018 related to an increase in deferred commissions. There was no impact to revenue as a result of applying Topic 606.

The primary impact of adopting Topic 606 is to sales commissions related to onboarding new clients that were previously expensed. Under the new standard, these costs are now capitalized as deferred commissions and amortized over the estimated customer life of five to ten years.

SaaS arrangements and time-based software subscriptions typically have an initial term ranging from one to three years and are renewable on an annual basis. A typical SaaS/software subscription arrangement will also include hardware, setup and implementation services. Revenue allocated to the SaaS/software subscription performance obligations are recognized on an output basis ratably as the service is provided over the non-cancellable term of the SaaS/subscription service and are reported as Cloud revenue on the Consolidated Statement of Comprehensive Loss. Revenue allocated to other performance obligations included in the arrangement is recognized as outlined in the paragraphs below.

Hardware devices sold to customers (typically time clocks, LCD panels, sensors and other peripheral devices) are sold as either a standard product sell arrangement where title to the hardware passes to the customer or under a hardware-as-a-service (“HaaS”) arrangement where the title to the hardware remains with Asure. Revenue allocated to hardware sold as a standard product are recognized on an output basis when title passes to the customer, typically the date we ship the hardware. Revenue allocated to hardware under a hardware-as-a-service (“HaaS”) arrangement are recognized on an output basis, recorded ratably as the service is provided over the non-cancellable term of the HaaS arrangement, typically one year. Revenue recognized from hardware devices sold to customers via either of the two above types of arrangements are reported as Hardware revenue on the Consolidated Statement of Comprehensive Loss.

Our professional services offerings typically include data migration, set up, training, and implementation services. Set up and implementation services typically occur at the start of the software arrangement while certain other professional services, depending on the nature of the services and customer requirements, may occur several months later. We can reasonably estimate professional services performed for a fixed fee and we recognize allocated revenue on an output basis on a proportional performance basis as the service is provided. We recognize allocated revenue on an output basis for professional services engagements billed on a time and materials basis as the service is provided. We recognize allocated revenue on an output basis on all other professional services engagements upon the earlier of the completion of the service's deliverable or the expiration of the customer's right to receive the service. Revenue recognized from professional services offerings are reported as Professional service revenue on the Consolidated Statement of Comprehensive Loss.

We recognize allocated revenue for maintenance/support on an output basis ratably over the non-cancellable term of the support agreement. Initial maintenance/support terms are typically one to three years and are renewable on an annual basis. Revenue recognized from maintenance/support are reported as Maintenance and support revenue on the Consolidated Statement of Comprehensive Loss.

We do not recognize revenue for agreements with rights of return, refundable fees, cancellation rights or substantive acceptance clauses until these return, refund or cancellation rights have expired or acceptance has occurred. Our arrangements with resellers do not allow for any rights of return.

Our payment terms vary by the type of customer and the customer's payment history and the products or services offered. The term between invoicing and when payment is due is not significant and as such our contracts do not include a significant financing component. The transaction prices of our contracts do not include consideration amounts that are variable and do not include noncash consideration.

Table of Contents

Deferred revenue includes amounts invoiced to customers in excess of revenue we recognize, and is comprised of deferred Cloud, HaaS, Maintenance and support, and Professional services revenue. We recognize deferred revenue when we complete the service and over the terms of the arrangements, primarily ranging from one to three years.

Intangible Assets and Goodwill

We record the assets acquired and liabilities assumed in business combinations at their respective fair values at the date of acquisition, with any excess purchase price recorded as goodwill. Valuation of intangible assets and in-process research and development entails significant estimates and assumptions including, but not limited to, estimating future cash flows from product sales, developing appropriate discount rates, estimating probability rates for the continuation of customer relationships and renewal of customer contracts and approximating the useful lives of the intangible assets acquired. U.S. generally accepted accounting principles (“GAAP”) require that we not amortize intangible assets other than goodwill with an indefinite life until we determine their life as finite. We must amortize all other intangible assets over their useful lives. We currently amortize our acquired intangible assets with definite lives over periods ranging from one to nine years.

Impairment of Intangible Assets and Long-Lived Assets

In accordance with Financial Accounting Standards Board (“FASB”) ASC 350, we review and evaluate our long-lived assets for impairment whenever events or changes in circumstances indicate that we may not recover their net book value. When such factors and circumstances exist, including those noted above, we compare the assets’ carrying amounts against the estimated undiscounted cash flows we expect to generate with those assets over their estimated useful lives. If the carrying amounts are greater than the undiscounted cash flows, we estimate the fair values of those assets by discounting the projected cash flows. We record any excess of the carrying amounts over the fair values as impairments in that fiscal period. There has been no impairment of intangible assets and long-lived assets for the periods presented.

Goodwill represents the excess of the purchase price in a business combination over the fair value of net tangible and intangible assets acquired in a business combination. We test goodwill for impairment on an annual basis in the fourth fiscal quarter of each year, and between annual tests if indicators of potential impairment exist, using a fair-value-based approach. There has been no impairment of goodwill for the periods presented. See Notes 4 and 5 in the accompanying consolidated financial statements for additional information regarding goodwill.

Income Taxes

We account for income taxes using the liability method under ASC 740, *Accounting for Income Taxes*, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events included in the financial statements. Under the liability method, we determine deferred tax assets and liabilities based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect in the years in which we expect the differences to reverse. We reduce deferred tax assets by a valuation allowance when it is more likely than not that we will not realize some component or all of the deferred tax assets.

See Note 2 – Significant Account Policies in the accompanying consolidated financial statements for more information about Recent Accounting Pronouncements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We have operations in the United States and internationally, and we are exposed to market risks in the ordinary course of our business. These risks primarily include interest rate, foreign exchange, inflation and counterparty risks, as well as risks relating to changes in the general economic conditions in the countries where we conduct business. To reduce certain of these risks, we monitor the financial condition of our large clients and limit credit exposure by principally collecting in advance and setting credit limits as we deem appropriate. In addition, our investment strategy has been to invest in financial instruments, including U.S. treasury securities and money market funds backed by United States Treasury Bills within the guidelines established under our investment policy. We also make strategic investments in privately-held companies in the development stage. To date, we have not used derivative instruments to mitigate the impact of our market risk exposures. We have also not used, nor do we intend to use, derivatives for trading or speculative purposes.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements and supplementary data required by this Item 8 are listed in Items 15(a)(1) and (2) of Part IV of this Report (*Exhibits, Financial Statement Schedules*).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Shareholders and Board of Directors of

Asure Software, Inc.

Opinion on Internal Control over Financial Reporting

We have audited Asure Software, Inc.'s (the "Company") internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets as of December 31, 2018 and 2017 and the related consolidated statements of income, shareholders' equity, and cash flows for the years then ended of the Company and our report dated March 19, 2019 expressed an unqualified opinion on those financial statements.

Explanatory Paragraph – Excluded Subsidiaries

As described in Management's Report on Internal Control over Financial Reporting, management has excluded its wholly owned direct and indirect subsidiaries, Occupeye Limited, Evolution Payroll Processing LLC, and USA Payrolls, Inc., from its assessment of internal control over financial reporting as of December 31, 2018 because these entities were acquired by the Company in purchase business combinations during 2018. We have also excluded Occupeye Limited, Evolution Payroll Processing, and USA Payrolls, Inc., from our audit of internal control over financial reporting. These subsidiaries' combined total assets and total revenues represent approximately 30.9% and 19.5%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2018.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that degree of compliance with the policies or procedures may deteriorate.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Control and Procedures

Based on an evaluation under the supervision and with the participation of our management, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act were effective as of December 31, 2018 to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the criteria set forth in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 Framework) (“COSO”). Based on our assessment, management has concluded that our internal control over financial reporting was effective as of December 31, 2018 to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with U.S. generally accepted accounting principles. Our independent registered public accounting firm, Marcum LLP, has issued an audit report with respect to our internal control over financial reporting, which appears in Part II, Item 8 of this Annual Report on Form 10-K, and is incorporated herein by reference.

Management has excluded its wholly owned direct and indirect subsidiaries, Occupeye Limited, Evolution Payroll Processing LLC, and USA Payrolls, Inc., from its assessment of internal control over financial reporting as of December 31, 2018 because these entities were acquired by the Company in purchase business combinations during 2018. These subsidiaries' combined total assets and total revenues represent approximately 30.9% and 19.5%,

respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2018.

There were no changes in our internal control over financial reporting during the year ended December 31, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

In designing and evaluating the disclosure controls and procedures and internal control over financial reporting, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures and internal control over financial reporting must reflect the fact that there are resource constraints and that management is required to apply judgment in evaluating the benefits of possible controls and procedures relative to their costs.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

The information required under this Item is incorporated by reference to the information set forth in our definitive proxy statement for our 2019 annual meeting of shareholders under the headings “Item 1 – Election of Directors and “Other Matters.”

In addition, the following table sets forth information regarding our current executive officers as of March 19, 2019:

Name	Age	Position
Patrick Goepel	56	Chief Executive Officer
Kelyn Brannon	60	Chief Financial Officer
Eyal Goldstein	43	Chief Revenue Officer
Joe Karbowski	51	Chief Technical Officer
Rhonda Parouty	44	Chief Operating Officer

Patrick Goepel was elected to our Board of Directors in August 2009. He was subsequently appointed as Interim Chief Executive Officer on September 15, 2009 and became Chief Executive Officer as of January 1, 2010. Prior to joining Asure, he served as Chief Operating Officer of Patersons Global Payroll. Previously, he was the President and Chief Executive Officer of Fidelity Investment’s Human Resource Services Division from 2006 to 2008; President and Chief Executive Officer of Advantec from 2005 to 2006; and Executive Vice President of Business Development and US Operations at Ceridian from 1994 to 2005. A former board member of iEmployee, Mr. Goepel currently serves on the board of directors of APPD Investments and SafeGuard World International.

Kelyn Brannon joined Asure as Chief Financial Officer in October 2017. Prior to joining Asure, Ms. Brannon held positions as a CFO as well as a CEO at several leading enterprises, including Amazon, Calypso Technology, Calix, and most recently, Arista Networks, where she served as CFO from 2013-2015. Brannon also held senior finance positions at Sun Microsystems, Lexmark International, and Ernst & Young, and is a member of the American Institute of Certified Public Accountants. Ms. Brannon earned a Bachelor’s degree in Political Science from Murray State University.

