PART I

ITEM 1. BUSINESS

Background

Nocopi Technologies, Inc. (hereinafter "Nocopi", "Registrant" or the "Company") is a Maryland corporation organized in 1983 to exploit a technology developed by its founders for impeding the reproduction of documents on office copiers. In its early stages of development, Nocopi's business consisted primarily of selling copy resistant paper to protect corporate documents and information. More recently, Registrant has increasingly focused on developing and marketing technologies for document and product authentication which can reduce losses caused by fraudulent document reproduction or by product counterfeiting and/or diversion. Since 2003, the Registrant has focused on developing specialty reactive inks that it believes have applications in the large educational and toy market. During 2009, Registrant expanded its retail loss prevention market activities by entering into licensing arrangements with several printers and distributors who serve this market and refocused its sales and marketing efforts to utilize licensed printers and distributors to market its technologies to major retailers. Registrant derives revenues by licensing its technologies, both to end-users and to value-added resellers, and by selling products incorporating its technologies and technical support services.

Registrant experienced a significant decline in its financial condition from the late 1990's through 2006. However, in 2007, it recorded net income and positive cash flow from operations for the first time in a number of years primarily as a result of licenses signed in 2006 and early 2007 with Elmer's Products, Inc. ("Elmer's"), a privately held industry leader in adhesives, arts and crafts and educational products, and two of Elmer's operating companies, Giddy Up and Color Loco. From 2008 through 2010, Registrant recorded declines in revenues with resultant net losses primarily as a result of a significant decline in ink sales to Elmer's and its licensed printers as well as Elmer's decisions in early 2010 to discontinue a product line, called Go Paint!, which utilized technologies licensed from Registrant, cease ink purchases related to the Go Paint! products and sell off its remaining Go Paint! inventory. The ongoing global recession that impacted the sales of the Registrant's licensees has also negatively affected Registrant's revenues and caused net losses in recent years. While Registrant's 2010 revenues were negatively affected by Elmer's decision, the revenue loss caused by this licensee's discontinuance of the Go Paint! product line in 2010 was substantially offset by Registrant's obtaining a new licensee in the entertainment and toy products market, increased revenues from licensees in the retail loss prevention market and a sale to a new international customer that introduced products incorporating Registrant's technologies in South America. In 2011, Registrant experienced an increase in revenues of approximately 8% to \$713,500 from \$658,700 in 2010 primarily due to higher ink orders from the licensed printers of Elmer's and a new licensee in the entertainment and toy products market who entered into a multi-year license with Registrant in 2010 and introduced its initial line of products incorporating Registrant's technologies in the second half of 2011. In September 2011, Elmer's sold its Giddy Up and Color Loco divisions, each of which utilize a technology license with Registrant to a business with a significant presence in the entertainment and toy products market and, with Registrant's consent, assigned the technology license to the purchaser. Registrant's net loss decreased substantially in 2011 to \$27,300 compared to \$245,100 in 2010; this was due to an improved gross profit on the higher level of sales as well as a license transfer fee related to the Elmer's transaction and the reversal of certain liabilities that are no longer statutorily payable. In 2011, Registrant realized a positive cash flow from operations of \$19,300. Historically, during past periods of adverse liquidity, Registrant relied upon capital investment and various short-term loans to provide liquidity needed to avoid a cessation of its operations.

Registrant is currently attempting to raise additional capital, in the form of debt, equity or both to support its working capital requirements and to provide funding for other business opportunities. There are no assurances that Registrant will be able to attract such additional capital.

In late 2003, Registrant developed and began to market a new technology, named Rub-it & Color, which consists of a system of removable dyes in a large variety of colors that can be activated through rubbing with a fingernail or a firm object. Registrant believed this technology had applications in children's activity products, such as coloring books without crayons, and in educational testing review products. Registrant displayed this technology to several potential licensees and participated in trade shows including, from 2004 to 2012, the American International Toy Fair in New York City where the technology received several industry awards. In April 2006, Registrant signed multi-year license agreements with Giddy Up and Color Loco, two leading children's books publishers with proven

Table of Contents

Index to Financial Statements

track records of innovation and access to major channels of distribution. Registrant subsequently amended these license agreements to expand the licenses. In October 2006, both Giddy Up and Color Loco became wholly owned by Elmer's, a privately held industry leader in adhesives, arts and crafts and educational products. Products incorporating Registrant's technologies, including Giddy Up's Rub-n-Color activity books and kits have been on sale in leading retail outlets since January 2007 and have received coverage in the press and on television. In late 2009, the Registrant entered into a three-year license agreement with Elmer's which commenced in January 2010, containing guaranteed minimum annual royalties and covering the products sold by its Giddy Up and Color Loco divisions under the previous license agreements. In the third quarter of 2011, Elmer's sold its Giddy Up and Color Loco divisions which utilize the technology license with Registrant to a business with a significant presence in the entertainment and toy products market and, with Registrant's consent, assigned the technology license to the purchaser.

In February 2007, Registrant entered into a multi-year license agreement with Elmer's whereby Registrant's technologies have been incorporated into products sold under the Elmer's brand including its Go Paint! line of children's products. Retail sales of these products commenced in the second quarter of 2007. In March 2010, Registrant was informed by Elmer's that Elmer's was discontinuing the Go Paint! product line, ceasing ink purchases related to the Go Paint! products and selling off its remaining Go Paint! inventory. In the second quarter of 2010, Registrant concluded a multi-year license for the technology previously licensed by Elmer's, containing guaranteed minimum royalties, with a new licensee in the entertainment and toy products market; this license generated revenues in the second half of 2010. In mid-2011, this licensee's initial line of products incorporating Registrant's technologies was introduced in certain retail outlets nationwide. Registrant believes this licensee will continue to generate revenues, from among other things, its demand for ink sales, in the future, as the licensee continues to expand and enhance its product offering. There can be no assurances that this licensee will generate significant additional operating revenues for the Registrant. In 2010 and 2011, the Registrant made sales to a large international business that introduced entertainment and toy products that incorporate Registrant's technologies into South America. There can be no assurances that this customer will continue to purchase and distribute products incorporating Registrant's technologies in the future.

Entertainment and Toy Technologies and Products

As mentioned above, in late 2003, the Registrant developed a new technology that consists of removable dyes that can be produced in a variety of colors and can be revealed by rubbing with a fingernail or other firm object such as a plastic pen cap. This technology has been named Rub-it & Color. Registrant believes that this new technology does not compromise the confidentiality of its security and authentication technologies whose chemistry is similar but the specific formulations are different for each application. Applications include children's activity products such as coloring books without crayons or restaurant place mats, educational instruction books and testing review manuals. Registrant has obtained certifications of non-toxicity from the Consumer Products Services, Inc. and the American Society for Testing and Materials Laboratories. In February 2004, Registrant inaugurated its marketing efforts for this new technology at the American International Toy Fair in New York City. Registrant continued to attend the Toy Fair each February from 2005 through 2012. During 2004, Registrant received awards from both Creative Child Magazine and Spectrum Magazine for its Rub-it & Color Activity Book. As a result of its participation and marketing activities, Registrant identified a number of potential licensees in the children's and educational markets. In April 2006, Registrant signed multi-year license agreements with Giddy Up and Color Loco, two leading children's book publishers who had proven track records of innovation and access to major channels of distribution. Registrant subsequently amended these agreements to expand the licenses. In October 2006, both Giddy Up and Color Loco became wholly owned by Elmer's, a privately held company. Since January 2007, products incorporating Registrant's technologies, including Giddy Up's Rub-n-Color activity books and kits have been on sale in leading retail outlets and have received coverage in the press and on television. In late 2009, the Registrant entered into a three-year license agreement with Elmer's which commenced in January 2010 containing guaranteed minimum annual royalties and covering the products sold by its Giddy Up and Color Loco divisions under the previous license agreements. Revenues derived directly from Elmer's, including its Giddy Up and Color Loco divisions, and from its third party printer, accounted for approximately 41% of Registrant's total 2011 revenues, approximately 23% from Elmer's and its operating companies and approximately 18% from its licensed third party printer. In the third quarter of 2011, Elmer's sold its Giddy Up and Color Loco divisions who utilized the technology license with Registrant to a business with a significant presence in the entertainment and toy products market and, with Registrant's consent, assigned the technology license to the purchaser. In January 2012, Registrant negotiated a new six-year license, containing guaranteed royalties for 2012, with the acquirer of the license which permits this

Table of Contents

Index to Financial Statements

licensee to exclusively market a specific line of products incorporating Registrant's technologies through a specific distribution channel but permitting Registrant to license the covered technologies to others for applications and sale through channels of distribution not available to this licensee under the terms of the new license. In February 2012, Registrant negotiated a license, expiring in 2015 and containing guaranteed minimum royalties over the term of the license, with another new licensee who also has a significant presence in the entertainment and toy products market that permits this licensee to exclusively market products with other characteristics that incorporate Registrant's technologies through a distinctly different channel of distribution. These two new licensees are well known and highly regarded participants in the entertainment and toy products market with significantly greater market recognition and retail distribution in this market than Elmer's. Registrant believes that both new licensees will introduce their initial products incorporating Registrant's technologies by mid-2012. The agreements with both licensees contain renewal options but there can be no assurances that the licenses will continue in force at the same or more favorable terms beyond their current termination dates nor can there be any assurances that the relationships with these two new licensees will generate revenues for Registrant equal to or greater than those generated by Elmer's.

In February 2007, Registrant entered into a multi-year license agreement with Elmer's whereby Registrant's technologies were incorporated into products sold under the Elmer's brand including its Go Paint! line of children's products. In March 2007, Registrant received initial ink orders from Elmer's and, in the second quarter of 2007, Elmer's began actively marketing products incorporating Registrant's technologies. Revenues derived directly from Elmer's, including its Giddy Up and Color Loco divisions, and from its third party printer, accounted for approximately 41% of Registrant's total 2011 revenues, approximately 23% from Elmer's and its operating companies and approximately 18% from its third party printer. In March 2010, Registrant was informed by Elmer's that Elmer's was discontinuing the Go Paint! product line, ceasing ink purchases related to the Go Paint! products and selling off its remaining Go Paint! inventory. In 2009 and 2010, Registrant experienced a significant decline in both royalties and ink sales related to decreased revenue generated by its license with Elmer's for the technology used in Elmer's Go Paint! products. In the second quarter of 2010, Registrant concluded a multi-year license for the technology previously licensed by Elmer's, containing guaranteed minimum royalties, with a new licensee in the entertainment and toy products market that generated revenues beginning in the second half of 2010. In mid-2011, this licensee's initial line of products incorporating Registrant's technologies was introduced in certain retail outlets nationwide. Registrant believes this licensee will continue to generate revenues, from among other things, its demand for ink sales, in the future, as the licensee continues to expand and enhance its product offering. There can be no assurances that this licensee will generate significant additional operating revenues for Registrant.

In 2010 and 2011, the Registrant made sales to a large international business that introduced entertainment and toy products that incorporate Registrant's technologies into South America. There can be no assurances that this customer will purchase and distribute products incorporating Registrant's technologies in the future.

In March 2011, Registrant completed a multi-year license agreement with a designer of creative educational products for children granting the licensee the exclusive right to utilize Registrant's Rub-it & Color ink technology in a newly-created vertical market in the United States. In addition to an annual license fee, Registrant receives a royalty based on units of product produced. Receipt of royalties commenced in the second quarter of 2011. There can be no assurances that the marketing efforts of Registrant's licensee will generate significant additional revenues for the Registrant.

Registrant continues to pursue additional licensing opportunities for its technologies in the large entertainment and toy products market through direct marketing efforts and attendance at trade shows. There can be no assurances that the Registrant's available resources, even with additional investment, if obtained, for marketing and further technical development of this product line will be sufficient to increase Registrant's revenues.

