Yes No

Legal Suit Clarifications

(Rio de Janeiro, february 09, 2007). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces it will appeal the first instance decision handed down by the Rio de Janeiro Judiciary regarding compensating fishermen as a result of the accident that occurred in the Guanabara Bay, in 2000. The company argues that:

- 1 At the time, Petrobras compensated, extra-judicially, all of those who proved to be fishermen at the time of the accident.
- 2 According to the national fishermen reference file records, of the some 12,000 listed in the above-mentioned decision, only 3,339 could demand compensation for to the Petrobras accident at the time of the accident in 2000.
- 3 The company also questions the payment of compensations for a 10-year period, since 30 days after the accident, a technical inspection carried out by universities and environmental agencies approved fishing to be retaken at the Guanabara Bay.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
