The Strategic Report was approved by the Board of Directors on 22 February 2017 and signed on its behalf by the Chairman.

Report of the Auditor The Auditor's report on the full accounts for the year ended 31 December 2016 was unqualified, and their statement under section 496 (whether the Strategic Report and the Directors' report are consistent with the accounts) of the Companies Act 2006 was unqualified.

Notes, Non-IFRS performance measures and forward-looking statements Barclays management

believes that the non-IFRS performance measures included in this document provide valuable information to the readers of the financial statements. This document also contains certain forward-looking statements within the meaning of Section 21E of the US Securities Exchange Act of 1934, as amended, and Section 27A of the US Securities Act of 1933, as amended, with respect to the Group. For full details on Notes, Non-IFRS performance measures, and forward-looking statements used within this document, please see the back cover.

Chairman's letter

While much is yet to be done, business restructuring will largely be completed in 2017...

Summary

Today the Group is smaller, safer, more focused, less leveraged, better capitalised and highly liquid, with the customer at the centre of the business. The sale of Africa, the settlement of legacy conduct matters and the exit of Non-Core will improve this significantly going forward.

For further information, see home.barclays/annualreport
2016 was pivotal for Barclays, which is engaged in one of the largest restructurings in history.

Jes Staley has had an impressive first year. Initially, he set out a new strategic agenda for the Group as a leading UK and transatlantic bank, with the customer at its heart, placing it at the forefront of our industry, and re-embracing banking as a profession.

Under his leadership, the Core business was redefined and reorganised in preparation for structural reform, together with plans to bring its returns above hurdle rates. It was decided to exit Africa and accelerate the reduction in Non-Core. The senior management team was strengthened with key internal and external appointments, and plans put in place to achieve successful structural reform in the UK and the US, as well as a major medium-term initiative to embrace digital technology, to upgrade our systems architecture, to become fully cyber ready and improve our control effectiveness.

While much is yet to be done, including the full transfer of business to the UK ring-fenced bank during the first half of 2018, business restructuring will largely be completed in 2017, and subject to the future impact of a number of legacy conduct issues, this should allow the Group to return to a good and more stable financial performance in 2018, and

possibly in the late months of 2017.

The year itself saw external surprises, including the decision by the UK to exit the EU, a consequent decline in Sterling, as well as a new political climate emerging in the UK and the US. We also faced regulatory pressure to increase capital levels, and the need to improve further our control effectiveness and corporate culture.

Notwithstanding such pressures, I'm pleased with the progress that we have made. The Group implemented its geographic refocus around the UK and North America, while retaining international coverage for our clients. The business was reorganised into Barclays International (corporate/investment banking and international consumer) and Barclays UK (local consumer, small business, UK wealth and credit cards) in preparation for structural reform and to leverage the core competitive advantages of the Group. New senior management joined in Risk, Corporate and Investment Banking and Operations and Technology, and a new Group Executive Committee was constituted, with Jes investing heavily in its cohesion and effectiveness.

Overall, the Group returned to bottom-line profitability in the year, with attributable profits up £2.0bn and with basic earnings per share of 10.4p. Capital was strengthened, and the Common Equity Tier 1 ratio improved by 100bps to 12.4%. The Cost: Income ratio improved from 84% to 76%.

The Core business had a good year with attributable profit doubling to £3.4bn, together with an equivalent improvement in Return on Tangible Equity to 8.4% and basic earnings per share of 20.5p.

This was offset significantly by the £1.9bn loss (11.3p per share) associated with the run down of Non-Core, which saw its risk weighted assets reduce by 41% to £32bn with transactions announced in France, Italy, Spain, Portugal and in Asia. Given this progress, we now expect the run down of Non-Core to be completed six months earlier than planned, at the end of the first half of 2017. This will leave an anticipated residual £25bn of RWAs that will be re-absorbed by the Core businesses.

A major decision was made to sell down our 62% shareholding in Barclays Africa Group Ltd (BAGL) and the process began with a reduction to just over 50%. This investment became non-viable economically under current regulatory capital rules, and the UK bank levy. BAGL had a reasonable year in 2016, although profits were slightly down on 2015. Our shareholding benefitted from an improvement in the exchange rate and an increase in its stock price.

From these statistics, we can see the merits of improving further the Core return, the elimination of the drag from Non-Core, the sale of Africa, and further progressing the resolution of historical conduct matters.

It is worth stepping back to remind shareholders of the enormous changes that are taking place at Barclays. At our peak in 2008 we had:

§ £2.1trn in assets against £1.2trn today, down over 40% and declining

§ shareholders' equity was £36.6bn, and is now £58.4bn, up 60%

§ balance sheet leverage (total assets to ordinary shareholders' funds) was stretched 56 times, and has been reduced to 21 times

§ shareholders' capital as a percentage of risk weighted assets was 8.5% and is now almost double at 16%.

Today therefore, the Group is smaller, safer, more focused, less leveraged, better capitalised and highly liquid, with the customer at the centre of the business. The sale of Africa, the settlement of legacy conduct matters and the exit of Non-Core will improve this significantly going forward.

Despite this progress, significant challenges remain. The interest rate and growth environment remains subdued in our core markets. Our Core business overall is still operating below our cost of equity. In the near term, we need to exit Non-Core and complete the sale of Africa at the best financial outcome possible. UK and US structural reform also needs to be implemented, with a major event involving the transfer of business from Barclays Bank PLC to the ring-fenced bank. A number of potentially material legacy conduct matters need to be resolved at acceptable cost. A way forward to capture the opportunity and mitigate the risk of the UK's exit from the EU needs to be found, depending on the final international agreement. Finally, we need to reach our required regulatory capital and desired control levels. I am confident we have the capacity to work our way through these.

Edgar Filing: BARCLAYS PLC - Form 6-K

Looking forward therefore, a great deal has changed at Barclays and much will change going forward. We are a major full-service player in the UK, have leadership in several important segments and are the digital banking leader. We also have a major corporate, investment banking and cards presence in the US. For example, our cards and consumer and payments businesses there, now produce more revenues than our equivalent UK business. We also retain a focused international presence to serve our customers internationally and bring overseas customers to our core markets.

12.4%

Common Equity Tier 1 ratio

2016 CET1 ratio up 100bps vs 2015 (2015: 11.4%)

£58.4bn

Shareholders equity

2016 shareholders equity up 7% vs 2015 (2015: £54.5bn)

This foundation gives us a new beginning and subject to the resolution of legacy conduct matters and the satisfactory execution of the near-term agenda. I genuinely believe we can see the light at the end of the tunnel. Restructuring will largely be completed in 2017, and subject to legacy matters, this should allow the Group to return to a good and more stable financial performance in 2018, and possibly in the late months of 2017. This augurs well for completion of the turnaround at Barclays, for future value creation, and at the appropriate time, a reconsideration of the dividend.

I would like to take this opportunity to thank our Board for their contribution to our company. I am also grateful for the enormous progress made by our senior management team, and thank our staff across the organisation for coming every day to serve our customers, without whom we would not have an enterprise. Finally, I would pay respect to our shareholders for their ongoing patience and support.

John McFarlane
Chairman

Chief Executive's review

...positioning ourselves for growth while delivering
a positive impact on society.

Summary

We will stay wedded to a fundamental principle of finance: earn and maintain the trust of your customers and clients. Just as 327 years ago when we were founded, Barclays will be known for the way in which we do business, the integrity with which we operate, having a positive impact on society, and delivering shareholder value.

For further information, see home.barclays/annualreport

A year ago we laid out our intention to accelerate the restructuring of Barclays and refocus our business as a transatlantic, consumer, corporate and investment bank, anchored in the two financial capitals of the world, London and New York.

I am pleased to report that the strategic actions we have undertaken in 2016 have allowed us to make strong progress against this agenda, including: reorganising our business into Barclays UK and Barclays International; renewing our commitment to operate a leading global corporate and investment bank; reducing our stake in Barclays Africa, over time, to a non-consolidated level; and accelerating the run down of our Non-Core assets.

Barclays UK and Barclays International are doing well, our Corporate and Investment Bank has solidified its position in the bulge bracket, our Non-Core run-down is ahead of schedule, and we expect to close that unit in the middle of 2017. We are also on track to complete the planned sell-down of our Barclays Africa stake to a non-consolidated level in due course. Certain legacy conduct issues remain and we intend to make further progress on them.

In short, we have accomplished a lot in a year, and I am thankful to each and every one of our colleagues who have made this possible. Their efforts mean that, in 2017, we can begin to move on from the restructuring of Barclays, shifting our focus solely to the future, and in particular to how we can generate attractive, sustainable, and distributable, returns for you, our shareholders.

This means increasing management focus on Barclays UK and Barclays International, the future of your firm. Together, they encompass a diverse set of market-leading consumer and wholesale businesses. From retail and business banking operations and our merchant acquiring business in the UK; to our corporate and investment banking and cards businesses in the US. Barclays UK and Barclays International are diversified by product, by customer and client, by currency and by geography. We deliver everything from institutional advisory to international cards and payments; from equity capital markets to corporate lending; from macro markets execution to mortgages.

We have accomplished a lot in a year, and I am thankful to each and every one of our colleagues who have made this possible. Their efforts mean that, in 2017, we can begin to move on from the restructuring of Barclays, shifting our focus solely to the future, and in particular to how we can generate attractive, sustainable, and distributable, returns for you, our shareholders.

It is worth noting that just over half of our income in 2016 was from our consumer businesses, and just under half from our wholesale businesses. This balance between the two is a huge strength for Barclays, giving us opportunities for growth across a wide waterfront, and resilience in earnings if one side of the mix comes under pressure. I firmly believe that this model gives us the capacity to generate strong sustainable returns for you, our shareholders, through any cycle, especially with the reinvestment capacity we expect to generate through cost savings from the single core operational foundation that we are building.

Operational and technological strength is going to be a key competitive advantage for any global bank in the future. And so our intent is to build Barclays on a foundation of world class core operations and technology. This will strengthen our core processes, provide our businesses with the ability to use data in new and innovative ways, allowing us to fundamentally rethink the way we run Barclays, and how we serve our customers and clients. Upon this foundation, we can generate efficiency from scale while at the same time ensuring that we deliver world-class customer experience which is key to driving loyalty and long-term growth.

As we complete the restructuring of our bank we will stay wedded to a fundamental principle of finance: earn and maintain the trust of your customers and clients. Just as 327 years ago when we were founded, Barclays will be known for the way in which we do business, the integrity with which we operate, having a positive impact on society, and delivering shareholder value.

We will do that through providing great service, as well as playing our full part in the communities in which we live and work. I am very proud in particular of how, following the EU referendum last June, Barclays continued to be a constructive partner to our customers and clients, and to the Government, as we dealt with the initial impact of that decision.

We stayed truly open for business throughout 2016, lending £3.6bn to small and medium-sized businesses in the UK. We wrote nearly £19bn of mortgages to almost 90,000 households across the country, including to over 18,000 first-time buyers. We processed some £260bn of payments for consumers and businesses in the UK, with £1 in every 3 spent on cards going through our systems. We enhanced our customers' experiences, by introducing market-leading innovations like voice security, contactless cash, a new direct investing platform, and our collect cash management service for businesses.

I was particularly proud when we became the first major UK bank to run TV advertising on how people can protect themselves from fraud. We also helped to up-skill 1.7 million people through a range of regional partnerships and our LifeSkills programme. More than 43,000 colleagues also contributed 212,000 hours of time volunteering for a range of charities and causes.

Our people, and their commitment to Barclays' customers and clients, are the reason why I have such confidence in our capacity to realise our potential as a company. Regardless of role or location, seniority or business unit, I am continually amazed by the talent that we have within Barclays and the dedication people show to this institution. That dedication is one of the company's strongest assets, and it is because of it that bright years lie ahead for our bank. I

look forward to discussing this future with you when we meet at our AGM.

James E. Staley
Group Chief Executive

Barclays PLC Annual Report 2016 | 5

Operating environment

Our decision making considers developments

in the external environment...

Summary

As a consumer, corporate and investment bank with operations around the world, Barclays is impacted by a wide range of macroeconomic, political, regulatory and accounting, technological, social and environmental developments. We continue to live in a period of significant change and uncertainty, which requires us to be vigilant in our review and assessment of the operating environment and as nimble as possible in the delivery of our strategy.

Global economic growth has been modest in recent years and 2016 was characterised by ongoing uncertainty with periods of volatility in global markets and a continuation of the low interest rate environment. A low growth, low interest rate environment makes income growth more challenging.

We experienced significant developments in the global political environment in 2016, including the UK's vote to leave the EU in June and the presidential election in the US in November. Significant policy uncertainty remains around the implications of these events and there is further potential political change in 2017 with several major European countries holding elections. We remain alert to the risks, including those posed by policy-induced disruptions of global trade and investment, as well as the impact of current and potential geopolitical tensions. However, we do not see these events impacting the broad direction of our strategy set out in March 2016 to be a leading transatlantic bank with global reach.

Over recent years a significant objective of change in financial regulation has been to create a stronger banking environment through enhancing capital, liquidity and funding in the sector. A sounder banking environment has been further supported by an increased focus on stress testing, with the UK regulatory authorities completing their third comprehensive stress testing of the sector in November 2016. A key element of the regulatory agenda, known as Structural Reform, requires banks to ring-fence certain activities and these requirements, particularly in the UK and US, were reflected in our strategy update in March 2016. The implementation of these changes requires significant focus and we continue to execute our approach in accordance with regulatory timelines. An additional consideration relates to future accounting changes, specifically the introduction of IFRS9 in 2018 which will see significant change in the accounting for impairment.

Regulatory scrutiny around conduct remains in sharp focus and we continue to embed a conduct-focused culture across the organisation, through the delivery of our strategy, in order to drive positive outcomes for all our stakeholders. We are also working to put legacy conduct issues behind us and the FCA's proposed deadline of the end of June 2019 for PPI complaints, although not yet confirmed, is a significant development.

Technological change continues at pace, significantly impacting customer expectations and leading to the ongoing review of established banking operating models and systems.

One of the key benefits of digitisation and the growth in mobile banking has been improved customer and client experiences as transactions and interactions become faster and more convenient.

However, the rapid speed of innovation also presents challenges. We have seen agile, digital players entering the market while new avenues for increasingly sophisticated fraudulent and criminal activity have been created. We continue to develop new technology and invest in digital and mobile capabilities to improve and differentiate our offering, while remaining constantly vigilant to, and investing in, fraud prevention, cyber risk, IT security and the appropriate management of data.

During 2016 there has been activity to further the financial sector's understanding of the potential financial, operational and strategic implications of climate change. In addition, there has been an increase in the level of interest in companies' responses to climate change, largely driven by the ratification of the UN Climate Change Conference requirements and publication of draft recommendations by the Financial Stability Board's Taskforce on Climate-related Financial Disclosures for annual reports.

Developments in the external environment present both opportunities and risks. Without active risk management to address these external factors our long-term goals could be adversely impacted. Our approach to risk management and material existing and emerging risks to the Group's future performance are outlined in the Risk Review section on page 137.

Our business model

we create value for our stakeholders and deliver

broader economic benefits to society

home.barclays/annualreport

Barclays PLC Annual Report 2016 | 9

Our strategy

...where success for us is to be a leading, diversified, transatlantic bank.

Summary

Our goal is to become the bank of choice by providing superior services to customers and clients and supporting our stakeholders via a commercially successful business that generates long-term sustainable returns.

The strategy of Barclays PLC Group is to build on our strength as a transatlantic consumer, corporate and investment bank, anchored in our two homes markets of the UK and US, with global reach. Our two clearly defined divisions, Barclays UK and Barclays International, provide diversification by business line, geography and customer, enhancing financial resilience and helping to contribute to the delivery of consistent returns through the business cycle. We have a strong core business with exciting prospects, well positioned to deliver long-term value for our shareholders.

Consistent with the objective of delivering long-term sustainable value for all our stakeholders, we have developed our Shared Growth Ambition – our approach to citizenship and the sustainability of the business model we operate. The aim is to make decisions and do business that provides our clients and customers, and the communities which we serve, with access to a prosperous future.

The delivery of our strategy is underpinned by the energy, commitment and passion of our people, and we are clear on our common purpose: to help people achieve their ambitions, in the right way. Our shared values inform the way we work and how we act, guiding the choices we make every day.

Building the Barclays of the future

Edgar Filing: BARCLAYS PLC - Form 6-K

In March 2016 we announced the following actions to materially progress our restructuring and lay the foundations for increased stability and improved performance:

§ the creation of two clearly defined divisions, Barclays UK and Barclays International, consistent with the regulatory requirements of ring-fencing in the UK

§ the sell-down of our 62.3% stake in Barclays Africa Group Limited (BAGL) to a non-controlling, regulatory deconsolidated, position

§ a one-time increase to Barclays Non-Core, with a plan to accelerate the run down.

The priorities that emerged from our March 2016 announcement can be broadly summarised as:

§ simplifying our core business

§ accelerating the run down of our Non-Core operations

§ continuing to address our remaining legacy conduct issues and improving our control environment.

Simplifying our core business

Our two divisions represent a balanced business mix that we believe helps to enhance our resilience to developments in the external environment, while remaining focused on helping our customers and clients achieve their ambitions.

Barclays UK is our UK consumer and business bank differentiated by scale and proven digital capability. Barclays UK will become the ring-fenced bank for the UK during 2018, providing transactional, lending and investment products and services to over 24 million Personal, Wealth and Business Banking customers and clients. For further information on Barclays UK's performance, please see page 26.

Barclays International is our diversified transatlantic wholesale and consumer bank which will be housed within Barclays Bank PLC, the future non-ring-fenced bank. We seek to compete in markets where we have the competitive advantage and provide best-in-class service to our clients and customers. On 1 July 2016 our US Intermediate Holding Company (IHC) became operational, as part of Barclays International. For further information on Barclays International's performance, please see page 32.

Our objective is to maintain solid investment grade ratings for our rated entities.

Barclays UK and Barclays International will be supported by a Group Service Company, a subsidiary which houses the majority of Barclays' Group Functions and the Chief Operating Office, which includes Operations and Technology.

Further details on the structure of the Group under Structural Reform can be found in the Supervision and Regulation section on page 236.

We are also reducing our stake in Barclays Africa Group Limited to a non-controlling, regulatory deconsolidated position, subject to required approvals. Having completed the first sell-down, to 50.1%, in 2016, we expect to continue to reduce our ownership and will execute this change in our investment responsibly.

Accelerating the run down of our Non-Core operations

Our Non-Core businesses act as a significant drag on Group profitability and exiting these businesses will enable us to focus on a simplified Group, centred on our key areas of strength. Over the year we have continued to run down our Non-Core business, reducing risk weighted assets and strengthening our Common Equity Tier 1 ratio in the process.

We have made strong progress in executing our strategy and are fully committed to the early closure of Non-Core in June 2017. For further details please refer to the Non-Core Performance Review on page 36.

Continuing to address remaining legacy conduct issues and improving our control environment

We are working hard to resolve our remaining legacy conduct matters as soon as is practical, while improving our control environment.

We aspire to be one of the world's most respected and well-regarded banks. We put our customers and clients at the heart of everything we do and seek to strengthen trust in the profession of banking, using transparency and integrity to engender the trust of our customers, clients and wider society.

[Our strategy](#)

where success for us is to be a leading,
diversified, transatlantic bank.

Risk management

We balance risk against opportunity

Summary

Risk management at Barclays is directed and overseen by the independent Risk Management function. The function's primary roles are to define the level of risk taking for the Group in normal and stressed economic conditions and to oversee that business activities are undertaken to be consistent with these levels.

For further information, see home.barclays/annualreport

The Risk Management function is accountable to the CEO and the Risk Committee of the Board. In 2016, Barclays financial condition and our results were subject to various external developments, including market volatility related to the UK's vote to leave the EU in June, as well as reflationary expectations related to the US elections in November. In 2017, we will continue to monitor the external environment, including: macro-economic risks in the UK and Europe, heightened risk of global reflation and the possible end of central bank quantitative easing, as well as ongoing regulatory developments.

Barclays engages in activities which entail risk taking, every day, throughout its business. The firm is vulnerable to credit losses in its lending and banking transactions. It experiences gains and losses from market risk in its traded positions. It is subject to treasury risk (including liquidity, leverage and capital gains or losses) in its financial management. Many important activities are managed and controlled through models, which introduce risk in themselves. Across its business, the firm is subject to operational risks, including from fraud, and process or technology failure. Our reputation is important when it comes to trust in the firm's integrity and competence. In addition Barclays may, in its activities, create conduct risk in relation to its customers, clients and the markets in which it operates. Lastly, Barclays faces the risk of being penalised for not meeting its legal obligations.

The firm sets a risk appetite based on current and anticipated exposures, and views on the evolution of markets and the economy in normal and stressed conditions. In effect, the risk appetite is designed to measure the amount of market volatility and stress the firm can withstand, while still meeting its financial goals and regulatory requirements. This enables the Risk function to set, monitor and enforce appropriate risk limits.

The overall governance of Risk is defined in an Enterprise Risk Management Framework (ERMF), which describes how Barclays identifies and manages risk. The framework defines the Principal Risks to which the firm is subject to (see table overleaf). Model risk, reputation risk and legal risk are newly classified as Principal Risks in the latest version of the ERMF, reflecting the heightened importance of these risk types in the current environment. Other risks may also arise from time to time, for example, the firm is also subject to political and regulatory risks. While these risks are not considered Principal Risks, they are also subject to the principles set out in the ERMF and overseen by Risk Management.

The firm sets a risk appetite based on current and anticipated exposures, and views on the evolution of markets and the economy in normal and stressed conditions.

All colleagues have a specific responsibility for risk management under a Three Lines of Defence model. The First Line includes customer and client-facing colleagues and supporting functions. The role of the first line is to identify and manage risks. The Risk and Compliance functions form the Second Line. They set and monitor compliance with the rules and limits needed to stay within risk appetite. Finally, Internal Audit is the Third Line, who provide assurance to the Board on the effectiveness of risk management. The ERMF also sets out Risk governance principles and committee structures. The ERMF is approved by the Board.

Risk management

We balance risk against opportunity

Principal Risks are overseen by a dedicated Second Line function^a

Risks are classified into Principal Risks, as below

How risks are incurred/managed

Credit Risk The risk of loss to the firm from the failure of clients, customers or counterparties, including sovereigns, to fully honour their obligations to the firm, including the whole and timely payment of principal, interest, collateral and other receivables.

We incur credit risk when we lend money, e.g. to individual customers (including mortgages, credit cards and personal loans), small and medium-sized businesses, loans to large companies; and from derivatives contracts.

Market Risk The risk of loss arising from potential adverse changes in the value of the firm's assets and liabilities from fluctuation in market variables including, but not limited to, interest rates, foreign exchange, equity prices, commodity prices, credit spreads, implied volatilities and asset correlations.

We incur market risk via trading activities with clients and via the liquid assets Barclays holds to ensure we can meet our short-term obligations.

Treasury and Capital Risk Liquidity Risk:

We can incur liquidity risk in the event of severe financial market disruptions or Barclays idiosyncratic events that impede the bank's ability

The risk that the firm is unable to meet its contractual or contingent obligations or that it does not have the appropriate amount, tenor and composition of funding and liquidity to support its assets.

to secure funding.

Capital risk is mainly due to large unexpected losses, which can arise, e.g., from economic or market events or fines. Changes in regulations can also affect the assessment of capital adequacy.

Capital Risk:

The risk that the firm has an insufficient level or composition of capital to support its normal business activities and to meet its regulatory capital requirements under normal operating environments or stressed conditions (both actual and as defined for internal planning or regulatory testing purposes). This includes the risk from the firm's pension plans.

Interest rate risk arises because assets, such as loans to customers, and liabilities, such as deposits, carry different interest rates. Losses can occur when interest rate changes affect the performance of assets and liabilities differently. Interest rates have different impacts on assets and liabilities due to contractual differences, e.g. fixed vs floating interest rate profiles.

Interest Rate Risk in the Banking Book:

The risk that the firm is exposed to capital or income volatility because of a mismatch between the interest rate exposures of its (non-traded) assets and liabilities.

Operational Risk

The risk of loss to the firm from inadequate or failed processes or systems, human factors or due to external events (e.g. fraud) where the root cause is not due to credit or market risks.

Operational risks are inherent in the firm's activities, and can arise, e.g. from fraud, process or technology failures.

Model Risk

The risk of the potential adverse consequences from financial assessments or decisions based on incorrect or misused model outputs and reports.

Model risk is incurred through model misuse and poorly designed/implemented models.

Reputation Risk

The risk that an action, transaction, investment or event will reduce trust in the firm's integrity and competence by clients, counterparties, investors, regulators, employees or the public.

Reputation risk is managed by maintaining a positive and dynamic culture within Barclays, ensuring that we act with integrity, enabling strong and trusted relationships to be built with customers and clients, colleagues and broader society.

**Conduct
Risk**

The risk of detriment to customers, clients, market integrity, competition or Barclays from the inappropriate supply of financial services, including instances of wilful or negligent misconduct.

All colleagues are responsible for the management and mitigation of conduct risk. The Compliance function sets the minimum standards that are required to ensure this risk is managed and provide oversight to ensure these risks are effectively managed and escalated where appropriate.

**Legal
Risk**

The risk of loss or imposition of penalties, damages or fines from the failure of the firm to meet its legal obligations including regulatory or contractual requirements.

The Group conducts diverse activities in a highly regulated global market and therefore is exposed to the risk of fines and other sanctions relating to the conduct of its business. The Group General Counsel and the Legal function support colleagues to mitigate legal risk.

Note

a Legal risk is overseen by the Group General Counsel and the Legal function, which are not part of the Three Lines of Defence.

In 2016, markets experienced three distinct phases of volatility. At the start of the year, fears of a slowdown in China led to a sharp decline in global interest rates and equity markets. Mid-year, closer to home, the UK's vote to leave the EU led not just to volatility in financial markets but also drove a steep decline in Sterling to levels not seen in 30 years. Moreover, the referendum has sparked fears, which still persist, of resultant real weakness in the UK economy. Toward the end of the year, US election results buoyed international equity markets, and sparked rate rises on the anticipation of global reflation. The firm has aimed to prudently manage its exposures to financial markets over the last year, consistent with our risk appetite and engagement in global financial markets. The results of the UK referendum and the US elections will likely be felt over 2017 and beyond, and require continued care in managing the firm's exposures, not just in financial markets but in credit portfolios. In addition to financial risk, the firm continues to monitor its risk processes and operational risks closely.

Focus areas in 2016 have included credit risk, with a management review of the UK and US cards portfolio impairment modelling leading to process enhancements, and operational risk focus areas including technology and information security. The number of well-publicised instances of cyber-attacks and related fraud has been increasing in both scope and size, placing a greater need to increase protection. Barclays also continues to pay careful attention to the management of conduct and reputational risks (please see pages 160 and 161).

All colleagues have a specific responsibility for risk management under a Three Lines of Defence model.

The firm continues to respond to evolving regulatory requirements, including in relation to IFRS9, stress testing, UK Structural Reform, and the institution of the Intermediate Holding Company (IHC) in the US. These changes require considerable risk management effort and monitoring (please see material existing and emerging risks outlined in the Risk Review section on page 137). In particular, IFRS9 implementation is expected to result in higher impairment loss allowances that are recognised earlier, on a more forward-looking basis and on a broader scope of financial instruments. Finally, in 2016, the firm commenced the re-organisation of the risk management function by legal entity. This is being done in compliance with the requirements of Structural Reform and to support the IHC.

In summary, the scale, complexity and requirements of Risk Management have been steadily increasing since the financial crisis of 2008-2009, and will continue to do so. At the same time, the market and economic environment are showing greater signs of flux, after a relatively long period of improving credit conditions and quiescent volatility. The combination of these factors will likely pose important challenges for Risk Management in 2017.

C.S. Venkatakrisnan

Chief Risk Officer

Our key performance indicators

and positive outcomes for our stakeholders
are integral to our long-term strategic success.

Summary

In 2013, we introduced a Balanced Scorecard to allow delivery of our strategy to be measured over a five-year time horizon. As we are now approaching the end of this period, we believe that a revised approach to measuring financial and non-financial performance, aligned to the strategic update announced on 1 March 2016, is more appropriate.

We comment in this section on our performance against the Balanced Scorecard in 2016, and introduce the revised performance measurement framework that we will use going forward to assess progress against our strategy.

In 2016, the Balanced Scorecard was used by the organisation as part of its performance management framework, to assess our performance against nine specific metrics that were designed to allow progress against our strategy to be measured. These metrics were aligned to five categories: Company, Customer and Client, Colleague, Citizenship and Conduct. In revising our approach to performance measurement going forward, we have kept elements of the Balanced Scorecard consistent, such as the objective of delivering positive outcomes for all our stakeholders and many of the metrics, but broadened the scope of the evaluation to produce a more detailed and informed reflection of how we are delivering against our strategic objectives.

Overall in 2016, the majority of these Balanced Scorecard metrics remained broadly stable, with the exception of our CET1 ratio and the percentage of women in senior leadership, both of which improved. Below you will find a summary of our performance in 2016 against the each of the Balanced Scorecard categories.

Company: our financial metrics were revised within the Balanced Scorecard at the beginning of 2016 when we announced our intention to simplify our financial targets for Barclays PLC Group to focus on three key metrics. We aligned our focus to Return on Tangible Equity, from Return on Equity, taking on board the feedback from our

Edgar Filing: BARCLAYS PLC - Form 6-K

stakeholders and aligning ourselves to how many of our peers report their returns. We are also committed to the continued management of our cost base, as a proportion of income, and incorporated Cost: Income ratio as a new metric. Finally, we continue to focus on our CET1 ratio, by driving the capital strength and resilience of Barclays and ensuring a safer bank for all of our stakeholders. Further detail on how we performed against our financial metrics under our revised performance measurement framework can be found on page 19.

Delivery of 2016 Barclays PLC Group performance against our Balanced Scorecard

	Primary metrics	2014 Actual	2015 Actual	2016	2018 Target	
Company^a	Return on Tangible Equity	Excluding notable items ^b	5.9%	5.8%	4.4%	N/A
		Including notable items	(0.3%)	(0.7%)	3.6%	
	Cost: Income ratio ^c	Excluding notable items ^b	70%	69%	72%	N/A
		Including notable items	81%	81%	74%	
	Common Equity Tier 1 ratio	10.3%	11.4%	12.4%	N/A	
Customer and Client	Net Promoter Score (NPS)	4th	4th	4th	1st	
	Client Franchise Rank (CFR)	5th	5th	5th	Top three	
Colleague	Sustained engagement of colleagues score	72%	75%	75%	87-91%	
	% of women in senior leadership	22%	23%	24%	26%	
Citizenship	Citizenship Plan initiatives on track or ahead of plan	11/11	10/11	8/10	Plan targets	
Conduct	Conduct Reputation (YouGov survey)	5.3/10	5.4/10	5.4/10	6.5/10	

Note:

a New Company targets were introduced on 1 March 2016. The Adjusted Return on Equity metric was replaced with Return on Tangible Equity and the Cost: Income ratio was introduced.

b Notable items comprise provisions for UK customer redress of £1bn (2015: 2.8bn), a £615m (2015: £nil) gain on disposal of Barclays' share of Visa Europe Limited, and an own credit loss of £35m (2015: gain of £430m).

c Cost: Income ratio for the Balanced Scorecard expressed as total operating expenses of the Group, including Africa, divided by the total income of these businesses (both excluding notable items).

Customer and Client: despite improvements to our NPS across most consumer businesses, our ranking of 4th relative to our peer group remained the same, as improvements continued across the industry. We focused on making further enhancements to customer journeys and strengthening the level of engagement we have with customers, while continuing to offer innovative products and services that meet their needs. We were pleased that our Client Franchise Rank remained flat on 2015, demonstrating the strength of our banking and markets franchises in our home markets of the UK and US, despite the execution of our strategic realignment announced on 1 March 2016. Further detail on how we delivered positive outcomes for Customers and Clients under our revised performance measurement framework can be found on page 20.

We remain resolutely focused on creating an environment in which our colleagues feel enabled to fulfil their potential.

Colleague: we saw an improvement in the gender diversity of our leadership, with initiatives to promote diversity proving successful. Our colleague engagement remained constant despite some significant organisational change. We remain resolutely focused on creating an environment in which our colleagues feel enabled to fulfil their potential. Further detail on how we delivered

Citizenship: previously, performance was measured against 11 metrics embedded in the 2015 Citizenship Plan, which has now been completed. In June 2016, Barclays launched the Shared Growth Ambition and we have developed new metrics as part of the evolution of our performance measurement framework. 2016 is a transition year in moving to our new approach, with distinct performance frameworks for Barclays Group (excluding Africa) and Barclays Africa.

For Barclays Group (excluding Africa), performance was assessed against six initiatives: three reflecting the new Shared Growth Ambition focus areas of access to financing, access to financial and digital empowerment and access to employment; and three initiatives that are consistent with the previous Citizenship Plan, namely Barclays Way training, carbon emissions reduction and payment of our suppliers on time. We exceeded our objectives on all six of these initiatives in 2016 (see page 23 for more detail).

Barclays Africa has a Citizenship strategy that is closely aligned, but focused on four regionally specific objectives. In 2016, Barclays Africa delivered strong performance on investment in education and SME financing, both of which were on track for 2016. However, performance on two initiatives in Africa was off-track due to external challenges which impacted the delivery of planned employability and financial inclusion interventions, and resulted in an overall Group score of 8/10 for Citizenship on the Balanced Scorecard.

Conduct: our Conduct Reputation measure was flat on 2015, at 5.4/10, as stakeholder audience perceptions weakened slightly across the components of the Conduct measure, with the exception of Has high quality products and services. While below our expectations,

positive outcomes for Colleagues under our revised performance measurement framework can be found on page 22.

overall performance on the Conduct reputation measure remains stronger than two of the three prior years and reflects our ongoing commitment to promoting a positive conduct and values-based culture. In 2016, the Group continued to incur significant costs in relation to litigation and conduct matters and resolution of these matters remains a necessary and important part of delivering the Group's strategy, together with an ongoing commitment to improve oversight of culture and conduct. As we transition to our revised performance measurement framework (see page 18 for more detail), how we behave through our conduct and culture underpins our objective of achieving positive outcomes for all our stakeholders and is embedded across the organisation.

Supporting the UK economy

Barclays added £8.5bn^a in economic benefit to the UK through our employment, supply chain and purchasing power, which creates a positive ripple throughout the economy. This is a bigger benefit than the entire UK pharma, IT or aviation industry.

Note

a From April 2015 to March 2016.

Our key performance indicators

and positive outcomes for our stakeholders are integral to our long-term strategic success.

Revised performance measurement framework

Evolving our approach to measuring progress towards our strategic goals and delivering positive outcomes for all our stakeholders.

In line with our objective of delivering a simplified bank, focused on delivering long-term sustainable value for all our stakeholders through the strategic actions announced on 1 March 2016, we are now evolving our approach to performance measurement to reflect better the way in which management monitors the performance of the Group. The framework incorporates a balance of key financial performance metrics, while broadening our approach to strategic non-financial measures, and represents an evolution from the Balanced Scorecard that has been used since 2013.

Our revised approach retains a similar focus on achieving positive outcomes for our key stakeholders. However, rather than focusing on a few narrowly defined targets to measure our performance, the revised approach allows for a more holistic assessment, and provides a better reflection of our progress towards the strategic goals of the organisation.

The revised approach will support the sustained delivery of our strategy over the medium to long-term and will influence executive remuneration from 2017. Our strategic success is intrinsically linked to the positive impact we have on all our stakeholders and society as a whole.

Financial performance metrics

The financial metrics are aligned to Barclays PLC Group Financial Targets: Group Return on Tangible Equity (RoTE) to converge with Core RoTE; Cost: Income ratio below 60%; and CET1 ratio 150-200bps above the minimum regulatory level, and will be reported quarterly as part of our financial results. Achieving these three targets within a reasonable timeframe is consistent with our aim of generating long-term sustainable returns for the shareholders of Barclays PLC Group.

Strategic non-financial performance measures

Non-financial measures remain an important element of how we evaluate our strategic performance, in achieving our ambition of delivering a sustainable business for all our stakeholders. We focus on the impact we make on our customers and clients, colleagues, and the benefit we bring to society via our new citizenship strategy – our Shared Growth Ambition. These measures are underpinned by how we behave towards all our stakeholders, through our conduct and our culture.

To assess our performance, we draw on a broad range of information sources that are aligned to our management reporting framework, including internal management reports and external measures, ensuring a balanced view. As our management reporting framework develops, the sources may also evolve, but we will retain a consistent approach,

with quantitative and qualitative evaluation to provide context to the performance assessment.

Financial performance metrics

Key outcomes we will look to achieve include:

Achieving Barclays PLC Group financial targets within a reasonable timeframe, consistent with our aim of generating long-term sustainable returns for the shareholders

How we measure success

Current financial targets that we aim to achieve within a reasonable timeframe:

§ Group Return on Tangible Equity (RoTE) to converge with Core RoTE

§ Cost: Income ratio below 60%

§ CET1 ratio 150-200bps above the minimum regulatory level.

How and why we are renewing our approach

On 1 March 2016, we set out three financial targets to allow shareholders to track our progress towards our strategic objectives. Our revised approach aligns our financial performance metrics to the Barclays PLC Group targets, which are reported quarterly in line with our financial results.

How we are doing

3.6%

Group Return on Tangible Equity

(2015: (0.7%))

8.4%

Core Return on Tangible Equity

(2015: 4.8%)

RoTE measures our ability to generate acceptable returns for shareholders. It is calculated as profit after tax attributable to ordinary shareholders, divided by average shareholders' equity for the year, excluding non-controlling interests and other equity instruments adjusted for the deduction of intangible assets and goodwill.

Group RoTE increased to 3.6% (2015: (0.7%)) predominately reflecting the significantly lower impact of notable items in 2016, as profit before tax increased 182% to £3,230m. Notable items totalled a net loss before tax of £420m (2015: £3,330m) comprising provisions for UK customer redress of £1,000m (2015: £2,772m), a £615m (2015: £nil) gain on disposal of Barclays' share of Visa Europe Limited and an own credit loss of £35m (2015: gain of £430m). Excluding notable items, Group RoTE was 4.4% (2015: 5.8%).

Core RoTE increased to 8.4% (2015: 4.8%), or 9.4% (2015: 11.2%) excluding notable items, on an average tangible equity base that was £4.2bn higher at £41.0bn. While we expect Group and Core RoTE to converge over time, Group RoTE in 2016 was significantly impacted by the loss before tax of £2,786m (2015: £2,603m) incurred by Non-Core as its run-down was accelerated.

76%

Cost: Income ratio

(2015: 84%)

Cost: Income ratio measures operating expenses as a percentage of total income, and is used to gauge the efficiency and productivity of our business.

Group Cost: Income ratio reduced to 76% (2015: 84%) primarily as a result of lower litigation and conduct charges, as total operating expenses declined 12% to £16,338m. Group Cost: Income ratio, excluding notable items, was 73% (2015: 70%), with the increase primarily driven by negative income in Non-Core reflecting the acceleration of the run-down. Core Cost: Income ratio, excluding notable items, was 61% (2015: 62%), as Core income increased by 7% to £22,035m, while total operating expenses increased by 6% to £13,507m. We are on track to achieve our Group target of below 60% over time.

Our key performance indicators

and positive outcomes for our stakeholders
are integral to our long-term strategic success.

12.4%

Common Equity Tier 1 (CET1) ratio

(2015: 11.4%)

The CET1 ratio is a measure of the capital strength and resilience of Barclays. The Group's capital management objective is to maximise shareholder value by prudently managing the level and mix of its capital to: ensure the Group and all of its subsidiaries are appropriately capitalised relative to their minimum regulatory and stressed capital requirements; support the Group's risk appetite, growth and strategic options, while seeking to maintain a robust credit proposition for the Group and its subsidiaries.

The ratio expresses Barclays' capital as a percentage of risk weighted assets (RWAs), as defined by the PRA, in the context of Capital Requirements Directive IV (CRDIV - an EU Directive prescribing capital adequacy and liquidity requirements), and is part of the regulatory framework governing how banks and depository institutions are supervised.

The Group's CRD IV fully loaded CET1 ratio increased to 12.4% (2015: 11.4%) due to an increase in CET1 capital to £45.2bn (2015: £40.7bn), driven largely by profits generated during the year. This was partially offset by an increase in RWAs to £366bn (2015: £358bn), driven by the appreciation of US Dollar, Euro and South African Rand against Sterling.

We have increased our expected end-state management buffer from a 100-150bps range to 150-200bps above the minimum regulatory level, providing 400-450bps buffer to the Bank of England stress test systemic reference point. On this basis we currently expect our end-state CET1 ratio to be in a range of 12.3-12.8% and we remain confident in our capital trajectory.

For full details of our financial performance,
please refer to the financial statements from page 267.

**Strategic non-financial performance
measures: Customer and Client**

Key outcomes we will look to achieve include:

- § Building trust with our customers and clients, such that they are happy to recommend us to others
- § Successfully innovating and developing products and services that meet their needs
- § Offering suitable products and services in an accessible way, ensuring excellent customer and client experience.

How we measure success

Progress towards these outcomes is informed by a number of sources including internal dashboards, regular management reporting materials and external measures, ensuring a balanced review of performance. Evaluation includes, but is not limited to:

- § Net Promoter Scores (NPS)¹
- § Client rankings and market shares
- § Complaints performance
- § Lending volumes provided to customers and clients.

How and why we are renewing our approach

These measures build on the previous Balanced Scorecard metrics for Customer and Client, defined as Relationship NPS and Client Franchise Rank. Our revised approach allows for a broader consideration of how well we are serving our customers and clients, including our complaints performance and the volume of lending we have provided to support consumers and businesses, as well as examples of innovation.

How we are doing

In 2016, we focused on delivering excellent customer and client experience, by offering innovative products and services to meet their needs in an appropriate and accessible way, while also promoting fair, open and transparent markets. Although our NPS increased across many of our businesses, customer expectations also continued to increase, meaning continual improvements to our customer journeys across our businesses are necessary. And while the repositioning of our CIB involved challenging strategic choices to reduce our activities in certain products and geographies, our client rankings and market shares demonstrate the strength of our proposition in our home markets of the UK and US. Complaints reduction remains a priority and we have more work to do, as can be seen from our position in the FCA complaint tables in the UK². This is a key focus area for management as part of our ongoing commitment to improve our oversight of conduct.

Net Promoter Scores¹

Relationship NPS (RNPS) across Barclays UK in 2016 reached a high of +13, an increase of 6 points compared to 2015, with more customers advocating our brands across key product categories, notably UK current accounts and UK credit cards. The continuous improvements we made to customer journeys through automation, digitisation and omni-channel capabilities were reflected in an average increase of five Transactional NPS (TNPS) points, with particularly strong scores in Barclays Mobile Banking and Pingit. Our Barclaycard International business also continued to have strong RNPS, driven by a clear focus on advocacy and improvements in our products and digital experience. Despite minor improvements to our NPS in business banking, we are intently focused on improving customer experience in 2017 to meet and exceed industry benchmarks. We are placing particular focus on our TNPS for business banking telephony and complaints, which are below expectations.

Client rankings and market shares

In Barclays International, within the Corporate and Investment Bank, we ranked in 2016: 5th by fee share, up from 6th in 2015, across our UK and US home markets in M&A, equity and debt capital markets and syndicated loan transactions (Dealogic) and 4th based on 2016 Global Fixed Income market share (Greenwich Associates). Among our largest UK corporate clients, 90% considered the service they receive from Barclays to be good, very good or excellent, broadly stable with 2015 (Charterhouse³).

Complaints

Underlying complaint volumes in Barclays UK reduced by 11% as a result of our ongoing focus on improving customer journeys. However, with PPI complaints increasing by 16%, total Barclays UK complaint volumes were up 1% year on year in 2016. Barclays International complaints increased 8%, mostly in our consumer business, driven by 6% growth in US credit card average open accounts, although complaints per account still remain close to an all-time

low.

Lending volumes

Barclays is an important provider of financial services to UK businesses – we provided around £70bn of loans, up 6%, and just over £3.6bn to SMEs, demonstrating our commitment to supporting growth in the UK. We also extended or renewed mortgage facilities worth nearly £19bn, up 8% year on year, to nearly 90,000 UK households. Building on the success of our digital consumer loan offering to existing customers, we recently became the first UK bank to offer instant business lending via a mobile app. And we processed one third of all payments made in the UK, through customer spending and our merchant acquiring network.

In 2016 we focused on delivering excellent customer and client experience, by offering innovative products and services to meet their needs in an appropriate and accessible way.

Making customers and clients lives easier

We are making our customers and clients lives much easier through pioneering innovation. For example, Barclays will be the first UK bank to offer a contactless mobile withdrawal service of up to £100 with the tap of a smartphone. We also launched our new online direct investing service (Smart Investor) and are the first high street bank to provide fully integrated banking and investments via online banking. Barclaycard also continued to lead in innovation, being the first of our competitors to launch a proprietary contactless Android capability through its app.

We also offered initiatives to help high-growth businesses flourish – for example, our Barclays Eagle Labs provided innovation hubs for pioneering businesses in bank branches around the UK (see case study on page 28). Our UK credit cards Specialist Support team won the Vulnerable Customer Support Initiative Award at the 2016 Collections and Customer Service Awards; testament to the significant work we have done to provide the best possible experience to customers in difficult situations.

Our customers and clients are at the heart of our purpose and strategy. For further information on our customer propositions provided via our two core divisions, Barclays UK and Barclays International, please refer to pages 26 to 35.

Notes

- 1 NPS is a ranking widely used in banking and other industries that facilitates comprehensive benchmarking and identifies best practice. Relationship NPS is measured at a business level, whereas Transactional NPS is measured for key customer journeys.
- 2 FCA reporting methodology changes were implemented for the second half of 2016, with reporting to commence from the end of February 2017.
- 3 Charterhouse Research Business Banking survey, 804 interviews with businesses in the UK turning over £25m-£1bn in 2016. Data is weighted to be representative of the UK business market. Percentage rating for overall service of bank named as main bank.

Our key performance indicators

and positive outcomes for our stakeholders are integral to our long-term strategic success.

Strategic non-financial performance measures: Colleague

Key outcomes we will look to achieve include:

Promoting and maintaining:

§ A diverse and inclusive workforce in which employees of all backgrounds are treated equally and have the opportunity to be successful and achieve their potential

§ Engaged and enabled colleagues

§ A positive conduct and values-based environment.

How we measure success

Progress towards these outcomes is informed by a number of sources including internal dashboards, regular management reporting and external measures, ensuring a balanced review of performance. Evaluation includes, but is not limited to:

§ Diversity and Inclusion statistics

§ Employee sustainable engagement survey scores

§ Conduct and culture measures.

How and why we are renewing our approach

These measures build on the previous Balanced Scorecard Colleague metrics, the sustainable engagement of colleagues and proportion of women in senior leadership. Our revised approach allows for broader consideration of the extensive initiatives at Barclays that promote a diverse and inclusive environment where colleagues are engaged and enabled, while maintaining a positive conduct and values-based culture.

Although this is evidence of good progress, we continue to strengthen our gender pipeline and enable women to fulfil their career aspirations.

Supporting our employees

We provide 2m hours of training to our employees.

How we are doing

In 2016, we received positive external recognition for our work towards promoting a diverse workforce, with initiatives ongoing across each of our diversity pillars. At the same time, engagement of our colleagues remained stable overall, with opportunities identified to enable our colleagues to deliver excellent performance. We also made solid progress in embedding a positive conduct and values-based environment which will continue to evolve into 2017 and beyond.

For further information on our People, please see page 95.

Diversity of our workforce and inclusion of our colleagues^a

In 2016 we remained committed to increasing the diversity of our workforce, with increased female representation at all levels remaining a key focus on our Board this remained at 31% (2020 target of 33%). Across our senior leadership, female representation was 24% (2018 Women in Leadership goal of 26%). Following the recommendations from the Hampton Alexander Review, from 2017, we will publish the combined number of women on the Group Executive Committee and their direct reports, which was 25% at the end of 2016 (2020 target of 33%). In addition, in 2016 we increased female graduate hires to 39% from 31% in 2014.

Although this is evidence of good progress, we continue to strengthen our gender pipeline and enable women to fulfil their career aspirations, through activity such as: the 2016 Barclays Global Women in Leadership summit, promoting Dynamic Working, our Encore! Returnship Programme, our HeForShe campaign and the Barclays Women's Initiatives Network.

The other pillars of our global Diversity and Inclusion strategy are:

§ **Disability:** Barclays Able to Enable Apprenticeship Programme launched in 2016 along with the Business Disability Forum awarding Barclays a score of 98%, the highest company rating in the history of the index

§ **LGBT:** Our Spectrum Allies programme includes over 7,000 colleagues supporting our LGBT agenda

§ **Multicultural:** 30% of our apprentices identify as Black, Asian and Minority Ethnic, 19% points above the national apprenticeship average

§ **Multigenerational:** Barclays Armed Forces Transitioning, Employment and Resettlement (AFTER) programme with nearly 400 ex-military hires since 2010.

External recognition from organisations such as Stonewall, The Times Top 50 Places to Work for Women, 100% on the Human Rights Campaign Corporate Equality Index and a Working Mother Media's Top Employer for Women, confirms the progress we have made. In 2017, we will focus on our multicultural agenda through the launch of our Embracing Us Campaign and partnerships with organisations including the Wall Street Project and Race for Opportunity.

Note

a Under Companies Act 2006, we are also required to report on the gender breakdown of our employees and senior managers – a narrower scope than our Women In Senior Leadership definition. Of our global workforce of 119,300 (60,100 male, 59,200 female), 756 were senior managers (531 male, 225 female), which include Officers of the Group, certain direct reports of the Chief Executive, heads of major business units, certain senior Managing Directors, and directors on the boards of undertakings of the Group, but exclude individuals who sit as directors on the Board of the Company.

Engaged and enabled colleagues

Engaged employees are critically important as they are more likely to remain at and recommend Barclays, and deliver beyond the day to day requirements of their role. By promoting internal mobility and career development, we hope to not only attract talented individuals, but retain them. In 2016 we launched our 'Apply Within' internal mobility campaign, increasing our rate of internal hiring to 48%, from 37% at the end of 2015 (excluding Africa).

This year our annual 'Your View' employee opinion survey became a quarterly pulse survey (excluding Africa) allowing for more real-time feedback on how it feels to work at Barclays. At the end of 2016, sustainable engagement of our colleagues remained stable at 75%. Areas of particular strength from the survey included: colleagues feeling proud of the contribution Barclays makes to the community and society (88% favourable, up 3% points on 2015) and employees feeling respected regardless of their job (83% favourable, up 4% points on 2015).

Areas of opportunity include removing the obstacles people face in doing their jobs well and ensuring people have the necessary tools and resources to achieve excellent performance (both 52% favourable). To address this we continue to look at ways to improve the simplicity and efficiency of our systems, tools and resources to drive a culture of excellence.

A positive conduct and values-based culture

Fostering the right culture at Barclays is critical to our success and we continue to build a positive conduct and values-based culture through initiatives aimed at strengthening the profession of banking. The 'Let's talk about how' performance management campaign, launched this year, supports the behaviours that underpin our values and reinforces the importance that we place on measuring and rewarding both what our employees deliver and how they deliver.

During 2016, we developed a culture measurement framework, anchored in our values, to manage and measure progress in embedding a positive conduct and values-based culture. The initial results demonstrate that we have been particularly successful in continuing to embed Stewardship and Integrity through focus on innovation and citizenship and by creating an environment where colleagues feel increasingly safe to speak up (81% favourable, up 6% points on 2015); and are unafraid to report unethical behaviour (first reported outcome 86% favourable). In addition, Service and Respect remain strong with 83% of colleagues agreeing with the proposition that Barclays is truly focused on achieving good customer and client outcomes and 89% of colleagues agreeing that Leaders at Barclays support diversity in the workplace. Excellence remains our biggest opportunity for improvement with 36% of colleagues agreeing that Barclays has been successful in eliminating obstacles to efficiency.

Strategic non-financial performance measures: Citizenship

Key outcomes we will look to achieve include:

- § Making decisions and doing business that provides our clients, customers, shareholders, colleagues and the communities which we serve with access to a prosperous future, through our Shared Growth Ambition

- § Proactively managing the environmental and societal impacts of our business.

How we measure success

Progress towards these outcomes is informed by an assessment against our Shared Growth Ambition. These are supplemented by internal dashboards and external measures. Evaluation includes, but is not limited to:

- § Delivery against our Shared Growth Ambition

- § Colleague engagement in Citizenship activities

- § External benchmarks and surveys.

How and why we are renewing our approach

Since 2012, we have measured progress against initiatives in our four-year Citizenship plan. In June 2016, we launched our new plan, the Shared Growth Ambition.

Our long-term aim is to create and grow a collection of products, services and partnerships that improve the lives of people in the communities which we serve, while providing the commercial return our shareholders deserve.

We are moving away from setting narrow targets for our Shared Growth Ambition, as we focus more on impact and use a broader range of quantitative and qualitative indicators to assess performance. We will continue to have targets for carbon emissions reduction and training on the Barclays Way. We aim to enhance the impact of our Shared Growth Ambition over time and may expand our assessment to include additional measures in future years.

LifeSkills

Since 2013, 3.6m young people have participated in the programme, gaining real-world experiences for a better future.

Our key performance indicators

and positive outcomes for our stakeholders are integral to our long-term strategic success.

How we are doing

We exceeded our own objectives on all six initiatives in the first year of our Shared Growth Ambition. Performance was ahead of plan against our internal milestones for three initiatives around access to financing, access to digital and financial empowerment and access to employment. We also exceeded our 2016 targets for Barclays Way training, carbon emissions reduction and payment of suppliers on time.

Access to financing: We continued to deliver innovative financing solutions for areas including renewable energy, water and low carbon technologies; social infrastructure; development institutions; and small business financing. Barclays delivered £21.1bn in financing for selected social and environmental segments across our business lines. This included a range of green bond transactions for corporate, supranational and municipal clients as well as lending facilities for renewable energy projects. For further information, please see our Environmental, Social, Governance (ESG) Supplement 2016 available at home.barclays/annualreport

Access to financial and digital empowerment: Inclusive financial systems are key to achieving economic and societal progress, but there can be several barriers to access. We believe digital offerings can help break down these barriers. We helped empower around 249,000 people in 2016 through initiatives such as Barclaycard Initial for those with a limited credit history; our Digital Eagles network, who are specially trained Barclays employees working to provide free technology support to customers and non-customers; and the continued development of learning platforms such as Financial Wings and Digital Wings.

Access to employment: In the 21st century new jobs are increasingly coming from fast-growing small businesses and entrepreneurs, which require support to scale up. Barclays is committed to working on both the supply and demand side enhancing supply by helping people gain access to skills, and facilitating demand by supporting entrepreneurs to drive job creation. We helped upskill over 1.7 million people in 2016, driven by a range of regional partnerships and our LifeSkills programme. We also launched Unreasonable Impact in partnership with Unreasonable Group, focused on scaling ventures that solve environmental and societal problems. The first cohorts in the UK started in September and in the US in November 2016, with Asia launching in 2017.

Business conduct and environmental impact

The Barclays Way outlines the Purpose and Values which govern our way of working across our business globally. It constitutes a reference point covering all aspects of colleagues working relationships. 99.6% of our colleagues completed annual training on The Barclays Way in 2016 (Target: above 97%).

We reduced carbon emissions by 15.8% against the 2015 baseline, making good progress against our new target of 30% reduction by 2018. We also achieved 88% on-time payment by value to our suppliers (Target: 85%).

Engaging our colleagues

Our people are Barclays' greatest ambassadors, contributing time, skills and expertise to create a positive and sustainable societal impact. In 2016 more than 43,000 colleagues participated in a range of causes, contributing over 212,000 hours, donating a total of almost £25m, including Barclays matched funding.

We reduced carbon emissions by 15.8% against the 2015 baseline, making good progress against our new target of 30% reduction by 2018.

Benchmarking our performance

In 2016, we improved our performance and maintained membership of both the Dow Jones Sustainability Index series, where our score increased by 2 percentage points to 84%, and the FTSE4Good Index series, with an absolute score of 3.9/5, up from 3.6 in 2015.

Further detail on policies, including Barclays Group Statement on Modern Slavery, can be found on our website at home.barclays/citizenship

We also provide disclosures on key initiatives aligned to the Global Reporting Initiative guidelines, in the Environmental, Social, Governance (ESG) Supplement 2016 available at home.barclays/annualreport

home.barclays/annualreport

Barclays PLC Annual Report 2016 | 25

Performance review

Barclays UK

Summary

Our aim at Barclays UK is to help people move forward. We do this by creating meaningful relationships with our customers, offering them relevant products and services, and by using our leading data and analytic capabilities to ensure suitability and delivery of excellent customer experience.

During 2018, Barclays UK will become the ring-fenced bank for the UK, continuing to provide transactional, lending and investment products and services to over 24 million Personal, Wealth and Business Banking customers and clients, via a separate legal entity.

Ashok Vaswani is the CEO for Barclays UK and has spent the last seven years with Barclays in a variety of roles following an extensive career at Citigroup. Ashok represents Barclays as a Non-Executive Director on the Board of Barclays Africa Group Limited and is a member

Market and environment in which the division operates

2016 was a year in which a number of significant events took place, such as the UK's vote to leave the EU and the presidential election in the US – both of which impacted our customers and our operating environment.

In addition, the UK retail banking environment is increasingly competitive and dynamic, and is experiencing significant regulatory and technological change. The speed of change and innovation is expected to continue to accelerate with the introduction of new data regulations, such as the Open Banking Standards. Unfortunately, we are also seeing significant growth in sophisticated cyber-fraud.

Customer expectations are also increasing. Our customers want prompt responses to their banking requirements. They want their transactions to be accurate and efficient, yet still have that personalised support during key moments in their lives.

Barclays UK has a tremendous opportunity to grow our business and generate sustainable returns by building meaningful relationships with the 24 million customers we currently do business with. By innovating and harnessing technology we are able to provide simple and relevant solutions for our customers and clients, build sustainable revenue flows, structurally remove cost and

Edgar Filing: BARCLAYS PLC - Form 6-K

of the Board of Directors of Telenor ASA. He also sits on the advisory boards of a number of institutions such as Citizens Advice, FICO, Rutberg & Co and is Founder Director of Lend-a-Hand, a non-profit organisation focused on rural education in India.

achieve prudent, balanced growth within our risk appetite.

We achieve this through:

§ leveraging our data capabilities to identify when our customers need solutions e.g. SmartBusiness, our first big data product providing SMEs with key information, metrics and insights to help them grow their business

§ enhancing functionality on mobile and internet banking to enable customers to undertake all their routine transactional banking quickly and easily. Over 9.5 million of our customers are digitally active

§ building the Direct Bank. We have built capabilities, such as voice recognition and video banking, which allow us to interact with our customers 24/7, increase capacity, and have more meaningful interactions with our customers

§ tailoring services, such as pre-selecting existing banking customers for a Barclaycard, providing instant digital fulfilment and personalised experience through Barclays Mobile Banking

§ providing fully-integrated banking and investments with new, sophisticated digital platforms with a range of helpful tools, planners and information to help customers make informed decisions and take control of their investments

§ giving customers and clients market data they need to make personalised choices across business, property, education or investment by using our annual Barclays UK Prosperity Map or through our Unlock Britain campaign

§ keeping our customers and clients safe with increased focus and investment in tackling cyber-fraud.

We are also leading the digital revolution with our colleagues, working hand in hand with our communities, and helping our customers feel comfortable in the digital environment by introducing them to our Digital Eagles and our Digital Wings initiatives.

Barclays UK provides diversification to the Group with our balance of products and services in the UK banking sector. This diversification helps protect revenue flows in the changing environment, and allows us to remain close to our customers for all their banking needs.

Risks to the operating model

We monitor the market environment closely in particular the effect of low interest rates, the expected growth in credit and unsecured lending, and adjust our financial and economic assumptions in a considered manner. As a large UK retail bank, we are cognisant of the credit risk

faced through our lending. Our conservative risk profile for lending through products such as mortgages and credit cards, is continually monitored to ensure our exposure is aligned to our risk appetite.

Barclays UK is the largest contributor to margin-led income for the Group. Our focus on pricing discipline, reflected in our stable net interest margin in recent years, and our structural hedge programme investing in interest rate swaps to provide a smoothing effect on interest rate step changes have both provided protection against adverse changes in the interest rate environment in 2016, and will continue to do so going forward, albeit the beneficial impact of the structural hedge will decline over time.

We are committed to ensuring continued growth of the UK business, and are developing our product offering and services to suit customers' needs, in their local environments. We understand the challenges posed by significant technological change and know it is essential that we stay relevant and provide up-to-date solutions for our customers. The pace of development also means a changing set of risks; from data integrity to continuity of service. We ensure our contingency systems are pressure-tested to ensure there is no disruption to customer service. Cyber-risk is a continuing concern, and we have invested heavily in cyber-crime prevention, working very closely with the UK government and other providers to create a secure digital environment.

This year, we launched automated valuations for home purchases, shaving four to five days off processing time and transforming both the colleague and customer experience. We've also introduced Mortgage Agreement in Principle in 338 branches, allowing a customer to obtain a mortgage decision in less than 15 minutes. We are also offering bespoke mortgage products for Premier customers. Overall, our mortgage business is seeing significant sustainable growth.

We have focused on automating the end-to-end customer journey across all parts of our business, which is resulting in improved customer experience, reduced costs and a double-digit drop in customer complaints. We have made it easier for business clients to open accounts and borrow money from us with digital on-boarding, the Solicitor Portal a dedicated portal for managing the end-to-end business lending journey and pre-approved limits. Business Instant Lending has reduced cycle times for customers requesting unsecured loans of less than £25,000, from five days to a matter of minutes.

We have also launched an exciting new product for SMEs. SmartBusiness is a data analytics tool that allows a business to know its monthly sales, annual debit card transactions, year-on-year sales, or average transaction values in a simple snapshot, using all of our debit card and credit card data for that business. We believe providing these analytics to small businesses will help move their business forward.

We want to ensure we can put past conduct issues behind us, and have continued to de-risk and simplify our product portfolio.

You can read more about changes in regulation, and risks to the business in the Risk section and the Supervisory and Regulation sections in the Annual Report.

Business highlights

One of our highlights of 2016 has been the creation of Barclays UK and an even greater focus on transforming how we interact with our customers and use data to identify opportunities to meet their needs.

In 2016, Barclays UK RoTE excluding notable items was 19.3% (2015: 21.1%), as profit before tax decreased 5% to £2,587m driven by an increase in credit impairment charges, partially offset by a reduction in total operating expenses. Including notable items, reflecting provisions for UK customer redress, RoTE was 9.6% (2015: (0.3%)). We have seen strong deposit growth, a stable net interest margin and prudent growth in loans and advances, focused on remortgage and lower loan-to-value segments, and unsecured loans to existing customers.

We now have 5.7 million registered users on Barclays Mobile Banking. On average, customers come into our mobile app 31 times a month, an indication of deep engagement.

[Barclays UK operational model](#)

We are delivering on significant opportunities in UK Cards, both by providing credit cards to existing current account customers, leveraging what we have learnt in digital delivery of consumer lending, and by extending programmes like SmartSpend and Features Store to all UK Cards customers.

Pingit, our app where you can undertake a transaction whether or not you are a Barclays customer, now has 3.2 million registered users. Its companion app is our reference tool, Cloudfit, which allows all correspondence with the bank to be stored on a customer's personal cloud.

We are the only bank in Europe to have launched video banking, rolling it out at scale, and encrypting the process. And we're the first bank in the UK to introduce contactless cash – a completely new way for our customers to withdraw cash, using contactless technology.

We have made significant changes to our business in 2016, and I am confident that in 2017 we will continue on our path of innovation and growth.

Ashok Vaswani

CEO, Barclays UK

Performance review

Barclays UK

Personal Banking

Summary

Personal Banking provides simple and transparent banking products to around 16 million customers, helping them to anticipate and fulfil their financial needs. This can range from opening a first bank account as a young person to managing finances in retirement, or from everyday insurance to buying a home.

A core element of our Personal Banking business is to use technology to automate transactions, enabling us to interact with customers about what is important to them, when and how they want.

The scale and reach of Personal Banking offers a unique opportunity to help people move forward, with confidence, in an increasingly dynamic and changing financial environment.

We are continuing to transform our customer experience, by building innovative technology to make banking easier. This more efficient technology also allows our colleagues more time to spend with customers, all of which positions us well for the future.

Our focus is, therefore, on delivering an outstanding experience for our customers, our colleagues and the communities in which we operate. We believe in building relationships that show we understand individual and collective circumstances to such a degree that we can provide a solution that is both relevant and meaningful. We offer choice and flexibility in how to meet the different needs of our diverse customer base and we are proud to be the first UK bank to launch voice security and secure video banking.

Discovering the value of connecting customers with other people within their communities has proved to be a great success. Our branches are providing spaces for Incubators and Barclays Accelerator projects, for Digital Eagle sessions and also Eagle Labs – not only educating customers on new and different technologies, but providing them with space to meet, collaborate, network and build on ideas.

Our innovative technology is industry leading and we are award-winners for our work on intuitive products and ways of banking that suit customer needs. Launching such a broad combination of products, services and convenient ways to conduct everyday banking has meant, however, that we continue to see counter transactions decline. Nevertheless, we have evolved our physical estate and invested in areas such as Newcastle, with our new city centre branch, and also redesigned our Fenchurch Street and Hanover Square branches in London, to better suit the banking needs of the communities there. Our highly-automated consumer lending business to existing customers is growing fast, making Barclays the biggest digital unsecured personal lender in the UK.

Significant improvements have been made to the customer experience, by looking at the end-to-end experience from our customers' viewpoint. This is an ongoing programme, but has already resulted in a double-digit drop in customer complaints, as well as helping to lower costs and improve control.

Rewarding customers' loyalty has been a focus for 2016. Blue Rewards, including cashback, Premier Exclusives and the launch of welcome gifts for first-time homebuyers, are good examples of this. We wanted to create moments that stand out for our customers, and to make their lives easier by simplifying our processes. This supports our ambition to build better relationships with our customers at all levels.

We are continuing to transform our customer experience by building innovative technology to make banking easier.

We have improved the support we offer the communities we serve, making it easier for students and young professionals to open an account. In addition, we are continuing our support to military personnel to improve their access to banking.

We are creating an environment for our colleagues that inspires them to be passionate and empathetic and that makes them feel empowered to find solutions for our customers – in turn, helping our customers move forward and achieve their financial ambitions.

Barclaycard Consumer UK

Summary

Barclaycard Consumer UK is a leading credit card provider in the UK.

We are a responsible lender and help consumers fund purchases by providing credit based on their credit history, ability to afford credit and our risk appetite. We enable consumers to pay in the way that suits them by card, online, mobile or using a wearable device, including Barclaycard Contactless Mobile and Apple Pay.

We are customer focused and invest in people, processes and future technologies in order to continue to play a leading role in the industry and help our customers move forward every day.

In 2016, Barclaycard celebrated its 50th anniversary, having launched the first credit card in the UK in 1966. We have been responsible for many firsts – from company credit cards through Chip & PIN to contactless, mobile payments and most recently our range of wearable payment options. As Barclays is the only major UK card issuer and payment acceptance provider, we are in a unique position to shape the payments landscape, make businesses more successful and give people greater control over their money.

In UK Cards, we offer three core credit card products. Our Barclaycard Initial credit card is aimed at customers who are looking for a first credit card, or have a limited credit history, and helps them to build a credit profile. Our Barclaycard Platinum card offers promotional savings on balance transfers and purchases for borrowers with good credit history. Alternatively, shoppers can earn reward points everywhere they shop with our Barclaycard Freedom Rewards credit card. All our products are underpinned by terms and conditions that have received the Plain English Crystal Mark.

Every Barclaycard comes with additional features and benefits, including ways to manage accounts online and on the go with the Barclaycard App. We offer free Experian Credit Scores and a range of entertainment benefits. We also give support to consumers by providing guides on how to protect themselves from fraud, how they can protect their purchases and what to do if they have money worries.

We're continuously looking for ways to improve the customer experience we deliver. We track our Transactional Net Promoter Score (TNPS) after customer interactions and use social media as a way to get feedback from our customers and improve our processes. Since UK Cards was brought under the

Barclays UK structure in March, we have been looking for ways to enhance the services we provide to our joint customers. For example, Barclays customers can now apply for a Barclaycard through the Barclays Mobile Banking app, with guaranteed pre-approvals for eligible customers.

The unsecured lending and consumer payments markets continue to experience considerable change, driven by new entrants, new technologies, changing consumer expectations and behaviour. We are continuing to invest in new technology and to develop pioneering new products and services for our consumers, for example we launched proprietary contactless Android capability through our app, six months ahead of our nearest competitor.

We are pleased to have won a number of awards, acknowledging the market-leading products and services we offer our consumers. We won Best Overall Credit Card Provider at the Money Pages Personal Finance Awards 2016/17. In addition, we have won awards for our support for vulnerable customers and our use of social media.

Performance review

Barclays UK

Wealth, Entrepreneurs and Business Banking

Summary

Barclays wealth offering delivers a truly holistic wealth management service that includes domestic private banking, wealth planning, trust and fiduciary services, investment management and brokerage.

Business Banking supports over one million clients, across the UK, run and grow their business, from start-ups to mid-sized businesses. Our model is relationship-based and digitally-driven.

We aim to allow clients to access the products they need, in the way they want – online, mobile or by working with a Relationship Manager. We put our clients at the heart of our business, delivering the service they need, in the way they choose.

Wealth Overview

In our Wealth business, our bankers provide overall advice to our clients and co-ordinate access to specialists within Wealth and the wider Barclays UK division. Clients benefit from our expertise in personal banking, credit cards, business banking and digital innovation.

A sharp focus on our fundamental business drivers in Wealth, throughout 2016, has resulted in strong underlying asset growth, generating both sustainable income growth and an improvement in our Cost: Income ratio.

We have continued to enhance our Wealth client experience in 2016, most notably with the launch of the Barclays Mobile Banking for Wealth app, which introduced innovative features, such as historical performance analysis, benchmark comparison functionality and asset class drilldowns.

We have reduced our risk by refocusing our Wealth business on our core markets in the UK. The overall wealth market remains stable and we anticipate that it will remain competitive. We feel the business is relatively insulated from the effects of FinTech on traditional financial services, as our clients have a preference for personal service and human interaction.

Business Banking Overview

We provide coverage for clients across the UK at every stage of their business cycle in every industry, delivering distribution models which match clients' needs and sophistication. We serve our clients through a relationship-based and digitally-driven model, combining an on-the-ground and direct relationship model with unique digital solutions. A number of innovations were launched in 2016, including instant lending online, and on mobile, plus on-demand cash pick-up. We are the only UK bank to offer these services.

In 2016, we launched new tools for our Business Banking colleagues bringing relevant, up-to-date industry information together in one place, enhancing our service to clients through deeper insights and understanding.

The Industry Knowledge Hub, for example, brings together 150 client-shareable industry snapshots, external industry news, industry marketing and thought leadership into one easily-accessible place for colleagues. We are looking to continue enhancements to the platform in 2017, including the ability for colleagues to personalise their industry reports and bookmark their most used reports.

We ensure a strong focus on conduct and customer outcomes through creating a secure and controlled environment and have mobilised comprehensive and experienced teams to monitor, anticipate and resolve issues.

home.barclays/annualreport

Barclays PLC Annual Report 2016 | 31

Performance review

Barclays International

Summary

Barclays International is a diversified transatlantic, wholesale and consumer bank which will be housed within Barclays Bank PLC, the future non-ring-fenced bank. We seek to compete in markets where we have the competitive advantage and scale to provide best-in-class service to our clients and customers. We seek to maintain and further our position as a leading provider of financial services to corporates, institutions and individuals.

Market and environment in which the division operates

In 2016, heightened political uncertainty in both of our home markets, caused significant volatility in capital markets and material movements in currency markets, particularly in Sterling.

In spite of this, the environment in which we are operating in is more stable than it has been for a number of years. The implications of a number of post-crisis regulations on the business models of banks, in particular investment banks, have become clearer through 2016 as a number of key regulations have either taken effect or been clarified. As part of complying with Section 165 of the Dodd-Frank Act, Barclays and other large foreign banking organisations operating in the US were required to establish a US Intermediate Holding Company (IHC) by 1 July 2016. The IHC is an umbrella holding company for the Bank's US subsidiaries, and is subject to Federal Reserve prudential standards to ensure safety and soundness, particularly around capital, liquidity and risk management. Barclays' IHC became operational on 1 July 2016 and its key subsidiaries include Barclays Capital Inc. (US broker-dealer) that operates key investment banking businesses and Barclays Bank Delaware that operates Barclaycard US.

The implementation of our strategy, which is in-line with the UK ring-fencing regulations, has resulted in the creation of Barclays International as a sister

division to Barclays UK under the Barclays PLC Group umbrella. Barclays Bank PLC, the future non-ring fenced banking entity, will continue to house the Barclays International division.

Supported by the newly created Group Service Company, Barclays International is reliant on the support of internal operations and technology to maximise efficiency for customers and clients and meet the requirements of our regulators. In a dynamic environment we need to be setting trends, by using forward-looking technology and adapting quickly and proactively to the evolving regulatory and market conditions.

For example, in the payments space, technological evolution, regulation and consumer behaviour is driving disruption, which is likely to transform the way in which consumers and businesses transact.

Barclays International encompasses the following businesses:

§ Corporate and Investment Bank (CIB)

§ Consumer, Cards and Payments (CC&P)

These businesses combine to form a diversified, yet highly complementary portfolio of businesses that has proved to be resilient in a year of significant uncertainty and change. We consciously focus our efforts and resources on products, sectors and geographies where we have a meaningful competitive advantage.

Our dual home markets, in the UK and US, anchor our business in the two most important global financial

centres and two of the most resilient western economies.

Barclays International brings together a portfolio of businesses serving consumers, SMEs, corporates and institutional investors. On the consumer side, Barclaycard International provides consumers with credit cards and lending. In Private Bank & Overseas Services, we provide banking, investment and wealth management services across the client continuum, globally. For SMEs and corporates, we enable payment acceptance, commercial card payments and point-of-sale finance. Through our CIB, we also serve corporates by providing advice on raising new equity or debt capital, and support our institutional investors by enabling them to trade stocks and bonds.

Our business model in Barclays International, especially CIB, is dependent upon client relationships and the services that we provide to these clients. Armed with these financial tools, we help our clients execute their business strategies and grow their businesses. This may result in capital raised to build a new production centre and in turn, create employment as well as product creation for pension funds to invest in.

Risks to the operating model

Global volatility and macroeconomic uncertainty in some markets remains a risk. While the UK's vote to leave the EU does not change our overall strategic objectives, we realise that it will add complexity in the shorter term to our operations in the EU.

The volume and reach of regulatory change continues to require significant attention and presents a number of challenges in the medium term. However, we have demonstrated our ability to react early to regulatory changes, and the impact they have on our operating environment, often turning challenges into competitive advantages.

Data and technology drive benefits for our customers and clients. The importance of complying adequately with data protection laws and protecting this information from increasingly sophisticated criminals remains at the forefront of our operations.

The frequency and reach of cyber-attacks has markedly increased, and financial institutions, such as Barclays, are obvious targets for malicious cyber-activity. We are very focused on ensuring our cyber-defences stay ahead of the increasingly sophisticated threats that we face.

In addition, preparing the business for structural reform continues. Barclays International is now operating as a separate segment within the Group, but a number of execution milestones remain before we achieve the Group's target state structure. We are very conscious of ensuring that our clients and customers face the minimum possible disruption from this transition.

We continue to strengthen our resilience to conduct risk and are working to put legacy conduct issues behind us.

Business highlights

Barclays International RoTE was 8.0% (2015: 9.5%), excluding notable items, as profit before tax decreased 3% to £3,747m driven by increased credit impairment charges and increased operating expense. This was partially offset by strong income growth, including the benefit from the appreciation of the US Dollar and the Euro against GBP. On a statutory basis, RoTE was 9.8% (2015: 7.2%).

Barclays has taken a leadership role in Blockchain technology in the banking sector, together with enhancements in data analytics, cyber-security and innovative identification and verification techniques. This has enabled us to utilise innovation to deliver improved client service.

We became the first organisation in the world to use a Blockchain-enabled trade transaction to transfer original shipping documentation. The initiative helped the client complete a process that usually takes 10 days in just 4 hours,

mostly due to allowing for paperless exchange of documents, full transparency through the supply chain and mitigation of financial crime risks. For further information refer to the case study on page 7.

Transparency and the intelligent use of data has been a key focus. We continued to roll out the SPECS platform across Barclays. SPECS provides buy-side traders with an online portal to view, verify and request changes to client order handling settings. It meets requirements for greater control, transparency, trade analytics and a consolidated view of order settings.

Our payments expertise and dedication to our customers and clients has enabled us to retain and grow relationships with partners and clients such as American Airlines, in US Cards, and TfL, through our payment acceptance proposition, as well as launching new partnerships such as with JetBlue Airways. In addition, we expanded our lending offering with new personal loans launched in the US and Germany and a new partnership with Apple on the iPhone upgrade programme in the UK.

We have made encouraging progress in fraud and cyber-protection in 2016, and will continue to focus on this critical area. For instance, in the Corporate Bank we have introduced cutting-edge malware and remote attack detection solutions and introduced a new PIN Pad reader and Barclays Biometrics reader in the UK, to tackle PIN capture fraud.

The services we offer to our customers and clients have been recognised by industry awards: International Financing Review (IFR) magazine named Barclays its house of the year for North America high-yield bonds, Americas loans and Sterling bonds in its 2016 review of the year. Our research platform ranked third for Developed Markets Research across Equities and Fixed Income in the Institutional Investor 2016 survey, reflecting alignment with our transatlantic strategy. In addition, we won Best Investment Bank Western Europe in the 2016 Euromoney

Awards for Excellence.

Performance review

Barclays International

Corporate and Investment Bank

Summary

The CIB offers wholesale banking products and services to corporate and institutional investor clients. The business is anchored around our two home markets – two of the largest capital markets in the world. We have adapted early to regulatory and markets changes, positioning the business to retain our position as a leading European CIB.

The creation of Barclays International has helped us to better align our businesses so that we now present a single integrated view of Barclays to our corporate and institutional clients through our CIB and deliver synergies to the business. The CIB offers clients a full service capability through its two divisions:

§ Banking offers long-term strategic advice on mergers and acquisitions, corporate finance and strategic risk management solutions, equity and credit origination capabilities, coupled with lending and transaction banking products

§ Markets provides execution, prime brokerage and risk management services across the full range of asset classes, including equity and fixed income and currency products.

We have extensively simplified our CIB over the past three years, making challenging strategic choices to reduce our activities in certain products and geographies, to better position the business for the regulatory and market conditions

that we now face. In spite of the heightened political uncertainty that we have seen through 2016, the environment that we are operating in is more stable than it has been for a number of years, and we are beginning to see the positive implications of making early strategic decisions on our CIB business model. We aim to retain our position as a leading European CIB, competing with the US-domiciled banks in our chosen products and markets.

As part of our Banking division, we aim to help clients large and small, improve performance and enable businesses to grow. We review individual business needs to offer bespoke solutions suited to particular business objectives. For example, through our asset finance operations, Barclays can be an enabler in the transition to greener operations through financing more efficient manufacturing sites and green supply chains. We support lending to high growth businesses who typically have difficulty accessing bank finance, as well as through larger infrastructure project finance, where we have supported the financing of over 500 Mega Watts of clean energy in the UK and Ireland in 2016, equivalent to powering c.220,000 homes per annum.

Further information can be found in the case study below, and in the ESG supplement available at home.barclays.com/annualreport

Performance

Our Banking business had a strong performance in 2016 gaining share, particularly in our home markets of the UK and US where we ranked 5th by fee share for all clients in M&A, equity and debt capital markets and syndicated loan transactions in 2016 (Dealogic). This momentum helps us retain and hire talented individuals and further develop our relationships with our corporate client base. Landmark transactions that we have closed in 2016 include:

§ financial advisor to Teva Pharmaceutical in its acquisition of Allergan's generic drug business

§ joint bookrunner on the two largest US leveraged loan financings of 2016 for Dell and Avago

§ active joint bookrunner and global coordinator in the second-largest corporate investment grade bond offering ever, ABInBev's M&A IG Bond financing.

Markets income increased compared to 2015 with strong performances in the underlying businesses. Credit income benefitted from a strong performance in fixed income flow credit and emerging markets businesses, which benefitted from increased market volatility and client demand. Macro income benefitted from an increase in activity post the UK's vote to leave the EU and US elections. These performances were partially offset by a decrease in Equities, reflecting the simplification of the EMEA business and lower client activity in Asia.

Consumer, Cards and Payments

Summary

Consumer, Cards and Payments is the consolidated reporting structure for Barclaycard International and the Private Bank and Overseas Services.

Barclaycard International provides branded and co-branded consumer credit cards and lending to our customers and business solutions to our clients, globally.

Private Bank and Overseas Services provides banking, investment and wealth management services to over 163,000 clients, globally.