Anti-Counterfeiting and Anti-Diversion Technologies and Products

Continuing developments in copying and printing technologies have made it ever easier to counterfeit a wide variety of documents. Lottery tickets, gift certificates, event and transportation tickets, travelers' checks and the like are all susceptible to counterfeiting, and Registrant believes that losses from such counterfeiting have increased substantially with improvements in the copying and printing technologies. Product counterfeiting has long caused losses to manufacturers of brand name products, and Registrant believes these losses have increased as the counterfeiting of labeling and packaging has become easier.

Table of Contents

Index to Financial Statements

Registrant's proprietary document authentication technologies are useful to businesses desiring to authenticate a wide variety of printed materials and products. One product incorporating these technologies has the ability to print invisibly on certain areas of a document. When authentication of certain documents is required, the invisible printing can be activated or revealed by use of a special highlighter pen. This technology is marketed under the trademark COPIMARK. Other variations of the COPIMARK technology involve multiple color responses from a common pen, visible marks of one color that turn another color with the pen or visible and invisible marks that turn into a multicolored image. A related technology is Nocopi's RUB & REVEAL system, which permits the invisible printing of an authenticating symbol or code that can be revealed by rubbing a fingernail over the printed area. These technologies provide users with the ability to authenticate documents and detect counterfeit documents. Applications include the authentication of documents having intrinsic value, such as merchandise receipts, checks, travelers' checks, gift certificates and event tickets, and the authentication of product labeling and packaging. When applied to product labels and packaging such technologies allow detection of counterfeit products, the labels and packaging of which would not contain the authenticating marks invisibly printed on the packaging or labels of the legitimate product. These technologies also combat product diversion (i.e. sale of legitimate products through unauthorized distribution channels or in unauthorized markets). A related technology of the Registrant, the invisible inkjet technology permits manufacturers and distributors to track the movement of products from production to ultimate consumption when coupled with proprietary software. Management believes that the track and trace capability provided by this technology will be attractive to brand owners and marketers. Registrant continues to pursue opportunities for its patented anti-counterfeiting and anti-diversion technologies as a potential solution to counterfeit and diverted pharmaceutical products. While this market incentive has not developed revenues to date, Registrant continues to pursue opportunities in this market. There are no assurances that initiatives currently underway in the pharmaceutical and other markets will result in additional revenues in the future.

For a number of years, Registrant has participated in the retail receipt and document fraud market through a licensing arrangement with Nashua Corporation (Nashua), initially on an exclusive basis but since 2009 on a non-exclusive basis; this non-exclusive relationship allows Registrant to participate in this market to sell its security products directly to other outlets, including loss prevention departments within retail businesses and chains and/or to make non-exclusive licenses available to other printers who serve this market segment. A formal 2012 license with Nashua has not been finalized but, pending these ongoing discussions, the companies continue to conduct business on the same basis as in 2011 and, in Registrant's view, under the terms of the last executed agreement. Since 2009, in addition to its licensing relationship with Nashua, Registrant established licensing relationships with three printers and distributors in the United States and Canada who provide loss prevention products to retailers and other outlets. Registrant believes that these technologies are most efficiently marketed through the use of licensed printers and distributors. Registrant continues to use its available internal sales and technical resources to expand the number of licensees marketing its technologies in this market. During 2011, Registrant derived approximately 28% of its 2011 total revenues from its four licensees in the retail loss prevention market compared to approximately 34% derived from this market in 2010. There can be no assurances that Registrant's strategy for the retail loss prevention market will result in significant additional revenues and cash flow for Registrant.

Document Security Products

Since its inception, Registrant has offered a line of burgundy colored papers that deter photocopying and transmission by facsimile. While this colored paper successfully inhibits photocopier reproduction, it also diminishes legibility to the reader. Registrant offers its copy resistant papers in three grades, each balancing improved copy resistance against diminished legibility. Registrant also sells user defined, pre-printed forms on which selected areas are colored to inhibit reproduction. An example is a doctor's prescription form with the signature area protected. This product line is called SELECTIVE NOCOPI. Registrant also offers several inks that impede photocopying by color copiers. This technology is called COLORBLOC.

Registrant, in addition to marketing its own technologies and products, has acted as a distributor for a line of Pantograph security paper. This patented product, complementary to the Registrant's line of security paper, produces a message, such as "unauthorized copy," when a copy of an original document that was printed or typed on the Pantograph paper is reproduced on a photocopier. This product line is called COPI-ALERT.

Registrant also markets Secure Rub Rx, a specially designed prescription paper base stock that incorporates all three tamper resistant characteristics mandated by the U.S. Department of Health & Human Services for Medicaid prescriptions beginning in October 2008 including certain tamper resistant requirements that became effective in April 2008. Registrant has generated only minimal revenues from this product since its introduction in 2008.

Table of Contents**Index to Financial Statements**

As a result of declining sales of Registrant's security paper over the past several years, Registrant is not replenishing its inventory of security paper and does not intend to offer such products for sale when the remaining supply of these products, whose value was fully reserved prior to 2011, is exhausted.

The following table illustrates the approximate percentage of Registrant's revenues accounted for by each type of its products for each of the two last fiscal years:

Product Type	Year Ended December 31	
	2011	2010
Entertainment and Toy Technologies and Products	61%	50%
Anti-Counterfeiting and Anti-Diversion Technologies and Products	38%	47%
Document Security Products	1%	3%

Marketing

Registrant's marketing approach focuses on the sufficient flexibility in its products and technologies and its ability to provide cost effective solutions to a wide variety of counterfeiting, diversion and copier fraud problems. As a technology company, Registrant generates revenues primarily by collecting license fees from market-specific manufacturers that incorporate Registrant's technologies into their manufacturing processes and products and, in certain cases, sales of Registrant's inks to these licensees and their designated manufacturers. Registrant also licenses its technologies directly to end-users.

Registrant has identified a number of major markets for its technologies and products, including security printers, labels, packaging materials and specialty paper products and brand name products. Within each market, key potential users have been identified and several have been licensed. Within North America, sales efforts include direct selling by Company personnel to create end user demand and selling through licensee sales forces and sales agents with support from Company personnel. Registrant has determined that technical sales supported by its personnel is of great importance and results increasing its licensees' sales of products incorporating Registrant's technologies and, therefore, seeks to maintain, to the extent permitted by its limited resources, its commitment to providing such support.

In recent years, Registrant's management has somewhat refocused the Company's marketing efforts in view of the limited resources available to the Company for marketing and the need to improve the Registrant's cash flow. Current marketing efforts are focused on Registrant's more mature technologies that can be utilized by customers with relatively fewer development efforts.

As continued improvements in color copier and desktop publishing technology make counterfeiting and fraud opportunities less expensive and more available, Registrant intends, to the extent feasible, to maintain an interactive product development and enhancement program through the combined efforts of marketing, applications engineering and research and development. Registrant's objective is to concentrate its efforts on developing market-ready products with the most favorable ratios of market potential to development time and cost.

Except in Europe, Registrant markets its technologies through its own employees and through independent sales representatives. In Europe, certain of its security technologies are marketed by Contrast Technologies, formerly known as Euro-Nocopi, S.A., and a former affiliate of the Registrant, which holds certain European marketing rights with respect to those technologies.

Registrant is presently considering a number of marketing strategies for its Rub-it & Color product line including licensing and direct sales through product retailers, continued service to the markets presently served by its licensees and to potential markets not presently served by its existing licensees.

Registrant continues its efforts to improve the marketing of its technologies. Since 2008, Registrant has maintained a

Table of Contents

Index to Financial Statements

web site developed in conjunction with Minerva Design, a creative marketing and communications agency associated with a number of well known brands. During 2009, Registrant finalized a strategy to market its proprietary security inks to the retail loss prevention market, appointing three new printers and distributors in the United States and Canada. During 2010, Registrant concluded a multi-year license with a business in the domestic entertainment and toy products market and established a relationship with a large international business that introduced entertainment and toy products that incorporate the Registrant's technologies into South America. During 2011 and early 2012, Registrant established multi-year licensing relationships with two well-known and highly regarded businesses in the entertainment and toy products market. Registrant, through its internal sales resources, continues its marketing efforts to former and potential customers in the anti-counterfeiting and anti-diversion marketplace and to prospective licensees in the entertainment and toy products market. There can be no assurances that the limited resources Registrant can dedicate to its marketing activities will result in significant additional revenues in the future.

Major Customers

During 2011, Registrant made sales or obtained revenues equal to 10% or more of Registrant's 2011 total revenues from three non-affiliated customers who individually accounted for approximately 23%, 20% and 18%, respectively, of 2011 revenues of the Company.

Manufacturing

Registrant has a small facility for the manufacture of its security inks. Except for this facility, Registrant does not maintain manufacturing facilities. Registrant presently subcontracts the manufacture of its applications (mainly printing and coating) to third party manufacturers and expects to continue such subcontracting. Because some of the processes that Nocopi uses in its applications are based on relatively common manufacturing technologies, there appears to be no technical or economic reason for Registrant to invest capital in its own manufacturing facilities.

Registrant has established a quality control program that currently entails laboratory analysis of developed technologies. When warranted, Registrant's specially trained technicians travel to third party production facilities to install equipment, train client staff and monitor the manufacturing process.

Patents

Since its inception, Registrant has received various patents in the United States, Canada, South Africa, Saudi Arabia, Australia, New Zealand, Japan, France, the United Kingdom, Belgium, the Netherlands, Germany, Austria, Italy, Sweden, Switzerland, Luxembourg, and Liechtenstein. Registrant currently has a patent pending in the United States but there can be no assurance that such patent will be obtained. Registrant currently has obtained patent protection on substantially all of its security inks including the RUB & REVEAL system and the Rub-it & Color technology. Registrant's patent pending is on a certain newly developed technology that Registrant believes has applications in the entertainment and toy products market.

When a new product or process is developed, the developer may seek to preserve for itself the economic benefit of the product or process by applying for a patent in each jurisdiction in which the product or process is likely to be exploited. Generally speaking, in order for a patent to be granted, the product or process must be new and be inventively different from what has been previously patented or otherwise known anywhere in the world. Patents generally have a duration of twenty years from the date of application depending on the jurisdiction concerned, after which time any person is free to exploit the product or process covered by a patent. A person who is the owner of a patent has, within the jurisdiction in which the patent is granted, the exclusive right, either directly or through licensees, to prevent any person from infringing on the patent.

The granting of a patent does not prevent a third party from seeking a judicial determination that the patent is invalid. Such challenges to the validity of a patent are not uncommon and are occasionally successful. There can be no assurance that a challenge will not be filed to one or more of Registrant's patents and that, if filed, such challenge(s) will not be successful.

In the United States and some other countries, patent applications are automatically published at a specified time after filing. Nocopi is required to pay annuities from time to time on patents to keep them in force; with this in mind,

Table of Contents

Index to Financial Statements

Nocopi makes an annual evaluation of its patents in order to determine which patents it will continue to maintain. In Europe, the territory of Contrast Technologies, formerly known as Euro-Nocopi, S.A. (Contrast), annuities for European patents are paid by Contrast.

Research and Development

Registrant has been involved in research and development since its inception. Although Registrant's financial condition has forced it to reduce funding for research and development in recent years, it intends to continue its research and development activities in three areas, to the extent feasible. First, Registrant will seek to continue to refine its present family of products. Second, Registrant will seek to develop specific customer applications. Finally, Registrant will seek to expand its technology into new areas of implementation. There can be no assurances that Registrant will continue to have funds available to maintain its research and development activities at current or increased levels.

