PART I.

ITEM 1. Business

We are a leading provider of outsourcing and transformation services and focus on providing our clients with a positive business impact and enhancing their long term financial value. We customize our services to improve the economics of business performance and transform organizations to be leaner and more flexible. Our outsourcing services provide front-, middle- and back-office processing for our clients, who are primarily global companies. Outsourcing services involve the transfer to us of select business operations of a client, such as claims processing, policy administration and finance and accounting, after which we administer and manage the operations for our client on an ongoing basis. We also offer a number of transformation services that include decision analytics, finance transformation and operations and process excellence services. These transformation services help our clients provide additional insight into their future financial and operational results, improve their operating environments through cost reduction, increased efficiency and productivity initiatives, and enhance the risk and control environments within our clients' operations whether or not they are outsourced to us. We serve primarily the needs of Global 1000 companies in the insurance and healthcare, utilities, banking and financial services, travel, transportation and logistics sectors.

Our services for each of the sectors include:

We combine in-depth knowledge of the industry sectors in which we focus with proven expertise in transferring business operations to our offshore and onshore delivery centers, and administering and managing such operations. We have successfully transferred more than 900 processes covering a broad array of products and services to our operations centers, including approximately 130 new processes that were transferred to us in 2012.

Our operations centers are located in India, the Philippines, the Czech Republic, the U.S., Bulgaria, Malaysia and Romania. Our geographic footprint enables us to leverage a large pool of highly qualified and educated technical professionals who are able to handle complex processes and services that require functional skills and industry expertise.

Table of Contents

While a majority of our professionals provide services in the English language, our operations in the Czech Republic, Bulgaria and Romania provide multi-lingual delivery capabilities. We believe we can offer consistent high quality services at substantially lower costs than those available from U.S.- or U.K.-based in-house facilities or U.S.- or U.K.-based outsourcing providers. As of December 31, 2012, we had a headcount of approximately 21,000 employees, a substantial portion of whom are based in India. Our operations platforms are supported by a state-of-the-art infrastructure that can be expanded to meet each client's needs. We market our services directly through our sales and marketing and client management teams, which operate from the U.S. and Europe. Our senior managers have extensive experience in the industry sectors on which we are focused and are well versed in the business practices of leading multinational corporations.

We believe our reputation for operational excellence is widely recognized by our clients and is an important competitive advantage. We use Lean and Six Sigma, which are data-driven methodologies for eliminating defects in any process, to identify process inefficiencies and improve productivity in client and support processes. We deliver continued process enhancements by soliciting and implementing process improvements from employees and through our proprietary software tools. As a part of our commitment to quality, information security and employee safety, several of our delivery centers are certified to various standards, such as the ISO 9001:2008 standard for quality management, the ISO 27001:2005 standard for our information security management system and the OHSAS 18001:2007 standard for our occupational health and safety management processes. Certain client operations processes in our operations center in the Philippines are certified as compliant with the Payment Card Industry Data Security Standard. We have received an unqualified SSAE 16 (SOC I Type II) report on general controls from Ernst & Young Pvt. Ltd., an affiliate of our independent registered public accounting firm, for several delivery centers and certain client operations processes. In 2012, our clinical processes in Manila, the Philippines, received accreditation from the URAC, a leading healthcare and education accreditation organization.

Services

Outsourcing Services

Our outsourcing services are structured around industry-focused business process outsourcing (BPO) services as well as cross-industry BPO services, such as finance and accounting services.

Insurance and Healthcare. We have established a leadership position in servicing insurance and healthcare companies and derived approximately 49% of our revenues in 2012 from such services. In 2012, the research firm Everest Group ranked EXL the largest player in the U.S. BPO insurance market. Within the life insurance, property and casualty insurance, health and disability insurance and retirement services business lines, we have expertise in providing services in the areas of claims processing, premium and benefit administration, agency management, account reconciliation, policy research, underwriting support, new business processing, policy servicing, trades/sub-account transactions, add-on processing, premium audit, billing and collection and customer service. We have acquired significant experience in transferring and managing processes in these areas. We have also built significant capability to manage clinical operations for healthcare payers.

We have significantly increased our use of proprietary technology tools and platforms to provide increasingly complex services for our insurance and healthcare clients. Through our acquisition of Landacorp, Inc. (Landacorp) on October 12, 2012, we acquired a leading care management software platform for healthcare payers. In October 2011, through our acquisition of Trumbull Services, LLC (Trumbull), we acquired the capability to provide subrogation services to property and casualty insurers as well as access to a software platform called SubroSource . In connection with our acquisition of Professional Data Management Again, Inc. (PDMA), in April 2010, we acquired an insurance policy administration platform called LifePRO[®] to administer life insurance, health insurance, annuities and credit life and disability insurance policies for insurance and healthcare clients.

Table of Contents

Our services include:

Utilities. We have expertise in providing end-to-end services for the back-office operations of utilities companies in service areas such as meter to cash, portfolio and energy balancing, debt management and customer service. A large part of these services involves complex processing of transactions.

Our services include:

Banking and Financial Services. We have expertise in servicing and processing various banking products, including residential mortgage lending, retail banking, credit cards, consumer finance, commercial lending and investment management.

Table of Contents

Our services include:

Travel, Transportation and Logistics. We have expertise in managing and improving operational, financial and analytical functions for clients in the travel, transportation and logistics industries. We provide end-to-end, front-, middle- and back-office services to companies in the corporate and leisure travel management industry. In addition, we have expertise in processing transportation and logistics transactions, including end-to-end supply chain management, warehousing, transportation management and international logistics services. We also provide highly complex operational and analytical services to airlines, trucking and shipping companies, ocean carriers and logistics providers.

Our services include:

Finance and Accounting. We provide outsourcing services to our clients' finance organizations through our finance and accounting center of excellence. We provide integrated end-to-end finance and accounting outsourcing services across an array of finance and accounting service cycles, including procure to pay, order to cash, hire to retire, record to report and treasury and tax processes, in part by leveraging our deep capabilities in finance transformation, decision analytics and a number of tools and methodologies which are proprietary or

Table of Contents

available through a number of partnerships with third parties. Our finance and accounting outsourcing services are provided to clients across a broad spectrum of industries.

Our services include:

Transformation Services

We offer a number of service offerings that we refer to collectively as transformation services. These offerings include decision analytics, finance transformation and operations and process excellence services.

These transformation services focus on helping our clients by improving their operating environments through cost reduction, additional insight for business forecasting, enhanced efficiency, higher productivity, improved effectiveness of business decisions and improved risk and control environment within our clients' operations whether or not they are outsourced to us. Our transformation services have enabled us to expand our client base by providing complementary service offerings to our clients and also to migrate clients into our outsourcing services. We have experienced a significant increase in demand for our annuity-based transformation services, which are engagements that are contracted for periods of one year or more. We actively cross-sell and, where appropriate, integrate our transformation services with our outsourcing services as part of an integrated solution for our clients. Our transformation services team is comprised of over 1,000 professionals.

Decision Analytics

We offer decision analytics services, including data filtering, organization and synthesis, management information system reporting, trend and variance analysis, statistical and econometric modeling and economic and financial markets research. Our decision analytics services involve accessing and analyzing large volumes of data from multiple sources in order to understand historical performance or behavior to predict particular outcomes. We utilize the insights that we generate to assist our clients in making better and data-driven business decisions, which are expected to lead to tangible financial benefits.

Our decision analytics services include marketing and customer analytics, risk analytics, operations analytics and finance and investment analytics. Our offerings emphasize our expertise within our industry focus areas which are complemented by techniques, technology tools and methodologies designed to deliver quantitative modeling, proprietary intellectual property and business intelligence to achieve optimal results with faster turnaround times for our clients.

Table of Contents

We deliver these services through a team of industry specialists and graduates with mathematical, statistical, engineering, economics, business or accounting backgrounds. A large proportion of our decision analytics team members have received post-graduate degrees in business or other quantitative or financial disciplines.

Our services include:

Finance Transformation

Our finance transformation services include finance organizational design, finance process optimization, finance systems advisory, governance, risk and compliance and accounting advisory services.

As part of our finance organization design services, we assist our clients with the design and implementation of various target operating models, outsourcing and shared service programs. Our finance process optimization services help our clients evaluate the efficiency, effectiveness and internal controls of our clients' finance and accounting processes including management information systems and decision support, through various diagnostic methods including benchmarking. We also provide advisory and implementation support for various finance automation and system optimization initiatives through our finance systems advisory services. Our governance, risk and compliance services include compliance advisory and support, internal audit and controls monitoring services. Our accounting and financial advisory reporting services include transaction assurance, general accounting, financial reporting and finance and accounting process optimization services. Many of our professionals who provide these services are certified accountants, internal auditors and process and technology experts.

Our services include:

Operations and Process Excellence Services

We assist clients in understanding, controlling and improving their business processes with a view to increasing effectiveness at optimized cost. We utilize Lean and Six Sigma methodologies to advise our clients on cost reduction initiatives and subsequently manage the implementation of our recommendations. Our services also identify business processes that can be improved by documenting processes, creating standard operating procedures,

Table of Contents

defining metrics and evaluation criteria as well as generating customized dashboards and reporting using our proprietary methodologies. By diagnosing existing processes, we are able to assist our clients in improving their operations by modifying, eliminating or automating certain activities.

Our services include:

Geographic and Segment Information

Please see the disclosures in Notes 4 and 14 to our consolidated financial statements for segment and geographic information regarding our business.

Table of Contents

Business Strategy

Our goal is to continue to be a leading provider of outsourcing and transformation services in the industry sectors on which we are focused. Specific elements of our growth strategy include:

Creating Positive Business Impact for Clients by Offering a Broad Range of Operations Management, Analytics and Platform Technology Services

In servicing our clients, we seek to differentiate ourselves by emphasizing the broad range of operations management, analytics and platform technology services that we provide as part of our outsourcing and transformation services. We believe that clients are increasingly viewing their service providers as long-term partners that provide a full range of service offerings. By leveraging our broad range of services and improving our clients' operations through tangible measures such as revenue enhancement, revenue and expense leakage prevention, cost reduction, write-off reduction and working capital reduction, we can provide our clients with a positive business impact and create a long-term partnership.

Utilizing Innovative Approaches to Enhance Margin Sustainability

We believe that we can better enhance our margin sustainability by utilizing innovative delivery and pricing approaches. Successful innovative delivery approaches will require the use of acquired or internally developed intellectual property, methodologies and analytical models as well as a range of proprietary technology tools. These innovative delivery approaches are typically specialized for the industry sectors on which we are focused.

In this light, we have significantly increased our use of proprietary technology tools and platforms through a combination of acquisitions and in-house development. Our Landacorp acquisition has provided us with a family of leading healthcare management software platforms that manage clinical data for over 50 million lives while our PDMA and Trumbull acquisitions have provided us with the LifePRO® and SubroSource™ platforms, respectively, for our clients in the insurance sector. We have also built proprietary platforms such as the Freight Bill Audit and Payment platform to automate the receipt, validation and exception processing of customer invoices for our clients in the transportation and logistics sectors.

In addition, we believe that the increased utilization of transaction-based and other innovative pricing models, supplemented by these innovative delivery approaches, may also enhance the sustainability of our margins while delivering increased value to our clients. Currently, a majority of our revenues is billed to our clients on a time and materials basis. We intend to increase the number of processes in which we utilize transaction-based and other innovative pricing to better align our incentives with our clients, thereby assisting them with variable cost structures and driving service improvements.

Extending Our Industry Expertise

We have developed expertise in transferring and servicing more than 900 outsourcing processes to our operations centers, including more than 550 processes in the insurance and healthcare industry. This expertise continues to distinguish us from other providers of outsourcing services and has established our reputation as a leading provider of outsourcing services. We intend to continue to strengthen our processing capabilities by focusing on more complex and value-enhancing services that are common to these sectors. We intend to supplement our innovative delivery and pricing approaches with the introduction of industry-specific training academies to enhance the domain expertise of our employees. In 2012, we launched the EXL Healthcare Academy in Manila, Philippines, to deepen and extend our clinical and utilization capabilities for healthcare payers and providers.

Cultivating Large-scale, Long-term Relationships and Expanding Our Existing Client Base

We intend to continue to maintain our focus on large-scale, long-term client relationships. We believe there are significant opportunities for additional growth with our existing clients, and we seek to expand these relationships by increasing the depth and breadth of the services we provide. We also believe that our geographically distributed network of operations centers will enable us to expand our client base and range of services. Our domain expertise and long-term client relationships enable us to provide more fully integrated and innovative outsourcing and transformation services and develop closer relationships with our clients.

Table of Contents

We will also continue to initiate long-term relationships with small and medium sized companies in our focus industries and expand our relationships with such companies over time. We intend to develop long-term relationships that present recurring revenue opportunities with new clients by leveraging our industry experience and expanding our marketing activities in a manner designed to strengthen, encourage and accelerate long-term relationship building. We continue to be highly selective and seek industry-leading clients, targeting Global 1000 companies that have the most complex and diverse processes and, accordingly, stand to benefit significantly from our services.

Continuing to Invest in Our People and Operational Infrastructure

We intend to continue to invest in infrastructure, including human resources, process optimization and delivery platforms, to meet our growing client requirements. We intend to further refine and supplement the innovative methods we use to recruit, train and retain our skilled employees. We intend to continue focusing on recruiting highly qualified employees and developing our employees' leadership skills through specialized programs, rigorous promotion standards, industry-specific training and competitive compensation packages that include incentive-based compensation. During 2012, we inaugurated a center for talent dedicated to recruitment, capability enhancement and talent development and also partnered with a leading management institute in India to develop various management and programs dedicated to our target industry sectors and services. During 2012, we launched new operations centers in Manila, Philippines and Pune, India and acquired our operations center in Chico, California, as a result of our acquisition of Landacorp.

Pursuing Strategic Relationships and Acquisitions

We intend to continue to selectively consider strategic relationships with industry leaders that add new long-term client relationships, enhance the depth and breadth of our services and complement our business strategy. We also intend to selectively consider acquisitions, partnerships and alliances or investments that will expand the scope and effectiveness of our services by adding proprietary technology assets and intellectual property, adding new clients or allowing us to enter new geographic markets. On October 12, 2012, we acquired Landacorp, a leading care management software platform for healthcare payers, with approximately 125 employees in the U.S.

Our Industry

BPO service providers work with clients to develop and deliver business operational improvements with the goal of achieving higher performance at lower costs. Organizations outsource their key business processes to third parties to reduce costs, improve process quality, handle increased transaction volumes and reduce redundancy. Outsourcing can enable organizations to enhance profitability and increase efficiency and reliability, permitting them to concentrate on their core areas of competence. BPO is a long-term strategic commitment for companies that, once implemented, is generally not subject to cyclical spending or information technology budget reductions. Increased global demand, cost improvements in international communications and the automation of many business services have created a significant opportunity for offshore BPO providers, and many companies are moving select office processes to providers with the capacity to perform these functions from overseas locations.

Companies have historically used BPO providers to drive revenue growth by expanding service offerings that otherwise would be too costly to administer or by enhancing receivable collections that would otherwise not be cost-efficient to pursue using internal staff. We believe the demand for BPO services will be primarily led by industries that are transaction-driven and that require significant customer interactions. The high cost of servicing a large number of small customer accounts makes outsourcing a compelling strategic alternative for such industries.

Companies are increasingly looking to providers of analytics services to apply statistical tools, models and techniques to clean, organize and examine structured and unstructured corporate data and thereby to generate specific business-related analysis and insight into their business and prospects using this data. The enhanced generation of business data across multiple formats, substantial reduction in data storage costs, growing enterprise demand for data-driven and real-time decision making and availability of sophisticated analytics tools have enabled companies to overcome a local shortage of specialized analytics talent and benefit from global labor markets. Service providers who can develop industry-specific analytics expertise are especially well poised to benefit from this global trend.

Table of Contents

According to Nasscom, an industry trade organization, exports from India in the information technology and business process management industry are expected to grow between 12% and 14% year-over-year in the fiscal year ending March 31, 2014, to between \$85 and \$87 billion.

Trend Toward Offshore Delivery of BPO and Analytics Services

Global demand for high quality, lower-cost BPO services from external providers, combined with operational and cost improvements in international telecommunications and the automation of many business services, have created a significant opportunity for BPO service providers that are able to take advantage of an offshore talent pool. Many companies are moving selected front-, middle- and back-office processes to providers with the capacity to perform these functions from overseas locations.

Over the past decade, India and the Philippines have emerged as preferred locations for companies planning to outsource services ranging from insurance claims processing, payroll processing, medical transcription, customer relationship management to back-office operations such as accounting and data processing, filtering and organization. India currently accounts for the largest share of the offshore BPO services market. Recently, in order to take advantage of multiple language capabilities and large educated talent pools at competitive costs, companies have engaged service providers with operations in other locations such as Eastern Europe and Latin America.

In analytics services, India has also emerged as a leading delivery location, driven by a large quantitatively-trained workforce and attractive cost efficiencies, as compared to other locations. By 2015, the Indian offshore data analytics market is expected to be approximately \$1.2 billion in size, having grown at a CAGR of 25% since 2010, according to Avendus, an Indian financial advisor. We offer a global analytics delivery model and operate multiple analytics centers of excellence in India and other locations globally.

Sales and Marketing and Client Management

We market our services to our existing and prospective clients through our sales and client management teams, which are aligned by industry verticals and cross-industry domains such as finance and accounting. Our sales and client management teams operate from the U.S. and Europe and are supported by our business development team.

Our sales, marketing and business development teams are responsible for new client acquisitions, public relations, relations with outsourcing advisory companies, brand awareness and participation in industry forums and conferences. Our sales, marketing and business development teams identify prospective clients based on selective criteria that apply our industry expertise to the prospective client's business units and services, goals and operating constraints, and qualify the long-term relationship potential with the client. Our client relationships vary from a single discrete process to multiple complex integrated processes.

Our client management team is responsible for managing client relationships, understanding client needs and developing customized services that create value for clients from our suite of outsourcing and transformation services. Each strategic client relationship is assigned a team that consists of members from the client management team, an operations delivery leader, a member of our transformation services group and a member of our technology team. Members of the client management team work closely with the delivery team to ensure high levels of client satisfaction and are also responsible for business expansion and revenue growth of their respective client accounts.

Our sales and client management professionals focus on identifying, qualifying and initiating discussions with our current and prospective clients. They operate collaboratively with our business development team which prepares responses to requests for proposals, hosts client visits to our facilities and coordinates due diligence on processes to be outsourced to us.

As of December 31, 2012, we employed approximately 100 sales, marketing, business development and client management professionals primarily in the U.S. and Europe. Each professional has significant experience in global outsourcing and expertise in identifying outsourcing opportunities and process migration. Our sales, client management, marketing and business development teams work actively with our service delivery team as the sales process moves closer to the client's final decision to either select or expand a service provider relationship. The client executive or sales executive works with the service delivery team to define the scope, services, assumptions and execution strategies for each proposed project and to develop project estimates, pricing and sales proposals. Our senior management reviews and approves each proposal. The selling cycle varies depending on the type of service required, generally ranging from six months to eighteen months for our outsourcing services.

Table of Contents

Members of our sales, client management, marketing and business development teams remain actively involved in a project through the execution phase. Each client team consists of a corporate sponsor, executive steering committee, operations leadership team and, in some cases, a dedicated human resources, technology and infrastructure team.

Clients

We generated revenues from approximately 270 clients in 2012. Our top three, five and ten clients, respectively, generated 26%, 39% and 59% of our revenues in 2012, respectively. In 2011, our top three, five and ten clients, respectively, generated 32%, 45% and 62% of our annual revenues, respectively. While we are developing relationships with new clients and expect to continue to diversify our client base, we believe that the loss of any of our ten largest clients could have a material adverse effect on our financial performance. See Item 1A. Risk Factors Risks Related to Our Business We have a limited number of clients and provide services to few industries. In 2012, approximately 59% of our total revenues came from top ten clients.

Our long-term relationships with our clients typically evolve from providing a single, discrete process into providing a series of complex, integrated processes across multiple business lines. For outsourcing services, we enter into long-term agreements with our clients with typical initial terms of between three and eight years. Agreements for transformation services generally have shorter initial terms. Each agreement is individually negotiated with the client.

In addition, our agreements generally limit our liability to our clients to a maximum amount, subject in many cases to certain exceptions such as indemnification for third-party claims and breaches of confidentiality. In order to meet the specific needs of our clients, we enter into contracts with varying contractual provisions.

Competition

Competition in the BPO services industry is intense and growing. See Item 1A. Risk Factors Risks Related to Our Business We face significant competition from U.S.-based and non-U.S.-based outsourcing and information technology (IT) companies and from our clients, who may perform outsourcing services themselves, either in-house, in the U.S. or through offshore groups or other arrangements. Many companies, including certain of our clients, choose to perform some or all of their customer service, collections and back-office processes internally. Their employees provide these services as part of their regular business operations. Some companies have moved portions of their in-house customer management functions offshore, including to offshore affiliates. We believe our key advantage over in-house business processes is that we give companies the opportunity to focus on their core products and services while we focus on service delivery and operational excellence. We believe that clients who operate a hybrid business model partnering with external BPO providers while handling other BPO functions in-house have the opportunity to benchmark the performance of their internal BPO operations against ours.

We compete primarily against:

BPO service companies based in offshore locations, particularly India, such as Genpact Limited and WNS (Holdings) Limited;

the BPO divisions of large IT service companies and global BPO services companies, such as Accenture, Cognizant Technology Solutions, Tata Consultancy Services and Infosys;

niche providers that provide services in a specific geographic market, industry or service area such as analytics and healthcare; and

leading accounting and management consulting firms.

Table of Contents

We compete against these entities by establishing ourselves as a service provider with deep industry expertise, superior operational capabilities and process expertise, and unique transformation service capabilities, which enables us to respond rapidly to market trends and the evolving needs of our clients in this sector. See [Business Strategy](#) [Creating Positive Business Impact for Clients by Offering a Broad Range of Operations Management, Analytics and Platform Technology Services](#), and [Extending Our Industry Expertise](#).

