CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

This report contains forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act), and the U.S. Private Securities Litigation Reform Act of 1995. Any statements about our expectations, beliefs, plans, predictions, forecasts, objectives, assumptions or future events or performance are not historical facts and may be forward looking. These statements are often, but not always, made through the use of words or phrases such as "anticipate," "believe," "can," "could," "may," "predict," "potential," "should," "will," "estimate," "plan," "project," "continuing," "ongoing," "expect," "intend" or words of similar meaning and include, but are not limited to, statements regarding the outlook for our future business and financial performance. All forward looking statements are necessarily only estimates of future results, and actual results may differ materially from expectations. You are, therefore, cautioned not to place undue reliance on such statements which should be read in conjunction with the other cautionary statements that are included elsewhere in this report. Further, any forward looking statement speaks only as of the date on which it is made and we undertake no obligation to update or revise any forward looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events. We have based these forward looking statements on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, operating results, business strategy and financial needs. There are important factors that could cause our actual results, level of activity, performance or achievements to differ materially from the results, level of activity, performance or achievements expressed or implied by the forward looking statements including, but not limited to:

- our limited operating history;
- our future profitability, liquidity and capital resources;
- developments in the world's financial and capital markets and our access to such markets, including reinsurance;
- retention of our existing certificates of authority in each state and the District of Columbia (D.C.) and our ability to remain a mortgage insurer in good standing in each state and D.C.;
- changes in the business practices of Fannie Mae and Freddie Mac (collectively, the GSEs), including implementation of the new Private Mortgage Insurer Eligibility Requirements (PMIERs) or decisions that have the impact of decreasing or discontinuing the use of mortgage insurance as credit enhancement;
- our ability to remain an eligible mortgage insurer under the PMIERs and other requirements imposed by the GSEs, which they may change at any time;
- actions of existing competitors, including governmental agencies like the Federal Housing Administration (FHA) and the Veterans Administration (VA), and potential market entry by new competitors or consolidation of existing competitors;
- adoption of new or changes to existing laws and regulations or their enforcement and implementation by regulators;
- changes to the GSEs' role in the secondary mortgage market or other changes that could affect the residential mortgage industry generally or mortgage insurance in particular;
- potential future lawsuits, investigations or inquiries or resolution of current lawsuits or inquiries;
- changes in general economic, market and political conditions and policies, interest rates, inflation and investment results or other conditions that affect the housing market or the markets for home mortgages or mortgage insurance;
- our ability to successfully execute and implement our capital plans, including our ability to enter into, and receive approval of, reinsurance arrangements on terms and conditions that are acceptable to us and to the GSEs;
- our ability to implement our business strategy, including our ability to write mortgage insurance on high quality low down payment residential mortgage loans, implement successfully and on a timely basis, complex infrastructure, systems, procedures, and internal controls to support our business and regulatory and reporting requirements of the insurance industry;
- our ability to attract and retain a diverse customer base, including the largest mortgage originators;
- failure of risk management or pricing or investment strategies;
- emergence of unexpected claim and coverage issues, including claims exceeding our reserves or amounts we had expected to experience;
-

our ability to utilize our net operating loss carryforwards, which could be limited or eliminated in various ways, including if we experience an ownership change as defined in Section 382 of the Internal Revenue Code;

• failure to maintain, improve and continue to develop necessary information technology systems or the failure of technology providers to perform; and
• ability to recruit, train and retain key personnel.

For more information regarding these risks and uncertainties as well as certain additional risks that we face, you should refer to Part I, Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in this report on Form 10-Q, including the exhibits hereto. In addition, for additional discussion of those risks and uncertainties that have the potential to affect our business, financial condition, results of operations, cash flows or prospects in a material and adverse manner, you should review the Risk Factors in Part I, Item 1A, of our Annual Report on Form 10-K for the year ended December 31, 2015 (2015 10-K), as subsequently updated in other reports we file from time to time with the U.S. Securities and Exchange Commission (SEC).

Unless expressly indicated or the context requires otherwise, the terms "we," "our," "us" and "Company" in this document refer to NMI Holdings, Inc., a Delaware corporation, and its wholly owned subsidiaries on a consolidated basis.

