Exposure to Securitized Products and Related Investments

Our exposure to securitized products and related investments as of June 30, 2012 is outlined below. (Figures are on a managerial basis and rounded off to the billion yen other than that of P/L impact.)

[Balance, net unrealized gains (losses), realized gains]

The balance as of the end of June 2012 increased to \$1.72 trillion in total, an increase of \$0.06 trillion compared with the balance as of the end of March 2012, mainly due to an increase in highly rated CLOs and CMBS.

Net unrealized losses were ¥40 billion, improved by ¥13 billion compared to the end of March 2012.

The effect on the P/L for the first quarter ended June 30, 2012 was a slight loss of approximately ¥0.3 billion.

- 1. Balance is the amount after impairment and before deducting net unrealized losses.

 The above table does not include mortgage-backed securities arranged and guaranteed by U.S. government sponsored enterprises, etc.,

 Japanese RMBS such as Japanese Housing Finance Agency securities, and products held by funds such as investment trusts. These are also applicable to the tables in this document.
- 2. Following the publication of Tentative Solution on Reclassification of Debt Securities (Practical Issue Task Force No.26, The Accounting Standards Board of Japan, December 5, 2008), some of our securitized products were reclassified into securities being held to maturity from securities available for sale at and after the end of January 2009. The balance and net unrealized gains (losses) of the securities being held to maturity in the above table are based on book value before reclassification.

[Distribution by rating]

AAA-rated products accounted for 72% of our investments in securitized products, an increase of 2% compared with the end of March 2012, mainly due to an increase in highly rated CLOs and CMBS.

(Vhn)

AAA and AA-rated products accounted for 89% of our investments in securitized products.