We expect that competition will increase. A significant part of our competitive advantage has historically been a wage cost advantage relative to companies in the U.S. and Europe and the ability to attract and retain highly experienced and skilled employees. We believe, however, that as a result of rising wage costs in India and other locations of our operations centers and the infrastructure improvements that are taking place in other emerging markets around the world, our ability to compete effectively will increasingly depend on our ability to utilize innovative approaches that rely on our industry expertise as well as a broad range of operations management, analytics and platform technology services to create a positive business impact for our clients.

Intellectual Property

Our principal intellectual property consists of trademarks, copyrighted software and other materials, proprietary and licensed platforms, and the know-how of our management and employees. We have several trademarks and logos registered with the U.S. Patent and Trademark Office and certain foreign jurisdictions. We also consider the availability of patent protection for certain proprietary technology.

We often use our clients' software systems and third-party software platforms to provide our services. We customarily enter into licensing and nondisclosure agreements with our clients and third parties with respect to the use of their software systems and platforms. Clients typically obtain consents for us to access and use third party software licenses held by the client so that we may provide our services. Our contracts usually provide that intellectual property created specifically for use of a client will automatically be assigned to that client.

We consider our business processes and implementation methodologies to be confidential, proprietary information that includes trade secrets that are important to our business. Clients and business partners sign nondisclosure agreements requiring confidential treatment of our information. Our employees are also required to sign intellectual property assignments and confidentiality undertakings as a condition to their employment.

Technology

We have a well-developed international telecommunications capacity to support our business operations. Our business continuity management plan includes plans to eliminate certain risks inherent in critical applications by building redundancies and resilience into the connectivity and telecommunications infrastructure, network, systems, power availability, transportation, physical security, and trained manpower availability, as well as utilizing distributed computing. Our infrastructure is built on industry standards and we work closely with several leading original equipment manufacturers and principal technology partners.

We customize our technology solutions in line with our clients' business and outsourcing requirements. Our technology teams are comprised of expert professionals from technology project management, infrastructure management, information security and technology operational service delivery, thereby permitting us to adapt our infrastructure services to our clients through various phases of our client engagements. We seek to understand our clients' business and outsourcing requirements and their process platforms, develop and implement customized services to our clients and deliver reliable services that facilitate the offshore conduct and management of their business processes.

We have robust systems in place to protect the privacy of our clients and their customers and to ensure compliance with the laws and regulations governing our activities.

Table of Contents

Process Compliance and Management

We have an independent quality compliance team to monitor, analyze, provide feedback on and report process performance and compliance. In addition, we have a customer experience team to assess and improve end-customer experience for all processes. Currently, we have over 400 quality compliance analysts and customer experience analysts.

For most of our operations processes, we report process performance on B-ProMPT, a web-based application accessible by both our clients and us. B-ProMPT includes process control capabilities such as digital dashboards for evaluating process management and performance at any level within an organization, including tracking the individual performance of agents, supervisors and other employees. B-ProMPT includes advanced analytics capacity to provide Six Sigma-based process analysis, including trend analysis, distribution analysis and correlation analysis and tracking.

Employees

As of December 31, 2012, we had a headcount of approximately 21,000 individuals, a substantial portion of whom are based in India. We have approximately 600 employees in the U.S. and the U.K., approximately 2,000 employees in the Philippines and over 500 employees in the Czech Republic, Bulgaria and Romania. Our employees are not unionized. We have never experienced any work stoppages and believe that we enjoy good employee relations.

Hiring and Recruiting

Our employees are critical to the success of our business. Accordingly, we focus on recruiting, training and retaining our professionals.

We have developed effective strategies that enable an efficient recruitment process. We have 90 employees dedicated to recruitment. Some of the strategies we have adopted to increase efficiency in our hiring practices include online voice assessment and a centralized hiring center. Our hiring policies focus on identifying high quality employees who demonstrate a propensity for learning, contribution to client services and growth. Candidates must undergo numerous tests and interviews before we extend offers for employment. We also conduct extensive background checks on candidates, including criminal background checks, where permitted and as required by clients or on a sample basis. In addition, where permitted, we perform random drug testing on the workforce on a regular basis. In 2012, we received more than 68,000 applications for employment and hired approximately 9,000 new professionals. We also have an employee referral program that provides us with a cost effective way of accessing qualified potential employees.

We offer our professionals competitive compensation packages that include significant incentive-based compensation and offer a variety of benefits, including free transport to and from home in certain circumstances, subsidized meals and free access to recreational facilities that are located within some of our operations centers. Our turnover rate for billable employees was 29.3% for the year ended December 31, 2012. As competition in our industry increases, our turnover rate could increase. See **Item 1A. Risk Factors** **Risks Related to Our Business** We may fail to attract and retain enough sufficiently trained employees to support our operations, as competition for highly skilled personnel is intense and we experience significant employee turnover rates.

Training and Development

We dedicate significant resources to the training and development of our professionals. On December 31, 2012, we had over 230 certified trainers. Our trainers work with professionals in our recruitment, operations and quality control teams to create an end-to-end process for value addition, skill evaluation, skill enhancement and certification. We also use training to provide continuity by linking skill assessment at the point of recruitment to subsequent assessment and on-the-job training.

We customize our training to country, client, industry and service, closely collaborating with the clients throughout the training process. Over 8,500 employees received training for the insurance industry and processes at

Table of Contents

the insurance academy established by us in 2009. Our finance and accounting academy, inaugurated in November 2011, trained approximately 900 employees in basic accounting, payroll and taxation during 2012. Our healthcare academy, inaugurated in Manila, Philippines in 2012, trained over 300 employees during the year, while our travel academy, inaugurated in Gurgaon, India in 2011, trained over 900 employees. Training for new employees includes culture, voice and accent training. We also have ongoing training that includes refresher training programs and personality development programs. We develop our employees' leadership skills through various capability development programs, talent identification and performance management mechanisms, and significant monetary and non-monetary incentives. The overall participation in various programs administered in 2012 resulted in approximately 74,000 days of training. We have also created career development programs for our middle and junior level management employees, helping them define and identify their career paths within the company. In 2012, we provided training to over 1,000 of our junior and middle managers at the EXL School of Management Development, which was launched in 2010.

In February 2012, we inaugurated the EXL Center for Talent in Noida, India, our first facility exclusively dedicated to recruitment, capability enhancement and talent development. In October 2012, we announced a partnership with the Indian Institute of Management, Lucknow to deliver a business management program for working executives at the institute's campus in Noida, India, focusing both on general management and also industry-focused modules on consulting, analytics and operational excellence.

Regulation

Because of the diversity and highly complex nature of our service offerings, our operations are subject to a variety of rules and regulations and several U.S. and foreign federal and state agencies regulate aspects of our business. In addition, our clients may contractually require that we comply with certain rules and regulations, even if those rules and regulations do not actually apply to us. Failure to comply with any applicable laws and regulations could result in restrictions on our ability to provide our products and services, as well as the imposition of civil fines and criminal penalties, which could have a material adverse effect on our operations.

We are one of the few service providers that can provide third-party administrator insurance services from India and the Philippines, having been licensed or exempted from, or not subject to, licensing in 44 states and 16 states, respectively. Additionally, we are licensed or otherwise eligible to provide third-party administrator services in all states within the U.S. Certain of our debt collection, workers compensation utilization review and telemarketing services require us to maintain licenses in various jurisdictions or require certain categories of our professionals to be individually licensed. We continue to obtain licenses required by our business operations.

Our operations are also subject to compliance with a variety of other laws, including the U.S. federal and state regulations, that apply to certain portions of our business, such as the Fair Credit Reporting Act, the Gramm-Leach-Bliley Act, the Health Insurance Portability and Accountability Act of 1996, the HITECH Act of 2009, the Truth in Lending Act, the Fair Credit Billing Act, the Federal Trade Commission Act and FDIC rules and regulations. We must also comply with applicable regulations relating to healthcare and other personal information that we process as part of our services. Additionally, our client contracts may specify other regulatory requirements we must meet in connection with the services we provide. We provide our employees with training for applicable laws and regulations.

Regulation of our business by the Indian government affects us in several ways. For instance, until April 2011, we benefited from certain tax incentives promulgated by the Indian government, including a holiday from Indian corporate income taxes for the operation of some of our Indian operations centers. Our operations centers in Jaipur and Noida, which were established in Special Economic Zones (SEZs) in 2010, and our new operations center in Pune established during 2012, are eligible for tax incentives until 2020, ten years from the year of their establishment. As part of our acquisition of Business Process Outsourcing, Inc. in 2011 (the OPI Acquisition), we acquired operations centers in Bengaluru and Kochi, India that are also established in SEZs. Our operations center in Bengaluru completed its first five years of operations on March 31, 2012 and benefited from a 100% exemption on export profits in prior years. Under Indian tax regulations, the Bengaluru operations center is now entitled to a 50% tax exemption on export profits for five years from April 1, 2012. After April 1, 2017, the applicable tax exemption will be further reduced. We anticipate establishing additional operations centers in SEZs or other tax advantaged locations in the future. We also continue to benefit from certain tax incentives for our operations in the Philippines. See Item 1A. Risk

Table of Contents

Factors. Our subsidiaries in India are also subject to certain currency transfer restrictions. See Management's Discussion and Analysis of Financial Condition and Results of Operations Foreign Exchange and Income Taxes.

Other Information

ExlService Holdings, Inc. was incorporated in Delaware on October 29, 2002.

The Company files annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (the SEC) under the Securities Exchange Act of 1934, as amended (the Exchange Act). You may read and copy this information at the Public Reference Room of the SEC, Room 1580, 100 F Street, N.E., Washington, D.C. 20549. You may obtain information about the Public Reference Room by calling the SEC at 1-800-SEC-0330. In addition, the SEC maintains a website (<http://www.sec.gov>) that contains reports, proxy and information statements, and other information regarding issuers that file electronically through the EDGAR System.

The Company also maintains a website at <http://www.exlservice.com>. The Company makes available, free of charge, on its website its annual reports on Form 10-K, quarterly reports on Form 10-Q, proxy statements, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the SEC.

Table of Contents

ITEM 1A. Risk Factors
Risks Related to Our Business

We have a limited number of clients and provide services to few industries. In 2012, approximately 59% of our total revenues came from top ten clients.

We have derived and believe that we will continue to derive a substantial portion of our total revenues from a limited number of large clients. In 2012, our ten largest clients accounted for approximately 59.0% of our total revenues. We generated 10.1% of our total revenues in 2012 from the Travelers Company (Travelers). We provide services to Travelers under a services agreement and work assignments and orders generated thereunder. Although the services agreement does not have a fixed term, the work assignments and work orders expire in December 2013 and renew every year thereafter unless either party elects not to renew within a specified period before the next renewal date. Travelers may terminate the services agreement, or any work assignment or work order, without cause upon 60 days prior notice. We expect that a significant portion of our total revenues will continue to be contributed by a limited number of large clients in the near future. The loss of or financial difficulties at any of our large clients would have a material adverse effect on our business, results of operations, financial condition and cash flows.

General economic and business conditions could negatively affect our business in multiple ways.

The recent global economic downturn adversely impacted companies in the industries to which we provide services, including the banking, financial services and insurance industries. In 2012, approximately 57% of our total revenues were derived from clients in those industries, including 49% of our total revenues that were derived from clients in the insurance industry. Our business largely depends on continued demand for our services from clients and potential clients in these industries. Adverse developments in these industries or the other select industries to which we provide services could further unfavorably affect our business. In particular, we currently derive, and are likely to continue to derive, a significant portion of our revenues from clients located in the U.S. Any future decreases in the general level of economic activity, such as decreases in business and consumer spending, could result in a decrease in demand for our services, particularly our transformation services, thus reducing our revenues. Continued high unemployment rates in the U.S. could also adversely affect the demand for our services. Other developments in response to economic events, such as consolidations, restructurings or reorganizations, particularly involving our clients, could also cause the demand for our services to decline.

Any future disruptions in the commercial credit markets may impact liquidity in the global credit market as greatly, or even more, than in recent years, and we may not be able to predict the impact such worsening conditions will have on our targeted industries in general, and our results of operations specifically. Future turbulence in global markets and economies may adversely affect our liquidity and financial condition, and the liquidity and financial condition of our clients. Market disruptions may limit our ability to access financing or increase our cost of financing to meet liquidity needs, and affect the ability of our customers to use credit to purchase our services or to make timely payments to us, resulting in adverse effects on our financial condition and results of operations. Changes in global economic conditions could also shift demand to services for which we do not have competitive advantages, and this could negatively affect the amount of business that we are able to obtain.

Our industry may not develop in ways that we currently anticipate due to negative public reaction in the U.S. and elsewhere to offshore outsourcing, recently proposed legislation or otherwise.

We have based our strategy of future growth on certain assumptions regarding our industry and future developments in the market for outsourcing services. For example, we believe that there will continue to be changes in product and service requirements, and investments in the products offered by our clients will continue to increase. However, the trend to outsource business processes may not continue and could reverse. Offshore outsourcing is a politically sensitive topic in the U.S. and elsewhere, and many organizations and public figures have publicly expressed concern about a perceived association between offshore outsourcing providers and the loss of jobs in the U.S. and elsewhere. In addition, there has been limited publicity about the negative experience of certain companies that use offshore outsourcing, particularly in India. Current or prospective clients may elect to perform such services themselves or may be discouraged from transferring these services to offshore providers to avoid any negative perception that may be associated with using an offshore provider. Any slowdown or reversal of existing industry

Table of Contents

trends would harm our ability to compete effectively with competitors that operate out of facilities located in the U.S. and elsewhere.

A variety of U.S. federal and state legislation has been proposed that, if enacted, could restrict or discourage U.S. companies from outsourcing their services to companies outside the U.S. For example, legislation has been proposed that would require offshore providers to identify where they are located and that would require notice to individuals whose personal information is disclosed to non-U.S. companies. In addition, recently introduced bills have proposed providing tax and other economic incentives for companies that create employment in the U.S. by reducing their offshore outsourcing. Other bills have proposed requiring call centers to disclose their geographic locations, requiring notice to individuals whose personal information is disclosed to non-U.S. affiliates or subcontractors, requiring disclosures of companies' foreign outsourcing practices or restricting U.S. private sector companies that have federal government contracts, federal grants or guaranteed loan programs from outsourcing their services to offshore service providers. Because most of our clients are located in the U.S., any expansion of existing laws or the enactment of new legislation restricting offshore outsourcing could adversely impact our ability to do business with U.S. clients and have a material and adverse effect on our business, results of operations, financial condition and cash flows.

In other countries, such as the U.K., which comprised 20.2% of our total revenues in 2012, there has also been some negative publicity and concern expressed regarding the possible effect of job losses caused by outsourcing. Legislation enacted in the U.K. provides that if a company transfers or outsources its business or a part of its business to a transferee or a service provider, the employees who were employed in such business are entitled to become employed by the transferee or service provider on the same terms and conditions as they had been employed before the transfer. The dismissal of such employees as a result of such transfer of business is deemed unfair dismissal and entitles the employees to compensation. As a result, we may become liable for redundancy payments to the employees of our clients in the U.K. who outsource business to us. We are generally indemnified in our existing contracts with clients in the U.K. to the extent we incur losses or additional costs due to the application of this legislation to us, and we intend to obtain indemnification in future contracts with clients. However, if we are unable to obtain indemnification in future contracts with clients, we may be liable under any agreements we enter into in the future with U.K. clients. Similar legislation has also been enacted in certain other European jurisdictions.

Our client contracts contain certain termination and other provisions that could have an adverse effect on our business, results of operations and financial condition.

Most of our client contracts may be terminated by our clients without cause and do not commit our clients to provide us with a specific volume of business. Any failure to meet a client's expectations could result in a cancellation or non-renewal of a contract or a decrease in business provided to us. We may not be able to replace any client that elects to terminate or not renew its contract with us, which would reduce our revenues. For example, we provide services to Travelers which is our largest client under a services agreement that Travelers may terminate without cause upon 60 days prior notice. The loss of or financial difficulties at any of our large clients would have a material adverse effect on our business, results of operations, financial condition and cash flows.

Table of Contents

A limited number of our contracts allow a client, in certain limited circumstances, to request a benchmark study comparing our pricing and performance with that of an agreed list of other service providers for comparable services. Based on the results of the study and depending on the reasons for any unfavorable variance, we may be required to make improvements in the services we provide or reduce the pricing for services on a prospective basis to be performed under the remaining term of the contract or our client could elect to terminate the contract, which could have an adverse effect on our business, results of operations and financial condition. Many of our contracts contain provisions that would require us to pay penalties to our clients and/or provide our clients with the right to terminate the contract if we do not meet pre-agreed service level requirements or if we do not provide certain productivity benefits. Failure to meet these requirements or accurately estimate the productivity benefits could result in the payment of significant penalties by us to our clients which in turn could have a material adverse effect on our business, results of operations and financial condition. Some of our contracts with clients specify that if a change of control of our company occurs during the term of the contract, the client has the right to terminate the contract. These provisions may result in our contracts being terminated if there is such a change in control, resulting in a potential loss of revenues. In addition, these provisions may act as a deterrent to any attempt by a third party to acquire our company.

We may fail to attract and retain enough sufficiently trained employees to support our operations, as competition for highly skilled personnel is intense and we experience significant employee turnover rates.

Our industry is labor intensive and our success depends to a significant extent on our ability to attract, hire, train and retain qualified employees, including our ability to attract employees with needed skills in the geographic areas in which we operate. The industry, including us, experiences high employee turnover. In 2012, our turnover rate for billable employees was approximately 29.3%. There is significant competition for professionals with skills necessary to perform the services we offer to our clients. Increased competition for these professionals could have an adverse effect on us. A significant increase in the turnover rate among our employees, particularly among our higher skilled workforce, would increase our recruiting and training costs and decrease our operating efficiency, productivity and profit margins, and could lead to a decline in demand for our services. High turnover rates generally do not impact our revenues as we factor the attrition rate into our pricing models by maintaining additional employees for each process. However, high turnover rates do increase our cost of revenues and therefore impact our profit margins due to higher recruitment, training and retention costs. High employee turnover increases training, recruitment and retention costs because we must maintain larger hiring, training and human resources departments and it also increases our operating costs due to having to reallocate certain business processes among our operations centers where we have access to the skilled workforce needed for our business. In 2012, we incurred approximately \$2.4 million on recruitment and approximately \$2.7 million on training costs due to employee turnover, thereby increasing our costs and reducing our profit margins for that period by \$5.1 million.

In addition, our ability to maintain and renew existing engagements and obtain new business will depend, in large part, on our ability to attract, train and retain personnel with skills that keep pace with the demand for outsourcing, evolving industry standards and changing client preferences. A lack of sufficiently qualified personnel could also inhibit our ability to establish operations in new markets and our efforts to expand geographically. Our failure to attract, train and retain personnel with the qualifications necessary to fulfill the needs of our existing and future clients or to assimilate new employees successfully could have a material adverse effect on our business, results of operations, financial condition and cash flows.

We have a long selling cycle for our outsourcing services that requires significant funds and management resources and a long implementation cycle that requires significant resource commitments.

We have a long selling cycle for our outsourcing services, which requires significant investment of capital, resources and time by both our clients and us. Before committing to use our services, potential clients require us to expend substantial time and resources educating them as to the value of our services, including testing our services for a limited period of time, and assessing the feasibility of integrating our systems and processes with theirs. Our clients then evaluate our services before deciding whether to use them. Therefore, our selling cycle, which generally

Table of Contents

ranges from six to eighteen months, is subject to many risks and delays over which we have little or no control, including our clients' decision to choose alternatives to our services (such as other providers or in-house offshore resources) and the timing of our clients' budget cycles and approval processes. In addition, we may not be able to successfully conclude a contract after the selling cycle is complete.

Implementing our services involves a significant commitment of resources over an extended period of time from both our clients and us. Our clients may also experience delays in obtaining internal approvals or delays associated with technology or system implementations, thereby delaying further the implementation process. Our clients and future clients may not be willing or able to invest the time and resources necessary to implement our services, and we may fail to close sales with potential clients to which we have devoted significant time and resources. These factors could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Once we are engaged by a client, it may take us several months before we start to recognize significant revenues.

When we are engaged by a client after the selling process for our outsourcing services, it takes from four to six weeks to integrate the client's systems with ours, and up to three months thereafter to build up our services to the client's requirements. Depending on the complexity of the processes being implemented, these time periods may be significantly longer. Implementing processes can be subject to potential delays similar to certain of those affecting the selling cycle. Therefore, we do not recognize significant revenues until after we have completed the implementation phase.

We enter into long-term contracts with our clients, and our failure to estimate the resources and time required for our contracts may negatively affect our profitability.

The initial terms of our outsourcing contracts typically range from three to five years. In many of our outsourcing contracts we commit to long-term pricing with our clients and therefore bear the risk of cost overruns, completion delays, wage inflation and adverse movements in exchange rates in connection with these contracts. If we fail to estimate accurately the resources and time required for a contract, future wage inflation rates or currency exchange rates (or fail to accurately hedge our currency exchange rate exposure) or if we fail to complete our contractual obligations within the contracted timeframe, our revenues and profitability may be negatively affected.

Consistency in our revenues from period to period depends in part on our ability to reflect the changing demands and needs of our existing and potential clients. If we are unable to adjust our pricing terms or the mix of products and services we provide to meet the changing demands of our clients and potential clients, our business, results of operations and financial condition may be adversely affected.

Most of our contracts use a pricing model that provides for hourly or annual billing rates. Industry pricing models are evolving, however, and we anticipate that clients may increasingly request transaction-based or other pricing models. If we are unable to obtain operating efficiencies or if we make inaccurate assumptions for contracts with transaction-based pricing, our profitability may be negatively affected. If we are unable to adapt our operations to evolving pricing protocols, our results of operations may be adversely affected or we may not be able to offer pricing that is attractive relative to our competitors.