Barclaycard US

Our core co-brand and branded credit card business in the US has continued to grow strongly; we remain the ninth-largest issuer by balances, growing 14% over the last year. We have strengthened our relationship with existing partners, for example signing a major deal with American Airlines, and have launched a new partnership programme with JetBlue Airways. Our Barclaycard brand continues to get stronger in the US; with our Barclaycard Arrival Plus World Elite MasterCard winning the Best Travel Credit Card for Frequent Fliers by MONEY® Magazine.

Our successful online retail deposits business has reached US\$11bn, supporting our overall funding strategy in the US. In November we launched a personal loans offering, further diversifying our product mix.

Barclaycard Business Solutions

Barclaycard provides payment acceptance, commercial payments and point-of-sale finance solutions to all client segments in the UK. We are a leading provider in all areas, including being the second-largest payment acceptance provider in Europe by volume.

Among our achievements this year, we have launched market-leading business card propositions, developed full omni-channel capabilities including strong data security features, and partnered with Apple to help launch their Apple iPhone Upgrade.

Our large corporate portfolio continued to grow, with a number of major new client wins and retentions, including TfL, Greggs and Centrica.

Barclaycard Germany and EnterCard

This year, Barclaycard Germany celebrated its 25th anniversary and now serves over 1.1 million customers. With a share of 34%, Barclaycard Germany is the leading issuer for revolving credit cards in Germany by outstanding balances. In the instalment loans market, Barclaycard Germany has a strong challenger position with a growth rate of 15% and 1% share. Innovative products and features such as the fully digital Express-Kredit or the Equal Payment Plan, as well as continued customer focus, drive exceptional customer satisfaction rankings, with the business leading the market for credit cards and in the top two for loans, respectively.

We also provide cards and lending in Norway, Sweden and Denmark via our EnterCard joint venture.

Travis Perkins PLC

Travis Perkins PLC, a leading company in the builders merchant and home improvement markets, was looking for a unified customer payments platform across its different brands. It wanted to work with a partner that would reduce the complexity of managing and maintaining a highly secure, diverse payments environment, while allowing the flexibility to innovate and explore new customer interactions.

Barclaycard Business Solutions was able to provide a true omni-channel payments platform that offers single point management across multiple brands and channels, from online pay pages to in-store points of sale. The implementation has already seen Travis Perkins PLC benefit from increased card payment security and protection of its brand, as well as cutting transaction response times by up to 94%.

For further information, see
the-logic-group.com/cp/case-studies

Private Bank

The Private Bank strategy going forward is to deliver personalised banking, investment and wealth management solutions to high net worth and ultra high net worth individuals, providing full access to complex and innovative products and services across Barclays platforms. Clients are supported by a dedicated Private Banker and team of investment and wealth specialists. In addition, the Private Bank facilitates access to Barclays Corporate and

Investment Bank full suite of products and services. The Private Bank is now even more focused on our core competencies and poised to grow, demonstrated by strong underlying asset and income growth in 2016.

Overseas Services

With a full suite of banking, credit, investment and wealth management operations principally in the Isle of Man, Jersey and Guernsey, our Overseas Services business supports client types that stretch across the client continuum, personal to corporate. Overseas Services is the gateway to the wider Barclays Group, providing offshore capabilities and expertise. The business delivered solid results in 2016, with strong liability growth, coupled with continued focus on cost management, resulting in a strong Cost:Income ratio and returns in 2016.

Supporting our communities

Building on our commitment to make a positive difference to the communities in which we live and work, we delivered a number of successful initiatives across Barclaycard International in 2016. In the UK, we have launched a major new partnership with The Prince's Trust, helping young people build their skills and confidence, and have won The Prince's Trust Service to Young People Award for corporate volunteering. In the US and Germany we have been supporting start-ups through our programmes with West End Neighbourhood House and our Social Impact Lab incubator respectively, and helping individuals develop essential coding skills through our Apps Camp programme and partnerships with Tech Impact and Delaware State University.

Performance review

Non-Core and Africa

Non-Core

Summary

The Non-Core run-down is a key driver of the simplification of Barclays, helping to improve Group returns and deliver value for shareholders. After our accelerated progress in 2016, we now intend to close Non-Core six months early at 30 June 2017.

Non-Core was formed in 2014 to oversee the divestment of Barclays non-strategic assets and businesses, releasing capital to support strategic growth in our Core businesses. Non-Core brought together businesses and assets that did not fit our strategy, remained sub-scale with limited growth opportunities, or were challenged by the regulatory capital environment.

Non-Core is run by a dedicated management team operating within a clear governance framework to optimise shareholder value as businesses and assets are divested. It maintains a robust risk management framework to mitigate the risks inherent in our businesses and assets, as well as our divestiture and run-down processes. The clearly defined objectives for Non-Core are to bring down RWAs, reduce the ongoing operational cost base and simplify the residual portfolio and risks in preparation for their return to Core.

To divest Non-Core successfully we are partly dependent on external factors that can impact our planned run-down profile. For instance, the income from our businesses and assets, the quantum of associated RWAs and finally market appetite for Non-Core components are all influenced by the market environment. In addition, our ability to complete divestitures depends on regulatory approvals in various jurisdictions and regulatory changes in the treatment of RWAs can impact our stock of RWAs.

2016 was an important year for Non-Core as RWAs were reduced by 41% to £32bn, preparing the division for reintegration into the Core in 2017. The loss before tax increased to £2.8bn, reflecting the acceleration of the run-down during the year, where significant progress was made across all three components of Non-Core. Business RWAs were reduced by £4bn, with the completion of the sales of Barclays Risk Analytics and Index Solutions, the Asia Wealth and Investment Management business, the Southern European cards business, and the Italian retail business. We also made good progress in the run-down of Derivatives, reducing RWAs by £10bn, and Securities & Loans by £3bn respectively.

Given the progress made in 2016, we intend to close Non-Core six months early at 30 June 2017, with c.£25bn of RWAs, meaning that we will have reduced Non-Core RWAs by c.£85bn in just over three years. We expect Non-Core losses in 2017 to be significantly lower than in 2016, with further reductions thereafter once the remaining assets are reabsorbed back into the Core where they will continue to be managed down.

Africa

Summary

As part of the strategic review on 1 March 2016, Barclays announced its intention to sell down its stake in BAGL to a level that would permit regulatory deconsolidation.

Barclays Africa Group Limited (BAGL) is a leading pan-African diversified financial services provider headquartered in South Africa, with meaningful operations across the continent (Botswana, Ghana, Kenya, Mauritius, Mozambique, Seychelles, South Africa, Tanzania, Uganda and Zambia), and is listed on the Johannesburg Stock Exchange.

During 2016, we sold a 12.2% stake, reducing our previous 62.3% holding to 50.1%. Further sell-down to a level that will permit regulatory deconsolidation is expected, and it is currently the Boards intention to maintain a minority shareholding and a commercial relationship with BAGL. Both would need to be consistent with the aim of achieving regulatory deconsolidation.

BAGL is represented in Barclays accounts through Africa Banking. Africa Banking represents BAGL accounts converted to GBP, in addition to Barclays goodwill on acquisition and Head Office allocations that are deemed to be incrementally incurred as a consequence of Barclays operations in Africa, such as the UK bank levy. For clarity, the income statement is provided on page 257. As Africa Banking meets the requirements for presentation as a discontinued operation, the results are presented as two lines in the Group income statement, representing profit after tax relating to our 50.1% stake, and the 49.9% portion attributable to the non-controlling interests in BAGL. This can be seen in the Group income statement on page 277.

Barclays and BAGL have been working closely together to plan and prepare for the successful separation and migration of BAGL's operations from the Barclays Group while Barclays assesses sell-down options, both on and off-market. This work has culminated in the agreement of terms for transitional services and supporting arrangements with BAGL, the details of which have been submitted to relevant regulators as part of a request for approval for Barclays to sell down to below a 50% holding.

A successful regulatory deconsolidation of BAGL's operations will lead to further simplification for the Group, resulting in CET1 ratio uplift and will constitute a further step towards focusing on our core transatlantic consumer, corporate and investment bank operations.

Details on the performance of BAGL can be found at

Governance overview

Our shared values guide the choices we make every day

Summary

A comprehensive corporate governance framework is vital – it helps ensure that your investment in Barclays is protected, while at the same time recognising the interests of our wider stakeholders.

For your Board, 2016 was a year of continued focus on execution and managing through a period of change. Our Group Chief Executive Officer, Jes Staley, completed his first full year in the role and the momentum that has been achieved under his leadership over a relatively short period has been notable. During this time, he has articulated a clear strategy for the future and put together an executive management team that is focused on delivering that strategy and generating sustainable returns for our shareholders. A comprehensive corporate governance framework is vital in supporting executive management in its execution of strategy and in driving long-term sustainable performance. It helps ensure that your investment in Barclays is protected, while at the same time recognising the interests of our wider stakeholders.

Supporting strategy execution

The Board's agenda during 2016 was focused on overseeing and supporting executive management in delivering on Barclays' strategic objectives. You will read elsewhere in this report of the progress that has been made with the performance of our Core business, with the accelerated run-down of the Non-Core businesses and with the sell-down of our holding in Barclays Africa. As a Board, we also spent a considerable amount of our time on Structural Reform, in particular the project to separate our retail banking operations into an independent legal entity within the Barclays Group. This is a significant and far-reaching change to Barclays' operating structure. In tracking the progress of implementation, your Board debated the risks and challenges across the stakeholder spectrum, including the potential impacts on shareholders, employees, clients and customers. Structural Reform will also have a profound impact on the way in which the Barclays Board itself operates, especially in terms of how it interacts with the boards of the newly-established legal entities and with regard to talent management and succession planning for executive management and board appointments across the Barclays Group.

Personal accountability is a central tenet of our culture, enabling us to achieve the highest standards of performance and deliver value for our customers and clients. It is also key to ensuring that trust finds its way back into banking and therefore underpins our long-term success.

Edgar Filing: BARCLAYS PLC - Form 6-K

It is during such periods of transformational change that leadership and good governance are more important than ever. The challenge was heightened during 2016 by the result of the UK's referendum on its membership of the EU. Your Board spent time assessing Barclays' contingency plans and evaluating the potential impact of the UK exiting the EU on each of Barclays' businesses. This included the possible consequences for capital, operations and regulation, along with the impact for employees, clients and customers. Of course, the precise terms of the UK's exit from the EU and the long-term effects are not yet known and will only become clear over time. However, our strategy remains focused on building on our strengths as a transatlantic consumer, corporate and investment bank, anchored in the UK and the US.

Culture, values and accountability

As Chairman, an important part of my role is to promote the highest standards of corporate governance in Barclays and to ensure that this is supported by the right culture, values and behaviours from the top down. The implementation in March 2016 of the UK's Senior Managers Regime introduced new regulatory standards for individual accountability and conduct, which align closely with our established purpose, culture and values. Personal accountability is a central tenet of our culture, enabling us to achieve the highest standards of performance and deliver value for our customers and clients. It is also key to ensuring that trust finds its way back into banking and therefore underpins our long-term success.

Barclays PLC Annual Report 2016 | 39

Governance overview

Our shared values guide the choices we make every day

Summary

A snapshot of how Barclays complies with the requirements of the UK Corporate Governance Code (the Code) is set out below.

Compliance with the UK Corporate Governance Code

Leadership

There is clear division of responsibilities between the Chairman, who runs the Board, and the Group Chief Executive, who runs the Group's business. Individual roles on the Board and their responsibilities are set out in Barclays' *Charter of Expectations*.

The Senior Independent Director, Sir Gerry Grimstone, provides a sounding board for the Chairman, acts as an intermediary for the other Directors when necessary and is available to shareholders if they have concerns that have not been addressed through the normal channels.

The Board has set out Barclays' culture, values and behaviours in Barclays' *Purpose and Values* and *The Barclays Way*, which are embedded throughout the Group.

Directors are expected to provide rigorous and constructive challenge on matters that, owing to their strategic, financial or reputational implications or consequences, are considered significant to the Group.

Effectiveness

The skills, knowledge and experience needed for an effective Board are recorded on a skills matrix, which is used by the Board Nominations Committee to inform Director recruitment, induction and on-going development.

The composition of principal Board Committees meets the independence criteria of the Code and there is appropriate cross-membership to further promote effectiveness.

Edgar Filing: BARCLAYS PLC - Form 6-K

10 of 13 Directors are independent non-executive Directors (77%), while the Chairman was independent on appointment.

At the end of 2016, there were four women Directors (31%), compared to our target of 33% by 2020.

The Board Nominations Committee regularly considers Board and senior management succession plans.

Appointments to the Board are made via a formal, rigorous and transparent process, based on merit, taking into account the skills, experience and diversity needed on the Board in the context of Barclays' strategic direction.

All Directors are expected to commit sufficient time to fulfil their duties to Barclays. In 2016, Directors' attendance at scheduled Board meetings was 98% and across the scheduled Board Committee meetings was an average of 98%.

The Board assesses its effectiveness and that of its Committees and the individual Directors annually in a process that is externally facilitated by an independent third party.

Directors are subject to re-election each year by shareholders at the Annual General Meeting (AGM).

Barclays' *Charter of Expectations* sets out responsibilities for providing the Board with accurate, timely and high-quality information necessary for it to fulfil its duties.

Accountability

The Board is responsible for setting Barclays' Risk Appetite, i.e. the risks it is prepared to take in the context of achieving Barclays' strategic objectives.

Barclays' *Enterprise Risk Management Framework* is designed to identify and set minimum requirements in respect of the main risks to achieving the Barclays' strategic objectives and to provide reasonable assurance that internal controls are effective.

The Board conducts robust assessments of the principal risks facing Barclays, including those that would threaten its business model, future performance, solvency or liquidity. It reports on this in the annual Viability statement (opposite).

The Directors also review the effectiveness of the Group's systems of internal control and risk management.

The Board has put in place processes to support the presentation to shareholders of fair, balanced and understandable information.

The Board Audit Committee, comprising independent non-executive Directors, oversees the effectiveness of Barclays' internal and external auditors.

Remuneration

The Board Remuneration Committee, comprising independent non-executive Directors, sets overarching Group remuneration policy and approves the remuneration arrangements of the Chairman, the executive Directors and other senior executives.

The Board Remuneration Committee seeks the views of Barclays' major shareholders on remuneration matters. This engagement is meaningful and contributes directly to the decisions it makes.

Barclays' reward framework is simple and transparent and is designed to support and drive business strategy and long-term success.

To ensure alignment with shareholder interests, a significant part of performance-related pay is delivered through Barclays' shares.

Unvested deferred remuneration is subject to malus. Clawback also applies to any variable remuneration awarded to PRA Material Risk Takers after 1 January 2015.

Engagement

The Chairman and Senior Independent Director, together with other Board representatives and the Company Secretary, hold meetings with investors focusing on corporate governance matters.

The Chief Executive and Group Finance Director present quarterly results briefings and the Group Finance Director holds briefings for equity and debt sellside analysts.

Regular engagement with Barclays' brokers ensures that the Group's strategy and performance is being communicated effectively and provides a better understanding of investor views.

The Board receives feedback on investor relations activity, along with regular reports of changes in holdings of substantial shareholders and reports on share price movements.

A number of events are held throughout the year to maintain an open dialogue with investors, of which the AGM is the most important.

Viability statement

While the financial statements and accounts have been prepared on a going concern basis, the UK Corporate Governance Code requires the Directors to make a statement in the Annual Report regarding the viability of the Group, including explaining how they assessed the prospects of the Group, the period of time for which they have made the assessment and why they consider that period to be appropriate.

In light of the analysis set out below, the Board has assessed the Group's viability and confirms that the Directors have a reasonable expectation that the Group will be able to continue in operation and meet its liabilities as they fall due over the next three years. This timeframe is used in management's Working Capital and Viability Report (WCR) dated 16 February 2017. The availability of the WCR gives management and the Board sufficient visibility and confidence on the future operating environment for this time period. The three year timeframe has also been chosen because:

§ it is within the period covered by the Group's future projections of profitability, cash flows, capital requirements and capital resources;

§ it is also within the period over which regulatory and internal stress testing is carried out and in the current environment it is necessary for the Board to ensure confidence in the Group is maintained over the shorter term; and

§ as a consequence of the unparalleled level of regulatory change in the financial services industry, a three year timeframe is appropriate.

The Directors are satisfied that this period is sufficient to enable a reasonable assessment of viability to be made.

In making their assessment the Board has:

§ carried out a regular and robust assessment of the Group's risk profile and material existing and emerging risks. Notable among these are risks which senior management believe could cause the Group's future performance (i.e. results of operations or financial condition) to differ materially from current expectations, including the ability to meet dividend expectations, maintain minimum levels of regulatory capital and meet solvency targets (including capital, leverage and total loss absorbing capacity including TLAC/MREL) over the period of the assessment;

Edgar Filing: BARCLAYS PLC - Form 6-K

- § reviewed how those risks are managed and controlled (see below and also further detail provided on pages 146 to 162);
 - § considered the WCR which provides an assessment of forecast CET1, leverage ratio, Tier 1 and total capital ratios, as well as the build-up of MREL up to 2022;
 - § reviewed the Group's liquidity and funding profile, particularly Barclays' internal liquidity risk appetite (LRA) and regulatory liquidity coverage ratios;
 - § considered the Group's viability under specific internal and regulatory stress scenarios (further details below);
 - § considered the stability of the major markets in which it operates, the risks posed by the simplification of the business model and regulatory changes;
 - § reviewed the statutory accounts and the in-depth disclosure of the financial performance of the Group;
 - § considered the Group's medium term plan (MTP); and
 - § reviewed the legal, competition and regulatory matters set out in Note 29 to the financial statements on pages 330 to 338.
- Conduct, capital and operational risks are controlled and managed in line with the Enterprise Risk Management Framework and the relevant Principal Risk Frameworks. Executive management set a Risk Appetite for the Group, which is then approved by the Board. The second line set limits, within which the first line are required to operate. Management and the Board then oversee the associated Risk Profile.
- In relation to regulatory change, the firm has a fully resourced project team, dedicated to understanding and implementing changes required by Structural Reform.
- Particular risks to viability identified by the Board are detailed below. These have been chosen on the basis of their ability to impact viability over the timeframe of the assessment. In some instances, however, the risks exist beyond this timeframe:
- § legacy conduct matters and the potential risk of fines and other sanctions;
 - § the cost and scale of regulatory change in the financial services industry, including the implementation of structural reform, which could impact ratings, alter the behaviour of depositors and affect the ability of the firm to maintain appropriate capital and liquidity ratios; and
 - § evolving operational risks (notably cyber security, technology and resilience) and potential impact on operations and/or payment systems.

The Board has also considered the Group's viability under specific internal and regulatory stress scenarios.

The latest internal stress test conducted in Q4 2016 (which was concluded on 16 February 2017) considered the potential impacts of:

§ a severe global recession;

§ decelerating growth in China and emerging markets;

§ UK housing market weakness; and

§ a significant and sustained fall in commodity prices.

Litigation matters and remediation/redress are assessed as part of the stress testing process. Capital risk appetite and LRA were set at a level which would enable the Group to withstand the stress scenario, based on expected financial performance. Management also identified actions, including cost reductions and withdrawal from lines of business, available to restore the Group to its desired capital flightpath under a range of operating environments.

The Group-wide stress testing framework also includes reverse stress testing techniques which aim to identify and analyse the circumstances under which the Group's business model would no longer be viable, leading to a significant change in business strategy and to identify appropriate mitigating actions. Examples include extreme macroeconomic downturn (severely adverse) scenarios, or specific idiosyncratic events, covering both operational risk (e.g. cyber attack) and capital/liquidity events.

These internal stress tests informed the conclusions of the WCR. Based on current forecasts, incorporating key known regulatory changes to be enacted and having considered possible stress scenarios, the current liquidity and capital position of the Group continues to support the Board's assessment of the Group's viability.

The Board also reviewed external regulatory stress test results which are designed to assess the resilience of banks to adverse economic developments and ensure that we have robust forward looking planning processes for the risks associated with our business profile. Barclays was not required to submit revised capital plans as a result of these tests.

The Board's assessment of the Group's viability over the next three years is subject to material existing and emerging risks highlighted on pages 137 to 144. Future events, such as the crystallisation of any of these risks may require the Board to review dividend policy.

Our culture and our people

and the energy, commitment and passion
of our colleagues enhances our success

Summary

We recognise that fostering the right culture at Barclays is critical to our success and we want to play a leading role in defining the future of banking, restoring trust and respect for our profession.

We are four years into a cultural change journey at Barclays and we have a clear set of values that guide how we work and how we act. We are continuing to make progress to further embed and sustain a values-based culture through initiatives aimed at strengthening the profession of banking. We recognise that fostering the right culture at Barclays is critical to our success and we want to play a leading role in defining the future of banking, restoring trust and respect for our profession. We have placed continued focus on the importance of a values-based culture and with that in mind, conduct, culture and values were established as part of our key strategic priorities for the year. Throughout 2016 we have launched a number of initiatives to foster the right culture at Barclays and we developed a culture measurement framework, anchored in our values, to measure and manage progress in embedding a values-based culture across the organisation. We also seek to share across different parts of the business the initiatives that are having a positive impact on our culture and engagement of our employees.

Having constructive and empathetic conversations with customers reflect our continued focus on a values-based culture.

To ensure we constantly review and reappraise to see what is working, in 2016 the annual Your View survey became a quarterly pulse survey (excluding Africa),

providing colleagues the opportunity on a more regular basis to say what they are experiencing and how it feels to work at Barclays. In the third quarter of the year, we surveyed 50% of all colleagues and the remaining 50% were surveyed in the fourth quarter. Starting from 2017, each quarter, 25% of colleagues (excluding Africa) will be invited to take part in Your View.

The Your View results have continued to measure Sustainable Engagement and this year we have been provided with more regular snapshots. The quarterly results were then aggregated at the end of the year into an overall annual picture of engagement. At the end of 2016, Sustainable Engagement of our colleagues has remained stable year-on-year at 75%. The quarterly results of the Your View survey and the indicators and insights from our culture measurement framework help us to assess what we are doing well and guide and focus management action as required across our businesses and functions. Each quarter the results are analysed in depth and our senior leadership teams across the businesses and functions work to identify relevant actions that will continue to foster a culture that builds the Barclays of the future. The results from the Your View survey, and the insights from the quarterly indicators within the culture measurement framework, evidence that we continue to make strong progress in embedding a values-based culture across the bank.

Apply within , our internal mobility programme, and the Let s talk about how performance management campaign, both launched this year, are initiatives that support the behaviours that underpin our values. The Let s talk about how campaign reinforces the importance that we place on both what our employees deliver and how they deliver. A new event launched this year, sponsored by the Group CEO, this was a step forward in developing the next generation of enterprise leaders who actively contribute towards rebuilding the profession of banking through their own leadership and their influence of others. By bringing together high potential senior leaders from across our businesses and functions we seek to strengthen collaboration and an enterprise-wide perspective amongst our senior leaders to deliver improved solutions and products for our customers and clients.

Our Wellbeing programme; Barclays Shared Growth Ambition which focuses on access to employment, access to financial and digital empowerment and access to financing; as well as the Conversation Framework and Empathy Diagnostic launched in Barclays UK to support colleagues in having constructive and empathetic conversations with customers, reflect our continued focus on a values-based culture that ensures we do the right thing for our customers and clients.

Tristram Roberts

Group Human Resources Director

Barclays PLC Annual Report 2016 | 43

Remuneration framework

so our remuneration is reflective
of the way we do business.

Summary

The Committee remains focused on aligning our pay to performance and setting pay at a level which allows us to attract, retain and motivate, but is no more than necessary to ensure that we accelerate the delivery of shareholder value. The inherent tension between these important considerations continues to be a key component of the Committee's deliberations.

2016 represented a year of strong progress against our strategy. The Committee's deliberations on the 2016 incentive pool reflected Group performance and strategic delivery in both the Core and Non-Core businesses. We reached the decision that an overall Group incentive pool of £1,533m, down slightly from £1,544m in 2015, is appropriate notwithstanding strong 2016 delivery. This level of incentive pool also absorbs the material adverse impact of foreign exchange movements through the year, which more than offset the impact of reductions in staff numbers in the year.

The Core compensation to net income (excluding notable items) ratio decreased from 34.0% in 2015 to 32.7% in 2016 excluding the impact of deferral changes, increasing slightly to 34.7% including the impact of these changes. At a Group level, the ratio increases to 40.2% (2015: 37.7%) driven by Non-Core as it continues to be run down.

From 2016, a change in the recognition timing of deferral costs, together with a harmonisation of deferral levels across the Group, will result in improvements to the Group's operational flexibility going into 2017 and beyond. Further information on deferral changes can be found on page 104.

We will be seeking shareholder approval for a new Directors' remuneration policy at the 2017 AGM. More details can be found on page 45.

During 2017, the Committee will continue to focus on ensuring that remuneration is aligned to the delivery of our strategy and sustainable shareholder returns. The Committee will also continue to monitor the competitiveness of our remuneration in the light of recent regulatory changes by the PRA, FCA and EBA. We will also continue to progress

further our agenda to address pay inequality, which is in line with the proposals in the Government's Green Paper on Corporate Governance Reform.

The Committee is grateful for the feedback received from our larger shareholders on our remuneration proposals and values the insight the discussions provide.

Crawford Gillies

Board Remuneration Committee (Chairman)

We continue to focus on aligning reward and performance

Barclays Group incentive pool

2010	£3,484m
2011	£2,578m
2012	£2,168m
2013	£2,378m
2014	£1,860m
2015	£1,544m
2016	£1,533m

Note

The 2015 number has been restated from £1,669m to reflect the treatment of Africa Banking as a discontinued operation. The 2010-2014 numbers have not been restated.

Distribution of 2016 total remuneration to Group employees by banding

364	£1m+
11,962	£100k-£1m

39,990 £25k-£100k

33,989 £0-25k

Note

The number of employees paid above £1m is slightly down year on year on a constant currency basis (364 in 2016 vs. 369 in 2015).

Directors remuneration policy

Barclays new Directors remuneration policy is subject to shareholder approval at the 2017 AGM on 10 May 2017 and, if approved, is intended to apply immediately, for three years to the date of the 2020 AGM. The new policy has evolved from the existing policy and has been updated for regulatory changes, and simplified where possible.

Full details of our Directors remuneration policy can be found on pages 108 to 120

The key changes to the policy can be summarised as follows:

Key changes

Fixed pay	§ Fixed Pay introduced, replacing salary and Role Based Pay
	§ Fixed Pay delivered 50% in cash and 50% in shares (subject to 5 year holding period lifting pro-rata)
	§ Fixed Pay will not change during the policy period for either of the current executive Directors
	§ Pension allowance retained at current levels, but limited to 10% of Fixed Pay for new hires

Edgar Filing: BARCLAYS PLC - Form 6-K

Variable pay	§ Bonus and Long Term Incentive Plan (LTIP) combined for regulatory deferral purposes
Performance measures	§ Bonus: Financial measures ³ 60% § LTIP: Financial measures ³ 70%
Delivery	§ Any bonus deferral vests in equal tranches between the third and seventh anniversary of award § LTIP performance is tested at end of 3 year performance period and vests in equal tranches between the third and seventh anniversary of award
Shareholding requirement	§ Requirement increased to 200% of Total fixed pay (i.e. Fixed Pay plus Pension) within 5 years from the date of appointment (from 400% of salary to equivalent of 457% of salary for CEO) § New requirement to hold shares worth 100% of Total fixed pay (or pro-rata thereof) for 2 years post-termination
Employment contracts	§ For new hires, asymmetry for notice periods removed i.e. 6 months from the Company and 6 months from the Director (from 12 months from the Company and 6 months from the Director)

2017 remuneration

The following summarises how the Directors' remuneration policy would be implemented in 2017 assuming the new policy is approved by shareholders.

	Fixed Pay	Annual bonus^a	LTIP^a
Jes Staley	£2,350,000	Maximum 80% of Total fixed pay	Maximum 120% of Total fixed pay
Tushar Morzaria plus competitive benefits and pension Note	£1,650,000	Maximum 80% of Total fixed pay	Maximum 120% of Total fixed pay

^a Total fixed pay is defined as Fixed Pay plus Pension.

2016 remuneration

The following tables show a single total figure for 2016 remuneration in respect of qualifying service for each executive and non-executive Director together with comparative figures for 2015.

Executive Directors: Single total figure for 2016 remuneration (audited)

	Salary		Role Based Pay		Taxable benefits		Annual bonus		LTIP		Pension		T
	£000		£000		£000		£000		£000		£000		£
	2016	2015	2016	2015	2016	2015	2016	2015	2016	2015	2016	2015	2016
Jes Staley ^a	1,200	100	1,150	96	169	48	1,318				396	33	4,233
Tushar Morzaria	800	800	750	750	44	82	854	701	1,008		200	200	3,656

a The 2015 figures for Jes Staley relate to the period from 1 December 2015 when he joined the Board as Group Chief Executive.

Remuneration framework

so our remuneration is reflective
of the way we do business.

Additional information in respect of each element of pay for the executive Directors (audited)

Role Based Pay (RBP)

Executive Directors received RBP which was delivered quarterly in shares, subject to a holding period with restrictions lifting over five years (20% each year). The value shown is of shares at the date awarded.

Taxable benefits

Taxable benefits include private medical cover, life and ill health income protection, tax advice, relocation, car allowance, the use of a Company vehicle and driver when required for business purposes and other benefits that are considered minor in nature.

Annual bonus

The 2016 bonus awards reflect the Committee's assessment of the extent to which the executive Directors achieved their Financial (50% weighting) and Balanced Scorecard (35% weighting) performance measures, and their personal objectives (15% weighting). A summary of the assessment against the performance measures is provided below. For more information please see pages 121 and 122.

Financial (50% weighting)

Performance measure	Weighting	Threshold 25%	Maximum 100%	2016	
				Actual	2016 Outcome
Profit before tax (excluding notable items)	20%	£3.45bn	£4.20bn	£3.65bn	9%
Costs (excluding notable items)	10%	£14.6bn	£13.7bn	£15.3bn	0%
CET1 ratio	20%	11.1%	11.6%	12.4%	20%
Total financial	50%				29%

Balanced Scorecard (35% weighting)

Progress in relation to each of the 5Cs of the Balanced Scorecard was assessed by the Committee. The Committee took a similar approach as for 2015 i.e. based on a three-point scale in relation to each measure, with 0% to 2% for below target, 3% or 4% for a met target, and 5% to 7% for above target progress against a particular Balanced Scorecard component. Based on this approach, the Committee agreed an 18% outcome out of a maximum of 35%.

Personal objectives (15% weighting)

- (i) Jes Staley: The Committee concluded that Jes Staley had delivered a very strong performance throughout the year. By the end of 2016, a clear new strategy was firmly embedded and a new Core organisational structure consistent with structural reform has been implemented. The Core businesses have performed well, delivering improved profitability and cost income efficiency. At the same time significant progress has been made in exiting the Non-Core businesses. Jes Staley has demonstrated strong leadership, strengthened the management team and has instilled a more effective performance ethic and culture within the organisation. Given his very strong performance, the Committee judged that 13% of a maximum of 15% was appropriate.
- (ii) Tushar Morzaria: The Committee concluded that Tushar Morzaria had delivered an outstanding performance in 2016. In doing so, the Committee noted the role provided by Tushar Morzaria in reshaping the business and in particular, recognised his contribution in the significant progress in exiting Non-Core, resulting in a reduction of £22bn in Risk Weighted Assets and his focus in delivering an organisation with a significantly higher CET1 ratio and lower Cost: Income ratio. In doing so, it was also noted that Tushar Morzaria has continued to develop very strong working relationships with shareholders, investors and regulators, while also improving the performance delivery within the Finance Functions. Given his exceptional personal performance during 2016, the Committee judged that 14% of a maximum of 15% was appropriate.

Overall summary

In aggregate, the performance assessment for Jes Staley resulted in an overall formulaic outcome of 60% of maximum bonus opportunity being achieved. The resulting bonus is £1,318,000 of which 70% is deferred under the Share Value Plan and will vest in five equal tranches from the third to seventh anniversary (subject to the rules of the Share Value Plan as amended from time to time).

In aggregate, the performance assessment for Tushar Morzaria resulted in an overall formulaic outcome of 61% of maximum bonus opportunity being achieved. The resulting bonus is £854,000 of which 60% is deferred under the Share Value Plan and will vest in five equal tranches from the third to seventh anniversary (subject to the rules of the Share Value Plan as amended from time to time).

LTIP

The LTIP amount included in Tushar Morzaria's 2016 single total figure is the value of the amount scheduled to be released in relation to the LTIP award granted in 2014 in respect of performance period 2014-2016 (by reference to Q4 2016 average share price). Jes Staley was not a participant in this cycle. The performance achieved against the performance targets is as follows.

Performance measure	Weighting	Threshold	Maximum vesting	Actual	% of award vesting
Return on risk weighted assets (RoRWA)	50%	23% of award vests for average annual RoRWA of 1.08%	Average annual RoRWA of 1.52%	0.33%	0%
Loan loss rate	20%	7% of award vests for average annual loan loss rate of 70bps	Average annual loan loss rate of 55bps or below	50bps	20%
Balanced Scorecard	30%	Performance against the Balanced Scorecard was assessed by the Committee to determine the percentage of the award that may vest between 0% and 30%. Each of the 5Cs in the Balanced Scorecard has equal weighting.		See page 123	14%

The Committee was also satisfied that the discretionary underpin in respect of the underlying financial health of the Group based on profit before tax was met, and accordingly determined that 34% of the maximum number of shares under the total award should be considered for release in March 2017. After release, the shares are subject to an additional two year holding period.

Pension

Executive Directors are paid cash in lieu of pension contributions. This is market practice for senior executives in comparable roles.

Non-executive Directors are reimbursed expenses that are incurred for business reasons. Any tax that arises on these reimbursed expenses is paid by Barclays.

The Chairman is provided with private medical cover and the use of a Company vehicle and driver when required for business purposes.

Notes

- a John McFarlane joined the Board as a non-executive Director with effect from 1 January 2015 and as Chairman from 24 April 2015. The 2015 total includes non-executive Director fees of £78,000 for the period from 1 January 2015 to 24 April 2015.
- b Sir David Walker retired from the Board with effect from 23 April 2015.
- c Mary Francis joined the Board as a non-executive Director with effect from 1 October 2016.
- d Sir Gerry Grimstone joined the Board as a non-executive Director from 1 January 2016 and succeeded Sir Michael Rake as Senior Independent Director and Deputy Chairman with effect from 1 January 2016.
- e Wendy Lucas-Bull retired from the Board with effect from 1 March 2016. Figures include fees received by Wendy Lucas-Bull for her role as Chairman of Barclays Africa Group Limited.
- f Frits van Paasschen retired from the Board with effect from 28 April 2016.
- g Diane Schueneman joined the Board as a non-executive Director with effect from 25 June 2015.
- h Diane Schueneman and Steve Thieke both served in 2016 on the US Governance Review Board, which was an advisory board set up as the forerunner of the board of our US intermediate holding company which was established during 2016. They each subsequently joined the board of the US intermediate holding company on its formation. The 2015 figures for Diane Schueneman and Steve Thieke included fees of \$37,500 and \$75,000 respectively for their roles on the US Governance Review Board. The 2016 figures include fees of \$138,000 and \$150,000 respectively for their roles on the US Governance Review Board and the board of the US intermediate holding company. In addition, Steve Thieke waived fees of \$63,000.
- i Sir Michael Rake retired from the Board with effect from 31 December 2015.
- j Sir John Sunderland retired from the Board with effect from 23 April 2015.

Financial performance

Our strategy is on track with good progress in 2016.

Summary

2016 reflected good operational performance of Barclays UK and Barclays International reflecting the benefits of diversification across customers and clients, geographies and products.

The Core business generated a RoTE excluding notable items of 9.4% (2015: 11.2%) on a £4bn increased average allocated tangible equity base of £41bn. The Core business also generated positive cost: income jaws and we intend to continue to reduce the Group's structural cost base, targeting a Group cost: income ratio of less than 60% over time. The accelerated Non-Core run-down resulted in a reduction in RWAs of £22bn to £32bn resulting in the decision to close the unit six months ahead of plan on 30 June 2017. Capital ratio progression towards end state requirements of 150bps to 200bps above the minimum regulatory level was strong with a CET1 ratio of 12.4% (December 2015: 11.4%), largely reflecting profit generation in the period.

	2016	2015
Common Equity Tier 1 (CET1) ratio	12.4%	11.4%
Cost: income ratio	76%	84%
Return on average tangible shareholders' equity (RoTE)	3.6%	(0.7%)
Total operating expenses	£16,338m	£18,536m
Non-Core RWAs	£32bn	£54bn

Group performance

§ Return on average tangible shareholders' equity was 3.6% (2015: (0.7%)) and basic earnings per share was 10.4p (2015: (1.9p))

§ Profit before tax increased to £3,230m (2015: £1,146m). The Group performance reflected good Core results while being impacted by the Non-Core loss before tax of £2,786m (2015: £2,603m) and provisions for UK customer redress of £1,000m (2015: £2,772m). The appreciation of average USD and EUR against GBP positively impacted income and adversely affected impairment and operating expenses

Edgar Filing: BARCLAYS PLC - Form 6-K

- § Total income decreased 3% to £21,451m as Non-Core income reduced £1,776m to a net expense of £1,164m due to the acceleration of the Non-Core run-down, while Core income increased 6% to £22,615m driven by Barclays International
- § Credit impairment charges increased £611m to £2,373m including a £320m charge in Q316 following the management review of the UK and US cards portfolio impairment modelling. This resulted in a 11bps increase in the loan loss rate to 53bps
- § Total operating expenses reduced 12% to £16,338m reflecting lower litigation and conduct charges. This was partially offset by the non-recurrence of the prior year gains of £429m on the valuation of a component of the defined retirement benefit liability, increased structural reform implementation costs, and a £150m charge in Barclays International in Q316, relating to a reduction in the real estate footprint which will generate savings in future periods. Operating expenses also included a £395m additional charge in Q416 relating to 2016 compensation awards
- § The effective tax rate on profit before tax decreased to 30.7% (2015: 100.3%) principally as a result of a reduction in non-deductible charges
- § Profit after tax in respect of continuing operations increased to £2,237m (2015: loss of £3m). Profit after tax in relation to the Africa Banking discontinued operation decreased 6% to £591m as increased credit impairment charges and operating expenses were partially offset by income growth
- § Notable items totalled a net loss before tax of £420m (2015: £3,330m) comprising provisions for UK customer redress of £1,000m (2015: £2,772m), a £615m (2015: £nil) gain on disposal of Barclays share of Visa Europe Limited and an own credit loss of £35m (2015: gain of £430m)

Group capital and leverage

- § The fully loaded CRD IV CET1 ratio increased to 12.4% (December 2015: 11.4%) reflecting an increase in CET1 capital of £4.5bn to £45.2bn, despite RWAs increasing by £7bn to £366bn

The increase in CET1 capital was largely driven by profits of £2.1bn generated in the period, after absorbing the impact of notable items. Other favourable movements included the currency translation reserve as a result of the appreciation of all major currencies against GBP

The increase in RWAs was principally due to the appreciation of ZAR, USD and EUR against GBP and business growth, which more than offset RWA reductions in Non-Core

Governance

Our corporate governance processes and the role they play in supporting the delivery of our strategy, including reports from the Chairman and each of the Board Committee Chairmen.

Governance: Directors report

[UK Corporate Governance Code](#) [index to disclosures](#)

The purpose of corporate governance is to facilitate effective, entrepreneurial and prudent management that can deliver the long-term success of the company.

The UK Corporate Governance Code

The UK Corporate Governance Code (the Code) is not a rigid set of rules. It consists of principles (main and supporting) and provisions. The Listing Rules require companies to apply the main principles and report to shareholders on how they have done so.

You can find our disclosures as follows:

		Page
Leadership	Every company should be headed by an effective board which is collectively responsible for the long-term success of the company.	Board of Directors Composition of the Board 51 to 52 87
	There should be a clear division of responsibilities at the head of the company between the running of the board and the executive responsibility for the running of the company's business. No one individual should have unfettered powers of decision.	Roles on the Board 85
	The chairman is responsible for leadership of the board and ensuring its effectiveness on all aspects of its role.	Roles on the Board 85
	As part of their role as members of a unitary board, non-executive directors should constructively challenge and help develop proposals on strategy.	Roles on the Board 85

Edgar Filing: BARCLAYS PLC - Form 6-K

Effectiveness	The board and its committees should have the appropriate balance of skills, experience, independence and knowledge of the company to enable them to discharge their respective duties and responsibilities effectively.	Board of Directors	51 to 52
	There should be a formal, rigorous and transparent procedure for the appointment of new directors to the board.	Appointment and re-election of Directors	80
	All directors should be able to allocate sufficient time to the company to discharge their responsibilities effectively.	Attendance	86
		Time commitment	87
	All directors should receive an induction on joining the board and should regularly update and refresh their skills and knowledge.	Induction, Training and development	87
	The board should be supplied in a timely manner with information in a form and of a quality appropriate to enable it to discharge its duties.	Information provided to the Board	88
	The board should undertake a formal and rigorous annual evaluation of its own performance and that of its committees and individual directors.	Review of Board and Board Committee effectiveness	81
All directors should be submitted for re-election at regular intervals, subject to continued satisfactory performance.	Roles on the Board	85	
	Appointment and re-election of Directors	80	
Accountability	The board should present a fair, balanced and understandable assessment of the company's position and prospects.	Strategic report Risk management Viability statement, going concern	1 to 48 145 to 162 41, 80
	The board is responsible for determining the nature and extent of the principal risks it is willing to take in achieving its strategic objectives. The board should maintain sound risk management and internal control systems.	Risk management and internal control	88 to 89
	The board should establish formal and transparent arrangements for considering how they should apply the corporate reporting, risk management and internal control principles, and for maintaining an appropriate relationship with the company's auditors.	Board Audit Committee report	58 to 67
Remuneration	Executive directors' remuneration should be designed to promote the long-term success of the company. Performance-related elements should be	Remuneration report	99 to 133

transparent, stretching and rigorously applied.

There should be a formal and transparent procedure for developing policy on executive remuneration and for fixing the remuneration packages of individual directors. No director should be involved in deciding his or her own remuneration.

Remuneration report

99 to 133

Relations with shareholders

There should be a dialogue with shareholders based on the mutual understanding of objectives. The board as a whole has responsibility for ensuring that a satisfactory dialogue with shareholders takes place.

Stakeholder engagement

89 to 90

The board should use general meetings to communicate with investors and to encourage their participation.

Stakeholder engagement

Governance: Directors' report

[What we did in 2016](#)

[Chairman's introduction](#)

Strong and effective governance benefits companies and the UK economy more generally, by instilling public confidence and respect for the corporate sector, making the UK an attractive place to do business.

Dear Fellow Shareholders

Welcome to my 2016 corporate governance report. When I think about corporate governance, I inevitably focus on how strong and effective governance acts to provide the necessary checks and balances at the very top of companies, thus supporting better decision-making and accountability. In turn, this benefits companies and the UK economy more generally, by instilling public confidence and respect for the corporate sector and making the UK an attractive place to do business, something that has grown in importance post the EU Referendum. As a bank, gaining this confidence and respect is paramount. Our business is founded on and operates on trust – the trust of our customers and clients, our employees and the wider public. Strong and effective corporate governance has a vital role in ensuring that we earn and keep that trust.

What is the role of the Board?

I firmly believe that the role of the Board is to focus on long-term, sustainable value creation. At the heart of our strategy, which we announced in March 2016, is building on our strength as a transatlantic consumer, corporate and investment bank, with global reach. To this end, the Board has provided critical oversight of executive management in developing and delivering this strategy, creating a smaller, simplified bank capable of producing high quality returns for our shareholders on a sustainable basis.

What were the Board's key areas of focus in 2016?

During 2016, the Board focused its activity to support management in delivery of the agreed strategy. A summary of key items considered by the Board can be found on pages 56 to 57. The main areas of Board activity have been on ensuring that we have strong foundations in place by focusing on the performance of our Core businesses, and on completing the restructuring of Barclays by accelerating the run-down of the Non-Core businesses. We also took the difficult, but important, decision to sell-down our holding in Barclays Africa. Progress in these areas is enabling us to build the Barclays of the future. As part of ensuring we are well-positioned, and to meet regulatory requirements, we have aligned our business more closely with our legal entity structure and geographic locations. You can read more about the Board's role in preparing Barclays for Structural Reform in the case study on page 57. We also had to deal with the impacts of the UK's vote to leave the EU and held a special meeting in the days following the EU Referendum result to assess the position for Barclays. You can read more about how we prepared for the EU Referendum in the case study on page 72.

How effective is the Board?

Effective delivery of long-term, sustainable value for shareholders requires an effective Board. It is an important part of my role as Chairman to satisfy myself that the Board – both collectively and its individual members – operates effectively. Each year, we conduct a self-assessment of our performance, with the aid of an independent facilitator, and you can read a report on the outcomes of the 2016 self-assessment on pages 81 to 83. We also describe the actions we took during 2016 in response to any matters identified for improvement during the 2015 self-assessment. I hope this provides a flavour of how seriously the Board regards this important exercise.

The working relationship between the Board and executive management is, of course, critical to the effectiveness of the Board and I am pleased to report that we enjoy a healthy, constructive relationship, with an appropriate level of creative tension that helps drive productive discussions in the boardroom.

How did the Board change in 2016?

To be effective, the Board needs the right people and, in particular, it needs to have the right balance and diversity of skills, experience and perspectives. It is important that the composition of the Board brings to bear a broad range of social perspectives and talent on decision-making and that the Board is able to connect with the demographics of Barclays' customers and clients and employees. We have a healthy non-executive presence on the Board, which was strengthened further during 2016 with the appointments of Sir Gerry Grimstone as Deputy Chairman and Senior Independent Director and Mary Francis as a non-executive Director. Both are highly-experienced non-executive Directors and add to the depth of experience and talent on the Board. During 2016, Wendy Lucas-Bull and Frits van Paasschen, both non-executive Directors, left the Board and I thank them on behalf of the Board for their service.

In early 2016, we set ourselves a new Board diversity target, which is to have 33% women on the Board by 2020. We currently have 31% women on the Board and are pleased with the progress we are making towards our target. Of course, diversity is not just about gender and although we have not set any other Board diversity targets, such as ethnicity, when it discusses and assesses Board composition and prospective candidates the Board Nominations Committee considers a number of factors before making its recommendations. Ultimately, maintaining the overall effectiveness of the Board is paramount and we maintain the position that all appointments to the Board are made on merit. More information on the Board appointments process can be found on page 80.

How does the Board ensure that high standards of business conduct are maintained?

There can be no argument that to be successful and to create long-term, sustainable value, we must maintain consumer and market trust and confidence. We need to act with transparency and integrity in every interaction we have with all of our stakeholders and this behaviour is integral to the way in which we operate. This is why as a Board we have continued to wholeheartedly support Barclays' shared purpose and common values. *The Barclays Way*, which is endorsed by me, as Chairman, outlines the purpose and values that govern our way of working across our businesses globally. Of course, the challenge we have, in a large organisation such as Barclays, is to ensure that all employees do the right thing day in, day out. To address this challenge, all employees continue to be required to undertake training on *The Barclays Way* annually, with the Board Reputation Committee tracking completion rates. Additionally, the Board Reputation Committee hears directly from the senior management in each business on how they are addressing any conduct and cultural matters specific to that business, thus holding senior management to account for the values and behaviours in their business. You can read more about the work of the Board Reputation Committee on pages 73 to 76.

How does the Board take account of Barclays' wider stakeholders?

I've referred a number of times to the Board's role in creating and delivering shareholder value in a long-term, sustainable way. This can only be achieved by being acutely alive to the impact that our business decisions might have on our customers, clients, employees and others and by fully understanding and appreciating the wider societal obligations that we have. These issues are important for the Board and the Board Reputation Committee fulfils a vital role on behalf of the Board by monitoring key indicators across the areas of conduct, culture, citizenship and customer complaints. This includes, for example, assessing not only the volumes of customer complaints that we receive, but also the way in which they are handled. It covers assessing the results from regular employee opinion surveys and the actions being taken to address any common issues or themes that arise across the business. It also includes oversight

of the delivery of our citizenship strategy, the *Shared Growth Ambition*, where our long-term aim is to create and grow a collection of products, services and partnerships that improve the lives of people in the communities that we serve. All of this activity can and does support the Board's over-arching objective of delivering sustainable returns for our shareholders.

You can read more about the *Shared Growth Ambition* at home.barclays/citizenship

Looking ahead

I expect 2017 to be a pivotal year for Barclays in the delivery of its strategy; a year when we will complete our restructuring and establish ourselves as a bank that is recognised for financial strength, financial transparency, operational stability, underpinned by a values-driven culture. We are incredibly focused and working hard as your Board to engender respect and trust for our Company and the profession of banking, in order to support our customers and clients, to contribute to the UK's reputation as a place to do business and to deliver long-term value to shareholders.

John McFarlane

Barclays PLC Annual Report 2016 | 55

Governance: Directors report

What we did in 2016

During 2016, the Board focused on a number of specific areas, outlined in the table below, in line with Barclays three strategic goals and five principal risks:

Strategic goals

- Have strong foundations in place
- Accelerate the completion of restructuring
- Build the Barclays of the future

Principal risks

- Credit
- Market
- Funding
- Operational
- Conduct

Board allocation of time (%)

	2016	2015
1 Strategy formulation and implementation monitoring	55	56
2 Finance (incl. capital and liquidity)	17	11
3 Governance and Risk (incl. regulatory issues)	26	29
4 Other (incl. compensation)	2	4

Strategic Goal

Principal Risks

Strategy formulation and monitoring

§ Debated the potential impact of the EU Referendum and the contingency plans being developed. Following the result of the Referendum, discussed and assessed the implications for the UK, the banking sector and for Barclays, including a presentation from a third party on the political aspects and their potential implications

§ Regularly debated and monitored the progress of Barclays preparations for Structural Reform – see the case study on page 57 for further details

§ Reflected on the position of Barclays Africa in the Barclays Group and its impact on Barclays' capital position, deciding to sell-down Barclays' holding to a position where Barclays Africa accounting and regulatory de-consolidation could be achieved

§ Assessed the progress of strategy execution in each of Barclays UK, Barclays International's investment bank and corporate business and the Cards business, via presentations from the heads of each business

§ Monitored the progress of the run-down of Barclays Non-Core via regular presentations from the heads of the Non-Core business

§ Discussed regular updates from the Group Chief Executive on the progress being made against the Group's execution priorities and received insights on stakeholder issues (including those arising from customers and clients, employees, regulators and governments) and cultural matters, including results from employee opinion surveys

§ Debated and provided input to management on the formulation of overall Group strategy, including

the impact of structural change and the creation of new subsidiary legal entities in the Group

the progress of the sell-down of Barclays Africa, including potential options, costs of separation, potential conduct risks and customer impacts

the impact of the EU Referendum result, taking into account an assessment of possible political scenarios and the potential impacts on each of Barclays businesses in terms of capital, operations, economics, regulation, clients and customers

a strategic approach to costs optimisation
constraints and risks to strategy execution, covering economic assumptions; expected regulatory requirements on capital and solvency ratios at Group and subsidiary legal entity level; anticipated changes to accounting rules; investor expectations; and potential impacts for clients and customers

potential growth opportunities, covering an assessment of the competitive landscape for Barclays UK, Barclays International and the Cards business; key trends and risks for each business in terms of economics, regulation, customers, employees and technology; near-term focus areas and potential transformational opportunities

Finance, including capital and liquidity

§ Debated and approved the Group's Medium Term Plan for 2016-2018 and short-term plan for 2016, with a focus on producing increased returns in future

§ Regularly assessed financial performance of the Group and its main businesses via reports from the Group Finance Director

§ Reviewed and approved Barclays' financial results prior to publication, including approving final and interim dividends

§ Discussed market and investor reaction to Barclays' strategic and financial results announcements, with insights provided by the Head of Investor Relations

§ Provided input, guidance and advice to senior management on the high-level shape of Barclays' 2017-2019 Medium Term Plan and subsequently approved the final plan

Strategic Goal

Principal
Risks

Governance and risk, including regulatory issues

- § Debated and approved 2016 risk appetite for the Barclays Group
- § Regularly assessed Barclays overall risk profile and emerging risk themes, hearing directly from the Chief Risk Officer and the Chairman of the Board Risk Committee
- § Evaluated Barclays operational and technology capability, including specific updates on cyber-risk capability and the strategy for infrastructure services.
- Approved Barclays International's investment bank's IT and Data Global Strategy
- § Approved the Group's 2016 Recovery Plan and US Resolution Plan
- § Held specific meetings with representatives of Barclays' UK and US regulators to hear first-hand about regulatory expectations and their specific views on Barclays
- § Evaluated the status of Barclays' risk and control environment and the plans in place to enhance the risk and control framework and approved a revised Enterprise Risk Management Framework (ERMF)
- § Considered regular updates from the Group General Counsel on the legal risks facing Barclays
- § Heard regularly from the chairmen of the Board's principal Board Committees on the matters discussed at Board Committee meetings
- § Received updates from the chairman of Barclays US IHC on matters discussed at its board meetings
- § Heard directly from representatives of the Banking Standards Board on its assessment of the culture in Barclays and the banking sector as a whole

Other, including compensation

- § Reviewed Barclays' Talent Management strategy and the process for succession planning for key executive positions, hearing directly from the Group HR Director

and the Chairman of the Board Nominations Committee

§ Received and debated a presentation from the independent facilitator of the 2016 Board effectiveness review on the outcomes and potential areas of focus for improvement

The above analysis reflects the ERMF that was in place during 2016.

Governance in Action

Preparing for Structural Reform

Law and regulation in the UK, and associated regulatory rules, require Barclays to separate its retail banking operations into a separate, independent legal entity (known as ring-fencing). Barclays has an internal Structural Reform Programme in place to implement these required changes in the UK. A new UK banking entity is being established as the ring-fenced bank (Barclays UK) and will serve retail and small business customers, as well as UK wealth and credit card customers. Barclays International will continue to serve corporate, institutional and investment banking clients and will also serve international wealth and credit card customers. A Group Service Company will be established to support the revised operating entity structure.

These structural changes will have a material impact on the way in which Barclays operates in future. Consequently, the progress of the Structural Reform Programme featured heavily on the Board's agenda during 2016, given the scale of change required and the potential material risks associated with transitioning to the new structure and with the new structure itself. The Board evaluated progress of the Structural Reform Programme at seven of the eight Board meetings held during 2016, including specifically evaluating the impact of structural change as part of the annual Group strategy Board meeting. Specific matters addressed by the Board included:

§ Structural Reform design and implementation plans, including evaluating any identified risks and challenges; considering regulatory feedback on the plans and the status of actions arising from regulatory engagement; and agreeing the internal accountability framework

§ debating the potential implications of Structural Reform on Barclays' pension scheme, both in terms of the potential impact on Barclays and on pension scheme members

§ conducting an assessment of the overall conduct risk considerations associated with Structural Reform, focusing on the potential impacts for clients and customers

§ evaluating the work being conducted to address sort-code migration, covering technology planning and implementation and customer impact considerations.

Separately, during 2016, Barclays' US businesses were organised under an Intermediate Holding Company (IHC) in order to meet US legal requirements. The IHC became operational from 1 July 2016. The Board was regularly updated on progress of implementation, any risks and challenges and how they were being managed.

Board Committees have supported the Board in overseeing the implementation of Structural Reform on matters that fall directly within their remit. For example, the Board Nominations Committee determined the proposed composition of the boards of the new operating entities and is in the process of identifying and evaluating proposed candidates for appointment to those boards. It also discussed and

§ assessing the progress being made with establishing the new legal entity for Barclays UK, including any necessary regulatory licencing requirements and preparations for the ring-fence transfer scheme

§ monitoring the creation of the Group Service Company, including assessing its design, its board governance structure, its control and oversight framework and the execution milestones to be achieved

endorsed a set of Governance Guiding Principles, which will govern the relationship between the parent company and its new operating entities. The Board Risk Committee spends time at each meeting assessing the prospective capital and liquidity impacts of Structural Reform, while the Board Audit Committee has evaluated the potential accounting implications. More information can be found in the individual Board Committee reports on the pages that follow.

Governance: Directors report

[What we did in 2016](#)

[Board Audit Committee report](#)

Change has continued apace and it has been critical to focus on ensuring that the commitment to strengthening the control environment is maintained throughout this transformational period.

Dear Fellow Shareholders

My report to you last year highlighted the significant degree of change that Barclays was facing, driven by its own strategic aims and by the demands of Structural Reform. Change has continued apace and it has been critical for the Committee to focus on ensuring the commitment to strengthening the control environment is maintained throughout this transformational period. Barclays has during 2016 put in place a significantly changed senior management team and my Committee colleagues and I are greatly encouraged by the renewed focus and vigour with which the control environment is being addressed and the sense of personal accountability that we are seeing. A significant development in the fourth quarter of 2016 was the creation of a chief controls office and the appointment of a Chief Controls Officer, which will drive forward the delivery of an enhanced programme designed to strengthen the control environment and remediate any known issues. Although the new controls office structure is in its infancy, I welcome the more strategic approach that is now being taken to embed accountability for a strong control environment into the first line of management. Such is the importance of this programme to Barclays that, for its initial phase, progress on the framework will be reported directly to the full Board. In assessing control issues for disclosure in the Annual Report, the Committee has continued to apply similar definitions to those used for assessing internal financial controls for the purposes of Sarbanes-Oxley. The conclusion we have reached is that there are no control issues that are considered to be a material weakness, which merit specific disclosure. Further details may be found in the Risk management and internal control section on page 88.

Our busy agenda in 2016 continued to include our responsibilities for overseeing the performance and effectiveness of internal and external audit, the main independent assurance mechanisms that serve to protect shareholders' interests. The Committee also continued to exercise its responsibilities for ensuring the integrity of Barclays' published financial information by debating and challenging the judgements made by management and the assumptions and estimates on which they are based. The exercise of appropriate judgement in preparing the financial statements is critical in ensuring that Barclays reports to its shareholders in a fair, balanced and transparent way. The report that follows sets out details of the material matters considered by the Committee since my last report.

A significant change that the Committee has been overseeing is the transition to KPMG as Barclays' statutory auditor, following the audit tender concluded in 2015. I met regularly with the PwC lead audit partner and his KPMG successor during 2016. KPMG has been shadowing the current auditor, PwC, during the 2016 year-end audit and the Committee is already seeing some value from the new perspective provided by KPMG on accounting estimates and policies. You can read more about auditor transition in the case study on page 67.

The introduction in March 2016 of the UK's Senior Managers Regime allocated to me specific prescribed responsibilities for safeguarding the independence of, and overseeing the performance of, the internal audit function, including the performance of the Chief Internal Auditor, in line with regulatory requirements. In practice, little has changed in the way in which I fulfil my responsibilities: I continue to hold regular meetings with the Chief Internal Auditor and members of her senior management team to ensure I am aware of current work programmes and any emerging issues and I also agree the Chief Internal Auditor's objectives and the outcomes of her performance assessment. During 2016, the PRA undertook a review of Barclays Internal Audit (BIA) and made a number of recommendations to increase its effectiveness and the Committee's monitoring thereof. An action plan has been developed

to address these recommendations. The Committee also held a networking event with BIA during 2016, enabling Committee members to meet less formally with senior members of the BIA team.

An additional responsibility I have assumed under the Senior Managers Regime is that of Whistleblower's Champion, a position required by the FCA to be held at Board level. As champion, I have specific responsibility for the integrity, independence and effectiveness of the Barclays' policies and procedures on whistleblowing, including the procedures for protecting employees who raise concerns from detrimental treatment. During 2016, I recorded a video message to all employees Group-wide, highlighting my role as Whistleblower's Champion and raising awareness of the policies and procedures we have in place.

I continued to work closely with my fellow Board Committee chairmen during 2016, particularly with the Board Risk Committee chairman on the question of operational risk issues, which each Committee has a role in overseeing. I attended meetings of the IHC audit committee to gain a first-hand insight into the issues being addressed by that committee and have invited its chairman to attend a Committee meeting in early 2017 by way of reciprocating. I met frequently with other members of senior management, including the Group Finance Director, and continued my engagement with Barclays' regulators both in the UK and US.

Committee performance

The Committee's performance during 2016 was assessed as part of the independently facilitated annual Board effectiveness review. The conclusion of my Board colleagues was that the Committee is regarded as thorough and the Board takes assurance from the quality of the Committee's work. The main area identified for improvement was to ensure that the Committee continues to strike an appropriate balance between covering issues in appropriate detail and taking a strategic approach to its oversight and supervision of management. The review also commented on the need to strengthen the depth of financial and accounting expertise on the Committee via new appointments, which is a matter that was already under consideration during 2016, and the need to ensure that the way in which the Committee works with the Board Reputation and Board Risk Committees continues to capture all significant issues effectively while minimising any overlap. I will be seeking to address each of these areas over the coming year. You can read more about the outcomes of the Board effectiveness review on pages 81 to 83.

Looking ahead

The Committee is looking forward to working with both the new Chief Controls Officer and with the new auditor, KPMG, during 2017. In addition to overseeing management's progress on enhancing the control environment, the Committee will be focusing on some significant accounting issues, including the Group's preparedness for the implementation of IFRS9 and the accounting implications of Structural Reform. We will also be closely monitoring the implementation of the action plan to address the recommendations arising from the PRA's review of BIA.

Mike Ashley

Chairman, Board Audit Committee

22 February 2017

Board Audit Committee allocation of time (%)

	2016	2015
1 Control issues	23	18
2 Business control environment	19	16
3 Financial results	36	27
4 Internal audit matters	11	7
5 External audit matters	6	26
(including, in 2015, external audit tender)		
6 Other (including governance and compliance)	4	6

Committee composition and meetings

The Committee is composed solely of independent non-executive Directors, with membership designed to provide the breadth of financial expertise and commercial acumen its needs to fulfil its responsibilities. Its members as a whole have experience of the banking and financial services sector in addition to general management and commercial experience. Diane Schueneman was appointed to the Committee with effect from 18 February 2016, bringing valuable insights into operational and technology risk and controls. Diane de Saint Victor retired from the Committee at the end of May 2016. Mike Ashley is the designated financial expert on the Committee for the purposes of the US Sarbanes-Oxley Act. Although each member of the Committee has financial and/ or financial services experience, the Board has identified that the Committee could be strengthened by the appointment of an additional member with direct accounting and auditing experience. Consideration is being given to further appointments to the Committee in this regard, however, given the impact of Structural Reform, the search for suitable candidates is being addressed in the context of overall Board composition requirements. You can find more details of the experience of Committee members in their biographies on pages 51 and 52.

The Committee met 12 times in 2016 and the chart above shows how it allocated its time. Meetings are generally arranged well in advance and are usually scheduled in line with Barclays financial reporting timetable. Two of the meetings were arranged specifically to provide the Committee opportunity to consider particular issues relevant to the financial statements, such as the viability statement and the proposed deadline for PPI claims. Committee meetings were attended by management, including the Group Chief Executive, Group Finance Director, Chief Internal Auditor, Chief Risk Officer, Chief Operating Officer, General Counsel and Head of Compliance, as well as representatives from the businesses and other functions. In future, the Chief Controls Officer will attend meetings on a regular basis. The lead audit partner of the external auditor attended all Committee meetings and the Committee held a number of private sessions with each of the Chief Internal Auditor or the lead auditor partner, which were not attended by

management. From 1 July 2016, the lead audit partner of KPMG also attended meetings as part of the statutory auditor transition process. Representatives from the PRA also attended a meeting during 2016.

Member	Meetings attended/eligible to attend
Mike Ashley	12/12
Tim Breedon	12/12
Crawford Gillies*	11/12
Diane de Saint Victor (to 31 May 2016)	8/8
Diane Schueneman (from 18 February 2016)	9/9

*Did not attend one meeting convened at short notice owing to a prior commitment

Committee role and responsibilities

The Committee is responsible for:

§ assessing the integrity of the Group's financial reporting and satisfying itself that any significant financial judgements made by management are sound

§ evaluating the effectiveness of the Group's internal controls, including internal financial controls

§ scrutinising the activities and performance of the internal and external auditors, including monitoring their independence and objectivity.

The Committee's terms of reference are available at home.barclays/corporategovernance

Governance: Directors report

[What we did in 2016](#)

[Board Audit Committee report](#)

The Committee's work

The significant matters addressed by the Committee during 2016 and in evaluating Barclays' 2016 annual report and financial statements, are described on the following pages.

[Financial statement reporting issues](#)

The Committee's main responsibility in relation to Barclays' financial reporting is to review with both management and the external auditor the appropriateness of Barclays' financial statements, including quarterly results announcements and half-year and annual financial statements and supporting analyst presentations, with its primary focus being on:

§ the quality and acceptability of accounting policies and practices

§ any correspondence from financial reporting regulators in relation to Barclays' financial reporting

§ material areas where significant judgements have been made, along with any significant assumptions or estimates, or where significant issues have been discussed with or challenged by the external auditor

§ an assessment of whether the Annual Report, taken as a whole, is fair, balanced and understandable and provides the information necessary for shareholders to assess Barclays' position and performance, business model and strategy.

[Accounting policies and practices](#)

The Committee discussed reports from management in relation to the identification of critical accounting judgements and key sources of estimation uncertainty, significant accounting policies and the proposed disclosure of these in the 2016 Annual Report. Following discussions with both management and the external auditor, the Committee approved the critical accounting judgements, significant accounting policies and disclosures, which are set out in note 1,

Significant accounting policies, to the consolidated financial statements. There were no significant changes in accounting policy during the period. During 2016, the Committee was regularly updated on Barclays' preparations for

the implementation of IFRS9 (Financial Instruments), which is effective from 1 January 2018, including the key technical decisions and interpretations required and Barclays' proposed approach

for each. The Committee also considered the accounting implications of Structural Reform and the establishment of the ring-fenced bank. These will continue to be areas of focus in 2017.

Financial reporting regulators and Barclays

During the third quarter of 2016, Barclays received a comment letter from the Corporate Reporting Review Team (CRRT) of the Financial Reporting Council (FRC) in relation to its thematic review of tax disclosures. The comment letter covered the disclosure of uncertain tax provisions in Barclays' 2015 annual report and financial statements. The CRRT requested and was provided with additional information in respect of Barclays' disclosure of uncertain tax positions, including an advance copy of Barclays' enhanced policy for such disclosure (see page 294), and subsequently confirmed in writing that it had closed its enquiries.*

The Committee from time to time considers comment letters from the SEC in relation to its reviews of Barclays' Annual Report and other publicly filed financial statements. Such comment letters and Barclays' responses are made publicly available by the SEC on its website, www.sec.gov, once it has closed each such review. The Committee sought to ensure that Barclays took due account of the SEC's views in its external reporting.

Significant judgements and issues

The significant judgements and issues and actions taken by the Committee in relation to the 2016 annual report and financial statements are outlined below. The significant judgements and issues are broadly comparable in nature to prior years. Each of these matters was discussed with the external auditor during the year and, where appropriate, have been addressed as areas of audit focus in the Auditors' Report on pages 269 to 275.

*The CRRT's review was based on Barclays' annual report and financial statements and did not benefit from detailed knowledge of Barclays' business or the transactions entered into. The closure of the CRRT's enquiries provides no assurance that Barclays' annual report and accounts are correct in all material respects, as the FRC's role is not to verify information but to ensure compliance with reporting requirements. The FRC accepts no liability for reliance on its closure letter from Barclays or any third party, including but not limited to investors and shareholders.

Area of focus	Reporting issue	Role of the Committee	Conclusion/action taken
Conduct provisions (see Note 27 to the financial statements).	Barclays makes certain assumptions and estimates, analysis of which underpins provisions made for the costs of customer redress, such as for Payment	§ Regularly analysed the judgements and estimates made with regard to Barclays' provisioning for PPI claims, taking into account forecasts and assumptions made for PPI complaints and actual claims	The Committee and management continue to monitor closely any changes in customer or claims management companies' behaviour in light of the Plevin case and the proposed FCA timebar. Over the course of

Edgar Filing: BARCLAYS PLC - Form 6-K

Protection Insurance (PPI).	experience for Barclays and the industry as a whole.	2016, having assessed actual claims experience and the potential impact of the proposed timebar and the Plevin case, the Committee agreed to recognise additional provisions of £1,000m in 2016, bringing Barclays' total cumulative provisions against the cost of PPI redress and associated processing costs to £8.4bn, of which £2.0bn is remaining.
	§ Debated the potential impact on the future range of provisions arising from the FCA's proposed timebar on claims and the expected deadline of June 2019, discussing the levels of uncertainty in the projections.	
	§ Discussed the potential range of outcomes that might arise from the Plevin case (the 2014 UK Supreme Court ruling in Plevin v Paragon Personal Finance Ltd) and whether any increase in provisions was required.	
	§ Evaluated proposed additional provisions for PPI and whether the analysis performed by management was consistent with prior periods and reflected known trend data and whether Barclays' approach was consistent with that taken by industry peers.	
	§ Assessed provisions for alternative PPI (card protection and payment break plan insurance) and the claims experience compared to the range of reasonable high and low end scenarios that had been determined.	

Area of focus	Reporting issue	Role of the Committee	Conclusion/action taken
<p>Legal, competition and regulatory provisions (see Notes 27-29 to the financial statements).</p>	<p>Barclays is engaged in various legal, competition and regulatory matters. The extent of the impact on Barclays of these matters cannot always be predicted, but matters can give rise to provisioning for contingent and other liabilities depending on the relevant facts and circumstances. The level of provisioning is subject to management judgement on the basis of legal advice and is therefore an area of focus for the Committee.</p>	<p>§ Evaluated advice on the status of current legal, competition and regulatory matters.</p> <p>§ Assessed management's judgements and estimates of the levels of provisions to be taken and the adequacy of those provisions, based on available information and evidence.</p> <p>§ Considered the adequacy of disclosure, recognising that any decision to set provisions involves significant judgement.</p>	<p>The Committee discussed provisions and utilisation. Having reviewed the information available to determine what was both probable and could be reliably estimated, the Committee agreed that no additional provision should be made at the full year for ongoing investigations and litigation.</p> <p>Further information may be found on pages 330 to 338.</p>
<p>Valuations (see Notes 14-18 to the financial statements).</p>	<p>Barclays exercises judgement in the valuation and disclosure of financial instruments, derivative assets and certain portfolios, particularly where quoted market</p>	<p>§ Evaluated reports from Barclays Valuations Committee, with particular focus on the restructuring of the ESHLA portfolio and its subsequent de-recognition; a valuation disparity with a third party in</p>	<p>The Committee confirmed its agreement to the restructuring and de-recognition of the ESHLA portfolio and concluded that it was a de-recognition event. It noted the lack of progress made in resolving the</p>

prices are not available, including the Group's Education, Social Housing and Local Authority (ESHLA) portfolio.

respect of a specific long-dated derivative portfolio; and an assessment of the impact of negative interest rates on the valuation of derivatives.

third-party valuation disparity, which has been outstanding for some time, and satisfied itself on the basis of the information available to it that Barclays valuation methodology remains appropriate. It approved a revision to the model used for valuing the remaining ESHLA portfolio recommended by the Valuations Committee.

§ Considered proposals from the Valuations Committee to revise the valuations approach for the remaining ESHLA portfolio and to revise the approach to the marking of Own Credit.

Impairment
(see Note 7 to the financial statements).

Where appropriate, Barclays models potential impairment performance, allowing for certain assumptions and sensitivities, to agree allowances for credit impairment, including agreeing the timing of the recognition of any impairment and estimating the size, particularly where forbearance has been granted.

§ Assessed impairment experience against forecast and whether impairment provisions were appropriate.

§ Evaluated the appropriateness and timing of the impairment taken in connection with Barclays exposures to the oil and gas sectors, including the impact of single name losses in the oil and commodities sectors.

§ Debated the adjustment in impairment taken in the Cards business for informal forbearance arrangements and the potential impact of changes in emergence modelling.

§ Considered a report from the Group Impairment Committee on the adequacy of loan impairment allowances as at 31 December 2016, including assessing internal and external trends, methodologies and key management judgements.

The Committee challenged the timing of the oil and gas impairment taken in the half-year results, although confirmed that the provision was adequate. It welcomed the proposal to create a new Group Impairment Committee and enhance the role of the Group Finance function in assessing impairment provisioning. It agreed a post-model adjustment of £250m for impairment in the UK and US Cards businesses during the third quarter of 2016 and obtained clarification on the impairment policy for the Cards business. At the full year, having debated the report from the Group Impairment Committee it confirmed the adequacy of the full year impairment charge of £2.4bn.

Tax (see Note 10 to the financial statements).	Barclays is subject to taxation in a number of jurisdictions globally and makes judgements with regard to provisioning for tax at risk and on the recognition and measurement of deferred tax assets.	§ Evaluated the appropriateness of tax risk provisions to cover existing tax risk. § Debated the forecasts and assumptions supporting the recognition and valuation of deferred tax assets.	The Committee confirmed the tax risk provisions for the full year and the treatment of deferred tax assets.

Board Audit Committee report

Area of focus	Reporting issue	Role of the Committee	Conclusion/action taken
<p>Long-term viability (see page 41 for further information).</p>	<p>The Directors are required to make a statement in the Annual Report as to the long-term viability of Barclays. The Committee provides advice to the Board on the form and content of the statement, including the underlying assumptions.</p>	<p>§ Evaluated at year end a report from management setting out the view of Barclays long-term viability. This report was based on Barclays Medium Term Plan (MTP) and covered forecasts for capital, liquidity and leverage, including forecast performance against regulatory targets, outcomes of the stress test of the MTP and forecast capital and liquidity performance against stress hurdle rates, funding and liquidity forecasts and an assessment of global risk themes and the Group's risk profile.</p>	<p>Taking into account the assessment by the Board Risk Committee of stress testing results and risk appetite, the Committee agreed to recommend the viability statement to the Board for approval.</p>
		<p>§ Considered the viability statement in conjunction with Barclays risk statements and strategy/business model disclosures.</p>	

§ Addressed specific feedback from investors and other stakeholders on viability statements in general.

Fair, balanced and understandable reporting

(including country-by-country reporting and Pillar 3 reporting).

Barclays is required to ensure that its external reporting is fair, balanced and understandable. The Committee undertakes an assessment on behalf of the Board in order to provide the Board with assurance that it can make the statement required by the Code.

§ Assessed, via discussion with and challenge of management, including the Group Chief Executive and Group Finance Director, whether disclosures in Barclays published financial statements were fair, balanced and understandable.

§ Evaluated reports from Barclays Disclosure Committee on its assessment of the content, accuracy and tone of the disclosures.

§ Established via reports from management that there were no indications of fraud relating to financial reporting matters.

§ Evaluated the outputs of Barclays internal control assessments and Sarbanes-Oxley s404 internal control process.

§ Assessed disclosure controls and procedures.

§ Confirmed that management had reported on and evidenced the basis on which representations to the external auditors were made.

Having evaluated all of the available information and the assurances provided by management, the Committee concluded that the processes underlying the preparation of Barclays published financial statements, including the 2016 annual report and financial statements, were appropriate in ensuring that those statements were fair, balanced and understandable.

In assessing Barclays financial results statements over the course of 2016, the Committee specifically addressed and provided input to management on the disclosure and presentation of:

§ Barclays restated financial results, including the allocations to Barclays UK and Barclays International and the separation of the Cards business

§ the sell-down of Barclays holding in Barclays Africa and its classification as held for sale

§ guidance provided to the market on the costs of Structural Reform

§ the Group Finance Director's presentations to analysts

§ alternative performance measures in view of new guidance from the European Securities & Markets Association

§ core performance and headcount

§ operational risk capital and guidance on capital levels

§ the level of segmental reporting.

The Committee recommended to the Board that the 2016 annual report and financial statements are fair, balanced and understandable.

Other significant matters

Apart from financial reporting matters the Committee has responsibility for oversight of the effectiveness of Barclays internal controls, the performance and effectiveness of BIA and the performance, objectivity and independence of the external auditor. The most significant matters considered during 2016 are described below:

Area of focus	Matter addressed	Role of the Committee	Conclusion/action taken
<p>Internal control</p> <p>Read more about the Barclays internal control and risk management processes on pages 88 and 89.</p>	<p>The effectiveness of the overall control environment, including the status of any material control issues and the progress of specific remediation plans.</p>	<p>§ Evaluated and tracked the status of the most material control issues identified by management via regular reports from the Head of Operational Risk and latterly from the Chief Controls Officer.</p> <p>§ Evaluated the status of specific material control issues and associated remediation plans, including in particular those relating to Security of Secret and Confidential Data; Infrastructure Access Management; Group Resilience; IT Security; Data Governance; Model Risk Management; and Unsupported Infrastructure and Applications,</p>	<p>The Committee requested enhancements to reporting to make clear where operational risk was outside appetite and the actions being taken. The Committee welcomed the improvements made to the lessons-learned process and proposed that the new Group Controls Committee should play a role in setting standards for lessons-learned exercises and deciding when they should be conducted. The Committee endorsed the work being taken forward, under the leadership of the Chief Controls Officer, to address any feedback from regulators on Barclays control environment, noting that the</p>

all of which remained open at the end of 2016. Board would directly oversee the progress being made to address specific regulatory feedback. The Committee also challenged management to ensure that the RCSA process was sufficiently robust in light of some specific control issues that had emerged after certain RCSAs had been completed.

§ Discussed lessons learned from specific control incidents and how these could be applied to Barclays business globally, via an enhanced lessons-learned process. Board would directly oversee the progress being made to address specific regulatory feedback. The Committee also challenged management to ensure that the RCSA process was sufficiently robust in light of some specific control issues that had emerged after certain RCSAs had been completed.

§ Debated any regulatory reports or other feedback received from regulators on Barclays overall control environment.

§ Assessed the status of the enhancements being made to Barclays risk and control self-assessment (RCSA) process to support disclosures in Barclays annual report.

The effectiveness of the management control approach and control environment in each individual business, including the status of any material control issues and the progress of specific remediation plans.

§ Assessed individual reports from Barclays UK, Barclays International, the Cards business, Barclays Non-Core operations, Barclays International's US investment banking operations and Barclays Africa, including questioning directly the heads of those businesses on their management control approach/culture and control environment, including any specific control issues, resilience issues, the status and progress of any remediation plans or workstreams and plans to enhance the control environment.

The Committee welcomed the decision by Barclaycard to redirect strategic investment towards enhancing its control environment and to restrict growth in new business while certain control issues, such as fraud levels in the US, were addressed. To make clear the levels of personal accountability expected, the Committee asked for the control objectives for each member of the Group Executive Committee for 2016 to be made more specific, with an emphasis on prioritising control issues.

Edgar Filing: BARCLAYS PLC - Form 6-K

§ Tracked plans for implementing revised control governance structures in each business to align with changes in Barclays organisational structure.

§ Provided feedback on the 2016 control objectives for each member of the Group Executive Committee.

Governance: Directors report

What we did in 2016

Board Audit Committee report

Area of focus	Matter addressed	Role of the Committee	Conclusion/action taken
	The effectiveness of the control environment in the Chief Operating Office (COO) and the status and remediation of any material control issues.	<p>§ Scrutinised on a regular basis the COO control environment, taking the opportunity to directly challenge and question functional leaders, including the Chief Operating Officer on the progress of remediation plans.</p> <p>§ Debated the clarity of accountability and standards of consistency needed, given decentralisation of the business.</p> <p>§ Addressed the issue of resilience and associated risk appetite, discussing in particular the impact of change on resilience initiatives.</p> <p>§ Discussed the impact of the proposed sell-down of Barclays holding in Barclays</p>	The Committee emphasised the need for clear ownership and accountability between the business and COO for technology control issues, which has been addressed via the implementation of the new organisational management structure. In view of the volume of technology and change remediation required, the Committee tasked the Chief Operating Officer with enhancing the processes for self-identification and logging of risk and control issues. The Committee also asked the new Chief Information Officer to conduct a deep dive into Technology control issues, the outputs of which were evaluated by the Committee in the fourth quarter of 2016. The Committee welcomed the improved clarity of the plans to enhance the COO control environment and will receive further regular updates throughout 2017.

