ENOVA SYSTEMS, INC.
NOTES TO FINANCIAL STATEMENTS
(Unaudited)

1. Description of the Company and its Business

Enova Systems, Inc., (“Enova”, “We” or “the Company”), a California corporation, was incorporated in July 1976, and trades on the NYSE MKT under the trading symbol “ENA” and on the London Stock Exchange under the symbol “ENV” or “ENVS”. The Company is a globally recognized leader as a supplier of efficient, environmentally-friendly digital power components and systems products, in conjunction with associated engineering services. The Company’s core competencies are focused on the commercialization of power management and conversion systems for mobile and stationary applications.

2. Summary of Significant Accounting Policies

Basis of Presentation — Interim Financial Statements

The financial information as of and for the three and six months ended June 30, 2012 and 2011 is unaudited but includes all adjustments (consisting only of normal recurring adjustments) that the Company considers necessary for a fair statement of its financial position at such dates and the operating results and cash flows for those periods. The year-end balance sheet data was derived from audited financial statements, and certain information and note disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to SEC rules or regulations; however, the Company believes the disclosures made are adequate to make the information presented not misleading.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although management believes these estimates and assumptions are adequate, actual results could differ from the estimates and assumptions used.

The results of operations for the interim periods presented are not necessarily indicative of the results of operations to be expected for the fiscal year. These interim financial statements should be read in conjunction with the audited financial statements for the year ended December 31, 2011, which are included in the Company’s Annual Report on Form 10-K for the year then ended.

Delisting Notification from the NYSE MKT

On April 17, 2012, Enova Systems, Inc. (the "Company") received notice (the "April Notice") from the NYSE MKT (the "Exchange") indicating that the Company was not in compliance with one of the Exchange's continued listing standards as set forth in Part 10 of the Exchange's Company Guide (the "Exchange Guide"), and the Company was therefore subject to the procedures and requirements of Section 1009 of the Exchange Guide. Specifically, the Company was not in compliance with Section 1003(a) (iii) of the Exchange Guide because the Company reported stockholders' equity of less than \$6,000,000 for 2011 and the Company had incurred a loss from continuing operations and/or net losses for five consecutive years.

As required by the April Notice, on May 17, 2012, pursuant to Section 1009 of the Exchange Guide, the Company submitted a plan of compliance (the "Plan of Compliance") advising the Exchange of actions the Company would take to regain compliance with Section 1003(a)(iii) and 1003(a)(ii) of the Exchange Guide over the period ending October

15, 2013 (the "Plan Period").

By letter dated May 22, 2012 (the "May Notice"), the Company received an additional notice from the Exchange stating that a review of the Company's Form 10-Q for the first quarter of fiscal 2012 indicated that the Company did not meet an additional listing requirement. Specifically, the Company was not in compliance with Exchange Guide Section 1003(a)(ii) because the Company reported stockholders' equity of less than \$4,000,000 and losses from continuing operations and/or net losses in three of its four most recent fiscal years. Due to the higher stockholders' equity requirement identified in the April Notice, the Company was not required by the Exchange to submit an additional plan of compliance in connection with the deficiency identified in the May Notice.

-4-

Table of Contents

On June 21, 2012, the Company filed a Form 8-K disclosing the resignation of Chief Executive Officer and Director Michael Staran, Chief Operating Officer John Mullins and Director Richard Davies.

On July 5, 2012, the Company received a further notice (the "July Notice") from the Exchange indicating that the Company no longer complied with the Exchange's continued listing standards as set forth in Section 1003 of the Exchange Guide and that its securities are, therefore, subject to being delisted from the Exchange. The July Notice stated that the financial projections provided in connection with the Plan of Compliance did not demonstrate an ability to regain compliance with the minimum requirements by the end of the Plan Period and the resignations of Messrs. Staran, Mullins and Davies further reinforced the conclusion that the Company would be unable to regain such compliance by the end of the plan Period. The July Notice further stated that, on June 25, 2012, the Company notified the Exchange that the financial projections provided with the Plan were no longer accurate and did not provide the staff of the Exchange (the "Staff") with updated projections. Following a review of the above-described facts, the Staff advised the Company that the Exchange did not accept the proposed Plan of Compliance and that the Company is therefore subject to delisting pursuant to Section 1009 of the Exchange Guide.

In accordance with Sections 1203 and 1009(d) of the Exchange Guide, the Company exercised its right to appeal the determination of the Staff by requesting a hearing with the Listing Qualifications Panel. The Company was granted a hearing date in September 2012. There can be no assurance that the Company's request for continued listing will be granted or that, if granted, the Company will be able to continue to meet the minimum listing requirements.

Liquidity and Going Concern

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. However, historically the Company has experienced significant recurring net losses and operating cash flow deficits. The Company's ability to continue as a going concern is dependent on many factors, including among others, its ability to raise additional funding, and its ability to successfully restructure operations to lower manufacturing costs and reduce operating expenses.

To date, the Company has incurred recurring net losses and negative cash flows from operations. At June 30, 2012, the Company had an accumulated deficit of approximately \$155.1 million, cash and cash equivalents of \$233,000 and working capital of approximately \$3.4 million and shareholders' equity of approximately \$1.6 million. Until the Company can generate significant cash from its operations, the Company expects to continue to fund its operations with existing cash resources, proceeds from one or more private placement agreements, as well as potentially through debt financing or the sale of equity securities. However, the Company may not be successful in obtaining additional funding. In addition, the Company cannot be sure that its existing cash and investment resources will be adequate or that additional financing will be available when needed or that, if available, financing will be obtained on terms favorable to the Company or its stockholders.

Our ongoing operations and anticipated growth will require us to make necessary investments in human and production resources, regulatory compliance, as well as sales and marketing efforts. We do not currently have adequate internal liquidity to meet these objectives in the long term. To do so, we will need to continue to look for partnering opportunities and other external sources of liquidity, including the public and private financial markets and strategic partners. Having insufficient funds may require the Company to delay or potentially eliminate some or all of its development programs, relinquish some or even all rights to product candidates at an earlier stage of development or negotiate less favorable terms than it would otherwise choose. Failure to obtain adequate financing also may adversely affect the launch of the Company's product candidates or its ability to continue in business. If the Company raises additional funds by issuing equity securities, substantial dilution to existing stockholders would likely result. If the Company raises additional funds by incurring debt financing, the terms of the debt may involve significant cash payment obligations, as well as covenants and specific financial ratios that may restrict its ability to operate its

business.

On June 21, 2012, we reported in a Form 8-K filing that, as part of cost cutting measures in response to our decrease in revenue amid continued delays in industry adoption of EV technology resulting from ongoing battery cost and reliability concerns, in excess of 80% of our workforce left our Company. We continue to evaluate strategic opportunities to leverage our resources and assist with continuing operations.

As of June 30, 2012, the Company had approximately \$0.2 million in cash and cash equivalents currently and anticipates that its existing cash and anticipated receivables collections will be sufficient to meet its projected operating requirements through December 2012 to continue operations and market trading.

We have also accessed the capital markets to obtain additional operating funds. In December 2011, we raised approximately \$1,245,000, net of financing costs of \$442,500, through an equity issuance to certain accredited investors, which was disclosed in our Form 10-K filed on March 29, 2012. In addition, as summarized in the liquidity discussion in our Management Discussion, we entered into two Purchase Agreements (the facility) with Lincoln Park Capital Fund in April 2012 to issue up to \$10,000,000 in shares of our common stock and received proceeds of \$132,000, net of financing costs of \$152,000, from the initial purchase of shares of Common Stock from Lincoln Park in the second quarter. Access to funding under the facility is dependent upon our share price maintaining a floor price of at least \$0.15 per share. Our share price decreased below that threshold in May 2012 and, until our share price increases above the threshold level, we cannot raise additional funds from the facility.

Table of Contents

The Company continues to pursue other options to raise additional capital to fund its operations; however, there can be no assurance that we can successfully raise additional funds through the capital markets.

Significant Accounting Policies

The accounting and reporting policies of the Company conform to US GAAP. There have been no significant changes in the Company's significant accounting policies during the three and six months ended June 30, 2012 compared to what was previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2011.

Revenue Recognition

The Company manufactures proprietary products and other products based on design specifications provided by its customers. The Company recognizes revenue only when all of the following criteria have been met:

• **Persuasive Evidence of an Arrangement** — The Company documents all terms of an arrangement in a written contract signed by the customer prior to recognizing revenue.

• **Delivery Has Occurred or Services Have Been Rendered** — The Company performs all services or delivers all products prior to recognizing revenue. Professional consulting and engineering services are considered to be performed when the services are complete. Equipment is considered delivered upon delivery to a customer's designated location. In certain instances, the customer elects to take title upon shipment.

• **The Fee for the Arrangement is Fixed or Determinable** — Prior to recognizing revenue, a customer's fee is either fixed or determinable under the terms of the written contract. Fees for professional consulting services, engineering services and equipment sales are fixed under the terms of the written contract. The customer's fee is negotiated at the outset of the arrangement and is not subject to refund or adjustment during the initial term of the arrangement.