In addition, the services we provide to our clients and the revenues and income from those services may decline or vary as the type and quantity of services we provide under those contracts changes over time, including as a result of a shift in the mix of products and services we provide. Furthermore, our clients, some of which have experienced significant and adverse changes in their prospects, substantial price competition and pressures on their profitability, have in the past and may in the future demand price reductions, automate some or all of their processes or change their outsourcing strategy by moving more work in-house or to other providers, any of which could reduce our profitability. Any significant reduction in or the elimination of the use of the services we provide to any of our clients, or any requirement to lower our prices, would harm our business.

Table of Contents

Our profitability will suffer if we are not able to appropriately price our services or manage our asset utilization levels.

Our profitability is largely a function of the efficiency with which we utilize our assets, in particular our people and our operations centers, and the pricing that we are able to obtain for our services. Our asset utilization levels are affected by a number of factors, including our ability to transition employees from completed projects to new assignments, attract, train and retain employees, forecast demand for our services and maintain an appropriate headcount in each of our locations, as well as our need to dedicate resources to employee training and development and other typically non-chargeable activities. The prices we are able to charge for our services are affected by a number of factors, including our clients' perceptions of our ability to add value through our services, substantial price competition, introduction of new services or products by us or our competitors, our ability to accurately estimate, attain and sustain revenues from client engagements, our ability to estimate resources for long-term pricing, margins and cash flows for long-term contracts and general economic and political conditions. Therefore, if we are unable to appropriately price our services or manage our asset utilization levels, there could be a material adverse effect on our business, results of operations and financial condition.

Our transformation services are cyclical and based on specific projects involving short-term contracts.

Our transformation services, such as our decision analytics, finance transformation and operations and process excellence services, are cyclical and can be significantly affected by variations in business cycles. Changes in the deadlines or the scope of work required for compliance with the requirements of legislation applicable to our clients could have a significant impact on certain service offerings of our finance transformation services business.

In addition, a majority of our transformation services consist of specific projects with contract terms generally not exceeding one year and may not produce ongoing or recurring business for us once the project is completed. These contracts also usually contain provisions permitting termination of the contract after a short notice period. The short-term nature and specificity of these projects could lead to material fluctuations and uncertainties in the revenues generated from providing transformation services.

Our operating results may experience significant variability and as a result it may be difficult for us to make accurate financial forecasts.

Our operating results may vary significantly from period to period. Although our existing agreements with original terms of three or more years provide us with a relatively predictable revenue base for a substantial portion of our business, the long selling cycle for our services and the budget and approval processes of prospective clients make it difficult to predict the timing of entering into definitive agreements with new clients. The timing of revenue recognition under new client agreements also varies depending on when we complete the implementation phase with new clients. The completion of implementation varies significantly based upon the complexity of the processes being implemented.

Our period-to-period results have in the past and may also in the future fluctuate due to other factors, including client losses, delays or failure by our clients to provide anticipated business, variations in employee utilization rates resulting from changes in our clients' operations, delays or difficulties in expanding our operations centers and infrastructure (including hiring new employees or constructing new operations centers), changes to our pricing structure or that of our competitors, currency fluctuation, seasonal changes in the operations of our clients and other events identified in this Annual Report on Form 10-K. Our revenues are also affected by changes in pricing under our contracts at the time of renewal or by pricing under new contracts. For example, because a significant portion of our revenues are denominated in U.K. pounds sterling or U.S. dollars while most of our expenses are incurred and paid in Indian rupees and the Philippine peso, our revenues can decrease or increase significantly if the exchange rates among the Indian rupee, the U.K. pound sterling, the Philippine peso and the U.S. dollar fluctuate significantly. In addition, most of our contracts do not commit our clients to provide us with a specific volume of business. These factors may make it difficult to make accurate financial forecasts or replace anticipated revenues that we do not receive as a result of delays in implementing our services or client losses. If our actual results do not meet any estimated results that we announce, or if we underperform market expectations as a result of such factors, trading prices for our common stock could be adversely affected.

Table of Contents

Our senior management team is critical to our continued success and the loss of one or more members of our senior management team could harm our business.

Our future success substantially depends on the continued services and performance of the members of our management team and other key employees possessing technical and business capabilities, including industry expertise, that are difficult to replace. Specifically, the loss of the services of Rohit Kapoor, our Vice Chairman and Chief Executive Officer, could seriously impair our ability to continue to manage and expand our business. There is intense competition for experienced senior management and personnel with technical and industry expertise in the industry in which we operate, and we may not be able to retain these officers or key employees. Although we have entered into employment and non-competition agreements with all of our executive officers, certain terms of those agreements may not be enforceable and in any event these agreements do not ensure the continued service of these executive officers. Mr. Kapoor and certain of his affiliates have certain registration rights with respect to their shares of common stock.

In addition, we currently do not maintain key person insurance covering any member of our management team. The loss of any of our key employees, particularly to competitors, could have a material adverse effect on our business, results of operations, financial condition and cash flows.

Our inability to effectively manage our rapid infrastructure and personnel growth could have a material adverse effect on our operations, results of operations and financial condition.

Since we were founded in April 1999, we have experienced rapid growth and significantly expanded our operations. We have fifteen operations centers in India, six operations centers in the U.S., two operations centers in each of Bulgaria and the Philippines and one in each of Romania, the Czech Republic and Malaysia. Our headcount has increased from approximately 1,800 on December 31, 2002 to approximately 21,000 on December 31, 2012. We expect to develop and improve our internal systems in the locations where we operate in order to address the anticipated growth of our business. We are also continuing to look for operations centers at additional locations outside of our current operating geographies. We believe expanding our geographic base of operations will provide higher value to our clients by decreasing the risks of operating from a single country (including potential shortages of skilled employees, increases in wage costs during strong economic times and currency fluctuations), while also giving our clients access to a wider talent pool and establishing a base in countries that may be competitive in the future. However, we may not be able to effectively manage our infrastructure and employee expansion, open additional operations centers or hire additional skilled employees as and when they are required to meet the ongoing needs of our clients, and we may not be able to develop and improve our internal systems. Our inability to execute our growth strategy, to ensure the continued adequacy of our current systems or to manage our expansion effectively could have a material adverse effect on our business, results of operations, financial condition and cash flows.

We may engage in strategic acquisitions or transactions, which could have a material adverse effect on our business, results of operations and financial condition.

As part of our business strategy, we intend to continue to selectively consider acquisitions or investments, some of which may be material. Through the acquisitions we pursue, we may seek opportunities to expand the scope of our existing services we provide, add new clients or to enter new geographic markets. We have made acquisitions in the past, including our acquisitions in 2011 of Business Processing Outsourcing Inc. (the OPI Acquisition) and Trumbull Services, LLC and our acquisition of Landacorp in 2012. There can be no assurance that we will successfully identify suitable candidates in the future for strategic transactions at acceptable prices, have sufficient capital resources to finance potential acquisitions or be able to consummate any desired transactions. Our failure to close transactions with potential acquisition targets for which we have invested significant time and resources could have a material adverse effect on our financial condition and cash flows.

Acquisitions, including completed acquisitions, involve a number of risks, including diversion of management's attention, ability to finance the acquisition on attractive terms, failure to retain key personnel or

Table of Contents

valuable customers, legal liabilities and the need to amortize acquired intangible assets, any of which could have a material adverse effect on our business, results of operations, financial condition and cash flows. Future acquisitions may also result in the incurrence of indebtedness or the issuance of additional equity securities.

We could also experience financial or other setbacks if transactions encounter unanticipated problems, including problems related to execution, integration or underperformance relative to prior expectations. Our management may not be able to successfully integrate any acquired business into our operations or maintain our standards, controls and policies, which could have a material adverse effect on our business, results of operations and financial condition. Consequently, any acquisition we do complete may not result in long-term benefits to us.

Following the completion of an acquisition, we may have to rely on the seller to provide administrative and other support, including financial reporting and internal controls, and other transition services to the acquired business for a period of time. There can be no assurance that the seller will do so in a manner that is acceptable to us.

We may not be able to realize the entire book value of goodwill and other intangible assets from acquisitions.

As of December 31, 2012, we had approximately \$106.7 million of goodwill and \$43.5 million of intangible assets. We periodically assess these assets to determine if they are impaired and we monitor for impairment of goodwill relating to all acquisitions. Goodwill is not amortized but is tested for impairment testing at least on an annual basis as of December 31 of each year, based on a number of factors including operating results, business plans and future cash flows. Impairment testing of goodwill may also be performed between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of goodwill below its carrying amount. We perform an assessment of qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on the results of the qualitative assessment, the Company performs the quantitative assessment of goodwill impairment if it determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. In the event that the book value of goodwill is impaired, any such impairment would be charged to earnings in the period of impairment. We cannot assure you that future impairment of goodwill will not have a material adverse effect on our business, financial condition or results of operations.

Employee wage increases may prevent us from sustaining our competitive advantage and may reduce our profit margin.

Our most significant costs are the salaries and related benefits of our operations staff and other employees. For example, wage costs in India have historically been significantly lower than wage costs in the U.S. and Europe for comparably skilled professionals, which has been one of our competitive advantages. However, because of rapid economic growth in India, increased demand for outsourcing services from India and increased competition for skilled employees in India, wages for comparably skilled employees in India are increasing at a faster rate than in the U.S. and Europe, which may reduce this competitive advantage. We may need to increase the levels of employee compensation more rapidly than in the past to remain competitive in attracting and retaining the quality and number of employees that our business requires. Wages are generally higher for employees performing transformation services than for employees performing outsourcing services. As the scale of our transformation services increases, wages as a percentage of revenues will likely increase. To the extent that we are not able to control or share wage increases with our clients, wage increases may reduce our margins. We will attempt to control such costs by our efforts to add capacity in locations where we consider wage levels of skilled personnel to be satisfactory, but we may not be successful in doing so. Additionally, because a majority of our employees are based in India and paid in Indian rupees, while our revenues are primarily in U.S. dollars and U.K. pounds sterling, our employee costs as a percentage of revenues may increase or decrease significantly if the exchange rates among the Indian rupee, the U.K. pound sterling and the U.S. dollar fluctuate significantly.

If more stringent labor laws become applicable to us or if our employees unionize, our profitability may be adversely affected.

India has stringent labor legislation that protects employee interests, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes financial obligations on employers upon retrenchment. Though we are exempt from some of these labor laws at present under exceptions in some states for providers of IT-enabled services, there can be no assurance that such laws will not become applicable to us in the future. If these labor laws become applicable to our employees, it may become difficult for us to maintain flexible human resource policies and attract and employ the numbers of sufficiently qualified candidates that we need or discharge employees, and our compensation expenses may increase significantly. Regulations in our other operating geographies also regulate our relations with our employees.

In addition, our employees may in the future form unions. If employees at any of our operations centers become eligible for union membership, we may be required to raise wage levels or grant other benefits that could result in an increase in our compensation expenses, in which case our profitability may be adversely affected.

Edgar Filing: ExlService Holdings, Inc. - Form 10-K

The Government of India has recently focused on the occupational health and safety concerns experienced by workers in the outsourcing industry. The introduction of legislation imposing restrictions on working hours or conditions of professionals in the outsourcing industry could have an adverse effect on our business, results of operations and financial condition.

Table of Contents

We face significant competition from U.S.-based and non-U.S.-based outsourcing and IT companies and from our clients, who may perform outsourcing services themselves, either in-house, in the U.S. or through offshore groups or other arrangements.

The market for outsourcing services is highly competitive, and we expect competition to intensify and increase from a number of sources. We believe that the principal competitive factors in our markets are breadth and depth of process expertise, knowledge of industries served, service quality, the ability to attract, train and retain qualified people, compliance rigor, global delivery capabilities, price and sales and client management capabilities. We also face competition from non-U.S.-based outsourcing and IT companies (including those in the U.K. and India) and U.S.-based outsourcing and IT companies. In addition, the trend toward offshore outsourcing, international expansion by foreign and domestic competitors and continuing technological changes, such as cloud computing, will result in new and different competition for our services. These competitors may include entrants from the communications, software and data networking industries or entrants in geographic locations with lower costs than those in which we operate. Some of these existing and future competitors have greater financial, personnel and other resources, a broader range of service offerings, greater technological expertise, more recognizable brand names and more established relationships in industries that we currently serve or may serve in the future. In addition, some of our competitors may enter into strategic or commercial relationships among themselves or with larger, more established companies in order to increase their ability to address client needs, or enter into similar arrangements with potential clients. The trend in multi-vendor relationships has been growing, which could reduce our revenues to the extent that we are required to modify the terms of our relationship with clients or that clients obtain services from other vendors. Increased competition, our inability to compete successfully against competitors, pricing pressures or loss of market share could result in reduced operating margins, which could harm our business, results of operations, financial condition and cash flows.

We expect competition to intensify in the future as more companies enter our markets. Increased competition may result in lower prices and volumes, higher costs for resources, especially people, and lower profitability. We may not be able to supply clients with services that they deem superior and at competitive prices and we may lose business to our competitors. Any inability to compete effectively would adversely affect our business, results of operations and financial condition.

We may disrupt our clients' operations as a result of inadequate service or other factors, including telecommunications or technology downtime or interruptions.

The services we provide are often critical to our clients' businesses, and any failure to provide those services could result in a reduction in revenues or a claim for substantial damages against us, regardless of whether we are responsible for that failure. Most of our agreements with clients contain service level and performance requirements, including requirements relating to the quality of our services. Failure to consistently meet service requirements of a client or errors made by our employees in the course of delivering services to our clients could disrupt the client's business and result in a reduction in revenues or a claim for damages against us. Additionally, we could incur certain liabilities if a process we manage for a client were to result in internal control failures or impair our client's ability to comply with its own internal control requirements.

Our contractual limitations on liability with our clients and third parties may not be enforceable.

Under a majority of our agreements with our clients, our liability for breach of certain of our obligations is generally limited to actual damages suffered by the client and is typically capped at the greater of an agreed amount or the fees paid or payable to us for a period of time under the relevant agreement. These limitations and caps on liability may be unenforceable or otherwise may not protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients or liability for breaches of confidentiality, are generally not limited under those agreements. Our agreements are governed by laws of multiple jurisdictions, therefore the interpretation of such provisions, and the availability of defenses to us, may vary, which may contribute to the uncertainty as to the scope of our potential liability. In addition, many of our agreements with our clients do not include any limitation on our liability to them with respect to breaches of our obligation to keep the information we receive from them confidential.

Table of Contents

Our dependence on our offshore operations centers requires us to maintain active voice and data communications among our operations centers, our international technology hubs and our clients' offices. Although we maintain redundant facilities and communications links, disruptions could result from, among other things, technical breakdowns, computer glitches and viruses and weather conditions. We also depend on certain significant vendors for facility storage and related maintenance of our main technology equipment and data at those technology hubs. Any failure by these vendors to perform those services, any temporary or permanent loss of our equipment or systems, or any disruptions to basic infrastructure like power and telecommunications could impede our ability to provide services to our clients, have a negative impact on our reputation, cause us to lose clients, reduce our revenues and harm our business.

Our business could be materially and adversely affected if we do not protect our intellectual property or if our services are found to infringe on the intellectual property of others.

Our success depends in part on certain methodologies, practices, tools and technical expertise we utilize in designing, developing, implementing and maintaining applications and other proprietary intellectual property rights. In order to protect our rights in these various intellectual properties, we rely upon a combination of nondisclosure and other contractual arrangements as well as trade secret, patent, copyright and trademark laws. We also generally enter into confidentiality agreements with our employees, consultants, clients and potential clients and limit access to and distribution of our proprietary information. We also have submitted and expect to continue to submit U.S. federal and foreign trademark applications for the names of certain service offerings. We may not be successful in maintaining or obtaining trademarks for these trade names. India is a member of the Berne Convention, an international intellectual property treaty, and has agreed to recognize protections on intellectual property rights conferred under the laws of other foreign countries, including the laws of the U.S. There can be no assurance that the laws, rules, regulations and treaties in effect in the U.S., India and the other jurisdictions in which we operate and the contractual and other protective measures we take, are adequate to protect us from misappropriation or unauthorized use of our intellectual property, or that such laws will not change. We may not be able to detect unauthorized use and take appropriate steps to enforce our rights, and any such steps may not be successful. Infringement by others of our intellectual property, including the costs of enforcing our intellectual property rights, may have a material adverse effect on our business, results of operations and financial condition.

Our client contracts generally require our clients to indemnify us for any breaches of intellectual property rights or licenses to third party software when our clients provide such access to us. Although we believe that we are not infringing on the intellectual property rights of others, claims may nonetheless be asserted against us in the future. The costs of defending any such claims could be significant, and any successful claim may require us to modify, discontinue or rename any of our services. Any such changes may have a material adverse effect on our business, results of operations and financial condition.

New and changing corporate governance and public disclosure requirements add uncertainty to our compliance policies and increase our costs of compliance.

Changing laws, regulations and standards relating to accounting, corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, other SEC regulations, and the NASDAQ Global Select Market rules, are creating uncertainty for companies like ours. These laws, regulations and standards may lack specificity and are subject to varying interpretations. Their application in practice may evolve over time, as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs of compliance as a result of ongoing revisions to such corporate governance standards.

In particular, our efforts to comply with Section 404 of the Sarbanes-Oxley Act of 2002 and the related regulations regarding our required assessment of our internal controls over financial reporting and our external auditors' audit of that assessment requires the commitment of significant financial and managerial resources. We consistently assess the adequacy of our internal controls over financial reporting, remediate any control deficiencies that may be identified, and validate through testing that our controls are functioning as documented. While we do not anticipate any material weaknesses, the inability of management and our independent auditor to provide us with an unqualified report as to the adequacy and effectiveness, respectively, of our internal controls over financial reporting for future year ends could result in adverse consequences to us, including, but not limited to, a loss of investor confidence in the reliability of our financial statements, which could cause the market price of our stock to decline.

We are committed to maintaining high standards of corporate governance and public disclosure, and our efforts to comply with evolving laws, regulations and standards in this regard have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. In addition, the laws, regulations and standards regarding corporate governance may make it more difficult for us to obtain director and officer liability insurance. Further, our board members, chief executive officer and chief financial officer could face an increased risk of personal liability in connection with their performance of duties. As a result, we may face difficulties attracting and retaining qualified board members and executive officers, which could harm our business. If we fail to comply with new or changed laws, regulations or standards of corporate governance, our business and reputation may be harmed.

Unauthorized disclosure of sensitive or confidential client and customer data, whether through breach of our computer systems or otherwise, could expose us to protracted and costly litigation and cause us to lose clients.

We are typically required to collect and store sensitive data in connection with our services, including names, addresses, social security numbers, personal health information, credit card account numbers, checking and savings account numbers and payment history records, such as account closures and returned checks. In addition, we collect and store data regarding our employees. As a result, we are subject to various data protection and privacy laws in countries in which we operate. In addition, many of our agreements with our clients do not include any limitation on our liability to them with respect to breaches of our obligation to keep the information we receive from them confidential. We devote substantial resources to maintaining adequate levels of cyber security and to protecting confidential client and customer data. However, any network infrastructure may be vulnerable to rapidly evolving cyber attacks. If any person, including any of our employees, penetrates our network security or otherwise mismanages or misappropriates sensitive data, we could be subject to significant liability and lawsuits from our clients or their own customers for breaching contractual confidentiality provisions or privacy laws, or investigations and penalties from regulators. We have obtained privacy and network security insurance for claims related to breaches of our privacy and network security, including unauthorized access to or disclosure of sensitive

Table of Contents

data, suspension or interruption of our network infrastructure, transmission of computer viruses or failure to comply with our privacy and network security procedures. However, such coverage may not be adequate or may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims, and our insurers may disclaim coverage as to any future claims. Cyber attacks penetrating the network security of our data centers could also have a negative impact on our reputation and client confidence, which could have a material adverse effect on our business, results of operations, financial condition and cash flows.

We may not be fully insured for all losses we may incur.

Although we attempt to limit and mitigate our liability for damages arising from negligent acts, errors or omissions through contractual provisions, limitations of liability set forth in our contracts may not be enforceable in all instances or may not otherwise protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients, are generally not limited under those agreements. Although we have general liability insurance coverage, including coverage for errors or omissions, property damage or loss and breaches of privacy and network security, that coverage may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims, and our insurers may disclaim coverage as to any future claim. The successful assertion of one or more large claims against us that are excluded from our insurance coverage or exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, reputation, results of operations, financial condition and cash flows.

We do not intend to pay dividends in the foreseeable future, and, because we are also a holding company, we may be unable to pay dividends.

For the foreseeable future, we intend to retain any earnings to finance the development and expansion of our business, and we do not anticipate paying any cash dividends on our common stock. Any future determination to pay dividends will be at the discretion of our board of directors and will be dependent on then-existing conditions, including our financial condition and results of operations, capital requirements, contractual restrictions, including restrictions under our credit agreement, business prospects and other factors that our board of directors considers relevant. Furthermore, because we are also a holding company, any dividend payments would also depend on the cash flow from our subsidiaries. Accordingly, we may not be able to pay dividends even if our board of directors would otherwise deem it appropriate.

We may choose to expand operations to additional countries and may not be successful in maintaining our current profit margins in our new locations due to factors beyond our control.

We are currently continuing to evaluate additional locations outside our current operating geographies in which to invest in an operations center. We cannot predict the extent of government support, availability of qualified workers, or monetary and economic conditions in other countries. Although some of these factors will influence our decision to establish operations in another country, there are inherent risks beyond our control, including exposure to currency fluctuations, political uncertainties, foreign exchange restrictions and foreign regulatory restrictions. One or more of these factors or other factors relating to expanded international operations could result in increased operating expenses and make it more difficult for us to manage our costs and operations, which could harm our business and negatively impact our operating results.

We may increase the range of services that we provide to our clients and our business and future prospects are difficult to evaluate.

We are exploring opportunities to provide services that we have not provided to date. Should we decide to expand our service offerings, our results of operations may be negatively affected during any transition or growth period before such offerings achieve profitability. For example, we may need to expand our training of our existing employees or recruit new, specially-trained employees to provide these services, which could increase our costs of revenues disproportionately to the revenues generated by such services. Other challenges we may face include the diversion of our management's attention, attracting and retaining clients for such services, integrating any new services into our current suite of services and managing any resulting growth in our operations.

