RELIABILITY INCORPORATED

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2005

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and with instructions to Form 10-QSB and Item 10 of Regulation S-B. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the interim period ended March 31, 2005 are not necessarily indicative of the results that may be expected for the year ending December 31, 2005.

The consolidated financial statements include the financial transactions and accounts of the Company and its wholly-owned subsidiary. All significant intercompany balances and transactions have been eliminated in consolidation. For further information, refer to the financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2004.

Accounting Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires that management make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Income Taxes

Deferred income taxes are provided under the liability method and reflect the net tax effects of temporary differences between the tax basis of assets and liabilities and their reported amounts in the consolidated financial statements. The Company establishes valuation allowances when the realization of specific deferred tax assets are subject to significant uncertainty. The Company recorded no tax benefits on its operating losses, as the losses will have to be carried forward and realization of any benefit is uncertain.

Table of Contents

RELIABILITY INCORPORATED

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2005

Inventories

Inventories are stated at the lower of standard cost (which approximates first-in, first-out) or market (replacement cost or net realizable value) and include (in thousands):

	March 31, 2005
Raw materials	\$ 114
Work-in-progress	75
Finished goods	318
	\$ 507

Inventories are presented net of reserves for excess and obsolete inventories of \$556,000.

Investments in Marketable Equity and Debt Securities

All investments are classified as held to maturity or available-for-sale securities under the provisions of Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities. Management determines the appropriate classification of its investments in equity and debt securities at the time of purchase and reevaluates such determinations at each balance sheet date.

Marketable equity securities are classified as available-for-sale and are carried at their fair value on the balance sheet, with unrealized gains and losses reported as a separate component of stockholders' equity. Marketable equity securities are stated at market value, as determined by the most recently published trade price of the securities at the balance sheet date.

The following table summarizes the Company's investment in securities (in thousands) at March 31, 2005:

Edgar Filing: RELIABILITY INC - Form 10QSB

Marketable equity securities, at cost	\$ 187
Unrealized net gains (losses) on marketable securities	(5)
	<u> </u>
Amount classified as current	\$ 182
	<u> </u>
Amount classified as long-term	\$ 182
	<u> </u>

Earnings per Share

Basic and diluted earnings per share are computed based on 6,335,965 shares outstanding, since the effect of including the impact of the assumed exercise of outstanding stock options is anti-dilutive.

Reclassifications

Certain reclassifications have been made in prior years financial statements to conform to classifications used in the current year.

Table of Contents

RELIABILITY INCORPORATED

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2005

2. LIQUIDITY

The Company's business is largely dependent on the capital equipment expenditures of integrated circuit manufacturers and the overall demand for products utilizing integrated circuits. Beginning in 2001 the entire semiconductor industry experienced a sharp downturn that resulted in a significant decrease in demand for the Company's products and services. As a result, revenues in the three-year period from 2002 through 2004 of \$9.3 million were less than 2001 revenues of \$12.1 million. Other factors contributing to this decline include overcapacity in the markets the Company serves, increased competition from foreign sources, reduced capital spending, significant reductions in burn-in times by some customers, a move away from conventional burn-in by a major customer, and the Company's inability to generate sales for its newer products and services.

During the period from 2002-2004, the Company made several workforce reductions and restructured its operations in order to reduce its fixed operating costs. Despite these cost reduction actions, the Company incurred operating losses of \$21.5 million, pre-tax losses of \$20.4 million and consumed approximately \$15.4 million of its cash reserves during this period. As a result of these continuing operating losses and decline in the Company's cash position, substantial doubt is raised about the Company's ability to continue as a going concern.

In order to generate funds for continued operations, the Company plans to sell its Houston headquarters building. As an interim step, to allow for an orderly sale of the building, the Company obtained bridge financing in December 2004 from an asset-based lender. The bridge financing facility will provide up to \$2.9 million of liquidity, has an initial term of eighteen months, and may be renewed for an additional twelve-month period, subject to certain terms and conditions. At March 31, 2005, the Company had borrowed \$1 million under this facility. Upon the sale of the Houston building, the Company must first repay the bridge loan, and any excess funds can be used to fund the Company's operations. The Company is also attempting to sell an idle manufacturing facility in North Carolina. All proceeds from the sale of this facility can be used to fund the Company's operations, since this facility is not pledged as collateral under the bridge financing facility. The Houston property has been on the market for over one year and the North Carolina property for in excess of five years. There can be no assurances that the Company can consummate a sale of either property in a timely manner or that the proceeds of any such sale(s) will be sufficient to fund any future operating deficits incurred by the Company. For further information, refer to the financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2004.