• **Collectability is Reasonably Assured** — The Company determines that collectability is reasonably assured prior to recognizing revenue. Collectability is assessed on a customer-by-customer basis based on criteria outlined by management. New customers are subject to a credit review process which evaluates the customer's financial position and ultimately its ability to pay. The Company does not enter into arrangements unless collectability is reasonably assured at the outset. Existing customers are subject to ongoing credit evaluations based on payment history and other factors. If it is determined during the arrangement that collectability is not reasonably assured, revenue is recognized on a cash basis. Amounts received upfront for engineering or development fees under multiple-element arrangements are deferred and recognized over the period of committed services or performance, if such arrangements require the Company to provide on-going services or performance. All amounts received under collaborative research agreements or research and development contracts are nonrefundable, regardless of the success of the underlying research.

The Company recognizes revenue from milestone payments over the remaining minimum period of performance obligations.

The Company also recognizes engineering and construction contract revenues using the percentage-of-completion method, based primarily on contract costs incurred to date compared with total estimated contract costs. Customer-furnished materials, labor, and equipment, and in certain cases subcontractor materials, labor, and equipment, are included in revenues and cost of revenues when management believes that the company is responsible for the ultimate acceptability of the project. Contracts are segmented between types of services, such as engineering and construction, and accordingly, revenue and gross margin related to each activity is recognized as those separate services are rendered.

Changes to total estimated contract costs or losses, if any, are recognized in the period in which they are determined. Claims against customers are recognized as revenue upon settlement. Revenues recognized in excess of amounts received are classified as current assets. Amounts billed to clients in excess of revenues recognized to date are classified as current liabilities on contracts.

-6-

Table of Contents

Changes in project performance and conditions, estimated profitability, and final contract settlements may result in future revisions to engineering and development contract costs and revenue.

These accounting policies were applied consistently for all periods presented. Our operating results would be affected if other alternatives were used. Information about the impact on our operating results is included in the footnotes to our financial statements.

Several other factors related to the Company may have a significant impact on our operating results from year to year. For example, the accounting rules governing the timing of revenue recognition related to product contracts are complex and it can be difficult to estimate when we will recognize revenue generated by a given transaction. Factors such as acceptance of services provided, payment terms, creditworthiness of the customer, and timing of delivery or acceptance of our products often cause revenues related to sales generated in one period to be deferred and recognized in later periods. For arrangements in which services revenue is deferred, related direct and incremental costs may also be deferred.

Deferred Revenues

The Company recognizes revenues as earned. Amounts billed in advance of the period in which service is rendered are recorded as a liability under deferred revenues. The Company has entered into several production and development contracts with customers. The Company has evaluated these contracts, ascertained the specific revenue generating activities of each contract, and established the units of accounting for each activity. Revenue on these units of accounting is not recognized until a) there is persuasive evidence of the existence of a contract, b) the service has been rendered and delivery has occurred, c) there is a fixed and determinable price, and d) collectability is reasonable assured.

Warranty Costs

The Company provides product warranties for specific product lines and accrues for estimated future warranty costs in the period in which revenue is recognized. Our products are generally warranted to be free of defects in materials and workmanship for a period of 12 to 24 months from the date of installation, subject to standard limitations for equipment that has been altered by other than Enova Systems personnel and equipment which has been subject to negligent use. Warranty provisions are based on past experience of product returns, number of units repaired and our historical warranty incidence over the past twenty-four month period. The warranty liability is evaluated on an ongoing basis for adequacy and may be adjusted as additional information regarding expected warranty costs becomes known.

Stock Based Compensation

We measure the compensation cost for stock-based awards classified as equity at their fair value on the date of grant and recognize compensation expense over the service period for awards expected to vest, net of estimated forfeitures.

See Note 9 Stock Options for further information on stock-based compensation expense.

3. Inventory

Inventory, consisting of materials, labor and manufacturing overhead, is stated at the lower of cost (first-in, first-out) or market and consisted of the following at:

June 30,	December 31,
----------	--------------

Edgar Filing: ENOVA SYSTEMS INC - Form 10-Q

	2012	2011
Raw Materials	\$ 4,303,000	\$ 4,431,000
Work In Progress	155,000	144,000
Finished Goods	618,000	644,000
Reserve for Obsolescence	(2,000,000)	(1,183,000)
Total	\$ 3,076,000	\$ 4,036,000

Inventory write-offs were \$76,000 and \$179,000 for the six months ended June 30, 2012 and 2011, respectively.

-7-

Table of Contents

4. Property and Equipment

Property and equipment consisted of the following at:

	June 30, 2012	December 31, 2011
Computers and software	\$ 618,000	\$ 618,000
Machinery and equipment	947,000	892,000
Furniture and office equipment	98,000	98,000
Demonstration vehicles and buses	675,000	774,000
Leasehold improvements	1,348,000	1,348,000
Construction in process	-	39,000
	3,686,000	3,769,000
Less accumulated depreciation and amortization	(3,048,000)	(2,841,000)
Total	\$ 638,000	\$ 928,000

Depreciation and amortization expense was \$238,000 and \$253,000 for the six months ended June 30, 2012 and 2011, respectively, and within those total expenses, the amortization of leasehold improvements was \$131,000 for the six months ended June 30, 2012 and 2011. Depreciation and amortization expense was \$119,000 and \$129,000 for the three months ended June 30, 2012 and 2011, respectively, and within those total expenses, the amortization of leasehold improvements was \$65,000 for the three months ended June 30, 2012 and 2011. In addition, the company recorded an impairment loss of \$68,000 for the three and six months ended June 30, 2012 and a loss on disposal of fixed assets in the amount of \$49,000 was recorded in the three and six months ended June 30, 2011.

5. Other Accrued Liabilities

Other accrued liabilities consisted of the following at:

	June 30, 2012	December 31, 2011
Accrued inventory received	\$ 15,000	\$ 2,000
Accrued professional services	81,000	150,000
Accrued warranty	140,000	227,000
Other	107,000	138,000
Total	\$ 343,000	\$ 517,000

Accrued warranty consisted of the following activities during the six months ended June 30:

	2012	2011
Balance at beginning of quarter	\$ 227,000	\$ 510,000
Accruals for warranties issued during the period	80,000	285,000
Warranty claims	(167,000)	(387,000)
Balance at end of quarter	\$ 140,000	\$ 408,000

Accrued warranty consisted of the following activities during the three months ended June 30:

	2012	2011
Balance at beginning of quarter	\$ 186,000	\$ 467,000
Accruals for warranties issued during the period	55,000	160,000

Edgar Filing: ENOVA SYSTEMS INC - Form 10-Q

Warranty claims		(101,000)		(219,000)
Balance at end of quarter	\$	140,000	\$	408,000

6. Notes Payable, Long-Term Debt and Other Financing

Notes payable consisted of the following at:

	June 30, 2012	December 31, 2011
Secured note payable to Credit Managers Association of California, bearing interest at prime plus 3% (6.25% as of June 30, 2012), and is adjusted annually in April through maturity. Principal and unpaid interest due in April 2016. A sinking fund escrow may be funded with 10% of future equity financing, as defined in the Agreement	\$ 1,238,000	\$ 1,238,000
Secured note payable to a Coca Cola Enterprises in the original amount of \$40,000, bearing interest at 10% per annum. Principal and unpaid interest due on demand	40,000	40,000
Secured note payable to a financial institution in the original amount of \$38,000, bearing interest at 8.25% per annum, payable in 60 equal monthly installments of principal and interest through February 19, 2014	14,000	18,000
Secured note payable to a financial institution in the original amount of \$19,000, bearing interest at 10.50% per annum, payable in 60 equal monthly installments of principal and interest through August 25, 2014	10,000	12,000
Secured note payable to a financial institution in the original amount of \$26,000, bearing interest at 7.91% per annum, payable in 60 equal monthly installments of principal and interest through April 9, 2015	16,000	18,000
Secured note payable to a financial institution in the original amount of \$25,000, bearing interest at 7.24% per annum, payable in 60 equal monthly installments of principal and interest through March 10, 2016	19,000	22,000
	1,337,000	1,348,000
Less current portion of notes payable	(62,000)	(62,000)
Notes payable, net of current portion	\$ 1,275,000	\$ 1,286,000

As of June 30, 2012 and December 31, 2011, the balance of long term interest payable with respect to the Credit Managers Association of California note amounted to \$1,248,000 and \$1,209,000, respectively. Interest expense on notes payable amounted to \$42,000 and \$44,000 during the six months ended June 30, 2012 and 2011, respectively. Interest expense on notes payable amounted to \$21,000 and \$22,000 during the three months ended June 30, 2012 and 2011, respectively.

7. Revolving Credit Agreement

On June 30, 2010, the Company entered into a secured revolving credit facility with a financial institution for \$200,000 which was secured by a \$200,000 certificate of deposit. The facility is for a period of 3 years and 6 months from July 1, 2010 to December 31, 2013. The interest rate on a drawdown from the facility is the certificate of deposit rate plus 1.25% with interest payable monthly and the principal due at maturity. The financial institution also renewed the \$200,000 irrevocable letter of credit for the full amount of the credit facility in favor of Sunshine Distribution LP, with respect to the lease of the Company's corporate headquarters at 1560 West 190th Street, Torrance, California.