<p>The adequacy of the Group's arrangements to allow employees to raise concerns in confidence without fear of retaliation and the outcomes of any substantiated cases.</p>	<p>Africa, including any ongoing support requirements on COO-related material control issues.</p>	<p>The Committee concluded that Barclays' processes were appropriate and in line with peers. It noted that the successful internal campaign had generated an increase in the number of whistleblowing reports, all of which were investigated. Volumes of cases remain proportionate to Barclays' size and footprint. The Committee asked management to provide additional detail in its future reports where any whistleblowing investigation was outstanding for more than six months. In future, as Barclays Whistleblowing Champion, the Chairman of the Committee will make an annual report to the Board on whistleblowing matters.</p>
	<p>§ Evaluated the results of benchmarking exercise to compare Barclays' processes and case volumes to 40 peer companies.</p>	
	<p>§ Tracked the progress of the internal campaign to raise awareness among employees on raising concerns.</p>	
	<p>§ Monitored the trends in reported and substantiated whistleblowing cases, including any information on any instances of retaliation.</p>	

Area of focus	Matter addressed	Role of the Committee	Conclusion/action taken
Internal audit	The performance of BIA and delivery of the internal audit plan, including scope of work performed, the level of resources and the methodology and coverage of the internal audit plan.	<p>§ Scrutinised and agreed internal audit plans and deliverables for 2016, including agreeing the areas of focus, such as technology, data, change, execution risk, and the resources required.</p> <p>§ Monitored delivery of the agreed audit plans, including assessing internal audit resources and attrition levels and any impacts on the plan.</p> <p>§ Debated audit risk appetite and issue validation.</p> <p>§ Tracked the levels of unsatisfactory audits, including discussing the time taken to issue audit reports and the reasons for</p>	The Committee approved an increase in headcount to ensure appropriate audit coverage of technology and change and agreed an interim audit risk appetite level pending recruitment, subject to the delivery of mitigating actions assigned to the Chief Operating Officer. The Committee emphasised to management that it was not content with the number of unsatisfactory audits and considered setting a target for management. It also asked BIA to disclose in its reports the reasons for any delay in issuing audit reports, along with details of any audit work that was deferred or cancelled. In view of the additional expectations placed on BIA, the Committee requested details of internal audit vacancies, business areas and skills sets and encouraged the Chief Internal Auditor to consider internal transfers and

any delays.

§ Discussed BIA's assessment of the management control approach and control environment in Barclays UK, Barclays International and the COO.

§ Debated with BIA the possibility of auditing culture.

§ Evaluated the outcomes from BIA's annual self-assessment.

§ Debated feedback received from the PRA on the performance of BIA and discussed the increased regulatory expectations of BIA and the impact on internal audit plans and resources.

other creative solutions to fill resourcing gaps. It agreed with BIA the action plan to address the recommendations arising from the PRA review of BIA's performance. The Committee confirmed that it was satisfied with the outcomes of the self-assessment of BIA performance, which evidenced that the function generally conforms to the standards set by the Institute of Internal Auditors. It further confirmed that it felt able to rely on the work of BIA in discharging its own responsibilities.

External audit

The work and performance of PwC, including the maintenance of audit quality during the period of transition to a new auditor.

§ Met with key members of the PwC audit team to discuss the 2016 audit plan and agree areas of focus.

§ Assessed regular reports from PwC on the progress of the 2016 audit and any material issues identified, including debating with PwC whether any changes to the audit plan were needed following the UK's vote to leave the EU.

The Committee approved the audit plan and the main areas of focus.

Read more about the Committee's role in assessing the performance, effectiveness and independence of the external auditor and the quality of the external audit on pages 66 to 67.

Edgar Filing: BARCLAYS PLC - Form 6-K

§ Discussed PwC's report on certain control areas and the control environment, including a specific report on controls over access to payment systems requested by the Committee.

§ Discussed the draft audit opinion ahead of 2016 year end.

Governance: Directors' report

[What we did in 2016](#)

Board Audit Committee report

The Committee also covered the following matters:

§ tracked the progress of specific work being done to enhance Barclays' financial crime controls and the deployment of a revised financial crime operating model. The Committee also assessed the Group Money Laundering Officer's annual report and was briefed on any issues arising from the publication of the information known as the Panama Papers

§ assessed the status of the programme in place to ensure Barclays' compliance with client assets regulatory requirements, including approving the annual client assets audit report and discussing the potential impact of Structural Reform on client assets

§ evaluated the outcomes of the assessment of the Committee's performance and any areas of Committee performance that needed to be enhanced

§ reviewed and updated its terms of reference, recommending them to the Board for approval.

External auditor

PwC, and its predecessor firms, has been Barclays' external auditor since 1896. An external audit tender was conducted in 2015, with a view to rotating the external audit firm for the 2017 audit onwards. PwC was not asked to tender. The tender process completed in summer 2015 and the Board announced in July 2015 that it had appointed KPMG as Barclays' statutory auditor with effect from the 2017 financial year. Henry Daubeney of PwC has been Barclays' senior statutory auditor with effect from the audit for the 2015 financial year. He will be succeeded by an audit partner from KPMG with effect from the audit for the 2017 financial year.

Assessing external auditor effectiveness, auditor objectivity and independence and non-audit services

The Committee is responsible for assessing the effectiveness, objectivity and independence of the Group's auditor, PwC. This responsibility was discharged throughout the year at formal Committee meetings, during private meetings with PwC and via discussions with key executive stakeholders. In addition to the matters noted above, during 2016 the Committee:

§ approved the terms of the audit engagement letter and associated fees, on behalf of the Board

§ discussed and agreed revisions to the *Group Policy on the Provision of Services by the Group Statutory Auditor* and regularly analysed reports from management on the non-audit services provided to Barclays. Read more about non-audit services below

§ evaluated and approved revisions to the *Group Policy on Employment of Employees or Workers from the Statutory Auditor* and ensured compliance with the policy by regularly assessing reports from management detailing any appointments made

§ assessed the draft report to the PRA prepared by PwC regarding its detailed audit work on specific topics

§ was briefed by PwC on critical accounting estimates, where significant judgement is needed

§ assessed any potential threats to its independence self-identified and reported by PwC

§ reviewed the report on PwC issued by the FRC's Audit Quality Review team.

PwC's performance, independence and objectivity during 2016 were formally assessed at the beginning of 2017 by way of a questionnaire completed by key stakeholders across the Group. The questionnaire was designed to evaluate PwC's audit process and addressed matters including the quality of planning and communication, technical knowledge, the level of scrutiny and challenge applied and PwC's understanding of the business. The Committee was particularly interested in assessing whether audit quality was being maintained throughout the period of transition to a new auditor and that the appropriate degree of challenge and scepticism was being maintained. The results of the evaluation confirmed that both PwC and the audit process were effective. In view of the external audit tender conducted in 2015 and the decision to appoint KPMG as Barclays' external auditor with effect from the 2017 financial year, PwC will resign as the Group's statutory auditor at the conclusion of the 2016 audit and the Board will resolve to appoint KPMG to fill the vacancy. A resolution to appoint KPMG as auditor will be proposed at Barclays' 2017 AGM. PwC will be available at the 2017 AGM to answer any questions.

Non-audit services

In order to safeguard the auditor's independence and objectivity, Barclays has in place a policy setting out the circumstances in which the auditor may be engaged to provide services other than those covered by the Group audit. *The Group Policy on the Provision of Services by the Group Statutory Auditor* (the Policy) applies to all Barclays subsidiaries and other material entities over which Barclays has significant influence. The core principle of the Policy is that non-audit services (other than those legally required to be carried out by the Group's auditor) should only be performed by the auditor in certain, controlled circumstances. The Policy sets out those types of services that are strictly prohibited and those that are allowable in principle. Any service types that do not fall within either list are considered by the Committee Chairman on a case by case basis, supported by a risk assessment provided by management. Since October 2015, the Committee has also required all new engagements of KPMG for non-audit services to be considered in light of the Policy and has maintained oversight of such services on the same basis as for PwC. In particular, KPMG was not permitted to provide any non-audit service that might have continued beyond mid-2016 if it had potential to cause independence issues.

During 2016, the Policy was revised to reflect the FRC's draft Ethical Standard for Auditors published in September 2015, which implemented the EU's revised Statutory Audit Directive. The new Ethical Standard is effective from financial years commencing on or after 17 June 2016, meaning that Barclays must comply with effect from 1 January 2017. However, the Committee decided to early adopt the requirements of the new Ethical Standard from 1 July 2016, to align with the point at which KPMG started its required period of independence. In order to comply with the new Ethical Standard, significant amendments were made to the list of services that are strictly prohibited by the Policy. A number of services being undertaken by PwC or KPMG were required to be exited following adoption of the new Policy, with any exceptions being approved by the Chairman and notified to the Committee.

Under the Policy, the Committee has pre-approved all allowable services up to £100,000, or £25,000 for tax advisory services, however, all proposed work, regardless of the fees, must be sponsored by a senior executive and recorded on a centralised online system, with a detailed explanation of the clear commercial benefit arising from engaging the auditor over other potential service providers. The audit firm engagement partner must also confirm that the engagement has been approved in accordance with the auditor's own internal ethical standards and does not pose any threat to the auditor's independence or objectivity. All requests to engage the auditor are assessed by independent management before work can commence. Requests for allowable service types in respect of which the fees are expected to meet or exceed the above thresholds must be approved by the Chairman of the Committee before work is permitted to begin. Services where the fees are expected to be £250,000 or higher must be approved by the Committee as a whole. All expenses and disbursements must be included in the fees calculation. The thresholds were not amended when the Policy was revised in 2016.

During 2016, all engagements where expected fees met or exceeded the above thresholds were evaluated by either the Committee Chairman or the Committee as a whole who, before confirming any approval, assured themselves that there was justifiable reason for engaging the auditor and that its independence and objectivity would not be threatened. No requests to use PwC were declined in 2016 (2015: two), with one request to use KPMG declined (2015: n/a). On a quarterly basis, the Committee scrutinised details of individually approved and pre-approved services undertaken by PwC and KPMG in order to satisfy itself that they posed no risk to independence, either in isolation or on an aggregated basis. For the purposes of the Policy, the Committee has determined that any pre-approved service of a value of under £50,000 is to be regarded as clearly trivial in terms of its impact on Barclays' financial statements and has required the Group Financial Controller to specifically review and confirm to the Committee that any pre-approved service with a value of £50,000-£100,000 (or up to £25,000 for tax advisory services) may be regarded as clearly trivial. The Committee undertook a review of pre-approved services at its meeting in December 2016 and satisfied itself that such pre-approved services were clearly trivial in the context of their impact on the financial statements.

The fees paid to PwC for the year ended 31 December 2016 amounted to £49m (2015: £43m), of which £8m (2015: £9m) was payable in respect of non-audit services. Non-audit services

Governance in Action Statutory auditor transition

A significant activity for the Committee during 2016 has been overseeing the transition of Barclays' statutory auditor from PwC to KPMG. Following the audit tender that concluded in mid-2015, KPMG will become Barclays' statutory auditor with effect from the 2017 financial year onwards. The Committee has undertaken activity to manage the transition period to facilitate a smooth handover of responsibilities.

The Committee has overseen the steps required to enable KPMG to achieve independence by 1 July 2016. This included:

- § assigning a dedicated transition team to support operational activities, including progressing a global master services agreement and local jurisdictional agreements

- § agreeing with KPMG the overall plan to achieve independence and assessing regular reports from KPMG on the progress being made

represented 20.6% of the statutory audit fee (2015: 24.2%). A breakdown of the fees paid to the auditor for statutory audit and non-audit work can be found in Note 42 on page 362. Of the £8m of non-audit services provided by PwC during 2016, the significant categories of engagement, i.e. services where the fees amounted to more than £500,000, included:

§ audit-related services: additional work to facilitate the transition to KPMG as Barclays' statutory auditor

§ transaction support: services provided in connection with the sell-down of Barclays' holding in Barclays Africa, including acting as the reporting accountant on the circular issued to Barclays shareholders and providing comfort on associated documentation

§ quality assurance: services performed on behalf of Barclays Africa over work conducted by Barclays in connection with the separation arrangements from Barclays.

The fees paid to KPMG for non-audit work during 2016 were £17.3m (2015: £38m). Significant categories of engagement approved in 2016 included:

§ Audit-related services: services provided in connection with minimum regulatory requirements for audits of benchmark interest rate submissions.

The Statutory Audit Services for Large Companies Market Investigation (Mandatory Use of Competitive Tender Processes and Audit Committee Responsibilities) Order 2014

§ monitoring the orderly termination of non-audit services being provided by KPMG to Barclays that would be prohibited when KPMG becomes statutory auditor

§ requiring KPMG to comply from 1 June 2016 with the provisions of the Group's policies relating to the statutory auditor, specifically, *The Group Policy on the Provision of Services by the Group Statutory Auditor* and the *Group Policy on Employment of Employees or Workers from the Statutory Auditor*, and requiring management to report to the Committee on any services or appointments undertaken in line with these policies

§ accepting a formal independence letter from KPMG. This included a list of ongoing non-audit services that are deemed permissible and which have been approved in accordance with Barclays' policy and confirmation of KPMG's compliance with applicable ethics and independence rules.

Once independence was achieved, the Committee oversaw the handover plan and the transition to business as usual. This included:

§ inviting the lead audit partner of KPMG to attend Committee meetings as part of the process of shadowing PwC's 2016 audit

§ arranging for the lead audit partner of KPMG to attend meetings of the Board Reputation Committee and Board Risk Committee

§ receiving a briefing from KPMG on accounting developments, covering: Impairment and the impact of IFRS9 (Financial Instruments); Valuations; Negative interest rates; Structural Reform; IFRS15 (Revenue from contracts with customers) and

As described in this report, Barclays is in compliance with the requirements of The Statutory Audit Services for Large Companies Market Investigation (Mandatory Use of Competitive Tender Processes and Audit Committee Responsibilities) Order 2014, which relates to the frequency and governance of tenders for the appointment of the external auditor and the setting of a policy on the provision of non-audit services.

IFRS16 (Leases)

§ discussing with KPMG accounting policy interpretations following KPMG's review of Barclays accounting policies

§ assessing regular reports from KPMG on the progress being made with key activities, including building the Barclays audit team and gaining an understanding of Barclays key processes, systems and controls

§ reviewing the report on KPMG issued by the FRC's Audit Quality Review team

§ scheduling a planning meeting between the Committee and KPMG for the second quarter of 2017 to discuss the audit strategy and provide input.

Governance: Directors report

[What we did in 2016](#)

[Board Risk Committee report](#)

The Committee's focus during 2016 has been driven by a number of key challenges, including emerging economic and political risks, notably those associated with the EU Referendum and the subsequent vote by the UK to leave the EU.

Dear Fellow Shareholders

The Committee's focus during 2016 has been driven by a number of key challenges. First, Barclays has been implementing its new strategy and executing its Structural Reform Programme, which has some particular implications in terms of capital and liquidity management across Barclays' legal entities. Second, there was continued focus on any emerging risks arising in our key markets in the UK, US and South Africa as a consequence of any macroeconomic deterioration or disruption in financial market conditions. Finally, there were the challenges presented by emerging economic and political risks, notably those associated with the EU Referendum and the subsequent vote by the UK to leave the EU.

Considerations for risk appetite for 2016 and the Medium Term Plan (MTP) included credit cycle conditions; the impact of ongoing low commodity prices; a potential slowdown in China; and the likelihood of interest rate rises. Consequently, the recommendation of the risk

line of defence for managing risk in their businesses, with the chief executives of each business attending Committee meetings to present directly to the Committee, with the support of their chief risk officers, on the risk profile of their business and how risk is being managed.

My own responsibilities as Chairman of the Committee were re-emphasised during 2016, with the introduction in March 2016 of the UK's Senior Managers Regime. Under this regulatory regime, I have specific prescribed responsibilities for safeguarding the independence of and overseeing the performance of the risk function, including the performance of the Chief Risk Officer, in line with regulatory requirements. In addition to my regular meetings with the Chief Risk Officer and members of his senior management, I have led the Committee in encouraging the risk function to develop a way of assessing risk management capability, which we have also agreed will be subject to a periodic, external review. The risk function has also been encouraged to develop a way of measuring risk culture across the Group.

During 2016, I continued to liaise closely with the Chairman of the Board Audit Committee, particularly with regard to operational risk issues, where there is some degree of overlap between the remit of the two committees. I also attended a meeting of the risk committee of Barclays US IHC to gain a first-hand insight into the risk issues being addressed by

function, which was endorsed by the Committee, was that a conservative approach to growth should be maintained, with a focus on core products and markets. We expected continued volatility in external conditions and aimed to ensure that the Group was conservatively positioned. Headwinds developed during 2016 with the potential to have a significant first-order impact on Barclays businesses, including heightened economic risk in the UK post the EU Referendum; increased geo-political risk following the US presidential election; and the IAS19 position of Barclays' pension scheme, which is vulnerable to market volatility. Other emerging risks with the potential to impact Barclays include interest rate and credit spread movements; UK property price stress; potential transmission impacts of any slowdown in China; and ongoing volatility in oil prices, which remain low. All of these potential risks continue to be actively managed and the risk profile and actions taken are subject to regular oversight by the Committee. In these circumstances, we were pleased with the capital and leverage performance for 2016, although impairment performance was adverse to plan, primarily as a result of one-off effects reflecting management's review of impairment modelling in the UK and US Cards businesses.

In early 2016, Barclays appointed a new Chief Risk Officer, C.S. Venkatakrisnan, an appointment that was recommended to the Board by the Committee. The Committee oversaw the transition, specifically requesting information from the outgoing Chief Risk Officer on the transition plans and handover arrangements and seeking assurance from the new Chief Risk Officer that he had been provided with all of the information needed to enable him to fulfil his responsibilities. The Committee has welcomed the opportunity to work closely with the new Chief Risk Officer during 2016. We have also seen greater emphasis emerge over 2016 on the responsibilities of the first

management in that entity. I continued my practice of meeting regularly with other members of senior management and continued to engage with Barclays regulators in the UK and US.

Committee performance

The Committee's performance during 2016 was assessed as part of the independently facilitated annual Board effectiveness review. I am pleased to report that the conclusion of my Board colleagues was that the Committee is regarded as thorough and effective and that the Board has a high degree of confidence in the diligence and coverage of the Committee. The main area identified for improvement was to ensure that the co-operation and collaboration between the Committee and the Board Audit and Board Reputation Committees continues to capture all significant risk issues effectively. I will be working even more closely with my fellow Board Committee chairmen on this over the coming year. You can read more about the outcomes of the Board effectiveness review on pages 81 to 83.

Looking ahead

2017 will be a key year for Barclays in delivering its strategy, as it completes its restructuring and makes significant steps in implementing the new legal entity structure required under Structural Reform. I expect the Committee to focus on strategic risk, with an emphasis on promoting even greater linkages between strategy formulation and risk management, and ensuring that there is appropriate global oversight of risk across the new Group structure.

Tim Breedon

Chairman, Board Risk Committee

22 February 2017

Board Risk Committee allocation of time (%)

	2016	2015
1 Risk profile/risk appetite (including capital and liquidity management)	52	43
2 Key risk issues	26	31
3 Internal control/risk policies	8	11
4 Other (including remuneration and governance issues)	14	15

Committee composition and meetings

The Committee is comprised solely of independent non-executive

Directors. Details of the skills and experience of the Committee members can be found in their biographies on pages 51 to 52.

The Committee met eight times in 2016, with one of the meetings held at Barclays New York offices. A meeting was held specifically to consider the risk considerations arising from the outcome of the EU Referendum result, further details of which can be found on page 72. The chart above shows how the Committee allocated its time during 2016. Committee meetings were attended by management, including the Group Chief Executive, Group Finance Director, Chief Internal Auditor, Chief Risk Officer, Barclays Treasurer and General Counsel, as well as representatives from the businesses and other representatives from the risk function. Representatives from the current external auditor, PwC and, from 1 July 2016, representatives from the incoming external auditor, KPMG, also attended meetings.

Committee role and responsibilities

The Committee's main responsibilities include:

- § recommending to the Board the total level of financial and operational risk the Group is prepared to take (risk appetite) to achieve the creation of long-term shareholder value
- § monitoring financial and operational risk appetite, including setting limits for individual types of risk, e.g., credit, market and funding risk
- § monitoring the Group's financial and operational risk profile
- § ensuring that financial and operational risk is taken into account during the due diligence phase of any strategic transaction
- § providing input from a financial and operational risk perspective into the deliberations of the Board Remuneration Committee.

The Committee's terms of reference are available at home.barclays/corporategovernance

The Committee's work

The significant matters addressed by the Committee during 2016 are described below:

Area of focus	Matter addressed	Role of the Committee	Conclusion/action taken
<p>Risk appetite and stress testing, i.e. the level of risk the Group chooses to take in pursuit of its business objectives, including testing whether the Group's financial position and risk profile provide sufficient resilience to withstand the impact of severe economic stress.</p>	<p>The risk context to MTP, the financial parameters and constraints and mandate and scale limits for specific business risk exposures; the Group's internal stress testing exercises, including scenario selection and financial constraints, stress testing themes and the results and implications of stress tests, including those run by the Bank of England (BoE).</p>	<p>§ Assessed the risk context for the 2016 MTP, including general economic and financial conditions and how these had been reflected in planning assumptions.</p> <p>§ Debated the assumptions, parameters and results of the internal stress test of the risk appetite of the 2016 MTP.</p> <p>§ Discussed and agreed mandate and scale limits for</p>	<p>The Committee recommended the proposed risk appetite for 2016 to the Board for approval, although asked management to develop a contingency plan with identified triggers and actions that could be implemented if the stress occurred. It also emphasised to management that mandate and scale limits should be set at appropriate levels, reflecting the desire to focus on conservative growth in core products and markets. The Committee approved credit and market risk limits and requested that additional</p>

market and credit risk.

§ Approved the parameters for the European Banking Authority stress test.

§ Approved the parameters for BoE stress test scenario expansion.

§ Evaluated the BoE stress test results, including updates on stress testing governance and methodology and assessing potential contingency plan actions.

§ Debated regulatory and market reaction to the BoE stress test results.

§ Considered and approved internal stress test themes and the financial constraints and scenarios for stress testing risk appetite for the 2017 MTP.

§ Regularly monitored the progress of the US IHC in preparing for the Comprehensive Capital Analysis and Review (CCAR) stress test.

limits were set for market risk in order to enhance monitoring and control. It also asked management to review limits and guidelines and develop a revised framework for single name risk management, which it subsequently considered and approved. The Committee approved the stress test results for submission to the BoE. After evaluating feedback from the BoE on the stress test, the Committee encouraged management to engage with the BoE on specific points where additional clarity on regulatory expectations was desirable.

What we did in 2016

Board Risk Committee report

Area of focus	Matter addressed	Role of the Committee	Conclusion/action taken
<p>Capital and funding,</p> <p>i.e. having sufficient capital and financial resources to meet the Group's regulatory requirements and its obligations as they fall due, to maintain its credit rating, to support growth and strategic options.</p>	<p>The trajectory to achieving required regulatory and internal targets and capital and leverage ratios, including the potential impact of Structural Reform and legal entity requirements.</p>	<p>§ Debated on a regular basis, capital performance against plan, tracking the capital trajectory, any challenges and opportunities and regulatory policy developments.</p> <p>§ Assessed on a regular basis liquidity performance against both internal and regulatory requirements.</p> <p>§ Regularly monitored capital and funding requirements on a legal entity basis, including evaluating proposed capital and liquidity processes for Barclays UK.</p> <p>§ Debated with management proposed actions to be taken to restructure the Group's asset swaps and ESHLA portfolio in order to reduce the impact of market volatility on capital.</p>	<p>The Committee supported the forecast capital and funding trajectory and the actions identified by management to manage the Group's capital position, including the actions taken to restructure asset swaps and the ESHLA portfolio. The Committee approved the proposed capital and liquidity processes for Barclays UK for submission to the regulator.</p>

Political and economic risk,

i.e. the impact on the Group's risk profile of political and economic developments and macroeconomic conditions.

The potential impact on the Group's risk profile of political developments, such as the UK's EU Referendum and the US Presidential election, political and economic risk in South Africa, and weakening macroeconomic conditions, such as disruption and volatility in financial markets.

§ Closely monitored the potential impact of the UK's EU Referendum on the Group's risk profile and risk management **see the case study on page 72 for further details.**

§ Requested an assessment of the potential impact of negative interest rates in the UK on Barclays and on UK banks generally, evaluating the potential impact on risk appetite, on customers and on Barclays' models.

§ Continued to assess the economic and political situation in South Africa and the potential impact on the Group's risk profile, including assessing the potential risk of a sovereign credit rating downgrade and the action taken by management to position the business appropriately.

§ Continued to assess Chinese economic metrics and the potential for the global impact of any economic slowdown in China.

§ Discussed the impact of market volatility on Barclays' pension scheme.

The Committee identified interest rate risk as a potential area of emerging risk and asked management for an assessment of Barclays' sensitivity to changes in interest rates and inflation, which was presented to the Committee in the fourth quarter. The Committee suggested that the Board was briefed on this subject and a briefing session is planned for 2017.

The Committee satisfied itself that the actions taken to position Barclays' business in South Africa were appropriate in the context of the identified economic and political risk. It continues to keep the potential impact of a Chinese slowdown under active review and will be updated by management in early 2017 with an assessment of the risk horizon. Given the political and economic uncertainty in Italy that re-emerged in late 2016, the Committee asked management to renew its focus on reducing any redenomination risk arising from Barclays' operations in Italy.

§ Monitored Barclays exposures to certain European banks in view of potential specific stresses for individual banks and general economic and political conditions in the Eurozone.

Specific sector risk,

i.e. the Group's risk profile in sectors showing signs of stress, such as the oil sector.

The Group's exposures to the oil and commodities sectors in light of the ongoing price weakness and volatility in these sectors during 2016.

§ Continued to regularly assess the Group's exposures to the oil sector, including how the portfolio was performing and whether this was in line with expectations given the actions that had been taken to manage or restructure Barclays exposures.

The Committee satisfied itself that the actions taken by management were appropriate. Given ongoing volatility in this sector it will continue to monitor the portfolio for any further signs of stress that may require additional action.

Area of focus	Matter addressed	Role of the Committee	Conclusion/action taken
<p>Credit risk, i.e. the potential for financial loss if customers fail to fulfil their contractual obligations.</p>	<p>Conditions in the UK housing market, particularly in London and the South East and the Group's risk appetite for and management of sectors such as the buy-to-let sector, given changes in taxation; levels of UK consumer indebtedness, particularly in the context of the risk of rising interest rates; and the performance of the Cards business, particularly the US Cards business, including levels of impairment.</p>	<p>§ Continued to assess conditions in the UK property market for any signs of stress.</p> <p>§ Evaluated how management was tracking and responding to rising levels of consumer indebtedness.</p> <p>§ Scrutinised the performance of the Cards business, including reviewing performance against risk appetite, evaluating the drivers of impairment in the UK and US businesses and assessing actions being taken to ensure that the performance of certain business segments remained within agreed risk appetite.</p>	<p>The Committee continued to encourage management to carry on with its conservative approach to UK mortgage lending, particularly in view of signs of slowdown the market post the EU Referendum. It also encouraged management to continue its close monitoring of overall levels of consumer indebtedness. The Committee challenged the credit performance of certain business segments in the US Cards business and encouraged management to complete the actions that had been identified to improve credit performance. It also emphasised to management the need to strengthen the linkages between business strategy and risk appetite.</p>

<p>Operational risk, i.e. costs arising from human factors, inadequate processes and systems or external events.</p>	<p>The Group's operational risk capital requirements and any material changes to the Group's operational risk profile and performance of specific operational risks against agreed risk appetite.</p>	<p>§ Tracked operational risk key indicators via regular reports from the Head of Operational Risk.</p>	<p>The Committee focused its attention on the financial and capital impacts of operational risk, with specific attention on key risks that were outside appetite. It encouraged management to implement greater links between the control environment in each business and the operational risk capital allocated to that business. It also emphasised to management that there should be greater co-ordination between the key risks highlighted to the Committee and the operational risk control issues escalated to the Board Audit Committee, which is being addressed via the new chief controls office.</p>
<p>Risk framework and governance</p>	<p>The frameworks, policies and talent and tools in place to support effective risk management and oversight.</p>	<p>§ Evaluated model risk and plans in place to enhance Barclays' models and modelling capabilities.</p>	<p>The Committee will continue to track the delivery of plans to enhance modelling and will focus on this during 2017 as part of its oversight of the model risk principal risk. The Committee encouraged management to continue to improve risk data quality, including embedding accountability for risk data quality with the business chief risk officers. The Committee will continue to track management's response to any risk management matters raised by the Group's regulators.</p>
		<p>§ Tracked the progress of significant risk management projects, including the plans in place to achieve compliance with BCBS239 risk data aggregation principles.</p>	
		<p>§ Debated any risk management matters raised by Barclays' regulators and the actions being taken by management to respond.</p>	<p>The Committee was satisfied</p>

§ Discussed and endorsed the revised Enterprise Risk Management Framework (ERMF) from the perspective of financial and operational risk.

§ Oversaw the transition and handover to a new Chief Risk Officer.

§ Encouraged management to find ways of assessing risk capability and risk management culture.

that the handover to the new Chief Risk Officer was appropriate. The Committee welcomed the development of a risk management capability scorecard and asked for risk management capability to be evaluated by an external third party on a periodic basis, with a view to starting in 2017. It also welcomed the proposal to measure risk culture and asked for this to be fed into the Board Reputation Committee's overall assessment of Barclays culture.

Remuneration

The scope of any risk adjustments to be taken into account by the Board Remuneration Committee when making remuneration decisions for 2016.

§ Debated the Risk function view of 2016 performance, making a recommendation to the Board Remuneration Committee on the financial and operational risk factors to be taken into account in remuneration decisions for 2016.

The Committee asked for capital and liquidity on a stressed basis to be taken into account when finalising the risk input to remuneration decisions.

Governance: Directors report

What we did in 2016

Board Risk Committee report

In addition, the Committee also covered the following matters in 2016:

§ assessed Barclays' exposures to the leveraged finance market and general conditions in that market

§ was briefed by PwC on any risk matters associated with the 2015 year-end audit, specifically impairment; the valuation of the ESHLA portfolio; and a valuation disparity with a third party

§ evaluated the outcomes of the assessment of the Committee's performance and any areas of Committee performance that needed to be enhanced

§ reviewed and updated its terms of reference, recommending them to the Board for approval.

Governance in Action

contingency planning for the UK's EU Referendum

A significant external risk event in 2016 was the UK's Referendum on its continued membership of the EU. The Board Risk Committee actively tracked this emerging risk throughout 2016, both before and after

the vote.

Pre-EU Referendum activity by the Committee included:

§ debating the UK's potential exit from the EU, including evaluating an assessment of the potential impacts on Barclays of a leave vote and discussing the key messages for policymakers and prudential authorities on the risks

§ evaluating Barclays' potential exposures if there were to be a vote to leave the EU, including assessing the steps taken by management to mitigate any risk (such as reducing any currency mismatches) in order to position Barclays defensively to manage the impact of any volatility on market and funding risk

§ assessing the likelihood of any operational risk issues that might arise if there was a period of market volatility following a leave vote

§ conducting an overall review of the appropriateness of Barclays' preparations for any market dislocation

§ reporting to the Board on the Committee's deliberations.

In addition to the activities undertaken by the Committee, Board members, including certain non-executive Directors, participated in a Group crisis management planning exercise based on the UK voting to leave the EU. The exercise focused on Barclays' response and communications planning in the event of a vote to leave; articulating some of the high level impact scenarios following a vote to leave;

Post-EU Referendum activity by the Committee included:

§ convening a special meeting to discuss and evaluate the effectiveness of Barclays' preparations, concluding that the plans developed had been executed satisfactorily

§ assessing the performance of the actions taken to manage the impact of volatility on market and funding risk

§ evaluating a revised stressed outlook, based on revised economic assumptions, and its impact on Barclays' risk profile, deliberating the effect of the revised outlook on forecast impairment and on capital and funding, market risk and credit risk

§ considering Barclays' exposures to European banks in anticipation of potential market disruption in the Eurozone and the actions that had been taken to limit such exposures

§ discussing with management the actions that had been taken to reduce risk appetite and limits on exposures to residential property development, high loan-to-value mortgages and buy to-let lending and other actions that had been implemented to manage risk in higher risk retail segments and corporate portfolios

§ encouraging management to consider the strategic implications of the leave vote

§ emphasising to management the need to fully and openly engage on matters of mutual concern with the UK government and regulators given the new political and economic environment

and determining the decisions and ensuing direction required from Barclays' Crisis Leadership Team.

§ continuing to track the potential impact of the leave vote and the actions being taken by management to deal with any emerging signs of stress in Barclays' portfolios

§ reporting to the Board on the Committee's deliberations.

The full Board also met in the aftermath of the vote result to be briefed on how Barclays had performed during the period of volatility immediately following the result, including discussing Barclays' capital and liquidity position; market conditions; communications with employees and with customers and clients; contact with regulators and the UK government; the outlook for the UK economy; share price performance and potential strategic impacts.

Read more about Barclays' risk management on pages 145 to 162 and in our Pillar 3 report, which is available online at barclays.com/annualreport

[What we did in 2016](#)

Board Reputation Committee report

Achieving and sustaining a culture where all of our people demonstrate consistent behaviours and conduct underpinned by the Barclays values is key to delivering high performance for all our stakeholders and, therefore, to our long-term success.

Dear Fellow Shareholders

One of the key areas of focus for the Committee during 2016 was encouraging management to develop a way of better understanding and measuring intangible areas such as behaviour and culture. Barclays has a strong and resonant purpose, Helping people achieve their ambitions in the right way, and a well understood set of values, Respect, Integrity, Service, Excellence and Stewardship. This culture is firmly endorsed from the top: achieving and sustaining a culture where all of our people demonstrate consistent behaviours and conduct, underpinned by Barclays values, is key to delivering high performance for all our stakeholders and, therefore, to our long-term success.

Our challenge has been how to co-ordinate the efforts to build culture across the Group and obtain assurance that progress is being made. Significant focus was given during 2016 to developing consistent measurement and reporting of culture and you can read about the Committee's role in this important initiative in the case study on page 76. A

This is my first report as Chairman of the Board Reputation Committee and I wish to record my thanks to Sir Michael Rake, who I succeeded as Chairman on 1 January 2016, and to Wendy Lucas-Bull and Frits van Paasschen, who both stepped down from the Committee on their retirement from the Barclays Board during 2016. Mike Ashley and Mary Francis subsequently joined the Committee to ensure we have the right balance of skills and experience and appropriate cross-membership with other Board Committees.

The report on pages 74 to 76 sets out details of the material matters considered by the Committee during 2016.

Committee performance

The Committee's performance during 2016 was assessed as part of the independently facilitated annual Board effectiveness review. I can report that my fellow Board members considered that the Committee has made progress in defining its role and is performing well. The main area identified for improvement was around ensuring that Board members have greater awareness of the Committee's mandate and core agenda. You can read more about the outcomes of the Board effectiveness review on pages 81 to 83.

similar approach has been taken to developing a set of indicators to allow us to measure progress across the Committee's other areas of responsibility: conduct, complaints and citizenship.

During 2016, the Committee continued to track the exposure of Barclays, and the financial sector in general, to reputational risks. It also placed a renewed focus on the initiatives under way to build and manage Barclays reputation with its key stakeholders. We also continued to exercise oversight of the Barclays Compliance function, including approving its annual business plan, budget and resources.

Under the UK's Senior Manager Regime, which was introduced in March 2016, I have specific responsibilities with regard to safeguarding the independence and integrity of Barclays Compliance function and for overseeing its performance, including that of the Head of Compliance. To this end, I regularly meet with the Head of Compliance to receive briefings on the work of Compliance and provide support when necessary. I also meet regularly with other members of senior management, including those in the Corporate Relations, Citizenship and Reputation Risk teams.

Looking ahead

Cultural transformation remains firmly on the Committee's agenda and we will continue to track key indicators and measure the progress being made. This will be increasingly important as Barclays implements its Structural Reform Programme and begins to establish separate legal entities within the Group. My key objective in 2016 was to put the Committee at the centre of Barclays' drive to be a leader in conduct, culture and reputation - matters at which we have not always excelled in the past. There is still lots to do, but I believe that the leadership and processes that we have now put in place give us a great foundation on which to build.

Sir Gerry Grimstone

Chairman, Board Reputation Committee

Committee composition and meetings

The Committee comprises independent non-executive Directors. During 2016 there were a number of changes to the membership of the Committee, which are set out in the table opposite.

The Committee met five times during 2016 with one of the meetings held at Barclays New York offices. The chart above shows how it allocated its time. Committee meetings were attended by representatives from management, including the Group Chief Executive, Chief Internal Auditor, Chief Risk Officer, General Counsel, Group Corporate Relations Director and Heads of Compliance, Conduct Risk and Operational Risk, as well as representatives from the businesses and other functions. Representatives from the FCA also attended a meeting during 2016.

The Committee's work

The significant matters addressed by the Committee during 2016 are described below:

Area of focus	Matter addressed	Role of the Committee	Conclusion/action taken
Conduct risk	The risk of detriment to customers, clients, market integrity, competition or Barclays from the inappropriate supply of financial services, including instances of wilful or negligent misconduct.	<p>§ Discussed updates from management on conduct risk and requested the development of a dashboard report of conduct indicators to be presented to each meeting.</p> <p>§ Monitored on a regular basis performance against agreed conduct risk indicators.</p>	The Committee requested further focus on product propositions and suitability and updates on product development and controls. In 2017, it will receive a quarterly report on new products. It provided input on the development of the dashboard, including requesting that it incorporates reports from BIA and draws on external data points where available. The Committee reiterated to management the

§ Debated the indicators that had been developed to measure material conduct risks and issues, including providing feedback on indicators for policy breaches.

§ Discussed with BIA its view of the management of conduct risk across the Group, with particular emphasis on maintaining focus on conduct risk through periods of change.

§ Provided input, via the Committee Chairman, to the scope of BIA's review of the conduct risk programme.

§ Discussed directly with the senior management of Barclays International and Barclays UK their view of conduct and cultural issues in those businesses and the status of any initiatives in place to strengthen conduct and culture.

§ Confirmed with management that reviews had been undertaken to learn lessons from issues that had arisen at other banks and financial institutions, e.g. sales-based incentive schemes.

§ Tracked the levels of attestation by colleagues

importance of ensuring that the focus on conduct is maintained in those businesses or jurisdictions that Barclays is exiting or where it is reducing its presence. The Committee encouraged management to bring contingent workers into the scope of *The Barclays Way* training and arrangements are being made for all Committee members to complete the training themselves.

	and the standard and quality of complaints handling processes.	presented to each meeting.	complaints in the Barclays International's investment bank and a standard on complaint handling in that business will be issued in the first quarter of 2017. The Committee requested that additional information on the top root causes of complaints was included in future reports.
		§ Monitored on a regular basis performance against agreed complaints indicators.	
		§ Discussed the way in which complaints are handled and the focus on resolving complaints at first point of contact.	
		§ Debated imminent industry-wide changes in the way in which reportable complaints are recorded and the potential for reputation risk.	
Citizenship	The status of Barclays Citizenship Plan 2016-2018, the <i>Shared Growth Ambition</i> .	§ Debated the targets to be set for the Shared Growth initiatives.	The Committee provided feedback on how the <i>Shared Growth Ambition</i> was articulated and requested additional information on the focus areas and metrics and how progress would be measured and reported. Its feedback was incorporated into the plan, which was launched in June 2016.
		§ Agreed with the proposal to focus activity around the themes of access to employment, to financial and digital empowerment and to financing.	
		§ Assessed status updates on the progress of the <i>Shared Growth Ambition</i> .	Read more about Barclays approach to citizenship on pages 23 to 24.
		§ Requested the development of a dashboard report of citizenship indicators to be	

presented to each meeting and monitored on a regular basis performance against agreed indicators.

§ Considered and recommended to the Board for approval Barclays statement under the UK's Modern Slavery Act, which can be found on Barclays website.

Reputation risk

Ensuring that Barclays anticipates, identifies and manages reputational issues that may impact it or the industry now or in the future.

§ Monitored current reputation risk issues, including Barclays involvement in sensitive sectors such as defence or energy and fossil fuels.

§ Assessed emerging reputational issues, such as climate change and the relaxation of certain sanctions against Iran.

§ Evaluated the measures being taken to proactively build and manage Barclays reputation with stakeholders.

§ Assessed external opinion survey results, the trends in indicators and factors influencing the survey results, including the potential impact of the EU Referendum and government leadership changes in the UK and US.

The Committee provided feedback on the form and content of the reputation risk reports and how Barclays-specific and systemic risks might be monitored. It approved changes to Barclays' Sanctions Policy with regard to sanctions with Iran. The Committee requested a regular report setting out a rolling 12-month view of Barclays' communications campaigns. It also requested and received an update on Barclays' crisis management plans. It requested and received further information on Barclays' business in low tax jurisdictions. It asked for and receives regular reports from the Tax Management Oversight Committee on the transactions it has reviewed.

§ Discussed the reputational risks associated with tax and how this was being managed across the Group, including the effectiveness of Barclays Tax Principles and Code of Conduct.

Governance: Directors report

What we did in 2016

Board Reputation Committee report

The Committee also covered the following matters:

§ discussed the progress of plans to develop the Barclays brand

§ endorsed the 2017 priorities for Barclays Corporate Relations team

§ assessed the revised ERMF from a conduct and reputation risk perspective and recommended it to the Board for approval

§ approved the 2016 Compliance business plan and tracked progress, including updates on resourcing and attrition levels

§ received a report on management's annual review of the effectiveness of compliance with the Volcker Rule (restrictions on proprietary trading and certain fund investments by banks operating in the US)

§ assessed and discussed a report on the Committee's performance during 2015

§ approved revisions to its terms of reference and recommended them to the Board for approval.

--

measuring cultural progress

A primary area of focus for the Committee in 2016 was providing challenge and support to management in its delivery of cultural change. The Group Executive Committee confirmed conduct, culture and values as one of its execution priorities for 2016, with the aim of monitoring cultural change and bringing together different cultural indicators to form a coherent and consolidated view of culture across Barclays.

Senior representatives from Compliance, Risk, HR and BIA presented to the Committee in early 2016 on the progress of implementing cultural change and proposals for developing a set of key indicators, along with clear governance structures and accountability for monitoring and sustaining cultural progress. The Committee debated and endorsed the following objectives:

§ identify the desired culture end-state and how to measure progress towards achieving it

§ develop a cultural measurement tool that provides simple and consistent reporting relevant to all stakeholders

§ use the insights obtained to drive actions and further embed and sustain the desired values-based culture.

Ten cultural outcomes were identified, firmly linked to Barclays values:

Value

Cultural outcomes

For each desired cultural outcome, a set of internal qualitative and quantitative indicators was identified, along with external perception indicators. The indicators proposed were drawn from existing indicators used in the Group, such as the results from Your View (the employee opinion survey), external opinion survey results, BIA reports, performance reviews and indicators relating to risk management and compliance. Assessing these indicators will ensure that ongoing efforts are focused on priority issues and challenges that may impede cultural transformation.

In debating and endorsing the proposed cultural outcomes and indicators, the Committee provided feedback to management. It discussed in particular:

§ how to embed the desired culture across middle-management and whether a targeted action plan was needed for this population

§ how structuring incentives in the right way, based on personal accountability, could help drive the right culture and behaviours

§ whether a more holistic approach was needed to performance reviews, with even more focus on rewarding how things were done, rather than what was achieved

§ that indicators based around the how assessments from performance reviews might be incorporated as a measure of success

§ that existing indicators on audit issues and regulatory actions could be incorporated as a

Edgar Filing: BARCLAYS PLC - Form 6-K

Respect	Inclusion	Collaboration	<p>measure of success.</p> <p>Feedback from the Committee was subsequently incorporated into the measurement tool. The Committee also requested the development of a culture dashboard, setting out quarterly performance against the agreed indicators. The first such report was made in September 2016, with a further report in December 2016, allowing the Committee to debate the results and trends and the areas identified for potential deep dive reviews or targeted action. During 2017, the Committee will continue to assess the quarterly indicators, the potential themes emerging and any specific challenges identified at a business and functional level.</p>

[What we did in 2016](#)

[Board Nominations Committee report](#)

It is a key part of our role to be satisfied that there are proper processes in place for executive succession.

Dear Fellow Shareholders

Following his appointment as Group Chief Executive at the end of 2015, Jes Staley has been building his Group Executive Committee. Board level consideration is required for appointments to the Group Executive Committee and throughout 2016 the Board Nominations Committee continued to embed its oversight of Group Executive Committee succession planning. The Committee was updated on Barclays talent and succession strategy and presented with role profiles and outputs from reviews of internal successors to Group Executive Committee roles. It is a key part of our role to be satisfied that there are proper processes in place for executive succession and at our regular meetings we discussed how potential successors are being provided with wider, relevant experience as part of their development.

Another ongoing area of focus for the Committee in 2016 was the composition of our subsidiary boards in light of the legal, regulatory and governance requirements of Structural Reform. A great deal of consideration has been given to ensuring the independence of the board and board committees of Barclays strategically significant subsidiaries, while allowing for collaboration between those boards and the Barclays Board. We have deliberated at

When considering Board and Board Committee composition and succession plans, diversity remains at the front of our minds. We continued to receive regular updates on diversity and inclusion during 2016 and were pleased to hear that the number of women in senior leadership positions had increased for the third successive year. As a Board we met our target of 25% female representation by 2015 and are progressing towards the target we set ourselves last year of 33% female representation by 2020. Diversity is not just about gender, however, and we are always mindful of diversity in all of its forms, even where we have not set specific targets.

Certain responsibilities for me as Chairman of the Committee have been prescribed by the Senior Managers Regime that was introduced in the UK in March 2016. Under that regime, I am responsible for ensuring that the Committee remains independent and that it performs effectively, fulfilling the responsibilities expected of it by our regulators in terms of overseeing decisions around the structure, size, composition, diversity and performance of the Board. The report that follows describes how these responsibilities have been fulfilled. I would like to take this opportunity to thank my fellow Committee members for their continued support during 2016.

Committee performance

The performance of the Committee was assessed as part of the annual Board effectiveness review and I am pleased to report that it was assessed to be performing effectively. An area identified for

length on the structure of the subsidiary boards and how they will report into and interact with our Group Board, which must continue to have appropriate oversight to ensure the effective operation of the Group and the protection of shareholder interests. During 2016, we finalised and recommended to the Board a set of Governance Guiding Principles, which document the high level expectations of the relationship that will exist between Barclays and its strategically significant subsidiaries.

The Committee regularly considered the balance of skills, experience and diversity needed on the Board during 2016. We refreshed the Board skills matrix to reflect the future strategy of the Group, identifying the attributes required to further strengthen and enhance the Board's effectiveness. We conducted searches for new non-executive Directors, approving the appointment of Mary Francis as non-executive Director: Mary brings both financial services experience and significant non-executive directorship experience to the Board. We also considered subsidiary board composition at each of our Committee meetings, with a particular focus on populating the strategically significant subsidiary boards as we continue to embed Structural Reform. It is fair to say that attracting candidates with the skills, experience and qualities we need remains a considerable task: serving on a bank board is not an undertaking that anyone considers lightly and our success in securing the right candidates has been necessarily limited by the challenges they perceive.

improvement was around ensuring that there are more regular reports to the Board on the status of recruitment of new non-executive Directors, which I will address. The report on the Board effectiveness review contains more information and can be found on pages 81 to 83.

Looking ahead

In 2017 we will continue to support the implementation of the new Group structure, ensuring that we have the right people in place to take Barclays forward. As appropriate, we will continue to make recommendations to the Board to ensure that we remain at the forefront of best practice corporate governance standards.

John McFarlane

Chairman, Board Nominations Committee

Committee composition and meetings

The Committee is composed solely of independent non-executive Directors. John McFarlane, as Chairman of the Board, is also Chairman of the Committee. Mike Ashley, Tim Breedon, Crawford Gillies, and Sir Gerry Grimstone, being the Chairmen of each of the other Board Committees, and Reuben Jeffery, are also members of the Committee. Details of the skills and experience of the Committee members can be found in their biographies on pages 51 and 52.

During 2016 there were seven meetings of the Committee, including one joint meeting with the Board Remuneration Committee. Three of these meetings were held at short notice to deal with specific matters. Attendance by members at Committee meetings is shown opposite and the chart above shows how the Committee allocated its time. Committee meetings were attended by the Group Chief Executive, with the Group HR Director, the Head of Talent, and the Global Head of Diversity and Inclusion attending as appropriate.

The Chairman and the Group Chief Executive excuse themselves from meetings when the Committee focuses on the matter of succession to their roles.

Committee role and responsibilities

The principal purpose of the Committee is to:

- § support and advise the Board in ensuring that the composition of the Board and its Committees is appropriate and enables them to function effectively
- § examine the skills, experience and diversity on the Board and plan succession for key Board appointments, planning ahead to deal with upcoming retirements and to fill any expected skills gaps
- § provide Board level oversight of the Group's talent management programme and diversity and inclusion initiatives
- § agree the annual Board effectiveness review process and monitor the progress of any actions arising.

You can find the Committee's terms of reference at
home.barclays/corporategovernance

The Committee's work

The significant matters addressed by the Committee during 2016 are described below:

Area of focus	Matter considered	Role of the Committee	Conclusion/action taken
Board and Board Committee composition	The membership of the Board and the current and future composition of the Board and its Committees.	<p>§ Debated a forward-looking plan of the expected skills and experience needed on the Board in the context of future strategic direction.</p> <p>§ Evaluated the revised Board skills matrix and, in</p>	The Committee approved the revised skills matrix and agreed to conduct a search for new non-executive Directors in line with the requirements identified. review.

Governance

Changes to the Board's corporate governance framework following the implementation of the Senior Managers Regime in March 2016.

§ Reviewed updates to *Corporate Governance in Barclays* and the *Charter of Expectations* following the implementation of the Senior Managers Regime in order to integrate the requirements into the existing corporate governance framework, applying particular focus to the updated individual role profiles.

Approved and recommended to the Board for approval the updated corporate governance documents and role profiles for key positions on the Board.

Governance: Directors report

[What we did in 2016](#)

Board Nominations Committee report

In addition the Committee covered the following matters:

§ received a presentation from the PRA on its annual review of Barclays

§ proposals for the 2016 Corporate Governance Report

§ review of the Committee's effectiveness and its terms of reference.

Appointment and re-election of Directors

Board and Board Committee composition is a standing item for consideration at each Committee meeting. This includes the consideration of potential new non-executive Director appointments, both in respect of planned succession for known retirements and as a result of the ongoing review of the skills and experience needed on the Board in order for it to continue to operate effectively.

The Committee frequently considers a skills matrix for the Board, which identifies the core competencies, skills, diversity and experience required for the Board to deliver its strategic aims and govern the Group effectively. Each attribute identified in the skills matrix has a target weighting attached to it and these are regularly updated over time to reflect the needs of the Group. The Committee reviews the skills matrix when considering a new appointment to the Board, as well as reviewing the current and expected Board and Board Committee composition. This helps to determine a timeline for proposed appointments to the Board.

When recruiting a new non-executive Director the specific skills that are needed are identified, for example, an individual with international experience, or recent history serving on a particular board committee. The *Charter of Expectations* contains the key competencies and skills expected of non-executive Directors, and these, in addition to other details such as expected time commitment, will be included in an individual specification. The Committee as a whole then considers curriculum vitae and references for potential candidates. Any candidates who are shortlisted will be interviewed by members of the Committee and, if applicable, key shareholders and Barclays regulators may be asked to provide feedback on the proposed appointment. The Board is updated on the progress of the recruitment and interview process, and any feedback from the interviews is provided to the Board alongside a recommendation for appointment.

Executive search firms Egon Zehnder, JCA Group and MWM Consulting were instructed to assist with the search for non-executive Directors during 2016. None of these firms has any other connection to Barclays, other than to provide recruitment services. Open advertising for Board positions was not used in 2016, as the Committee believes that targeted recruitment is the optimal way of recruiting for Board positions. All of the firms used for non-executive Director recruitment have signed up to the voluntary code of conduct for executive search firms, which include measures designed to improve gender diversity on boards.

In 2016, Barclays announced the appointment of Mary Francis as non-executive Director and she joined the Board with effect from 1 October 2016. As previously reported, Mary has extensive board level experience across a range of industries. Wendy Lucas-Bull stood down from the Board in March 2016 following the announcement of Barclays intention to reduce its shareholding in Barclays Africa Group Limited, and Frits van Paasschen did not stand for re-election at the 2016 AGM.

The Directors in office at the end of 2016 were subject to an effectiveness review, as described on page 81. Based on the results of the review the Board accepted the view of the Committee that each Director proposed for re-election continues to be effective and that they each demonstrated the level of commitment required in connection with their role on the Board and the needs of the business. Diane de Saint Victor and Steve Thieke have each signalled their intention to retire from the Board at the 2017 AGM.

Diversity statement

The Board has had regard to two important publications that were issued in 2016: the *Hampton-Alexander Review* recommendations to improve gender balance in FTSE leadership teams and the *Parker Review* recommendations on the ethnic diversity of UK boards. The Committee reported last year that the Board had exceeded its target of 25% female Directors by the end of 2015 and had set a new target of 33% gender Board representation by 2020. This target has been formally reflected in the Board Diversity Policy, which can be found online at home.barclays/corporategovernance. Below Board level the Group met its 2016 target of 24% female senior leaders. The Committee is mindful that the Group Executive Committee does not currently include any women, but is satisfied with the level of diversity across that Committee and with the percentage of women amongst the direct reports of Group Executive Committee members (25% at the end of 2016). To broaden the scope of the perspectives and contributions made to Group Executive Committee meetings an initiative was implemented by the Group Chief Executive during 2016 to create one ex-officio position on the Committee, with each appointee serving for a four-month rotation. The first appointee was Kathryn McLeland, Head of Investor Relations. With regard to ethnic diversity, the Board considers that Barclays is currently well-positioned in terms of representation at Board level and also at Group Executive Committee level when taking into account the Parker Review definition (being individuals of Black, East Asian, Latin American, Middle Eastern or South Asian ethno-cultural backgrounds).

During 2016, the Committee received regular updates from the Global Head of Diversity and Inclusion covering the full spectrum of Barclays' diversity and inclusion agenda. For 2017, the Committee has requested additional information regarding social inclusion.

The Committee recognises the importance of ensuring that there is diversity of gender, ethnicity, geography and business experience on the Board, while continuing to recommend all appointments based on merit in the context of the skills and experience required. The Barclays Board female diversity target is noted in the Board skills matrix, which identifies the core competencies and skills needed for an effective Board. When executive search firms are engaged to assist with the recruitment of a new Director diversity is identified as a key factor. In addition, the external Board evaluation considered diversity when assessing the effectiveness of the Board.

More details on Barclays' diversity and inclusion strategy can be found on page 96

Review of Board and Board Committee effectiveness

Each year the Board conducts an externally facilitated self-assessment of the effectiveness of the Board, the Board Committees and the individual Directors. Independent Board Evaluation facilitated the effectiveness review for 2015 and was engaged to conduct the 2016 review, which built on the findings of the 2015 review, including assessing the progress of the actions that had been identified. Independent Board Evaluation is an independent external consultancy with no other connection to Barclays. In order to ensure that high quality feedback was received, Ffion Hague, the consultant, based the review on face-to-face interviews with the Directors. The Directors received an agenda prior to their interview, which focused on areas for improvement identified in the 2015 effectiveness review as well as any new issues that had emerged since that review was conducted. In addition to the interviews, Ffion Hague attended Board and Board Committee meetings as an observer, met with members of the Group Executive Committee, the Company Secretary and other members of senior management, along with seeking feedback from external stakeholders.

In December 2016, Independent Board Evaluation presented a report to the Board on the findings of the effectiveness review. In addition, the Chairman was provided with a report and feedback on the performance of each of the Directors, and the Senior Independent Director received a report on the Chairman. Board Committee chairmen received individual reports on the performance of the Board Committees.

Following consideration of the findings of the 2016 effectiveness review the Directors remain satisfied that the Board and each of the Board Committees are operating effectively. Progress relative to 2015 was good and the Board remains committed to making further progress to ensure that it is considered to be at the top of the range of effectiveness for a FTSE100 company. Following the conclusion of the review the Board Nominations Committee, with support from the Company Secretary, prepared a detailed action planning document. An overview of actions that were identified to help the Board to maintain and improve its effectiveness have been disclosed on the following pages 82 and 83, as well as an update on the actions taken following the 2015 effectiveness review.

Governance: Directors report

What we did in 2016

Board Nominations Committee report

Review of Board and Board Committee Effectiveness

Board priorities

Leveraging Board experience in support of executives

Greater awareness of Board Committee work

2015 findings

To ensure that the Board agenda is optimised, including time for blue-sky discussion of major risks.

2015 findings

To continue to ensure that all non-executive Directors have the opportunity to contribute to strategic debate.

2015 findings

To continue to raise awareness across all Board members of the significant issues considered by Board Committees and to continue to refine the remit and scope of the Board Reputation Committee.

Actions taken in 2016

In early 2016, a set of Board objectives was agreed in order to track progress against the Board's priorities.

Board agendas were updated to allow more time for discussion of strategic options. This was also a key focus for the 2016 Board

Actions taken in 2016

John McFarlane and Sir Gerry Grimstone took responsibility for ensuring that all non-executive Directors were involved in strategic decision making.

In the course of the year, it was decided that partnering non-executive Directors with

Actions taken in 2016

All Directors have access to Board Committee meeting papers and minutes, and are reminded that they may attend Board Committee meetings whether or not they are members. Some Directors made use of this option during 2016. Board Committee Chairmen have continued to report to the Board on specific matters discussed at Board Committee meetings.

Strategy Offsite.

Board dinners were used for more free-ranging discussions, with suggested topics notified to the Directors in advance. No decisions were taken or required as part of these discussions, which were used to inform the broader debate at subsequent Board meetings.

2016 findings

Create regular broad-based risk oversight sessions for the Board to allow Directors to look across the risk spectrum.

Schedule a debate on the role of the Board and non-executive Directors and link the conclusions to revised Board objectives to help focus the Board's agenda over the coming year.

Actions to be taken in 2017

We will continue to identify opportunities for more free-ranging discussion of risk, including as part of the annual Board strategy session.

The role of the Group Board and Group non-executive Directors will be reviewed in the context of Structural Reform.

members of the Group Executive Committee would not be taken forward. However, the experience of non-executive Directors has been leveraged as appropriate, e.g. the appointments of Steve Thieke and Diane Schueneman to the board of Barclays US IHC. Non-executive Directors continue to make a valuable contribution to the Board and its Committees.

2016 findings

The Board effectiveness review reported on positive and constructive relations between the Board and the new management team.

Actions to be taken in 2017

The Board will continue to support and challenge executive management, with particular focus on execution of strategy.

During 2016, Sir Gerry Grimstone, chairman of the Board Reputation Committee, took action to define and focus its role and scope more clearly, including implementing new reporting initiatives such as the development of dashboard reports.

2016 findings

Continue to optimise the information flow between Directors in the run-up to Structural Reform in 2018.

Consider agreeing common values for the Group and the banking subsidiary boards in the new structure.

For 2017 this finding will be renamed as *Optimise communication and collaboration between directors, boards and committees.*

Actions to be taken in 2017

The Chairman will continue to use his meetings with non-executive Directors ahead of Board meetings to ensure that all non-executive Directors are briefed on current issues.

Opportunities for the Board (and, in due course, the banking subsidiary boards) to spend more

time together around Board meetings will be identified.

Once the subsidiary boards are established, a common set of values will be agreed to supplement the Governance Guiding Principles that are already in place.

**Improvements to the
Board appointment process**

2015 findings

To continue to assess the skills and experience needed on the Board and to ensure that Board composition is balanced between UK and international members.

To enhance Board succession planning, particularly in respect of key roles.

Actions taken in 2016

During 2016, a revised Board succession plan and updated skills matrix were presented to the Board Nominations Committee. The plan addresses immediate needs as well

Director induction

2015 findings

To enhance the Board training and induction programme, with particular focus on the training needs of Board members from outside the financial services sector.

Actions taken in 2016

The Board training programme for 2016 included specific sessions aimed primarily at non-executive Directors without a financial services background. Details of the

**Dealing more strategically
with global regulation**

2015 findings

To continue to provide opportunities for Board members to provide early input to thinking on major issues and decisions.

Actions taken in 2016

The Board's agenda during 2016 focused more on strategic issues, including the capital and liquidity impacts of Structural Reform. For a description of the Board's activity

as longer-term requirements to take account of the tenure of non-executive Directors.

The succession plan included succession to key roles and considered the optimum size of the Board. The future composition of the Board post-Structural Reform has also been considered.

In addition, the Board received updates on executive talent management and succession planning during 2016.

2016 findings

Continue to refine the Board skills matrix to ensure it aligns with the Group's strategy and informs the succession plan for key Board roles. Implement more regular reporting to the Board on potential non-executive Directors under consideration.

Actions to be taken in 2017

The Board skills matrix will be kept under review, with separate skills matrices to be agreed with the respective chairmen of the banking subsidiaries. The Group Board succession plan will continue to be reviewed on a regular basis by the Board Nominations Committee and the Chairman will keep current

training programme offered during 2016 can be found on page 87.

2016 findings

Continue to enhance the Director induction with a focus on providing broader governance training to anyone who has not previously served on a UK plc board.

Actions to be taken in 2017

The Director induction programme will be reviewed and refreshed to factor in tailored governance training for new Directors. This is also being extended to directors of the new banking subsidiaries.

in 2016, including the input provided to management on the formulation of Group strategy and other significant decisions, see pages 56 to 57.

2016 findings

Review reporting arrangements on strategy implementation and review the KPIs or dashboard reports for key initiatives.

For 2017 this finding will be renamed as *Optimise reporting to the Board on strategy and execution priorities*.

Actions to be taken in 2017

The form and content of reporting to the Board will be reviewed and refreshed by management to ensure that the Board is provided with appropriate management information on strategy and execution priorities. Specific topics that the Board indicated that it wished to review have been

Edgar Filing: BARCLAYS PLC - Form 6-K

Board members regularly updated on recruitment plans and potential candidates.

factored into the 2017 Board agenda.

Barclays PLC Annual Report 2016 | 83

Governance: Directors report

[How we comply](#)

UK Corporate Governance Code (the Code)

As Barclays is listed on the London Stock Exchange we apply the main principles of the Code and comply with the Code's provisions. A revised Code came into effect in 2016, applying to financial years beginning on or after 17 June 2016 and will apply to Barclays from 1 January 2017. Copies of the 2014 and 2016 Codes can be found at www.frc.org.uk. *Corporate Governance in Barclays* contains a full description of our corporate governance practices and is available online at home.barclays/corporategovernance. For the year ended 31 December 2016, and at the date of this report, we complied with the 2014 Code except as disclosed below:

§ Provision E.2.3 of the Code requires that the Chairman should arrange for all Directors to attend the AGM. While such arrangements were made, Steve Thieke was unable to attend the 2016 AGM owing to other commitments in the US, where he is based. The Chairman and all Board Committee Chairmen were available at the AGM to answer questions.

The changes made in the 2016 Code were concerned with the relevance of the experience of the audit committee and with audit re-tendering, both of which are covered in this report.

Disclosure Guidance and Transparency Rules

By virtue of the information included in this Governance section of the Annual Report we comply with the corporate governance statement requirements of the FCA's Disclosure Guidance and Transparency Rules. Certain additional information that is required to be disclosed pursuant to DTR7.2.6 can be found on pages 91 to 94.

New York Stock Exchange (NYSE)

Barclays is permitted by NYSE rules to follow UK corporate governance practices instead of those applied in the US. However, any significant variations must be explained in Barclays 20-F filing, which can be accessed from the Securities and Exchange Commission's EDGAR database or via our website, home.barclays.

Leadership

The Role of the Board

The Board of Directors is responsible for promoting the highest standards of corporate governance in Barclays. We act in a way that we consider promotes the success of Barclays for the benefit of shareholders as a whole, and are accountable to the shareholders for creating and delivering sustainable value. It is our responsibility as the Board to ensure that management not only delivers on short-term objectives, but promotes the long-term growth of Barclays. The existing corporate governance framework embeds the right culture, values and behaviours throughout the Group and supports our role in determining strategic objectives and policies.

In addition to setting strategy and overseeing its implementation, we are also responsible for ensuring that management maintains an effective system of internal control. An effective system of internal control should provide assurance of effective and efficient operations, internal financial controls and compliance with law and regulation. In meeting this responsibility we consider what is appropriate for the Group's business and reputation, the materiality of financial and other risks and the relevant costs and benefits of implementing controls.

The Board is the decision-making body for matters that, owing to their strategic, financial or reputational implications or consequences, are considered significant to the Group. A formal schedule of powers reserved to the Board ensures that our control of these key decisions is maintained. A summary of the matters reserved to the Board can be found at home.barclays/corporategovernance. It includes the approval of appointments to the Board, Barclays' strategy, financial statements, capital expenditure and any major acquisitions, mergers or disposals.

Board Governance framework

The main Board Committees are the Board Audit Committee, the Board Nominations Committee, the Board Remuneration Committee, the Board Reputation Committee and the Board Risk Committee. Under the authority of our Articles of Association, each Board Committee has had specific responsibilities delegated to it by the Board. Further information on the role and activities of each of the Board Committees can be found in this report and in their individual terms of reference, which have been approved by the Board and are available at home.barclays/corporategovernance.

In addition, the Regulatory Investigations Committee was formed in 2012 and focuses on providing Board-level oversight of regulatory investigations. In 2016 the Committee met five times. John McFarlane is the Committee Chairman and the other Committee members are Mike Ashley, Sir Gerry Grimstone, Diane de Saint Victor and Jes Staley.

Board Governance framework

Roles on the Board

Executive and non-executive Directors share the same duties and are subject to the same constraints but, in line with the principles of the Code, a clear division of responsibilities has been established. It is the responsibility of the Chairman to lead and manage the work of the Board, while responsibility for the day-to-day management of Barclays has been delegated to the Group Chief Executive. The Group Chief Executive is supported in this role by the Group Executive Committee. Further information on membership of the Group Executive Committee can be found on page 53.

As a Board we have set out our expectations of each Director in Barclays *Charter of Expectations*. This includes role profiles and the behaviours and competencies required for each role on the Board, namely the Chairman, Deputy Chairman, Senior Independent Director, non-executive Directors, executive Directors and Committee Chairmen. The Board Nominations Committee reviews the *Charter of Expectations* annually to ensure it remains relevant and up-to-date. It is published on home.barclays/corporategovernance to ensure that there is complete transparency of the standards we set for ourselves.

Governance: Directors report

How we comply

Attendance

As members of the Board of Directors we are expected to attend each Board meeting and in 2016 we attended both scheduled and additional Board meetings, as disclosed in the table below. The Chairman met privately with the non-executive Directors ahead of each scheduled Board meeting, and if, owing to exceptional circumstances, a Director was not able to attend a Board meeting they ensured that their views were made known to the Chairman in advance of the meeting.

Effectiveness

Composition of the Board

In line with the requirements of the Code a majority of the Board are independent non-executive Directors. The Board currently comprises a Chairman, who was independent on appointment, two executive Directors and ten non-executive Directors. We consider the independence of our non-executive Directors annually, using the independence criteria set out in the Code and by reviewing performance against behaviours that we have identified as essential in order to be considered independent. The independence criteria can be found in *Corporate Governance in Barclays* at home.barclays/corporategovernance.

The Board Nominations Committee considers Board succession planning and regularly reviews the composition of the Board and the Board Committees to ensure that there is an appropriate balance and diversity of skills, experience, independence and knowledge. The size of the Board is not fixed and may be revised from time to time to reflect the changing needs of the business and the Board Nominations Committee will consider the balance of skills and experience of current Directors when considering a proposed appointment.

Each year we carry out an effectiveness review in order to evaluate our performance as a Board, as well as the performance of each of the Board Committees and individual Directors. This annual review assesses whether each of us continues to discharge our respective duties and responsibilities effectively and is considered when deciding whether individual Directors will offer themselves for election or re-election at the AGM. More information on the 2016 Board effectiveness review can be found on page 81.

Our biographies containing our relevant skills and experience, Board Committee membership and other principal appointments can be found on pages 51 and 52. Details of changes to the Board in 2016 and year to date are disclosed on page 91.

The service contracts for the executive Directors and the letters of appointment for the Chairman and non-executive Directors are available for inspection at our registered office.

Time commitment

It is expected that in order to discharge our responsibilities effectively we will each allocate sufficient time to our role on the Board. We are expected to attend, and to be well prepared for, all Board and Board Committee meetings, as

well as making time to understand the business, meet with executives and regulators, and complete ongoing training. As stated in our *Charter of Expectations*, time commitment is agreed with each non-executive Director on an individual basis. Disclosed below is the average expected time commitment for the role of non-executive Director and the other non-executive positions on the Board. For these additional positions there is an expectation that, in order to effectively fulfil extra responsibilities, additional time commitment is required.

Role	Expected time commitment
Chairman	80% of a full time position
Deputy Chairman	At least 0.5 days a week
Senior Independent Director	As required to fulfil the role
Non-executive Director	30 days a year (membership of one Board Committee included, increasing to 40 days a year if a member of two Board Committees)
Committee Chairmen	At least 60 days a year (including non-executive Director time commitment)

The Chairman must commit to expend whatever time is necessary to fulfil his duties and, while this is expected to be equivalent to 80% of a full time position, his Chairmanship of the Group and leadership of the Board has priority over other business commitments. In exceptional circumstances we are all expected to commit significantly more time to our work on the Board.

Induction

On appointment to the Board all Directors receive a comprehensive induction which is tailored to the new Director's individual requirements. The induction schedule is designed to quickly provide the new Director with an understanding of how the Group works and the key issues that it faces. The Company Secretary consults the Chairman when designing an induction schedule, giving consideration to the particular needs of the new Director. When a Director is joining a Board Committee the schedule includes an induction to the operation of that committee.

On completion of the induction programme the Director should have sufficient knowledge and understanding of the nature of the business, and the opportunities and challenges facing Barclays, to enable them to effectively contribute to strategic discussions and oversight of the Group.

In 2016, Sir Gerry Grimstone and Mary Francis both received induction programmes on joining the Board. In line with normal practice, they met with the Company Secretary, the current non-executive Directors and members of the Group Executive Committee and the Senior Leadership Group. In addition, Sir Gerry Grimstone met with Sir Michael Rake, the outgoing Deputy Chairman and Senior Independent Director, and former Chairman of the Board Reputation Committee.

Training and development

In order to continue to contribute effectively to Board and Board Committee meetings we are regularly provided with the opportunity to take part in ongoing training and development. As part of our annual performance review with the Chairman we discuss any particular development needs that can be met through either formal training or meeting with a particular senior executive.

The Company Secretary organises a formal training schedule for the year, covering both Board and Board Committee training requirements, to ensure that our insight into the Group's business and awareness of the external environment in which we operate continues after our formal induction schedules have been completed.

During 2016, we attended briefings on the following subjects:

§ capital and liquidity (including regulatory targets and constraints)

§ the Federal Reserve's CCAR exercise

§ Group Resilience

§ cyber-risk

§ a presentation from Compliance and Regulatory Relations on the regulatory expectations of Directors and the PRA's threshold conditions

§ a briefing from Finance and Risk on the impact of IFRS9

§ an accounting update presented by KPMG

§ an update on the implementation of the Senior Managers Regime

§ strategic planning and crisis management plans ahead of the EU Referendum

§ internal briefings on Structural Reform.

These briefing sessions were supplemented by written material, such as a briefing note on the implementation of the Market Abuse Regulation in the UK.

In addition, site visits were arranged to Barclays UK and Cards US operations, as well as the regular business visits and engagements that we may undertake. This included the attendance of our Board Audit Committee Chairman and Board Risk Committee Chairman at US IHC board committee meetings at Barclays' offices in New York.

Conflicts of interest

In accordance with the Companies Act 2006 and the Articles of Association the Board has the authority to authorise conflicts of interest. Directors are required to declare any potential or actual conflicts of interest that could interfere with their ability to act in the best interests of the Group. The Company Secretary maintains a conflicts register, which is a record of actual and potential conflicts, together with any Board authorisation of the conflict. The authorisations are for an indefinite period but are reviewed annually by the Board Nominations Committee. The Board retains the power to vary or terminate the authorisation at any time.

Governance: Directors report

[How we comply](#)

Information provided to the Board

The Role Profile for the Chairman, as set out in our *Charter of Expectations*, confirms his responsibility for ensuring that members of the Board receive accurate, timely and high-quality information. In particular, we require information about Barclays performance to enable us to take sound decisions, monitor effectively and provide advice to promote the success of the Company. Working in collaboration with the Chairman, the Company Secretary is responsible for ensuring good governance and consults Directors to ensure that good information flows exist and that the Board receives the information it requires in order to be effective.

Throughout the year both the executive Directors and senior executives keep the Board informed of key developments in the business through regular reports and updates. These are in addition to the presentations that the Board and Board Committees receive as part of their formal meetings. Directors are able to seek independent and professional advice at Barclays expense, if required, to enable Directors to fulfil their obligations as members of the Board.

Accountability

Risk management and internal control

The Directors are responsible for ensuring that management maintains an effective system of risk management and internal control and for assessing its effectiveness. Such a system is designed to identify, evaluate and manage, rather than eliminate, the risk of failure to achieve business objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

Barclays is committed to operating within a strong system of internal control that enables business to be transacted and risk taken without exposing itself to unacceptable potential losses or reputational damage. Barclays has an overarching framework that sets out the Group's approach to internal governance, *The Barclays Guide*, which establishes the mechanisms and processes by which the Board directs the organisation, through setting the tone and expectations from the top, delegating its authority and assessing compliance.

A key component of *The Barclays Guide* is the *Enterprise Risk Management Framework* (ERMF). The purpose of the ERMF is to identify and set minimum requirements in respect of the main risks to achieving the Group's strategic objectives and to provide reasonable assurance that internal controls are effective. The key elements of the Group's system of internal control, which is aligned to the recommendations of *The Committee of Sponsoring Organizations of the Treadway Commission, Internal Control – Integrated Framework* (2013 COSO), are set out in the risk control frameworks relating to each of the Group's Principal and Key Risks. As well as incorporating our internal requirements, these reflect material Group-wide legal and regulatory requirements relating to internal control and assurance.

Effectiveness of internal controls

Key controls are assessed on a regular basis for both design and operating effectiveness. Issues arising out of business risk and control assessments and other internal and external sources are examined to identify pervasive themes. Where appropriate, control issues are reported to the Board Audit Committee (BAC). In addition, regular reports are made to the BAC by management, BIA and the Finance, Compliance and Legal functions covering, in particular, financial controls, compliance and other operational controls.

Risk management and internal control framework

The ERMF is the Group's Internal Control Framework. It is refreshed annually and has been substantially revised during 2016. The BAC receives quarterly reports relating to the effectiveness of the Control Environment covering all risks and controls including financial, operational and compliance risk.

The BAC formally reviews the system of internal control and risk management annually. Throughout the year ended 31 December 2016 and to date, the Group has operated a system of internal control that provides reasonable assurance of effective operations covering all controls, including financial and operational controls and compliance with laws and regulations. Processes are in place for identifying, evaluating and managing the principal risks facing the Group in accordance with the *Guidance on Risk Management, Internal Control and Related Financial and Business Reporting* published by the Financial Reporting Council.

The review of the effectiveness of the system of risk management and internal control is achieved through a four-step approach which is centred on reviewing the effectiveness of *The Barclays Guide* and its component parts:

1. Governance Risk & Control meetings of the Business and Functional Executive Committees monitor, review and challenge the effective operation of key risk management and control processes, including the results of audits and reviews undertaken by BIA (which include assessments of the Control Environment and Management Control Approach) and examinations and assessments undertaken by our primary regulators, on an ongoing basis as part of the system of risk management and internal control. The remediation of issues identified within the Control Environment is regularly monitored by management and the BAC.
2. Testing of the Governance Risk and Control meetings held within the Executive Committees provides assurance that the committees are effectively overseeing the Control Environment and associated risk management and internal control processes.
3. The owners of the key governance processes which comprise *The Barclays Guide* undertake a review to confirm that processes have been implemented.
4. The annual review of the system of risk management and internal control brings together the results of the activities completed in steps 1 to 3 to ensure that each of the key processes has been effectively reviewed. Regular reports are made to the Board covering risks of Group level significance. The Board Risk Committee and the Board Reputation Committee examine reports covering the Principal Risks (Credit Risk, Market risk, Capital Risk, Liquidity Risk, Operational Risk and Conduct Risk) as well as reports on risk measurement methodologies and risk appetite. Further details of risk management procedures and potential risk factors are given in the Risk review and risk management sections on pages 136 to 162.

Controls over financial reporting

A framework of disclosure controls and procedures is in place to support the approval of the Group's financial statements. The Legal and Technical Review Committee is responsible for examining the Group's financial reports and disclosures to ensure that they have been subject to adequate verification and comply with applicable standards and legislation. The Committee reports its conclusions to the Disclosure Committee. The Disclosure Committee examines the content and accuracy of the disclosures and reports its conclusions to the Board Audit Committee which debates its conclusions and provides further challenge. Finally, the Board scrutinises and approves results announcements and the Annual Report, and ensures that appropriate disclosures have been made. This governance process ensures that both management and the Board are given sufficient opportunity to debate and challenge the Group's financial statements and other significant disclosures before they are made public.

Management's report on internal control over financial reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed under the supervision of the principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and issued by the International Accounting Standards Board (IASB). Internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS and that receipts and expenditures are being made only in accordance with authorisations of management and the respective Directors; and provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use or disposition of assets that could have a material effect on the financial statements.

Internal control systems, no matter how well designed, have inherent limitations and may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that internal controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has assessed internal control over financial reporting as of 31 December 2016. In making its assessment, management has utilised the criteria set forth by the 2013 COSO framework. Management concluded that, based on its assessment, the internal control over financial reporting was effective as of 31 December 2016. Our independent registered public accounting firm has issued a report on the Group's internal control over financial reporting, which is set out on page 276.

The system of internal financial and operational controls is also subject to regulatory oversight in the UK and overseas. Further information on supervision by the financial services regulators is provided under Supervision and Regulation in the Risk review section on pages 229 to 236.

Changes in internal control over financial reporting

There have been no changes in the Group's internal control over financial reporting that occurred during the period covered by this report which have materially affected or are reasonably likely to materially affect the Group's internal control over financial reporting.

Remuneration

The Board has delegated responsibility for the consideration and approval of the remuneration arrangements of the Chairman, executive Directors, other senior executives and certain Group employees to the Board Remuneration Committee. The Board as a whole, with the non-executive Directors abstaining, considers annually the fees paid to non-executive Directors. Information on the activities of the Board Remuneration Committee in 2016 can be found on pages 99 to 133 of the Directors' remuneration report, which forms part of the corporate governance statement.

Stakeholder engagement

Investor engagement

The Board is committed to promoting effective channels of communication with our shareholders and upholding good corporate governance as a means of building stronger and more engaged relationships with them. Our comprehensive Investor Relations engagement with the market helps us to understand investor views about Barclays, which are communicated regularly to the Board. Our shareholder communication guidelines, which underpin all investor engagement, are available on our website at home.barclays/investorrelations.

Institutional investors

In 2016, our Investor Relations engagement with institutional investors took place throughout the year, both following our quarterly results as well as outside of the reporting cycle. This allowed the opportunity for existing and potential new investors to engage with Barclays regularly, promoting dialogue on longer-term strategic developments as well as on the recent financial performance of the Group.

The Directors, in conjunction with the senior executive team and Investor Relations, participated in varied forms of engagement, including investor meetings, seminars and conferences across many geographic locations, reflecting the diverse nature of our equity and debt institutional ownership. Divisional management also presented extensively to investors, promoting greater awareness and understanding of our operational businesses.

During 2016, discussions with investors were focused on the continued execution of our strategy, following the appointment of Jes Staley as Group Chief Executive, and the strategic update announced on 1 March 2016.

Investor meetings focused on corporate governance also took place throughout the year, with the Chairman, Senior Independent Director, other Board representatives and the Company Secretary.

We held conference calls/webcasts for our quarterly results briefings and an in-person presentation for our 2015 full year results in March 2016, all hosted by the Group Chief Executive and Group Finance Director. In addition, the Group Finance Director held a quarterly breakfast briefing for sellside analysts, with a transcript of the discussions uploaded to our website. For fixed income investors we held conference calls at our full year and half year results, hosted by our Group Finance Director and Group Treasurer.

The Investor Relations section of our website is an important communication channel that enables the effective distribution of information to the market in a clear and consistent manner. Executive management presentations, speeches and, where possible, webcast replays are uploaded to our website on a timely basis. In 2016, we also created an improved 'About Barclays' factsheet, allowing investors the opportunity to understand Barclays' strategy and key financial metrics at a glance. We also continued to provide short videos summarising the key messages in our results from our Group Chief Executive and Group Finance Director.

How we comply

Private shareholders

During 2016, we continued to communicate with our private shareholders through our shareholder mailings. Shareholders can also choose to sign up to Shareview so that they receive information about Barclays and their shareholding directly by email. On a practical level, over 60,000 shareholders did not cash their Shares Not Taken Up (SNTU) cheque following the Rights Issue in September 2013. In 2016, we continued the tracing process to reunite these shareholders with their SNTU monies and any unclaimed dividends. By the end of 2016, we had returned over £1.65m to our shareholders in addition to the £2.2m returned in 2015. We also launched a Special Share Dealing Service in November 2016 aimed at shareholders with relatively small shareholdings for whom it might otherwise be uneconomical to deal. One option open to shareholders was to donate their sale proceeds to ShareGift. As a result of this initiative, more than £100,000 was donated.