3. SEGMENT INFORMATION

The following table presents reportable segment information (in thousands) for the periods indicated:

	Three Months Ended March 31,	
	2005	2004
Revenues from external customers:		
Testing Products	\$ 103	\$ 130
Services	336	363
Power Sources	219	204
Intersegment revenues:		
Testing Products	5	32
Services		
Power Sources		
Eliminations	(5)	(32)
	<u>\$ 658</u>	<u>\$ 697</u>
Operating loss:		
Testing Products	\$ (638)	\$ (512)
Services	(94)	(221)
Power Sources	(129)	(58)
General corporate expenses	(209)	(303)
Operating loss	<u>\$ (1,070)</u>	<u>\$ (1,094)</u>

Total assets by reportable segment as of the dates indicated are as follows (in thousands):

	March 31, 2005
Testing Products	<u>\$ 3,017</u>

Edgar Filing: RELIABILITY INC - Form 10QSB

Services	939
Power Sources	392
General corporate assets	2,036
	<hr/>
	\$ 6,384
	<hr/>

For the periods indicated above, there were no material changes in the accounting policies and procedures used to determine segment income or loss. It should be noted, however, that due to the closure of the Automotive segment in January 2005, corporate allocations to the remaining operating segments increased. In the 2004 period, \$80,000 of corporate overhead was allocated to the Automotive segment.

4. COMPREHENSIVE LOSS

The only difference between the total comprehensive loss and the net loss reported on the Consolidated Statements of Operations arises from unrealized gains and losses on available-for-sale securities. The Company's total comprehensive loss (in thousands) for the periods indicated, is as follows:

	Three Months Ended March 31,	
	2004	2003
	<u> </u>	<u> </u>
Net loss	\$ (1,098)	\$ (1,259)
Unrealized net gains (losses) on marketable equity securities	(18)	1
	<u> </u>	<u> </u>
Total comprehensive loss	\$ (1,116)	\$ (1,258)
	<u> </u>	<u> </u>

5. OTHER INCOME

Other income includes rental income on idle real estate.

Table of Contents

RELIABILITY INCORPORATED

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2005

6. STOCK OPTION PLAN

The Company has a stock option plan that provides for the grant of options to employees and directors of the Company. The term and vesting of each option is determined by the Board of Directors. The Company accounts for stock options using the intrinsic value based method prescribed by APB 25. Had the Company elected to account for stock options using the fair value method described in SFAS No. 123, the Company's reported net loss would have increased to the amounts shown below (in thousands, except per share data):

	Three Months Ended March 31,	
	2005	2004
Reported net loss	\$ (1,098)	\$ (1,259)
Deduct: Total stock-based employee compensation expense determined under the fair value method for all awards	(30)	(46)
Pro forma net loss	<u>\$ (1,128)</u>	<u>\$ (1,305)</u>
Basic and Diluted loss per share, as reported:		
Continuing operations	\$ (.17)	\$ (.17)
Discontinued operations		(.03)
Net Loss	<u>\$ (.17)</u>	<u>\$ (.20)</u>
Pro forma Basic and Diluted loss per share, as if the fair value method had been applied to all awards:		
Continuing operations	\$ (.18)	\$ (.18)
Discontinued operations		(.03)
Net loss	<u>\$ (.18)</u>	<u>\$ (.21)</u>

The pro forma disclosures above are not necessarily indicative of the effects of applying SFAS 123 in future periods.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2005

7. DISCONTINUED OPERATIONS - AUTOMOTIVE DIVISION

Effective January 29, 2005, the Company terminated the Asset Purchase Agreement between the Company and Futura International, Inc. (Futura) for the purchase of the Ezy-Load product line. The Company elected to terminate the agreement due to continued disappointing sales of the product and the amount of capital required to sustain the sales and marketing efforts. As a result of the termination, the Company ceased manufacturing and marketing the Ezy-Load product, except that thirteen units on hand as of the termination date may be sold by the Company. With the exception of inventories, the Company reconveyed to Futura all assets previously acquired from Futura, consisting primarily of intellectual property rights. The Company is relieved of all payment liabilities to Futura, including \$225,000 of contingent purchase price payments scheduled for 2005 and future royalties.

Results of operations for the former Ezy-Load segment are reported as discontinued operations in the accompanying Statements of Operations for each period presented. Net sales and the loss from discontinued operations are as follows (in thousands):

	Three Months Ended March 31,	
	2005	2004
Product Sales	\$ 12	\$ 9
Loss from discontinued operations	\$ (21)	\$ (183)

Included in Other Current Assets at March 31, 2005 are the following items that are associated with the former Ezy-Load operations (in thousands):

Vehicles	\$ 25
Inventories	15
Accounts receivable	3
	<u>43</u>

It is anticipated that the assets listed in the table above will be liquidated in the second fiscal quarter of 2005.