During the years ended December 31, 2011 and 2010, Registrant expended approximately \$113,700 and \$132,300 respectively, on research and development.

Competition

In the area of document and product authentication and serialization, Registrant is aware of other covert and overt surface marking technologies requiring decoding implements or analytical methods to reveal certain information. These technologies are offered by other companies for the same anti-counterfeiting and anti-diversion purposes for which the Registrant markets its covert technologies. These include, among others, biological DNA codes, microtaggants, thermochronic, UV and infrared inks as well as encryption, 2D symbology and laser engraving. Nonetheless, Registrant believes its patented and proprietary technologies provide a unique and cost-effective solution to the problem of counterfeiting and gray marketing in the document and product authentication markets it has traditionally sought to exploit.

The entertainment and toy products markets include numerous potential competitors who have significantly greater financial resources and presence in these markets than Registrant.

The loss prevention market includes numerous potential competitors, including large-publicly traded companies such as NCR Corporation and regional paper converters, many of whom have greater financial resources and presence in these markets than Registrant.

Registrant currently has limited resources and competes with businesses that have greater financial resources than Registrant. There can be no assurance that businesses with greater resources than Registrant will not enter Registrant's markets and compete successfully with Registrant.

Contrast Technologies (formerly Euro-Nocopi, S.A.)

Contrast Technologies, formerly known as Euro-Nocopi, S.A., is a former affiliate of Registrant which, since June 2003, has held a perpetual royalty-free license to exploit certain of Registrant's technologies in Europe.

Employees

At March 16, 2012, Registrant had three full-time and two part-time employees.

Financial Information about Foreign and Domestic Operations

Registrant conducts its operations solely in the United States; however, it does have licensees and customers in Europe, Asia and South America. These licensees and customers accounted for approximately 25% of Registrant's gross revenues in 2011 and approximately 13% in 2010. Certain information concerning Registrant's foreign and domestic operations is contained in Note 12 to Registrant's Financial Statements included elsewhere in this Annual Report on Form 10-K.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Registrant's corporate headquarters, research and ink production facilities are located at 9C Portland Road, West Conshohocken, Pennsylvania 19428. Its telephone number is (610) 834-9600. These premises consist of approximately 5,000 square feet of space in a multi-tenant building leased by the Registrant from an unaffiliated third party pursuant to a lease expiring in March 2013. Current monthly rent under this lease is \$3,542; this amount escalates an amount of three percent on each anniversary date of the lease. In addition to rent, Registrant is responsible for its pro-rata share of the operating costs of the building. Registrant incurred leasehold improvement expenditures of approximately \$72,500 through December 31, 2011 and believes that additional leasehold improvement expenditures will not be significant. Registrant believes that this space will be adequate for its current needs and that additional space will be available as needed.

ITEM 3. LEGAL PROCEEDINGS

Registrant is not aware of any pending litigation (other than ordinary routine litigation incidental to its business where, in management's view, the amount involved is not material) to which Registrant is or may be a party, or to which any of its properties is or may be subject, nor is it aware of any pending or contemplated proceedings against it by any governmental authority. Registrant knows of no material legal proceedings pending or threatened, or judgments entered against, any director or officer of Registrant in his capacity as such.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Registrant's Common Stock is traded on the OTCQB, the over-the-counter (OTC) market tier for companies that report to the SEC or a U.S. banking or insurance regulator, under the symbol NNUP. The table below presents the range of high and low sales prices of Registrant's Common Stock by calendar quarter for the last two full fiscal years and for a recent date, as reported by OTC Markets Group Inc.

	High	Low
January 1, 2010 to March 31, 2010	\$.12	\$.05
April 1, 2010 to June 30, 2010	\$.10	\$.03

Table of Contents

Index to Financial Statements

As of March 16, 2012, 58,554,800 shares of Registrant's Common Stock were outstanding. The number of holders of record of Registrant's Common Stock was approximately 600. However, Registrant estimates that it has a significantly greater number of common stockholders because a number of shares of Registrant's Common Stock are held of record by broker-dealers for their customers in street name. In addition to the 58,554,800 shares of Common Stock which are outstanding, Registrant, at March 16, 2012, has reserved for the issuance of 730,500 shares of its Common Stock which underlie options and warrants to purchase common stock of the Registrant.

The Company did not pay dividends in 2011 or 2010 and does not anticipate paying any such dividends in the foreseeable future. Any determination to pay dividends in the future will be at the discretion of the Company's Board of Directors and will be dependent upon the Company's results of operations, financial condition, contractual restrictions and other factors deemed relevant by the Board of Directors.

Information required with respect to Equity Compensation Plans in this Item 5 is included in Item 12 on page 23 of this report on Form 10-K.

Recent Sales of Unregistered Securities

On April 6, 2011, the Company sold 96,154 shares of its Common Stock, \$0.01 per share (the "Common Stock") to an individual accredited investor (who was acquainted with a member of the Company's Board of Directors) for \$5,000, or \$0.052 per share; on April 16, 2011, the Company sold 96,154 shares of its Common Stock to an individual accredited investor (who was acquainted with a member of the Company's Board of Directors) for \$5,000, or \$0.052 per share; on May 10, 2011, the Company sold 96,154 shares of its Common Stock to an individual accredited investor (who was acquainted with a member of the Company's Board of Directors) for \$5,000, or \$0.052 per share; on June 9, 2011, the Company sold 46,875 shares of its Common Stock to an individual accredited investor (who was acquainted with a member of the Company's Board of Directors) for \$3,000, or \$0.064 per share. The shares of Common Stock were sold in private transactions exempt from registration pursuant to Section 4(2) of the Securities Act. Appropriate legends were affixed to the securities issued in these transactions. The recipients of securities in these transactions had adequate access, through employment or business relationships, to information about the Company. No underwriters were involved in these transactions or received any commissions or other compensation. Proceeds of the sale of Common Stock were used to fund the Company's working capital requirements.

On November 15, 2011, the Company entered into a Conversion Agreement with two individual accredited investors whereby unsecured loans in the aggregate principal amount of \$6,500 (including \$1,500 representing a portion of an unsecured loan held by Herman M. Gerwitz, a Director) together with approximately \$700 of accrued interest on one of the unsecured loans were converted into an aggregate of 159,088 shares of its Common Stock at \$0.045, the market price at the date of conversion. As a result, an aggregate of 159,088 shares of restricted Common Stock were issued including 33,333 shares to Mr. Gerwitz.

On February 10, 2012, the Company sold 104,167 shares of its Common Stock to an individual accredited investor (who was acquainted with a member of the Company's Board of Directors) for \$5,000, or \$0.048 per share; on March 16, 2012, the Company sold 104,167 shares of its Common Stock to an individual accredited investor (who was acquainted with a member of the Company's Board of Directors) for \$5,000, or \$0.048 per share. The shares of Common Stock were sold in private transactions exempt from registration pursuant to Section 4(2) of the Securities Act. Appropriate legends were affixed to the securities issued in these transactions. The recipient of securities in these transactions had adequate access, through employment or business relationships, to information about the Company. No underwriters were involved in these transactions or received any commissions or other compensation. Proceeds of the sale of Common Stock were used to fund the Company's working capital requirements.

Issuer Repurchases of Equity Securities

None.

ITEM 6. SELECTED FINANCIAL DATA

Not required for a smaller reporting company.

Table of Contents

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Information

This Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, regarding, among other things, anticipated improvements in operations, the Company's plans, earnings, cash flow and expense estimates, strategies and prospects, both business and financial. All statements other than statements of current or historical fact contained in this report are forward-looking statements. The words believe, expect, anticipate, should, plan, will, may, intend, estimate, potential, continue and similar expressions, as they relate to the Company, are intended to identify forward-looking statements.

The Company has based these forward-looking statements largely on its current expectations and projections about future events, financial trends, market opportunities, competition, and the adequacy of the Company's available cash resources, which the Company believes may affect its financial condition, results of operations, business strategy and financial needs. This Form 10-K also contains forward-looking statements attributed to third parties. All such statements can be affected by inaccurate assumptions, including, without limitation, with respect to risks, uncertainties, anticipated operating efficiencies, new business prospects and the rate of expense increases. In light of these risks, uncertainties and assumptions, the forward-looking statements in this report may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements. For these reasons, and because of the uncertainty relating to the current financial crisis in today's economic environment and the potential reduction in demand for the Company's products, you should not consider this information to be a guarantee by the Company or any other person that its objectives and plans will be achieved. When you consider these forward-looking statements, you should keep in mind the Risk Factors and other cautionary statements set forth in this Item 7 and elsewhere in this Form 10-K. The Company's forward-looking statements speak only as of the date made. The Company undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

The following discussion and analysis of the Company's financial condition and results of operations should be read in conjunction with the financial statements and related notes, and keeping in mind this cautionary statement regarding forward-looking information.

Results of Operations

The Company's revenues are derived from royalties paid by licensees of the Company's technologies, fees for the provision of technical services to licensees and from the direct sale of (i) products incorporating the Company's technologies, such as inks, security paper and pressure sensitive labels, and (ii) equipment used to support the application of the Company's technologies, such as ink-jet printing systems. Royalties consist of guaranteed minimum royalties payable by the Company's licensees in certain cases and additional royalties which typically vary with the licensee's sales or production of products incorporating the licensed technology. Service fees and sales revenues vary directly with the number of units of service or product provided.

The Company recognizes revenue on its lines of business as follows:

- a) License fees and royalties are recognized when the license term begins. Upon inception of the license term, revenue is recognized in a manner consistent with the nature of the transaction and the earnings process, which generally is ratably over the license term;
- b) Product sales are recognized upon shipment of products, when the price is fixed or determinable and collectability is reasonably assured; and

Table of Contents

Index to Financial Statements

c) Fees for technical services are recognized when (i) the service has been rendered; (ii) an arrangement exists; (iii) the price is fixed or determinable based upon a per diem or hourly rate; and (iv) collectability is reasonably assured.

The Company believes that, as fixed cost reductions beyond those it has achieved in recent years may not be achievable, its operating results are substantially dependent on revenue levels. Because revenues derived from licenses and royalties carry a much higher gross profit margin than other revenues, operating results are also substantially affected by changes in revenue mix.

Both the absolute amount of the Company's revenues and the mix among the various sources of revenue are subject to substantial fluctuation. The Company has a relatively small number of substantial customers rather than a large number of small customers. Accordingly, changes in the revenue received from a significant customer can have a substantial effect on the Company's total revenue, revenue mix and overall financial performance. Such changes may result from a customer's product development delays, engineering changes, changes in product marketing strategies, production requirements and the like. In addition, certain customers have, from time to time, sought to renegotiate certain provisions of their license agreements and, when the Company agrees to revise such terms, revenues from the customer may be affected.

