Title: Chief Executive Officer and General Director

VIMPELCOM ANNOUNCES THIRD QUARTER AND NINE MONTHS 2008 FINANCIAL AND OPERATING RESULTS

Moscow and New York (November 25, 2008) - Open Joint Stock Company Vimpel-Communications (VimpelCom or the Company) (NYSE: VIP), the leading provider of telecommunications services in Russia and the Commonwealth of Independent States (CIS), today announced its financial and operating results for the quarter and nine months ended September 30, 2008.

3Q08 Financial and Operating Highlights

OIBDA reached \$1,388 million, an increase of 36.7% versus 3Q07.

OIBDA margin improved quarter-on-quarter to 48.8%, including 50.0% in Russia and 53.4% in Kazakhstan.

Net income totaled \$269 million, a reduction of 41.3% versus 3Q07, reflecting strong adverse currency impact.

Mobile subscribers increased by 7.1 million versus 3Q07, reaching 57.8 million.

Bonds in the amount of 10 billion Russian rubles were issued in July.

Commenting on today s announcement, Alexander Izosimov, Chief Executive Officer of VimpelCom, said, We are pleased to present another strong set of quarterly results. In the third quarter our business showed 45% annual revenue growth with an improved 49% OIBDA margin.

While our operations have not yet been affected by the financial turmoil, we clearly understand that the Company will not be immune to it going forward. Anticipating this, we have already taken steps to mitigate any potential adverse impact of deteriorating market conditions. We froze new orders for capital expenditures, cut non-essential expenses, implemented a hiring freeze and re-negotiated a number of contracts with vendors and suppliers. We are monitoring the situation very closely and are prepared to activate additional measures as events unfold.

We are confident that our robust business model and resilient cash flow, further enhanced by the protective measures that we have implemented, will ensure VimpelCom s ability to meet its obligations and to continue operations without significant disruptions.

^{*} Due to the increasing integration between different parts of our business, we include inter-company transactions in the reported revenues of geographic and business segments, and indicate the amount of inter-company eliminations within and between the segments.

Our third quarter revenues were \$2,843 million, up 45.3% year-on-year.

Our quarterly consolidated OIBDA amounted to \$1.4 billion. Our consolidated OIBDA margin improved to 48.8% compared to the previous quarter, reflecting our focus on cost efficiency and reversal of a \$43.1 million accrual in our stock price based compensation plans.

In July 2008, we successfully raised 10 billion Russian rubles in a 5-year bond offering. In October 2008, the Company signed a new unsecured loan agreement for up to EUR600 million with a consortium of international banks.

Our current debt obligations constitute approximately \$1.8 billion for 2009. The closing cash balance on September 30th was \$727 million.

The quarterly net income was negatively affected by currency exchange rate fluctuations resulted in a \$341 million net foreign exchange loss as 82% of our debt was denominated in US dollars.

Our revenue in Russia showed growth of 46.8%, including 23.2% organic growth in mobile revenues. We significantly increased the number of our active mobile subscribers, which now exceeds 45 million.

Fixed line revenues in Russia grew by 37.3% year-on-year on a pro-forma basis. In residential broadband we continued the active rollout of our fiber-to-the-building (FTTB) networks. By the end of the third quarter our FTTB network passed 5.9 million households. The total number of our broadband subscribers in Russia reached 673,000. For now we have scaled back new construction and have shifted our focus to maximizing sales within the existing FTTB networks.

The third quarter consolidated OIBDA margin in Russia was 50.0%, up from 47.3% reported in the previous quarter.

Starting from January 1, 2008 VimpelCom s subscriber market share is being reported solely on the basis of active subscribers, while previously it was based on registered subscribers. The drop in the reported market share in the third quarter of 2008 as compared to the third quarter of 2007 is caused by the change of reporting methodology.

Overall, during the third quarter we have seen revenue growth and an increase in the active subscriber base across all CIS markets in which we operate. Total revenues from the CIS markets amounted to \$440 million and already represent about 15% of our consolidated revenues, further diversifying our revenue sources.

In Kazakhstan, our largest market outside of Russia, the macroeconomic situation remains difficult but stable. In this market environment, we achieved 10.1% quarter-on-quarter growth in our active subscriber base and with usage and ARPU essentially flat, our mobile revenues increased by 7.3% over the same period. Annual revenue growth of 18.9% was supported by good OIBDA margin improvement to 53.4%.

