Various inputs are used in determining the value of the Fund's investments. These inputs are summarized in the three broad levels listed below.

Level 1 - quoted prices generally in active markets for identical securities.

Level 2 - other significant observable inputs including, but not limited to, quoted prices for similar securities, interest rates and yield curves, prepayment speeds, foreign currency exchange rates, and amortized cost.

Level 3 - significant unobservable inputs for securities valued in accordance with Board approved fair valuation procedures.

The following is a summary of the inputs used as of August 31, 2013 in valuing such portfolio securities:

	Level 1	Level 2	Level 3
<b>Investments in Securities</b>

<b>Total</b>	<b>\$ 5,350,355</b>	<b>\$ 813,409,800</b>	<b>\$ 1,813,553</b>

**Notes to Schedule of Investments (Unaudited)**

*Securities Valuation:* The Fund holds portfolio securities and other assets that are fair valued at the close of each day the New York Stock Exchange ( NYSE ) is open for trading. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. The Board of Trustees (the Board ) has delegated fair valuation responsibilities to Prudential Investments LLC ( PI or Manager ) through the adoption of Valuation Procedures for valuation of the Fund s securities. Under the current Valuation Procedures, a Valuation Committee is established and responsible for supervising the valuation of portfolio securities and other assets. The Valuation Procedures allow the Fund to utilize independent pricing vendor services, quotations from market makers and other valuation methods in events when market quotations are not readily available or not representative of the fair value of the securities. A record of the Valuation Committee s actions is subject to review, approval and ratification by the Board at its next regularly scheduled quarterly meeting.

Various inputs are used in determining the value of the Fund s investments, which are summarized in the three broad level hierarchies based on any observable inputs used as described in the table following the Schedule of Investments. The valuation methodologies and significant inputs used in determining the fair value of securities and other assets classified as Level 1, Level 2 and Level 3 of the hierarchy are as follows:

Common stocks, exchange-traded funds and financial derivative instruments (including futures contracts and certain options and swap contracts on securities), that are traded on a national securities exchange are valued at the last sale price as of the close of trading on the applicable exchange. Securities traded via NASDAQ are valued at the NASDAQ official closing price. To the extent these securities are valued at the last sale price or NASDAQ official closing price, they are classified as Level 1 of the fair value hierarchy.

In the event there is no sale or official closing price on such day, these securities are valued at the mean between the last reported bid and asked prices, or at the last bid price in absence of an asked price. These securities are classified as Level 2 of the fair value hierarchy as these inputs are considered as significant other observable inputs to the valuation.

Common stocks traded on foreign securities exchanges are valued using pricing vendor services that provide model prices derived using adjustment factors based on information such as local closing price, relevant general and sector indices, currency fluctuations, depository receipts, and futures, as applicable. Securities valued using such model prices are classified as Level 2 in the fair value hierarchy, as the adjustment factors are observable and considered to be significant to the valuation.

Investments in open-end, non-exchange-traded mutual funds are valued at their net asset values as of the close of the NYSE on the date of valuation. These securities are classified as Level 1 as they have the ability to be purchased or sold at their net asset value on the date of valuation.

Fixed income securities traded in the over-the-counter market, such as corporate bonds, municipal bonds, U.S. Government agencies issues and guaranteed obligations, U.S. Treasury obligations and sovereign issues are usually valued at prices provided by approved independent pricing vendors. The pricing vendors provide these prices usually after evaluating observable inputs including yield curves, credit rating, yield spreads, default rates, cash flows as well as broker/dealer quotations and reported trades. Securities valued using such vendor prices are classified as Level 2 of the fair value hierarchy.

Asset-backed and mortgage-related securities are usually valued by approved independent pricing vendors. The pricing vendors provide the prices using their internal pricing models with inputs from deal terms, tranche level attributes, yield curves, prepayment speeds, default rates and broker/dealer quotes. Securities valued using such vendor prices are classified as Level 2 of the fair value hierarchy.

Over-the-counter financial derivative instruments, such as option contracts, foreign currency contracts and swaps agreements, are usually valued using pricing vendor services, which derive the valuation based on underlying asset prices, indices, spreads, interest rates, exchange rates and other inputs. These instruments are categorized as Level 2 of the fair value hierarchy.

Securities and other assets that cannot be priced using the methods described above are valued with pricing methodologies approved by the Board of Trustees. In the event there are unobservable inputs used when determining such valuations, the securities will be classified as Level 3 of the fair value hierarchy.

When determining the fair value of securities, some of the factors influencing the valuation include: the nature of any restrictions on disposition of the securities; assessment of the general liquidity of the securities; the issuer's financial condition and the markets in which it does business; the cost of the investment; the size of the holding and the capitalization of the issuer; the prices of any recent transactions or bids/offers for such securities or any comparable securities; any available analyst media or other reports or information deemed reliable by the investment adviser regarding the issuer or the markets or industry in which it operates. Using fair value to price securities may result in a value that is different from a security's most recent closing price and from the price used by other mutual funds to calculate their net asset values.

The Fund may hold up to 15% of its net assets in illiquid securities, including repurchase agreements which have a maturity of longer than seven days, certain securities with legal or contractual restrictions on resale (restricted securities, sometimes referred to as Private Placements) and securities that are not readily marketable. Restricted securities are valued pursuant to the valuation procedures noted above.

The Fund invests in the Prudential Core Taxable Money Market Fund, a portfolio of the Prudential Investment Portfolios 2, registered under the Investment Company Act of 1940, as amended, and managed by PI.