Revenues for 2011 were \$713,500, an increase of approximately 8%, or \$54,800, from \$658,700 in 2010. Licenses, royalties and fees decreased nominally in 2011 by \$500, to \$373,200 from \$373,700 in 2010. During 2011, the Company recorded higher licensing fee revenue from a licensee in the entertainment and toy products market whose multi-year license commenced in the second quarter of 2010. The Company also received license fees and royalties from a new licensee in the entertainment and toy products market whose multi-year license commenced in the second quarter of 2011. These revenue increases were offset by (i) lower license fees received from a long-term licensee in the entertainment and toy products market as the Company agreed to reduce the overall license fee due for 2011 in exchange for an adjustment to the schedule by which such fees were paid and (ii) lower royalty fees received from the Company's licensees in the retail receipt and document fraud market. Product and other sales increased by \$55,300, or approximately 19%, to \$340,300 in 2011 from \$285,000 in 2010. The higher level of ink sales in 2011 compared to 2010 is due primarily to higher ink requirements of the licensed third party printer used by the Company's major licensee in the entertainment and toy products market and initial ink sales to the licensed third party printer of the Company's new licensee in the entertainment and toy products market whose multi-year license commenced in the second quarter of 2010. Ink orders from the licensed printers of its licensees in the entertainment and toy products market were approximately \$89,000 higher in 2011 compared to 2010. Sales of security ink to the Company's licensees in the retail receipt and document fraud market declined by approximately \$26,500 in 2011 compared to 2010 and sales of the Company's security paper declined to \$10,400 in 2011 from \$17,200 in 2010. As a result of declining sales of its security paper over the past several years, the Company is not replenishing its inventory of these products and, accordingly, does not intend to offer such products for sale when the remaining supply of these products, whose value was fully reserved prior to 2011, is exhausted. In 2011, the Company recorded a sale of entertainment and toy products that incorporate the Company's technologies to a large international business for sale in South America that approximated the value of the initial sale of these products to this customer in 2010. The Company derived \$429,600 or approximately 60% of total revenues, from licensees and their licensed printers in the entertainment and toy products market in 2011 compared to \$329,300 or approximately 50% of total revenues, in 2010. The Company's licensees in the entertainment and toy products market continue to develop new products for this market and improve their current offerings; however, their sales will be affected by marketplace reaction to the new and improved products, economic conditions that influence this market segment and the economy as a whole. Revenues that the Company derives from these licensees will be similarly affected. There can be no assurances that the marketing and product development activities of licensees in the entertainment and toy products market will produce increased revenues for the Company in future periods, nor can the timing of any potential revenue increases be predicted, particularly given the uncertain economic conditions currently being experienced worldwide.

Gross profit increased to \$451,100, or approximately 63% of revenues, in 2011 from \$383,200, or approximately 58% of revenues, in 2010. Licenses, royalties and fees have historically carried a higher gross profit than product sales, which generally consist of supplies or other manufactured products that incorporate the Company's technologies or equipment used to support the application of its technologies. These items (except for inks which are manufactured by the Company) are generally purchased from third-party vendors and resold to the end-user or licensee and carry a lower gross profit than licenses, royalties and fees. The higher gross profit in 2011 compared to 2010 reflects higher product sales along with a favorable mix of product sales as well as cost reductions implemented during the second quarter of 2010.

Table of Contents

Index to Financial Statements

As the variable component of cost of revenues related to licenses, royalties and fees is a low percentage of these revenues and the fixed component is not substantial, period to period changes in revenues from licenses, royalties and fees can significantly affect both gross profit from licenses, royalties and fees as well as overall gross profit. Primarily due to the cost reductions initiated in the second quarter of 2010, the gross profit from licenses, royalties and fees increased to approximately 84% of revenues from licenses, royalties and fees in 2011 from approximately 82% in 2010.

Gross profit, expressed as a percentage of revenues, of product and other sales is dependent on both the overall sales volumes of product and other sales and on the mix of the specific goods produced and/or sold. As a result of both increased ink sales, favorable product mix and cost reductions initiated in the second quarter of 2010, the gross profit from product and other sales increased to approximately 40% of revenues in 2011 compared to approximately 27% of revenues from product and other sales in 2010.

Research and development expenses decreased to \$113,700 in 2011 from \$132,300 in 2010. The decrease in 2011 compared 2010 is due primarily to a staff reduction in the second quarter of 2010.

Sales and marketing expenses increased to \$167,300 in 2011 from \$152,800 in 2010. The increase in 2011 compared to 2010 is due primarily to higher commission expenses on the higher level of revenues, relocation expenses related to the relocation of a key sales and marketing employee from North Carolina to Pennsylvania and higher travel expenses.

General and administrative expenses increased to \$353,800 in 2011 from \$332,500 in 2010. The increase in 2011 compared 2010 is due primarily to higher patent related expenses and professional fees offset in part by lower insurance costs in 2011 compared to 2010.

Other income (expenses) includes, in 2011, (i) a license transfer fee of \$60,000, net of commission expense of \$6,000, received in connection with the sale by a licensee in the entertainment and toy products market of an operating division that included, with the Company's consent, assignment of the technology license with the Company to another business in the entertainment and toy products market during the third quarter of 2011; (ii) the reversal of approximately \$74,700 of accounts payable and related accrued expenses related to invoices received during 2001 from a professional services business that provided legal services to the Company that the Company, with legal counsel, has determined to be no longer statutorily payable as the statute of limitations to bring a claim has expired; and (iii) the reversal of a total of \$38,000 of accrued expenses related to (x) potential reimbursement of expenses to members of a group who in 1999 succeeded in electing four members to the Company's Board of Directors and (y) the purchase of equipment in 2007 for which an invoice was never submitted by the supplier that the Company, with legal counsel, has determined to be no longer statutorily payable as the applicable statutes of limitations to bring such claims have expired. Additionally, other income (expenses) includes interest on funds borrowed under the Company's line of credit with a bank and on unsecured loans from five individuals. Also included in other income (expenses) are financing costs related to warrants issued in 2011 and 2010 primarily in conjunction with unsecured loans received during those periods.

The lower net loss of \$27,300 in 2011 compared to the net loss of \$245,100 in 2010 resulted primarily from a higher gross profit on a higher level of revenues and other income including a technology license transfer fee and the reversal of accounts payable and accrued expenses that are no longer statutorily payable offset in part by higher operating expenses in 2011 compared to 2010.

Management of the Company does not believe that inflation and changing prices have had a significant effect on its revenues and results of operations during the years ended December 31, 2011 and December 31, 2010.

Plan of Operation, Liquidity and Capital Resources

The Company's cash increased to \$22,900 at December 31, 2011 from \$10,600 at December 31, 2010. During 2011, the Company generated \$19,300 from its operating activities, received \$18,000 from the sale of 335,337 shares of its common stock and borrowed \$17,000 from two individuals, one of whom is a director of the Company. The Company repaid the loans and also repaid \$25,000 of its line of credit with a bank.

Table of Contents

Index to Financial Statements

In 2011, the Company's revenues increased primarily as a result of license fees generated from a license signed in mid-2010 with a licensee in the entertainment and toy products market, sales of ink to the licensed printers of the Company's licensees in the entertainment and toy products market and license and royalty revenues from a new licensee signed in the first quarter of 2011. Primarily as a result of higher revenues, favorable product mix, a license transfer fee received from a licensee, the reversal of certain liabilities and the positive effect of certain cost reductions in 2010, the Company recorded a significantly lower net loss of \$27,300 in the year ended December 31, 2011 and had positive operating cash flow of \$19,300 during that period. At December 31, 2011, the Company had negative working capital of \$338,100 and stockholders' deficiency of \$334,400. For the full year of 2010, the Company had a net loss of \$245,100 and had negative operating cash flow of \$170,200 during the year. At December 31, 2010, the Company had negative working capital of \$343,000 and stockholders' deficiency of \$333,400.

During 2010, the Company accepted an offer by a bank to repay the then outstanding balance of \$100,000 under its line of credit, received in 2008, with that bank in forty-eight equal monthly installments, plus interest, beginning in October 2010. As of December 31, 2011, the balance on the line of credit had been reduced to \$68,750. During 2010 and 2011, the Company received unsecured loans totaling \$67,500 from five individuals and, through December 31, 2011, repaid \$17,000 of those amounts borrowed and converted \$6,500 of the principal and approximately \$700 of accrued interest into 159,088 shares of its common stock. Additionally, in 2010, 2011 and 2012 through the date of this report, the Company raised approximately \$129,600 through the sale of 3,423,416 shares of its common stock. These borrowings and sales of common stock have allowed the Company to remain in operation through the current date.

Management of the Company believes that it will need to obtain additional capital in the near future to support its working capital requirements associated with its existing revenue base and to fund operating losses that it believes may continue through 2012 related to the uncertainty associated with the worldwide economic downturn. There can be no assurances that the Company will be successful in obtaining sufficient additional capital, or if it does, that the additional capital will enable the Company to return its business to profitability and develop new revenue sources to have a material positive effect on the Company's operations and cash flow. The Company believes that without additional investment, it may be forced to cease operations in the near future.

There can be no assurances that the Company will be successful in obtaining additional investment. There can be no assurances that revenues in future periods will be sustained at levels that will allow it to maintain positive cash flow.

The Company continues to maintain a cost containment program including curtailment, where possible, of discretionary research and development and sales and marketing expenses. In the second quarter of 2010, the Company reduced its staff by two full-time individuals.

The Company's plan of operation for the twelve months beginning with the date of this annual report consists of concentrating available human and financial resources to continue to capitalize on the specific business relationships the Company has developed in the entertainment and toy products market, including a new licensee with a significant presence in the entertainment and toy products market added as a result of the assignment, with the Company's consent, of a technology license by a former licensee late in the third quarter of 2011, a licensee added in 2010 whose initial line of products that incorporate the Company's technologies are now available for purchase in certain retail outlets in the United States, an additional licensee added in the first quarter of 2011 and a new licensee with a major presence in the entertainment and toy products market with whom a multi-year license was signed in February 2012. The two most recently added licensees in the entertainment and toy products market are well known and highly regarded participants in this market with significantly greater market recognition and retail distribution in this market than the licensee who previously held the license for these specific technologies. The Company plans to continue developing applications for these licensees while expanding its licensee base in the entertainment and toy market. Additionally, the Company believes that revenue growth in the retail loss prevention market can be achieved through increased royalties and security ink sales to its licensees in this market. The Company will continue to adjust its production and technical staff as necessary. The Company will also, subject to available financial resources, invest in capital equipment needed to support potential growth in ink production requirements beyond its current capacity. Additionally, the Company will pursue opportunities to market its current technologies in specific security and non-security markets.

Table of Contents

Index to Financial Statements

The Company has received and continues to seek additional capital, in the form of debt, equity or both, to support its working capital requirements. There can be no assurances that the Company will be successful in raising additional capital, or that such additional capital, if obtained, will enable the Company to generate additional revenues and positive cash flow.

The Company generates a significant portion of its total revenues from licensees in the entertainment and toy products market. These licensees generally sell their products through retail outlets. During the year, such sales may be adversely affected by a continuation of the slowdown in consumer spending that was experienced from 2009 to 2011 due to the current negative economic environment. As a result, the Company's revenues, results of operations and liquidity may continue to be negatively impacted as they were in previous years.

Risk Factors

The Company's operating results, financial condition and stock price are subject to certain risks, some of which are beyond its control. These risks could cause the Company's actual operating and financial results to differ materially from those expressed in its forward looking statements, including the risks described below and the risks identified in other documents which are filed and furnished with the SEC:

Access to Capital. The Company anticipates that it will need to raise capital in the near future to fund its historical and new business operations. The crisis in the financial markets that commenced in 2007 has caused serious deterioration in the net worth and liquidity of many investors, including that of potential investors in the Company, and seriously eroded investor confidence in general making it more difficult for the Company to raise capital. If the Company is unable to secure capital in the near future, in the form debt, equity or both, it may be forced to cease operations. There can be no assurances that the Company will be successful in obtaining additional investment in sufficient amounts to fund its ongoing business operations.

Line of Credit. The Company has a line of credit with a bank that, at its inception, allowed the Company to borrow a maximum of \$100,000. In August 2010, after the bank indicated that it would not renew the line of credit, the Company accepted an offer by the bank to repay the then outstanding loan balance of \$100,000 in forty-eight equal monthly installments of \$2,083, plus interest, beginning in October 2010 and maturing in September 2014. During 2010 and 2011, the Company incurred unsecured loans totaling \$67,500 from five individuals, repaid \$17,000 of these loans and converted \$6,500 of these loans, along with approximately \$700 of accrued interest, into 159,088 shares of the Company's common stock. The incurrence of these unsecured loans constituted a violation of certain covenants of the Company's line of credit with the bank. Under the terms of the line of credit agreement, this covenant violation is an event of default whereby the bank has certain rights, including the right to require the Company to immediately repay the entire outstanding loan balance. Should the bank impose a requirement for immediate repayment of the entire outstanding loan balance, which was \$68,750 at December 31, 2011, this could have a material adverse effect on the Company's financial condition.