NMI HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Organization and Basis of Presentation

NMI Holdings, Inc. (NMIH) is a Delaware corporation, incorporated in May 2011, to provide private mortgage guaranty insurance (which we refer to as mortgage insurance or MI) through its wholly owned insurance subsidiaries, National Mortgage Insurance Corporation (NMIC) and National Mortgage Reinsurance Inc One (Re One). In April 2012, we completed a private placement of our securities, through which we offered and sold an aggregate of 55,000,000 of our Class A common stock resulting in net proceeds of approximately \$510 million (the Private Placement), and we completed the acquisition of our insurance subsidiaries for \$8.5 million in cash, common stock and warrants, plus the assumption of \$1.3 million in liabilities. In November 2013, we completed an initial public offering of 2.4 million shares of our common stock, and our common stock began trading on the NASDAQ exchange on November 8, 2013, under the symbol "NMIH."

In April 2013, NMIC, our primary insurance subsidiary, issued its first mortgage insurance policy. NMIC is licensed to write mortgage insurance in all 50 states and D.C. In August 2015, NMIH capitalized a wholly owned subsidiary, NMI Services, Inc. (NMIS), through which we offer outsourced loan review services on a limited basis to mortgage loan originators.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements, which include the results of NMIH and its wholly owned subsidiaries, have been prepared in accordance with the instructions to Form 10-Q as prescribed by the SEC for interim reporting and include other information and disclosures required by accounting principles generally accepted in the U.S. (GAAP). Our accounts are maintained in U.S. dollars. These statements should be read in conjunction with our consolidated financial statements and notes thereto for the year ended December 31, 2015 included in our 2015 10-K. All intercompany transactions have been eliminated. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect reported amounts of assets and liabilities, as well as disclosure of contingent assets and liabilities as of the balance sheet date. Estimates also affect the reported amounts of income and expenses for the reporting period. Actual results could differ from those estimates. The results of operations for the interim period may not be indicative of the results that may be expected for the full year ending December 31, 2016.

Deferred Policy Acquisition Costs

Costs directly associated with the successful acquisition of mortgage insurance policies, consisting of certain selling expenses and other policy issuance and underwriting expenses, are initially deferred and reported as deferred policy acquisition costs (DAC). DAC is reviewed periodically to determine that it does not exceed recoverable amounts and is adjusted as appropriate for policy cancellations to be consistent with our revenue recognition policy. We estimate the rate of amortization to reflect actual experience and any changes to persistency or loss development. For each book year of business, these costs are amortized to expense in proportion to estimated gross profits over the estimated life of the policies. Total amortization of DAC for the six months ended June 30, 2016 and 2015 was \$2.2 million and \$0.9 million, respectively.

Premium Deficiency Reserves

We consider whether a premium deficiency exists at each fiscal quarter using best estimate assumptions as of the testing date. Per Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 944, a premium deficiency reserve shall be recognized if the sum of expected claim costs and claim adjustment expenses, expected dividends to policyholders, unamortized acquisition costs and maintenance costs exceeds related unearned premiums and anticipated investment income. We have determined that no premium deficiency reserves were necessary for the six months ended June 30, 2016 or 2015.

Recent Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09, Revenue from Contracts with Customers (Topic 606). This update is intended to provide a consistent approach in recognizing revenue. In accordance with the new standard, recognition of revenue occurs when a customer obtains control of promised goods or services in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those

goods or services. In addition, the new standard requires that reporting companies disclose the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. In August 2015, ASU 2015-14 deferred the provisions of ASU 2014-09 to be effective for interim and annual periods beginning after December 15, 2017. The Company is currently evaluating the impact the adoption of this ASU will have on the consolidated financial statements.

In May 2015, the FASB issued ASU 2015-09, Disclosures about Short-Duration Contracts (Topic 944), which requires insurance entities to disclose additional information related to the liability for unpaid claims and claims adjustment expenses. These

NMI HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

disclosures include the nature, amount, timing and uncertainty of cash flows related to those liabilities and the effects of those cash flows on comprehensive income. This update is effective for annual periods beginning after December 15, 2015 and interim periods within annual periods beginning after December 15, 2016. The Company is currently evaluating the impact the adoption of this ASU will have on the consolidated financial statements.

