Consolidated Notes to the Financial Statements
(unaudited)

1. Basis of Presentation

The accompanying unaudited interim financial statements of Minerco Resources, Inc. (“Minerco” or the “Company”), have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission (the “SEC”), and should be read in conjunction with the audited financial statements and notes thereto contained in Minerco’s Annual Report filed with the SEC on Form 10-K. In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position and the results of operations for the interim periods presented have been reflected herein. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. Consolidated Notes to the Financial Statements which substantially duplicate the disclosure contained in the audited financial statements for fiscal 2012 as reported in Minerco’s Form 10-K have been omitted.

2. Going Concern

These financial statements have been prepared on a going concern basis, which implies the Company will continue to realize its assets and discharge its liabilities in the normal course of business. During the period ended January 31, 2013, the Company has an accumulated deficit and no revenue. The Company is in the business of developing, producing and providing clean, renewable energy solutions in Central America. On October 16, 2012, we added an additional line of business, Level 5 Beverage Company, a progressive specialty beverage retailer. The Company participates in and invests in development projects with other companies in clean, renewable energy projects. The continuation of the Company as a going concern is dependent upon the continued financial support from its shareholders, the ability of the Company to obtain necessary equity financing to continue operations, and the attainment of profitable operations. These factors raise substantial doubt regarding the Company’s ability to continue as a going concern. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

The Company intends to fund operations through equity and debt financing arrangements, which may be insufficient to fund its capital expenditures, working capital and other cash requirements for the year ending July 31, 2013.

3. Fair Value of Financial Instruments

ASC 820, “Fair Value Measurements”, requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument’s categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 prioritizes the inputs into three levels that may be used to measure fair value:

Level 1

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

 (unaudited)

3. Fair Value of Financial Instruments (continued)

Level 2

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The Company's financial instruments consist principally of cash, accounts payable and accrued liabilities, and due to related party. Pursuant to ASC 820, the fair value of our cash equivalents is determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets. The Company believes that the recorded values of all of the other financial instruments approximate their current fair values because of their nature and respective maturity dates or durations.

The following table sets forth by level with the fair value hierarchy the Company's financial assets and liabilities measured at fair value on January 31, 2013.

	Level 1	Level 2	Level 3	Total
Assets	-	-	-	-
Liabilities	-	-	-	-
Derivative Financial Instruments	\$ -	\$ -	\$ 1,214,992	\$ 1,214,992

The following table sets forth by level with the fair value hierarchy the Company's financial assets and liabilities measured at fair value on July 31, 2012.

7. Derivative Liabilities (continued)

Due to their being no explicit limit to the number of shares to be delivered upon settlement of the above conversion options embedded in the Convertible Promissory Notes, the options are classified as derivative liabilities and recorded at fair value.

A summary of changes in Convertible Promissory Notes payable for the period ended January 31, 2013 is as follows:

Beginning balance	\$ 310,886
Gross proceeds from the notes payable	39,250
Less: debt discount from conversion options	-
Less: debt repayment	(4,000)
Add: amortization of discount	570,416
Less: debt converted to common stock	(61,350)
Add: cancellation of prior conversion for debt-return of shares	2,845
Total notes payable	\$ 858,047

Derivative Liability:

The fair values of the four instruments as of January 31, 2013 were determined to be \$1,214,992 using a Black-Scholes option-pricing model. During the six and three months ended January 31, 2013, the Company recorded a net gain on mark-to-market of the conversion options of \$1,493,742 and 2,860,191, respectively.

The following table summarizes the derivative liabilities included in the consolidated balance sheet at January 31, 2013:

Balance at July 31, 2012	\$ 3,089,498
Debt discount	-
Day one loss on fair value	-
January 31, 2013 gain on change in fair value	(1,493,742)
Write off due to conversion	(380,764)
Balance at January 31, 2013	\$ 1,214,992

Pursuant to ASC 815, "Derivatives and Hedging," the Company recognized the fair value of the embedded conversion features of all notes of \$1,214,992, of which \$2,007 is recorded as discount on the notes. The initial fair value of the derivative liability was determined using the Black Scholes option pricing model with a quoted market price of \$0.00021 to \$0.00055, a conversion price of \$0.00014 to \$0.001, expected volatility of 68.80% to 488.78%, no expected dividends, an expected term of one year and a risk-free interest rate of 0.07% to 0.18%. The discount on the convertible loan is accreted over the term of the convertible loan. During the six and three months ended January 31, 2013, the Company recorded accretion of \$570,416 and \$550,159 respectively.

