KIMCO REALTY CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Interim Financial Statements

Business -

Kimco Realty Corporation and subsidiaries (the "Company"), affiliates and related real estate joint ventures are engaged principally in the ownership, management, development and operation of open-air shopping centers, which are anchored generally by discount department stores, grocery stores or drugstores. Additionally, the Company provides complementary services that capitalize on the Company's established retail real estate expertise.

The Company elected status as a Real Estate Investment Trust (a "REIT") for federal income tax purposes beginning in its taxable year ended December 31, 1991 and operates in a manner that enables the Company to maintain its status as a REIT. As a REIT, with respect to each taxable year, the Company must distribute at least 90 percent of its taxable income (excluding capital gain) and does not pay federal income taxes on the amount distributed to its shareholders. The Company is not generally subject to federal income taxes if it distributes 100 percent of its taxable income. Most states, where the Company holds investments in real estate, conform to the federal rules recognizing REITs. Certain subsidiaries have made a joint election with the Company to be treated as taxable REIT subsidiaries ("TRSs"), which permit the Company to engage in certain business activities which the REIT may not conduct directly. A TRS is subject to federal and state income taxes on its income, and the Company includes, when applicable, a provision for taxes in its condensed consolidated financial statements. The Company is subject to and also includes in its tax provision non-U.S. income taxes on certain investments located in jurisdictions outside the U.S. These investments are held by the Company at the REIT level and not in the Company's taxable REIT subsidiaries. Accordingly, the Company does not expect a U.S. income tax impact associated with the repatriation of undistributed earnings from the Company's foreign subsidiaries.

Principles of Consolidation -

The accompanying Condensed Consolidated Financial Statements include the accounts of the Company. The Company's subsidiaries include subsidiaries which are wholly-owned and all entities in which the Company has a controlling financial interest, including where the Company has been determined to be a primary beneficiary of a variable interest entity ("VIE") in accordance with the Consolidation guidance of the Financial Accounting Standards

Board (“FASB”) Accounting Standards Codification (“ASC”). All inter-company balances and transactions have been eliminated in consolidation. The information presented in the accompanying Condensed Consolidated Financial Statements is unaudited and reflects all adjustments which are, in the opinion of management, necessary to reflect a fair statement of the results for the interim periods presented, and all such adjustments are of a normal recurring nature. These Condensed Consolidated Financial Statements should be read in conjunction with the Company's audited Annual Report on Form 10-K for the year ended December 31, 2016 (the “10-K”), as certain disclosures in this Quarterly Report on Form 10-Q for the quarterly period ended September 30, 2017, that would duplicate those included in the 10-K are not included in these Condensed Consolidated Financial Statements.

Subsequent Events -

The Company has evaluated subsequent events and transactions for potential recognition or disclosure in the condensed consolidated financial statements (see Footnote 9).

Diluted earnings/(loss) per share	0.24	(0.13)	0.70	0.63

The effect of the assumed conversion of certain convertible units had an anti-dilutive effect upon the calculation of (a) Income from continuing operations per share. Accordingly, the impact of such conversions has not been included in the determination of diluted earnings/(loss) per share calculations. Additionally, there were 2,314,908 and 3,545,000 stock options that were not dilutive as of September 30, 2017 and 2016, respectively.

The Company's unvested restricted share awards contain non-forfeitable rights to distributions or distribution equivalents. The impact of the unvested restricted share awards on earnings per share has been calculated using the two-class method whereby earnings are allocated to the unvested restricted share awards based on dividends declared and the unvested restricted shares' participation rights in undistributed earnings.

New Accounting Pronouncements –

The following table represents Accounting Standard Updates (“ASU”) to the FASB’s Accounting Standards Codification (“ASC”) that are not yet effective for the Company and for which the Company has not elected early adoption, where permitted:

