KRONOS WORLDWIDE, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2012

(unaudited)

Note 1 Organization and basis of presentation:

Organization We are a majority-owned subsidiary of Valhi, Inc. (NYSE: VHI). At June 30, 2012, Valhi held approximately 50% of our outstanding common stock and NL Industries, Inc. (NYSE: NL) held an additional 30% of our common stock. Valhi owns approximately 83% of NL's outstanding common stock. Approximately 95% of Valhi's outstanding common stock is held by Contran Corporation and its subsidiaries. Substantially all of Contran's outstanding voting stock is held by trusts established for the benefit of certain children and grandchildren of Harold C. Simmons (for which Mr. Simmons is the sole trustee), or is held directly by Mr. Simmons or other persons or entities related to Mr. Simmons. Consequently, Mr. Simmons may be deemed to control Contran, Valhi and us.

Basis of presentation The unaudited Condensed Consolidated Financial Statements contained in this Quarterly Report have been prepared on the same basis as the audited Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2011 that we filed with the Securities and Exchange Commission (SEC) on March 5, 2012 (2011 Annual Report). In our opinion, we have made all necessary adjustments (which include only normal recurring adjustments) in order to state fairly, in all material respects, our consolidated financial position, results of operations and cash flows as of the dates and for the periods presented. We have condensed the Consolidated Balance Sheet and Statement of Stockholders' Equity at December 31, 2011 contained in this Quarterly Report as compared to our audited Consolidated Financial Statements at that date, and we have omitted certain information and footnote disclosures (including those related to the Consolidated Balance Sheet at December 31, 2011) normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). Our results of operations for the interim periods ended June 30, 2012 may not be indicative of our operating results for the full year. The Condensed Consolidated Financial Statements contained in this Quarterly Report should be read in conjunction with our 2011 Consolidated Financial Statements contained in our 2011 Annual Report.

Unless otherwise indicated, references in this report to we, us or our refer to Kronos Worldwide, Inc. and its subsidiaries (NYSE: KRO) taken as a whole.

In May 2011, we implemented a 2-for-1 split of our common stock effected in the form of a stock dividend. We have adjusted all share and per-share disclosures for all periods presented prior to May 2011 to give effect to the stock split. Cash dividends in the first quarter of 2011 include a \$.50 per share special dividend.

Table of Contents**Note 2 Marketable securities:**

Our marketable securities at June 30, 2012 consist of investments in the publicly-traded shares of related parties: Titanium Metals Corporation (TIMET), Valhi, NL and CompX International Inc. Contran, Mr. Harold Simmons and persons and other entities related to Mr. Simmons own a majority of TIMET's outstanding common stock, and NL owns a majority of CompX's outstanding common stock. All of our marketable securities at June 30, 2012 and December 31, 2011 are accounted for as available-for-sale, which are carried at fair value using quoted market prices in active markets for each marketable security, and represent a Level 1 input within the fair value hierarchy. See Note 12. Because we have classified all of our marketable securities as available-for-sale, any unrealized gains or losses on the securities are recognized through other comprehensive income.

Marketable security	Fair value measurement level	Market Value	Cost Basis (In millions)	Unrealized gains (losses)
As of December 31, 2011:				
Current assets:				
Mutual funds	1	\$ 20.9	\$ 21.1	\$ (.2)
Noncurrent assets:				
TIMET common stock	1	\$ 63.6	\$ 73.9	\$ (10.3)
Valhi common stock	1	34.7	15.3	19.4
NL and CompX common stocks	1	.1	.1	
Total		\$ 98.4	\$ 89.3	\$ 9.1
As of June 30, 2012:				
Noncurrent assets:				
TIMET common stock	1	\$ 48.0	\$ 73.9	\$ (25.9)
Valhi common stock	1	21.5	15.3	6.2
NL and CompX common stocks	1	.1	.1	
Total		\$ 69.6	\$ 89.3	\$ (19.7)

At December 31, 2011 and June 30, 2012, we held approximately 4.2 million shares, or 2.4%, of TIMET's outstanding common stock and approximately 1.7 million shares of Valhi's common stock. At June 30, 2012, the quoted market price of TIMET's and Valhi's common stock was \$11.31 and \$12.49 per share, respectively. At December 31, 2011, such quoted market prices were \$14.98 and \$20.16 per share, respectively. In May 2012, Valhi implemented a 3-for-1 split of its common stock. We have adjusted all share and per-share disclosures related to our investment in Valhi stock for all periods prior to May 2012 to give effect to the stock split. The stock split had no financial statement impact to us, and our ownership interest in Valhi did not change as a result of the split. We also held a nominal number of shares of CompX and NL common stocks.

The TIMET, Valhi, CompX and NL common stocks we own are subject to the restrictions on resale pursuant to certain provisions of SEC Rule 144. In addition, as a majority-owned subsidiary of Valhi we cannot vote our shares of Valhi common stock under Delaware Corporation Law, but we do receive dividends from Valhi on these shares, when declared and paid.

Table of Contents

With respect to our investment in TIMET, our cost basis has exceeded its market value since October 2011 but we consider such decline in market price to be temporary at June 30, 2012. We considered all available evidence in reaching this conclusion, including our ability and intent to hold this investment for a reasonable period of time sufficient for the recovery of fair value, as evidenced by the amount of liquidity we currently have with cash on hand. We will continue to monitor the quoted market price for this investment. In this regard, as of August 3, 2012, the aggregate quoted market price for our shares of TIMET common stock was \$22.4 million less than our aggregate cost basis. If we conclude in the future that a decline in value of one or more of these securities was other than temporary, we would recognize impairment through an income statement charge at that time. Such income statement impairment charge would be offset in other comprehensive income by the reversal of the previously recognized unrealized losses to the extent they were previously recognized in accumulated other comprehensive income.

At December 31, 2011, we held investments in various mutual funds which had a primary investment objective of holding corporate and government debt securities from U.S. and other markets. These funds were liquidated for cash proceeds in the first quarter of 2012.