The net gain recorded on the above derivative liabilities for the six and three months ended January 31, 2013 was \$1,493,742 and \$2,790,469, respectively.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward Looking Statements

This quarterly report on Form 10-Q for the quarter ended January 31, 2013 contains forward-looking statements that involve risks and uncertainties. These statements relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology including "could", "may", "will", "should", "expect", "plan", "anticipate", "believe", "estimate", "predict", "potential" and the negative of these terms or other comparable terminology. These statements are only predictions. Actual events or results may differ materially.

While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment regarding the direction of our business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions or other future performance suggested in this report.

Business Overview

Minerco Resources, Inc. was incorporated as a Nevada company on June 21, 2007 and our only two subsidiaries are Minerco Honduras S.A. and Level 5 Beverage Company, Inc. We were engaged in the acquisition of interests and leases in oil and natural gas properties from our inception in June 2007 through May 27, 2010. In May 2010 we changed the focus of our business to the development, production and provision of clean, renewable energy solutions in Central America. On October 16, 2012, we once again shifted our focus when we added an additional line of business, Level 5 Beverage Company, Inc., a progressive specialty beverage retailer .

Beverage Business

Level 5 Beverage Company, Inc. (LEVEL 5), a 70.3% owned subsidiary of Minerco Resources, Inc., is a progressive specialty beverage developer and retailer. Level 5 incorporates a proprietary whole ingredient and vitamin enhanced system that targets health conscience individuals in multiple demographics. Level 5 has partnered with Power Brands, a beverage industry expert, who is assisting Level 5 in developing custom beverage product formulations, marketing strategies, production and sales for the new line of Level 5 specialty beverage products.

To date, Level 5 has retained a beverage developer to begin the development of 60 prototypes (15 of 4 different flavors).

Level 5 retained Power Brands in November, 2012 and on February 27, 2013 Level 5 entered into a Premium Product Development agreement, with Power Brands pursuant to which Power Brands agreed to render prototype development services that include the 1) formulation and development of four (4) beverage products (four varieties); 2) the Creative Brief; 3) Executive Consultation; 4) label design; 5) lay-flat artwork; 6) packaging and material sourcing; 7) contract manufacturers; and 8) the product business plan. Set forth below is a detailed description of such services:

Product(s): Aid with formulation and development of four (4) beverage products (four varieties).

Creative Brief: Advice to determine and define brand identity including packaging design, recipes/formulas, target demographic etc.

Executive Consultation: Advice will be provided regarding key product and category issues such as: branding, pricing/margin architecture, consumer trends, sales strategies, marketing strategies, retail channel development, manufacturing and logistics. Additional consultation will be billed ad hoc at a rate of \$500/hour.

Back to Table Of Contents

Label/Packaging Design: Oversee the product label design process through its network of independent graphic designers. .

Layflat artwork: Create a layflat file suitable for printing which will include back and side panel elements such as a nutritional panel, ingredient list, UPC barcode (to be supplied by Client), and any sell (or “romance”) copy.

Formula Research & Development: Formulation of beverage samples based on work at its in-house laboratory.

Packaging Material Sourcing: provide supplier information for bottles, caps, labels, cans, cartons and any other component that is used in the manufacturing process for this brand.

Contract Manufacturers: Recommend manufacturer(s) who are capable of running the specifications of Client’s new product i.e. machines that are able to manage the chosen package style and have the correct processing equipment for the ingredients selected.

