Explanatory Note

Indevus Pharmaceuticals, Inc. (the Company) is filing this Amendment No. 1 to Form 10-Q on Form 10-Q/A to restate its consolidated financial statements for the third quarter of fiscal 2004. In the Form 10-Q filed for the quarter ended June 30, 2004, the Company disclosed that the Securities and Exchange Commission (SEC) reviewed and provided comments on the Company's prospective accounting treatment for the PLIVA Agreement. As a result of discussions with the SEC, the Company has restated its consolidated financial statements for the third quarter of fiscal 2004 and the first nine months of fiscal 2004 to correct the recognition of certain revenue received in connection with the Company's co-promotion and licensing agreement with Odyssey Pharmaceuticals, Inc., a specialty branded subsidiary of PLIVA d.d. in accordance with the contingency adjusted performance model. Previously, the Company recognized revenue under the contract-term deferral method. The correction resulted in an increase in revenues and a corresponding decrease in net loss of \$1,655,000 for the three and nine months ended June 30, 2004. This adjustment had no effect on the net cash flows from operations for such periods.

The Company's consolidated financial statements for the third quarter of fiscal 2004 contained in this Amendment No. 1 to Form 10-Q on Form 10-Q/A reflect the effect of the restatement. See Note A of Notes to unaudited consolidated financial statements.

This Amendment No. 1 restates in their entirety, Items 1 and 2 of Part I of the Company's Quarterly Report on Form 10-Q for the third quarter of fiscal 2004 to reflect the restatement described above, as well as Item 6 of Part II to comply with Rule 12b-15 promulgated under the Securities Exchange Act of 1934. Pursuant to Rule 12b-15 this Amendment No. 1 sets forth the complete text of each item which is being amended, as amended. Any Items of the initially filed 10-Q which are not being amended have been left out of this Amendment No. 1. Furthermore, pursuant Rule 12b-15 this Amendment No. 1 includes new certifications by each principal executive and principal financial officer of Indevus Pharmaceuticals, Inc.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (As restated)

A. Basis of Presentation

The consolidated interim financial statements included herein have been prepared by Indevus Pharmaceuticals, Inc. (Indevus or the Company) without audit, pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States of America have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the accompanying unaudited consolidated financial statements include all adjustments (consisting only of normal recurring adjustments) necessary to present fairly the consolidated financial position, results of operations and cash flows of the Company. The unaudited consolidated financial statements included herein should be read in conjunction with the audited consolidated financial statements and the notes thereto included in the Company's Form 10-K for the fiscal year ended September 30, 2003.

For an entity that is not a variable interest entity under FIN 46, *Consolidation of Variable Interest Entities*, the Company's policy is to consolidate a subsidiary when the Company owns greater than 50% of the voting interest in the subsidiary and/or controls it.

Certain prior year amounts have been reclassified to conform to fiscal 2004 classifications.

Indevus is a biopharmaceutical company engaged in the development and commercialization of a diversified portfolio of product candidates, including SANCTURA (trospium chloride), approved by the U.S. Food and Drug Administration for the treatment of overactive bladder (OAB), and multiple compounds in clinical development.

Restatement of Quarterly Financial Statements

The Company has restated its consolidated financial statements for the third quarter of 2004 and the first nine months of fiscal 2004 to correct the recognition of milestone revenue received in connection with the Company's co-promotion and licensing agreement with Odyssey Pharmaceuticals, Inc., a specialty branded subsidiary of PLIVA d.d. in accordance with the contingency adjusted performance model. Previously, the Company recognized revenue under the contract-term deferral method. The correction resulted in an increase in revenues and a corresponding decrease in net loss of \$1,655,000 for the three and nine months ended June 30, 2004. The following table presents a summary of the impact of the restatements on the Company's consolidated statements of operations for the three and nine months ended June 30, 2004, consolidated balance sheet as of June 30, 2004 and consolidated statement of cash flows for the nine months ended June 30, 2004:

B. Revenue Recognition Policy

Product revenue consists of revenues from sales of products, royalties and commissions. Contract and license fee revenue consists of revenue stemming from contractual initial and milestone payments received from customers, including amortization of deferred revenue from contractual payments, reimbursements from PLIVA for their share of SANCTURA promotion and advertising costs incurred by the Company less an amount owed by the Company to PLIVA for the Company's share of SANCTURA promotion and advertising costs incurred by PLIVA, sales force subsidies from PLIVA, reimbursements from PLIVA for royalties owed by the Company to Madaus, and grants from agencies supporting

research and development activities.

Table of Contents

INDEVUS PHARMACEUTICALS, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (As restated) (Continued)

The Company records sales of product as product revenue upon the later of shipment or as title passes to its customer. In fiscal 2004, the Company commenced selling SANCTURA to PLIVA in bottles for resale and blister packs for distribution as samples (see Note F).

Royalty revenue consists of payments received from licensees for a portion of sales proceeds from products that utilize the Company's licensed technologies and are generally reported to the Company in a royalty report on a specified periodic basis. Royalty revenue is recognized in the period in which the sales of the product or technology occurred on which the royalties are based unless the royalty report for such period is received subsequent to the time the Company is required to report its results on Form 10-Q or Form 10-K and the amount of the royalties earned is not estimable, in which case the Company recognizes such royalty revenue in the subsequent accounting period when it receives the royalty report and when the amount of and basis for such royalty payments are reported to the Company in accurate and appropriate form and in accordance with the related license agreement.

The Company's business strategy includes entering into collaborative license and development or co-promotion agreements with strategic partners for the development and commercialization of the Company's products or product candidates. The terms of the agreements typically include non-refundable license fees, funding of research and development, payments based upon achievement of certain milestones and royalties on net product sales. Non-refundable license fees are recognized as revenue when the Company has a contractual right to receive such payment, the contract price is fixed or determinable, the collection of the resulting receivable is reasonably assured and the Company has no further performance obligations under the license agreement. In multiple element arrangements where the Company has continuing performance obligations, license fees are recognized together with any up-front payment over the term of the arrangement as the Company completes its performance obligations, unless the delivered technology has stand alone value to the customer and there is objective and reliable evidence of fair value of the undelivered elements in the arrangement. The Company records such revenue as contract and license fee revenue.

Revenues from milestone payments related to arrangements under which the Company has continuing performance obligations are recognized as revenue upon achievement of the milestone only if all of the following conditions are met: the milestone payments are non-refundable; achievement of the milestone was not reasonably assured at the inception of the arrangement; substantive effort is involved in achieving the milestone; and the amount of the milestone is reasonable in relation to the effort expended or the risk associated with achievement of the milestone. Determination as to whether a milestone meets the aforementioned conditions involves management's judgment. If any of these conditions are not met, the milestone payments are deferred and recognized as revenue over the term of the arrangement as the Company completes its performance obligations. Revenues from milestone payments related to arrangements under which the Company has no continuing performance obligations are recognized upon achievement of the related milestone. The Company records such revenue as contract and license fee revenue. Contractual subsidies of ongoing expenses are recorded as contract and license fee revenue.

Under the PLIVA Agreement, the initial and subsequent milestone payments, once earned, are recognized as contract and license fee revenue using the contingency-adjusted performance model. Under this model, when a milestone is earned, revenue is immediately recognized on a pro-rata basis in the period the Company achieves the milestone based on the time elapsed from inception of the agreement to the time the milestone is earned over the estimated duration of the PLIVA Agreement. Going forward, the remaining portion of the milestone payment is recognized on a straight-line basis over the remaining estimated duration of the PLIVA Agreement.