Dependency on Major Customers. The Company is dependent on its licensees to develop new products and markets that will generate increases in its licensing and product revenues. The inability of the Company's licensees to maintain at least current levels of sales of products utilizing the Company's technologies could adversely affect the Company's operating results and cash flow. To the extent the Company's licensees are adversely affected by the current economic downturn, the Company's revenues may also be negatively impacted. The Company has derived a significant percentage of its revenues through a licensing relationship with a major customer. Revenues obtained directly from this customer and indirectly, through the customer's third party licensed printer, equaled approximately 41% of the Company's revenues in 2011. The Company also has, from time to time, substantial receivables from these businesses. Late in the third quarter of 2011, this customer sold the operating division that utilized a technology license with the Company to a business with a significant presence in the entertainment and toy products market and, with the Company's consent, assigned the technology license to the purchaser. In January 2012, the Company negotiated a new six-year license, containing guaranteed royalties for 2012, with the purchaser of the license which permits this licensee to exclusively market a specific line of products incorporating the Company's technologies through a specific distribution channel but permitting the Company to license the covered technologies to others for applications and sale through channels of distribution not available to this licensee under the terms of the new license. In February 2012, the Company negotiated a license, expiring in 2015

Table of Contents

Index to Financial Statements

and containing guaranteed minimum royalties over the term of the license, with another new licensee who also has a significant presence in the entertainment and toy products market that permits this licensee to exclusively market products with other characteristics that incorporate the Company's technologies through a distinctly different channel of distribution. These two licensees are well known and highly regarded participants in the entertainment and toy products market with significantly greater market recognition and retail distribution in this market than the licensee who previously held the license for these specific technologies. The agreements with both licensees contain renewal options but there can be no assurances that the licenses will continue in force at the same or more favorable terms beyond their current termination dates, nor can there be any assurances that the relationships with these two new licensees will generate revenues for the Company equal to or greater than its former licensee who previously marketed products incorporating the Company's technologies in the entertainment and toy products market.

Possible Inability to Develop New Business. While the Company raised cash through additional capital investment and borrowings under its line of credit in 2009 and loans from individuals in 2010 and 2011, it limited increases in its operating expenses and reduced its operating expenses when possible. Management of the Company believes that any significant improvement in the Company's cash flow must result from increases in revenues from traditional sources and from new revenue sources. The Company's ability to develop new revenues may depend on the extent of both its marketing activities and its research and development activities, both of which are limited. There are no assurances that the resources that the Company can devote to marketing and to research and development will be sufficient to increase its revenues to levels that will enable it to return to and maintain positive operating cash flow in the future.

Inability to Obtain Raw Materials and Products for Resale. The Company's adverse financial condition has required it from time to time to significantly defer payments due to (i) vendors who supply raw materials and other components of its security inks and (ii) providers of professional and other services. As a result, the Company is required to pay cash in advance of shipment to certain of its suppliers. The inability to obtain materials on a timely basis and the possibility that certain vendors may permanently discontinue supplying the Company with needed products and services may result in delayed shipments to customers and further impact the Company's ability to service its customers, thereby adversely affecting the Company's relationships with its customers and licensees. There can be no assurances that the Company will be able to maintain its vendor relationships in an acceptable manner.

Uneven Pattern of Quarterly and Annual Operating Results. The Company's revenues, which are derived primarily from licensing and sales of products incorporating its technologies as well as royalties from these products, are difficult to forecast; such forecasting difficulty is due to, among other reasons, the long sales cycle of the Company's technologies, the potential for customer delay or deferral of implementation of the Company's technologies, the size and timing of inception of individual license agreements, the success of the Company's licensees and strategic partners in exploiting the market for the licensed products, modifications of customer budgets, and uneven patterns of royalty revenue and product orders. As the Company's revenue base is not substantial, delays in the finalization of license contracts, the implementation of the technology to initiate the revenue stream and the ordering decisions of customers can have a material adverse effect on the Company's quarterly and annual revenue expectations. As the Company's operating expenses are substantially fixed, income expectations will be subject to a similar adverse outcome. As licensees for the entertainment and toy products markets are added, the predictability of the Company's revenue stream may be further impacted.

Volatility of Stock Price. The market price for the Company's common stock has historically experienced significant fluctuations and may continue to do so. With the exception of 2007, from its inception, the Company has operated at a loss and has not produced revenue levels traditionally associated with publicly-traded companies. The Company's common stock is not listed on a national or regional securities exchange and, consequently, the Company receives limited publicity regarding its business achievements and prospects. Additionally, securities analysts and traders do not extensively follow the Company's stock and its stock is thinly traded. The Company's market price may be affected by announcements of new relationships or modifications to existing relationships. The stock prices of many developing public companies, particularly those with small capitalizations, have experienced wide fluctuations not necessarily related to operating performance. Such fluctuations may adversely affect the market price of the Company's common stock.

Intellectual Property. The Company relies on a combination of protections provided under applicable international patent, trademark and trade secret laws. The Company also relies on confidentiality, non-analysis and licensing

Table of Contents

Index to Financial Statements

agreements to establish and protect its rights in its proprietary technologies. While the Company actively attempts to protect these rights, its technologies may be compromised through reverse engineering or other means. In addition, the Company's ability to enforce its intellectual property rights through appropriate legal action has been and will continue to be limited by its adverse liquidity. There can be no assurances that the Company will be able to protect the basis of its technologies from discovery by unauthorized third parties or to preclude unauthorized persons from conducting activities that infringe on the Company's rights. The Company's adverse liquidity situation also impacts its ability to obtain patent protection on its intellectual property and to maintain protection on previously issued patents. There can be no assurances that the Company will be able to continue to prosecute new patents and maintain issued patents. As a result, the Company's customer and licensee relationships could be adversely affected, and the value of the Company's technologies and intellectual property (including their value upon liquidation) could be substantially diminished.

Economic Conditions. The Company's revenue is susceptible to changes in general economic conditions and the present global recession that is expected to continue during 2012. The Company's sales, liquidity and overall results of operations may be negatively affected by decreasing consumer confidence, further slowdowns in consumer spending or other downturns in the U.S. economy as a whole or in any geographic markets from which the Company derives revenue. In addition, these factors may result in decreased customer and licensee demand for the Company's products and may negatively impact the Company's ability to develop new customers and licensees. Due to the uncertainty surrounding the financial crisis, the Company is unable to predict the effect of such conditions on its customers and licensees. Consequently, the Company cannot predict the scope or magnitude of the negative effect resulting from an ongoing global financial crisis and economic slowdown.

Recently Adopted Accounting Pronouncements

In January 2010, FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*. This update provides amendments to ASC Topic 820 that provide disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The Company adopted the disclosure requirements effective January 1, 2011.

As of December 31, 2011 and for the year then ended, there were no other recently adopted accounting pronouncements that had a material effect on the Company's financial statements.

As of December 31, 2011, the FASB has issued Accounting Standards Updates (ASU) through No. 2011-12. None of the ASUs have had an impact on the Company's financial statements.

Recently Issued Accounting Pronouncements Not Yet Adopted

As of December 31, 2011, there are no recently issued accounting standards not yet adopted which would have a material effect on the Company's financial statements.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not required for a smaller reporting company.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

For information required with respect to this Item 8, see index to Financial Statements and Schedules on page F-1 of this report on Form 10-K.

Table of Contents

Index to Financial Statements

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's disclosure controls and procedures are designed to provide reasonable assurance that material information required to be included in its periodic SEC reports is recorded, processed, summarized and reported within the time periods specified in the relevant SEC rules and forms. The Company has carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded, as of the end of the period covered by this report, that the Company's disclosure controls and procedures are effective.

Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Internal control over financial reporting is a process to provide reasonable assurance regarding the reliability of financial reporting and preparation of financial statements for external purposes in accordance with U.S. GAAP. Internal control over financial reporting includes maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company, provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, that receipts and expenditures of the Company are being made only with management authorization and provide reasonable assurance that unauthorized acquisition, use or disposition of Company assets that could have a material effect on the Company's financial statements would be prevented or detected on a timely basis. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements in the Company's financial statements on a timely basis.

Management assessed the effectiveness of the Company's internal control over financial reporting based on the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework. Based on this assessment, management believes that, as of December 31, 2011, the Company's internal control over financial reporting was effective.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. The attestation report requirement for non-accelerated filers was permanently removed from the Sarbanes-Oxley Act by Section 989C of the Dodd-Frank Act as adopted by the SEC.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal controls over financial reporting during the fourth quarter of 2011 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The directors, officers and named executive of the Company, their ages, present positions with the Company, and a summary of their business experience are set forth below.

Table of Contents

Index to Financial Statements

Michael A. Feinstein, M.D., 65, Chairman of the Board of Directors since December 1999 and Nocopi's Chief Executive Officer since February 2000, has been a practicing physician in Philadelphia for more than thirty years, serving for more than twenty-five years as the President of a group medical practice which includes three physicians. He is a Fellow of the American College of Obstetrics and Gynecology and of the American Board of Obstetrics and Gynecology. He received his B.A. from LaSalle University and his M.D. from Jefferson Medical College. He has represented Nocopi in numerous licensing negotiations, governmental meetings and capital raises. The Board of Directors believes that Dr. Feinstein's considerable personal experience as a business owner and investor in publicly traded businesses makes him well suited to serve as a member of Nocopi Technologies' Board of Directors.

William P. Curtis, Jr., 50, a director since November 2008 is a Partner at Porter & Curtis, L.L.C., of Media, Pennsylvania, an insurance brokerage and risk management consulting company. The technical focus of Porter & Curtis is in risk financing, specifically in the alternative financing area (insurance and reinsurance), and risk management including claims administration. Prior to forming Porter & Curtis, Mr. Curtis, along with Partner Kenneth Porter, founded and successfully managed a retail brokerage operation for Arthur J. Gallagher & Company, the fourth largest insurance broker in the world. Mr. Curtis is licensed as a Pennsylvania Attorney and a Resident Insurance Broker. He has a Bachelor of Science in Accounting and a M.B.A. in Finance from St. Joseph's University in Philadelphia and a Juris Doctor from Temple University School of Law. In addition, he holds the Chartered Property Casualty Underwriter (CPCU), Associate in Risk Management (ARM), and Associate in Reinsurance (ARe) professional designations from the Insurance Institute of America. The Board of Directors believes that Mr. Curtis' finance, law, risk management and business management experience makes him well suited to serve as a member of Nocopi Technologies' Board of Directors.

Herman M. Gerwitz, CPA, 58, a director since May 2005, is the Treasurer of Keystone Property Group. Mr. Gerwitz has been with Keystone full time since 1998 and has been responsible for all the financial matters of a Real Estate Development Company that has grown to over 3 million square feet of commercial real estate and a \$100,000,000 Real Estate Fund. Prior to joining Keystone, Mr. Gerwitz has spent 20 years as a partner in a public accounting firm. He has received a BBA from Temple University with master's coursework at Widener University. He has been a member of both the Pennsylvania and American Institutes of Certified Public Accountants since 1983. The Board of Directors believes that Mr. Gerwitz' many years as a Certified Public Accountant and his subsequent business management experience make him well suited to serve as a member of Nocopi Technologies' Board of Directors and to serve on its Audit Committee.