In addition, Level 5 has also entered into a Prototype Development Agreement, with Power Brands pursuant to which Power Brands has agreed to provide prototype development services which include 1) development of prototypes of all final formulations; 2) final label application; and 3) final formula application. Prototype development process includes the following:

Prototype(s): The prototype agreement includes 15 prototypes of each product variety (flavor). Four variations (flavors) equating to 60 prototypes. Additional quantities of samples per variety or additional varieties may incur incremental fees.

Label Application: Power Brands will order the minimum amount of Client approved shrink sleeve labels. Power Brands is responsible for the application of the labels to the containers to assemble the prototypes.

Formulation Application: Power Brands food science team will prepare solution for prototype application based on approved formulations

The Power Brands lab started developing and formulating the initial product line on March 1, 2013, and we currently expect to have samples of all four (4) of our initial products in April, 2013. The formulations are proprietary; however, all four (4) products are classified as 100% natural.

Power Brands and Level 5 completed and approved the Creative Brief on March 15, 2013 (as was released). In addition, we have started the Executive Consultation and label design and lay-flat artwork. The label design samples and lay-flat art work are also expected to be completed in April, 2013. Level 5 though Power Brands is actively, simultaneously, procuring all packaging and material, negotiating with manufacturers and developing the marketing strategy. The definitive agreement with Power Brands, the Premium Product Development Agreement, further details the responsibilities and timelines of the respective parties.

Upon completion of the Premium Product Development and Prototype Development, Level 5 plans to retain Power Brands to handle a majority of the sales, marketing and product placement on a contract basis.

Renewable Energy Business

We currently have an interest in two Hydro-Electric Projects and one Wind project in various parts of Honduras. Both of our Hydro-Electric projects are classified as as run-of-the-river projects (not conventional retention dams). Our Chiligatoro Hydro-Electric Project is in the permitting stage of development and our Iscan Hydro-Electric Project is currently in the feasibility stage of development.. To date, we have not completed construction of any of the projects and therefore we have not received any revenue from any of the projects. There can be no assurance given that these

projects will be completed in a timely manner, if at all. We will require additional funds to complete these projects, estimated at \$200,000 in the aggregate. Additionally, even if we complete construction of the projects, there is no guarantee that they will be successfully used to create electricity or that will generate a consistent revenue stream for us. The feasibility stage of development is the stage of development where the preliminary permits are obtained, measurement of the water flow for hydro-electric projects or wind and weather patterns for wind projects are observed, and final project size are determined. As of July 31, 2012, these assets were impaired due to inactivity; however we are still actively pursuing obtaining necessary permits and negotiating contracts for the Chiligatoro Hydro-Electric Project including the Power Purchase Agreement, Congressional Approval, Equity Partner Financing and Senior Debt Financing. The Iscan Hydro-Electric Project is actively completing the Socialization and Feasibility stages of development.

[Back to Table Of Contents](#)

We have not generated any revenue since inception and during the six and three months ended January 31, 2013, we had an accumulated deficit of \$6,024,778, a stockholder's deficit of \$1,814,968 and a net gain of \$1,224,390. There is substantial doubt regarding our ability to continue as a going concern. Our operations are dependent upon our ability to obtain necessary financing and our ability to limit our negative cash flow and/or attain profitable operations. As such, the report of our independent certified auditor for the year ended July 31, 2012 is qualified subject to substantial doubt as to our ability to continue as a going concern.

Chiligatoro

On May 27, 2010, we acquired 100% of the 6 mega-watt per hour (MWh) Chiligatoro Hydro-Electric Project ("Chiligatoro") in Intibuca, Honduras. This project is classified as a run-of-the-river project (not a conventional retention dam) and is currently in the feasibility stage of development. Acquisition in this phase of development allows us to have full control of the final design and construction of this project. To date, the construction of Chiligatoro has not started, and we have not received any revenues from the project. There is no assurance that Chiligatoro will be completed in a timely manner, if at all. Additionally, if Chiligatoro is completed, there is no guarantee that it will be successfully used to create electricity or that it will generate a consistent revenue stream for us.

