Part I

Item 1. Financial Information

The information furnished in our accompanying consolidated balance sheets, consolidated statements of operations and consolidated statements of cash flows reflects all adjustments which are, in our opinion, necessary for a fair presentation of the aforementioned financial statements for the interim periods.

The financial statements should be read in conjunction with the notes to the financial statements and Management s Discussion and Analysis of Financial Condition and Results of Operations. The results of operations for the six months ended June 30, 2003 are not necessarily indicative of the operating results to be expected for the full year.

CARRAMERICA REALTY CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

(1) Description of Business and Summary of Significant Accounting Policies

(a) Business

We are a fully integrated, self-administered and self-managed publicly traded real estate investment trust (REIT), organized as a corporation under the laws of Maryland. We focus on the acquisition, development, ownership and operation of office properties, located in selected markets across the United States.

(b) Basis of Presentation

The financial statements have been prepared using the accounting policies described in our 2002 annual report on Form 10-K except that, effective January 1, 2003, we began using the fair value method to account for future employee stock compensation awards. The effect of the change on the financial statements was immaterial.

Our accounts and those of our controlled subsidiaries and affiliates are consolidated in the financial statements. We use the equity or cost methods, as appropriate in the circumstances, to account for our investments in and our share of the earnings or losses of unconsolidated entities. These entities are not controlled by us. If events or changes in circumstances indicate that the fair value of an investment accounted for using the equity method or cost method has declined below its carrying value and we consider the decline to be other than temporary, the investment is written down to fair value and an impairment loss is recognized.

Management has made a number of estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses in the financial statements, and the disclosure of contingent assets and liabilities. Estimates are required in order for us to prepare our financial statements in conformity with accounting principles generally accepted in the United States of America. Significant estimates are required in a number of areas, including the evaluation of impairment of long-lived assets and investments, assessing our probable liability under lease guarantees for HQ Global Workplaces, Inc. and the evaluation of the collectibility of accounts and notes receivable. Actual results could differ from these estimates.

(c) Interim Financial Statements

The financial statements reflect all adjustments, which are, in our opinion, necessary to reflect a fair presentation of the results for the interim periods, and all adjustments are of a normal, recurring nature.

(d) New Accounting Pronouncements

In November 2002, the Financial Accounting Standards Board (FASB) issued Interpretation No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The Interpretation requires recognition of liabilities at their fair value for newly issued guarantees. The Interpretation requires certain disclosures, which we have included in note 4. The adoption of Interpretation No. 45 on January 1, 2003 did not have a material effect on our financial statements.

7

Table of Contents

CARRAMERICA REALTY CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure. SFAS No. 148 provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based compensation and requires disclosure in both annual and interim financial statements about the method of accounting for stock-based compensation and the effect of the method used on reported results. Effective January 1, 2003, we adopted the fair value based method of accounting for stock-based compensation costs. We elected to use the prospective method of transition to the fair value method provided in SFAS No. 148 and, accordingly, the method is being applied for all employee stock compensation awards granted, modified or settled on or after January 1, 2003.

In January 2003, the FASB issued Interpretation No. 46, Consolidation of Variable Interest Entities. This Interpretation addresses the consolidation of variable interest entities (VIEs) in which the equity investors lack one or more of the essential characteristics of a controlling financial interest or where the equity investment at risk is not sufficient for the entity to finance its activities without subordinated financial support from other parties. The Interpretation applies to VIEs created after January 31, 2003 and to VIEs in which we acquire an interest after that date. Effective July 1, 2003, it also applies to VIEs in which we acquired an interest before February 1, 2003. We may apply the Interpretation prospectively, with a cumulative effect adjustment as of July 1, 2003, or by restating previously issued financial statements with a cumulative effect adjustment as of the beginning of the first year restated. Based on our current analysis, we believe that we will not be required to consolidate any of our unconsolidated real estate ventures that we have accounted for using the equity method; nor do we believe that we will have to consolidate any other entities.

As the result of a mezzanine loan and guaranty provided to a third-party for a development management project, we have an interest in a variable interest entity. The purpose of this entity is to build and own a 286,000 square foot office building in Washington, D.C. Based upon our analysis, we believe that we are not the primary beneficiary in this entity; therefore, we are not consolidating the entity. Our maximum exposure to loss as of June 30, 2003 is \$23.7 million, the sum of our note receivable and the maximum exposure under the guaranty.

In May 2003, the FASB issued SFAS No. 150, Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity. SFAS No. 150 establishes standards for the classification and measurement of certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). Adoption of SFAS No. 150 did not affect our financial statements.

Income from continuing operations has been reduced by preferred stock dividends and dividends paid on unvested restricted stock of approximately \$4,425,000 and \$8,517,000 for the three months ended June 30, 2003 and 2002, respectively and \$9,858,000 and \$17,065,000 for

the six months ended June 30, 2003 and 2002, respectively.

The effects of units in CarrAmerica Realty, L.P. and Carr Realty, L.P. that are redeemable for shares of our common stock are not included in the computation of diluted earnings per share as their effect is antidilutive.

(f) Derivative Financial Instruments and Hedging

We manage our capital structure to reflect a long-term investment approach, generally seeking to match the generally stable return nature of our assets with a mix of equity and various debt instruments. With respect to the use of debt instruments, we use fixed rate debt of varying maturities as well as variable rate debt. The mix of fixed and variable rate debt is determined by assessing their relative prices as well as economic conditions. Over the last two years we have increased variable rate exposure as we believe it has provided a more cost effective source of debt financing than fixed rate debt. We believe that our exposure to weaker operating conditions including higher vacancies necessitates the increased use of variable rate instruments.

9

CARRAMERICA REALTY CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

At times, our mix of variable and fixed rate debt may not suit our needs. At those times, we may use derivative financial instruments, including interest rate caps and swaps, forward interest rate options or interest rate options in order to assist us in managing our debt mix. We either will hedge our variable rate debt to give it a fixed interest rate or hedge fixed rate debt to give it a variable interest rate.