Our AGM

The Board and the senior executive team continue to consider our AGM as a key date in the diary. The AGM provides us with our main opportunity to engage with shareholders, particularly our private shareholders, on the key issues facing the Group and any questions they may have. A number of Directors, including the Chairman, were available for informal discussion either before or after the meeting. All resolutions proposed at the 2016 AGM, which were considered on a poll, were passed with votes for ranging from 86% to 99.9% of the total votes cast.

The 2017 AGM will be held on Wednesday 10 May 2017 at the Royal Festival Hall in London. The Notice of AGM can be found in a separate document, which is sent out at least 20 working days before the AGM and also made available at home.barclays/agm. Voting on the resolutions will again be by poll and the results will be announced via the Regulatory News Service and made available on our website on the same day. We encourage any shareholders who are unable to attend on the day to vote in advance of the meeting via home.barclays/investorrelations/vote or through Shareview (www.shareview.co.uk).

Engagement timeline

Governance: Directors report

Other statutory information

The Directors present their report together with the audited accounts for the year ended 31 December 2016.

Other information that is relevant to the Directors report, and which is incorporated by reference into this report, can be located as follows:

	Page
Employee involvement	95
Policy concerning the employment of disabled persons	97
Financial instruments	299 to 321
Hedge accounting policy	284
Remuneration policy, including details of the remuneration of each Director and Directors interests in shares	99 to 133
Corporate governance report	49 to 90
Risk review	136 to 236
Viability statement	41

Disclosures required pursuant to Listing Rule 9.8.4R can be found on the following pages:

	Page
Long-term incentive schemes	111
Director emoluments	361
Allotment for cash of equity securities	342
Waiver of dividends	91

Section 414A of the Companies Act 2006 requires the Directors to present a Strategic report in the Annual Report and Financial Statements. The information can be found on pages 1 to 48.

The Company has chosen, in accordance with section 414 C(11) of the Companies Act 2006, and as noted in this Directors report, to include certain matters in its Strategic report that would otherwise be disclosed in this Directors report.

An indication of likely future developments may be found in the Strategic report.

The particulars of important events affecting the Company since the financial year end can be found in the Strategic report and Note 29, Legal, competition and regulatory matters.

Profit and dividends

Statutory profit after tax for 2016 was £2,828m (2015: £623m). The final dividend for 2016 of 2.0p per share will be paid on 5 April 2017 to shareholders whose names are on the Register of Members at the close of business on 3 March 2017. With the interim dividend totalling 1.0p per ordinary share, paid in September 2016, the total distribution for 2016 is 3.0p (2015: 6.5p) per ordinary share. The interim and final dividends for 2016 amounted to £757m (2016: £1,081m).

As at 31 December 2016, the distributable reserves of Barclays PLC (the Parent Company) were £6,831m. As at 31 December 2016, the distributable reserves of Barclays Bank PLC were £25,834m.

The nominee companies of certain Barclays employee benefit trusts holding shares in Barclays in connection with the operation of the Company's share plans have lodged evergreen dividend waivers on shares held by them that have not been allocated to employees. The total amount of dividends waived during the year ended 31 December 2016 was £2.6m (2015: £6.4m).

Shareholders may have their dividends reinvested in Barclays by joining the Barclays PLC Scrip Dividend Programme (the Programme). At the Barclays 2013 AGM, shareholders approved the introduction of the Programme to replace the Barclays Dividend Reinvestment Plan. The Programme enables shareholders, if they wish, to receive new fully-paid ordinary shares in Barclays PLC instead of a cash dividend, without incurring dealing costs or stamp duty.

Board of Directors

The names of the current Directors of Barclays PLC, along with their biographical details, are set out on pages 51 and 52 and are incorporated into this report by reference. Changes to Directors during the year are set out below.

Name	Role	Effective date of appointment/ resignation
Sir Gerald (Gerry) Grimstone	Non-executive Director	Appointed 1 January 2016
Mary Francis	Non-executive Director	Appointed 1 October 2016
Wendy Lucas-Bull	Non-executive Director	Retired 1 March 2016
Frits van Paasschen	Non-executive Director	Retired 28 April 2016

Appointment and retirement of Directors

The appointment and retirement of Directors is governed by the Company's Articles of Association (the Articles), the UK Corporate Governance Code (the Code), the Companies Act 2006 and related legislation.

The Articles may only be amended by a special resolution of the shareholders. The Board has the power to appoint additional Directors or to fill a casual vacancy amongst the Directors. Any such Director holds office only until the next AGM and may offer himself/herself for re-election. The Code recommends that all directors of FTSE 350 companies should be subject to annual re-election and all Directors will stand for election or re-election at the 2017 AGM with the exception of Diane de Saint Victor and Steve Thieke.

Governance: Directors report

[Other statutory information](#)

Directors indemnities

Qualifying third party indemnity provisions (as defined by section 234 of the Companies Act 2006) were in force during the course of the financial year ended 31 December 2016 for the benefit of the then Directors and, at the date of this report, are in force for the benefit of the Directors in relation to certain losses and liabilities which they may incur (or have incurred) in connection with their duties, powers or office. In addition, the Company maintains Directors & Officers Liability Insurance which gives appropriate cover for legal action brought against its Directors.

Qualifying pension scheme indemnity provisions (as defined by section 235 of the Companies Act 2006) were in force during the course of the financial year ended 31 December 2016 for the benefit of the then Directors, and at the date of this report are in force for the benefit of directors of Barclays Pension Funds Trustees Limited as Trustee of the Barclays Bank UK Retirement Fund. The directors of the Trustee are indemnified against liability incurred in connection with the company's activities as Trustee of the Barclays Bank UK Retirement Fund.

Similarly, qualifying pension scheme indemnities were in force during 2016 for the benefit of directors of Barclays Executive Schemes Trustees Limited as Trustee of Barclays Bank International Limited Zambia Staff Pension Fund (1965), Barclays Capital International Pension Scheme (No.1), and Barclays PLC Funded Unapproved Retirement Benefits Scheme. The directors of the Trustee are indemnified against liability incurred in connection with the company's activities as Trustee of the schemes above.

Political donations

The Group did not give any money for political purposes in the UK, the rest of the EU or outside of the EU, nor did it make any political donations to political parties or other political organisations, or to any independent election candidates, or incur any political expenditure during the year.

In accordance with the US Federal Election Campaign Act, Barclays provides administrative support to a federal Political Action Committee (PAC) in the US funded by the voluntary political contributions of eligible employees. The PAC is not controlled by Barclays and all decisions regarding the amounts and recipients of contributions are directed by a steering committee comprising employees eligible to contribute to the PAC. Contributions to political organisations reported by the PAC during the calendar year 2016 totalled \$12,500 (2015: \$79,500).

Environment

Barclays focuses on addressing environmental issues where we believe we have the greatest potential to make a difference. We focus on managing our own carbon footprint and reducing our absolute carbon emissions; developing products and services to help enable the transition to a low-carbon economy, and managing the risks of climate change to our operations, clients, customers and society at large. We invest in improving the energy efficiency of our operations and offset the emissions remaining through the purchase of carbon credits. We also have a long-standing commitment to managing the environmental and social risks associated with our lending practices, which is embedded

into our Credit Risk processes. A governance structure is in place to facilitate clear dialogue across the business and with suppliers around issues of potential environmental and social risk.

We have disclosed global greenhouse gas emissions that we are responsible for as set out by The Companies Act 2006 (Strategic Report and Directors Report) Regulations 2013. We provide fuller disclosure on (i) financing solutions for the lower carbon economy, (ii) environmental risk management and (iii) management of our carbon and environmental footprint in the Barclays Environmental, Social and Governance (ESG) Supplement available on our website at home.barclays.com/citizenship.

	Current reporting year ^a 2016	Previous reporting year ^b 2015	Previous reporting year ^c 2014	Comparison year ^d 2013
Global GHG emissions				
Total CO ₂ e (tonnes) ^e	678,412	712,916	830,668	968,781
Scope 1 CO ₂ e emissions (tonnes) ^f	46,571	56,642	49,994	58,176
Scope 2 CO ₂ e emissions (tonnes) ^g	538,783	520,098	655,426	723,993
Scope 3 CO ₂ e emissions (tonnes) ^h	93,059	136,176	125,248	186,612
Intensity ratioⁱ				
Total full time employees (FTE)	119,300	129,400	132,300	139,600
Total CO ₂ e per FTE (tonnes)	5.69	5.51	6.28	6.94
Scope 2 market based emissions (tonnes) ^j	596,198			

Notes

a 2016 Reporting Year covers Q4 2015 and Q1, 2, 3 of 2016. The carbon reporting year is not fully aligned to the financial reporting year covered by the Directors report.

b 2015 Reporting Year covers Q4 2014 and Q1, 2, 3 of 2015.

c 2014 Reporting Year covers Q4 2013 and Q1, 2, 3 of 2014.

d 2013 Reporting Year covers Q4 2012 and Q1, 2, 3 of 2013.

e The methodology used to calculate our CO₂e emissions is the operational control approach on reporting boundaries as defined by the World Resources Institute/World Business Council for Sustainable Development (WRI/WBCSD) Greenhouse Gas Protocol (GHG): A Corporate Accounting and Reporting Standard, Revised Edition. Where properties are covered by Barclays consolidated financial statements but are leased to tenants who are invoiced for utilities, these emissions are not included in the Group GHG calculations. We also capture consumption from properties which are yet to be consolidated by Barclays and as such Barclays still is responsible for the utility cost.

f Scope 1 covers direct combustion of fuels and company owned vehicles (from UK and South Africa only, which is the most material contributors). Fugitive emissions reported in Scope 1 for 2013 – 2016 cover emissions from Americas, Asia Pacific and South Africa. Scope 1 fugitive emissions excludes the UK while we amend our governance procedures in the UK. Business travel is reported in Scope 1.

g Scope 2 covers emissions from electricity and steam purchased for own use. Scope 2 emissions are using location based emission factors. Please see note j below for Scope 2 Market Based emissions.

h Scope 3 covers indirect emissions from business travel (global flights and ground transport from the UK and South Africa). From 2014 onwards car hire data covers the USA and India. Ground transportation data (excluding Scope 1 company cars) covers only countries where this type of transport is material and data is available.

i Intensity ratio calculations have been calculated using location based emission factors only.

j Scope 2 Market Based emissions have been reported for 2016 only.

Research and development

In the ordinary course of business the Group develops new products and services in each of its business divisions.

Share capital

Share capital structure

The Company has ordinary shares in issue. The Company's Articles also allow for the issuance of sterling, US dollar, euro and yen preference shares (preference shares). No preference shares have been issued as at 20 February 2017 (the latest practicable date for inclusion in this report). Ordinary shares therefore represent 100% of the total issued share capital as at 31 December 2016 and as at 20 February 2017 (the latest practicable date for inclusion in this report). Details of the movement in ordinary share capital during the year can be found in Note 31 on page 342.

Voting

Every member who is present in person or represented at any general meeting of the Company, and who is entitled to vote, has one vote on a show of hands. Every proxy present has one vote. The proxy will have one vote for and one vote against a resolution if he/she has been instructed to vote for or against the resolution by different members or in one direction by a member while another member has permitted the proxy discretion as to how to vote. On a poll, every member who is present or represented and who is entitled to vote has one vote for every share held. In the case of joint holders, only the vote of the senior holder (as determined by order in the share register) or his proxy may be counted. If any sum payable remains unpaid in relation to a member's shareholding, that member is not entitled to vote that share or exercise any other right in relation to a meeting of the Company unless the Board otherwise determine. If any member, or any other person appearing to be interested in any of the Company's ordinary shares, is served with a notice under section 793 of the Companies Act 2006 and does not supply the Company with the information required in the notice, then the Board, in its absolute discretion, may direct that that member shall not be entitled to attend or vote at any meeting of the Company. The Board may further direct that if the shares of the defaulting member represent 0.25% or more of the issued shares of the relevant class, that dividends or other monies payable on those shares shall be retained by the Company until the direction ceases to have effect and that no transfer of those shares shall be registered (other than certain specified excepted transfers). A direction ceases to have effect seven days after the Company has received the information requested, or when the Company is notified that an excepted transfer of all of the relevant shares to a third party has occurred, or as the Board otherwise determines.

Transfers

Ordinary shares may be held in either certificated or uncertificated form. Certificated ordinary shares shall be transferred in writing in any usual or other form approved by the Secretary and executed by or on behalf of the transferor. Transfers of uncertificated ordinary shares shall be made in accordance with the Companies Act 2006 and CREST Regulations.

The Board is not bound to register a transfer of partly-paid ordinary shares or fully-paid shares in exceptional circumstances approved by the FCA. The Board may also decline to register an instrument of transfer of certificated ordinary shares unless it is duly stamped and deposited at the prescribed place and accompanied by the share certificate(s) and such other evidence as reasonably required by the Board to evidence right to transfer, it is in respect of one class of shares only, and it is in favour of a single transferee or not more than four joint transferees (except in the case of executors or trustees of a member).

In accordance with the provisions of Section 84 of the Small Business, Enterprise and Employment Act 2015, preference shares may only be issued in registered form. Preference shares shall be transferred in writing in any usual or other form approved by the Secretary and executed by or on behalf of the transferor. The Company's registrar shall register such transfers of preference shares by making the appropriate entries in the register of preference shares. Each preference share shall confer, in the event of a winding up or any return of capital by reduction of capital (other than, unless otherwise provided by their terms of issue, a redemption or purchase by the Company of any of its issued shares, or a reduction of share capital), the right to receive out of the surplus assets of the Company available for distribution amongst the members and in priority to the holders of the ordinary shares and any other shares in the Company ranking junior to the relevant series of preference shares

and *pari passu* with any other class of preference shares (other than any class of shares then in issue ranking in priority to the relevant series of preference shares), repayment of the amount paid up or treated as paid up in respect of the nominal value of the preference share together with any premium which was paid or treated as paid when the preference share was issued in addition to an amount equal to accrued and unpaid dividends.

Variation of rights

The rights attached to any class of shares may be varied either with the consent in writing of the holders of at least 75% in nominal value of the issued shares of that class, or with the sanction of a special resolution passed at a separate meeting of the holders of the shares of that class. The rights of shares shall not (unless expressly provided by the rights attached to such shares) be deemed varied by the creation of further shares ranking equally with them or subsequent to them.

Limitations on foreign shareholders

There are no restrictions imposed by the Articles of Association or (subject to the effect of any economic sanctions that may be in force from time to time) by current UK laws which relate only to non-residents of the UK and which limit the rights of such non-residents to hold or (when entitled to do so) vote the ordinary shares.

Exercisability of rights under an employee share scheme

Employee Benefit Trusts (EBTs) operate in connection with certain of the Group's Employee Share Plans (Plans). The trustees of the EBTs may exercise all rights attached to the shares in accordance with their fiduciary duties other than as specifically restricted in the relevant Plan governing documents. The trustees of the EBTs have informed the Company that their normal policy is to abstain from voting in respect of the Barclays shares held in trust. The trustees of the Global Sharepurchase EBT and UK Sharepurchase EBTs may vote in respect of Barclays shares held in the EBTs, but only as instructed by participants in those Plans in respect of their partnership shares and (when vested) matching and dividend shares. The trustees will not otherwise vote in respect of shares held in the Sharepurchase EBTs.

Special rights

There are no persons holding securities that carry special rights with regard to the control of the Company.

Major shareholders

Major shareholders do not have different voting rights from those of other shareholders. Information provided to the Company by substantial shareholders pursuant to the FCA's Disclosure Guidance and Transparency Rules are published via a Regulatory Information Service and is available on the Company's website. As at 31 December 2016, the Company had been notified under Rule 5 of the Disclosure Guidance and Transparency Rules of the following holdings of voting rights in its shares.

Person interested	Number of Barclays shares	% of total voting rights attaching to issued share capital^a
The Capital Group Companies Inc ^b	1,172,090,125	6.98
Qatar Holding LLC ^c	1,017,455,690	5.99
BlackRock, Inc. ^d	922,509,972	5.45
Norges Bank	512,348,359	3.03

Notes

a The percentage of voting rights detailed above was calculated at the time of the relevant disclosures made in accordance with Rule 5 of the Disclosure Guidance and Transparency Rules.

b The Capital Group Companies Inc (CG) holds its shares via CG Management companies and funds. Part of the CG holding is held as American Depositary Receipts.

c Qatar Holding LLC is wholly-owned by Qatar Investment Authority.

d Total shown includes 3,860,531 contracts for difference to which voting rights are attached. Part of the holding is held as American Depositary Receipts. On 19 January 2017, BlackRock, Inc. disclosed by way of a Schedule 13G filed with the SEC, beneficial ownership of 1,054,988,420 ordinary shares of the Company as of 31 December 2016, representing 6.2% of that class of shares.

Governance: Directors report

Other Statutory Information

Between 31 December 2016 and 20 February 2017 (the latest practicable date for inclusion in this report) the Company was notified that Norges Bank now holds 508,175,594 Barclays shares, representing 2.996% of the total voting rights attached to issued share capital.

Powers of Directors to issue or buy back the Company's shares

The powers of the Directors are determined by the Companies Act 2006 and the Company's Articles. The Directors are authorised to issue and allot shares and to buy back shares subject to annual shareholder approval at the AGM. Such authorities were granted by shareholders at the 2016 AGM. It will be proposed at the 2017 AGM that the Directors be granted new authorities to allot and buy back shares.

Repurchase of shares

The Company did not repurchase any of its ordinary shares during 2016 (2015: none). As at 20 February 2017 (the latest practicable date for inclusion in this report) the Company had an unexpired authority to repurchase ordinary shares up to a maximum of 1,681m ordinary shares.

Change of control

There are no significant agreements to which the Company is a party that are affected by a change of control of the Company following a takeover bid. There are no agreements between the Company and its Directors or employees providing for compensation for loss of office or employment that occurs because of a takeover bid.

Going concern

The Group's business activities, financial position, capital, factors likely to affect its future development and performance and its objectives and policies in managing the financial risks to which it is exposed are discussed in the Strategic report and Risk review and Risk management sections.

The Directors considered it appropriate to prepare the financial statements on a going concern basis.

Disclosure of information to the auditor

Each Director confirms that, so far as he/she is aware, there is no relevant audit information of which the Company's auditors are unaware and that each of the Directors has taken all the steps that he/she ought to have taken as a Director to make himself/herself aware of any relevant audit information and to establish that the Company's auditors are aware of that information. This confirmation is given pursuant to section 418 of the Companies Act 2006 and should be interpreted in accordance with and subject to those provisions.

Directors' responsibilities

Edgar Filing: BARCLAYS PLC - Form 6-K

The following statement, which should be read in conjunction with the Auditors' report set out on page 269 to 275, is made with a view to distinguishing for shareholders the respective responsibilities of the Directors and of the auditors in relation to the accounts.

The Directors are required by the Companies Act 2006 to prepare accounts for each financial year and, with regards to Group accounts, in accordance with Article 4 of the IAS Regulation. The Directors have prepared Group and individual accounts in accordance with IFRS as adopted by the EU. The accounts are required by law and IFRS to present fairly the financial position and performance of the Company and the Group for that period. The Companies Act 2006 provides, in relation to such accounts, that references to accounts giving a true and fair view are references to fair presentation.

The Directors consider that, in preparing the accounts on pages 267 to 374, and the additional information contained on pages 134 to 236, the Group has used appropriate accounting policies, supported by reasonable judgements and estimates, and that all accounting standards which they consider to be applicable have been followed.

Having taken all the matters considered by the Board and brought to the attention of the Board during the year into account, the Directors are satisfied that the Annual Report and Financial Statements, taken as a whole, are fair, balanced and understandable, and provide the information necessary for shareholders to assess the Company's position and performance, business model and strategy.

Directors' responsibility statement

The Directors have responsibility for ensuring that the Company and the Group keep accounting records which disclose with reasonable accuracy the financial position of the Company and the Group and which enable them to ensure that the accounts comply with the Companies Act 2006.

The Directors are responsible for the maintenance and integrity of the Company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The Directors have a general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

The Directors, whose names and functions are set out on pages 51 and 52, confirm to the best of their knowledge that:

- (a) the financial statements, prepared in accordance with the applicable set of accounting standards, give a true and fair view of the assets, liabilities, financial position and profit or loss of the Company and the undertakings included in the consolidation taken as a whole; and
- (b) the management report, which is incorporated in the Directors' Report on pages 49 to 94, includes a fair review of the development and performance of the business and the position of the Company and the undertakings included in the consolidation taken as a whole, together with a description of the principal risks and uncertainties that they face.

By order of the Board

Claire Davies

Company Secretary

22 February 2017

Barclays PLC

Registered in England.

Company No. 48839

Governance: People

Culture and Values

We are four years into a cultural change journey at Barclays. Over this period we have defined a common set of values and embedded them across the organisation, ensuring they are recognised and understood by our employees. We recognise that fostering the right culture at Barclays is critical to our success and we have placed continued focus on the importance of a values based culture to the organisation. Early in 2016 conduct, culture and values was established as one of the strategic priorities for the year, and within that we have developed a culture measurement framework to manage and measure progress in embedding a values based culture across Barclays. This framework is anchored in our values and through quarterly indicators and insights we are able to assess what we are doing well and where we might need to focus attention and prioritise management action across our businesses and functions. The quarterly indicators and insights are presented to the Board Reputation Committee and the Group Executive Committee and shared with our senior leadership teams with a view to becoming an integral part of our regular management reporting so that we can ensure our priorities and decisions are focused in the right areas. The insights from the indicators and metrics within the culture measurement framework this year support the view that our ongoing efforts are having a positive impact in continuing to create a culture that will help us build the Barclays of the future.

Your View

Engagement of our employees is one of the key indicators of cultural health and we recognise the importance of listening to our colleagues and maintaining an open, two-way dialogue. The views of our colleagues shape the decisions we make, helping us create an environment in which colleagues want to work, and which in turn we believe will drive high performance. To ensure that we constantly review and reappraise to see what is working, in 2016, the annual Your View survey, our employee opinion survey, became a quarterly pulse survey excluding Africa, providing colleagues the opportunity on a more regular basis to say how it feels to work at Barclays. In the third quarter of the year, we surveyed 50% of all colleagues and the remaining 50% were surveyed in the fourth quarter. Starting from 2017, each quarter 25% of colleagues excluding Africa will be invited to take part in Your View.

The Your View results have continued to measure Sustainable Engagement and this year we have been provided with more regular snapshots. The quarterly results were then aggregated at the end of the year into an overall annual picture of engagement. At the end of 2016 Sustainable Engagement of our colleagues has remained stable year on year at 75%. Areas of particular strength from the annual results include: colleagues feeling safe to speak up (81% favourable, up 6% points on 2015); colleagues feeling proud of the contribution Barclays makes to the community and society (88% favourable, up 3% points on 2015) and employees feeling respected regardless of their job (83% favourable, up 4% points on 2015). In addition, the commitment and discretionary effort of employees continues to be very high with 94% saying they believe they work beyond what is required of them to help Barclays succeed. Along with the insights from the quarterly indicators within the culture measurement framework, these results evidence that we continue to make strong progress in embedding a values based culture across the bank.

Leadership and Learning

Our leadership and learning solutions are underpinned by our values and are focused on supporting our colleagues to develop critical skills and capabilities. Both the Barclays Academy and our Global Curriculum provide colleagues with development resources, through a variety of formats and content. In 2016 our employees spent an average of 40 hours each on training through formal programmes, in addition to having access to many other informal learning opportunities that are not captured through our learning management system. We continue to assess candidate alignment to our Values and Behaviours through our recruitment and promotion processes and we also ensure new joiners attend the Being Barclays Global Induction programme, which provides in-depth experience of the Values. All colleagues are required to attest and demonstrate their understanding of expected behaviours through the Global Code of Conduct (The Barclays Way).

This year a new event was launched, sponsored by the Group CEO, to begin to develop the next generation of enterprise leaders who actively contribute towards rebuilding the profession of banking through their own leadership and their influence of others. By bringing together high potential senior leaders from across our businesses and functions we seek to strengthen collaboration and an enterprise wide perspective amongst our senior leaders to deliver improved solutions and products for our customers and clients.

We have continued to launch and refresh learning and leadership initiatives with particular focus on supporting the development of line managers. Examples include our Manager Excellence Programme, the iLead programme for high potential Directors, and the Senior Leadership Development programme in the Banking business. All our leadership development activities follow a common principle of leaders teaching leaders, creating opportunities for knowledge sharing across different parts of Barclays.

Early careers and apprenticeships

Barclays is committed to helping people achieve their ambitions when they enter the world of work whether they are a young person entering the workplace for the first time or an experienced professional seeking to develop new skills. Barclays Early Careers proposition includes graduate, internship and apprenticeship programmes and in 2016 we hired over 750 interns and 700 graduates. Since 2012 we have created over 3,000 apprenticeships. We provide pathways for progression from apprentice to graduate supported by recognised qualifications and, in doing so, help to create an internal talent pipeline.

The ambition in 2016 for our apprenticeship programmes was to widen accessibility and ensure our programmes are fully inclusive. We expanded our Bolder Apprenticeship Programme, targeting long-term unemployed adults over the age of 24, and we also piloted our Able to Enable Programme targeting the long-term unemployed who have a disability. These programmes along with our place on the UK Government's Apprenticeship Delivery Board reflect our commitment to tackling societal issues and attracting diverse talent. Throughout 2016 we have continued to receive external recognition for our apprenticeship programmes.

We have transformed the way we recruit for our EMEA Internship and Graduate programmes to deliver an improved candidate experience and to ensure that we are assessing candidates against the right skills and qualities. This recruitment process helps to drive diversity and inclusion as students are able to demonstrate ability and potential throughout the process so that recruitment outcomes are based on performance and not on the basis of academic grades, universities attended and previous work experience. This year in the Americas we rolled out our first Sophomore Springboard programme aimed at preparing a diverse range of students for an internship in their junior year. This was the first phase of a two year strategy to identify diverse talent early on.

Industrial relations

Barclays has a long-standing partnership approach to industrial relations and we value the relationships we have with over 30 trade unions, works councils and staff associations around the world. Within the UK we have a formal partnership with Unite which has been in place for over 15 years and is one of the longest standing partnerships in the UK. Throughout 2016, we have continued to have regular, constructive dialogue with employee representatives on a wide range of topics that impact our employees in order to seek their feedback prior to implementation. Regional consultation forums have also provided a platform for bringing together and engaging employee representatives on a wide range of topics that affect the interests of our employees.

Managing change

Where restructuring is necessary to support our strategy, we have consulted on proposals with our recognised trade unions or employee forums and impacted employees, prior to implementation. In line with our Values and to ensure we treat all colleagues with respect, we seek to avoid compulsory redundancies wherever possible and we try to find ways in which we can achieve this during consultation. We continue to place significant emphasis on both voluntary redundancy programmes as well as internal redeployment through our *Internals First* programme.

Governance: People

Internals First supports colleagues who have been impacted by change and provides individual support to ensure that we retain talent within Barclays. In 2016, over 1,000 colleagues registered for Internals First support and we redeployed 32% of them within Barclays. Throughout 2016, colleagues have attended Internals First careers and networking events and opted for outplacement support services. When an employee does leave Barclays as a consequence of restructuring, our commitment is to ensure that they are given the best support for the next stage in their career. To achieve this, Barclays provides a global career transition service which offers personalised advice and support for employees placed at risk of redundancy. We also hope to keep in touch with former colleagues through the Barclays Global Alumni Programme which provides a platform for current and former employees to connect with Barclays and one another through global networking events, monthly e-newsletters and access to career opportunities.

Internal Mobility

During 2016 internal mobility has been a key focus. Being able to attract and retain talented individuals, as well as provide them with the opportunity to take control of their career and development at Barclays is one of our most important ambitions. Our aim is that by supporting internal mobility across Barclays and making it simple and easy for colleagues to move internally, we are successfully retaining and developing our internal talent. To promote this and provide colleagues with opportunities to broaden their experience, the Group CEO launched *Apply Within*, our internal mobility programme, early in 2016. We have developed multiple tools and resources for colleagues to find new internal career opportunities and for managers to find and assess suitable internal candidates. Global careers fairs, the Barclays Mentoring Tool and enhancements to the *My Career* online portal, which was launched in 2015, are part of the campaign. Thousands of colleagues have visited the *My Career* portal this year to update career profiles, upload CVs and import LinkedIn profiles and our Resourcing teams have sought to match vacant roles to colleagues' skills and aspirations. We have increased our internal recruitment percentage to 48% firm wide (excluding Africa).

Wellbeing

By actively supporting employees to be healthy and happy, we will deliver better outcomes for colleagues, for Barclays and for society. Our global wellbeing programme *Be Well* launched in 2015 and has focused on health education, a Global Speaker Series, health risk identification, prevention and management as well as new leadership and management programmes to help line managers support colleagues. The insights developed this year through our wellbeing programme help to identify themes and areas to focus on in 2017.

Performance Management

Barclays approach to performance management is key to enabling the delivery of our strategy and to continue to embed a values-based culture. Colleagues align their objectives (*what* they will deliver) to business and team goals to support the delivery of our strategy and good customer outcomes. Behavioural expectations (*how* they will achieve their objectives) are set in the context of our Values. This year we have enhanced the focus on balancing the *what* and

the how through the launch of our Let's talk about how campaign to remind colleagues that how they achieve their objectives is just as important as what they achieve. Both the campaign and the Values in Action framework provide tools and resources for colleagues to bring to life the behaviours that underpin our Values and to enhance the quality of performance reviews.

Our global recognition programme provides colleagues the opportunity to recognise the outstanding achievements of those who have demonstrated our Values. We continue to see a year on year increase in the number of colleagues receiving a Values Thank You message from a fellow colleague, with over 250,000 sent in 2016.

Colleagues are also encouraged to be involved with the company's performance by participating in our all-employee share plans, which have been running successfully for over 10 years. Further details of our approach to remuneration are included in the Remuneration Report pages 105 and 106.

Barclays regularly updates employees regarding the financial and economic factors affecting the company's performance throughout the year, using a variety of communications channels. These include CEO and senior leader communications, line manager briefing packs, video interviews and talking points which are distributed to employees every quarter to coincide with Barclays' financial reporting calendar. They are all designed to build awareness and understanding of Barclays' results and the broader macroeconomic environment, and to drive dialogue. We also hold a variety of events for employees to hear directly from the CEO and the Group Executive Committee and to ask them questions.

We have also recently introduced an Ask the Experts communication which gives perspectives from across the bank on what Barclays' results mean and how they are received by different stakeholders. Flagship campaigns are released to all employees each quarter, covering topics such as wellbeing, recognition and dynamic working to raise awareness of the tools being introduced to help them develop their careers at Barclays and to provide them with the opportunity to understand and engage in employee initiatives. Colleagues are also kept informed through regular intranet and email updates about the progress Barclays is making across activity such as Diversity and Inclusion and Performance Management.

Employees are invited to share their opinion on what it is like to work at Barclays through regular interactive events with senior leaders. These events provide employees with the opportunity to discuss their perspective on a range of areas to help senior management understand what is working well and where we need to improve. Any changes that are implemented as a result of colleague feedback are communicated through leadership briefings and engagement initiatives across each business and function.

Diversity and Inclusion

Barclays' global Diversity and Inclusion (D&I) strategy establishes objectives, initiatives and plans across each of five core pillars: Gender, LGBT, Disability, Multicultural and Multigenerational. As an organisation we remain focussed on increasing the diversity of our employees and by continuing to foster an inclusive culture we seek to ensure that employees of all backgrounds are treated equally and have the opportunity to be successful.

In recognition of this in 2016 we have continued to develop opportunities to attract and retain a diverse pipeline of talented employees across the bank. This year we have launched new initiatives including our Encore! Returnship Programme which offers leadership development and training opportunities to professionals who have taken a career break and are looking to re-enter the workforce. Also launched in 2016 is our Able to Enable apprenticeship initiative which targets the long-term unemployed who have a disability. Working with Remploy and by providing a bespoke, supportive selection process, which includes a 13 week development experience, we hope to provide opportunities for this population.

Edgar Filing: BARCLAYS PLC - Form 6-K

In June we announced enhancements to our US Leave of Absence policies for Childcare and Military Leave, supporting our commitment to creating a diverse and inclusive environment through policies that help employees successfully integrate their profession and personal lives.

Providing leadership development to ensure we are continuing to build an inclusive work environment is paramount to our diversity strategy and in 2016 our Unconscious Bias Training, previously delivered to over 8,000 senior leaders, was deployed to our junior populations with over 1,900 attending workshops to date.

We always have more to do, but are pleased when our progress towards greater inclusion is recognised. During 2016, we continued to receive national and international recognition from respected organisations such as the Business Disability Forum in the UK, Human Rights Campaign in the US and Community Business for our achievements, citing our D&I work as innovative, robust and sustainable.

Gender

Sustaining progress towards increasing female representation at all levels across Barclays remains a core focus of our talent management and leadership succession processes. Across our organisation and the financial services industry we hope to see more females in senior roles and we are determined to enable women to fulfil their career aspirations. As referenced in the Board Nominations Committee section on page 80 we revised our Board Diversity Policy in 2015 to reflect our new target of minimum 33% female representation on our Board by 2020. Our Board membership currently has 31% female representation, reflecting that we are on track to meet our 2020 target.

As a founding signatory of the HM Treasury Women in Leadership Charter and supporter of the Hampton-Alexander Review we proactively set gender targets and at the end of 2016 female representation across the senior leadership population stood at 24% representing the third consecutive year-on-year increase and progress towards our 2018 Women in Leadership goal of 26%. In line with the recommendations from the Hampton-Alexander Review, from 2017, we will publish the combined number of women on the Group Executive Committee and in the direct reports to the Executive Committee. At the end of 2016 female representation across this population stood at 25%. We will also use the review output to inform the update of our Women in Leadership targets.

At all levels our gender pipeline has continued to strengthen thanks to extensive programmes which focus on building capability and capacity, such as our Global Women in Leadership conference with over 5,000 colleagues participating, the Encore! Returnship Programme and the number of female graduate hires we have made increasing from 31% in 2014 to 39% in 2016. The Barclays Women's Initiatives Network (WiN) also provides targeted development and networking opportunities such as group mentoring, careers fairs, and events helping to connect both junior and senior colleagues from across the organisation.

Recognising our efforts, we were invited to be a corporate IMPACT champion by the United Nations in their HeForShe campaign on gender equality. Internally we have asked colleagues to show their support by pledging a specific commitment that will contribute to gender parity. Since launching HeForShe, 60% of new members are male and many are now taking a more visible role as mentors and sponsors, helping to contribute towards gender diversity and greater inclusion. Staying at the vanguard of good practice requires sustained commitment and we value independent assessment that allows us to calibrate our approach. For the ninth year running, we were pleased to be included in The Times Top 50 Workplaces for Women in the UK, and for the fourth successive year to be named in Working Mother 100 Best Companies in the US.

Female representation

Above shows the positive change in female representation within Barclays from 2015 (H2) to 2016 (H2)

LGBT

An inclusive culture is vital for colleagues to have the freedom and choice to bring their whole selves to work. Enabling that culture, are our Spectrum Allies - colleagues who are committed to inclusion and equality. By educating others and visibly supporting equality, allies help to make LGBT colleagues, friends and family feel safer and more comfortable in leading their lives. The Spectrum Allies campaign has identified over 7,000 colleagues globally as LGBT allies in 2016.

#nofilter was the theme of Pride in London 2016, which we were proud to be the headline sponsor of for the third consecutive year. More than 1,100 colleagues, leaders, friends and family came together for Pride in London and hundreds of colleagues marched at the head of the parade in June. Events for our colleagues, customers and clients took place throughout June to celebrate Pride month, and a partnership between the Barclays UK Marketing Team and Thomson Reuters resulted in a successful social media campaign, including over 10,000 downloads of the Pride in London smartphone application, in which Barclays #nofilter advert was highlighted.

Barclays ATM messaging conveyed our advocacy for IDAHOBIT (International Day Against Homophobia, Biphobia and Transphobia) and for World Aids Day, £ for £ matching augmented colleague fundraising for organisations leading on the treatment and prevention of HIV and Aids.

Independent recognition reflects the sustained impact of our global work. Stonewall continue to name us as one of just eight Star Performer organisations seen as leaders globally. Role-model colleagues were this year recognised in the Financial Times OUTstanding list of 100 LGBT business leaders, and in the Pride Power List. Awards simply serve to motivate us to continue to shape our culture so that colleagues really can bring their whole selves to work. Through the Your View survey we provide colleagues with the opportunity to identify as being LGBT, with 3% of colleagues identifying as being LGBT in 2016.

Disability

Our aspiration to become the most accessible bank remains firm. Progressing our aim, this year in partnership with the Lord Mayor of the City we expanded our internal campaign, This Is Me, into the City of London to encourage other organisations to join in eliminating the stigma associated with mental health issues. Over 70 organisations have already signed up for This is Me in The City. Through our corporate accessibility portal, we have now made our learning on accessibility and inclusion available for any organisation.

We give continued to give full and fair consideration to applications from candidates who may have a disability. Our people processes ensure all colleagues can progress their careers, with comprehensive training and development including our Disability Confident eLearning, and through tailored and needs-based workplace adjustments where relevant. This year we reviewed our Workplace Adjustment process to make it simpler and easier for colleagues and our Adjustment Passport outlines colleagues' reasonable adjustments to eliminate the need for colleagues to inform new line managers and to increase the ease of internal mobility. Employees who become disabled during their employment with us can access a full range of services and support ensuring we retain their talent.

Our efforts were recognised when Barclays achieved 98% in the Business Disability Forum's world-renowned Disability Standard - the highest ever score awarded to any organisation since the introduction of the Disability Standard in 2004.

Multigenerational

Above shows the different generations working at Barclays and the percentage change over 2015 (H2) and 2016 (H2)

home.barclays/annualreport

Barclays PLC Annual Report 2016 | 97

Governance: People

We benefit from the diverse perspectives of employees from five generations and need to ensure our workplace is inclusive for all. Dynamic Working, our signature campaign relevant to colleagues every life stage with the strapline of 'how do you work your life', is encouraging the integration of personal and professional responsibilities through smarter work patterns.

As an example of our commitment to colleagues in different life stages, we are one of the eight founding members in the Equality and Human Rights Commissions (EHRC) Working Forward campaign that aims to make British workplaces the best they can be for pregnant women and working mothers. Our Working Families network is supporting the campaign by running integration workshops for returners from parental and adoption leave.

The Emerge network supports colleagues early in their career or new to financial services and the multigenerational composition of our workforce. This year a global reverse mentoring programme was launched with over 200 successful reverse mentoring partnerships established. Our Bolder Apprentice Programme continues to grow and our Returnship programmes, both in the UK and US, are proving to be successful.

Changing careers is also important, which is why our Armed Forces Transitioning, Employment and Rehabilitation (AFTER) programme continued to see ex-military talent join our company, or be supported to gain relevant work-ready skills. Since the programme began in 2010 AFTER has assisted over 4,000 veterans in employment transition, we have hired nearly 400 ex-military talent and over £4m has been donated to military charities to assist wounded and injured personnel in employment transition. Meanwhile, our LifeSkills programmes continue to prepare young people for their first steps into the world of work.

Working Families UK recognised Barclays for best embedded workplace flexibility through our Dynamic Working Campaign. In Singapore, we won the Most Empowering Company for Mums award by the National Trades Union Congress, while in the US we were included in the 100 Best Companies for Working Mothers. In the UK, our approach to talent attraction was recognised by Working Mums as well as by Business In the Community.

Multicultural

Above shows the percentage of underrepresented populations that make up our global and regional populations. Note that underrepresented populations are defined regionally to ensure inclusion with all groups in the workplace

- a UK includes Asian, Mixed, Black, Other and Non-disclosed.
- b US includes Hispanic/Latino, Asian, Mixed, Black, Other and Non-disclosed.
- c South Africa includes African, Indian, Coloured, Other, and Non-disclosed.

Barclays global footprint makes multicultural inclusion imperative. Fostering cross-cultural connections is enabled by Embrace our multicultural network. Through the year Embrace has partnered with leaders and engaged colleagues across our global community to host discussions to gain insight and ideas on how we can better serve our multicultural customers and clients. Embrace also helped us mark important cultural and religious calendar dates throughout 2016 such as Diwali and Eid, creating communications and events to bring to life the rich multicultural diversity of our people. Day to day, this diversity is enabled by, for example, dedicated quiet rooms in many of our larger sites for prayer and reflection, and by serving halal and kosher food in our canteens.

Barclays Apprenticeship Programme reflects our commitment to recruit a diverse workforce. Since the programme launched in 2012, we have recruited over 3,000 apprentices who are considered NEET (Not in Education, Employment or Training). 30% identify as Black, Asian and Minority Ethnic, which is 19% higher than the national apprenticeship average of 11%. In addition, 43% of our apprentices are from a disadvantaged area, as defined by the Department of Education. Through this scheme we are making a positive impact on both youth unemployment and social mobility.

Ensuring Black, Asian and Minority Ethnic (BAME) female entrepreneurs can sustain and develop their businesses has been a shared focus via our partnership with the UK Women's Business Council, and in 2016 we also supported the Black British Business Awards to celebrate the achievements of BAME leaders in the UK. The multicultural profile of the organisation was acknowledged externally with senior leader role models recognised in the top 100 inaugural UPstanding Executive Power List of BAME leaders in the UK and US and in the Powerlist an annual publication of Britain's most influential people of African and African Caribbean heritage.

Dear Fellow Shareholders

As Chairman of the Board Remuneration Committee, I am pleased to introduce the Remuneration report for 2016. I set out below the business context which influenced the major decisions taken by the Committee for the year. This year's report also includes a new Directors' remuneration policy, which has been updated for regulatory changes, and simplified where possible.

Performance and pay

We remain focused on aligning our pay to performance and setting pay at a level which allows us to attract, retain and motivate, but is no more than necessary to ensure that we accelerate the delivery of shareholder value. The inherent tension between these important considerations continues to be a key component of the Committee's deliberations.

2016 represented a year of strong progress against our strategy. We have moved a step closer towards completing the restructuring of Barclays – a restructuring that will create a simplified bank focused on delivering long-term sustainable value for all our stakeholders. Our Core businesses are performing well, the rundown of Non-Core businesses has accelerated and Barclays continues to explore opportunities to reduce its shareholding in BAGL to a level that would permit regulatory deconsolidation. The result will be the creation of a high performing transatlantic consumer, corporate and investment bank.

Our Core businesses delivered profit before tax up materially, 60% up compared to 2015. Excluding notable items this increase was 4%, and 10% excluding the impact of changes to our deferral arrangements (further detail overleaf). Core costs of £13.4bn exceeded guidance due to changes to the deferral arrangements. Return on Tangible Equity (RoTE) in our Core businesses has increased to 8.4% in 2016 (2015: 4.8%). Excluding notable items, Core RoTE was 9.4% (2015: 11.2%).

Non-Core has executed well against strategy, accelerating the rundown while preserving capital, delivering a £22bn reduction in Risk Weighted Assets.

Group profit before tax for 2016 is 182% up from 2015, at £3,230m, in part driven by a material reduction in costs associated with risk and conduct events in 2016. The Group's capital position continues to strengthen with a 2016 year end CRD IV fully loaded Common Equity Tier 1 (CET1) ratio of 12.4% (2015: 11.4%).

The Committee's deliberations on the 2016 incentive pool reflected Group performance and strategic delivery in both the Core and Non-Core businesses. We reached the decision that an overall Group incentive pool of £1,533m, down slightly from £1,544m in 2015, is appropriate notwithstanding strong 2016 delivery. This level of incentive pool also absorbs the material adverse impact of foreign exchange movements through the year, which more than offset the impact of reductions in staff numbers in the year.

The Core compensation to net income (excluding notable items) ratio decreased from 34.0% in 2015 to 32.7% in 2016 excluding the impact of the deferral changes, increasing slightly to 34.7% including the impact of these changes. At a Group level, the ratio increased to 40.2% (2015: 37.7%) driven by Non-Core as it continues to be run down.

Risk and conduct

The Committee takes risk and conduct issues very seriously and ensures that appropriate adjustments are made at both the individual level and to the incentive pool.

Individual performance management reviews assess individuals' alignment with Barclays' Values, which in turn impacts individual incentive decisions. Employees who exhibit Barclays' Values, resulting in positive risk and conduct outcomes, are rewarded accordingly while those who are directly or indirectly accountable for risk and conduct issues have their remuneration adjusted downwards. This includes reductions in current year bonus and, where appropriate, reductions through the application of malus and, going forward, clawback.

Governance: Remuneration report

[Annual statement from the Chairman of the Board Remuneration Committee](#)

Collective adjustments have also been made to the Group incentive pool for specific material risk and conduct events, and to take account of an overall assessment of a wide range of future risks including conduct, non-financial factors that can support the delivery of a strong risk management and conduct culture and other factors including reputation, impact on customers, markets and other stakeholders.

Changes to deferral arrangements

Under existing incentive deferral arrangements, there is a limited relationship between in-year performance costs booked and changes in the incentive pool. This is a result of high overall levels of deferral, as well as the way that the costs of those deferrals have been recognised in our accounts. The effect of this is that if we chose for example to reduce the incentive pool in a given year due to underperformance, there would be limited impact on costs for the year in question. This lack of in-year flexibility on such an important cost line is not ideal. From 2016, a change in the recognition timing of deferral costs, together with a harmonisation of deferral levels across the Group, will result in improvements to the Group's operational flexibility going into 2017 and beyond.

These changes are described in further detail on page 104.

New remuneration policy for 2017

We will be seeking shareholder approval for a new Directors' remuneration policy (DRP) at the 2017 AGM. The new policy adopts, where possible, a more simplified and transparent approach to remuneration and is more closely aligned to Barclays' remuneration philosophy. Changes in the policy also address recent regulatory developments, in particular the requirement to defer bonuses and Long Term Incentive Plan (LTIP) awards for a period of up to seven years. We have also introduced a new requirement for executive Directors to hold shares for two years post-termination.

The Committee was supportive of an even more simplified approach than that proposed, but the Committee concluded that while this alternative was attractive, there was not yet sufficient clarity on major shareholders' expectations for us to propose such a change at the present time. The proposed changes to the DRP have been discussed with a number of our larger shareholders and institutional shareholder bodies, and overall they are broadly supportive of the changes. An at a glance summary of the new policy can be found on pages 101 and 102 of this report and the full policy is set out on pages 108 to 120.

Key remuneration decisions for executive Directors

Based on the performance of our executive Directors against the performance measures set at the beginning of the year, the Committee approved a 2016 bonus award of £1,318,000 (60% of maximum) for Jes Staley and £854,000 (61% of maximum) for Tushar Morzaria. Further details of the Committee's 2016 decisions for the executive Directors are set out on pages 121 and 122. 70% of Jes Staley's annual bonus and 60% of Tushar Morzaria's annual bonus have been deferred in shares. The period over which variable remuneration has been deferred has increased to seven years. Unvested variable remuneration is subject to malus during the vesting period. All variable remuneration awarded to

the executive Directors is also subject to clawback for a period of up to 10 years.

The Committee has agreed that Jes Staley's Fixed Pay will be unchanged for 2017 at £2,350,000 (2016: salary £1,200,000 and Role Based Pay (RBP) £1,150,000). The Committee has agreed that Tushar Morzaria's Fixed Pay will be increased to £1,650,000 for 2017 (2016: salary £800,000 and RBP £750,000). In considering the appropriate level of Tushar Morzaria's Total fixed pay (Fixed Pay plus Pension), the Committee took account of the time he has been in role without any increase (over three years), his strong performance and importance to the organisation, and industry market rates for the role. The Committee concluded that an increase of 5.7%, being less than the cumulative increase paid to UK employees over the same period, was warranted but agreed that the executive Directors would not be eligible for any further increase in the next three years (i.e. during the new policy period).

From 2017, Barclays is evolving from the existing Balanced Scorecard approach to one which better reflects progress towards our strategic goals. While many of the performance measures remain consistent with the Balanced Scorecard, the new Performance Measurement Framework allows for a more holistic assessment and broadens our approach to strategic non-financial measures while retaining a balance of key financial performance measures. The framework has been incorporated into the measures for the 2017 annual bonus and LTIP with effect from the 2017 award. Financial measures will guide 60% of the maximum opportunity for the 2017 annual bonus, and 70% of the maximum opportunity for the 2017 LTIP award.

Agenda for 2017

The Committee will continue to focus on ensuring that remuneration is aligned to the delivery of our strategy and sustainable shareholder returns. The Committee will also continue to monitor the competitiveness of our remuneration in the light of recent regulatory changes by the PRA, FCA and EBA. These changes have compounded the competitive disadvantage for UK based global firms attributable to the lack of a global level regulatory playing field.

We will also continue to progress further our agenda to address pay inequality, further details on page 106, which is in line with the proposals in the Government's Green Paper on Corporate Governance Reform. The Committee welcomes this Green Paper and supports its intent to strengthen accountability over executive pay. We have provided our views on the proposals via an industry response and will monitor developments over the coming months.

Our Remuneration report

The report has been prepared in accordance with the remuneration disclosures required by the Large and Medium-sized Companies and Groups (Accounts and Reports) (Amendment) Regulations 2013. We are seeking shareholder approval at the 2017 AGM for our new DRP, the Remuneration report (other than the part containing the DRP) and revisions to the Barclays LTIP in response to changes in regulatory requirements. Further details can be found in the 2017 AGM Notice of Meeting.

I am grateful for the feedback received from our larger shareholders on our remuneration proposals and value the insight the discussions provide. I hope you will support these resolutions at the 2017 AGM.

Crawford Gillies

Chairman, Board Remuneration Committee

22 February 2017

Governance: Remuneration report

[New Directors remuneration policy at a glance](#)

Introduction

Barclays' new DRP is subject to shareholder approval at the 2017 AGM on 10 May 2017 and, if approved, is intended to apply immediately, for three years to the date of the 2020 AGM.

What were the key factors taken into account when determining the new DRP?

The Committee considered the Barclays' remuneration philosophy (adopted in 2015), regulatory developments and its experience of operating the prior DRP when designing the new DRP.

Inputs	Outcomes
Alignment with Barclays' remuneration philosophy	<ul style="list-style-type: none"> § Attract and retain talent needed to deliver Barclays strategy § Align pay with investor interests § Reward sustainable performance § Support Barclays' Values and culture § Align with risk appetite, risk exposure and conduct expectations § Be clear, transparent and as simple as possible

Edgar Filing: BARCLAYS PLC - Form 6-K

Regulatory developments

§ Longer deferral periods:

7 year pro-rata, from year 3 for PRA Senior Managers (including executive Directors)

Extension of clawback periods from 7 to 10 years for PRA Senior Managers (including executive Directors)

§ Applies for first time for 2017 performance year:

Prohibition on dividend equivalents on deferred shares

Increase to one year (from 6 months) holding period for awards delivered in shares

Requirement that LTIP grants are based on performance over prior year as well as forward-looking performance period

What are the key changes to the DRP?

Key changes

Fixed pay

§ Fixed Pay introduced, replacing salary and RBP

§ Fixed Pay delivered 50% in cash and 50% in shares (subject to 5 year holding period lifting pro-rata)

§ Fixed Pay will not change during the policy period for either of the current executive Directors

§ Pension allowance retained at current levels, but limited to 10% of Fixed Pay for new hires

Variable pay

§ Bonus and LTIP combined for regulatory deferral purposes

Performance measures

§ Bonus: Financial measures ³ 60%

§ LTIP: Financial measures ³ 70%

Delivery

§ Any bonus deferral vests in equal tranches between the third and seventh anniversary of award

§ LTIP performance is tested at end of 3 year performance period and vests in equal tranches between the third and seventh anniversary of award

Shareholding requirement

§ Requirement increased to 200% of Total fixed pay (i.e. Fixed Pay plus Pension) within 5 years from their respective date of appointment (from 400% of salary to equivalent of 457% of salary for CEO)

§ New requirement to hold shares worth 100% of Total fixed pay (or pro-rata thereof) for 2 years post-termination

Employment contracts

§ For new hires, asymmetry for notice periods removed i.e. 6 months from the Company and 6 months from the Director (from 12 months from the Company and 6 months from the Director)

Full details of the changes to the DRP can be found on page 113.

The full DRP is set out on pages 108 to 120.

[New Directors remuneration policy at a glance](#)

How will the new DRP be implemented?

The following charts illustrate how the vesting profiles of maximum total compensation for the Group CEO would change from the current policy to the new policy. All share awards are subject to additional holding periods following vesting, during which shares may not be sold or transferred.

Current policy pre-regulatory change (for current CEO)

Proposed policy post-regulatory change (for current CEO)

Subject to shareholder approval of the new DRP, the proposed DRP will apply from the 2017 performance year.

How will the executive Directors remuneration be structured in 2017?

Total fixed pay

	Fixed Pay £000	Pension £000
Jes Staley	2,350	396
Tushar Morzaria	1,650	200

Governance: Remuneration report

2016 incentives

This section provides details of how the 2016 total incentive award decisions were made.

2016 pay and performance headlines

The key performance considerations which the Committee took into account in making its remuneration decisions for 2016 are highlighted below:

§ Group profit before tax was up 182% at £3,230m (2015: £1,146m)

§ Group CET1 ratio was up to 12.4% (2015: 11.4%)

§ Core profit before tax was up 60% from 2015 at £6,016m. Excluding notable items Core profit before tax was up 4% to £6,436m (2015: £6,191m), and up 10% excluding the impact of deferral changes made in 2016

§ RoTE in our Core businesses increased to 8.4% in 2016 (2015: 4.8%). Excluding notable items, Core RoTE was 9.4% (2015: 11.2%)

§ strong execution of the rundown of Non-Core resulting in a reduction in Risk Weighted Assets of £22bn. The pay outcomes and decisions can be summarised as follows:

§ total compensation costs increased 2% to £7,445m (2015: £7,301m) including the impact of the deferral changes. Excluding this impact compensation costs were down 3%

§ total incentive awards granted were slightly down at £1,533m (2015: £1,544m)

- § the level of incentive pool absorbs the material adverse impact of foreign exchange movements through the year which more than offset the impact of reductions in staff numbers in the year
- § the Core compensation to net income ratio (excluding notable items) improved to 32.7% (2015: 34.0%) excluding the impact of deferral changes, increasing slightly to 34.7% including the impact of these changes
- § Group compensation to net income ratio (excluding notable items) was 40.2% (2015: 37.7%) driven by Non-Core income reduction as it runs down
- § Corporate and Investment Bank (CIB) front office incentive awards were also slightly down at £875m (2015: £884m). Excluding the impact of deferral changes made in 2016, CIB compensation to net income ratio (excluding notable items) was 39.2% (2015: 40.3%)
- § there has been continued strong differentiation on the basis of individual performance to allow the Group to more effectively manage compensation costs.

2016 total incentive award decisions

The Committee's 2016 incentives decisions took full consideration of financial and non-financial performance and also the material repositioning of incentives undertaken since 2010. Since 2010, the Group incentive pool has declined steadily, from £3,484m in 2010 to £1,533m in 2016 – a decrease of 56% over six years.

Notes

- a Part of the reduction in incentive pools in 2014 was due to the introduction of RBP.
- b The 2015 Group incentive pool has been restated from £1,669m to reflect the treatment of Africa Banking as a discontinued operation. The 2010 – 2014 Group incentive pools have not been restated.

Governance: Remuneration report

Total compensation costs^{d,e}	7,445	7,301	(2)
Total compensation costs before the impact of deferral changes^{d,e}	7,050	7,301	3
Proportion of bonus pool that is deferred %	30	46	
Notes			

a Awards included in 2015 as commitments are now reflected in Bonus pool for consistency with 2016.

b Difference between incentive awards granted and Income Statement charge for commissions and other incentives.

c Includes the £395m impact of changes to deferral arrangements.

d 2015 total compensation costs have been adjusted to exclude the impact of a £429m gain on valuation of a component of the defined benefit liability.

e In addition £212m of Group compensation (2015: £236m) was capitalised as internally generated software.

Changes to deferral arrangements

From 2016 onwards, costs in relation to deferred bonuses are expensed from the performance year in respect of which they are granted. Approximately 33% of deferred bonus costs will be taken in the year of performance, being the year prior to granting (previously 0%). This acceleration of future cost immediately improves the link between in-year performance costs and the size of the incentive pool.

The relationship between in-year performance costs and changes in the incentive pool will be further improved through a change to harmonise the deferral approach for all staff across the Group, creating internal consistency. Historically, we have applied deferral levels significantly higher than those required by our regulators for bonus payments made specifically to senior staff in our Investment Bank, making them defer 100% of incentive awards over at least three years, with nothing paid at all in the year in which the performance is delivered. This meant that any change to the Investment Bank pool in incentive awards to those staff had limited impact on the in-year performance costs recognised in our accounts. This approach also put us out of step with peer practice where deferral levels are typically lower. Our new Group deferral approach ensures that all staff will defer at least what is required by our regulators, while all of our highest paid staff will continue to defer more than is required to preserve the strong alignment to future Group performance. This change means that any change in incentive awards will now have a direct and immediate impact on performance costs for the year when the charge is made.

The alignment of deferral levels across the Group also helps from a global competitive perspective given the differences in approach being adopted by the different regulatory regimes. The differences have widened given the recent changes in the UK e.g. the increase in deferral duration to seven years for PRA Senior Managers and to five years for many other MRTs (from three years previously). Harmonising our deferral approach makes the delivery less uncompetitive outside the UK while importantly maintaining our responsibilities to all our stakeholders.

Impact of deferral changes

	Barclays Group	
	Year ended 31.12.16	Year ended 31.12.15
	%	%
Barclays Group		
Compensation costs as a % of net income (excluding notable items)		
Before impact of deferral changes	38.1	37.7
After impact of deferral changes	40.2	37.7
Barclays Core		
Compensation costs as a % of net income (excluding notable items)		
Before impact of deferral changes	32.7	34.0
After impact of deferral changes	34.7	34.0

Governance: Remuneration report

Remuneration policy for all employees

This section sets out Barclays' remuneration policy for all employees, explaining the philosophy underlying the structure of remuneration packages, and how this links remuneration to the achievement of sustained high performance and long-term value creation.

Remuneration philosophy

In October 2015, the Committee formally adopted a revised, simplified remuneration philosophy which articulates Barclays' overarching remuneration approach and is set out below.

Barclays' remuneration philosophy

Attract and retain talent needed to deliver Barclays strategy

Long-term success depends on the talent of our employees. This means attracting and retaining an appropriate range of talent to deliver against our strategy, and paying the right amount for that talent

Align pay with investor interests

Ensure employees' interests are aligned with those of investors (equity and debt holders), both in structure and the appropriate balance of returns

Reward sustainable performance

Sustainable performance means making a positive contribution to stakeholders, in both the short and longer term, playing a valuable role in society

Support Barclays Values and culture

Results must be achieved in a manner consistent with our Values. Our Values and culture should drive the way that business is conducted

Align with Risk Appetite, risk exposure and conduct expectations

Designed to reward employees for achieving results in line with the Bank's risk appetite and conduct expectations

Be clear, transparent and as simple as possible

All employees and stakeholders should understand how we reward our employees. Remuneration structures should be as simple as possible so that everyone can understand how they work and the behaviours they reward

Culture and remuneration

Barclays' remuneration philosophy links remuneration to achieving sustained high performance and creating long-term value. Our remuneration philosophy applies to all employees globally across Barclays and aims to reinforce our belief that effective performance management is critical to enabling the delivery of our business strategy in line with our Values. Employees who adhere to the Barclays' Values and contribute to Barclays' success are rewarded accordingly.

This is achieved by basing performance assessment on clear standards of delivery and behaviour, and starts with employees aligning their objectives (what they will deliver) to business and team goals in order to support the delivery of the business strategy and good customer outcomes. Behavioural expectations (how people will achieve their objectives) are set in the context of our Values.

Individual performance is assessed against both financial and non-financial criteria. Other factors are also taken into consideration within the overall performance assessment, including core job responsibilities, behaviours towards risk and control, colleague and stakeholder feedback as well as input from the Risk and Compliance functions, where appropriate.

Through our performance management approach we emphasise the equal importance of both what an individual has delivered as well as how they have achieved this, encouraging balanced consideration of each dimension. Both of these elements are assessed and rated independently of each other. In 2016 we eliminated the requirement to have an overall rating which should allow for more robust and reflective conversations between managers and team members on the individual components of performance.

A key part of the performance management philosophy promotes ongoing quality dialogue throughout the year. This helps manage performance messages effectively and allows for more timely recognition as well as appropriate coaching and support where needed.

By linking individual performance assessment to Barclays' strategy and our Values and, in turn, to remuneration decisions, a clear alignment between what we are striving to achieve, how we go about this, and ultimately, how we recognise this in individual financial terms is achieved.

Risk, conduct and remuneration

Another key feature of our remuneration philosophy is the alignment of remuneration with our risk appetite and with the conduct expectations of Barclays, our regulators and stakeholders. The Committee takes risk and conduct events very seriously and ensures that there are appropriate adjustments to individual remuneration and, where necessary, the incentive pool.

The Remuneration Review Panel, which reports to the Committee, supports the Committee in this process. The Panel is chaired by the Chief Risk Officer and includes senior representatives from the key control functions of Risk, Compliance, Internal Audit, Legal and HR as well as the CEOs of Barclays UK and Barclays International. It sets the policy and processes for assessing compensation adjustments for risk and conduct events.

We have robust processes for considering risk and conduct as part of individual performance management processes with outcomes reflected in individual remuneration decisions. Line managers have primary accountability for ensuring the risk and conduct issues are considered when assessing performance and making remuneration decisions. In addition, there is a secondary review by the control functions for individuals involved in significant failures of risk management, conduct issues, regulatory actions or other major incidents which impact either the Group or business to ensure these issues are also considered. When considering individual responsibility, a variety of factors are taken into account such as whether an individual was directly responsible or whether the individual, by virtue of seniority, could be deemed indirectly responsible, including staff who drive the Group's culture and set its strategy.

Governance: Remuneration report

[Remuneration policy for all employees](#)

Actions which may be taken where risk management and conduct falls below required standards include:

Adjustment Current year annual bonuses are adjusted downwards where individuals are found to be responsible (either directly or indirectly) in a risk or misconduct event.

Malus Deferred unvested bonuses from prior years are subject to malus provisions which enable the Committee to reduce the vesting level of deferred bonuses (including to nil) at its discretion. Events which may lead the Committee to do this include, but are not limited to, employee misconduct or a material failure of risk management.

Clawback Clawback applies to any variable remuneration awarded to a PRA Material Risk Taker (MRT) on or after 1 January 2015 in respect of years for which they are a MRT. Barclays may apply clawback if, at any time during the seven year period from the date on which variable remuneration is awarded to a MRT: (i) there is reasonable evidence of employee misbehaviour or material error, and/or (ii) the firm or the business unit suffers a material failure of risk management, taking account of the individual's proximity to and responsibility for that incident.

Clawback may be extended to 10 years for PRA Senior Managers where there are outstanding internal or regulatory investigations at the end of the 7 year clawback period.

Where possible, an adjustment will be made to current year annual bonus, before the application of malus and then clawback.

In addition to reductions to individuals' bonuses, the Committee considers and makes collective adjustments to the incentive pool for specific material risk and conduct events. In 2016, the impact of these collective adjustments, resulting from both the direct financial impact on performance and the additional adjustments applied by the Committee, is a reduction of £150m.

We have also adjusted the incentive pool to take account of an assessment of a wide range of future risks including conduct, non-financial factors that can support the delivery of a strong risk management, control and conduct culture and other factors including reputation, impact on customers, markets and other stakeholders.

Remuneration levels

Barclays is a long-standing supporter of the Living Wage. As an accredited Living Wage employer, Barclays commits to ensure that all permanent UK employees and those UK employees of third party contractors who provide services to us at our sites, are paid at least the current London or UK Living Wage. This is a commitment which we have also extended to all our UK employed apprentices.

Barclays is also fully committed to addressing pay inequality. Barclays' work in this area is illustrated by recent union pay deals and the repositioning of the incentive pools over recent years. Over the past few years, we have consciously redirected the bonus pool funding, providing proportionally more to junior employees.

For UK employees, average Total Compensation (fixed pay plus bonus) for Managing Directors has reduced materially since 2010 (broadly in line with the reduction in the incentive pool). Over the same period, junior populations have been protected and have seen small increases in Total Compensation despite a challenging business environment. Similarly, salaries have been consciously increased for those within lower corporate grades within the UK. The UK pay deal which was in place for the 2014-2016 period provided non-management populations (primarily outside of the Investment Bank) with a 7.5% merit increase over the three-year period. A new three-year pay deal with Unite was reached in January 2017 which commits for the non-management population to a 7.5% merit increase over the 2017-2019 period and also commits to a minimum increase of 10% for the most junior graded employees.

Remuneration structure

The remuneration structure for employees is closely aligned with that for executive Directors, set out in detail in the DRP which is at pages 108 to 120 of this report and for which shareholder approval is being sought at the 2017 AGM. The primary exception being that the executive Directors participate in the Barclays' LTIP.

Employees receive salary, pension and other benefits and are eligible to be considered for an annual bonus. Employees in some customer-facing businesses participate in formulaic incentive plans including plans which have good customer outcomes as the primary performance measure. The plans also recognise how results have been achieved in line with Barclays' Values. Some senior employees also receive RBP. For executive Directors, under the new DRP, salary and RBP are replaced by Fixed Pay. Remuneration of MRTs is subject to the 2:1 maximum ratio of variable to total fixed pay. A total of 1,561 (2015: 1,523) individuals were MRTs in 2016. Capital requirements regulation (CRR) quantitative disclosures on MRTs are set out on pages 176 and 177 of Barclays PLC 2016 Pillar 3 Report.

The remuneration of employees engaged in control functions is determined independently from the business they support and within the parameters of the incentive pool allocated to them by the Committee.

Fixed remuneration

Salary Salaries reflect individuals' skills and experience and are reviewed annually in the context of annual performance assessment. They are increased where justified by role change, increased responsibility or a change in the appropriate market rate.

Salaries may also be increased in line with local statutory requirements and in line with union and works council commitments.

Role Based Pay (RBP) A small number of senior employees receive a class of fixed pay called RBP to recognise the seniority, breadth and depth of their role.

Pension and benefits The provision of a competitive package of benefits is important to attracting and retaining the talented staff needed to deliver Barclays' strategy. Employees have access to a range of country-specific company-funded benefits, including pension schemes, healthcare, life assurance and Barclays' share plans as well as other voluntary employee funded benefits. The cost of providing these benefits is defined and controlled.

Variable remuneration

Annual bonus Annual bonuses incentivise and reward the achievement of Group, business and individual objectives, and reward employees for demonstrating individual behaviours in line with Barclays Values.

The ability to recognise performance through variable remuneration enables the Group to control its cost base flexibly and to react to events and market circumstances. Bonuses remain a key feature of remuneration practice in the highly competitive and mobile market for talent in the financial services sector. The Committee is careful to control the proportion of variable to fixed remuneration paid to individuals.

From 2016, the typical deferral structures are:

For MRTs:		For non-MRTs:	
Incentive award	Amount deferred	Incentive award	Amount deferred
< £500,000	40% of total award	Up to £65,000	0%
£500,000 to £1,000,000	60% of total award	> £65,000	Graduated level of deferral
³ £1,000,000	60% up to £1,000,000		
	100% above £1,000,000		

Deferred bonuses are generally delivered in equal portions as deferred cash and deferred shares subject to the rules of the deferred cash and share plans (as amended from time to time) and continued service. From 2016, deferred bonuses are subject to either a 3, 5 or 7 year deferral period in line with regulatory requirements.

Share plans Alignment of senior employees with shareholders is achieved through deferral of incentive pay. We also encourage wider employee shareholding through the all-employee share plans. 82% of the global employee population (excluding Africa) is eligible to participate.

Governance: Remuneration report

[Directors remuneration policy](#)

This section sets out the proposed new Barclays forward-looking remuneration policy for Directors, which has evolved from the existing policy and explains each element of remuneration and how it operates. The policy described in this section is intended to apply for three years beginning on the date of the 2017 AGM, subject to shareholder approval.

The existing policy can be found on pages 100 to 110 of the 2013 Annual Report or at home.barclays/annualreport.

Remuneration policy for executive Directors

Element and purpose	Operation	Maximum value and performance measures
-------------------------------------	---------------------------	--

A. Fixed pay

Fixed Pay

To reward skills and experience appropriate for the breadth and depth of the role and to provide the basis for a competitive remuneration package

Fixed Pay is determined with reference to market practice and historical market data (on which the Committee receives independent advice), and reflects the individual's experience and role.

Executive Directors' total compensation is benchmarked against comparable roles in the following banks: Bank of America, BNP Paribas, Citigroup, Credit Suisse, Deutsche Bank, HSBC, JP Morgan Chase & Co, Lloyds, Morgan Stanley, Standard Chartered and UBS. The Committee may amend the list of comparator companies to ensure it remains relevant to Barclays or if circumstances make this necessary (for example, as a result of takeovers or mergers).

Fixed Pay for executive Directors is set within the benchmark range determined by the Committee taking into account their experience and performance.

The maximum Fixed Pay is £2,350,000 for Jes Staley (Group Chief Executive) and £1,650,000 for Tushar Morzaria (Group Finance Director).

50% of Fixed Pay is delivered in cash (paid monthly), and 50% is delivered in shares. The shares are delivered quarterly and are subject to a holding period with restrictions lifting over five years (20% each year). As the executive Directors beneficially own the shares, they will be entitled to any dividends paid on those shares.

These amounts are fixed and will not change during the policy period for these individuals.

There are no performance measures.

Malus and clawback provisions do not apply to Fixed Pay.

Pension

To enable executive Directors to build long-term retirement savings

Executive Directors receive an annual cash allowance in lieu of participation in a pension arrangement.

The maximum annual cash allowance is £396,000 for Jes Staley (Group Chief Executive) and £200,000 for Tushar Morzaria (Group Finance Director).

These amounts are fixed and will not change during the policy period for these individuals.

Benefits

To provide a competitive and cost effective benefits package appropriate to the role and location

Executive Directors' benefits provision includes, but is not restricted to, private medical cover, annual health check, life and ill health income protection, car cash allowance, and use of a Company vehicle and driver when required for business purposes.

The maximum value of the benefit is determined by the nature of the benefit itself and costs of provision may depend on external factors, e.g. insurance costs.

In addition to the above, if an executive Director were to relocate, additional support would be provided for a defined and limited period of time in line with Barclays' general employee mobility policy including, but not restricted to, the provision of temporary accommodation, tax advice, home leave related costs, payment of removal costs and relocation flights for the executive Director, spouse and children. Barclays will pay the executive Director's tax on the relocation

Edgar Filing: BARCLAYS PLC - Form 6-K

costs but will not tax equalise and will also not pay the tax on any other employment income.

Remuneration policy for executive Directors continued

Element and purpose	Operation	Maximum value and performance measures
---------------------	-----------	--

B. Variable pay

Annual bonus

To reward delivery of short-term financial targets set each year, the individual performance of the executive Directors in achieving those targets, and their contribution to delivering Barclays strategic objectives

Delivery in part in shares with a holding period increases alignment with shareholders. Deferred bonuses encourage longer term focus and retention

Determination of annual bonus

Individual bonuses are discretionary and decisions are based on the Committee's judgement of executive Directors' performance in the year, measured against Group and personal objectives.

Delivery structure

Annual bonuses are delivered as a combination of cash and shares, a proportion of which may be deferred and/or subject to a holding period.

Deferral proportions and vesting profiles will be structured so that, in combination with any LTIP award, the proportion of variable pay that is deferred is no less than that required by regulations.

The maximum annual bonus opportunity is 80% of Total fixed pay. For these purposes Total fixed pay is Fixed Pay plus Pension.

The performance measures by which any executive Director's bonus is assessed include financial and non-financial measures which also include risk-related measures and personal objectives. In making its assessment of any bonus, the Committee will consider financial factors to guide at least 60% of the bonus opportunity. Any bonus is discretionary and any amount may be awarded from zero to the maximum value.

Edgar Filing: BARCLAYS PLC - Form 6-K

Deferred bonuses are granted by the Committee (or an authorised sub-committee) at its discretion, subject to the relevant plan rules as amended from time to time.

Dividend equivalents, in the form of additional shares, are payable on the vested deferred bonus shares, equal to the dividends paid or payable between the award date and the relevant release date. If dividend equivalents are not permissible under regulations, the number of deferred bonus shares to be awarded will be based on a share price discounted by reference to an expected dividend yield over the vesting period. In such circumstances, the Committee has discretion to reduce (not increase) the number of shares that vest if actual dividends paid over the period are materially lower than the original dividend assumption.

A notional discount may be applied to the deferred bonus awards for the purposes of calculating the 2:1 cap to the extent this is permitted by regulations (currently a discount is permitted on up to 25% of variable pay where the conditions for applying such a discount are met).

Operation of risk and conduct adjustment, malus and clawback

Any bonus awarded will reflect appropriate consideration in relation to Group risk and conduct events. Individual bonus decisions may also reflect appropriate reductions in relation to specific risk and conduct events. Any bonus is also subject to malus and clawback provisions.

The malus provisions enable the Committee to reduce the amount of unvested bonus (including to nil) prior to the unvested bonus vesting in specified circumstances, including, but not limited to:

§ a participant deliberately misleading Barclays, the market and/or shareholders in relation to the financial

The Committee has the discretion to vary the measures and their respective weightings within each category. The measures and weightings will be disclosed annually as part of the Annual report on Directors' remuneration.

performance of the Barclays Group

§ a participant causing harm to Barclays' reputation or where his/her actions have amounted to misconduct, incompetence or negligence

§ a material restatement of the financial statements of the Barclays Group or any subsidiary, or the Group or any business unit suffering a material downturn in its financial performance

§ a material failure of risk management in the Barclays Group

§ a significant deterioration in the financial health of the Barclays Group.

Governance: Remuneration report

[Directors remuneration policy](#)

Remuneration policy for executive Directors continued

Element and purpose

Operation

Maximum value and performance measures

B. Variable pay continued

The clawback provisions enable amounts to be recovered after they have vested (for a period of seven years from grant/10 years in specified circumstances e.g. where a relevant investigation is ongoing at the end of the initial seven year period) in circumstances where (i) a participant's actions or omissions have amounted to misbehaviour or material error and/or (ii) Barclays or the relevant business unit has suffered a material failure of risk management.

Timing of receipt

Non-deferred cash components of any bonus are paid following the performance year to which they relate, normally in March. Non-deferred share bonuses are also awarded normally in March and are subject to a holding period (after the payment of tax) in line with regulations and with release no faster than permitted by regulations (currently minimum of six months, increasing to one year for the 2017 performance year).

Deferred share bonuses are structured so that no deferred shares vest faster than permitted by regulations (currently in five equal tranches with the first vesting on or around the third anniversary of grant and the last tranche vesting on or around the seventh anniversary of grant). Vesting is also subject to the provisions of the plan rules including employment and the malus and clawback provisions (as explained above). Any shares that vest are subject to an additional holding period (after payment of tax) in line with regulations and with release no faster than permitted by regulations (currently minimum of six months, increasing to one year for the 2017 performance year).

Remuneration policy for executive Directors continued

Element and purpose	Operation	Maximum value and performance measures
---------------------	-----------	--

B. Variable pay continued

Long Term Incentive Plan (LTIP) award

To reward execution of Barclays' strategy over a multi-year period

Long-term performance measurement, deferral and holding periods encourage a long-term view and align executive Directors' interests with those of shareholders. Malus and clawback provisions discourage excessive risk-taking and inappropriate behaviours

Determination of LTIP award

LTIP awards are made by the Committee following discussion of recommendations made by the Chairman (for the Group Chief Executive's LTIP award) and by the Group Chief Executive (for other executive Directors' LTIP awards) based on satisfactory performance over the prior year.

Delivery structure

LTIP awards are granted subject to the plan rules and are satisfied in Barclays shares (although they may be satisfied in other instruments as may be required by regulation).

The maximum annual LTIP award is 120% of Total fixed pay. For these purposes Total fixed pay is Fixed Pay plus Pension.

Vesting is dependent on performance measures and service.

Forward-looking performance measures will be based on financial performance and other long-term strategic measures. The Committee has discretion to change the weightings but financial measures will be at least 70% of the total opportunity. Measures and weightings will be set in advance of each grant. The threshold and maximum level of performance for each financial performance measure will be disclosed annually as part of the Annual report on Directors' remuneration.

Edgar Filing: BARCLAYS PLC - Form 6-K

LTIP awards are structured so that when combined with the annual bonus the proportion of variable pay that is deferred is no less than that required by regulations. Straight-line vesting applies between threshold and maximum for the financial measures and weightings with no more than 25% vesting at threshold performance.

For each award, forward-looking performance measures are set at grant and there is no retesting allowed of those conditions. The Committee has, within the parameters set out opposite, the flexibility to vary the weighting of performance measures and calibration for each award prior to its grant.

The Committee has discretion, and in line with the plan rules approved by shareholders, in exceptional circumstances to amend targets, measures, or the number of awards if an event happens (for example, a major transaction) that, in the opinion of the Committee, causes the original targets or measures to be no longer appropriate or such adjustment to be reasonable. The Committee also has the discretion to reduce the vesting of any award, including to nil, if it deems that the outcome is not consistent with performance delivered.

Dividend equivalents, in the form of additional shares, are payable on the vested deferred shares, equal to the dividends paid or payable between the award date and the relevant release date. If dividend equivalents are not permissible under regulations, the number of shares to be awarded will be based on a share price discounted by reference to an expected dividend yield over the vesting period. In such circumstances, the Committee has discretion to reduce (not increase) the number of shares that vest if actual dividends paid over the period are materially lower than the original

dividend assumption.

A notional discount may be applied to LTIP awards for the purposes of calculating the 2:1 cap to the extent this is permitted by regulations (currently a discount is permitted on up to 25% of variable pay where the conditions for applying such a discount are met).

Operation of malus and clawback

The achievement of performance measures determines the extent to which LTIP awards will vest. Awards are also subject to malus during the vesting period and clawback for a period of seven years (10 years in specific circumstances) from the date of award which enables the Committee to reduce the vesting level of awards (including to nil). This is explained further in the annual bonus paragraphs above.

Timing of receipt

Barclays LTIP awards are structured so that no award vests before the third anniversary of grant and an award vests no faster than permitted by regulations (currently in five equal tranches with the first tranche vesting on or around the third anniversary of grant and the last tranche vesting on or around the seventh anniversary of the grant date). Any shares that vest are subject to an additional holding period (after payment of tax) in line with regulations, with restrictions lifting no faster than permitted by regulations (currently minimum of six months, increasing to one year for the 2017 performance year).

notwithstanding that such awards and/or payments may not be in line with the new policy described above.

Shareholding requirement

To further enhance the alignment of shareholders and executive Directors interests in long-term value creation

Executive Directors must build up a shareholding of Barclays shares worth a minimum of 200% of Total fixed pay (i.e. Fixed Pay plus Pension) within five years from the date of appointment as executive Director. They have a reasonable period to build up to this requirement again if it is not met because of a significant share price depreciation.

Barclays shares worth a minimum of 200% of Total fixed pay must be held within five years plus a shareholding of 100% of Total fixed pay (or pro-rata thereof) for two years post termination.

Executive Directors must also continue to hold a shareholding for two years post-termination as follows:

(i) if the executive Director has been employed for more than five years: 100% of Total fixed pay; or

(ii) if the executive Director has been employed for less than five years: either

(a) grow their holding to the pro-rated requirement if the pro-rated requirement has not been met. Directors would only be allowed to sell shares to pay for tax liabilities which crystallise when deferred awards vest on or after termination; or

(b) if the pro-rated requirement has been exceeded, executive Directors would be allowed to sell shares above this requirement and also sell shares to pay for tax liabilities which crystallise when deferred awards vest on or after termination.

Shares that count towards the requirement are beneficially owned shares including any vested

share awards subject only to holding periods (including vested LTIPs, vested deferred share bonuses, Fixed Pay shares, and RBP shares). Shares from unvested deferred share bonuses and unvested LTIPs do not count towards the requirement.

Outside appointments

To encourage self-development and allow for the introduction of external insight and practice

Executive Directors may accept one non-executive Director board appointment in another listed company. Not applicable.

The Chairman's approval must be sought before accepting an appointment. Fees may be retained by the executive Director. Neither of the executive Directors currently hold an outside appointment.

Notes to the table on pages 108 to 112

Performance measures and targets

The Committee selects financial performance measures which are fundamental to delivery against the Bank's strategy and are considered to be the most important financial measures used by the executive Directors to oversee the direction of the business. The non-financial performance measures and sources of data are chosen to represent key indicators of sustainable performance that are robustly monitored and reported on to management. The measures are determined in consultation with major shareholders.

Financial targets are set to be stretching but achievable and are aligned to enhancing shareholder value. In respect of the LTIP, the financial measures, weightings and targets will be disclosed at the start of the relevant performance period. In respect of the annual bonus, the financial measures and weightings will be disclosed at the start of the relevant performance year. The Committee is of the opinion that the financial targets for the annual bonus are commercially sensitive in respect of the Company and that it would be detrimental to disclose details at the start of the relevant performance year. Performance against the targets will be disclosed at the end of the relevant performance year in that year's remuneration report, subject to commercial sensitivity no longer remaining.