Chiligatoro has received approval from the National Energy Commission, signed a 30 Year Operations Contract with SERNA and is currently negotiating its Power Purchase Agreement (PPA) with ENEE. Chiligatoro is awaiting final approval from the Honduran National Congress. This Congressional Approval acts as a "defacto" guarantee. This approval makes Chiligatoro's Power Purchase Contracts a recorded law in the Honduran National Congress. Final approval and start of construction is anticipated by the end of 2012.

The revenue for Chiligatoro (or any hydro or wind project) is expected to be generated from the following; however there can be no guarantee that such anticipated revenue level or any revenue at all will be generated:

Power Generation Sales

Chiligatoro Example: $6 \text{ MWh} \times 24 \text{ hr/day} \times \$115.97 / \text{MWh} = \text{US\$ } 16,700 / \text{day}$ or $\text{US\$ } 6,095,000$ per year of Gross Energy Generation Revenue

Carbon Credits

Carbon Emission Reduction (CER) Credits can be pre-sold or traded on the open market. The spot price is currently over US\$ 10 per Credit. Carbon Credits are relatively new but are measured in tonnes of CO₂.

The Chiligatoro Project is expected eliminate approximately 27,000 tonnes of CO₂ per year, or earn 27,000 CER Credits annually. $27,000 \text{ CER /year} \times \$10 / \text{CER} = \text{US\$ } 270,000$ per year.

Reforestation in Project Buffer Zone

Reforestation generates revenue directly and indirectly. Planting tropical hardwood trees such as mahogany is expected to generate direct revenue in less than 20 years. Current prices yield more than US\$ 8,000 per tree.

More importantly, reforestation of the Project's Buffer Zone (water supply zone) is expected to increase the Projects total efficiency within a couple years adding additional power generation revenue. This increase in efficiency is typically 2 – 3%. Additional CER Credits are also realized with reforestation.

We acquired the rights to Chiligatoro from ROTA INVERSIONES S.DE R.L., a corporation formed under the laws of Honduras (“Rota”), pursuant to the terms of an acquisition agreement we entered into with Rota on May 27, 2010. We agreed to pay Rota at total of 18,000,000 shares of common stock consisting of 9,000,000 shares of our common stock within 3 days of closing, 4,500,000 shares of our common stock within 180 days of closing and 4,500,000 shares of our common stock upon us raising of \$12,000,000 no later than 24 months after closing. We also agreed to pay Rota a royalty of 10% of the adjusted gross revenue, derived after all applicable taxes, from Chiligatoro prior to completion of the payment of the foregoing. Further, we agreed to pay Rota a royalty of 20% of the adjusted gross revenue, derived after all applicable taxes, from Chiligatoro after the completion of the payout for the life of Chiligatoro, including any renewal, transfer or sale, if any, in perpetuity. “Payout” is defined as all associated costs related to the development of Chiligatoro. If we are unable to obtain the financing requirements of this agreement, Rota will have the right to terminate the agreement with full rights of rescission, and all rights, title and interest to Chiligatoro shall be transferred back to Rota. 13,500,000 shares of common stock were issued to ROTA on June 4, 2010. On May 27, 2012, the company and ROTA INVERSIONES S. DER.L. signed a one year extension to satisfy the financing requirements of this agreement.

Ischan

On January 5, 2011, we acquired 100% of the 4 mega-watt per hour (MWh) Ischan Hydro-Electric Project (“Ischan”) in Olancho, Honduras. This project is classified as a run-of-the-river project (not a conventional retention dam) and is currently in the feasibility stage of development. Acquisition in this phase of development allows us to have full control of the final design and construction of this project. To date, the construction of Ischan has not started, and we have not received any revenues from the project. There is no assurance that Ischan will be completed in a timely manner, if at all. Additionally, if the Ischan project is completed, there is no guarantee that it will be successfully used to create electricity or that it will generate a consistent revenue stream for us.