Less current maturities	2.2	21.7
 Total long-term debt	 \$ 362.9	 \$ 475.3

Table of Contents

Term Loan On June 13, 2012, we entered into a \$400 million term loan. We used a portion of the net proceeds of the term loan to redeem the remaining outstanding 6.5% Senior Secured Notes (279.2 million principal amount outstanding), as discussed below. The term loan was issued at 98.5% of the principal amount, or an aggregate of \$394 million. The term loan provides for an additional \$100 million of term loan borrowings in the future under certain conditions. The remaining net proceeds of the term loan, plus any additional term loan which might be borrowed in the future, are available for our general corporate purposes. The term loan permits the continued payment of regular quarterly dividends as well as the payment of special dividends, if any. The term loan:

bears interest, at our option, at LIBOR (with LIBOR no less than 1.0%) plus 4.75% or the base rate, as defined in the agreement, plus 3.75%. The average interest rate on these borrowings at June 30, 2012, and the period from issuance to June 30, 2012, was 5.75% and 6.25%, respectively;

requires quarterly principal repayments of \$5.0 million commencing in September 2012, other mandatory principal repayments of formula-determined amounts under specified conditions with all remaining principal balance due in June 2018. Voluntary principal prepayments are permitted at any time (without penalty);

is collateralized by, among other things, a first priority lien on (i) 100% of the common stock of certain of our U.S. wholly-owned subsidiaries, (ii) 65% of the common stock or other ownership interest of our Canadian subsidiary (Kronos Canada, Inc.) and certain first-tier European subsidiaries (Kronos Titan GmbH and Kronos Denmark ApS) and (iii) a \$362.1 million unsecured promissory note issued by our wholly-owned subsidiary, Kronos International, Inc. (KII) to us;

is also collateralized by a second priority lien on all of the U.S. assets which collateralize our new North American revolving facility, as discussed below;

contains a number of covenants and restrictions which, among other things, restrict our ability to incur additional debt, incur liens, pay dividends or merge or consolidate with, or sell or transfer substantially all of our assets to, another entity, contains other provisions and restrictive covenants customary in lending transactions of this type and requires the maintenance of a specified financial covenant (leverage to EBITDA, as defined) to be less than or equal to 3.5 to 1.0; and

contains customary default provisions, including a default under any of our other indebtedness in excess of \$50 million. The carrying amount of the term loan includes unamortized original issue discount of \$6.0 million at June 30, 2012.

Senior Secured Notes In March 2011, we redeemed 80 million of our 400 million 6.5% Senior Secured Notes at 102.17% of the principal amount for an aggregate of \$115.7 million, including a \$2.5 million call premium. During the third and fourth quarters of 2011, we repurchased in open market transactions an aggregate of 40.8 million principal amount of the Senior Notes for an aggregate of 40.6 million (an aggregate of \$57.6 million when repurchased). Following such partial redemption and repurchases, 279.2 million principal amount of Senior Notes remained outstanding. We recognized a \$3.3 million pre-tax interest charge related to the prepayment of the Senior Notes in the first quarter of 2011, consisting of the call premium and the write-off of unamortized deferred financing costs and original issue discount associated with the redeemed Senior Notes.

Table of Contents

Immediately upon the June 2012 issuance of the term loan as discussed above, we sent a request to the trustee under the indenture for the Senior Notes, asking that all remaining Senior Notes be called for redemption on July 20, 2012. We also directed that a portion of the proceeds from the new term loan be irrevocably sent to the trustee, in an amount sufficient to pay the principal, call premium at 1.01083% of the principal amount and all accrued and unpaid interest due through the July 20, 2012 redemption date. Upon the trustee's confirmation of receipt of such funds on June 14, 2012, the trustee discharged our obligations under the indenture and released the liens on all collateral thereunder. Because we were released as being the primary obligor under the indenture as of June 14, 2012, the Senior Notes were derecognized as of that date along with the funds irrevocably sent to the trustee to effect the July 20, 2012 redemption. We recognized an aggregate \$7.2 million pre-tax charge related to the early extinguishment of debt in the second quarter of 2012, consisting of the call premium paid, interest from the June 14, 2012 indenture discharge date to the July 20, 2012 redemption date and the write-off of unamortized deferred financing costs and original issue discount associated with the redeemed Senior Notes.

Revolving North American credit facility Also in June 2012, we entered into a \$125 million revolving bank credit facility which matures June 2017. Borrowings under the revolving credit facility are available for our general corporate purposes. Available borrowings on this facility are based on formula-determined amounts of eligible trade receivables and inventories, as defined in the agreement, of certain of our North American subsidiaries less any outstanding letters of credit up to \$15 million issued under the facility (with revolving borrowings by our Canadian subsidiary limited to \$25 million). Any amounts outstanding under the revolving credit facility bear interest, at our option, at LIBOR plus a margin ranging from 1.5% to 2.0% or at the applicable base rate, as defined in the agreement, plus a margin ranging from .5% to 1.0%. The credit facility is collateralized by, among other things, a first priority lien on the borrowers' trade receivables and inventories. The facility contains a number of covenants and restrictions which, among other things, restricts the borrowers' ability to incur additional debt, incur liens, pay dividends or merge or consolidate with, or sell or transfer all or substantially all of their assets to, another entity, contains other provisions and restrictive covenants customary in lending transactions of this type and under certain conditions requires the maintenance of a specified financial covenant (fixed charge coverage ratio, as defined) to be at least 1.0 to 1.0. At June 30, 2012, we had no outstanding borrowings under this revolving credit facility and approximately \$125 million was available for borrowing.

Revolving European credit facility During the first six months of 2012, we borrowed 80 million (\$107.4 million when borrowed) under our European credit facility. The average interest rate on these borrowings as of and for the six-months ended June 30, 2012 was 1.88% and 1.94%, respectively.

Canada At June 30, 2012, an aggregate of Cdn. \$7.3 million letters of credit were outstanding under our Canadian subsidiary's loan agreement with the Bank of Montreal which provides solely for the issuance of up to Cdn. \$10.0 million in letters of credit.

Table of Contents

Restrictions and other Our European credit facility described above requires the borrower to maintain minimum levels of equity, requires the maintenance of certain financial ratios, limits dividends and additional indebtedness and contains other provisions and restrictive covenants customary in lending transactions of this type. Our new term loan and North American revolving credit facility also contain restrictive covenants, as described above. We are in compliance with all of our debt covenants at June 30, 2012. We believe that we will be able to comply with the financial covenants contained in our credit facilities and term loan through their maturity; however if future operating results differ materially from our expectations we may be unable to maintain compliance. At June 30, 2012, there were no restrictions on our ability to pay dividends.