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

Multiple element arrangements are evaluated pursuant to EITF 00-21, Accounting Revenue Arrangements with Multiple Deliverables (EITF 00-21). Pursuant to EITF 00-21, in multiple element arrangements where we have continuing performance obligations, contract, milestone and license fees are recognized together with any up-front payments over the term of the arrangement as we complete our performance obligation, unless the delivered

Table of Contents

INDEVUS PHARMACEUTICALS, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (As restated) (Continued)

technology has stand alone value to the customer and there is objective, reliable evidence of fair value of the undelivered element in the arrangement. In the case of an arrangement where it is determined there is a single unit of accounting, all cash flows from the arrangement are considered in the determination of all revenue to be recognized. Additionally, pursuant to the guidance of Securities and Exchange Commission Staff Accounting Bulletin 104 (SAB 104), unless evidence suggests otherwise, revenue from consideration received is recognized on a straight-line basis over the expected term of the arrangements. In particular relating to the PLIVA Agreement (see Note F), the Company and PLIVA are contractually bound to share certain promotion and advertising costs relating to SANCTURA. For promotion and advertising costs incurred by the Company, reimbursements from PLIVA for PLIVA s share are reflected in contract and license fee revenue. For promotion and advertising costs incurred by PLIVA, reimbursements to PLIVA for the Company s share are reflected as a reduction of contract and license fee revenue.

Cash received in advance of revenue recognition is recorded as deferred revenue.

C. Basic and Diluted Loss per Common Share

During the three month period ended June 30, 2004, securities not included in the computation of diluted earnings per share, because their exercise price exceeded the average market price during the period were as follows: (i) the notes convertible into 10,817,000 shares of Common Stock at a conversion price of \$6.656 per share and which are convertible through July 15, 2008 and (ii) options to purchase 501,000 shares of Common Stock at prices ranging from \$7.37 to \$20.13 with expiration dates ranging up to June 8, 2014. Additionally, during the three month period ended June 30, 2004, potentially dilutive securities not included in the computation of diluted earnings per share, because they would have an antidilutive effect due to the net loss for the period, were as follows: (i) options to purchase 9,629,000 shares of Common Stock at prices ranging from \$1.22 to \$7.10 with expiration dates ranging up to May 18, 2014; (ii) Series B and C preferred stock convertible into 622,222 shares of Common Stock and (iii) warrants to purchase 55,000 shares of Common Stock with exercise prices ranging from \$5.00 to \$6.19 and with expiration dates ranging up to July 17, 2006.

During the three month period ended June 30, 2003, securities not included in the computation of diluted earnings per share, because their exercise price exceeded the average market price during the period were as follows: (i) options to purchase 3,528,686 shares of Common Stock at prices ranging from \$4.63 to \$20.13 with expiration dates ranging up to June 3, 2013; and (ii) warrants to purchase 105,000 shares of Common Stock with exercise prices ranging from \$5.00 to \$7.13 and with expiration dates ranging up to July 17, 2006. Additionally, during the three month period ended June 30, 2003, securities not included in the computation of diluted earnings per share, because they would have an antidilutive effect due to the net loss for the period, were as follows: (i) options to purchase 7,008,097 shares of Common Stock at prices ranging from \$1.22 to \$4.40 with expiration dates ranging up to April 23, 2013; and (ii) Series B and C preferred stock convertible into 622,222 shares of Common Stock.

During the nine month period ended June 30, 2004, securities not included in the computation of diluted earnings per share, because their exercise price exceeded the average market price during the period were as follows: (i) the notes convertible into 10,817,000 shares of Common Stock at a conversion price of \$6.656 per share and which are convertible through July 15, 2008; and (ii) options to purchase 569,000 shares of Common Stock at prices ranging from \$6.68 to \$20.13 with expiration dates ranging up to June 8, 2014. Additionally, during the nine month period ended June 30, 2004, potentially dilutive securities not included in the computation of diluted earnings per share, because they would

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

have an antidilutive effect due to the net loss for the period, were as follows: (i) options to purchase 9,548,000 shares of Common Stock at prices ranging from \$1.22 to \$6.25 with expiration dates ranging up to March 10, 2014; (ii) Series B and C preferred stock convertible into 622,222 shares of Common Stock and (iii) warrants to purchase 55,000 shares of Common Stock with exercise prices ranging from \$5.00 to \$6.19 and with expiration dates ranging up to July 17, 2006.

During the nine month period ended June 30, 2003, securities not included in the computation of diluted earnings per share, because their exercise price exceeded the average market price during the period were as

Table of Contents**INDEVUS PHARMACEUTICALS, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (As restated) (Continued)**

follows: (i) options to purchase 6,444,883 shares of Common Stock at prices ranging from \$3.13 to \$20.13 with expiration dates ranging up to April 23, 2013; and (ii) warrants to purchase 105,000 shares of Common Stock with exercise prices ranging from \$5.00 to \$7.13 and with expiration dates ranging up to July 17, 2006. Additionally, during the nine month period ended June 30, 2003, securities not included in the computation of diluted earnings per share, because they would have an antidilutive effect due to the net loss for the period, were as follows: (i) options to purchase 3,836,639 shares of Common Stock at prices ranging from \$1.22 to \$2.38 with expiration dates ranging up to March 12, 2013; and (ii) Series B and C preferred stock convertible into 622,222 shares of Common Stock.

Certain of the above securities contain anti-dilution provisions which may result in a change in the exercise price or number of shares issuable upon exercise or conversion of such securities.

D. Pro Forma Net Loss Information

The Company applies Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations, in accounting for its employee stock-based compensation plans. The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure, an amendment of FASB Statement No. 123 (SFAS No. 148). Had compensation expense for the Company's employee stock option plans been determined based on the fair value at the grant date for awards under these plans using a Black-Scholes option pricing model consistent with the methodology prescribed under SFAS No. 148, the Company's net loss and net loss per share would have approximated the pro forma amounts indicated below:

	Three months ended		Nine months ended	
	June 30,		June 30,	
	2004		2004	
	(As restated)	2003	(As restated)	2003
As reported net loss	\$ (16,963,000)	\$ (12,050,000)	\$ (40,357,000)	\$ (20,447,000)
Adjustment to compensation expense for stock-based awards	\$ (940,000)	\$ (241,000)	\$ (1,547,000)	\$ (760,000)
Pro forma net loss	\$ (17,903,000)	\$ (12,291,000)	\$ (41,904,000)	\$ (21,207,000)
As reported net loss per common share, basic and diluted	\$ (0.36)	\$ (0.26)	\$ (0.85)	\$ (0.44)
Pro forma net loss per common share, basic and diluted	\$ (0.38)	\$ (0.26)	\$ (0.88)	\$ (0.45)

INDEVUS PHARMACEUTICALS, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (As restated) (Continued)

F. Agreements

SANCTURA:

In April 2004, the Company entered into a co-promotion and licensing agreement with Odyssey Pharmaceuticals, Inc., a specialty branded subsidiary of PLIVA d.d. (PLIVA) (the PLIVA Agreement) for the U.S. commercialization of SANCTURA (tamsulosin hydrochloride), approved for marketing on May 28, 2004 by the U.S. Food and Drug Administration (FDA) as a treatment for overactive bladder. Under the terms of this agreement, the Company granted PLIVA an exclusive right and license to co-promote and sell SANCTURA in the United States. Pursuant to the PLIVA Agreement the Company received \$150 million, \$30 million upon the execution of the agreement in April 2004 and \$120 million in May 2004 upon receipt of the FDA approval of SANCTURA twice daily. In addition, Indevus could receive up to \$45 million in future payments contingent upon the achievement of certain milestones related to the development of a once-a-day formulation of SANCTURA, as well as a payment of \$20 million related to the achievement of a long-term commercialization milestone in 2013.