Eyal Goldstein joined Asure as Chief Revenue Officer in December 2016. Prior to joining Asure, Mr. Goldstein served as Chief Revenue Officer of Insight Venture Partner’s FilmTrack, a global rights management platform, from 2013-2016. He previously served as Executive Vice President of DAZ Systems, prior to DAZ he was Regional Vice

President at Oracle Corp. and served as Vice President at Ceridian Corporation. Mr. Goldstein earned a Bachelor's degree in English from University of Nevada, Las Vegas.

Joe Karbowski has served as our Chief Technical Officer since September 2016 and previously served as our Chief Operating Officer from September 2016 to January 2019. He joined Asure in 2012 when we acquired PeopleCube, where he also served as Chief Technical Officer, evolving it from a startup he co-founded in 1999 to be a leader in the Agile Workspace market. With more than 25 years of experience in building commercial software companies, he is a featured speaker and has published numerous articles on software development techniques and methodologies. Mr. Karbowski earned a Bachelor of Science degree in Computer Science from Michigan Technological University, Houghton.

Rhonda Parouty joined Asure as Chief Operating Officer in January 2019. Prior to joining Asure, Ms. Parouty was an advisor to various start-ups, including Trivie, Inc. and ZenYala. From 2016 to 2017, Ms. Parouty served as Executive Vice President, Channel Management & Consumer Brands at BrandeMuscle, a global leader in precision local marketing solutions. From 2007 until 2016, Ms. Parouty held various positions with HP Software, including as Head of Revenue, Global Business Development & Strategy Director (2014-2016); Global Business Strategy & Operations Director (2012-2014); and Global Application Owner & Consulting Services Leader (2007-2012). Ms. Parouty holds a degree in Business Administration Studies from Oakland Community College.

ITEM 11. EXECUTIVE COMPENSATION

The information required under this Item is incorporated by reference to the information set forth in our definitive proxy statement for our 2019 annual meeting of shareholders under the headings "Executive Compensation," "Equity Compensation Plan Information" and "Non-Employee Director Compensation Table."

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and

Board of Directors

of Asure Software, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Asure Software, Inc. (the “Company”) as of December 31, 2018 and 2017, the related consolidated statements of comprehensive loss, changes in stockholders’ equity and cash flows for each of the two years in the period ended December 31, 2018, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2018 and 2017, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Company’s internal control over financial reporting as of December 31, 2018, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 2013 and our report dated March 19, 2019, expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

Explanatory Paragraph – Change in Accounting Principles

As discussed in Note 2 to the consolidated financial statements, the Company changed its method of recognizing revenue during the year ended December 31, 2018 due to the adoption of Financial Accounting Standards Board (“FASB”) Accounting Standard Update (“ASU”) 2014-09, Revenue with Contracts from Customers (Topic 606).

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

NOTE 1 - THE COMPANY

Asure Software, Inc., (“Asure”, the “Company”, “we” and “our”), a Delaware Corporation, is a leading provider of Human Capital Management (“HCM”) and Workspace Management, offering intuitive and innovative cloud-based solutions designed to help organizations of all sizes and complexities build companies of the future. Our cloud platforms enables clients worldwide to better manage their people and space in a mobile, digital, multi-generational, and global landscape. Asure’s offerings include a fully-integrated HCM platform, flexible benefits and compliance administration, Human Resources (“HR”) consulting, and time and labor management as well as a full suite of workspace management solutions for conference room scheduling, desk sharing programs, and real estate optimization. We develop, market, sell and support our offerings worldwide through our principal office in Austin, Texas and through additional offices in Alabama, Florida, Massachusetts, Michigan, Oregon, Vermont, Washington, and the United Kingdom. As a result of the 2018 acquisitions, we also have offices in California, Iowa, Tennessee, North Carolina, Georgia and New York.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

We have prepared our consolidated financial statements in accordance with U.S. generally accepted accounting principles and have included the accounts of our wholly owned subsidiaries. We have eliminated all significant intercompany transactions and balances in consolidation. We have made certain reclassifications to the prior year’s consolidated financial statements to conform to the current year presentation.

SEGMENTS

The chief operating decision maker is Asure’s Chief Executive Officer who reviews financial information presented on a company-wide basis. Accordingly, in accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 280, we determined that the Company has a single reporting segment and operating unit structure.

USE OF ESTIMATES

Preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of the assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates are subjective in nature and involve judgments that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at fiscal year end and the reported amounts of revenues and expenses during the reporting period. The more significant estimates made by management include the valuation allowance for the gross deferred tax assets, useful lives of fixed assets, the determination of the fair value of its long-lived assets, and the fair value of assets acquired and liabilities assumed during acquisitions. We base our estimates on historical experience and on various other assumptions the Company management believes reasonable under the given circumstances. These estimates could be materially different under different conditions and assumptions. Additionally, the actual amounts could differ from the estimates made. Management periodically evaluates estimates used in the preparation of the consolidated financial statements for continued reasonableness. We make appropriate adjustments, if any, to the estimates used prospectively based upon such periodic evaluation.

CONTINGENCIES

Although we have been, and in the future may be, the defendant or plaintiff in various actions arising in the normal course of business, as of December 31, 2018, we were not party to any pending legal proceedings.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash deposits and highly liquid investments with an original maturity of three months or less when purchased.

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

INVESTMENTS AVAILABLE-FOR SALE

Available-for-sale securities are carried at fair value, with the unrealized gains and losses reported in accumulated other comprehensive income (loss). The amortized cost of debt securities is adjusted for amortization of premiums and accretion of discounts to maturity. The amortization of premiums and accretion of discounts is included in interest income. Realized gains and losses and declines in value judged to be other-than-temporary, if any, on available-for-sale securities are included in other income (expense). The cost of securities sold is based on the specific identification method. Interest and dividends on securities classified as available-for-sale are included in interest income.

FUNDS HELD FOR CLIENTS

Funds held for clients represent assets that, based upon the Company's intent, are restricted for use solely for the purposes of satisfying the obligations to remit funds relating to the Company's payroll and payroll tax filing services, which are classified as client fund obligations on our consolidated balance sheets. Funds held for clients are held in demand deposit accounts at major financial institutions and are classified as a current asset on our consolidated balance sheets since these funds are held solely for the purposes of satisfying the client fund obligations.

Client fund obligations represent the Company's contractual obligations to remit funds to satisfy clients' payroll and tax payment obligations and are recorded on the consolidated balance sheets at the time that the Company impounds funds from clients. The client fund obligations represent liabilities that will be repaid within one year of the balance sheet date. The Company has reported client fund obligations as a current liability on the consolidated balance sheets totaling \$123,170 and \$42,328 as of December 31, 2018 and December 31, 2017, respectively. The Company has classified funds held for clients as a current asset totaling \$122,206 and \$42,328 as of December 31, 2018 and 2017, respectively, since these funds are held solely for the purposes of satisfying client funds obligations. The Company has reported cash flows related to purchases, sales and maturities of corporate and client funds marketable securities on a gross basis in the investing section of the statements of consolidated cash flows. The Company has reported cash flows related to client fund investments with original maturities of ninety days or less on a net basis within the net increase in restricted cash and cash equivalents and other restricted assets held to satisfy client fund obligations in the investing section of the statements of consolidated cash flows. The Company has reported cash flows related to cash received from and paid on behalf of clients on a net basis within the net increase in client fund obligations in the financing activities section of the statements of consolidated cash flows.

FAIR VALUE OF FINANCIAL INSTRUMENTS

We apply the authoritative guidance on fair value measurements for financial assets and liabilities that are measured at fair value on a recurring basis, and non-financial assets and liabilities such as goodwill, intangible assets and property and equipment that are measured at fair value on a non-recurring basis.

CONCENTRATION OF CREDIT RISK

We grant credit to customers in the ordinary course of business. We limit concentrations of credit risk related to our trade accounts receivable due to our large number of customers, including third-party resellers, and their dispersion across several industries and geographic areas. We perform ongoing credit evaluations of our customers and maintain reserves for potential credit losses. We require advanced payments or secured transactions when deemed necessary.

We review potential customers' credit ratings to evaluate customers' ability to pay an obligation within the payment term, which is usually net thirty days. If we receive reasonable assurance of payment and know of no barriers to legally enforce the payment obligation, we may extend credit to customers. We place accounts on "Credit Hold" if a placed order exceeds the credit limit or sooner if circumstances warrant. We follow our credit policy consistently and routinely monitor our delinquent accounts for indications of uncollectability.

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

ALLOWANCE FOR DOUBTFUL ACCOUNTS

We maintain an allowance for doubtful accounts at an amount we estimate to be sufficient to provide adequate protection against losses resulting from extending credit to our customers. We base this allowance, in the aggregate, on historical collection experience, age of receivables and general economic conditions. The allowance for doubtful accounts also considers the need for specific customer reserves based on the customer's payment experience, credit-worthiness and age of receivable balances. Our bad debts have not been material and have been within management expectations.

INVENTORY

Inventory consists of finished goods and is stated at the lower of cost or net realizable value, cost being determined using the first-in, first-out method. Inventory includes purchased LCD panels, sensors, hosts and a full range of biometric and card recognition clocks that we sell as part of our workforce and workspace management solutions. We routinely assess our on-hand inventory for timely identification and measurement of obsolete, slow-moving or otherwise impaired inventory.

PROPERTY AND EQUIPMENT

We record property and equipment, including software, furniture and equipment, at cost less accumulated depreciation. We record depreciation using the straight-line method over the estimated economic useful lives of the assets, which range from two to five years. Property and equipment also includes leasehold improvements and capital leases which we record at cost less accumulated amortization. We record amortization of leasehold improvements and capital leases using the straight-line method over the shorter of the lease term or over the life of the respective assets, as applicable. We recognize gains or losses related to retirements or disposition of fixed assets in the period incurred. We expense repair and maintenance costs as incurred. We periodically review the estimated economic useful lives of our property and equipment and make adjustments, if necessary, according to the latest information available.