Note 8 Income taxes:

	Six months ended June 30,	
	2011	2012
	(In millions)	
Expected tax expense, at U.S. Federal statutory income tax rate of 35%	\$ 80.0	\$ 106.4
Non-U.S. tax rates	(7.5)	(11.7)
Incremental tax on earnings of non-U.S. companies	4.7	5.7
U.S. state income taxes, net	.7	1.7
Other, net	1.4	.6
 Total	 \$ 79.3	 \$ 102.7

Tax authorities are examining certain of our non-U.S. tax returns and have or may propose tax deficiencies, including interest and penalties. Because of the inherent uncertainties involved in settlement initiatives and court and tax proceedings, we cannot guarantee that these matters will be resolved in our favor, and therefore our potential exposure, if any, is also uncertain. In 2011 and 2012, we received notices of re-assessment from the Canadian federal and provincial tax authorities related to the years 2002 through 2004. We object to the re-assessments and believe the position is without merit. Accordingly, we are appealing the re-assessments and in connection with such appeal we were required to post letters of credit aggregating Cdn. \$7.3 million (see Note 7). If the full amount of the proposed adjustment were ultimately to be assessed against us, the cash tax liability would be approximately \$15.2 million. We believe we have adequate accruals for additional taxes and related interest expense which could ultimately result from tax examinations. We believe the ultimate disposition of tax examinations should not have a material adverse effect on our consolidated financial position, results of operations or liquidity. We currently estimate that our unrecognized tax benefits will not change materially during the next twelve months.

Table of Contents**Note 9 Employee benefit plans:**

Defined benefit plans The components of net periodic defined benefit pension cost are presented in the table below.

	Three months ended June 30,		Six months ended June 30,	
	2011	2012	2011	2012
	(In millions)			
Service cost	\$ 2.8	\$ 2.6	\$ 5.5	\$ 5.2
Interest cost	6.3	5.8	12.2	11.6
Expected return on plan assets	(4.9)	(4.6)	(9.5)	(9.2)
Amortization of prior service cost	.4	.4	.8	.8
Amortization of net transition obligations	.1	.1	.2	.2
Recognized actuarial losses	1.7	2.0	3.3	4.0
Total	\$ 6.4	\$ 6.3	\$ 12.5	\$ 12.6

Postretirement benefits The components of net periodic postretirement benefits other than pension (OPEB) cost are presented in the table below.

	Three months ended June 30,		Six months ended June 30,	
	2011	2012	2011	2012
	(In millions)			
Service cost	\$.	\$.1	\$.1	\$.1
Interest cost	.2	.2	.3	.3
Amortization of prior service credit	(.2)	(.1)	(.4)	(.3)
Recognized actuarial loss		.1	.1	.2
Total	\$.	\$.2	\$.1	\$.3

Contributions We expect our 2012 contributions for our pension and other postretirement plans to be approximately \$27 million.

Note 10 Other noncurrent liabilities:

	December 31, 2011	June 30, 2012
	(In millions)	
Reserve for uncertain tax positions	\$ 11.9	\$ 13.0
Employee benefits	10.2	9.6
Other	5.3	5.2
Total	\$ 27.4	\$ 27.8

Note 11 Commitments and contingencies:

Edgar Filing: KRONOS WORLDWIDE INC - Form 10-Q

From time-to-time, we are involved in various environmental, contractual, product liability, patent (or intellectual property), employment and other claims and disputes incidental to our operations. In certain cases, we have insurance coverage for these items. We currently believe the disposition of all claims and disputes, individually or in the aggregate, should not have a material adverse effect on our consolidated financial position, results of operations or liquidity beyond the accruals we have already provided.

Table of Contents

Please refer to our 2011 Annual Report for a discussion of certain other legal proceedings to which we are a party.

Note 12 Financial instruments:

The following table summarizes the valuation of our financial instruments recorded on a fair value basis as of December 31, 2011 and June 30, 2012:

	Total	Fair Value Measurements		
		Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
(In millions)				
Asset (liability)				
December 31, 2011				
Currency forward contracts	\$ (.8)	\$ (.8)	\$	\$
Current marketable securities (See Note 2)	20.9	20.9		
Noncurrent marketable securities (See Note 2)	98.4	98.4		
June 30, 2012				
Currency forward contracts	\$ (.1)	\$ (.1)	\$	\$
Noncurrent marketable securities (See Note 2)	69.6	69.6		

Certain of our sales generated by our non-U.S. operations are denominated in U.S. dollars. We periodically use currency forward contracts to manage a very nominal portion of currency exchange rate risk associated with trade receivables denominated in a currency other than the holder's functional currency or similar exchange rate risk associated with future sales. We have not entered into these contracts for trading or speculative purposes in the past, nor do we currently anticipate entering into such contracts for trading or speculative purposes in the future. Derivatives used to hedge forecasted transactions and specific cash flows associated with financial assets and liabilities denominated in currencies other than the U.S. dollar and which meet the criteria for hedge accounting are designated as cash flow hedges. Consequently, the effective portion of gains and losses is deferred as a component of accumulated other comprehensive income and is recognized in earnings at the time the hedged item affects earnings. Contracts that do not meet the criteria for hedge accounting are marked-to-market at each balance sheet date with any resulting gain or loss recognized in income currently as part of net currency transactions. The fair value of the currency forward contracts is determined using Level 1 inputs based on the currency spot forward rates quoted by banks or currency dealers.

At June 30, 2012, we had currency forward contracts to exchange:

an aggregate of \$24.0 million for an equivalent value of Canadian dollars at exchange rates ranging from Cdn. \$1.0 to Cdn. \$1.03 per U.S. dollar. These contracts with Wells Fargo Bank, N.A. mature from July 2012 through December 2012 at a rate of \$4.0 million per month, subject to early redemption provisions at our option; and

Table of Contents

an aggregate \$30.0 million for an equivalent value of Norwegian kroner at exchange rates ranging from kroner 5.99 to kroner 6.05 per U.S. dollar. These contracts with DnB Nor Bank ASA mature at a rate of \$5.0 million per month in certain months from August 2012 through May 2013.

The estimated fair value of our currency forward contracts at June 30, 2012 was a \$.1 million net liability, of which \$.2 million is recognized as part of accounts and other receivables and \$.3 million is recognized as part of accounts payable and accrued liabilities. There is also a corresponding \$.1 million currency transaction loss recognized in our Condensed Consolidated Statement of Income. We are not currently using hedge accounting for our outstanding currency forward contracts at June 30, 2012, and we did not use hedge accounting for any of such contracts we previously held in 2011.

The following table presents the financial instruments that are not carried at fair value but which require fair value disclosure as of December 31, 2011 and June 30, 2012.