ASU	Description	Effective Date	Effect on the financial statements or other significant matters
ASU 2017-09, Compensation – Stock Compensation (Topic 718): Scope of Modification Accounting	The amendment provides guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in Topic 718. Under the new guidance, modification accounting is required only if the fair value, the vesting conditions, or the classification of the award (as equity or liability) changes as a result of the change in terms or conditions. The new guidance will be applied prospectively to awards modified on or after the adoption date.	January 1, 2018; Early adoption permitted	The adoption is not expected to have a material effect on the Company’s financial position and/or results of operations.
ASU 2017-05, Other Income – Gains and Losses from the Derecognition of Nonfinancial Assets (“Subtopic 610-20”): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets	The amendment clarifies that a financial asset is within the scope of Subtopic 610-20 if it meets the definition of an in substance nonfinancial asset and defines the term in substance nonfinancial asset. ASU 2017-05 also clarifies that nonfinancial assets within the scope of Subtopic 610-20 may include nonfinancial assets transferred within a legal entity to a counterparty. Subtopic 610-20, which was issued in May 2014 as part of ASU 2014-09, discussed below, provides guidance for recognizing gains and losses from the transfer of nonfinancial assets in contracts with noncustomers. An entity is required to apply the amendments in ASU 2017-05 at the same time it applies the amendments in ASU 2014-09 discussed below. An entity may elect to apply the amendments in ASU 2017-05 either retrospectively to each period presented in the financial statements in accordance with the guidance on accounting changes in ASC Topic 250, Accounting Changes and Error Corrections, paragraphs 10-45-5 through 10-45-10 (i.e. the retrospective approach) or retrospectively with a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year of adoption (i.e. the modified retrospective approach). An entity may elect to apply all of the amendments in ASU 2017-05 and ASU 2014-09 using the same transition method, or alternatively may elect to use different transition methods.	January 1, 2018; Early adoption is permitted if adopted with ASU 2014-09	The Company will adopt the provisions of Subtopic 610-20 in the first quarter of fiscal 2018, using the modified retrospective approach. Upon adoption, the Company will appropriately apply the guidance to prospective disposals of nonfinancial assets within the scope of Subtopic 610-20.

ASU 2016-13, Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments	The new guidance introduces a new model for estimating credit losses for certain types of financial instruments, including loans receivable, held-to-maturity debt securities, and net investments in direct financing leases, amongst other financial instruments. ASU 2016-13 also modifies the impairment model for available-for-sale debt securities and expands the disclosure requirements regarding an entity’s assumptions, models, and methods for estimating the allowance for losses.	January 1, 2020; Early adoption permitted	The adoption is not expected to have a material effect on the Company’s financial position and/or results of operations.
ASU 2014-09, Revenue from Contracts with Customers (Topic 606)	ASU 2014-09 is a comprehensive new revenue recognition model requiring a company to recognize revenue to depict the transfer of goods or services to a customer at an amount reflecting the consideration it expects to receive in exchange for those goods or services. Ineffective adopting ASU 2014-09, companies may use either a full retrospective or a modified retrospective approach. ASU 2014-09 was anticipated to be effective for the first interim period within annual reporting periods beginning after December 15, 2016, and early adoption was not permitted.	January 1, 2018; Early adoption permitted as of original date, which was January 1, 2017	The Company’s revenue-producing contracts are primarily leases that are not within the scope of this standard, except for the lease component relating to common area maintenance (“CAM”) reimbursement revenue, which will be within the scope of this standard upon the effective date of ASU 2016-02 discussed below. The Company continues to evaluate the effect the adoption will have on the Company’s other sources of revenue which include management and other fee income. However, the Company currently does not believe the adoption will significantly affect the timing of the recognition of the Company’s management and other fee income. The Company plans to adopt this standard using the modified retrospective approach, which requires a cumulative effect adjustment as of the date of adoption.
ASU 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date			
ASU 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations	In August 2015, the FASB issued ASU 2015-14, which delayed the effective date of ASU 2014-09 by one year making it effective for the first interim period within annual reporting periods beginning after December 15, 2017.		
ASU 2016-10, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations	Subsequently, in March 2016, the FASB issued ASU 2016-08, which further clarifies the implementation guidance on principal versus agent considerations, and in April 2016, the		

606): Identifying performance obligations and licensing FASB issued ASU 2016-10, an update on identifying performance obligations and accounting for licenses of intellectual property.

ASU 2016-12, Revenue from Contracts with Customers (Topic 606): Narrow-scope improvements and practical expedients Additionally, in May 2016, the FASB issued ASU 2016-12, which includes amendments for enhanced clarification of the guidance. Early adoption is permitted as of the original effective date.