BUSINESS COMBINATIONS

We have accounted for our acquisitions using the acquisition method of accounting based on ASC 805—*Business Combinations*, which requires recognition and measurement of all identifiable assets acquired and liabilities assumed at their full fair value as of the date we obtain control. We have determined the fair value of assets acquired and liabilities assumed based upon our estimates of the fair values of assets acquired and liabilities assumed in the acquisitions. Goodwill represents the excess of the purchase price over the fair value of the net tangible and identifiable intangible assets acquired. While we have used our best estimates and assumptions to measure the fair value of the identifiable assets acquired and liabilities assumed at the acquisition date, our estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, not to exceed one year from the date of acquisition, any changes in the estimated fair values of the net assets recorded for the acquisitions will result in an adjustment to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, we record any subsequent adjustments to our consolidated statements of comprehensive loss.

GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill represents the excess of the purchase price in a business combination over the fair value of net tangible and intangible assets acquired in a business combination. We test goodwill for impairment on an annual basis in the fourth fiscal quarter of each year, and between annual tests if indicators of potential impairment exist, by first assessing qualitative factors to determine whether it is necessary to perform the two-step goodwill impairment test. If determined to be necessary, the two-step impairment test should be used to identify any potential impairment and measure an impairment loss, if any. Step one of the impairment test consists of comparing the fair value of the reporting unit with the aggregate carrying value, including goodwill. If the carrying value of a reporting unit exceeds the reporting unit's fair value, step two must be performed to determine the amount, if any, of the goodwill impairment. We tested goodwill using the qualitative factors during 2018 and 2017. There has been no impairment of goodwill for the periods presented. See Notes 4 and 5 for additional information regarding goodwill. We amortize intangible assets not considered to have an indefinite useful life using the straight-line method over their useful lives. We currently amortize our acquired intangible assets with definite lives over periods ranging from one to nine years. Each reporting period, we evaluate the estimated remaining useful life of intangible assets and assess whether events or changes in circumstances warrant a revision to the remaining period of amortization or indicate that impairment exists. We have not identified any impairments of finite-lived intangible assets during any of the periods presented. See Note 5 – Goodwill and Other Intangible Assets for additional information regarding intangible assets.

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

ORIGINAL ISSUE DISCOUNTS

We recognize original issue discounts, when incurred on the issuance of debt, as a reduction of the current loan obligations that we amortize to interest expense over the life of the related indebtedness using the effective interest rate method. We record the amortization as interest expense – amortization of OID in the Consolidated Statements of Comprehensive Loss. At the time of any repurchases or retirements of related debt, we will write off the remaining amount of net original issue discounts and include them in the calculation of gain/(loss) on retirement in the consolidated statements of comprehensive loss.

REVENUE RECOGNITION

On January 1, 2018, we adopted ASC Topic 606 (“Topic 606”) using the modified retrospective method applied to those contracts which were not completed as of January 1, 2018. Results of reporting periods beginning after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with our historic accounting under Topic 605. There was no impact to revenue as a result of applying Topic 606 for the year ended December 31, 2018.

Our revenue consist of software-as-a-service (“SaaS”) offerings and time-based software subscription license arrangements that also, typically include hardware, maintenance/support, and professional services elements. We recognize revenue on an output basis when control of the promised goods or services is transferred to our customers, in an amount that reflects the consideration we expect to be entitled to in exchange for those goods or services. Our contracts with customers may include multiple performance obligations. For such arrangements, we allocate revenue to each performance obligation based on its relative standalone selling price. We determine standalone selling prices based on the amount that we believe the market is willing to pay determined through historical analysis of sales data as well as through use of the residual approach when we can estimate the standalone selling price for one or more, but not all, of the promised goods or services.

SaaS arrangements and time-based software subscriptions typically have an initial term ranging from one to three years and are renewable on an annual basis. A typical SaaS/software subscription arrangement will also include hardware, setup and implementation services. Revenue allocated to the SaaS/software subscription performance

obligations are recognized on an output basis ratably as the service is provided over the non-cancellable term of the SaaS/subscription service and are reported as Cloud revenue on the Consolidated Statement of Comprehensive Loss. Revenue allocated to other performance obligations included in the arrangement is recognized as outlined in the paragraphs below.

Hardware devices sold to customers (typically time clocks, LCD panels, sensors and other peripheral devices) are sold as either a standard product sell arrangement where title to the hardware passes to the customer or under a hardware-as-a-service (“HaaS”) arrangement where the title to the hardware remains with Asure. Revenue allocated to hardware sold as a standard product are recognized on an output basis when title passes to the customer, typically the date we ship the hardware. Revenue allocated to hardware under a hardware-as-a-service (“HaaS”) arrangement are recognized on an output basis, recorded ratably as the service is provided over the non-cancellable term of the HaaS arrangement, typically one year. Revenue recognized from hardware devices sold to customers via either of the two above types of arrangements are reported as Hardware revenue on the Consolidated Statement of Comprehensive Loss.

Our professional services offerings typically include data migration, set up, training, and implementation services. Set up and implementation services typically occur at the start of the software arrangement while certain other professional services, depending on the nature of the services and customer requirements, may occur several months later. We can reasonably estimate professional services performed for a fixed fee and we recognize allocated revenue on an output basis on a proportional performance basis as the service is provided. We recognize allocated revenue on an output basis for professional services engagements billed on a time and materials basis as the service is provided. We recognize allocated revenue on an output basis on all other professional services engagements upon the earlier of the completion of the service’s deliverable or the expiration of the customer’s right to receive the service. Revenue recognized from professional services offerings are reported as Professional service revenue on the Consolidated Statement of Comprehensive Loss.

We recognize allocated revenue for maintenance/support on an output basis ratably over the non-cancellable term of the support agreement. Initial maintenance/support terms are typically one to three years and are renewable on an annual basis. Revenue recognized from maintenance/support are reported as Maintenance and support revenue on the Consolidated Statement of Comprehensive Loss.

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

We do not recognize revenue for agreements with rights of return, refundable fees, cancellation rights or substantive acceptance clauses until these return, refund or cancellation rights have expired or acceptance has occurred. Our arrangements with resellers do not allow for any rights of return.

Our payment terms vary by the type of customer and the customer's payment history and the products or services offered. The term between invoicing and when payment is due is not significant and as such our contracts do not include a significant financing component. The transaction prices of our contracts do not include consideration amounts that are variable and do not include noncash consideration.

Deferred revenue includes amounts invoiced to customers in excess of revenue we recognize, and is comprised of deferred Cloud, HaaS, Maintenance and support, and Professional services revenue. We recognize deferred revenue when we complete the service and over the terms of the arrangements, primarily ranging from one to three years.

ADVERTISING COSTS

We expense advertising costs as we incur them. Advertising expenses were \$102 and \$65 for 2018 and 2017, respectively. We recorded these expenses as part of sales and marketing expenses on our Consolidated Statements of Comprehensive Loss.

LEASE OBLIGATIONS

We recognize our lease obligations with scheduled rent increases over the term of the lease on a straight-line basis. Accordingly, we charge the total amount of base rentals over the term of our leases to expense on a straight-line method, recording the amount of rental expense in excess of lease payments as a deferred rent liability. As of December 31, 2018 and 2017, we had \$697 and \$125 deferred rent liabilities. We also recognize capital lease obligations and record the underlying assets and liabilities on our Consolidated Balance Sheets. As of December 31, 2018 and 2017, we had \$102 and \$24 in capital lease obligations, respectively.

FOREIGN CURRENCY TRANSLATION

We measure the financial statements of our foreign subsidiaries using the local currency as the functional currency. Accordingly, we translate the assets and liabilities of these foreign subsidiaries at current exchange rates at each balance sheet date. We record translation adjustments arising from the translation of net assets located outside of the United States into United States dollars in accumulated other comprehensive loss as a separate component of stockholders' equity. We translate income and expenses from the foreign subsidiaries using monthly average exchange rates. We include net gains and losses resulting from foreign exchange transactions in other income and expenses, which were not significant in 2018 and 2017.

INCOME TAXES

We account for income taxes using the liability method under ASC 740, *Accounting for Income Taxes*, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events included in the financial statements. Under the liability method, we determine deferred tax assets and liabilities based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect in the years in which we expect the differences to reverse. We reduce deferred tax assets by a valuation allowance when it is more likely than not that we will not realize some component or all of the deferred tax assets.

SHARE BASED COMPENSATION

We adopted Statement ASC 718 effective August 1, 2005, using the modified prospective application transition method. The modified prospective application method requires that companies recognize compensation expense on stock-based payment awards that are modified, repurchased or cancelled after the effective date. We estimate the fair value of each award granted from our stock option plan at the date of grant using the Black-Scholes option pricing model. During 2018 and 2017, we granted 803,000 and 575,000 stock options, respectively.

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

As of December 31, 2018, we expect to recognize \$3,943 of unrecognized compensation costs related to non-vested option grants over the course of the following three years.

We issued 30,000 shares of common stock related to exercises of stock options granted from our stock option plan in 2018 and 80,000 shares in 2017.

RECENT ACCOUNTING PRONOUNCEMENTS

Recently Adopted Standards

Effective January 1, 2018, we adopted the Financial Accounting Standards Board (“FASB”) Accounting Standards Update (“ASU”) 2014-09, *Revenue from Contracts with Customers (Topic 606)*, and ASU 2015-14, *Revenue from Contracts with Customers (Topic 606): Deferral of Effective Date*, which deferred the effective date of ASU 2014-09 by one year. Topic 606 supersedes the revenue recognition requirements in Topic 605, *Revenue Recognition*, and is based on the principle that revenue is recognized to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. It also requires additional disclosure about the nature, amount, timing, and uncertainty of revenue, cash flows arising from customer contracts, including significant judgments and changes in judgments, and assets recognized from costs incurred to obtain or fulfill a contract. The adoption of ASU 2014-09, using the modified retrospective approach, had no significant impact on our results of operations, cash flows, or financial position. The initial application was applied to all contracts at the date of initial application. We recognized the cumulative effect of initially applying the new revenue standard as an adjustment to the opening balance of retained earnings. Results of reporting periods after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with our historic accounting under Topic 605.

We recorded a \$1,502 cumulative effect adjustment to opening retained earnings as of January 1, 2018 related to an increase in deferred commissions. There was no impact to revenue as a result of applying Topic 606.

The primary impact of adopting Topic 606 is to sales commissions related to onboarding new clients that were previously expensed. Under the new standard, these costs are now capitalized as deferred commissions and amortized over the estimated customer life of five to ten years.