For the first six months following the approval of SANCTURA, Indevus is receiving a commission based on net sales of SANCTURA, adjusted by a fixed percentage of the aggregate advertising and promotion costs incurred by PLIVA and Indevus. During this period, Indevus has been responsible for funding its own sales force and certain advertising and promotional costs. PLIVA and Indevus have co-promoted SANCTURA through a joint sales force of approximately 500 sales representatives. Indevus established a sales force initially numbering approximately 280 representatives promoting SANCTURA to urology specialists, obstetricians and gynecologists, and certain primary care physicians.

At any time beginning six months after the approval of SANCTURA, each company has the right to convert the PLIVA Agreement into a royalty-bearing structure, whereby Indevus will receive royalties from PLIVA based on net sales of SANCTURA, and PLIVA would be responsible for promotional and advertising costs. Should this right be exercised, Indevus' specialty sales force would be subsidized by PLIVA for the first three years commencing on the effective date of the conversion and would continue to promote SANCTURA to urology specialists, obstetricians and gynecologists, and high prescribers during this period.

The Pliva Agreement contains certain obligations to PLIVA to be performed by the Company and gives the Company certain rights resulting from PLIVA's performance and obligations under the PLIVA Agreement. The Company's obligations to Pliva, over the term of the PLIVA Agreement, are to: (i) grant an exclusive right to PLIVA to all of our the Company's technology and know how related to SANCTURA in the U.S.; (ii) conduct and fund all development activities, on a best-efforts basis, to achieve FDA approval of SANCTURA twice-daily and once-daily; (iii) participate equally with PLIVA on steering, development, and marketing committees; (iv) establish and train a sales force during the Copromotion Period and maintain a trained sales force during the first three years of the License Period; (v) provide to PLIVA at cost all product to be used for sale and all samples for distribution; (vi) engage and manage third-party promotion and advertising services related to the launch of SANCTURA twice-daily, as directed by the marketing committee during the Copromotion Period; and (vii) share with PLIVA at a predetermined percentage certain costs related to the launch of SANCTURA twice-daily. Our rights pursuant to the PLIVA Agreement, in addition to the initial and milestone payments, are to: (i) receive commissions on sales of SANCTURA during the Copromotion Period and royalties on sales of SANCTURA during the License Period; (ii) receive a subsidy for our sales force for the first three years of the License Period; (iii) receive reimbursement for a predetermined percentage of promotional and advertising costs incurred; and (iv) convert the PLIVA Agreement from the copromotion structure to the license structure after six months from FDA approval of SANCTURA.

Multiple element arrangements are evaluated pursuant to EITF 00-21, Accounting Revenue Arrangements with Multiple Deliverables (EITF 00-21). Pursuant to EITF 00-21, in multiple element arrangements where we have continuing performance obligations, contract, milestone and license fees are recognized together with any up-front payments over the term of the arrangement as we complete our performance obligation, unless the delivered technology has stand alone value to the customer and there is objective, reliable evidence of fair value of the undelivered element in the arrangement. In the case of an arrangement where it is determined there is a single unit of accounting, all cash flows from the arrangement are considered in the determination of all revenue to be recognized.

Table of Contents

Additionally, pursuant to the guidance of Securities and Exchange Commission Staff Accounting Bulletin 104 (SAB 104), in service arrangements, provided all other revenue recognition criteria are met, service revenue should be recognized on a straight-line basis, unless evidence suggests that the revenue is earned or obligations are fulfilled in a different pattern, over the contractual term of the arrangement or the expected period during which the services will be performed.

Under the PLIVA Agreement, the initial and subsequent milestone payments, once earned, are recognized as contract and license fee revenue using the contingency-adjusted performance model. Under this model, when a milestone is earned, revenue is immediately recognized on a pro-rata basis in the period the Company achieves the milestone based on the time elapsed from inception of the agreement to the time the milestone is earned over the estimated duration of the PLIVA Agreement. Going forward, the remaining portion of the milestone payment is recognized on a straight-line basis over the remaining estimated duration of the PLIVA Agreement.

Also, the Company and PLIVA are contractually bound to share certain promotion and advertising costs relating to SANCTURA. For promotion and advertising costs incurred by the Company, reimbursements from PLIVA for PLIVA's share are reflected in contract and license fee revenue. For promotion and advertising costs incurred by PLIVA, reimbursements to PLIVA for the Company's share of promotion and advertising costs incurred by PLIVA reflected as a reduction of contract and license fee revenue.

Additionally, the Company is recognizing commission and royalty payments, including PLIVA's reimbursement to the Company of its royalty obligation to Madaus, as product revenue when earned and shipments to PLIVA of product and samples as product revenue upon shipment, as such activities are reimbursed on a transaction by transaction basis as incurred over the expected term of the Pliva Agreement. Similarly, the subsidy from PLIVA for the Company's sales force will be recognized as contract and license fee revenue ratably over the three year period of expected receipt during the license period of the arrangement.

The Company estimated the expected twelve year duration of the PLIVA Agreement by assessing several factors. In addition to the contractual duration of the PLIVA Agreement, the later of (i) the twelfth (12th) anniversary of the Launch Date of SANCTURA twice-daily or (ii) the expiration of the last to expire patent included in the Indevus Patent Rights covering SANCTURA once-daily, the Company considered: the absence of patent protection for SANCTURA twice-daily, the current reliance upon Waxman-Hatch market exclusivity, the potential for success of developing SANCTURA once-daily and obtaining patents for SANCTURA once-daily, and the strong competition in the OAB market.

PLIVA will be responsible for product inventory management and sales order fulfillment including billing and collection of customer receivables. The PLIVA Agreement is subject to termination by PLIVA under certain circumstances. Under the PLIVA Agreement, Indevus granted a security interest to PLIVA in Indevus' FDA marketing authorizations or approvals relating to SANCTURA and agreed to indemnify PLIVA under certain circumstances.

The Company recorded the \$150,000,000 received from PLIVA as deferred revenue and is amortizing the deferred revenue into contract and license fee revenue over the estimated twelve year duration of the PLIVA Agreement. In the three and nine month periods ended June 30, 2004, the Company recognized as contract and license fee revenue \$3,125,000 from amortization of the deferred revenue under the contingency adjusted method, and \$851,000 net reimbursement due to the Company comprised of \$1,163,000 of PLIVA's share of SANCTURA promotion and advertising costs incurred by Indevus less \$312,000 owed by the Company to PLIVA for Indevus' share of SANCTURA promotion and advertising costs incurred by PLIVA.

Citicoline:

Effective January 22, 2004, the Company entered into a new agreement with Ferrer International S.A. (Ferrer) covering the development, manufacture, and marketing of citicoline in the U.S. and Canada. Under the terms of the new agreement, the Company has granted Ferrer exclusive rights to its patents and know-how related to citicoline. In exchange, Ferrer agreed to assume all future development, manufacturing, and commercialization costs of citicoline. Indevus will receive 50% of all milestone payments made to Ferrer by a third party and royalties on net sales of the product.

Bucindolol:

In October 2003, CPEC LLC, a consolidated subsidiary, licensed its bucindolol development and marketing rights to ARCA Discovery, Inc. in exchange for potential future milestone and royalty payments.

Table of Contents

INDEVUS PHARMACEUTICALS, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (As restated) (Continued)

PRO 2000:

Pursuant to research grants supporting certain PRO 2000 development costs, the Company reflected \$6,000 and \$170,000 of contract and license fee revenue in the three and nine month periods ended June 30, 2004, respectively, and \$12,000 and \$71,000 of contract and license fee revenue in the three and nine month periods ended June 30, 2003, respectively.

G. Subsequent Event

On July 1, 2004, the Company announced that its board of directors has authorized the repurchase from time to time of up to 2,500,000 shares of its common stock in open market transactions. Through December 14, 2004, the Company has repurchased 1,166,000 shares at an average price of approximately \$6.28 per share.