Table of Contents***Failure to adhere to the regulations that govern our business could have an adverse impact on our operations.***

Our clients are often subject to regulations that may require that we comply with certain rules and regulations in performing services for them that would not otherwise apply to us. Debt collection services, for example, may be subject to the Fair Debt Collection Practices Act, which regulates debt collection practices. In addition, many U.S. states require a debt collector to apply for, be granted and maintain a license to engage in debt collection activities in a state. We are currently licensed (or exempt from licensing requirements) to provide debt collection services in the U.S. from India in all but two U.S. states and from the Philippines in 35 U.S. states that have non-exempt requirements and that have separate conditional exemptions with respect to our ongoing collection obligations. If we do not maintain our licenses or other qualifications to provide our services, we may not be able to provide services to existing customers or be able to attract new clients and could lose revenues, which could have a material adverse effect on our business. Other U.S. federal laws and regulations that apply to certain portions of our business include the Fair Credit Reporting Act, the Gramm-Leach-Bliley Act, the Health Insurance Portability and Accountability Act of 1996, the HITECH Act of 2009, the Truth in Lending Act, the Fair Credit Billing Act; the Federal Trade Commission Act and FDIC rules and regulations. We must also comply with applicable federal and state laws and regulations relating to healthcare and other personal information that we must process as part of our services. Our agreements with some of our clients require us to remain knowledgeable about and comply with a number of relevant consumer protection laws and other regulatory requirements. Failure to perform our services in a manner that complies with any such requirement could result in breaches of contracts with our clients. Our failure to comply with any applicable laws and regulations could subject us to civil fines and criminal penalties.

Our stock price continues to be volatile.

Our stock has at times experienced substantial price volatility as a result of variations between our actual and anticipated financial results, announcements by us and our competitors, projections or speculation about our business or that of our competitors by the media or investment analysts or uncertainty about current global economic conditions. The stock market, as a whole, also has experienced extreme price and volume fluctuations that have affected the market price of many technology companies in ways that may have been unrelated to these companies operating performance. Furthermore, we believe our stock price should reflect future growth and profitability expectations and, if we fail to meet these expectations, our stock price may significantly decline.

Delaware law and our amended and restated certificate of incorporation and by-laws contain certain anti-takeover provisions that could delay or discourage business combinations and takeover attempts that stockholders may consider favorable.

Our amended and restated certificate of incorporation and by-laws contain provisions that may make it more difficult, expensive or otherwise discourage a tender offer or a change in control or takeover attempt by a third-party that is opposed by our board of directors. These provisions include classified board provisions, provisions permitting the board of directors to fill vacancies created by its expansion, provisions permitting the removal of directors only for cause and with a 66 ²/₃% stockholder vote, provisions requiring a 66 ²/₃% stockholder vote for certain amendments to our organizational documents, provisions barring stockholders from calling a special meeting of stockholders or requiring one to be called or from taking action by written consent and provisions that set forth advance notice procedures for stockholders' nominations of directors and proposals for consideration at meetings of stockholders. These provisions may have the effect of delaying or preventing a change of control or changes in management that stockholders consider favorable. Additionally, because we are incorporated in Delaware, we are subject to Section 203 of the Delaware General Corporation Law. Section 203 may prohibit large stockholders, in particular those owning 15.0% or more of our outstanding voting stock, from merging or combining with us. These provisions of our amended and restated certificate of incorporation, by-laws and Delaware law could discourage potential takeover attempts and reduce the price that investors might be willing to pay for shares of our common stock in the future which could reduce the market price of our stock.

Risks Related to the International Nature of Our Business***Our financial condition could be negatively affected if foreign governments reduce or withdraw tax benefits and other incentives currently provided to companies within our industry or if we are not eligible for these benefits.***

Under the Income Tax Act, 1961 of India, we previously benefited from certain tax incentives promulgated by the Indian government, including a tax holiday from Indian corporate income taxes for the operation of some of our Indian operations centers. The tax benefit for most of our operations centers in India expired on April 1, 2011. Our operations centers in Jaipur and Noida, India, which were established in SEZs in 2010, are eligible for tax incentives until 2020, ten years from the year of their establishment. As part of the OPI Acquisition, we also acquired operations centers in Bengaluru and Kochi, India that are also located in SEZs. The operations center in Bengaluru completed its first five years of operations on March 31, 2012 and benefitted from a 100% exemption on export profits in prior years. Under the tax regulations, the Bengaluru operations center is now entitled to a 50% tax exemption on export profits for five years from April 1, 2012. After April 1, 2017, the applicable tax exemption will be further reduced. We also established a new operations center in Pune, India in June 2012, which is located in an SEZ. The Company anticipates establishing additional operations centers in SEZs or other tax advantaged locations in the future.

Edgar Filing: ExlService Holdings, Inc. - Form 10-K

The Direct Taxes Code Bill 2010 (the Direct Taxes Code) proposed by the Government of India and currently pending before the Indian Parliament proposes grandfathering the existing profit-based tax benefits for operations centers in SEZs already receiving such tax benefits. The Direct Taxes Code also proposes discontinuing profit-based incentives for operations centers in SEZs set up after March 31, 2014 and replaces them with investment-based incentives for operations centers in SEZs established after that date. Accordingly, we expect to continue receiving the benefit of tax deductions for our existing operations centers in SEZs pursuant to the current regulations until the currently proposed March 31, 2014 sunset date. If this grandfathering does not happen under the Direct Taxes Code and if the sunset date is brought forward, our new operations centers in SEZs will not receive profit-based tax benefits. Without such benefits, we expect that our tax rate in India and our overall tax rate will increase over the next few years and that such increase may be material.

One of our operations centers in the Philippines benefited from a four-year income tax holiday that expired in May 2012. In February 2013, PEZA, which can approve two successive one-year extensions, granted us a one year extension retroactively from May 2012. Our new operations center in the Philippines, which began operations in January 2012, benefits from a separate four-year income tax holiday that can be extended at PEZA's discretion. While we are reasonably certain that PEZA will extend these tax holidays, it is possible that such extension requests may be denied, or that these tax holidays may be conditioned or removed entirely due to changes in applicable legislation by the government of the Philippines. Should any of these events occur, our tax liability in the Philippines would likely increase.

Table of Contents

We may be required to pay additional taxes in connection with audits by the Indian taxing authorities.

U.S. and Indian transfer pricing regulations require that any international transaction involving associated enterprises be at an arm's-length price. Transactions among the Company's subsidiaries and the Company may be required to satisfy such requirements. Accordingly, the Company determines the pricing among its associated enterprises on the basis of detailed functional and economic analysis involving benchmarking against transactions among entities that are not under common control. The tax authorities have jurisdiction to review this arrangement and in the event that they determine that the transfer price applied was not appropriate, the Company may incur increased tax liability, including accrued interest and penalties. The Company is currently involved in disputes with the Indian tax authorities over the application of some of its transfer pricing policies for past years. Please see Note 15 to our consolidated financial statements for details.

Based on advice from our Indian tax advisors, the facts underlying our position and our experience with these types of assessments, we continue to believe that the probability of loss is remote and have not accrued any amount with respect to these matters in our consolidated financial statements. Any amounts paid by us as deposits will be refunded to us with interest or applied toward outstanding disputes at such time if we succeed in our appeals with the appropriate tax authorities. We cannot assure you that our appeals will be successful or that these appeals will be finally resolved in the near future.

Introduction of tax legislation and disputes with tax authorities may have an adverse effect on our operations and our overall tax rate.

Governments in countries in which we operate or provide services could enact new tax legislation which would have a material adverse effect on our business, results of operations and financial condition. In addition, our ability to repatriate surplus earnings from our operations centers in a tax-efficient manner is dependent upon interpretations of local laws, possible changes in such laws and the renegotiation of existing double tax avoidance treaties. Changes to any of these may adversely affect our overall tax rate, which would have a material adverse effect on our business, results of operations and financial condition. Additionally, if a tax authority in any jurisdiction reviews any of our tax returns and determines that the transfer prices and terms we have applied are not appropriate, or that other income of our affiliates should be taxed in that jurisdiction, we may incur increased tax liability, including accrued interest and penalties, which would cause our tax expense to increase, possibly materially, thereby reducing our profitability and cash flows.

The Company has undertaken a legal entity rationalization project which may be implemented and become effective in 2013 to simplify the global legal entity structure and remove redundancies and reduce compliance risks and costs associated with it. Furthermore, the Company also intends to optimize the tax and financial efficiencies of the group structure. As a result, we may carry out certain re-organizations under the tax laws of various jurisdictions in which we operate and take certain positions to qualify for tax neutrality for such internal re-organization. We cannot assure you that there could not be any litigation by the tax authorities on such re-organization when implemented.

Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violations of these regulations could harm our business.

Because we provide services to clients throughout the world, we are subject to numerous, and sometimes conflicting, legal rules on matters as diverse as import/export controls, content requirements, trade restrictions, tariffs, taxation, sanctions, government affairs, internal and disclosure control obligations, data privacy and labor relations. Violations of these laws or regulations in the conduct of our business could result in fines, criminal sanctions against us or our officers, prohibitions on doing business, damage to our reputation and other unintended consequences such as liability for monetary damages, fines and/or criminal prosecution, unfavorable publicity, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degrees of development of the legal systems of the countries in which we operate, local laws might be insufficient to protect our rights. Our failure to comply with applicable legal and regulatory requirements could have a material adverse effect on our business, results of operations and financial condition.

Among other anti-corruption laws and regulations, including the U.K. Bribery Act, we are subject to the United States Foreign Corrupt Practices Act, or FCPA, which prohibits improper payments or offers of improper payments to foreign officials to obtain business or any other benefit. The FCPA also requires covered companies to make and keep books and records that accurately and fairly reflect the transactions of the company and to devise and maintain an adequate system of internal accounting controls. In many parts of the world, including countries in which we operate, practices in the local business community might not conform to international business standards and could violate these anti-corruption laws or regulations. Although we have policies and procedures in place that are designed to promote legal and regulatory compliance, our employees, subcontractors and agents could take actions that violate these policies or procedures or applicable anti-corruption laws or regulations. Furthermore, the U.S. government may seek to hold us liable for successor liability FCPA violations committed by companies in which we invest or that we acquire. Violations of these laws or regulations could subject us to criminal or civil enforcement actions, including fines and suspension or disqualification from government contracting or contracting with private entities in certain highly regulated industries, any of which could have a material adverse effect on our business.

Currency fluctuations among the Indian rupee, the U.K. pound sterling, the Philippine peso and the U.S. dollar could have a material adverse effect on our results of operations.

Although a substantial portion of our revenues are denominated in U.S. dollars (72.3% in 2012) or U.K. pounds sterling (20.2% in 2012), a significant portion of our expenses are incurred and paid in Indian rupees and Philippines peso (55.2% and 7.2% in 2012, respectively). We report our financial results in U.S. dollars. The exchange rates among the Indian rupee, the U.K. pound sterling, the Philippine peso and the U.S. dollar have changed substantially in recent years and may fluctuate substantially in the future. Although we take steps to hedge a substantial portion of our Indian rupee/U.S. dollar and Philippines peso/U.S. dollar foreign currency exposures, our results of operations may be adversely affected if the Indian rupee and Philippines peso fluctuates significantly against the U.S. dollar, the U.K. pound sterling further depreciates against the U.S. dollar, our hedging strategy is unsuccessful or if the hedging markets have insufficient liquidity or depth to allow us to implement our hedging strategy in a cost-effective manner. Any failure by our hedging counterparties to meet their contractual obligations could materially and adversely affect our profitability. We are subject to legal restrictions on hedging activities as

Table of Contents

well as the convertibility of currencies in India. This could limit our ability to use cash generated in one country in another country and could limit our ability to hedge our exposures.

Terrorist attacks and other acts of violence involving India, the Philippines, the U.S. or other countries could adversely affect the financial markets, result in a loss of client confidence and adversely affect our business, results of operations and financial condition.

Terrorist attacks and other acts of violence or war, including those involving India, the Philippines, the U.S. or other countries, may adversely affect worldwide financial markets and could potentially lead to economic recession, which could adversely affect our business, results of operations and financial condition. These events could adversely affect our clients' levels of business activity and precipitate sudden significant changes in regional and global economic conditions and cycles. These events also pose significant risks to our people and to our operations centers. South Asia has, from time to time, experienced instances of civil unrest and hostilities among neighboring countries, including Bangladesh, Pakistan and China. In recent years there have been several instances of military confrontations along the Indo-Pakistani border. There continues to be potential for hostilities between India and Pakistan due to recent terrorist activities and the geopolitical climate along the border. Although this has not been the case to date, such political tensions could create a perception that there is a risk of disruption of services provided by India-based companies, which could have a material adverse effect on the market for our services. Furthermore, if India were to become engaged in armed hostilities, particularly hostilities that were protracted or involved the threat or use of nuclear weapons, we might not be able to continue to operate. Our insurance policies may not insure us against losses and interruptions caused by terrorist attacks and other acts of violence or war.

We may face difficulties as we expand our operations into countries in which we have no prior operating experience.

We intend to continue to expand our global footprint in order to maintain an appropriate cost structure and meet our clients' delivery needs. This may involve expanding into countries other than those in which we currently operate. It may involve expanding into less developed countries, which may have less political, social or economic stability and less developed infrastructure and legal systems. As we expand our business into new countries we may encounter regulatory, personnel, technological and other difficulties that increase our expenses or delay our ability to start up our operations or become profitable in such countries. This may affect our relationships with our clients and could have an adverse effect on our business, results of operations and financial condition.

A substantial portion of our assets and operations are located in India, and we are subject to regulatory, economic and political uncertainties in India.

Our principal operating subsidiaries are incorporated in India, and a majority of our assets and our professionals are located in India. We intend to continue to develop and expand our offshore facilities in India. In the early 1990s, India experienced significant inflation, low growth in gross domestic product and shortages of foreign currency reserves. The Indian government, however, has exercised and continues to exercise significant influence over many aspects of the Indian economy. India's government has provided significant tax incentives and relaxed certain regulatory restrictions in order to encourage foreign investment in specified sectors of the economy, including our industry. Certain of those programs, which have benefited us, include tax holidays, liberalized import and export duties and preferential rules on foreign investment and repatriation. We cannot assure you that liberalization policies will continue. Various factors, such as changes in the current federal government, could trigger significant changes in India's economic liberalization and deregulation policies and disrupt business and economic conditions in India generally and our business in particular.

The choice of India as an outsourcing destination and our financial performance may be adversely affected by general economic conditions and economic and fiscal policy in India, including changes in exchange rates and controls, interest rates and taxation policies, as well as social stability and political, economic or diplomatic developments affecting India in the future. In particular, India has experienced significant economic growth over the last several years, but faces major challenges in sustaining that growth in the years ahead. These challenges include the need for substantial infrastructure development and improving access to healthcare and education. Our ability to

Table of Contents

recruit, train and retain qualified employees, develop and operate our operations centers, and attract and retain clients could be adversely affected if India does not successfully meet these challenges.

Restrictions on entry visas may affect our ability to compete for and provide services to clients in the U.S., which could have a material adverse effect on future revenues.

The vast majority of our employees are Indian nationals. The ability of some of our executives and employees to work with and meet our U.S. and European clients and our clients from other countries depends on their ability to obtain the necessary visas and entry permits. In response to terrorist attacks, the recent global economic downturn and public sentiments about the high unemployment rates in their respective economies, U.S. and European immigration authorities have increased the level of scrutiny in granting visas. Immigration laws in those countries may also require us to meet certain levels of compensation and comply with other legal requirements as a condition to obtaining or maintaining entry visas. These restrictions have increased the application fees for certain types of visas and have significantly lengthened the time requirements to obtain visas for our personnel, which has in the past resulted, and may continue to result, in delays in the ability of our personnel to meet with our clients. In addition, immigration laws are subject to legislative change and varying standards of application and enforcement due to political forces, economic conditions or other events, including terrorist attacks. We cannot predict the political or economic events that could affect immigration laws or any restrictive impact those events could have on obtaining or monitoring entry visas for our professionals. If we are unable to obtain the necessary visas for personnel who need to get to our clients' sites, or if the duration of such visas is shortened or if such visas are delayed, we may not be able to provide services to our clients or to continue to provide these services on a timely and cost effective basis, which could have a material adverse effect on our business, results of operations, financial condition and cash flows.

We are vulnerable to natural disasters that could severely disrupt the normal operation of our business and adversely affect our business, results of operation and financial condition.

India and the Philippines are susceptible to natural disasters, including typhoons, tsunamis, floods and earthquakes. The Philippines is additionally susceptible to volcanic eruptions. Substantially all of our operations centers and employees are located in India and the Philippines. If our operations centers are damaged by a typhoon, tsunami, flood, earthquake, volcanic eruption or other natural disaster, our operations and our ability to provide services to our clients could be interrupted or delayed significantly. Our insurance coverage may not be sufficient to cover all of our potential losses. In addition, although all of our operations centers have access to other power sources, disaster management facilities may not be adequate to protect against potential losses. In addition, clients may terminate their contracts with us if we cannot resume providing services quickly enough. As a result, a natural disaster in India or the Philippines could have a material adverse effect on our business, results of operation and financial condition.

Investors may have difficulty effecting service of process or enforcing judgments obtained in the U.S. against our subsidiaries in India or our executive officers.

Our primary operating subsidiaries are organized outside the U.S. and a number of our executive officers reside outside of the U.S. A substantial portion of our assets are located in India. As a result, you may be unable to effect service of process upon our affiliates who reside in India outside their jurisdiction of residence. In addition, you may be unable to enforce against these persons outside the jurisdiction of their residence judgments obtained in courts of the U.S., including judgments predicated solely upon the federal securities laws of the U.S.

Sections 44A and Section 13 of the Indian Civil Procedure Code, 1908 (the "Civil Code") govern recognition and enforcement of foreign judgments. Section 44A of the Civil Code provides for recognition and enforcement of a foreign judgment without having to file an original suit in India, provided such judgments have been rendered by courts in a country or territory outside India which the Government of India has declared to be a reciprocating territory. We have been advised by our Indian counsel that the U.S. and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments (other than certain arbitration awards) in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the U.S. based on civil liability, whether or not it is predicated upon the federal securities laws of the U.S., would not be enforceable in India as such.

Table of Contents

However, if the party in whose favor such final judgment is rendered brings a new suit in a competent court in India based on a final judgment that has been obtained in the U.S., Section 13 of the Civil Code provides that the foreign judgment will be conclusive as to certain matters. The suit must be brought in India within three years of the date of the foreign judgment. It is unlikely, however, that a court in India would award damages on the same basis as a court in the U.S. if an action is brought in India. It is also unlikely that an Indian court would enforce judgments obtained in the U.S. if it viewed the amount of damages awarded as excessive or inconsistent with Indian practice.

ITEM 1B. Unresolved Staff Comments

None.

ITEM 2. Properties

Our corporate headquarters is located in New York, New York. We have fifteen operations centers in India, two operations centers in each of Bulgaria and the Philippines and one in each of Romania, the Czech Republic and Malaysia with an aggregate area of approximately 1,560,000 square feet and a current installed capacity of approximately 18,600 agent workstations. In 2012, we inaugurated the EXL Center for Talent in Noida, India, which is our first facility exclusively dedicated to recruitment, capability enhancement and talent development. We also have six operations centers in the U.S. and a sales office in London, U.K. Our networking and telecommunication hubs are located in Sunnyvale, California, Jersey City, New Jersey and New York, New York. Substantially all of our operations centers are leased under long-term leases with varying expiration dates, except for an operations center in Pune, India with an area of 86,361 sq. ft. and containing 1,325 agent workstations which we own. We do not have the option under our present lease agreements to buy any of these properties.

ITEM 3. Legal Proceedings

In the course of our normal business activities, various lawsuits, claims and proceedings may be instituted or asserted against us. We believe that the disposition of matters currently instituted or asserted will not have a material adverse effect on our consolidated financial position, results of operations or cash flows. Please see Note 15 to our consolidated financial statements for details regarding our tax proceedings.

ITEM 4. Mine Safety Disclosures

Not applicable.

Table of Contents**PART II.****ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock trades on the Nasdaq Global Select Market under the symbol EXLS.

The following table sets forth for the periods indicated the high and low sales prices for shares of our common stock as reported by the Nasdaq Global Select Market.

Calendar Period	Price Range	
	High	Low
2012		
First Quarter	\$ 28.85	\$ 21.47
Second Quarter	\$ 28.25	\$ 20.28
Third Quarter	\$ 29.71	\$ 22.67
Fourth Quarter	\$ 30.10	\$ 25.87
2011		
First Quarter	\$ 22.49	\$ 18.63
Second Quarter	\$ 24.75	\$ 17.94
Third Quarter	\$ 26.55	\$ 21.59
Fourth Quarter	\$ 26.99	\$ 21.30

As of February 28, 2013, there were 43 holders of record of our outstanding common stock.

We have not paid or declared any cash dividends on our common stock. We currently expect to retain all of our earnings for use in developing our business and do not anticipate paying any cash dividends in the foreseeable future. Future cash dividends, if any, will be paid at the discretion of our board of directors and will depend, among other things, upon our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and such other factors as our board of directors may deem relevant.

Issuer Purchases of Equity Securities

During the year ended December 31, 2012, the Company acquired 12,865 shares of common stock from employees in connection with withholding tax payments related to the vesting of restricted stock for a total consideration of \$331,719. The weighted average purchase price of \$25.78 per share was the average of the high and low price of the Company's share of common stock on the Nasdaq Global Select Market on the trading day prior to the vesting date of the shares of restricted stock. The shares acquired are held as treasury stock.

Equity Compensation Plan Information

The following table provides information as of December 31, 2012 with respect to the shares of our common stock that may be issued under our existing equity compensation plans. For a description of our equity compensation plans, please see Note 13 to our consolidated financial statements.