The impact from the adoption of Topic 606 to our consolidated balance sheet and income statement as of and for the year ended December 31, 2018, are as follows:

Balance Sheet	December 31, 2018	Balance Using Previous Standard	Increase (Decrease)
Assets			
Prepaid expenses and other current assets	\$3,120	\$3,359	\$ (239)
Total current assets before funds held for clients	37,709	37,948	(239)
Total current assets	159,915	160,154	(239)
Other assets	4,090	1,015	3,075
Total assets	\$361,100	\$358,275	\$ 2,825
Liabilities and stockholders' equity			
Accumulated deficit	(283,643)	(286,468)	2,825
Total stockholders' equity	102,518	99,693	2,825
Total liabilities and stockholders' equity	\$361,100	\$358,275	\$ 2,825

In August 2016, the FASB issued ASU 2016-15, “Statement of Cash Flows (Topic 230) Classification of Certain Cash Receipts and Cash Payments” which eliminates the diversity in practice related to eight cash flow classification issues. This ASU is effective for fiscal years beginning after December 15, 2017, with early adoption permitted. The adoption of this accounting standard did not have a material impact on our financial position, results of operations, cash flows, or presentation thereof.

In November 2016, the FASB issued ASU 2016-18, “Statement of Cash Flows (Topic 230): Restricted Cash,” which requires the change in restricted cash or cash equivalents to be included with other changes in cash and cash equivalents in the statement of cash flows. The ASU is effective for fiscal years beginning after December 15, 2017, with early adoption permitted. The adoption of this accounting standard did not have a material impact on our financial position, results of operations, cash flows, or presentation thereof.

In January 2017, the FASB issued ASU 2017-01, “Business Combinations (Topic 805): Clarifying the Definition of a Business” (“ASU 2017-01”). ASU 2017-01 clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation. The guidance is effective for annual periods beginning after December 15, 2017. The adoption of this accounting standard did not have a material impact on our financial position, results of operations, cash flows, or presentation thereof.

In May 2017, the FASB issued ASU 2017-09, “Compensation – Stock Compensation (Topic 718) Scope of Modification Accounting,” which clarifies when to account for a change in the terms or conditions of a share-based payment award as a modification. ASU 2017-09 requires modification accounting only if the fair value, the vesting conditions, or the classification of the award (as equity or liability) changes as a result of the change in terms or conditions. ASU 2017-09 is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The adoption of this accounting standard did not have a material impact on our financial position, results of operations, cash flows, or presentation thereof.

Standards Yet To Be Adopted

In February 2016, the FASB issued ASU No. 2016-02, “Leases (Topic 842)”. The core principle of the standard is that a lessee should recognize the assets and liabilities that arise from leases. A lessee should recognize in its statement of financial position a liability to make lease payments (the lease liability) and a right-of-use asset representing its right to use the underlying asset for the lease term. We will be required to adopt the new standard in the first quarter of 2019. While we are currently evaluating the impact ASU 2016-02 will have on our consolidated financial statements, we expect the adoption will result in a material increase in the assets and liabilities recorded on our Consolidated Balance Sheets and additional qualitative and quantitative disclosures.

In February 2018, the FASB issued ASU No. 2018-02, “Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income”, which provides entities the option to reclassify tax effects stranded in accumulated other comprehensive income as a result of the 2017 Tax Cuts and Jobs Act (“the Tax Act”) to retained earnings. The guidance is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. We do not expect the adoption of this accounting standard to have a material impact on our financial position, results of operations, cash flows, or presentation thereof.

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data unless otherwise noted)****NOTE 3 - INVESTMENTS AND FAIR VALUE MEASUREMENTS**

At December 31, 2018, \$4,256 of Funds Held for Clients were invested in short-term available-for-sale securities consisting of government and commercial bonds, including mortgage backed securities. There were no investments in securities during the first six months of 2018 and the twelve months ended December 31, 2017. At December 31, 2018, we also had approximately \$8,100 in money market funds, classified as cash equivalents.

Investments classified as short-term available-for-sale as of December 31, 2018 consisted of the following:

	Amortized Cost	Gross Unrealized Gains ⁽¹⁾	Gross Unrealized Losses ⁽¹⁾	Aggregate Estimated Fair Value
Corporate debt securities ⁽²⁾	\$ 4,334	\$ 21	\$ (99)	\$ 4,256

Unrealized gains and losses on available-for-sale securities are included as a component of comprehensive loss. At December 31, 2018, there were 26 securities in an unrealized gain position and there were 32 securities in an unrealized loss position. These unrealized losses were less than \$25 individually and \$170 in the aggregate. These securities have not been in a continuous unrealized gain or loss position for more than 12 months. The Company does not intend to sell these investments and it is not more likely than not that the Company will be required to sell these investments before recovery of their amortized cost basis, which may be at maturity. The Company reviews its investments to identify and evaluate investments that have an indication of possible other-than-temporary impairment. Factors considered in determining whether a loss is other-than-temporary include the length of time and extent to which fair value has been less than the cost basis, the financial condition and near-term prospects of the investee, and the Company's intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value.

(2) At December 31, 2018, none of these securities were classified as cash and cash equivalents on the Company's balance sheet.

Accounting Standards Codification (“ASC”) 820, *Fair Value Measurements and Disclosures* defines fair value, establishes a framework for measuring fair value in U.S. generally accepted accounting principles and expands disclosures about fair value measurements.

ASC 820 establishes a three-tier fair value hierarchy, which is based on the reliability of the inputs used in measuring fair values. These tiers include:

Level 1: Quoted prices in active markets for *identical* assets or liabilities;

Level 2: Quoted prices in active markets for *similar* assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities; and model-driven valuations whose significant inputs are observable; and

Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

At December 31, 2018, we had \$8,106 in money market funds, classified as cash equivalents. Short-term available-for-sale securities consist of government and commercial bonds, including mortgage backed securities, and are classified as Funds Held for Clients on the accompanying consolidated balance sheet.

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Amounts in thousands, except share and per share data or otherwise noted)

The following table presents the fair value hierarchy for our financial assets measured at fair value on a recurring basis as of December 31, 2018 and December 31, 2017, respectively:

		Fair Value Measure at December 31, 2018		
	Total Carrying Value at December 31, 2018	Quoted Prices in Active Market (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Cash and cash equivalents	\$ 15,444	\$15,444	\$ -	\$ -
Short-term available-for-sale securities- Funds Held for Clients	4,256	-	4,256	-
Total	\$ 19,700	\$15,444	\$ 4,256	\$ -

		Fair Value Measure at December 31, 2017		
	Total Carrying Value at December 31, 2017	Quoted Prices in Active Market (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Cash and cash equivalents	\$ 27,292	\$27,292	\$ -	\$ -
Total	\$ 27,292	\$27,292	\$ -	\$ -

Other Financial Assets and Liabilities

Financial assets and liabilities with carrying amounts approximating fair value include cash and cash equivalents, trade accounts receivable, accounts payable, accrued expenses and other current liabilities. The carrying amount of these financial assets and liabilities approximates fair value because of their short maturities.

Our line of credit and notes payable, including current portion, as of December 31, 2018, had a carrying value of \$111,962. This carrying value approximates fair value. The fair value is based on interest rates that are currently available to us for issuance of debt with similar terms and remaining maturities.

NOTE 4 - ACQUISITIONS

2018 Acquisitions

In January 2018, we acquired all of the outstanding shares of common stock of Pay Systems of America, Inc. (“Pay Systems”), a provider of HR, payroll and employee benefits services. The aggregate consideration for the shares consisted of (i) \$13,935 in cash and (ii) a subordinated promissory note (the “Pay Systems Note”) in the principal amount of \$1,572, subject to adjustment. We funded the cash payment with cash on hand. The Pay Systems Note bears interest at an annual rate of 2.0% and is payable in two installments – one-half, plus accrued interest, on July 1, 2018 and the remaining principal balance and accrued interest on January 1, 2019. This note was paid in full in January 2019.

In January 2018, we also completed the acquisitions of two other companies that are current resellers of our leading Human Resource Information System platform. We funded these two acquisitions with cash on hand, subordinated promissory notes and shares of Asure common stock.

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

In April 2018, we acquired all of the assets of a provider of outsourced HR, consulting, and professional services around payroll and employee benefits; and we acquired all of the share capital of a provider of a sensor-based solution that allows organizations across the world to streamline operations, create efficiencies, enhance productivity, and analyze employee engagement. We funded these acquisitions with cash (using borrowed funds under our Second Restated Credit Agreement) and subordinated promissory notes.

In April 2018, we also purchased a portfolio of customer accounts and the related contracts for payroll processing services (known as Evolution Payroll) from Wells Fargo for an aggregate purchase price of \$10,450. The aggregate purchase price consisted of (i) \$10,000 in cash and (ii) a subordinated promissory note (the “Evolution Payroll Note”) in the principal amount of \$450. The Evolution Payroll Note bears interest at an annual rate of 2.0%, and the unpaid principal and all accrued interest under the Evolution Payroll Note is payable on April 9, 2020. To finance this transaction, we borrowed approximately \$10,000 under our Second Restated Credit Agreement.

In July 2018, we acquired all of the capital stock of USA Payroll, Inc. and assets of its affiliates (“USA Payroll”), a payroll processing company based in Rochester, New York and a licensee of our Evolution software. The aggregate purchase price consisted of (i) \$18,561 in cash; (ii) a subordinated promissory note (the “USA Payroll Notes”) in the principal amount of \$3,263; and (iii) 225,089 unregistered shares of our common stock valued at \$3,600 based on a volume-weighted average of the closing prices of our common stock during a 90-day period. We funded the cash payment with cash on hand. The USA Payroll Notes bear interest at an annual rate of 3.0%. Interest payments are due on July 1, 2019, July 1, 2020 and accrued interest and principal is due on July 1, 2021.

Except for the purchase of Pay Systems, Evolution Payroll portfolio and USA Payroll, the 2018 acquisitions, individually, were not material to our results of operations, financial position, or cash flows. We have treated the purchase of the Evolution Payroll portfolio as an acquisition of assets, rather than as an acquisition of a business.

Purchase Price Allocation

Following is the purchase price allocation for the 2018 business acquisitions. We based the preliminary fair value estimate for the assets acquired and liabilities assumed for these acquisitions upon preliminary calculations and valuations. Our estimates and assumptions for these acquisitions are subject to change as we obtain additional

information for our estimates during the respective measurement periods (up to one year from the acquisition date). The primary areas of those preliminary estimates that we have not yet finalized relate to certain tangible assets and liabilities acquired, and income and non-income based taxes.