H. Recent Accounting Pronouncements

In January 2003, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 46, Consolidation of Variable Interest Entities, (FIN 46). FIN 46 requires that if an entity has a controlling financial interest in a variable interest entity (VIE), the assets, liabilities and results of activities of the VIE should be included in the consolidated financial statements of the entity. FIN 46 requires that its provisions are effective immediately for all arrangements entered into after January 31, 2003. The Company does not have any financial interests in VIE s created after January 31, 2003. For those arrangements entered into prior to January 31, 2003, FIN 46 requires its provisions, as amended by FIN 46R which was issued by the FASB in December 2003, be adopted by the Company in the second quarter of fiscal 2004. The Company s adoption of FIN 46R in the second quarter of fiscal 2004 did not have a material impact on the Company s financial position or results of operations.

Emerging issues Task Force (EITF) 03-6, *Participating Securities and the Two-Class Method under FASB Statement No. 128, Earnings per Share* (EITF 03-6), was issued in March 2004. EITF 03-6 is intended to clarify what is a participating security and how to apply the two-class method of computing earnings per share once it is determined that a security is participating, including how to allocate undistributed earnings to such a security. EITF 03-6 is effective for reporting periods beginning after March 31, 2004. The adoption of this pronouncement did not have an impact on the Company s consolidated financial position, results of operations or cash flows due to the net loss reported. In the event the Company reports net income, the Company will allocate undistributed earnings and report earnings per share accordingly.

I. Withdrawal of Redux, Legal Proceedings, Insurance Claims, and Related Contingencies

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

In May 2001, the Company entered into the AHP Indemnity and Release Agreement with Wyeth pursuant to which Wyeth agreed to indemnify the Company against certain classes of product liability cases filed against the Company related to Redux (dexfenfluramine), a prescription anti-obesity compound withdrawn from the market in September 1997. This indemnification covers plaintiffs who initially opted out of Wyeth's national class action settlement of diet drug claims and claimants alleging primary pulmonary hypertension. In addition, Wyeth has agreed to fund all future legal costs related to the Company's defense of Redux-related product liability cases. Also, pursuant to the agreement, Wyeth has funded additional insurance coverage to supplement the Company's existing product liability insurance. The Company believes this total insurance coverage is sufficient to address its potential remaining Redux product liability exposure. However, there can be no assurance that uninsured or insufficiently insured Redux-related claims or Redux-related claims for which the Company is not otherwise indemnified or covered under the AHP Indemnity and Release Agreement will not have a material adverse effect on the Company's future business, results of operations or financial condition or that the potential of any such claims would not adversely affect the Company's ability to obtain sufficient financing to fund operations. Up to the date of the AHP Indemnity and Release Agreement, the Company's defense costs were paid by, or subject to reimbursement to the Company from, the Company's product liability insurers. To date, there have been no Redux-related product liability settlements or judgments paid by the Company or its insurers.

Table of Contents

INDEVUS PHARMACEUTICALS, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (As restated) (Continued)

As of June 30, 2004, the Company had an outstanding insurance claim of \$3,700,000, consisting of payments made by the Company to the group of law firms defending the Company in the Redux-related product liability litigation, for services rendered by such law firms through May 30, 2001. The full amount of the Company's current outstanding insurance claim is made pursuant to the Company's product liability policy issued to the Company by Reliance Insurance Company (Reliance). In October 2001, the Commonwealth Court of Pennsylvania granted an Order of Liquidation to the Insurance Commissioner of Pennsylvania to begin liquidation proceedings against Reliance. Based upon discussions with its attorneys and other consultants regarding the amount and timing of potential collection of its claims on Reliance, the Company previously recorded a reserve against its outstanding and estimated claim receivable from Reliance to reduce the balance to the estimated net realizable value of \$1,258,000 reflecting the Company's best estimate given the available facts and circumstances. The amount the Company collects could differ from the \$1,258,000 reflected as a noncurrent insurance claim receivable at June 30, 2004 and September 30, 2003. It is uncertain when, if ever, the Company will collect any of its \$3,700,000 of estimated claims. If the Company incurs additional product liability defense and other costs subject to claims on the Reliance product liability policy up to the \$5,000,000 limit of the policy, the Company will have to pay such costs without expectation of reimbursement and will incur charges to operations for all or a portion of such payments.

At June 30, 2004, we have an accrued liability of approximately \$700,000 for Redux-related expenses, including legal expenses. The amounts we ultimately pay could differ from this amount. To the extent amounts paid differ from the amounts accrued, we will record a charge or credit to the statement of operations.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Statements in this Form 10-Q that are not statements or descriptions of historical facts are forward-looking statements under Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995 and are subject to numerous risks and uncertainties. These and other forward-looking statements made by us in reports that we file with the SEC, press releases, and public statements of our officers, corporate spokespersons or our representatives are based on a number of assumptions and relate to, without limitation: our ability to successfully develop, obtain regulatory approval for and commercialize any products, including SANCTURA; our ability to enter into corporate collaborations or to obtain sufficient additional capital to fund operations; and the Redux-related litigation. The words believe, expect, anticipate, intend, plan, estimate or other expressions which predict or indicate future events and trends and do not relate to historical matters identify forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements as they involve risks and uncertainties and such forward-looking statements may turn out to be wrong. Actual results could differ materially from those currently anticipated due to a number of factors, including those set forth under Risk Factors in the Company's Post-Effective Amendment No. 4 to Registration Statement on Form S-3 as filed with the SEC on July 12, 2004. These factors include, but are not limited to: dependence on the success of SANCTURA; the early stage of products under development; uncertainties relating to clinical trials, regulatory approval and commercialization of our products, particularly SANCTURA; risks associated with contractual agreements, particularly for the manufacturing and co-promotion of SANCTURA; dependence on third parties for manufacturing and marketing; competition; need for additional funds and corporate partners, including for the development of our products; failure to acquire and develop additional product candidates; history of operating losses and expectation of future losses; product liability and insurance uncertainties; risks relating to the Redux-related litigation; limited patents and proprietary rights; dependence on market exclusivity; valuation of our Common Stock; risks related to repayment of debts; risks related to increased leverage; and other risks. The forward-looking statements represent our judgment and expectations as of the date of this Form 10-Q. We assume no obligation to update any such forward-looking statements.

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

The following discussion should be read in conjunction with the Company's unaudited consolidated financial statements and notes thereto appearing elsewhere in this report and audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2003. Unless the context indicates otherwise, Indevus, the Company, we or us refer to Indevus Pharmaceuticals, Inc.

Table of Contents

Description of the Company

Indevus is a biopharmaceutical company engaged in the development and commercialization of a diversified portfolio of product candidates, including SANCTURA (trospium chloride), approved by the FDA for the treatment of overactive bladder, and multiple other compounds in clinical development. We currently have rights to five compounds approved or in development: SANCTURA, pagoclonerone for panic and generalized anxiety disorders, IP 751 for pain and inflammatory disorders, PRO 2000 for the prevention of infection by HIV and other sexually transmitted pathogens, and aminocandin for treatment of systemic fungal infections.

Recent Product Developments

SANCTURA

On May 28, 2004, our New Drug Application (NDA) for SANCTURA was approved by the FDA for the treatment of overactive bladder.

Effective April 6, 2004, the Company entered into the Pliva Agreement for the U.S. commercialization of SANCTURA, a treatment for overactive bladder. The Company granted Pliva an exclusive right and license to co-promote and sell SANCTURA in the United States. The Pliva Agreement provides for payments to Indevus from Pliva, including \$150 million received during the quarter ended June 30, 2004, \$30 million upon signing and \$120 million upon FDA approval of SANCTURA twice daily. In addition, Indevus could receive up to \$45 million in future payments contingent upon the achievement of certain milestones related to the development of a once-a-day formulation of SANCTURA, as well as a payment of \$20 million related to the achievement of a long-term commercialization milestone in 2013. The \$150 million received from Pliva during the quarter ended June 30, 2004 is being amortized into contract and license fees on a straight-line basis in accordance with the contingency adjusted method over a currently-estimated 12 year duration of the Pliva Agreement. Cash received in excess of revenue recorded is classified as deferred revenue. New information in future periods that could affect the duration may result in an adjustment to the estimated duration.