	December 31, 2011		June 30, 2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In millions)			
Cash, cash equivalents and restricted cash	\$ 89.8	\$ 89.8	\$ 100.8	\$ 100.8
Notes payable and long-term debt:				
Fixed rate with market quotes - 6.5% Senior Secured Notes	360.6	362.6		
European credit facility			99.5	99.5
Term loan			394.0	394.0
Common stockholders' equity	924.3	2,090.9	1,054.0	1,830.2

At December 31, 2011, the estimated market price of the 6.5% Notes was approximately 1,004 per 1,000 principal amount. The fair value of our 6.5% Notes was based on quoted market prices at December 31, 2011; however, these quoted market prices represent Level 2 inputs because the markets in which the Notes trade were not active. The fair value of our common stockholders' equity is based upon quoted market prices at each balance sheet date, which represent Level 1 inputs. The fair values of variable interest rate debt represent Level 2 inputs, and are deemed to approximate book value. Due to their near-term maturities, the carrying amounts of accounts receivable and accounts payable are considered equivalent to fair value.

Note 13 Recent accounting standards:

In June 2011 the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-05, *Presentation of Comprehensive Income*. ASU 2011-05 eliminates the option of presenting comprehensive income as a component of the Consolidated Statement of Stockholders' Equity and instead requires comprehensive income to be presented as a component of the Consolidated Statement of Income or in a separate Consolidated Statement of Comprehensive Income immediately following the Consolidated Statement of Income. In accordance with ASU 2011-05, we now present our comprehensive income in a separate Condensed Consolidated Statement of Comprehensive Income.

Table of Contents

Additionally, ASU 2011-05 would have required us to present on the face of our financial statements the effect of reclassifications out of accumulative other comprehensive income on the components of net income and other comprehensive income. However, in December 2011 the FASB issued ASU 2011-12, *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*. ASU 2011-12 defers the effective date for the requirement to present on the face of our financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income. Adoption of ASU 2011-05, as amended by ASU 2011-12, did not have a material effect on our Condensed Consolidated Financial Statements.

In December 2011 the FASB issued ASU 2011-11 *Disclosures about Offsetting Assets and Liabilities*. ASU 2011-11 requires entities to disclose both gross information and net information about both instruments and transactions eligible for offset in the balance sheet and instruments and transactions subject to an agreement similar to a master netting arrangement. This standard will be effective for annual and interim periods beginning with our first quarter 2013 report. We do not believe the adoption of this standard will have a material effect on our Condensed Consolidated Financial Statements.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS:

Business overview

We are a leading global producer and marketer of value-added titanium dioxide pigments (TiO₂). TiO₂ is used for a variety of manufacturing applications, including plastics, paints, paper and other industrial products. For the six months ended June 30, 2012, approximately one-half of our sales volumes were into European markets. Our production facilities are located in Europe and North America.

We consider TiO₂ to be a "quality of life" product, with demand affected by gross domestic product, or GDP, and overall economic conditions in our markets located in various regions of the world. Over the long-term, we expect demand for TiO₂ will grow by 2% to 3% per year, consistent with our expectations for the long-term growth in GDP. However, even if we and our competitors maintain consistent shares of the worldwide market, demand for TiO₂ in any interim or annual period may not change in the same proportion as the change in GDP, in part due to relative changes in the TiO₂ inventory levels of our customers. We believe that our customers' inventory levels are influenced in part by their expectations for future changes in market TiO₂ selling prices as well as their expectations for future availability of product. Although certain of our TiO₂ grades are considered specialty pigments, the majority of our grades and substantially all of our production are considered commodity pigment products, with price and availability being the most significant competitive factors along with quality and customer service.

The factors having the most impact on our reported operating results are:

our TiO₂ sales and production volumes,

TiO₂ selling prices,

currency exchange rates (particularly the exchange rate for the U.S. dollar relative to the euro, Norwegian krone and Canadian dollar) and

manufacturing costs, particularly raw materials, maintenance and energy-related expenses.

Our key performance indicators are our TiO₂ average selling prices and our TiO₂ sales and production volumes. TiO₂ selling prices generally follow industry trends and prices will increase or decrease generally as a result of competitive market pressures.

Executive summary

We reported net income of \$64.5 million, or \$.56 per share, in the second quarter of 2012 as compared to net income of \$89.0 million, or \$.77 per share, in the second quarter of 2011. For the first six months of 2012, we reported net income of \$201.4 million, or \$1.74 per share, compared to net income of \$149.3 million, or \$1.29 per share, in the first six months of 2011. Our net income for the second quarter of 2012 is lower as compared to the same period

Table of Contents

of 2011 due to lower income from operations resulting from lower sales and production volumes and higher raw material costs, partially offset by higher selling prices. Our net income for the first six months of 2012 is higher as compared to the first six months of 2011 due to higher income from operations resulting principally from higher selling prices, partially offset by lower sales and production volumes and higher raw material costs.

Our results in the first six months of 2011 include an aggregate first quarter charge of \$3.3 million (\$2.2 million, or \$.02 per share, net of income tax benefit) consisting of the call premium and the write-off of unamortized deferred financing costs and original issue discount associated with the March 2011 redemption of \$80 million principal amount of our Senior Notes. Our results in the first six months of 2012 include an aggregate second quarter charge of \$7.2 million (\$4.7 million, or \$.04 per share, net of income tax benefit) consisting of the call premium paid, interest from the June 14, 2012 indenture discharge date to the July 20, 2012 redemption date and the write-off of unamortized deferred financing costs and original issue discount associated with the June 2012 redemption of the remaining \$279.2 million principal amount of our Senior Notes.