We acquired the rights to Ischan from Energetica de Occidente S.A. de C.V., a corporation formed under the laws of Honduras (the “Energetica”), pursuant to the terms of an acquisition agreement we entered into with the Ischan Seller on January 5, 2011. We agreed to pay Energetica a total of 1,000,000 shares of common stock consisting of 500,000 shares of our common stock within 30 days of closing and 500,000 shares of our common stock upon us raising \$8,500,000 no later than 36 months after closing. We also agreed to pay the Energetica a royalty of 10% of the adjusted gross revenue, derived after all applicable taxes, from Ischan prior to completion of the payment of the foregoing. If we default on financing obligations under this agreement, Energetica can terminate this agreement, rescind the sale of these rights to us, and all rights, title and interest to Ischan will be transferred back to Energetica. Minerco has not issued any shares because it is awaiting approval from SERNA for the project before the transfer of title and we expect title to be transferred in the middle of the second quarter of calendar 2012.

Sayab

On January 18, 2011, we acquired 100% of the 100 mega-watt per hour (MWh) Sayab Wind Project (“Sayab”) in Choluteca, Honduras. This project is currently in the feasibility stage of development. Acquisition in this phase of development allows us to have full control of the final design and construction of this project. To date, the construction of Sayab has not started, and we have not received any revenues from the project. There is no assurance that Sayab will be completed in a timely manner, if at all. Additionally, if Sayab is completed, there is no guarantee that it will be successfully used to create electricity or that it will generate a consistent revenue stream for us.

We acquired the rights to Sayab from Energia Renovable Hondurenas S.A., a corporation formed under the laws of Honduras (the “Sayab Seller”), pursuant to the terms of an acquisition agreement we entered into with the Sayab Seller on January 18, 2011. We agreed to pay the Sayab Seller a total of 1,000,000 shares of common stock consisting of 500,000 shares of our common stock within 30 days of closing and 500,000 shares of our common stock upon us raising \$10,000,000 no later than 18 months after closing. We also agreed to pay the Sayab Seller a royalty of 6% of the adjusted gross revenue, derived after all applicable taxes, from Sayab prior to completion of the payment of the foregoing. Further, we agreed to pay the Sayab Seller a royalty of 12% of the adjusted gross revenue, derived after all applicable taxes, from Sayab after the completion of the payout for the life of Sayab, including any renewal, transfer or sale, if any, in perpetuity. “Payout” is defined as all associated costs related to the development of Sayab. As additional consideration for this Agreement, the Sayab Seller will have the right to, upon written notice delivered to us, to purchase back from us up to an additional 8% of Sayab. The buyback purchase price will be determined by actual costs incurred by us relating to Sayab. The Sayab Seller can buy back or obtain 0.5% increments until a maximum 20% total interest is obtained. If we are unable to obtain the financing requirements of this agreement, the Sayab Seller shall have the right to terminate this agreement with full rights of rescission, and all rights, title and interest to Sayab shall be transferred back to the Sayab Seller. Minerco has not issued any shares because it is awaiting approval from SERNA for the project before the transfer of title and we expect title to be transferred in the middle of the second quarter of calendar 2012.

Results of Operations for the Three months ended January 31, 2013

During the three months ended January 31, 2013 we incurred a net income of \$2,202,675, compared to a net loss of \$552,884 during the same period in fiscal 2012. The increase in our net income during the three months ended January 31, 2013 was primarily due to increase on gain on derivative liability.

Our total general and administrative expenses for the three months ended January 31, 2013 were \$20,333, compared to operating expenses of \$182,587 during the same period in fiscal 2012. Our total general and administrative expenses during the three months ended January 31, 2013 consisted of \$0 in compensation expense, \$12,691 in professional fees, and \$7,642 in general and administrative expense and during the three months ended January 31, 2013 consisted entirely of general and administrative expenses, and we did not incur any foreign exchange losses, management fees, rent expenses or other operating expenses. During the quarter our expenses associated with the development of our beverage products was minimal as commitments for the work done in seeking formulations and developers of the product did not require a cash outlay, although our CEO devoted a great amount of time to these efforts.

Results of Operations for the Six months ended January 31, 2013

During the six months ended January 31, 2013 we incurred a net income loss of \$874,887, compared to a net loss of \$1,316,988 during the same period in fiscal 2012. The increase in our net income during the six months ended January 31, 2013 was primarily due to increased gain on derivative liability.