We recorded the transactions, with the exception of the Evolution Payroll portfolio purchase, using the acquisition method of accounting and recognized assets and liabilities assumed at their fair value as of the dates of acquisitions. The \$40,323 of intangible assets subject to amortization consist of \$35,563 allocated to Customer Relationships, \$2,100 for Developed Technology, \$2,330 for Trade Names, and \$330 for Noncompete Agreements. To value the Trade Names, we employed the relief from royalty method under the market approach. For the Noncompete Agreements, we employed a form of the income approach which analyzes the Company's profitability with these assets in place, in contrast to the Company's profitability without them. For the Customer Relationships and Developed Technology, we employed a form of the excess earnings method, which is a form of the income approach. The discount rate used in valuing these assets ranged from 13.0% to 33.0%, which reflects the risk associated with the intangible assets related to the other assets and the overall business operations to us. We estimated the fair values of the Trade Names using the relief from royalty method based upon a 1.0% royalty rate.

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data or otherwise noted)**

We believe significant synergies are expected to arise from these strategic acquisitions. This factor contributed to a purchase price that was in excess of the fair value of the net assets acquired and, as a result, we recorded goodwill for each acquisition. A portion of acquired goodwill will be deductible for tax purposes.

	Pay Systems	USA Payroll	Others	Total
Cash & cash equivalents	\$ 764	\$470	\$643	\$1,877
Accounts receivable	56	104	2,395	2,555
Fixed assets	121	98	428	647
Inventory	-	-	121	121
Other assets	100	5	995	1,100
Funds held for clients	10,976	20,439	14,013	45,428
Goodwill	9,606	12,644	11,966	34,216
Intangibles	7,240	17,643	15,440	40,323
Total assets acquired	\$ 28,863	\$51,403	\$46,001	\$126,267
Accounts payable	85	39	880	1,004
Deferred tax liability	1,364	3,622	2,036	7,022
Accrued other liabilities	946	376	2,335	3,657
Deferred revenue	-	-	1,289	1,289
Client fund obligations	11,962	20,439	14,000	46,401
Total liabilities assumed	14,357	24,476	20,540	59,373
Net assets acquired	\$ 14,506	\$26,927	\$25,461	\$66,894

The following is a reconciliation of the purchase price to the fair value of net assets acquired at the date of acquisition:

	Pay Systems	USA Payroll	Others	Total
Purchase price	\$15,507	\$27,504	\$28,142	\$71,153
Working capital adjustment	(940)	-	(557)	(1,497)
Adjustment to fair value of contingent liability	-	-	(1,761)	(1,761)
Adjustment to fair value of Asure's stock	-	(287)	(7)	(294)
Debt discount	(61)	(290)	(356)	(707)
Fair value of net assets acquired	\$14,506	\$26,927	\$25,461	\$66,894

The purchase of the Evolution Payroll portfolio has been accounted for as an asset acquisition under the acquisition method of accounting. The amendments in ASU 2017-01 provide a screen to determine when a set of assets and activities is not a business. The screen requires that when substantially all of the fair value of the gross assets acquired (or disposed of) is concentrated in a single identifiable asset or a group of similar identifiable assets, the set of assets and activities is not a business. Since the acquisition was determined to be an asset acquisition, the total value of the purchase consideration is allocated to the asset acquired. Management assessed the fair value of the promissory note and cash consideration as of April 1, 2018, which was as follows:

	Fair Value
Cash	\$10,000
Promissory note	450
Debt discount	(46)
Total	\$10,404

Fair value of asset acquired, Customer Relationships \$10,404

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

As an asset acquisition, we also capitalized approximately \$40 of total costs incurred to complete the acquisition consisting of legal fees of approximately \$30 and accounting fees of approximately \$10. The total intangible asset of \$10,444 is recorded in our consolidated balance sheet within Intangible Assets- Customer Relationships, and is being amortized over its estimated useful life of eight years.

Transaction costs incurred for the business acquisitions were \$1,347 in the year ended December 31, 2018, and were expensed as incurred and included in selling, general and administrative expenses.

Contingent consideration

In connection with the acquisition of all of the assets of a provider of outsourced human resources, consulting, and professional services in April 2018, we recorded contingent consideration based upon the expected achievement of certain milestone goals. We will record any changes to the fair value of contingent consideration due to changes in assumptions used in preparing the valuation model in selling, general and administrative expenses in the Consolidated Statements of Comprehensive Income (Loss).

Contingent consideration is valued using a multi-scenario discounted cash flow method. The assumptions used in preparing the discounted cash flow method include estimates for outcomes if milestone goals are achieved and the probability of achieving each outcome. Management estimates probabilities and then applies them to management's conservative case forecast, most likely case forecast and optimistic case forecast with the various scenarios. The Company retained a third party expert to assist in determining the value of the contingent consideration as of April 1, 2018.

As of April 1, 2018, the third party expert determined the value of the contingent consideration for the acquisition was \$489. The valuation of the contingent consideration was based on a Monte Carlo simulation model for fiscal 2017 to 2019. Management provided revenue projections (an unobservable input) of \$3,075 for fiscal 2018 (partial year), and \$4,408 for fiscal 2019, respectively. Based on current projections, we released the liability for the contingent consideration as of September 30, 2018, and recorded \$489 of Other Income in the accompanying consolidated statement of operations.

2017 Acquisitions

In January 2017, we closed three strategic acquisitions of a provider of outsourced HR solutions, and two providers of payroll services.

In May 2017, we closed two strategic acquisitions: iSystems Intermediate HoldCo, Inc. (“iSystems”), and another company that offers payroll, tax management and HR software combined with comprehensive back-end service bureau tools to service providers across the United States. The company is a current reseller of our HCM offering (formerly Mangrove), which provides human resources solutions that enhance organizations, people, and profits through payroll and HR solutions.

In October 2017, we acquired a company based in Birmingham, Alabama, which is a leading regional human resources and payroll services bureau in the Southeast and a current reseller of our HCM solution, Evolution.

Equity Purchase Agreement

In May 2017, we entered into an equity purchase agreement (the “Equity Purchase Agreement”) with iSystems Holdings, LLC, a Delaware limited liability company (“Seller”), and iSystems Intermediate Holdco, Inc., a Delaware corporation (“iSystems”), pursuant to which we acquired 100% of the outstanding equity interests of iSystems for an aggregate purchase price of \$55,000, subject to adjustment as provided in the Equity Purchase Agreement. The aggregate purchase price consists of (i) \$32,000 in cash, subject to adjustment, (ii) a secured subordinated promissory note (“iSystems Note”) in the principal amount of \$5,000, subject to adjustment, and (iii) 1,526,332 shares of unregistered common stock valued at \$18,000 based on a volume-weighted average of the closing prices of our common stock during a 90-day period. The iSystems Note bears interest at an annual rate of 3.5% and matures on May 25, 2019. The unpaid principal and all accrued interest under the promissory note is payable in two installments of \$2,500 on May 25, 2018 and May 25, 2019, subject to adjustment. The Equity Purchase Agreement contains certain customary representations, warranties, indemnities and covenants.

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

To finance the iSystems acquisition, we amended and restated our existing credit agreement with Wells Fargo Bank, National Association, as administrative agent (the “Restated Credit Agreement”) to add an additional term loan in the amount of approximately \$40,000, of which we borrowed approximately \$32,000 to complete the iSystems acquisition.

In connection with the iSystems acquisition, we also entered into an investor rights agreement (the “Investor Rights Agreement”) with the Seller. Pursuant to the terms of the Investor Rights Agreement, until May 2018, the holders of the registrable securities received in connection with the acquisition have agreed not to directly or indirectly transfer, sell, make any short sale or otherwise dispose of any of our equity securities and not to vote any of our equity securities or solicit proxies other than in favor of each director that our board recommends for election, against any director that our board has not nominated for election, and in accordance with the recommendation of our board on any other matters, subject to certain exceptions. In addition, under the Investor Rights Agreement, holders of the registrable securities have demand registration rights which allow a registration statement to be filed on or about March 31, 2018 and piggyback registration rights which become effective in May 2018. On January 31, 2018, holders of the registrable securities exercised their demand registration rights, and we filed and caused to become effective a registration statement with the SEC on April 16, 2018 registering the resale of 1,526,332 shares of our common stock.

In addition, under the terms of the Investor Rights Agreement, such holders have the right to nominate one director to our board of directors until the first date that the holders of the registrable securities no longer hold more than the lesser of (x) 5% of our outstanding common stock (as equitably adjusted for any stock splits, stock combinations, reorganizations, exchanges, merger, recapitalizations or similar transaction after the date hereof) and (y) 90% of the shares of our common stock held by such holders as of May 25, 2017. The director nominee appointed by the holders is Daniel Gill. Our board appointed him to serve as a director on June 6, 2017. Mr. Gill is a founder and a co-managing partner of Silver Oak Services Partners, a private equity firm. In 2014 Silver Oak acquired iSystems, LLC (currently, a wholly owned subsidiary of iSystems) and Mr. Gill served on the board of directors of iSystems, LLC.

Purchase Price Allocation

Following is the purchase price allocation for the 2017 acquisitions. We based the preliminary fair value estimate for the assets acquired and liabilities assumed for these acquisitions upon preliminary calculations and valuations. Our estimates and assumptions for these acquisition are subject to change as we obtain additional information for our

estimates during the respective measurement periods (up to one year from the acquisition date). The primary areas of those preliminary estimates that we have not yet finalized relate to certain tangible assets and liabilities acquired, and income and non-income based taxes.

We recorded the transactions using the acquisition method of accounting and recognized assets and liabilities assumed at their fair value as of the dates of acquisitions. The \$26,408 of intangible assets subject to amortization consist of \$23,085 allocated to Customer Relationships, \$1,621 for Trade Names, \$1,010 for Developed Technology, and \$692 for Noncompete Agreements. To value the Trade Names, we employed the relief from royalty method under the market approach. For the Noncompete Agreements, we employed a form of the income approach which analyzes the Company's profitability with these assets in place, in contrast to the Company's profitability without them. For the Customer Relationships and Developed Technology, we employed a form of the excess earnings method, which is a form of the income approach. The discount rate used in valuing these assets ranged from 14.0% to 17.0%, which reflects the risk associated with the intangible assets related to the other assets and the overall business operations to us. We estimated the fair values of the Trade Names using the relief from royalty method based upon a 1.0% to 1.7% royalty rate.

