***“América Móvil informs about a resolution of the Instituto Federal de Telecomunicaciones”***

**Mexico City, Mexico, March 31, 2014. América Móvil, S.A.B. de C.V. (“AMX”) (BMV: AMX; NYSE: AMX; NASDAQ: AMOV; LATIBEX: XAMXL)**, informs that it was notified on Friday March 28 after the closing of the stock markets in which AMX is listed, of a resolution issued by the Federal Telecommunications Institute (*Instituto Federal de Telecomunicaciones*, or “*IFT*”), through which the ***asymmetrical*** rates for interconnection, termination and transit, mobile and fixed, as the case maybe, have been determined for the period commencing from April 6 to December 31, 2014, to Radiomóvil Dipsa, S.A. de C.V. (“*Telcel*”) and Teléfonos de México, S.A.B. de C.V. (“*Telmex*”).

This resolution was issued by the IFT as a result of the resolution through which said institute determined as “preponderant economic agent” (*agente económico preponderante*), in the telecommunications market in Mexico to an alleged economic interest group comprised by AMX, Telmex, Telcel as well as by Grupo Carso, S.A.B. de C.V., and Grupo Financiero Inbursa, S.A.B. de C.V., imposing certain specific asymmetrical regulations.

The following table sets forth the asymmetrical rates (expressed in Mexican Pesos), established to Telmex for the services to be provided for the period commencing from April 6 to December 31, 2014:

Interconnection rate per minute within the same regional node	\$ 0.02015
Interconnection rate per minute among regional nodes that depend on a domestic node	\$ 0.02258
Interconnection rate per minute among regional nodes that depend on different domestic nodes	\$ 0.02340
Transit rate per minute within the same regional node	\$ 0.00864
Transit rate per minute among regional nodes that depend on a domestic node	\$ 0.01108
Transit rate per minute among regional nodes that depend on different domestic nodes	\$ 0.01190

The following table sets forth the asymmetrical rates (expressed in Mexican Pesos), established to Telcel for termination services (Voice and SMS), to be provided for the period commencing from April 6 to December 31, 2014:

---

Switched termination rates of mobile users under the “calling party pays” system or “domestic calling party pays” system	\$ 0.2045
Termination rate for the short message services (SMS) of mobile users	\$ 0.0391

This resolution was issued by the IFT in its capacity as an autonomous constitutional body (*organismo Constitucional autónomo*), on a date after the draft bill of the Federal Telecommunications and Broadcasting Act (*Ley Federal de Telecomunicaciones y Radiodifusión*), was submitted to the Mexican Congress, and it establishes a substantial reduction to the current interconnection, termination and transit rates and imposes also an asymmetrical treatment with respect to rest of the operators in Mexico. The aforementioned rates are comparatively lower than the current rates for the same services in most of the countries throughout the world.

#### **About AMX**

AMX is the leading provider of wireless services in Latin America. As of December 31, 2013, it had 269.9 million wireless subscribers and 69.4 million fixed revenue generating units in the Americas.