8. Stockholders' Equity

On April 23, 2012, the Company entered into a \$6,600,000 purchase agreement with Lincoln Park Capital Fund pursuant to which the Company has the right to sell to Lincoln Park up to \$6,600,000 in shares of the Company's common stock, and on April 24, 2012, the Company entered into another purchase agreement with Lincoln Park

Capital Fund pursuant to which the Company has the right to sell to Lincoln Park up to \$3,400,000 in shares of the Company's common stock, subject to certain limitations. We received proceeds of \$132,000, net of financing costs of \$152,000, under the \$3,400,000 Purchase Agreement and issued a total of 1,754,974 shares of common stock in the second quarter of 2012. As consideration for its commitment to purchase common stock under the \$3,400,000 Purchase Agreement, the Company issued to Lincoln Park 281,030 shares of common stock.

During the three and six months ended June 30, 2012 and 2011, the Company did not issue any shares of common stock to directors or employees as compensation. During the six months ended June 30, 2011, 10,000 shares of the Company's Series A Preferred Stock were converted into 222 shares of its common stock. There were no conversions of the Company's Series A Preferred Stock for the comparable period in 2012.

9. Stock Options

Stock Option Program Description

As of June 30, 2012, the Company had two equity compensation plans, the 1996 Stock Option Plan (the “1996 Plan”) and the 2006 equity compensation plan (the “2006 Plan”). The 1996 Plan has expired for the purposes of issuing new grants. However, the 1996 Plan will continue to govern awards previously granted under that plan. The 2006 Plan has been approved by the Company’s shareholders. Equity compensation grants are designed to reward employees and executives for their long term contributions to the Company and to provide incentives for them to remain with the Company. The number and frequency of equity compensation grants are based on competitive practices, operating results of the company, and government regulations.

The 2006 Plan has a total of 3,000,000 shares reserved for issuance, of which 608,000 shares were available for grant as of June 30, 2012. All stock options have terms of between three and ten years and generally vest and become fully exercisable from one to three years from the date of grant or vest according to the price performance of our shares.

As of June 30, 2012, the total compensation cost related to non-vested awards not yet recognized is \$150,000. The weighted average period over which the future compensation cost is expected to be recognized is 20 months.

The following table summarizes information about stock options outstanding and exercisable at June 30, 2012:

	Number of Share Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term in Years	Aggregate Intrinsic Value(1)
Outstanding at December 31, 2011	2,529,000	\$ 1.07	6.09	\$ —
Granted	20,000	\$ 0.18	—	\$ —
Exercised	—	\$ —	—	\$ —
Forfeited or Cancelled	(198,000)	\$ 1.80	—	\$ —
Outstanding at June 30, 2012	2,351,000	\$ 1.00	5.55	\$ —
Exercisable at June 30, 2012	1,838,000	\$ 1.17	4.53	\$ —
Vested and expected to vest (2)	1,883,000	\$ 1.15	6.03	\$ —

(1) Aggregate intrinsic value represents the value of the closing price per share of our common stock on the last trading day of the fiscal period in excess of the exercise price multiplied by the number of options outstanding or exercisable, except for the “Exercised” line, which uses the closing price on the date exercised.

(2) Number of shares includes options vested and those expected to vest net of estimated forfeitures.

The exercise prices of the options outstanding at June 30, 2012 ranged from \$0.18 to \$4.35. The weighted average grant-date fair value of options granted during the six months ended June 31, 2012 and 2011 were \$0.15 and \$0.79, respectively. The Company’s policy is to issue shares from its authorized shares upon the exercise of stock options.

Unvested share activity for the six months ended June 30, 2012 is summarized below:

Unvested Number of Options	Weighted Average Grant Date Fair
----------------------------------	--

			Value
Unvested balance at December 31, 2011	1,403,000	\$	0.26
Granted	20,000	\$	0.15
Vested	(866,000)	\$	0.20
Forfeited	(44,000)	\$	0.35
Unvested balance at June 30, 2012	513,000	\$	0.29

-10-

Table of Contents

The fair values of all stock options granted during the six months ended June 30, 2012 and 2011 were estimated on the date of grant using the Black-Scholes option-pricing model with the following range of assumptions:

	For the six months ended			
	June 30, 2012		June 30, 2011	
Expected life (in years)	6.5		2.5 – 6.5	
Average risk-free interest rate	1.66	%	2.00	%
Expected volatility	108	%	107 - 132	%
Expected dividend yield	0	%	0	%
Forfeiture rate	3	%	3	%

The estimated fair value of grants of stock options to nonemployees of the Company is charged to expense in the financial statements. These options vest in the same manner as the employee options granted under each of the option plans as described above.

10. Concentrations

The Company's trade receivables are concentrated with few customers. The Company performs credit evaluations on its customers' financial condition. Concentrations of credit risk, with respect to accounts receivable, exist to the extent of amounts presented in the financial statements. Two customers represented 51% and 43%, respectively, of gross accounts receivable at June 30, 2012, and two customers represented 62% and 37%, respectively, of gross accounts receivable at December 31, 2011.

The Company's revenues are concentrated with few customers. For the three and six months ended June 30, 2012, two customers represented 52% and 40% of gross revenues and two customers represented 66% and 24% of gross revenues, respectively. For the three and six months ended June 30, 2011, one customer represented 80% of gross revenues and three customers represented 54%, 19% and 11% of gross revenues, respectively.

11. Recent Accounting Pronouncements

Effective January 1, 2012, the Company adopted revised guidance related to the presentation of comprehensive income that increases comparability between U.S. GAAP and International Financial Reporting Standards. This guidance eliminates the current option to report other comprehensive income (OCI) and its components in the statement of changes in stockholders' equity. The Company adopted this guidance during the first quarter of 2012, which had no impact on the Company's financial position, operations, or cash flows. The Company currently does not have any components of other comprehensive income or loss.

In May 2011, the Financial Accounting Standards Board ("FASB") issued new guidance to achieve common fair value measurement and disclosure requirements between GAAP and International Financial Reporting Standards. This new guidance amends current fair value measurement and disclosure guidance to include increased disclosures regarding valuation inputs and investment categorization. The adoption of this new accounting guidance in 2012 did not have a material impact on the Company's financial position, operations or cash flows.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q contains statements indicating expectations about future performance and other forward-looking statements that involve risks and uncertainties. We usually use words such as “may,” “will,” “should,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “future,” “intend,” “potential,” or “continue” or the negative or similar expressions to identify forward-looking statements. These statements appear throughout this Quarterly Report on Form 10-Q and are statements regarding our current intent, belief or expectation, primarily with respect to our operations and related industry developments. Examples of these statements include, but are not limited to, statements regarding the following: our future operating expenses, our future losses, our future expenditures for research and development and the sufficiency of our cash resources. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this Quarterly Report on Form 10-Q. Our actual results could differ materially from those anticipated in these forward-looking statements for many reasons, including the risks faced by us and described in our Annual Report on Form 10-K for the year ended December 31, 2011, as updated by the disclosure contained in Item 1A of Part II of this Form 10-Q.

The following discussion and analysis should be read in conjunction with the unaudited interim financial statements and notes thereto included in Part I, Item 1 of this Quarterly Report on Form 10-Q and with the financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Annual Report on Form 10-K for the year ended December 31, 2011.

Overview

Enova believes it is a leader in the development, design and production of proprietary, power train systems and related components for electric and hybrid electric buses and medium and heavy duty commercial vehicles. Electric drive systems are comprised of an electric motor, electronics control unit and a gear unit which power a vehicle. Hybrid electric systems, which are similar to pure electric drive systems, contain an internal combustion engine in addition to the electric motor, and may eliminate external recharging of the battery system. A hydrogen fuel cell based system is similar to a hybrid system, except that instead of an internal combustion engine, a fuel cell is utilized as the power source. A fuel cell is a system which combines hydrogen and oxygen in a chemical process to produce electricity.

A fundamental element of Enova's strategy is to develop and produce advanced proprietary software and hardware for applications in these alternative power markets. Our focus is powertrain systems including digital power conversion, power management and system integration, focusing chiefly on vehicle power generation.

Specifically, we develop, design and produce drive systems and related components for electric, hybrid electric and fuel cell powered vehicles in both the new and retrofit markets. We also perform internal research and development (“R&D”) and funded third party R&D to augment our product development and support our customers.

Our product development strategy is to design and introduce to market successively advanced products, each based on our core technical competencies. In each of our product/market segments, we provide products and services to leverage our core competencies in digital power management, power conversion and system integration. We believe that the underlying technical requirements shared among the market segments will allow us to more quickly transition from one emerging market to the next, with the goal of capturing early market share.

Enova's primary market focus centers on aligning ourselves with key customers and integrating with original equipment manufacturers (“OEMs”) in our target markets. We believe that alliances will result in the latest technology being implemented and customer requirements being met, with an optimized level of additional time and expense.