Under interest rate cap agreements, we make initial premium payments to the counterparties in exchange for the right to receive payments from them if interest rates exceed specified levels during the agreement period. Under interest rate swap agreements, we and the counterparties agree to exchange the difference between fixed rate and variable rate interest amounts calculated by reference to specified notional principal amounts during the agreement period. Notional principal amounts are used to express the volume of these transactions, but the cash requirements and amounts subject to credit risk are substantially less. Parties to interest rate cap and swap agreements are subject to market risk for changes in interest rates and credit risk in the event of nonperformance by the counterparty. We do not require any collateral under these agreements but deal only with highly rated institutional counterparties and do not expect that any counterparties will fail to meet their obligations.

Derivative financial instruments are recognized as either assets or liabilities on our balance sheet at their fair value. Subject to certain qualifying conditions, we may designate a derivative as either a hedge of the cash flows from a variable rate debt instrument or anticipated transaction (cash flow hedge) or a hedge of the fair value of a fixed rate debt instrument (fair value hedge). For those derivatives designated as a cash flow hedge, we report the fair value gains and losses in accumulated other comprehensive income in stockholders—equity to the extent the hedge is effective. We recognize these fair value gains or losses in earnings during the period(s) in which the hedged item affects earnings. For derivatives qualifying as fair value hedges, we report fair value gains and losses in earnings along with fair value gains or losses on the hedge item attributable to the risk being hedged. Most of our derivative financial instruments qualify as fair value hedges. Derivatives that do not qualify for hedge accounting are marked to market through earnings. Amounts receivable or payable under interest rate cap and swap agreements are accounted for as adjustments to interest expense on the related debt.

On May 8, 2002, we entered into interest rate swap agreements with JP Morgan Chase and Bank of America, N.A. hedging \$150.0 million of senior unsecured notes due July 2004. We receive interest at a fixed rate of 7.2% and pay interest at a variable rate of six-month LIBOR in arrears plus 2.72%. The interest rate swaps mature at the same time the notes are due. The swaps qualify as fair value hedges for accounting purposes. The fair value of the interest rate swaps is recognized on our balance sheet and the carrying value of the senior unsecured notes is increased or decreased by an offsetting amount. As of June 30, 2003, the fair value of the interest rate swaps was approximately \$4.4 million. We recognized reductions in interest expense for the three months ended June 30, 2003 and 2002 of approximately \$2.5 million and \$0.5 million, respectively, and for the six months ended June 30, 2003 and 2002 of approximately \$3.8 million and \$0.5 million, respectively, related to the swaps. As of June 30, 2003, taking into account the effect of the interest rate swaps, the effective interest rate on the notes was reduced to 3.84%.

On November 20, 2002, in conjunction with the issuance of \$175.0 million of senior unsecured notes, we entered into interest rate swap agreements with JP Morgan Chase, Bank of America, N.A. and Goldman Sachs & Co. We receive interest at a fixed rate of 5.25% and pay interest at a variable rate of six-month LIBOR in arrears plus 1.405%. The interest rate swaps mature at the same time the notes are due. The swaps qualify as fair value hedges for accounting purposes. The fair value of the interest rate swaps is recognized on our balance sheet and the carrying value of the senior unsecured notes is increased or decreased by an offsetting amount. As of June 30, 2003, the fair value of the interest rate swaps was approximately \$6.7 million. We recognized reductions in interest expense for the three and six months ended June 30, 2003 of approximately \$1.2 million and \$2.3 million, respectively, related to the swaps. As of June 30, 2003, taking into account the effect of the interest rate swaps, the effective interest rate on the notes was reduced to 2.62%.

As part of the assumption of \$63.5 million of debt associated with the purchase of two operating properties in August 2002, we purchased interest rate caps with a notional amount of \$97.0 million and

10

CARRAMERICA REALTY CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

LIBOR capped at 6.75%. As of June 30, 2003, the fair market value of these interest rate caps was not material.

(g) Stock/Unit Compensation Plans

Through 2002, we applied the intrinsic value method of accounting prescribed by Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations to account for our stock/unit compensation plans. Under this method, we recorded compensation expense for awards of stock, options or units to employees only if the market price of the unit or stock on the grant date exceeded the amount the employee was required to pay to acquire the unit or stock. Effective January 1, 2003, we adopted the fair value based method of accounting for stock-based compensation costs. We elected to use the prospective method of transition to the fair value method provided in SFAS No. 148 and, accordingly, the method is being applied for all employee stock compensation awards granted, modified or settled on or after January 1, 2003.

The following table summarizes pro forma effects on net income and earnings per share if the fair value method had been used to account for all stock-based compensation awards made between 1997 and 2002.

	Three Months Ended June 30,				Six Months Ended June 30,			nded
(In thousands, except per share data)		2003		2002		2003		2002

(h) Reclassifications

Certain reclassifications of prior period amounts have been made to conform to the current period s presentation.

(2) HQ Global Workplaces, Inc.

In 1997, we began making investments in HQ Global Workplaces, Inc. (HQ Global), a provider of executive office suites. On June 1, 2000, we, along with HQ Global, VANTAS Incorporated (VANTAS) and FrontLine Capital Group (FrontLine), consummated several transactions including (i) the merger of VANTAS with and into HQ Global, (ii) the acquisition by FrontLine of shares of HQ Global common stock from us and other stockholders of HQ Global, and (iii) the acquisition by VANTAS of our debt and equity interests in OmniOffices (UK) Limited and OmniOffices LUX 1929 Holding Company S.A. We received \$377.3 million in cash in connection with these transactions. In addition, \$140.5 million of debt which we had guaranteed was repaid with a portion of the cash proceeds. Following the transaction, we owned approximately 16% of the equity of HQ Global on a diluted basis and our investment had a carrying value of \$42.2 million. In 2001, based on a number of considerations, we recorded an impairment charge that reduced the carrying value of our remaining investment in HQ Global to zero.

On March 13, 2002, HQ Global filed for bankruptcy protection under Chapter 11 of the federal bankruptcy laws.

11

CARRAMERICA REALTY CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

During 1997 and 1998, to assist HQ Global as it grew its business, we provided guarantees of HQ Global s performance under four office leases. To our knowledge, all monthly rent payments were made by HQ Global under two of these leases through January 2002, and rental payments under the other two leases were made through February 2002.