Under the Pliva Agreement, Indevus will be responsible for funding the development of the once-a-day formulation of SANCTURA. The Company is responsible for the manufacture of SANCTURA and will sell it to Pliva at cost. Pliva will be responsible for product inventory management and sales order fulfillment including billing and collecting of customer receivables. The Pliva Agreement is subject to termination by Pliva under certain circumstances. Under the Pliva Agreement, Indevus granted a security interest to Pliva in Indevus' rights relating to FDA rights in SANCTURA and agreed to indemnify Pliva under certain circumstances.

For at least six months following the approval of SANCTURA, Indevus will receive a commission based on net sales of SANCTURA. During this period, Indevus will be responsible for funding its own sales force and certain advertising and promotional costs. Pliva and Indevus will co-promote SANCTURA through a joint sales force of approximately 500 sales representatives. Indevus will establish a sales force initially numbering approximately 280 representatives who will promote SANCTURA to urology specialists, obstetricians and gynecologists, and certain primary care physicians.

At any time beginning six months after the approval of SANCTURA, each company has the right to convert the Pliva Agreement into a royalty-bearing structure, whereby Indevus will receive royalties from Pliva based on net sales of SANCTURA, and Pliva will be responsible for promotional and advertising costs. Should this right be exercised, Indevus' specialty sales force will be subsidized by Pliva for a specified period,

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

and will continue to promote SANCTURA to urology specialists, obstetricians and gynecologists, and high prescribers.

Pursuant to the NDA, the SANCTURA finished product is being manufactured by our licensor, Madaus AG (Madaus), at their manufacturing facility in Germany. We expect to launch SANCTURA in August 2004.

Aminocandin

In June 2004, we announced that aminocandin, under development as a treatment for systemic fungal infections, was well tolerated among healthy volunteers in a Phase I clinical trial and demonstrated a prolonged duration of antifungal activity following single-dose therapy. The trial was designed to test the safety and tolerance of rising single doses of intravenously administered aminocandin among approximately 40 healthy volunteers.

Table of Contents

Secondary objectives included the pharmacokinetic assessment of aminocandin in plasma and urine and determination of serum fungicidal activity. Dose levels achieved during this trial were approximately seven-fold higher than the anticipated clinical dose and were all well tolerated. Of particular note was the absence of infusion-related histamine reactions, a recognized effect of other drugs in the echinocandin class, and the lack of a significant infusion-associated rise in plasma histamine levels, even at the highest doses and concentrations of administered drug. Furthermore, following single intravenous doses, significant fungicidal activity was observed in patients' serum samples for up to one week.

Citicoline

Effective January 22, 2004, we entered into a new agreement with Ferrer covering the development, manufacture, and marketing of citicoline in the U.S. and Canada. Under the terms of the new agreement, we have granted Ferrer exclusive rights to our patents and know-how related to citicoline. In exchange, Ferrer agreed to assume all future development, manufacturing, and commercialization costs of citicoline. Indevus will receive 50% of all milestone payments made to Ferrer by a third party and royalties on net sales of the product. This new agreement allows Indevus to retain significant participation in the future economics of citicoline, should the product be approved and marketed in the U.S. and Canada, without incurring any further costs.

Significant Judgments and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements that have been prepared in accordance with generally accepted accounting principles in the U.S. The preparation of these financial statements requires us to make certain estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expense during the reported periods. These items are regularly monitored and analyzed by management for changes in facts and circumstances, and material changes in these estimates could occur in the future. Changes in estimates are recorded in the period in which they become known. We base our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from our estimates if past experience or other assumptions do not turn out to be substantially accurate.

Expected Term of the PLIVA Agreement and Deferred Revenue

The initial \$30 million payment received from PLIVA and the \$120 million payment received from PLIVA upon receipt of FDA approval to market SANCTURA are significant and we are recording the initial and milestone payments received from PLIVA as deferred revenue and amortizing each of these components into revenue under the contingency adjusted method over the estimated duration of the PLIVA Agreement commencing on the date earned. We believe the estimated term of the PLIVA Agreement is a significant estimate which affects revenue recognized and the balance of deferred revenue on our balance sheet and we explain our estimate of the expected twelve year term of the PLIVA Agreement below.

The Pliva Agreement expires on the later of (i) the twelfth (12th) anniversary of the Launch Date of SANCTURA twice-daily or (ii) the expiration of the last to expire patent included in the Indevus Patent Rights covering SANCTURA once-daily. Securities and Exchange Commission Staff Accounting Bulletin No. 104 (SAB 104) specifies that unless evidence suggests otherwise, service revenues should be recognized over the contractual term of the arrangement or the expected period over which services are expected to be performed, if longer. We considered the following factors in evaluating the expected duration of the Pliva Agreement:

SANCTURA twice-daily does not have marketing protection afforded by patents and is currently being marketed pursuant to five years of market exclusivity provided by the Waxman-Hatch Act;

The potential of success in developing SANCTURA once-daily including the filing of an NDA and ultimate approval by the FDA to market SANCTURA Once-Daily;

The potential for successfully obtaining approval of patents covering SANCTURA once-daily and the protection such patents may afford;

If protection from patents was not obtained for SANCTURA once-daily, the potential benefit of any reliance on market exclusivity that may be provided by the Waxman-Hatch Act;

The strong competition in the overactive bladder market including from large pharmaceutical companies.

Table of Contents

After considering all of the above, we estimated the expected term of the PLIVA Agreement to be twelve years consistent with the negotiated minimum term of the arrangement of twelve years from launch of SANCTURA. In the event development of SANCTURA once-daily was terminated prior to approval for marketing by the FDA the expected term of the arrangement would likely be less than twelve years. In the event SANCTURA once-daily is approved for marketing by the FDA, achieves an acceptable measure of market success, and we are able to obtain and benefit from patent protection for SANCTURA once-daily, the term of the arrangement may extend beyond the estimated twelve years.

We amortized \$3,125,000 of deferred revenue into contract and license fee revenue in the three and nine months ended June 30, 2004 and the balance of deferred revenue at June 30, 2004 is \$146,875,000. We will reevaluate our estimate of the expected term of the PLIVA Agreement when new information is known that could affect this estimate. If we change our estimate of the duration of the PLIVA Agreement in the future and extend or reduce our estimate of its duration, we would decrease or increase, respectively, the amount of periodic revenue to be recognized from the amortization of remaining deferred revenue.

Insurance Claim Receivable

As of June 30, 2004, we had an outstanding insurance claim of approximately \$3,700,000, for services rendered through May 30, 2001 by the group of law firms defending us in the Redux-related product liability litigation. The full amount of our current outstanding insurance claim is made pursuant to our product liability policy issued to us by Reliance Insurance Company (Reliance), which is in liquidation proceedings. Based upon discussions with our attorneys and other consultants regarding the amount and timing of potential collection of our claim on Reliance, we previously recorded a reserve against our outstanding and estimated claim receivable from Reliance to reduce the balance to the estimated net realizable value of \$1,258,000 reflecting our best estimate given the available facts and circumstances. We believe our reserve of approximately \$2,400,000 against the insurance claim on Reliance as of June 30, 2004 is a significant estimate reflecting management's judgment. To the extent we do not collect the insurance claim receivable of \$1,258,000, we would be required to record additional charges. Alternatively, if we collect amounts in excess of the current receivable balance, we would record a credit for the additional funds received in the statement of operations.

