Item 8.01. Other Events.

Notes Offering

On October 6, 2016, Gulfport Energy Corporation (Gulfport) issued a press release announcing that it proposes to offer, subject to market conditions and other factors, \$650 million aggregate principal amount of its Senior Notes due 2024 (the Notes) to fund the repurchase of its outstanding 7.750% Senior Notes due 2020. The Notes will be offered to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended (the Securities Act), and to certain non-U.S. persons in accordance with Regulation S under the Securities Act (the Notes Offering). A copy of the press release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

The Notes will not be registered under the Securities Act or any state securities laws and may not be offered or sold in the United States absent registration or an applicable exemption from such registration requirements. This report is neither an offer to sell nor a solicitation of an offer to buy any of these securities and shall not constitute an offer, solicitation or sale in any jurisdiction in which such offer, solicitation or sale is unlawful.

Certain Additional Information

In connection with the Notes Offering discussed above, Gulfport intends to disclose to potential investors the following:

Estimated Proved Reserves and Hedge Position Based on Current NYMEX Pricing

Gulfport's proved reserves at December 31, 2015 were calculated, as required by the Securities and Exchange Commission (the SEC), using prices based on the 12-month unweighted arithmetic average of the first-day-of-the-month price for the period January through December 2015 of \$50.28 per barrel and \$2.59 per MMBtu. Holding production and development costs constant, if Gulfport's 2015 reserves were calculated using the October 5, 2016 NYMEX strip pricing of \$47.81 per barrel and \$3.08 per MMBtu in 2016, \$52.76 per barrel and \$3.19 per MMBtu in 2017, \$54.64 per barrel and \$2.98 per MMBtu in 2018, \$55.78 per barrel and \$2.86 per MMBtu in 2019, and \$56.87 per barrel and \$2.87 per MMBtu thereafter, Gulfport's present value of estimated future net revenues discounted at 10% (PV-10) would have been approximately \$1,194.1 million as compared to Gulfport's actual PV-10 value of \$765.8 million at December 31, 2015.

The value of Gulfport's hedge position as of June 30, 2016 using December 31, 2015 SEC pricing discounted to present value using a 10% discount rate was approximately \$135.0 million. The value of Gulfport's hedge position as of June 30, 2016 using October 5, 2016 NYMEX pricing discounted to present value using a 10% discount rate was approximately \$(8.1) million.

Additional Risk Factor

Other than as set forth below, there have been no material changes to the Risk Factors previously disclosed in Gulfport's Annual Report on Form 10-K for the year ended December 31, 2015 or subsequent filings it makes with the SEC.

Recent decisions by the Ohio Supreme Court interpreting the Ohio Dormant Mineral Act relating to preservation of mineral rights by surface owners could require certain curative efforts to vest title in a portion of Gulfport's leasehold acreage, increase its leasehold expenses, subject it to payment of additional royalties and/or result in the loss of some of its leasehold acreage in Ohio.

On September 15, 2016, the Ohio Supreme Court issued a series of decisions relating to the Ohio Dormant Mineral Act (the ODMA). In the lead case, *Corban v. Chesapeake Exploration L.L.C.*, the court concluded that the 1989

version of the ODMA did not transfer ownership of dormant mineral rights automatically, by operation of law. Instead, prior to 2006, surface owners were required to bring a quiet title action in order to establish abandonment of mineral rights. After June 30, 2006 (the effective date of the 2006 version of the ODMA), surface owners are required to follow the statutory notice and recording procedures enacted in 2006. Gulfport is assessing the impact of these recent Ohio Supreme Court decisions on its operations in Ohio where the majority of its acreage and its producing properties are located. However, the Ohio Supreme Court decisions could require certain curative efforts to vest title in a portion of Gulfport's leasehold acreage, increase its leasehold expenses, subject it to payment of additional royalties and/or result in the loss of some of its leasehold acreage in Ohio, any of which could have an adverse effect on Gulfport's results of operations and financial condition.