Our website, www.enovsystems.com, contains up-to-date information on our company, our products, programs and current events. Our website is a prime focal point for current and prospective customers, investors and other affiliated parties seeking additional information on our business.

Enova has incurred significant operating losses in the past. As of June 30, 2012, we had an accumulated deficit of approximately \$155.1 million. As reported in our Form 8-K filing on June 21, 2012, due to continued delays in industry adoption of EV technology, the Company's revenues continue to significantly decrease. As part of cost cutting measures, we implemented a reduction in our workforce whereby in excess of 80% of our employees have left the Company. We continue to evaluate strategic opportunities to leverage resources and assist with continuing operations. We expect to incur additional operating losses until we re-position the company in order to achieve a level of product sales sufficient to cover our operating and other expenses. Following reductions in the Company's expense base, the Company currently believes it has sufficient working capital in the short term through year end to continue operations and market trading.

Table of Contents

Delisting Notification from the NYSE MKT

On April 17, 2012, Enova Systems, Inc. (the "Company") received notice (the "April Notice") from the NYSE MKT (the "Exchange") indicating that the Company was not in compliance with one of the Exchange's continued listing standards as set forth in Part 10 of the Exchange's Company Guide (the "Exchange Guide"), and the Company was therefore subject to the procedures and requirements of Section 1009 of the Exchange Guide. Specifically, the Company was not in compliance with Section 1003(a) (iii) of the Exchange Guide because the Company reported stockholders' equity of less than \$6,000,000 for 2011 and the Company had incurred a loss from continuing operations and/or net losses for five consecutive years.

As required by the April Notice, on May 17, 2012, pursuant to Section 1009 of the Exchange Guide, the Company submitted a plan of compliance (the "Plan of Compliance") advising the Exchange of actions the Company would take to regain compliance with Section 1003(a)(iii) and 1003(a)(ii) of the Exchange Guide over the period ending October 15, 2013 (the "Plan Period").

By letter dated May 22, 2012 (the "May Notice"), the Company received an additional notice from the Exchange stating that a review of the Company's Form 10-Q for the first quarter of fiscal 2012 indicated that the Company did not meet an additional listing requirement. Specifically, the Company was not in compliance with Exchange Guide Section 1003(a)(ii) because the Company reported stockholders' equity of less than \$4,000,000 and losses from continuing operations and/or net losses in three of its four most recent fiscal years. Due to the higher stockholders' equity requirement identified in the April Notice, the Company was not required by the Exchange to submit an additional plan of compliance in connection with the deficiency identified in the May Notice.

On June 21, 2012, the Company filed a Form 8-K disclosing the resignation of Chief Executive Officer and Director Michael Staran, Chief Operating Officer John Mullins and Director Richard Davies.

On July 5, 2012, the Company received a further notice (the "July Notice") from the Exchange indicating that the Company no longer complied with the Exchange's continued listing standards as set forth in Section 1003 of the Exchange Guide and that its securities are, therefore, subject to being delisted from the Exchange. The July Notice stated that the financial projections provided in connection with the Plan of Compliance did not demonstrate an ability to regain compliance with the minimum requirements by the end of the Plan Period and the resignations of Messrs. Staran, Mullins and Davies further reinforced the conclusion that the Company would be unable to regain such compliance by the end of the plan Period. The July Notice further stated that, on June 25, 2012, the Company notified the Exchange that the financial projections provided with the Plan were no longer accurate and did not provide the staff of the Exchange (the "Staff") with updated projections. Following a review of the above-described facts, the Staff advised the Company that the Exchange did not accept the proposed Plan of Compliance and that the Company is therefore subject to delisting pursuant to Section 1009 of the Exchange Guide.

In accordance with Sections 1203 and 1009(d) of the Exchange Guide, the Company exercised its right to appeal the determination of the Staff by requesting a hearing with the Listing Qualifications Panel. The Company was granted a hearing date in September 2012. There can be no assurance that the Company's request for continued listing will be granted or that, if granted, the Company will be able to continue to meet the minimum listing requirements.

Customer Highlights

FREIGHTLINER CUSTOM CHASSIS CORPORATION (FCCC) - Enova and FCCC began deploying new and retrofit all-electric vehicles to major fleet customers in 2011. The resulting integration of our all-electric drive system into the MT-45 chassis provides FCCC an all-electric product offering: the FCCC MT-EV. The MT-EV (the FCCC model name) chassis boasts a GVWR of 14,000 to 19,500 lbs. Enova and FCCC also jointly announced, in November

2011, intentions to deploy 3000 vehicles via the Green for Free™ Program, which is designed to allow fleet executives to operate full 100% electric commercial vehicles (EVs) and/or Hybrid Electric Vehicles (HEVs) for similar life cycle costs as those of diesel-powered commercial vehicles. The anticipated savings fleets are expected to realize from the reduced maintenance and fuel cost of electricity of the electric vehicles are used over a period of time to cover the incremental expense for the technology. FCCC had begun, in early 2011, showcasing the Enova/FCCC EV step van at numerous events on the West Coast, as well as the recent NTEA Work Truck show in Indianapolis. This program is currently on hold, pending Enova's ability to continue operations and FCCC's decision on battery sourcing, which has been delayed due to concerns over recent negative reports regarding battery reliability.

Table of Contents

FIRST AUTO WORKS (FAW) - Enova continues to supply FAW drive systems for their hybrid buses. Since the 2008 Olympics in Beijing, Enova Systems and First Auto Works have deployed over 500 vehicles, all utilizing Enova's pre-transmission hybrid drive system components. First Auto Works is one of China's largest vehicle producers, manufacturing in excess of 1,000,000 vehicles annually. FAW has historically ordered systems in increments of 25-50 with very little (if any) visibility.

SMITH ELECTRIC VEHICLES (SEV) – Enova continues to be SEVs supplier of drive systems. SEV, a leader in the all EV market, is currently in the process of an IPO. A successful IPO could result in increased opportunity for Enova.

CSR CORPORATION LIMITED (CSR) – Enova completed initial scope with CSR to integrate our all electric drive system into its commercial bus applications. CSR is approved by the State-owned Assets Supervision and Administration Commission of the State Council and was co-founded by China South Locomotive and Rolling Stock Industry Group Corporation and Beijing Railway Industry Economic and Trade Company with a total equity capital of \$7 billion USD. The company was established in December 2007 with sixteen (16) fully funded holding companies and over 80,000 employees distributed in 10 provinces and cities around the country.

OPTARE PLC – Enova fulfilled an order in the second quarter of 2012 for eight 120kW systems for integration into Optare's Solo Electric Bus. Optare has chosen Enova as the production drive system supplier for its all electric buses. Optare designs, manufactures and sells single deck and double deck buses and mini coaches and operates in the UK, Continental Europe, and North America. Recently Optare announced that its long term future has been secured due to a refinancing agreement with Ashok Leyland increasing its holding in Optare to 75.1%. Optare anticipates being fully integrated in Ashok's global bus strategy which seeks to improve on its position amongst the world's bus makers. Ashok Leyland has annual turnover of approximately \$2.5 billion and is a market leader in the medium and heavy commercial vehicle segment in India with a market share of about 25.7% in 2010/2011. Ashok is a market leader in the Indian bus market selling over 23,000 buses annually and including overseas plants, has current global capacity of over 150,000 buses and trucks.

Technology Highlights

OMNI INVERTER. Power-source and motor design agnostic, Enova's new Omni-series inverter/vehicle controller offers increased flexibility and ease-of-integration. With plug-and-play connectivity, it is compatible with a wide range of vehicle drive systems and motors, and can be configured for HEV, PHEV and EV applications. The inverter is fully production validated.

OMNI CHARGER. We continued development of our new Omni-series 10kW on-board battery charger for plug-in hybrid-electric and all-electric vehicles. CAN control based, the new Omni charger offers increased flexibility, ease-of-integration and compatibility with a wide range of vehicle platforms.

Enova has delayed further introduction of the Omni Inverter and Charger with customers due to the reduction in our workforce and current financial resource constraints. Provided additional resources are obtained, we will continue development and marketing of these two products, which we believe can gain broad market acceptance.

Enova recently participated in the Electric Vehicle Symposium (EVS) 26 Conference in Los Angeles, the Alternative Clean Transportation (ACT) 2012 Expo in Long Beach and the 7th Annual Energy Showcase in San Diego in the second quarter of 2012. Enova displayed multiple vehicles all powered with its drive systems at all three events and attendees were able to test drive Enova Systems' powered light and medium duty full electric vehicles in the events Ride and Drives.

We continue to receive recognition from both governmental and private industry with regards to both commercial and military application of our all-electric and hybrid drive systems and fuel cell power management technologies. Although we believe that current negotiations with above named parties may result in additional production contracts during 2012 and beyond, there are no assurances that such additional agreements will be realized.

