## Cautionary Statement Regarding Forward-Looking Statements

This current report contains forward-looking statements. For example, statements regarding future financial performance, future competitive positioning and business synergies, future acquisition cost savings, future market demand, future benefits to unitholders, future economic and industry conditions, the proposed Simplification Transaction (including its benefits, results, effects and timing) and whether and when the Simplification Transaction will be consummated, are forward-looking statements within the meaning of federal securities laws. WES, the Partnership and their respective general partners believe that their expectations are based on reasonable assumptions. No assurance, however, can be given that such expectations will prove to have been correct.

A number of factors could cause actual results to differ materially from the projections, anticipated results or other expectations expressed in this current report. Such factors include, but are not limited to: the failure of the unitholders of WES to approve the proposed Simplification Transaction; the risk that the conditions to the closing of the proposed Simplification Transaction are not satisfied; the risk that regulatory approvals required for the proposed Simplification Transaction are not obtained or are obtained subject to conditions that are not anticipated; potential adverse reactions or changes to business relationships resulting from the announcement or completion of the proposed Simplification Transaction; uncertainties as to the timing of the proposed Simplification Transaction; competitive responses to the proposed Simplification Transaction; the inability to obtain or delay in obtaining cost savings and synergies from the

proposed Simplification Transaction; unexpected costs, charges or expenses resulting from the proposed Simplification Transaction; the outcome of pending or potential litigation, including the Lawsuits; the inability to retain key personnel; uncertainty of the expected financial performance of the Partnership following completion of the proposed Simplification Transaction; and any changes in general economic and/or industry specific conditions.

WES and the Partnership caution that the foregoing list of factors is not exclusive. Additional information concerning these and other risk factors is contained in WES's and the Partnership's most recently filed Annual Reports on Form 10-K, subsequent Quarterly Reports on Form 10-Q, recent Current Reports on Form 8-K, and other SEC filings, which are available at the SEC's website, <http://www.sec.gov>. All subsequent written and oral forward-looking statements concerning WES, the Partnership, the proposed Simplification Transaction or other matters attributable to WES and the Partnership or any person acting on their behalf are expressly qualified in their entirety by the cautionary statements above. Each forward-looking statement speaks only as of the date of the particular statement. Except as required by law, WES, the Partnership and their respective general partners undertake no obligation to publicly update or revise any forward-looking statements.

The information in this Item 8.01 shall not be deemed to be “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of that section, and is not incorporated by reference into any filing under the Securities Act of 1933, as amended, or the Exchange Act.