The existing Balanced Scorecard has evolved into a Performance Measurement framework which better reflects progress towards our strategic and non-financial goals. Enhancements to the available sources of management information and reporting, ranging from internal dashboards to external third party measures, allows for a more holistic view of sustainable business performance, rather than focusing on a few narrowly defined targets. The evaluation will focus on key performance measures (many continuing from the Balanced Scorecard), with a detailed retrospective disclosure on progress throughout the period against each category, together with supporting rationale for payments.

Changes in remuneration policy for 2017

The following table provides a summary of the changes to the DRP for 2017:

Element	Change	Rationale for change
Fixed Pay	§ Consolidate salary and RBP into a single Fixed Pay element (delivered 50% in cash and 50% in shares subject to a 5 year holding period lifting pro-rata). §	§ Simplicity, transparency.

Edgar Filing: BARCLAYS PLC - Form 6-K

Fixed Pay will not change during the policy period for either of the current executive Directors.

§

Pension

Continue pension allowance as a separate allowance:

for existing executive Directors, amount unchanged but fixed for the duration of this policy

for new hires, pension allowance limited to 10% of Fixed Pay.

§ Supports simplified approach to Fixed Pay

Variable pay

§ Combine annual bonus and LTIP for deferral purposes, while retaining maximum variable at 200% of Total fixed pay and 60:40 split between maximum LTIP and annual bonus.

§ Mitigates the global competitive impact of longer deferral periods and holding periods under the PRA Remuneration Rules and the EBA Guidelines on sound remuneration policies.

§ Performance measures

Bonus: financial performance measures at least 60%.

LTIP: financial performance measures at least 70%.

§ Simplicity, transparency.

§ Dividends

Where regulatory constraints prevent dividend alignment, use discounted share price to calculate number of shares under award.

Committee has discretion to reduce the number of shares that vest if actual dividends paid are materially lower than original dividend assumption.

§ Recreates shareholder alignment lost through regulatory dividend prohibition.

Shareholding requirement

§ Increase requirement to 200% of Total fixed pay (i.e. Fixed Pay plus Pension) from 400% of salary.

§ Longer and stronger shareholder alignment (equivalent to 457% of salary for CEO).

§ Introduce shareholding requirement of 2 years post termination of 100% of Total fixed pay (or pro-rata thereof).

Employment contracts	§ For new hires, 6 months notice from the Company and 6 months notice from the executive Director.	§ Remove asymmetry for notice periods. § Alignment between the employee and the Company.
Leavers	§ Apply eligible leaver treatment to deferred bonus and LTIP awards from 5 years (except for termination for gross misconduct). Ability to apply malus for the full vesting period maintained. § Pro-ration of LTIP for eligible leavers retained but based on 4 year performance period, i.e. includes assessment period prior to grant. Clawback extended to 10 years in specific circumstances.	§ Partially mitigates the global competitive impact of longer deferral periods (increasing from 3 years to 7 years) and holding periods under the PRA Remuneration Rules and the EBA Guidelines respectively. § Alignment to the EBA Guidelines for performance assessment prior to award.

Governance: Remuneration report

[Directors remuneration policy](#)

Differences between the remuneration policy of the executive Directors and the policy for all employees of the Barclays Group

The structure of remuneration packages for executive Directors is closely aligned with that for the broader employee population. Employees receive salary, pension and benefits and are eligible to be considered for a bonus and to participate in all-employee share plans. The broader employee population typically does not have a contractual limit on the quantum of remuneration and does not receive RBP which is paid only to some, but not all, MRTs and other senior employees. Under the new DRP, executive Directors do not receive RBP.

As with executive Directors, variable pay for the broader employee population is performance based. Variable pay for executive Directors and the broader employee population is subject to deferral requirements. Executive Directors and other MRTs are subject to deferral at a minimum rate of 40% (for variable pay of less than £500,000) or 60% (for variable pay between £500,000 and £1,000,000) or 60% up to £1,000,000 and 100% above £1,000,000 (for variable pay of more than £1,000,000). For non-MRTs, bonuses in excess of £65,000 are currently subject to a graduated level of deferral. The terms of deferred bonus awards for executive Directors and the wider employee population are broadly the same, in particular the vesting of all deferred bonuses (subject to service and malus conditions).

The broader employee population does not currently participate in the Barclays LTIP.

How shareholder views and broader employee pay are taken into account by the Committee in setting policy and making remuneration decisions

We recognise that remuneration is an area of particular interest to shareholders and that in setting and considering changes to remuneration it is critical that we listen to and take into account their views. Accordingly, a series of meetings are held each year with major shareholders and shareholder representative groups. The Committee Chairman attends these meetings, accompanied by senior Barclays employees (including the Group Reward and Performance Director and the Company Secretary). The Committee notes that shareholder views on some matters are not always unanimous, but values the insight and engagement that these interactions provide, including the expression of sometimes different views. This engagement is meaningful and helpful to the Committee in its work and contributes directly to the decisions made by the Committee. Shareholders' feedback has been incorporated into the new DRP.

The Committee takes account of the pay and employment conditions of the broader employee base when it considers the remuneration of the executive Directors. The Committee receives and reviews analyses of summary remuneration proposals for employees across all of the Group's businesses. When the Committee considers executive Directors remuneration, it therefore makes that consideration in the context of a detailed understanding of remuneration for the broader employee population to ensure consistency throughout the Group.

Executive Directors policy on recruitment

Barclays operates in a highly specialised sector and many of its competitors for talent are outside of the UK. The Committee's approach to remuneration on recruitment is to pay no more than is necessary to attract the best candidates to the role.

Approval of the remuneration packages offered on appointment to any new executive Director is a specific requirement of the Committee's Terms of Reference. The terms of such packages must be approved by the Committee in consultation with the Chairman and (except for the terms of his own remuneration) the Group Chief Executive.

Any new executive Director's package would include the same elements as those of the existing executive Directors, as shown below.

Element of remuneration	Commentary	Maximum value
Fixed Pay	Determined by experience, market practice, market conditions and ability to recruit.	As determined by the Committee with reference to these factors. Fixed Pay will only exceed amounts paid to current executive Directors, as considered reasonable by the Committee, by reference to these factors.
		If on appointment Fixed Pay is equal to or greater than maximum stated for the relevant role in the policy (for current executive Director), no changes are allowed over the policy period.
		If on appointment Fixed Pay is at a level below the maximum stated for

the relevant role in the policy (for current executive Director), the Committee retains the discretion to realign Fixed Pay over a transitional period which may mean that annual Fixed Pay increases for the new appointee are required up to such maximum amounts.

Pension	In line with policy.	10% of Fixed Pay.
Benefits	In line with policy.	In line with policy.
Annual Bonus	In line with policy.	80% of Total fixed pay.
Long Term Incentive Plan	In line with policy.	120% of Total fixed pay.
Buy-out	<p>The Committee can consider buying out forfeited bonus opportunity or incentive awards that the new executive Director has forfeited as a result of accepting the appointment with Barclays, subject to proof of forfeiture where applicable.</p> <p>As required by the PRA Remuneration Rules, any award made to compensate for forfeited remuneration from the new executive Director's previous employment may not be more generous than, and must mirror as far as possible the expected value, timing and form of delivery of, the terms of the forfeited remuneration and must be in the best long-term interests of Barclays. Barclays deferral policy shall however apply as a minimum to any buy-out of annual bonus opportunity.</p>	<p>The value of any buy-out is not included within the maximum incentive levels above since it relates to a buy-out of forfeited bonus opportunity or incentive awards from a previous employer.</p>

Where a senior executive is promoted to the Board, his or her existing contractual commitments agreed prior to his or her appointment may still be honoured in accordance with the terms of the relevant commitment including vesting of any pre-existing deferred bonus or long-term incentive awards.

Governance: Remuneration report

[Directors remuneration policy](#)

Executive Directors policy on payment for loss of office (including or following a takeover)

The Committee's approach to payments in the event of termination is to take account of the individual circumstances including the reason for termination, individual performance, contractual obligations and the terms of the deferred bonus plans and LTIPs in which the executive Director participates.

Provisions relating to executive Directors termination

Standard provision	Policy	Details
Notice periods in executive Directors service contracts	<p>For existing executive Directors, 12 months notice from the Company and six months notice from the executive Director.</p> <p>For new executive Director hires, six months notice from the Company and six months notice from the executive Director.</p>	<p>Executive Directors may be required to work during the notice period or may be placed on garden leave or, if not required to work the full notice period, may be provided with pay in lieu of notice (subject to mitigation where relevant).</p>
Pay during notice period or payment in lieu of notice per service contracts	<p>Fixed Pay payable and continuation of pension and other contractual benefits while an employee during notice period.</p>	<p>Fixed Pay delivered in cash is payable in phased instalments (or lump sum) and subject to mitigation if paid in instalments and executive Director obtains alternative employment during the notice period or while on garden leave.</p> <p>Fixed Pay delivered in shares is delivered on the next quarterly delivery date and is pro-rated for the number of days from the start of the relevant quarter to the termination date. Where Barclays elects to</p>

terminate the employment with immediate effect by making a payment in lieu of notice, the executive Director will not receive any shares that would otherwise have been payable during the period for which the payment in lieu is made (unless required otherwise by regulations or local law).

In the event of termination for gross misconduct neither notice nor payment in lieu of notice is given.

Treatment of annual bonus on termination

No automatic entitlement to bonus on termination, but may be considered at the Committee's discretion pro-rated for service, and subject to performance measures being met. No bonus would be payable in the case of gross misconduct or resignation.

Treatment of unvested deferred bonus awards

In the case of death or if the executive Director is an eligible leaver the executive Director would continue to be eligible to be considered for unvested portions of deferred awards, subject to the rules of the relevant plan, unless the Committee determines otherwise in exceptional circumstances. Eligible leaver is defined as leaving due to injury, disability or ill health, retirement, redundancy, the business or company which employs the executive Director ceasing to be part of the Group or the employer terminating employment, other than in circumstances which amount to gross misconduct or dismissal for cause. In addition, the Committee will apply its discretion to treat resignation on or after the fifth anniversary of the date of grant as eligible leaver status. Outstanding deferred bonus awards would lapse if the executive Director leaves by reason of resignation prior to fifth anniversary, is terminated for gross misconduct or cause, or is otherwise not designated an eligible leaver.

In an eligible leaver situation, deferred bonus awards may be considered for release in full on the scheduled release dates unless the Committee determines otherwise in exceptional circumstances. After release, the shares are subject to an additional holding period in line with regulations (currently a minimum of six months, increasing to one year for the 2017 performance year).

Deferred awards are subject to malus provisions which enable the Committee to reduce the vesting level of deferred bonuses (including to nil) and once vested are subject to clawback provisions (as described above).

In the event of a takeover or other major corporate event, the Committee has absolute discretion to determine whether all outstanding awards would vest early or whether they should continue in the same or revised form following the change of control. The Committee may also determine that participants may exchange existing awards for awards over shares in an acquiring company with the agreement of that company.

Standard provision

Policy

Details

Treatment of unvested awards under the LTIP

In the case of death or if the executive Director is an eligible leaver the executive Director would continue to be entitled to be considered for an award. Eligible leaver defined as leaving due to injury, disability or ill health, retirement, redundancy, the business or company which employs the executive Director ceasing to be part of the Group or for any other reason if the Committee decides at its discretion. In addition, the Committee will apply its discretion to treat resignation on or after the fifth anniversary of the date of grant as eligible leaver status. Outstanding unvested awards under the LTIP would lapse if the executive Director leaves by reason of resignation prior to fifth anniversary, is terminated for gross misconduct, or is otherwise not designated an eligible leaver.

In an eligible leaver situation, awards may be considered for release on the scheduled release dates, pro-rated for time (over the whole performance period, including the assessment period prior to grant for awards granted on or after 10 May 2017) and performance, subject to the Committee's discretion to determine otherwise in exceptional circumstances, in accordance with the plan rules, as amended from time to time. After release, the shares (net of deductions for tax) are subject to an additional holding period (currently minimum of six months, increasing to one year for the 2017 performance year).

Awards are subject to malus provisions which enable the Committee to reduce the vesting level of awards (including to nil) and once vested, awards are subject to clawback provisions (as described above).

In the event of a takeover or other major corporate event (but excluding an internal reorganisation of the Group), the Committee has absolute discretion to

determine whether all outstanding awards vest subject to the achievement of any performance conditions. The Committee has discretion to apply a pro-rata reduction to reflect the unexpired part of the vesting period. The Committee may also determine that participants may exchange awards for awards over shares in an acquiring company with the agreement of that company. In the event of an internal reorganisation, the Committee may determine that outstanding awards will be exchanged for equivalent awards in another company.

Repatriation

Except in the case of gross misconduct or resignation, where an executive Director has been relocated at the commencement of employment, the Company may pay for the executive Director's repatriation costs in line with Barclays' general employee mobility policy including temporary accommodation, payment of removal costs and relocation flights for the executive Director, spouse and children. The Company will pay the executive Director's tax on the relocation costs but will not tax equalise and will also not pay tax on his or her other income relating to the termination of employment.

Other

Except in the case of gross misconduct or resignation, the Company may pay for the executive Director's legal fees and tax advice relating to the termination of employment and provide outplacement services. The Company may pay the executive Director's tax on these particular costs.

Governance: Remuneration report

[Directors remuneration policy](#)

Illustrative scenarios for executive Directors remuneration

The charts below show the potential value of the current executive Directors' 2017 total remuneration under the new DRP in three scenarios: Minimum (i.e. Fixed Pay, Pension and benefits), Maximum (i.e. Fixed Pay, Pension, benefits and the maximum variable pay that may be awarded) and Mid-point (i.e. Fixed Pay, Pension, benefits and 50% of the maximum variable pay that may be awarded). For the purposes of these charts, the value of benefits is based on an estimated annual value for 2017. The scenarios do not reflect share price movement between award and vesting.

A significant proportion of the potential remuneration of the executive Directors is variable and is therefore performance-related. It is also subject to deferral, additional holding periods, malus and clawback.

Total remuneration opportunity: Group Chief Executive (£m)

Total remuneration opportunity: Group Finance Director (£m)

In the above illustrative scenarios, benefits include regular contractual benefits. Additional ad hoc benefits may arise, for example, overseas relocation of executive Directors, but will always be provided in line with the DRP.

Remuneration policy for non-executive Directors

This section provides details of the remuneration policy for the Chairman and non-executive Directors.

Element and purpose	Operation	Maximum value
<p>Fees</p> <p>Reflect individual responsibilities and membership of Board Committees and are set to attract non-executive Directors who have relevant skills and experience to oversee the implementation of our strategy</p>	<p>The Chairman and Deputy Chairman are paid an all-inclusive fee for all Board responsibilities. The Chairman has a minimum time commitment equivalent to at least 80% of a full-time role. The other non-executive Directors receive a basic Board fee, with additional fees payable where individuals serve as a member or Chairman of a Committee of the Board.</p>	<p>Fees are reviewed against those for non-executive Directors in companies of similar size and complexity. Other than in exceptional circumstances, fees will not increase by more than 20% above the current fee levels during this policy period (basic fees last increased in 2011).</p>
<p>Fees are set at a level which reflects the role, responsibilities and time commitment which are expected from the Chairman, Deputy Chairman and non-executive Directors</p>	<p>Fees are reviewed each year by the Board as a whole.</p> <p>£30,000 (Chairman: £100,000) after tax and national insurance contributions per annum of each non-executive Director s basic fee is used to purchase Barclays shares which are retained on the non-executive Director s behalf until they retire from the Board.</p>	
	<p>Some non-executive Directors may also receive fees as directors of subsidiary companies of Barclays PLC. In the case of certain subsidiary appointments, such additional remuneration is approved by the Board Nominations Committee.</p>	

Benefits

The Chairman is provided with private medical cover subject to the terms of the Barclays scheme rules from time to time, and is provided with the use of a Company vehicle and driver when required for business purposes.

Benefits which are minor in nature and in any event do not exceed a cost of £500 may be provided to non-executive Directors in specific circumstances.

Non-executive Directors are not eligible to join Barclays pension plans.

Expenses

The Chairman and non-executive Directors are reimbursed for any reasonable and appropriate expenses incurred for business reasons. Any tax that arises on these reimbursed expenses is paid by Barclays.

Bonus and share plans

The Chairman is required to be eligible to participate in HMRC employee tax advantaged share schemes, due to his 80% of a full-role time commitment, but has opted not to participate. The Chairman is not eligible to participate in any other Barclays cash, share or long-term incentive plans.

All other non-executive Directors are not eligible to participate in Barclays cash, share or long-term incentive plans.

Notice and termination provisions

Each non-executive Director's appointment is for an initial six year term, renewable at Barclays discretion for a single term of three years thereafter and subject to annual re-election by shareholders.

Notice period

Chairman: 12 months from the Company (six months from the Chairman).
Non-executive Directors: six months from the Company (six months from the non-executive Director).

Termination payment policy

Edgar Filing: BARCLAYS PLC - Form 6-K

The Chairman's appointment may be terminated by Barclays on 12 months' notice or immediately in which case 12 months' fees and contractual benefits are payable in instalments at the times they would have been received had the appointment continued, but subject to mitigation if he or she were to obtain alternative employment. There are similar termination provisions for non-executive Directors based on 6 months' fees. No continuing payments of fees (or benefits) are due if a non-executive Director is not re-elected by shareholders at the Barclays AGM.

In accordance with the policy table above, any new Chairman and Deputy Chairman would be paid an all-inclusive fee only and any new non-executive Director would be paid a basic fee for their appointment as a non-executive Director, plus fees for their participation on and/or chairing of any Board committees, time apportioned in the first year as necessary. No sign-on payments are offered to non-executive Directors.

Governance: Remuneration report

[Directors remuneration policy](#)

Service contracts and letters of appointment

All executive Directors have a service contract whereas all non-executive Directors have a letter of appointment. Copies of the service contracts and letters of appointment respectively are available for inspection at the Company's registered office. The dates of the current Directors' service contracts and letters of appointment are shown in the table below.

	Effective date
Chairman	
John McFarlane	1 January 2015 (non-executive Director), 24 April 2015 (Chairman)
Executive Directors	
Jes Staley	1 December 2015
Tushar Morzaria	15 October 2013
Non-executive Directors	
Michael Ashley	18 September 2013
Tim Breedon	1 November 2012
Mary Francis	1 October 2016
Crawford Gillies	1 May 2014
Sir Gerry Grimstone	1 January 2016
Reuben Jeffery III	16 July 2009
Dambisa Moyo	1 May 2010
Diane de Saint Victor	1 March 2013
Diane Schueneman	25 June 2015
Steve Thieke	7 January 2014

All Directors are put forward for re-election at each AGM, unless they have indicated that they will not seek re-election at the AGM.

Discretion

In addition to the various operational discretions that the Committee can exercise in the performance of its duties (including those discretions set out in the Company's share plans), the Committee reserves the right to make either minor or administrative amendments to the policy to benefit its operation or to make more material amendments in order to comply with new laws, regulations and/or regulatory guidance. The Committee would only exercise this right if it believed it was in the best interests of the Company to do so and where it is not possible, practicable or proportionate to seek or await shareholder approval in General Meeting.

Governance: Remuneration report

[Annual report on Directors remuneration](#)

This section explains how our Directors remuneration policy was implemented during 2016.

Executive Directors

Executive Directors: Single total figure for 2016 remuneration (audited)

The following table shows a single total figure for 2016 remuneration in respect of qualifying service for each executive Director together with comparative figures for 2015.

	Salary		Role Based Pay		Taxable benefits		Annual bonus		LTIP		Pension	
	£000		£000		£000		£000		£000		£000	
	2016	2015	2016	2015	2016	2015	2016	2015	2016	2015	2016	2015
Jes Staley ^a	1,200	100	1,150	96	169	48	1,318				396	33
Tushar Morzaria	800	800	750	750	44	82	854	701	1,008		200	200
Note												

a The 2015 figures for Jes Staley relate to the period from 1 December 2015 when he joined the Board as Group Chief Executive.

Additional information in respect of each element of pay for the executive Directors (audited)

Salary

Jes Staley has been paid a salary of £1,200,000 per annum since his appointment to the Group Chief Executive role on 1 December 2015. Tushar Morzaria was paid a salary of £800,000 per annum as Group Finance Director.

Role Based Pay (RBP)

Executive Directors received RBP which was delivered quarterly in shares, subject to a holding period with restrictions lifting over five years (20% each year). The value shown is of shares at the date awarded.

Taxable benefits

Taxable benefits include private medical cover, life and ill health income protection, tax advice, relocation, car allowance, the use of a Company vehicle and driver when required for business purposes and other benefits that are considered minor in nature.

Annual bonus

Annual bonuses are discretionary and are typically awarded in Q1 following the financial year to which they relate. The Committee considered the executive Directors' performance against the financial (50% weighting) and Balanced Scorecard (35% weighting) performance measures which had been set to reflect strategic priorities for 2016. Performance against their individual personal objectives (15% weighting) was assessed on an individual basis.

2016 annual bonus outcomes

Financial (50% weighting)

The approach taken to assessing financial performance against each of the financial measures is based on a straight-line outcome between 25% for threshold performance and 100% applicable to each measure for achievement of maximum performance.

The formulaic outcome from 2016 performance against the financial measures gave a total of 29% out of 50% being payable attributable to those measures. A summary of the assessment is provided in the following table.

Financial

performance measure	Weighting	Threshold 25%	Maximum 100%	2016 Actual	2016 Outcome
Profit before tax (excluding notable items)	20%	£3.45bn	£4.20bn	£3.65bn	9%
Costs (excluding notable items)	10%	£14.6bn	£13.7bn	£15.3bn	0%
CET1 ratio	20%	11.1%	11.6%	12.4%	20%
Total Financial	50%				29%

When reflecting upon the appropriate 2016 bonus, the Committee considered the impact of the deferral changes on the formulaic outcomes against the financial measures. In particular, the Committee noted that while the decision to accelerate the deferral charges would improve the Group's operational flexibility going into 2017 and beyond, it would also lead to a lower 2016 bonus outcome than could have been justified absent the changes. However, on balance, the Committee felt that the overall outcomes were appropriate particularly given the ongoing focus to rebalance towards improving shareholder returns.

Balanced Scorecard (35% weighting)

Progress in relation to each of the 5Cs of the Balanced Scorecard was assessed by the Committee. The Committee took a similar approach as for 2015 i.e. based on a three-point scale in relation to each measure, with 0% to 2% for below target, 3% or 4% for a met target, and 5% to 7% for above target progress against a particular Balanced Scorecard component.

Governance: Remuneration report

Annual report on Directors remuneration

Based on this approach to assessing performance against 2016 Balanced Scorecard milestones, the Committee agreed a 18% outcome out of a maximum of 35%. A summary of the assessment is provided in the following table. Further details in respect of performance in each category can be found on pages 16 to 17.

Balanced Scorecard	5Cs	Weighting	Metric	2016		2016
				Target	Actual	Outcome out of maximum
Customer and Client		7%	PCB, Barclaycard and Africa Banking weighted	4th	4th	4%
Colleague		7%	average ranking of RNPS v peer sets Client Franchise Risk Sustained engagement of colleagues score	6th 77-79%	5th 75%	3%
Citizenship		7%	% women in senior leadership Citizenship Plan initiatives on track or ahead	24%	24%	5%
Conduct		7%	Conduct Reputation (YouGov Survey)	5.5-5.6/10	5.4/10	2%
Company ^a		7%	Return on tangible equity ^b Cost: Income ratio ^{b,c} CET1 ratio	4.8% 70% 11.3%	4.4% 72% 12.4%	4%
Total Balanced Scorecard		35%				18%

Notes

^a Company metrics have been updated to reflect the 1 March 2016 strategy announcement.

^b Excluding notable items.

^c

Cost:Income ratio expressed as total operating expenses of the Group, including Africa, divided by the total income of these businesses.

Individual outcomes including assessment of personal objectives

Performance against each of the executive Directors' individual personal objectives (15% weighting overall) was assessed by the Committee on an individual basis.

(i) Jes Staley

A summary of the assessment for Jes Staley against his specific performance measures is provided in the following table.

Performance measure		Weighting	Outcome
Financial	See table on page 121	50%	29%
Balanced Scorecard – 5Cs	See table above	35%	18%
Personal objectives	Judgemental assessment – see below	15%	13%
Total		100%	60%

Final outcome approved by the Remuneration Committee

60%

The Committee assessed Jes Staley's performance against his 2016 personal objectives (as set out on page 97 of the 2015 Annual Report) and concluded that Jes Staley had delivered a very strong performance throughout the year. By the end of 2016, a clear new strategy was firmly embedded and a new Core organisational structure consistent with structural reform has been implemented. The Core businesses have performed well, delivering improved profitability and cost income efficiency. At the same time significant progress has been made in exiting the Non-Core businesses. Jes Staley has demonstrated strong leadership, strengthened the management team and has instilled a more effective performance ethic and culture within the organisation. Given his very strong personal performance, the Committee judged that 13% of a maximum of 15% attributable to individual objectives was appropriate.

In aggregate, the performance assessment for Jes Staley resulted in an overall formulaic outcome of 60% of maximum bonus opportunity being achieved. The resulting 2016 bonus is £1,318,000 of which 70% is deferred under the Share Value Plan and will vest in five equal tranches from the third to seventh anniversary (subject to the rules of the Share Value Plan as amended from time to time).

(ii) Tushar Morzaria

A summary of the assessment for Tushar Morzaria against his specific performance measures is provided in the following table.

Performance measure		Weighting	Outcome
Financial	See table on page 121	50%	29%
Balanced Scorecard – 5Cs	See table above	35%	18%
Personal objectives	Judgemental assessment – see below	15%	14%
Total		100%	61%

Final outcome approved by the Remuneration Committee

61%

The Committee assessed Tushar Morzaria's performance against his 2016 personal objectives (as set out on page 97 of the 2015 Annual Report) and concluded that Tushar Morzaria had delivered an outstanding performance in 2016. In doing so, the Committee noted the role provided by Tushar Morzaria in reshaping the business and, in particular, recognised his contribution in the significant progress in exiting Non-Core, resulting in a reduction of £22bn in Risk

Weighted Assets and his focus in delivering an organisation with a significantly higher CET1 ratio and lower Cost:Income ratio. In doing so, it was also noted that Tushar Morzaria has continued to develop very strong working relationships with shareholders, investors and regulators, while also improving the performance delivery within the Finance Functions. Given his exceptional personal performance during 2016, the Committee judged that 14% of a maximum of 15% attributable to individual objectives was appropriate.

In aggregate, the performance assessment for Tushar Morzaria resulted in an overall formulaic outcome of 61% of maximum bonus opportunity being achieved. The resulting 2016 bonus is £854,000 of which 60% is deferred under the Share Value Plan and will vest in five equal tranches from the third to seventh anniversary (subject to the rules of the Share Value Plan as amended from time to time).

All shares (whether deferred or not) are subject to a further six month holding period from the point of release. 2016 bonuses are subject to clawback provisions and, additionally, unvested deferred 2016 bonuses are subject to malus provisions which enable the Committee to reduce the vesting level of deferred bonuses (including to nil).

LTIP

The LTIP amount included in Tushar Morzaria's 2016 single total figure is the value of the amount scheduled to be released in relation to the LTIP award granted in 2014 in respect of performance period 2014-2016 (by reference to Q4 2016 average share price). As Jes Staley was not a participant in this cycle, the LTIP figure in the single figure table is zero for him. Release is dependent on, among other things, performance over the period from 1 January 2014 to 31 December 2016. Straight-line vesting applied between the threshold and maximum points in respect of the RoRWA and loan loss rate measures. The performance achieved against the performance targets is as follows.

Performance measure	Weighting	Threshold	Maximum vesting	Actual	% of award vesting
Return on risk weighted assets (RoRWA)	50%	23% of award vests for average annual RoRWA of 1.08%	Average annual RoRWA of 1.52%	0.33%	0%
Loan loss rate	20%	7% of award vests for average annual loan loss rate of 70bps	Average annual loan loss rate of 55bps or below	50bps	20%
Balanced Scorecard	30%	Performance against the Balanced Scorecard was assessed by the Committee to determine the percentage of the award that may vest between 0% and 30%. Each of the 5Cs in the Balanced Scorecard has equal weighting.		See below	14%
Total					34%

A summary of the Committee's assessment against the Balanced Scorecard performance measure over the three year performance period is provided below.

		Vesting out of maximum 6% for each C
Category	Performance	
Customer and Client	<p>§ Net Promoter Score (NPS) performance against peers was 4th during the period. Across key product categories, notably UK current accounts and UK credit cards, Barclays NPS scores have improved with more customers advocating our brands.</p> <p>§ Client Franchise Rank remained stable at 5th rank throughout the period, a positive result given the shift in strategy to focus on geographies and businesses of strength in the Investment Bank.</p>	3%
Colleague	<p>§ Continued improvement in the female representation across our senior leadership, rising from 22% in 2014 to 24% at the end of 2016.</p> <p>§ Colleague engagement improved from 72% in 2014 to 75% overall in 2016, a positive result in light of the change the organisation has undergone over the period.</p>	3%
Citizenship	<p>§ Continuing on from the successful Citizenship Plan, which closed 2015 with 10 out of 11 initiatives on or ahead of target, Barclays Group (ex Africa) exceeded objectives on all 6 initiatives in the first year of the Shared Growth Ambition.</p> <p>§ Barclays Africa also delivered strong performance on investment in education and SME financing, both of which were on track for 2016. Two objectives were off-track due to external challenges which impacted the delivery of planned employability and financial inclusion interventions (although foundations are now established which will enable strong 2017 momentum).</p>	4%
Conduct	<p>§ Conduct Reputation, as measured by the YouGov survey, remained at or below 5.4 over the period.</p> <p>§ However, new conduct items and costs have reduced.</p>	1%
Company	<p>§ The CET1 ratio has strengthened significantly over the period, to 12.4% at the end of 2016.</p> <p>§ However, returns excluding notable items (both RoE and RoTE) were below target through much of the period.</p>	3%
Total		14%

The LTIP award is also subject to a discretionary underpin whereby the Committee must be satisfied with the underlying financial health of the Group based on profit before tax. The Committee was satisfied that this underpin was met, and accordingly determined that the award should be considered for release to the extent of 34% of the maximum number of shares under the total award. The shares are scheduled to be released in March 2017. After release, the shares are subject to an additional two year holding period.

Pension

Executive Directors are paid cash in lieu of pension contributions. The cash allowance in 2016 was 33% of salary for Jes Staley and 25% of salary for Tushar Morzaria. No other benefits were received by the executive Directors from any Barclays pension plans.

Governance: Remuneration report

[Annual report on Directors remuneration](#)

Executive Directors: other LTIP awards

The Directors remuneration reporting regulations require inclusion in the single total figure of only the value of the LTIP awards whose last year of performance ends in the relevant financial year and whose vesting outcome is known. For 2016, this is the award to Tushar Morzaria under the 2014-2016 LTIP cycle and further details are set out on page 123. This section sets out other LTIP cycles in which the executive Directors participate, the outcome of which remains dependent on future performance.

LTIP awards to be granted during 2017

The Committee decided to make an award under the 2017-2019 LTIP cycle to Jes Staley and Tushar Morzaria (based on their performance in 2016) with a face value at grant of 120% of their respective Total fixed pay at 31 December 2016.

The 2017-2019 LTIP award will be subject to the following forward-looking performance measures.

Performance measure	Weighting	Threshold	Maximum vesting
Return on tangible equity (RoTE) excluding notable items	25%	6.25% of award vests for average RoTE excluding notable items of 7.5%	Average RoTE excluding notable items of 9.5%
		CET1 ratio must remain at or above an acceptable level for any of this element to vest. The threshold will be reviewed and set annually based on market conditions and regulatory requirements (11% on 31 December 2017)	
CET1 ratio as at 31 December 2019	25%	6.25% of award vests for CET1 ratio 100 basis points above the mandatory distribution restrictions hurdle (MDRH)	CET1 ratio 200 basis points above the MDRH
Cost:Income ratio excluding notable items	20%	5% of award vests for average Cost:Income ratio of 63%	Average Cost:Income ratio of 58%
Risk Scorecard	15%	The Risk Scorecard captures a range of risks and is aligned with the annual incentive risk adjustment framework agreed with the PRA.	

Strategic/Non-financial

15%

The current framework measures performance against three broad categories – Capital and Liquidity, Control Environment and Conduct using a combination of quantitative and qualitative metrics. The framework may be updated from time to time in line with the Group’s risk strategy. Specific targets within each of the categories are deemed to be commercially sensitive. Retrospective disclosure of performance will be made in the 2019 Remuneration report. As noted on page 18, the existing Balanced Scorecard has evolved into a Performance Measurement framework in line with the objective of delivering a simplified Barclays through the strategic actions announced in March 2016. The evaluation will focus on key performance measures (many continuing from the Balanced Scorecard), with a detailed retrospective narrative on progress throughout the period against each category. Performance against the Strategic/Non-financial measures will be assessed by the Committee to determine the percentage of the award that may vest between 0% and 15%. The measures are organised around three main categories: Customer and Client, Colleague and Citizenship. Each of the three main categories has equal weighting. Measures will likely include, but not be limited to, the following:

- § Customer and Client: NPS for consumer businesses, Client rankings and market shares for the Corporate and Investment Bank, complaints performance and volume of lending provided to customers and clients.
- § Colleague: Diversity and Inclusion statistics (including women in senior leadership), Employee sustainable engagement survey scores and conduct and culture measures.
- § Citizenship: Delivery against our Shared Growth Ambition, Colleague engagement in Citizenship activities and external benchmarks and surveys.

Straight-line vesting applies between the threshold and maximum points in respect of the financial measures. The award is subject to a discretionary underpin by which the Committee must be satisfied with the underlying financial health of the Group.

Outstanding LTIP awards

(i) LTIP awards granted during 2015

The performance measures for the awards made under the 2015-2017 LTIP cycle are shown below.

Performance measure	Weighting	Threshold	Maximum vesting
Net generated equity ^a	30%	7.5% of award vests for Net generated equity of £1,363m	Net generated equity of £1,844m
Core return on risk weighted assets (RoRWA) excluding own credit	20%	5% of award vests for average annual Core RoRWA of 1.34%	Average annual Core RoRWA of 1.81%

Edgar Filing: BARCLAYS PLC - Form 6-K

Non-Core drag on return on equity (RoE) excluding notable items	10%	2.5% of award vests for Non-Core drag on RoE of 4.02%	Non-Core drag on RoE of 2.97%
Loan loss rate	10%	2.5% of award vests for average annual loan loss rate of 70bps	Average annual loan loss rate of 55bps or below
Balanced Scorecard	30%	Performance against the Balanced Scorecard is assessed by the Committee to determine the percentage of the award that may vest between 0% and 30%. Each of the 5Cs in the Balanced Scorecard has equal weighting. The targets within each of the 5Cs are deemed to be commercially sensitive. However, retrospective disclosure of the targets and performance against them will be made in the 2017 Remuneration report subject to commercial sensitivity no longer remaining.	

Note

a Net generated equity is a metric which converts changes in the CET1 ratio into an absolute capital equivalent measure. For remuneration purposes, net generated equity will exclude inorganic actions such as rights issues, as determined by the Committee.

Straight-line vesting applies between the threshold and maximum points in respect of the financial and risk measures. The award is subject to a discretionary underpin by which the Committee must be satisfied with the underlying financial health of the Group.

(ii) LTIP awards granted during 2016

An award was made to Tushar Morzaria on 14 March 2016 under the 2016-2018 LTIP cycle at a share price on the date of grant of £1.6535, in accordance with our Directors' remuneration policy. This is the price used to calculate the face value below. Jes Staley was not eligible for a grant under the 2016-2018 LTIP cycle.

	% of fixed pay	Number of shares	Face value at grant	Performance period
Tushar Morzaria	120%	1,270,033	£2,100,000	2016-2018

The performance measures for the 2016-2018 LTIP awards are as follows:

Performance measure	Weighting	Threshold	Maximum vesting
Return on tangible equity (RoTE) excluding notable items	25%	6.25% of award vests for average RoTE of 7.5% CET1 ratio must remain at or above an acceptable level for any of this element to vest. The threshold will be reviewed and set annually based on market conditions and regulatory requirements (11% on 31 December 2017)	Average RoTE of 10.0%
CET1 ratio as at 31 December 2018	25%	6.25% of award vests for CET1 ratio of 11.6%	CET1 ratio of 12.7%
Cost:Income ratio excluding notable items	20%	5% of award vests for average Cost:Income ratio of 66%	Average Cost:Income ratio of 58%
Risk Scorecard	15%	Performance against the Risk Scorecard is assessed by the Committee, with input from the Group Risk function, Board Risk Committee and Board Reputation Committee as appropriate, to determine the percentage of the award that may vest between 0% and 15%. The Risk Scorecard measures performance against three broad categories – Risk Profile (including Conduct), Control Environment and Risk Capability – using a combination of quantitative and qualitative metrics. Specific targets within each of the categories are deemed to be commercially sensitive. Retrospective disclosure of performance will be made in the 2018 Remuneration report subject to commercial sensitivity no longer remaining.	
Balanced Scorecard	15%		

Edgar Filing: BARCLAYS PLC - Form 6-K

Performance against the Balanced Scorecard is assessed by the Committee to determine the percentage of the award that may vest between 0% and 15%. Each of the 5Cs in the Balanced Scorecard has equal weighting. Assessment will be made against progress towards the 2018 targets.

Straight-line vesting applies between the threshold and maximum points in respect of the financial measures. The award is subject to a discretionary underpin by which the Committee must be satisfied with the underlying financial health of the Group.

Executive Directors: Statement of implementation of remuneration policy in 2017

The executive Directors' package for 2017, in line with the new DRP, will be implemented with effect from the 2017 AGM as follows:

	Jes Staley	Tushar Morzaria	Comments
Fixed Pay	£2,350,000	£1,650,000	Fixed Pay replaces salary and Role Based Pay. Fixed Pay delivered 50% in cash and 50% in shares (subject to 5 year holding period lifting pro rata).
			No change in Fixed Pay from 2016 for Jes Staley.
			Fixed Pay has increased to £1,650,000 from £1,550,000 for Tushar Morzaria.
Pension	£396,000	£200,000	No change from 2016.
Maximum Bonus	80% of Total fixed pay ^a	80% of Total fixed pay ^a	Total variable opportunity unchanged.
			Bonus and LTIP combined for regulatory deferral purposes.
Maximum LTIP	120% of Total fixed pay ^a	120% of Total fixed pay ^a	

Note:

Edgar Filing: BARCLAYS PLC - Form 6-K

a Total fixed pay is defined as Fixed Pay plus Pension.

In considering the appropriate level of Tushar Morzaria's Total fixed pay (Fixed Pay plus Pension), the Committee took account of the time he has been in role without any increase (over three years), his strong performance and importance to the organisation, and industry market rates for the role. The Committee concluded that an increase of 5.7%, being less than the increase paid to UK employees over the same period, was warranted but agreed that the executive Directors would not be eligible for any further increase in the next three years (i.e. during the new policy period).

Governance: Remuneration report

[Annual report on Directors remuneration](#)

Clawback and malus

Barclays may apply clawback if at any time during the seven year period from the date on which any variable remuneration is awarded: (i) there is reasonable evidence of individual misbehaviour or material error, and/or (ii) the firm suffers a material failure of risk management, taking account of the individual's proximity to, and responsibility for, that incident. For variable remuneration awards granted to executive Directors in respect of 2016 onwards, the clawback period may be extended to 10 years in circumstances where the Company or a regulatory authority has commenced an investigation which could potentially lead to the application of clawback.

Malus provisions will continue to apply to unvested deferred awards.

Deferral

A seven year deferral period (with no vesting prior to the third anniversary of award, and vesting in equal tranches between the third and seventh year) will apply to any 2017 deferred variable remuneration awarded to the executive Directors.

2017 Annual bonus performance measures

Performance measures with appropriately stretching targets have been selected to cover a range of financial and non-financial goals that support the key strategic objectives of the Company. The performance measures and weightings are shown below.

Financial (60% weighting) § Profit before tax excluding notable items (22.5% weighting)

§ Cost:Income ratio excluding notable items (15% weighting)

A performance target range has been set for each financial measure.

§ CET1 ratio (22.5% weighting)

Edgar Filing: BARCLAYS PLC - Form 6-K

Strategic/Non-financial
(20% weighting)

§ As noted on page 18, the existing Balanced Scorecard has evolved into a Performance Measurement framework in line with the objective of delivering a simplified Barclays through the strategic actions announced in March 2016. Enhancements to the available sources of management information and reporting, ranging from internal dashboards to external third party measures, allow for a more holistic view of sustainable business performance, rather than focusing on a few narrowly defined targets. The evaluation will focus on key performance measures (many continuing from the Balanced Scorecard), with a detailed retrospective narrative on progress throughout the period against each category.

§ Performance against the Strategic/Non-financial measures will be assessed by the Committee to determine the percentage of the award that may vest between 0% and 20%. The measures are organised around three main categories: Customer and Client, Colleague and Citizenship. Each of the three main categories has equal weighting. Measures will likely include, but not be limited to, the following:

Customer and Client: NPS for consumer businesses, Client rankings and market shares for the Corporate and Investment Bank, complaints performance and volume of lending provided to customers and clients.

Colleague: Diversity and Inclusion statistics (including women in senior leadership), Employee sustainable engagement survey scores and conduct and culture measures.

Citizenship: Delivery against our Shared Growth Ambition, Colleague engagement in Citizenship activities and external benchmarks and surveys.

Personal (20% weighting) The executive Directors have the following joint personal objectives for 2017:

§ deliver on 2017 financial commitments including continued improvement in RoTE, Cost:Income ratio and continued build-up of our capital base (CET1 ratio)

§ exit Non-Core and ensure successful reintegration of remaining assets/businesses into Core

§ achieve the sell-down of Barclays Africa Group Ltd to obtain accounting deconsolidation

Edgar Filing: BARCLAYS PLC - Form 6-K

§ ensure successful implementation of the 2017 Structural Reform programme, including creation of the Service Company

§ identify and implement as far as possible in 2017 a structural solution to ensure continued access to the single market in Europe

§ manage risk and control effectively and make continued progress in resolving legacy conduct and litigation matters.

In addition, individual personal objectives for 2017 are as follows:

Jes Staley:

§ make continued progress towards a high performing culture in line with our Values while also strengthening employee engagement

§ improve customer and client satisfaction while reducing the number of overall complaints

§ strengthen succession planning pipeline for Group and Business Unit/Functional Executive Committees and continue to improve percentage of women in senior leadership positions

§ improve the Group's control environment and its operations and technology infrastructure.

Tushar Morzaria:

§ demonstrate effective management of external relationships and reputation

§ continue to strengthen team performance, talent pipeline and employee engagement in Group Finance, Tax and Treasury.

Detailed calibration of the Financial and Strategic targets is commercially sensitive and it is not appropriate to disclose this information externally on a prospective basis. Disclosure of achievement will be made in the 2017 Annual Report subject to the targets no longer being commercially sensitive. The Committee may exercise its discretion to amend the formulaic outcome of assessment against the targets. Any exercise of discretion will be disclosed and explained.

Performance graph and table

The performance graph below illustrates the performance of Barclays over the financial years from 2009 to 2016 in terms of total shareholder return compared with that of the companies comprising the FTSE 100 index. The index has been selected because it represents a cross-section of leading UK companies.

In addition, the table below provides a summary of the total remuneration of the relevant Group Chief Executive over the same period as the previous graph. For the purpose of calculating the value of the remuneration of the Group Chief Executive, data has been collated on a basis consistent with the single figure methodology.

Year	2009	2010	2011	2012	2012	2013	2014	2015	2015
Group Chief Executive	John Varley	John Varley	Bob Diamond	Bob Diamond ^a	Antony Jenkins ^b	Antony Jenkins	Antony Jenkins	Antony Jenkins ^b	John McFarlane ^c
Group Chief Executive single figure of total remuneration £000s	2,050	4,567	11,070 ^e	1,892	529	1,602	5,467 ^f	3,399	305
Annual bonus against maximum opportunity %	0%	100%	80%	0%	0%	0%	57%	48%	N/A
Long-term incentive vesting against maximum opportunity %	50%	16%	N/A ^g	0%	N/A ^g	N/A ^g	30%	39%	N/A ^g
Notes									

a Bob Diamond left the Board on 3 July 2012.

b Antony Jenkins became Group Chief Executive on 30 August 2012 and left the Board on 16 July 2015.

c John McFarlane was Executive Chairman from 17 July 2015 to 30 November 2015. His fees, which remained unchanged, have been pro-rated for his time in the position. He was not eligible to receive a bonus or LTIP.

d Jes Staley became Group Chief Executive on 1 December 2015.

e This figure includes £5,745k tax equalisation as set out in the 2011 Remuneration report. Bob Diamond was tax equalised on tax above the UK rate where that could not be offset by a double tax treaty.

f Antony Jenkins 2014 pay is higher than in earlier years since he declined a bonus in 2012 and 2013 and did not have LTIP vesting in those years.

g Not a participant in a long-term incentive award which vested in the period.

Percentage change in Group Chief Executive s remuneration

The table below shows how the percentage change in the Group Chief Executive s salary, benefits and bonus between 2015 and 2016 compares with the percentage change in the average of each of those components of pay for UK based employees.

	Fixed Pay	Benefits	Annual bonus
Group Chief Executive ^a	0%	118% ^b	N/A ^c
Average based on UK employees ^d	3.6%	No change	(0.1)%

Notes

a The 2015 figures for the Group Chief Executive are based on the Group Chief Executive, Jes Staley, and are annualised in order to provide a meaningful comparison of the year on year change in remuneration for the Group Chief Executive and UK based employees.

b The percentage increase in benefits for the Group Chief Executive arises primarily as a result of relocation provided in 2016.

c The Group Chief Executive did not receive an annual bonus in 2015.

d Certain populations were excluded to enable a meaningful like for like comparison.

We have chosen UK based employees as the comparator group as it is the most representative group for pay structure comparisons.

Relative importance of spend on pay

A year on year comparison of Group compensation costs and distributions to shareholders is shown below.

Note

a 2015 Group compensation costs have been adjusted to exclude the impact of £429m gain on valuation of a component of the defined benefit liability.

Total	2,626	2,966	1	17	2,627	2,983

Non-executive Directors are reimbursed expenses that are incurred for business reasons. Any tax that arises on these reimbursed expenses is paid by Barclays.

The Chairman is provided with private medical cover and the use of a Company vehicle and driver when required for business purposes.

Notes

Edgar Filing: BARCLAYS PLC - Form 6-K

- a John McFarlane joined the Board as a non-executive Director with effect from 1 January 2015 and as Chairman from 24 April 2015. The 2015 total includes non-executive Director fees of £78,000 for the period from 1 January 2015 to 24 April 2015.
- b Sir David Walker retired from the Board with effect from 23 April 2015.
- c Mary Francis joined the Board as a non-executive Director with effect from 1 October 2016.
- d Sir Gerry Grimstone joined the Board as a non-executive Director from 1 January 2016 and succeeded Sir Michael Rake as Senior Independent Director and Deputy Chairman with effect from 1 January 2016.
- e Wendy Lucas-Bull retired from the Board with effect from 1 March 2016. Figures include fees received by Wendy Lucas-Bull for her role as Chairman of Barclays Africa Group Limited.
- f Frits van Paasschen retired from the Board with effect from 28 April 2016.
- g Diane Schueneman joined the Board as a non-executive Director with effect from 25 June 2015.
- h Diane Schueneman and Steve Thieke both served in 2016 on the US Governance Review Board, which was an advisory board set up as the forerunner of the board of our US intermediate holding company which was established during 2016. They each subsequently joined the board of the US intermediate holding company on its formation. The 2015 figures for Diane Schueneman and Steve Thieke included fees of \$37,500 and \$75,000 respectively for their roles on the US Governance Review Board. The 2016 figures include fees of \$138,000 and \$150,000 respectively for their roles on the US Governance Review Board and the board of the US intermediate holding company. In addition, Steve Thieke waived fees of \$63,000.
- i Sir Michael Rake retired from the Board with effect from 31 December 2015.
- j Sir John Sunderland retired from the Board with effect from 23 April 2015.

Chairman and non-executive Directors: Statement of implementation of remuneration policy in 2017

2017 fees, subject to annual review in line with policy, for the Chairman and non-executive Directors are shown below.

	1 January 2017	1 January 2016	Percentage
	£000	£000	Increase
Chairman ^a	800	800	0
Deputy Chairman ^a	250	250	0
Board member	80	80	0
Additional responsibilities			
Senior Independent Director	30	30	0
Chairman of Board Audit or Board Remuneration Committee	70	70	0
Chairman of Board Risk Committee	70	60	17
Chairman of Board Reputation Committee	50	50	0
Membership of Board Audit or Board Remuneration Committee	30	30	0
Membership of Board Reputation or Board Risk Committee	25	25	0
Membership of Board Nominations Committee	15	15	0
Notes			

a The Chairman and Deputy Chairman do not receive any other additional responsibility fees in addition to the Chairman and Deputy Chairman fees respectively.

b The basic fee payable to non-executive Directors was last increased in May 2011. Some revisions have been made to the additional fees payable to Board Committee Chairman to reflect time commitment and responsibilities.

Payments to former Directors

Former Group Chief Executive: Antony Jenkins

Antony Jenkins continued to receive base salary, RBP, benefits and pension allowance until 7 July 2016 (the Termination Date). Full details of his eligibility to variable pay were disclosed in the 2015 Directors Remuneration report (page 101 of the 2015 Annual Report).

Former Group Finance Director: Chris Lucas

In 2016, Chris Lucas continued to be eligible to receive life assurance cover, private medical cover and payments under the Executive Income Protection Plan (EIPP). Full details of his eligibility under the EIPP were disclosed in the 2013 Directors Remuneration report (page 115 of the 2013 Annual Report). Chris Lucas did not receive any other payment or benefit in 2016.

Directors shareholdings and share interests

Executive Directors shareholdings and share interests (audited)

The chart below shows the value of Barclays shares held beneficially by Jes Staley and Tushar Morzaria as at 20 February 2017 that count towards the shareholding requirement of, as a minimum, Barclays shares worth four times salary. The current executive Directors have five years from their respective date of appointment to meet this requirement. At close of business on 20 February 2017, the market value of Barclays ordinary shares was £2.375.

Interests in Barclays PLC shares (audited)

The table below shows shares owned beneficially by all the Directors and shares over which executive Directors hold awards which are subject to either deferral terms and/or performance measures. The shares shown below, that are subject to performance measures, are based on the maximum number of shares that may be released.

Owned outright	Unvested	Total as at	Total as at
	Not subject to performance measures	31 December 2016 (or date of retirement)	20 February 2017
	Subject to performance

Steve Thieke	55,073			55,073	55,073
Notes					

a Mary Francis joined the Board as a non-executive Director with effect from 1 October 2016.

b Wendy Lucas-Bull retired from the Board as a non-executive Director with effect from 1 March 2016.

c Frits van Paasschen retired from the Board as a non-executive Director with effect from 28 April 2016.

Governance: Remuneration report

[Annual report on Directors remuneration](#)

Barclays Board Remuneration Committee

The Board Remuneration Committee is responsible for overseeing Barclays remuneration as described in more detail below.

Terms of Reference

The role of the Committee is to:

§ set the overarching principles and parameters of remuneration policy across the Group

§ consider and approve the remuneration arrangements of (i) the Chairman, (ii) the executive Directors, (iii) members of the Barclays Group Executive Committee and any other senior executives specified by the Committee from time to time, and (iv) all other Group employees whose total annual compensation exceeds an amount determined by the Committee from time to time (currently £2m)

§ exercise oversight for remuneration issues.

The Committee considers all aspects of the design and operation of remuneration policy to ensure a coherent approach is taken in respect of all employees. In discharging this responsibility the Committee seeks to ensure that the policy assesses, among other things, the impact of pay arrangements on culture and all elements of risk management. The Committee also approves incentive pools for all major businesses and functions, regularly reviews the design and provision of retirement benefits, and considers and approves measures designed to promote the alignment of the interests of shareholders and employees. The Committee and its members work as necessary with other Board Committees, and is authorised to select and appoint its own advisers as required.

The Terms of Reference can be found at home.barclays/corporategovernance or from the Company Secretary on request.

Chairman and members

The Chairman and members of the Committee are as follows:

Edgar Filing: BARCLAYS PLC - Form 6-K

§ Crawford Gillies, Committee member since 1 May 2014 and Chairman since 24 April 2015

§ Tim Breedon, Committee member since 1 December 2012

§ Mary Francis, Committee member since 1 November 2016

§ Dambisa Moyo, Committee member since 1 September 2015.

Former member

Steve Thieke left the Committee on 1 March 2016 having been a Committee member since 6 February 2014.

All current members are considered independent by the Board.

Remuneration Committee attendance in 2016

	Number of meetings eligible to attend	Number of meetings attended
Crawford Gillies	9	9
Tim Breedon	9	8
Mary Francis	2	2
Dambisa Moyo	9	9
Steve Thieke	3	3

The performance of the Committee is reviewed each year as part of the Board Effectiveness Review. The December 2016 review concluded that Board members have full confidence in the effectiveness and thoroughness of the Committee. Full details of the Board Effectiveness review can be found on page 81.

Advisers to the Remuneration Committee

Until February 2016, the Committee was advised by Willis Towers Watson. The Committee is satisfied that the advice provided by Willis Towers Watson to the Committee was independent and objective. Willis Towers Watson is a signatory to, and its appointment as adviser to the Committee was conditional on adherence to, the voluntary UK Code of Conduct for executive remuneration consultants.

During the rest of 2016, the Committee decided not to engage an independent adviser but Willis Towers Watson continued to provide the Committee with market data on compensation when considering incentive levels and remuneration packages.

Fees for the Committee work were charged on a time/cost basis and Willis Towers Watson was paid a total of £48,000 (excluding VAT) in fees for its advice to the Committee in 2016 relating to the executive Directors (either exclusively or along with other employees within the Committee's Terms of Reference).

Willis Towers Watson also provides pensions advice, advice on health and benefits provision, assistance and technology support for employee surveys and performance management, and remuneration data to the Group. Willis Towers Watson also provides pensions advice and administration services to the Barclays Bank UK Retirement Fund.

Edgar Filing: BARCLAYS PLC - Form 6-K

In the course of its deliberations, the Committee also considers the views of the Group Chief Executive, Group Human Resources Director and the Group Reward and Performance Director. The Group Finance Director and Chief Risk Officer provide regular updates on Group and business financial performance and the Group's risk profile respectively.

No Barclays employee or Director participates in discussions with, or decisions of, the Committee relating to his or her own remuneration. No other advisers provided significant services to the Committee in the year.

Remuneration Committee activities in 2016

The following provides a summary of the Committee's activities during 2016 and at the January and February 2017 meetings at which 2016 remuneration decisions were finalised.

Meeting	Fixed and variable pay issues	Governance, risk and other matters
January 2016	§ 2015 incentive funding proposals	§ Finance and Risk updates
February 2016 (Two meetings)	§ Approved executive Directors and senior executives' 2016 fixed pay § Approved 2016 executive Directors' annual bonus performance measures § Approved Group fixed pay budgets for 2016 § Approved final 2015 incentive funding §	§ Approved 2015 Remuneration report § Finance and Risk updates including ex ante risk adjustment § Appointment of Committee independent adviser § Updates on headcount and employee attrition § Consideration of the outcomes of the 2015 Committee effectiveness review

Edgar Filing: BARCLAYS PLC - Form 6-K

[Analysis of material existing and emerging risks](#)

This section describes the material risks to which senior management pay particular attention, which they believe could cause the future results of the Group's operations, financial condition and prospects to differ materially from current expectations.

For more information about the major risk policies which underlie risk exposures, see the consolidated policy-based qualitative information in the Barclays PLC 2016 Pillar 3 Report. A summary of this information may also be found in this report in the Risk management section between pages 146 to 162.

Material existing and emerging risks

Material existing and emerging risks to the Group's future performance

This section describes the material risks to which senior management pay particular attention, which they believe could cause the future results of the Group's operations, financial condition and prospects to differ materially from current expectations. These expectations include the ability to pay dividends, maintain appropriate levels of capital and meet capital and leverage ratio targets, and achieve stated commitments as outlined in the Strategic Report. In addition, risks relating to the Group that are not currently known, or that are currently deemed immaterial, may individually or cumulatively have the potential to materially affect the future results of the Group's operations, financial condition and prospects.

Material risks and their impact are described below in two sections: i) risks which senior management believe are likely to affect more than one Principal Risk; and ii) risks which senior management believe are likely to impact a single Principal Risk. An emerging risk is a risk that has the potential to have a significant detrimental effect on the Group's performance, but currently the outcome and the time horizon for the crystallisation of its possible impact is more uncertain and more difficult to predict than for other risk factors that are not identified as emerging risks. A revised ERMF was approved by the Board in December 2016. This includes a revised risk taxonomy comprising eight Principal Risks (Model Risk, Reputation Risk and Legal Risk were not previously classified as Principal Risks). Additional detail on ERMF and Principal Risks may be found on page 146.

Additional detail on the management of risks may be found in Barclays' Approach to Managing Risk in the Barclays PLC 2016 Pillar 3 Report.

Material existing and emerging risks potentially impacting more than one Principal Risk

i) Structural reform

The UK Financial Services (Banking Reform) Act 2013 (the UK Banking Reform Act) and associated secondary legislation and regulatory rules, require all UK deposit-taking banks with over £25bn of deposits (from individuals and small businesses) to separate certain day-to-day banking activities (e.g. deposit-taking) offered to retail and smaller business customers from other wholesale and investment banking services.

Through the creation of Barclays' ring-fenced bank, the Group will ensure that core deposits placed within the European Economic Area (EEA) are ring-fenced to meet the requirements of the legislation by 2019. The implementation of these changes involves a number of risks which include:

§ The Group must restructure its intra-group and external capital, funding and liquidity arrangements to meet regulatory requirements and support business needs. The changes will impact the sources of funding available to the different entities, including preventing the non ring-fenced bank's access to certain categories of deposit funding.

These changes may result in higher funding costs.

§ The changes to the Group structure may negatively impact the assessment made by credit rating agencies and creditors. The risk profile and key risk drivers of the ring-fenced bank and the non ring-fenced bank will be specific to the activities and risk profile of each entity. As a result different Group entities are likely to be assessed differently and this may result in differences in credit ratings. Changes to the credit assessment at the Group or individual entity level, including the potential for ratings downgrades and ratings differences across entities, could impact access and cost of certain sources of funding.

§ Implementation of ring-fencing introduces a number of execution risks. Technology change could result in outages or operational errors. Legal challenge to the ring-fence transfer scheme may delay the transfer of assets and liabilities to the ring-fenced bank. In particular, the setup of the Group Service Company as a separate legal entity servicing both trading entities (i.e. ring-fenced bank and non ring-fenced bank) will require a number of intra-group service level agreements to be established and agreed between the Group Service Company and the trading entities and will require the Group to set up a new approach to manage, fund and deliver the activities that will be provided by this entity. Delayed delivery could increase reputational risk or result in regulatory non-compliance. Uncertain customer preference (for placement in the ring-fenced or non ring-fenced bank) may result in changes to design and implementation plans.

§ At the European level, structural reform regulation is still being developed as highlighted by the European Union proposal issued in November 2016 for Intermediate Holding Companies. The impact of final rules on Barclays businesses is still to be assessed once European regulation is finalised. Final rules will need to be considered alongside EU Referendum implications. The implementation date for these proposals will depend on the date on which any final legislation is agreed.

§ There is a risk that Barclays does not meet regulatory requirements across the new structure. Failure to meet these requirements may have an adverse impact on the Group's profitability, operating flexibility, flexibility of deployment of capital and funding, return on equity, ability to pay dividends, credit ratings, and/or financial condition.

ii) Business conditions, general economy and geopolitical issues

The Group's performance could be adversely affected in relation to more than one Principal Risk by a weak or deteriorating global economy or political instability. These factors may also occur in one or more of the Group's main countries of operation.

The Group offers a broad range of services including to retail, institutional and government customers, in a large number of countries. The breadth of these operations means that deterioration in the economic environment, or an increase in political instability in countries where the Group is active, or in any other systemically important economy, could adversely affect the Group's performance and prospects.

For the Group, a deterioration of conditions in its key markets could affect performance in a number of ways including, for example: (i) deteriorating business, consumer or investor confidence leading to reduced levels of client activity, or indirectly, a material adverse impact on GDP growth in significant markets and therefore on Group performance; (ii) higher levels of default rates and impairment; (iii) mark to market losses in trading portfolios resulting from changes in factors such as credit ratings, share prices and solvency of counterparties; and (iv) lower levels of fixed asset investment and productivity growth overall.

Global growth is expected to remain modest in 2017, with low single digit growth in advanced economies alongside a slowdown in emerging markets. This moderate economic performance, lower commodity prices and increased

geopolitical tensions mean that the distribution of risks to global economic activity continues to be biased to the downside. Commodity prices, particularly oil prices, remain depressed, but could fall further if growth in demand remains weak or supply takes longer than expected to adjust. At the same time, countries with high reliance on commodity-related earnings have already experienced a tightening of financial conditions. A sustained period of low prices risks triggering further financial distress, default and contagion, for our customers, their suppliers and local communities, and resulting losses for Barclays.

Moreover, sentiment towards emerging markets as a whole continues to be driven in large part by developments in China, where there is significant concern around the ability of authorities to manage growth whilst transitioning towards services. A stronger than expected slowdown could result if authorities fail to appropriately manage the end of the investment and credit-led boom, while the consequences from a faster slowdown would flow through both financial and trade channels into other economies, and affect commodity markets.

Whilst tightening of monetary policy by the US Federal Reserve was not as pronounced as expected during 2016, a moderate increase in activity is expected during 2017, the increasing divergence of policies between major advanced economies risks triggering further financial market volatility. Changes to interest rate expectations could ignite further volatility and US Dollar appreciation, particularly if the US Federal Reserve were to increase interest rates faster than markets currently expect. Emerging markets have already seen growth slow following increased capital outflows, but growth may slow further if tighter US interest rate policy drives further reallocation of capital.

Risk review

Material existing and emerging risks

Material existing and emerging risks to the Group's future performance

In several countries, reversals of capital inflows, as well as fiscal austerity, have already caused deterioration in political stability. This could be exacerbated by a renewed rise in asset price volatility or sustained pressure on government finances. In addition, geopolitical tensions in some areas of the world, including the Middle East and Eastern Europe are already acute, and are at risk of further deterioration.

In the US, the policy platform of the new administration is expected to be clarified during the early part of 2017. There is the possibility of significant changes in policy in sectors including trade, healthcare and commodities which may have an impact on associated Barclays' portfolios. Proposed policy changes (including tax-cuts and significant infrastructure spending) are likely to result in higher global growth, further reinforcing the move towards global reflation. Political change may increase uncertainty as to regulatory trends, both in the US and the EU.

In the UK, the vote in favour of leaving the EU has given rise to political uncertainty with attendant consequences for investment and confidence. See vi) EU Referendum on page 139.

iii) Change and execution risk

The Group continues to drive changes to its functional capabilities and operating environment in order to allow the business to exploit emerging and digital technologies, and improve customer experience whilst also embedding enhanced regulatory requirements, strategic realignment, and business model changes. The complexity, increasing pace, and volume of changes underway simultaneously mean there is heightened execution risk and potential for change not being delivered to plan.

Failure to adequately manage this risk could result in extended outages and disruption, financial loss, customer detriment, legal liability, potential regulatory censure and reputational damage.

iv) Risks arising from regulation of the financial services industry

The financial services industry continues to be the focus of significant regulatory change and scrutiny which may adversely affect the Group's business, financial performance, capital and risk management strategies. For further information on regulations affecting the Group, including significant regulatory developments, please see the section on Supervision and Regulation on page 229.

a) Regulatory change

The Group, in common with much of the financial services industry, remains subject to significant levels of regulatory change and increasing scrutiny in many of the countries in which it operates (including, in particular, the UK and the US). This has led to a more intensive approach to supervision and oversight, increased expectations and enhanced requirements. As a result, regulatory risk will remain a focus for senior management and consume significant levels of

business resources. Furthermore, this more intensive approach and the enhanced requirements, uncertainty and extent of international regulatory coordination as enhanced supervisory standards are developed and implemented may adversely affect the Group's business, capital and risk management strategies and/or may result in the Group deciding to modify its legal entity structure, capital and funding structures and business mix, or to exit certain business activities altogether or not to expand in areas despite otherwise attractive potential.

b) Changes in prudential requirements, including changes to CRD IV

The Group's results and ability to conduct its business may be negatively affected by changes or additions to supervisory and prudential expectations, including in relation to any minimum requirements for own funds and eligible liabilities, leverage or liquidity requirements, applicable buffers and/or add-ons to such minimum requirements and RWA calculation methodologies all as may be set by international, EU or national authorities from time to time (including, for example, through changes being proposed to the CRD IV framework).

Changes to or additional supervisory and prudential expectations, either individually or in aggregate, may lead to unexpected enhanced requirements in relation to the Group's capital, leverage, liquidity and funding ratios or alter the way such ratios are calculated. This may result in, amongst other things, a need for further management actions to meet the changed requirements, such as: increasing capital or liquidity resources, reducing leverage and risk weighted assets; modifying legal

entity structure (including with regard to issuance and deployment of capital and funding for the Group); changing the Group's business mix or exiting other businesses; and/or undertaking other actions to strengthen the Group's position. See Treasury and Capital Risk on page 152 and Supervision and Regulation on page 229 for more information.

c) Market infrastructure reforms

Financial market infrastructure is subject to extensive and increasing regulation in many of the Group's markets. The derivatives market has been the subject of particular focus across the G20 countries, requiring the clearing of standardised derivatives and the mandatory margining of non-cleared derivatives. More broadly, the recast Markets in Financial Instruments Directive in Europe (MiFID II) will fundamentally change the framework for market infrastructure, the Benchmarks Regulation will regulate the use of benchmarks in the EU, and regulation governing Central Securities Depositories will increase the requirements upon participants in the financial markets.

It is possible that these additional regulations, and the related expenses and requirements, will increase the cost of and therefore impact willingness of participation in the financial markets.

d) Recovery and resolution planning

In recent years, there has been a strong regulatory focus on resolvability from regulators globally, and Barclays continues to work with the relevant authorities to identify and address potential impediments to the Group's resolvability. As part of this work, the Group is required to submit formal Recovery and Resolution Plan (RRP) submissions to UK, US and South African regulators describing Barclays' strategy for recovery and rapid and orderly resolution. These submissions are evaluated by regulators on the basis of both qualitative and quantitative metrics, the specifics of which may become more rigorous over time.

Should the relevant authorities in any jurisdiction ultimately determine that a resolution plan were not credible or would not facilitate an orderly resolution, Barclays or its subsidiaries could be made subject to more stringent capital, leverage or liquidity requirements, or restrictions on growth, activities or operations. The potential structural changes that may be required to address such a determination may negatively impact the financial or competitive position or results of operations of the Group, as well as increase the risk that the Group would be unable to maintain appropriate prudential ratios or be restricted from making intra-group or external capital contributions.

e) Stress testing

The Group and certain of its members are subject to supervisory stress testing exercises in a number of jurisdictions. These exercises currently include the programmes of the BoE, the EBA, the FDIC, the FRB and the SARB. These exercises are designed to assess the resilience of banks to adverse economic or financial developments and ensure that they have robust, forward-looking capital and liquidity management processes that account for the risks associated with their business profile. Assessment by regulators is on both a quantitative and qualitative basis, the latter focusing on the Group's or certain of its members' business model, data provision, stress testing capability and internal management processes and controls. The stress testing requirements to which the Group and its members are subject are becoming increasingly stringent, including in the US where the newly sub-consolidated operations and the IHC will be stress-tested and examined under the FRB's annual CCAR programme for the first time in 2017. Failure to meet requirements of regulatory stress tests, or the failure by regulators to approve the stress test results and capital plans of the Group, could result in the Group being required to enhance its capital position, limit capital distributions or position capital in specific subsidiaries. For more information on stress testing, please see Supervision and Regulation on page 229.

v) Regulatory action in the event of a bank failure

As described under Supervision of the Group, Regulation in the EU and UK, Recovery and Resolution developments on page 231, UK resolution authorities have the right under certain circumstances to intervene in the Group pursuant to the stabilisation and resolution powers granted to them under the Banking Act and other applicable legislation.

If any of the powers conferred on the BoE were to be exercised, or there were an increased risk of exercise, in respect of the Group or any entity within the Group, this might result in a material adverse effect on the rights or interests of shareholders and creditors including holders of debt securities and could have a material adverse effect on the market price of shares and other securities issued by the Group. Such effects could include losses of shareholdings or associated rights including, the dilution of percentage ownership of the Group's share capital, and may result in creditors, including debt holders, losing all or a part of the value of their investment in the Group's issued securities.

vi) EU referendum

The UK held a referendum on 23 June 2016 on whether it should remain a member of the EU. This resulted in a vote in favour of leaving the EU. The result of the referendum means that the long-term nature of the UK's relationship with the EU is unclear and there is uncertainty as to the nature and timing of any agreement with the EU on the terms of exit. In the interim, there is a risk of uncertainty for both the UK and the EU, which could adversely affect the economy of the UK and the other economies in which we operate. The potential risks associated with an exit from the EU have been carefully considered by the Board and include:

Market risk

§ Potential for continued market volatility (notably FX and interest rates) given political uncertainty which could affect the value of Trading Book positions.

Credit risk

§ Increased risk of a UK recession with lower growth, higher unemployment and falling UK house prices. This would likely negatively impact a number of Barclays' portfolios, notably: higher Loan to Value home loans, UK unsecured lending including cards and Commercial Real Estate exposures.

Operational risk

§ Changes to current EU 'Passporting rights': the UK's withdrawal from the EU may result in the loss of cross-border market access rights which would require Barclays to make alternative licensing arrangements in EU jurisdictions in which Barclays continues to operate.

§ Uncertainty over UK's future approach to EU freedom of movement will impact Barclays' access to the EU talent pool, decisions on hiring from the EU of critical roles and rights to work of current Barclays non-UK EU citizens located in the UK and UK citizens located in the EU.

Legal risk

§ The legal framework within which Barclays operates could change and become more uncertain as the UK takes steps to replace or repeal certain laws currently in force, which are based on EU legislation and regulation. Certainty of existing contracts, enforceability of legal obligations and uncertainty around the outcome of disputes

may be affected until the impacts of the loss of the current jurisdictional arrangements between UK and EU courts and the universal enforceability of judgements across the EU, are fully known (including the status of existing EU case law).

Treasury and capital risk

§ Potential for credit spread widening and reduced investor appetite for Barclays debt issuance, which could negatively impact the cost of and/or access to funding. Potential for continued market volatility could affect interest rate risk in the banking book, as well as securities held by Barclays for liquidity purposes.

§ Changes in the long-term outlook for UK interest rates might also adversely affect UK Pension IAS19 liabilities.

vii) Impairment

The introduction of the impairment requirements of IFRS 9 *Financial Instruments*, due to be implemented on 1 January 2018, is expected to result in higher impairment loss allowances that are recognised earlier, on a more forward looking basis and on a broader scope of financial instruments than is the case under IAS 39. Measurement will involve increased complexity, judgement and is expected to have a material financial impact and impairment charges will tend to be more volatile. Unsecured products with longer expected lives, such as revolving credit cards, are expected to be most impacted. The capital treatment on the increased reserves is the subject of ongoing discussion with regulators and across the industry, but there is potential for significant adverse impact on regulatory capital ratios. In addition, the move from incurred to expected credit losses has the potential to impact the Group's performance under stressed economic conditions or regulatory stress tests. For more information please refer to Note 1 Significant Accounting Policies on pages 284 to 289.

Barclays has a jointly accountable risk and finance implementation and governance programme with representation from all impacted departments. During 2016, work continued on the design and build of impairment models, systems, processes, governance, controls and data collection and continues to be refined during 2017. During 2017, there is a planned parallel run which includes continued model, process and output validation, testing, calibration and analysis.

There will be three different layers of impairment committees. In addition to the existing Group and Business level committees, Legal Entity committees for Barclays UK and Barclays International will also be in place. Committees will be chaired by the Chief Risk Officer (CRO), with joint accountability by both CROs and Chief Financial Officers (CFOs) for signing off the results. The new IFRS 9 impairment committee structure, with underlying key controls, is expected to be in operation from Q2 2017. There will also be a Scenarios Management Committee to review and approve the scenario process. The scope of review will include the scenarios and scenario narratives, the core set of macroeconomic variables and any management overlays. The Scenario Management Committee will attest that the scenarios adequately account for the non-linearity and asymmetry of the loss distribution. Reported results and key messages will be communicated to the Board Audit Committee and Risk Executive Committee, who will have oversight roles and provide challenge of key assumptions, including the basis of the scenarios adopted.

Material existing and emerging risks by Principal Risk

Credit risk

The risk of loss to the firm from the failure of clients, customers or counterparties, including sovereigns, to fully honour their obligations to the firm, including the whole and timely payment of principal, interest, collateral and other receivables.

The Group may suffer financial loss if any of its customers, clients or market counterparties fails to fulfil their contractual obligations to the Group. The Group may also suffer loss when the value of its investment in the financial instruments of an entity falls as a result of that entity's credit rating being downgraded. In addition, the Group may

Edgar Filing: BARCLAYS PLC - Form 6-K

incur significant unrealised gains or losses due to changes in the Group's credit spreads or those of third parties, as these changes affect the fair value of the Group's derivative instruments, debt securities that the Group holds or issues, and loans held at fair value.

Risk review

Material existing and emerging risks

Material existing and emerging risks to the Group's future performance

i) Deterioration in political and economic environment

The Group's performance is at risk from deterioration in the political and economic environment (see also Business conditions, general economy and geopolitical issues on page 137) which may result from a number of uncertainties, including the following:

a) Specific regions

Adverse impacts on customers' ability to service debt and may result in higher impairment charges for the Group.

UK

Following the EU referendum on 23 June 2016 (see EU Referendum on page 139), the UK may experience a period of political and economic uncertainty throughout the negotiation period during which exit options are hard to fully and accurately predict. The initial impact has been the depreciation of Sterling resulting in higher costs for companies exposed to imports and a more favourable environment for exporters. Rising domestic costs resulting from higher import prices may impact household incomes and the affordability of consumer loans and home loans. In turn this may affect businesses dependent on consumers for revenue. There has also been a reduction in activity in both commercial and residential real estate markets which has the potential to impact value.

US

A significant proportion of the Group's portfolio is located in the US, including a major credit card portfolio and a range of corporate and investment banking exposures. Stress in the US economy, weakening GDP, rising unemployment and/or an increase in interest rates could lead to increased levels of impairment.

Emerging Markets

Slower growth in China continues to affect a number of emerging economies, particularly those with high fiscal deficits and those reliant on short-term external financing and/or material reliance on commodity exports. Their vulnerability has been further impacted by the fall, and sustained volatility in oil prices, the strong US Dollar and the winding down of quantitative easing policies by some central banks. The impact on the Group may vary depending on the vulnerabilities present in each country, but the impact may result in increased impairment charges through sovereign defaults, or the inability or unwillingness of clients and counterparties in that country to meet their debt obligations.

South Africa

The negative economic outlook in South Africa continues, with a challenging domestic and external economic environment and ongoing political uncertainty. Real GDP growth remains low resulting in these domestic and global factors impacting credit quality across our portfolios. In the retail sector, concerns remain over the level of consumer indebtedness and affordability, particularly as interest rates rise.

b) Interest rate rises, including as a result of slowing of monetary stimulus, could impact consumer debt affordability and corporate profitability

To the extent that central banks increase interest rates in certain developed markets, particularly in our main markets, the UK and the US, they are expected to be small and gradual in scale during 2017, albeit following differing timetables. Recent increases in interest rates occurred in the US with a 0.25% rise in December 2015 and the same rise in December 2016. Whilst further increases may support Group income, future interest rate increases, if larger or more frequent than expectations, could cause stress in the loan portfolio and underwriting activity of the Group. This would be particularly applicable to non-investment grade lending, leading to the possibility of the Group incurring higher impairment. Higher credit losses driving an increased impairment allowance would most notably impact retail unsecured and secured portfolios as a result of a reduction in recoverability and value of the Group's assets, coupled with a decline in collateral values.

Interest rate increases in developed markets may also negatively impact emerging economies, as capital flows to mature markets to take advantage of the higher returns and strengthening economic fundamentals.

ii) Specific sectors

The Group is subject to risks arising from changes in credit quality and recovery rate of loans and advances due from borrowers and counterparties in a specific portfolio. Any deterioration in credit quality could lead to lower recoverability and higher impairment in a specific sector. The following are areas of uncertainties to the Group's portfolio which could have a material impact on performance.

a) UK property

With UK property representing a significant portion of the overall UK Corporate and Retail credit exposure, the Group is at risk from a fall in property prices in both the residential and commercial sectors in the UK. Strong house price growth in London and the South East of the UK, fuelled by foreign investment, strong buy-to-let (BTL) demand and subdued housing supply, has resulted in affordability metrics becoming stretched. Average house prices as at the end of 2016 were more than 7.9 times average earnings.

However, the recent EU referendum has had a negative impact on home loan applications due to the increased uncertainty in the UK housing market, with ongoing concerns regarding the potential for falling house prices, particularly in London and the South East. Further, a weakening economy would impact the home loan portfolio as costs rise off the back of higher interest rates and customers are impacted by inflationary affordability pressures. Potential losses would likely be most pronounced in the higher Loan to Value (LTV) segments as falling house prices lead to higher impairment and negative capital impact as loss given default (LGD) rates increase.

b) Natural resources

Despite limited recovery in oil and commodities prices, the risk of losses and increased impairment is more pronounced where leverage is higher, or in sectors currently subject to strain, notably oil and gas, mining and metals and commodities. Sustained oil price depression from its recent high continues and is driven by ongoing global excess supply. The positioning of these portfolios focuses on investment grade customers or collateralised positions. Continued stress in this market does have the potential to further increase credit losses and impairment where a decline in the value of oil impacts both customer revenue and the value of our underlying collateral.

c) Large single name losses

The Group has large individual exposures to single name counterparties. The default of such counterparties could have a significant impact on the carrying value of these assets. In addition, where such counterparty risk has been mitigated by taking collateral, credit risk may remain high if the collateral held cannot be realised, or has to be liquidated at prices which are insufficient to recover the full amount of the loan or derivative exposure. Any such defaults could have a material adverse effect on the Group's results due to, for example, increased credit losses and higher impairment charges.

d) Leverage finance underwriting

The Group takes on significant sub-investment grade underwriting exposure, including single name risk, particularly in the US and Europe. The Group is exposed to credit events and market volatility during the underwriting period. Any adverse events during this period may potentially result in loss for the Group or an increased capital requirement should there be a need to hold the exposure for an extended period.

Market risk

The risk of loss arising from potential adverse changes in the value of the firm's assets and liabilities from fluctuation in market variables including, but not limited to, interest rates, foreign exchange, equity prices, commodity prices, credit spreads, implied volatilities and asset correlations.

Increased uncertainty across global markets from such factors as an unexpected slowdown in global economic growth, sudden changes in monetary policy, unexpected foreign exchange volatility, especially if accompanied by a significant deterioration in the depth of marketplace liquidity (emerging risk).

The trading business model is focused on client facilitation in wholesale financial markets, ranging from underwriting of debt and equity on behalf of issuers, to acting as a market maker in exchange-traded and over the counter products, to providing risk management solutions.

The Group's trading business is generally adversely exposed to a prolonged period of elevated asset price volatility, particularly if it negatively affects the depth of marketplace liquidity. Such a scenario could impact the Group's ability to execute client trades and may also result in lower client flow-driven income and/or market-based losses on its existing portfolio of market risks. These can include having to absorb higher hedging costs from rebalancing risks that need to be managed dynamically as market levels and their associated volatilities change.

Treasury and capital risk

The risk that the Group may not achieve its business plans because of the availability of planned liquidity, a shortfall in capital or a mismatch in the interest rate exposures of its assets and liabilities.