Our total general and administrative expenses for the six months ended January 31, 2013 were \$29,130, compared to operating expenses of \$439,706 during the same period in fiscal 2012. Our total general and administrative expenses during the six and three months ended January 31, 2013 consisted of \$0 in compensation expense, \$16,691 in professional fees, and \$12,439 in general and administrative expense and during the six months ended January 31, 2013 consisted entirely of general and administrative expenses, and we did not incur any foreign exchange losses, management fees, rent expenses or other operating expenses. Results of Operations for the Period from June 21, 2007 (Date of Inception) to January 31, 2013

From our inception on June 21, 2007 to January 31, 2013 we did not generate any revenues and we incurred a net loss of \$6,396,953. We may not generate significant revenues from our interest in our Hydro-Electric or Wind Projects or any other properties in which we acquire an interest, and we anticipate that we will incur substantial losses for the foreseeable future.

Our total operating expenses from our inception on June 21, 2007 to January 31, 2013 were \$3,552,231. Our general and administrative expenses consist of professional fees, transfer agent fees, investor relations expenses and general office expenses. Our professional fees include legal, accounting and auditing fees.

From our inception on June 21, 2007 to January 31, 2013 we also received \$13,000 in the form of proceeds from loan recovery and incurred \$32,700 in expenses related to the impairment of a note receivable. Also, there was a loss of \$1,822,935 and accretion of \$1,034,787 associated with the derivative in the convertible debt

Liquidity and Capital Resources

As of January 31, 2013 we had \$1,050 in cash and \$1,050 in total assets, \$2,179,071 in total liabilities and a working capital deficit of \$2,196,698. Our accumulated deficit from our inception on June 21, 2007 to January 31, 2013 was \$6,396,953 and was funded primarily through advances from related parties, equity and debt financing.

From our inception on June 21, 2007 to January 31, 2013 we used net cash of \$584,914 in operating activities. During the six months ended January 31, 2013 we used net cash of \$34,200 in operating activities, compared to net cash used \$59,130 in operating activities during the same period in fiscal 2012. The decrease in expenditures on operating activities for the six months ended January 31, 2013 was primarily due to an increased net gain offset by a gain on derivatives.

From our inception on June 21, 2007 to January 31, 2013 we used net cash of \$10,000 on investing activities, all of which was in the form of a loan to a third party. We used net cash of \$0 on investing activities during the six months ended January 31, 2013 and 2011.

From our inception on June 21, 2007 to January 31, 2013 we received net cash of \$595,964 from financing activities, which consists of \$90,514 from the issuance of our common stock, \$462,250 from debt financing, \$51,018 in proceeds from a related party, \$9,000 repayment of debt, and \$1,182 in capital contributions. During the six months ended January 31, 2013 we received \$35,250 net cash from financing activities, compared to net cash received of \$59,095 during the same period in fiscal 2012. The decrease in receipts from financing activities for the six months ended January 31, 2013 was primarily lower proceeds from loans and related parties.

Our general and administrative expenses for the year will consist primarily of transfer agent fees, investor relations expenses and general office expenses. The professional fees are related to our regulatory filings throughout the year.

[Back to Table Of Contents](#)

Based on our planned expenditures, we require additional funds of approximately \$13,627,950 (a total of \$13,629,000 less our approximately \$1,050 in cash as of January 31, 2013) to proceed with our business plan over the next 24 months. If we secure less than the full amount of financing that we require, we will not be able to carry out our complete business plan and we will be forced to proceed with a scaled back business plan based on our available financial resources.

We anticipate that we will incur substantial losses for the foreseeable future. Although we acquired a 100% interest in the various Hydro-Electric and Wind Projects, there is no assurance that we will receive any revenues from this interest. Meanwhile, even if we purchase other non-operated interests in hydro-electric projects or begin construction activities on any properties we may acquire, this does not guarantee that these projects or properties will be commercially exploitable.

Our activities will be directed by John Powers, our President and Chief Executive Officer, who will also manage our operations and supervise our other planned acquisition activities.