We believe significant synergies are expected to arise from these strategic acquisitions. This factor contributed to a purchase price that was in excess of the fair value of the net assets acquired and, as a result, we recorded goodwill for each acquisition. A portion of acquired goodwill will be deductible for tax purposes.

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data or otherwise noted)**

We based the allocations on fair values at the date of acquisition:

	iSystems	Others	Total
Cash & cash equivalents	\$ 211	\$ 641	\$ 852
Accounts receivable	951	721	1,672
Restricted cash	200	-	200
Fixed assets	681	179	860
Other assets	699	68	767
Funds held for clients	-	9,103	9,103
Goodwill	42,253	8,557	50,810
Intangibles	15,070	11,338	26,408
Total assets acquired	\$ 60,065	\$ 30,607	\$ 90,672
Accounts payable	392	181	573
Accrued other liabilities	791	282	1,073
Deferred revenue	1,073	370	1,443
Client fund obligations	-	9,048	9,048
Total liabilities assumed	2,256	9,881	12,137
Net assets acquired	\$ 57,809	\$ 20,726	\$ 78,535

The following is a reconciliation of the purchase price to the fair value of net assets acquired at the date of acquisition:

	iSystems	Others	Total
Purchase price	\$ 55,000	\$ 21,010	\$ 76,010
Working capital adjustment	202	123	325
Adjustment to fair value of Asure's stock issued	2,880	(26)	2,854
Debt discount	(273)	(381)	(654)
Fair value of net assets acquired	\$ 57,809	\$ 20,726	\$ 78,535

Transaction costs for the 2017 acquisitions were \$3,112 and were expensed as incurred and included in selling, general and administrative expenses.

Unaudited Pro Forma Financial Information

The following unaudited summary of pro forma combined results of operations for the year ended December 31, 2018 and December 31, 2017 gives effect to our 2017 and 2018 business and asset acquisitions as if we had completed them on January 1, 2017. This pro forma summary does not reflect any operating efficiencies, cost savings or revenue enhancements that we may achieve by combining operations. In addition, we have not reflected certain non-recurring expenses, such as legal expenses and other transactions expenses for the first 12 months after the acquisition, in the pro forma summary. We present this pro forma summary for informational purposes only and it is not necessarily indicative of what our actual results of operations would have been had the acquisitions taken place as of January 1, 2017, nor is it indicative of future consolidated results of operations.

	For the Year Ended December 31, 2018	For the Year Ended December 31, 2017
Revenues	\$ 99,388	\$ 100,989
Net income (loss)	\$ (6,112)	\$ (16,797)
Net income (loss) per common share:		
Basic and diluted	\$ (0.43)	\$ (1.42)
Weighted average shares outstanding	14,121	11,843

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data or otherwise noted)****NOTE 5 - GOODWILL AND OTHER INTANGIBLE ASSETS**

We accounted for our historical acquisitions in accordance with ASC 805, *Business Combinations*. We recorded the amount exceeding the fair value of net assets acquired at the date of acquisition as goodwill. We recorded intangible assets apart from goodwill if the assets had contractual or other legal rights or if the assets could be separated and sold, transferred, licensed, rented or exchanged. Our goodwill relates to acquisitions from 2011 through 2018.

In accordance with ASC 350, *Intangibles-Goodwill and Other*, we review and evaluate our long-lived assets, including intangible assets with finite lives, for impairment whenever events or changes in circumstances indicate that we may not recover their net book value. We test goodwill for impairment on an annual basis in the fourth fiscal quarter of each year, and between annual tests, if indicators of potential impairment exist, using a fair-value-based approach. There has been no impairment of goodwill for the periods presented. We amortize intangible assets not considered to have an indefinite useful life using the straight-line method over their estimated period of benefit, which generally ranges from one to nine years. Each reporting period, we evaluate the estimated remaining useful life of intangible assets and assess whether events or changes in circumstances warrant a revision to the remaining period of amortization or indicate that impairment exists. We have not identified any impairments of finite-lived intangible assets during any of the periods presented.

The following table summarizes the changes in our goodwill:

Balance at December 31, 2017	\$77,348
Goodwill recognized upon acquisitions	34,216
Adjustments to goodwill associated with acquisitions	81
Foreign exchange adjustment to goodwill	(258)
Balance at December 31, 2018	\$111,387

The gross carrying amount and accumulated amortization of our intangible assets as of December 31, 2018 and December 31, 2017 are as follows:

2018

Intangible Assets	Weighted Average	Accumulated		
	Amortization	Gross	Amortization	Net
	Period (in Years)			
Developed Technology	6.0	\$ 14,805	\$ (7,065) \$ 7,740
Customer Relationships	8.5	85,094	(20,601) 64,493
Reseller Relationships	7.0	853	(853) -
Trade Names	12.2	5,187	(1,241) 3,946
Noncompete Agreements	5.2	1,032	(451) 581
	8.3	\$106,971	\$ (30,211) \$76,760

2017

Intangible Assets	Weighted Average	Accumulated		
	Amortization	Gross	Amortization	Net
	Period (in Years)			
Developed Technology	6.7	\$ 11,925	\$ (5,010) \$ 6,915
Customer Relationships	9.5	37,096	(13,142) 23,954
Reseller Relationships	7.0	853	(761) 92
Trade Names	10.4	2,915	(884) 2,031
Noncompete Agreements	6.1	692	(130) 562
	8.8	\$53,481	\$ (19,927) \$33,554

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data or otherwise noted)**

We record amortization expense using the straight-line method over the estimated useful lives of the intangible assets, as noted above. Amortization expenses were \$8,692 and \$4,477 for 2018 and 2017, respectively, included in Operating Expenses. Amortization expenses recorded in Cost of Sales were \$1,607 and \$453 for 2018 and 2017, respectively.

The following table summarizes the future estimated amortization expense relating to our intangible assets as of December 31, 2018:

Year Ending

2019	\$ 12,084
2020	11,249
2021	10,757
2022	9,918
2023	8,096
Thereafter	24,656
Total	\$76,760

NOTE 6 - NOTES PAYABLE

The following table summarizes our outstanding debt as of December 31, 2018 and 2017:

	Maturity	Stated Interest Rate	2018	2017
Subordinated Notes Payable- acquisitions	5/25/2019 – 7/1/2021	2.00% - 3.50	% \$10,964	\$9,847
Term Loan – Wells Fargo Syndicate Partner	5/25/2022	10.55	% 52,106	34,125
Term Loan - Wells Fargo	5/25/2022	5.55	% 52,106	34,125
Total Notes Payable			\$115,176	\$78,097
Short-term notes payable			\$5,864	\$8,895
Long-term notes payable			\$109,312	\$69,202

On January 1, 2016, we adopted ASU 2015-03 for debt issuance costs on our term loan, on a retrospective basis. The impact of adopting ASU 2015-03 was the classification of all deferred financing costs as a deduction to corresponding debt in addition to the reclassification of deferred financing costs in other current and long-term assets to short and long-term notes payable. The following table summarizes the debt issuance costs as of December 31, 2018 and 2017:

	Gross Notes Payable 2018	Debt Issuance Costs	Net Notes Payable 2018
Notes payable, current portion	\$5,864	\$ (1,131)	\$4,733
Notes payable, net of current portion	109,312	(2,083)	107,229
Total Notes Payable	\$115,176	\$ (3,214)	\$111,962

	Gross Notes Payable 2017	Debt Issuance Costs	Net Notes Payable 2017
Notes payable, current portion	\$8,895	\$ -	\$8,895
Notes payable, net of current portion	69,202	(2,229)	66,973
Total Notes Payable	\$78,097	\$ (2,229)	\$75,868

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data or otherwise noted)**

The following table summarizes the future gross principal payments related to our outstanding debt as of December 31, 2018:

Year Ending	
2019	\$5,864
2020	5,119
2021	7,856
2022	96,337
Gross Notes Payable	\$115,176

Term Loan - Wells Fargo

In March 2014, we entered into a credit agreement (the “Credit Agreement”) with Wells Fargo, as administrative agent, and the lenders that are party thereto. The Credit Agreement contains customary events of default, including, among others, payment defaults, covenant defaults, judgment defaults, bankruptcy and insolvency events, cross defaults to certain indebtedness, incorrect representations or warranties, and change of control. In some cases, the defaults are subject to customary notice and grace period provisions. In March 2014 and in connection with the Credit Agreement, we and our wholly-owned active subsidiaries entered into a Guaranty and Security Agreement with Wells Fargo Bank. Under the Guaranty and Security Agreement, we and each of our wholly-owned active subsidiaries have guaranteed all obligations under the Credit Agreement and granted a security interest in substantially all of our and our subsidiaries’ assets.

Second Amended and Restated Credit Agreement

In March 2018, we entered into a second amended and restated credit agreement (the “Second Restated Credit Agreement”) with Wells Fargo, and the lenders that are parties thereto, amending and restating the terms of the Amended and Restated Credit Agreement dated as of May 2017.

The Second Restated Credit Agreement provides for a total of \$175,000 in available financing consisting of (a) \$105,000 in the aggregate principal amount of term loans, an increase of approximately \$36,750; (b) a \$5,000 line of credit, (c) a \$25,000 delayed draw term loan commitment for the financing of permitted acquisitions, which is a new financing option for us; and (d) a \$40,000 accordion, an increase of \$30,000. The accordion allows us to increase the amount of financing we receive from our lenders at our option. Financing under the delayed draw term loan commitment and accordion are subject to certain conditions as described in the Second Restated Credit Agreement.

The Second Restated Credit Agreement amends the applicable margin rates for determining the interest rate payable on the loans as follows:

Leverage Ratio	First Out Revolver Base Rate Margin	First Out Revolver LIBOR Rate Margin	First Out TL Base Rate Margin	First Out TL LIBOR Rate Margin	Last Out Base Rate Margin	Last Out LIBOR Rate Margin
	4.25	5.25	1.75	2.75	6.75	7.75
≤ 3.25:1	percentage points	percentage points	percentage points	percentage points	percentage points	percentage points
	4.75	5.75	2.25	3.25	7.25	8.25
> 3.25:1	percentage points	percentage points	percentage points	percentage points	percentage points	percentage points

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

The outstanding principal amount of the term loans is payable as follows:

\$263 beginning on June 30, 2018 and the last day of each fiscal quarter thereafter up to March 31, 2020, plus an additional amount equal to 0.25% of the principal amount of all delayed draw term loans;
\$656 beginning on June 30, 2020 and the last day of each fiscal quarter thereafter up to March 31, 2021, plus an additional amount equal to 0.625% of the principal amount of all delayed draw term loans; and
\$1,313 beginning on June 30, 2021 and the last day of each fiscal quarter thereafter, plus an additional amount equal to 1.25% of the principal amount of all delayed draw term loans.

