UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

x **ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

.. **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2009

Commission File Number 0-25756

IBERIABANK Corporation

(Exact name of Registrant as specified in its charter)

Edgar Filing: IBERIABANK CORP - Form 10-K

Louisiana
(State of incorporation
or organization)

72-1280718
(I.R.S. Employer
Identification Number)

200 West Congress Street, Lafayette, Louisiana
(Address of principal executive office)

70501
(Zip Code)

Registrant's telephone number, including area code: (337) 521-4003

Securities registered pursuant to Section 12(g) of the Act: Not Applicable

Securities registered pursuant to Section 12(b) of the Act

Common Stock (par value \$1.00 per share)

(Title of Class)

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Exchange Act of 1934. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer or a non-accelerated filer (as defined in Securities Exchange Act Rule 12b-2).

Large Accelerated Filer

Accelerated Filer

Non-accelerated Filer

Smaller Reporting Company

Indicate by check mark whether the Registrant is a shell company, as defined in Rule 12b-2 of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: IBERIABANK CORP - Form 10-K

As of June 30, 2009, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the voting shares of common stock held by non-affiliates of the Registrant was approximately \$649.9 million. This figure is based on the closing sale price of \$43.91 per share of the Registrant's common stock on June 30, 2009. For purposes of this calculation, the term "affiliate" refers to all executive officers and directors of the Registrant and all shareholders beneficially owning more than 10% of the Registrant's common stock.

Number of shares of common stock outstanding as of March 12, 2010: 26,741,532

DOCUMENTS INCORPORATED BY REFERENCE

(1) Portions of the Annual Report to Shareholders for the fiscal year ended December 31, 2009 are incorporated into Part II, Items 5 through 9B of this Form 10-K; (2) portions of the definitive proxy statement for the 2010 Annual Meeting of Shareholders to be filed within 120 days of Registrant's fiscal year end (the "Proxy Statement") are incorporated into Part III, Items 10 through 14 of this Form 10-K.

PART 1.

Item 1. Business.

Unless we indicate otherwise, the words we, our, us, and Company refer to IBERIABANK Corporation and its wholly owned subsidiaries.

General

IBERIABANK Corporation, a Louisiana corporation, is a multi-bank financial holding company with 209 combined offices, including 136 bank branch offices in Louisiana, Arkansas, Florida, Alabama, Tennessee, and Texas, 26 title insurance offices in Arkansas and Louisiana, and mortgage representatives in 47 locations in 12 states. As of December 31, 2009, we had consolidated assets of \$9.7 billion, total deposits of \$7.6 billion and shareholders' equity of \$954.2 million.

Our principal executive office is located at 200 West Congress Street, Lafayette, Louisiana, and our telephone number at that office is (337) 521-4003. Our website is located at www.iberiabank.com.

We are the holding company for IBERIABANK, a Louisiana banking corporation headquartered in Lafayette, Louisiana; IBERIABANK *fsb*, a federal savings bank headquartered in Little Rock, Arkansas (formerly Pulaski Bank and Trust Company); Lenders Title Company, an Arkansas-chartered title insurance and closing services agency headquartered in Little Rock, Arkansas (Lenders Title); and IBERIA Capital Partners LLC, a corporate finance services firm in formation.

We offer traditional commercial bank products and services to our clients. These products and services include a broad array of commercial, consumer, mortgage, and private banking products and services, cash management, deposit and annuity products and investment brokerage services. Certain of our non-bank subsidiaries engage in financial services-related activities, including brokerage services, sales of variable annuities, life, health, dental and accident insurance products, and wealth management services.

Our segments reflect the manner in which financial information is currently evaluated. The Company strategically manages and reports the results of its business through four operating segment levels: IBERIABANK, IBERIABANK *fsb*, IBERIABANK Mortgage Company (IMC), and Lenders Title.

IBERIABANK and IBERIABANK *fsb* offer commercial and retail banking products and services to customers throughout locations in six states. IBERIABANK provides these products and services in Louisiana, Alabama, and Florida, while IBERIABANK *fsb* provides similar services in Arkansas, Tennessee, and Texas. IMC operates mortgage production offices that provide mortgage servicing and mortgage loan origination activities in twelve states. Lenders Title offers a full line of title insurance and closing services throughout Arkansas and Louisiana.

Subsidiaries

IBERIABANK has six active, wholly-owned non-bank subsidiaries, Iberia Financial Services, LLC; IBERIABANK Insurance Services, LLC; IBERIABANK Asset Management, Inc.; Acadiana Holdings, LLC, Iberia Investment Fund I, LLC, and Iberia Investment Fund II, LLC. Iberia Financial Services manages the brokerage services offered by IBERIABANK. At December 31, 2009, IBERIABANK's equity investment in Iberia Financial Services, LLC was \$2.6 million, and Iberia Financial Services, LLC had total assets of \$3.2 million. IBERIABANK Insurance Services, LLC is a licensed insurance agency and facilitates the receipt of insurance commissions from the sale of variable annuities, life, health, dental and accident insurance products. At December 31, 2009, IBERIABANK's equity investment in IBERIABANK Insurance Services, LLC was \$0.1 million, and IBERIABANK Insurance Services, LLC had total assets of \$0.2 million. Acadiana Holdings, LLC owns and operates a commercial office building that also serves as our headquarters and IBERIABANK's main office. At December 31, 2009, IBERIABANK's equity investment in Acadiana Holdings, LLC was \$9.9 million, and Acadiana Holdings, LLC had total assets of \$10.8 million. IBERIABANK Asset Management, Inc. (IAM) provides wealth management services to high net worth individuals, pension funds, corporations and trusts. At December 31, 2009, IBERIABANK's equity investment in IAM was \$0.7 million, and IAM had total assets of \$0.7 million. Iberia Investment Fund I, LLC and Iberia Investment Fund II, LLC are investment funds held for the purpose of funding new market tax credits and are disregarded entities for tax purposes. IBERIABANK's equity investment in Iberia Investment Fund I, LLC and Iberia

Table of Contents

Investment Fund II, LLC was \$40.6 million and \$3.0 million, respectively, at December 31, 2009. Iberia Investment Funds I, LLC and Iberia Investment Fund II, LLC has total assets of \$97.1 million and \$10.5 million, respectively, at December 31, 2009.

IBERIABANK *fsb* has two active, wholly-owned non-bank subsidiaries, IBERIABANK Mortgage Company (IMC , formerly Pulaski Mortgage Company) and P.F. Services, Inc. IMC offers one-to-four family residential mortgage loans in Louisiana, Arkansas, Tennessee, Mississippi, Oklahoma, Texas, Missouri, Illinois, Georgia, Florida, and Idaho. At December 31, 2009, IBERIABANK *fsb* 's equity investment in IMC was \$29.6 million, and IMC had total assets of \$89.2 million. P.F. Services, Inc. owns an office building which we plan to divest. IBERIABANK *fsb* 's equity investment in P.F. Services, Inc. was \$0.4 million, and P.F. Services, Inc. had total assets of \$0.4 million at December 31, 2009.

Lenders Title provides a full line of title insurance and loan closing services for both residential and commercial customers in locations throughout Arkansas. Lenders Title has three active, wholly-owned subsidiaries, Asset Exchange, Inc., United Title of Louisiana, Inc. (United Title), and American Abstract and Title Company, Inc (AAT). Asset Exchange, Inc. provides qualified intermediary services to facilitate Internal Revenue Code Section 1031 tax deferred exchanges. At December 31, 2009, Lenders Title 's equity investment in Asset Exchange, Inc. was less than \$0.3 million, and Asset Exchange, Inc. had total assets of \$0.3 million. United Title and AAT provide a full line of title insurance and loan closing services for both residential and commercial customers in locations throughout Louisiana. At December 31, 2009, Lenders Title 's equity investment in United Title was \$5.2 million, and United Title had total assets of \$6.5 million. Lenders Title 's equity investment in AAT was \$1.8 million and AAT had total assets of \$2.7 million.

Competition

We face strong competition in attracting deposits, originating loans, and providing title services. Our most direct competition for deposits has historically come from other commercial banks, savings institutions and credit unions located in our market areas, including many large financial institutions that have greater financial and marketing resources available to them. In addition, during times of high interest rates, we have faced significant competition for investors' funds from short-term money market securities, mutual funds and other corporate and government securities. Our ability to attract and retain customer deposits depends on our ability to generally provide a rate of return, liquidity and risk comparable to that offered by competing investment opportunities.

We experience strong competition for loan originations principally from other commercial banks, savings institutions and mortgage banking companies. We compete for loans principally through the interest rates and loan fees we charge, the efficiency and quality of services we provide borrowers and the convenient locations of our branch office network.

Employees

We had 1,579 full-time employees and 106 part-time employees as of December 31, 2009. None of these employees is represented by a collective bargaining agreement. We believe we enjoy an excellent relationship with our personnel.

Business Combinations

We continually evaluate business combination opportunities and sometimes conduct due diligence activities in connection with them. As a result, business combination discussions and, in some cases, negotiations take place, and transactions involving cash, debt or equity securities can be expected. Any future business combinations or series of business combinations that we might undertake may be material in terms of assets acquired or liabilities assumed.

TARP Preferred Stock Redemption and Warrant Repurchase

The Emergency Economic Stabilization Act of 2008 (the EESA) authorized the U.S. Treasury Department (the Treasury Department) to take actions to restore stability and liquidity to the financial system in the U.S. The EESA established the Troubled Asset Relief Program (the TARP) and the Treasury Department established the Capital Purchase Program (the CPP) under TARP. Pursuant to the CPP, qualified financial institutions may issue and sell senior preferred stock and warrants to purchase common stock to the Treasury Department, the proceeds of which will qualify as Tier 1 regulatory capital in an amount of between 1% and 3% of risk-weighted assets.

We were approved to participate in the CPP in an amount up to \$115 million, or approximately 3% of our total risk-weighted assets, which our board of directors subsequently decided to reduce to \$90 million. On December 5, 2008, for an aggregate purchase price of \$90 million under then current Treasury Department guidelines we:

Edgar Filing: IBERIABANK CORP - Form 10-K

Issued and sold 90,000 shares of our preferred stock to the Treasury Department under the terms and conditions of the CPP; and

Issued and sold a warrant to the Treasury Department to purchase 276,980 shares of our common stock equal, in the aggregate, to 15% of the Treasury Department's investment amount in our preferred stock, or approximately \$13.5 million. The exercise price for the warrant was \$48.74 per share of common stock and was based on an average market price of our common stock.