In the course of its bankruptcy proceedings, HQ Global has filed motions to reject two of these four leases. One lease was for approximately 22,000 square feet of space at two adjacent buildings in San Jose, California. Our liability under this guarantee was limited to approximately \$2.0 million. We reached an agreement with the landlord of this lease under which we paid \$1.75 million in full satisfaction of the guarantee in January 2003. We recognized this expense in 2002.

The second lease that was rejected by HQ Global is a sublease for space in downtown Manhattan. This lease is for approximately 26,000 square feet of space and runs through March 2008, with total aggregate remaining lease payments as of February 1, 2002 of approximately \$5.4 million. In June 2002, we received a demand for payment of the full amount of the guarantee. However, we believe that we have defenses to payment under this guarantee available to us and joined with HQ Global in filing suit on July 24, 2002 in HQ Global s bankruptcy proceedings asking the bankruptcy court to declare that the lease was terminated by the landlord of the sublease not later than February 28, 2002. On July 26, 2002, the landlord under the sublease filed suit in federal court in New York seeking payment from us under this guarantee; however, the landlord voluntarily dismissed this suit on June 30, 2003 following a ruling by the bankruptcy court that it was the appropriate court to hear and decide the litigation. In light of our defenses and these proceedings, we have not accrued any expense relating to this guarantee; however, there can be no assurance as to the outcome of the pending litigation or that we will not incur expense or be required to make cash payments relating to this guarantee up to the full amount of the guarantee. As of June 30, 2003, we had not made any payments under this guarantee.

HQ Global has not filed a motion seeking to reject the remaining two leases that we have guaranteed, although it could do so in the future. Even if the leases are not rejected, we may ultimately be liable to the lessors for payments due under the leases. In one case, the lease is for approximately 25,000 square feet of space in midtown Manhattan, and our liability is currently capped at approximately \$0.5 million, which liability reduces over the life of the lease until its expiration in September 2007. As of June 30, 2003, we have not accrued any expense related to or made any payments under this guarantee.

The remaining lease is for space in San Mateo, California. This lease is for approximately 19,000 square feet of space and runs through January 2013, with total aggregate remaining lease payments as of March 1, 2002 of approximately \$10.4 million. We initially recognized an expense of \$0.4 million under this guarantee in the first quarter of 2002 based on a tentative agreement with HQ Global under which HQ Global would not reject this lease obligation and we would fund HQ Global subsequently determined that the tentative agreement was not in its best interest. HQ Global indicated to us that it intended to reject this lease unless its rent was reduced to current market rates. As an interim measure, we entered into an agreement with HQ Global as of June 30, 2002 to fund operating losses at this location up to an aggregate amount of \$130,000 in exchange for HQ Global forbearing from rejecting this lease until September 15, 2002, or, if it obtained from the bankruptcy court an extension of time within which to reject leases, November 1, 2002. Because the bankruptcy court has since three times extended the time period within which HQ Global may reject this lease to September 9, 2003, we have extended the existing forbearance agreement three times in exchange for funding operating losses up to an additional aggregate amount of \$385,000. As of June 30, 2003, we have funded \$0.4 million to HQ Global under the forbearance agreement and its extensions. As a result of our efforts to mitigate our exposure under this guarantee, we entered into agreements with HQ Global in January 2003 under which HQ Global assigned its interest as a tenant in this lease to us and we in turn subleased the space back to HQ Global at current market rates. The bankruptcy court approved these agreements on July 16, 2003; however,

these agreements will not be enforceable if HQ Global fails to successfully reorganize and emerge from the bankruptcy proceedings. We increased our provision for loss under this guarantee to \$6.9 million in the second quarter of 2002. Since there can be no assurance that HQ Global will successfully reorganize and emerge from the bankruptcy proceedings, we have not made any adjustments to our estimate of likely exposure under this guarantee as a result of the bankruptcy court supproval of the new lease and sublease agreements. There can be no assurance that we will not

12

CARRAMERICA REALTY CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

be required to further increase our provision or make cash payments related to this guarantee in future periods up to, in the aggregate, the full amount of the guarantee. As of June 30, 2003, we had not made any payments under this guarantee.

(3) Gain on Sale of Assets and Other Provisions, Net and Discontinued Operations

The table below summarizes property sales for the six months ended June 30, 2003 and 2002:

200	3		2002		
Property Name	Sale Date	Square Footage	Property Name	Sale Date	Square Footage
Wateridge	May-03	62,194	Wasatch 17	May-02	72,088

We dispose of assets from time to time that are inconsistent with our long-term strategic or return objectives. During the three and six months ended June 30, 2003 we disposed of one operating property, recognizing a gain of \$3.5 million. We continue to manage the property under a management agreement and the gain on this sale and the operating results of the property are not classified as discontinued operations due to our continuing involvement. We also recognized an impairment loss of \$2.7 million on a building as we currently expect that we will dispose of the property before the end of its previously estimated useful life and will not recover the carrying value. For the three and six months ended June 30, 2002, we disposed of one operating property, recognizing a gain of \$3.3 million. We continue to manage the property under a management agreement and the gain on this sale and the operating results of the property are not classified as discontinued operations due to our continuing involvement. We recognized impairment losses of \$0.5 million and \$1.3 million on parcels of land held for development during the three and six months ended June 30, 2002, respectively.

At June 30, 2003, we have contracts to sell two properties with which we will have no continuing involvement after the sale. The results of operations for these properties have been classified as discontinued operations in all periods presented in the statements of operations. In August 2002, we sold our Commons at Las Colinas property with which we had no continuing involvement after the sale. The results of operations of this property are classified as discontinued operations for the three and six months ended June 30, 2002.

