Domestic Market

In April, GOL continued with its strategy to rationalize capacity and recorded a **6.9% decrease in the domestic supply**, mainly due to the end of Webjet's operations. The strategy of capacity reduction was initiated in April 2012, thus, there is a lower level of reduction when compared to the previous months.

Load factor in the domestic market was 4.5 p.p. down over April 2012, reaching 67.7% in the period. Due to reduced supply mentioned above and price recovery trend in the period, demand in April 2013 was 12.7% down year-on-year.

International Market

Supply in April was 31.2% up year-on-year, chiefly due to new daily routes to Santo Domingo, Miami and Orlando which started by the end of last year. Demand in same period increased by 17.5% due to same reasons mentioned above.

Load factor on the international market was 6.8 p.p. down year over year, mainly due to the aging period effect of new routes which started on December, 2012.