Forward-looking information

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, as amended. Statements in this Quarterly Report on Form 10-Q that are not historical facts are forward-looking in nature and represent management's beliefs and assumptions based on currently available information. Statements in this report including, but not limited to, statements found in Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations, are forward-looking statements that represent our management's beliefs and assumptions based on currently available information. In some cases you can identify forward-looking statements by the use of words such as believes, intends, may, should, could, anticipates, expects or comparable terminology, or by discussions of strategies and trends. Although we believe the expectations reflected in forward-looking statements are reasonable, we do not know if these expectations will be correct. Such statements by their nature involve substantial risks and uncertainties that could significantly impact expected results. Actual future results could differ materially from those predicted. The factors that could cause our actual future results to differ materially from those described herein are the risks and uncertainties discussed in this Quarterly Report and those described from time to time in our other filings with the SEC including, but are not limited to, the following:

Future supply and demand for our products;

The extent of the dependence of certain of our businesses on certain market sectors;

The cyclical nature of our business;

Customer inventory levels;

Changes in raw material and other operating costs (such as energy and ore costs);

Changes in the availability of raw materials (such as ore);

Table of Contents

General global economic and political conditions (such as changes in the level of gross domestic product in various regions of the world and the impact of such changes on demand for TiO₂);

Competitive products and substitute products;

Customer and competitor strategies;

Potential consolidation of our competitors;

The impact of pricing and production decisions;

Competitive technology positions;

The introduction of trade barriers;

Possible disruption of our business, or increases in our cost of doing business, resulting from terrorist activities or global conflicts;

Fluctuations in currency exchange rates (such as changes in the exchange rate between the U.S. dollar and each of the euro, the Norwegian krone and the Canadian dollar), or possible disruptions to our business resulting from potential instability resulting from uncertainties associated with the euro;

Operating interruptions (including, but not limited to, labor disputes, leaks, natural disasters, fires, explosions, unscheduled or unplanned downtime and transportation interruptions);

Our ability to renew or refinance credit facilities;

Our ability to maintain sufficient liquidity;

The ultimate outcome of income tax audits, tax settlement initiatives or other tax matters;

Our ability to utilize income tax attributes, the benefits of which have been recognized under the more-likely-than-not recognition criteria;

Environmental matters (such as those requiring compliance with emission and discharge standards for existing and new facilities);

Government laws and regulations and possible changes therein;

The ultimate resolution of pending litigation; and

Possible future litigation.

Should one or more of these risks materialize (or the consequences of such a development worsen), or should the underlying assumptions prove incorrect, actual results could differ materially from those forecasted or expected. We disclaim any intention or obligation to update or revise any forward-looking statement whether as a result of changes in information, future events or otherwise.

* Thousands of metric tons

Current industry conditions Throughout 2011 and continuing into the first quarter of 2012, our production facilities operated at full practical capacity rates. During the second quarter of 2012, we operated our facilities at approximately 86% of practical capacity, primarily in order to align production and inventory levels with decreased demand. We also increased TiO₂ selling prices throughout 2011. As a result, our average selling prices in the second quarter 2012 were 24% higher as compared to the second quarter of 2011, and our average selling prices at the end of the second quarter of 2012 were comparable to selling prices at the end of 2011. Global customer demand for TiO₂ products also remained strong throughout much of 2011. Although we did experience a softening of demand in the fourth quarter of 2011 as a result of customer destocking, customer demand in the first quarter of 2012 rebounded from the softness experienced in the fourth quarter of 2011. Aggregate global demand for TiO₂ products softened again in the second quarter of 2012 in line with global economic conditions, although markets in North America and certain export markets continue to show relative strength. We expect demand for TiO₂ products will increase as economic conditions improve in the various regions of the world.

Net sales Net sales in the second quarter of 2012 increased 1%, or \$7.8 million, compared to the second quarter of 2011 primarily due to the net effects of a 24% increase in average TiO₂ selling prices (which increased net sales by approximately \$129 million) and a 16% decrease in sales volume (which decreased net sales by approximately \$86 million). TiO₂ selling prices will increase or decrease generally as a result of competitive market pressures, changes in the relative level of supply and demand as well as changes in raw material and other manufacturing costs. Based on the

Table of Contents

increases in our TiO₂ selling prices we implemented throughout 2011 and the current conditions in the TiO₂ industry, we currently expect our average selling prices for the remainder of 2012 to continue to be higher than the comparable periods in 2011.

Our sales volumes decreased 16% in the second quarter of 2012 as compared to the second quarter of 2011 due to lower customer demand, primarily in European and certain export markets. In addition, we estimate the unfavorable effect of changes in currency exchange rates decreased our net sales by approximately \$27 million, or 5%, as compared to the second quarter of 2011.

Cost of sales Cost of sales increased \$41.5 million or 12% in the second quarter of 2012 compared to 2011 due to the net impact of higher raw material costs of approximately \$90 million (primarily feedstock ore and petroleum coke), a 16% decrease in sales volumes, a 17% decrease in TiO₂ production volumes, an increase in maintenance costs of \$2.9 million and currency fluctuations (primarily the euro). Cost of sales as a percentage of net sales increased to 70% in the second quarter of 2012 compared to 63% in the second quarter of 2011, primarily due to the net effect of higher raw material costs, lower production volumes and higher average selling prices. We expect further increases in our manufacturing costs during the remainder of 2012, as discussed below.

Gross margin and income from operations Income from operations decreased by \$33.6 million from \$144.2 million in the second quarter of 2011 to \$110.6 million in the second quarter of 2012. Income from operations as a percentage of net sales decreased to 20% in the second quarter of 2012 from 27% in the same period of 2011. This decrease was driven by the decline in gross margin, which decreased to 30% for the second quarter of 2012 compared to 37% for the second quarter of 2011. As discussed and quantified above, our gross margin has decreased primarily due to the net effects of higher manufacturing costs (primarily raw materials), lower sales volumes and lower production volumes, and higher selling prices. Additionally, changes in currency exchange rates have negatively affected our gross margin and income from operations. We estimate that changes in currency exchange rates decreased income from operations by approximately \$1 million in the second quarter of 2012 as compared to the same period in 2011.

Other non-operating income (expense) In June 2012, we entered into a new \$400 million term loan. We used a portion of the net proceeds of the term loan to redeem the remaining outstanding 6.5% Senior Secured Notes due April 2013 (279.2 million principal amount outstanding). As a result, we recognized an aggregate \$7.2 million pre-tax charge in the second quarter of 2012 related to the early extinguishment of debt, consisting of the call premium paid, interest from the June 14, 2012 indenture discharge date to the July 20, 2012 redemption date and the write-off of unamortized deferred financing costs and original issue discount associated with the redeemed Senior Notes. See Note 7 to our Condensed Consolidated Financial Statements.

Interest expense decreased \$1.8 million from \$8.5 million in the second quarter of 2011 to \$6.7 million in the second quarter of 2012 primarily due to lower average debt levels of our 6.5% Senior Notes resulting from the March 2011 redemption and open market purchases in the third and fourth quarters of 2011. As discussed above, the remaining Senior Notes were derecognized in June 2012.

Table of Contents

We expect interest expense for the remainder of 2012 to be comparable to the same periods in 2011 due to the net effect of higher average outstanding debt levels associated with borrowings under the new term loan and European revolver, and lower average interest rates on outstanding borrowings, as the term loan and European revolver bear interest at a lower average interest rate compared to the redeemed 6.5% Senior Notes.