Operating results of the properties are summarized as follows:

(In thousands)	For the three months ended	For the six months ended
	June 30,	June 30,

(4) Guarantees

Our obligations under guarantee agreements at June 30, 2003 are summarized as follows:

			Maximum	Carrying
Type of Guarantee	Project Relationship	Term	Exposure	Value
Loan ¹	575 7th Street	Apr-05	\$ 40,000,000	\$
Loan ²	Atlantic Building	Dec-03	21,000,000	
Loan ³	Shakespeare Theater	Dec-04	16,500,000	175,000
Lease ⁴	HQ Global	Jan-13	16,400,000	7,103,000
Indemnification ⁵	HQ Global			

- 1. Loan guarantee relates to a joint venture in which we have a 30% interest and for which we are the developer. It is a payment guaranty to the lender on behalf of the joint venture. If the joint venture defaults on the loan, we may be required to perform under the guarantee. We have a reimbursement guarantee from the other joint venture partner to repay us its proportionate share (70%) of any monies we pay under the guarantee.
- 2. Loan guarantee relates to a third party project for which we are the developer. It is a payment guarantee to the lender. If the third party defaults on the loan, we may be required to perform under the guarantee. We have a security interest in the third party s interest in the underlying property. In the event of a default, we can exercise our rights under the security agreement to take title to the property and sell the property to mitigate our exposure under the guarantee.
- 3. Represents a payment guarantee on a third party project for which we are the developer. We have entered into an agreement with the lender that permits us to acquire the lender s first position mortgage securing the loan if the third party defaults on the loan and we then make payment in full to the lender under the guarantee.
- 4. See note 2 for further discussion.
- 5. See Part II, Item 1 for further discussion.

(5) Segment Information

Our only reportable operating segment is real estate property operations. Other business activities and operating segments that are not reportable are included in other operations. The performance measure we use to assess results for real estate property operations is segment operating income. We define segment operating income as total rental revenue less property expenses, which include property operating expenses (other than depreciation and amortization) and real estate taxes. The real estate property operations segment includes the operation and management of consolidated rental properties including those classified as discontinued operations. The accounting policies of the segments are the same as those described in note 1.

Operating results of our reportable segment and our other operations for the three months ended June 30, 2003 and 2002 are summarized as follows:

14

(6) Supplemental Cash Flow Information

In the first quarter of 2002, 80,000 shares of our Series A Cumulative Convertible Redeemable Preferred Stock were converted to shares of common stock, retiring all remaining shares of Series A Cumulative Convertible Redeemable Preferred Stock.

Our employees converted approximately \$0.6 million and \$0.7 million in restricted units to 25,978 shares and 31,797 shares of common stock during the six months ended June 30, 2003 and 2002, respectively.

(7) Preferred and Common Stock

On March 18, 2003, we redeemed 2,000,000 shares of our Series B Cumulative Redeemable Preferred Stock at a redemption price of \$25.00 per share plus \$0.107125 per share in accrued and unpaid dividends for the period from March 1, 2003 through and including the redemption date. This resulted in a cash expenditure of approximately \$50.2 million in March 2003, which we funded by drawing on our \$500 million unsecured credit

16

CARRAMERICA REALTY CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

facility. Including this redemption, for the six months ended June 30, 2003, we repurchased or redeemed 2,188,035 shares of our preferred stock for approximately \$54.7 million, excluding accrued and unpaid dividends.

During the first six months of 2003, we repurchased 322,600 shares of our common stock for approximately \$7.9 million.

(8) Subsequent Event

On July 31, 2003, the Securities and Exchange Commission (SEC) issued a clarification of Emerging Issues Task Force Topic D-42, The Effect on the Calculation of Earnings per Share for the Redemption or Induced Conversion of Preferred Stock. Topic D-42 provides, among other things, that any excess of the fair value of the consideration transferred to the holders of preferred stock redeemed over the carrying amount of the preferred stock should be subtracted from net earnings to determine net earnings available to common stockholders in the calculation of earnings per share (EPS). The SEC s clarification of the guidance in Topic D-42 provides that the carrying amount of the preferred stock should be reduced by the related issuance costs.

The July 2003 clarification of Topic D-42 is effective for us for the quarter ending September 30, 2003 and is required to be reflected retroactively in the financial statements of prior periods. We have not previously considered issuance costs in determining the carrying amount of the preferred stock we redeemed in 2003 and 2002 and, accordingly, implementation of the clarification of Topic D-42 will affect our previously reported EPS. In particular, our reported basic and diluted EPS (from continuing operations and in total) for the six months ended June 30, 2003 will be reduced by \$0.03 per share, all of which relates to the quarter ended March 31, 2003, and our reported basic and diluted EPS (from continuing operations and in total) for 2002 will be reduced by \$0.09 per share, including \$0.01 per share for the quarters ended June 30, 2002 and December 31, 2002 and \$0.07 per share for the quarter ended September 30, 2002.

17

Management s Discussion and Analysis

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

The discussion that follows is based primarily on our consolidated financial statements as of June 30, 2003 and December 31, 2002 and for the three and six months ended June 30, 2003 and 2002 and should be read along with the consolidated financial statements and related notes. The ability to compare one period to another may be significantly affected by acquisitions completed, development properties placed in service and dispositions made during those periods.

General

During the six months ended June 30, 2003 we completed the following significant transactions:

We repurchased or redeemed an aggregate of 2.2 million shares of our preferred stock for approximately \$54.7 million.

We repurchased 322,600 shares of our common stock for approximately \$7.9 million.

We disposed of one operating property generating net proceeds of approximately \$9.5 million.

We acquired a 20% interest in a joint venture which purchased a \$190.0 million operating property.

During the six months ended June 30, 2002 we completed the following significant transactions:

We issued \$400.0 million of 7.125% senior unsecured notes in January 2002.

We entered into an interest rate swap against \$150.0 million of our senior unsecured notes effectively converting our fixed rate debt to variable rate debt.

We purchased one operating property for \$19.0 million.

We disposed of one operating property generating net proceeds of approximately \$10.7 million.

Critical Accounting Policies and Estimates

Critical accounting policies and estimates are those that are both important to the presentation of our financial condition and results of operations and require management s most difficult, complex or subjective judgments. Our critical accounting policies and estimates relate to evaluating the impairment of long-lived assets and investments, assessing our probable liability under lease guarantees for HQ Global Workplaces, Inc. (HQ Global) and the evaluation of the collectibility of accounts and notes receivable.