The preferred stock was non-voting and qualified as Tier 1 capital and paid cumulative dividends at a rate of 5% per annum for the first five years, and 9% thereafter. The dividends ranked senior to any junior preferred stock and our common stock. The warrant was exercisable in full immediately.

On March 31, 2009, we announced the redemption of all shares of preferred stock sold to the Treasury Department for a purchase price of \$90 million. In connection with the redemption, we incurred a charge of approximately \$2.2 million in the first quarter in the form of an accelerated deemed dividend to account for the difference between the amount at which the preferred stock sale was initially recorded and its redemption price. The accelerated dividend was combined with the previously scheduled cash dividend, resulting in a total deemed dividend of \$3.4 million during the quarter ended March 31, 2009.

On May 20, 2009, we announced that we had repurchased the warrant for \$1.2 million. The repurchase had no impact on our results of operations. Payment of the repurchase price resulted in reduction of our cash and an offsetting reduction of paid-in capital.

Available Information

Our filings with the Securities and Exchange Commission (SEC), including annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments thereto, are available on our website as soon as reasonably practicable after the reports are filed with or furnished to the SEC. Copies can be

Lafayette, Louisiana 70505-2747

Supervision and Regulation

General

The banking industry is extensively regulated under both federal and applicable state laws. The following discussion is a summary of certain statutes and regulations applicable to bank and financial holding companies and their subsidiaries and provides specific information relevant to us. Regulation of financial institutions is intended primarily for the protection of depositors, deposit insurance funds and the banking system, and generally is not intended for the protection of shareholders.

Proposals are frequently introduced to change federal and state laws and regulations applicable to us. The likelihood and timing of any such changes and the impact such changes might have on us are impossible to determine with any certainty.

We are a bank holding company and are qualified as a financial holding company with the Board of Governors of the Federal Reserve System (the FRB). We are subject to examination and supervision by the FRB pursuant to the Bank Holding Company Act of 1956, as amended (the BHCA), and are required to file reports and other information regarding our business operations and the business operations of our subsidiaries with the FRB.

Because we are a public company, we are also subject to regulation by the Securities and Exchange Commission (the SEC). The SEC has established three categories of issuers for the purpose of filing periodic and annual reports. Under these regulations, we are considered to be an accelerated filer and, as such, must comply with SEC accelerated reporting requirements.

As a Louisiana-chartered commercial bank and a member of the Federal Reserve System, IBERIABANK is subject to regulation, supervision and examination by the Office of Financial Institutions of the State of Louisiana, IBERIABANK's chartering authority, and the FRB, IBERIABANK's primary federal regulator. As a federal savings association, IBERIABANK *fsb* is subject to regulation, supervision and examination by the Office of Thrift Supervision (the OTS). IBERIABANK and IBERIABANK *fsb* are collectively referred to herein as the Banks. Each of the Banks is also subject to regulation, supervision and examination by the Federal Deposit Insurance Corporation (the FDIC). The FDIC insures the deposits of the Banks to the maximum extent permitted by law.

State and federal law govern the activities in which the Banks may engage, the investments they may make and the aggregate amount of loans that may be granted to one borrower. Various consumer and compliance laws and regulations also affect the Banks' operations.

The banking industry is affected by the monetary and fiscal policies of the FRB. An important function of the FRB is to regulate the national supply of bank credit to moderate recessions and to curb inflation. Among the instruments of monetary policy used by the FRB to implement its objectives are: open-market operations in U.S. Government securities, changes in the discount rate and the federal funds rate (which is the rate banks charge each other for overnight borrowings) and changes in reserve requirements on bank deposits.

In addition to federal and state banking laws and regulations, we and certain of our subsidiaries and affiliates, including those that engage in securities brokerage and insurance activities, are subject to other federal and state laws and regulations, and supervision and examination by other state and federal regulatory agencies, including the Financial Industry Regulatory Authority (FINRA), the U.S. Department of Housing and Urban Development (HUD), and various state insurance and securities regulators.

Table of Contents

Holding Company Structure

We have one Louisiana-chartered commercial bank subsidiary, one federal savings association subsidiary, one title insurance company subsidiary, and numerous other non-bank subsidiaries of these first tier subsidiaries. We are also forming, subject to FINRA approval, a new first tier subsidiary to provide equity research, institutional sales and trading, and corporate financial services. Exhibit 21 of this report lists all of our subsidiaries.

The Banks are subject to affiliate transaction restrictions under federal laws, which limit the transfer of funds by a subsidiary bank or its subsidiaries to its parent corporation or any non-bank subsidiary of its parent corporation, whether in the form of loans, extensions of credit, investments, or asset purchases. Such transfers by a subsidiary bank are limited to:

10% of the subsidiary bank's capital and surplus for transfers to its parent corporation or to any individual non-bank subsidiary of the parent, and

An aggregate of 20% of the subsidiary bank's capital and surplus for transfers to such parent together with all such non-bank subsidiaries of the parent.

Furthermore, such loans and extensions of credit must be secured within specified amounts. In addition, all affiliate transactions must be conducted on terms and under circumstances that are substantially the same as such transactions with unaffiliated entities. Such extensions of credit must be made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third parties and must not involve more than the normal risk of repayment or present other unfavorable features.

As a matter of policy, the FRB expects a bank holding company to act as a source of financial and managerial strength to each of its subsidiary banks and to commit resources to support each such subsidiary bank. Under this source of strength doctrine, the FRB may require a bank holding company to make capital injections into a troubled subsidiary bank. They may charge the bank holding company with engaging in unsafe and unsound practices if it fails to commit resources to such a subsidiary bank or if it undertakes actions that the FRB believes might jeopardize its ability to commit resources to such subsidiary bank. A capital injection may be required at times when the holding company does not have the resources to provide it.

Any loans by a holding company to a subsidiary bank are subordinate in right of payment to deposits and to certain other indebtedness of such subsidiary bank. In the event of a bank holding company's bankruptcy, the bankruptcy trustee will assume any commitment by the holding company to a federal bank regulatory agency to maintain the capital of a subsidiary bank. Moreover, the bankruptcy law provides that claims based on any such commitment will be entitled to a priority of payment over the claims of the institution's general unsecured creditors, including the holders of its note obligations.

Louisiana law permits the Louisiana commissioner to require a special assessment of shareholders of a Louisiana-chartered bank whose capital has become impaired to remedy an impairment in such bank's capital stock. This statute also provides that the commissioner may suspend the bank's certificate of authority until the capital is restored. As the sole shareholder of IBERIABANK, we are subject to such statute.

Moreover, the claims of a receiver of an insured depository institution for administrative expenses and the claims of holders of deposit liabilities of such an institution are accorded priority over the claims of general unsecured creditors of such an institution, including the holders of the institution's note obligations, in the event of liquidation or other resolution of such institution. Claims of a receiver for administrative expenses and claims of holders of deposit liabilities of the Banks, including the FDIC as the insurer of such holders, would receive priority over the holders of notes and other senior debt of the Banks in the event of liquidation or other resolution and over our interests as sole shareholder of the Banks.

The FRB maintains a bank holding company rating system that emphasizes risk management, introduces a framework for analyzing and rating financial factors, and provides a framework for assessing and rating the potential impact of non-depository entities of a holding company on its subsidiary depository institution(s).

A composite rating is assigned based on the foregoing three components, but a fourth component is also rated, reflecting generally the assessment of depository institution subsidiaries by their principal regulators. Ratings are made on a scale of 1 to 5 (1 highest) and are not made public. The composite ratings assigned to us, like those assigned to other financial institutions, are confidential and may not be directly disclosed, except to the extent required by law.

Table of Contents

Acquisitions. The Company complies with numerous laws relating to its acquisition activity. Under the BHCA, a bank holding company may not directly or indirectly acquire ownership or control of more than 5% of the voting shares or substantially all of the assets of any bank holding company or bank or merge or consolidate with another bank holding company without the prior approval of the FRB. Current Federal law authorizes interstate acquisitions of banks and bank holding companies without geographic limitation. Furthermore, a bank headquartered in one state is authorized to merge with a bank headquartered in another state, as long as neither of the states have opted out of such interstate merger authority prior to such date, and subject to any state requirement that the target bank shall have been in existence and operating for a minimum period of time, not to exceed five years; and subject to certain deposit market-share limitations. After a bank has established branches in a state through an interstate merger transaction, the bank may establish and acquire additional branches at any location in the state where a bank headquartered in that state could have established or acquired branches under applicable federal or state law.

In 2009, IBERIABANK consummated three FDIC-assisted transactions. On August 21, 2009, IBERIABANK acquired certain assets of CapitalSouth Bank, including a substantial majority of its loan portfolio, and assumed certain liabilities of CapitalSouth Bank from the FDIC, as receiver. On November 13, 2009, IBERIABANK acquired certain assets and assumed certain liabilities of each of Orion Bank and Century Bank, FSB from the FDIC, as receiver. In connection with these FDIC-assisted transactions, IBERIABANK entered into purchase and assumption, loss-sharing and other agreements which contain certain regulatory covenants and limitations. We currently expect to enter additional FDIC-assisted transactions.

Safety and Soundness Regulations. The FRB has enforcement powers over bank holding companies and their non-banking subsidiaries. The FRB has authority to prohibit activities that represent unsafe or unsound practices or constitute violations of law, rule, regulation, administrative order or written agreement with a federal regulator. These powers may be exercised through the issuance of cease and desist orders, civil money penalties or other actions.

There also are a number of obligations and restrictions imposed on bank holding companies and their depository institution subsidiaries by federal law and regulatory policy that are designed to reduce potential loss exposure to the depositors of such depository institutions and to the FDIC insurance funds in the event the depository institution is insolvent or is in danger of becoming insolvent. For example, under requirements of the FRB with respect to bank holding company operations, a bank holding company is required to serve as a source of financial strength to its subsidiary depository institutions and to commit financial resources to support such institutions in circumstances where it might not do so otherwise. In addition, the cross-guarantee provisions of federal law require insured depository institutions under common control to reimburse the FDIC for any loss suffered or reasonably anticipated by the Deposit Insurance Fund (DIF) as a result of the insolvency of commonly controlled insured depository institutions or for any assistance provided by the FDIC to commonly controlled insured depository institutions in danger of failure. The FDIC may decline to enforce the cross-guarantee provision if it determines that a waiver is in the best interests of the DIF. The FDIC's claim for reimbursement under the cross guarantee provisions is superior to claims of shareholders of the insured depository institution or its holding company, but is subordinate to claims of depositors, secured creditors and nonaffiliated holders of subordinated debt of the commonly controlled insured depository institution.