ASU 2016-02, Leases (Topic 842) This ASU sets out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract (i.e. lessees and lessors). The new standard requires lessees to apply a dual approach, classifying leases as either finance or operating leases based on the principle of whether or not the lease is effectively a financed purchase by the lessee. This classification will determine whether lease expense is recognized based on an effective interest method or on a straight-line basis over the term of the lease. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term of greater than 12 months regardless of their classification. Leases with a term of 12 months or less will be accounted for similar to existing guidance for operating leases today. The new standard requires lessors to account for leases using an approach that is substantially equivalent to existing guidance for sales-type leases, direct financing leases and operating leases. ASU 2016-02 supersedes the previous leases standard, Leases (Topic 840). January 1, 2019; Early adoption permitted

The Company continues to evaluate the effect the adoption will have on the Company's financial position and/or results of operations. However, the Company currently believes that the adoption will not have a material impact for operating leases where it is a lessor and will continue to record revenues from rental properties for its operating leases on a straight-line basis. However, for leases where the Company is a lessee, primarily for the Company's ground leases and administrative office leases, the Company will be required to record a lease liability and a right of use asset on its Consolidated Balance Sheets at fair value upon adoption. In addition, direct internal leasing costs will continue to be capitalized, however, indirect internal leasing costs previously capitalized will be expensed. Within the terms of the Company's leases where the Company is the lessor, the Company is entitled to receive reimbursement amounts from tenants for operating expenses such as real estate taxes, insurance and other CAM. CAM reimbursement revenue will be accounted for in accordance with Topic 606 upon adoption of this ASU 2016-02. The Company continues to evaluate the effect the adoption will have on this source of revenue. However, the Company currently does not believe the adoption will significantly affect the timing of the recognition of the Company's CAM reimbursement revenue.

The following ASU's to the FASB's ASC have been adopted by the Company:

ASU	Description	Adoption Date	Effect on the financial statements or other significant matters
ASU 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business	The update clarifies the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation.	January 1, 2017; Elected early adoption	The Company's operating property acquisitions during the nine months ended September 30, 2017, qualified for asset acquisition treatment under ASC 360, Property, Plant, and Equipment, rather than business combination treatment under ASC 805 Business Combinations, and resulted in the capitalization of asset acquisition costs rather than directly expensing these costs.
ASU 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting	The update simplifies several aspects of accounting for employee share-based payment transactions for both public and nonpublic entities, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows.	January 1, 2017	The adoption did not have a material effect on the Company's financial position and/or results of operations.

Dispositions and Assets Held for Sale –

During the nine months ended September 30, 2017, the Company disposed of 15 consolidated operating properties and eight parcels, in separate transactions, for an aggregate sales price of \$230.2 million. These transactions resulted in (i) an aggregate gain of \$62.1 million and (ii) aggregate impairment charges of \$13.0 million.

At September 30, 2017, the Company had one property classified as held-for-sale at a carrying amount of \$14.9 million, net of accumulated depreciation of \$2.9 million, which is included in Other assets on the Company's Condensed Consolidated Balance Sheets. The Company's determination of the fair value of the property was based upon an executed contract of sale with a third party.

Impairments –

During the nine months ended September 30, 2017, the Company recognized aggregate impairment charges of \$34.3 million. These impairment charges consist of (i) \$13.0 million related to the sale of certain operating properties, as discussed above, (ii) \$5.1 million related to adjustments to property carrying values for properties which the Company has marketed for sale as part of its active capital recycling program and as such has adjusted the anticipated hold periods for such properties and (iii) \$16.2 million related to a property for which the Company has re-evaluated its long-term plan for the property due to unfavorable local market conditions. The Company's estimated fair values of these properties were primarily based upon estimated sales prices from (i) signed contracts or letters of intent from third party offers or (ii) a discounted cash flow model. See Footnote 11 for fair value disclosure.

Hurricane Impact –

The impact of Hurricanes Harvey, which hit Texas on August 25, 2017, and Irma, which hit Florida on September 10, 2017, resulted in minimal damage to the Company's properties located in Texas and Florida.

With respect to Hurricane Maria, which hit the island of Puerto Rico on September 20, 2017, the Company is currently assessing damages at its seven operating properties located throughout Puerto Rico, aggregating 2.2 million square feet of GLA. Two of these operating properties, located in the southern region of the island were less impacted and most tenants have resumed operations, while the remaining five operating properties in the northern region sustained varying amounts of damage. Initial repairs are in progress, however, a final assessment and recovery plan will require additional time. The Company maintains a comprehensive property insurance policy on these properties with total coverage of up to \$62.0 million, as well as business interruption insurance with coverage up to \$39.3

million in the aggregate, subject to a collective deductible of \$1.2 million. The Company anticipates that all damages and any loss of operations sustained will be covered under these existing policies. As further detailed information becomes available, the Company expects to recognize a charge, which it believes will not have a material effect on the Company's financial position and/or results of operations. This charge will result from the write-down of the undepreciated portion of the property that has been permanently damaged, which would be less than the replacement costs and offset by insurance proceeds received by the Company.

This distribution exceeded the Company's carrying basis and as such was recognized as income and is included in Equity in income from other real estate investments, net on the Company's Condensed Consolidated Statements of Operations.