The outstanding principal balance and all accrued and unpaid interest on the term and revolving loans is due on May 25, 2022.

The Second Restated Credit Agreement also:

amends our leverage ratio covenant to increase the maximum ratio to 6.50:1 at March 31, 2018 and June 30, 2018, 6.00:1 at September 30, 2018 and December 31, 2018 and then stepping down each quarter-end thereafter;
amends our fixed charge coverage ratio to be not less than 1.25:1 at March 31, 2018 and each quarter-end thereafter;
and
removes the TTM recurring revenue covenant.

As of December 31, 2018 and December 31, 2017, \$0 was outstanding and \$5,000 was available for borrowing under the revolver.

As of December 31, 2018, we were in compliance with all covenants and all payments remain current. We expect to be in compliance or be able to obtain compliance through debt repayments with available cash on hand or cash we expect to generate from the ordinary course of operations over the next twelve months.

In January 2019, we entered into a Consent and Amendment No. 2 to the Second Restated Credit Agreement with Wells Fargo Bank, National Association and Goldman Sachs Specialty Lending Holdings, Inc., amending and restating the terms of the Second Restated Credit. See Note 14- *Subsequent Events*.

NOTE 7 - PROPERTY AND EQUIPMENT

Property and equipment and related depreciable useful lives as of December 31, 2018 and 2017 are composed of the following:

	2018	2017
Software: 3-5 years	\$8,213	\$7,436
Furniture and equipment: 2-5 years	8,791	7,918
Internal support equipment: 2-4 years	696	696
Capital leases: lease term or life of the asset	178	178
Leasehold improvements: shorter of the lease term or life of the improvement	3,282	3,813
Software development costs	5,959	2,062
	27,119	22,103
Less accumulated depreciation and amortization	(18,171)	(16,886)
	\$8,948	\$5,217

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

We record the amortization of our capital leases as depreciation expense on our Consolidated Statements of Comprehensive Loss. Depreciation and amortization expenses relating to property and equipment were approximately \$2,616 and \$1,128 for 2018 and 2017, respectively.

As part of the acquisitions of Mangrove and iSystems in 2016 and 2017, we acquired software development costs. We continue to invest in software development. We are developing products which we intend to offer utilizing software as-a-service (“SaaS”). We follow the guidance of ASC 350-40, *Intangibles- Goodwill and Other- Internal Use Software*, for development costs related to these new products. Costs incurred in the planning stage are expensed as incurred while costs incurred in the application and infrastructure stage are capitalized, assuming such costs are deemed to be recoverable. Costs incurred in the operating stage are generally expensed as incurred except for significant upgrades and enhancements. Capitalized software costs are amortized over the software’s estimated useful life, which management has determined to be three years. During the year ended December 31, 2018 and 2017, we capitalized \$3,897 and \$2,062 of software development costs, respectively.

NOTE 8 - STOCKHOLDERS’ EQUITY

SHELF REGISTRATION

In February 2017, we filed a shelf registration statement on Form S-3 with the SEC to sell, from time to time, in one or more offerings, up to \$75,000 of our common stock, preferred stock, warrants, debt securities, subscription rights, and units. In April 2017 the shelf registration statement was declared effective by the SEC. Under this shelf registration statement, we completed an underwritten public offering in June 2017. In connection with the public offering, we issued 2,185,000 shares of common stock, including 285,000 shares of common stock pursuant to the exercise of the underwriters’ over-allotment option, at the public offering price of \$13.50 per share. Net proceeds from the issuance of common stock was \$27,800.

In April 2018, we filed a universal shelf registration statement on Form S-3 with the Securities and Exchange Commission (“SEC”) to provide access to additional capital, if needed. Pursuant to the shelf registration statement, we may from time to time offer to sell in one or more offerings shares of our common stock or other securities having an aggregate value of up to \$175,000 (which includes approximately \$60,000 of unsold securities that were previously

registered on our currently effective registration statements). The shelf registration statement relating to these securities became effective on April 16, 2018. As of December 31, 2018, there is \$133,438 remaining available under the shelf registration statement.

In June 2018, we completed an underwritten public offering in which we sold an aggregate of 2,375,000 shares of our common stock at a public offering price of \$17.50 per share. We realized net proceeds of approximately \$38,900 after deducting underwriting discounts and estimated offering expenses.

SHARE REPURCHASE PROGRAM

Pursuant to our stock repurchase plan, we may repurchase up to 450,000 shares of our common stock. We have repurchased a total of 384,000 shares for approximately \$5,000 over the life of the plan. Management will periodically assess repurchasing additional shares, depending on our cash position, market conditions, financial covenants and other factors. While the program remains in place, we did not repurchase any shares during 2018 or 2017.

STOCK AND STOCK OPTION PLANS

We have one active equity plan, the 2018 Incentive Award Plan (the “2018 Plan”). The 2018 Plan, approved by our shareholders, is intended to replace our 2009 Equity Incentive Plan, as amended (the “2009 Plan”), however, the terms and conditions of the 2009 Plan will continue to govern any outstanding awards granted thereunder.

Employees and consultants of the Company, its subsidiaries and affiliates, as well as members of our board, are eligible to receive awards under the 2018 Plan. The 2018 Plan provides for the grant of stock options, including incentive stock options (“ISOs”) and nonqualified stock options (“NQSOs”), stock appreciation rights (“SARs”), restricted stock, restricted stock units, performance bonus awards, performance stock units awards, other stock or cash-based awards and dividend equivalents to eligible individuals. We generally grant stock options with exercise prices equal to the fair market value at the time of grant. The options generally vest over three to four years and are exercisable for a period of five to ten years beginning with the date of grant.

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data or otherwise noted)**

The number of shares available for issuance under 2018 Plan is equal to the sum of (i) 750,000 shares, (ii) any shares subject to issued and outstanding awards under the 2009 Plan as of the effective date of the 2018 Plan that expire, are cancelled or otherwise terminate following the effective date of the 2018 Plan. We have 1,639,000 options granted and outstanding pursuant to the 2018 Plan as of December 31, 2018.

We use the Black-Scholes option valuation model to value employee stock awards. We estimate stock price volatility based upon our historical volatility. Estimated option life and forfeiture rate assumptions are derived from historical data. For stock-based compensation awards with graded vesting, we recognize compensation expense using the straight-line amortization method.

Total compensation expense recognized in the Consolidated Statements of Comprehensive Loss for stock based awards was \$1,687 and \$593 for 2018 and 2017, respectively.

The following table summarizes the assumptions used to develop their fair value for the year ending December 31, 2018 and 2017:

	2018	2017
Risk-free interest rate	2.81 %	1.60 %
Expected volatility	.45	.41
Expected life in years	4.00	3.69
Dividend yield	-	-

As of December 31, 2018, we reserved shares of common stock for future issuance as follows:

Options outstanding	1,639,000
Options available for future grant	108,000
Shares reserved	1,747,000

The following table summarizes activity under all Plans during the year ended December 31, 2018 and 2017.

	2018		2017	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
Outstanding at the beginning of the year	1,014,000	\$ 9.22	614,000	\$ 6.47
Granted	803,000	11.48	575,000	11.30
Exercised	(30,000)	6.43	(80,000)	5.55
Canceled	(148,000)	13.21	(95,000)	7.16
Outstanding at the end of the year	1,639,000	\$ 10.02	1,014,000	\$ 9.22
Options exercisable at the end of the year	585,000	\$ 8.59	247,000	\$ 6.34
Weighted average fair value of options granted during the year	\$7.80		\$3.63

(Amounts in thousands, except share and per share data or otherwise noted)

The following table summarizes the outstanding and exercisable options and their exercise prices as of December 31, 2018:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding	Weighted-Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number Exercisable and Vested	Weighted-Average Exercise Price
\$ 1.68 – 8.81	529,000	1.95	\$ 4.58	303,000	\$ 6.18
8.82 – 13.39	595,000	3.31	10.88	223,000	10.36
13.40 – 16.27	515,000	3.95	14.62	59,000	14.27
\$ 1.68 – 16.27	1,639,000	2.67	\$ 10.02	585,000	\$ 8.59

The aggregate intrinsic value of options outstanding and options exercisable is \$748 and \$11, respectively, at December 31, 2018.

NOTE 9 - EMPLOYEE BENEFIT PLANS**401(K) SAVINGS PLAN**

We sponsor a defined contribution 401(k) plan that is available to substantially all employees. Our Board of Directors may amend or terminate the plan at any time. We provided matching contributions to the plan of \$490 and \$369 in 2018 and 2017, respectively.

EMPLOYEE STOCK PURCHASE PLAN

Our Employee Stock Purchase Plan (“Purchase Plan”) was approved by the shareholders in June 2017. The Purchase Plan allows all eligible employees to purchase a limited number of shares of our common stock during pre-specified offering periods at a discount established by the Board of Directors, not to exceed 15% of the fair market value of the common stock, at the beginning or end of the offering period (whichever is lower). Under the ESPP, 225,000 shares were reserved for issuance. During the year ended December 31, 2018, 14,415 shares of common stock were issued at \$11.88 per share and 55,631 shares of common stock were issued at \$5.27 per share. During the year ended December 31, 2017, 17,568 shares of common stock were issued at \$7.65 per share.

NOTE 10 - CONTRACTS WITH CUSTOMERS AND REVENUE CONCENTRATION

Receivables

Receivables from contracts with customers, net of allowance for doubtful accounts of \$1,467, were \$14,291 at December 31, 2018. Receivables from contracts with customers, net of allowance for doubtful accounts of \$425, were \$12,032 at December 31, 2017.

Deferred Commissions

Deferred commissions costs from contracts with customers were \$3,675 and \$636 at December 31, 2018 and December 31, 2017, respectively. The amount of amortization recognized during the December 31, 2018 and 2017 period was \$1,079 and \$2,210, respectively.