If events or changes in circumstances indicate that the carrying value of a rental property to be held and used or land held for development may be impaired, we perform a recoverability analysis based on estimated undiscounted cash flows to be generated from the property in the future. If the analysis indicates that the carrying value is not recoverable from future cash flows, the property and related assets such as tenant improvements and lease commissions, are written down to estimated fair value and an impairment loss is recognized. If we decide to sell rental properties or land holdings, we evaluate the recoverability of the carrying amounts of the assets. If the evaluation indicates that the carrying value is not recoverable from estimated net sales proceeds, the property is written down to estimated fair value less costs to sell and an impairment loss is recognized. Our estimates of cash flows and fair values of the properties are based on current market conditions and consider matters such as rental rates and occupancies for comparable properties, recent sales data for comparable properties and, where applicable, contracts or the results of negotiations with purchasers or prospective purchasers. Changes in estimated future cash flows due to changes in our plans or views of market and economic conditions could result in recognition of additional impairment losses which, under applicable accounting guidance, could be substantial.

If events or circumstances indicate that the fair value of an investment has declined below its carrying value and we consider the decline to be other than temporary, the investment is written down to fair value and an impairment loss is recognized.

As a result of the bankruptcy of HQ Global, we were required to make estimates regarding our probable liability under guarantees of HQ Global s performance under four office leases. After carefully evaluating the facts and circumstances of each property and developments in the bankruptcy proceedings, we accrued a loss of \$8.7 million in 2002, our best estimate of the probable liability related to these guarantees. Our estimated loss was based on such

18

Management s Discussion and Analysis

factors as the expected period of vacancy for the space before it could be relet, expected rental rates and other factors. Circumstances may change in the future which could cause us to reevaluate our liability under these guarantees and adjust our estimate as appropriate.

Our allowance for doubtful accounts receivable is established based on analysis of the risk of loss on specific accounts. The analysis places particular emphasis on past-due accounts and considers information such as the nature and age of the receivable, the payment history of the tenant or other debtor, the amount of security we hold, the financial condition of the tenant and our assessment of its ability to meet its lease obligations, the basis for any disputes and the status of related negotiations, etc. Our estimate of the required allowance, which is reviewed on a quarterly basis, is subject to revision as these factors change and is sensitive to the effects of economic and market conditions on our tenants, particularly in our largest markets (i.e., the San Francisco Bay and Washington, D.C. Metro areas). For example, due to economic conditions and analysis of our accounts receivable, we increased our provision for uncollectible accounts (and related accrued straight-line rents) by approximately \$2.1 million for the six months ended June 30, 2003.

Results Of Operations

Property Operations Revenue

Property operations revenue is summarized as follows:

	For the three	e months ended	I	E4b	41	
	Ju	ne 30,	Variance		months ended ne 30,	Variance
(in millions)	2003	2002	2003 vs. 2002	2003	2002	2003 vs. 2002
(III IIIIIIIOIIS)						
Minimum base rent	\$ 103.0	\$ 104.2	\$ (1.2)	\$ 207.9	\$ 208.6	\$ (0.7)
Recoveries from tenants	13.7	13.6	0.1	29.7	29.7	
Parking and other tenant charges	5.2	2.5	2.7	11.2	5.3	5.9

Property operations revenue is composed of minimum base rent from our office buildings, revenue from the recovery of operating expenses from our tenants and other revenue such as parking and termination fees. Occupancy rates in our buildings began to decline in most of our markets in late 2001 and have continued to decline into 2003. This decline has negatively affected our operating revenue. Occupancy in stabilized buildings (buildings in operation more than one year) by market as of June 30, 2003 and 2002 is as follows:

	June 30, 2	2003	June 30	, 2002	Varian	ice
Market	Rentable	Percent	Rentable	Percent	Rentable Sq.	Percent
	Sq.	Leased	Sq.	Leased	Footage	Leased

Edgar Filing: CARRAMERICA REALTY CORP - Form 10-Q

As a result of the ongoing weak economic climate, the real estate markets have been materially affected. The contraction of office workforces has reduced demand for office space and overall vacancy rates for office properties have increased in all of our markets. In reviewing various outlooks for the economy, we believe that the vacancy rates

Management s Discussion and Analysis

will not improve in any material fashion until at least 2004. During 2002 and into 2003, our markets weakened significantly and our operations were adversely impacted. The occupancy in our portfolio of stabilized operating properties decreased to 88.9% at June 30, 2003 compared to 92.3% at December 31, 2002 and 93.6% at June 30, 2002. Market rental rates have declined in most markets from peak levels and we believe there will be additional declines in some markets this year. Rental rates on space that was re-leased in the first half of 2003 decreased an average of 12.1% in comparison to rates that were in effect under expiring leases.

Minimum Base Rent

Minimum base rent decreased \$1.2 million (1.2%) in the second quarter of 2003 compared to 2002. The decrease in minimum base rent in 2003 was due primarily to higher vacancies. We expect minimum base rent to be under downward pressure during the remainder of the year as a result of re-leasing space at lower rates than those rates that were in effect under expiring leases. Minimum base rent decreased \$0.7 million (0.3%) for the first half of 2003 compared to 2002. The decrease in minimum base rent in 2003 was due primarily to higher vacancies partially offset by higher rents in buildings we acquired in the latter half of 2002 compared to the rents in buildings we sold in 2002. Additionally, the results for our largest 2002 disposition, which occurred in August 2002, are included in discontinued operations while the proceeds from the sale were re-invested in new properties. The base rent associated with that property was \$3.1 million and \$6.2 million for the three and six months ended June 30, 2002, respectively.

Our lease rollover by square footage and rent at June 30, 2003 is as follows:

	Leased Sq. Footage ¹	Rent (\$000)
2003	1,131,707	26,137
2004	2,456,313	52,253
2005	2,331,312	74,029
2006	2,384,568	58,287
2007	2,772,512	59,478
2008	2,147,630	43,606
2009	1,681,808	28,483
2010	627,790	15,212
2011	395,355	7,629
2012	1,026,879	25,762
2013 and thereafter	1,197,645	15,313
	18,153,519	406,189

Does not include vacant space at 6/30/03 - 2.3 million sq. ft.