Critical Accounting Policies

In the ordinary course of business, the Company has made a number of estimates and assumptions relating to the reporting of results of operations and financial condition in the preparation of its financial statements in conformity with accounting principles generally accepted in the United States of America. The Company constantly re-evaluates these significant factors and makes adjustments where facts and circumstances dictate. Estimates and assumptions include, but are not limited to, customer receivables, inventories, equity investments, fixed asset lives, contingencies and litigation. There have been no material changes in estimates or assumptions compared to our most recent Annual Report for the fiscal year ended December 31, 2011.

Table of Contents

The following represents a summary of our critical accounting policies, defined as those policies that we believe: (a) are the most important to the portrayal of our financial condition and results of operations and (b) involve inherently uncertain issues which require management's most difficult, subjective or complex judgments.

Cash and cash equivalents — Cash consists of currency held at reputable financial institutions.

Inventory — Inventories are priced at the lower of cost or market utilizing first-in, first-out (“FIFO”) cost flow assumption. We maintain a perpetual inventory system and continuously record the quantity on-hand and standard cost for each product, including purchased components, subassemblies and finished goods. We maintain the integrity of perpetual inventory records through periodic physical counts of quantities on hand. Finished goods are reported as inventories until the point of transfer to the customer. Generally, title transfer is documented in the terms of sale.

Inventory reserve — We maintain an allowance against inventory for the potential future obsolescence or excess inventory. A substantial decrease in expected demand for our products, or decreases in our selling prices could lead to excess or overvalued inventories and could require us to substantially increase our allowance for excess inventory. If future customer demand or market conditions are less favorable than our projections, additional inventory write-downs may be required, and would be reflected in cost of revenues in the period the revision is made.

Allowance for doubtful accounts — We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. The assessment of the ultimate realization of accounts receivable including the current credit-worthiness of each customer is subject to a considerable degree to the judgment of our management. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Stock-based Compensation — The Company measures and recognizes compensation expense for all share-based payment awards made to employees and directors, including employee stock options based on the estimated fair values at the date of grant. The compensation expense is recognized over the requisite service period.

Revenue recognition — Effective January 1, 2011, we adopted the provisions of Accounting Standards Update, or ASU, 2009-13, Multiple-Deliverable Revenue Arrangements, or ASU 2009-13, which is included within the Codification as Revenue Recognition-Multiple Element Arrangements, on a prospective basis. Under the provisions of ASU 2009-13, we no longer rely on objective and reliable evidence of the fair value of the elements in a revenue arrangement in order to separate a deliverable into a separate unit of accounting, and the use of the residual method has been eliminated. We instead use a selling price hierarchy for determining the selling price of a deliverable, which is used to determine the allocation of consideration to each unit of accounting under an arrangement. The selling price used for each deliverable will be based on vendor-specific objective evidence, if available, third-party evidence if vendor-specific objective evidence is not available or estimated selling price if neither vendor-specific objective evidence nor third-party evidence is available. As of June 30, 2012, we had not applied the provisions of ASU 2009-13 to any of our revenue arrangements as we had not entered into any new, or materially modified any of our existing, revenue arrangements since our adoption of ASU 2009-13. Therefore, there was no material impact on our financial position or results of operations from adopting ASU 2009-13. However, the provisions of ASU 2009-13 could have a material impact on the revenue recognized from any collaboration agreements that we enter into in future periods.

We generally recognize revenue at the time of shipment when title and risk of loss have passed to the customer, persuasive evidence of an arrangement exists, performance of our obligation is complete, our price to the buyer is fixed or determinable, and we are reasonably assured of collection. If a loss is anticipated on any contract, a provision for the entire loss is made immediately. Determination of these criteria, in some cases, requires management's judgment. Should changes in conditions cause management to determine that these criteria are not met for certain

future transactions, revenue for any reporting period could be adversely affected.

The Company also recognizes engineering and construction contract revenues using the percentage-of-completion method, based primarily on contract costs incurred to date compared with total estimated contract costs. Customer-furnished materials, labor, and equipment, and in certain cases subcontractor materials, labor, and equipment, are included in revenues and cost of revenues when management believes that the company is responsible for the ultimate acceptability of the project. Contracts are segmented between types of services, such as engineering and construction, and accordingly, gross margin related to each activity is recognized as those separate services are rendered.

-15-

Table of Contents

These accounting policies were applied consistently for all periods presented. Our operating results would be affected if other alternatives were used. Information about the impact on our operating results is included in the footnotes to our financial statements.

Several other factors related to the Company may have a significant impact on our operating results from year to year. For example, the accounting rules governing the timing of revenue recognition related to product contracts are complex and it can be difficult to estimate when we will recognize revenue generated by a given transaction. Factors such as acceptance of services provided, payment terms, creditworthiness of the customer, and timing of delivery or acceptance of our products often cause revenues related to sales generated in one period to be deferred and recognized in later periods. For arrangements in which services revenue is deferred, related direct and incremental costs may also be deferred.

RESULTS OF OPERATIONS

Three and Six Months Ended June 30, 2012 compared to Three and Six Months Ended June 30, 2011

Second Quarter of Fiscal 2012 vs. Second Quarter of Fiscal 2011

	Three Months Ended		% Change	As a % of Revenues	
	2012	June 30, 2011		2012	June 30, 2011
Revenues	\$ 543,000	\$ 2,531,000	-79%	100 %	100%
Cost of revenues	746,000	1,948,000	-62%	137%	77%
Gross income (loss)	(203,000)	583,000	-135%	-37%	23%
Operating expenses

Table of Contents

The sum of the amounts and percentages may not equal the totals for the period due to the effects of rounding.

Computations of percentage change period over period are based upon our results, as rounded and presented herein.

Revenues. Revenues in the current year were negatively affected by continued uncertainty over battery performance and non recoverable engineering costs associated with battery development. As a result, OEM and other customers have delayed major all-electric vehicle marketing initiatives, resulting in decreased demand for our systems. The decrease in revenue for the three and six months ended June 30, 2012 compared to the same period in 2011 was mainly due to a decrease in deliveries to our core customer base in the United States. Revenues in the first half of 2012 were mainly attributed to continued shipments to First Auto Works in China and the Optare Group in the U.K. We will have fluctuations in revenue from quarter to quarter. Although we have seen indications from our customers to support future production growth, there can be no assurance there will be continuing demand for our products and services.

Cost of Revenues. Cost of revenues consists of component and material costs, direct labor costs, integration costs and overhead related to manufacturing our products as well as inventory valuation reserve amounts. Cost of revenues for the three and six months ended June 30, 2012 decreased primarily due to the decrease in revenue for the three and six months ended June 30, 2012 compared to the same period in the prior year. We recorded a charge of approximately \$893,000 during the first half of 2012 increasing our inventory obsolescence reserve after management updated its estimate of the realizable value of inventory.

Gross Profit. The decrease in gross profit for the three and six months ended June 30, 2012 compared to the same period in the prior year is primarily attributable to the decrease in revenues and the recording of an increase in the inventory obsolescence reserve in the first half of 2012.

Research and Development (“R&D”). R&D costs decreased for the three and six months ended June 30, 2012 compared to the same periods in the prior year as we reduced resources devoted to continued development of existing products and focused our engineering personnel resources to the development of our next generation Omni-series motor control unit and 10kW charger. We also continued testing of new battery technologies and electric motors as well as the development of upgraded proprietary control software for specific customer applications.

Selling, General, and Administrative Expenses (“S, G & A”). S, G & A is comprised of activities in the executive, finance, marketing, field service and quality departments’ compensation as well as related payroll benefits, and non-cash charges for depreciation and options expense. The decrease in S, G & A for the three and six months ended June 30, 2012 compared to the same period in the prior year is attributable the Company’s implementation of staff reductions and other cost savings measures. We continually monitor S, G & A in light of our business outlook and are taking proactive steps to control these costs.

Interest and Other Income (Expense). The net of other income (expense) increased in the three and six months ended June 30, 2012 compared to the same period in the prior year due to \$68,000 of fixed asset impairment charge recorded in the second quarter of 2012 and a decrease in interest increase and miscellaneous income.

Net Loss. The increase in the net loss for the three and six months ended June 30, 2012 compared to the same period in the prior year was mainly due to the decreased demand for our systems in 2012.

Comparability of Quarterly Results. Our quarterly results have fluctuated in the past and we believe they will continue to do so in the future. Certain factors that could affect our quarterly operating results are described in Part I, Item 1A-Risk Factors contained in our Form 10-K for 2011, as updated by the disclosure contained in Item 1A of Part II of this Form 10-Q. Due to these and other factors, we believe that quarter-to-quarter comparisons of our results of

operations are not meaningful indicators of future performance.

-17-

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

We have experienced losses primarily attributable to research, development, marketing and other costs associated with our strategic plan as an international developer and supplier of electric drive and power management systems and components. Historically cash flows from operations have not been sufficient to meet our obligations and we have had to raise funds through several financing transactions. At least until we reach breakeven volume in sales and develop and/or acquire the capability to manufacture and sell our products profitably, we will need to continue to rely on cash from external financing sources. Our operations during the six months ended June 30, 2012 were financed by product sales, equity financing, as well as from working capital reserves.