Table of Contents

Plan Category	Number of Securities to be Issued Upon Exercise/Vesting of Outstanding Equity Awards	Weighted Average Exercise Price of Outstanding Options	Number of Securities Available for Future Issuance Under Equity Compensation Plans
Equity compensation plans that have been approved by security holders	3,609,752	\$ 15.30	2,229,618
Equity compensation plans not approved by security holders			
Total	3,609,752	\$ 15.30	2,229,618

Performance Graph

The following graph compares the cumulative total stockholder return on our common stock with the cumulative total return of the Nasdaq 100 Index (capitalization weighted) and our peer group of companies for the period beginning October 20, 2006. Our peer group of companies is comprised of two companies that we believe are our closest reporting issuer competitors: Genpact Limited and WNS (Holdings) Limited. The returns of the component entities of our peer group index are weighted according to the market capitalization of each company as of the beginning of each period for which a return is presented. The stock performance shown on the graph below is not indicative of future price performance.

This graph will not be deemed filed for purposes of Section 18 of the Exchange Act or otherwise subject to the liability of that section. This graph will not be deemed to be incorporated by reference into any prior or subsequent filing under the Securities Act of 1933 or the Exchange Act.

Table of Contents**ITEM 6. Selected Financial Data**

The following table sets forth our selected consolidated historical financial data as of the dates and for the periods indicated. Our selected consolidated financial data set forth below as of December 31, 2012 and 2011 and for each of the three years in the period ended December 31, 2012 has been derived from our consolidated financial statements included elsewhere in this Annual Report on Form 10-K. Our selected consolidated financial data set forth below as of December 31, 2010, 2009 and 2008 and for years ended December 31, 2009 and 2008 is derived from our audited financial statements, which are not included in this Annual Report on Form 10-K. Our selected consolidated financial information for 2012, 2011 and 2010 should be read in conjunction with our consolidated financial statements and the notes thereto and Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, which are included elsewhere in this Annual Report on Form 10-K.

	2012	2011	Year ended December 31, 2010 2009 2008 (in millions, except share and per share data)

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion in connection with our consolidated financial statements and the related notes included elsewhere in this Annual Report on Form 10-K. Some of the statements in the following discussion are forward looking statements. See Forward Looking Statements.

Forward Looking Statements

This Annual Report on Form 10-K contains forward looking statements. You should not place undue reliance on those statements because they are subject to numerous uncertainties and factors relating to our operations and business environment, all of which are difficult to predict and many of which are beyond our control. Forward looking statements include information concerning our possible or assumed future results of operations, including descriptions of our business strategy. These statements often include words such as may, will, should, believe, expect, anticipate, intend, plan, estimate or similar expressions. These statements are based on assumptions that we have made in light of our experience in the industry as well as our perceptions of historical trends, current conditions, expected future developments and other factors we believe are appropriate under the circumstances. As you read and consider this Annual Report on Form 10-K, you should understand that these statements are not guarantees of performance or results. They involve known and unknown risks, uncertainties and assumptions. Although we believe that these forward looking statements are based on reasonable assumptions, you should be aware that many factors could affect our actual financial results or results of operations and could cause actual results to differ materially from those in the forward looking statements. These factors include but are not limited to:

our dependence on a limited number of clients in a limited number of industries;

worldwide political, economic or business conditions;

negative public reaction in the U.S. or elsewhere to offshore outsourcing;

fluctuations in our earnings;

our ability to attract and retain clients;

our ability to successfully consummate or integrate strategic acquisitions;

restrictions on immigration;

our ability to hire and retain enough sufficiently trained employees to support our operations;

our ability to grow our business or effectively manage growth and international operations;

increasing competition in our industry;

telecommunications or technology disruptions;

Edgar Filing: ExlService Holdings, Inc. - Form 10-K

regulatory, legislative and judicial developments, including changes to or the withdrawal of governmental fiscal incentives;

technological innovation;

political or economic instability in the geographies in which we operate;

unauthorized disclosure of sensitive or confidential client and customer data; and

adverse outcome of our disputes with the Indian tax authorities.

These and other factors are more fully discussed elsewhere in this Annual Report on Form 10-K. These and other risks could cause actual results to differ materially from those implied by forward looking statements in this Annual Report on Form 10-K.

Table of Contents

You should keep in mind that any forward looking statement made by us in this Annual Report on Form 10-K, or elsewhere, speaks only as of the date on which we make it. New risks and uncertainties come up from time to time, and it is impossible for us to predict these events or how they may affect us. We have no obligation to update any forward looking statements in this Annual Report on Form 10-K after the date of this Annual Report on Form 10-K, except as required by federal securities laws.

Overview

We are a leading provider of outsourcing and transformation services and focus on providing our clients with a positive business impact and enhancing their long term financial value. We customize our services to improve the economics of business performance and transform organizations to be leaner and more flexible. Our outsourcing services provide front-, middle- and back-office processing for our clients, who are primarily global companies. Outsourcing services involve the transfer to us of select business operations of a client, such as claims processing, policy administration and finance and accounting, after which we administer and manage the operations for our client on an ongoing basis. We also offer a number of transformation services that include decision analytics, finance transformation and operations and process excellence services. These transformation services help our clients provide additional insight into their future financial and operational results, improve their operating environments through cost reduction, enhanced efficiency and productivity initiatives, and enhance the risk and control environments within our clients' operations whether or not they are outsourced to us. We serve primarily the needs of Global 1000 companies in the insurance and healthcare, utilities, banking and financial services, travel, transportation and logistics sectors.

On October 12, 2012, we acquired Landacorp, a leading provider of healthcare solutions and technology (the Landacorp Acquisition). Landacorp has more than 50 million lives under management on its software platforms and has developed services and technology solutions that share vital clinical data with payers, providers, plan participants and accountable care organizations.

We market our services to our existing and prospective clients through our sales and client management teams, which are aligned by industry verticals and cross-industry domains such as finance and accounting. Our sales and client management teams operate from the U.S. and Europe. We operate fifteen operations centers in India, including our new operations center in Pune, India and Manila, Philippines which began operations in 2012. We also have six operations centers in the U.S., two operations centers each in the Philippines and Bulgaria and one operations center in each of Romania, Malaysia and the Czech Republic.

Revenues

We generate revenues principally from contracts to provide outsourcing and transformation services. Total revenues increased \$82.4 million, or 22.9%, from \$360.5 million for the year ended December 31, 2011 to \$442.9 million for the year ended December 31, 2012.

Revenues from outsourcing services increased from \$294.4 million for the year ended December 31, 2011 to \$366.8 million for the year ended December 31, 2012. The increase in revenues from outsourcing services of \$72.4 million was driven primarily by revenues of \$49.9 million due to the Landacorp Acquisition in 2012 and the acquisitions in 2011 of OPI (the OPI Acquisition) and Trumbull (the Trumbull Acquisition) and net volume increases from existing and new clients aggregating to \$35.7 million. These increases were offset partially by a net decrease in revenues of \$13.2 million, primarily due to the depreciation of the Indian rupee, the U.K. pound sterling and Czech koruna against the U.S. dollar during the year ended December 31, 2012 compared to the year ended December 31, 2011.

Table of Contents

Revenues from transformation services increased from \$66.2 million for the year ended December 31, 2011 to \$76.2 million for the year ended December 31, 2012. The increase was primarily due to a combination of increased revenues in recurring or annuity-based decision analytics services and an increase in project-based engagements both in our decision analytics and operations and process excellence services. Revenues from new clients for transformation services were \$9.4 million and \$0.9 million during the year ended December 31, 2012 and 2011, respectively.

We anticipate that our revenues will grow as we expand our service offerings and client base, both organically and through acquisitions. We provide our clients with a range of outsourcing services, principally in the insurance, healthcare, utilities, banking and financial services, travel, transportation and logistics sectors, as well as cross-industry outsourcing services, such as finance and accounting services. Our clients transfer the management and execution of their processes or business functions to us. As part of this transfer, we hire and train employees to work at our operations centers on the relevant outsourcing services, implement a process migration to these operations centers and then provide services either to the client or directly to the client's customers. Each client contract has different terms based on the scope, deliverables and complexity of the engagement. The outsourcing services we provide to any of our clients (particularly under our general framework agreements), and the revenues and income that we derive from those services, may decline or vary as the type and quantity of services we provide under those contracts change over time, including as a result of a shift in the mix of products and services we provide.

For outsourcing services, we enter into long-term agreements with our clients with typical initial terms ranging from three to eight years. These contracts also usually contain provisions permitting termination of the contract after a short notice period. Although these agreements provide us with a relatively predictable revenue base for a substantial portion of our business, the long selling cycle for our outsourcing services and the budget and approval processes of prospective clients make it difficult to predict the timing of new client acquisitions. Revenues under new client contracts also vary depending on when we complete the selling cycle and the implementation phase. For risks relating to termination of our client contracts, see Item 1A. Risk Factors Risks Related to Our Business Our client contracts contain certain termination and other provisions that could have an adverse effect on our business, results of operations and financial condition. For risks relating to our selling cycles, see

Item 1A. Risk Factors Risks Related to Our Business We have a long selling cycle for our outsourcing services that requires significant funds and management resources and a long implementation cycle that requires significant resource commitments.

Through the Landacorp Acquisition on October 12, 2012, we added a leading care management software platform for healthcare payers. As a result of our Trumbull Acquisition, on October 1, 2011, we acquired the capability to provide subrogation services as well as access to a software platform called SubroSource for providing subrogation services to property and casualty insurers. In connection with our acquisition of Professional Data Management Again (PDMA) in April 2010, we acquired an insurance policy administration platform called LifePRO to administer life insurance, health insurance annuities and credit life and disability insurance policies for insurance and healthcare clients. As we increase our service capabilities utilizing platform- and other software-based services, revenues from such services will continue to grow in proportion to our total revenues. Revenues from annual maintenance and support contracts for our software platforms provide us with a relatively predictable revenue base and are generally recognized ratably over the terms of the contracts. New license sales and implementation projects have a long selling cycle and it is difficult to predict the timing of signing of such new contracts which may lead to fluctuations in our short term revenues.

Our transformation services can be significantly affected by variations in business cycles. In addition, our transformation services consist primarily of specific projects with contract terms generally not exceeding one to three years and may not produce ongoing or recurring business for us once the project is completed. These contracts also usually contain provisions permitting termination of the contract after a short notice period. The short-term nature and specificity of these projects could lead to further material fluctuations and uncertainties in the revenues generated from these businesses. We have experienced a significant increase in demand for our annuity-based transformation services, which are engagements that are contracted for one- to three-year terms.

We serve clients mainly in the U.S. and the U.K., with these two regions generating approximately 72.3% and 20.2%, respectively, of our total revenues for the year ended December 31, 2012 and approximately 71.8% and 22.0%, respectively, of our total revenues for the year ended December 31, 2011.

Table of Contents

In the years ended December 31, 2012 and 2011, our total revenues from our top ten clients accounted for 59.1% and 61.9% of our total revenues, respectively. Only one client accounted for more than 10% of our total revenues in the year ended December 31, 2012 compared to two clients in the year ended December 31, 2011. Although we are increasing and diversifying our customer base, we expect in the near future that a significant portion of our revenues will continue to be contributed by a limited number of large clients.

Pursuant to a services agreement, we provide services to The Travelers Company (Travelers). These services to Travelers represented \$44.6 million, or 10.1%, of our total revenues for the year ended December 31, 2012, and \$41.9 million, or 11.6%, of our total revenues for the year ended December 31, 2011. Travelers may terminate the services agreement, or any work assignment or work order thereunder all of which expire in December 2013, without cause upon 60 days prior notice.

We derived revenues from 38 and 17 new clients for our services in the years ended December 31, 2012 and 2011, respectively. Another three new clients acquired during 2012 did not generate any revenues in 2012 but are expected to start generating revenues from 2013.

Revenues also include amounts representing reimbursable expenses that are billed to and reimbursed by our clients and typically include telecommunication and travel-related costs. The amount of reimbursable expenses that we incur, and any resulting revenues, can vary significantly depending on each client's situation and on the type of services provided. For the years ended December 31, 2012 and 2011, 4.3% and 4.5%, respectively, of our total revenues represent reimbursement of such expenses.

To the extent our client contracts do not contain provisions to the contrary, we bear the risk of inflation and fluctuations in currency exchange rates with respect to our contracts. We hedge a substantial portion of our Indian rupee/U.S. dollar, Philippine peso/U.S. dollar and U.K. pound sterling/U.S. dollar foreign currency exposure.

We have observed a shift in industry pricing models toward transaction-based pricing and other pricing models. We believe this trend will continue and we have begun to use transaction-based and other pricing models with some of our current clients and are seeking to move certain other clients from a billing rate model to a transaction-based or other pricing model. Such models place the focus on operating efficiency in order to maintain our operating margins. In addition, we have also observed that prospective larger clients are entering into multi-vendor relationships with regard to their outsourcing needs. We believe that the trend toward multi-vendor relationships will continue. A multi-vendor relationship allows a client to seek more favorable pricing and other contract terms from each vendor, which can result in significantly reduced operating margins from the provision of services to such client for each vendor. To the extent our large clients expand their use of multi-vendor relationships and are able to extract more favorable contract terms from other vendors, our operating margins and revenues may be reduced with regard to such clients if we are required to modify the terms of our relationship with such clients.

Expenses

Cost of Revenues

Our cost of revenues primarily consists of:

employee costs, which include salary, bonus and other compensation expenses; recruitment and training costs; employee insurance; transport and meals; rewards and recognition for certain employees; and non-cash stock compensation expense; and

costs relating to our facilities and communications network, which include telecommunication and IT costs; facilities and customer management support; operational expenses for our outsourcing centers; rent expenses; and travel and other billable costs to our clients.

The most significant components of our cost of revenues are employee compensation, recruitment, training, transport, meals, rewards and recognition and employee insurance. Salary levels, employee turnover rates and our ability to efficiently manage and utilize our employees significantly affect our cost of revenues. Salary increases for most of our operations personnel are

Table of Contents

generally awarded each year effective April 1. Accordingly, employee costs are generally lower in the first quarter of each year compared to the rest of the year. We make every effort to manage employee and capacity utilization and continuously monitor service levels and staffing requirements. Although we generally have been able to reallocate our employees as client demand has fluctuated, a contract termination or significant reduction in work assigned to us by a major client could cause us to experience a higher-than-expected number of unassigned employees, which would increase our cost of revenues as a percentage of revenues until we are able to reduce or reallocate our headcount. A significant increase in the turnover rate among our employees, particularly among the highly skilled workforce needed to execute certain services, would increase our recruiting and training costs and decrease our operating efficiency, productivity and profit margins. In addition, cost of revenues also includes a non-cash amortization of stock compensation expense relating to our issuance of equity awards to employees directly involved in providing services to our clients.

We expect our cost of revenues to continue to increase as we continue to add professionals in our operating centers globally to service additional business and as wages continue to increase globally. In particular, we expect training costs to continue to increase as we continue to add staff to service new clients and provide existing staff with additional skill sets. There is significant competition for professionals with skills necessary to perform the services we offer to our clients. As our existing competitors continue to grow, and as new competitors enter the market, we expect competition for skilled professionals in each of these areas to continue to increase, with corresponding increases in our cost of revenues to reflect increased compensation levels for such professionals. However, a significant portion of our client contracts include inflation-based adjustments to our billing rates year over year which partially offset such increase in cost of revenues. We also expect our cost of revenues to increase due to employee turnover resulting in higher recruitment and training costs. See Item 1A Risk Factors Employee wage increases may prevent us from sustaining our competitive advantage and may reduce our profit margin.

Cost of revenues is also affected by our long selling cycle and implementation period for our outsourcing services, which require significant commitments of capital, resources and time by both our clients and us. Before committing to use our services, potential clients require us to expend substantial time and resources educating them as to the value of our services and assessing the feasibility of integrating our systems and processes with theirs. In addition, once a client engages us in a new contract, our cost of revenues may represent a higher percentage of revenues until the implementation phase for that contract, generally three to four months, is completed.

Selling, General and Administrative Expenses

Our general and administrative expenses are comprised of expenses relating to salaries of senior management and other support personnel, legal and other professional fees, telecommunications, utilities, travel and other miscellaneous administrative costs. Selling and marketing expenses primarily consist of salaries and other compensation expenses of sales and marketing and client management personnel, sales commission, travel and brand building, client events and conferences. We expect that sales and marketing expenses will continue to increase as we invest in our sales and client management functions to better serve our clients and in our branding. We also expect our costs to increase as we continue to strengthen our support and enabling functions and invest in leadership development, performance management and training programs. However, our SG&A as a percentage of revenues has declined from 21.1% in 2011 to 19.9% in 2012 as a result of our acquisitions in 2011 and 2012 and operating leverage in 2012. SG&A expenses also include acquisition-related costs, professional fees, which represent the costs of third party legal, tax, accounting and other advisors, bad debt allowance and non-cash amortization of stock compensation expense related to our issuance of equity awards to senior management, members of our board of directors, other support personnel and consultants.

Depreciation and Amortization

Depreciation and amortization pertains to depreciation and amortization of our tangible assets, including network equipment, cabling, computers, office furniture and equipment, motor vehicles and leasehold improvements and intangible assets. As we add new facilities and expand our existing operations centers, we expect that depreciation expense will increase, reflecting additional investments in equipment such as desktop computers, servers and other infrastructure. Amortization of intangible assets acquired is included in depreciation and

Table of Contents

amortization. Amortization of intangible assets has increased substantially in 2012 due to the Landacorp Acquisition in 2012 and the OPI Acquisition and the Trumbull Acquisition in 2011. We expect amortization of intangible assets to increase further as we pursue strategic relationships and acquisitions. As a percentage of revenues, depreciation and amortization expenses decreased from 6.4% for the year ended December 31, 2011 to 5.8% for the year ended December 31, 2012

Foreign Exchange

Exchange Rates

We report our financial results in U.S. dollars. However, a significant portion of our total revenues is earned in U.K. pounds sterling (20.2% and 22.0%, respectively, of our total revenues for the year ended December 31, 2012 and 2011) while a significant portion of our expenses is incurred and paid in Indian rupees (55.2% and 57.6%, respectively, of our total costs for the years ended December 31, 2012 and 2011) and the Philippine peso (7.2% and 5.6%, respectively, of our total costs for the year ended December 31, 2012 and 2011). The exchange rates among the Indian rupee, the Philippine peso, the U.K. pound sterling, Czech koruna and the U.S. dollar have changed substantially in recent years and may fluctuate substantially in the future. The results of our operations could be substantially impacted as the Indian rupee and U.K. pound sterling appreciate or depreciate against the U.S. dollar. See Notes 2 and 7 to our consolidated financial statements and Item 7A Quantitative and Qualitative Disclosures about Market Risk Foreign Currency Risk.

Currency Regulation

According to the prevailing foreign exchange regulations in India, an exporter of outsourcing and transformation services that is registered with a software technology park in India, such as our Indian subsidiaries in India, is required to realize its export proceeds within a period of 12 months from the date of exports. Similarly, in the event that such exporter has received any advance against exports in foreign exchange from its overseas customers, it will have to render the requisite services so that the advances so received are earned within a period of 12 months. If those subsidiaries in India did not meet these conditions, they would be required to obtain permission from the Reserve Bank of India.

Income Taxes

The fiscal year under the Indian Income Tax Act ends on March 31. Certain of our operations centers in India qualified for an exemption from corporate tax under the Indian Income Tax Act which expired on April 1, 2011. Therefore, profits generated from the services provided from such operations centers have become fully taxable and consequently, our tax expense increased significantly from 2011 and may continue to be higher going forward.

The Special Economic Zones Act, 2005 and rules framed thereunder (the SEZ Regulations), introduced a 15-year tax holiday scheme for operations established in designated SEZs. Under the SEZ Regulations, qualifying operations are eligible for a profit-based deduction from taxable income equal to (i) 100% of the export profits derived for the first five years from the commencement of operations; (ii) 50% of the export profits for the next five years; and (iii) subject to satisfying certain investment requirements, 50% of the export profits for a further five years.

Our operations centers in Jaipur and Noida, India, which were established in SEZs in 2010, are eligible for tax incentives until 2020, ten years from the year of their establishment. As part of the OPI Acquisition, we acquired operations centers in Bengaluru and Kochi, India that are also located in SEZs. Our operations center in Bengaluru completed its first five years of operations on March 31, 2012 and benefitted from a 100% exemption on export profits in prior years. Under the tax regulations, the Bengaluru operations center is now entitled to a 50% tax exemption on export profits for five years beginning on April 1, 2012. After April 1, 2017, the applicable tax exemption will be further reduced. We also established a new operations center in Pune, India in June 2012, which is located in an SEZ. We anticipate establishing additional operations centers in SEZs in the future.

The Direct Taxes Code proposed by the Government of India and currently pending before the Indian Parliament proposes grandfathering the existing profit-based tax benefits for operations centers in SEZs already receiving such tax benefits. The Direct Taxes Code also proposes discontinuing profit-based incentives for

Table of Contents

operations centers in SEZs set up after March 31, 2014 and replaces them with investment-based incentives for operations centers in SEZs established after that date.

Accordingly, we expect to continue receiving the benefit of tax deductions for our existing operations centers in SEZs pursuant to the current regulations until the currently proposed March 31, 2014 sunset date. If this grandfathering does not happen under the Direct Taxes Code and if the sunset date is brought forward, our new operations centers in SEZs will not receive profit-based tax benefits. Without such benefits, we expect that our tax rate in India and our overall tax rate will increase over the next few years and that such increase may be material.

One of our operations centers in the Philippines benefited from a four-year income tax holiday that expired in May 2012. In February 2013, PEZA, which can approve two successive one-year extensions, granted us a one year extension retroactively from May 2012. Our new operations center in the Philippines, which began operations in January 2012, benefits from a separate four-year income tax holiday that can be extended at PEZA's discretion. While we are reasonably certain that PEZA will extend these tax holidays, it is possible that such extension requests may be denied, or that these tax holidays may be conditioned or removed entirely due to changes in applicable legislation by the government of the Philippines. Should any of these events occur, our tax liability in the Philippines would likely increase.