Banking regulators also have broad enforcement powers over the Banks, including the power to impose fines and other civil and criminal penalties, and to appoint a conservator in order to conserve the assets of any such institution for the benefit of depositors and other creditors.

Dividends. We are a legal entity separate and distinct from our subsidiaries. The majority of our revenue is from dividends paid us by the Banks. The Banks are subject to laws and regulations that limit the amount of dividends they can pay. In addition, we and the Banks are subject to various regulatory restrictions relating to the payment of dividends, including requirements to maintain capital at or above regulatory minimums, and to remain well-capitalized under the prompt corrective action rules. The FRB has indicated generally that it may be an unsafe or unsound practice for a bank holding company to pay dividends unless the bank holding company's net income over the preceding year is sufficient to fund the dividends and the expected rate of earnings retention is consistent with the organization's capital needs, asset quality and overall financial condition.

In addition to the limitations placed on the payment of dividends at the holding company level, there are various legal and regulatory limits on the extent to which the Banks may pay dividends or otherwise supply funds to us. The Banks are subject to laws and regulations of Louisiana and the OTS, as applicable, which place certain restrictions on the payment of dividends. Additionally, as a member of the Federal Reserve System, IBERIABANK is subject to regulations of the FRB.

Table of Contents

We do not expect that these laws, regulations or policies will materially affect the ability of the Banks to pay dividends. Additional information is provided in Note 22 to the Consolidated Financial Statements incorporated herein by reference.

FDIC Insurance. The deposits of the Banks are insured by the DIF of the FDIC up to the limits set forth under applicable law and are subject to the deposit insurance premium assessments of the DIF. The FDIC imposes a risk-based deposit premium assessment system, which was amended pursuant to the Federal Deposit Insurance Reform Act of 2005 (the Reform Act). Under this system, as amended, the assessment rates for an insured depository institution vary according to the level of risk incurred in its activities. To arrive at an assessment rate for a banking institution, the FDIC places it in one of four risk categories determined by reference to its capital levels and supervisory ratings. In addition, in the case of those institutions in the lowest risk category, the FDIC further determines its assessment rate based on certain specified financial ratios or, if applicable, its long-term debt ratings. The assessment rate schedule can change from time to time, at the discretion of the FDIC, subject to certain limits. On November 12, 2009, the FDIC adopted a rule requiring banks to prepay three years worth of premiums to replenish the depleted insurance fund. The FDIC has published guidelines under the Reform Act on the adjustment of assessment rates for certain institutions. Under the current system, premiums are assessed quarterly. In addition, insured depositors have been required to pay a pro rata portion of the interest due on the obligations issued by the Financing Corporation to fund the closing and disposal of failed thrift institutions by the Resolution Trust Corporation.

Table of Contents

Capital Requirements The Federal Reserve has issued risk-based capital ratio and leverage ratio guidelines for bank holding companies. The risk-based capital ratio guidelines establish a systematic analytical framework that:

makes regulatory capital requirements sensitive to differences in risk profiles among banking organizations,

takes off-balance sheet exposures into explicit account in assessing capital adequacy, and

minimizes disincentives to holding liquid, low-risk assets.

Under the guidelines and related policies, bank holding companies must maintain capital sufficient to meet both a risk-based asset ratio test and a leverage ratio test on a consolidated basis. The risk-based ratio is determined by allocating assets and specified off-balance sheet commitments into four weighted categories, with higher weighting assigned to categories perceived as representing greater risk. The risk-based ratio represents capital divided by total risk weighted assets. The leverage ratio is core capital divided by total assets adjusted as specified in the guidelines. The Banks are subject to substantially similar capital requirements.

Generally, under the applicable guidelines, a financial institution's capital is divided into two tiers. Institutions that must incorporate market risk exposure into their risk-based capital requirements may also have a third tier of capital in the form of restricted short-term subordinated debt. These tiers are:

Tier 1, or core capital, includes total equity plus qualifying capital securities and minority interests, excluding unrealized gains and losses accumulated in other comprehensive income, and non-qualifying intangible and servicing assets.

Tier 2, or supplementary capital, includes, among other things, cumulative and limited-life preferred stock, mandatory convertible securities, qualifying subordinated debt, and the allowance for credit losses, up to 1.25% of risk-weighted assets.

Total capital is Tier 1 plus Tier 2 capital.

The Federal Reserve and the other federal banking regulators require that all intangible assets (net of deferred tax), except originated or purchased mortgage-servicing rights, non-mortgage servicing assets, and purchased credit card relationships, be deducted from Tier 1 capital. However, the total amount of these items included in capital cannot exceed 100% of its Tier 1 capital.

Under the risk-based guidelines, financial institutions are required to maintain a risk-based ratio of 8%, with 4% being Tier 1 capital. The appropriate regulatory authority may set higher capital requirements when they believe an institution's circumstances warrant.

Under the leverage guidelines, financial institutions are required to maintain a leverage ratio of at least 3%. The minimum ratio is applicable only to financial institutions that meet certain specified criteria, including excellent asset quality, high liquidity, low interest rate risk exposure, and the highest regulatory rating. Financial institutions not meeting these criteria are required to maintain a minimum Tier 1 leverage ratio of 4%.

Special minimum capital requirements apply to equity investments in non-financial companies. The requirements consist of a series of deductions from Tier 1 capital that increase within a range from 8% to 25% of the adjusted carrying value of the investment.

Failure to meet applicable capital guidelines could subject the financial institution to a variety of enforcement remedies available to the federal regulatory authorities. These include limitations on the ability to pay dividends, the issuance by the regulatory authority of a capital directive to increase capital, and the termination of deposit insurance by the FDIC. In addition, the financial institution could be subject to the measures described below under Prompt Corrective Action as applicable to under-capitalized institutions.

Edgar Filing: IBERIABANK CORP - Form 10-K

The risk-based capital standards of the Federal Reserve, the OTS, and the FDIC specify that evaluations by the banking agencies of a bank's capital adequacy will include an assessment of the exposure to declines in the economic value of the bank's capital due to changes in interest rates. These banking agencies issued a joint policy statement on interest rate risk describing prudent methods for monitoring such risk that rely principally on internal measures of exposure and active oversight of risk management activities by senior management.

Table of Contents

Prompt Corrective Action The Federal Deposit Insurance Corporation Improvement Act of 1991, known as FIDICIA, requires federal banking regulatory authorities to take prompt corrective action with respect to depository institutions that do not meet minimum capital requirements. For these purposes, FIDICIA establishes five capital tiers: well-capitalized, adequately-capitalized, under-capitalized, significantly under-capitalized and critically under-capitalized.

An institution is deemed to be:

well-capitalized if it has a total risk-based capital ratio of 10% or greater, a Tier 1 risk-based capital ratio of 6% or greater, and a Tier 1 leverage ratio of 5% or greater and is not subject to a regulatory order, agreement, or directive to meet and maintain a specific capital level for any capital measure;

adequately-capitalized if it has a total risk-based capital ratio of 8% or greater, a Tier 1 risk-based capital ratio of 4% or greater, and, generally, a Tier 1 leverage ratio of 4% or greater and the institution does not meet the definition of a well-capitalized institution;

under-capitalized if it does not meet one or more of the adequately-capitalized tests;

significantly under-capitalized if it has a total risk-based capital ratio that is less than 6%, a Tier 1 risk-based capital ratio that is less than 3%, or a Tier 1 leverage ratio that is less than 3%; and

critically under-capitalized if it has a ratio of tangible equity, as defined in the regulations, to total assets that is equal to or less than 2%.

Throughout 2009, our regulatory capital ratios and those of the Banks were in excess of the levels established for well-capitalized institutions.

(in thousands of dollars)		Well-Capitalized Minimums	At December 31, 2009	
			Actual	Excess Capital
Ratios:				
Tier 1 leverage ratio	Consolidated	5.00%	9.90%	\$ 386,087
	IBERIABANK	5.00	8.40	221,751
	IBERIABANK <i>fsb</i>	5.00	10.35	74,516
Tier 1 risk-based capital ratio	Consolidated	6.00	13.21	425,775
	IBERIABANK	6.00	12.18	278,167
	IBERIABANK <i>fsb</i>	6.00	12.45	74,667
Total risk-based capital ratio	Consolidated	10.00	14.58	270,458
	IBERIABANK	10.00	13.50	157,625
	IBERIABANK <i>fsb</i>	10.00	13.69	42,738

FDICIA generally prohibits a depository institution from making any capital distribution, including payment of a cash dividend or paying any management fee to its holding company, if the depository institution would be under-capitalized after such payment. Under-capitalized institutions are subject to growth limitations and are required by the appropriate federal banking agency to submit a capital restoration plan. If any depository institution subsidiary of a holding company is required to submit a capital restoration plan, the holding company would be required to provide a limited guarantee regarding compliance with the plan as a condition of approval of such plan.

If an under-capitalized institution fails to submit an acceptable plan, it is treated as if it is significantly under-capitalized. Significantly under-capitalized institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become adequately-capitalized, requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks.

Edgar Filing: IBERIABANK CORP - Form 10-K

Critically under-capitalized institutions may not, beginning 60 days after becoming critically under-capitalized, make any payment of principal or interest on their subordinated debt. In addition, critically under-capitalized institutions are subject to appointment of a receiver or conservator within 90 days of becoming so classified.

Table of Contents

Under FDICIA, a depository institution that is not well-capitalized is generally prohibited from accepting brokered deposits and offering interest rates on deposits higher than the prevailing rate in its market. As previously stated, the Banks are well-capitalized and the FDICIA brokered deposit rule did not adversely affect their ability to accept brokered deposits. IBERIABANK had \$175.5 million of such brokered deposits at December 31, 2009. At that date, IBERIABANK *fsb* had no such brokered deposits.

Additional information is provided in Note 15 to the Consolidated Financial Statements and in Management's Discussion and Analysis of Financial Condition and Results of Operations - Capital Resources in Exhibit 13 to this Form 10-K incorporated herein by reference.

Financial Holding Company Status In order to maintain its status as a financial holding company, a bank holding company's depository subsidiaries must all be both well-capitalized and well-managed, and must meet their Community Reinvestment Act obligations.