Deferred Revenue

Revenue of \$12,206 was recognized during the year ended December 31, 2018 that was included in the deferred revenue balance at the beginning of the period.

Table of Contents

ASURE SOFTWARE, INC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except share and per share data or otherwise noted)

Transaction Price Allocated to the Remaining Performance Obligations

As of December 31, 2018, approximately \$52,475 of revenue is expected to be recognized from remaining performance obligations. We expect to recognize revenue on approximately 56% of these remaining performance obligations over the next 12 months, with the balance recognized thereafter.

Revenue Concentration

During 2018 and 2017, there were no customers who individually represented 10% or more of consolidated revenue.

NOTE 11 - NET LOSS PER SHARE

The following table sets forth the computation of basic and diluted net loss per common share for the years ending December 2018 and 2017.

	2018	2017
Net Loss	\$ (7,548)	\$ (5,722)
Weighted-average shares of common stock outstanding	14,010,000	10,891,000
Basic and diluted net loss per share	\$ (0.54)	\$ (0.53)

We have excluded stock options to acquire 1,639,000 and 1,014,000 shares for 2018 and 2017, respectively, from the computation of the dilutive stock options because the effect of including the stock options would have been anti-dilutive.

NOTE 12 - INCOME TAXES

The Tax Act was enacted in December 2017. The Tax Act significantly changes U.S. tax law by, among other things, lowering U.S. corporate income tax rates, implementing a modified territorial tax system and imposing a one-time transition tax on deemed repatriated earnings of foreign subsidiaries. The Tax Act reduces the U.S. corporate income tax rate from 35% to 21%, effective January 1, 2018.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse. As a result of the reduction in the U.S. corporate income tax rate from 35% to 21% under the Tax Act, we revalued our ending net deferred tax liabilities at December 31, 2017 and recognized a deferred tax benefit of \$545.

While the Tax Act provides for a modified territorial tax system, beginning in 2018, Global Intangible Low-Taxed Income ("GILTI") provisions will be applied providing an incremental tax on low taxed foreign income. The GILTI provisions require us to include in our U.S. income tax return foreign subsidiary earnings in excess of an allowable return on the foreign subsidiary's tangible assets. Under U.S. GAAP, we are required to make an accounting policy election to either (1) treat taxes due related to GILTI as a current-period expense when incurred (the "period cost method") or (2) factor such amounts into our measurement of our deferred taxes (the "deferred method"). The Company has selected the "period cost method" as its accounting policy with respect to the new GILTI tax rules.

The components of pre-tax loss for the years ended December 31, 2018 and 2017 are as follows:

	2018	2017
Domestic	\$(14,550)	\$(5,519)
Foreign	(227)	(107)
Total	\$(14,777)	\$(5,626)

F-27

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data or otherwise noted)**

The components of the provision (benefit) for income taxes attributable to continuing operations for the years ended December 31, 2018 and 2017 are as follows:

	2018	2017
Current:		
Federal	\$-	\$6
State	37	50
Foreign	116	(213)
Total current	153	(157)
Deferred:		
Federal	(5,747)	85
State	(1,554)	168
Foreign	(81)	-
Total deferred	(7,382)	253
	\$(7,229)	\$96

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of our deferred taxes at December 31, 2018 and 2017 are as follows:

	2018	2017
Deferred tax assets:		
Net operating losses	\$24,330	\$28,349
Research and development credit carryforwards	5,147	4,659
Minimum tax credit carryforwards	123	123
Disallowed interest expense carryforwards	1,909	-
Stock compensation	107	11
Deferred revenue	276	299
Fixed assets	14	-
Accrued expenses	594	318
Other	526	260
	33,026	34,019
Valuation allowance	(19,517)	(28,849)

Net deferred tax assets	13,509	5,170
Deferred tax liabilities:		
Acquired intangibles	(11,216)	(5,180)
Fixed assets	-	(309)
Capitalized software	(1,268)	-
Deferred commission	(856)	-
Goodwill	(1,735)	(751)
	(15,075)	(6,240)
Net current deferred tax assets (liabilities)	\$(1,566)	\$(1,070)

At December 31, 2018, we had federal net operating loss carryforwards of approximately \$110,136, research and development credit carryforwards of approximately \$6,257 and alternative minimum tax credit carryforwards of approximately \$123. The net operating loss and research and development credit carryforwards will expire in varying amounts from 2019 through 2038, if not utilized. Federal net operating losses generated in 2018 and after are carried forward indefinitely.

Table of Contents**ASURE SOFTWARE, INC.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****(Amounts in thousands, except share and per share data or otherwise noted)**

As a result of various acquisitions by us in prior years, we may be subject to a substantial annual limitation in the utilization of the net operating losses and credit carryforwards due to the “change in ownership” provisions of the Internal Revenue Code of 1986. The annual limitation may result in the expiration of net operating losses before utilization.

Due to the uncertainty surrounding the timing of realizing the benefits of its favorable tax attributes in future tax returns, we have placed a valuation allowance against our net deferred tax assets, exclusive of goodwill. During the year ended December 31, 2018, the valuation allowance decreased by approximately \$9,332 due primarily to the results of operations, acquisitions and the impact of changes in law.

We consider undistributed earnings of our foreign subsidiaries as permanently reinvested and, accordingly, we have made no provision for U.S. federal or state income taxes thereon, other than the earnings required to be recognized under IRC Section 956 or Section 965.

Our provision for income taxes attributable to continuing operations for the years ending December 31, 2018 and 2017 differ from the expected tax expense (benefit) amount computed by applying the statutory federal income tax rate of 21% to income before income taxes as a result of the following:

	2018	2017
Computed at statutory rate	\$(3,103)	\$(1,913)
State taxes, net of federal benefit	(482)	(6)
Permanent items and other	392	21
Credit carryforwards	(478)	(181)
Foreign income taxed at different rates	(4)	(198)
Effect of Tax Act	-	14,058
Change in tax carryforwards not benefitted	5,778	2,983
Change in valuation allowance	(9,332)	(14,668)
	\$(7,229)	\$96

Under ASC 740-10, *Income Taxes*, we periodically review the uncertainties and judgments related to the application of complex income tax regulations to determine income tax liabilities in several jurisdictions. We use a “more likely than not” criterion for recognizing an asset for unrecognized income tax benefits or a liability for uncertain tax positions. We have determined we have the following unrecognized assets or liabilities related to uncertain tax positions as of December 31, 2018. We do not anticipate any significant changes in such uncertainties and judgments during the next twelve months. To the extent we are required to recognize interest and penalties related to unrecognized tax liabilities, this amount will be recorded as an accrued liability. The reconciliation of our unrecognized tax benefits is as follows:

Balance at December 31, 2016	\$1,219
Additions based on tax positions related to the current year	99
Additions for tax positions of prior years	11
Reductions for tax positions of prior years	(155)
Balance at December 31, 2017	\$1,174
Additions based on tax positions related to the current year	246
Additions for tax positions of prior years	15
Reductions for tax positions of prior years	-
Balance at December 31, 2018	\$1,435

As of December 31, 2018, we had \$1,435 of unrecognized tax benefits, which would affect the effective tax rate if recognized. Our assessment of our unrecognized tax benefits is subject to change as a function of our financial statement audit.

Our practice is to recognize interest and/or penalties related to income tax matters in income tax expense. During the twelve months ended December 31, 2018, we recognized \$0 of interest and penalties in our income tax expense.

We file tax returns in the U.S. federal jurisdiction and in several state and foreign jurisdictions. We are no longer subject to U.S. federal income tax examinations for years ending before December 31, 2015 and are no longer subject to state and local or foreign income tax examinations by tax authorities for years ending before December 31, 2014. We are not currently under audit for federal, state or any foreign jurisdictions.

NOTE 13 - LEASE COMMITMENTS

Our future minimum lease payments under all operating and capital leases as of December 31, 2018 are as follows:

Year Ending	Operating Lease Obligations	Capital Lease Obligations
2019	\$ 2,693	\$ 102
2020	2,172	-
2021	1,962	-
2022	1,417	-
2023	711	-
Thereafter	2,977	-
	\$ 11,932	\$ 102
Less: Sublease income	(223)	-
Total	\$ 11,709	\$ 102
Less current portion of obligations		(102)
Long-term portion of obligations		\$ -

Total rent expense under all operating leases for 2018 and 2017 were \$2,881 and \$1,552, respectively. At December 31, 2018 and 2017, 29.3% and 29.7%, respectively, of our total operating lease obligation relates to our office facility in Vermont where iSystems is based.

NOTE 14 - SUBSEQUENT EVENTS

The Company evaluated subsequent events through the date of the filing of this Annual Report on Form 10-K with the SEC, to ensure that this filing includes appropriate disclosure of events both recognized in the financial statements as of December 31, 2018, and events which occurred subsequent to December 31, 2018 but were not recognized in the financial statements. The Company has determined that there were no subsequent events which required recognition, adjustment to or disclosure in the financial statements except as below and except as discussed in Note 13 above and

as follows:

In January 2019, we entered into a Consent and Amendment No. 2 to the Second Restated Credit Agreement (the “Consent and Amendment No. 2”), with Wells Fargo Bank, National Association and Goldman Sachs Specialty Lending Holdings, Inc., amending and restating the terms of the Second Restated Credit Agreement. Under the terms and conditions of the Consent and Amendment No. 2, the agent and required lenders have consented to our acquisition of Payroll Maxx LLC as a “permitted acquisition” and we borrowed a delayed draw term loan in the aggregate amount of \$8,000. The Consent and Amendment No. 2 also amends, among other things, our leverage ratio covenant to increase the maximum ratio to 6.00:1 at March 31, 2019, June 30, 2019 and September 30, 2019 and then stepping down each quarter-end thereafter through December 31, 2020, which is a change from 5.85:1 at March 31, 2019, 5.30:1 at June 30, 2019 and 5.10:1 at September 30, 2019 prior to this amendment.

In January 2019, we also issued 122,850 unregistered shares of our common stock to the equity holders of Payroll Maxx LLC, a Colorado limited liability company, as part of the purchase price consideration paid in connection with the acquisition of all of the equity interests of Payroll Maxx LLC. The shares were valued at \$8.14 per share, or an aggregate of \$1,000, based on a volume weighted average of the closing prices of our common stock during a 60-day period.