The Group may not be able to achieve its business plans due to: i) being unable to maintain appropriate capital ratios; ii) being unable to meet its obligations as they fall due; iii) rating agency downgrades; iv) adverse changes in foreign exchange rates on capital ratios; v) negative interest rates; and vi) adverse movements in the pension fund.

i) Inability to maintain appropriate prudential ratios

Should the Group be unable to maintain or achieve appropriate capital ratios this could lead to: an inability to support business activity; a failure to meet regulatory capital requirements including any additional capital add-ons or the requirements set for regulatory stress tests; increased cost of funding due to deterioration in investor appetite or credit ratings; restrictions on distributions including the ability to meet dividend targets; and/or the need to take additional measures to strengthen the Group's capital or leverage position. While the requirements in CRD IV are now in force in the UK, further changes to regulatory capital requirements could occur, whether as a result of: (i) further changes to EU legislation (for example, expected implementation of Bank of International Settlements (BIS) regulatory update recommendations through CRD V, etc); (ii) relevant binding regulatory technical standards updates by the European Banking Authority (EBA); (iii) changes to UK legislation; (iv) changes to PRA rules; (v) additional capital

requirements through Financial Policy Committee (FPC) recommendations; or (vi) changes to International Financial Reporting Standards (IFRS). Such changes, either individually and/or in aggregate, may lead to further unexpected additional requirements in relation to the Group's regulatory capital. For example, during 2016, the European Commission proposed substantial changes to the CRD IV framework (including CRR) in line with internationally-agreed standards. These include changes to the regulatory definition of trading activity, standardised and advanced RWA calculation methodologies for market risk and new standardised RWA rules for counterparty credit risk. The proposal also includes phase-in arrangements for the regulatory capital impact of IFRS9 and the ongoing interaction of IFRS9 with the regulatory framework. The Basel Committee has continued its post-crisis work on RWA and leverage reform. Further standards are expected during the course of 2017 on RWAs for credit risk and operational risk, limitations on the use of internal models for RWA purposes and possible floors based on standardised RWAs. The implementation timeframe for these changes is not yet certain.

Additional prudential requirements may also arise from other regulatory reforms, including UK, EU and US proposals on bank structural reform and current proposals for Minimum Requirement for own funds and Eligible Liabilities (MREL) under the EU Bank Recovery and Resolution Directive (BRRD). Included within these reforms are the Bank of England's latest responses to consultation and statement of policy on MREL requirements for UK banks which were published in November 2016 and which remain subject to further changes.

Many of the expected regulatory proposals are still subject to finalisation, with calibration and timing of implementation still to be determined, and there is potential for the impacts to be different from those originally expected when in final form. Overall, it is likely that these changes in law and regulation will have an impact on the Group as they are likely, when implemented, to require changes to the legal entity structure of the Group and how businesses are capitalised and funded. Any such increased prudential requirements may also constrain the Group's planned activities, require balance sheet reductions and could increase the Group's costs, impact the Group's earnings and restrict the Group's ability to pay dividends. Moreover, if combined with a period of market dislocation or when there is significant competition for the type of funding that the Group needs, it may be more difficult and/or costly to increase the Group's capital resources.

ii) Inability to manage liquidity and funding risk effectively

Failure to manage its liquidity and funding risk effectively may result in the Group either not having sufficient financial resources to meet its payment obligations as they fall due or, although solvent, only being able to meet these obligations at excessive cost. This could cause the Group to fail to meet regulatory liquidity standards, be unable to support day-to-day banking activities, or no longer be a going concern.

iii) Credit rating changes and the impact on funding costs

A credit rating assesses the creditworthiness of the Group, its subsidiaries and branches, and is based on reviews of a broad range of business and financial attributes including risk management processes and procedures, capital strength, asset quality, earnings, funding, liquidity, accounting and governance. Any adverse event to one or more of these attributes may lead to a downgrade, which in turn could result in contractual outflows to meet contractual requirements on existing contracts. Furthermore, outflows related to a multiple-notch credit rating downgrade are included in the LRA stress scenarios and a portion of the liquidity pool is held against this risk. There is a risk that any potential downgrades could impact the Group's performance should borrowing cost and liquidity change significantly versus expectations or the credit spreads of the Group be negatively affected.

For further information, please refer to Credit Ratings in the Liquidity Risk Performance section on page 219.

iv) Adverse changes in foreign exchange rates on capital ratios

Edgar Filing: BARCLAYS PLC - Form 6-K

The Group has capital resources, risk weighted assets and leverage exposures denominated in foreign currencies. Changes in foreign currency exchange rates may adversely impact the Sterling equivalent value of these items. As a result, the Group's regulatory capital ratios are sensitive to foreign currency movements, and any failure to appropriately manage the Group's balance sheet to take account of foreign currency movements could result in an adverse impact on regulatory capital and leverage ratios.

home.barclays/annualreport

Barclays PLC Annual Report 2016 | 141

Risk review

Material existing and emerging risks

Material existing and emerging risks to the Group's future performance

v) Negative interest rates

A fall in interest rates leading to an environment with negative nominal interest rates would adversely impact Group profitability as retail and corporate business income would decrease due to margin compression. This is because the significant reduction in asset income would not be offset by a reduction in cost in liabilities due to the presence of a floor in our customer deposit and savings rates which are typically set at positive level of rates.

vi) Adverse movements in the pension fund

Adverse movements between pension assets and liabilities for defined benefit pension schemes could contribute to a pension deficit. The liabilities discount rate is a key driver and, in accordance with International Financial Reporting Standards (IAS 19), is derived from the yields of high quality corporate bonds (deemed to be those with AA ratings) and consequently includes exposure to both risk-free yields and credit spreads. Therefore, the Group's defined benefits scheme valuation would be adversely affected by a prolonged fall in the discount rate or a persistent low rate and/or credit spread environment. Inflation is another significant risk driver to the pension fund, as the liabilities are adversely impacted by an increase in long-term inflation expectations. However in the long term, inflation and rates risk tend to be negatively correlated and therefore partially offset each other.

Operational risk

The risk of loss to the firm from inadequate or failed processes or systems, human factors or due to external events (for example fraud) where the root cause is not due to credit or market risks.

The Group is exposed to many types of operational risk. These include: fraudulent and other internal and external criminal activities; breakdowns in processes, controls or procedures (or their inadequacy relative to the size and scope of the Group's business); systems failures or an attempt by an external party to make a service or supporting technological infrastructure unavailable to its intended users, known as a denial of service attack; and the risk of geopolitical cyber threat activity which destabilises or destroys the Group's information technology, or critical technological infrastructure the Group depends upon but does not control. The Group is also subject to the risk of business disruption arising from events wholly or partially beyond its control, for example natural disasters, acts of terrorism, epidemics and transport or utility failures, which may give rise to losses or reductions in service to customers and/or economic loss to the Group. All of these risks are also applicable where the Group relies on outside suppliers or vendors to provide services to it and its customers. The operational risks that the Group is exposed to could change rapidly and there is no guarantee that the Group's processes, controls, procedures and systems are sufficient to address, or could adapt promptly to, such changing risks to avoid the risk of loss.

i) Cyber risk

The risk posed by cyber attacks is growing, with financial institutions being a primary target of increasingly capable cyber crime groups, as demonstrated by sophisticated targeted attacks against global payment networks throughout 2016. The increased maturity of online marketplaces for criminal services and stolen data has reduced barriers to entry for criminals perpetrating financial attacks which carry high reward and low risk of law enforcement prosecution.

The cyber threat increases the inherent risk to the Group's data (whether it is held by the Group or in its supply chain), to the integrity of financial transactions of the Group, its clients, counterparties and customers, and to the availability of the Group's services. Failure to adequately manage this risk, and to continually review and update processes, could result in increased fraud losses, inability to perform critical economic functions, customer detriment, potential regulatory censure and penalty, legal liability and reputational damage.

ii) Infrastructure and technology resilience

The failure of the Group's and its suppliers' technology infrastructures remain a material risk driver for the Group. The increased use of technologies to support business strategy, and customer and client demand, means any failures will be felt more immediately and with greater impact.

Failure to adequately manage resilience in our technologies, real-estate, and business and suppliers' processes, may result in disruption to normal service which could in turn result in significant customer detriment, cost to reimburse losses incurred by our customers, potential regulatory censure or penalty, and reputational damage.

iii) Ability to hire and retain appropriately qualified employees

The Group requires a diverse mix of highly skilled and qualified colleagues to deliver its strategy and so is dependent on attracting and retaining appropriately qualified and experienced individuals. Barclays' ability to attract and retain such talent is impacted by a range of external and internal factors.

External regulation such as the introduction of the Individual Accountability Regime and the required deferral and claw back provisions of our compensation arrangements may make Barclays a less attractive proposition relative to both our international competitors and other industries. Similarly, the impact of the planned exit of the UK from the EU could potentially have an impact on our ability to hire and retain key employees.

Failure to attract or prevent the departure of appropriately qualified employees who are dedicated to overseeing and managing current and future regulatory standards and expectations, or who have the necessary skills required to deliver the Group strategy, could negatively impact our financial performance, control environment, level of employee engagement and may result in disruption to service which could in turn lead to customer detriment and reputational damage.

iv) Tax risk

The Group is required to comply with the domestic and international tax laws and practice of all countries in which it has business operations. There is a risk that the Group could suffer losses due to additional tax charges, other financial costs or reputational damage as a result of failing to comply with such laws and practice or by failing to manage its tax affairs in an appropriate manner. The Group also faces emerging risks from domestic and international tax developments. For example, the OECD's Base Erosion and Profit Shifting (BEPS) project, and the implementation of its recommendations into domestic law in countries around the world, has the potential to significantly increase the compliance burden on the Group, as well as to increase the incidence of double taxation on the Group as a result of different countries adopting different interpretations and approaches to the BEPS recommendations.

v) Critical accounting estimates and judgements

The preparation of financial statements in accordance with IFRS requires the use of estimates. It also requires management to exercise judgement in applying relevant accounting policies. The key areas involving a higher degree of judgement or complexity, or areas where assumptions are significant to the consolidated and individual financial statements include provisions for conduct and legal, competition and regulatory matters, fair value of financial instruments, credit impairment charges for amortised cost assets, impairment and valuation of available for sale investments, and accounting for pensions and post-retirements benefits. There is a risk that if the judgement exercised, or the estimates or assumptions used, subsequently turn out to be incorrect, this could result in significant loss to the Group, beyond what was anticipated or provided for.

As part of the assets in the Non-Core business, the Group holds a UK portfolio of generally longer-term loans to counterparties in Education, Social Housing and Local Authorities (ESHLA) sectors, which are measured on a fair value basis. The valuation of this portfolio is subject to substantial uncertainty due to the long-dated nature of the portfolios, the lack of a secondary market in the relevant loans and unobservable loan spreads. As a result of these factors, the Group may be required to revise the fair values of these portfolios to reflect, among other things, changes in valuation methodologies due to changes in industry valuation practices and as further market evidence is obtained in connection with the Non-Core asset run-off and exit process. For further information refer to Note 18 Fair value of financial instruments of the Group's consolidated financial statements.

The further development of standards and interpretations under IFRS could also significantly impact the financial results, condition and prospects of the Group.

vi) Outsourcing

The Group depends on suppliers for the provision of many of our services, though the Group continues to be accountable for risk arising from the actions of such suppliers. Failure to monitor and control our suppliers could potentially lead to client information, or our critical infrastructures and services, not being adequately protected.

Conduct risk

The risk of detriment to customers, clients, market integrity, competition or Barclays from the inappropriate supply of financial services, including instances of wilful or negligent misconduct.

Barclays is committed to ensuring that positive customer and client outcomes and protecting market integrity are integral to the way the firm operates. This includes taking reasonable steps to ensure our culture and strategy are appropriately aligned to these objectives; our products and services are reasonably designed and delivered to meet the needs of our customers and clients, as well as maintaining the fair and orderly operation of the markets in which we do business.

Certain other risks referenced herein may result in detriment to customers, clients and market integrity if not managed effectively. These include but are not limited to: cyber risk; infrastructure and technology resilience; ability to hire and retain qualified people; outsourcing; data quality; operational precision and payments; regulatory change; structural reform; change and execution risk; and the exit of the UK from the EU.

i) Execution of strategic divestment in Non-Core businesses

The dependency on suppliers and sub-contracting of outsourced services introduces concentration risk where the failure of specific suppliers could have an impact on our ability to continue to provide services that are material to the Group.

Failure to adequately manage outsourcing risk could result in increased losses, inability to perform critical economic functions, customer detriment, potential regulatory censure and penalty, legal liability and reputational damage.

vii) Data quality

The quality of the data used in models across Barclays has a material impact on the accuracy and completeness of our risk and financial metrics. The evolution of complex modelling underpinning risk decisions, forecasting and capital calculations, demands greater precision in our data. Failure to manage data standards accordingly may have a material adverse effect on the quality of our risk management.

viii) Operational precision and payments

The risk of material errors in operational processes, including payments, are exacerbated during the present period of significant levels of structural and regulatory change, the evolving technology landscape, and a transition to digital channel capabilities.

Material operational or payment errors could disadvantage our customers, clients or counterparties and could result in regulatory censure and penalties, legal liability and reputational damage.

Model risk

As Barclays executes strategic decisions to exit products, businesses or countries, the firm must consider and mitigate any potential detriment to customers, clients and market integrity. There is a risk some customers and clients may have reduced market access and a limited choice of alternative providers, or transitions to alternate providers could cause disruptions. There is also a risk the firm's strategic divestments may impact market liquidity or result in adverse pricing movements. In connection with any country exits, there is a risk that any ongoing cross-border activities into those countries are not conducted in accordance with local laws and regulations. The crystallisation of any of these risks could cause detriment to customers, clients and market integrity, as well as regulatory sanctions, financial loss and reputational damage.

ii) Product governance and sales practices

Effective product governance, including design, approval and periodic review of products, and appropriate controls over various internal and third-party sales channels are critical to ensuring positive outcomes for customers and clients. In particular, Barclays must ensure that its remuneration practices and performance management framework are designed to prevent conflicts of interest and inappropriate sales incentives. Failure of product governance and sales controls could result in the sale of products and services that fail to meet the needs of, or are unsuitable for, customers and clients, regulatory sanctions, financial loss and reputational damage.

iii) Trading controls and benchmark submissions

Maintaining controls over trading activities and benchmark submissions is critical to ensuring the trust of our customers, clients and other market participants. These controls must be designed to ensure compliance with all applicable regulatory requirements, as well as to prevent market manipulation, unauthorised trading and inadvertent errors. A failure of these controls could result in detriment to customers and clients, disruptions to market integrity, regulatory sanctions, financial loss and reputational damage. The risk of failure could be enhanced by the changes necessary to address various

new regulations, including but not limited to the Markets in Financial Instruments Directive II.

The risk of the potential adverse consequences from financial assessments or decisions based on incorrect or misused model outputs and reports.

Barclays uses models to support a broad range of business and risk management activities, including informing business decisions and strategies, measuring and limiting risk, valuing exposures, conducting stress testing, assessing capital adequacy, supporting new business acceptance and risk/reward evaluation, managing client assets, or meeting reporting requirements.

Models are imperfect and incomplete representations of reality, and so they may be subject to errors affecting the accuracy of their outputs. Models may also be misused. Model errors or misuse may result in the Group making inappropriate business decisions and being subject to financial loss, regulatory risk, reputational risk and/or inadequate capital reporting.

iv) Financial Crime

The management of Financial Crime remains a key area of regulatory focus. Delivering a robust control environment to ensure that the Bank effectively manages the risks of Money Laundering, Terrorist Financing, Sanctions and Bribery and Corruption protects the Bank, its customers and its employees, as well as society at large, from the negative effects of financial crime. Failure to maintain an effective control environment may lead to regulatory sanctions, financial loss and reputational damage.

Risk review

Material existing and emerging risks

Material existing and emerging risks to the Group's future performance

v) Data protection and privacy

The proper handling of data and protection of data privacy is critical to developing trust and sustaining long-term relationships with our customers and clients. Inadequate protection of data (including data held and managed by third party suppliers) could lead to security compromise, data loss, financial loss and other potential detriment to our customers and clients, as well as regulatory sanctions, financial loss and reputational damage. The risk of failure could be enhanced by the changes necessary to address various new regulations, including but not limited to the EU Data Protection Initiative.

vi) Regulatory focus on culture and accountability

Various regulators around the world have emphasised the importance of culture and personal accountability in helping to ensure appropriate conduct and drive positive outcomes for customers, clients and markets integrity. Regulatory changes such as the new UK Senior Managers Regime and Conduct Rules coming into effect in 2017, along with similar regulations in other jurisdictions, will require Barclays to enhance its organisational and operational governance to evidence its effective management of culture and accountability. Failure to meet these new requirements and expectations may lead to regulatory sanctions, financial loss and reputational damage.

Reputation risk

The risk that an action, transaction, investment or event will reduce trust in the firm's integrity and competence by clients, counterparties, investors, regulators, employees or the public.

Climate change, human rights and support for the defence sector

Any one transaction, investment or event that, in the perception of key stakeholders reduces their trust in the firm's integrity and competence, may have the potential to give rise to risk to Barclays reputation. Barclays' association with sensitive sectors is often an area of concern for stakeholders and the following topics have been of particular interest:

Fossil fuels: As the Paris agreement on CO² emissions comes into force, banks are coming under increased pressure from civil society, shareholders and potentially national governments regarding the management and disclosure of their climate risks and opportunities, including the activities of certain sections of their client base;

Human Trafficking: The UK Modern Slavery Act came into force in October 2015 and with the scrutiny of global business investments rising, the risks of association with human rights violations are growing within the banking sector, through the perceived indirect involvement in human rights abuses committed by clients and customers. Campaigners have been seeking to hold all parties in the value chain to account for environmental and human rights violations where they occur; and

Defence Sector: Supporting the manufacture and export of military and riot control goods and services continues to require significant review internally in order to ensure compliance with all relevant requirements and to avoid reputational damage.

Legal risk

The risk of loss or imposition of penalties, damages or fines from the failure of the firm to meet its legal obligations including regulatory or contractual requirements.

Legal disputes, regulatory investigations, fines and other sanctions relating to conduct of business and breaches of legislation and/or regulations may negatively affect the Group's results, reputation and ability to conduct its business.

The Group conducts diverse activities in a highly regulated global market and therefore is exposed to the risk of fines and other sanctions relating to the conduct of its business. In recent years authorities have increasingly investigated past practices, pursued alleged breaches and imposed heavy penalties on financial services firms. This trend is expected to continue. A breach of applicable legislation and/or regulations could result in the Group or its staff being subject to criminal prosecution, regulatory censure, fines and other sanctions in the jurisdictions in which it operates, particularly in the UK and the US. Where clients, customers or other third parties are harmed by the

Group's conduct, this may also give rise to legal proceedings, including class actions. Other legal disputes may also arise between the Group and third parties relating to matters such as breaches, enforcement of legal rights or obligations arising under contracts, statutes or common law. Adverse findings in any such matters may result in the Group being liable to third parties seeking damages, or may result in the Group's rights not being enforced as intended.

Details of legal, competition and regulatory matters to which the Group is currently exposed are set out in Note 29 legal, competition and regulatory matters. In addition to matters specifically described in Note 29, the Group is engaged in various other legal proceedings in the UK and US and a number of other overseas jurisdictions which arise in the ordinary course of business. The Group is also subject to requests for information, investigations and other reviews by regulators, governmental and other public bodies in connection with business activities in which the Group is or has been engaged. The Group is keeping all relevant agencies briefed as appropriate in relation to these matters on an ongoing basis. In light of the uncertainties involved in legal, competition and regulatory matters, there can be no assurance that the outcome of a particular matter or matters will not be material to the Group's results of operations or cash flow for a particular period, depending on, amongst other things, the amount of the loss resulting from the matter(s) and the amount of income otherwise reported for the period.

The outcome of legal, competition and regulatory matters, both those to which the Group is currently exposed and any others which may arise in the future, is difficult to predict. However, in connection with such matters the Group may incur significant expense, regardless of the ultimate outcome, and any such matters could expose the Group to any of the following: substantial monetary damages and/or fines; remediation of affected customers and clients; other penalties and injunctive relief; additional litigation; criminal prosecution in certain circumstances; the loss of any existing agreed protection from prosecution; regulatory restrictions on the Group's business operations including the withdrawal of authorisations; increased regulatory compliance requirements; suspension of operations; public reprimands; loss of significant assets or business; a negative effect on the Group's reputation; loss of investor confidence and/or dismissal or resignation of key individuals.

In January 2017, Barclays PLC was sentenced to serve three years of probation from the date of the sentencing order in accordance with the terms of its May 2015 plea agreement with the DOJ. During the term of probation Barclays PLC must, amongst other things, (i) commit no crime whatsoever in violation of the federal laws of the US, (ii) implement and continue to implement a compliance programme designed to prevent and detect the conduct that gave rise to the plea agreement and (iii) strengthen its compliance and internal controls as required by relevant regulatory or enforcement agencies. Potential consequences of breaching the plea agreement include the imposition of

additional terms and conditions on the Group, an extension of the agreement, or the criminal prosecution of Barclays PLC, which could, in turn, entail further financial penalties and collateral consequences and have a material adverse effect on the Group's business, operating results or financial position.

There is also a risk that the outcome of any legal, competition or regulatory matters in which the Group is involved may give rise to changes in law or regulation as part of a wider response by relevant law makers and regulators. A decision in any matter, either against the Group or another financial institution facing similar claims, could lead to further claims against the Group.

Risk review

Risk management

Barclays risk management strategy

Introduction

Barclays engages in activities which entail risk taking, every day, throughout its business. This section introduces these risks, and outlines key governance arrangements for managing them. These include roles and responsibilities, frameworks, policies and standards, assurance and lessons learned processes. The Group's approach to fostering a strong Risk Culture is also described.

Enterprise Risk Management Framework (ERMF)

The Group has clear risk management objectives and a strategy to deliver them through core risk management processes. The ERMF sets the strategic direction by defining clear standards, objectives and responsibilities for all areas of Barclays. It supports the CEO and CRO in embedding effective risk management and a strong Risk Culture.

The ERMF sets out:

§ Principal Risks faced by the Group

§ Risk Appetite requirements

§ Roles and responsibilities for risk management

§ Risk Committee structure.

A revised ERMF was approved by the Board in December 2016. This includes a revised risk taxonomy comprising eight Principal Risks. Credit, market, funding, operational and conduct risks have been aligned to this new taxonomy and the management of these risks has not materially changed. Model risk, reputation risk and legal risk are newly classified as Principal Risks in the latest version of the ERMF, reflecting the heightened importance of these risk types in the current environment. In 2016, Model risk was managed in accordance with dedicated policies linked to the ERMF. These policies supplemented the key risk control frameworks underlying the financial risk types and applied to all businesses and functions in which financial risks were incurred or managed. Reputation risk was considered as part of conduct risk and legal risk was included as a sub-risk type under operational risk. In this Annual Report, the Risk Management sections (page 145 to 162) follow the new Principal Risk taxonomy of eight risks, reflecting our current approach to risk management. The Risk Performance sections (pages 164 to 228) follow the Principal Risk taxonomy (of five risks) which prevailed during 2016. Information on reputation risk performance in 2016 is included

as part of the Conduct Risk section. Information on legal risk performance in 2016 can be found in the Material Existing and Emerging Risks section (page 136 to 144), the Supervision and Regulation section (page 229 to 236) and Note 29 to the Financial Statements (page 333 to 338). The definition of the Three Lines of Defence and associated responsibilities were also revised. The ERMF also contains a revised governance structure, including new Group and Business Risk committees, with representation from the first and second lines of defence.

Principal Risks

The ERMF identifies Principal Risks and sets out responsibilities and risk management standards. Note that Legal, Reputation and Model risks are Principal Risks from January 2017 following Board approval in December 2016.

Financial Principal Risks:

§ Credit risk: The risk of loss to the firm from the failure of clients, customers or counterparties, including sovereigns, to fully honour their obligations to the firm, including the whole and timely payment of principal, interest, collateral and other receivables

§ Market risk: The risk of loss arising from potential adverse changes in the value of the firm's assets and liabilities from fluctuation in market variables including, but not limited to, interest rates, foreign exchange, equity prices, commodity prices, credit spreads, implied volatilities and asset correlations

§ Treasury and capital risk: This comprises:

Liquidity risk: The risk that the firm is unable to meet its contractual or contingent obligations or that it does not have the appropriate amount, tenor and composition of funding and liquidity to support its assets

Capital risk: The risk that the firm has an insufficient level or composition of capital to support its normal business activities and to meet its regulatory capital requirements under normal operating environments or stressed conditions (both actual and as defined for internal planning or regulatory testing purposes). This includes the risk from the firm's pension plans

Interest rate risk in the banking book: The risk that the firm is exposed to capital or income volatility because of a mismatch between the interest rate exposures of its (non-traded) assets and liabilities.

Non-Financial Principal Risks:

§ Operational risk: The risk of loss to the firm from inadequate or failed processes or systems, human factors or due to external events (for example fraud) where the root cause is not due to credit or market risks.

§ Model risk: The risk of the potential adverse consequences from financial assessments or decisions based on incorrect or misused model outputs and reports.

§ Reputation risk: The risk that an action, transaction, investment or event will reduce trust in the firm's integrity and competence by clients, counterparties, investors, regulators, employees or the public.

§ Conduct risk: The risk of detriment to customers, clients, market integrity, competition or Barclays from the inappropriate supply of financial services, including instances of wilful or negligent misconduct.

§ Legal risk: The risk of loss or imposition of penalties, damages or fines from the failure of the firm to meet its legal obligations including regulatory or contractual requirements.

Risk Appetite for the Principal Risks

Risk Appetite is defined as the level of risk which the firm is prepared to accept in the conduct of its activities. The Risk Appetite of the firm:

§ specifies the level of risk we are willing to take and why, to enable specific risk taking activities

§ considers all Principal Risks individually and, where appropriate, in aggregate

§ communicates the acceptable level of risk for different risk types; this may be expressed in financial or non-financial terms, and is measured and effectively monitored

§ describes agreed parameters for the firm's performance under varying levels of financial stress with respect to profitability

§ is considered in key decision-making processes, including business planning, mergers and acquisitions, new product approvals and business change initiatives.

Risk Appetite is approved and disseminated across legal entities and businesses, including by use of Mandate and Scale limits to enable and control specific activities that have material concentration risk implications for the firm. These limits also help reduce the likelihood and size of one-off losses. The Risk Appetite must be formally reviewed on at least an annual frequency in conjunction with the Medium Term Planning (MTP) process and approved by the Board.

Roles and responsibilities in the management of risk – the Three Lines of Defence

All colleagues have a responsibility to contribute to the risk management of the Group. These responsibilities are set out in the Three Lines of Defence. In 2016 these definitions were simplified. Regardless of their function, all teams who manage processes in the firm are responsible for designing, implementing, remediating, monitoring and testing the controls for those processes.

First Line of Defence:

The First Line comprises all employees engaged in the revenue generating and client facing areas of the firm and all associated support functions, including Finance, Treasury, Technology and Operations, Human Resources etc. Employees in the first line are responsible for:

§ identifying all the risks in the activities in which they are engaged, and developing appropriate policies, standards and controls to govern their activities

§ operating within any and all limits which the Risk and Compliance functions establish in connection with the Risk Appetite of the firm

§ escalating risk events to senior managers and Risk and Compliance.

Internal controls are critical to running a cost-effective and stable business. To ensure these controls remain strong, sustainable, and efficient the new strategic position of Chief Controls Officer has been created. The Chief Controls Office will help to maintain and enhance an effective and consistent control framework across the organisation.

The First Line must establish their own policies and controls (subject to the Controls Framework of the firm), particularly with respect to operational activities, and require their colleagues to manage all controls to specified tolerances. These control-related activities are also considered First Line and are permitted so long as they are within any applicable limits established by Risk or Compliance. All activities in the first line are subject to oversight from the relevant parts of the second and third lines.

Second Line of Defence:

Employees of Risk and Compliance comprise the Second Line of Defence. The role of the Second Line is to establish the limits, rules and constraints under which first line activities shall be performed, consistent with the Risk Appetite of the firm, and to monitor the performance of the First Line against these limits and constraints.

The Second Line may not establish limits for all First Line activities, especially those related to Operational Risk. The controls for these will ordinarily be established by Controls Officers operating within the Controls Framework of the firm, under the oversight of the Second Line.

The Second Line can also undertake certain additional activities if, in the judgement of the Group CRO, this will reduce the firm's exposure to risk.

Third Line of Defence:

Employees of Internal Audit comprise the Third Line of Defence. They provide independent assurance to the Board and Executive Management over the effectiveness of governance, risk management and control over current, systemic

and evolving risks.

The Legal department does not sit in any of the three lines, but supports them all. The Legal department is, however, subject to oversight from Risk and Compliance, with respect to Operational and Conduct risks.

Roles and responsibilities in the management of risk – risk committees

Business Risk Committees consider risk matters relevant to their business, and escalate as required to the Group Risk Committee (GRC), whose Chairman in turn escalates to Board Committees and the Board.

There are five Board-level fora which review and monitor risk across the Group. These are: The main Board, the Board Risk Committee, the Board Audit Committee, the Board Reputation Committee and the Board Remuneration Committee.

The Chairman of each Committee prepares a statement each year on the committee's activities, which is included in this report from page 54 to 76.

The Board

One of the Board's (Board of Directors of Barclays PLC) responsibilities is the approval of Risk Appetite (see the Risk Management and Strategy section on page 146), which is the level of risk the Group chooses to take in pursuit of its business objectives. The Group CRO (GCRO) regularly presents a report to the Board summarising developments in the risk environment and performance trends in the key portfolios. The Board is also responsible for the ERMF. It oversees the management of the most significant risks through regular review of risk exposures. Executive management responsibilities relating to this are set out in the ERMF.

The Board Risk Committee (BRC)

The BRC monitors the Group's risk profile against the agreed financial appetite. Where actual performance differs from expectations, the actions taken by management are reviewed to ensure that the BRC is comfortable with them. After each meeting, the Chairman of the BRC prepares a report for the next meeting of the Board. All members are independent executive directors. The Group Finance Director (GFD) and the GCRO attend each meeting as a matter of course.

The BRC also considers the Group's risk appetite statement for operational risk and evaluates the Group's operational risk profile and operational risk monitoring.

The BRC receives regular and comprehensive reports on risk methodologies, the effectiveness of the risk management framework, and the Group's risk profile, including the key issues affecting each business portfolio and forward risk trends. The Committee also commissions in-depth analyses of significant risk topics, which are presented by the CRO or senior risk managers in the businesses.

The Board Reputation Committee (RepCo)

Edgar Filing: BARCLAYS PLC - Form 6-K

The RepCo reviews management's recommendations on conduct and reputational risk and the effectiveness of the processes by which the Group identifies and manages these risks. It also reviews and monitors the effectiveness of Barclays' Citizenship strategy, including the management of Barclays' economic, social and environmental contribution.

In addition, the Board Audit and Board Remuneration Committees receive regular risk reports to assist them in the undertaking of their duties.

home.barclays/annualreport

Barclays PLC Annual Report 2016 | 147

Risk review

Risk management

Barclays risk management strategy

The Board Audit Committee (BAC)

The BAC receives regular reports on the effectiveness of internal control systems, quarterly reports on material control issues of significance, and quarterly papers on accounting judgements (including impairment). It also receives a quarterly review of the adequacy of impairment allowances, which it reviews relative to the risk inherent in the portfolios, the business environment, the Group's policies and methodologies and the performance trends of peer banks. The Chairman of the BAC also sits on the BRC.

The Board Remuneration Committee (RemCo)

The RemCo receives a detailed report on risk management performance from the BRC, regular updates on the risk profile and proposals on an ex-ante and ex-post risk adjustments to variable remuneration. These inputs are considered in the setting of performance incentives.

Summaries of the relevant business, professional and risk management experience of the Directors of the Board are presented in the Board of Directors section on pages 51 to 52. The terms of reference and additional details on membership and activities for each of the principal Board Committees are available from the Corporate Governance section at home.barclays/about-barclays/barclays-corporate-governance/board-committees.

Barclays Risk Culture

Barclays defines Risk Culture as norms, attitudes and behaviours related to risk awareness, risk taking and risk management. At Barclays this is reflected in how we identify, escalate and manage risk matters.

Our Code of Conduct the Barclays Way

Globally, all colleagues must attest to the Barclays Way, our Code of Conduct, and all frameworks, policies and standards applicable to their roles. The Code of Conduct outlines the Purpose and Values which govern our Barclays Way of working across our business globally. It constitutes a reference point covering all aspects of colleagues working relationships, specifically (but not exclusively) with other Barclays employees, customers and clients, governments and regulators, business partners, suppliers, competitors and the broader community.

Definition of Risk Culture and its determinants

We review our culture through the lens of four determinants, associated with desired outcomes:

§ **Management and governance:** Consistent tone from the top; responsibilities are clear to enable identification and challenge

§ **Motivation and incentives:** The right behaviours are rewarded and modelled

§ **Competence and effectiveness:** Colleagues are enabled to identify, coordinate, escalate and address risk and control matters

§ **Integrity:** Colleagues are willing to meet their risk management responsibilities; colleagues escalate issues on a timely basis.

Management and governance

Leaders must demonstrate through their everyday behaviours the importance of strong risk management and ensure that their teams have sufficient resource and capability to manage the risk environment.

The simplification of the Three Lines of Defence, as well as the reorganisation of business and risk committees with First and Second Lines of defence representation, promote ownership and accountabilities for risk management.

Motivation and incentives

Barclays seeks to ensure that compensation and promotion decisions take account of risk behaviours.

Management of risk and control is assessed as part of the annual performance appraisal process for all colleagues globally. Positive risk management behaviours will be rewarded and considered as part of promotion decisions, particularly to Managing Director.

Competence and effectiveness

A risk capability scorecard was developed for the Board Risk Committee to monitor and measure capability, and to identify any areas for improvement. Barclays has also appointed a Chief Risk Officer for Treasury and Capital and a Head of Model Risk Management.

Integrity

The *Being Barclays* global induction supports new colleagues in understanding how risk management culture and practices support how the Group does business and the link to Barclays' values. The Leadership Curriculum covers building, sustaining and supporting a trustworthy organisation and is offered to colleagues globally.

The continued promotion and reinforcement of Barclays' Values, as well as the Barclays Way was reflected in the near-perfect rate of completion of related training by employees. Messages and communications from the Chief Risk Officer emphasise the importance of early escalation of risk issues.

Risk review

Risk management

Credit risk management

Credit risk

The risk of loss to the firm from the failure of clients, customers or counterparties, including sovereigns, to fully honour their obligations to the firm, including the whole and timely payment of principal, interest, collateral and other receivables.

Overview

The granting of credit is one of the Group's major sources of income and, as a Principal Risk, the Group dedicates considerable resources to its control. The credit risk that the Group faces arises mainly from wholesale and retail loans and advances together with the counterparty credit risk arising from derivative contracts with clients. Other sources of credit risk arise from trading activities, including: debt securities, settlement balances with market counterparties; available for sale assets; and reverse repurchase agreements.

Credit risk management objectives are to:

- § maintain a framework of controls to ensure credit risk taking is based on sound credit risk management principles
- § identify, assess and measure credit risk clearly and accurately across the Group and within each separate business, from the level of individual facilities up to the total portfolio
- § control and plan credit risk taking in line with external stakeholder expectations and avoiding undesirable concentrations
- § monitor credit risk and adherence to agreed controls

§ ensure that risk-reward objectives are met.

More information of the reporting of credit risk can be found in Barclays PLC 2016 Pillar 3 Report.

Organisation and structure

Wholesale and retail portfolios are managed separately to reflect the differing nature of the assets; wholesale balances tend to be larger in value and are managed on an individual basis, while retail balances are larger in number but smaller in value and are, therefore, managed on a homogenous portfolio basis.

Credit risk management responsibilities have been structured so that decisions are taken as close as possible to the business, while ensuring robust review and challenge of performance, risk infrastructure and strategic plans. The credit risk management teams in each business are accountable to the relevant Business CRO who, in turn, reports to the Group CRO.

Board oversight and flow of risk related information

Barclays PLC Annual Report 2016 | 149

Risk review

Risk management

Credit risk management

Roles and responsibilities

The responsibilities of the credit risk management teams in the businesses, the sanctioning team and other shared services include: sanctioning new credit agreements (principally wholesale); setting policies for approval of transactions (principally retail); setting risk appetite; monitoring risk against limits and other parameters; maintaining robust processes, data gathering, quality, storage and reporting methods for effective credit risk management; performing effective turnaround and workout scenarios for wholesale portfolios via dedicated restructuring and recoveries teams; maintaining robust collections and recovery processes/units for retail portfolios; and review and validation of credit risk measurement models.

For wholesale portfolios, credit risk approval is undertaken by experienced credit risk professionals operating within a clearly defined delegated authority framework, with only the most senior credit officers entrusted with the higher levels of delegated authority. The largest credit exposures, which are outside the Risk Sanctioning Unit or Risk Distribution Committee authority require the support of the Group Senior Credit Officer (GSCO), the Group's most senior credit risk sanctioner. For exposures in excess of the GSCO's authority, approval by Group CRO is required. In the wholesale portfolios, credit risk managers are organised in sanctioning teams by geography, industry and/or product.

The role of the Central Risk function is to provide Group-wide direction, oversight and challenge of credit risk-taking. Central Risk sets the Credit Risk Control Framework, which provides the structure within which credit risk is managed, together with supporting credit risk policies.

Credit risk mitigation

The Group employs a range of techniques and strategies to actively mitigate the counterparty credit risks. These can broadly be divided into three types:

§ netting and set-off

§ collateral

§ risk transfer.

Netting and set-off

In most jurisdictions in which the Group operates, credit risk exposures can be reduced by applying netting and set-off. In exposure terms, this credit risk mitigation technique has the largest overall impact on net exposure to derivative transactions, compared with other risk mitigation techniques.

For derivative transactions, the Group's normal practice is to enter into standard master agreements with counterparties (e.g. ISDAs). These master agreements typically allow for netting of credit risk exposure to a counterparty resulting from derivative transactions against the obligations to the counterparty in the event of default, and so produce a lower net credit exposure. These agreements may also reduce settlement exposure (e.g. for foreign exchange transactions) by allowing payments on the same day in the same currency to be set-off against one another.

Collateral

The Group has the ability to call on collateral in the event of default of the counterparty, comprising:

§ home loans: a fixed charge over residential property in the form of houses, flats and other dwellings

§ wholesale lending: a fixed charge over commercial property and other physical assets, in various forms

§ other retail lending: includes charges over motor vehicles and other physical assets, second lien charges over residential property, and finance lease receivables

§ derivatives: the Group also often seeks to enter into a margin agreement (e.g. CSA) with counterparties with which the Group has master netting agreements in place

§ reverse repurchase agreements: collateral typically comprises highly liquid securities which have been legally transferred to the Group subject to an agreement to return them for a fixed price

§ financial guarantees and similar off-balance sheet commitments: cash collateral may be held against these arrangements.

Risk transfer

A range of instruments including guarantees, credit insurance, credit derivatives and securitisations can be used to transfer credit risk from one counterparty to another. These mitigate credit risk in two main ways:

§ if the risk is transferred to a counterparty which is more credit worthy than the original counterparty, then overall credit risk is reduced

§ where recourse to the first counterparty remains, both counterparties must default before a loss materialises. This is less likely than the default of either counterparty individually so credit risk is reduced.

Detailed policies are in place to ensure that credit risk mitigation is appropriately recognised and recorded and more information can be found in the Barclays PLC 2016 Pillar 3 Report.

Risk review

Risk management

Market risk management

Market risk

The risk of loss arising from potential adverse changes in the value of the firm's assets and liabilities from fluctuation in market variables including, but not limited to, interest rates, foreign exchange, equity prices, commodity prices, credit spreads, implied volatilities and asset correlations.

Overview

Market risk

Market risk arises primarily as a result of client facilitation in wholesale markets, involving market making activities, risk management solutions and execution of syndications. Upon execution of a trade with a client, the Group will look to hedge against the risk of the trade moving in an adverse direction. Mismatches between client transactions and hedges result in market risk due to changes in asset prices.

Market risk in the businesses resides primarily in Barclays International, Group Treasury and Non-Core. These businesses have the mandate to incur market risk.

Market risk oversight and challenge is provided by business committees and Group committees, including the Market Risk Committee.

Roles and responsibilities

The objectives of market risk management are to:

§ understand and control market risk by robust measurement, limit setting, reporting and oversight

§ facilitate business growth within a controlled and transparent risk management framework

§ ensure that market risk in the businesses is controlled according to the allocated appetite

§ support the Non-Core strategy of asset reductions by ensuring that market risk remains within agreed risk appetite. To ensure the above objectives are met, a well-established governance structure is in place to manage these risks consistent with the ERMF. See page 146 on risk management strategy, governance and risk culture.

The BRC recommends market risk appetite to the Board for their approval. The Market Risk Principal Risk Officer (MRPRO) is responsible for the Market Risk Control Framework and, under delegated authority from the CRO, agrees with the BCROs a limit framework within the context of the approved market risk appetite.

Across the Group, market risk oversight and challenge is provided by business committees, Group committees, including the Market Risk Committee.

The Market Risk Committee approves and makes recommendations concerning the Group-wide market risk profile. This includes overseeing the operation of the Market Risk Framework and associated standards and policies; reviewing arising market or regulatory issues, limits and utilisation; and risk appetite levels to the Board. The Committee is chaired by the MRPRO and attendees include the business heads of market risk, business aligned market risk managers and Internal Audit.

The head of each business is accountable for all market risks associated with its activities, while the head of the market risk team covering each business is responsible for implementing the risk control framework for market risk.

More information on market risk management can be found in Barclays PLC 2016 Pillar 3 Report.

Organisation and structure

Risk review

Risk management

Treasury and capital risk management

Treasury and capital risk

The risk that the Group may not achieve its business plans because of the availability of planned liquidity, a shortfall in capital or a mismatch in the interest rate exposures of its assets and liabilities. The Treasury and Capital Risk function is an independent risk function with responsibility for oversight of the following risks:

Liquidity risk: The risk that the firm is unable to meet its contractual or contingent obligations or that it does not have the appropriate amount, tenor and composition of funding and liquidity to support its assets

Capital risk: The risk that the firm has an insufficient level or composition of capital to support its normal business activities and to meet its regulatory capital requirements under normal operating environments or stressed conditions (both actual and as defined for internal planning or regulatory testing purposes). This includes the risk from the firm's pension plans

Interest rate risk in the banking book: The risk that the firm is exposed to capital or income volatility because of a mismatch between the interest rate exposures of its (non-traded) assets and liabilities.

Overview

Barclays Treasury manages treasury and capital risk on a day-to-day basis with the Treasury Committee acting as the principal management body. To ensure effective oversight and segregation of duties and in line with the ERMF, the Treasury and Capital Risk function is responsible for oversight of key capital and liquidity risk management activities.

To ensure effective oversight and segregation of duties and in line with the ERMF, the Treasury and Capital Risk function is responsible for oversight of key capital, liquidity, non-traded market risk (NTMR) and pension risk

management activities. The following describes the structure and governance associated with the risk types within the Treasury and Capital Risk function.

Organisation and structure

Liquidity risk management

Overview

The efficient management of liquidity is essential to the Group in retaining the confidence of the financial markets and ensuring that the business is sustainable. There is a control framework in place for managing liquidity risk and this is designed to meet the following objectives:

§ to maintain liquidity resources that are sufficient in amount and quality and a funding profile that is appropriate to meet the liquidity risk appetite as expressed by the Board

§ to maintain market confidence in the Group's name.

This is achieved via a combination of policy formation, review and governance, analysis, stress testing, limit setting and monitoring. Together, these meet internal and regulatory requirements.

Roles and responsibilities

The Treasury and Capital Risk function is responsible for the management and governance of the liquidity risk mandate defined by the Board. Treasury has the primary responsibility for managing liquidity risk within the set risk appetite.

Liquidity risk management

A control framework is in place for Liquidity Risk under which the Treasury function operates. The control framework describes liquidity risk management processes, associated policies and controls that the Group has implemented to manage liquidity risk within the Liquidity Risk Appetite (LRA) and is subject to annual review.

The Board sets the LRA over Group stress tests and is represented as the level of risk the Group chooses to take in pursuit of its business objectives and in meeting its regulatory obligations. The approved LRA is implemented in line with the control framework and policy for liquidity risk.

Control framework

Barclays has a comprehensive control framework for managing the Group's liquidity risk. It is designed to deliver the appropriate term and structure of funding consistent with the LRA set by the Board.

The control framework incorporates a range of ongoing business management tools to monitor, limit and stress test the Group's balance sheet and contingent liabilities and a Contingency Funding Plan. Limit setting and transfer pricing are tools that are designed to control the level of liquidity risk taken and drive the appropriate mix of funds. Together, these tools reduce the likelihood that a liquidity stress event could lead to an inability to meet the Group's obligations as they fall due.

The stress tests assess the potential contractual and contingent stress outflows under a range of scenarios, which are then used to determine the size of the liquidity pool that is immediately available to meet anticipated outflows if a stress occurs.

The Group maintains a Contingency Funding Plan which details how liquidity stress events of varying severity would be managed. Since the precise nature of any stress event cannot be known in advance, the plans are designed to be flexible to the nature and severity of the stress event and provide a menu of options that can be drawn upon as required. Barclays also maintains Recovery Plans which consider actions to generate additional liquidity in order to facilitate recovery in a severe stress.

Risk Appetite and planning

Barclays has established a LRA over Group stress tests and is represented as the level of liquidity risk the Group chooses to take in pursuit of its business objectives and in meeting its regulatory obligations.

The key expression of the liquidity risk is through stress tests. It is measured with reference to the liquidity pool compared to anticipated stressed net contractual and contingent outflows for each of five stress scenarios. Barclays has defined both internal short-term and long-term LRA stress test metrics.

The LRA for internal stress tests is approved by the Board. The LRA is reviewed on a continuous basis and is subject to formal review at least annually as part of the Individual Liquidity Adequacy Assessment Process (ILAAP).

The stress outflows are used to determine the size of the Group Liquidity Pool, which represents those resources immediately available to meet outflows in a stress. In addition to the liquidity pool, the control framework and policy provides for other management actions, including generating liquidity from other liquid assets on the Group's balance sheet in order to meet additional stress outflows, or to preserve or restore the Liquidity Pool in the event of a liquidity stress.

Liquidity limits

Barclays manages limits on a variety of on- and off-balance sheet exposures, a sample of which is shown in the table below. These limits serve to control the overall extent and composition of liquidity risk taken by managing exposure to the cash outflows.

Early warning indicators

Barclays monitors a range of market indicators for early signs of liquidity risk either in the market or specific to Barclays, a sample of which are shown in the table below. These are designed to immediately identify the emergence of increased liquidity risk to maximise the time available to execute appropriate mitigating actions. Early warning indicators are used as part of the assessment of whether to invoke the Group's Contingency Funding Plan (CFP).

Contingency funding plan and recovery and resolution planning

Edgar Filing: BARCLAYS PLC - Form 6-K

Barclays maintains a CFP which is designed to provide a framework where a liquidity stress could be effectively managed. The CFP is proportionate to the nature, scale and complexity of the business and is tested to ensure that it is operationally robust. The CFP details the circumstances in which the plan could be invoked, including as a result of adverse movements in liquidity early warning indicators. As part of the plan, the Barclays Treasurer has established a Liquidity Management Committee (LMC). On invocation of the CFP by the Executive Committee, the LMC would meet to identify the likely impact of

home.barclays/annualreport

Barclays PLC Annual Report 2016 | 153

Risk review

Risk management

Treasury and capital risk management

the event on the Group and determine the appropriate response for the nature and severity of the stress.

The CFP provides a communication plan and includes management actions to respond to liquidity stresses of varying severity. This could include monetising the liquidity pool, slowing the extension of credit, increasing the tenor of funding and securitising or selling assets.

Capital risk management

Overview

Capital risk is managed through ongoing monitoring and management of the capital position, regular stress testing and a robust capital governance framework.

Organisation and structure

The management of capital risk is integral to the Group's approach to financial stability and sustainability management, and is embedded in the way businesses and legal entities operate.

Capital risk management is underpinned by a control framework and policy. The capital management strategy, outlined in the Group and legal entity capital plans, is developed in alignment with the control framework and policy for capital risk, and is implemented consistently in order to deliver on the Group's objectives.

The Board approves the Group capital plan, internal and regulatory stress tests, and the Group recovery plan. The Treasury Committee is responsible for monitoring and managing capital risk in line with the Group's capital management objectives, capital plan and risk frameworks. The Board Risk Committee reviews the risk profile, and annually reviews risk appetite and the impact of stress scenarios on the Group capital plan/forecast in order to agree the Group's projected capital adequacy.

Local management ensures compliance with an entity's minimum regulatory capital requirements by reporting to local Asset and Liability Committees with oversight by the Group's Treasury Committee, as required.

Roles and responsibilities

Treasury has the primary responsibility for managing and monitoring capital and reports to the Group Finance Director. The Treasury and Capital Risk function contains a Capital Risk Oversight team, and is an independent risk function that reports to the Group CRO and is responsible for oversight of capital risk.

Capital risk management

The Group's capital management strategy is driven by the strategic aims of the Group and the risk appetite set by the Board. The Group's objectives are achieved through well embedded capital management practices.

Capital planning and allocation

The Group assesses its capital requirements on multiple bases, with the Group's capital plan set in consideration of the Group's risk profile and appetite, strategic and performance objectives, regulatory requirements, and market and internal factors, including the results of stress testing. The capital plan is managed on a top-down and bottom-up basis through both short-term and medium-term financial planning cycles, and is developed with the objective of ensuring that the Group maintains an adequate level of capital to support its capital requirements.

The PRA determines the regulatory capital requirements for the consolidated Group. Under these regulatory frameworks, capital requirements are set in consideration of the level of risk that the firm is exposed to and the factors above, and are measured through both risk-based RWAs and leverage-based metrics. An internal assessment of the Bank's capital adequacy is undertaken through the Internal Capital Adequacy Assessment Process (ICAAP) and is used to inform the capital requirements of the firm.

The Group expects to meet the minimum requirements for capital and leverage both during the transition period and upon full implementation, and also holds an internal buffer sized according to the firm's assessment of capital risk.

Through the capital planning process, capital allocations are approved by the Group Executive Committee, taking into consideration the risk appetite and strategic aims of the Group. Regulated legal entities are, at a minimum, capitalised to meet their current and forecast regulatory and business requirements.

Monitoring and reporting

Capital is managed and monitored to ensure that Barclays capital plans remain appropriate and that risks to the plans are considered.

Limits are in place to support alignment with the capital plan and adherence to regulatory requirements, and are monitored through appropriately governed forums. Capital risks against firm-specific and macroeconomic early warning indicators are monitored and reported to the Treasury Committee, with clear escalation channels to senior management. This enables a consistent and objective approach to monitoring the capital outlook against the capital plan, and supports the early identification when outlooks deteriorate.

Foreign exchange risk

The Group has capital resources and RWAs denominated in foreign currencies. Changes in foreign exchange rates result in changes in the Sterling equivalent value of foreign currency denominated capital resources and RWAs. As a result, the Group's regulatory capital ratios are sensitive to foreign currency movements.

The Group's capital ratio management strategy is to minimise the volatility of the capital ratios caused by foreign exchange rate movements. To achieve this, the Group aims to maintain the ratio of foreign currency CET1, Tier 1 and Total capital resources to foreign currency RWAs the same as the Group's consolidated capital ratios.

The Group's investments in foreign currency subsidiaries and branches, to the extent that they are not hedged for foreign exchange movements, translate into GBP upon consolidation creating CET1 capital resources sensitive to foreign currency movements. Changes in the GBP value of the investments due to foreign currency movements are captured in the currency translation reserve, resulting in a movement in CET1 capital.

To create foreign currency Tier 1 and Total Capital resources additional to the CET1 capital resources, the Group issues debt capital in non-Sterling currencies, where possible. This is primarily achieved through the issuance of debt capital from Barclays PLC or Barclays

Capital management information is readily available to support the Senior Management's strategic and day-to-day business decision making.

Bank PLC in US Dollar and Euro, but can also be achieved by subsidiaries issuing capital in local currencies.

Stress testing and risk mitigation

Internal Group-wide stress testing is undertaken to quantify and understand the impact of sensitivities on the capital plan and capital ratios arising from stressed macroeconomic conditions. Recent economic, market and peer institution stresses are used to inform the assumptions developed for internal stress tests and to assess the effectiveness of mitigation strategies.

The Group also undertakes stress tests prescribed by the BoE and EBA, and legal entities undertake stress tests prescribed by their local regulators. These stress tests inform decisions on the size and quality of the internal capital buffer required and the results are incorporated into the Group capital plan to ensure adequacy of capital under normal and severe, but plausible stressed conditions.

Actions are identified as part of the stress tests that can be taken to mitigate the risks that may arise in the event of material adverse changes in the current economic and business outlook. As an additional layer of protection, the Group Recovery Plan defines the actions and implementation strategies available to the Group to increase or preserve capital resources in the situation that a stress occurs that is more severe than anticipated.

Transferability of capital

Surplus capital held in Group entities is required to be repatriated to Barclays Bank PLC in the form of dividends and/or capital repatriation, subject to local regulatory requirements, exchange controls and tax implications. This approach provides optimal flexibility on the redeployment of capital across legal entities. Pre and post the implementation of ring-fencing, capital is managed for the Group as a whole as well as its operating subsidiaries to ensure fungibility and redeployment of

Pension risk

The Group maintains a number of defined benefit pension schemes for past and current employees. The ability of the pension fund to meet the projected pension payments is maintained principally through investments.

Pension risk arises because the estimated market value of the pension fund assets might decline; investment returns might reduce; or the estimated value of the pension liabilities might increase as a result of changes to the market process. The Group monitors the market risks arising from its defined benefit pension schemes and works with the Trustees to address shortfalls. In these circumstances, the Group could be required or might choose to make extra contributions to the pension fund. The Group's main defined benefit scheme was closed to new entrants in 2012.

capital while meeting relevant internal and regulatory targets at entity levels.

Barclays PLC Annual Report 2016 | 155

Risk review

Risk management

Treasury and capital risk management

Interest rate risk in the banking book management

Overview

Banking book operations generate non-traded market risk, primarily through interest rate risk arising from the sensitivity of net interest margins to changes in interest rates. To manage interest rate risk within its defined risk appetite, the principal banking businesses engage in internal derivative trades with Treasury. However, the businesses remain susceptible to market risk from six key sources:

- § **direct risk:** the mismatch between the run-off of product balances and the associated interest rate hedge, given that the balance sheet is held static

- § **structural risk:** the impact of the rate shock on the rolling hedge replenishment rate on non-maturity products, given that the balance sheet is held static

- § **prepayment risk:** balance run-off may be faster or slower than expected, due to customer behaviour in response to general economic conditions or interest rates. This can lead to a mismatch between the actual balance of products and the hedges executed with Treasury based on initial expectations

- § **recruitment risk:** the volume of new business may be lower or higher than expected, requiring the business to unwind pre-hedging or execute hedging transactions with Treasury at different rates than expected

- § **residual risk and margin compression:** the business may retain a small element of interest rate risk to facilitate the day-to-day management of customer business. Additionally, in the current low interest rate environment, deposits on which the Group sets the interest rate are exposed to margin compression. This is because for any further fall in base rates the Group must absorb an increasing amount of the rate move in its margin

- § **lag risk:** the risk of being unable to re-price products immediately after a change in interest rates due to both mandatory notification periods and operational constraints in large volume mailings. This is highly prevalent in managed rates savings product (e.g. Everyday Saver) where customers must be informed in writing of any planned reduction in their savings rates.

Non-traded market risk also arises from the Liquidity Buffer investment portfolio, which is managed to a defined risk appetite. Investments in the liquidity buffer are generally subject to available for sale accounting rules; changes in the value of these assets impact capital via the available for sale reserve.

Roles and responsibilities

The Treasury Market Risk team:

§ provides risk management oversight and monitoring of all traded and non-traded market risk in Treasury, which specifically includes risk management of the liquidity buffer, funding activities, asset and liability management hedging, residual interest rate risk from the hedge accounting solution and foreign exchange translation hedging

§ sets and monitors risk limits to ensure non-traded market risk taken in Treasury and the customer banking book adheres to agreed risk appetite.

The Interest Rate Risk in the Banking Book team:

§ assesses interest rate risk in the banking book, particularly as it relates to customer banking book and Treasury

§ acts as review and challenge of the First Line's risk management practices and decisions including the hedging activity performed by Treasury on behalf of the business

§ acts as review and challenge for the behavioural assumptions used in hedging and transfer pricing.

Risk review

Risk management

Operational risk management

Operational risk

The risk of loss to the firm from inadequate or failed processes or systems, human factors or due to external events (for example fraud) where the root cause is not due to credit or market risks.

Overview

The management of operational risk has two key objectives:

§ minimise the impact of losses suffered, both in the normal course of business (small losses) and from extreme events (large losses)

§ improve the effective management of the Group and strengthen its brand and external reputation.

The Group is committed to the management and measurement of operational risk and was granted a waiver by the FSA (now the PRA) to operate an Advanced Measurement Approach (AMA) for operational risk, which commenced in January 2008. The majority of the Group calculates regulatory capital requirements using AMA (94% of capital requirements), except for small parts of the organisation acquired since the original permission (6% of capital requirements) using the Basic Indicator Approach (BIA). The Group works to benchmark its internal operational risk management and measurement practices with peer banks and to drive the further development of advanced techniques.

The Group is committed to operating within a strong system of internal controls that enables business to be transacted and risk taken without exposing the Group to unacceptable potential losses or reputational damages. The Group has an overarching framework that sets out the approach to internal governance. This guide establishes the mechanisms and processes by which the Board directs the organisation, through setting the tone and expectations from the top, delegating authority and monitoring compliance.

Organisation and structure

Operational Risk comprises a number of specific risks defined as follow:

- § **external supplier:** inadequate selection and ongoing management of external suppliers
- § **financial reporting:** reporting misstatement or omission within external financial or regulatory reporting
- § **fraud:** dishonest behaviour with the intent to make a gain or cause a loss to others
- § **information:** inadequate protection of the Group's information in accordance with its value and sensitivity
- § **payments process:** failure in operation of payments processes
- § **people:** inadequate people capabilities, and/or performance/reward structures, and/or inappropriate behaviours
- § **premises and security:** unavailability of premises (to meet business demand) and/or safe working environments, and inadequate protection of physical assets, employees and customers against external threats
- § **taxation:** failure to comply with tax laws and practice which could lead to financial penalties, additional tax charges or reputational damages
- § **technology (including cyber security):** failure to develop and deploy secure, stable and reliable technology solutions which includes risk of loss or detriment to the Group's business and customers as a result of actions committed or facilitated through the use of networked information systems
- § **transaction operations:** failure in the management of critical transaction processes.

In order to ensure complete coverage of the potential adverse impacts on the Group arising from operational risk, the operational risk taxonomy extends beyond the operational risks listed above to cover areas included within conduct risk. For more information on conduct risk please see page 160.

These risks may result in financial and/or non-financial impacts including legal/regulatory breaches or reputational damages.

Organisation and structure

Risk review

Risk management

Operational risk management

Roles and responsibilities

The prime responsibility for the management of operational risk and the compliance with control requirements rests with the business and functional units where the risk arises. The operational risk profile and control environment is reviewed by business management through specific meetings which cover governance, risk and control. Businesses are required to report their operational risks on both a regular and an event-driven basis. The reports include a profile of the material risks that may threaten the achievement of their objectives and the effectiveness of key controls, operational risk events and a review of scenarios.

The Group Head of Operational Risk is responsible for establishing, owning and maintaining an appropriate Group-wide Operational Risk Framework and for overseeing the portfolio of operational risk across the Group.

Operational risk management acts in a Second Line of Defence capacity, and is responsible for implementation of the framework and monitoring operational risk events and risk exposures. Key indicators (KIs) allow the Group to monitor its operational risk profile and alert management when risk levels exceed acceptable ranges or risk appetite levels and drive timely decision making and actions. Through attendance at business GRC meetings, operational risk management provides specific risk input into the issues highlighted and the overall risk profile of the business. Operational risk issues escalated from these meetings are considered through the Second Line of Defence review meetings. Depending on their nature, the outputs of these meetings are presented to the BRC or the BAC.

Risk and control self-assessments

The Group identifies and assesses all material risks within each business and evaluates the key controls in place to mitigate those risks. Managers in the businesses use self-assessment techniques to identify risks, evaluate the effectiveness of key controls in place and assess whether the risks are being effectively managed. The businesses are then able to make decisions on what action, if any, is required to reduce the level of risk to the Group. These risk assessments are monitored on a regular basis to ensure that each business continually understands the risks it faces.

Risk review

Risk management

Model risk management

Model risk

The risk of the potential adverse consequences from financial assessments or decisions based on incorrect or misused model outputs and reports.

Overview

Barclays uses models to support a broad range of activities, including informing business decisions and strategies, measuring and limiting risk, valuing exposures, conducting stress testing, assessing capital adequacy, managing client assets, and meeting reporting requirements.

Because models are imperfect and incomplete representations of reality, they may be subject to errors affecting the accuracy of their output.

Model errors can result in inappropriate business decisions being made, financial loss, regulatory risk, reputational risk and/or inadequate capital reporting.

Models may also be misused, for instance applied to products that they were not intended for, or not adjusted, where fundamental changes to their environment would justify re-evaluating their core assumptions.

Errors and misuse are the primary sources of model risk.

Robust model risk management is crucial to ensuring that model risk is assessed and managed within a defined risk appetite. Strong model risk culture, appropriate technology environment, and adequate focus on understanding and resolving model limitations are crucial components.

Organisation and structure

Barclays allocates substantial resources to identify and record models and their usage, document and monitor the performance of models, validate models and ensure that model limitations are adequately addressed.

Barclays has a dedicated Model Risk Management (MRM) function that consists of two main units: the Independent Validation Unit (IVU), responsible for model validation and approval, and Model Governance and Controls (MGC), covering model risk governance, controls and reporting, including ownership of model risk policy.

The model risk policy prescribes Group-wide, end to end requirements for the identification, measurement and management of model risk, covering model documentation, development, implementation, monitoring, annual review, independent validation and approval, change and reporting processes. The Policy is supported by global Standards covering model inventory, documentation, validation, complexity and materiality, testing and monitoring, overlays, as well as vendor models and CCAR benchmarking.

Barclays is continuously enhancing model risk management. MRM reports to the Group Chief Risk Officer and operates a global framework. Implementation of best practice standards is a central objective of the Group. Large new model development programmes are currently in motion to implement the model requirements of UK structural reform, CCAR, FRTB and IFRS9.

Roles and responsibilities

The key model risk management activities include:

§ ensuring that models are correctly identified across all relevant areas of the firm, and recorded in the Group Models Database (GMD), the Group-wide model inventory. The heads of the relevant areas (typically, the Business Chief Risk Officers, Business Chief Executive Officers, the Treasurer, the Chief Financial Officer) annually attest to the completeness and accuracy of the model inventory. MGC undertakes regular conformance reviews on the model inventory. These activities are detailed in the Model Inventory, Workflow and Taxonomy Standard

§ ensuring that every model has a model owner who is accountable for the model. The model owner must sign off models prior to submission to IVU for validation. The model owner works with the relevant technical teams (model developers, implementation, monitoring, data services, regulatory) to ensure that the model presented to IVU is and remains fit for purpose, in accordance with the Model Documentation Standard, and the Model Testing, Monitoring and Annual Review Standard

§ ensuring that every model is subject to validation and approval by IVU, prior to being implemented and on a continual basis, in accordance with the Model Validation and Approval Standard. The level of review and challenge applied by IVU is tailored to the materiality and complexity of each model. Validation includes a review of the model assumptions, conceptual soundness, data, design, performance testing, compliance with external requirements if applicable, as well as any limitations, proposed remediation and overlays with supporting rationale. Material model changes are subject to prioritised validation and approval

§ specific Standards cover model risk management activities relating to CCAR benchmarking and challenger modelling, model overlays, vendor models, and model complexity and materiality.

Organisation and structure

Risk review

Risk management

Conduct risk management

Conduct risk

The risk of detriment to customers, clients, market integrity, competition or Barclays from the inappropriate supply of financial services, including instances of wilful or negligent misconduct.

Overview

The Group defines, manages and mitigates conduct risk with the goals of providing positive customer and client outcomes and protecting market integrity. This includes taking reasonable steps to ensure our culture and strategy are appropriately aligned to these goals; our products and services are reasonably designed and delivered to meet the needs of our customers and clients as well as promoting the fair and orderly operation of the markets in which we do business.

As part of the Enterprise Risk Management Framework (ERMF) refresh (page 146), Reputation risk has been designated as a Principal Risk and Financial Crime has been designated as a Risk Category under Conduct Risk.

Organisation and structure

The Group Risk Committee (GRC) is the most senior Executive body responsible for reviewing and monitoring the effectiveness of Barclays' management of Conduct risk.

Roles and responsibilities

The Conduct Risk Principal Risk Framework (PRF) comprises a number of elements that allow the Group to manage and measure its conduct risk profile.

The PRF is implemented vertically across the Group through an organisational structure that requires all businesses to implement and operate their own conduct risk frameworks that meet the requirements within the ERMF.

The primary responsibility for managing conduct risk and compliance with control requirements sits with the business where the risk arises. The Conduct Risk Accountable Executive for each business is responsible for ensuring the implementation of, and adherence to the PRF.

Edgar Filing: BARCLAYS PLC - Form 6-K

The Group Chief Compliance Officer is responsible for owning and maintaining an appropriate Group-wide Conduct Risk PRF and for overseeing Group-wide conduct risk management.

Businesses are required to report their conduct risks on both a quarterly and an event-driven basis. The quarterly reports detail the conduct risks inherent within the business strategy and include forward looking horizon scanning analysis as well as backward looking evidence-based indicators from both internal and external sources. For details please refer to the Risk Review, Conduct Risk Performance section of this report on page 227.

Organisation and structure

Risk review

Risk management

Reputation risk management

Reputation risk

The risk that an action, transaction, investment or event will reduce trust in the firm's integrity and competence by clients, counterparties, investors, regulators, employees or the public.

Overview

A reduction of trust in Barclays' integrity and competence may reduce the attractiveness of Barclays to stakeholders and could lead to negative publicity, loss of revenue, regulatory or legislative action, loss of existing and potential client business, reduced workforce morale and difficulties in recruiting talent. Ultimately it may destroy shareholder value.

With effect from 2017, Reputation risk has been redesignated as a Principal Risk within the Enterprise Risk Management Framework.

Organisation and structure

The Group Risk Committee (GRC) is the most senior Executive body responsible for reviewing and monitoring the effectiveness of Barclays' management of Reputation risk.

Roles and responsibilities

The Chief Compliance Officer is accountable for ensuring that a Reputation Principal Risk Framework and policies are developed and that they are subject to limits, monitored, reported on and escalated, as required.

Reputation risk is by nature pervasive and can be difficult to quantify, requiring more subjective judgement than many other risks. The Reputation Principal Risk Framework sets out what is required to ensure Reputation risk is managed effectively and consistently across the bank.

The primary responsibility for identifying and managing Reputation risk and adherence to the control requirements sits with the business and support functions where the risk arises.

Edgar Filing: BARCLAYS PLC - Form 6-K

Each business is required to operate within established Reputation risk appetite and to submit quarterly reports to the Group Reputation Management team, highlighting their most significant current and potential Reputation risks and issues and how they are being managed. These reports are a key internal source of information for the quarterly Reputation risk reports which are prepared for the Group Risk Committee and the Board Reputation Committee.

Risk review

Risk management

Legal risk

Legal risk

The risk of loss or imposition of penalties, damages or fines from the failure of the firm to meet its legal obligations including regulatory or contractual requirements.

Overview

With effect from 2017, Legal risk, which was previously a Key Risk under operational risk, has been re-designated as a Principal Risk within the Enterprise Risk Management Framework.

The Legal Risk Framework prescribes Group-wide requirements for the identification, measurement and management of Legal risk, covering assessment, risk appetite, key indicators and governance. The Group General Counsel (GCC) is the Legal Principal Risk Officer and owns the Legal Risk Framework and the associated legal policies.

Legal risk is defined by the five respective Legal Policies:

§ **Contractual arrangements** failure to have enforceable contracts in place or for contracts to be enforceable as intended

§ **Litigation management** failure to adequately manage litigation involving Barclays as either claimant or defendant

§ **Intellectual property (IP)** failure to protect the Group's IP assets or Barclays infringing IP rights of third parties

§ **Competition/antitrust law** failure to follow competition/antitrust law or failure to manage relationships with competition and antitrust authorities

§ **Use of law firms** failure to control instruction of an external law firm.

Group-wide and Business/Function specific Standards may be put in place to support the implementation of the legal policies. The standards are aligned to one of the policies and are implemented by Businesses/Functions.

Organisation and structure

The Group Risk Committee (GRC) is the most senior executive body responsible for reviewing and monitoring the effectiveness of Barclays' management of Legal risk. Escalation paths from this forum exist to the Board of Barclays PLC.

Roles and responsibilities

The Legal Risk Framework sets out what is required to ensure Legal risk is managed effectively and consistently across the bank.

The primary responsibility for managing Legal risk and adherence to the control requirements sits with the business where the risk arises.

On behalf of the businesses, the aligned General Counsel or Legal Senior Management, will undertake Legal risk appetite assessments and provide advice and guidance on Legal risk management. The Legal risk assessment includes both quantitative and qualitative criteria including:

§ Knowledge of Legal risk material control issues or weaknesses

§ Emerging risks resulting from upcoming changes in the control environment, systems, or internal organisational structures

§ Potential implications on Barclays of forthcoming changes in the external legal and regulatory environment and/or prevailing decisions from courts and enforcing authorities as they relate to defined legal risks.

The Legal Principal Risk Officer is responsible for owning and maintaining an appropriate Legal Risk Framework and for overseeing Group-wide legal risk management.

Risk review

[Risk performance](#)

Maintaining our risk profile at an acceptable and appropriate level is essential to ensure our continued performance. This section provides a review of the performance of the Group in 2016 for each of the five Principal Risks in operation throughout the year, which are credit, market, funding, operational, and conduct risk.

Please refer to the Risk Management section (pages 145 to 162) for an overview of the changes to Barclays' Principal Risk taxonomy in December 2016.

Risk review

Risk performance

Credit risk

Analysis of credit risk

Credit risk is the risk of the Group suffering financial loss should any of its customers, clients, or market counterparties fail to fulfil their contractual obligations to the Group.

This section details the Group's credit risk profile and provides information on the Group's exposure to loans and advances to customer and banks, maximum exposures with collateral held and net impairment charges raised in the year. It provides information on balances that are categorised as credit risk loans, balances in forbearance, as well as exposure to and performance metrics for specific portfolios and asset types.

Key metrics

Credit impairment charges in 2016 were 35% higher than 2015:

+£608m Group

Loan impairment increased reflecting a higher charge following the management review of the UK and US cards portfolio impairment modelling and a number of single name exposures.

+£555m Retail Core

Increased charges primarily due to a charge following the review of UK and US cards portfolio impairment modelling. Underlying performance across key portfolios has remained stable and broadly within expectations.

+£63m Wholesale Core

Increased charges reflecting a limited range of single name exposures.

-£10m Non-Core

Decreased charges reflecting lower charges in European businesses:

Net Loans and advances to customers and banks decreased by 2% in 2016

The loan loss rate rose to 53bps.

Risk review

Risk performance

Credit risk

Credit risk

Credit risk is the risk of the Group suffering financial loss if any of its customers, clients or market counterparties fails to fulfil their contractual obligations to the Group.

All disclosures in this section (pages 166 to 168) are unaudited unless otherwise stated. Disclosures for 2016 exclude BAGL balances which are now recognised as held for sale, comparative tables for 2015 include BAGL balances unless otherwise stated.

Overview

Credit risk represents a significant risk to the Group and mainly arises from exposure to wholesale and retail loans and advances together with the counterparty credit risk arising from derivative contracts entered into with clients. A summary of performance may be found below.

This section provides an analysis of areas of particular interest or potentially of higher risk, including: i) balance sheet, including the maximum exposure, and collateral, and loans and advances; ii) areas of concentration; iii) exposure to and performance metrics for specific portfolios and assets types, including home loans, credit cards and UK commercial real estate; iv) exposure and performance of loans on concession programmes, including forbearance; v) problem loans, including credit risk loans (CRLs); and vi) impairment, including impairment stock and management adjustments to model outputs.

Please see risk management section on pages 149 to 150 for details of governance, policies and procedures.

Summary of performance in the period

Credit impairment charges increased £0.6bn to £2.4bn including a £0.3bn charge in Q3 2016 following the management review of the UK and US cards portfolio impairment modelling. Overall, this resulted in an 11bps increase in the loan loss rate to 53bps.

Credit Risk Loans (CRLs) remained stable at £6.5bn (2015: £6.4bn) with the Group's CRL coverage ratio increasing to 71% (2015: 65%) mainly within retail portfolios.

Total loans and advances net of impairment decreased by £11.4bn to £449.5bn driven by a £31bn decrease due to the reclassification of BAGL balances to held for sale and £9bn from the exit of other assets in Non-Core. This was offset by lending growth of £20bn and a net £9bn increase in settlement and cash collateral balances.

Analysis of the Balance Sheet

Group's maximum exposure and collateral and other credit enhancements held

Basis of preparation

The following tables present a reconciliation between the Group's maximum exposure and its net exposure to credit risk; reflecting the financial effects of collateral, credit enhancements and other actions taken to mitigate the Group's exposure.

For financial assets recognised on the balance sheet, maximum exposure to credit risk represents the balance sheet carrying value after allowance for impairment. For off-balance sheet guarantees, the maximum exposure is the maximum amount that the Group would have to pay if the guarantees were to be called upon. For loan commitments and other credit related commitments that are irrevocable over the life of the respective facilities, the maximum exposure is the full amount of the committed facilities.

This and subsequent analyses of credit risk include only financial assets subject to credit risk. They exclude other financial assets not subject to credit risk, mainly equity securities held for trading, as available for sale or designated at fair value, and traded commodities. Assets designated at fair value in respect of linked liabilities to customers under investment contracts have also not been included as the Group is not exposed to credit risk on these assets. Credit losses in these portfolios, if any, would lead to a reduction in the linked liabilities and not result in a loss to the Group. For off-balance sheet exposures certain contingent liabilities not subject to credit risk such as performance guarantees are excluded.

Both on and off balance sheet exposures for 2016 exclude BAGL balances now held for sale. Comparative tables for 2015 include BAGL balances unless stated otherwise.

The Group mitigates the credit risk to which it is exposed through netting and set-off, collateral and risk transfer. Further detail on the Group's policies to each of these forms of credit enhancement is presented on page 36 of the Barclays PLC 2016 Pillar 3 Report.

Overview

As at 31 December 2016, the Group's net exposure to credit risk after taking into account netting and set-off, collateral and risk transfer increased 6% to £740.7bn, reflecting an increase in maximum exposure of 3% and an increase in level of mitigation held of 1%. Overall, the extent to which the Group holds mitigation against its total exposure remained stable at 47% (2015: 48%).

Of the remaining exposure left unmitigated, a significant portion relates to cash held at central banks, financial investment debt securities issued by governments, cash collateral and settlement balances, all of which are considered lower risk. Trading portfolio liability positions, which to a significant extent economically hedge trading portfolio assets but which are not held specifically for risk management purposes, are excluded from the analysis. The credit

Edgar Filing: BARCLAYS PLC - Form 6-K

quality of counterparties to derivative, financial investments and wholesale loan assets are predominantly investment grade. Further analysis on the credit quality of assets is presented on pages 169 to 170.

Where collateral has been obtained in the event of default, the Group does not, as a rule, use such assets for its own operations and they are usually sold on a timely basis. The carrying value of assets held by the Group as at 31 December 2016, as a result of the enforcement of collateral, was £16m (2015: £69m).

The Group's approach to management and representation of credit quality

Asset credit quality

All loans and advances are categorised as either neither past due nor impaired, past due but not impaired, or past due and impaired, which includes restructured loans. For the purposes of the disclosures in the balance sheet credit quality section below and the analysis of loans and advances and impairment section (page 186):

§ loans neither past due nor impaired consist predominantly of wholesale and retail loans that are performing. These loans, although unimpaired may carry an unidentified impairment

§ a loan is considered past due and classified as Higher risk when the borrower has failed to make a payment when due under the terms of the loan contract

§ loans on forbearance programmes, as defined on page 182, are categorised as Higher risk

§ the impairment allowance includes allowances against financial assets that have been individually impaired and those subject to collective impairment.

The Group uses the following internal measures to determine credit quality for loans that are performing:

Default Grade	Wholesale lending Probability of default	Credit Quality Description
1-3	0.0-0.05%	Strong
4-5	0.05-0.15%	
6-8	0.15-0.30%	
9-11	0.30-0.60%	
12-14	0.60-2.15%	Satisfactory
15-19	2.15-11.35%	
20 - 21	11.35%+	Higher risk

For retail clients, a range of analytical tools is used to derive the probability of default of clients at inception and on an ongoing basis.

For loans that are performing, these descriptions can be summarised as follows:

Strong: there is a very high likelihood of the asset being recovered in full.

Satisfactory: while there is a high likelihood that the asset will be recovered and therefore, of no cause for concern to the Group, the asset may not be collateralised, or may relate to retail facilities, such as credit card balances and unsecured loans, which have been classified as satisfactory, regardless of the fact that the output of internal grading models may have indicated a strong or high classification. At the lower end of this grade there are customers that are being more carefully monitored, for example, corporate customers which are indicating some evidence of deterioration, home loans with a high loan to value, and unsecured retail loans operating outside normal product guidelines.

Higher risk: there is concern over the obligor's ability to make payments when due. However, these have not yet converted to actual delinquency. There may also be doubts over the value of collateral or security provided. However, the borrower or counterparty is continuing to make payments when due and is expected to settle all outstanding amounts of principal and interest.

Loans that are past due are monitored closely, with impairment allowances raised as appropriate and in line with the Group's impairment policies. These loans are all considered Higher risk for the purpose of this analysis of credit quality.

Debt securities

For assets held at fair value, the carrying value on the balance sheet will include, among other things, the credit risk of the issuer. Most listed and some unlisted securities are rated by external rating agencies. The Group mainly uses external credit ratings provided by Standard & Poor's, Fitch or Moody's. Where such ratings are not available or are not current, the Group will use its own internal ratings for the securities.

Balance sheet credit quality

The following tables present the credit quality of Group assets exposed to credit risk.

Overview

As at 31 December 2016, the ratio of the Group's assets classified as strong remained broadly stable at 86% (2015: 85%) of total assets exposed to credit risk.

Risk review

Risk performance

Credit risk

Further analysis of debt securities by issuer and issuer type and netting and collateral arrangements on derivative financial instruments is presented on pages 187 and 188 respectively.

Analysis of the concentration of credit risk

A concentration of credit risk exists when a number of counterparties are located in a geographical region or are engaged in similar activities and have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. The Group implements limits on concentrations in order to mitigate the risk. The analyses of credit risk concentrations presented below are based on the location of the counterparty or customer or the industry in which they are engaged. Further detail on the Group's policies with regard to managing concentration risk is presented on page 136 of Barclays PLC 2016 Pillar 3 Report.

Geographic concentrations

As at 31 December 2016, the geographic concentration of the Group's assets remained broadly consistent with 2015. Exposure is concentrated in the UK 41% (2015: 40%), in the Americas 33% (2015: 31%) and Europe 21% (2015: 20%). The decrease of £58bn in Africa and the Middle East is due to the reclassification of BAGL balances now held for sale.

Information on exposures to Eurozone countries is presented on page 172.

Risk review

Risk performance

Credit risk

Exposures to Eurozone countries

The following table shows Barclays' most significant current exposure (above £4bn net on-balance sheet exposure) to Eurozone countries.

Basis of preparation

The Group presents the direct balance sheet exposure to credit and market risk by country, with the totals reflecting allowance for impairment, netting and cash collateral held where appropriate.

The net on-balance sheet exposure includes:

§ Loans and advances held at amortised cost, net of impairment. Settlement balances and cash collateral are excluded from this analysis

§ Trading assets and liabilities are presented by issuer type on a net basis. Where liability positions exceed asset positions by issuer type, exposures are presented as nil

§ Derivative assets and liabilities are presented by counterparty type on a net basis. Cash collateral held is then added to give a net credit exposure. Where liability positions and collateral held exceed asset positions by counterparty type, exposures are presented as nil

§ Financial investments – debt securities principally relating to investments in government bonds and other debt securities

§ Other assets held for sale. Businesses held for sale with European exposures are included within the Financial institutions category.

The analysis excludes financial assets not subject to credit risk:

§ Equity securities held for trading, as financial investments or designated at fair value, and traded commodities

Edgar Filing: BARCLAYS PLC - Form 6-K

§ Reverse repurchase agreements measured at amortised cost and at fair value which are materially fully collateralised.

Gross exposure reflects total exposures before the effects of economic hedging by way of trading portfolio liabilities, derivative liabilities and cash collateral, but after taking into account impairment allowances and IFRS netting.

The Italian home loans of £9.7bn (2015: £9.5bn) are secured on residential property with average balance weighted marked to market LTVs of 61.8% (2015: 60.6%) and CRL coverage of 36% (2015: 31%). 90 days arrear and gross charge-off rates remained stable at 1.2% (2015: 1.2%) and 0.8% (2015: 0.7%) respectively.

Industry concentrations

The concentration of the Group's assets by industry remained broadly consistent year on year. As at 31 December 2016, total assets concentrated towards banks and other financial institutions was 43% (2015: 42%), predominantly within derivative financial instruments. The proportion of the overall balance concentrated towards governments and central banks remained stable at 14% (2015: 12%) and home loans at 11% (2015: 12%).