Future Financings

Our financial statements for the three and six and three months ended January 31, 2013 have been prepared on a going concern basis and there is substantial doubt about our ability to continue as a going concern. We have not generated any revenues, have achieved losses since our inception, and rely upon the sale of our securities to fund our operations. We may not generate any revenues from our interest in the various Hydro-Electric and Wind Projects, or from any of the hydro-electric or wind projects in which we acquire an interest. Accordingly, we are dependent upon obtaining outside financing to carry out our operations and pursue any acquisition and exploration activities.

Of the \$13,629,000 we require for the next 24 months, we had approximately \$1,050 in cash as of January 31, 2013. We intend to raise the balance of our cash requirements for the next 24 months (approximately \$13,627,950), private placements, shareholder loans or possibly a registered public offering (either self-underwritten or through a broker-dealer). If we are unsuccessful in raising enough money through such efforts, we may review other financing possibilities such as bank loans. At this time we do not have a commitment from any broker-dealer to provide us with financing other than the equity line, and there is no guarantee that any financing will be successful. We intend to negotiate with our management and any consultants we may hire to pay parts of their salaries and fees with stock and stock options instead of cash.

If we are unable to obtain the necessary additional financing, then we plan to reduce the amounts that we spend on our acquisition and exploration activities and our general and administrative expenses so as not to exceed the amount of capital resources that are available to us. Specifically, we anticipate that we will defer drilling programs and certain acquisitions pending the receipt of additional financing. Still, if we do not secure additional financing our current cash reserves and working capital will be not be sufficient to enable us to sustain our operations and for the next 12 months, even if we do decide to scale back our operations.

Product Research and Development

We do not anticipate spending any material amounts in connection with product research and development activities during the next 12 months.

Outstanding Notes

As of January 31, 2013 our obligations under outstanding notes totaled an aggregate principal amount of \$858,047. Of such amount \$809,304 is due on demand, \$9,493 is due March 20, 2013, \$19,250 is due August 5, 2013, and \$20,000 is due September 15, 2013. We currently do not have sufficient funds to pay any of the past due or future notes.

On October 12, 2010, we issued a promissory note to an unrelated third party in the amount of \$200,000 in consideration for monies loaned to our company. The promissory note is non-interest bearing and due on demand. We currently do not have the funds necessary to repay this debt if a demand were to be made. The promissory note was subsequently sold to two unrelated parties, each acquiring \$100,000 of the principal amount owed under the promissory note. On September 1, 2011, we entered into two agreements, each of which provide for the exchange of the principal amount of \$100,000 of the promissory notes for convertible promissory notes (the "Convertible Notes") in the aggregate principal amount of \$100,000. Each Convertible Note plus accrued interest of 10% may be converted into shares of common stock of the Company at any time before the maturity date by the Convertible Note holder at a conversion price of \$0.0004 per share at the time of conversion. In the event of a default by the Company, each Convertible Note plus accrued interest may be converted into shares of common stock of the Company at any time after the default date by the Convertible Note holder at a conversion price of the lower of (i) par value or (ii) half of the average bid price over the five trading days prior to the conversion date, but in no case for an amount less than a 51% interest in the Company. The Company is obligated to register the shares underlying the Convertible Notes under the Securities Act of 1933 until shares become available for resale under Rule 144(k). On February 20, 2012, we amended the notes with a remaining aggregate balance of \$73,600 to convert at the lower of \$0.001 or 50% of market based on the lowest day during the preceding 5 days.

