### Information required by Industry Guide 3

The Group's 2006 20-F sets forth selected statistical information extracted from the Group's consolidated financial statements. Certain selected statistical information is also included in the Bank's Consolidated Financial Statements, including notes 5 Interest and dividend income and interest expense, 9 Investment securities, 11 Loans, 17 Deposits, 18 Long-term debt, 25 Derivatives and hedging activities, 26 Guarantees and commitments and 28 Financial instruments. Except to the extent described below, the Group does not believe that such statistical information for the Bank would be materially different, either in absolute amount or in terms of trends, from such statistical information for the Group. The principal differences described below relate to the banking businesses of the Group that are not included in the Bank's Consolidated Financial Statements and intercompany eliminations.

The short-term borrowings of the Bank and the Group may differ from period to period. At December 31, 2006, 2005 and 2004, the Bank had short-term borrowings of CHF 16,287 million, CHF 16,291 million and CHF 15,650 million compared to short-term borrowings of CHF 21,556 million, CHF 19,472 million and CHF 15,343 million at the Group. The lower level of short-term borrowings at the Bank compared to the Group at year-end 2006 and 2005 primarily related to structured commercial paper issued by Clariden Leu in Switzerland.

In addition, certain elements of the Group's and the Bank's investment portfolio may differ from period to period. At December 31, 2006, the carrying value of the Group's debt securities was CHF 21,131 million compared to CHF 20,069 million for the Bank. The higher value of debt securities at the Group compared to the Bank primarily related to debt securities issued by Swiss federal, cantonal or local government entities and held by Neue Aargauer Bank, principally for liquidity management purposes.