In August 2014, the FASB issued an update that requires an entity's management to evaluate whether there is substantial doubt about that entity's ability to continue as a going concern and, if so, disclose that fact. An entity's management will also be required to evaluate and disclose whether its plans alleviate that doubt. The guidance is effective for annual periods ending after December 15, 2016 and for interim and annual periods thereafter. We do not expect the adoption of this update to have a material effect on the presentation of our financial statements and notes therein.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842). This update requires that businesses recognize rights and obligations associated with certain leases as assets and liabilities on the balance sheet. The standard also requires additional disclosures regarding the amount, timing, and uncertainty of cash flows arising from leases. For public business entities, this update is effective for annual periods beginning after December 15, 2018, and interim periods therein. Early adoption is permitted in any period. The Company is currently evaluating the impact the adoption of this ASU will have on the consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, Compensation-Stock Compensation (Topic 718). This update is intended to provide improvements to employee share-based payment accounting. The areas for simplification in the update involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. For public business entities, the amendments in this update are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted in any period. The Company is currently evaluating the impact the adoption of this ASU will have on the consolidated financial statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments, which requires companies to measure all expected credit losses for financial assets held at the reporting date. The accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration also is amended in the standard. The standard will take effect for SEC filers for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. The Company is currently evaluating the impact the adoption of this ASU will have on the presentation of the consolidated financial statements and notes therein.

2. Investments

We have designated our investment portfolio as available-for-sale and report it at fair value. The related unrealized gains and losses are, after considering the related tax expense or benefit, recognized as a component of accumulated other comprehensive loss in shareholders' equity. Net realized investment gains and losses are reported in income based upon specific identification of securities sold.

Fair Values and Gross Unrealized Gains and Losses on Investments

	Amortized Cost	Gross Unrealized Gains	Losses	Fair Value
As of June 30, 2016	(In Thousands)			
U.S. Treasury securities and obligations of U.S. government agencies	\$62,725	\$835	\$—	\$63,560

Aging of Unrealized Losses

As of June 30, 2016, the investment portfolio had gross unrealized losses of \$0.6 million, \$0.2 million of which has been in an unrealized loss position for a period of 12 months or greater. We did not consider these securities to be other-than-temporarily impaired as of June 30, 2016. We based our conclusion that these investments were not other-than-temporarily impaired as of June 30, 2016 on the following facts: (i) the unrealized losses were primarily caused by interest rate movements since the purchase date; (ii) we do not intend to sell these investments; and (iii) we do not believe that it is more likely than not that we will be required to sell these investments before recovery of our amortized cost basis, which may not occur until maturity. For those securities in an unrealized loss position, the length of time the securities were in such a position is as follows:

Net Investment Income

For the three and six months ended June 30, 2016, net investment income was comprised of \$3.5 million and \$7.0 million of investment income from fixed maturities and \$0.2 million and \$0.4 million of investment expenses, respectively, compared to \$1.8 million and \$3.5 million of investment income from fixed maturities and \$0.1 million and \$0.2 million of investment expenses for the three and six months ended June 30, 2015, respectively.

As of June 30, 2016 and December 31, 2015, there were approximately \$6.9 million and \$7.0 million, respectively, of cash and investments in the form of U.S. Treasury securities on deposit with various state insurance departments to satisfy regulatory requirements.

Cash, cash equivalents and short-term investments	77,872	—	—	77,872
Total assets	\$143,057	\$ 473,496	\$ —	\$616,553
Warrant liability	—	—	1,467	1,467
Total liabilities	\$—	\$ —	\$ 1,467	\$1,467

The following is a roll-forward of Level 3 liabilities measured at fair value:

	For the six	
	months ended	
	June 30,	
	2016	2015
Warrant Liability	(In Thousands)	
Balance, January 1	\$1,467	\$3,372
Change in fair value of warrant liability included in earnings	(611)	(1,142)
Balance, June 30	\$856	\$2,230

We revalue the warrant liability quarterly using a Black-Scholes option-pricing model, in combination with a binomial model, and we value the pricing protection features within the warrants using a Monte-Carlo simulation model. As of June 30, 2016, the assumptions used in the option-pricing model were as follows: a common stock price as of June 30, 2016 of \$5.48, risk free interest rate of 1.10%, expected life of 5.67 years, expected volatility of 34.4% and a dividend yield of 0%. The change in fair value is primarily attributable to a decline in the price of our common stock from December 31, 2015 to June 30, 2016.

NMI HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

4. Term Loan

On November 10, 2015, we entered into a credit agreement (the Credit Agreement) to obtain a three-year senior secured term loan B (the Term Loan) for \$150 million. The Term Loan bears interest at the Eurodollar Rate, as defined in the Credit Agreement, (1% floor) plus an annual margin rate of 7.5% (an all-in rate of 8.5% from inception through June 30, 2016), payable quarterly. Quarterly principal payments of \$375 thousand are also required. The outstanding balance as of June 30, 2016 was \$148.9 million.

Debt issuance costs totaling \$4.4 million and a 1% debt discount are being amortized to interest expense, using the effective interest method, over the contractual life of the Term Loan. Effective interest rate for the Term Loan includes interest, amortization of issuance cost and the discount. For the six months ended June 30, 2016, the Company recorded \$7.3 million of interest expense, including amortization of the issuance cost and discount.