Financial holding company powers relate to financial activities that are determined by the Federal Reserve, in coordination with the Secretary of the Treasury, to be financial in nature, incidental to an activity that is financial in nature, or complementary to a financial activity, provided that the complementary activity does not pose a safety and soundness risk. The Gramm-Leach-Bliley Act designates certain activities as financial in nature, including:

underwriting insurance or annuities;

providing financial or investment advice;

underwriting, dealing in, or making markets in securities;

merchant banking, subject to significant limitations;

insurance company portfolio investing, subject to significant limitations; and

any activities previously found by the Federal Reserve to be closely related to banking.

The Gramm-Leach-Bliley Act also authorizes the Federal Reserve, in coordination with the Secretary of the Treasury, to determine that additional activities are financial in nature or incidental to activities that are financial in nature.

We are required by the Bank Holding Company Act to obtain Federal Reserve approval prior to acquiring, directly or indirectly, ownership or control of voting shares of any bank, if, after such acquisition, we would own or control more than 5% of its voting stock. However, as a financial holding company, we may commence any new financial activity, except for the acquisition of a savings association, with notice to the Federal Reserve within 30 days after the commencement of the new financial activity.

Affiliate Transactions. The Banks are subject to Regulation W, which comprehensively implemented statutory restrictions on transactions between a bank and its affiliates. Regulation W combines the FRB's interpretations and exemptions relating to Sections 23A and 23B of the Federal Reserve Act. Regulation W and Section 23A place limits on the amount of loans or extensions of credit to, investments in, or certain other transactions with affiliates, and on the amount of advances to third parties collateralized by the securities or obligations of affiliates. In general, the Banks' affiliates are IBERIABANK Corporation and our non-bank subsidiaries.

Regulation W and Section 23B prohibit, among other things, a bank from engaging in certain transactions with affiliates unless the transactions are on terms substantially the same, or at least as favorable to the bank, as those prevailing at the time for comparable transactions with non-affiliated companies.

The Banks are also subject to certain restrictions on extensions of credit to executive officers, directors, certain principal shareholders and their related interests. Such extensions of credit must be made on substantially the same terms, including interest rates and collateral, as those

Edgar Filing: IBERIABANK CORP - Form 10-K

prevailing at the time for comparable transactions with third parties and must not involve more than the normal risk of repayment or present other unfavorable features.

USA Patriot Act. The USA Patriot Act of 2001 and its related regulations require insured depository institutions, broker-dealers, and certain other financial institutions to have policies, procedures, and controls to detect, prevent, and report money laundering and terrorist financing. The statute and its regulations also provide for information sharing, subject to conditions, between federal law enforcement agencies and financial institutions, as well as among financial institutions, for counter-terrorism purposes. Federal banking regulators are required, when reviewing bank holding company acquisition and bank merger applications, to take into account the effectiveness of the anti-money laundering activities of the applicants.

Table of Contents

Consumer Privacy and Other Consumer Protection Laws. We, like all other financial institutions, are required to:

provide notice to our customers regarding privacy policies and practices,

inform our customers regarding the conditions under which their non-public personal information may be disclosed to non-affiliated third parties, and

give our customers an option to prevent disclosure of such information to non-affiliated third parties.

Under the Fair and Accurate Credit Transactions Act of 2003, our customers may also opt out of information sharing between and among us and our affiliates. We are also subject, in connection with our lending and leasing activities, to numerous federal and state laws aimed at protecting consumers, including the Home Mortgage Disclosure Act, the Real Estate Settlement Procedures Act, the Equal Credit Opportunity Act, the Truth in Lending Act, and the Fair Credit Reporting Act.

Sarbanes-Oxley Act of 2002. The Sarbanes-Oxley Act of 2002 (the SOX Act) implements a broad range of corporate governance, accounting and disclosure requirements for public companies, and also for their directors and officers. SEC rules adopted to implement SOX Act requirements require a reporting company's chief executive and chief financial officers to certify certain financial and other information included in our quarterly and annual reports. The rules also require these officers to certify that they are responsible for establishing, maintaining and regularly evaluating the effectiveness of our financial reporting and disclosure controls and procedures; that they have made certain disclosures to the auditors and to the Audit Committee of the board of directors about our controls and procedures; and that they have included information in their quarterly and annual filings about their evaluation and whether there have been significant changes to the controls and procedures or other factors which would significantly impact these controls subsequent to their evaluation. Section 404 of the SOX Act requires management to undertake an assessment of the adequacy and effectiveness of our internal controls over financial reporting and requires our auditors to attest to and report on the effectiveness of these controls. See Item 9A. Controls and Procedures hereof for our evaluation of disclosure controls and procedures. The certifications required by Sections 302 and 906 of the SOX Act also accompany this Form 10-K.

Other Regulatory Matters. We and our subsidiaries and affiliates are subject to numerous examinations by federal and state banking regulators, as well as the SEC, FINRA, NASDAQ, and various state insurance and securities regulators.

Corporate Governance. Information with respect to our corporate governance is available on our web site, www.iberiabank.com, and includes:

Corporate Governance Guidelines

Nominating and Corporate Governance Committee Charter

Codes of Ethics

Chief Executive Officer and Chief Financial Officer Certifications

We intend to disclose any waiver of or substantial amendment to the Codes of Ethics applicable to directors and executive officers on our web site at www.iberiabank.com.

Federal Taxation

We and our subsidiaries are subject to the generally applicable corporate tax provisions of the Internal Revenue Code (the Code), and the Banks are subject to certain additional provisions of the Code which apply to financial institutions. We and our subsidiaries file a consolidated federal income tax return on the basis of a fiscal year ending on December 31.

Table of Contents

Retained earnings at December 31, 2009 and 2008 included approximately \$21.9 million accumulated prior to January 1, 1987 for which no provision for federal income taxes has been made. If this portion of retained earnings is used in the future for any purpose other than to absorb bad debts, it will be added to future taxable income.

The deferred tax liability at December 31, 2009 includes \$74.9 million of future deductible temporary differences. Included is \$55.0 million related to book deductions for the bad debt reserve that have not been deducted for tax purposes.

State Taxation

Louisiana does not permit the filing of consolidated income tax returns. We are subject to the Louisiana Corporation Income Tax based on our separate Louisiana taxable income, as well as a corporate franchise tax. IBERIABANK is not subject to the Louisiana income or franchise taxes. However, IBERIABANK is subject to the Louisiana Shares Tax which is imposed on the assessed value of our stock. The formula for deriving the assessed value is to calculate 15% of the sum of (a) 20% of our capitalized earnings, plus (b) 80% of our taxable shareholders' equity, and to subtract from that figure 50% of our real and personal property assessment. Various items may also be subtracted in calculating a company's capitalized earnings. The portion of the Louisiana shares tax expense calculated on our shareholders' equity is included in noninterest expense, and the portion calculated on our capitalized earnings is included in income tax expense.

Arkansas generally imposes income tax on financial institutions computed at a rate of 6.5% of net earnings. For the purpose of the 6.5% income tax, net earnings are defined as the net income of the financial institution computed in the manner prescribed for computing the net taxable income for federal corporate income tax purposes, less (i) interest income from obligations of the United States, of any county, municipal or public corporation authority, special district or political subdivision, plus (ii) any deduction for state income taxes.

Florida generally imposes income tax on financial institutions computed at a rate of 5.5% of net earnings. For the purpose of the 5.5% income tax, net earnings are defined as the net income of the financial institution computed in the manner prescribed for computing the net taxable income for federal corporate income tax purposes, less certain modifications defined by Florida law.

Alabama generally imposes income tax on financial institutions computed at a rate of 5.5% of net earnings. For the purpose of the 6.5% income tax, net earnings are defined as the net income of the financial institution computed in the manner prescribed for computing the net taxable income for federal corporate income tax purposes, less certain modifications defined by Alabama law.

Item 1A. Risk Factors.

There are risks, many beyond our control, which could cause our results to differ significantly from management's expectations. Some of these risk factors are described below. Any factor described in this report could, by itself or together with one or more other factors, adversely affect our business, results of operations and/or financial condition.

Risks About Our Company

The current economic environment poses significant challenges for us and could adversely affect our financial condition and results of operations.

Although we remain well capitalized and have not suffered from liquidity issues, we are operating in a challenging and uncertain economic environment. Financial institutions continue to be affected by declines in the real estate market and constrained financial markets. We retain direct exposure to the residential and commercial real estate markets, and we could be affected by these events. Continued declines in real estate values, home sales volumes and financial stress on borrowers as a result of the uncertain economic environment, including job losses, could have an adverse affect on our borrowers or their customers, which could adversely affect our financial condition and results of operations. In addition, a continued deterioration in local economic conditions in our markets could drive losses beyond those which are provided for in our allowance for loan losses and result in a variety of consequences including the following:

increases in loan delinquencies;

increases in nonperforming assets and foreclosures;

decreases in demand for our products and services, which could adversely affect our liquidity position; and

decreases in the value of the collateral securing our loans, especially real estate, which could reduce customers' borrowing power.

Disruptions in the global financial markets could adversely affect our results of operations and financial condition.

Since mid-2007, global financial markets have suffered substantial disruption, illiquidity and volatility. These circumstances resulted in significant government assistance to a number of major financial institutions. These events have significantly diminished overall confidence in the financial markets and in financial institutions and have increased the uncertainty we face in managing our business. If these disruptions continue or other disruptions in the financial markets or the global or our regional economic environment arise, they could have an adverse effect on our future results of operations and financial condition, including our liquidity position, and may affect our ability to access capital.

The U.S. government's plans to stabilize the financial markets may not be effective.

In response to the recent volatility in the financial markets, the U.S. government has enacted certain legislation and regulatory programs to foster stability, including the EESA as amended by the American Recovery and Reinvestment Act of 2009, or ARRA. There can be no assurance that the impact of such legislation and the various programs created thereunder on the financial markets will be sufficient to produce the desired results. The failure of the U.S. government to fully execute the programs it has already developed, or to implement expeditiously other remedial economic and financial legislation that may be needed, could have a material adverse effect on the financial markets, which in turn could materially and adversely affect our business, financial condition and results of operations.

Table of Contents

Recent legislative and regulatory proposals in response to recent turmoil in the financial markets may adversely affect our business and results of operations.