6. Variable Interest Entities ("VIE")

Included within the Company's consolidated operating properties at September 30, 2017, are 24 consolidated partnership entities that are VIEs, for which the Company is the primary beneficiary. These entities have been established to own and operate real estate property. The Company's involvement with these entities is through its majority ownership and management of the properties. The entities were deemed VIEs primarily based on the fact that the unrelated investors do not have substantial kick-out rights to remove the general or managing partner by a vote of a simple majority or less and they do not have participating rights. The Company determined that it was the primary beneficiary of these VIEs as a result of its controlling financial interest. At September 30, 2017, total assets of these VIEs were \$1.2 billion and total liabilities were \$385.6 million.

The majority of the operations of these VIEs are funded with cash flows generated from the properties. The Company has not provided financial support to any of these VIEs that it was not previously contractually required to provide, which consists primarily of funding any capital expenditures, including tenant improvements, which are deemed necessary to continue to operate the entity and any operating cash shortfalls that the entity may experience.

Table of Contents

Additionally, included within the Company's real estate development projects at September 30, 2017, are three consolidated partnership entities that are VIEs, for which the Company is the primary beneficiary. These entities have been established to develop real estate properties to hold as long-term investments. The Company's involvement with these entities is through its majority ownership and management of the properties. These entities were deemed VIEs primarily based on the fact that the equity investments at risk are not sufficient to permit the entities to finance their activities without additional financial support. The initial equity contributed to these entities was not sufficient to fully finance the real estate construction as development costs are funded by the partners throughout the construction period. The Company determined that it was the primary beneficiary of these VIEs as a result of its controlling financial interest. At September 30, 2017, total assets of these real estate development VIEs were \$269.3 million and total liabilities were \$22.5 million.

Substantially all the projected development costs to be funded for these three real estate development projects, aggregating \$129.3 million, will be funded with capital contributions from the Company, when contractually obligated. The Company has not provided financial support to these VIEs that it was not previously contractually required to provide.

All liabilities of these consolidated VIEs are non-recourse to the Company ("VIE Liabilities"). Of the 27 total VIEs, 22 are unencumbered and the assets of these VIEs are not restricted for use to settle only the obligations of these VIEs. The remaining five VIEs are encumbered by third party non-recourse mortgage debt. The assets associated with these encumbered VIEs ("Restricted Assets") are collateral under the respective mortgages and are therefore restricted and can only be used to settle the corresponding liabilities of the VIE. The classification of the Restricted Assets and VIE Liabilities on the Company's Condensed Consolidated Balance Sheets are as follows (in millions):

	September 30, 2017	December 31, 2016
Restricted Assets:

This Credit Facility, which accrues interest at a rate of LIBOR plus 87.5 basis points (2.10% as of September 30, 2017), can be increased to \$2.75 billion through an accordion feature. The Credit Facility replaced the Company's \$1.75 billion unsecured revolving credit facility that was scheduled to mature in March 2018. In addition, the Credit Facility includes a \$500.0 million sub-limit which provides the company the opportunity to borrow in alternative currencies including Canadian Dollars, British Pounds Sterling, Japanese Yen or Euros. Pursuant to the terms of the Credit Facility, the Company, among other things, is subject to covenants requiring the maintenance of (i) maximum leverage ratios on both unsecured and secured debt and (ii) minimum interest and fixed coverage ratios. As of September 30, 2017, the Credit Facility had a balance of \$25.0 million outstanding and \$0.5 million appropriated for letters of credit.

10. Redeemable Noncontrolling Interests

Redeemable noncontrolling interests includes amounts related to partnership units issued by consolidated subsidiaries of the Company in connection with certain property acquisitions. Partnership units which are determined to be contingently redeemable under the FASB's Distinguishing Liabilities from Equity guidance are classified as Redeemable noncontrolling interests and presented in the mezzanine section between Total liabilities and Stockholder's equity on the Company's Condensed Consolidated Balance Sheets. The amounts of consolidated net income attributable to the Company and to the noncontrolling interests are presented on the Company's Condensed Consolidated Statements of Operations.

The following table presents the change in the redemption value of the Redeemable noncontrolling interests for the nine months ended September 30, 2017 and 2016 (amounts in thousands):

11. Fair Value Measurements

All financial instruments of the Company are reflected in the accompanying Condensed Consolidated Balance Sheets at amounts which, in management's estimation, based upon an interpretation of available market information and valuation methodologies, reasonably approximate their fair values except those listed below, for which fair values are disclosed. The valuation method used to estimate fair value for fixed-rate and variable-rate debt is based on discounted cash flow analyses, with assumptions that include credit spreads, market yield curves, trading activity, loan amounts and debt maturities. The fair values for marketable securities are based on published values, securities dealers' estimated market values or comparable market sales. Such fair value estimates are not necessarily indicative of the amounts that would be realized upon disposition.