Income tax provision Our income tax provision was \$34.2 million in the second quarter of 2012 compared to an income tax provision of \$48.4 million in the same period last year. This decrease is primarily due to our decreased earnings. See Note 8 to our Condensed Consolidated Financial Statements for a tabular reconciliation of our statutory income tax provision to our actual tax provision.

We have substantial net operating loss carryforwards in Germany (the equivalent of \$799 million and \$188 million for German corporate and trade tax purposes, respectively, at December 31, 2011). At June 30, 2012, we have concluded that no deferred income tax asset valuation allowance is required to be recognized with respect to such carryforwards, principally because (i) such carryforwards have an indefinite carryforward period, (ii) we have utilized a portion of such carryforwards during the most recent three-year period and (iii) we currently expect to utilize the remainder of such carryforwards over the long term. However, prior to the complete utilization of such carryforwards, particularly if the economic recovery were to be short-lived or we were to generate losses in our German operations for an extended period of time, it is possible that we might conclude the benefit of such carryforwards would no longer meet the more-likely-than-not recognition criteria, at which point we would be required to recognize a valuation allowance against some or all of the then-remaining tax benefit associated with the carryforwards.

Table of Contents

Six months ended June 30, 2012 compared to the

six months ended June 30, 2011

	Six months ended June 30,			
	2011	(Dollars in millions)		2012

TiO ₂ sales volumes				(7)
TiO ₂ product mix				(1)
Changes in currency exchange rates				(4)
Total				16%

* Thousands of metric tons

Net sales Net sales in the six months ended June 30, 2012 increased 16%, or \$148.7 million, compared to the six months ended June 30, 2011 primarily due to the net effects of a 28% increase in average TiO₂ selling prices (which increased net sales by approximately \$268 million) and a 7% decrease in sales volumes (which decreased net sales by approximately \$67 million). TiO₂ selling prices will increase or decrease generally as a result of competitive market pressures, changes in the relative level of supply and demand as well as changes in raw material and other manufacturing costs.

Our sales volumes decreased 7% in the first six months of 2012 as compared to the first six months of 2011 due to decreased customer demand, primarily in European and certain export markets. In addition, we estimate the unfavorable effect of changes in currency exchange rates decreased our net sales by approximately \$36 million, or 4%, as compared to the first six months of 2011.

Cost of sales Cost of sales increased \$67.3 million or 11% in the six months ended June 30, 2012 compared to this same period in 2011 due to the net impact of higher raw material costs of approximately \$117 million (primarily feedstock ore and petroleum coke), a 7% decrease in sales volume, a 6% decrease in production volume, an increase in maintenance costs of \$3.8 million and currency fluctuations (primarily the euro). Cost of sales as a percentage of net sales decreased to 62% in the first six months of 2012 compared to 64% in the same period in 2011 primarily due to the net effects of higher average selling prices, higher raw material costs and lower production volumes. Additionally, the first half of 2012 reflects the benefit of lower raw material costs (as compared to current costs) in the first quarter of 2012 as lower cost raw materials purchased at the end of 2011 were used in the production process.

Table of Contents

Gross margin and income from operations Income from operations increased by \$73.4 million from \$246.6 million in the first six months of 2011 to \$320.0 million in the first six months of 2012. Income from operations as a percentage of net sales increased to 29% in the first six months of 2012 from 26% in the same period of 2011. This increase was driven by the improvement in gross margin, which increased to 38% for the first six months of 2012 compared to 36% for the same period in 2011. As discussed and quantified above, our gross margin has increased primarily due to the net effects of higher selling prices, higher manufacturing costs (primarily raw materials), lower sales volumes and lower production volumes. Additionally, changes in currency exchange rates have negatively affected our gross margin and income from operations. We estimate that changes in currency exchange rates decreased income from operations by approximately \$3 million in the first six months of 2012 as compared to the same period in 2011.

Other non-operating expense In March 2011, we redeemed 80 million of our 6.5% Senior Secured Notes and borrowed under our European revolving credit facility in order to fund the redemption. As a result, we recognized a \$3.3 million pre-tax interest charge related to the prepayment of the 6.5% Senior Secured Notes in the first quarter of 2011 consisting of the call premium and the write-off of unamortized deferred financing costs and original issue discount associated with the redeemed Senior Notes.

As discussed above, we recognized an aggregate \$7.2 million pre-tax charge in the second quarter of 2012 related to the early extinguishment of our remaining Senior Secured Notes.

Interest expense decreased \$5.1 million from \$18.1 million in the six months ended June 30, 2011 to \$13.0 million in the six months ended June 30, 2012 primarily due to lower average debt levels of our 6.5% Senior Notes resulting from the March 2011 redemption and open market purchases in the third and fourth quarters of 2011.

Income tax provision Our income tax provision was \$102.7 million in the first six months of 2012 compared to \$79.3 million in the same period last year. This increase in provision for income taxes was primarily due to improved income from operations in the first six months of 2012 compared to the same period in 2011. See Note 8 to our Condensed Consolidated Financial Statements.

Effects of Currency Exchange Rates

We have substantial operations and assets located outside the United States (primarily in Germany, Belgium, Norway and Canada). The majority of our sales from non-U.S. operations are denominated in currencies other than the U.S. dollar, principally the euro, other major European currencies and the Canadian dollar. A portion of our sales generated from our non-U.S. operations is denominated in the U.S. dollar. Certain raw materials used worldwide, primarily titanium-containing feedstocks, are purchased in U.S. dollars, while labor and other production costs are purchased primarily in local currencies. Consequently, the translated U.S. dollar value of our non-U.S. sales and operating results are subject to currency exchange rate fluctuations which may favorably or unfavorably impact reported earnings and may affect the comparability of period-to-period operating results. In addition to the impact of the translation of sales and expenses over time, our

Table of Contents

non-U.S. operations also generate currency transaction gains and losses which primarily relate to the difference between the currency exchange rates in effect when non-local currency sales or operating costs are initially accrued and when such amounts are settled with the non-local currency.

Overall, we estimate that fluctuations in currency exchange rates had the following effects on our sales and income from operations for the periods indicated.