On each of June 22, 2011, August 9, 2011, September 27, 2011, June 18, 2012, November 1, 2012 December 11, 2012 and February 4, 2013 we entered into a Securities Purchase Agreement and Convertible Promissory Note with Asher Enterprises for \$32,500, \$27,500, \$35,000, \$11,500, \$19,250 \$20,000 and \$42,500, respectively. The convertible notes carries an 8% rate of interest and the June 2011 and August 2011 Notes were convertible into common stock at a variable conversion price of 55% of the market price and the September Note is convertible into common stock at a variable conversion price of 51% of which shall be calculated as the average of the lowest 3 days during the preceding 10 days before conversion. The June 2012, the November 2012 and December 2012 and February 2013 Notes are convertible into common stock at a variable conversion price of 35% of which shall be calculated as the lowest trading day during the preceding 120 days before conversion. The promissory note issued on June 22, 2011 was due on March 26, 2012, the promissory note issued on August 9, 2011 was due on May 11, 2012 and the promissory note issued on September 27, 2011 was due on June 29, 2012, the promissory note issued on June 18, 2012 is due on March 20, 2013, the promissory note issued on November 1, 2012 is due on August 5, 2013, the promissory note issued on December 11, 2012 is due on September 15, 2013 and the promissory note issued on February 4, 2013 is due November 9, 2013. On June 14, 2012, we amended the remaining balance on the June 2011, August 2011 and September 2011 notes of \$69,000 as convertible into common stock at a variable conversion price of 35% of which shall be calculated as the lowest trading day during the preceding 120 days before conversion.

On June 6, 2011, August 6, 2011 and November 6, 2011, we entered into a Securities Purchase Agreement and Convertible Promissory Note between the Company and SE Media Partners, Inc. for \$36,000, \$18,000 and \$27,000, respectively. The convertible notes carry a 5% rate of interest and are convertible into common stock at a variable conversion price of 50% of the market price which shall be calculated as the lowest day during the preceding 5 days before conversion. The June Convertible Promissory Note was due on December 6, 2011 and has \$25,310 in principal remaining, the August Convertible Promissory Note was due on February 6, 2012 and the November Convertible Promissory Note is due on May 6, 2012. On February 1, 2012, we amended the note dated June 6, 2011 for \$36,000 to convert at the lower of \$0.001 or 50% of market based on the lowest day during the preceding 5 days.

On July 23, 2012, we entered into a Securities Purchase Agreement and Convertible Promissory Note between the Company and its former Chief Executive Officer and former Chief Financial Officer for \$320,301 and \$267,998, respectively. The convertible notes carry a 5% rate of interest and are convertible into common stock at a variable conversion price of 50% of the market price which shall be calculated as the lowest day during the preceding 5 days before conversion. The Convertible Promissory Notes are due on January 23, 2012.

Acquisition of Plants and Equipment and Other Assets

Apart from our interest in the various Hydro-Electric and Wind Projects, we do not anticipate selling or acquiring any material properties, plants or equipment during the next 12 months unless we are successful in obtaining additional financing.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to stockholders.

Inflation

The amounts presented in the financial statements do not provide for the effect of inflation on our operations or financial position. The net operating losses shown would be greater than reported if the effects of inflation were reflected either by charging operations with amounts that represent replacement costs or by using other inflation adjustments.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Exchange Act) designed to provide reasonable assurance the information required to be reported in our Exchange Act filings is recorded, processed, summarized and reported within the time periods specified and pursuant to Securities and Exchange Commission rules and forms, including controls and procedures designed to ensure that this information is accumulated and communicated to our management, including our Principal Executive Officer, as appropriate, to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, our management, with the participation of our Principal Executive Officer and Principal Financial Officer, carried out an evaluation of the effectiveness of our disclosure controls and procedures. Inasmuch as we only have one individual serving as officer, director and employee we have determined that the company has, per se, inadequate controls and procedures over financial reporting due to the lack of segregation of duties despite the fact that the duties of the Chief Executive Officer and Chief Financial Officer are performed by one individual. Management recognizes that its controls and procedures would be substantially improved if there was a greater segregation of the duties and as such is actively seeking to remediate this issue. Management believes that the material weakness in its controls and procedures referenced did not have an effect on our financial results. Based upon this evaluation, our Principal Executive Officer concluded that our disclosure controls and procedures were ineffective.

Changes in Internal Control

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Exchange Act) during the six and three months ended January 31, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are not aware of any legal proceedings to which we are a party or of which our property is the subject.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES

On August 6, 2012, the Company issued 3,714,286 common shares pursuant to a convertible promissory note to dated June 22, 2011. These shares of common stock were issued in reliance on Section 3 (a)(9) of the Act.