The banking industry is heavily regulated. We are subject to examinations, supervision and comprehensive regulation by various federal and state agencies. Our compliance with these regulations is costly and restricts certain of our activities. Banking regulations are primarily intended to protect the federal deposit insurance fund and depositors, not shareholders.

The burden imposed by federal and state regulations puts banks at a competitive disadvantage compared to less regulated competitors such as finance companies, mortgage banking companies and leasing companies. Changes in the laws, regulations and regulatory practices affecting the banking industry may increase our costs of doing business or otherwise adversely affect us and create competitive advantages for others. Federal economic and monetary policies may also affect our ability to attract deposits and other funding sources, make loans and investments, and achieve satisfactory interest spreads.

Legislation proposing significant structural reforms to the financial services industry is being considered in the U.S. Congress, including, among other things, the creation of a Consumer Financial Protection Agency, which would have broad authority to regulate financial service providers and financial products. In addition, the Federal Reserve Board has proposed guidance on incentive compensation at the banking organizations it regulates and the Treasury Department and the federal banking regulators have issued statements calling for higher capital and liquidity requirements for banking organizations. Complying with any new legislative or regulatory requirements, and any programs established thereunder, by federal and state governments to address the current economic crisis could have an adverse impact on our results of operations, financial condition, our ability to fill positions with the most qualified candidates available and our ability to maintain our dividend.

We may be required to pay significantly higher FDIC premiums or special assessments that could adversely affect our earnings.

Market developments have significantly depleted the insurance fund of the FDIC and reduced the ratio of reserves to insured deposits. As a result, we may be required to pay significantly higher premiums or additional special assessments that could adversely affect our earnings. In the second quarter of 2009, the FDIC implemented a special assessment that resulted in approximately \$2 million of additional expense during the quarter. It is possible that the FDIC may impose additional special assessments in the future as part of its restoration plan. In addition, on November 12, 2009, the FDIC adopted a rule requiring banks to prepay, on December 30, 2009, three years' worth of premiums to replenish the depleted insurance fund. We expect the amount of our prepaid assessment to be approximately \$19 million. This expected amount does not reflect the impact of the Orion and Century FDIC-assisted transactions. The FDIC is also considering other criteria to create a more risk-based assessment model that could increase respective assessment expenses of some depository institutions. We are generally unable to control the amount of premiums that we are required to pay for FDIC insurance. If there are additional bank or financial institution failures, we may be required to pay even higher FDIC premiums than the recently increased levels. These announced increases and any future increases or required prepayments in FDIC insurance premiums may materially adversely affect our results of operations.

Our recent growth and financial performance will be negatively impacted if we are unable to execute our growth strategy.

Our stated growth strategy is to grow organically and supplement that growth with select acquisitions. Over the last few years, we have continued to fill out our Louisiana franchise by adding de novo branches in attractive

Table of Contents

markets where we believe we have a competitive advantage and will continue to do so. In the wake of Hurricanes Katrina and Rita, we implemented a branch expansion initiative whereby we opened banking offices in various southern Louisiana communities. Our success depends primarily on generating loans and deposits of acceptable risk and expense. There can be no assurances that we will be successful in continuing our organic, or internal, growth strategy. Since it depends upon economic conditions, our ability to identify appropriate markets for expansion, our ability to recruit and retain qualified personnel, our ability to fund growth at reasonable cost, sufficient capital, competitive factors, banking laws, and other factors.

Supplementing our internal growth through acquisitions is an important part of our strategic focus. Since 1995, approximately 66% of our asset growth has been through acquisitions, or external growth. Our acquisition efforts focus on select markets and targeted entities in Louisiana and most recently in selected markets we consider to be contiguous, or natural extensions, to our current markets. These selected markets include Arkansas, where we completed acquisitions of Pulaski Investment Corporation and Pocahontas Bancorp, Inc. in 2007, and ANB Financial, N.A. in 2008. As consolidation of the banking industry continues, the competition for suitable acquisition candidates may increase. We compete with other banking companies for acquisition opportunities, and many of these competitors have greater financial resources than we do and may be able to pay more for an acquisition than we are able or willing to pay. We also may need additional debt or equity financing in the future to fund acquisitions. We may not be able to obtain additional financing or, if available, it may not be in amounts and on terms acceptable to us. Our issuance of additional securities will dilute existing shareholders' equity interest in us and may have a dilutive effect on our earnings per share. If we are unable to locate suitable acquisition candidates willing to sell on terms acceptable to us, or we are otherwise unable to obtain additional debt or equity financing necessary for us to continue making acquisitions, we would be required to find other methods to grow our business and we may not grow at the same rate we have in the past, or at all.

We cannot be certain as to our ability to manage increased levels of assets and liabilities without increased expenses and higher levels of nonperforming assets. We may be required to make additional investments in equipment and personnel to manage higher asset levels and loan balances, which may adversely affect earnings, shareholder returns, and our efficiency ratio. Increases in operating expenses or nonperforming assets may decrease our earnings and the value of our common stock.

In addition to the normal operating challenges inherent in managing a larger financial institution, each of our acquisitions and potential future acquisitions is subject to appropriate regulatory approval. Our regulators may require that we demonstrate that we have appropriately integrated our prior acquisitions, or any future acquisitions we may do, before permitting us to engage in any future material acquisitions.

FDIC-assisted acquisition opportunities may not become available and increased competition may make it more difficult for us to bid on failed bank transactions on terms we consider to be acceptable.

A part of our near-term business strategy is to pursue failing banks that the FDIC plans to place in receivership. The FDIC may not place banks that meet our strategic objectives into receivership. Failed bank transactions are attractive opportunities in part because of loss sharing arrangements with the FDIC that limit the acquirer's downside risk on the purchased loan portfolio and, apart from our assumption of deposit liabilities, we have significant discretion as to the non-deposit liabilities that we assume. In addition, assets purchased from the FDIC are marked to their fair value and in many cases there is little or no addition to goodwill arising from an FDIC-assisted transaction. The bidding process for failing banks could become very competitive and the increased competition may make it more difficult for us to bid on terms we consider to be acceptable.

Like most banking organizations, our business is highly susceptible to credit risk.

As a lender, we are exposed to the risk that our customers will be unable to repay their loans according to their terms and that the collateral securing the payment of their loans (if any) may not be sufficient to assure repayment. Credit losses could have a material adverse effect on our operating results.

As of December 31, 2009, our total loan portfolio was approximately \$5.8 billion, or 60% of total assets. The major components of our loan portfolio include 64% of commercial loans, both real estate and business, 18% of mortgage loans comprised primarily of residential 1-4 family mortgage loans, and 18% consumer loans. Our credit risk with respect to our consumer installment loan portfolio and commercial loan portfolio relates principally to the general creditworthiness of individuals and businesses within our local market areas. Our credit risk with respect to our residential and commercial real estate mortgage and construction loan portfolios relates principally to the general creditworthiness of individuals and businesses and the value of real estate serving as security for the repayment of the loans. A related risk in connection with loans secured by commercial real estate is the effect of unknown or unexpected environmental contamination, which could make the real estate effectively unmarketable or otherwise significantly reduce its value as security, or could expose us to remediation liabilities as the lender.

Table of Contents

Our loan portfolio has and will continue to be affected by the on-going correction in residential real estate prices and reduced levels of home sales.

There has been a general slowdown in housing in some of our market areas, reflecting declining prices and excess inventories of houses to be sold, particularly impacting borrowers in our Northwest Arkansas and Memphis markets. As a result, home builders have shown signs of financial deterioration. A soft residential housing market, increased delinquency rates, and a weakened secondary credit market have affected the overall mortgage industry. We expect the home builder market to continue to be volatile and anticipate continuing pressure on the home builder segment in the coming months. We make credit and reserve decisions based on the current conditions of borrowers or projects combined with our expectations for the future. If the slowdown in the housing market continues, we could experience higher charge-offs and delinquencies beyond that which is provided in the allowance for loan losses. As such, our earnings could be adversely affected through a higher than anticipated provision for loan losses.

At December 31, 2009, we had:

\$649.8 million of home equity loans and lines, representing 11.2% of total loans and leases.

\$1.0 billion in residential real estate loans, representing 17.4% of total loans and leases. Adjustable-rate mortgages, primarily mortgages that have a fixed rate for the first 3 to 5 years and then adjust annually, comprised 44.8% of this portfolio.

\$83.9 million of loans to single family home builders, including loans made to both middle market and small business home builders. These loans represented 1.5% of total loans and leases.

Our allowance for loan losses may not be sufficient to cover actual loan losses, which could adversely affect our earnings.

We maintain an allowance for loan losses in an attempt to cover loan losses inherent in our loan portfolio. Additional loan losses will likely occur in the future and may occur at a rate greater than we have experienced to date.

The determination of the allowance for loan losses, which represents management's estimate of probable losses inherent in our credit portfolio, involves a high degree of judgment and complexity. Our policy is to establish reserves for estimated losses on delinquent and other problem loans when it is determined that losses are expected to be incurred on such loans. Management's determination of the adequacy of the allowance is based on various factors, including an evaluation of the portfolio, past loss experience, current economic conditions, the volume and type of lending conducted by us, composition of the portfolio, the amount of our classified assets, seasoning of the loan portfolio, the status of past due principal and interest payments and other relevant factors. Changes in such estimates may have a significant impact on our financial statements. If our assumptions and judgments prove to be incorrect, our current allowance may not be sufficient and adjustments may be necessary to allow for different economic conditions or adverse developments in our loan portfolio. Federal and state regulators also periodically review our allowance for loan losses and may require us to increase our provision for loan losses or recognize further loan charge-offs, based on judgments different than those of our management. Any increase in our allowance for loan losses would have an adverse effect on our operating results and financial condition.

Commercial and commercial real estate loans generally are viewed as having more risk of default than residential real estate loans or other loans or investments. These types of loans also typically are larger than residential real estate loans and other consumer loans. Because the loan portfolio contains a significant number of commercial and commercial real estate loans with relatively large balances, the deterioration of a material amount of these loans may cause a significant increase in nonperforming assets. An increase in nonperforming loans could result in: a loss of earnings from these loans, an increase in the provision for loan losses or an increase in loan charge-offs, which would have an adverse impact on our results of operations and financial condition.

Table of Contents

Changes in interest rates and other factors beyond our control may adversely affect our earnings and financial condition.