Richard Levitt, 55, a director since December 1999, has been engaged in the computer and services segment of the computer industry since 1981. Mr. Levitt is currently a Senior Account Executive for Dell Computer in Pittsburgh, PA. He is in the Large Enterprise Group and is responsible for developing major accounts in Western Pennsylvania. Mr. Levitt has been with Dell since November 2005. In 2009, Mr. Levitt was awarded the Circle of Excellence award by Dell which is Dell's highest corporate award given to less than 1% of its sales and support employees. In addition, he was awarded over the past three years the Top Team Performer and Regional Top Performer awards. In 1995, he participated in the founding of XiTech Corporation, a Pittsburgh, Pennsylvania-based provider of computing and computer networking hardware and network design and implementation services which in five years grew to over 100 employees and \$50 million in annual sales. Since founding XiTech, Mr. Levitt served as one of its corporate principals, as a Network Consultant and as the Manager of its Network Sales Force. Mr. Levitt left XiTech in 2004. Before joining XiTech, Mr. Levitt served as a network sales executive for Digital Equipment Corporation from 1988 to 1994 and as a network consultant for TriLogic Corporation during 1994 and 1995. Mr. Levitt holds a B.S. in Marketing from Kent State University. The Board of Directors believes that Mr. Levitt's sales and marketing experience in technology-based businesses, including start-ups and smaller businesses, makes him well suited to serve as a member of Nocopi Technologies' Board of Directors.

Philip B. White, 73, has been a director since August 2006. Mr. White is currently an international consultant in the private sector providing regulatory and industry standards advice to international companies regulated by the Food and Drug Administration, the Consumer Product Safety Commission, and the Environmental Protection Agency. He also served as a Technical Advisor and Regulatory Liaison to Nocopi from 2002 to 2005. Before establishing his own global consulting practice in 2000, Mr. White was, from 1994 to 2000, Director of Medical Device Consulting at the international firm of AAC Consulting Group (now Kendle), Rockville, MD. In 1994, Mr. White retired from a

Table of Contents

Index to Financial Statements

33-year career with the U.S. Food and Drug Administration. His last FDA position was Director of the Office of Standards and Regulations in the Center for Devices and Radiological Health. Previous FDA positions included Regional Director of FDA's enforcement activities in the Southwestern Region, Deputy FDA Assistant Commissioner for Program Coordination, and Supervisory Food and Drug Inspector. He has served on the Board of Directors of the American National Standards Institute, the Association for Advancement of Medical Instrumentation, and the Regulatory Affairs Professionals Society. He is a 1961 graduate of Wilkes University, Wilkes-Barre, PA with a B.A. Degree in Biology. He also did graduate studies in 1967 and 1968 specializing in the Federal Food Drug and Cosmetic Act at the New York University Graduate Law School in New York City. The Board of Directors believes that Mr. White's considerable experience with consumer product safety and regulatory matters gained from his many years at the Food and Drug Administration makes him well suited to serve as a member of Nocopi Technologies' Board of Directors.

Rudolph A. Lutterschmidt, 65, has been Vice President and Chief Financial Officer of the Company for more than five years, serving in this capacity on a part-time basis since January 2000. Mr. Lutterschmidt has been a consultant to several southeast Pennsylvania businesses including Murex Investments, a Philadelphia investment fund, where he provided financial guidance to two of its portfolio companies. He is a graduate of Syracuse University, a member of Financial Executives International, the Institute of Management Accountants and is a Certified Management Accountant.

Terry W. Stovold, 49, Director of Operations and Sales since 2011, has been employed by Nocopi for more than twenty years. Mr. Stovold received a Forestry Technician College degree from Algonquin College and studied business at McGill University. He holds numerous U.S. and foreign patents in the fields of printing technology and printing inks with a patent pending.

The terms of the current directors will expire at the 2012 annual meeting of stockholders of the Company.

Corporate Governance

The Board of Directors has determined that all of the directors, with the exception of Michael A. Feinstein, M.D., who serves as Chief Executive Officer, are independent as that term is defined by the SEC. The Company did not make any material changes to the procedures by which stockholders may recommend nominees to the Company's Board of Directors during 2011.

Audit Committee Financial Expert

The Company has established a standing audit committee in accordance with Section 3(a) (58) (A) of the Securities Exchange Act of 1934 that makes recommendations to the Company's Board of Directors regarding the selection of an independent registered public accounting firm, reviews the results and scope of the Company's audits and other accounting-related services and reviews and evaluates the Company's internal control functions. The audit committee does not presently have a written charter. The audit committee is comprised of Michael A. Feinstein, M.D., its Chairman of the Board, and Herman M. Gerwitz, CPA. The Board of Directors has determined that Mr. Gerwitz is an audit committee financial expert as currently defined under the SEC rules implementing Section 407 of the Sarbanes Oxley Act of 2002 and that Mr. Gerwitz meets the criteria for independence as defined by the SEC.

Code of Ethics

The Company has adopted a Code of Ethics that applies to its Principal Executive Officer, Principal Financial Officer, Principal Accounting Officer and persons performing similar functions. A copy of the Company's Code of Ethics is incorporated by reference to Exhibit 14.1 of this report on Form 10-K.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires the Company's executive officers and directors and any persons who beneficially own more than 10% of its Common Stock (collectively, Reporting Persons) to file reports of ownership and changes in ownership with the SEC. Reporting Persons are required by SEC regulations to furnish the Company with copies of all Section 16(a) forms they file.

Table of Contents**Index to Financial Statements**

Based solely on the Company's review of the copies of any Section 16(a) forms received by it, the Company believes that with respect to the fiscal year ended December 31, 2011, all Reporting Persons complied with all applicable filing requirements.

ITEM 11. EXECUTIVE COMPENSATION

The following table sets forth information concerning compensation for 2011 and 2010 earned by Michael A. Feinstein, M.D., the Company's Chairman who has served since February 2000 as the Company's Chief Executive Officer and Terry W. Stovold, Director of Operations and Sales, the only employee to receive compensation in 2011 greater than \$100,000 (the Named Executive).

SUMMARY COMPENSATION TABLE

Name and principal position	Year	Salary	Bonus	Stock awards	Option awards	Nonequity incentive plan compensation	Nonqualified	All other compensation	Total
							deferred earnings		
(a)	(b)	(\$) (c)	(\$) (d)	(\$) (e)	(\$) (f)	(\$) (g)	(\$) (h)	(\$) (i)	(\$) (j)
Michael A. Feinstein, M.D. Chairman, President and Chief Executive Officer	2011	85,000							85,000
	2010	85,000							85,000
Terry W. Stovold Director of Operations and Sales	2011	36,000						67,800(1)	103,800
	2010	36,000						55,200(1)	91,200

(1) Sales commissions

Dr. Feinstein entered into a written employment agreement effective June 1, 2008 under which he serves as President and Chief Executive Officer of the Company for an initial term of three years with successive one year renewal terms. In accordance with the terms of the employment agreement, the employment agreement renewed on December 1, 2011 for a period of one year effective June 1, 2012. The employment agreement provides for an annual base salary of \$85,000 which may be increased annually at the discretion of the Board of Directors and an annual performance bonus determined by the Board of Directors. In certain situations, including a change in control, Dr. Feinstein may be eligible to receive his base salary for a period of up to twelve months following the termination of employment. The employment agreement prohibits him from competing with the Company during the term of this agreement and for two years after the termination of his employment with the Company. During 2011 and 2010, Dr. Feinstein deferred approximately \$1,600 and \$11,400, respectively, of salary owed to him for those years.

Mr. Stovold entered into a written employment agreement effective April 1, 2011 under which he serves as the Company's Director of Operations and Sales for an initial term of three years with successive one year renewal terms. The employment agreement provides for a base salary set by the Company's Board of Directors, which is currently set at \$75,000 per year beginning on January 1, 2012, along with a commission of seven percent on sales generated by his efforts. In certain situations, including a change in control, Mr. Stovold may be eligible to receive his base salary for a period of up to six months following the termination of employment. The employment agreement prohibits him from competing with the Company during the term of the agreement and for one year after the termination of his employment with the Company. During 2011, the Company paid \$5,400 in moving costs on behalf of Mr. Stovold representing a portion of Mr. Stovold's expenses related to his relocation from North Carolina to Pennsylvania.

EQUITY COMPENSATION PLAN INFORMATION AS OF DECEMBER 31, 2011

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding warrants and rights compensation plans (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity Compensation plans not approved by security holders (1)	645,000	\$ 0.32	-0-
Warrants issued in connection with short-term loans and financing considerations (2)	85,500	\$ 0.06	-0-
Total	730,500	\$ 0.29	-0-

- (1) Registrant's 1999 Stock Option Plan was adopted by the Registrant's Board of Directors in February 1999. The Plan provided for the grant of incentive or non-qualified options to purchase up to 2,000,000 shares of common restricted stock of the Registrant to employees, directors, consultants and advisors. The Plan was administered by the Board of Directors or a committee of not less than two board members appointed by the board. The Plan terminated in February 2009 on the tenth anniversary of its adoption.
- (2) Warrants issued in connection with the receipt of short term-notes totaling \$50,500 in 2010 and \$15,000 in 2011 and, in 2011, to a professional services provider related to certain fee payment considerations were approved by the Board of Directors. The warrants expire five years from the date of issuance.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

During 2010, the Company sold 148,912 unregistered shares of its Common Stock to Philip B. White., a director, for \$6,500 (\$0.04365 per share).

During 2010, the Company sold 62,500 unregistered shares of its Common Stock to Herman M Gerwitz., a director, for \$2,000 (\$0.032 per share), received an unsecured loan of \$7,500 from Mr. Gerwitz and issued warrants, expiring in five years, to purchase 7,500 shares of its Common Stock at \$0.0703 per share to Mr. Gerwitz.

During 2010, Dr. Feinstein's brother-in-law purchased 500,000 unregistered shares of the Company's Common Stock for \$16,000 (\$0.032 per share).

During 2011, the Company received an unsecured loan of \$15,000 from William P. Curtis, Jr., a director, and issued warrants, expiring in five years, to purchase 15,000 shares of its Common Stock at \$0.06 to Mr. Curtis. The \$15,000 loan was repaid by the Company during 2011.

Edgar Filing: NOCOPI TECHNOLOGIES INC/MD/ - Form 10-K

During 2011, with Board of Directors approval, the Company converted \$1,500 of a \$7,500 unsecured loan held by Herman M. Gerwitz, a director, into unregistered shares of its Common Stock and issued 33,333 shares at \$0.045 per share to Mr. Gerwitz.

Table of Contents

Index to Financial Statements

The Board of Directors has determined that all the directors, with the exception of Michael A. Feinstein, M.D., who serves as President and Chief Executive Officer, are independent as that term is defined by the SEC.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Registrant has retained the public accounting firm of Morison Cogen LLP, whose principal business address is 150 Monument Rd., Suite 500, Bala Cynwyd, PA 19004, to perform its annual audit for inclusion of its report on Form 10-K and perform SAS 100 reviews of quarterly information in connection with Form 10-Q filings.

Audit Fees

During 2011 and 2010, the aggregate fees billed for professional services rendered by Registrant's principal accountant for the audit of Registrant's annual financial statements and review of its quarterly financial statements were \$39,000 and \$36,500, respectively.

Audit-Related Fees

During 2011 and 2010, Registrant's principal accountant did not render assurance and related services reasonably related to the performance of the audit or review of financial statements.

Tax Fees

During 2011 and 2010, the aggregate fees billed for professional services rendered by Registrant's principal accountant for tax compliance, tax advice and tax planning were \$4,500 in each year.

All Other Fees

During 2011 and 2010, there were no fees billed for products and services provided by Registrant's principal accountant other than those set forth above.