Significant Accounting Policy

Product revenue consists of revenues from sales of products, royalties and commissions. Contract and license fee revenue consists of revenue stemming from contractual initial and milestone payments received from customers, including amortization of deferred revenue from contractual payments, reimbursements from PLIVA for their share of SANCTURA promotion and advertising costs incurred by the Company less an amount owed by the Company to PLIVA for the Company's share of SANCTURA promotion and advertising costs incurred by PLIVA, sales force subsidies from PLIVA, reimbursements from PLIVA for royalties owed by the Company to Madaus, and grants from agencies supporting research and development activities.

The Company records sales of product as product revenue upon the later of shipment or as title passes to its customer. In fiscal 2004, the Company commenced selling SANCTURA to PLIVA in bottles for resale and blister packs for distribution as samples (see Note F of Notes to unaudited consolidated financial statements).

Royalty revenue consists of payments received from licensees for a portion of sales proceeds from products that utilize the Company's licensed technologies and are generally reported to the Company in a royalty report on a specified periodic basis. Royalty revenue is recognized in the period in which the sales of the product or technology occurred on which the royalties are based unless the royalty report for such period is received subsequent to the time the Company is required to report its results on Form 10-Q or Form 10-K and the amount of the royalties earned is not estimable, in which case the Company recognizes such royalty revenue in the subsequent accounting period when it receives the royalty

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

report and when the amount of and basis for such royalty payments are reported to the Company in accurate and appropriate form and in accordance with the related license agreement.

The Company's business strategy includes entering into collaborative license and development or co-promotion agreements with strategic partners for the development and commercialization of the Company's products or product candidates. The terms of the agreements typically include non-refundable license fees, funding of research and development, payments based upon achievement of certain milestones and royalties on net product

Table of Contents

sales. Non-refundable license fees are recognized as revenue when the Company has a contractual right to receive such payment, the contract price is fixed or determinable, the collection of the resulting receivable is reasonably assured and the Company has no further performance obligations under the license agreement. In multiple element arrangements where the Company has continuing performance obligations, license fees are recognized together with any up-front payment over the term of the arrangement as the Company completes its performance obligations, unless the delivered technology has stand alone value to the customer and there is objective and reliable evidence of fair value of the undelivered elements in the arrangement. The Company records such revenue as contract and license fee revenue.

Revenues from milestone payments related to arrangements under which the Company has continuing performance obligations are recognized as revenue upon achievement of the milestone only if all of the following conditions are met: the milestone payments are non-refundable; achievement of the milestone was not reasonably assured at the inception of the arrangement; substantive effort is involved in achieving the milestone; and the amount of the milestone is reasonable in relation to the effort expended or the risk associated with achievement of the milestone. Determination as to whether a milestone meets the aforementioned conditions involves management's judgment. If any of these conditions are not met, the milestone payments are deferred and recognized as revenue over the term of the arrangement as the Company completes its performance obligations. Revenues from milestone payments related to arrangements under which the Company has no continuing performance obligations are recognized upon achievement of the related milestone. The Company records such revenue as contract and license fee revenue. Contractual subsidies of ongoing expenses are recorded as contract and license fee revenue.

Under the PLIVA Agreement, the initial and subsequent milestone payments, once earned, are recognized as contract and license fee revenue using the contingency-adjusted performance model. Under this model, when a milestone is earned, revenue is immediately recognized on a pro-rata basis in the period the Company achieves the milestone based on the time elapsed from inception of the agreement to the time the milestone is earned over the estimated duration of the PLIVA Agreement. Going forward, the remaining portion of the milestone payment is recognized on a straight-line basis over the remaining estimated duration of the PLIVA Agreement.

Multiple element arrangements are evaluated pursuant to EITF 00-21, Accounting Revenue Arrangements with Multiple Deliverables (EITF 00-21). Pursuant to EITF 00-21, in multiple element arrangements where we have continuing performance obligations, contract, milestone and license fees are recognized together with any up-front payments over the term of the arrangement as we complete our performance obligation, unless the delivered technology has stand alone value to the customer and there is objective, reliable evidence of fair value of the undelivered element in the arrangement. In the case of an arrangement where it is determined there is a single unit of accounting, all cash flows from the arrangement are considered in the determination of all revenue to be recognized. Additionally, pursuant to the guidance of Securities and Exchange Commission Staff Accounting Bulletin 104 (SAB 104), in service arrangements, provided all other revenue recognition criteria are met, service revenue should be recognized on a straight-line basis, unless evidence suggests that the revenue is earned or obligations are fulfilled in a different pattern, over the contractual term of the arrangement or the expected period during which the services will be performed. In particular relating to the PLIVA Agreement (see Note F of Notes to unaudited consolidated financial statements), the Company and PLIVA are contractually bound to share certain promotion and advertising costs relating to SANCTURA. For promotion and advertising costs incurred by the Company, reimbursements from PLIVA for PLIVA's share are reflected in contract and license fee revenue. For promotion and advertising costs incurred by PLIVA, reimbursements to PLIVA for the Company's share are reflected as a reduction of contract and license fee revenue.

Cash received in advance of revenue recognition is recorded as deferred revenue.

Other

The Company is filing this Amendment No. 1 to Form 10-Q on Form 10-Q/A to restate its consolidated financial statements for the third quarter of fiscal 2004. In the Form 10-Q filed for the quarter ended June 30, 2004, the Company disclosed that the SEC reviewed and provided comments on the Company's prospective accounting treatment for the Pliva Agreement. As a result of discussions with the SEC, the Company

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

changed its method of accounting for revenue to be recognized from the initial and subsequent milestones received from Pliva. The effect of the change in accounting method in the Company's statement of operations was to increase revenue by \$1,655,000 for the three and nine months ended June 30, 2004 and to reduce the Company's net loss by \$1,655,000 for the same periods. This adjustment had no effect on the net cash flows from operations for such periods.

Table of Contents

The Company's consolidated financial statements for the third quarter of fiscal 2004 contained in this Amendment No. 1 to Form 10-Q on Form 10-Q/A reflect the effect of the restatement. See Note A of Notes to unaudited consolidated financial statements.

This Amendment No. 1 restates in their entirety, Items 1 and 2 of Part I of the Company's Quarterly Report on Form 10-Q for the third quarter of fiscal 2004 to reflect the restatement described above, as well as Item 6 of Part II to comply with Rule 12b-15 promulgated under the Securities Exchange Act of 1934. Pursuant to Rule 12b-15 this Amendment No. 1 sets forth the complete text of each item which is being amended, as amended. Any Items of the initially filed 10-Q which are not being amended have been left out of this Amendment No. 1. Furthermore, pursuant Rule 12b-15 this Amendment No. 1 includes new certifications by each principal executive and principal financial officer of Indevus Pharmaceuticals, Inc.

Results of Operations

Our net loss increased \$4,913,000 to \$(16,963,000), or \$(0.36) per share, basic, in the third quarter of fiscal 2004 from \$(12,050,000), or \$(0.26) per share, basic, in the third quarter of fiscal 2003 and increased \$19,910,000 to \$(40,357,000), or \$(0.85) per share, in the nine month period ended June 30, 2004 from \$(20,447,000), or \$(0.44) per share, in the nine month period ended June 30, 2003. These increased net losses are primarily the result of our continuing development and pre-marketing activities related to SANCTURA.