Our net income depends to a great extent upon the level of our net interest income. Changes in interest rates can increase or decrease net interest income and net income. Net interest income is the difference between the interest income we earn on loans, investments and other interest-earning assets, and the interest we pay on interest-bearing liabilities, such as deposits and borrowings. Net interest income is affected by changes in market interest rates, because different types of assets and liabilities may react differently, and at different times, to market interest rate changes. When interest-bearing liabilities mature or reprice more quickly than interest-earning assets in a period, an increase in market rates of interest could reduce net interest income. Similarly, when interest-earning assets mature or reprice more quickly than interest-bearing liabilities, falling interest rates could reduce net interest income. As of December 31, 2009, our interest rate risk model indicated we are asset sensitive, meaning interest rate changes would be expected to impact our asset yields more than our liability costs.

Changes in market interest rates are affected by many factors beyond our control, including inflation, unemployment, the money supply, international events, and events in world financial markets. We attempt to manage our risk from changes in market interest rates by adjusting the rates, maturity, repricing, and balances of the different types of interest-earning assets and interest-bearing liabilities, but interest rate risk management techniques are not exact. As a result, a rapid increase or decrease in interest rates could have an adverse effect on our net interest margin and results of operations. Changes in the market interest rates for types of products and services in our markets also may vary significantly from location to location and over time based upon competition and local or regional economic factors.

If we or our banks or holding company were unable to borrow funds through access to capital markets, we may not be able to meet the cash flow requirements of our depositors and borrowers, or the operating cash needs to fund corporate expansion and other corporate activities.

Liquidity is the ability to meet cash flow needs on a timely basis at a reasonable cost. The liquidity of our banks is used to make loans and leases to repay deposit liabilities as they become due or are demanded by customers. Liquidity policies and limits are established by the board of directors. Management and the Investment Committee regularly monitor the overall liquidity position of the banks and the holding company to ensure that various alternative strategies exist to cover unanticipated events that could affect liquidity. Management and the Investment Committee also establish policies and monitor guidelines to diversify the banks' funding sources to avoid concentrations in any one market source. Funding sources include Federal funds purchased, securities sold under repurchase agreements, non-core deposits, and short- and long-term debt. The Banks are also members of the Federal Home Loan Bank (FHLB) System, which provides funding through advances to members that are collateralized with mortgage-related assets.

We maintain a portfolio of securities that can be used as a secondary source of liquidity. There are other sources of liquidity available to us should they be needed. These sources include sales or securitizations of loans, our ability to acquire additional national market, non-core deposits, additional collateralized borrowings such as FHLB advances, the issuance and sale of debt securities, and the issuance and sale of preferred or common securities in public or private transactions. The Banks also can borrow from the Federal Reserve's discount window.

Amounts available under our existing credit facilities as of December 31, 2009, consist of \$960.4 million in Federal Home Loan Bank notes and \$145.0 million in the form of federal funds and other lines of credit.

If we were unable to access any of these funding sources when needed, we might be unable to meet customers' needs, which could adversely impact our financial condition, results of operations, cash flows, and level of regulatory-qualifying capital. For further discussion, see Note 15 to the Consolidated Financial Statements.

Table of Contents

Our eligibility to continue to use a short form registration statement on Form S-3 may affect our short-term ability to access the capital markets.

The ability to conduct primary offerings under a registration statement on Form S-3 has benefits to issuers who are eligible to use this short form registration statement. Form S-3 permits an eligible issuer to incorporate by reference its past and future filings and reports made under the Securities Exchange Act of 1934, as amended, or the Exchange Act. In addition, Form S-3 enables eligible issuers to conduct primary offerings off the shelf under Rule 415 of the Securities Act of 1933, as amended, or the Securities Act. The shelf registration process under Form S-3, combined with the ability to incorporate information on a forward basis, allows issuers to avoid additional delays and interruptions in the offering process and to access the capital markets in a more expeditious and efficient manner than raising capital in a standard registered offering on Form S-1. One of the requirements for Form S-3 eligibility is for an issuer to have timely filed its Exchange Act reports (including Form 10-Ks, Form 10-Qs and certain Form 8-Ks) for the 12-month period immediately preceding either the filing of the Form S-3 or a subsequent determination date.

During 2009, we were unable to timely file on Form 8-K certain required financial statement information with respect to the FDIC-assisted transactions we consummated (although such information was filed on February 25, 2010). Therefore, we believe we may not be able to continue to use Form S-3 for a period of approximately 12 months from and after we file our Annual Report on Form 10-K for the year ended December 31, 2009. Without Form S-3 eligibility, we may experience delays in our ability to raise capital in the capital markets during that 12-month period. Any such delay may result in offering terms that may not be advantageous to us.

We face risks related to our operational, technological and organizational infrastructure.

Our ability to grow and compete is dependent on our ability to build or acquire the necessary operational and technological infrastructure and to manage the cost of that infrastructure while we expand. Similar to other large corporations, in our case, operational risk can manifest itself in many ways, such as errors related to failed or inadequate processes, faulty or disabled computer systems, fraud by employees or persons outside of the company and exposure to external events. We are dependent on our operational infrastructure to help manage these risks. In addition, we are heavily dependent on the strength and capability of our technology systems which we use both to interface with our customers and to manage our internal financial and other systems. Our ability to develop and deliver new products that meet the needs of our existing customers and attract new ones depends on the functionality of our technology systems. Additionally, our ability to run our business in compliance with applicable laws and regulations is dependent on these infrastructures.

We continuously monitor our operational and technological capabilities and make modifications and improvements when we believe it will be cost effective to do so. In some instances, we may build and maintain these capabilities ourselves. We also outsource some of these functions to third parties. These third parties may experience errors or disruptions that could adversely impact us and over which we may have limited control. We also face risk from the integration of new infrastructure platforms and/or new third party providers of such platforms into our existing businesses.

Acquisitions or mergers entail risks which could negatively affect our operations.

Acquisitions and mergers, particularly the integration of companies that have previously been operated separately, involves a number of risks, including, but not limited to:

the time and costs associated with identifying and evaluating potential acquisition or merger partners;

difficulties in assimilating operations of the acquired institution and implementing uniform standards, controls, procedures and policies;

exposure to asset quality problems of the acquired institution;

our ability to finance an acquisition and maintain adequate regulatory capital;

Edgar Filing: IBERIABANK CORP - Form 10-K

diversion of management's attention from the management of daily operations;

risks and expenses of entering new geographic markets;

potential significant loss of depositors or loan customers from the acquired institution;

loss of key employees of the acquired institution; and

exposure to undisclosed or unknown liabilities of an acquired institution.

Table of Contents

Any of these acquisition risks could result in unexpected losses or expenses and thereby reduce the expected benefits of the acquisition. Also, we may issue equity securities, including common stock and securities convertible into common stock in connection with future acquisitions, which could cause ownership and economic dilution to our current shareholders. Our failure to successfully integrate current and future acquisitions and manage our growth could adversely affect our business, results of operations, financial condition and future prospects.

The loss of certain key personnel could negatively affect our operations.

Although we have employed a significant number of additional executive officers and other key personnel in recent months, our success continues to depend in large part on the retention of a limited number of key management, lending and other banking personnel. We could undergo a difficult transition period if we were to lose the services of any of these individuals. Our success also depends on the experience of our banking facilities managers and lending officers and on their relationships with the customers and communities they serve. The loss of these key persons could negatively impact the affected banking operations. The unexpected loss of key senior managers, or the inability to recruit and retain qualified personnel in the future, could have an adverse effect on our business, financial condition, or operating results.

Competition may decrease our growth or profits.

We compete for loans, deposits, title business and investment dollars with other banks and other financial institutions and enterprises, such as securities firms, insurance companies, savings associations, credit unions, mortgage brokers, private lenders and title companies, many of which have substantially greater resources than ours. Credit unions have federal tax exemptions, which may allow them to offer lower rates on loans and higher rates on deposits than taxpaying financial institutions such as commercial banks. In addition, non-depository institution competitors are generally not subject to the extensive regulation applicable to institutions that offer federally insured deposits. Other institutions may have other competitive advantages in particular markets or may be willing to accept lower profit margins on certain products. These differences in resources, regulation, competitive advantages, and business strategy may decrease our net interest margin, may increase our operating costs, and may make it harder for us to compete profitably.

Reputational risk and social factors may impact our results.

Our ability to originate and maintain accounts is highly dependent upon consumer and other external perceptions of our business practices and/or our financial health. Adverse perceptions regarding our business practices and/or our financial health could damage our reputation in both the customer and funding markets, leading to difficulties in generating and maintaining accounts as well as in financing them. Adverse developments with respect to the consumer or other external perceptions regarding the practices of our competitors, or our industry as a whole, may also adversely impact our reputation. In addition, adverse reputational impacts on third parties with whom we have important relationships may also adversely impact our reputation. Adverse impacts on our reputation, or the reputation of our industry, may also result in greater regulatory and/or legislative scrutiny, which may lead to laws or regulations that may change or constrain the manner in which we engage with our customers and the products we offer. Adverse reputational impacts or events may also increase our litigation risk. We carefully monitor internal and external developments for areas of potential reputational risk and have established governance structures to assist in evaluating such risks in our business practices and decisions.

Changes in government regulations and legislation could limit our future performance and growth.

The banking industry is heavily regulated. We are subject to examinations, supervision and comprehensive regulation by various federal and state agencies. Our compliance with these regulations is costly and restricts certain of our activities. Banking regulations are primarily intended to protect the federal deposit insurance fund and depositors, not shareholders. The burden imposed by federal and state regulations puts banks at a competitive disadvantage compared to less regulated competitors such as finance companies, mortgage banking companies and leasing companies. Changes in the laws, regulations and regulatory practices affecting the banking industry may increase our costs of doing business or otherwise adversely affect us and create competitive advantages for others. Regulations affecting banks and financial services companies undergo continuous change, and we cannot predict the ultimate effect of these changes, which could have a material adverse effect on our profitability or financial condition. Federal economic and monetary policies may also affect our ability to attract deposits and other funding sources, make loans and investments, and achieve satisfactory interest spreads.

Table of Contents

The geographic concentration of our markets makes our business highly susceptible to local economic conditions.

Unlike larger organizations that are more geographically diversified, our offices are primarily concentrated in selected markets in Louisiana, Alabama, Arkansas, Florida, Tennessee and Texas. As a result of this geographic concentration, our financial results depend largely upon economic conditions in these market areas. Deterioration in economic conditions in the markets we serve could result in one or more of the following:

an increase in loan delinquencies;

an increase in problem assets and foreclosures;

a decrease in the demand for our products and services; and

a decrease in the value of collateral for loans, especially real estate, in turn reducing customers' borrowing power, the value of assets associated with problem loans and collateral coverage.