Audit Committee Approval

The Audit Committee, consisting of Michael A. Feinstein, M.D., Chairman, President and Chief Executive Officer, and Herman M. Gerwitz, CPA, evaluate and approve, in advance, the scope and cost of the engagement of an auditor before the auditor renders audit and non-audit services. All non-audit services were approved by the audit committee. Registrant does not rely on pre-approval policies and procedures.

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

See Exhibit Index.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors

of Nocopi Technologies, Inc.

West Conshohocken, Pennsylvania

We have audited the accompanying balance sheets of Nocopi Technologies, Inc. as of December 31, 2011 and 2010, and the related statements of operations, stockholders' deficiency, and cash flows for the years then ended. Nocopi Technologies, Inc.'s management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Nocopi Technologies, Inc. at December 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 3 to the financial statements, the Company has incurred losses from operations which raises substantial doubt about its ability to continue as a going concern. Management's plans in regard to this matter are also described in Note 3. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

/s/ MORISON COGEN LLP

Bala Cynwyd, Pennsylvania

Table of Contents

Index to Financial Statements

NOCOPI TECHNOLOGIES, INC.

NOTES TO FINANCIAL STATEMENTS

December 31, 2011 and 2010

1. Organization of the Company

Nocopi Technologies, Inc. (the Company) is organized under the laws of the State of Maryland. Its main business activities are the development and distribution of document security products and the licensing of its patented reactive ink technologies for the Entertainment and Toy and the Document and Product Authentication markets in the United States and foreign countries. The Company operates in one principal industry segment.

2. Significant Accounting Policies

Financial Statement Presentation Amounts included in the accompanying financial statements have been rounded to the nearest hundred, except for number of shares and per share information.

Estimates The preparation of the financial statements in conformity with Accounting Principles Generally Accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the dates of financial statements and the reported amounts of revenues and expenses during the reported periods. Actual results could differ from those estimates.

Cash consists of demand deposits with a major U.S. bank.

Accounts receivable and credit policies Accounts receivable are uncollateralized customer obligations due under normal trade terms requiring payment within 30 days from the invoice date. Accounts receivable are stated at the amount billed to the customer. Customer account balances with invoices dated over 90 days old are considered delinquent.

The carrying amount of accounts receivable is reduced by an allowance that reflects management's best estimate of the amounts that will not be collected. Management individually reviews all accounts receivable balances that exceed 90 days from invoice date and based on an assessment of current creditworthiness, estimates the portion, if any, of the balance that will not be collected.

Inventory consists primarily of ink components and paper and is stated at the lower of cost (determined by the first-in, first-out method) or market.

Fixed assets are carried at cost less accumulated depreciation and amortization. Furniture, fixtures and equipment are generally depreciated on the straight-line method over their estimated service lives. Leasehold improvements are amortized on a straight-line basis over the shorter of five years or the term of the lease. Major renovations and betterments are capitalized. Maintenance, repairs and minor items are expensed as incurred. Upon disposal, assets and related depreciation are removed from the accounts and the net amount, less proceeds from disposal, is charged or credited to income. In 2010, the Company wrote off approximately \$2,700 of fully depreciated furniture, fixtures and equipment that had been disposed of during the year, along with an equal amount of accumulated depreciation. There was no effect on the Company's results of operations.

Table of Contents

Index to Financial Statements

Patent costs are charged to expense as incurred due to the uncertainty of their recoverability as a result of the Company's adverse liquidity situation.

Revenues In accordance with Financial Accounting Standards Board Accounting Standards Codification (FASB ASC) 605, Revenue Recognition, the Company recognizes revenue when (i) persuasive evidence of a customer or distributor arrangement exists or acceptance occurs, (ii) a retailer, distributor or wholesaler receives the goods, (iii) the price is fixed or determinable, and (iv) collectability of the sales revenue is reasonably assured. Subject to these criteria, the Company will generally recognize revenue upon shipment of product. Revenue from license fees and royalties will be recognized as earned over the license term.

Income taxes Deferred income taxes are provided for all temporary differences and net operating loss and tax credit carryforwards. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Fair value The carrying amounts reflected in the balance sheets for cash, receivables, accounts payable and accrued expenses approximate fair value due to the short maturities of these instruments. The carrying amount of the demand loans and the line of credit approximates fair value since the interest rate associated with the debt approximates the current market interest rates.

Earnings (loss) per share The Company follows FASB ASC 260, Earnings Per Share, resulting in the presentation of basic and diluted earnings per share. Because the Company reported a net loss for the years ended December 31, 2011 and December 31, 2010, common stock equivalents, consisting of stock options and warrants, were anti-dilutive for those periods.

Comprehensive income (loss) The Company follows FASB ASC 220 in reporting comprehensive income. Comprehensive income is a more inclusive financial reporting methodology that includes disclosure of certain financial information that historically has not been recognized in the calculation of net income. Since the Company has no items of other comprehensive income, comprehensive income (loss) is equal to net income (loss).

Recoverability of Long-Lived Assets

The Company follows FASB ASC 360-35, Impairment or Disposal of Long-Lived Assets. The Statement requires that long-lived assets and certain identifiable intangibles be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The Company is not aware of any events or circumstances which indicate the existence of an impairment which would be material to the Company's annual financial statements.

Recently Adopted Accounting Pronouncements

In January 2010, FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*. This update provides amendments to ASC Topic 820 that provide disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The Company adopted the disclosure requirements effective January 1, 2011.

Table of Contents

Index to Financial Statements

As of December 31, 2011 and for the year then ended, there were no other recently adopted accounting pronouncements that had a material effect on the Company's financial statements.

As of December 31, 2011, the FASB has issued Accounting Standards Updates (ASU) through No. 2011-12. None of the ASUs have had an impact on the Company's financial statements.

Recently Issued Accounting Pronouncements Not Yet Adopted

As of December 31, 2011, there are no recently issued accounting standards not yet adopted which would have a material effect on the Company's financial statements.

3. Going Concern

Since its inception, with the exception of the year ended December 31, 2007 during which it generated net income of \$386,000, the Company has incurred significant losses and, as of December 31, 2011, had accumulated losses of \$13,304,600. For the years ended December 31, 2011 and December 31, 2010, the Company's had a net loss from operations of \$183,700 and \$234,400, respectively. The Company had negative working capital of \$338,100 at December 31, 2011 and \$343,000 at December 31, 2010. Due in part to the recession which has and is continuing to negatively impact the country's economy, the Company, which is substantially dependent on its licensees to generate licensing revenues, may incur further operating losses and experience negative cash flow in the future. Achieving profitability and positive cash flow depends on the Company's ability to generate and sustain significant increases in revenues and gross profits from its traditional business. There can be no assurances that the Company will be able to generate sufficient revenues and gross profits to return to and sustain profitability and positive cash flow in the future.

During 2011, the Company received unsecured loans totaling \$17,000 from two individuals, of which \$15,000 was lent by William P. Curtis, Jr., a Director, and repaid these loans during 2011. In 2011, the Company raised \$18,000 in a private placement exempt from registration under section 4(2) of the Securities Act of 1933, as amended, whereby 335,337 shares of the Company's common stock were sold to two non-affiliated individual investors. During 2010, the Company received unsecured loans totaling \$50,500 from four individuals, of which \$7,500 was lent by Herman M. Gerwitz, a Director. In 2010, the Company raised \$101,600 in this private placement exempt whereby 2,668,333 shares of the Company's common stock were sold to five non-affiliated individual investors and 211,412 shares of the Company's common stock were sold to two Directors of the Company. Receipt of funds from these investors and from the demand loan holders have allowed the Company to remain in operation through the current date. Management of the Company believes that it will need additional capital in the near future both to fund investments needed to increase its operating revenues to levels that will sustain its operations and to fund operating deficits that it anticipates will continue until revenue increases from traditional and new product lines can be realized. There can be no assurances that the Company will be successful in obtaining sufficient additional capital, or if it does, that the additional capital will enable the Company to impact its revenues so as to have a material positive effect on the Company's operations and cash flow. The Company believes that without additional capital, whether in the form of debt, equity or both, it may be forced to cease operations in the near future.

Table of Contents

Index to Financial Statements

The Company's independent registered public accountants have included a "going concern" explanatory paragraph in their audit report accompanying the 2011 financial statements. The paragraph states that the Company's recurring losses from operations raise substantial doubt about the Company's ability to continue as a going concern and cautions that the financial statements do not include any adjustments that might result from the outcome of this uncertainty.

4. Concentration of Credit Risk

Certain financial instruments potentially subject the Company to concentrations of credit risk. These financial instruments consist primarily of cash and accounts receivables. At December 31, 2011, the Company did not have deposits with a financial institution that exceed the FDIC deposit insurance coverage of \$250,000. There is a concentration of credit risk with respect to accounts receivable due to the number of major customers.

5. Demand Loans

In September 2011, the Company received an unsecured loan of \$2,000 from an individual and repaid the loan, with interest at 8%, in October 2011.

In January 2011, the Company received an unsecured loan of \$15,000 from William P. Curtis, Jr., a Director, and repaid the loan, with interest at 8%, in February 2011. The loan was used to finance the Company's working capital requirements. Additionally, the Company granted warrants to purchase 15,000 shares of common stock of the Company at \$0.06 per share to Mr. Curtis. The warrants expire in five years. A financing cost of approximately \$600, representing the fair value of the warrants, was charged to income in the first quarter of 2011. The fair value of the warrants was determined using the Black-Scholes pricing model with the following assumptions: expected life-5 years; interest rate-2%; expected volatility based on the Company's historical volatility-83%; and dividend yield-0.

In May 2010, the Company received an unsecured loan of \$10,000 from an individual. The loan bears interest at 8% and is payable on demand. The loan was used to finance the Company's working capital requirements. Additionally, the Company granted warrants to purchase 10,000 shares of common stock of the Company at \$0.06 per share to this individual. The warrants expire in five years. A financing cost of approximately \$400, representing the fair value of the warrants, was charged to income in the second quarter of 2010. The fair value of the warrants was determined using the Black-Scholes pricing model with the following assumptions: expected life-5 years; interest rate-2.11%; expected volatility based on the Company's historical volatility-78%; and dividend yield-0.

In March 2010, the Company received unsecured loans totaling \$40,500 from three individuals of which \$7,500 was lent by Herman M. Gerwitz, a Director. The loans bear interest at 8% and are payable on demand. The loans were used to finance the Company's working capital requirements. Additionally, the Company granted warrants to purchase 40,500 shares of common stock of the Company at \$0.0703 per share to these three individuals. The warrants expire in five years. A financing cost of approximately \$1,800, representing the fair value of the warrants, was charged to income in the first quarter of 2010. The fair value of the warrants was determined using the Black-Scholes pricing model with the following assumptions: expected life-5 years; interest rate- 2.65%; expected volatility based on the Company's historical volatility-77%; and dividend yield-0.

Table of Contents

Index to Financial Statements

6. Line of Credit

In 2008, the Company negotiated a \$100,000 revolving line of credit with a bank to provide a source of working capital. The line of credit is secured by all the assets of the Company and bears interest at the bank's prime rate plus 0.5%. At December 31, 2011, the interest rate applicable to the Company's line of credit was 3.75%. During the year ended December 31, 2009, the Company borrowed the entire \$100,000 available under the line of credit. Until the third quarter of 2010, the Company had been required to pay interest only on borrowings under the line of credit. During the third quarter of 2010, the Company was notified by the bank that the line of credit was not being renewed and was offered repayment terms, which the Company accepted, to repay the outstanding loan balance in forty-eight equal monthly installments of \$2,083, plus interest at the bank's prime rate plus 0.5%, 3.75% at December 31, 2011, beginning in October 2010. At December 31, 2011, the line of credit balance was \$68,750. Future installment payments under this repayment arrangement are: \$25,000 2012; \$25,000 2013 and \$18,750 2014. The incurrence of certain unsecured loans in 2010 and 2011 constitutes a violation of certain covenants under the Company's line of credit which gives the lender certain rights, including the right to require the Company to repay immediately the entire outstanding loan balance, which was \$68,750 at December 31, 2011, rather than on a monthly basis over the following thirty-three months. Should the bank require immediate prepayment, the Company's financial condition could be materially adversely affected. Management of the Company intends to cure this violation.