Recoveries from Tenants

Recoveries from tenants increased \$0.1 million in the second quarter of 2003 from 2002. Recoveries from tenants were relatively unchanged for the six months ended June 30, 2003 compared to the six months ended June 30, 2002.

Parking and Other Tenant Charges

Parking and other tenant charges increased \$2.7 million (108.6%) in the second quarter of 2003 from 2002. This increase was due primarily to \$2.2 million of lease termination fees compared to \$0.4 million of lease termination fees in the second quarter of 2002. Parking and other tenant charges increased \$5.9 million (111.7%) for the first six months of 2003 compared to the same period in 2002. Lease termination fees were \$4.5 million higher in 2003 compared to 2002. Lease termination fees are paid by a tenant in exchange for our agreement to terminate the lease. Vacancies created as a result of these terminations are expected to negatively impact minimum base rent for the remainder of the year.

20

Management s Discussion and Analysis

Property Expenses

Property expenses are summarized as follows:

	For the three June		Variance		nonths ended e 30,	Varia	ance
(in millions)	2003	2002	2003 vs. 2002	2003	2002	2003	
Property operating expenses Real estate taxes	\$ 31.6 11.1	\$ 29.4 11.3	\$ 2.2 (0.2)	\$ 63.8 23.0	\$ 60.1 23.0	\$	3.7

Property operating expenses increased \$2.2 million (7.5%) in the second quarter of 2003 from 2002 as a result of higher insurance expense (\$1.5 million), utility expenses (\$0.5 million), repairs and maintenance (\$1.1 million) and landscaping (\$0.3 million). These increases were partially offset by lower bad debt expense (\$1.4 million). The increase in insurance expense was due primarily to increases in our property and casualty insurance premiums and the cost of terrorism coverage upon renewal in June 2002. The increase in repairs and maintenance was expected.

For the six months ended June 30, 2003, property operating expenses increased \$3.7 million from 2002 due primarily to higher insurance expense (\$3.2 million) and repairs and maintenance (\$1.2 million) partially offset by lower bad debt expense (\$1.0 million). The increases in insurance and repairs and maintenance were attributable to the factors discussed above.

Property Operating Margin

Property operating margin, defined as property operations revenue less property expenses excluding depreciation, is summarized as follows:

		For the three months ended June 30, Variance June 30				Varia	ınce
(in millions)	2003	2002	2003 vs. 2002	2003	2002	2003	
Property operating margin Property operating margin percent	\$ 79.2 65.0%	\$ 79.6 66.2%	\$ (0.4)	\$ 162.1 65.1%	\$ 160.5 65.9%	\$	1.6

Property operating margin decreased \$0.4 million (0.5%) in the second quarter of 2003 from 2002 due primarily to increased vacancies partially offset by higher termination fees. Property operating margin as a percentage of property operations revenue was 65.0% for the second quarter of 2003 compared to 66.2% in 2002. For the six months ended June 30, 2003, property operating margin increased \$1.6 million (1.0%) due primarily to higher termination fees and acquisitions partially offset by higher vacancies. Property operating margin for the first half of 2003 was 65.1% compared to 65.9% in 2002.

Real Estate Service Revenue

Real estate service revenue, which includes our third party property management services and our development services, increased \$2.0 million (36.3%) in the second quarter of 2003 from 2002. The increase was due primarily to one-time incentive development fees of \$2.2 million from third parties. For the first half of 2003, real estate service revenue increased \$1.4 million (12.2%) from 2002 for the same reason.

Interest Expense

Interest expense increased \$1.3 million (5.1%) during the second quarter of 2003 compared to the second quarter of 2002. This increase was due primarily to higher debt levels to finance our repurchases of common and preferred stock in the latter half of 2002 and 2003. The effect of this increase was partially offset by a decrease in short-term interest rates on our variable rate line of credit, our interest rate swap agreements and repayment of higher rate mortgages. Interest expense increased \$2.4 million (4.9%) for the first half of 2003 compared to 2002 for the same reasons.

21

Management s Discussion and Analysis

General and Administrative Expense

General and administrative expense increased \$2.6 million (31.9%) in the second quarter of 2003 from 2002. This increase was due primarily to higher payroll costs, including incentive compensation. General and administrative expense increased \$1.8 million (9.5%) for the first half of 2003 compared to 2002 for the same reason.

Depreciation and Amortization

Depreciation and amortization increased \$3.9 million (13.0%) in the second quarter of 2003 compared to the second quarter of 2002. This increase was due primarily to amortization of intangible assets related to property acquisitions in the second half of 2002 and the depreciation of tenant improvement costs related to terminated leases. Depreciation and amortization increased \$3.2 million (5.1%) in the first half of 2003 compared to 2002 for the same reasons.

Gain on Sale of Assets and Other Provisions, Net and Discontinued Operations

We dispose of assets from time to time that are inconsistent with our long-term strategic or return objectives. During the three and six months ended June 30, 2003 we disposed of one operating property, recognizing a gain of \$3.5 million. We continue to manage the property under a management agreement and the gain on this sale and the operating results of the property are not classified as discontinued operations due to our continuing involvement. We also recognized an impairment loss of \$2.7 million on a building as we currently expect that we will dispose of the property before the end of its previously estimated useful life and will not recover the carrying value. For the three and six months ended June 30, 2002, we disposed of one operating property, recognizing a gain of \$3.3 million. We continue to manage the property under a management agreement and the gain on this sale and the operating results of the property are not classified as discontinued operations due to our continuing involvement. We recognized impairment losses of \$0.5 million and \$1.3 million on parcels of land held for development during the three and six months ended June 30, 2002, respectively.

At June 30, 2003, we have contracts to sell two properties with which we will have no continuing involvement after the sale. The results of operations for these properties have been classified as discontinued operations in all periods presented in the statements of operations. In August 2002, we sold our Commons at Las Colinas property with which we had no continuing involvement after the sale. The results of operations of this property are classified as discontinued operations for the three and six months ended June 30, 2002.