Table of Contents

As a basis for considering market participant assumptions in fair value measurements, the FASB's Fair Value Measurements and Disclosures guidance establishes a fair value hierarchy that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumptions about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

The following are financial instruments for which the Company's estimate of fair value differs from the carrying amounts (in thousands):

	September 30, 2017		December 31, 2016	
	Carrying	Estimated	Carrying	Estimated
	Amounts	Fair Value	Amounts	Fair Value
Notes payable, net (1)	\$4,700,423	\$4,676,777	\$3,927,251	\$3,890,797
Mortgages payable, net (2)	\$850,848	\$852,165	\$1,139,117	\$1,141,047

The Company determined that the valuation of its Senior Unsecured Notes and MTN notes were classified within Level 2 of the fair value hierarchy and its Term Loan and Credit Facility were classified within Level 3 of the fair value hierarchy. The estimated fair value amounts classified as Level 2 as of September 30, 2017 and December 31, 2016, were \$4.7 billion and \$3.6 billion, respectively. The estimated fair value amounts classified as Level 3 as of September 30, 2017 and December 31, 2016, were \$18.2 million and \$272.5 million, respectively.

(2) The Company determined that its valuation of Mortgages payable, net was classified within Level 3 of the fair value hierarchy.

The Company has certain financial instruments that must be measured under the FASB's Fair Value Measurements and Disclosures guidance, including available for sale securities. The Company currently does not have non-financial assets and non-financial liabilities that are required to be measured at fair value on a recurring basis.

The tables below present the Company's financial assets and liabilities measured at fair value on a recurring basis as of September 30, 2017 and December 31, 2016, aggregated by the level in the fair value hierarchy within which those measurements fall (in thousands):

During the nine months ended September 30, 2017 and 2016, the Company recognized impairment charges related to adjustments to property carrying values of \$34.3 million and \$68.1 million, respectively. The Company's estimated fair values of these properties were primarily based upon estimated sales prices from (i) signed contracts or letters of intent from third party offers or (ii) a discounted cash flow model. The Company does not have access to the unobservable inputs used to determine the estimated fair values of third party offers. For the discounted cash flow model, a capitalization rate of 8.50% and a discount rate of 10.00% were utilized in the model based upon unobservable rates that the Company believes to be within a reasonable range of current market rates for this respective investment. Based on these inputs, the Company determined that its valuation of these investments was classified within Level 3 of the fair value hierarchy. (See Footnote 2 for additional discussion regarding impairment charges).

The Company accounts for equity awards in accordance with FASB's Compensation – Stock Compensation guidance which requires that all share based payments to employees, including grants of employee stock options, restricted stock and performance shares, be recognized in the Condensed Consolidated Statements of Operations over the service period based on their fair values. Fair value is determined, depending on the type of award, using either the Black-Scholes option pricing formula or the Monte Carlo method for performance shares, both of which are intended to estimate the fair value of the awards at the grant date. Fair value of restricted shares is calculated based on the price on the date of grant.

The Company recognized expenses associated with its equity awards of \$17.8 million and \$15.3 million for the nine months ended September 30, 2017 and 2016, respectively. As of September 30, 2017, the Company had \$32.8 million of total unrecognized compensation cost related to unvested stock compensation granted under the Plans. Executive Summary

Kimco Realty Corporation is one of the nation's largest publicly-traded owners and operators of open-air shopping centers. As of September 30, 2017, the Company had interests in 508 shopping center properties aggregating 84.2 million square feet of gross leasable area ("GLA") located in 32 states, Puerto Rico and Canada. In addition, the Company had 374 other property interests, primarily through the Company's preferred equity investments and other real estate investments, totaling 5.9 million square feet of GLA.

The executive officers are engaged in the day-to-day management and operation of real estate exclusively with the Company, with nearly all operating functions, including leasing, asset management, maintenance, construction, legal, finance and accounting, administered by the Company.