Total revenues increased \$3,747,000, or 525%, to \$4,461,000 in the three month period ended June 30, 2004 from \$714,000 in the three month period ended June 30, 2003 and increased \$1,857,000, or 42%, to \$6,264,000 in the nine month period ended June 30, 2004 from \$4,407,000 in the nine month period ended June 30, 2003. Contract and license fees in the three and nine month periods ended June 30, 2004 relate almost entirely to the Pliva Agreement and include \$3,125,000 from amortization of the deferred revenue and \$851,000 net reimbursement due to the Company comprised of \$1,163,000 of Pliva's share of SANCTURA promotion and advertising costs incurred by Indevus, less \$312,000 owed by us to Pliva for Indevus' share of SANCTURA promotion and advertising costs incurred by Pliva. Included in contract and license fees in the nine month period ended June 30, 2003 is a \$777,000 initial payment received in from Lilly related to the renegotiated agreement with Lilly for Sarafem. Royalty revenue in the three and nine month periods ended June 30, 2004 and 2003 includes fixed net royalties received from Eli Lilly & Company (Lilly) for sales of Sarafem and the nine month period ended June 30, 2003 includes \$2,184,000 of accelerated sales milestones which were one-time payments and do not recur. In the next fiscal quarter, we expect to record commissions on net sales of SANCTURA pursuant to the launch of SANCTURA and revenue from the sale of SANCTURA to Pliva.

Royalty expense decreased \$59,000, or 38%, to \$98,000 in the three month period ended June 30, 2004 from \$157,000 in the three month period ended June 30, 2003 and decreased \$445,000, or 49%, to \$459,000 in the nine month period ended June 30, 2004 from \$904,000 for the nine month period ended June 30, 2003. Royalty expense in the three and nine month periods ended June 30, 2004 and 2003 consists primarily of amounts due or paid to Massachusetts Institute of Technology for their portion of the royalties and contractual payments received from Lilly and decreased in the fiscal 2004 three and nine month periods as a result of decreased revenue from Sarafem as described above. We expect to record cost of product revenues in the next fiscal quarter from sales of SANCTURA to Pliva.

Research and development expense decreased \$2,953,000, or 34%, to \$5,777,000 in the three month period ended June 30, 2004 from \$8,730,000 in the three month period ended June 30, 2003 and increased \$2,830,000, or 18%, to \$18,636,000 in the nine month period ended June 30, 2004 from \$15,806,000 in the nine month period ended June 30, 2003.

The decrease in research and development expense in the three month period is due primarily to decreased development costs related to SANCTURA and the absence of license and contractual fees paid in the fiscal 2003 three month period. SANCTURA development costs

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

decreased approximately \$3,100,000 due to absence of clinical costs and NDA preparation costs incurred in the fiscal 2003 three month period offset by once-a-day and other development costs that included a milestone payment to Shire, related to once-a-day development, of \$1,250,000 incurred in the fiscal 2004 three month period. Additionally, the fiscal 2003 three month period included an initial license fee of \$1,500,000 paid for aminocandin and a \$500,000 contractual payment to Paligent, Inc. related to PRO 2000. The fiscal 2004 three month period also included other increased development costs of approximately \$800,000 related primarily to dersalazine, aminocandin, and IP 751.

Table of Contents

The increase in research and development expense in the nine month period is due primarily to increased development costs related to SANCTURA and the absence of license and contractual fees paid in the fiscal 2003 nine month period. SANCTURA development costs increased approximately \$1,500,000 due to the QT study, once-a-day and other development costs offset by the absence of clinical costs and NDA preparation costs incurred in the fiscal 2003 nine month period and increased for milestone payments to Shire of \$1,750,000 incurred in the fiscal 2004 nine month period. Additionally, the fiscal 2003 nine month period included an initial license fee of \$1,500,000 paid for aminocandin and a \$500,000 contractual payment to Paligent, Inc. related to PRO 2000. The fiscal 2004 nine month period also included other increased development costs of approximately \$1,500,000 related primarily to IP 751, aminocandin, and of dersalazine. We expect to incur substantial costs related to SANCTURA as well as the continued development of our other products.

Marketing, general and administrative expense increased \$10,596,000, or 266%, to \$14,572,000 in the three month period ended June 30, 2004 from \$3,976,000 in the three month period ended June 30, 2003 and increased \$15,777,000, or 184%, to \$24,370,000 in the nine month period ended June 30, 2004 from \$8,593,000 in the nine month period ended June 30, 2003. The fiscal 2004 three month period included significant expenses related to the build-up of the sales force infrastructure in anticipation of the launch of SANCTURA. Sales and marketing expenses aggregated approximately \$11,000,000 in the fiscal 2004 three month period, an increase of approximately \$9,000,000 from the fiscal 2003 three month period. The Company expects to incur increased sales and marketing expenses through 2004. Additional increased expenses in the fiscal 2004 three month period over the fiscal 2003 three month period aggregated approximately \$1,600,000 and included increased costs of consultants, staffing and facilities.

The increase in marketing, general and administrative expense in the nine month period primarily relates to the sales and marketing and support functions as described above. Of the \$15,777,000 increase on a year to date basis, approximately 64% was incurred in the three month period ended June 30, 2004. Sales and marketing expenses aggregated approximately \$17,000,000 in the fiscal 2004 nine month period, an increase of approximately \$14,500,000 from the fiscal 2003 nine month period. Additional increased expenses in the fiscal 2004 nine month period over the fiscal 2003 nine month period aggregated approximately \$1,300,000 and primarily included increased costs of consultants, staffing and facilities. We expect to incur increased sales and marketing expense in the next several quarters due to full staffing of the sales force and the launch and promotion of SANCTURA.

Investment income increased \$216,000, or 218%, to \$315,000 in the three month period ended June 30, 2004 from \$99,000 in the three month period ended June 30, 2003 and increased \$268,000, or 60%, to \$717,000 in the nine month period ended June 30, 2004 from \$449,000 in the nine month period ended June 30, 2003. The increases are due to higher average invested balances, offset somewhat by lower interest rates. Market interest rates have substantially decreased from the fiscal 2003 periods; however, due to the receipt of \$150,000,000 in the three month period ended June 30, 2004 pursuant to the Pliva Agreement, average invested balances are substantially higher resulting in an increase in investment income.

Interest expense of \$1,293,000 and \$3,878,000 in the three and nine month periods ended June 30, 2004 results from our July 2003 issuance of \$72,000,000 of 6.25% Convertible Senior Notes due 2008 (the "Notes"). Annual interest expense is expected to be approximately \$5,200,000, which includes approximately \$700,000 of amortization of debt issuance costs.

We expect to report losses from our current consolidated operations for fiscal 2004 and we expect an increased quarterly loss in the next fiscal quarter due primarily to significantly increased sales and marketing expenses related to SANCTURA.

Liquidity and Capital Resources

Edgar Filing: INDEVUS PHARMACEUTICALS INC - Form 10-Q/A

Cash, Cash Equivalents and Marketable Securities

At June 30, 2004, we had consolidated cash, cash equivalents and marketable securities of \$192,567,000 compared to \$84,087,000 at September 30, 2003. This increase of \$108,480,000 was primarily the result of net cash provided by operating activities of \$107,128,000 which included the receipt in the three month period ended June 30, 2004 of \$150,000,000 pursuant to the Pliva Agreement.

Table of Contents

We are continuing to invest substantial amounts in the ongoing development and sales and marketing activities related to SANCTURA. We are investing in the production of inventories of SANCTURA commencing in July 2004 and will sell the final product to Pliva at cost. We believe the funds received from Pliva under the Pliva Agreement will be sufficient to meet our obligations for the commercialization of SANCTURA. We believe we have sufficient cash for currently planned expenditures for the next twelve months.

We may require additional funds or corporate collaborations for the development and commercialization of our other compounds in development, as well as any new businesses, products or technologies acquired or developed in the future. We have no commitments to obtain such funds. There can be no assurance that, if such funds are required, we will be able to obtain additional financing to satisfy future cash requirements on acceptable terms, or at all. If such additional funds are not obtained, we may be required to delay product development and business development activities.