7. Stockholders Deficiency

During 2011, the Company sold a total of 335,337 shares of its common stock to two non-affiliated individual investors for a total of \$18,000 pursuant to a private placement. In November 2011, the Company entered into a Conversion Agreement with two individuals whereby unsecured loans in the aggregate principal amount of \$6,500, including \$1,500 representing a portion of an unsecured loan held by Herman M. Gerwitz, a Director, together with approximately \$700 of accrued interest on one of the unsecured loans were converted into shares of restricted common stock of the Company at \$0.045, the market price at the date of conversion. As a result, an aggregate of 159,088 shares of restricted common stock were issued, including 33,333 shares to Mr. Gerwitz.

During 2010, the Company sold 2,668,333 shares of its common stock to six non-affiliated individual investors, 148,912 shares of its common stock to Philip B. White, a Director, and 62,500 shares of its common stock to Herman M. Gerwitz, a Director, for a total of \$101,600 pursuant to a private placement.

8. Other Income (Expenses)

Other income (expenses) includes, in 2011, (i) a license transfer fee of \$60,000, net of commission expense of \$6,000, received in connection with the sale by a licensee in the entertainment and toy products market of an operating division that included, with the Company's consent, assignment of the technology license with the Company to another business in the entertainment and toy products market during the third quarter of 2011; (ii) the reversal of approximately \$74,700 of accounts payable and related accrued expenses related to invoices received during 2001 from a professional services business that provided legal services to the Company that the Company, with legal counsel, has determined to be no longer statutorily payable as the statute of limitations to bring a

Table of Contents

Index to Financial Statements

claim has expired; and (iii) the reversal of a total of \$38,000 of accrued expenses related to (x) potential reimbursement of expenses to members of a group who in 1999 succeeded in electing four members to the Company's Board of Directors and (y) the purchase of equipment in 2007 for which an invoice was never submitted by the supplier that the Company, with legal counsel, has determined to be no longer statutorily payable as the applicable statutes of limitations to bring such claims have expired. Additionally, other income (expenses) includes interest on funds borrowed under the Company's line of credit with a bank and on unsecured loans from five individuals. Also included in other income (expenses) are financing costs related to warrants issued in 2011 and 2010 in conjunction with unsecured loans received and certain financing considerations provided during those periods.

9. Income Taxes

There is no income tax benefit for the years ended December 31, 2011 and December 31, 2010 due to the availability of net operating loss carryforwards (NOLs) for which the Company had previously established a 100% valuation allowance for deferred tax assets due to the uncertainty of their recoverability. At December 31, 2011 and December 31, 2010, the Company had NOLs approximating \$6,012,000 and \$6,104,000, respectively. The operating losses at December 31, 2011 are available to offset future taxable income; however, if not utilized, they expire in varying amounts through the year 2031. As a result of the sale of the Company's common stock in an equity offering in late 1997 and the issuance of additional shares, the amount of the NOLs may be limited. Additionally, the utilization of these NOLs, if available, to reduce the future income taxes will depend on the generation of sufficient taxable income prior to their expiration. There were no material temporary differences for the years ended December 31, 2011 and December 31, 2010. The Company has established a 100% valuation allowance of approximately \$2,465,000 and \$2,502,000 at December 31, 2011 and December 31, 2010, respectively, for the deferred tax assets due to the uncertainty of their realization.

The Company has adopted the provisions of FASB ASC 740-10-50-15, Unrecognized Tax Benefit Related Disclosures. There were no unrecognized tax benefits as of the date of adoption and no unrecognized tax benefits at December 31, 2011. There was no change in unrecognized tax benefits during the year ended December 31, 2011 and there was no accrual for uncertain tax positions as of December 31, 2011.

There were no interest and penalties recognized in the statement of operations and in the balance sheet. Tax years from 2008 through 2011 remain subject to examination by U.S. federal and state tax jurisdictions.

10. Commitments and Contingencies

The Company conducts its operations in leased facilities and leases equipment under non-cancelable operating leases expiring at various dates to 2013.

Future minimum lease payments under non-cancelable operating leases with initial or remaining terms of one year or more at December 31, 2011 are: \$44,400 2012 and \$11,400 2013.

Total rental expense under operating leases was \$42,400 in both 2011 and 2010.

Index to Financial Statements

The Company has an employment agreement, expiring in May 2013, with Michael A. Feinstein, M.D., its Chairman of the Board and Chief Executive Officer. The employment agreement contains one-year renewal provisions that become effective after the original term. Dr. Feinstein receives base compensation of \$85,000 per year plus a performance bonus determined by the Company's Board of Directors. In 2011, the Company entered into an employment agreement, expiring in 2014, with Terry W. Stovold, its Director of Operations and Sales whereby Mr. Stovold receives a salary set by the Company's Board of Directors, currently set at \$75,000, along with a commission of seven percent on sales generated by his efforts. The employment agreement contains one-year renewal provisions that become effective after the original term. Future minimum compensation payments under these employment agreements are: \$160,000 to be paid in 2012; \$110,400 to be paid in 2013 and \$18,800 to be paid in 2014.

From time to time, the Company may be subject to legal proceedings and claims that arise in the ordinary course of its business.

11. Stock Options, Warrants and 401(k) Savings Plan

The Company follows FASB ASC 718, *Share Based Payment*, which requires that the cost resulting from all share-based payment transactions be recognized in the Company's financial statements. FASB ASC 718 requires all share-based payments to employees, including grants of employee stock options, to be recognized in the statement of operations based on their fair values.

The 1996 and 1999 Stock Option Plans provided for the granting of up to 2,700,000 incentive and non-qualified stock options to employees, non-employee directors, consultants and advisors to the Company. In the case of options designated as incentive stock options, the exercise price of the options granted must be not less than the fair market value of such shares on the date of grant. Non-qualified stock options may be granted at any amount established by the Stock Option Committee or, in the case of Discounted Options issued to non-employee directors in lieu of any portion of an Annual Retainer, in accordance with a formula designated in the Plan. The 1996 Stock Option Plan terminated in June 2006 and no further stock options can be granted under the plan. The 1999 Stock Option Plan terminated in February 2009 and no further stock options can be granted under the plan; however, options granted before the termination date may be exercised through their expiration date.

The Company uses the Black-Scholes option pricing model to calculate the grant-date fair value of an award.

Table of Contents**Index to Financial Statements**

A summary of stock options under the Company's stock option plans follows:

	Number of Shares	Exercise Price Range Per Share	Weighted Average Exercise Price
Outstanding at December 31, 2009	1,325,000	\$.10 to \$.45	\$.24
Options canceled	80,000	.12	.12
Options expired	300,000	.10 and .11	.10
Outstanding at December 31, 2010	945,000	.12 to .45	.29
Options expired	300,000	.215	.215
Outstanding at December 31, 2011	645,000	\$.12 and \$.45	\$.32

	Option Shares	Exercise Price Range Per Share	Weighted Average Exercise Price
Exercisable options at year end:			
2011	645,000	\$.12 and \$.45	\$.32
Weighted average remaining contractual life (years)	1.64		
Options available for future grant under all plans:			
2011	0		

In February 2009, the Board of Directors of the Company, under the Company's 1999 Stock Option Plan, granted options to acquire 200,000 shares of its common stock to five employees of the Company, options to acquire 75,000 shares of its common stock to two consultants and options to acquire 50,000 shares of its common stock to an officer of the Company at \$0.12 per share. The options vested in February 2010 and expire after five years. In accordance with the fair value method as described in accounting requirements of FASB ASC 718, compensation expense of approximately \$22,900 was recognized over the vesting period of the options through February 2010 to account for the cost of services received by the Company in exchange for the grant of stock options. The fair value was determined using the Black-Scholes pricing model with the following assumptions: expected life-5 years; interest rate-1.81%; volatility based on the Company's historical volatility-70% and dividend yield-0. During the year ended December 31, 2010, compensation expense of approximately \$3,000 was recognized. There was no compensation expense recognized during the year ended December 31, 2011 and there was no unrecognized portion of expense at December 31, 2011.

At December 31, 2011, the Company had 85,500 warrants to purchase common stock of the Company outstanding at exercise prices ranging from \$0.045 to \$0.07 and expiring at various dates through November 2016. In addition to the warrants granted in conjunction with loans provided to the Company by five individuals in 2010 and 2011, the Company, in November 2011, granted warrants to purchase 20,000 shares of common stock of the Company at \$0.045 per share to a professional services provider related to certain fee payment considerations granted by the individual. The warrants expire in five years. A financing cost of approximately \$500, representing the fair value of the warrants, was charged to income in 2011. The fair value of the warrants was determined using the Black-Scholes pricing model with the following assumptions: expected life-5 years; interest rate 0.9%; expected volatility based on the Company's historical volatility-72%; and dividend yield-0.

A summary of outstanding warrants follows:

	Number of Shares	Exercise Price Range Per Share	Weighted Average Exercise Price
Outstanding at December 31, 2009	47,000	\$.21 to \$.27	\$.23
Warrants granted	50,500	.06 and .07	.07
Outstanding at December 31, 2010	97,500	.06 to .27	.14
Warrants granted	35,000	.045 and .06	.05
Warrants expired	47,000	.21 to .27	.23
Outstanding at December 31, 2011	85,500	\$.045 to \$.07	\$.06

	Shares	Exercise Price Range Per Share	Weighted Average Exercise Price
Exercisable warrants at year end:			
2011	85,500	\$.045 to \$.07	\$.06
Weighted average remaining contractual life (years)	3.77		

At December 31, 2011, the Company has reserved 730,500 shares of common stock for possible future issuance upon exercise of 645,000 stock options and 85,500 warrants.

The Company sponsors a 401(k) savings plan, covering substantially all employees, providing for employee and employer contributions. Employer contributions are made at the discretion of the Company. There were no contributions charged to expense during 2011 or 2010.

12. Major Customer and Geographic Information

The Company's revenues, expressed as a percentage of total revenues, from non-affiliated customers that equaled 10% or more of the Company's total revenues were:

	Year ended December 31	
	2011	2010
Customer A	23%	30%
Customer B	21%	25%
Customer C	18%	9%

The Company's non-affiliate customers whose individual balances amounted to more than 10% of the Company's net accounts receivable, expressed as a percentage of net accounts receivable, were:

	December 31	
	2011	2010
Customer A		75%
Customer B	82%	16%
Customer C		

The Company performs ongoing credit evaluations of its customers and generally does not require

Table of Contents**Index to Financial Statements**

collateral. The Company also maintains allowances for potential credit losses. The loss of a major customer could have a material adverse effect on the Company's business operations and financial condition.

The Company's revenues by geographic region are as follows:

	Year ended December 31	
	2011	2010
North America	\$ 535,200	\$ 569,800
Asia	150,900	61,900
South America	27,400	24,300
Europe		2,700
	\$ 713,500	\$ 658,700

13. Subsequent Events

In February 2012, the Company sold 104,167 shares of its common stock to a non-affiliated investor for \$5,000 in a private placement. In March 2012, the Company sold an additional 104,167 shares of its common stock to this investor for \$5,000 in the private placement.