MANAGEMENT'S DISCUSSION AND ANALYSIS OR
PLAN OF OPERATIONS

March 31, 2005

Item 2. Management's Discussion and Analysis or Plan of Operation

FORWARD-LOOKING STATEMENTS

This Management's Discussion and Analysis or Plan of Operation and other parts of this report contain forward-looking statements that involve risks and uncertainties, as well as current expectations and assumptions. From time to time, the Company may publish forward-looking statements, including those that are contained in this report, relating to such matters as anticipated financial performance, business prospects, technological developments, new products, research and development activities and similar matters. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements. In order to comply with the terms of the safe harbor, the Company notes that a variety of factors could cause the Company's actual results and experience to differ materially from the anticipated results or other expectations expressed in the Company's forward-looking statements. The risks and uncertainties that may affect the operations, performance, development and results of the Company's business include, but are not limited to, its ability to maintain sufficient working capital, adverse changes in the global economy, sudden decreases in the demand for electronic products and semiconductors, market acceptance of the Company's products and services, the impact of competition, delays in product development schedules, delays due to technical difficulties related to developing and implementing technology, delays in delivery schedules, the ability to attract and maintain sufficient levels of people with specific technical talents, future results related to investments and acquisitions and changes in demand for the Company's products and services and the Company's customers' products and services. The Company's actual results could differ materially from those anticipated in these forward-looking statements, including those set forth elsewhere in this report. The Company assumes no obligation to update any such forward-looking statements.

CRITICAL ACCOUNTING POLICIES AND COMMENTS RELATED TO OPERATIONS

The Company has defined a critical accounting policy as one that is both important to the portrayal of the Company's financial condition and results of operations and requires the management of the Company to make difficult, subjective or complex judgments. Estimates and assumptions about future events and their effects cannot be perceived with certainty. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments. These estimates may change as new events occur, as more experience is acquired, as additional information is obtained and as the Company's operating environment changes. There have been no material changes or developments in the Company's evaluation of the accounting estimates and the underlying assumptions or methodologies that it believes to be Critical Accounting Policies and Estimates as disclosed in its Form 10-K for the year ended December 31, 2004.

Table of Contents

RELIABILITY INCORPORATED
MANAGEMENT'S DISCUSSION AND ANALYSIS OR
PLAN OF OPERATIONS

March 31, 2005

Management's Discussion included in the Form 10-K for the year ended December 31, 2004 includes discussion of various factors related to the decline in the Company's revenues and items related to the Company's results of operations, liquidity and markets. There have been no significant changes in most of the factors discussed in the Form 10-K and many of the items discussed in the Form 10-K are relevant to 2005 operations; thus the reader of this report should read Management's Discussion included in Form 10-K for the year ended December 31, 2004.

LIQUIDITY AND CAPITAL RESOURCES

The Company's business is largely dependent on the capital equipment expenditures of integrated circuit manufacturers and the overall demand for products utilizing integrated circuits. Beginning in 2001 the entire semiconductor industry experienced a sharp downturn that resulted in a significant decrease in demand for the Company's products and services. As a result, revenues in the three-year period from 2002 through 2004 of \$9.3 million were less than 2001 revenues of \$12.1 million. Other factors contributing to this decline include overcapacity in the markets the Company serves, increased competition from foreign sources, reduced capital spending, significant reductions in burn-in times by some customers, a move away from conventional burn-in by a major customer, and the Company's inability to generate sales for its newer products and services.

During the period from 2002-2004, the Company made several workforce reductions and restructured its operations in order to reduce its fixed operating costs. Despite these cost reduction actions, the Company incurred operating losses of \$21.5 million, pre-tax losses of \$20.4 million and consumed approximately \$15.4 million of its cash reserves during this period. As a result of these continuing operating losses and decline in the Company's cash position, substantial doubt is raised about the Company's ability to continue as a going concern.

In order to generate funds for continued operations, the Company plans to sell its Houston headquarters building. As an interim step, to allow for an orderly sale of the building, the Company obtained bridge financing in December 2004 from an asset-based lender. The bridge financing facility will provide up to \$2.9 million of liquidity, has an initial term of eighteen months, and may be renewed for an additional twelve-month period, subject to certain terms and conditions. At March 31, 2005, the Company had borrowed \$1 million under this facility. Upon the sale of the Houston building, the Company must first repay the bridge loan, and any excess funds can be used to fund the Company's operations. The Company is also attempting to sell an idle manufacturing facility in North Carolina. All proceeds from the sale of this facility can be used to fund the Company's operations, since this facility is not pledged as collateral under the bridge financing facility. The Houston property has been on the market for over one year and the North Carolina property for in excess of five years. There can be no assurances that the Company can consummate a sale of either property in a timely manner or that the proceeds of any such sale(s), will be sufficient to fund any future operating deficits incurred by the Company.