Product Development

We expect to continue to expend substantial additional amounts for the development of our products. In particular, we are continuing to expend substantial funds for SANCTURA, including clinical trials to explore further certain attributes of SANCTURA and the development of extended release formulations and other development efforts. There can be no assurance that results of any ongoing or future pre-clinical or clinical trials will be successful, that additional trials will not be required, that any drug or product under development will receive FDA approval in a timely manner or at all, or that such drug or product could be successfully manufactured in accordance with current Good Manufacturing Practices (cGMP) or successfully marketed in a timely manner, or at all, or that we will have sufficient funds to develop or commercialize any of our products.

We have entered into an agreement with Madaus for the manufacture of SANCTURA. In order to manufacture SANCTURA for sale in the United States, Madaus' manufacturing facility must comply with cGMP requirements. Failure to meet or maintain compliance with cGMP requirements could cause a material disruption of, or cessation in, the commercialization of SANCTURA. We may seek a second source for SANCTURA if Madaus is unable to continue to meet all regulatory requirements or provide the necessary quantities of SANCTURA in a timely manner; this alternate source would require FDA approval which may or may not be obtained.

Total research and development expenses incurred by us through June 30, 2004 on the major compounds currently being developed, including allocation of corporate general and administrative expenses, are approximately as follows: \$68,700,000 for SANCTURA, \$18,900,000 for pagoclone, \$10,700,000 for PRO 2000, \$2,600,000 for aminocandin and \$2,700,000 for IP 751. In June 2002, we re-acquired rights to pagoclone from Pfizer Inc. During the period Pfizer had rights to pagoclone, Pfizer conducted and funded all development activities for pagoclone. Estimating costs and time to complete development of a compound is difficult due to the uncertainties of the development process and the requirements of the FDA which could necessitate additional and unexpected clinical trials or other development, testing and analysis. Results of any testing could result in a decision to alter or terminate development of a compound, in which case estimated future costs could change substantially. Certain compounds could benefit from subsidies, grants or government or agency-sponsored studies that could reduce our development costs. In the event we were to enter into a licensing or other collaborative agreement with a corporate partner involving sharing, funding or assumption by such corporate partner of development costs, the estimated development costs to be incurred by us could be substantially less than the estimates below. Additionally, research and development costs are extremely difficult to estimate for early-stage compounds due to the fact that there is generally less comprehensive data available for such compounds to determine the development activities that would be required prior to the filing of an NDA. Given these uncertainties and other risks, variables and considerations related to each compound and regulatory uncertainties in general, we estimate remaining research and development costs, excluding allocation of corporate general and administrative expenses, from June 30, 2004 through the preparation of an NDA for our major compounds currently being developed as follows: approximately \$15,000,000 for PRO 2000, approximately \$45,000,000 for IP 751, approximately \$30,000,000 for aminocandin, and approximately \$38,000,000 for pagoclone. We cannot reasonably estimate the date of completion for any compound that is not at least in Phase III clinical development due to the uncertainty of the number of required trials and size of such trials and the duration of development. We are unable to estimate the date of development completion for

Table of Contents

citicoline because Ferrer is now responsible for its development. We are unable to estimate the date of development completion for pagoclone due to the scope complexity and cost of the type of clinical trials necessary which may require the financial assistance of a partner to complete. Actual costs and time to complete any of our products may differ significantly from the estimates.

Analysis of Cash Flows

Cash provided by operating activities for the nine month period ended June 30, 2004 of \$107,128,000 consisted primarily of the \$150,000,000 received from Pliva pursuant to the Pliva Agreement, which was classified as deferred revenue, and the net loss of \$40,357,000. We paid \$2,238,000 of interest due on our convertible notes in January 2004 and made a similar payment in July 2004.

Net cash used in investing activities of \$8,148,000 is primarily due to net purchases of marketable securities. We expect to purchase marketable securities with a portion of the proceeds from the Pliva Agreement and use proceeds from maturities and sales of such securities to fund operations.

Net cash provided from financing activities of \$1,947,000 resulted from net proceeds from the issuance of common stock upon the exercise of stock options. We cannot predict if or when stock options will be exercised in the future.

Other asset, noncurrent of \$2,000,000 at June 30, 2004, represents an amount due to Madaus, and included in accrued expenses, pursuant to the Madaus Agreement as a result of receipt of the FDA approval to market SANCTURA. Pursuant to the Madaus Agreement, half of this amount will offset royalties due to Madaus on net sales of SANCTURA and one half will be amortized to cost of revenue over a period coincident with the expected term of the Pliva Agreement.

Commitments

In February 2004, we issued a purchase order to Madaus, pursuant to the supply agreement between our two companies, to purchase from Madaus manufactured SANCTURA tablets in bulk form to be used for the launch of the product. The current value of this purchase order is approximately \$7,800,000, based upon recent exchange rates. In March 2004, we paid \$2,000,000 to Madaus as a deposit on this order. We are committed to purchase from Madaus significant additional quantities of manufactured SANCTURA tablets in bulk form during the initial launch year. Pliva agreed to purchase from us commercial quantities of SANCTURA and to be responsible for commercial product procurement costs, including costs to manufacture SANCTURA.

We are currently negotiating an agreement to lease automobiles for our sales force. In addition, due to a substantial increase in employees, we are negotiating to lease additional office space.

Other

Recent Accounting Pronouncements

In January 2003, the FASB issued FIN 46. FIN 46 requires that if an entity has a controlling financial interest in a VIE, the assets, liabilities and results of activities of the VIE should be included in the consolidated financial statements of the entity. FIN 46 requires that its provisions are effective immediately for all arrangements entered into after January 31, 2003. We do not have any financial interests in VIEs created after January 31, 2003. For those arrangements entered into prior to January 31, 2003, FIN 46 requires its provisions, as amended by FIN 46R which was issued by the FASB in December 2003, be adopted by us in the second quarter of fiscal 2004. The adoption of FIN 46R did not have a material impact on our financial position or results of operations.

EITF 03-6 was issued in March 2004 and is intended to clarify what is a participating security and how to apply the two-class method of computing earnings per share once it is determined that a security is participating, including how to allocate undistributed earnings to such a security. EITF 03-6 is effective for reporting periods beginning after March 31, 2004. The adoption of this pronouncement did not have an impact on our consolidated financial position, results of operations or cash flows.

Table of Contents

Repurchase of Common Stock

On July 1, 2004, the Company announced that its board of directors has authorized the repurchase from time to time of up to 2,500,000 shares of its common stock in open market transactions. Through August 13, 2004, the Company has repurchased 1,166,000 shares at an average price of approximately \$6.24 per share.

PART II. OTHER INFORMATION

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

- 31.1 Certification of Principal Executive Officer required by Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 31.2 Certification of Principal Financial Officer required by Rule 13a-14(a) or Rule 15d-14(a) of the Securities Exchange Act of 1934, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
- 32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, by Glenn L. Cooper, Chief Executive Officer
- 32.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, by Michael W. Rogers, Chief Financial Officer

(b) Reports on Form 8-K

On April 19, 2004, the Company filed a current report on Form 8-K reporting that on April 7, 2004, the Company issued a press release announcing it entered into a License, Commercialization and Supply Agreement with Odyssey Pharmaceuticals Inc., the specialty branded subsidiary of PLIVA d.d. to commercialize SANCTURA (trospium chloride), then under review by the U.S. Food and Drug Administration as a treatment for overactive bladder.

On June 10, 2004, the Company filed a current report on Form 8-K reporting that (i) on May 28, 2004, the Company issued a press release announcing that the U.S. Food and Drug Administration approved SANCTURA and (ii) on June 2, 2004, the Company issued a press release announcing that it received a milestone payment of \$120 million from PLIVA d.d. for the approval of SANCTURA by the U.S. Food and Drug Administration.