The Company's strategy is to be the premier owner and operator of open-air shopping centers through investments primarily in the U.S. To achieve this strategy the Company is (i) continuing to transform the quality of its portfolio by disposing of lesser quality assets and acquiring larger, higher quality properties in key markets identified by the Company, for which substantial progress has been achieved as of September 30, 2017, (ii) simplifying its business by: (a) reducing the number of joint venture investments and (b) exiting Mexico, South America and Canada, for which the exit of South America has been completed and Mexico and Canada have been substantially completed, (iii) pursuing redevelopment opportunities within its portfolio to increase overall value and (iv) selectively acquiring land parcels in our key markets for real estate development projects for long-term investment. As part of the Company's strategy each property is evaluated for its highest and best use, which may include residential and mixed-use components. In addition, the Company may consider other opportunistic investments related to retailer controlled real estate such as, repositioning underperforming retail locations, retail real estate financing and bankruptcy transaction support. The Company has an active capital recycling program which provides for the disposition of certain U.S. properties. If the Company accepts sales prices for any of these assets that are less than their net carrying values, the Company would be required to take impairment charges and such amounts could be material. In order to execute the Company's strategy, the Company intends to continue to strengthen its balance sheet by pursuing deleveraging efforts over time, providing it the necessary flexibility to invest opportunistically and selectively, primarily focusing on U.S. open-air shopping centers.

These adjustments to property carrying values were recognized in connection with the Company's efforts to market certain properties and management's assessment as to the likelihood and timing of such potential transactions and the long-term plan for certain properties. Certain of the calculations to determine fair value utilized unobservable inputs and as such are classified as Level 3 of the fair value hierarchy.

Other income, net decreased \$3.3 for the three months ended September 30, 2017, as compared to the corresponding period in 2016. For a full description of the Credit Facility's covenants refer to the Amended and Restated Credit Agreement dated as of February 1, 2017, filed as Exhibit 10.1 to the Company's Current Report on Form 8-K dated January 30, 2017.

Term Loan –

The Company had a \$650.0 million unsecured term loan (“Term Loan”) which was scheduled to mature in January 2017, with three one-year extension options at the Company’s discretion. The Term Loan accrued interest at LIBOR plus 95 basis points. During November 2016, the Company repaid \$400.0 million of borrowings under the Company’s Term Loan and in January 2017, the Company repaid the remaining \$250.0 million balance and terminated the agreement.

Mortgages Payable –

During the nine months ended September 30, 2017, the Company (i) consolidated \$212.2 million of individual non-recourse mortgage debt (including a fair market value adjustment of \$6.2 million) relating to a joint venture operating property which the Company now controls, (ii) paid off \$684.6 million of maturing mortgage debt (including fair market value adjustments of \$5.7 million) that encumbered 25 operating properties and (iii) obtained a \$206.0 million non-recourse mortgage relating to one operating property.

In addition to the public equity and debt markets as capital sources, the Company may, from time-to-time, obtain mortgage financing on selected properties and construction loans to partially fund the capital needs of its real estate development projects. As of September 30, 2017, the Company had over 380 unencumbered property interests in its portfolio.

Dividends –

In connection with its intention to continue to qualify as a REIT for federal income tax purposes, the Company expects to continue paying regular dividends to its stockholders. These dividends will be paid from operating cash flows. The Company’s Board of Directors will continue to evaluate the Company’s dividend policy on a quarterly basis as the Board of Directors monitors sources of capital and evaluates the impact of the economy and capital markets availability on operating fundamentals. Since cash used to pay dividends reduces amounts available for capital investment, the Company generally intends to maintain a conservative dividend payout ratio, reserving such amounts as it considers necessary for the expansion and renovation of shopping centers in its portfolio, debt reduction, the acquisition of interests in new properties and other investments as suitable opportunities arise and such other factors as the Board of Directors considers appropriate. Cash dividends paid for the nine months ended September 30, 2017 and 2016 were \$381.2 million and \$354.1 million, respectively.

Table of Contents

Although the Company receives substantially all its rental payments on a monthly basis, it generally intends to continue paying dividends quarterly. Amounts accumulated in advance of each quarterly distribution will be invested by the Company in short-term money market or other suitable instruments. On July 25, 2017, the Company's Board of Directors declared a quarterly cash dividend of \$0.27 per common share payable to shareholders of record on October 4, 2017, which was paid on October 16, 2017. Additionally, on October 24, 2017, the Company's Board of Directors declared an increased quarterly cash dividend of \$0.28 per common share, an annualized increase of 3.7%, payable to shareholders of record on January 2, 2018, which is scheduled to be paid on January 16, 2018.

The Board of Directors also declared quarterly dividends with respect to the Company's various series of cumulative redeemable preferred shares (Series I, Series J, Series K and Series L). All dividends on the preferred shares are scheduled to be paid on January 16, 2018, to shareholders of record on January 2, 2018.