Impact of changes in currency exchange rates**Three months ended June 30, 2012 vs June 30, 2011**

	Transaction gains recognized			Translation loss - impact of rate changes (In millions)	Total currency impact 2012 vs 2011
	2011	2012	Change		
Impact on:					
Net sales	\$	\$	\$	\$ (27)	\$ (27)
Income from operations	1	1		(1)	(1)

Impact of changes in currency exchange rates**Six months ended June 30, 2012 vs June 30, 2011**

	Transaction gains recognized			Translation loss - impact of rate changes (In millions)	Total currency impact 2012 vs 2011
	2011	2012	Change		
Impact on:					
Net sales	\$	\$	\$	\$ (36)	\$ (36)
Income from operations	2	1	(1)	(2)	(3)

Outlook

During the first quarter of 2012 we operated our production facilities at full practical capacity levels, consistent with our operating rates throughout 2011. During the second quarter of 2012, we operated our facilities at approximately 86% of practical capacity, primarily to align our production and inventory levels with decreased demand. In order to continue to manage our production and inventory levels, we currently expect to operate our facilities at 90% to 95% of our attainable practical production capacity of 550,000 metric tons for all of 2012. In addition, we currently expect our sales volumes for all of 2012 to be lower as compared to 2011, and our 2012 sales volumes to exceed our 2012 production volumes.

We implemented significant increases in TiO₂ selling prices throughout 2011 and raised prices in certain markets in the first half of 2012. Our average TiO₂ selling prices were 24% higher in the second quarter of 2012 as compared to the second quarter of 2011, and our average selling prices at the end of the second quarter of 2012 were comparable to prices at the end of 2011. Based on the increases in our TiO₂ selling prices we implemented throughout 2011 and the current conditions in the TiO₂ industry, we currently expect our average selling prices for the remainder of 2012 to continue to be higher than the comparable periods in 2011. Our ability to implement additional selling price increases for the remainder of 2012 will depend principally upon product demand levels.

Table of Contents

During the remainder of 2012, we expect to see a continuation of the significantly higher feedstock ore costs that we experienced in the second quarter, driven by tight ore supplies and higher-than-historical increases in petroleum coke and energy costs. Overall, we currently expect our per metric ton cost of TiO₂ we produce in 2012 will increase approximately 50% to 60% as compared to 2011, primarily due to higher feedstock ore costs. Our cost of sales per metric ton of TiO₂ sold in calendar 2012 is consequently expected to be significantly higher as compared to calendar 2011. However, our cost of sales per metric ton of TiO₂ sold in the first half of 2012 is lower as compared to our expected cost of sales per metric ton of TiO₂ sold in the remainder of 2012, as a substantial portion of the TiO₂ products we sold in the first quarter of 2012 was produced with lower-cost feedstock ore.

Overall, we expect that income from operations in the second half of 2012 will likely be lower as compared to the same period in 2011, as the favorable effects of higher selling prices will be more than offset by the unfavorable effect of lower sales volumes and higher production costs.

Our expectations as to the future of the TiO₂ industry are based upon a number of factors beyond our control, including worldwide growth of gross domestic product, competition in the marketplace, continued operation of competitors, unexpected or earlier-than-expected capacity additions or reductions and technological advances. If actual developments differ from our expectations, our results of operations could be unfavorably affected.

LIQUIDITY AND CAPITAL RESOURCES

Consolidated cash flows

Operating activities

Trends in cash flows as a result of our operating activities (excluding the impact of significant asset dispositions and relative changes in assets and liabilities) are generally similar to trends in our earnings.

Cash used in operating activities was \$67.0 million in the first six months of 2012 compared to cash provided by operating activities of \$80.2 million in the first six months of 2011. This \$147.2 million decrease in the amount of cash provided was primarily due to the net effects of the following:

higher income from operations in 2012 of \$73.4 million;

higher net cash used from relative changes in our inventories, receivables, payables and accruals in 2012 of \$160.1 million, primarily due to the relative increases in our inventories and receivables, as discussed below;

higher contributions to our TiO₂ manufacturing joint venture in 2012 of \$22.4 million, primarily to support the joint venture's higher working capital needs associated with higher-cost feedstock ore; and

higher net cash paid for income taxes in 2012 of \$32.1 million resulting from our increased profitability.

Changes in working capital were affected by accounts receivable and inventory changes. As shown below:

Table of Contents

Our average days sales outstanding, or DSO, increased from December 31, 2011 to June 30, 2012, primarily because sales in the fourth quarter of 2011 were more heavily weighted towards the beginning of the quarter while sales in the second quarter of 2012 were more heavily weighted towards the end of the quarter; and

Our average days sales in inventory, or DSI, decreased from December 31, 2011 to June 30, 2012 mainly due to the net effects of the higher cost of our inventories resulting primarily from higher feedstock ore costs, and lower production volumes in the second quarter of 2012 in order to manage our inventory levels.

For comparative purposes, we have also provided comparable prior year numbers below.

	December 31, 2010	June 30, 2011	December 31, 2011	June 30, 2012
DSO	55 days	60 days	55 days	69 days
DSI	52 days	49 days	104 days	84 days

Investing activities

Our capital expenditures of \$24.6 million and \$31.9 million in the six months ended June 30, 2011 and 2012, respectively, were primarily to maintain and improve the cost-effectiveness of our existing manufacturing facilities.

During the six months ended June 30, 2012, we:

loaned a net \$18.8 million under our unsecured revolving demand promissory note with Valhi; and

sold \$21.1 million in mutual fund marketable securities.

Financing activities

During the six months ended June 30, 2012, we:

borrowed 80 million (\$107.4 million when borrowed) on our European credit facility;

borrowed an aggregate \$394 million on a term loan entered into in June 2012 that was issued at 98.5% of the principal amount;

retired 279.2 million principal amount of our 6.5% Senior Secured Notes (\$352.3 million when retired); and

paid quarterly dividends to stockholders of \$.15 per share for an aggregate dividend of \$34.8 million (\$.30 per share).

Table of Contents

Outstanding debt obligations

At June 30, 2012, our consolidated debt comprised:

\$400 million aggregate borrowings under our new term loan (\$394 million carrying value, net of unamortized original issue discount);

80 million (\$99.5 million) under our European revolving credit facility which matures in October 2013; and

approximately \$3.5 million of other indebtedness.

Certain of our credit agreements contain provisions which could result in the acceleration of indebtedness prior to their stated maturity for reasons other than defaults for failure to comply with applicable covenants. For example, certain credit agreements allow the lender to accelerate the maturity of the indebtedness upon a change of control (as defined in the agreement) of the borrower. In addition, certain credit agreements could result in the acceleration of all or a portion of the indebtedness following a sale of assets outside the ordinary course of business. We are in compliance with all of our debt covenants at June 30, 2012.