We recognize deferred tax assets and liabilities for temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carry forwards. We determine if a valuation allowance is required or not on the basis of an assessment of whether it is more likely than not that a deferred tax asset will be realized.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon the financial statements included in this Annual Report on Form 10-K, which have been prepared in accordance with generally accepted accounting principles in the U.S. The notes to our consolidated financial statements contain a summary of our significant accounting policies. We consider the policies discussed below to be critical to an understanding of our consolidated financial statements, as their application places the most significant demands on management's judgment regarding matters that are inherently uncertain. These policies include revenue recognition, estimating tax liabilities, stock-based compensation, goodwill, intangibles and long-lived assets, derivative instruments and assets and obligations related to employee benefit plans. These accounting policies and the associated risks are set out below. Future events may not develop exactly as forecast and estimates routinely require adjustment.

Revenue Recognition

The Company derives its revenues from outsourcing and transformation services. Revenues from outsourcing services are recognized primarily on a time-and-material, cost-plus or unit-priced basis; revenues from transformation services are recognized primarily on a time-and-material, fixed price or contingent fee basis. The services provided within our contracts generally contain one unit of accounting. Revenues are recognized under our contracts generally when persuasive evidence of an arrangement exists, the sales price is fixed or determinable, services have been performed and collection of amounts billed is reasonably assured.

Revenues under time-and-material contracts are recognized as the services are performed. Revenues are recognized on cost-plus contracts on the basis of contractually agreed direct and indirect costs incurred on a client contract plus an agreed-upon profit markup. Revenues are recognized on unit-price based contracts based on the number of specified units of work (such as the number of email responses) delivered to a client. Such revenues are recognized as the related services are provided in accordance with the client contract. When the terms of the client contract specify service level parameters that must be met (such as turnaround time or accuracy), we monitor such service level parameters to determine if any service credits or penalties have been incurred. Revenues are recognized net of any service credits that are due to a client. We have experienced minimal service credits and penalties to date.

Table of Contents

Revenues are recognized on fixed-price contracts using the proportional performance method when the pattern of performance under the contracts can be reasonably determined. We estimate the proportional performance of a contract by comparing the actual number of hours or days worked to the estimated total number of hours or days required to complete each engagement. The use of the proportional performance method requires significant judgment relative to estimating the number of hours or days required to complete the contracted scope of work, including assumptions and estimates relative to the length of time to complete the project and the nature and complexity of the work to be performed. We regularly monitor our estimates for completion of a project and record changes in the period in which a change in an estimate is determined. If a change in an estimate results in a projected loss on a project, such loss is recognized in the period in which it is first identified.

Revenues from software licensing arrangements are recognized at the later of time of delivery or expiration of significant termination rights if the license fee is fixed or determinable, collection is probable, and there is sufficient vendor specific evidence of the fair value of each undelivered element. When there are significant production modifications or customization, installation, systems integration or related services, the professional services and license revenues are combined and recorded based upon proportional performance, measured in the manner described above. Revenues from fixed-term maintenance and support contracts are recognized ratably on a monthly basis over the period of the contract.

We make accruals for revenues and receivables for services rendered between the last billing date and the balance sheet date. Accordingly, our accounts receivable include amounts for services that we have performed and for which an invoice has not yet been issued to the client. These are included in accounts receivable on our consolidated balance sheet and the amounts are disclosed in the notes to our consolidated financial statements.

Goodwill, Intangible Assets and Long-lived Assets

Accounting Standards Codification (ASC) topic 805, *Business Combinations* (ASC No. 805), requires that the purchase method of accounting be used for all business combinations. The guidance specifies criteria as to intangible assets acquired in a business combination that must be recognized and reported separately from goodwill. In accordance with ASC topic 350, *Intangibles Goodwill and Other* (ASC No. 350), all assets and liabilities of the acquired businesses including goodwill are assigned to reporting units. We evaluate goodwill for impairment at least annually, or as circumstances warrant. When determining the fair value of our reporting units, we utilize various assumptions, including projections of future cash flows. Any adverse changes in key assumptions about our businesses and their prospects or an adverse change in market conditions may cause a change in the estimation of fair value and could result in an impairment charge.

We review long-lived assets and certain identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In general, we will recognize an impairment loss when the sum of undiscounted expected future cash flows is less than the carrying amount of such asset. The estimate of undiscounted cash flows and the fair value of assets require several assumptions and estimates like the weighted average cost of capital, discount rates, risk-free rates, market rate of return and risk premiums and can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts. Although we believe the historical assumptions and estimates we have made are reasonable and appropriate, different assumptions and estimates could materially impact our reported financial results.

Stock-based Compensation

Under the fair value recognition provisions of ASC topic 718, *Compensation Stock Compensation* (ASC No. 718), cost is measured at the grant date, based on the fair value of the award and is amortized on a straight-line basis over the requisite service periods of the awards, which is generally the vesting periods. Determining the fair value of stock-based awards at the grant date requires significant judgment, including estimating the expected term over which the stock awards will be outstanding before they are exercised, the expected volatility of our stock and the number of stock-based awards that are expected to be forfeited. In order to determine the estimated period of time that we expect employees to hold their share-based options, we have used data on the historical exercise pattern of employees. We use the historical volatility of our common stock and the volatility of stocks of our comparative companies in order to estimate future share price trends. We use historical data to estimate pre-vesting option

Table of Contents

forfeitures and record stock-based compensation expense only for those awards that are expected to vest. The risk-free interest rate that we use in the option valuation model is based on U.S. treasury zero-coupon bonds with a remaining term similar to the expected term of the options. We do not anticipate paying any cash dividends in the foreseeable future and therefore use an expected dividend yield of zero in the option valuation model. If the actual forfeiture rate differs significantly from our estimates, our stock-based compensation expense and our results of operations could be materially impacted.

Derivative Instruments and Hedging Activities

In the normal course of business, we actively look to mitigate the exposure of foreign currency market risk by entering into various hedging arrangements, authorized under our policies, with counterparties that are highly rated financial institutions. Our primary exchange rate exposure is with the U.K. pound sterling and the Indian rupee. We also have exposure in Philippine pesos, Czech koruna and other local currencies where we operate. We use derivative instruments for the purpose of mitigating the underlying exposure from foreign currency fluctuation risks associated with forecasted transactions denominated in certain foreign currencies and to minimize earnings and cash flow volatility associated with the changes in foreign currency exchange rates and not for speculative trading purposes.

We hedge anticipated transactions that are subject to foreign exchange exposure with foreign currency exchange contracts that are designated effective and that qualify as cash flow hedges under ASC topic 815, *Derivatives and Hedging* (ASC No. 815). Changes in the fair value of these cash flow hedges which are deemed effective, are deferred and recorded as a component of accumulated other comprehensive income/(loss), net of tax until the hedged transactions occur and are then recognized in the consolidated statements of income. Changes in the fair value of cash flow hedges deemed ineffective are recognized in the consolidated statement of income and are included in foreign exchange gain/(loss).

We also use derivatives consisting of foreign currency exchange contracts not designated as hedging instruments under ASC No. 815 to hedge intercompany balances and other monetary assets or liabilities denominated in currencies other than the functional currency. Changes in the fair value of these derivatives are recognized in the consolidated statements of income and are included in foreign exchange gain/(loss).

We value our derivatives based on market observable inputs including both forward and spot prices for currencies. Derivative assets and liabilities included in Level 2 primarily represent foreign currency forward contracts. The quotes are taken primarily from independent sources, including highly rated financial institutions.

We evaluate hedge effectiveness at the time a contract is entered into as well as on an ongoing basis. If during this time, a contract is deemed ineffective, the change in the fair value is recorded in the consolidated statements of income and is included in foreign exchange gain/(loss). For hedge relationships that are discontinued because the forecasted transaction is not expected to occur by the end of the originally specified period, any related derivative amounts recorded in equity are reclassified to earnings.

Income Taxes

We utilize the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized in respect of future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their tax bases and operating losses carried forward, if any. Deferred tax assets and liabilities are measured using the anticipated tax rates for the years in which such temporary differences are expected to be recovered or settled. We recognize the effect of a change in tax rates on deferred tax assets and liabilities during the period in which the new tax rate was enacted or the change in tax status was filed or approved. Deferred tax assets are recognized in full, subject to a valuation allowance that reduces the amount recognized to that which is more likely than not to be realized. In assessing the likelihood of realization, we consider estimates of future taxable income. With respect to any entity that benefits from a corporate tax holiday, deferred tax assets or liabilities for existing temporary differences are recorded only to the extent such temporary differences are expected to reverse following the expiration of the tax holiday.

Table of Contents

We also evaluate potential exposures related to tax contingencies or claims made by the tax authorities in various jurisdictions in order to determine whether a reserve may be required. A reserve is recorded if we believe that a loss is more likely than not to occur and if the amount of such loss can be reasonably estimated. Such reserves are based on estimates and, consequently, are subject to changing facts and circumstances, including the progress of ongoing audits, changes in case law and the passage of new legislation. We believe that we have established adequate reserves to cover any potential additional tax assessments.

We generally anticipate that we will indefinitely reinvest the undistributed earnings of our foreign subsidiaries. Accordingly, we do not accrue any material income, distribution or withholding taxes that would otherwise arise if such earnings were repatriated in a taxable manner.

We employ a two-step process for recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining, based on the technical merits, that the position will, more likely than not, be sustained upon examination. The second step is to measure the tax benefit as the largest amount of the tax benefit that has a greater than 50% likelihood of being realized upon settlement. Our provision for income tax expense also takes into account any interest or penalties related to unrecognized tax benefits.

Retirement Benefits

We provide our employees in India and the Philippines with benefits under a defined benefit plan, which we refer to as the Gratuity Plan. The Gratuity Plan provides a lump sum payment to vested employees on retirement or on termination of employment in an amount based on the respective employee's salary and years of employment with us. We determine our liability under the Gratuity Plan by actuarial valuation using the projected unit credit method. Under this method, we determine our liability based upon the discounted value of salary increases until the date of separation arising from retirement, death, resignation or other termination of services. Critical assumptions used in measuring the plan expense and projected liability under the projected unit credit method include the discount rate, expected return on assets and the expected increase in the compensation rates. We evaluate these critical assumptions at least annually. If actual results differ significantly from our estimates, our gratuity expense and our results of operations could be materially impacted.

Table of Contents**Results of Operations**

The following table summarizes our results of operations:

	Year ended December 31,		
	2012	2011	2010
	(in million)		
Revenues ⁽¹⁾	\$ 442.9	\$ 360.5	\$ 252.8
Cost of revenues (exclusive of depreciation and amortization) ⁽²⁾	271.9	220.0	151.3
Gross profit	171.0	140.5	101.5
Operating expenses:			
General and administrative expenses ⁽³⁾	57.2	50.6	40.3
Selling and marketing expenses ⁽³⁾	31.0	25.6	18.8
Depreciation and amortization expenses ⁽⁴⁾	25.6	23.0	15.9
Total operating expenses	113.8	99.2	75.0
Income from operations	57.2	41.3	26.5
Other income/(expense):			
Foreign exchange (loss)/gain	(2.5)	3.4	4.2
Interest and other income	2.0	2.0	1.4
Income before income taxes	56.7	46.7	32.1
Income tax provision	14.9	11.9	5.5
Net income	\$ 41.8	\$ 34.8	\$ 26.6

- (1) Revenues include reimbursable expenses of \$18.9 million, \$16.1 million and \$11.8 million for the years ended December 31, 2012, 2011 and 2010, respectively. Revenues also include a one-time fee of \$2.3 million in 2011.
- (2) Cost of revenues includes \$1.9 million, \$1.6 million and \$1.6 million for the years ended December 31, 2012, 2011 and 2010, respectively, of non-cash stock compensation expense relating to the issuance of equity awards to employees directly involved in providing services to our clients as described in Note 13 to our consolidated financial statements.
- (3) General and administrative expenses and selling and marketing expenses include \$7.5 million, \$7.8 million and \$6.9 million for the years ended December 31, 2012, 2011 and 2010, respectively, as non-cash amortization of stock compensation expense relating to the issuance of equity awards to our non-operations staff as described in Note 13 to our consolidated financial statements.
- (4) Depreciation and amortization includes \$5.6 million, \$4.3 million and \$2.0 million for the years ended December 31, 2012, 2011 and 2010, respectively, of amortization of intangibles as described in Note 5 to our consolidated financial statements.

Table of Contents**Year Ended December 31, 2012 Compared to Year Ended December 31, 2011**

Revenues. Revenues increased 22.9% from \$360.5 million for the year ended December 31, 2011 to \$442.9 million for the year ended December 31, 2012. Revenues from outsourcing services increased from \$294.4 million for the year ended December 31, 2011 to \$366.8 million for the year ended December 31, 2012. The increase in revenues from outsourcing services of \$72.4 million was primarily driven by revenues of \$49.9 million from the Landacorp Acquisition in 2012 and the OPI Acquisition and the Trumbull Acquisition in 2011 and net volume increases from existing and new clients aggregating to \$35.7 million. These increases were partially offset by a net decrease in revenues of \$13.2 million, primarily due to the depreciation of the Indian rupee, the U.K. pound sterling and Czech koruna against the U.S. dollar during the year ended December 31, 2012 compared to the year ended December 31, 2011.

Revenues from transformation services increased from \$66.2 million for the year ended December, 2011 to \$76.2 million for the year ended December 31, 2012. The increase was primarily due to a combination of increased revenues in recurring or annuity-based decision analytics services and an increase in project-based engagements both in our decision analytics and operations and process excellence services. Revenues from new clients for transformation services were \$9.4 million and \$0.9 million during the year ended December 31, 2012 and 2011, respectively.

Cost of Revenues. Cost of revenues increased 23.6% from \$220.0 million for the year ended December 31, 2011 to \$271.9 million for the year ended December 31, 2012. The increase in cost of revenues was primarily due to an increase in employee-related costs of \$55.4 million as a result of an increase in the number of our personnel directly involved in providing services to our clients, including \$25.8 million of employee-related costs related to our acquisitions. We also experienced an increase in reimbursable expenses of \$2.8 million and an increase in facilities, technology and other operating expenses of \$14.4 million (primarily due to our acquisitions and new operating centers to support business growth). These increases were partially offset by a decrease of \$20.8 million due to the net effect of depreciation of the Indian rupee and the Czech koruna and appreciation of the Philippines peso against the U.S. dollar during the year ended December 31, 2012 compared to the year ended December 31, 2011. Cost of revenues as a percentage of revenues increased from 61.0% for the year ended December 31, 2011 to 61.4% for the year ended December 31, 2012.

Gross Profit. Gross profit increased 21.7% from \$140.6 million for the year ended December 31, 2011 to \$171.1 million for the year ended December 31, 2012. The increase in gross profit was primarily due to an increase in revenues of \$82.4 million, offset by the increase in cost of revenues of \$51.9 million. Gross profit as a percentage of revenues decreased marginally from 39.0% for the year ended December 31, 2011 to 38.6% for the year ended December 31, 2012, primarily due to the OPI Acquisition and the Trumbull Acquisition in 2011, partially offset by the depreciation of the Indian rupee against the U.S. dollar during the year ended December 31, 2012 compared to the year ended December 31, 2011.

SG&A Expenses. SG&A expenses increased 15.7% from \$76.2 million for the year ended December 31, 2011 to \$88.2 million for the year ended December 31, 2012. The increase in SG&A expenses is primarily due to an increase in employee-related costs of \$10.2 million, including \$5.8 million of employee-related costs related to our acquisitions and our continued investment in sales and client management personnel. We also experienced an increase in other SG&A expenses of \$5.7 million, primarily due to increased professional fees, facilities and technology costs incurred at our new operating centers, costs associated with our acquisitions as well as increases in other marketing expenses. These increases were partially offset by a decrease of \$3.8 million due to the

Table of Contents

net effect of depreciation of the Indian rupee and the Czech koruna and appreciation of the Philippines peso against the U.S. dollar during the year ended December 31, 2012 compared to the year ended December 31, 2011. As a percentage of revenues, SG&A expenses decreased from 21.1% for the year ended December 31, 2011 to 19.9% for the year ended December 31, 2012 as a result of our acquisitions and operating leverage.

Depreciation and Amortization. Depreciation and amortization increased 11.4% from \$23.0 million for the year ended December 31, 2011 to \$25.6 million for the year ended December 31, 2012. The increase is primarily due to the increase in amortization of acquisition-related intangibles of \$1.3 million and depreciation related to our new operations centers including our acquisitions of \$3.4 million offset by a decrease of \$2.0 million due to the net effect of depreciation of the Indian rupee and the Czech koruna and appreciation of the Philippines peso against the U.S. dollar during the year ended December 31, 2012 compared to the year ended December 31, 2011. As a percentage of revenues, depreciation and amortization expenses decreased from 6.4% for the year ended December 31, 2011 to 5.8% for the year ended December 31, 2012. As we add more operations centers, we expect that depreciation expense will increase to reflect the additional investment in equipment and operations centers necessary to meet our service requirements.

Income from Operations. Income from operations increased 38.5% from \$41.3 million for the year ended December 31, 2011 to \$57.2 million for the year ended December 31, 2012. As a percentage of revenues, income from operations increased from 11.5% for the year ended December 31, 2011 to 12.9% for the year ended December 31, 2012. The increase in income from operations as a percentage of revenues was primarily due to our operating leverage, resulting in lower SG&A and depreciation and amortization expenses as a percentage of revenue in 2012.

Other Income/(Expense). Other income/(expense) is comprised of foreign exchange gains and losses, interest income, interest expense and other items. Other income/(expense) decreased from \$5.3 million for the year ended December 31, 2011 to (\$0.5 million) for the year ended December 31, 2012, due to net foreign exchange loss of \$2.5 million during the year ended December 31, 2012 compared to net foreign exchange gain of \$3.4 million during the year ended December 31, 2011 attributable to movement of the U.S. dollar against the Indian rupee. The average exchange rate of the Indian rupee against the U.S. dollar increased from 46.92 during the year ended December 31, 2011 to 53.40 during the year ended December 31, 2012.

Provision for Income Taxes. Provision for income taxes increased from \$11.9 million for the year ended December 31, 2011 to \$14.9 million for the year ended December 31, 2012. The effective tax rate increased from 25.4% for the year ended December 31, 2011 to 26.2% for the year ended December 31, 2012. The increase is primarily due to the partial expiry of the tax holiday benefit for our operations center in Bengaluru, India and provision for taxes for one of our operating centers in Manila, Philippines. Please see Note 12 to our consolidated financial statements for further details.

Net Income. Net income increased from \$34.8 million for the year ended December 31, 2011 to \$41.8 million for the year ended December 31, 2012, primarily due to an increase in operating income of \$15.9 million, offset by a decrease in other income of \$5.9 million and an increase in provision for income taxes of \$3.0 million. As a percentage of revenues, net income decreased marginally from 9.6% for the year ended December 31, 2011 to 9.4% for the year ended December 31, 2012.

Table of Contents***Year Ended December 31, 2011 Compared to Year Ended December 31, 2010***

Revenues. Revenues increased 42.6% from \$252.8 million for the year ended December 31, 2010 to \$360.5 million for the year ended December 31, 2011. Revenues from outsourcing services increased from \$192.1 million for the year ended December 31, 2010 to \$294.4 million for the year ended December 31, 2011. The increase in revenues from outsourcing services of \$102.3 million was primarily driven by revenues of \$63.6 million from the OPI Acquisition and the Trumbull Acquisition in 2011 and our acquisitions of American Express Global Travel Service Center (GTSC) and Professional Data Management Again (PDMA) in 2010, revenues from a one-time payment of \$2.3 million from a client with no associated costs and net volume increases from existing and new clients aggregating to \$38.3 million. These increases were partially offset by a net decrease in revenues of \$1.9 million, primarily due to the depreciation of the Indian rupee and appreciation of the U.K. pound sterling and Czech koruna against the U.S. dollar during the year ended December 31, 2011 compared to the year ended December 31, 2010.

Revenues from transformation services increased from \$60.7 million for the year ended December, 2010 to \$66.2 million for the year ended December 31, 2011. The increase was primarily due to a combination of increased revenues in recurring or annuity-based decision analytics services and an increase in project-based engagements both in our decision analytics and operations and process excellence services. Revenues from new clients for transformation services were \$0.9 million and \$4.1 million during the year ended December 31, 2011 and 2010, respectively.

Cost of Revenues. Cost of revenues increased 45.4% from \$151.3 million for the year ended December 31, 2010 to \$220.0 million for the year ended December 31, 2011. The increase in cost of revenues was primarily due to an increase in employee-related costs of \$57.5 million as a result of an increase in the number of our personnel directly involved in providing services to our clients, including \$33.9 million of employee-related costs related to the OPI Acquisition and our other acquisitions. We also experienced an increase in reimbursable expenses of \$4.3 million (resulting in an increase in revenues) and an increase in facilities, technology and other operating expenses of \$9.2 million (primarily due to our acquisitions and new operating centers to support business growth). These increases were partially offset by a decrease of \$2.3 million due to the net effect of depreciation of the Indian rupee and appreciation of the Philippines peso and Czech koruna against the U.S. dollar during the year ended December 31, 2011 compared to the year ended December 31, 2010. Cost of revenues as a percentage of revenues increased from 59.9% for the year ended December 31, 2010 to 61.0% for the year ended December 31, 2011.

Gross Profit. Gross profit increased 38.5% from \$101.5 million for the year ended December 31, 2010 to \$140.6 million for the year ended December 31, 2011. The increase in gross profit was primarily due to an increase in revenues of \$107.8 million, offset by the increase in cost of revenues of \$68.7 million. Gross profit as a percentage of revenues decreased from 40.1% for the year ended December 31, 2010 to 39.0% for the year ended December 31, 2011, primarily due to the impact of our acquisitions, partially offset by the depreciation of the Indian rupee against the U.S. dollar during the year ended December 31, 2011 compared to the year ended December 31, 2010.