Other risks being monitored include exposures to the oil and gas sector. Net on-balance sheet exposure to the oil and gas sector was £4.2bn (2015: £4.4bn), with contingent liabilities and commitments to this sector of £16.0bn (2015: £13.8bn). Impairment charges were £94m (2015: £106m). The ratio of the Group's net total exposures classified as strong or satisfactory was 93% (2015: 97%) of the total net exposure to credit risk to this sector.

Loans and advances designated at fair value	17,913	n/a	17,913	n/a			
Loans and advances held at fair value	20,387	n/a	20,387	n/a			
Total loans and advances	465,874	4,921	460,953	7,817			

Total loans and advances decreased by £11.4bn to £449.5bn driven by a £31bn decrease due to the reclassification of BAGL balances to held for sale and £9bn from the exit of other assets in Non-Core. This was offset by lending of £20bn driven by volume growth and foreign currency movements due to the appreciation of average US Dollar and Euro against Sterling. There was also a net £9bn increase in settlement and cash collateral balances.

Credit risk loans (CRLs) and the ratio of CRLs to gross loans and advances excluding BAGL balances now held for sale remained stable at £6.5bn (2015: £6.4bn) and 1.5% (2015: 1.6%) respectively.

Loan impairment charges increased £0.6bn to £2.4bn primarily due to increased charges following the management review of impairment modelling for UK and US cards portfolios and the impairment of a number of single name exposures. Overall, this resulted in an 11bps increase in the loan loss rate to 53bps.

Notes

- a Excluding impairment charges on available for sale investments and reverse repurchase agreements.
- b Excluding BAGL balances now held for sale.

Analysis of specific portfolios and asset types

This section provides an analysis of principal portfolios and businesses in the retail and wholesale segments. In particular, home loans, credit cards, overdrafts and unsecured loans are covered for retail segments. In addition, this section details exposures to UK commercial real estate.

Secured home loans

The UK home loans portfolio comprises first lien home loans and accounts for 98%^a (2015: 98%) of the Group's Core home loan balances and 91% (2015: 90%) of the Group's total home loan balances. Italy home loans accounts for 100% (2015: 91%) of the Group's Non-Core home loan balances and 7% (2015: 7%) of the Group's total home loan balances.

Home loans principal portfolios^b

As at 31 December

	Barclays UK	
	2016	2015
Gross loans and advances (£m)	129,136	127,750
>90 day arrears, excluding recovery book (%)	0.2	0.2
Non-performing proportion of outstanding balances (%)	0.6	0.7
Annualised gross charge-off rates (%)	0.3	0.3
Recovery book proportion of outstanding balances (%)	0.4	0.4
Recovery book impairment coverage ratio (%)	9.1	10.1

Barclays UK: Portfolio performance remained steady reflecting the continuing low base rate environment, house price appreciation and steady economic conditions. Non-performing proportion of outstanding balances and recovery book impairment coverage reduced due to a reduction in repossession stock.

Within the UK home loans portfolio:

§ owner-occupied interest-only home loans comprised 31% (2015: 32%) of total balances. The average balance weighted LTV on these loans reduced to 41.7% (2015: 44.7%) as house prices have improved across core regions, and >90 day arrears excluding recovery book remained steady at 0.2% (2015: 0.2%)

§

Edgar Filing: BARCLAYS PLC - Form 6-K

buy-to-let home loans comprised 9% (2015: 9%) of total balances. The average balance weighted LTV reduced to 52.6% (2015: 54.6%), and >90 day arrears excluding recovery book reduced to 0.1% (2015: 0.2%).

Edgar Filing: BARCLAYS PLC - Form 6-K

c Portfolio marked to market based on the most updated valuation including recovery book balances. Updated valuations reflect the application of the latest house price index available in the country as at 31 December 2016.

Balance weighted LTV in the UK reduced to 47.7% (2015: 49.2%) due to an increase in average house prices across core regions.

The house price appreciation resulted in a 23% reduction in home loans that have LTV >100% to £239m (2015: £310m).

Home loans principal portfolios new lending

As at 31 December

	Barclays UK	
	2016	2015
New home loan bookings (£m)	19,885	18,812
New home loans proportion above 85% LTV (%)	8.6	8.2
Average LTV on new home loans: balance weighted (%)	63.4	63.9
Average LTV on new home loans: valuation weighted (%)	54.4	55.0

Barclays UK: New lending in 2016 increased by 6%, reflecting a steady risk profile against the backdrop of heightened market activity. Average balance weighted LTV on new lending remained broadly stable at 63.4% (2015: 63.9%).

Credit cards and unsecured loans

The principal portfolios listed below accounted for 94% (2015: 92%) of the Group's total credit cards and unsecured loans.

Credit cards and unsecured loans principal portfolios

	Gross loans and advances ^a £m	30 day arrears, excluding recovery book %	90 day arrears, excluding recovery book %	Annualised gross charge-off rates %	Recovery book proportion of outstanding balances %	Recovery book impairment coverage ratio %
As at 31 December 2016 Barclays UK UK cards ^b	17,833	1.9	0.9	5.5	3.0	83.8

Edgar Filing: BARCLAYS PLC - Form 6-K

UK personal loans	6,076	2.1	0.9	3.1	4.7	77.2
Barclays International

As at 31 December
2015

Barclays UK

UK cards ^b	18,502	2.3	1.2	5.2	3.6	82.6
UK personal loans	5,476	1.9	0.8	3.0	7.5	73.9

Barclays International

US cards ^b	16,699	2.2	1.1	3.9	2.0	84.8
Barclays Partner Finance ^c	3,986	1.5	0.6	2.4	2.5	82.2
Germany cards	1,419	2.3	1.0	3.8	2.7	81.2

UK cards: Gross loans and advances decreased 4% to £17.8bn primarily due to reduced loans and advances to banks. Annualised gross charge-off rates increased due to accelerated asset sales in the latter half of the year and accelerated charge-off of informal arrangements stock. The recovery book impairment coverage ratio increased, reflecting the impact of increased flow into charge-off.

UK personal loans: 30 day arrears increased to 2.1% (2015: 1.9%) and 90 day arrears increased to 0.9% (2015: 0.8%) driven by portfolio growth and an increased level of operational delinquency from new customer acquisitions. The recovery book proportion of outstanding balances reduced to 4.7% (2015: 7.5%) due to an asset sale that also resulted in an increase in the recovery book impairment coverage ratio to 77.2% (2015: 73.9%).

US cards: Gross loans and advances increased 43% to £23.9bn due to portfolio growth, new acquisitions and appreciation of USD against GBP. Increased arrears and charge-off rates were driven by a change in portfolio mix, volume growth and the appreciation of average USD against GBP.

Barclays Partner Finance: Portfolio arrears and charge-off rates remained broadly steady during 2016.

Germany cards: Loans and advances were 28% higher, mainly due to a combination of the appreciation of EUR against GBP and portfolio growth. 90 day arrears and charge off rates remained stable, while the recovery book coverage ratio reduced slightly reflecting favourable recovery expectations.

Notes

aGross loans and advances include loans and advances to customers and banks. Risk metrics based on exposures to customers.

bFor UK and US cards, outstanding recovery book balances for acquired portfolios recognised at fair value (which have no related impairment allowance) have been excluded from the recovery book impairment coverage ratio.

Losses have been recognised where related to additional spend from acquired accounts in the period post acquisition.

c2015 figures for recovery book coverage ratio restated from 85.2% to 82.2% to reflect more granular allocation of management adjustments to the recovery book.

Excluding BAGL balances:							

§ Wholesale loans and advances increased by £19bn to £241bn (2015: £222bn) due to increased lending of £11bn driven by volume growth and foreign currency movements due to the appreciation of average US Dollar and Euro against Sterling, £8bn due to the reclassification of ESHLA loans now recognised at amortised cost and a net £9bn increase in settlement and cash collateral balances, offset by £9bn from the exit of assets in Non-Core.

§ CRLs remained stable at £2.4bn (2015: £2.4bn).

§ Loan impairment charges increased to £299m (2015: £209m) from a number of single name exposures. The loan loss rates increased to 12bps (2015: 9bps).

Note

a Included in the above analysis are Wealth and Private Banking exposures measured on an individual customer exposure basis.

Exposure to UK commercial real estate (CRE)

The UK CRE portfolio includes property investment, development, trading and house builders but excludes social housing and contractors.

UK CRE summary^a**As at 31 December**

	2016	2015
UK CRE loans and advances (£m)	11,227	10,690

Total	11,227	10,690	100	100

Notes

a Based on the most recent valuation assessment, 2015 year end numbers have been restated following closer alignment of industry classifications between corporate banking and business lending.

b Corporate Banking balances under £1m.

c Unsecured balances primarily relate to working capital facilities agreed to CRE companies.

Risk review

Risk performance

Credit risk**Analysis of problem loans**

Loans that are past due or assessed as impaired within this section are reflected in the balance sheet credit quality tables on page 170 as being Higher Risk.

Age analysis of loans and advances that are past due but not impaired (audited)

The following table presents an age analysis of loans and advances that are past due but not impaired. Loans that are past due but not impaired consist predominantly of wholesale loans that are past due but individually assessed as not being impaired. These loans although individually assessed as unimpaired, may carry an unidentified impairment provision.

Loans and advances past due but not impaired (audited)

	Past due up to 1 month £m	Past due 1-2 months £m	Past due 2-3 months £m	Past due 3-6 months £m	Past due 6 months and over £m	Total £m

Corporate loans	5,862	897	207	226	280	7,47
Total	6,242	933	228	343	689	8,43

Corporate loans past due up to 1 month increased £1.1bn to £7.0bn primarily driven by the appreciation of average USD against GBP.

Analysis of loans and advances assessed as impaired (audited)

The following table presents an analysis of loans and advances into those collectively or individually assessed as impaired. The table includes an age analysis for loans and advances collectively assessed as impaired.

Loans that are collectively assessed as impaired consist predominantly of retail loans that are one day or more past due for which a collective allowance is raised. Wholesale loans that are past due, individually assessed as unimpaired, but which carry an unidentified impairment provision, are excluded from this category.

Loans that are individually assessed as impaired consist predominantly of wholesale loans that are past due and for which an individual allowance has been raised.

Home loans, unsecured loans and credit card receivables that are subject to forbearance in the retail portfolios are included within the collectively assessed for impairment category. Where wholesale loans under forbearance have been impaired, these form part of individually assessed impaired loans.

Loans and advances assessed as impaired (audited)

As at 31 December 2016	Past due up to 1 month £m	Past due 1-2 months £m	Past due 2-3 months £m	Past due 3-6 months £m	Past due 6 months and over £m	Total collectively assessed £m	Individually assessed for impairment £m	Total £m

Total	5,164	1,803	607	981	2,700	11,255	3,398	14,653

The decrease in loans collectively assessed as impaired to £9.1bn (2015: £11.3bn) predominantly relates to BAGL balances now held for sale.

Potential credit risk loans (PCRLs) and coverage ratios

The Group reports potentially and actually impaired loans as PCRLs. PCRLs comprise two categories of loans: credit risk loans (CRLs) and potential problem loans (PPLs).

CRLs comprise three classes of loans:

§ *impaired loans*: comprises loans where an individually identified impairment allowance has been raised. This category also includes all retail loans that have been transferred to a recovery book. See page 182 for further analysis of impaired loans

§ *accruing past due 90 days or more*: comprises loans that are 90 days or more past due with respect to principal or interest

§ *impaired and restructured loans*: comprises loans not included above where, for economic or legal reasons related to the debtor's financial difficulties, a concession has been granted to the debtor that would not otherwise be considered. For information on restructured loans refer to disclosures on forbearance on pages 182 to 185.

PPLs are loans that are currently complying with repayment terms but where serious doubt exists as to the ability of the borrower to continue to comply with such terms in the near future. If the credit quality of a wholesale loan on a watchlist deteriorates to the highest category, or a retail loan deteriorates to delinquency cycle 2 (typically when past due 60 to 90 days), consideration is given to including it within the PPL category.

BAGL		739		53.9		41.7
Group total	4,620	4,921	71.2	63.0	53.2	49.9

§ Excluding BAGL balances, CRLs remained stable at £6.5bn (2015: £6.4bn) with the Group's CRL coverage ratio increasing to 71% (2015: 65%) mainly within retail portfolios

§ The CRL coverage ratio for retail portfolios increased to 82% (2015: 72%) primarily due to increased impairment allowances following the management review of the UK and US cards portfolio impairment modelling

§ PPLs increased to £2.2bn (2015: £1.7bn) primarily within Barclays International wholesale portfolios. The increase was driven by exposures within the Corporate and Investment bank across a number of industries.

Risk review

Risk performance

Credit risk

Impaired loans

The following table represents an analysis of impaired loans in line with the disclosure recommended by the Enhanced Disclosure Taskforce. Impaired loans are a subcomponent of CRLs (defined on page 181) and comprise loans where an individually identified impairment allowance has been raised. This category also includes all retail loans that have been transferred to a recovery book. For the majority of products, transfer to a recovery book occurs for loans that are past due over 6 months unless a forbearance agreement is agreed. Earlier transfer points may occur depending on specific circumstances. Impaired loans may include loans that are still performing, fully collateralised loans or where indebtedness has already been written down to the expected realisable value.

Barclays Core	1,169	1,221	294	237	
Barclays Non-Core	211	247	9	20	
Total retail	1,380	1,468	303	257	
Barclays UK	589	412	62	32	
Barclays International	2,044	1,333	257	196	
Barclays Core	2,633	1,745	319	228	
Barclays Non-Core	269	459	50	146	
Total wholesale	2,902	2,204	369	374	
Group total^b	4,282	3,672	672	631	

Balances on forbearance programmes increased 17% driven by an increase in forborne loans in Barclays International.

Retail balances on forbearance programmes reduced 6% to £1.4bn and reflected a decrease in Barclays UK and Barclays Non-Core offset by an increase in Barclays International portfolios.

§ Barclays UK: The reduction was driven by UK cards portfolio, where balances on forbearance plans are lower due to the application of an updated entry criteria, as well as asset sales.

§ Barclays International: The increase in US cards forbearance was in line with portfolio growth and appreciation of the US Dollar against Sterling.

Wholesale balances on forbearance increased by 32% to £2.9bn due to an increase in the Barclays Core portfolio where forbearance programmes increased mainly in performing segments of the corporate portfolio due to a change in methodology, extending the previously narrow scope of forbearance in relation to adjustment on non-enforcement of

covenants. This change has been applied consistently across the corporate portfolio with the increase primarily at the higher end of the corporate portfolio where there is a greater tendency for exposure to be under covenants.

Notes

- a Exchange and other adjustments for 2016 includes the reclassification of £1,015m related to BAGL balances now held for sale offset by currency movements due to the appreciation of average US Dollar and Euro against Sterling.
- b Excludes BAGL balances now held for sale.

Retail forbearance programmes

Forbearance on the Group's principal retail portfolios in the US and UK is presented below. The principal portfolios listed below account for 73% (2015: 76%) of total retail forbearance balances.

----------	-----	-----	----	----	----	-----	-----	----	------

§ **UK home loans:** Balances under forbearance decreased by 12% to £390m, principally due to fewer customers requiring forbearance in a stable macroeconomic environment. Total past due balances reduced by 14% to £202m in line with falling total balances under forbearance.

§ **UK cards:** Balances on forbearance plans have reduced due to an updated entry criteria, as well as asset sales. The forbearance impairment coverage ratio has increased due to implementation of updated impairment methodology.

§ **UK personal loans:** Increased forbearance coverage ratio reflects the changes in methodology to align with the impairment policy.

§ **US cards:** Balances are higher in line with portfolio growth while the balances in arrears remain stable. Past-due balances as a proportion of total balances have reduced, which reflects in the lower forbearance impairment coverage ratio.

Interest rate concession			74		13		89
Total	390	445	337	448	94	85	186

Payment concessions in UK cards increased to £45m (2015: £21m), including an additional £31m identified in second half of the year following a review of policy adherence. These balances have been appropriately provisioned.

Repayment plan balances in UK cards decreased to £218m (2015: £427m) driven by an asset sale and the continued reduction in repayment plan volumes. Following review of policy adherence, additional interest rate concession for UK cards (£74m) and repayment plan for UK personal loans (£13m) were identified in the year.

Wholesale forbearance programmes

Impairment

Impairment allowances

Impairment allowances decreased 6% to £4,620m primarily due to the reclassification of BAGL balances now held for sale, partially offset by the impact of a management review of impairment modelling within the credit cards portfolios and increases within Barclays International due to volume growth, the appreciation of average US Dollar and Euro against Sterling and increased impairment for a number of single name exposures.

Management adjustments to models for impairment

Management adjustments to models for impairment are applied in order to factor in certain conditions or changes in policy that are not incorporated into the relevant impairment models, or to ensure that the impairment allowance reflects all known facts and circumstances at the period end. Adjustments typically increase the model derived impairment allowance. Where applicable, management adjustments are reviewed and incorporated into future model development.

Management adjustments to models of more than £10m with respect to impairment allowance in our principal portfolios are presented below.

Principal portfolios that have management adjustments greater than £10m

	2016		2015	
	Total management adjustments to impairment stock, including forbearance £m	Proportion of total impairment stock %	Total management adjustments to impairment stock, including forbearance £m	Proportion of total impairment stock %

Corporate Banking	71	14	116	25
Barclays Partner Finance	59	37	41	28
Germany cards	29	23	20	21

During 2016, the models were aligned to a strengthened Retail Impairment Policy, following which adjustments were reviewed.

UK and US cards: Higher provisions held pending full implementation of newly developed and independently approved models with enhanced methodology following an impairment policy revision in Q3 16.

UK home loans: To capture the potential impact from an increase in the house price to earnings ratio, change in the impairment methodology and increased coverage on interest-only loans maturing in the next five years.

UK business lending: To align to impairment policy requirements, potential impact from commercial property price deterioration and the susceptibility of minimum debt service customers to interest rate rises not currently captured in models.

Corporate Banking: Reflects release against single names in the oil and gas sector.

Barclays Partner Finance: Due to increased risk in the secured motor portfolio along with adjustments on account of impairment methodology.

Germany cards: To align to impairment methodology and increased cover on forbearance programme.

Note

a Exchange and other adjustments for 2016 primarily includes the reclassification of £762m related to BAGL now held for sale offset by currency movements due to the appreciation of average US Dollar and Euro against Sterling.

Analysis of debt securities

Debt securities include government securities held as part of the Group's treasury management portfolio for liquidity and regulatory purposes, and are for use on a continuing basis in the activities of the Group.

The following tables provide an analysis of debt securities held by the Group for trading and investment purposes by issuer type, and where the Group held government securities exceeding 10% of shareholders' equity.

Further information on the credit quality of debt securities is presented on pages 169 to 170. Further disclosure on sovereign exposures in the Eurozone is presented on page 172.

Analysis of derivatives (audited)		

The tables below set out the fair values of the derivative assets together with the value of those assets subject to enforceable counterparty netting arrangements for which the Group holds offsetting liabilities and eligible collateral.

Derivative assets

	2016			2015		
	Balance sheet assets	Counterparty netting	Net exposure	Balance sheet assets	Counterparty netting	Net exposure
As at 31 December	£m	£m	£m	£m	£m	£m
Foreign exchange	79,744	59,040	20,704	54,936	40,301	14,635
Interest rate	228,652	185,723	42,929	231,426	190,513	40,913
Credit derivatives	16,273	12,891	3,382	18,181	14,110	4,071
Equity and stock index	17,089	12,603	4,486	13,799	8,358	5,441
Commodity derivatives	4,868	3,345	1,523	9,367	6,300	3,067
Total derivative assets	346,626	273,602	73,024	327,709	259,582	68,127
Cash collateral held			41,641			34,918
Net exposure less collateral			31,383			33,209

Derivative asset exposures would be £315bn (2015: £295bn) lower than reported under IFRS if netting were permitted for assets and liabilities with the same counterparty or for which the Group holds cash collateral. Similarly, derivative liabilities would be £317bn (2015: £295bn) lower reflecting counterparty netting and collateral placed. In addition, non-cash collateral of £8bn (2015: £7bn) was held in respect of derivative assets. The Group received collateral from clients in support of over the counter derivative transactions. These transactions are generally undertaken under International Swaps and Derivative Association (ISDA) agreements governed by either UK or New York law.

Exposure relating to derivatives, repurchase agreements, reverse repurchase agreements, stock borrowing and loan transactions is calculated using internal PRA approved models. These are used as the basis to assess both regulatory capital and capital appetite and are managed on a daily basis. The methodology encompasses all relevant factors to enable the current value to be calculated and the future value to be estimated, for example, current market rates, market volatility and legal documentation (including collateral rights).

Market risk

Analysis of market risk

Market risk is the risk of a reduction in earnings or capital due to volatility of trading book positions or an inability to fully hedge the banking book balance sheet.

This section contains key disclosures describing the Group's market risk profile, highlighting regulatory as well as management measures.

Key metrics

Value at Risk increased in the year due to increased volatility. The income sensitivity to falling rates has increased compared to 2015 as a result of the lower GBP rate environment and subsequent deposit repricing.

24%

Increase in management Value at Risk

-£220m

Decrease in Annual Earnings at Risk from a negative 25bps shock in interest rates (floored assumption)

Risk measurement

Risk review

Risk performance

Market risk

Market risk

Market risk is the risk of a reduction in earnings or capital due to volatility of the trading book positions or as a consequence of running a banking book balance sheet and liquidity funding pools.

All disclosures in this section (pages 191 to 199) are unaudited unless otherwise stated. Disclosures for 2016 and 2015 exclude BAGL balances held for sale unless otherwise stated.

Overview of market risk

This section contains key statistics describing the market risk profile of the Group, such as Value at Risk (VaR) and Annual Earnings at risk (AEaR) measures. A distinction is made between regulatory and management measures within the section. The market risk management sections on pages 138 to 145 and 150 to 157 of the Barclays PLC 2016 Pillar 3 Report provide descriptions of these metrics:

§ page 192 provides a view of market risk in the context of the Group's balance sheet

§ pages 193 to 194 cover the management of traded market risk. Management measures are shown from page 193 and regulatory equivalent measures are shown from page 194

§ non-traded market risk, arising from our banking books, is reviewed from page 195.

Measures of market risk in the Group and accounting measures

Traded market risk measures such as VaR and balance sheet exposure measures have fundamental differences:

§ balance sheet measures show accruals-based balances or marked to market values as at the reporting date

§ VaR measures also take account of current marked to market values, but in addition hedging effects between positions are considered

§ market risk measures are expressed in terms of changes in value or volatilities as opposed to static values. For these reasons, it is not possible to present direct reconciliations of traded market risk and accounting measures. The table *Balance sheet view of trading and banking books*, on page 192, helps the reader understand the main categories of assets and liabilities subject to regulatory market risk measures.

Summary of performance in the period

Overall, the Group has maintained a steady risk profile, with key movements outlined below:

§ measures of traded market risk, such as value at risk (VaR), increased in the year mainly due to the underlying movements to credit spreads and volatility in the cross currency markets driven by market structural changes

§ Annual Earnings at Risk (AEaR), is a key measure of interest rate risk volatility in the banking book (IRRBB). This sensitivity measure decreased in 2016, driven by two factors: the reduction in GBP base rate in August 2016 with the 0% model floor; and additional protection that the Group has put in place to reduce exposure to a possible further reduction in GBP base rate

§ pension risks are disclosed from page 198 onwards.

Balance sheet view of trading and banking books

As defined by regulatory rules, a trading book consists of positions held for trading intent or to hedge elements of the trading book. Trading intent must be evidenced in the basis of the strategies, policies and procedures set up by the firm to manage the position or portfolio. The table below provides a Group-wide overview of where assets and liabilities on the Group's balance sheet are managed within regulatory traded and non-traded books.

The balance sheet split by trading book and banking books is shown on an IFRS accounting scope of consolidation. The reconciliation between the accounting and regulatory scope of consolidation is shown in table 1 of the Barclays PLC 2016 Pillar 3 Report.

Derivative financial instruments	883	339,604	340,487
Debt securities in issue	75,932		75,932
Subordinated liabilities	23,383		23,383
Accruals, deferred income and other liabilities	8,830	41	8,871
Provisions	4,134		4,134
Current tax liabilities	737		737
Deferred tax liabilities	29		29
Retirement benefit liabilities	390		390
Liabilities included in disposal groups classified as held for sale ^b	60,703	4,589	65,292
Total liabilities	655,815	485,946	1,141,761

Included within the trading book are assets and liabilities which are included in the market risk regulatory measures.

For more information on these measures (VaR, SVaR, IRC and APR) see the risk management section on page 138 of the Barclays PLC 2016 Pillar 3 Report.

Notes

a The primary risk factors for banking book assets and liabilities are interest rates and to a lesser extent, foreign exchange rates. Credit spreads and equity prices will also be factors where the Group holds debt and equity securities respectively, either as financial assets designated at fair value (see Note 15) or as available for sale (see Note 17).

b Including BAGL.

Traded market risk review

Review of management measures

The following disclosures provide details on management measures of market risk. See the risk management section on page 138 of the Barclays PLC 2016 Pillar 3 Report for more detail on management measures and the differences when compared to regulatory measures.

The table below shows the total Management VaR on a diversified basis by risk factor. Total Management VaR includes all trading positions in Barclays International, Non-Core, BAGL and Head Office.

Limits are applied against each risk factor VaR as well as total Management VaR, which are then cascaded further by risk managers to each business.

The daily average, maximum and minimum values of management VaR^a

Management VaR (95%) (audited)

	2016			2015		
	Average	High ^b	Low ^b	Average	High ^b	Low ^b
For the year ended 31	£m	£m	£m	£m	£m	£m
December						
Credit risk	16	24	9	11	17	8
Interest rate risk	7	13	4	6	14	4
Equity risk	7	11	4	8	18	4
Basis risk	5	9	3	3	4	2
Spread risk	3	5	2	3	6	2
Foreign exchange risk	3	5	2	3	6	1
Commodity risk	2	4	1	2	3	1
Inflation risk	2	3	2	3	5	2
Diversification effect ^b	(24)	n/a	n/a	(22)	n/a	n/a
Total management VaR	21	29	13	17	25	12

Average Credit Risk VaR increased by £5m to £16m (2015: £11m) primarily due to the underlying volatile movements to credit spreads given own credit contribution.

Average Basis VaR increased by £2m to £5m (2015: £3m) primarily due to a combination of structural changes in the cross currency markets that led to higher volatility and higher client activity in G10 cross currency basis.

Average Equity VaR decreased by £1m to £7m (2015: £8m) reflecting reduced cash portfolio activities and a more conservative risk profile maintained in the derivatives portfolio.

Average Foreign Exchange Risk VaR was stable as a result of maintaining a conservative risk profile in the derivatives portfolio.

Group Management VaR^a (£m)

The daily VaR chart illustrates an average increasing trend in 2016. Intermittent VaR increases were due to increased client flow in periods of heightened volatility in specific markets and subsequent risk management of the position.

Notes

a Including BAGL.

b Diversification effects recognise that forecast losses from different assets or businesses are unlikely to occur concurrently, hence the expected aggregate loss is lower than the sum of the expected losses from each area. Historic correlations between losses are taken into account in making these assessments. The high and low VaR figures reported for each category did not necessarily occur on the same day as the high and low VaR reported as a whole. Consequently a diversification effect balance for the high and low VaR figures would not be meaningful and is therefore omitted from the above table.

Risk review

Risk performance

Market risk

Business Scenario Stresses

As part of the Group's risk management framework the performance of the trading business in hypothetical scenarios characterised by severe macroeconomic conditions is modelled. Up to seven global scenarios are modelled on a regular basis, for example, a sharp deterioration in liquidity, a slowdown in the global economy, terrorist attacks, global recession, and a sharp increase in economic growth.

In 2016, the scenario analyses showed that the largest market risk related impacts would be due to a severe deterioration in market liquidity and global recession.

Review of regulatory measures

The following disclosures provide details on regulatory measures of Market risk. See pages 141 to 143 of the Barclays PLC 2016 Pillar 3 Report for more detail on regulatory measures and the differences when compared to management measures.

The Group's market risk capital requirement comprises two elements:

§ the market risk of trading book positions booked to legal entities that are measured under a PRA approved internal models approach, including Regulatory VaR, Stressed Value at Risk (SVaR), Incremental Risk Charge (IRC), and Comprehensive Risk Measure as required

§ trading book positions that do not meet the conditions for inclusion within the approved internal models approach.

The capital requirement for these positions is calculated using standardised rules.

The table below summarises the regulatory market risk measures, under the internal models approach. See Table 65

Market risk own funds requirements on page 85 of the Barclays PLC 2016 Pillar 3 Report for a breakdown of capital requirements by approach.

Analysis of Regulatory VaR, SVaR, IRC and Comprehensive Risk Measure

Year-end	Avg.	Max	Min
-----------------	-------------	------------	------------

Edgar Filing: BARCLAYS PLC - Form 6-K

	£m	£m	£m	£m
As at 31 December 2016				
Regulatory VaR (1-day)	33	26	34	18
Regulatory VaR (10-day) ^a	105	84	108	57
SVaR (1-day)	65	56	75	34
SVaR (10-day) ^a	205	178	236	109
IRC	154	155	238	112
Comprehensive Risk Measure	2	5	12	2
As at 31 December 2015				
Regulatory VaR (1-day)	26	28	46	20
Regulatory VaR (10-day) ^a	82	89	145	63
SVaR (1-day)	44	54	68	38
SVaR (10-day) ^a	139	171	215	120
IRC	129	142	254	59
Comprehensive Risk Measure	12	15	27	11

Overall, there was an increase in average IRC in 2016, with no significant movements in other internal model components:

§ **Regulatory VaR/SVaR:** Remained broadly stable year on year.

§ **IRC:** Increased primarily due to positional increases in the third quarter of 2016.

§ **Comprehensive Risk Measure:** Reduced as a result of further reductions in a specific legacy portfolio.

Breakdown of the major regulatory risk measures by portfolio

Comprehensive Risk Measure							2

The table above shows the primary portfolios which drove the trading businesses modelled capital requirement as at 31 December 2016. The stand-alone portfolio results diversify at the total level and are not necessarily additive. Regulatory VaR, SVaR, IRC and Comprehensive Risk Measure in the prior table show the diversified results at a Group level.

Notes

- a The 10 day VaR is based on scaling of 1 day VaR model output. More information about Regulatory and Stressed VaR methodology is available in the Barclays PLC 2016 Pillar 3 Report on page 141.
- b In the fourth quarter, the Client Capital Management (CCM) portfolio was split into Barclays International Treasury, Banking and Agency Derivative Services (ADS) and Financing. For the purposes of the disclosures, only material portfolios (Barclays International Treasury and Banking) have been included.

Non-traded market risk

Overview

The non-traded market risk framework covers exposures in the banking book, mostly consisting of exposures relating to accrual accounted and available for sale instruments. The potential volatility of the net interest income of the bank is measured by an Annual Earnings at Risk (AEaR) metric that is monitored regularly and reported to Senior Management and the Board Risk Committee as part of the limit monitoring framework.

Net interest income sensitivity

The table below shows a sensitivity analysis on pre-tax net interest income for non-trading financial assets and financial liabilities, including the effect of any hedging. The sensitivity has been measured using the Annual Earnings at Risk (AEaR) methodology as described in the Barclays PLC 2016 Pillar 3 Report. Note that this metric assumes an instantaneous parallel change to interest rate forward curves. The model floors shocked market rates at zero; changes in net interest income sensitivity are only observed where forward rates are greater than zero. The main model assumptions are: (i) one year time horizon; (ii) balance sheet is held constant; (iii) balances are adjusted for assumed behavioural profiles (i.e. considers that customers may remortgage before the contractual maturity); and (iv) behavioural assumptions are kept unchanged in all rate scenarios.

Net interest income sensitivity (AEaR) by business unit^{a,b} (audited)

	Barclays UK £m	Barclays International £m	Barclays Non-Core £m	Total £m
As at 31 December 2016				
+25bps	5	16	1	22
25bps	(130)	(90)		(220)
As at 31 December 2015				
+25bps	16	21	5	42
25bps	(50)	(41)		(91)

The income sensitivity to falling rates has increased compared to 2015 as a result of the lower GBP rate environment and subsequent deposit re-pricing.

Net interest income sensitivity (AEaR) by currency^c

	+25 basis	25 basis
	points £m	points £m
As at 31 December 2016		
GBP	9	(215)
USD	3	(5)
EUR	7	1
Other currencies	3	(1)
Total	22	(220)
As percentage of net interest income	0.21%	(2.09%)

Notes

a The investment banking part of Barclays International has been excluded.

b Excludes Treasury operations, which are driven by the Group's investments in the liquidity pool, which are risk managed using VaR measures described on page 197. Treasury's net interest income sensitivity (AEaR) sensitivity to a +25/-25bps move is £(39)m /£36m respectively.

c Includes Barclays UK, Barclays International (excluding investment banking) and Non-Core sensitivity. Treasury excluded.

Risk review

Risk performance

Market risk

Economic Capital by business unit

Barclays measures some non-traded market risks using an economic capital (EC) methodology. EC is predominantly calculated using a daily VaR model scaled to a 99% confidence interval. A 99.98% confidence interval, as previously reported, is considered to be a very extreme shock i.e. a 1 in 5,000 event. A 99% confidence interval is considered more appropriate and also aligns to other regulatory submissions. For more information on definitions of prepayment, recruitment and residual risk, and on how EC is used to manage market risk, see the treasury and capital risk management section on page 138 of the Barclays PLC 2016 Pillar 3 Report.

Economic Capital by business unit

	Barclays			Total
	Barclays UK	International ^a	Barclays Non-Core ^b	
	£m	£m	£m	£m
As at 31 December 2016				
Prepayment risk	27	8		35
Recruitment risk	18	1	1	20
Residual risk	1	23	12	36
Total	46	32	13	91
As at 31 December 2015				
Prepayment risk	20	7		27
Recruitment risk	39	4	4	47
Residual risk	2	26	3	31
Total	61	37	7	105

Total Economic Capital decreased by £14m to £91m (2015: £105m), mainly driven by recruitment risk in Barclays UK which decreased by £21m due to a reduction in market rates and volatility.

Analysis of equity sensitivity

The equity sensitivity table below measures the overall impact of a +/-25bps movement in interest rates on retained earnings, available for sale and cash flow hedge reserves. This data is captured using a DV01 metric which is an indicator of the shift in value for a 1 basis point movement in the yield curve.

Analysis of equity sensitivity (audited)

	2016		2015	
	+25 basis points £m	25 basis points £m	+25 basis points £m	25 basis points £m
As at 31 December				
Net interest income	22	(220)	42	(91)
Taxation effects on the above	(7)	66	(13)	27
Effect on profit for the year	15	(154)	29	(64)
As percentage of net profit after tax	0.54%	(5.45%)	4.72%	(10.22%)
Effect on profit for the year (per above)	15	(154)	29	(64)
Available for sale reserve	(154)	114	(180)	248
Cash flow hedge reserve	(732)	692	(754)	694
Taxation effects on the above	222	(202)	280	(283)
Effect on equity	(649)	450	(625)	595
As percentage of equity	(0.91%)	0.63%	(0.95%)	0.90%

In relation to the net interest income sensitivity table on page 195, the impact of a 25bps movement in rates is largely driven by Barclays UK.

The change in available for sale reserve sensitivities was driven by a reduction in interest rate risk in the liquidity pool during the year. Movements in the available for sale reserve would impact CRD IV fully loaded CET1 capital, however the movement in the cash flow hedge reserve would not impact CET1 capital.

Notes

- a Residual risk for Barclays International includes Barclays Bank Delaware products to align with the NII disclosure. Prior period restated on the same basis for consistency.
- b Only retail exposures within Non-Core are captured in this measure.

Volatility of the available for sale portfolio in the liquidity pool

Changes in value of available for sale exposures flow directly through capital via the available for sale reserve. The volatility of the value of the available for sale investments in the liquidity pool is captured and managed through a value measure rather than an earning measure, i.e. the Non-traded market risk VaR.

Although the underlying methodology to calculate the non-traded VaR is identical to the one used in traded management VaR, the two measures are not directly comparable. The non-traded VaR represents the volatility to capital driven by the available for sale exposures. These exposures are in the banking book and do not meet the criteria for trading book treatment.

Volatility of the AFS portfolio in Liquidity Pool

Analysis of volatility of the available for sale portfolio in the liquidity pool

	2016			2015		
	Average £m	High £m	Low £m	Average £m	High £m	Low £m
For the year ended 31 December						
Non-traded market Value at Risk						
(daily, 95%)	40	46	32	42	49	37

The Non-traded VaR is mainly driven by volatility of interest rates in developed markets in the chart above. The sharp reduction in available for sale VaR at the end of September was driven by a reduction in outright interest rate risk taken in the liquidity pool, which was re-established in early October.

Foreign exchange risk

The Group is exposed to two sources of foreign exchange risk:

a) Transactional foreign currency exposure

Transactional foreign exchange exposures represent exposure on banking assets and liabilities, denominated in currencies other than the functional currency of the transacting entity.

The Group's risk management policies prevent the holding of significant open positions in foreign currencies outside the trading portfolio managed by Barclays International which is monitored through VaR.

Banking book transactional foreign exchange risk outside of Barclays International is monitored on a daily basis by the Market Risk function and minimised by the businesses.

b) Translational foreign exchange exposure

The Group's investments in overseas subsidiaries and branches create capital resources denominated in foreign currencies, principally US Dollar, Euro and South African Rand. Changes in the Sterling value of the net investments due to foreign currency movements are captured in the currency translation reserve, resulting in a movement in CET1 capital.

The Group's strategy is to minimise the volatility of the capital ratios caused by foreign exchange movements by using the CET1 capital movements to broadly match the revaluation of the Group's foreign currency RWA exposures.

The economic hedges primarily represent the US Dollar and Euro preference shares and Additional Tier 1 (AT1) instruments that are held as equity, accounted for at historic cost under IFRS and do not qualify as hedges for accounting purposes.

Total	33,225	(9,641)	(2,770)	20,814	(8,772)	12,042

During 2016, total structural currency exposure net of hedging instruments decreased by £1.0bn to £11.1bn (2015: £12.0bn). The decrease was broadly driven by an increase in ZAR hedges following Barclays announcement to reduce the Group's interest in BAGL. Foreign currency net investments increased by £5.3bn to £38.5bn (2015: £33.2bn) driven predominantly by the appreciation of US Dollar against Sterling. The hedges associated with these investments increased by £5.0bn to £17.5bn (2015: £12.4bn).

Pension risk review

The UK Retirement Fund (UKRF) represents approximately 96% (2015: 92%) of the Group's total retirement benefit obligations globally. As such, this risk review section focuses exclusively on the UKRF. The UKRF is closed to new entrants, and there is no new final salary benefit being accrued. Existing active members accrue a combination of a cash balance benefit and a defined contribution element.

Pension risk arises as the estimated market value of the pension fund assets may decline, investment returns may reduce or the estimated value of the pension liabilities may increase.

See page 155 of the Barclays PLC 2016 Pillar 3 Report for more information on how pension risk is managed.

Assets

The Trustee Board of the UKRF defines its overall long-term investment strategy with investments across a broad range of asset classes. This ensures an appropriate mix of return seeking assets as well as liability matching assets to better match future pension obligations. The main market risks within the asset portfolio are against interest rates and equities. The split of scheme assets is shown within Note 35. The fair value of the UKRF assets was £31.8bn as at 31 December 2016.

Liabilities

The UKRF retirement benefit obligations are a series of future cash flows with relatively long duration. On an IAS 19 basis these cash flows are sensitive to changes in the expected long-term price inflation rate (RPI) and the discount rate (AA corporate bond yield curve):

§ An increase in long-term expected inflation corresponds to an increase in liabilities

§ A decrease in the discount rate corresponds to an increase in liabilities.

Pension risk is generated through the Group's defined benefit schemes and this risk is set to reduce over time as our main defined benefit scheme is closed to new entrants. The chart below outlines the shape of the UKRF's liability cash flow profile (as at 31 December 2016) that takes account of future inflation indexing of payments to beneficiaries, with the majority of the cash flows (approximately 83%) falling between 0 and 40 years, peaking within the 11 to 20 year band and reducing thereafter. The shape may vary depending on changes in inflation expectation and mortality.

For more detail on the UKRF's financial and demographic assumptions see Note 35 Pensions and post retirement benefits.

Proportion of liability cash flows

Net IAS 19 Position

The graph above shows the UKRF's net IAS19 pension position for each quarter-end for the past two years. The volatility shown by the fluctuation in the net IAS 19 pension position is reflective of the movements observed in the market.

In Q2 2016, the UKRF IAS 19 position deteriorated as the AA discount rate moved lower, driven by both a decrease in long-dated government bond yields as well as tightening in credit spreads.

During H2 2016, this trend continued driven by the outcome of the EU Referendum in June as well as the Bank of England's announcement on quantitative easing in August. These events drove significant market moves adversely affecting the UKRF AA discount rate. For example, the market index IBOXX £-Corp AA yield was 53bps lower between June and September.

Gilt yields reverted higher in the months following September which was also reflected in higher AA discount rate. As a result, the net IAS 19 position reverted close to zero as at 31 December 2016.

Please see Note 35 for the sensitivity of the UKRF to change in key assumptions.

Risk measurement

In line with Barclays' risk management framework, the assets and liabilities of the UKRF are modelled within a VaR framework to show the volatility of the pension positions on a total portfolio level. This ensures that the risks, diversification and liability matching characteristics of the UKRF obligations and investments are adequately captured. VaR is measured and monitored on a monthly basis. Risks are reviewed and reported regularly at forums including Market Risk Committee, Group Risk Committee, Pensions Management Group and Pension Executive Board. The VaR model takes into account the valuation of the liabilities based on an IAS 19 basis (see Note 35). The Trustee receives quarterly VaR measures on a funding basis.

The pension liability is also sensitive to post-retirement mortality assumptions which are also reviewed regularly. See Note 35 for more details.

In addition, the impact of pension risk to the Group is taken into account as part of stress testing process. Stress testing is performed internally on at least an annual basis. The UKRF exposure is included as part of the regulatory stress tests.

Barclays defined benefit pension schemes affects capital in two ways:

- § An IAS 19 deficit is treated as a liability on the Group's balance sheet. Movement in a deficit due to remeasurements, including actuarial losses, are recognised immediately through Other Comprehensive Income and as such reduces shareholders' equity and CET1 capital. An IAS 19 surplus is treated as an asset on the balance sheet and increases shareholders' equity, however is deducted for the purposes of determining CET1 capital.
- § In the Group's statutory balance sheet, an IAS 19 surplus or deficit is partially offset by a deferred tax liability or asset respectively. These may or may not be recognised for calculating CET1 capital depending on the overall deferred tax position of the Group at the particular time.
- § Pension risk is taken into account in the Pillar 2A capital assessment undertaken by the PRA at least annually. The Pillar 2A requirement forms part of the Group's overall regulatory minimum requirement for CET1 capital, Tier 1 capital and total capital. More detail on minimum regulatory requirements can be found in the Funding risk – Capital section on page 200.

Funding risk **Capital**

Analysis of capital risk

Capital risk is the risk that the Group has insufficient capital resources to (i) meet minimum regulatory requirements in all jurisdictions; (ii) support its credit rating; and (iii) support its business strategy.

This section details Barclays' capital position providing information on both capital resources and capital requirements. It also provides details of the leverage ratio and exposures.

Key metrics

12.4%

Fully loaded Common Equity Tier 1 ratio

The fully loaded CRD IV CET1 ratio increased to 12.4% (2015: 11.4%) reflecting an increase in CET1 capital of £4.5bn to £45.2bn, despite

RWAs increasing by £7bn to £366bn.

The increase in CET1 capital was largely driven by profits of £2.1bn generated in the period, after absorbing the impact of notable items. Other favourable movements included the currency translation reserve as a result of the appreciation of all major currencies against Sterling.

The increase in RWAs was principally due to the appreciation of South African Rand, US Dollar and Euro against Sterling and business growth, which more than offset RWA reductions in Non-Core.

4.6%

Leverage ratio

The leverage ratio increased to 4.6% (2015: 4.5%) driven by a £5.8bn increase in fully loaded Tier 1 capital to £52.0bn partially offset by an increase in the leverage exposure of £97bn to £1,125bn.

Total IFRS assets increased 8% to £1,213bn from 2015 contributing to the 9% increase in the leverage exposure.

Funding risk **Capital**

Capital risk

Capital risk is the risk that the Group has insufficient capital resources to:

§ meet minimum regulatory requirements in all jurisdictions

§ support its credit rating; and

§ support its business strategy.

More details on monitoring and managing capital risk may be found in the Risk Management sections on pages 150 to 157 of the Barclays PLC 2016 Pillar 3 Report.

All disclosures in this section (pages 202 to 224) are unaudited unless otherwise stated. Disclosures for 2016 and 2015 include BAGL balances held for sale unless otherwise stated.

Overview

The fully loaded CRD IV CET1 ratio, among other metrics, is a measure of the capital strength and resilience of Barclays. Maintenance of our capital is vital in order to meet the minimum capital requirements of regulatory authorities and to fund growth within our businesses.

This section provides an overview of the Group's: (i) regulatory minimum capital and leverage requirements; (ii) capital resources; (iii) risk weighted assets (RWAs); and (iv) leverage ratio and exposures.

Summary of performance in the period

Barclays continues to be in excess of the minimum transitional and fully loaded capital requirements and PRA capital and leverage requirements.

The fully loaded CET1 ratio increased to 12.4% (2015: 11.4%) reflecting an increase in CET1 capital of £4.5bn to £45.2bn, despite RWAs increasing by £7bn to £366bn.

The increase in CET1 capital was largely driven by profits of £2.1bn generated in the period, after absorbing the impact of notable items. Other favourable movements included the currency translation reserve as a result of the appreciation of all major currencies against Sterling.

The increase in RWAs was principally due to the appreciation of South African Rand, US Dollar and Euro against Sterling and business growth, which more than offset RWA reductions in Non-Core.

The leverage ratio increased to 4.6% (2015: 4.5%) driven by a £5.8bn increase in fully loaded Tier 1 capital to £52.0bn partially offset by an increase in the leverage exposure of £97bn to £1,125bn.

Total IFRS assets increased 8% to £1,213bn from 2015 contributing to the 9% increase in leverage exposure.

The IFRS asset increase was mainly driven by loans and advances and other assets which increased £82bn to £707bn. The increase was primarily due to the appreciation of major currencies against Sterling, an increase in liquidity pool assets, and lending growth in Barclays UK and Barclays International. This was partially offset by the rundown and exit of Non-Core assets.

Net derivative leverage exposure, remained broadly flat as an increase in assets of £19bn to £347bn was offset by an increase in derivative liabilities resulting in regulatory derivative netting increasing £20bn to £313bn. The increase was mainly within foreign exchange derivatives driven by an increase in trade volumes and appreciation of all major currencies against Sterling.

Regulatory minimum capital and leverage requirements

Capital

Barclays' current regulatory requirement is to meet a fully loaded CRD IV CET1 ratio comprising the required 4.5% minimum CET1 ratio and, phased in from 2016, a Combined Buffer Requirement. This currently comprises a Capital Conservation Buffer (CCB) of 2.5% and a Globally Systemically Important Institution (G-SII) buffer determined by the PRA in line with guidance from the Financial Stability Board (FSB). Both buffers are subject to phased implementation, the CCB is phased in at 25% per annum with 0.625% applicable for 2016. The G-SII buffer for 2016 and 2017 has been set at 2% and is also phased in at 25% per annum with 0.5% applicable for 2016 and 1% for 2017. On 21 November 2016 the FSB confirmed that the G-SII buffer for 2018 will be 1.5% with 1.1% applicable for 2018 and taking full effect from 2019 onwards.

Also forming part of the Combined Buffer Requirement is a Counter-Cyclical Capital Buffer (CCyB) and a Systemic Risk Buffer (SRB). On 30 November 2016 the Financial Policy Committee (FPC) reaffirmed that it expects to maintain a CCyB of 0% on UK exposures until at least June 2017. Other national authorities also determine the appropriate CCyBs that should be applied to exposures in their jurisdiction. During 2016,

CCyBs started to apply for Barclays' exposures to other jurisdictions; however based on current exposures these are not material. No SRB has been set to date.

In addition, Barclays' Pillar 2A requirement as per the PRA's Individual Capital Guidance (ICG) for 2016 based on a point in time assessment was 3.9% of which 56% needs to be met in CET1 form, equating to approximately 2.2% of RWAs. The Pillar 2A requirement is subject to at least annual review and for 2017 Barclays' Pillar 2A add-on will be 4.0%, with approximately 2.3% of RWAs needing to be met in CET1 form. All capital, RWA and leverage calculations reflect Barclays' interpretation of the current rules.

The CRD IV CET1 transitional minimum capital requirement for 2016 is 7.8% including the 4.5% CET1 ratio requirement, 2.2% of Pillar 2A, a 0.625% CCB buffer, a 0.5% G-SII buffer and a 0% CCyB.

Leverage

Effective 1 January 2016, Barclays is required to disclose a leverage ratio and an average leverage ratio applicable to the Group:

§ The leverage ratio is consistent with the December 2015 method of calculation and has been included in our disclosure. The calculation uses the end point CRR definition of Tier 1 capital for the numerator and the CRR definition of leverage exposure. The current expected minimum fully loaded requirement is 3%, but this could be impacted by the Basel Consultation on the Leverage Framework

§ The average leverage ratio as outlined by the PRA Supervisory Statement SS45/15 and the updated PRA rulebook is calculated as the capital measure divided by the exposure measure, where the capital and exposure measure is based on the average of the last day of each month in the quarter. The expected end point minimum requirement is 3.5% comprising of the 3% minimum requirement, a fully phased in G-SII additional leverage ratio buffer (G-SII ALRB) and a countercyclical leverage ratio buffer (CCLB). The minimum requirement is on a phased basis in line with CET1 G-SII buffer which results in a minimum requirement of 3.175% at 31 December 2016.

In August 2016, the PRA implemented the FPC's recommendation to allow firms to exclude qualifying central bank claims from the calculation of the leverage exposure measure, as long as these are matched by deposits denominated in the same currency, subject to firms obtaining permission from the PRA. This change in reporting requirements is effective 1 April 2017, which will result in a modification to the calculation of the exposure measure for the purpose of calculating the UK leverage ratio. At 31 December 2016, Barclays' reported leverage ratio and average leverage ratio disclosed is unaffected by this announcement as firms are required to disclose based on the existing rules.

Capital Resources

The CRR and Capital Requirements Directive (CRD) implemented Basel III within the EU (collectively known as CRD IV) on 1 January 2014. The rules are supplemented by Regulatory Technical Standards and the PRA's rulebook, including the implementation of transitional rules. However, rules and guidance are still subject to change as certain aspects of CRD IV are dependent on final technical standards and clarifications to be issued by the EBA and adopted by the European Commission and the PRA.

Capital ratios

As at 31 December	2016	2015
Fully Loaded CET1 ^{a,b}	12.4%	11.4%
PRA Transitional Tier 1 ^{c,d}	15.6%	14.7%
PRA Transitional Total Capital ^{c,d}	19.6%	18.6%

Capital resources (audited)

As at 31 December	2016	2015
	£m	£m
Shareholders' equity (excluding non-controlling interests) per the balance sheet	64,873	59,810
Less: other equity instruments (recognised as AT1 capital)	(6,449)	(5,305)
Adjustment to retained earnings for foreseeable dividends	(388)	(631)

Deferred tax assets arising from temporary differences (amount above 10% threshold)	(183)	
Other regulatory adjustments	45	(177)
Fully loaded CET1 capital	45,204	40,741

Additional Tier 1 (AT1) capital		
Capital instruments and the related share premium accounts	6,449	5,305
Qualifying AT1 capital (including minority interests) issued by subsidiaries	5,445	6,718
Other regulatory adjustments and deductions	(130)	(130)
Transitional AT1 capital^e	11,764	11,893
PRA transitional Tier 1 capital	56,968	52,634
Tier 2 (T2) capital		
Capital instruments and the related share premium accounts	3,769	1,757
Qualifying Tier 2 capital (including minority interests) issued by subsidiaries	11,366	12,389
Other regulatory adjustments and deductions	(257)	(253)
PRA transitional total regulatory capital	71,846	66,527

Notes

- a The transitional regulatory adjustments to CET1 capital are no longer applicable resulting in CET1 capital on a fully loaded basis being equal to that on a transitional basis.
- b The CRD IV CET1 ratio (FSA October 2012 transitional statement) as applicable to Barclays Tier 2 Contingent Capital Notes was 13.7% based on £50.0bn of transitional CRD IV CET 1 capital and £366bn RWAs.
- c The PRA transitional capital is based on the PRA Rulebook and accompanying supervisory statements.
- d As at 31 December 2016, Barclays fully loaded Tier 1 capital was £51,993m, and the fully loaded Tier 1 ratio was 14.2%. Fully loaded total regulatory capital was £67,772m and the fully loaded total capital ratio was 18.5%. The fully loaded Tier 1 capital and total capital measures are calculated without applying the transitional provisions set out in CRD IV and assessing compliance of AT1 and Tier 2 instruments against the relevant criteria in CRD IV.
- e Of the £11.8bn transitional AT1 capital, fully loaded AT1 capital used for the leverage ratio comprises the £6.4bn capital instruments and related share premium accounts, £0.5bn qualifying minority interests and £0.1bn capital deductions. It excludes legacy Tier 1 capital instruments issued by subsidiaries that are subject to grandfathering.

Deferred tax assets arising from temporary differences (amount above 10% threshold)	(183)
Other regulatory adjustments	222
Increase in regulatory capital due to adjustments and deductions	564
Closing balance as at 31 December	45,204

The CET1 ratio improved to 12.4% (2015: 11.4%) primarily driven by an increase in CET1 capital of £4.5bn to £45.2bn as a result of profits of £2.1bn generated in the year, after absorbing the impact of notable items. Regulatory capital generated from earnings after absorbing the impact of own credit and dividends paid and foreseen increased CET1 capital by £1.2bn. Other significant movements in the year were:

§

a £3.0bn increase in other qualifying reserves including a £3.7bn increase in the currency translation reserves as US Dollar, Euro and South African Rand strengthened against Sterling; partially offset by a £0.4bn decrease as a result of preference share redemptions and a £0.4bn decrease in available for sale reserves

§ a £0.3bn decrease, net of tax, as a result of movements relating to pensions. There was a £1.0bn decrease in the retirement benefit reserve largely due to the UKRF, which is the Group's main pension scheme, moving from a £0.8bn surplus in December 2015 to a £27m deficit in December 2016. The decrease in reserves was partially offset by the removal of a £0.7bn capital deduction for the UKRF asset in December 2015

§ a £0.9bn increase in minority interests following the sale of 12.2% of BAGL's issued share capital was partially offset by £0.3bn higher capital deductions.

Transitional AT1 capital remained largely flat in the period as redemptions and repurchases of £1.3bn of CRD IV end point non qualifying preference shares, tier one notes and reserve capital instruments were offset by the issuance of \$1.5bn of end point qualifying AT1 capital instruments.

Leverage ratio and exposures

At 31 December 2016, Barclays' leverage ratio was 4.6% (2015: 4.5%) and the average leverage ratio was 4.3%, which exceeds the transitional minimum requirement for Barclays of 3.175% and expected end point minimum requirement of 3.5%.

The impact of the PRA rule modification to allow firms to exclude qualifying central bank claims from the calculation of the leverage exposure measure would have resulted in an average leverage ratio of 4.5% and a leverage ratio at 31 December 2016 of 5.0%.

Leverage exposure

	As at 31.12.16 £bn	As at 31.12.15 £bn

Total leverage exposure	1,125	1,028

Fully loaded CET1 capital	45.2	40.7
Fully loaded AT1 capital	6.8	5.4
Fully loaded Tier 1 capital	52.0	46.2
Leverage ratio	4.6%	4.5%

The leverage ratio increased to 4.6% (2015: 4.5%) primarily driven by a £5.8bn increase in fully loaded Tier 1 capital to £52.0bn (2015: £46.2bn), partially offset by an increase in the leverage exposure of £97bn to £1,125bn (2015: £1,028bn):

§ the IFRS asset increase was mainly driven by loans and advances and other assets which increased £82bn to £707bn. The increase was primarily due to the appreciation of major currencies against Sterling, an increase in liquidity pool assets, and lending growth in Barclays UK and Barclays International. This was partially offset by the rundown and exit of Non-Core assets

§ SFT adjustments increased by £13bn to £29bn, primarily as a result of a change in treatment of securities pre-positioned for use against undrawn central bank lending facilities

§ PFE on derivatives increased by £7bn to £136bn primarily driven by the appreciation of major currencies against Sterling, partially offset by compression activity, sale of positions and maturity of trades

§ weighted off-balance sheet commitments increased by £8bn to £119bn primarily driven by the appreciation of major currencies against Sterling.

The average leverage exposure measure for Q4 2016 was £1,206bn resulting in an average leverage ratio of 4.3%. The CET1 capital held against the 0.175% transitional G-SII ALRB was £2bn. The impact of the CCLB is currently nil.

The difference between the average leverage ratio and the leverage ratio was primarily driven by higher positions in October and November within trading portfolio assets, reverse repurchase agreements and settlements balances.

Note

a Included within financial assets designated at fair value are reverse repurchase agreements designated at fair value of £63bn (2015: £50bn).

Analysis of liquidity risk

Liquidity risk is the risk that a firm, although solvent, either does not have sufficient financial resources available to enable it to meet its obligations as they fall due, or can secure such resources only at excessive cost.

This section details the Group's liquidity risk profile and provides information on the way the Group manages that risk.

Key metrics

131% LCR

The Group strengthened its liquidity position during the year, increasing its surplus to internal and regulatory requirements.

£12bn Term Issuance

The Group maintains access to stable and diverse sources of funding across customer deposits and wholesale debt.

Risk review

Risk performance

Funding risk **liquidity**

Liquidity risk

Liquidity risk is the risk that the Group, although solvent, either does not have sufficient financial resources available to meet its obligations as they fall due, or can secure such resources only at excessive cost. This also results in a firm's inability to meet regulatory liquidity requirements. This risk is inherent in all banking operations and can be affected by a range of Group-specific and market-wide events.

All disclosures in this section (pages 209 to 224) are unaudited and exclude BAGL unless otherwise stated.

Overview

The Group has a comprehensive Key Risk Control Framework for managing the Group's liquidity risk. The Liquidity Framework meets the PRA's standards and is designed to ensure the Group maintains liquidity resources that are sufficient in amount and quality, and a funding profile that is appropriate to meet the liquidity risk appetite. The Liquidity Framework is delivered via a combination of policy formation, review and governance, analysis, stress testing, limit setting and monitoring.

Liquidity risk is managed separately at Barclays Africa Group Limited (BAGL) due to local currency and funding requirements. Unless stated otherwise, all disclosures in this section exclude BAGL and they are reported on a stand-alone basis. Adjusting for local requirements, BAGL liquidity risk is managed on a consistent basis to the Group.

This section provides an analysis of the Group's: (i) liquidity risk stress testing; (ii) internal and regulatory stress tests; (iii) liquidity pool; (iv) funding structure and funding relationships; (v) wholesale funding; (vi) term financing; (vii) encumbrance; (viii) repurchase agreements; (ix) credit ratings; (x) liquidity management at BAGL; and (xi) contractual maturity of financial assets and liabilities.

For further detail on liquidity risk governance and framework see pages 150 to 157 of the Barclays PLC 2016 Pillar 3 report.

Summary of performance in the period

The Group continued to maintain surpluses to its internal and regulatory requirements. The liquidity pool increased to £165bn (2015: £145bn), primarily driven by the depreciation of GBP against other major currencies and net increase in retail and commercial deposits and wholesale funding to support business growth. The Liquidity Coverage Ratio (LCR) was 131% (2015: 133%), equivalent to a surplus of £39bn (2015: £37bn). Wholesale funding outstanding excluding repurchase agreements was £158bn (2015: £142bn). The increase was driven by the prudent management of the liquidity position, holding company issuance and depreciation of GBP against other major currencies. The Group issued £12.1bn equivalent of capital and senior unsecured debt from the holding company of which £8.6bn equivalent and £0.7bn equivalent in public and private senior unsecured debt respectively, and £2.8bn of capital instruments. In the same period £7.4bn of Barclays Bank PLC capital and senior unsecured debt was bought back or called.

Liquidity risk stress testing

Under the Liquidity Framework, the Group has established a Liquidity Risk Appetite (LRA) together with the appropriate limits for the management of the liquidity risk. This is the level of liquidity risk the Group chooses to take in pursuit of its business objectives and in meeting its regulatory obligations. The key expression of the liquidity risk is through internal stress tests. It is measured with reference to the liquidity pool compared to anticipated stressed net contractual and contingent outflows for each of three short-term stress scenarios.

Liquidity Risk Appetite

As part of the LRA, the Group runs three primary short-term liquidity stress scenarios, aligned to the PRA's prescribed stresses:

§ 90-day market-wide stress event

§ 30-day Barclays-specific stress event

§ combined 30-day market-wide and Barclays-specific stress event.

Under normal market conditions, the liquidity pool is managed to be at a target of at least 100% of anticipated outflows under each of these stress scenarios. The 30-day Barclays-specific stress scenario results in the greatest net outflows of each of the liquidity stress tests. The combined 30-day scenario assumes outflows consistent with a firm-specific stress for the first two weeks of the stress period, followed by relatively lower outflows consistent with a market-wide stress for the remainder of the stress period.

Barclays also evaluates its long-term LRA, one year stress test based on prolonged closure of capital markets.

Risk review

Risk performance

Funding risk **liquidity**

**Key LRA assumptions include:
For the year ended 31 December 2016**

Drivers of

Liquidity Risk **LRA Specific Stress** **Key Assumptions**

**Wholesale Secured
and Unsecured
Funding Risk**

§ Zero rollover of maturing wholesale unsecured funding

§ Loss of repo capacity on non-extremely liquid repos at contractual maturity date

§ Withdrawal of contractual buyback obligations, excess client futures margin, PB client cash and overlifts

§ Haircuts applied to the market value of marketable assets held in the liquidity buffer

**Retail and Corporate
Funding Risk**

§ Retail and Corporate deposit outflows as counterparties seek to diversify their deposit balances

**Intra-day Liquidity
Risk**

§ Liquidity held against intra-day requirements for the settlement of cash and securities under a stress

**Intra-Group
Liquidity Risk**

§ Liquidity support for material subsidiaries. Surplus liquidity held within certain subsidiaries is not taken as a benefit to the wider Group

Cross-Currency Liquidity Risk § Currency liquidity cash flows at contractual maturity for physically settled FX forwards and cross currency swaps

Off-Balance Sheet Liquidity Risk

- § Drawdown on committed facilities based on facility and counterparty type
- § Collateral outflows due to a 2 notch credit rating downgrade
- § Increase in the Group's initial margin requirement across all major exchanges
- § Variation margin outflows from collateralised risk positions
- § Outflow of collateral owing but not called
- § Loss of internal sources of funding within the Prime Brokerage synthetics business

Franchise-Viability Risk § Liquidity held in order to meet outflows that are non-contractual in nature, but are necessary in order to support the firm's ongoing franchise (e.g. debt buybacks)

Funding Concentration Risk § Liquidity held against largest wholesale funding counterparty refusing to roll

Management Actions § Specifically defined actions that raise liquidity or mitigate cash outflows that would be conducted in a manner so as not to increase market volatility, whilst maintaining all core franchises

Liquidity regulation

The Group monitors its position against the CRD IV Delegated Act Liquidity Coverage Ratio (LCR) and the Basel III Net Stable Funding Ratio (NSFR).

The LCR is designed to promote short-term resilience of a bank's liquidity risk profile by ensuring that it holds sufficient High Quality Liquid Assets to survive an acute stress scenario lasting for 30 days. The NSFR has a time horizon of 12 months and has been developed to promote a sustainable maturity structure of assets and liabilities.

The CRD IV LCR became effective on 1 October 2015, with a minimum ratio requirement in the UK of 80% as at 31 December 2016; this will increase to 90% on 1 January 2017 and then to 100% on 1 January 2018. As of 31 December 2016, the Group reported a CRD IV LCR of 131% (2015: 133%).

In October 2014, the BCBS published a final standard for the NSFR with the minimum requirement to be introduced in January 2018 at 100% on an ongoing basis. On 23 November 2016 the European Commission published draft amendments to the Capital Requirements Regulation (CRR) including its proposed implementation of NSFR in the EU. This proposal makes a number of changes from Basel NSFR, particularly in the treatment of derivative and secured financing transactions. Barclays is in the process of assessing the impact of these changes on its NSFR ratio, and notes that NSFR is not proposed to be a binding regulation in the EU until two years after the European legislation is finalised. We remain above 100% well ahead of implementation timelines, based on a conservative interpretation of the Basel rule.

Comparing internal and regulatory liquidity stress tests

The LRA stress scenarios and the CRD IV LCR are all broadly comparable short-term stress scenarios in which the adequacy of defined liquidity resources is assessed against contractual and contingent stress outflows. The CRD IV LCR stress tests provide an independent assessment of the Group's liquidity risk profile.

Stress Test

Time Horizon

Calculation

As at 31 December 2016, the Group held eligible liquid assets in excess of 100% of stress requirements for all three short-term LRA scenarios and the CRD IV LCR requirement.

Barclays LRA

30 to 90 days

Liquid assets to net cash outflows

CRD IV LCR

30 days

Liquid assets to net cash outflows

Compliance with internal and regulatory stress tests

	Barclays LRA (30 day Barclays- specific requirement)^{a, b}	CRD IV LCR^b
	£bn	£bn
As at 31 December 2016		
Eligible liquidity buffer	173	166
Net stress outflows	(144)	(127)
Surplus	29	39
Liquidity pool as a percentage of anticipated net outflows as at 31 December 2016	120%	131%
Liquidity pool as a percentage of anticipated net outflows as at 31 December 2015	131%	133%

The Group plans to maintain its surplus to the internal and regulatory stress requirements at an efficient level, while considering risks to market funding conditions and its liquidity position. The continuous reassessment of these risks may lead to appropriate actions being taken with respect to sizing of the liquidity pool.

Liquidity pool

The Group liquidity pool as at 31 December 2016 was £165bn (2015: £145bn). During 2016, the month-end liquidity pool ranged from £132bn to £175bn (2015: £142bn to £168bn), and the month-end average balance was £153bn (2015: £155bn). The liquidity pool is held unencumbered and is not used to support payment or clearing requirements. Such requirements are treated as part of our regular business funding. The liquidity pool is intended to offset stress outflows, and comprises the following cash and unencumbered assets.

Composition of the Group liquidity pool as at 31 December 2016

Liquidity pool	<u>Liquidity pool of which CRD IV LCR eligible</u>			2015
	Cash	Level 1	Level 2A	
	£bn	£bn	£bn	

	£bn			Liquidity pool £bn

Total as at 31 December 2016	165	101	55	3
Total as at 31 December 2015	145	45	87	8

The Group liquidity pool is well diversified by major currencies and the Group monitors LRA stress scenarios for major currencies.

Liquidity pool by currency

	USD	EUR	GBP	Other	Total
	£bn	£bn	£bn	£bn	£bn
Liquidity pool as at 31 December 2016	44	36	49	36	165
Liquidity pool as at 31 December 2015	41	33	46	25	145

Management of the Group liquidity pool

The composition of the liquidity pool is subject to limits set by the Board, Treasury Committee and the independent credit risk and market risk functions. In addition, the investment of the liquidity pool is monitored for concentration risk by issuer, currency and asset type. Given the incremental returns generated by these highly liquid assets, the risk and reward profile is continuously managed.

The Group manages the liquidity pool on a centralised basis. As at 31 December 2016, 91% of the liquidity pool was located in Barclays Bank PLC (2015: 94%) and was available to meet liquidity needs across the Group. The residual liquidity pool is held predominantly within Barclays Capital Inc. (BCI). The portion of the liquidity pool outside of Barclays Bank PLC is held against entity-specific stressed outflows and regulatory requirements. To the extent the use of this portion of the liquidity pool is restricted due to regulatory requirements, it is assumed to be unavailable to the rest of the Group.

Notes

a Of the three stress scenarios monitored as part of the LRA, the 30-day Barclays-specific scenario results in the lowest ratio at 120% (December 2015: 131%). This compares to 134% (December 2015: 144%) under the 90-day market-wide scenario, and 144% (December 2015: 133%) under the 30-day combined scenario.

b Includes BAGL.

c Of which over 98% (2015: over 97%) was placed with the Bank of England, US Federal Reserve, European Central Bank, Bank of Japan and Swiss National Bank.

d Of which over 90% (2015: over 92%) are comprised of UK, US, Japanese, French, German, Danish, Swiss and Dutch securities.

Risk review

Risk performance

Funding risk **liquidity**

Contingent liquidity

In addition to the Group liquidity pool, the Group has access to other unencumbered assets which provide a source of contingent liquidity. While these are not relied on in the Group's LRA, a portion of these assets may be monetised in a stress to generate liquidity through use as collateral for secured funding or through outright sale.

In either a Barclays-specific or market-wide liquidity stress, liquidity available via market sources could be severely disrupted. In circumstances where market liquidity is unavailable or available only at heavily discounted prices, the Group could generate liquidity via central bank facilities. The Group maintains a significant amount of collateral pre-positioned at central banks and available to raise funding.

For more detail on the Group's other unencumbered assets see page 215.

Funding structure and funding relationships

The basis for sound liquidity risk management is a solid funding structure that reduces the probability of a liquidity stress leading to an inability to meet funding obligations as they fall due. The Group's overall funding strategy is to develop a diversified funding base (geographically, by type and by counterparty) and maintain access to a variety of alternative funding sources, to provide protection against unexpected fluctuations, while minimising the cost of funding.

Within this, the Group aims to align the sources and uses of funding. As such, retail and commercial customer loans and advances are largely funded by customer deposits, with the surplus funding the liquidity pool. Other assets, together with other loans and advances and unencumbered assets, are funded by long-term wholesale debt and equity.

The majority of reverse repurchase agreements are matched by repurchase agreements. The liquidity pool is predominantly funded through wholesale markets. These funding relationships are summarised below:

	2016	2015		2016	2015
Assets	£bn	£bn	Liabilities	£bn	£bn
Loans and advances to customers ^a	326	336	Customer accounts ^a	374	374

Barclays International, Head Office and Non-Core ^d	109	82		
Total	393	423	93%	95%

Total Barclays UK, Barclays International and Non-Core^c are largely funded by customer deposits. The loan to deposit ratio for these businesses was 83% (2015: 86%). The customer deposits in excess of loans and advances are primarily used to fund liquidity buffer requirements for these businesses. The loan to deposit ratio for the Group was 93% (2015: 95%).

As at 31 December 2016, £139bn (2015: £129bn) of total customer deposits were insured through the UK Financial Services Compensation Scheme (FSCS) and other similar schemes. In addition to these customer deposits, there were £4bn (2015: £4bn) of other liabilities insured by governments.

Notes

- portfolio assets.
- c Excluding investment banking businesses.
- d Including investment banking businesses.

Although, contractually, current accounts are repayable on demand and savings accounts at short notice, the Group's broad base of customers, numerically and by depositor type, helps protect against unexpected fluctuations in balances. Such accounts form a stable funding base for the Group's operations and liquidity needs. The Group assesses the behavioural maturity of both customer assets and liabilities to identify structural balance sheet funding gaps. Customer behaviour is determined by quantitative modelling combined with qualitative assessment taking into account for historical experience, current customer composition, and macroeconomic projections. These behavioural profiles represent our forward looking expectation of the run-off profile. The relatively low cash outflow within one year demonstrates that customer funding remains broadly matched with customer assets from a behavioural perspective.

Behavioural maturity profile

	Loans and advances to customers £bn	Customer deposits £bn	Customer funding surplus/ (deficit) £bn	Behavioural maturity profile cash outflow/(inflow)

Wholesale funding Group						

Wholesale funding relationships are summarised below:

	2016	2015		2016	2015
Assets	£bn	£bn	Liabilities	£bn	£bn
Trading portfolio assets	33	28	Repurchase agreements	75	70
Reverse repurchase agreements	42	42			
Reverse repurchase agreements	35	34	Trading portfolio liabilities	35	34
			Derivative financial		
Derivative financial instruments	347	326	instruments	340	322
			Less than 1 year wholesale		
Liquidity pool	108	97	debt	70	54
Other assets ^a	109	103	Greater than 1 year		
			wholesale debt and equity	154	150

Repurchase agreements fund reverse repurchase agreements and trading portfolio assets. Trading portfolio liabilities are settled by the remainder of reverse repurchase agreements (see Note 19 Offsetting financial assets and financial liabilities for further detail on netting).

Derivative liabilities and assets are largely matched. A substantial proportion of balance sheet derivative positions qualify for counterparty netting and the remaining portions are largely offset once netted against cash collateral received and paid.

Wholesale debt, along with the surplus of customer deposits to loans and advances to customers, is used to fund the liquidity pool. Term wholesale debt and equity largely fund other assets.

Note

a Predominantly available for sale investments, financial assets designated at fair value and loans and advances to banks funded by greater than one year wholesale debt and equity and trading portfolio assets partially.

Funding risk liquidity

Composition of wholesale funding^a

The Group maintains access to a variety of sources of wholesale funds in major currencies, including those available from term investors across a variety of distribution channels and geographies, money markets, and repo markets. The Group has direct access to US, European and Asian capital markets through its global investment banking operations and long-term investors through its clients worldwide, and is an active participant in money markets. As a result, wholesale funding is well diversified by product, maturity, geography and major currency.

As at 31 December 2016, the Group's total wholesale funding outstanding (excluding repurchase agreements) was £158bn (2015: £142bn). £70bn (2015: £54bn) of wholesale funding matures in less than one year, of which £22bn (2015: £14bn)^b relates to term funding.

As at 31 December 2016, outstanding wholesale funding comprised £26bn (2015: £25bn) of secured funding and £132bn (2015: £117bn) of unsecured funding.

As the Group progresses to a Single Point of Entry resolution model, Barclays continues to issue debt capital and term senior unsecured funding from Barclays PLC, the holding company, replacing maturing debt in Barclays Bank PLC.

Outstanding wholesale funding includes £37.6bn (2015: £35.1bn) of privately placed senior unsecured notes in issue.

These notes are issued through a variety of distribution channels including intermediaries and private banks. Although not a requirement, the liquidity pool exceeded wholesale funding maturing in less than one year by £95bn (2015: £91bn).

Notes

- a The composition of wholesale funds comprises the balance sheet reported deposits from banks, financial liabilities at fair value, debt securities in issue and subordinated liabilities, excluding cash collateral and settlement balances and collateral swaps. Included within deposits from banks are £4.5bn of liabilities drawn in the European Central Bank's facilities.
- b Term funding maturities comprise public benchmark and privately placed senior unsecured notes, covered bonds/asset-backed securities (ABS) and subordinated debt where the original maturity of the instrument was more than 1 year.
- c Includes structured notes of £30.8bn, £7.7bn of which matures within one year.
- d Primarily comprised of fair value deposits of £3.0bn and secured financing transactions of physical gold of £0.5bn.

Currency composition of wholesale debt

As at 31 December 2016, the proportion of wholesale funding by major currencies was as follows:

Currency composition of wholesale funding

	USD	EUR	GBP	Other
	%	%	%	%
Deposits from banks	22	44	30	4
Certificates of deposits and commercial paper	44	48	7	1
Asset backed commercial paper	89	8	3	
Senior unsecured (public benchmark)	51	25	16	8
Senior unsecured (privately placed)	48	25	11	16
Covered bonds/ABS	30	42	28	
Subordinated liabilities	53	28	19	
Total as at 31 December 2016	48	32	16	4
Total as at 31 December 2015	38	31	23	8

To manage cross-currency refinancing risk the Group manages foreign exchange cash flow limits, which limit risk at specific maturities. The composition of wholesale funding is materially unchanged.

Term financing

The Group issued £12.1bn equivalent of capital and senior unsecured debt from the holding company of which £8.6bn equivalent and £0.7bn equivalent in public and private senior unsecured debt respectively, and £2.8bn of capital instruments. In the same period £7.4bn of Barclays Bank PLC capital and senior unsecured debt was bought back or called.

The Group has £21.2bn of term funding maturing in 2017 and £13.2bn in 2018.

The Group expects to continue issuing public wholesale debt in 2017 from Barclays PLC, in order to ensure compliance with new prospective loss absorbency requirements and to maintain a stable and diverse funding base by type, currency and distribution channel.

Encumbrance

Edgar Filing: BARCLAYS PLC - Form 6-K

Asset encumbrance arises from collateral pledged against secured funding and other collateralised obligations. Barclays funds a portion of trading portfolio assets and other securities via repurchase agreements and other similar borrowing, and pledges a portion of customer loans and advances as collateral in securitisation, covered bond and other similar secured structures. Barclays monitors the mix of secured and unsecured funding sources within the Group's funding plan and seeks to efficiently utilise available collateral to raise secured funding and meet other collateral requirements.

Encumbered assets have been defined consistently with the Group's reporting requirements under Article 100 of the Capital Requirements Regulation (CRR). Securities and commodities assets are considered encumbered when they have been pledged or used to secure, collateralise or credit enhance a transaction which impacts their transferability and free use. This includes external repurchase or other similar agreements with market counterparts.

Excluding assets positioned at central banks, as at 31 December 2016, £168bn (2015: £157bn) of the Group's assets were encumbered, primarily due to cash collateral posted, firm financing of trading portfolio assets and other securities and funding secured against loans and advances to customers.

Assets may also be encumbered under secured funding arrangements with central banks. In advance of such encumbrance, assets are often positioned with central banks to facilitate efficient future draw down. £63bn (2015: £88bn) of on-balance sheet assets were positioned at the central banks, consisting of encumbered assets and collateral pre-positioned and available for use in secured financing transactions.

£277bn (2015: £212bn) of on and off-balance sheet assets not positioned at the central bank were identified as readily available and available for use in secured financing transactions. Additionally, they include cash and securities held in the Group liquidity pool as well as unencumbered assets which provide a source of contingent liquidity. While these additional assets are not relied upon in the Group's LRA, a portion of these assets may be monetised to generate liquidity through use as collateral for secured funding or through outright sale. Loans and advances to customers are only classified as readily available if they are already in a form, such that, they can be used to raise funding without further management actions. This includes excess collateral already in secured funding vehicles.

£231bn (2015: £208bn) of assets not positioned at the central bank were identified as available as collateral. These assets are not subject to any restrictions on their ability to secure funding, to be offered as collateral, or to be sold to reduce potential future funding requirements, but are not immediately available in the normal course of business in their current form. They primarily consist of loans and advances which would be suitable for use in secured funding structures but are conservatively classified as not readily available because they are not in transferable form.

Not available as collateral consists of assets that cannot be pledged or used as security for funding due to restrictions that prevent their pledge or use as security for funding in the normal course of business.

Derivatives and reverse repo assets relate specifically to derivatives, reverse repurchase agreements and other similar secured lending. These are shown separately as these on-balance sheet assets cannot be pledged. However, these assets can give rise to the receipt of non-cash assets which are held off-balance sheet, and can be used to raise secured funding or meet additional funding requirements.

In addition, £406bn (2015: £265bn) of the total £466bn (2015: £306bn) securities accepted as collateral, and held off-balance sheet, were on-pledged, the significant majority of which related to matched-book activity where reverse repurchase agreements are matched by repurchase agreements entered into to facilitate client activity. The remainder relates primarily to reverse repurchases used to settle trading portfolio liabilities as well as collateral posted against derivatives margin requirements.

Risk review

Risk performance

Funding risk liquidity

Repurchase agreements and reverse repurchase agreements

Barclays enters into repurchase and other similar secured borrowing agreements to finance its trading portfolio assets. The majority of reverse repurchase agreements are matched by offsetting repurchase agreements entered into to facilitate client activity. The remainder are used to settle trading portfolio liabilities.

Due to the high quality of collateral provided against secured financing transactions, the liquidity risk associated with this activity is significantly lower than unsecured financing transactions. Nonetheless, Barclays manages to gross and net secured mismatch limits to limit refinancing risk under a severe stress scenario and a portion of the Group's liquidity pool is held against stress outflows on these positions. The Group secured mismatch limits are calibrated based on market capacity, liquidity characteristics of the collateral and risk appetite.

The cash value of repurchase and reverse repurchase transactions will typically differ from the market value of the collateral against which these transactions are secured by an amount referred to as a haircut (or over-collateralisation). Typical haircut levels vary depending on the quality of the collateral that underlies these transactions. For transactions secured against extremely liquid fixed income collateral, lenders demand relatively small haircuts (typically ranging from 0-2%). For transactions secured against less liquid collateral, haircuts vary by asset class (typically ranging from 5-10% for corporate bonds and other less liquid collateral).

As at 31 December 2016, the significant majority of repurchase activity related to matched-book activity. The Group may face refinancing risk on the net maturity mismatch for matched-book activity.