Our assets consist primarily of investments in operating subsidiaries. Our ability to service parent level obligations, including our new term loan, depends in large part upon the distribution of earnings of our subsidiaries, whether in the form of dividends, advances or payments on account of intercompany obligations or otherwise. The new term loan is collateralized, in part, by a first priority lien on 100% of the common stock of certain of our U.S. subsidiaries and 65% of the stock or other ownership interests in certain of our first-tier foreign operating subsidiaries. Our subsidiaries are not subject to any contractual limitations on their ability to make distributions to us, other than the requirement to maintain compliance with certain financial covenants in our revolving credit facilities. See Note 7 to our Condensed Consolidated Financial Statements.

Future cash requirements

Liquidity

Our primary source of liquidity on an ongoing basis is cash flows from operating activities which is generally used to (i) fund working capital expenditures, (ii) repay any short-term indebtedness incurred for working capital purposes and (iii) provide for the payment of dividends. From time-to-time we will incur indebtedness, generally to (i) fund short-term working capital needs, (ii) refinance existing indebtedness or (iii) fund major capital expenditures or the acquisition of other assets outside the ordinary course of business. We will also from time-to-time sell assets outside the ordinary course of business and use the proceeds to (i) repay existing indebtedness, (ii) make investments in marketable and other securities, (iii) fund major capital expenditures or the acquisition of other assets outside the ordinary course of business or (iv) pay dividends.

The TiO₂ industry is cyclical, and changes in industry economic conditions significantly impact earnings and operating cash flows. Changes in TiO₂ pricing, production volumes and customer demand, among other things, could significantly affect our liquidity.

Table of Contents

We routinely evaluate our liquidity requirements, alternative uses of capital, capital needs and availability of resources in view of, among other things, our dividend policy, our debt service and capital expenditure requirements and estimated future operating cash flows. As a result of this process, we have in the past and may in the future seek to reduce, refinance, repurchase or restructure indebtedness, raise additional capital, repurchase shares of our common stock, modify our dividend policy, restructure ownership interests, sell interests in our subsidiaries or other assets, or take a combination of these steps or other steps to manage our liquidity and capital resources. Such activities have in the past and may in the future involve related companies. In the normal course of our business, we may investigate, evaluate, discuss and engage in acquisition, joint venture, strategic relationship and other business combination opportunities in the TiO₂ industry. In the event of any future acquisition or joint venture opportunity, we may consider using then-available liquidity, issuing our equity securities or incurring additional indebtedness.

At June 30, 2012, we had aggregate cash, cash equivalents and restricted cash on hand of \$100.8 million. Of such \$100.8 million aggregate cash, cash equivalents and restricted cash, \$38.5 million was held by non-U.S. subsidiaries. At June 30, 2012, we had \$125 million available for borrowing under our new North American revolving credit facility, and we had borrowed the full \$80 million under our European credit facility. Our new \$400 million term loan provides for an additional \$100 million of term loan borrowings in the future under certain conditions. Based upon our expectation for the TiO₂ industry and anticipated demands on cash resources, we expect to have sufficient liquidity to meet our short term obligations (defined as the twelve-month period ending June 30, 2013) and our long-term obligations (defined as the five-year period ending June 30, 2017, our time period for long-term budgeting). If actual developments differ from our expectations, our liquidity could be adversely affected.

Capital expenditures

We currently estimate that we will invest approximately \$74 million in capital expenditures to maintain and improve our existing facilities during 2012, including the \$31.9 million we have spent through June 30, 2012.

Stock repurchase program

In December 2010 our board of directors authorized the repurchase of up to 2.0 million shares of our common stock in open market transactions, including block purchases, or in privately-negotiated transactions at unspecified prices and over an unspecified period of time. To date, we have not made any repurchases under the plan and all 2.0 million shares are available for repurchase.

Off-balance sheet financing

We do not have any off-balance sheet financing agreements other than the operating leases discussed in our 2011 Annual Report.

Commitments and contingencies

See Notes 8 and 11 to the Condensed Consolidated Financial Statements for a description of certain income tax examinations currently underway and legal proceedings.

Table of Contents

Recent accounting pronouncements

See Note 13 to the Condensed Consolidated Financial Statements.

Critical accounting policies

For a discussion of our critical accounting policies, refer to Part I, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2011 Annual Report. There have been no changes in our critical accounting policies during the first six months of 2012.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

General

We are exposed to market risk, including currency exchange rates, interest rates and security prices, and raw material prices. There have been no material changes in these market risks since we filed our 2011 Annual Report, and refer you to Part I, Item 7A. Quantitative and Qualitative Disclosure About Market Risk in our 2011 Annual Report. See also Note 12 to our Condensed Consolidated Financial Statements.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures

We maintain a system of disclosure controls and procedures. The term disclosure controls and procedures, as defined by regulations of the SEC, means controls and other procedures that are designed to ensure that information required to be disclosed in the reports that we file or submit to the SEC under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information we are required to disclose in the reports we file or submit to the SEC under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions to be made regarding required disclosure. Each of Steven L. Watson, our Chief Executive Officer, and Gregory M. Swalwell, our Executive Vice President and Chief Financial Officer, have evaluated the design and operating effectiveness of our disclosure controls and procedures as of June 30, 2012. Based upon their evaluation, these executive officers have concluded that our disclosure controls and procedures are effective as of June 30, 2012.

Internal control over financial reporting

We also maintain internal control over financial reporting. The term internal control over financial reporting, as defined by regulations of the SEC, means a process designed by, or under the supervision of, our principal executive and principal financial officers, or persons performing similar functions, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP, and includes those policies and procedures that:

Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets,

Table of Contents

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors, and

Provide reasonable assurance regarding prevention or timely detection of an unauthorized acquisition, use or disposition of our assets that could have a material effect on our Condensed Consolidated Financial Statements.

As permitted by the SEC, our assessment of internal control over financial reporting excludes (i) internal control over financial reporting of our equity method investees and (ii) internal control over the preparation of our financial statement schedules required by Article 12 of Regulation S-X. However, our assessment of internal control over financial reporting with respect to our equity method investees did include our controls over the recording of amounts related to our investment that are recorded in our Condensed Consolidated Financial Statements, including controls over the selection of accounting methods for our investments, the recognition of equity method earnings and losses and the determination, valuation and recording of our investment account balances.

Changes in internal control over financial reporting

There has been no change to our internal control over financial reporting during the quarter ended June 30, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