SG&A Expenses. SG&A expenses increased 29.0% from \$59.1 million for the year ended December 31, 2010 to \$76.2 million for the year ended December 31, 2011. The increase in SG&A expenses is primarily due to an increase in employee-related costs of \$12.0 million, including \$4.7 million of employee-related costs related to the OPI acquisition and our continued investment in sales and client management personnel. We also experienced an increase in other SG&A expenses of \$3.6 million, primarily due to professional fees associated with our acquisitions

Table of Contents

and travel-related expenses. These increases were partially offset by a decrease of \$0.5 million due to the depreciation of the Indian rupee against the U.S. dollar during the year ended December 31, 2011 compared to the year ended December 31, 2010. As a percentage of revenues, SG&A expenses decreased from 23.4% for the year ended December 31, 2010 to 21.1% for the year ended December 31, 2011.

Depreciation and Amortization. Depreciation and amortization increased 45.2% from \$15.9 million for the year ended December 31, 2010 to \$23.0 million for the year ended December 31, 2011. The increase is primarily due to the increase in amortization of acquisition-related intangibles of \$2.3 million and depreciation related to our new operations centers (including those acquired from our acquisitions) of \$5.3 million offset by a decrease of \$0.5 million due to the depreciation of the Indian rupee and appreciation of the Philippine peso and the Czech koruna against the U.S. dollar during the year ended December 31, 2011 compared to the year ended December 31, 2010. As we add more operations centers, we expect that depreciation expense will increase to reflect the additional investment in equipment and operations centers necessary to meet our service requirements.

Income from Operations. Income from operations increased 55.8% from \$26.5 million for the year ended December 31, 2010 to \$41.3 million for the year ended December 31, 2011. As a percentage of revenues, income from operations increased from 10.5% for the year ended December 31, 2010 to 11.5% for the year ended December 31, 2011. The increase in income from operations as a percentage of revenues was primarily due to operating leverage and the OPI Acquisition, resulting in lower SG&A expenses as a percentage of revenue in 2011.

Other Income/(Expense). Other income/(expense) is comprised of foreign exchange gains and losses, interest income, interest expense and other items. Other income/(expense) decreased from \$5.6 million for the year ended December 31, 2010 to \$5.3 million for the year ended December 31, 2011, primarily as a result of decrease in net foreign exchange gain of \$3.4 million during the year ended December 31, 2011 compared to net foreign exchange gain of \$4.2 million during the year ended December 31, 2010 attributable to movement of the U.S. dollar against the Indian rupee, offset by an increase of \$0.6 million in net interest income and other income. The average exchange rate of the Indian rupee against the U.S. dollar increased from 45.65 during the year ended December 31, 2010 to 46.92 during the year ended December 31, 2011.

Provision for Income Taxes. Provision for income taxes increased from \$5.5 million for the year ended December 31, 2010 to \$11.9 million for the year ended December 31, 2011. The effective tax rate increased from 17.1% for the year ended December 31, 2010 to 25.4% for the year ended December 31, 2011. The increase in effective tax rate in 2011 was primarily due to a reversal in 2010 related to a tax position taken by one of our foreign subsidiaries in India. During 2010, the Indian tax authorities issued a clarification with respect to the taxability of certain components of taxable income which reduced our foreign subsidiary's taxable income and its corresponding tax liability. This clarification decreased the level of uncertainty in our tax position and was the basis on which we reduced the amount of our income tax reserve by \$2.8 million for 2010. The reversal of the tax reserve positively impacted our effective income tax rate by 8.9% for 2010.

Net Income. Net income increased from \$26.6 million for the year ended December 31, 2010 to \$34.8 million for the year ended December 31, 2011, primarily due to an increase in operating income of \$14.8 million, offset by a decrease in other income of \$0.2 million and an increase in provision for income taxes of \$6.4 million. As a percentage of revenues, net income decreased from 10.5% for the year ended December 31, 2010 to 9.6% for the year ended December 31, 2011.

Table of Contents

Liquidity and Capital Resources

At December 31, 2012, we had \$109.2 million in cash and cash equivalents and short-term investments which include \$61.5 million held by our foreign subsidiaries. We do not intend to repatriate such funds since our future growth depends upon continued infrastructure and technology investments, geographical expansions and acquisitions outside of the U.S. Therefore, we need to continuously and permanently reinvest the earnings generated outside of the U.S. If we were to repatriate the funds, we would need to accrue and pay applicable taxes.

Cash flows provided by operating activities increased from \$56.2 million in the year ended December 31, 2011 to \$65.8 million in the year ended December 31, 2012. Generally, factors that affect our earnings including pricing, volume of services, costs and productivity affect our cash flows provided by operations in a similar manner. However, while management of working capital, including timing of collections and payments affects operating results only indirectly, the impact on the working capital and cash flows provided by operating activities can be significant. The increase in cash flows provided by operations for the year ended December 31, 2012 was predominantly due to an increase in net income adjusted for non-cash items by \$21.1 million offset by decrease in working capital of \$11.6 million. The increase in net income adjusted for non-cash items is primarily due to an increase in net income of \$7.0 million, depreciation and amortization expense of \$2.6 million, deferred income taxes of \$6.4 million and decrease in unrealized foreign exchange gain of \$5.7 million.

Changes in working capital are primarily due to a decrease in trade accounts receivable of \$3.0 million and accrued expenses and other liabilities of \$9.2 million during the year ended December 31, 2012 compared to the year ended December 31, 2011. Our days sales outstanding increased from 49 days as of December 31, 2011 to 56 days as of December 31, 2012, primarily due to our milestones-based billing pertaining to our software licensing and implementation contracts associated with the Landacorp Acquisition.

Cash flows used for investing activities decreased from \$105.8 million in the year ended December 31, 2011 to \$54.8 million in the year ended December 31, 2012. The decrease is primarily due to the payment of the purchase consideration of approximately \$37.5 million for the Landacorp Acquisition in 2012 compared to \$81.0 million (net of cash acquired of \$20.1 million) paid for the OPI Acquisition and the Trumbull Acquisition during the year ended December 31, 2011. Further, net proceeds from short-term investments increased by \$6.8 million during the year ended December 31, 2012 compared to the year ended December 31, 2011.

Cash flows provided by financing activities decreased from \$24.9 million in the year ended December 31, 2011 to \$9.9 million during the year ended December 31, 2012. The decrease was primarily due to net proceeds from the issuance of common stock in a public offering of \$21.5 million during the year ended December 31, 2011. This decrease was partially offset by higher proceeds from the exercise of stock options of \$9.6 million during the year ended December 31, 2012 compared to \$5.5 million during the year ended December 31, 2011.

We expect to use cash from operating activities to maintain and expand our business. As we have focused on expanding our cash flow from operating activities, we continue to make capital investments, primarily related to new facilities and capital expenditures associated with leasehold improvements to build our facilities and purchase telecommunications equipment and computer hardware and software in connection with managing client operations. We incurred approximately \$18.8 million and \$19.5 million of capital expenditures in the year ended December 31, 2012 and 2011, respectively. We expect to incur capital expenditures of between \$25.0 million to \$30.0 million in the calendar year 2013, primarily to meet the growth requirements of our clients, including

Table of Contents

additions to our facilities as well as investments in technology applications and infrastructure. The timing and volume of such capital expenditures in the future will be affected by new client contracts we may enter into or the expansion of business under our existing client contracts.

In connection with any tax assessment orders that have been issued or may be issued against us or our subsidiaries, including against exl Service.com (India) Private Limited (Exl India) and Exl Service.com, Inc. (Exl Inc.), we may be required to deposit additional amounts with respect to such assessment orders. Refer to Note 15 to our consolidated financial statements for further details.

On May 26, 2011, we entered into a three-year credit agreement (the Credit Facility) with certain lenders and JPMorgan Chase Bank, N.A., as Administrative Agent. Borrowings under the Credit Facility may be used for working capital and general corporate purposes. Originally a \$50.0 million revolving facility, including a letter of credit sub-facility, the availability under the Credit Facility was reduced to \$15.0 million in June 2012. Upon our request, and the fulfillment of certain conditions, the Credit Facility can be increased to \$50.0 million. As of December 31, 2012, we did not have any borrowings under the Credit Facility.

We anticipate that we will continue to rely upon cash from operating activities to finance our smaller acquisitions, capital expenditures and working capital needs. If we have significant growth through acquisitions, we may need to obtain additional financing.

Off-Balance Sheet Arrangements

As of December 31, 2012, we had no off-balance sheet arrangements or obligations.

Table of Contents**Contractual Obligations**

The following table sets forth our contractual obligations as of December 31, 2012:

	Payment Due by Period				Total
	Less than 1 year	1-3 years	4-5 years (in millions)	After 5 years	
Capital leases	\$ 2.0	\$ 2.6	\$ 0.4	\$	\$ 5.0
Operating leases	8.1	13.4	3.5	1.1	26.1
Purchase obligations	3.4				3.4
Other obligations ^(a)	1.7	2.9	2.4	2.9	9.9
Total contractual cash obligations^(b)	\$ 15.2	\$ 18.9	\$ 6.3	\$ 4.0	\$ 44.4

(a) Represents estimated payments under the Gratuity Plan.

(b) Excludes \$3.0 million related to uncertain tax positions, since the extent of the amount and timing of payment is currently not reliably estimable or determinable.

Certain units of our Indian subsidiaries were established as 100% Export-Oriented units under the Software Technology Parks of India (STPI) scheme promulgated by the Government of India which provides certain incentives on imported and indigenous capital goods upon the fulfillment of certain conditions. Although the corporate tax incentives under the STPI scheme are no longer available to us, the units are required to fulfill such conditions for a limited time. In the event that these units are unable to meet those conditions over the specified period, we may be required to refund those incentives along with penalties and fines. We believe, however, that these units have in the past satisfied and will continue to satisfy the required conditions.

Our operations centers in Manila, the Philippines are registered with PEZA. The registration provides us with certain fiscal incentives on the import of capital goods and requires that Exl Philippines meet certain performance and investment criteria. One of our operations centers in the Philippines benefited from a four-year income tax holiday that expired in May 2012. In February 2013, we received a one-year extension retroactively from May 2012 and expect to file another extension request after which no further extensions are presently permitted. Our new operations center in the Philippines, which began operations in January 2012, benefits from a separate four-year income tax holiday that can be extended at PEZA's discretion.

Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board (FASB) issued update No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS* (ASU No. 2011-04). ASU No. 2011-04 is intended to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS). ASU No. 2011-04 explains how to measure fair value and does not require additional measurements. Accordingly, our adoption of this accounting pronouncement from January 1, 2012 did not have an impact on our consolidated financial statements.

In June 2011, the FASB issued update No. 2011-05, *Presentation of Comprehensive Income* (ASU No. 2011-05). ASU No. 2011-05, effective retrospectively for the interim and annual periods beginning on or after

Table of Contents

December 15, 2011 (early adoption is permitted), requires presentation of total comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. We adopted the option of presentation in two separate but consecutive statements. Refer to our consolidated statements of comprehensive income/(loss) for further details.

In December 2011, the FASB issued update No. 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards* (ASU No. 2011-12), which deferred the requirement to present on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income on the components of net income and other comprehensive income for annual and interim financial statements. The adoption of this accounting pronouncement from January 1, 2012 did not have any impact on our consolidated financial statements.

In September 2011, the FASB issued update No. 2011-08, *Testing Goodwill for Impairment* (ASU No. 2011-08), which permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If an entity concludes that the fair value of a reporting unit is less than its carrying value, it is necessary to perform a two-step goodwill impairment test. ASU No. 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this accounting pronouncement did not have a material impact on our consolidated financial statements and our annual goodwill impairment assessment for the fiscal year 2012.

In July 2012, the FASB issued update No. 2012-02, *Testing Indefinite-Lived Intangible Assets for Impairment* (ASU No. 2012-02), which simplifies the guidance for testing the impairment of indefinite-lived intangible assets other than goodwill. Examples of intangible assets subject to the guidance include indefinite-lived trademarks, licenses and distribution rights. The amendment provides the option to first assess qualitative factors to determine whether it is necessary to perform the quantitative impairment test. Under the option, an entity is no longer required to calculate the fair value of an indefinite-lived intangible asset unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. This amendment is effective for fiscal years beginning after September 15, 2012, with early adoption permitted. We do not expect the new guidance to have an impact on our 2013 impairment test results.

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2013-02, *Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income* (ASU 2013-02). Under ASU 2013-02, an entity is required to provide information about the amounts reclassified out of AOCI by component. In addition, an entity is required to present, either on the face of the financial statements or in the notes, significant amounts reclassified out of AOCI by the respective line items of net income, but only if the amount reclassified is required to be reclassified in its entirety in the same reporting period. For amounts that are not required to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures that provide additional details about those amounts. ASU 2013-02 does not change the current requirements for reporting net income or other comprehensive income in the financial statements. ASU 2013-02 is effective for us on January 1, 2013 and we do not expect the new guidance to have an impact on our consolidated financial statements.

Table of Contents

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

General

Market risk is the loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market sensitive financial instruments including foreign currency receivables and payables.

Our exposure to market risk is a function of our expenses and revenue generating activities in foreign currencies. The objective of market risk management is to avoid excessive exposure of our earnings and equity to loss. We manage market risk through our treasury operations. Our senior management and our board of directors approve our treasury operations objectives and policies. The activities of our treasury operations include management of cash resources, implementing hedging strategies for foreign currency exposures, borrowing strategies, if any, and ensuring compliance with market risk limits and policies.

Components of Market Risk

Foreign Currency Risk. Our exposure to market risk arises principally from exchange rate risk. Although substantially all of our revenues are denominated in U.S. dollars (72.3% in the year ended December 31, 2012) or U.K. pounds sterling (20.2% in the year ended December 31, 2012), a substantial portion of our expenses were incurred and paid in Indian rupees and Philippine pesos (55.2% and 7.2%, respectively, in the year ended December 31, 2012). We also incur expenses in U.S. dollars, the Czech koruna and the currencies of the other countries in which we have operations. The exchange rates among the Indian rupee, the Philippine peso, U.K. pound sterling, Czech koruna and the U.S. dollar have changed substantially in recent years and may fluctuate substantially in the future.

Our exchange rate risk primarily arises from our foreign currency revenues, expenses incurred by our foreign subsidiaries and foreign currency accounts receivable and payable. Based upon our level of operations during the year ended December 31, 2012 and excluding any hedging arrangements that we had in place during that period, a 5% appreciation/depreciation in the Indian rupee against the U.S. dollar would have increased/decreased our revenues in the year ended December 31, 2012 by approximately \$5.6 million and our expenses incurred and paid in Indian rupees by approximately \$10.6 million.

We have sought to reduce the effect of Indian rupee and Philippine peso and certain other local currency exchange rate fluctuations on our operating results by purchasing forward foreign exchange contracts to cover a substantial portion of our expected cash flows. Further, a significant number of our customer contracts include protection against foreign exchange rate fluctuations which minimizes the impact of volatility in the exchange rates on our operating results. Forward exchange contracts with notional amounts of \$160.0 million were outstanding at December 31, 2012 compared to \$184.3 million outstanding at December 31, 2011. At December 31, 2012, the cash flow hedging derivatives had maturity periods of one to thirty-three months. These contracts must be settled on the day of maturity or may be cancelled subject to the payment of any gains or losses in the difference between the contract exchange rate and the market exchange rate on the date of cancellation. We use these instruments as cash flow hedges and not for speculative purposes. We may not purchase contracts adequate to insulate ourselves from Indian rupee and Philippine pesos foreign exchange currency risks. In addition, any such contracts may not perform adequately as a hedging mechanism. We may, in the future, adopt more active hedging policies, and have done so in the past.

Table of Contents

We hedge our net recognized foreign currency assets and liabilities with foreign exchange forward contracts to reduce the risk that our earnings and cash flows will be adversely affected by changes in foreign currency exchange rates. These derivative instruments hedge assets and liabilities that are denominated in foreign currencies and are carried at fair value with changes in the fair value recorded as foreign exchange gain/(loss).

These derivative instruments do not subject us to material balance sheet risk due to exchange rate movements because gains and losses on the settlement of these derivatives are intended to offset revaluation losses and gains on the assets and liabilities being hedged. Forward exchange contracts with notional amounts of \$61.2 million and GBP 11.4 million were outstanding at December 31, 2012 compared to \$51.6 million and GBP 10.3 million outstanding at December 31, 2011. At December 31, 2012, the outstanding balance sheet hedging derivatives had maturities of 31 days or less.

Interest Rate Risk. We had cash, cash equivalents and short-term investments totaling \$109.2 million at December 31, 2012. These amounts were invested principally in a short-term investment portfolio primarily comprised of highly-rated mutual funds, money market accounts and time deposits. The cash and cash equivalents are held for potential acquisitions of complementary businesses or assets, working capital requirements and general corporate purposes. We do not enter into investments for trading or speculative purposes. We believe that we have no material exposure to changes in the fair value of our investment portfolio as a result of changes in interest rates. The interest income from these funds will be subject to fluctuations due to changes in interest rates. Declines in interest rates would reduce future investment income. A 50 basis points change in short term rates would impact our interest income for the year ended December 31, 2012 by approximately \$0.2 million. As of December 31, 2012, we did not have any borrowings under the Credit Facility.

Credit Risk. As of December 31, 2012, we had accounts receivable of \$73.7 million. We believe that our credit policies reflect normal industry terms and business risk. We do not anticipate non-performance by the counterparties and, accordingly, do not require collateral. Credit losses and write-offs of accounts receivable balances have historically not been material to our financial statements and have not exceeded our expectations.

ITEM 8. Financial Statements and Supplementary Data

The financial statements required to be filed pursuant to this Item 8 are appended to this Annual Report on Form 10-K. A list of the financial statements filed herewith is found at Item 15. Exhibits and Financial Statement Schedules.

ITEM 9. Changes in and Disagreement with Accountants on Accounting and Financial Disclosure

None.

Table of Contents

ITEM 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the reports the Company files under the Securities Exchange Act of 1934 (the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer (CEO) and Chief Financial Officer (CFO), to allow timely decisions regarding required financial disclosure. In connection with the preparation of this Annual Report on Form 10-K, the Company's management carried out an evaluation, under the supervision and with the participation of the CEO and CFO, of the effectiveness and operation of the Company's disclosure controls and procedures as of December 31, 2012. Based upon that evaluation, the CEO and CFO have concluded that, as of December 31, 2012, the Company's disclosure controls and procedures were effective.

Management's Responsibility for Financial Statements

Responsibility for the objectivity, integrity and presentation of the accompanying financial statements and other financial information presented in this report rests with our management. The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. The financial statements include amounts that are based on estimates and judgments which management believes are reasonable under the circumstances.

Ernst & Young LLP, an independent registered public accounting firm, is retained to audit the Company's consolidated financial statements and the effectiveness of our internal control over financial reporting. Its accompanying reports are based on audits conducted in accordance with the standards of the Public Company Accounting Oversight Board.

The Audit Committee of the board of directors is composed solely of independent directors and is responsible for recommending to the board of directors the independent public accounting firm to be retained for the coming year. The Audit Committee meets regularly and privately with the independent public accountants, with the company's internal auditors and with management to review accounting, auditing, internal control and financial reporting matters.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Exchange Act. Those rules define internal control over financial reporting as a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the U.S. The Company's internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect our transactions;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the U.S.;

provide reasonable assurance that receipts and expenditures are being made only in accordance with the authorization of our management and our board of directors; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the consolidated financial statements.

Table of Contents

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2012. In making this assessment, management used the criteria described in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Management's assessment included an evaluation of the design of our internal control over financial reporting and testing of the operational effectiveness of its internal control over financial reporting. Management reviewed the results of its assessment with the Audit Committee of the board of directors. Based on this assessment and those criteria, management concluded that we maintained effective internal control over financial reporting as of December 31, 2012. See Ernst & Young LLP's accompanying report on their audit of our internal controls over financial reporting.

On October 12, 2012, we completed the Landacorp Acquisition. The scope of our assessment of the effectiveness of internal control over financial reporting does not include this newly acquired business as permitted by SEC rules for recently acquired businesses. We are in the process of reviewing the internal control structure of Landacorp, and, if necessary, will make appropriate changes as we incorporate our controls and procedures into the acquired business.

Changes in Internal Control over Financial Reporting

During the three months ended December 31, 2012, there were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

In making its assessment of the changes in internal control over financial reporting during the quarter ended December 31, 2012, our management excluded an evaluation of the disclosure controls and procedures of Landacorp, Inc. which was acquired on October 12, 2012. See Note 5 to our consolidated financial statements for details of the acquisition.

ITEM 9B. Other Information

None.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of

ExlService Holdings, Inc.

We have audited the accompanying consolidated balance sheets of ExlService Holdings, Inc. and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of income, comprehensive income/(loss), stockholders' equity and cash flows for each of the three years in the period ended December 31, 2012. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of ExlService Holdings, Inc. and subsidiaries at December 31, 2012 and 2011, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), ExlService Holdings Inc. and subsidiaries' internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 7, 2013 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of ExlService Holdings, Inc.

We have audited ExlService Holdings, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2012, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). ExlService Holdings, Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Annual Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Landacorp, Inc., which is included in the 2012 consolidated financial statements of ExlService Holdings, Inc. and subsidiaries and constituted total assets of \$43,745 thousand (of which \$27,660 thousand represents goodwill and intangibles included within the scope of the assessment) as of December 31, 2012 and \$4,022 thousand of revenues and insignificant net income for the year then ended. Our audit of internal control over financial reporting of ExlService Holdings, Inc. and subsidiaries also did not include an evaluation of the internal controls over financial reporting of Landacorp, Inc.

In our opinion, ExlService Holdings, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on the COSO criteria.

Table of Contents

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of ExlService Holdings Inc. and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of income, comprehensive income/(loss), stockholders' equity and cash flows for each of the three years in the period ended December 31, 2012 and our report dated March 7, 2013 expressed an unqualified opinion thereon.

EXLSERVICE HOLDINGS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2012

(In thousands, except share and per share amounts)

1. Organization and Basis of Presentation

Organization

ExlService Holdings, Inc. (ExlService Holdings) is organized as a corporation under the laws of the state of Delaware. ExlService Holdings, together with its subsidiaries (collectively, the Company), is a leading provider of outsourcing services and transformation services. The Company's clients are located principally in the U.S. and the U.K.