On June 30, 2010, the Company entered into a secured revolving credit facility with a financial institution for \$200,000 which was secured by a \$200,000 certificate of deposit. The facility is for a period of 3 years and 6 months from July 1, 2010 to December 31, 2013. The interest rate on a drawdown from the facility is the certificate of deposit rate plus 1.25% with interest payable monthly and the principal due at maturity. The financial institution also renewed the \$200,000 irrevocable letter of credit for the full amount of the credit facility in favor of Sunshine Distribution LP, with respect to the lease of the Company's corporate headquarters at 1560 West 190th Street, Torrance, California.

Net cash used in operating activities was \$2,968,000 for the six months ended June 30, 2012, a decrease of \$2,037,000 compared to \$5,005,000 for the six months ended June 30, 2011. Operating cash used in the first half of 2012 decreased compared to the prior year period due mainly to decreases in our sales volume in 2012 and the use of our existing cash resources to fund our current operations. Non-cash items include expense for stock-based compensation, depreciation and amortization, issuance of common stock for employee services and other losses. These non-cash items increased by \$753,000 for the six months ended June 30, 2012 as compared to the same period in the prior year primarily due to larger increase in the inventory reserve. The increase in net loss was primarily due to a decrease in gross profit related to an 84% decrease in revenue and an increase in the inventory reserve when comparing the six months ended 2012 and 2011. We increased measures to conserve cash resources, including the reduction in our workforce by over 80% in June 2012 and by restricting administrative and general expenditures. As of June 30, 2012, the Company had \$233,000 of cash and cash equivalents compared to \$3,096,000 as of December 31, 2011.

Net cash used in investing activities for capital expenditures was \$16,000 for the six months ended June 30, 2012 compared to \$193,000 for the six months ended June 30, 2011. The decrease was primarily attributable to a decrease in acquisitions of test vehicles and equipment in the first six months of 2012.

Net cash provided by financing activities was \$121,000 for the six months ended June 30, 2012, compared to net cash provided in financing activities of \$9,000 for the six months ended June 30, 2011. The increase was primarily attributable to proceeds of \$132,000 from the issuance of Common Stock during second quarter of 2012 from the Lincoln Park facility, as explained in Note 8 – Stockholders' Equity to the financial statements included in Item 1 of this Form 10-Q.

Net accounts receivable decreased by \$45,000, or 6%, to \$714,000 at June 30, 2012 compared to a balance of \$759,000 at December 31, 2011. The decrease in the receivable balance was primarily due to an increase in the Reserve for Doubtful Accounts due to financial instability at a major customer, Smith Electric Vehicles. As of June 30, 2012 and December 31, 2011, the Company maintained a reserve for doubtful accounts receivable of \$212,000 and \$18,000, respectively.

Net inventory and supplies decreased by \$960,000, or 24%, to \$3,076,000 at June 30, 2012 compared to a balance of \$4,036,000 at December 31, 2011. The decrease resulted from net inventory activity including receipts totaling \$603,000, consumption of \$670,000 and an inventory reserve charge of \$893,000.

Prepaid expenses and other current assets decreased by \$39,000, or 16%, to \$203,000 at June 30, 2012 compared to a balance of \$242,000 at December 31, 2011. The decrease was primarily due to a decrease in purchase order deposits for inventory received to fulfill customer sales in the second quarter.

Long term accounts receivable decreased by \$6,000, or 8%, to \$73,000 at June 30, 2012 compared to a balance of \$79,000 at December 31, 2011. The decrease is primarily due to reclassification of amounts that will be due within one year to current accounts receivable. The Company agreed to defer collection of certain accounts receivable as requested by a customer for the term of the Company's warranty guarantee. The Company continues to remedy all warranty claims and therefore anticipates collection of this receivable.

Table of Contents

Property and equipment, net of depreciation, decreased by \$290,000, or 31%, to \$638,000 at June 30, 2012 compared to a balance of \$928,000 at December 31, 2011. The decrease is primarily due to depreciation expense of \$238,000 and an asset impairment charge of \$68,000, which was partially offset by additions to fixed assets totaling \$16,000 in the first six months of 2012.

Accounts payable increased by \$92,000, or 26%, to \$446,000 at June 30, 2012 compared to a balance of \$354,000 at December 31, 2011. The increase was primarily due to inventory purchases made in the first half of 2012.

Deferred revenues decreased by \$198,000, or 62%, to \$122,000 at June 30, 2012 compared to a balance of \$320,000 at December 31, 2011. The balance at June 30, 2012 is anticipated to be realized into revenue in the third quarter of 2012 and is associated with prepayments on purchase orders from certain customers.

Accrued payroll and related expenses decreased by \$248,000, or 93%, to \$18,000 at June 30, 2012 compared to a balance of \$266,000 at December 31, 2011. The decrease was primarily due to the reduction in our workforce by over 80% in June 2012 which resulted in a pay out of accrued vacation of approximately \$143,000 and a decrease in other accrued payroll expenses.

Other accrued liabilities decreased by \$174,000, or 34%, to \$343,000 at June 30, 2012 compared to a balance of \$517,000 at December 31, 2011. The decrease was primarily due to a decrease in the accrued warranty balance as costs for warranty claims were greater than warranty accruals during the first six months of 2012.

Accrued interest payable increased by \$40,000, or 3%, to \$1,277,000 at June 30, 2012 compared to a balance of \$1,237,000 at December 31, 2011. The increase was due to interest related to our debt instruments, primarily the secured note payable in the amount of \$1,238,000 to the Credit Managers Association of California.

Lincoln Park Equity Facility

On April 23, 2012, the Company entered into a \$6,600,000 purchase agreement (the “\$6,600,000 Purchase Agreement”), together with a registration rights agreement, with Lincoln Park Capital Fund, LLC (“Lincoln Park”), pursuant to which the Company has the right to sell to Lincoln Park up to \$6,600,000 in shares of the Company’s common stock, subject to certain limitations. In addition, on April 24, 2012, the Company entered into a purchase agreement (the “\$3,400,000 Purchase Agreement” and, together with the \$6,600,000 Purchase Agreement, the “Purchase Agreements”), pursuant to which the Company has the right to sell to Lincoln Park up to \$3,400,000 in shares of the Company’s common stock, subject to certain limitations.

Under the terms and subject to the conditions of the \$6,600,000 Purchase Agreement, Lincoln Park will be obligated to purchase up to \$6,600,000 in shares of common stock (subject to certain limitations) from time to time over the 36-month period commencing on the date that a registration statement, which we agreed to file with the Securities and Exchange Commission (the “SEC”), is declared effective by the SEC and a final and complete prospectus in connection therewith is filed. The Company may direct Lincoln Park, from time to time, at its sole discretion and subject to certain conditions, to purchase up to 200,000 shares of common stock, and in addition we may require additional purchases in accordance with the \$6,600,000 Purchase Agreement. The purchase price of shares of common stock related to the future funding will be based on the prevailing market prices of such shares at the time of sales without any fixed discount, and the Company will control the timing and amount of any sales of common stock to Lincoln Park. The Company’s sales of shares of common stock to Lincoln Park may be limited to the maximum number of shares of common stock under applicable rules of the NYSE MKT or we may be required to obtain stockholder approval under such rules. As consideration for its commitment to purchase shares of common stock pursuant to the \$6,600,000 Purchase Agreement, the Company will issue to Lincoln Park up to 556,440 shares pro rata, when and if, Lincoln Park purchases at the Company’s discretion the \$6,600,000 funding.

Pursuant to the \$3,400,000 Purchase Agreement, Lincoln Park initially purchased shares of common stock for gross proceeds of \$250,000 and, on May 11, 2012, purchased additional shares of common stock for gross proceeds of \$34,000. The Company has the right, from time to time, at its sole discretion and subject to certain conditions to direct Lincoln Park to purchase up to 200,000 shares of common stock, which amount may be increased in accordance with the \$3,400,000 Purchase Agreement. The purchase price of shares of common stock related to the future funding will be based on the prevailing market prices of such shares at the time of sales without any fixed discount, and the Company will control the timing and amount of any sales of common stock to Lincoln Park. Additionally, the \$3,400,000 Purchase Agreement limits the Company's sales of common stock to Lincoln Park to (i) the maximum number of shares of common stock that the Company may issue without breaching its obligations under applicable rules of the NYSE MKT or obtaining stockholder approval under such rules, and (ii) the maximum number of shares of Common Stock that the Company may issue without exceeding the limitations set forth in General Instruction I.B.6. of Form S-3 and the interpretive guidance of the SEC applicable to these transactions.

Table of Contents

As consideration for its commitment to purchase common stock under the \$3,400,000 Purchase Agreement, the Company issued to Lincoln Park 281,030 shares of common stock and agreed to issue up to 286,651 shares pro rata, when and if, Lincoln Park purchases at the Company's discretion the \$3,400,000 funding.