Net matched-book activity^{a,b}

	Less than one month £bn	One month to three months £bn	Over three months £bn
Negative number represents the cash value of the net repurchase agreement (net liability)			
As at 31 December 2016			
Extremely liquid Fixed Income ^c	(21.8)	11.6	10.7
Liquid Fixed Income	(0.4)	0.8	(0.7)
Equities	6.1	(0.5)	(9.6)
Less liquid Fixed Income	0.6	(0.2)	(1.3)
Total	(15.5)	11.7	(0.9)
As at 31 December 2015			
Extremely liquid Fixed Income	(12.9)	7.3	5.6
Liquid Fixed Income	0.3	0.6	(0.9)

Equities	7.0	(1.5)	(5.5)
Less liquid Fixed Income	1.6	(0.4)	(1.2)
Total	(4.0)	6.0	(2.0)

The residual repurchase agreement activity is the firm-financing component and reflects Barclays funding of a portion of its trading portfolio assets. The primary risk related to firm-financing activity is the inability to roll-over transactions as they mature. However, 44% (2015: 50%) of firm financing activity was secured against extremely liquid fixed income assets.

Notes				

a Includes collateral swaps.

b Includes financing positions for prime brokerage clients which are reported as customer payables/receivables on balance sheet.

c Extremely liquid fixed income is defined as very highly rated sovereigns and agencies, typically rated AA+ or better. It excludes liquid fixed income, equities and other less liquid collateral.

Credit ratings

In addition to monitoring and managing key metrics related to the financial strength of the Group, Barclays solicits independent credit ratings by Standard & Poor's (S&P), Moody's and Fitch, as well as Rating and Investment Information (R&I). These ratings assess the creditworthiness of the Group, its subsidiaries and branches and are based on reviews of a broad range of business and financial attributes including risk management processes and procedures, capital strength, earnings, funding, asset quality, liquidity, accounting and governance.

Credit ratings

As at 31 December 2016	Standard & Poor's	Moody's	Fitch
Barclays Bank PLC			
Long-term	A- (Negative)	A1 (Negative)	A (Stable)
Short-term	A-2	P-1	F1
Stand-alone rating^a	bbb+	Baa2	a
Barclays PLC			
Long-term	BBB (Negative)	Baa2 (Negative)	A (Stable)
Short-term	A-2	P-3	F1

During the year, Barclays' ratings outlooks for Moody's and S&P were changed to Negative from Stable following the outcome of the EU referendum in June 2016. The rating actions were part of a wider set of actions which saw the two agencies place several UK banks on negative outlooks whilst affirming the ratings. The ratings continue to carry a stable outlook with Fitch.

In December 2016, Moody's upgraded senior long-term ratings for both Barclays Bank PLC and Barclays PLC by one notch reflecting the continued build-up of loss absorbing capacity at Barclays PLC which would provide additional protection for Barclays Bank PLC's depositors and senior unsecured creditors, and Barclays PLC's senior unsecured creditors in a failure scenario. The negative outlooks assigned in June remained in place as the rating agency's assessment of Barclays' stand-alone credit strength was unaffected by the rating action.

S&P and Fitch affirmed Barclays' ratings in July and December 2016 respectively as part of their periodic reviews.

Barclays also solicits issuer ratings from R&I for local issuance purposes in Japan and the ratings of A- for Barclays PLC and A for Barclays Bank PLC were affirmed in July 2016 with stable outlooks.

Risk performance

Funding risk **liquidity**

Liquidity management at BAGL Group (audited)

Liquidity risk is managed separately at BAGL Group due to local currency, funding and regulatory requirements.

In addition to the Group liquidity pool, as at 31 December 2016, BAGL Group held £10.6bn (2015: £6.0bn) of liquidity pool assets against BAGL specific anticipated stressed outflows. The liquidity pool consists of central bank deposits, government bonds, treasury bills and notes, and coins. Absa Bank successfully applied for a Committed Liquidity Facility from the South African Reserve Bank, which is included in the liquidity pool from January 2016.

The BAGL loan to deposit ratio as at 31 December 2016 was 107% (2015: 102%).

Additional information on liquidity management at BAGL can be found in the Barclays Africa Group Annual Report.

Contractual maturity of financial assets and liabilities (audited)

The table below provides detail on the contractual maturity of all financial instruments and other assets and liabilities. Derivatives (other than those designated in a hedging relationship) and trading portfolio assets and liabilities are included in the 'on demand' column at their fair value. Liquidity risk on these items is not managed on the basis of contractual maturity since they are not held for settlement according to such maturity and will frequently be settled before contractual maturity at fair value. Derivatives designated in a hedging relationship are included according to their contractual maturity.

Financial assets designated at fair value in respect of linked liabilities to customers under investment contracts have been included in other assets and other liabilities as the Group is not exposed to liquidity risk arising from them; any request for funds from creditors would be met by simultaneously liquidating or transferring the related investment.

Expected maturity dates do not differ significantly from the contract dates, except for:

§ trading portfolio assets and liabilities and derivative financial instruments, which may not be held to maturity as part of the Group's trading strategies;

§ retail deposits, which are included within customer accounts, are repayable on demand or at short notice on a contractual basis. In practice, these instruments form a stable base for the Group's operations and liquidity needs because of the broad base of customers – both numerically and by depositor type (see Behavioural maturity profile on page 213; and

§ financial assets designated at fair value held in respect of linked liabilities, which are managed with the associated liabilities.

Note

a

Edgar Filing: BARCLAYS PLC - Form 6-K

The On demand and Not more than three months categories for 2015 have been adjusted by £37bn for financial assets and £25bn for financial liabilities to better reflect the contractual maturity of both Reverse repurchase agreements and Repurchase agreements measured at amortised cost and fair value.

Contractual maturity of financial liabilities on an undiscounted basis (audited)

The table below presents the cash flows payable by the Group under financial liabilities by remaining contractual maturities at the balance sheet date. The amounts disclosed in the table are the contractual undiscounted cash flows of all financial liabilities (i.e. nominal values).

The balances in the below table do not agree directly to the balances in the consolidated balance sheet as the table incorporates all cash flows, on an undiscounted basis, related to both principal as well as those associated with all future coupon payments.

Derivative financial instruments held for trading and trading portfolio liabilities are included in the on demand column at their fair value.

Financial liabilities designated at fair value in respect of linked liabilities under investment contracts have been excluded from this analysis as the Group is not exposed to liquidity risk arising from them.

Risk review

Risk performance

Operational risk

Analysis of operational risk

This section provides an analysis of the Group's operational risk profile, including events which have had a significant impact in 2016.

Key metrics

A small reduction in the number of recorded incidents occurring during the period

91%

of the Group's net reportable operational risk events had a loss value of £50,000 or less

65%

of events by number are due to external fraud

Risk review

Risk performance

Operational risk

Operational risk

Operational risk is the risk of loss to the firm from inadequate or failed processes or systems, human factors or due to external events (for example fraud) where the root cause is not due to credit or market risks

All disclosures in this section are unaudited unless otherwise stated.

Overview

Operational risks are inherent in the Group's business activities and it is not always cost effective or possible to attempt to eliminate all operational risks. The operational risk management framework is therefore focused on ensuring operational risks are identified, assessed and mitigated within the Group's approved risk appetite. More material losses are less frequent and the Group seeks to reduce the likelihood of these in accordance with its risk appetite.

The Operational principal risk comprises the following risks: financial reporting, fraud, information, payments process, people, premises and security, supplier, tax, technology (including cyber) and transaction operations. In 2016 legal risk and financial crime risk were managed as part of operational risk.

For definitions of these risks see page 157. In order to ensure complete coverage of the potential adverse impacts on the Group arising from operational risk, the operational risk taxonomy extends beyond the operational risks listed above to cover areas included within conduct and legal risk.

This section provides an analysis of the Group's operational risk profile, including events, those which are above the Bank's reportable threshold, which have had a financial impact in 2016.

For more information on conduct risk events please see page 228.

Summary of performance in the period

During 2016, total operational risk losses^a decreased to £225.9m (2015: £283.5m) with a 4% reduction in the number of recorded events compared to prior year. The loss for the year was primarily driven by a limited number of events in execution, delivery and process management categories and external fraud.

Operational risk profile

Within operational risk, a high proportion of risk events have a low associated financial cost and a very small proportion of operational risk events will have a material impact on the financial results of the Group. In 2016, 90.8% of the Group's net reportable operational risk events had a value of £50,000 or less (2015: 88.1%) and accounted for

23.2% (2015: 14.5%) of the Group's total net loss impact.

The analysis below presents the Group's operational risk events by Basel event category:

§ Execution, delivery and process management impacts increased to £124.4m (2015: £111.8m) and accounted for 55.0% (2015: 39.4%) of overall operational risk losses. The events in this category are typical of the banking industry as a whole where high volumes of transactions are processed on a daily basis. The increases in impacts were largely driven by limited number of events with higher loss values.

§ External fraud (65.2%) is the category with the highest frequency of events where high volume, low value events are also consistent with industry experience, driven by debit and credit card fraud. This accounted for 25.8% of overall operational risk losses in the year from 22.2% last year.

The Group's operational risk profile is informed by bottom-up risk assessments undertaken by each business unit and top-down qualitative review from the operational risk management for each risk type. External Fraud and technology are highlighted as key operational risk exposures. The operational risk profile is also informed by a number of risk themes: change, resilience and cyber security. These represent material risk to the bank but have scope which sits across multiple risk types, and therefore require a risk management approach which is integrated within relevant risk and control frameworks.

Investment continues to be made in new and enhanced fraud prevention systems and tools to combat the increasing level of fraud attempts being made and to minimise any disruption to genuine transactions. Fraud remains an industry-wide threat and the Bank continues to work closely with external partners on various prevention initiatives. Technology, resilience and cyber security risks evolve rapidly so the Bank maintains continued focus and investment in our control environment to manage these risks, and actively partners with peers and relevant organisations to understand and disrupt threats originating outside the Bank.

For further information see Operational Risk Management section on pages 158 to 161.

Operational risk events by risk category

% of total risk events by count

Operational risk events by risk category

% of total risk events by value

Note

a The data disclosed include operational risk losses for reportable events (excluding Africa) having impact of > £10,000 and exclude events that are conduct risk, aggregate and boundary events. A boundary event is an operational risk event that results in a credit risk impact. Legal risk events are also included. Due to the nature of risk events that keep evolving, prior year losses are updated.

Risk review

Risk performance

Conduct risk

Analysis of conduct risk

This section details Barclays' conduct risk profile and provides information on key 2016 risk events and risk mitigation actions Barclays has taken.

Key metrics

5.4/10

Balanced Scorecard

The Conduct Reputation Balanced Scorecard Measure has been sustained mainly by our focus on:

- § Operating openly and transparently
- § Having high quality products and services
- § Delivering value for money for customers and clients

Risk review

Risk performance

Conduct risk

Conduct risk

Conduct risk is the risk of detriment to customers, clients, market integrity, competition or Barclays from the inappropriate supply of financial services, including instances of wilful or negligent conduct

All disclosures in this section are unaudited unless otherwise stated.

Conduct Risk

Barclays strives to create and maintain mutually beneficial long-term relationships with our customers and clients. This means taking personal accountability for understanding their needs and providing them with products and services that meet those needs appropriately and help them manage their financial affairs.

As a transatlantic consumer, corporate and investment bank, Barclays also plays a critical role in promoting fair, open and transparent markets, as well as fostering shared growth for all. This means abiding by standards that in many cases are higher than those set by the laws and regulations that apply to our business.

Summary of performance in the period

In 2016, Barclays remained focused on the continuous improvements being made to manage risk effectively, with an emphasis on enhancing governance and management information to help ensure forward-looking risks are identified at earlier stages.

The cornerstone of our efforts is the Strengthening Personal Accountability programme, which is designed to strengthen our culture and embed our values throughout the organisation. The programme includes implementation of the UK Senior Manager, Certification and Conduct Rules, in addition to similar regulatory requirements and expectations in other jurisdictions.

The Group introduced dashboards on conduct, culture, complaints and citizenship to help the Board and senior management oversee and measure change across the organisation and take action where necessary to address issues and encourage progress. The dashboard data reflects a downward trend in conduct issues and complaints alongside an upward trend in confidence with respect to speaking up about potential conduct risks and issues.

Barclays proactively undertook Lessons Learned assessments on issues identified in enforcement matters across the industry, including the use of performance metrics and formulaic incentives in remuneration and performance management. The Group also enhanced the role and impact of conduct issues in the remuneration process at both the

individual and business level.

Businesses have continued to assess the potential customer, client and market impacts of strategic change and structural reform. As part of the 2016 Medium-Term Planning Process, material conduct risks associated with strategic and financial plans were assessed. Divestment of Non-Core assets and businesses remains subject to a governance framework that considers the impacts on customer and client choice, market access, liquidity and other conduct risks.

The Group also continually assesses the impact of economic and geopolitical events on customers, clients and markets. In anticipation of the EU Referendum, Barclays successfully applied incident management techniques to prepare for and respond to customer and client needs and provide market liquidity.

Throughout 2016 conduct risks were raised by businesses for consideration by the Board Reputation Committee. The Board Reputation Committee reviewed the risks raised and whether management's proposed actions were appropriate to manage the risks effectively. In addition to structural reform, strategic change, the EU Referendum and lessons learned assessments, the Board Reputation

Committee reviewed issues related to data security, cyber risk and technology resilience.

While there has been significant progress, a need for continued focus remains. Barclays must drive cultural change through all levels of the organisation and evidence consistent consideration of conduct risks in long-term, medium-term and day-to-day strategic decisions. The Group must continue to refine its conduct governance structure, particularly with respect to forward-looking management information to drive proactive decision making and address issues that persist around the general control environment and infrastructure.

The Group continued to incur significant costs in relation to litigation and conduct matters, please refer to Note 29 Legal, competition and regulatory matters and Note 27 Provisions for further detail. Costs include customer redress and remediation, as well as fines and settlements. Resolution of these matters remains a necessary and important part of delivering the Group's strategy and an ongoing commitment to improve oversight of culture and conduct.

Reputation Risk has been managed as a Key Risk under Conduct Risk, prior to being re-designated as a Principal Risk with effect from 2017. Barclays' association with sensitive sectors is often an area of concern for stakeholders and the following topics were of particular interest during the year:

§ Climate change and the management of climate risks is an increasingly important issue for the banking sector. There has been an increase in the level of interest in our response to climate change from a number of different stakeholder groups, largely driven by the ratification of COP21 requirements and publication of draft recommendations by the Financial Stability Board's Taskforce on Climate-related Financial Disclosures for annual reports. We are undertaking a review of our global energy sector client portfolio, in order to develop a strategic approach that is sustainable in the long term. We expect credit appetite to fossil fuels more broadly to decrease over time due to regulatory requirements, political appetite and moves towards development of cleaner energy sources, with particular short-term focus on coal. In the meantime, we are actively pursuing opportunities in the green energy and renewable sectors. Please refer to home.barclays/citizenship/our-reporting.html for further information.

§ Supporting the manufacture and export of military and riot control goods and services is a reputation risk for the financial services sector. Political and public concern in particular relates to the use of weapons against civilians in conflict situations and to support unjustified external aggression. Our Defence Policy mandates our relationship with clients in this sector and includes a number of restrictions regarding client activities. For example, it is our

policy not to finance trade in, or manufacture of, nuclear, chemical, biological or other weapons of mass destruction. A formal governance structure is in place to review high risk defence relationships and trade transactions on a case by case basis, taking into account the client, types of goods, end user and country risk.

§ The banking sector has come under increased scrutiny for its perceived indirect involvement in human rights abuses committed by clients and customers. Barclays Group Statement on Human Rights outlines how we manage our impacts across four key areas: employees, local communities, suppliers and clients/customers, taking into account the UN Framework and Guiding Principles on business and human rights and other internationally recognised human rights standards. The UK Modern Slavery Act which came into force in October 2015 has helped raise awareness of the role business plays in managing human rights impacts. We are committed to combatting the risk of modern slavery or human trafficking in our supply chain or in any part of our business and Barclays Group Statement on Modern Slavery is available on home.barclays/content/dam/barclayspublic/docs/Citizenship/Policy-Positions/MSA2016.pdf

Reputation Risk may also arise as a result of issues and incidents relevant to other Principal Risks, in particular other non-financial risks e.g. Conduct or Operational Risk.

Risk review

Supervision and regulation

Supervision of the Group

The Group's operations, including its overseas offices, subsidiaries and associates, are subject to a significant body of rules and regulations that are a condition for authorisation to conduct banking and financial services business. These apply to business operations, impact financial returns and include reserve and reporting requirements and prudential and conduct of business regulations. These requirements are set by the relevant central banks and regulatory authorities that authorise, regulate and supervise the Group in the jurisdictions in which it operates. The requirements generally reflect global standards developed by, amongst others, the Basel Committee on Banking Supervision (BCBS), the International Organization of Securities Commissions (IOSCO) and the Financial Stability Board (FSB). They also reflect requirements imposed directly by, or derived from, EU legislation. Various bodies, such as central banks, also create voluntary Codes of Conduct which affect the way the Group does business.

Regulatory developments impact the Group globally. We focus particularly on EU, UK and US regulation due to the location of Barclays' principal areas of business. Regulations elsewhere will affect Barclays due to the location of its branches, subsidiaries and, in some cases, clients.

The Group and certain of its members are subject to supervisory stress testing exercises in a number of jurisdictions. These exercises currently include the programmes of the Bank of England (BoE), the European Banking Authority (EBA), the Federal Deposit Insurance Corporation (FDIC), the Board of Governors of the Federal Reserve System (FRB) and the South African Reserve Bank (SARB). These exercises are designed to assess the resilience of banks to adverse economic or financial developments and ensure that they have robust, forward-looking capital planning processes that account for the risks associated with their business profile. Assessment by regulators is on both a quantitative and qualitative basis, the latter focusing on the Group's data provision, stress testing capability and internal management processes and controls. Failure to meet requirements of regulatory stress tests, or the failure by regulators to approve the stress test results and capital plans of the Group or its members subject to these exercises, could result in the Group or certain of its members being required to enhance its capital position or limit capital distributions, to any external holders of its equity or capital or within the Group. In 2016 Barclays and certain of its subsidiaries completed stress testing pursuant to the requirements of the BoE, EBA and SARB. Barclays was not required to submit revised plans as a result of these tests. Further details of Barclays capital requirements are set out below under [Prudential Developments](#).

Supervision in the EU

Financial regulation in the UK is to a significant degree shaped and influenced by EU legislation. This provides the structure of the European Single Market, an important feature of which is the framework for the regulation of authorised firms in the EU. This framework is designed to enable a credit institution or investment firm authorised in

one EU member state to conduct banking or investment business in another member state through the establishment of branches or by the provision of services on a cross-border basis without the need for local authorisation. Barclays operations in Europe are authorised and regulated by a combination of both home and host regulators. The impact of the UK's departure from the EU in this respect and, more broadly, its impact on the UK domestic regulatory framework, is yet to be determined. See the Risk Factor entitled "EU referendum", which discusses the potential impact of the UK's departure from the EU in more detail.

In the UK, the BoE has responsibility for monitoring the UK financial system as a whole. The day-to-day regulation and supervision of the Group is divided between the Prudential Regulation Authority (PRA) and the Financial Conduct Authority (FCA).

In addition, the Financial Policy Committee (FPC) of the BoE has influence on the prudential requirements that may be imposed on the banking system through its powers of direction and recommendation.

Barclays Bank PLC is authorised and subject to solo and consolidated prudential supervision by the PRA and subject to conduct regulation and supervision by the FCA. Barclays Bank PLC's Italian and French branches are also subject to direct supervision by the European Central Bank (ECB).

In its role as supervisor, the PRA seeks to maintain the safety and soundness of financial institutions with the aim of strengthening, but not guaranteeing, the protection of customers and the financial system. The PRA's continuing supervision of financial institutions is conducted through a variety of regulatory tools, including the collection of information by way of prudential returns, reports obtained from skilled persons, visits to firms and regular meetings with management to discuss issues such as performance, risk management, conduct and culture and strategy.

The regulation and supervision of market conduct matters is the responsibility of the FCA. The FCA's regulation of the UK firms in the Group is carried out through a combination of continuous assessment, regular thematic and project work based on the FCA's sector assessments, which analyse the different areas of the market and the risks that may lie ahead.

Both the PRA and the FCA have continued to develop and apply a more assertive approach to supervision and the application of existing standards. This may include application of standards that either anticipate or go beyond requirements established by global or EU standards, whether in relation to capital, leverage and liquidity, resolvability and resolution or matters of conduct.

The FCA has retained an approach to enforcement based on credible deterrence that has seen significant growth in the size of regulatory fines. The approach appears to be trending towards a more US model of enforcement including the use of Deferred Prosecution Agreements, vigorous enforcement of criminal and regulatory breaches, heightened fines and proposed measures related to increased corporate criminal liability and the failure to prevent the facilitation of tax evasion.

The FCA has focused strongly on conduct risk and on customer outcomes and will continue to do so. This has included a focus on the design and operation of products, the behaviour of customers and the operation of markets. This may affect both the incidence of conduct costs and increase the cost of remediation. The FCA has also increasingly focused on individual accountability within firms, as illustrated by the Senior Managers' Regime and Certification Regime detailed below.

Supervision in the US

The supervisory framework of Barclays within the US is set out below in the section entitled "Regulation in the US".

Supervision in South Africa

Edgar Filing: BARCLAYS PLC - Form 6-K

In South Africa, BAGL's operations are supervised and regulated by the South African Reserve Bank (SARB), the Financial Services Board (SAFSB) as well as ancillary regulators including, amongst others, the Financial Intelligence Centre. SARB oversees the banking industry and follows a risk-based approach to supervision, whilst the SAFSB oversees non-banking financial services such as insurance and investment businesses. The National Credit Regulator regulates consumer credit and the National Consumer Commission is responsible for other aspects of consumer protection not regulated under the jurisdiction of the SAFSB. It is intended that regulatory responsibilities in South Africa will in future be divided between the SARB, which will be responsible for prudential regulation, and the SAFSB, which will be responsible for matters of market conduct. The proposed 'twin peaks' legislation is currently going through the consultation phase of the Parliamentary process to enact the legislation. Barclays' and BAGL's operations in other African countries are primarily supervised and regulated by the central banks in the jurisdictions where Barclays or BAGL (as relevant) has a banking presence. In some African countries, the conduct of Barclays' and BAGL's operations and their non-banking activities are also regulated by financial market authorities.

Risk review

Supervision and regulation

Supervision in Asia Pacific

Barclays' operations in Asia Pacific are supervised and regulated by a broad range of national regulators including: the Japan Financial Services Agency, the Bank of Japan, the Hong Kong Monetary Authority, the Hong Kong Securities and Futures Commission, the Monetary Authority of Singapore, the Reserve Bank of India, the Securities and Exchange Board of India and the People's Bank of China, China's State Administration of Foreign Exchange and the China Banking Regulatory Commission. Such supervision and regulation extends to activities conducted through branches of Barclays Bank PLC in the Asia Pacific region as well as subsidiaries of the Group.

Global regulatory developments

Regulatory change continues to affect all large financial institutions. Such change emanates from: global institutions such as the G20, FSB, IOSCO and BCBS; the European Union regionally; and national regulators, especially in the UK and US. 2016 gave rise to significant political changes in these markets, which have increased the level of regulatory and supervisory uncertainty faced by the Group and the financial markets more broadly. For more information, please see the Risk Factor entitled "Business conditions, general economy and geopolitical issues".

Further changes to financial services regulations impacting Barclays may affect the Group's planned activities and could increase costs and contribute to adverse impacts on the Group's earnings.

The programme of reform of the global regulatory framework previously agreed by G20 Heads of Government in April 2009 has continued to be taken forward throughout 2016. The G20 continues to monitor emerging risks and vulnerabilities in the financial system and has stated that it will take action to address them if necessary.

The FSB has been designated by the G20 as the body responsible for co-ordinating the delivery of the global reform programme in relation to the financial services industry. It has focused particularly on the risks posed by systemically important financial institutions. In 2011, G20 Heads of Government adopted FSB proposals to reform the regulation of global systemically important financial institutions (G-SIFIs), including global systemically important banks (G-SIBs), such as Barclays.

Regulatory developments in the financial services industry can broadly be categorised as follows: (a) prudential developments; (b) recovery and resolution developments, a key aspect of which is to ensure that G-SIFIs are capable of being resolved without recourse to taxpayer support; (c) structural reform developments; (d) market infrastructure developments, aimed at enhancing client protection, financial stability and market integrity; and (e) conduct, culture and consumer protection developments.

Regulation in the EU and the UK

(a) Prudential developments

The Basel III capital and liquidity standards, defined by BCBS, are implemented in EU law through CRD IV. The provisions of CRD IV either applied from, or had to be implemented in EU Member States by, 1 January 2014. In addition, the PRA has expected Barclays, in common with other major UK banks and building societies, to meet a 7% CET1 ratio at the level of the consolidated group since 1 January 2016.

G-SIBs are subject to a number of additional prudential requirements, including the requirement to hold additional loss absorbing capacity and additional capital buffers above the level required by Basel III standards. The level of G-SIB buffer is set by the FSB according to a bank's systemic importance and can range from 1% to 3.5% of risk-weighted assets. The G-SIB buffer must be met with common equity.

In November 2016, the FSB published an update to its list of G-SIBs, reducing the G-SIB buffer that Barclays is required to hold from 2% to 1.5%, effective from January 2018. The additional G-SIB buffer began to be phased in from January 2016, from when G-SIBs were required to meet 25% of their designated buffer. This will increase to 50% in 2017, 75% in 2018 and 100% in January 2019. G-SIBs have also been required to meet higher supervisory expectations for data aggregation capabilities since 1 January 2016. Barclays is also subject to, among other buffers, a countercyclical capital buffer (CCyB) based on rates determined by the regulatory authorities in each jurisdiction in which Barclays maintains exposures. These rates may vary in either direction, for example, in July 2016, the FPC published a policy statement directing the PRA to reduce the UK CCyB rate from 0.5% to 0% of banks' UK exposures with immediate effect, which was subsequently adopted by the PRA. In November 2016, the FPC reaffirmed that it expects to maintain a UK CCyB rate at 0% until at least June 2017, absent any material change in the economic outlook. The systemic risk buffer is expected to be set by the PRA for the first time in early 2019.

The BCBS maintains a number of active workstreams that will affect the Group. In January 2016, the BCBS endorsed a new market risk framework, including rules made as a result of its fundamental review of the trading book, to take effect in 2019. The BCBS also continues to focus on the consistency of risk weighting of assets and on reducing the variations of approaches to risk weightings between banks. This includes revisions to the standardised rules for credit risk, CVA volatility risk and operational risk. The BCBS is also considering whether to limit the use of internal models in certain areas (for example, removing the Advanced Measurement Approach for operational risk) and to apply capital floors based on the standardised approaches. The BCBS has also recently published final standards on the Basel III securitisation framework, interest rate risk in the banking book and minimum capital requirements for market risk. The final standards for measuring and controlling large exposures were published by the BCBS in April 2014 to take effect in 2019. In November 2016 the European Commission adopted a proposal (commonly referred to as CRD V) to begin the legislative process for introducing these standards within the EU, with legislation expected to be finalised in late 2017 or early 2018. These proposals, if implemented in their current form would, among other things, overhaul existing rules relating to standardised and advanced market risk and the rules governing the inclusion of positions in the regulatory trading book. The proposals would also enhance rules for counterparty credit risk, strengthen requirements relating to leverage and large exposures and introduce a net stable funding ratio, requiring banks to ensure that they hold reliable sources of funds in excess of their required amount of stable funding over a one year period. CRD V also proposes to require that non-EU parent undertakings with two or more subsidiary firms established in the EU establish an intermediate parent undertaking, authorised and established in, and subject to the supervision of, an EU Member State. This requirement would apply to non-EU groups that have been identified as non-EU Global Systemically Important Institutions (G-SIIs) under CRD IV (as amended) and to groups with entities in the EU with total assets of at least €30bn. If implemented as proposed, Barclays could be required to establish such a holding company in respect of its EU operations following the UK's departure from the EU.

In January 2017, the BCBS announced that its finalisation of reforms to Basel III had been delayed. The BCBS is now expected to issue updated standards on the calculation of operational risk, the standardised framework for credit risk,

Edgar Filing: BARCLAYS PLC - Form 6-K

restrictions on the use of internal models (including the application of RWA floors based on standardised approaches), the leverage ratio (including a leverage ratio buffer for G-SIBs) and an output floor based on a standardised approach, later in 2017. As these measures will require EU and domestic legislation to be implemented, it is not clear when they will become effective.

IFRS9 will be implemented in the European Union from 1 January 2018. In October 2016, the Basel Committee issued two documents on the treatment of accounting provisions in the regulatory framework, to take account of the future move to expected credit loss provisioning under IFRS and Financial Accounting Standards Board (FASB) standards. One paper considered transitional arrangements to phase-in the immediate capital impact of the new provisioning standards, while the other discussed more fundamental changes to the recognition of provisions in regulatory capital and changes to the risk weighting framework. The European Commission's CRR2 proposal also proposed transitional arrangements. The regulatory capital impact of IFRS9 on the group will depend on the timing and final form of all these initiatives.

(b) Recovery and Resolution developments

An important component of the EU legislative framework is the 2014 Bank Recovery and Resolution Directive (BRRD) which establishes a framework for the recovery and resolution of EU credit institutions and investment firms. The UK implemented the BRRD through the Financial Services (Banking Reform) Act 2013 (the Banking Reform Act), which amended the Banking Act 2009.

Pursuant to the Banking Act, UK resolution authorities are empowered to intervene in and resolve a UK financial institution that is no longer viable. Pursuant to these laws, the BoE (in consultation with the PRA and HM Treasury as appropriate) has several stabilisation options where a banking institution is failing or likely to fail: (i) transfer some or all of the securities of the bank to a commercial purchaser; (ii) transfer some or all of the property, rights and liabilities of the bank to a bridge bank wholly owned by the BoE or to a commercial purchaser; (iii) transfer the impaired or problem assets to an asset management vehicle to allow them to be managed over time; (iv) cancel or reduce certain liabilities of the institution or convert liabilities to equity to absorb losses and recapitalise the institution and (v) in the case of a holding company, transfer the banking institution into temporary public ownership. In addition, the BoE may apply for a court insolvency order in order to wind up or liquidate the institution or to put the institution into special administration. When exercising any of its stabilisation powers, the BoE must generally provide that shareholders bear first losses, followed by creditors in accordance with the priority of their claims under normal insolvency proceedings.

In order to enable the exercise of its stabilisation powers, the BoE may impose a temporary stay on the rights of creditors to terminate, accelerate or close out contracts, and in some cases to override events of default or termination rights that might otherwise be invoked as a result of a resolution action. In addition, the Banking Act gives the BoE the power to override, vary, or impose conditions or contractual obligations between a UK bank, its holding company and its group undertakings, in order to enable any transferee or successor bank to operate effectively after any of the resolution tools have been applied. There is also power for HM Treasury to amend the law (excluding provisions made by or under the Banking Act) for the purpose of enabling it to use the regime powers effectively, potentially

with retrospective effect. The Banking Act powers apply regardless of any contractual restrictions and compensation that may be payable. In July 2016 the PRA issued final rules on ensuring operational continuity in resolution. The rules will apply from 1 January 2019 and will require banks to ensure that their operational structures facilitate effective recovery and resolution planning and the continued provision of functions critical to the economy in a resolution scenario.

The BRRD requires EU member states to establish pre-funded resolution funds of 1% of covered deposits to be built up by 31 December 2024. The UK government uses the Bank Levy to meet this ex-ante funding requirements, as well as the ex-post contributions that would be required were the ex-ante contributions not to cover costs or other expenses incurred by use of the resolution funds.

Separately, Financial Services Compensation Scheme (FSCS), a deposit guarantee scheme established under the EU Deposit Guarantee Schemes Directive and Investor Schemes Directive, is funded through fees levied on participant firms, including Barclays. The FSCS operates when an authorised firm is unable or is likely to be unable to meet claims made against it by its customers because of its financial circumstances. Most insured deposits made with branches of Barclays Bank PLC within the EEA are covered by the FSCS. Most claims made in respect of investment business will also be protected claims if the business was carried on from the UK or from a branch of the bank or investment firm in question in another EEA member state. Deposits covered by the FSCS are preferred in an insolvency of the bank.

In the event that the HM Treasury significantly increases the Bank Levy applicable to Barclays, or the FSCS significantly increases the fees levied on Barclays by virtue of its participation in the FSCS, the associated costs to the Group may have a material impact on the Group's results.

The BRRD also requires competent authorities to impose a Minimum Requirement for own funds and Eligible Liabilities (MREL) on financial institutions to facilitate the effective exercise of the in-tool referred to above. The EU proposes that for G-SIBs, such as Barclays, MREL should be set in accordance with the FSB Total Loss Absorbing Capital (TLAC) standard, discussed further below.

In November 2015 the FSB finalised its proposals to enhance the loss-absorbing capacity of G-SIBs to ensure that there is sufficient loss-absorbing and recapitalisation capacity available in resolution to implement an orderly resolution which minimises the impact on financial stability, ensures the continuity of critical functions and avoids exposing taxpayers to losses. To this end, the FSB has set a new minimum requirement for total loss absorbing capacity (TLAC). The EU has proposed to implement the TLAC standard via the MREL requirement and the European Commission has proposed amendments in its CRD V proposal to achieve this. As the proposals remain in draft it is uncertain what the final requirements and timing will be. The statement of policy confirmed that the BoE will set MREL for UK G-SIBs as necessary to implement the TLAC standard and that institution or group-specific MREL requirements will depend on the preferred resolution strategy for that institution or group. The MREL will be phased in from 1 January 2019 and will be fully implemented by 1 January 2022, at which time G-SIBs with resolution entities incorporated in the UK, including Barclays, will be required to meet a MREL equivalent to the higher of (i) two times the sum of its Pillar 1 and Pillar 2A requirements or (ii) the higher of two times its leverage ratio or 6.75% of leverage exposures. However, the PRA will review the MREL calibration by the end of 2020, including assessing the proposal for Pillar 2A recapitalisation which may drive a different 1 January 2022 MREL requirement than currently proposed. In addition, it is proposed that CET1 capital cannot be counted towards both MREL and the combined buffer requirement (CBR), meaning that the CBR will effectively be applied above both the Pillar 1 and Pillar 2A requirements relating to own funds and MREL, such that a failure to maintain sufficient other MREL resources could result in a breach of the CBR.

Risk review

Supervision and regulation

In October 2016, the BCBS also published its final standard on the prudential treatment of banks' investments in TLAC instruments issued by other institutions, confirming that internationally active banks (both G-SIBs and non-G-SIBs) must deduct their holdings of TLAC instruments that do not otherwise qualify as regulatory capital from their own Tier 2 capital. Where the investing bank owns less than 10% of the issuing bank's common shares, TLAC holdings are to be deducted from Tier 2 capital only to the extent that they exceed 10% of the investing bank's common equity (or 5% for non-regulatory capital TLAC holdings); below this threshold, holdings would instead be subjected to risk-weighting. G-SIBs may only apply risk-weighting to non-regulatory capital TLAC holdings by the 5% threshold where those holdings are in the trading book and are sold within 20 business days.

In addition to the amendments proposed to align MREL for G-SIBs with the TLAC standard, in November 2016 the European Commission proposed a package of amendments to the BRRD, including to harmonise the priority ranking of unsecured debt instruments under national insolvency proceedings and to enhance the stabilisation tools by including a moratorium tool.

The PRA has made rules that require authorised firms to draw up recovery plans and resolution packs, as required by the BRRD. Recovery plans are designed to outline credible recovery actions that authorised firms could implement in the event of severe stress in order to restore their business to a stable and sustainable condition. The resolution pack contains detailed information on the authorised firm in question which will be used to develop resolution strategies for that firm, assess its current level of resolvability against the strategy, and to inform work on identifying barriers to the implementation of operational resolution plans. In the UK, Recovery and Resolution Planning (RRP) work is considered part of continuing supervision. Removal of potential impediments to an orderly resolution of the Group or one or more of its subsidiaries is considered as part of the BoE's and PRA's supervisory strategy for each firm, and the PRA can require firms to make significant changes in order to enhance resolvability. Barclays currently provides the PRA with a Recovery Plan annually and with a Resolution Pack every other year.

The BoE's preferred approach for the resolution of the Group is a bail-in strategy with a single point of entry through Barclays PLC. Under such a strategy, Barclays PLC's subsidiaries would remain operational while Barclays PLC's eligible liabilities would be written down or converted to equity in order to recapitalise the Group and allow for the continued provision of services and operations throughout the resolution. This strategy relies on Barclays PLC having issued sufficient loss-absorbing capacity to effect bail-in and recapitalise the Group should the need arise. As a result the Group is focusing on transitioning eligible loss absorbing capital from subsidiary level to Barclays PLC level.

(c) Structural reform developments

Recent developments in banking law and regulation in the UK have included legislation designed to ring-fence the retail and smaller business deposit-taking businesses of large banks. The Banking Reform Act put in place a framework for this ring-fencing and secondary legislation passed in 2014 elaborated on the operation and application of the ring-fence. Ring-fencing rules have been published by the PRA further determining how ring-fenced banks will be permitted to operate. Further rules published by the FCA set out the disclosures that non-ring-fenced banks are required to make to prospective customers that are individuals.

In relation to ring-fencing in the UK, FSMA, as amended by the Banking Reform Act, requires, amongst other things, the separation of the retail and smaller business deposit-taking activities of UK banks in the UK and branches of UK banks in the European Economic Area (EEA) into a legally distinct, operationally separate and economically independent entity, which will not be permitted to undertake a range of activities (so called ring-fencing). UK ring-fenced banks and large UK building societies will be required to hold CET1 capital in excess of that required under CRD IV from 2019. This requirement will be applied by the PRA on an institution specific basis according to a framework set out by the FPC. The implications of these requirements on Barclays are discussed in more detail in the Risk Factor entitled Structural Reform .

At European level, the European Commission issued proposals recommending the mandatory separation of proprietary trading and other high-risk trading activities from banking activities in January 2014. These proposals would apply to institutions that have been identified as G-SIIs under CRD IV and envisage, amongst other things: (i) a ban on proprietary trading in financial instruments and commodities; and (ii) rules on the economic, legal, governance, and operational links between the trading entities and other banking group entities. The legislative proposal includes a derogation in respect of the separation of trading activities (but not the ban on proprietary trading) for Member States which had adopted similar measures before the date of its publication. The legislative proposal remains under consideration by the European Parliament and the Council of the EU.

(d) Market Infrastructure developments

The European Market Infrastructure Regulation (EMIR) has introduced requirements designed to improve transparency and reduce the risks associated with the derivatives market, some of which are still to be fully implemented. EMIR requires that certain entities that enter into derivative contracts: report such transactions; clear certain over the counter (OTC) transactions where mandated to do so; and implement risk mitigation standards in respect of uncleared OTC trades. The obligation to clear derivatives only applies to certain counterparties and specified types of derivative. In October 2016 the European Commission adopted a delegated regulation relating to the exchange of collateral, one of the risk mitigation techniques under EMIR. Provisions relating to initial margin will be phased in from 6 February 2017 until 1 September 2020. Provisions relating to variation margin applied on a phased basis from 4 February 2017. EMIR has potential operational and financial impacts on the Group, including by imposing collateral requirements.

CRD IV aims to complement EMIR by applying higher capital requirements for bilateral, uncleared over-the-counter derivative trades. Lower capital requirements for cleared derivatives trades are only available if the central counterparty through which the trade is cleared is recognised as a qualifying central counterparty (QCCP) which has been authorised or recognised under EMIR (in accordance with binding technical standards). Higher capital requirements may apply to the Group following the UK's departure from the EU if UK CCPs are not regarded as QCCPs.

The amended Markets in Financial Instruments Directive and Markets in Financial Instruments Regulation (collectively referred to as MiFID II) is expected to apply from 3 January 2018. MiFID II will affect many of the investment markets in which the Group operates, the instruments in which it trades and the way it transacts with market counterparties and other customers. Changes introduced by MiFID II include: the introduction of a new type of trading venue (the organised trading facility), capturing non-equity trading that falls outside the current regime; and the expansion of the concept of, and requirements applicable to, firms which systematically trade against proprietary capital (systematic internalisers).

MiFID II also strengthens investor protections and imposes new curbs on high frequency and commodity trading. It also increases pre-and post-trade transparency and introduces a new regime for third country firms. MiFID II also includes new requirements relating to non-discriminatory access to trading venues, central counterparties and benchmarks, and harmonised supervisory powers and sanctions across the EU.

The EU Benchmarks Regulation came into force in June 2016, with the majority of provisions intended to apply from January 2018. This Regulation applies to the administration, contribution of data to and use of benchmarks within the EU. Financial institutions within the EU will be prohibited from using benchmarks unless their administrators are authorised, registered or otherwise recognised in the EU. This may impact the ability of Barclays to use certain benchmarks.

In 2015 the European Commission launched work on establishing a Capital Markets Union (CMU) within the EU. The CMU aims to increase the availability of non-bank financing in the EU, deepen the single market for financial services and promote growth and financial stability. The Commission's work on the CMU includes the development of a regulatory framework in order to enhance efficiencies in the cross-border environment for capital markets, as well as a review of existing legislation to determine instances in which such legislation should be modified. This work is likely to continue through 2017 and beyond and may result in changes to the EU regulatory framework in which the Group operates.

(e) Conduct, Culture and Consumer Protection developments

On 7 March 2016 the PRA and FCA introduced measures to increase the individual accountability of senior managers and other covered individuals in the banking sector. The new regime comprises the Senior Managers Regime, which applies to a limited number of individuals with senior management responsibilities within a firm, the Certification Regime, which is intended to assess and monitor the fitness and propriety of a wider range of employees who could pose a risk of significant harm to the firm or its customers and conduct rules that individuals subject to either regime must comply with. From March 2017, the conduct rules will apply more widely to other staff of firms within scope of the regime.

The Financial Services Act 2010, amongst other things, requires the UK regulators to make rules about remuneration and to require regulated firms to have a remuneration policy that is consistent with effective risk management. The Banking Act also amended FSMA to allow the FCA to make rules requiring firms to operate a collective consumer redress scheme to deal with cases of widespread failure by regulated firms to meet regulatory requirements, that may have created consumer detriment.

Barclays has to comply with national data protection laws, governing the collection, use, and disclosure of personal data, in a majority of the countries in which it operates. From 25 May 2018 data protection laws throughout the EU will be replaced by a single General Data Protection Regulation (GDPR); the UK government has confirmed the UK will adopt and apply the GDPR from May 2018. The impact across Barclays will be significant, affecting not only Group entities operating and processing personal data within the EU but also those outside the EU offering goods or services to, or monitoring individuals within the EU. The GDPR contains significant penalties for data protection breaches and non-compliance, up to 4% of Group global turnover.

A number of recent developments have indicated a clear political and regulatory desire to make customer transactional account information more easily accessible to customers and parties providing services to them. One such example is the revised Payment Services Directive (PSD2), which came into force on 12 January 2016 and must be implemented by 13 January 2018. Shortly after the finalisation of PSD2, the Open Banking Working Group, a body established at the request of HM Treasury, issued a report outlining how an ecosystem allowing the sharing of bank and customer information could be established, operated and governed. The resulting Open Banking Standard is intended to allow for the provision of access to public data and secure access to private data.

In August 2016, the UK Competition and Markets Authority (CMA) published the results of its market investigation into retail banking, identifying features of the market that were having an adverse effect on competition and setting out a number of measures to remedy the shortcomings. One of these remedies requires Barclays, among other banks, to help establish and fund an entity to govern open access to information about bank services, provision and service quality. Barclays expects to be required to make public information available through open application programming interfaces (APIs) through the course of 2017, with transactional information being available through an open API by January 2018 to align with the PSD2 timeframes.

EU regulation and governments have been increasingly focused on cyber security risk management for banking organisations and have proposed laws that would impose a variety of requirements on regulated Barclays entities. These requirements include minimum required security measures, enhanced reporting requirements and a variety of other cyber and information risk governance measures. When implemented, the proposals may increase technology and compliance costs for Barclays.

The UK Bribery Act 2010 introduced a new form of corporate criminal liability focussed on a company's failure to prevent bribery on its behalf. The legislation has broad application and in certain circumstances may have extraterritorial impact as to entities, persons or activities located outside the UK, including Barclays PLC and its subsidiaries. In practice, the legislation requires Barclays to have adequate procedures to prevent bribery which, due to the extraterritorial nature of the status, makes this both complex and costly.

Regulation in the US

Supervision in the US

Barclays' US activities and operations are subject to umbrella supervision by the Board of Governors of the Federal Reserve System (FRB), as well as additional supervision, requirements and restrictions imposed by other federal and state regulators. Barclays PLC, Barclays Bank PLC and their US branches and subsidiaries are subject to a comprehensive regulatory framework involving numerous statutes, rules and regulations, including the International Banking Act of 1978, the Bank Holding Company Act of 1956 (BHC Act), the USA PATRIOT Act of 2001 and the Dodd Frank Wall Street Reform and Consumer Protection Act of 2010 (DFA). In some cases, US requirements may impose restrictions on Barclays' global activities in addition to its activities in the US.

In July 2016, Barclays established a US intermediate holding company, Barclays US LLC (BUSL), which holds substantially all of Barclays' US subsidiaries and assets (including Barclays Capital Inc. and Barclays Bank Delaware), other than Barclays' US branches and certain other assets and subsidiaries. BUSL, Barclays PLC and Barclays Bank PLC are regulated as bank holding companies (BHCs) by the FRB, which exercises umbrella supervisory authority over and imposes a wide variety of requirements and restrictions on Barclays' US operations, including with respect to safety and soundness. As Barclays top-tier US bank holding company, BUSL is or will become subject to the enhanced prudential supervision requirements applicable to US bank holding companies of comparable size, including: (i) regulatory capital requirements and leverage limits; (ii) mandatory annual supervisory and annual and semi-annual company-run stress testing of capital levels, and annual submission of a capital plan in connection with the FRB's annual Comprehensive Capital Analysis and Review (CCAR), resulting in an FRB objection or non-objection to the capital plan; (iii) FRB non-objection to any proposed capital distributions by BUSL, including to

Edgar Filing: BARCLAYS PLC - Form 6-K

Barclays Bank PLC; (iv) additional substantive liquidity requirements, including requirements to conduct monthly internal liquidity stress tests for BUSL (and also, separately, for Barclays Bank PLC's US branch network), and to maintain a 30-day buffer of highly liquid assets; (v) other liquidity risk management requirements, including compliance with liquidity risk management standards established by the FRB, and maintenance of an independent function to review and evaluate regularly the adequacy and effectiveness of the liquidity risk management practices of Barclays' combined US operations; and (vi) overall risk management requirements, including a US risk committee and a US chief risk officer. BUSL will become subject to the FRB's capital planning requirements in 2017.

Barclays PLC Annual Report 2016 | 233

Risk review

Supervision and regulation

The BHC Act generally restricts the activities of BHCs to banking and activities closely related to banking. In order to engage in a broader range of activities, Barclays PLC and Barclays Bank PLC have also elected to be treated as financial holding companies under the BHC Act. Financial holding companies may engage in a range of financial and related activities, directly or through subsidiaries, including underwriting, dealing and making markets in securities. In order to maintain its status as a financial holding company, a financial holding company is required to meet or exceed certain regulatory capital ratios and other requirements and be deemed well capitalised and well managed. In addition, the financial holding company status requires Barclays Bank Delaware to maintain at least a satisfactory rating under the Community Reinvestment Act of 1977 (CRA). Entities ceasing to meet any of these requirements are required to enter into an agreement to correct the deficiency and are allotted a period of time in which to restore capital levels or management ratings. The non-compliant entity will be subject to limitations on activities during any period of non-compliance. If the capital level or rating is not restored, the non-compliant entity would be subjected to increasingly stringent penalties and could ultimately be closed or required to cease certain activities in the US.

In addition to general oversight by the FRB, certain of Barclays' branches and subsidiaries are regulated by additional authorities based on the location or activities of those entities. The deposits of Barclays Bank Delaware are insured by the FDIC, which also exercises supervisory authority over the bank's operations. Under the Federal Deposit Insurance Act Barclays PLC, Barclays Bank PLC and BUSL are required to act as a source of financial strength for Barclays Bank Delaware. This could, among other things, require these entities to inject capital into Barclays Bank Delaware if it fails to meet applicable regulatory capital requirements. The New York and Florida branches of Barclays Bank PLC are subject to extensive supervision and regulation by, as applicable, the New York State Department of Financial Services (NYSDFS) and the Florida Office of Financial Regulation. Barclays Bank Delaware, a Delaware chartered commercial bank, is subject to supervision and regulation by the Delaware Office of the State Bank Commissioner.

Barclays' US securities broker/dealer, investment advisory and investment banking operations are also subject to ongoing supervision and regulation by the Securities and Exchange Commission (SEC), the Financial Industry Regulatory Authority (FINRA) and other government agencies and self-regulatory organisations (SROs) as part of a comprehensive scheme of regulation of all aspects of the securities and commodities business under US federal and state securities laws.

Similarly, Barclays' US commodity futures, commodity options and swaps-related operations are subject to ongoing supervision and regulation by the Commodity Futures Trading Commission (CFTC), the National Futures Association and other SROs.

Barclays' US retail and consumer activities, including the US credit card operations of Barclays Bank Delaware, are subject to direct supervision and regulation by the Consumer Financial Protection Bureau (CFPB), which was established by the DFA. The CFPB has the authority to examine and take enforcement action related to compliance with federal laws and regulations regarding the provision of consumer financial services and the prohibition of unfair, deceptive or abusive acts and practices.

The Volcker Rule, a provision of the DFA that came into effect in July 2015, prohibits banking entities from undertaking certain proprietary trading activities and limits the sponsorship of, and investment in, private equity funds (including non-conforming real estate and credit funds) and hedge funds, in each case broadly defined, by such

entities. These restrictions are subject to certain exemptions, including for underwriting, market-making and risk-mitigating hedging activities as well as for transactions and investments occurring solely outside of the US. As required by the rule, Barclays has developed and implemented an extensive compliance and monitoring programme (both inside and outside of the US) addressing proprietary trading and covered fund activities. These efforts are expected to continue as the FRB and the other relevant US regulatory agencies further implement and monitor these requirements and Barclays may incur additional costs in relation to such efforts. The Volcker Rule is highly complex and its full impact will not be known with certainty until market practices and structures further develop under it.

The Bank Secrecy Act, USA PATRIOT Act 2001 and regulations thereunder contain numerous anti-money laundering and anti-terrorist financing requirements for financial institutions. In addition, Barclays is subject to the US Foreign Corrupt Practices Act, which prohibits certain payments to foreign officials, as well as rules and regulations relating to economic sanctions and embargo programs administered by the US Office of Foreign Assets Control which restrict certain business activities with certain individuals, entities, groups, countries and territories. In some cases, these regulations may impact entities, persons or activities located outside the US, including Barclays PLC and its subsidiaries. The enforcement of these regulations has been a major focus of US government policy relating to financial institutions in recent years, and failure of a financial institution to ensure compliance could have serious legal, financial and reputational consequences for the institution.

The US regulators have enhanced their focus on the promotion of cultural values as a key area for banks. The regulators view the responsibility for reforming culture as primarily sitting with the industry. In this regard regulators have increasingly focused on areas such as incentive compensation, promotion processes and measurements of success.

Title II of the DFA established the Orderly Liquidation Authority, a new regime for orderly liquidation of systemically important financial institutions, which could apply to BUSL. Specifically, when a systemically important financial institution is in default or danger of default, the FDIC may be appointed receiver under the orderly liquidation authority instead of the institution being resolved through a voluntary or involuntary proceeding under the US Bankruptcy Code. In addition, the licensing authorities of each US branch of Barclays Bank PLC and of Barclays Bank Delaware have the authority, in certain circumstances, to take possession of the business and property of the applicable Barclays entity they license or to revoke or suspend such licence. Such circumstances include violations of law, unsafe business practices and insolvency.

Under the DFA, Barclays must submit annually to the FRB and the FDIC a plan for its rapid and orderly resolution in the event of material financial distress or failure. As required, Barclays submitted its most recent annual US resolution plan to the US regulators on 1 July 2015. Barclays next submission will be due on 1 July 2017 in view of the FDIC's and FRB's joint determination that certain foreign banking organisations' 2016 annual resolution plan filing requirements would be satisfied by the 2017 submission.

In addition, on 3 February 2017, the President of the US issued an executive order identifying core principles for the administration's financial services regulatory policy and directing the US Secretary of Treasury, in consultation with the heads of other US financial regulatory agencies, to evaluate and issue a report within 120 days examining how the current regulatory framework promotes or inhibits the principles and what actions have been and are being taken to promote the principles.

Regulatory developments in the US

The DFA's ultimate impact on the Group continues to remain uncertain and some rules are not yet fully implemented. In addition, market practices and structures may change in response to the requirements of the DFA in ways that are difficult to predict but that could impact Barclays' business. Nonetheless, certain proposed or final regulations are particularly likely to have a significant effect on the Group, including:

(a) Regulation of derivatives markets

Among the changes mandated by the DFA is a requirement that many types of derivatives that used to be traded in the over the counter markets be traded on an exchange or swap execution facility and centrally cleared through a regulated clearing house. The DFA also mandates that swaps and security-based swaps be reported and that certain of that information be made available to the public on an anonymous basis. In addition, certain participants in these markets are required to register with the CFTC as swap dealers or major swap participants and/or, following the compliance date for relevant SEC rules, with the SEC as security-based swap dealers or major security-based swap participants. Such registrants would be subject to CFTC and SEC regulation and oversight. SEC finalised the rules governing security based swap dealer registration in 2015 but clarified that registration timing is contingent upon the finalisation of certain additional rules under Title VII of DFA, several of which are still pending. Additional SEC rules governing security-based swap transactions, including security-based swap reporting, will become effective after the security-based swap dealer registration date. Barclays Bank PLC has provisionally registered with the CFTC as a swap dealer. Entities required to register are subject to business conduct and record-keeping requirements and will be subject to capital and margin requirements in connection with transactions with certain US and non-US counterparties. Barclays Bank PLC is also prudentially regulated as a swaps dealer so is subject to the FRB swaps rules.

The CFTC has approved certain comparability determinations that would permit substituted compliance with non-US regulatory regimes for certain swap regulations related to business conduct requirements. The CFTC had previously stated that its transaction-level rules (such as margin and documentation requirements) would apply to certain transactions entered into between a non-US swap dealer and a non-US counterparty but has delayed the compliance date for this requirement a number of times. The most recent extension of this relief expires on 30 September 2017. In addition, the CFTC has proposed to apply transaction-level rules to certain cross-border transactions with a US nexus. It is unclear whether further changes will be made to these proposed rules or when they will become effective.

In this regard, the US prudential regulators and the CFTC have imposed rules requiring the exchange of collateral in respect of OTC derivative transactions, in a similar manner to the European Commission as set out above in the section entitled Market Infrastructure Developments.

(b) Prudential developments

The FRB has proposed a number of prudential rules to implement DFA requirements, as well as its own versions of a number of international regulatory standards, including Basel large exposure rules (or single counterparty credit limits, proposed in March 2016) and temporary resolution stays for qualified financial contracts (proposed in May 2016).

In December 2016, the FRB issued final regulations for TLAC which will apply to BUSL. The FRB's final TLAC rule, while generally following the FSB termsheet, contains a number of provisions that are more restrictive. For example, the FRB's TLAC rule includes provisions that require BUSL (the Barclays IHC) to have (i) a specified outstanding amount of eligible long-term debt, (ii) a specified outstanding amount of TLAC (consisting of common and preferred equity regulatory capital plus long term debt), and (iii) a specified common equity buffer. In addition, the FRB's TLAC rule would prohibit BUSL, for so long as the Group's overall resolution plan treats BUSL as a non-resolution entity, from issuing TLAC to entities other than the Group and its non-US subsidiaries.

In addition, the FRB has issued proposed regulations for net stable funding ratio (NSFR) implementation. The NSFR is one of the two Basel III-based liquidity measures, along with the LCR, and as proposed by the FRB, would apply to US bank holding companies with more than \$250bn in total assets or \$10bn or more in on-balance sheet foreign exposures, including BUSL, and consolidated depository institution subsidiaries of such banking organisations with more than \$10bn in assets, including Barclays Bank Delaware. Under the proposed rule, such entities would be required to maintain a minimum level of available stable funding that equals or exceeds the amount of required stable funding over a one-year period. The proposal provides for an effective date of 1 January 2018, subject to finalisation of the rules.

If finally adopted as currently proposed, the NSFR requirement could impact Barclays liquidity and increase the funding and compliance costs for BUSL.

(c) Cybersecurity

US regulators, including the FRB, FDIC and NYSDFS, have been increasingly focused on cybersecurity risk management for banking organisations and have issued proposals for, or requested comment on, regulations that would impose a variety of new requirements on regulated Barclays entities. These requirements include, among others, the adoption of cybersecurity policies and procedures meeting specified criteria, a set of minimum required security measures, new reporting and compliance certification requirements and a variety of other cyber and information risk governance measures. If finally implemented, the proposals may increase technology and compliance costs for Barclays.

Supervision and regulation

Structural Reform

Overview

Barclays announced in March 2016 that it will be organised as two clearly defined divisions, Barclays UK and Barclays International, to simplify the Group and prepare early for UK ring-fencing requirements.

Barclays intends to achieve ring-fencing separation by setting up an operational legal entity, which will constitute the ring-fenced bank (RFB)

and will be separate from Barclays Bank PLC. The Barclays UK division of Barclays Bank PLC will be transferred to the RFB. Barclays Bank PLC will continue to house the Barclays International division. The two banking entities, RFB (containing Barclays UK) and Barclays Bank PLC (containing Barclays International) will operate alongside one another, together with the Group Service Company, Barclays Services Limited (BSerL), as subsidiaries of Barclays PLC within the Barclays Group.

In order to achieve this target-state structure, Barclays will need to undertake a number of legal transfers, including the transfer of customer and non-customer assets, liabilities and contractual arrangements.

Barclays intends to use a court approved statutory ring-fence transfer scheme process as defined in Financial Services and Markets Act 2000 Part VII section 106B (RFTS) to conduct the majority of these transfers to the RFB, as well as certain other items to BSerL. In addition to the transfers conducted through the RFTS, certain items will be transferred via alternative arrangements.

Between now and 1 January 2019, Barclays will complete the transition from the former divisional constructs to the legal entity constructs described above.

Timeline

Barclays Structural Reform timeline, including progress to date and indicative future milestones is as follows:

§ 2015:

The legal entity which will become the RFB was incorporated.

§ 2016:

Barclays US intermediate holding company was established.

RFB banking authorisation application was submitted to the regulators.

BSerL, which will become the Group Service Company, was transferred to be a direct subsidiary of Barclays PLC.

§ 2017:

Various legal entities connected with the future Barclays UK business will be transferred to be subsidiaries of the entity which will become the RFB.

Certain assets, liabilities, and other items connected with service provision will be transferred from Barclays Bank PLC to BSerL to establish the entity as the Group Service Company.

RFTS court process will be initiated during Q4 2017 with the submission of an application to the high court followed by the directions court hearing.

§ 2018:

Final court hearing will be held in respect of the RFTS.

Barclays UK businesses and related items will be transferred to the RFB through the RFTS and via alternative arrangements, taking effect in H1 2018.

Additional items connected with service provision will be transferred to BSerL, also via the RFTS in H1 2018.

Immediately following completion of the RFTS, the equity ownership in the RFB will be transferred, establishing the RFB as a direct subsidiary of Barclays PLC, alongside Barclays Bank PLC and BSerL.

Note

Financial review

Key performance indicators

In assessing the financial performance of the Group, management uses a range of Key Performance Indicators (KPIs) which focus on the Group’s financial strength, the delivery of sustainable returns and cost management.

Non-IFRS performance measures

Barclays management believes that the non-IFRS performance measures included in this document provide valuable information to the readers of the financial statements as they enable the reader to identify a more consistent basis for comparing the business performance between financial periods, and provide more detail concerning the elements of performance which the managers of these businesses are most directly able to influence or are relevant for an assessment of the Group. They also reflect an important aspect of the way in which operating targets are defined and performance is monitored by Barclays management. However, any non-IFRS performance measures in this document are not a substitute for IFRS measures and readers should consider the IFRS measures as well. Refer to pages 259 - 266 for further information, reconciliations and calculations of non-IFRS performance measures included throughout this document, and the most directly comparable IFRS measures.

Definition

Why is it important and how the Group performed

CRD IV fully loaded CET1 ratio

Capital requirements are part of the regulatory framework governing how banks and depository institutions are supervised. Capital ratios express a bank’s capital as a percentage of its RWAs as

The Group’s capital management objective is to maximise shareholder value by prudently managing the level and mix of its capital to: ensure the Group and all of its subsidiaries are appropriately capitalised relative to their minimum regulatory and stressed capital requirements, support the Group’s risk appetite, growth and strategic options, while seeking to maintain a robust credit proposition for

12.4%
CRD IV fully loaded CET1 ratio
2015: 11.4%
2014: 10.3%

defined by the PRA.

the Group and its subsidiaries.

In the context of CRD IV, the fully loaded CET1 ratio is a measure of capital that is predominantly common equity as defined by the Capital Requirements Regulation.

The Group's CRD IV fully loaded CET1 ratio increased to 12.4% (2015: 11.4%) due to an increase in CET1 capital to £45.2bn (2015: £40.7bn), partially offset by an increase in RWAs to £366bn (2015: £358bn). The 100bps increase reflected the Group's ability to grow capital through profit generation.

Group target: Revised end-state CET1 capital ratio target of 150-200bps above the minimum regulatory level providing 400-450bps buffer to the Bank of England stress test systemic reference point.

3.6%

Return on average tangible shareholders equity

RoTE is calculated as profit after tax attributable to ordinary shareholders, including an adjustment for the tax credit recorded in reserves in respect of other equity instruments, as a proportion of average shareholders' equity excluding non-controlling interests and other equity instruments adjusted for the deduction of intangible assets and goodwill.

This measure indicates the return generated by the management of the business based on shareholders' tangible equity. Achieving a target RoTE demonstrates the organisation's ability to execute its strategy and align management's interests with the shareholders. RoTE lies at the heart of the Group's capital allocation and performance management process.

Group RoTE

2015: (0.7%)

2014: (0.3%)

RoTE for the Group increased to 3.6% (2015: (0.7%)) reflecting an increase in Group attributable profit to £1,623m (2015: loss of £394m) and increased average tangible shareholders' equity of £49bn (2015: £48bn).

8.4%

Core RoTE

Core RoTE increased to 8.4% (2015: 4.8%) reflecting a 95% increase in attributable profit to £3,350m and a £4bn increase in average allocated

2015: 4.8%

Edgar Filing: BARCLAYS PLC - Form 6-K

tangible equity to £41bn, as capital was returned from Non-Core. Core RoTE excluding notable items reduced to 9.4% (2015: 11.2%) with a 4% increase in profit before tax to £6,436m and an 8% reduction in attributable profit to £3,781m primarily reflecting an increase in tax, due to the introduction of a new surcharge of 8% that applies to banks UK profits with effect from 1 January 2016.

Group target: Group RoTE will converge with Core RoTE.

2014: 7.0%

9.4%

2015: 11.2%

2014: 11.2%

Definition

Why is it important and how the Group performed

4.6%

Leverage ratio

The ratio is calculated as fully loaded Tier 1 capital divided by leverage exposure.

The leverage ratio is non-risk based and is intended to act as a supplementary measure to the risk-based capital metrics such as the CET1 ratio.

Leverage ratio

2015: 4.5%

2014: 3.7%

The leverage ratio increased to 4.6% (2015: 4.5%), reflecting an increase in Tier 1 capital to £52.0bn (2015: £46.2bn) and an increase in leverage exposure of £97bn to £1,125bn. Tier 1 capital included £6.8bn (2015: £5.4bn) of AT1 securities.

Group target: maintaining the leverage ratio above future minimum requirements.

76%

Cost: income ratio

Total operating expenses divided by total income.

This is a measure management uses to assess the productivity of the business operations. Restructuring the cost base is a key execution priority for management and includes a review of all categories of discretionary spending and an analysis of how we can run the business to ensure that costs increase at a slower rate than income.

Cost: income ratio

2015: 84%

2014: 84%

The Group cost: income ratio reduced to 76% (2015: 84%) driven by a 12% reduction in operating expenses, partially offset by a 3% reduction in income.

The reduction in operating expenses included a £3,024m reduction in litigation and conduct charges in 2016 to £1,363m.

The Core cost: income ratio reduced to 64% (2015: 75%) reflecting the reduction in litigation and conduct charges. Excluding notable items, the Core cost: income ratio reduced to 61% in 2016 (2015: 62%).

Group target: cost: income ratio of less than 60% over time.

£14,975m

Operating expenses

Total operating expenses, excluding conduct and litigation charges, and other notable items.

Barclays views operating expenses as a key strategic area for banks; those who actively manage costs and control them effectively will gain a strong competitive advantage.

Group operating expenses

2015: £14,479m

2014: £15,377m

Operating expenses for the Group were £14,975m (2015: £14,479m) when excluding conduct and litigation charges, and other notable items. This reflected increased structural reform implementation costs and the strengthening in average USD and EUR against GBP. Q416 included the impact of a decision for 2016 compensation awards, to more closely align income statement recognition with performance awards and to harmonise deferral

£13,390m

Core operating expenses

structures across the Group. These changes resulted in a £395m income statement charge in Q416, of which £390m was in Core, resulting in Core costs being above guidance by that amount.

Refer to page 261 for a reconciliation of total operating expenses excluding conduct and litigation charges, and other notable items.

2015: £12,532m

2014: £12,664m

£32bn

Non-Core RWAs

RWAs are a risk adjusted measure of assets. Risk weightings are established in accordance with the Basel Capital Accord as implemented by the PRA.

Barclays Non-Core was established as a separate unit in 2014 and groups together businesses and assets which do not fit with the strategic objectives of the Group. Reducing Non-Core RWAs will rebalance the Group to deliver higher and more sustainable returns.

Non-Core

2015: £54bn

2014: £89bn

Non-Core RWAs reduced by £22bn to £32bn in 2016. The 41% reduction in the year reflects strong progress in the rundown, driven by a £10bn reduction in Derivatives, a £3bn reduction in Securities and loans, a £4bn reduction in Businesses RWAs, and a £4bn reallocation to Head Office of operational risk RWAs associated with exited businesses and assets.

Target: Non-Core RWAs of c.£25bn as at 30 June 2017.

The financial information above is extracted from the published accounts. This information should be read together with the information included in the accompanying consolidated financial statements.

Notes

a Comparatives have been restated to reflect the implementation of the Group business reorganisation. These restatements were detailed in our announcement on 14 April 2016, accessible at home.barclays/results.

b Refer to page 257 for further information on the Africa Banking discontinued operation.

c The profit after tax attributable to other equity holders of £457m (2015: £345m) is offset by a tax credit recorded in reserves of £128m (2015: £70m). The net amount of £329m (2015: £275m), along with NCI is deducted from profit after tax in order to calculate earnings per share and return on average tangible shareholders' equity.

Financial review

Income statement commentary

2016 compared to 2015

Profit before tax increased to £3,230m (2015: £1,146m). The Group performance reflected good operational performance in Barclays UK and Barclays International whilst being impacted by the Non-Core loss before tax of £2,786m (2015: £2,603m) driven by the accelerated rundown of Non-Core and provisions for UK customer redress of £1,000m (2015: £2,772m). The appreciation of average USD and EUR against GBP positively impacted income and adversely affected impairment and operating expenses.

Total income decreased 3% to £21,451m as Non-Core income reduced £1,776m to a net expense of £1,164m due to the acceleration of the Non-Core rundown, while Core income increased 6% to £22,615m. Within Core, Barclays International income increased 9% to £14,995m, with growth in both CIB and Consumer, Cards and Payments, and Barclays UK income increased 2% to £7,517m.

Total income included a £615m (2015: £nil) gain on disposal of Barclays' share of Visa Europe Limited and an own credit loss of £35m (2015: gain of £430m).

Credit impairment charges increased £611m to £2,373m including a £320m charge in Q316 following the management review of the UK and US cards portfolio impairment modelling and balance growth primarily within Consumer, Cards and Payments. This was partially offset by a reduction in credit impairment charges of 9%

2015 compared to 2014

Profit before tax decreased to £1,146m (2014: £1,313m).

Total income increased 1% to £22,040m as Core income increased 4% to £21,428m, reflecting a 6% increase to £13,747m in Barclays International and a 22% increase in Head Office to £338m, which was partially offset by a 1% decrease to £7,343m in Barclays UK. Non-Core income reduced 46% to £612m, following assets and securities rundown, business sales including the impact of the sales of the Spanish and UAE retail businesses, and fair value losses on the ESHLA portfolio of £359m (2014: £156m).

Total income included a £496m (2014: £461m) gain on the US Lehman acquisition assets and an own credit gain of £430m (2014: £34m). 2014 total income included a loss of £935m (2015: £nil) relating to a revision to the ESHLA valuation methodology.

Credit impairment charges improved 3% to £1,762m, with a loan loss rate of 42bps (2014: 42bps). This reflected lower impairments in Barclays UK due to the benign economic environment in the UK resulting in lower default rates and charges and higher recoveries in European businesses in Non-Core. This was partially offset by increased impairment charges in Consumer, Cards and Payments primarily driven by asset growth and updates to impairment model methodologies, and increased impairment charges in CIB due to impairment of a number of single name exposures.

to £122m in Non-Core due to lower impairment charges in European businesses. This resulted in a 11bps increase in the loan loss rate to 53bps.

Total operating expenses reduced 12% to £16,338m reflecting lower litigation and conduct charges. This was partially offset by the non-recurrence of the prior year gain of £429m on the valuation of a component of the defined retirement benefit liability and increased structural reform implementation costs. Operating expenses also included a £395m additional charge in Q416 relating to 2016 compensation awards reflecting a decision to more closely align income statement recognition with performance awards and to harmonise deferral structures across the Group.

Total operating expenses included provisions for UK customer redress of £1,000m (2015: £2,772m).

The cost: income ratio improved to 76% (2015: 84%).

Other net income of £490m (2015: expense of £596m) included gains on the sale of Barclays Risk Analytics and Index Solutions, the Asia wealth and investment management business and the Southern European cards business, partly offset by the loss on sale of the French retail business of £455m.

The effective tax rate on profit before tax decreased to 30.7% (2015: 100.3%) principally as a result of a reduction in non-deductible charges.

Profit after tax in respect of continuing operations increased to £2,237m (2015: loss of £3m). Profit after tax in relation to the Africa Banking discontinued operation decreased 6% to £591m as increased credit impairment charges and operating expenses were partially offset by income growth.

Total operating expenses increased 2% to £18,536m due to an increase in litigation and conduct charges, and costs associated with the implementation of structural reform. This was partially offset by savings from the strategic cost programme, in addition to the continued rundown of Non-Core.

Total operating expenses included additional provisions for UK customer redress of £2,772m (2014: £1,110m), additional provisions for ongoing investigations and litigation including Foreign Exchange of £1,237m (2014: £1,250m), a £429m (2014: £nil) gain on valuation of a component of the defined retirement benefit liability and £96m (2014: £nil) of impairment of goodwill and other assets relating to businesses being disposed.

The cost: income ratio remained stable at 84% (2014: 84%).

Other net expenses increased to £596m (2014: £445m) primarily relating to losses on sale relating to the Spanish, Portuguese and Italian businesses of £577m (2014: £446m).

The tax charge of £1,149m (2014: £1,121m) on profit before tax of £1,146m (2014: £1,313m) represented an effective tax rate of 100.3% (2014: 85.4%), impacted by non-deductible items.

Profit after tax in respect of continuing operations decreased to a loss of £3m (2014: profit of £192m). Profit after tax in relation to the Africa Banking discontinued operation decreased 4% to £626m driven by a reduction in total income and an increase in credit impairment charges, partially offset by a reduction in operating expenses.

Edgar Filing: BARCLAYS PLC - Form 6-K

Return on average tangible shareholders' equity was 3.6% (2015: (0.7%)) and basic earnings per share was 10.4p (2015: (1.9p)).

Return on average tangible shareholders' equity was (0.7%) (2014: (0.3%)) and basic loss per share was 1.9p (2014: 0.7p).

Note

a Debt securities in issue include covered bonds of £13.9bn (2015: £12.3bn).

Financial review

Balance sheet commentary

Total assets

Total assets increased £93bn to £1,213bn.

Cash and balances at central banks and items in the course of collection from other banks increased £53bn to £102bn, as the cash contribution to the Group liquidity pool was increased.

Trading portfolio assets increased £3bn to £80bn primarily driven by client activity and the appreciation of USD against GBP, partially offset by reduction due to firm strategy.

Financial assets designated at fair value increased by £2bn to £79bn. During the period, reverse repurchase agreements designated at fair value have increased by £14bn as new reverse repurchase agreements in certain businesses have been designated at fair value to better align to the way the business manages the portfolio's risk and performance. Additionally, within financial assets designated at fair value, there was a partial offset by decreases in loans and advances, equity securities, debt securities and assets held in respect of linked liabilities.

Derivative financial instrument assets increased £19bn to £347bn, consistent with the increase in derivative financial instrument liabilities. The increase was primarily due to foreign exchange derivatives mainly driven by an increase in trade volumes and appreciation of all major currencies against GBP.

Financial liabilities designated at fair value increased by £4bn to £96bn. During the period, repurchase agreements designated at fair value have increased by £5bn and debt securities at fair value by £2bn, which was partially offset due by decreases in liabilities to customer under investment contracts and deposits at fair value.

Derivative financial instrument liabilities increased £16bn to £340bn in line with the increase in derivative financial assets.

Debt Securities in issue increased by £7bn to £76bn driven primarily by an increase in liquidity requirements and currency revaluations partially offset by the reclassification of BAGL balances to held for sale.

Subordinated liabilities increased £2bn to £23bn due to issuances of dated subordinated notes and FX movements due to the appreciation of USD and EUR against GBP. These were partially offset by the redemptions of dated and undated subordinated notes, and the reclassification of BAGL balances to held for sale.

Accruals, deferred income and other liabilities decreased £2bn to £9bn mainly driven by a reduction in insurance contract liabilities.

Financial investments decreased £27bn to £63bn due to a decrease in government bonds held in the liquidity pool.

Total loans and advances decreased by £5bn to £436bn driven by a £31bn decrease due to the reclassification of BAGL balances to held for sale and £9bn from the exit of other assets in Non-Core. This was offset by lending growth of £20bn, a net £9bn increase in settlement and cash collateral balances, and an £8bn increase due to the reclassification of ESHLA loans now recognised at amortised cost.

Reverse repurchase agreements and other similar secured lending decreased £15bn to £13bn mainly due to maturity of trades within amortised cost. New trades are designated as fair value through profit and loss to better align to the way the business manages the portfolio's risk and performance.

Non current assets classified as held for disposal increased £64bn to £71bn mainly due to the reclassification of BAGL to held for sale.

Total liabilities

Total liabilities increased £88bn to £1,142bn.

Customer accounts increased £5bn to £423bn mainly due to deposit growth of £38bn and an increase in settlement and cash collateral balances of £5bn offset by reclassification of £29bn of BAGL balances to held for sale and an £8bn decrease due to Non-Core disposals.

Repurchase agreements and other similar secured borrowing decreased £5bn to £20bn in line with Reverse repurchase agreements and other similar secured lending described above.

Liabilities included in disposal groups classified as held for sale increased £59bn to £65bn mainly due to the reclassification of BAGL to held for sale.

Shareholders equity

Total shareholders equity increased by £6bn to £71bn.

Share capital and share premium increased by £0.3bn to £21.8bn due to the issuance of shares under employee share schemes and the Barclays PLC scrip dividend programme.

Other equity instruments increased by £1.1bn to £6.4bn due to issuance of equity accounted AT1 securities to investors.

As at 31 December 2016 there was a debit balance of £0.1bn (2015: £0.3bn credit) in the available for sale reserve. The decrease of £0.4bn (2015: £0.2bn decrease) was due to a £2.2bn gain from changes in fair value on Government Bonds, predominantly held in the liquidity pool which was more than offset by £1.7bn of losses from related hedging and £0.9bn of net gains transferred to net profit, mainly due to £0.6bn purchase of Visa Europe by Visa Inc. A tax charge of £28m was recognised in the period relating to these items.

The cash flow hedging reserve increased £0.8bn to £2.1bn driven by £1.6bn increase in the fair value of interest rate swaps held for hedging purposes as forward interest rates decreased, partially offset by decreases of £0.5bn due to gains recycled to the income statement and £0.3bn tax charge.

The currency translation reserve increased by £3.7bn to £3.1bn due to the appreciation of USD and EUR against GBP.

Trading portfolio liabilities increased £1bn to £35bn primarily driven by client demand and the appreciation of the USD against GBP.

Net tangible asset value per share increased to 290p (2015: 275p). This increase was mainly attributable to favourable movements in the currency translation reserve partially offset by pension remeasurement.

2016 compared to 2015

Profit before tax increased £1,153m to £1,738m reflecting lower provisions for UK customer redress. Profit before tax excluding notable items^a decreased 5% to £2,587m driven by an increase in credit impairment charges following the management review of the cards portfolio impairment modelling, partially offset by a reduction in total operating expenses.

Total income, including a gain on disposal of Barclays' share of Visa Europe Limited recognised in Personal Banking and Wealth, Entrepreneurs & Business Banking (WEBB), increased 2% to £7,517m.

Total income excluding notable items was broadly in line at £7,366m (2015: £7,343m). Personal Banking income increased 1% to £3,762m driven by improved deposit margins and balance growth, partially offset by lower mortgage margins. Barclaycard Consumer UK income decreased 2% to £2,022m primarily as a result of the European Interchange Fee Regulation, which came into full effect from December 2015, offset by balance growth and gains from debt sales. WEBB income increased 1% to £1,582m reflecting improved margins and deposit growth, partially offset by reduced transactional fee income. Net interest income increased 1% to £6,048m due to balance growth and deposit pricing initiatives, partially offset by lower mortgage margins.

Net interest margin increased 6bps to 3.62% reflecting higher margins on deposits, partially offset by lower mortgage margins. Net fee, commission and other income decreased 4% to £1,318m due to the impact of the European Interchange Fee Regulation in Barclaycard Consumer UK, which came into full effect from December 2015, and reduced fee and commission income in WEBB.

Credit impairment charges increased 27% to £896m due to a £200m charge in Q316 following the management review of the cards portfolio impairment modelling. The 30 day and 90 day arrears rates on the cards portfolio improved year-on-year to 1.9% (2015: 2.3%) and 0.9% (2015: 1.2%) respectively.

Total operating expenses, including provisions for UK customer redress of £1,000m (2015: £2,431m), reduced 19% to £4,882m. Total operating expenses excluding notable items reduced 1% to £3,882m reflecting savings realised from strategic cost programmes, relating to restructuring of the branch network and technology improvements, offset by structural reform programme implementation costs.

The cost: income ratio excluding notable items was 53% (2015: 53%) and RoTE excluding notable items was 19.3% (2015: 21.1%).

Loans and advances to customers were stable at £166.4bn (December 2015: £166.1bn).

Total assets increased £7.1bn to £209.6bn primarily reflecting an increase in the allocated liquidity pool.

Edgar Filing: BARCLAYS PLC - Form 6-K

Customer deposits increased 7% to £189.0bn primarily driven by higher balances in Personal Banking and WEBB.

RWAs reduced £2.0bn to £67.5bn primarily driven by changes in the mortgages credit risk model.

2015 compared to 2014

Profit before tax decreased 54% to £585m. Profit before tax excluding notable items increased 17% to £2,720m driven by the continued reduction in operating expenses and lower credit impairment charges. The reduction in operating expenses was delivered through strategic cost programmes including the restructure of the branch network and technology improvements to increase automation.

Total income reduced 1% to £7,343m.

Personal Banking income decreased 2% to £3,714m due to a reduction in fee income and mortgage margin pressure, partially offset by improved deposit margins and balance growth.

Barclaycard Consumer UK income decreased 1% to £2,065m primarily due to the impact of the European Interchange Fee Regulation, partially offset by balance growth.

WEBB income remained broadly flat at £1,564m (2014: £1,570m) as balance growth was offset by margin pressure.

Net interest income increased 2% to £5,973m due to balance growth, deposit pricing initiatives and the impact of changes in the overdraft proposition in June 2014, partially offset by mortgage margin pressure. Net fee, commission and other income decreased 14% to £1,370m due to the change in the overdraft proposition and the impact of the European Interchange Fee Regulation.

Credit impairment charges decreased 22% to £706m primarily due to the benign economic environment in the UK resulting in lower default rates and charges across all businesses. The loan loss rate reduced 11bps to 42bps.

Total operating expenses increased 15% to £6,052m, including provisions for UK customer redress of £2,431m (2014: £1,067m). Total operating expenses excluding notable items reduced 7% to £3,917m reflecting savings realised from strategic cost programmes including the restructure of the branch network and technology improvements.

Loans and advances to customers remained broadly flat at £166.1bn (2014: £165.3bn).

Total assets increased 2% to £202.5bn.

Customer deposits increased 5% to £176.8bn driven by higher balances in Personal Banking and WEBB.

RWAs were broadly flat at £69.5bn (2014: £69.3bn).