Basis of Presentation

Certain amounts in the prior year's financial statements and related notes have been reclassified to conform to the 2012 presentation.

2. Summary of Significant Accounting Policies

Basis of Preparation and Principles of Consolidation

The accompanying consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (GAAP). The accompanying financial statements have been prepared on a consolidated basis and reflect the financial statements of ExlService Holdings and all of its subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

The non-controlling interest represents the minority partner's interest in the operation of exl Service.com (India) Private Limited (Exl India) and the profits associated with the minority partner's interest in those operations, in the consolidated balance sheets and consolidated statements of income, respectively. The minority partner's interest in the operations for the years ended December 31, 2012, 2011 and 2010 was insignificant and is included under general and administrative expenses in the consolidated statements of income.

Use of Estimates

The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the consolidated statements of income during the reporting period. Estimates are based upon management's best assessment of the current business environment. Actual results could differ from those estimates. The significant estimates and assumptions that affect the financial statements include, but are not limited to, allowance for doubtful receivables, service tax receivables, assets and obligations related to employee benefit plans, deferred tax valuation allowances, income-tax uncertainties and other contingencies, valuation of derivative financial instruments, stock-based compensation expense, depreciation and amortization periods, recoverability of long-term assets including goodwill and intangibles, and estimates to complete fixed price contracts.

Foreign Currency Translation

The functional currency of each entity in the Company is its respective local country currency which is also the currency of the primary economic environment in which it operates except for the entity in Mauritius. Monetary assets and liabilities in foreign currencies are re-measured into functional currency at the rates of exchange prevailing at the balance sheet dates. Transactions in foreign currencies are re-measured into functional currency at the rates of exchange prevailing on the date of the transaction. All transaction foreign exchange gains and losses are recorded in the accompanying consolidated statements of income.

The assets and liabilities of the subsidiaries for which the functional currency is other than the U.S. dollar are translated into U.S. dollars, the reporting currency, at the rate of exchange prevailing on the balance sheet dates.

Table of Contents

EXLSERVICE HOLDINGS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

December 31, 2012

(In thousands, except share and per share amounts)

Revenues and expenses are translated into U.S. dollars at the exchange rates prevailing on the last business day of each month, which approximates the average monthly exchange rate. Resulting translation adjustments are included in accumulated other comprehensive loss in the audited consolidated balance sheets.

Revenue Recognition

The Company derives its revenues from outsourcing and transformation services. Revenues from outsourcing services are recognized primarily on a time-and-material, cost-plus or unit-priced basis; revenues from transformation services are recognized primarily on a time-and-material and fixed price basis. The services provided within our contracts generally contain one unit of accounting. Revenues are recognized under our contracts generally when persuasive evidence of an arrangement exists, the sales price is fixed or determinable, services have been performed and collection of amounts billed is reasonably assured.

Revenues under time-and-material contracts are recognized as the services are performed. Revenues are recognized on cost-plus contracts on the basis of contractually agreed direct and indirect costs incurred on a client contract plus an agreed upon profit mark-up. Revenues are recognized on unit-price based contracts based on the number of specified units of work (such as the number of e-mail responses) delivered to a client. Such revenues are recognized as the related services are provided in accordance with the client contract. When the terms of the client contract specify service level parameters that must be met (such as turnaround time or accuracy), we monitor such service level parameters to determine if any service credits or penalties have been incurred. Revenues are recognized net of any service credits that are due to a client. We have experienced minimal service credits and penalties to date. Revenue on contingent fee based contracts is recognized when the related contingency has been met to the client's satisfaction.

Revenues are recognized on fixed-price contracts using the proportional performance method when the pattern of performance under the contracts can be reasonably determined. We estimate the proportional performance of a contract by comparing the actual number of hours or days worked to the estimated total number of hours or days required to complete each engagement. The use of the proportional performance method requires significant judgment relative to estimating the number of hours or days required to complete the contracted scope of work, including assumptions and estimates relative to the length of time to complete the project and the nature and complexity of the work to be performed. We regularly monitor our estimates for completion of a project and record changes in the period in which a change in an estimate is determined. If a change in an estimate results in a projected loss on a project, such loss is recognized in the period in which it is first identified.

Revenues from software licensing arrangements are recognized at the later of time of delivery or expiration of significant termination rights if the license fee is fixed or determinable, collection is probable, and there is sufficient vendor specific evidence of the fair value of each undelivered element. When there are significant production, modifications or customization, installation, systems integration or related services, the professional services and license revenues are combined and recorded based upon proportional performance, measured in the manner described above. Revenues from fixed-term maintenance and support contracts are recognized ratably on a monthly basis over the period of the contract.

The Company accrues for revenue and receivables for services rendered between the last billing date and the balance sheet date. Accordingly, our accounts receivable include amounts for services that we have performed and for which an invoice has not yet been issued to the client.

Table of Contents**EXLSERVICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****December 31, 2012****(In thousands, except share and per share amounts)**

Reimbursements of out-of-pocket expenses received from clients have been included as part of revenues in accordance with Accounting Standards Codification (ASC) topic 605-45-14, *Income Statement Characterization of Reimbursements Received for Out-of-Pocket Expenses Incurred*.

Revenues for the following periods include reimbursements of out-of-pocket expenses:

Year ended December 31, 2012	\$ 18,862
Year ended December 31, 2011	\$ 16,073
Year ended December 31, 2010	\$ 11,820

Cash and Cash Equivalents and Restricted Cash

The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents. Pursuant to the Company's investment policy, its surplus funds are kept as cash or cash equivalents and are invested in highly-rated mutual funds, money market accounts and time deposits to reduce its exposure to market risk with regard to these funds.

Current restricted cash represents amounts on deposit with banks against bank guarantees issued through banks for equipment imports that will mature on various dates before December 31, 2013, as well as client funds held in dedicated bank accounts.

Non-current restricted cash represents amounts on deposit with banks against bank guarantees issued through banks for equipment imports and for demands against pending income tax assessments (see Note 15 for details), that will mature on various dates after December 31, 2013.

Investments

The Company's investments consist of time deposits with financial institutions which are valued at cost and approximate fair value. Interest earned on such investments is included in interest income. Investments with original maturities greater than three months but less than twelve months are classified as short-term investments. Investments with maturities greater than twelve months from the balance sheet date are classified as long-term investments.

Accounts Receivable

Accounts receivable are recorded net of allowances for doubtful accounts. Allowances for doubtful accounts are established through the evaluation of the accounts receivable ageing and prior collection experience to estimate the ultimate collectability of these receivables. As of December 31, 2012 and 2011, the Company had \$207 and \$134 of allowance for doubtful accounts, respectively.

Accounts receivable include unbilled accounts receivable which represents revenues for services performed but yet to be billed to the client. As of December 31, 2012 and 2011, the Company had \$15,601 and \$6,103 of unbilled accounts receivable, respectively, part of which are subsequently billed to the respective clients.

Table of Contents**EXLSERVICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****December 31, 2012****(In thousands, except share and per share amounts)*****Fixed Assets***

Fixed assets are stated at cost less accumulated depreciation and amortization. Equipment held under capital leases is stated at the lower of present value of minimum lease payments at the inception of the leases or its fair value. Advances paid towards acquisition of fixed assets and the cost of fixed assets not yet placed in service before the end of the period are classified as construction in progress.

Fixed assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable through an assessment of the estimated future undiscounted cash flows related to such assets. In the event that assets are found to be carried at amounts that are in excess of estimated undiscounted future cash flows, the carrying value of the related asset or group of assets is reduced to a level commensurate with fair value based on a discounted cash flow analysis.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets. Depreciation and amortization on equipment held under capital leases and leasehold improvements are computed using the straight-line method over the shorter of the assets estimated useful lives or the lease term.

The estimated lives used in determining depreciation are as follows:

	Estimated Useful Life (Years)
Network equipment, computers and software	3-5
Buildings	30
Leasehold improvements	3-8
Office furniture and equipment	3-7
Motor vehicles	3-5

Business Combinations, Goodwill and Other Intangible Assets

ASC topic 805, *Business Combinations* (ASC No. 805), requires that the purchase method of accounting be used for all business combinations. The guidance specifies criteria as to intangible assets acquired in a business combination that must be recognized and reported separately from goodwill. Under ASC topic 350, *Intangibles Goodwill and Other* (ASC No. 350), all assets and liabilities of the acquired businesses, including goodwill, are assigned to reporting units.

Goodwill represents the cost of the acquired businesses in excess of the fair value of identifiable tangible and intangible net assets purchased. Goodwill is not amortized but is tested for impairment at least on an annual basis, relying on a number of factors including operating results, business plans and estimated future cash flows. Recoverability of goodwill is evaluated using a two-step process. The first step involves a comparison of the fair value of a reporting unit with its carrying value. The fair value of the reporting unit is measured by discounting estimated future cash flows. If the carrying amount of the reporting unit exceeds its fair value, the second step of the process involves a comparison of the fair value and carrying value of the goodwill of that reporting unit. If the carrying value of the goodwill of a reporting unit exceeds the fair value of that goodwill, an impairment loss is recognized in an amount equal to the excess. Goodwill of a reporting unit will be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount.

Table of Contents**EXLSERVICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****December 31, 2012****(In thousands, except share and per share amounts)**

Intangible assets are initially valued at fair market value using generally accepted valuation methods appropriate for the type of intangible asset. Intangible assets with definite lives are amortized over the estimated useful lives and are reviewed for impairment, if indicators of impairment arise. The evaluation of impairment is based upon a comparison of the carrying amount of the intangible asset to the estimated future undiscounted net cash flows expected to be generated by the asset. If estimated future undiscounted cash flows are less than the carrying amount of the asset, the asset is considered impaired. The impairment expense is determined by comparing the estimated fair value of the intangible asset to its carrying value, with any shortfall from fair value recognized as an expense in the current period.

The Company's definite lived intangible assets are amortized over their estimated useful lives as listed below using a straight-line method or a method of amortization that reflects the pattern in which the economic benefits of the intangibles assets were consumed or otherwise realized:

Customer relationships	3-15 years
Leasehold benefits	3-8 years
Developed technology	5-10 years
Non-compete agreements	1-2 years
Trade names and trademarks	3-5 years

Derivative Financial Instruments.

In the normal course of business, the Company actively looks to mitigate the exposure of foreign currency market risk by entering into various hedging instruments, authorized under Company policies, with counterparties that are highly rated financial institutions. The Company uses derivative instruments for the purpose of mitigating the underlying exposure from foreign currency fluctuation risks associated with forecasted transactions denominated in certain foreign currencies and to minimize earnings and cash flow volatility associated with changes in foreign currency exchange rates, and not for speculative trading purposes.

The Company hedges anticipated transactions that are subject to foreign exchange exposure with foreign currency exchange contracts that are designated effective and that qualify as cash flow hedges under ASC topic 815, *Derivatives and Hedging* (ASC No. 815). Changes in the fair value of these cash flow hedges which are deemed effective, are recorded in accumulated other comprehensive income/(loss) (AOCI) until the hedged transactions occur and at that time are recognized in the consolidated statements of income. Changes in the fair value of cash flow hedges deemed ineffective are recognized in the consolidated statement of income and are included in foreign exchange (loss)/gain. The Company also uses derivatives instruments consisting of foreign currency exchange contracts not designated as hedging instruments under ASC No. 815 to hedge intercompany balances and other monetary assets or liabilities denominated in currencies other than the functional currency. Changes in the fair value of these derivatives are recognized in the consolidated statements of income and are included in foreign exchange (loss)/gain.

The Company evaluates hedge effectiveness at the time a contract is entered into as well as on an ongoing basis. If during this time, a contract is deemed ineffective, the change in the fair value is recorded in the consolidated statements of income and is included in foreign exchange (loss)/gain. For hedge relationships that are discontinued because the forecasted transaction is not expected to occur by the end of the originally specified period, any related derivative amounts recorded in equity are reclassified to earnings.

Table of Contents

EXLSERVICE HOLDINGS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

December 31, 2012

(In thousands, except share and per share amounts)

Retirement Benefits

Contributions to defined contribution plans are charged to the consolidated statements of income in the period in which services are rendered by the covered employees. Current service costs for defined benefit plans are accrued in the period to which they relate. In accordance with ASC topic 715, *Compensation Retirement Benefit* (ASC No. 715), the liability in respect of defined benefit plans is calculated annually by the Company using the projected unit credit method. Prior service cost, if any, resulting from an amendment to a plan is recognized and amortized over the remaining period of service of the covered employees. The Company recognizes its liabilities for compensated absences in accordance with ASC topic 710, *Compensation General* (ASC No. 710).

Share-Based Compensation

The Company follows ASC topic 718, *Compensation Stock Compensation* (ASC No. 718), which requires the recognition of stock-based compensation expense in the consolidated financial statements for awards of equity instruments to employees and non-employee directors based on the grant-date fair value of those awards. The Company recognizes these compensation costs, net of an estimated forfeiture rate, over the requisite service period of the award.

Income Taxes

The Company accounts for income taxes in accordance with ASC topic 740, *Income Taxes* (ASC No. 740). Under ASC No. 740, deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying value of existing assets and liabilities and their respective tax basis and all operating losses carried forward, if any. Deferred tax assets and liabilities are measured using tax rates expected to apply to taxable income in the years in which the applicable temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates or tax status is recognized in the statement of income in the period in which the change is identified. Deferred tax assets are reduced by a valuation allowance if, based on available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

ASC No. 740 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. It also provides guidance on de-recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. The guidance contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with ASC No. 740. The first step is to evaluate the tax position for recognition by determining, based on the technical merits, that the position will be more likely than not sustained upon examination. The second step is to measure the tax benefit as the largest amount of the tax benefit that is greater than 50% likely of being realized upon settlement. Interest and penalties related to unrecognized tax benefits are being included in provision for income-tax expense in the consolidated statements of income.

Financial Instruments and Concentration of Credit Risk

Financial Instruments. For certain financial instruments including cash and cash equivalents, short-term investments, accounts receivable, accounts payable, accrued expenses, and other current liabilities, recorded amounts approximate fair value due to the relatively short maturity periods of such instruments.

Table of Contents**EXLSERVICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****December 31, 2012****(In thousands, except share and per share amounts)**

Concentration of Credit Risk. Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, time deposits, accounts receivable and derivative financial instruments. By their nature, all such financial instruments involve risks including the credit risks of non-performance by counterparties. Pursuant to the Company's investment policy, its surplus funds are maintained as cash or cash equivalents and are invested in highly-rated mutual funds, money market accounts and time deposits to reduce its exposure to market risk with regard to these funds. Trade accounts receivable are incurred pursuant to contractual terms with customers. Credit losses on accounts receivable have not been material because of a large concentration of revenues with a small number of large, established companies. The Company evaluates the creditworthiness of its clients in conjunction with its revenue recognition processes as well as through its ongoing collectability assessment processes for accounts receivable.

Earnings Per Share

Basic earnings per share is computed by dividing net income to common stockholders by the weighted average number of common shares outstanding during each period. Diluted earnings per share is computed using the weighted average number of common shares plus the potentially dilutive effect of common stock equivalents issued and outstanding at the reporting date, using the treasury stock method. Stock options, restricted stock and restricted stock units that are anti-dilutive are excluded from the computation of weighted average shares outstanding.

Any cash or in-kind dividends paid with respect to unvested shares of restricted stock and restricted stock units are withheld by the Company and paid to the holder of such shares of restricted stock, without interest, only if and when such shares of restricted stock and restricted stock units vest. Any unvested shares of restricted stock and restricted stock units are immediately forfeited without consideration upon the termination of holder's employment with the Company or its affiliates. Accordingly, the Company's unvested restricted stock and restricted stock units do not include non-forfeitable rights to dividends or dividend equivalents and are therefore not considered as participating securities for purposes of earnings per share calculations pursuant to the two-class method. However, the Company's vested restricted stock units against which the underlying common stock has not been issued, contain non-forfeitable rights to dividends or dividend equivalents and are therefore after vesting considered as participating securities for the purposes of computing basic earnings per share pursuant to the two-class method. Application of this treatment had an insignificant effect on the basic earnings per share.

The following table sets forth the computation of basic and diluted earnings per share:

	2012	Year ended December 31,	
		2011	2010
Numerators:			
Net income	\$ 41,836	\$ 34,780	\$ 26,592
Denominators:			
Basic weighted average common shares outstanding	31,968,386	30,264,805	29,281,364
Dilutive effect of share based awards	1,202,719	1,281,339	1,107,156
Diluted weighted average common shares outstanding	33,171,105	31,546,144	30,388,520
Earnings per share:			
Basic	\$ 1.31	\$ 1.15	\$ 0.91
Diluted	\$ 1.26	\$ 1.10	\$ 0.88

Edgar Filing: ExlService Holdings, Inc. - Form 10-K

Weighted average common shares considered anti-dilutive in computing diluted earnings per share	413,493	424,081	674,507
--	---------	---------	---------

F-16

Table of Contents**EXLSERVICE HOLDINGS, INC.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****December 31, 2012****(In thousands, except share and per share amounts)*****Accumulated Other Comprehensive Loss***

ASC topic 220, *Reporting Comprehensive Income*, establishes rules for the reporting of comprehensive income and its components. Comprehensive income is defined as all changes in equity from non-owner sources. For the Company, comprehensive loss consists of net earnings/(loss), amortization of actuarial gain/(loss) on retirement benefits and changes in the cumulative foreign currency translation adjustments. In addition, the Company enters into foreign currency exchange contracts, which are designated as cash flow hedges in accordance with ASC No. 815. Changes in the fair values of contracts that are deemed effective are recorded as a component of accumulated other comprehensive loss until the settlement of that contract. The balances as of December 31, 2012 and 2011 are as follows:

	December 31, 2012	December 31, 2011
Cumulative translation adjustments	\$ (30,486)	\$ (26,337)
Unrealized loss on cash flow hedges, net of taxes of (\$2,521) and (\$4,819)	(5,456)	(12,910)
Retirement benefits, net of taxes of (\$203) and (\$164)	(705)	(611)
Accumulated other comprehensive loss	\$ (36,647)	\$ (39,858)

Accrued expenses and other current liabilities

Accrued expenses and other current liabilities consist of the following:

	December 31, 2012	December 31, 2011
Accrued expenses	\$ 20,134	\$ 15,572
Derivative instruments	6,403	9,170
Other current liabilities	5,200	6,214
Accrued expenses and other current liabilities	\$ 31,737	\$ 30,956

Non-current liabilities

Non-current liabilities consist of the following:

	December 31, 2012	December 31, 2011
Derivative instruments	\$ 3,458	\$ 8,559
Unrecognized tax benefits	2,680	4,981

Edgar Filing: ExlService Holdings, Inc. - Form 10-K

Deferred rent	4,631	3,319
Retirement benefits	2,380	3,068
Other non-current liabilities	1,168	2,531
Non-current liabilities	\$ 14,317	\$ 22,458

Recent Accounting Pronouncements

In May 2011, the Financial Accounting Standards Board (FASB) issued update No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS* (ASU No. 2011-04). ASU No. 2011-04 is intended to improve the comparability of fair value measurements presented and disclosed in financial statements prepared in accordance with GAAP and International Financial Reporting Standards (IFRS). ASU No. 2011-04 explains how to measure fair value and does not require additional measurements. Accordingly, the adoption of this accounting pronouncement from January 1, 2012 did not have an impact on the Company's consolidated financial statements.

Table of Contents

EXLSERVICE HOLDINGS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

December 31, 2012

(In thousands, except share and per share amounts)

In June 2011, the FASB issued update No. 2011-05, *Presentation of Comprehensive Income* (ASU No. 2011-05). ASU No. 2011-05, effective retrospectively for the interim and annual periods beginning on or after December 15, 2011 (early adoption is permitted), requires presentation of total comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. The Company adopted the option of presentation in two separate but consecutive statements. Refer to the Company's consolidated statements of comprehensive income/(loss) for further details.

In December 2011, the FASB issued update No. 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards* (ASU No. 2011-12), which deferred the requirement to present on the face of the financial statements the effects of reclassifications out of accumulated other comprehensive income (AOCI) on the components of net income and other comprehensive income for annual and interim financial statements. The adoption of this accounting pronouncement from January 1, 2012 did not have any impact on the Company's consolidated financial statements.

In September 2011, the FASB issued update No. 2011-08, *Testing Goodwill for Impairment* (ASU No. 2011-08), which permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If an entity concludes that the fair value of a reporting unit is less than its carrying value, it is necessary to perform a two-step goodwill impairment test. ASU No. 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this accounting pronouncement did not have a material impact on the Company's consolidated financial statements and annual goodwill impairment for the fiscal year 2012.

In July 2012, the FASB issued update No. 2012-02, *Testing Indefinite-Lived Intangible Assets for Impairment* (ASU No. 2012-02), which simplifies the guidance for testing the impairment of indefinite-lived intangible assets other than goodwill. Examples of intangible assets subject to the guidance include indefinite-lived trademarks, licenses, and distribution rights. The amendment provides the option to first assess qualitative factors to determine whether it is necessary to perform the quantitative impairment test. Under the option, an entity is no longer required to calculate the fair value of an indefinite-lived intangible asset unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. This amendment is effective for fiscal years beginning after September 15, 2012, with early adoption permitted. The Company does not expect the new guidance to have an impact on its 2013 impairment test results.

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2013-02, *Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income* (ASU 2013-02). Under ASU 2013-02, an entity is required to provide information about the amounts reclassified out of AOCI by component. In addition, an entity is required to present, either on the face of the financial statements or in the notes, significant amounts reclassified out of AOCI by the respective line items of net income, but only if the amount reclassified is required to be reclassified in its entirety in the same reporting period. For amounts that are not required to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures that provide additional details about those amounts. ASU 2013-02 does not change the current requirements for reporting net income or other comprehensive income in the financial statements. ASU 2013-02 is effective from January 1, 2013 and the Company does not expect the new guidance to have an impact on its consolidated financial statements.