Table of Contents

RELIABILITY INCORPORATED
MANAGEMENT'S DISCUSSION AND ANALYSIS OR
PLAN OF OPERATIONS

March 31, 2005

Net cash used by operating activities for the three months ended March 31, 2005 was \$705,000, compared to \$1,322,000 used by operations in the comparable quarter of 2004. The principal items comprising the difference were: a lower net loss of \$161,000; \$292,000 related to the timing of collections of accounts receivable and \$192,000 related to the timing of the payment of property taxes.

Net cash used by financing and investing activities was not material in either period.

RESULTS OF OPERATIONS

Three months ended March 31, 2005 compared to three months ended March 31, 2004.

Revenues

Revenues in the first quarter of 2005 were \$658,000, compared to \$697,000 in the comparable period of 2004. A revenue increase of 7% in the Power Sources segment was offset by decreases of 21% and 7% in the Equipment and Services segments, respectively.

Revenues in the Testing Products segment were \$103,000 in the first quarter of 2005, compared to \$130,000 in the 2004 period. The decrease is attributable to a \$63,000 decline in spare parts sales in the Asian market, partially offset by an increase in domestic parts and tooling sales.

Revenues in the Services segment were \$336,000, compared to \$364,000 in the prior year. A \$37,000 decrease in sales of burn-in boards in 2005 was partially offset by a \$9,000 increase in revenues from burn-in and test services.

Revenues in the Power Sources segment were \$219,000, compared to \$204,000 in the prior year. The increase is the result of a 41% increase in average selling prices, partially offset by a 26% decrease in units shipped. The increase in average selling prices is due to a change in product mix, as sales in 2005 included more higher output devices.

Gross Profit

The gross margin deficit decreased from \$(158,000) for the quarter ended March 31, 2004 to \$(40,000) in the quarter ended March 31, 2005. Gross margin by industry segment for the periods is presented below (in thousands):

	Three Months Ended March 31,	
	2005	2004
Testing Products	\$ (48)	\$ (91)
Services	(17)	(132)
Power Services	25	65
Total	\$ (40)	\$ (158)

Table of Contents

RELIABILITY INCORPORATED
MANAGEMENT'S DISCUSSION AND ANALYSIS OR
PLAN OF OPERATIONS

March 31, 2005

The margin improvement in the Testing Equipment segment resulted primarily from a \$58,000 reduction in engineering charges for the modification of developed products. In 2005, these engineering resources were devoted to research and development projects.

The improvement in the Services segment resulted from a \$51,000 decrease in depreciation, as many of the division's assets reached the end of their assigned depreciable life; a decrease in repairs and maintenance charges of \$50,000, resulting from charges incurred in the prior year for the repair of test equipment and costs associated with relocating equipment from leased space that was vacated, and a decrease in utilities costs of \$8,000, as the Division reduced the amount of leased space it occupied.

The decrease in gross margin in the Power Sources segment resulted primarily from an increase in scrap and standard cost variances of \$20,000 due to re-work costs associated with a job for which the Company received a sub-assembly that was not in accordance with specifications and a quantity discount allowed for the order; a \$6,000 increase in inbound freight; a \$5,000 increase in engineering charges for the modification of developed products; and a \$5,000 increase in charges for manufacturing supplies.

Marketing, General and Administrative

Marketing, general and administrative expenses decreased from \$786,000 in the quarter ended March 31, 2004 to \$740,000 in the 2005 period. This reduction is primarily due to attrition in one Corporate administrative position and the timing of expenses associated with production of shareholder reports.

Research and Development

Research and development costs were \$291,000 in the quarter ended March 31, 2005, compared to \$150,000 in the comparable period in 2004. As was previously discussed, \$58,000 of the increase relates to engineering activities in 2004 that were charged to cost of sales rather than research and development, as they related to enhancements to existing products. The remainder of the increase relates to charges incurred in 2005, primarily for materials, for further development of the Criteria-20 that is under evaluation by a potential customer.

Interest Expense

Edgar Filing: RELIABILITY INC - Form 10QSB

Interest expense consists of \$29,000 for borrowings under the Company's term loan agreement, along with \$12,000 of amortization charges for deferred loan costs.

Other Income

The increase in other income is due to an increase in rental charges for the idle North Carolina property.

March 31, 2005

Item 3. Controls and Procedures.

Within 90 days prior to the date of this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-5 under the Securities Exchange Act. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer had concluded that the Company's disclosure controls and procedures are effective.

There have been no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of the evaluation described in the preceding paragraph.