Other Income and Expense

Other income (expense) was \$2.0 million and (\$3.9) million in the second quarter of 2003 and 2002, respectively. Equity in earnings of unconsolidated entities decreased \$0.3 million in 2003 from 2002 due to increased vacancies in the properties and the sale of one joint venture in the fourth quarter of 2002. In the second quarter of 2002, we accrued \$6.3 million of losses related to lease guarantees associated with HQ

Global.

Other income (expense) was \$3.4 million and (\$4.0) million in the first half of 2003 and 2002, respectively. Equity in earnings from unconsolidated entities decreased \$1.1 million in 2003 from 2002 due to increased vacancies in the properties and the sale of one joint venture in the fourth quarter of 2002. In the first half of 2002, we accrued \$8.7 million of losses related to lease guarantees associated with HQ Global.

Income from Continuing Operations and Diluted Earnings per Share

Income from continuing operations decreased \$1.7 million (9.6%) in the second quarter of 2003 compared to 2002 for the reasons discussed above. Diluted earnings per share from continuing operations increased \$0.06 (35.3%) per share for the second quarter of 2003 compared to 2002. The increase was due primarily to a reduction in preferred dividends (\$0.08) and a decrease in weighted average common shares outstanding (\$0.01), reduced by lower earnings (\$0.03).

Income from continuing operations increased \$1.4 million (4.0%) for the first half of 2003 compared to 2002 for the reasons discussed above. Diluted earnings per share from continuing operations increased \$0.18 (58.1%) per share in the first half of 2003 compared to 2002. The increase was due primarily to a reduction in preferred dividends (\$0.14), higher net income (\$0.02) and a decrease in weighted average common shares outstanding (\$0.02).

22

Management s Discussion and Analysis

Consolidated Cash Flows

Consolidated cash flow information is summarized as follows:

		For the six months ended June 30,			
(in millions)	2003	2002	2003 vs. 2002		
Cash provided by operating activities	\$ 85.6	\$ 110.8	\$ (25.2)		
Cash used by investing activities	(29.7) (28.8)	(0.9)		
Cash used by financing activities	(58.4) (82.5)	24.1		

Operations generated \$85.6 million of net cash for the first six months of 2003 compared to \$110.8 million in 2002. The change in cash flow from operating activities was primarily the result of factors discussed above in the analysis of operating results. The level of net cash provided by operating activities is also affected by the timing of receipt of revenues and payment of expenses.

Our investing activities used net cash of \$29.7 million in 2003 and \$28.8 million in 2002. The change in cash flows from investing activities in 2003 was due primarily to increased investments in joint ventures (\$9.9 million), increased notes receivable (\$1.5 million) and reduced proceeds from the sale of properties (\$1.2 million), partially offset by decreased capital expenditures on real estate (\$9.4 million) and decreased acquisition of minority interest (\$1.5 million).

Our financing activities used net cash of \$58.4 million in 2003 and \$82.5 million in 2002. The change in net cash used by financing activities in 2003 was due primarily to increased net unsecured borrowings (\$74.5 million), reduced dividend payments (\$7.5 million), and lower repayments of mortgages (\$1.2 million) partially offset by higher repurchases and redemptions of common and preferred stock (\$41.9 million) and reduced proceeds from stock option exercises (\$17.9 million)

LIQUIDITY AND CAPITAL RESOURCES

General

As of June 30, 2003, we had approximately \$0.6 million in available cash and cash equivalents. As a REIT, we are required to distribute at least 90% of our taxable income to our stockholders on an annual basis. In addition, we and our affiliates regularly require capital to invest in our existing portfolio of operating assets for capital projects. These capital projects include such things as large-scale renovations, routine capital improvements, deferred maintenance on properties we have recently acquired and leasing-related matters, including tenant improvements,

allowances and leasing commissions. The amounts of the leasing-related expenditures can vary significantly depending on negotiations with tenants and the willingness of tenants to pay higher base rents over the life of the leases.

We derive substantially all of our revenue from tenants under leases at our properties. Our operating cash flow therefore depends materially on the rents that we are able to charge to our tenants, and the ability of these tenants to make their rental payments. Although our top 25 tenants accounted for approximately 35.9% of our annualized minimum base rents as of June 30, 2003, we believe that the diversity of our tenant base (no tenant accounted for more than 5% of annualized minimum base rents as of June 30, 2003) helps insulate us from the negative impact of tenant defaults and bankruptcies. However, general economic downturns, or economic downturns in one or more of our markets, could materially adversely impact the ability of our tenants to make lease payments and our ability to re-lease space on favorable terms as leases expire. In either of these cases, our cash flow and therefore our ability to meet our capital needs would be adversely affected.

As a result of the ongoing weak economic climate, the real estate markets have been materially affected. The contraction of office workforces has reduced demand for office space and overall vacancy rates for office properties have increased in all of our markets. In reviewing various outlooks for the economy, we believe that the vacancy rates will not improve in any material fashion until at least 2004. During 2002 and into 2003, our markets weakened significantly and our operations were adversely impacted. The occupancy in our portfolio of stabilized operating properties decreased to 88.9% at June 30, 2003 compared to 92.3% at December 31, 2002 and 93.6% at June 30, 2002. Market rental rates have declined in most markets from peak levels and we believe there will be additional declines in

23

Management s Discussion and Analysis

some markets this year. Rental rates on space that was re-leased in the first half of 2003 decreased an average of 12.1% in comparison to rates that were in effect under expiring leases.