Hurricane Impact -

The impact of Hurricanes Harvey, which hit Texas on August 25, 2017, and Irma, which hit Florida on September 10, 2017, resulted in minimal damage to the Company's properties located in Texas and Florida.

With respect to Hurricane Maria, which hit the island of Puerto Rico on September 20, 2017, the Company is currently assessing damages at its seven operating properties located throughout Puerto Rico, aggregating 2.2 million square feet of GLA. Two of these operating properties, located in the southern region of the island were less impacted and most tenants have resumed operations, while the remaining five operating properties in the northern region sustained varying amounts of damage. Initial repairs are in progress, however, a final assessment and recovery plan will require additional time. The Company maintains a comprehensive property insurance policy on these properties with total coverage of up to \$62.0 million, as well as business interruption insurance with coverage up to \$39.3 million in the aggregate, subject to a collective deductible of \$1.2 million. The Company anticipates that all damages and any loss of operations sustained will be covered under these existing policies. As further detailed information becomes available, the Company expects to recognize a charge, which it believes will not have a material effect on the Company's financial position and/or results of operations. This charge will result from the write-down of the undepreciated portion of the property that has been permanently damaged, which would be less than the replacement costs and offset by insurance proceeds received by the Company.

Other -

The Company is subject to taxes on its activities in Canada, Puerto Rico and Mexico. In general, under local country law applicable to the structures the Company has in place and applicable treaties, the repatriation of cash to the Company from its subsidiaries and joint ventures in Canada, Puerto Rico and Mexico generally is not subject to

withholding tax. The Company is subject to and also includes in its tax provision non-U.S. income taxes on certain investments located in jurisdictions outside the U.S. These investments are held by the Company at the REIT level and not in the Company's taxable REIT subsidiary. Accordingly, the Company does not expect a U.S. income tax impact associated with the repatriation of undistributed earnings from the Company's foreign subsidiaries.

Funds From Operations

Funds From Operations ("FFO") is a supplemental non-GAAP financial measure utilized to evaluate the operating performance of real estate companies. The National Association of Real Estate Investment Trusts ("NAREIT") defines FFO as net income/(loss) available to the Company's common shareholders computed in accordance with generally accepted accounting principles in the United States ("GAAP"), excluding (i) gains or losses from sales of operating real estate assets and change in control of interests, plus (ii) depreciation and amortization of operating properties and (iii) impairment of depreciable real estate and in substance real estate equity investments and (iv) after adjustments for unconsolidated partnerships and joint ventures calculated to reflect FFO on the same basis.

The Company presents FFO available to the Company's common shareholders as it considers it an important supplemental measure of our operating performance and believes it is frequently used by securities analysts, investors and other interested parties in the evaluation of REITs, many of which present FFO available to the Company's common shareholders when reporting results. Comparison of our presentation of FFO available to the Company's common shareholders to similarly titled measures for other REITs may not necessarily be meaningful due to possible differences in the application of the NAREIT definition used by such REITs.

The Company also presents FFO available to the Company's common shareholders as adjusted as an additional supplemental measure as it believes it is more reflective of its core operating performance and provides investors and analysts an additional measure to compare the Company's performance across reporting periods on a consistent basis by excluding items that we do not believe are indicative of our core operating performance. FFO available to the Company's common shareholders as adjusted is generally calculated by the Company as FFO available to the Company's common shareholders excluding certain transactional income and expenses and non-operating impairments which management believes are not reflective of the results within the Company's operating real estate portfolio.

FFO is a supplemental non-GAAP financial measure of real estate companies' operating performances, which does not represent cash generated from operating activities in accordance with GAAP and therefore should not be considered an alternative for net income as a measure of liquidity. Our method of calculating FFO available to the Company's common shareholders and FFO available to the Company's common shareholders as adjusted may be different from methods used by other REITs and, accordingly, may not be comparable to such other REITs.

(1) Reflects the potential impact if certain units were converted to common stock at the beginning of the period, which would have a dilutive effect on FFO available to the Company's common shareholders. FFO available to the

Company's common shareholders would be increased by \$268 for the three months ended September 30, 2017, and \$688 and \$621 for the nine months ended September 30, 2017 and 2016, respectively. The effect of other certain convertible units would have an anti-dilutive effect upon the calculation of Net income available to the Company's common shareholders per share. Accordingly, the impact of such conversion has not been included in the determination of diluted earnings per share calculations.

(2) Related to gains, impairment and depreciation on operating properties, where applicable.

(3) Related to transactional (income)/expense, where applicable.