The \$3,400,000 Purchase Agreement limits our sales of shares of common stock to Lincoln Park to the lesser of: (a) the maximum number of shares of our common stock that we may issue without breaching our obligations under applicable rules of the NYSE MKT or obtaining stockholder approval under such rules, and (b) the maximum number of shares of our common stock that we may issue without exceeding the limitations set forth in General Instruction I.B.6. of Form S-3 and the interpretive guidance of the SEC. All shares of Common Stock sold and to be sold to Lincoln Park under the \$3,400,000 Purchase Agreement are and will be issued pursuant to the Company's effective shelf registration statement on Form S-3 (Registration No. 333-176480), filed with the SEC in accordance with the provisions of the Securities Act and declared effective on August 30, 2011.

It is anticipated that shares registered in this offering will be sold over a period of up to 36 months. The sale by Lincoln Park of a significant amount of shares registered in this offering at any given time could cause the market price of our common stock to decline and to be highly volatile. Lincoln Park may ultimately purchase all, some or none of the shares of common stock offered hereby. After it has acquired such shares, it may sell all, some or none of such shares. Therefore, sales by us to Lincoln Park of the shares registered in this offering may result in substantial dilution to the interests of other holders of our common stock. However, we have the right to control the timing and amount of any sales of our shares to Lincoln Park.

The number of shares ultimately offered for sale by Lincoln Park under the prospectus supplement is dependent upon the number of shares purchased by Lincoln Park under the \$3,400,000 Purchase Agreement. The following table sets forth the amount of proceeds we would receive from Lincoln Park from the sale of shares that are registered in the offering at varying purchase prices (without accounting for certain fees and expenses):

Assumed Average Purchase Price	Number of Shares to be Issued if Full Purchase (1)	Percentage of Outstanding Shares After Giving Effect to the Issuance to Lincoln Park (2)	Proceeds from the Sale of Shares to Lincoln Park Under the \$3,400,000 Purchase Agreement
\$ 0.13(3)	26,153,846(6)	37.64	\$ 3,400,000
\$ 0.20(4)	17,000,000(6)	28.18	\$ 3,400,000
\$ 0.23(5)	14,782,609(6)	25.43	\$ 3,400,000
\$ 1.00	3,400,000	7.28	\$ 3,400,000
\$ 2.00	1,700,000	3.78	\$ 3,400,000

(1) Excludes the shares to be issued to Lincoln Park as commitment shares, of which we issued 281,030 shares in connection with entering into the \$3,400,000 Purchase Agreement and an additional 286,651 shares we agreed to issue pro rata when and if Lincoln Park purchases the \$3,400,000 funding.

(2) The denominator is based on 42,765,223 shares outstanding as of April 24, 2012, adjusted to include the 281,030 shares to be issued to Lincoln Park as commitment shares in connection with the offering and the number of shares set forth in the adjacent column which we would have sold to Lincoln Park and any related additional shares which we would have issued pro rata, but excluding the 556,440 commitment shares that may be issued to Lincoln Park

in connection with the \$6,600,000 Purchase Agreement. The numerator is based on the number of shares issuable under the \$3,400,000 Purchase Agreement at the corresponding assumed purchase price set forth in the adjacent column. The number of shares in such column does not include shares that may be issued to Lincoln Park which are not registered in this offering.

- (3) Under the \$3,400,000 Purchase Agreement, we may not sell and Lincoln Park may not purchase any shares in the event the purchase price of such shares is below \$0.13.
- (4) Under the \$3,400,000 Purchase Agreement, we may not sell and Lincoln Park may not purchase any shares at the Accelerated Purchase Price in the event the closing price of our common stock on the NYSE MKT is less than \$0.20 on the purchase date.
- (5) The closing sale price of our shares on April 23, 2012.
- (6) If we seek to issue shares, including shares from other transactions but not included in the offering that may be aggregated with the transaction under the applicable rules of NYSE MKT, in excess of 8,500,000, or 19.99% of the total common stock outstanding as of the date of the \$3,400,000 Purchase Agreement, we may be required to seek shareholder approval in order to be in compliance with the NYSE MKT rules.

Table of Contents

Going concern

To date, the Company has incurred recurring net losses and negative cash flows from operations. At June 30, 2012, the Company had an accumulated deficit of approximately \$155.1 million, working capital of approximately \$3.4 million and shareholders' equity of approximately \$1.6 million. Until the Company can generate significant cash from its operations, the Company expects to continue to fund its operations with existing cash resources, proceeds from one or more private placement agreements, as well as potentially through debt financing or the sale of equity securities. However, the Company may not be successful in obtaining additional funding. In addition, the Company cannot be sure that its existing cash and investment resources will be adequate or that additional financing will be available when needed or that, if available, financing will be obtained on terms favorable to the Company or its shareholders.

Our ongoing operations and anticipated growth will require us to make necessary investments in human and production resources, regulatory compliance, as well as sales and marketing efforts. We do not currently have adequate internal liquidity to meet these objectives in the long term. On June 21, 2012, we reported in a Form 8-K filing that, as part of cost cutting measures in response to our decrease in revenue amid continued delays in industry adoption of EV technology resulting from ongoing battery cost and reliability concerns, in excess of 80% of our workforce left our Company, including the resignation of members of our senior management. We continue to evaluate strategic partnering opportunities and other external sources of liquidity, including the public and private financial markets and strategic partners. Having insufficient funds may require the Company to delay or potentially eliminate some or all of its development programs, relinquish some or even all rights to product candidates at an earlier stage of development or negotiate less favorable terms than it would otherwise choose. Failure to obtain adequate financing also may adversely affect the launch of the Company's product candidates or its ability to continue in business. If the Company raises additional funds by issuing equity securities, substantial dilution to existing stockholders would likely result. If the Company raises additional funds by incurring debt financing, the terms of the debt may involve significant cash payment obligations, as well as covenants and specific financial ratios that may restrict its ability to operate its business.

As of June 30, 2012, the Company had approximately \$0.2 million in cash and cash equivalents currently and anticipates that its existing cash and anticipated receivables collections will be sufficient to meet its projected operating requirements through year end to continue operations and market trading.

We have continued to closely scrutinize our cost structure in 2012 to reduce ongoing operating costs. Market acceptance of our products in sufficiently profitable production volume is closely tied to the development of a reliable and cost effective battery solution by the industry. Further delays in battery availability, in conjunction with unanticipated delays in OEM acceptance, could result in further actions by Enova to focus on cash management.

Table of Contents

We have also accessed the capital markets to obtain additional operating funds. In December 2011, we raised approximately \$1,245,000, net of financing costs of \$442,500 through an equity issuance to certain accredited investors, which was disclosed in our Form 10-K filed on March 29, 2012. In addition, as summarized in the liquidity discussion in our Management Discussion and Analysis of this Form 10-Q, we entered into two Purchase Agreements (the facility) with Lincoln Park Capital Fund in April to issue up to \$10,000,000 in shares of our common stock and received proceeds of \$132,000, net of financing costs of \$152,000, from the initial purchase of shares of Common Stock from Lincoln Park in the second quarter. Access to funding under the facility is dependent upon our share price maintaining a floor price of at least \$0.15 per share. Our share price decreased below that threshold in May 2012 and until our share price increases above the threshold level, we cannot raise additional funds from the facility.

The Company continues to pursue other options to raise additional capital to fund its operations, including potential strategic partnerships; however, there can be no assurance that we can successfully raise additional funds through the capital markets.

Off-Balance Sheet Arrangements

The Company has no off-balance sheet arrangements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures which are designed to provide reasonable assurance that information required to be disclosed in the Company's periodic Securities and Exchange Commission ("SEC") reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

As required by Rule 13a-15(b) under the Securities and Exchange Act of 1934, as amended, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures for the period covered by this report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer has concluded that the Company's internal control over disclosure controls and procedures was effective as of June 30, 2012.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the six months ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

As reported in our Form 10-K for the fiscal year 2011, six of the eight counts in the litigation between Enova and Arens Controls Company, L.L.C. were settled. The two counts that were not settled remain outstanding and there have been no material developments with respect thereto during the period covered by this report. We intend to continue to contest the remaining unresolved counts.

From time to time, we are subject to legal proceedings arising out of the conduct of our business, including matters relating to commercial transactions. We recognize a liability for any contingency that is probable of occurrence and reasonably estimable. We continually assess the likelihood of adverse outcomes in these matters, as well as potential ranges of probable losses (taking into consideration any insurance recoveries), based on a careful analysis of each matter with the assistance of outside legal counsel and, if applicable, other experts.

Table of Contents

Given the uncertainty inherent in litigation, we do not believe it is possible to develop estimates of the range of reasonably possible loss for these matters. Considering our past experience, we do not expect the outcome of these matters, either individually or in the aggregate, to have a material adverse effect on our consolidated financial position. Because most contingencies are resolved over long periods of time, potential liabilities are subject to change due to new developments, changes in settlement strategy or the impact of evidentiary requirements, which could cause us to pay damage awards or settlements (or become subject to equitable remedies) that could have a material adverse effect on our results of operations or operating cash flows in the periods recognized or paid.

ITEM 1A. Risk Factors

The additional risk factors included below supplement and update the risk factors previously discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2011. There have been no other material changes from the risk factors as previously disclosed in such Annual Report on Form 10-K.