If we do not adjust to rapid changes in the financial services industry, our financial performance may suffer.

We face substantial competition for deposit, credit, title and trust relationships, as well as other sources of funding in the communities we serve. Competing providers include other banks, thrifts and trust companies, insurance companies, mortgage banking operations, credit unions, finance companies, title companies, money market funds and other financial and nonfinancial companies which may offer products functionally equivalent to those offered by us. Competing providers may have greater financial resources than we do and offer services within and outside the market areas we serve. In addition to this challenge of attracting and retaining customers for traditional banking services, our competitors include securities dealers, brokers, mortgage bankers, investment advisors and finance and insurance companies who seek to offer one-stop financial services to their customers that may include services that financial institutions have not been able or allowed to offer to their customers in the past. The increasingly competitive environment is primarily a result of changes in regulation, changes in technology and product delivery systems and the accelerating pace of consolidation among financial service providers. If we are unable to adjust both to increased competition for traditional banking services and changing customer needs and preferences, our financial performance and your investment in our common stock could be adversely affected.

Hurricanes or other adverse weather events could negatively affect our local economies or disrupt our operations, which would have an adverse effect on our business or results of operations.

Like other coastal areas, some of our markets in Louisiana are susceptible to hurricanes and tropical storms. Such weather events can disrupt our operations, result in damage to our properties and negatively affect the local economies in which we operate. We cannot predict whether or to what extent damage that may be caused by future hurricanes or other weather events will affect our operations or the economies in our market areas, but such weather events could result in a decline in loan originations, a decline in the value or destruction of properties securing our loans and an increase in the delinquencies, foreclosures and loan losses. Our business or results of operations may be adversely affected by these and other negative effects of hurricanes or other significant weather events.

We are exposed to intangible asset risk which could impact our financial results.

In accordance with GAAP, we record assets acquired and liabilities assumed at their fair value, and, as such, acquisitions typically result in recording goodwill. We perform a goodwill valuation at least annually to test for goodwill impairment. Impairment testing is a two step process that first compares the fair value of goodwill with its carrying amount, and second measures impairment loss by comparing the implied fair value of goodwill with the carrying amount of that goodwill. Management's testing in 2009 indicated an impairment of goodwill at our Lenders Title Company subsidiary, resulting in an impairment charge of \$9.7 million recorded in our operating results for the year ended December 31, 2009. Adverse conditions in our business climate, including a significant decline in future operating cash flows, a significant change in our stock price or market capitalization, or a deviation from our expected growth rate and performance may significantly affect the fair value of our goodwill and may trigger additional impairment losses, which could be materially adverse to our operating results and financial position.

Table of Contents

Risks Related to the FDIC-assisted Transactions

The success of the FDIC-assisted transactions will depend on a number of uncertain factors.

The success of the FDIC-assisted transactions will depend on a number of factors, including, without limitation:

our ability to integrate the branches acquired from CapitalSouth, Orion and Century in the FDIC-assisted transactions into IBERIABANK's current operations;

our ability to limit the outflow of deposits held by our new customers in the acquired branches and to successfully retain and manage interest-earning assets (i.e., loans) acquired in the FDIC-assisted transactions;

our ability to attract new deposits and to generate new interest-earning assets in the geographic areas previously served by CapitalSouth, Orion, Century and the acquired branches;

our ability to effectively compete in new markets in which we did not previously have a presence;

our success in deploying the cash received in the FDIC-assisted transactions into assets bearing sufficiently high yields without incurring unacceptable credit or interest rate risk;

our ability to control the incremental non-interest expense from the acquired branches in a manner that enables us to maintain a favorable overall efficiency ratio;

our ability to retain and attract the appropriate personnel to staff the acquired branches; and

our ability to earn acceptable levels of interest and non-interest income, including fee income, from the acquired branches.

As with any acquisition involving a financial institution, particularly one involving the transfer of a large number of bank branches such as the FDIC-assisted transactions, there may be business and service changes and disruptions that result in the loss of customers or cause customers to close their accounts and move their business to competing financial institutions. Integrating the acquired branches will be an operation of substantial size and expense, and may be affected by general market and economic conditions or government actions affecting the financial industry generally. Integration efforts will also likely divert our management's attention and resources. No assurance can be given that we will be able to integrate the acquired branches successfully, and the integration process could result in the loss of key employees, the disruption of ongoing business, or inconsistencies in standards, controls, procedures and policies that adversely affect our ability to maintain relationships with clients, customers, depositors and employees or to achieve the anticipated benefits of the FDIC-assisted transactions. We may also encounter unexpected difficulties or costs during the integration that could adversely affect our earnings and financial condition, perhaps materially. Additionally, no assurance can be given that the operation of the acquired branches will not adversely affect our existing profitability, that we will be able to achieve results in the future similar to those achieved by our existing banking business, that we will be able to compete effectively in the market areas currently served by CapitalSouth, Orion, Century and the acquired branches, or that we will be able to manage any growth resulting from the FDIC-assisted transactions effectively.

Our ability to grow the acquired branches following the FDIC-assisted transactions depends in part on our ability to retain certain key branch personnel we expect to hire in connection with the FDIC-assisted transactions. We believe that the ties these employees have in the local banking markets previously served by CapitalSouth, Orion, Century and the acquired branches are vital to our ability to maintain our relationships with existing CapitalSouth, Orion and Century customers and to generate new business in these markets. Our failure to hire or retain these employees could adversely affect the success of the FDIC-assisted transactions and our future growth.

Table of Contents

Changes in national and local economics conditions could lead to higher loan charge-offs in connection with the FDIC-assisted transactions all of which may not be supported by the loss sharing agreement with the FDIC.

We acquired significant portfolios of loans in the FDIC-assisted transactions. Although these loan portfolios will be initially accounted for at fair value, there is no assurance that the loans we acquired will not become impaired, which may result in additional charge-offs to this portfolio. The fluctuations in national, regional and local economic conditions, including those related to local residential, commercial real estate and construction markets, may increase the level of charge-offs that we make to our loan portfolio, and consequently, reduce our net income, and may also increase the level of charge-offs on the loan portfolio that we have acquired in the Acquisitions and correspondingly reduce our net income. These fluctuations are not predictable, cannot be controlled and may have a material adverse impact on our operations and financial condition even if other favorable events occur.

Although we have entered into loss sharing agreements with the FDIC which provide that a significant portion of losses related to specified loan portfolios that we have acquired in connection with the FDIC-assisted transactions will be borne by the FDIC, we are not protected for all losses resulting from charge-offs with respect to those specified loan portfolios. Additionally, the loss sharing agreements have limited terms; therefore, any charge-off of related losses that we experience after the term of the loss sharing agreements will not be reimbursed by the FDIC and will negatively impact our net income. The loss sharing agreements also impose standard requirements on us which must be satisfied in order to retain loss share protections.

Deposit and loan run-off rates could exceed the rates we have projected in connection with our planning for the FDIC-assisted transactions and the integration of the acquired branches.

Deposit run-off could be higher than our assumptions. As part of the FDIC-assisted transactions, it will be necessary to convert customer loan and deposit data from Orion's and Century's data processing systems to our data processing system. Delays or errors in the conversion process could adversely affect customer relationships, increase run-off of deposit and loan customers and result in unexpected charges and costs. Similarly, run-off could increase if we are not able to service in a cost-effective manner particular loan or deposit products with special features previously offered by Orion and Century. Any increase in run-off rates could adversely affect our ability to stimulate growth in the acquired branches, our liquidity, and our results of operations.

Risks About Our Common Stock

We cannot guarantee that we will pay dividends to shareholders in the future.

Cash available to pay dividends to our shareholders is derived primarily, if not entirely, from dividends paid to us from the Banks. The ability of our subsidiary banks to pay dividends to us as well as our ability to pay dividends to our shareholders is limited by regulatory and legal restrictions and the need to maintain sufficient consolidated capital. We may also decide to limit the payment of dividends even when we have the legal ability to pay them in order to retain earnings for use in our business. Further, any lenders making loans to us may impose financial covenants that may be more restrictive than regulatory requirements with respect to the payment of dividends. For instance, we are prohibited from paying dividends on our common stock if the required payments on our subordinated debentures have not been made. There can be no assurance of whether or when we may pay dividends in the future.

The trading history of our common stock is characterized by low trading volume. The value of your investment may be subject to sudden decreases due to the volatility of the price of our common stock.

Our common stock trades on Nasdaq Global Market. During 2009, the average daily trading volume of our common stock was approximately 185,000 shares. We cannot predict the extent to which investor interest in us will lead to a more active trading market in our common stock or how much more liquid that market might become. A public trading market having the desired characteristics of depth, liquidity and orderliness depends upon the presence in the marketplace of willing buyers and sellers of our common stock at any given time, which presence is dependent upon the individual decisions of investors, over which we have no control.

The market price of our common stock may be highly volatile and subject to wide fluctuations in response to numerous factors, including, but not limited to, the factors discussed in other risk factors and the following:

actual or anticipated fluctuations in our operating results;

changes in interest rates;

changes in the legal or regulatory environment in which we operate;

Table of Contents

press releases, announcements or publicity relating to us or our competitors or relating to trends in our industry;

changes in expectations as to our future financial performance, including financial estimates or recommendations by securities analysts and investors;

future sales of our common stock;

changes in economic conditions in our marketplace, general conditions in the U.S. economy, financial markets or the banking industry; and

other developments affecting our competitors or us.

These factors may adversely affect the trading price of our common stock, regardless of our actual operating performance, and could prevent our shareholders from selling common stock at or above the public offering price. In addition, the stock markets, from time to time, experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of companies. These broad fluctuations may adversely affect the market price of our common stock, regardless of our trading performance.

In the past, shareholders often have brought securities class action litigation against a company following periods of volatility in the market price of their securities. We may be the target of similar litigation in the future, which could result in substantial costs and divert management's attention and resources.

Sales of a significant number of shares of our common stock in the public markets, or the perception of such sales, could depress the market price of our common stock.