In Ukraine, we executed a number of aggressive summer campaigns targeting high-quality customers. As a result, our ARPU grew quarter-on-quarter by 29.3%, reflecting increased share of high usage subscribers in our customer base. Consequently, our mobile revenue soared by 49.2% compared to the second quarter and by 84.3% compared to a year ago. However, this investment in high usage growth coupled with very high interconnect charges continue to depress our mobile OIBDA margins in Ukraine.

In Armenia, operations are robust, demonstrating strong quarter-on-quarter mobile revenue growth of 19.3% and a resilient 48.7% consolidated OIBDA margin.

In Uzbekistan, ongoing growth of the subscriber base led to more than 12.1% quarter-on-quarter and 83.8% annual mobile revenue growth. Although our Uzbek operations show the lowest price levels among all of our markets, OIBDA margin remains very strong at 56.5%.

All remaining markets continue to show good growth and consistent OIBDA margin improvements.

Definitions and tables are attached

Attachment A: Definitions

Mobile subscribers are those subscribers in the registered subscriber base who were a party to a revenue generating activity in the past three months and remain in the base at the end of the reported period. Such activities include all incoming and outgoing calls, subscriber fee accruals, debits related to service, outgoing SMS, MMS, data transmission and receipt sessions, but do not include incoming SMS and MMS sent by our Company or abandoned calls.

Each ADS represents 0.05 of one share of common stock. This ratio was established effective August 21, 2007.

ARPU (Monthly Average Revenue per User), a non-U.S. GAAP financial measure, is calculated by dividing the Company s service revenue during the relevant period, including roaming revenue and interconnect revenue, but excluding revenue from connection fees, sales of handsets and accessories and other non-service revenue, by the average number of the Company s subscribers during the period and dividing by the number of months in that period. The Company believes that ARPU provides useful information to investors because it is an indicator of the performance of the Company s business operations and assists management in budgeting. The Company also believes that ARPU provides management with useful information concerning usage and acceptance of the Company s services. ARPU should not be viewed in isolation or an alternative to other figures reported under U.S. GAAP.

Broadband subscribers are those subscribers in the registered subscriber base who were a party to a revenue generating activity in the past three months. Such activities include monthly internet access using FTTB, xDSL and WiFi technologies.

CIS Geographic Segment for the purpose of VimpelCom reporting includes our operations in the following countries: Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Armenia and Georgia.

Fixed-line subscriber is an authorized user of fixed-line communications services.

General and administrative costs (G&A) include salaries and outsourcing costs, including related social contributions required by Russian law; stock price-based compensation expenses; repair and maintenance expenses; rent, including lease payments for base station sites; utilities; other miscellaneous expenses, such as insurance, operating taxes, license fees, and accounting, audit and legal fees.

Households passed are households located within buildings, in which indoor installation of all the FTTB equipment necessary to install terminal residential equipment has been completed.

Market share of subscribers for each relevant area is calculated by dividing the estimated number of our subscribers in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Georgia and Armenia, respectively, by the total estimated number of subscribers in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Georgia and Armenia, respectively, and is provided by AC&M-Consulting.

Mobile services are wireless voice and data transmission services excluding WiFi.

MOU (Monthly Average Minutes of Use per User) is calculated by dividing the total number of minutes of usage for incoming and outgoing calls during the relevant period (excluding guest roamers) by the average number of subscribers during the period and dividing by the number of months in that period.

OIBDA is a non-U.S. GAAP financial measure. OIBDA, previously referred to as EBITDA by the Company, is defined as operating income before depreciation and amortization. The Company believes that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our business operations, including our ability to finance capital expenditures, acquisitions and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under U.S. GAAP, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculations are commonly used as bases for some investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the wireless telecommunications industry. OIBDA should not be considered in isolation as an alternative to net income, operating income or any other measure of performance under U.S. GAAP. OIBDA does not include our need to replace our capital equipment over time. Reconciliation of OIBDA to operating income, the most directly comparable U.S. GAAP financial measure, is presented below in the reconciliation tables section.

OIBDA margin is OIBDA expressed as a percentage of total net operating revenues. Reconciliation of OIBDA margin to operating income as a percentage of total net operating revenues, the most directly comparable U.S. GAAP financial measure, is presented below in the reconciliation tables section.

Prepaid subscribers are those subscribers who pay for their services in advance.

Sales and marketing costs (S&M) include marketing, advertising and dealer commissions expenses.

Take-up rate for the FTTB network is calculated by dividing the number of FTTB subscribers by the total number of households passed.