Same Property Net Operating Income ("Same property NOI")

Same property NOI is a supplemental non-GAAP financial measure of real estate companies' operating performance and should not be considered an alternative to net income in accordance with GAAP or as a measure of liquidity. The Company considers Same property NOI as an important operating performance measure because it is frequently used by securities analysts and investors to measure only the net operating income of properties that have been owned by the Company for the entire current and prior year reporting periods including those properties under redevelopment. It excludes properties under development and pending stabilization; properties are deemed stabilized at the earlier of (i) reaching 90% leased or (ii) one year following a project's inclusion in operating real estate. Same property NOI assists in eliminating disparities in net income due to the development, acquisition or disposition of properties during the particular period presented, and thus provides a more consistent performance measure for the comparison of the Company's properties.

Table of Contents

Same property NOI is calculated using revenues from rental properties (excluding straight-line rent adjustments, lease termination fees and amortization of above/below market rents) less charges for bad debt, operating and maintenance expense, real estate taxes and rent expense plus the Company's proportionate share of Same property NOI from unconsolidated real estate joint ventures, calculated on the same basis. The Company's method of calculating Same property NOI may differ from methods used by other REITs and, accordingly, may not be comparable to such other REITs.

The following is a reconciliation of Net income available to the Company's common shareholders to Same property NOI (in thousands):

Same property NOI increased by \$7.0 million or 3.1% for the three months ended September 30, 2017, as compared to the corresponding period in 2016. This increase is primarily the result of (i) an increase of \$3.2 million related to lease-up and rent commencements in the portfolio, (ii) an increase in other property income of \$3.3 million and (iii) a decrease of \$0.5 million of credit losses.

Same property NOI increased by \$11.7 million or 1.7% for the nine months ended September 30, 2017, as compared to the corresponding period in 2016. This increase is primarily the result of (i) an increase of \$8.2 million related to lease-up and rent commencements in the portfolio, (ii) a decrease of \$2.8 million of credit losses and (iii) an increase

in other property income of \$0.7 million.

Leasing Activity

During the nine months ended September 30, 2017, the Company executed 918 leases totaling 7.1 million square feet in the Company's consolidated operating portfolio comprised of 330 new leases and 588 renewals and options. The leasing costs associated with new leases are estimated to aggregate \$58.0 million or \$28.74 per square foot. These costs include \$45.1 million of tenant improvements and \$12.9 million of external leasing commissions. The average rent per square foot on new leases was \$18.53 and on renewals and options was \$15.70.

Tenant Lease Expirations

The following table sets forth the aggregate lease expirations for each of the next ten years, assuming no renewal options are exercised. For purposes of the table, the Total Annual Base Rent Expiring represents annualized rental revenue, for each lease that expires during the respective year. Amounts in thousands except for number of lease data and percentages:

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's primary market risk exposures are interest rate risk and foreign currency exchange rate risk. The following table presents the Company's aggregate fixed rate and variable rate debt obligations outstanding, including fair market value adjustments and unamortized deferred financing costs, as of September 30, 2017, with corresponding weighted-average interest rates sorted by maturity date. The table does not include extension options where available. Amounts are in millions.

Based on the Company's variable-rate debt balances, interest expense would have increased by \$0.9 million for the nine months ended September 30, 2017 if short-term interest rates were 1% higher.

The following table presents the Company's foreign investments in their respective local currencies and the U.S. dollar equivalents:

Foreign Investment (in millions)

Country	Local Currency	U.S. Dollars
Mexican real estate investments	53.5	\$ 4.8
Canadian real estate investments	19.1	\$ 15.4

The Company has not, and does not plan to, enter into any derivative financial instruments for trading or speculative purposes.

Currency fluctuations between local currency and the U.S. dollar, for investments for which the Company has determined that the local currency is the functional currency, for the period in which the Company held its investment result in a cumulative translation adjustment ("CTA"). This CTA is recorded as a component of Accumulated other comprehensive income ("AOCI") on the Company's Condensed Consolidated Balance Sheets. The CTA amounts are subject to future changes resulting from ongoing fluctuations in the respective foreign currency exchange rates. Changes in exchange rates are impacted by many factors that cannot be forecasted with reliable accuracy. During the nine months ended September 30, 2017, the Company substantially liquidated its investments in Canada and as such, recognized a net cumulative foreign currency translation gain of \$10.0 million. As of a result of the substantial liquidation of the Company's foreign investments, any future currency changes, which could have a favorable or unfavorable impact, will be recognized as earnings in Other income/(expense), net in the Company's Condensed Consolidated Statements of Operations.