Sales of a substantial number of shares of our common stock in the public markets and the availability of those shares for sale could adversely affect the market price of our common stock. In addition, future issuances of equity securities, including pursuant to outstanding options, could dilute the interests of our existing stockholders, including you, and could cause the market price of our common stock to decline. We may issue such additional equity or convertible securities to raise additional capital. The issuance of any additional shares of common or preferred stock or convertible securities could be substantially dilutive to shareholders of our common stock. Moreover, to the extent that we issue restricted stock units, phantom shares, stock appreciation rights, options or warrants to purchase our common stock in the future and those stock appreciation rights, options or warrants are exercised or as the restricted stock units vest, our shareholders may experience further dilution. Holders of our shares of common stock have no preemptive rights that entitle holders to purchase their pro rata share of any offering of shares of any class or series and, therefore, such sales or offerings could result in increased dilution to our shareholders. We cannot predict the effect that future sales of our common stock would have on the market price of our common stock.

We may issue debt and equity securities or securities convertible into equity securities, any of which may be senior to our common stock as to distributions and in liquidation, which could negatively affect the value of our common stock.

In the future, we may attempt to increase our capital resources by entering into debt or debt-like financing that is unsecured or secured by all or up to all of our assets, or by issuing additional debt or equity securities, which could include issuances of secured or unsecured commercial paper, medium-term notes, senior notes, subordinated notes, preferred stock or securities convertible into or exchangeable for equity securities. In the event of our liquidation, our lenders and holders of our debt and preferred securities would receive a distribution of our available assets before distributions to the holders of our common stock. Because our decision to incur debt and issue securities in our future offerings will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings and debt financings. Further, market conditions could require us to accept less favorable terms for the issuance of our securities in the future.

Our management has broad discretion over the use of proceeds from equity offerings.

Our management has significant flexibility in applying the proceeds that we receive from equity offerings. Although we have indicated our intent to use the proceeds from recent offerings for general corporate purposes, including future acquisitions, our working capital needs and investments in our subsidiaries, our management retains significant discretion with respect to the use of proceeds. The proceeds of our offerings

Edgar Filing: IBERIABANK CORP - Form 10-K

may be used in a manner which does not generate a favorable return for us. We may use the proceeds to fund future acquisitions of other businesses. In addition, if we use the funds to acquire other businesses, there can be no assurance that any business we acquire would be successfully integrated into our operations or otherwise perform as expected.

Table of Contents

We may issue additional securities, which could dilute your ownership percentage.

In many situations, our board of directors has the authority, without any vote of our shareholders, to issue shares of our authorized but unissued stock, including shares authorized and unissued under our stock option plans. In the future, we may issue additional securities, through public or private offerings, to raise additional capital or finance acquisitions. Moreover, to the extent that we issue restricted stock units, stock appreciation rights, options or warrants to purchase our common stock in the future and those stock appreciation rights, options or warrants are exercised or as the restricted stock units vest, our shareholders may experience further dilution. Any such issuance would dilute the ownership of current holders of our common stock.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

As of December 31, 2009, we operated 209 combined offices, including 136 bank branch offices in Louisiana, Arkansas, Alabama, Florida, Texas, and Tennessee, 26 title insurance offices in Arkansas and Louisiana, and had mortgage representatives in 26 locations in twelve states. Office locations are either owned or leased. For offices in premises leased by us or our subsidiaries, rent expense totaled \$4.6 million in 2009. During 2009, we and our subsidiaries received \$1.4 million in rental income for space leased to others. At December 31, 2009, there were no significant encumbrances on the offices, equipment and other operational facilities owned by us and our subsidiaries.

Additional information on our premises is provided in Note 7 to the Consolidated Financial Statements incorporated herein by reference.

Item 3. Legal Proceedings.

We are subject to certain claims and litigation arising in the ordinary course of business. In the opinion of management, after consultation with legal counsel, the ultimate disposition of these matters is not expected to have a material effect on our consolidated financial position.

Item 4. RESERVED

Executive Officers of the Registrant

Set forth below is information with respect to the executive officers of IBERIABANK Corporation and principal occupations and positions held for periods including the last five years.

DARYL G. BYRD, age 55, has served as our President since 1999 and as Chief Executive Officer since 2000. He also serves as President and Chief Executive Officer of each of the Banks.

ANTHONY J. RESTEL, age 40, has served as Senior Executive Vice President and Chief Financial Officer since February 2005. Mr. Restel was hired as Vice President and Treasurer in 2001 and previously served as Chief Credit Officer of each of the Banks.

MICHAEL J. BROWN, age 46, has served as Senior Executive Vice President since 2001. In September 2009, Mr. Brown was appointed Vice-Chairman and Chief Operating Officer. Mr. Brown is responsible for management of all of our banking markets.

JEFFERSON G. PARKER, age 57, serves as our Vice-Chairman and Managing Director of Brokerage, Trust, and Wealth Management. He has served as our Vice-Chairman since September 2009. Before his employment with the Company, Mr. Parker was a member of our Board of Directors since 2001. Prior to joining IBERIABANK, he served as President of Howard Weil, Inc., an energy research and investment banking boutique serving the institutional investors.

Table of Contents

JOHN R. DAVIS, age 49, has served as Senior Executive Vice President Mergers and Acquisitions/Finance and Investor Relations since 2001. He also serves as Director of Finance Strategy and Mortgage.

MICHAEL A. NAQUIN, age 49, has served as Senior Executive Vice President since March 2004. He also serves as Director of Retail Segment and Facilities.

ELIZABETH A. ARDOIN, age 41, joined the Company in 2002 as Senior Vice President and Director of Communications. In 2005, she was promoted to Executive Vice President continuing to serve in the same capacity for the organization.

GEORGE J. BECKER III, age 69, has served as Executive Vice President, Director of Organizational Development since February 2005. In 2007, he began his second tenure as Director of Corporate Operations. Mr. Becker, a Certified Public Accountant, also serves as Secretary of IBERIABANK Corporation and each of the Banks.

BARRY F. BERTHELOT, age 60, joined the Company in 2010 as Executive Vice President and Director of Organizational Development. Prior to joining IBERIABANK, he served as President of the Acadiana market for JP Morgan Chase.

JAMES B. GBUREK, age 59, serves as Executive Vice President and Chief Risk Officer of the Company and each of its financial institution subsidiaries. He joined the Company in 2009. Mr. Gburek is responsible for managing internal and external risks, including oversight of the Audit, Loan Review, Compliance, and Legal functions, as well as serving as regulatory agency liaison. From July 2008 to February 2009, he was Chief Credit Officer for Trident National Bank (in organization). Prior to that time, he worked for Wachovia Corporation for 23 years, where he last served as Managing Director of the Latin American Group in the Corporate and Investment Bank.

H. GREGG STRADER, age 51, serves as Executive Vice President and Chief Credit Officer since his appointment in 2009. Mr. Strader previously served as Senior Credit Officer and led our Special Assets Department and our Business Credit Services group prior to becoming Chief Credit Officer. Prior to joining the Company in 2009, Strader worked for Wachovia Corporation in a number of various senior credit roles for 23 years. From April 2005 until May of 2008, he served as Chief Real Estate Risk Officer for Wachovia.

Stock Performance Graph

The following graph and table, which were prepared by SNL Financial LC (SNL), compares the cumulative total return on our Common Stock over a measurement period beginning December 31, 2004 with (i) the cumulative total return on the stocks included in the National Association of Securities Dealers, Inc. Automated Quotation (NASDAQ) Composite Index and (ii) the cumulative total return on the stocks included in the SNL \$5 Billion-\$10 Billion Bank Index. All of these cumulative returns are computed assuming the quarterly reinvestment of dividends paid during the applicable period. Our stock value has been adjusted for a 5 for 4 stock split in August 2005.

Table of Contents

Index	Period Ending					
	12/31/04	12/31/05	12/31/06	12/31/07	12/31/08	12/31/09
IBERIABANK Corporation	100.00	98.03	115.84	94.15	99.44	114.80
NASDAQ Composite	100.00	101.37	111.03	121.92	72.49	104.31
SNL Bank \$5B-\$10B	100.00	96.89	104.56	83.86	73.57	56.56

The stock performance graph assumes \$100.00 was invested December 31, 2004. The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Additional information required herein is incorporated by reference to Management's Discussion and Analysis of Financial Condition and Results of Operations and Corporate Information Data in Exhibit 13 hereto.

Share Repurchases

In April 2007, the Board of Directors of the Company authorized a share repurchase program authorizing the repurchase of up to 300,000 shares of the Company's outstanding common stock, or approximately 1.4% of total shares outstanding. As of December 31, 2009, the Company had 149,029 shares remaining for repurchase under the plan.

Stock repurchases generally are affected through open market purchases, and may be made through unsolicited negotiated transactions. During 2009, the Company did not repurchase any shares of its common stock.

	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	2009	Maximum Number of Shares Available for Purchase Pursuant to Publicly Announced Plan
			Total Number of Shares Purchased as Part of Publicly Announced Plan (Shares in Thousands)	
October 1-31	3,340	\$ 44.51		149,029
November 1-30	2,046	53.12		149,029
December 1-31	342	56.28		149,029
Total	5,728	\$ 48.29		149,029

(1) Repurchases reflect shares exchanged or surrendered in connection with the exercise of equity-based awards under the Company's equity-based compensation plans.

Item 6. Selected Financial Data.

The information required herein is incorporated by reference to Selected Consolidated Financial and Other Data in Exhibit 13 hereto.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The information required herein is incorporated by reference to Management's Discussion and Analysis of Financial Condition and Results of Operations in Exhibit 13 hereto.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosures.

None.

Item 9A. Controls and Procedures.

As required by Rule 13a-15 under the Securities Exchange Act of 1934 (the Exchange Act), we performed an evaluation of the effectiveness of our disclosure controls and procedures as of December 31, 2009. The evaluation was carried out under the supervision, and with the participation of, the Chief Executive Officer (CEO) and Chief Financial Officer (CFO). Based on that evaluation, the CEO and CFO have concluded that our disclosure controls and procedures are effective in alerting them in a timely manner to material information required to be disclosed by us in reports that it files or submits under the Exchange Act.

In addition, we reviewed our financial reporting internal controls. There was no significant change in our internal control over financial reporting during the last fiscal quarter that has materially affected, or is reasonable likely to materially affect, our internal control over financial reporting. Management s Annual Report on Internal Control over Financial Reporting, and the attestation report of the independent registered public accounting firm are included in Exhibit 13 and are incorporated by reference herein.

Item 9B. Other Information.