In the future, if, as a result of general economic downturns, a credit rating downgrade, our properties do not perform as expected, we cannot raise the expected funds from the sale of properties and/or if we are unable to obtain capital from other sources, we may not be able to make required principal and interest payments, make strategic acquisitions or make necessary routine capital improvements with respect to our existing portfolio of operating assets. While we believe that we would continue to have sufficient funds to pay our operating expenses and debt service and our regular quarterly dividends, our ability to expand our development activity or to fund acquisitions of properties could be adversely affected. In addition, if a property is mortgaged to secure payment of indebtedness and we are unable to meet mortgage payments, the holder of the mortgage could foreclose on the property, resulting in loss of income and asset value. An unsecured lender could also attempt to foreclose on some of our assets in order to receive payment. In most cases, very little of the principal amount that we borrow is repaid prior to the maturity of the loan. We may refinance that debt when it matures, or we may pay off the loan. If principal amounts due at maturity cannot be refinanced, extended or paid with proceeds of other capital transactions, such as new equity capital, our cash flow may be insufficient to repay all maturing debt. Prevailing interest rates or other factors at the time of a refinancing (such as possible reluctance of lenders to make commercial real estate loans) may result in higher interest rates and increased interest expense.

Our ability to raise funds through sales of debt and equity securities is dependent on, among other things, general economic conditions, general market conditions for REITs, rental rates, occupancy levels, market perceptions about us, our debt rating and the current trading price of our stock. We will continue to analyze which source of capital is most advantageous to us at any particular point in time, but the capital markets may not consistently be available on terms that are attractive.

Capital Structure

We manage our capital structure to reflect a long-term investment approach, generally seeking to match the stable return nature of our assets with a mix of equity and various debt instruments. We expect that our capital structure will allow us to obtain additional capital from diverse sources that could include additional equity offerings of common stock and/or preferred stock, public and private debt financings and possible asset dispositions. Our management believes, but there can be no assurance, that we will have access to the capital resources necessary to expand and develop our business, to fund our operating and administrative expenses, to continue to meet our debt service obligations, to pay dividends in accordance with REIT requirements, to acquire additional properties and land and to pay for construction in progress.

Debt Financing

We generally use fixed rate debt instruments in order to match the returns from our real estate assets. We also utilize variable rate debt for short-term financing purposes or to protect against the risk, at certain times, that fixed rates may overstate our long-term costs of borrowing if assumed inflation or growth in the economy implicit in higher fixed interest rates do not materialize. At times, our mix of variable and fixed rate debt may not suit our needs. At those times, we use derivative financial instruments including interest rate swaps and caps, forward interest rate options or interest rate options in order to assist us in managing our debt mix. We either will hedge our variable rate debt to give it a fixed interest rate or hedge fixed rate debt to give it a variable interest rate.

We have three investment grade ratings. As of June 30, 2003, Fitch Rating Services and Standard & Poors have each assigned their BBB rating to our prospective senior unsecured debt offerings and their BBB- rating to our prospective cumulative preferred stock offerings. Moody s Investor Service has assigned its Baa2 rating with a negative outlook to our prospective senior unsecured debt offerings and its Baa3 rating to our prospective cumulative preferred stock offerings. A downgrade in rating by any one of these rating agencies could result from, among other things, a change in our financial position or a downturn in general economic conditions. Any such downgrade could adversely affect our ability to obtain future financing or could increase the interest rates on our existing variable rate debt. However, we have no debt instruments under which the principal maturity would be accelerated upon a downward change in our debt rating.

Management s Discussion and Analysis

Our total debt at June 30, 2003 is summarized as follows:

(In thousands)	
Fixed rate mortgages	\$ 384,247
Unsecured credit facility	188,000
Senior unsecured notes	1,100,000
	1,672,247
Unamortized discount and fair value adjustment, net	1,273
	\$ 1,673,520

Our fixed rate mortgage debt bore an effective weighted average interest rate of 8.05% at June 30, 2003 and had a weighted average maturity of 5.8 years. \$188.0 million (11.2%) of our total debt at June 30, 2003 bore a LIBOR-based variable interest rate and \$325.0 million (19.4%) of our debt was subject to variable interest rates through interest rate swap agreements. The interest rate on borrowings on our unsecured credit facility at June 30, 2003 was 1.82%.

Our primary external source of liquidity is our credit facility. We have a three-year, \$500 million unsecured credit facility expiring in June 2004 with J.P. Morgan Chase, as agent for a group of banks. We can extend the life of the facility an additional year at our option. The facility carries an interest rate of 70 basis points over 30-day LIBOR, or 1.82% as of June 30, 2003. As of June 30, 2002, \$188.0 million was drawn on the credit facility, \$4.6 million in letters of credit were outstanding and we had \$307.4 million available for borrowing.

Our unsecured credit facility contains financial and other covenants with which we must comply. Some of these covenants include:

A minimum ratio of annual EBITDA (earnings before interest, taxes, depreciation and amortization) to interest expense;

A minimum ratio of annual EBITDA to fixed charges;

A maximum ratio of aggregate unsecured debt to unencumbered assets;

A maximum ratio of total debt to tangible fair market value of our assets; and

Restrictions on our ability to make dividend distributions in excess of 90% of funds from operations.

Availability under the unsecured credit facility is also limited to a specified percentage of the fair value of our unmortgaged properties. During the second quarter of 2003, we amended our credit agreement to change our maximum ratio of aggregate unsecured debt to unencumbered assets covenant to allow for continuing compliance. Failure to comply with any of the covenants under our unsecured credit facility or other debt instruments could result in a default under one or more of our debt instruments. This could cause our lenders to accelerate the timing of payments and would therefore have a material adverse effect on our business, operations, financial condition or liquidity. As of June 30, 2003, we were in compliance with our loan covenants.

We have senior unsecured notes outstanding at June 30, 2003 as follows:

(In thousands)	Note Principal	Unamortized Discount	Fair Value Adjustment	Total
7.200% notes due in 2004	\$ 150,000	\$ (225)	\$ 4,424	\$ 154,199
6.625% notes due in 2005	100,000	(1,062)		98,938
7.375% notes due in 2007	125,000	(579)		124,421
5.261% notes due in 2007	50,000	(133)		49,867
5.250% notes due in 2007	175,000	(1,196)	6,674	180,478
6.875% notes due in 2008	100,000	(1,929)		98,071
7.125% notes due in 2012	400,000	(4,701)		395,299
	\$ 1,100,000	\$ (9,825)	\$ 11,098	\$ 1,101,273

Of our senior unsecured notes, \$625.0 million was issued in 2002. In January 2002, we issued \$400.0 million of senior unsecured not
