Brady W. Dougan, Chief Executive Officer, said: “We delivered a good performance, with our strategic businesses generating returns on equity of 11% for the quarter and 13% for the first nine months of this year. During the quarter, our momentum with clients across both divisions remained strong. With a Look-through CET1 ratio of 9.8% at quarter end, we are executing our capital measures and are on track to exceed 10% by the end of the year.”

Commenting on Private Banking & Wealth Management, he said: “Our profitability benefitted from ongoing cost discipline, although margins remain subdued and revenues continue to be impacted by the low interest-rate environment. We generated net new assets of CHF 8.8 billion in our strategic businesses, driven by strong growth in emerging markets, particularly in Asia Pacific. This was partly offset by continued outflows from the Western European cross-border business due to the importance that we have placed on the regularization of our asset base. We saw sustained growth in our ultra-high-net-worth individual lending initiative and increased collaboration revenues across both divisions, which we view as a competitive advantage, particularly with this client segment.”

Commenting on Investment Banking, he said: “Investment Banking’s strategic results reflect substantially increased profitability, improved returns and robust client activity across many of our businesses. Our strong results in fixed income trading, especially in emerging markets and securitized products, and in equity underwriting were driven by significant client transactions. We continued to work towards increasing the capital and cost efficiency of our strategic businesses, reporting a return on regulatory capital of 19% and a cost/income ratio of 69% for the first nine months of this year. We also made further progress in winding down the capital positions in our non-strategic unit.”

On the outlook for the fourth quarter, he said: “We have seen a mixed start to October, with recent market volatility benefitting certain businesses across both divisions, while negatively impacting others. We have a strong advisory and underwriting pipeline, but the pace of execution in the fourth quarter will depend on market conditions.”