Our common stock is subject to delisting from the NYSE MKT

The NYSE MKT, where our common stock trades, has established standards for continued listing of a security on the NYSE MKT. On July 5, 2012, Enova Systems, Inc. (the "Company") received notice (the "July Notice") from the NYSE MKT (the "Exchange") indicating that the Company no longer complies with the Exchange's continued listing standards as set forth in Section 1003 of the NYSE MKT Company Guide (the "Company Guide"), and that its securities are, therefore, subject to being delisted from the Exchange.

By a series of letters, the Exchange previously notified the Company that it was not in compliance with the following sections of the Company Guide: (a) Section 1003(a)(iii) insofar as the Company reported stockholders' equity of less than \$6,000,000 and has incurred losses from continuing operations and/or net losses in five consecutive fiscal years; (b) Section 1003(a)(ii) insofar as the Company reported stockholders' equity of less than \$4,000,000 and has incurred losses from continuing operations and/or net losses in three out of its four most recent fiscal years; and (c) Section 1003(f)(v) insofar as its Common Stock has been trading at a low price per share for a significant period of time.

On May 17, 2012, pursuant to Section 1009 of the Company Guide, the Company submitted a plan of compliance (the "Plan") advising the Exchange of actions the Company would take to regain compliance with Section 1003(a)(iii) and 1003(a)(ii) of the Company Guide by October 15, 2013. The July Notice stated that the financial projections provided in connection with the Plan did not demonstrate an ability to regain compliance with the minimum requirements by October 15, 2013. The July Notice further stated that, on June 25, 2012, the Company notified the Exchange that the financial projections provided with the Plan were no longer accurate and did not provide the staff of the Exchange (the "Staff") with updated projections.

On June 25, 2012, the Company filed a Form 8-K disclosing the resignation of Chief Executive Officer and Director Michael Staran, Chief Operating Officer John Mullins and Director Rich Davies, reinforcing the Staff's conclusion that the Company will be unable to regain compliance by October 15, 2013.

Following a review of the above-described facts, the Staff advised the Company that the Exchange did not accept the proposed Plan and that the Company is therefore subject to delisting pursuant to Section 1009 of the Company Guide.

In accordance with Sections 1203 and 1009(d) of the Company Guide, the Company exercised its right to appeal the determination of the Staff by requesting a hearing with the Listing Qualifications Panel. The Company was granted a hearing date in September 2012. There can be no assurance that the Company's request for continued listing

will be granted or that, if granted, the Company will be able to continue to meet the minimum listing requirements. If our common stock were to be delisted from the NYSE MKT, it would materially adversely affect the price and liquidity of our common stock, and our ability to raise funds from the sale of equity in the future.

The sale or issuance of our common stock to Lincoln Park may cause dilution and the sale of the shares of common stock acquired by Lincoln Park, or the perception that such sales may occur, could cause the price of our common stock to fall

On April 24, 2012, we entered into the \$3,400,000 Purchase Agreement with Lincoln Park pursuant to which we may issue to Lincoln Park from time to time over a 36-month period up to \$3,400,000 worth of our common stock subject to certain limitations defined in the prospectus supplement and 567,681 shares to be issued to Lincoln Park at no cost as a fee for its commitment to purchase such shares. In addition, on April 23, 2012, we entered into the \$6,600,000 Purchase Agreement with Lincoln Park, pursuant to which Lincoln Park committed to purchase an additional \$6,600,000 worth of our common stock, from time to time over a 36-month period commencing after the SEC has declared effective a registration statement for the resale of such shares that we must file with the SEC within 120 business days after the date of such agreement.

Table of Contents

Other than Lincoln Park's initial purchase under the \$3,400,000 Purchase Agreement of 1,250,000 shares of our common stock at a price per share of \$0.20 for an aggregate amount of \$250,000, or the Initial Purchase, the purchase price for the shares that we may sell to Lincoln Park will fluctuate based on the price of our common stock. It is anticipated that shares will be sold over a period of up to 36 months after the date of the prospectus supplement. Depending on market liquidity at the time, sales of shares we issue to Lincoln Park may cause the trading price of our common stock to fall.

We generally have the right to control the timing and amount of any sales of our shares to Lincoln Park, except that, pursuant to the terms of our agreements with Lincoln Park, we would be unable to sell shares to Lincoln Park if and when the market price of our common stock is below \$0.15 per share. Sales of our common stock, if any, to Lincoln Park will depend upon market conditions and other factors to be determined by us. As such, other than the Initial Purchase, Lincoln Park may ultimately purchase all, some or none of the shares of our common stock offered pursuant to this prospectus supplement and, after it has acquired shares, Lincoln Park may sell all, some or none of those shares. Therefore, sales to Lincoln Park by us pursuant to either the \$3,400,000 Purchase Agreement or the \$6,600,000 Purchase Agreement could result in substantial dilution to the interests of other holders of our common stock. Additionally, the sale of a substantial number of shares of our common stock to Lincoln Park, or the anticipation of such sales, could make it more difficult for us to sell equity or equity-related securities in the future at a time and at a price that we might otherwise wish to effect sales.

Raising additional funds by issuing securities, engaging in debt financings or through licensing arrangements may cause substantial dilution to existing stockholders, restrict our operations or require us to relinquish proprietary rights.

To the extent that we raise additional capital by issuing equity securities as we did in 2011, April 2012 and May 2012, our existing stockholders' ownership may be substantially diluted. Any debt financing we enter into may involve covenants that restrict our operations or our ability to enter into other funding arrangements. These restrictive covenants may include limitations on additional borrowing and specific restrictions on the use of our assets, as well as prohibitions on our ability to create liens, pay dividends, redeem our stock or make investments. In addition, if we raise additional funds through licensing arrangements, it may be necessary to relinquish potentially valuable rights to our potential products or proprietary technologies, or grant licenses on terms that are not favorable to us.

One group of our shareholders holds a large percentage of our outstanding common stock, and, should they choose to do so, may have significant influence over the outcome of corporate actions requiring stockholder approval.

Approximately 26.5% of our outstanding common stock is held by a group of 17 shareholders (the "Low-Beer Managed Accounts") who invested in our December 2011 placement of 11,250,000 shares of common stock together with warrants to purchase up to 11,250,00 shares of common stock. The warrants are exercisable for a period of five years and exercisable at a price of \$0.22 per share. The warrants further provide that if, for a twenty consecutive trading day period, the average of the closing price quoted on the NYSE MKT is greater than or equal to \$0.44 per share, with at least an average of 10,000 shares traded per day, then, on the 10th calendar day following written notice from the Company, any outstanding warrants will be deemed automatically exercised pursuant to the cashless/net exercise provisions under the warrants. Accordingly, the Low-Beer Managed Accounts, should they choose to do so, may be able to significantly influence the outcome of any corporate transaction or other matter submitted to our stockholders for approval, including the election of directors, any merger, consolidation or sale of all or substantially all of our assets or any other significant corporate transaction, and such group of investors could delay or prevent a change of control of our company, even if such a change of control would benefit our other stockholders. The interests of the Low-Beer Managed Accounts may differ from the interests of our other stockholders.

Funding from our equity lines of credit may be limited or be insufficient to fund our operations or to implement our strategy.

Under our purchase agreements with Lincoln Park, we may direct Lincoln Park to purchase up to \$3,400,000 of shares of common stock over a 36 month period, and, upon effectiveness of a registration statement for resale of the shares and subject to other conditions, we also may direct Lincoln Park to purchase up to \$6,600,000 of our shares of common stock over a 36 month period. The amounts available for purchase is limited under each purchase agreement. The extent to which we rely on Lincoln Park as a source of funding will depend on a number of factors including, the amount, if any, of additional working capital needed, the prevailing market price of our common stock and the extent to which we are able to secure working capital from other sources. If we are unable to sell enough of our products to finance our working capital requirements and if sufficient funding from Lincoln Park were to prove unavailable or prohibitively dilutive, we would need to secure another source of funding. Even if we sell all \$10,000,000 under the aggregate purchase agreements to Lincoln Park, there can be no assurance this would be sufficient to support our operations or implement our growth plans in all cases.

Table of Contents

We may need to secure adequate funding to complete the development program for Omni Product Line and Green For Free (GFF).

Our current cash reserves may not be sufficient to fully fund GFF development and commence production of the Omni product line, and as a result, we may need additional funding to complete the development of these product initiatives and to fund operations generally. We may seek to enter potential strategic partnerships related to both GFF and Omni production to provide funding for continued development of the Omni platform, support of our commercialization operations with respect to GFF and support funding of general operations. However, there can be no assurance that such a strategic partnership would be completed or on terms that are favorable to us. If we are unable to reach agreement with a potential strategic partner or if a strategic partnership does not provide adequate funding, we may need to obtain additional funding to complete the development of GFF. Raising additional equity capital may be difficult due to our share price trading at near historical lows and the potential delisting of our common shares from the NYSE MKT. If we are unable to raise sufficient capital to fund our development programs and operations generally, we may be unable to proceed with the development of GFF and our business and financial condition may be adversely affected.