NMIH is subject to certain quarterly covenants under the Credit Agreement. These covenants include, but are not limited to the following: a maximum debt-to-total capitalization ratio (as defined) of 35%, maximum risk-to-capital (RTC) ratio of 22.0:1.0, liquidity (as defined) of \$32 million as of June 30, 2016, compliance with the PMIERS financial requirements (subject to any GSE-approved waivers), and equity requirements. This description is not intended to be complete in all respects and is qualified in its entirety by the terms of the Credit Agreement, including its covenants and events of default. We were in compliance with all covenants as of June 30, 2016.

Future principal payments for the Company's Term Loan as of June 30, 2016 are as follows:

As of June 30, 2016	Principal (In thousands)
2016	\$ 750
2017	1,500
2018	146,625
Total	\$ 148,875

5. Reserves for Insurance Claims and Claims Expenses

We establish claim reserves to recognize the estimated liability for insurance claims and claim expenses related to defaults on insured mortgage loans. Our method, consistent with industry practice, is to establish claim reserves only for loans that have been reported to us as having been in default for at least 60 days. Our claim reserves also include amounts for estimated claims incurred on loans that have been in default for at least 60 days that have not yet been reported to us by the servicers, often referred to as IBNR. As of June 30, 2016, we have established reserves for insurance claims and claims expenses of \$1.5 million for 79 primary loans in default. We paid 3 claims totaling \$132 thousand during the quarter ended June 30, 2016.

In 2013, we entered into a pool insurance transaction with Fannie Mae. We only establish claim or IBNR reserves for pool risk if we expect claims to exceed the deductible under the pool agreement, which represents the amount of claims absorbed by Fannie Mae before we are obligated to pay any claims. At June 30, 2016, 40 loans in the pool were past due by 60 days or more. These 40 loans represent approximately \$2.6 million in RIF. Due to the size of the remaining deductible of \$10.3 million, the low level of notices of default (NODs) reported through June 30, 2016 and the expected severity (all loans in the pool have loan-to-value ratios (LTVs) under 80%), we have not established any pool reserves for claims or IBNR for the three and six months ended June 30, 2016 and 2015. In connection with settlement of pool claims, we applied \$18 thousand to the pool deductible through June 30, 2016. We have not paid any pool claims to date.

NMI HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The following table provides a reconciliation of the beginning and ending reserve balances for primary insurance claims and claims expenses:

	For the six months ended June 30, 2016	2015 (In Thousands)
Beginning balance	\$679	\$83

Add claims incurred:

Claims and claim expenses incurred:

Current year	1,113	139
Prior years	(185)	(41)
Total claims and claims expenses incurred	928	98

Less claims paid:

Claims and claim expenses paid:

Current year	—	—
Prior years	132	—
Total claims and claim expenses paid	132	—

Balance, June 30	\$1,475	\$181
------------------	---------	-------

There was a \$185 thousand favorable prior year development during the six months ended June 30, 2016 as a result of NOD cures and ongoing analysis of recent loss development trends. We may increase or decrease our original estimates as we learn additional information about individual defaults and claims. There were \$362 thousand of reserves remaining for defaults occurring in prior years as of June 30, 2016 as a result of the aforementioned favorable prior year development and claim payments.

6. Earnings (Loss) per Share (EPS)

Basic earnings (loss) per share is based on the weighted average number of shares of common stock outstanding, while diluted earning (loss) per share is based on the weighted average number of shares of common stock outstanding and common stock equivalents that would be issuable upon the exercise of stock options, other share-based compensation arrangements, and the dilutive effect of outstanding warrants. The following table reconciles the net income and the weighted average shares of common stock outstanding used in the computations of basic and diluted earnings (loss) per share of common stock:

	For the three months ended June 30,		For the six months ended June 30,	
	2016	2015	2016	2015
	(In Thousands, except for per share data)			
Net income (loss)	\$2,011	\$(10,353)	\$(1,896)	\$(18,173)
Basic earnings (loss) per share	\$0.03	\$(0.18)	\$(0.03)	\$(0.31)
Basic weighted average shares outstanding	59,105,688	720,095	59,005,983	38,603,644
Dilutive effect of non-vested shares	725,286	—	—	—
Dilutive weighted average shares outstanding	59,830,888	720,095	59,005,983	38,603,644

Diluted earnings (loss) per share	\$0.03	\$ (0.18	)	\$ (0.03	)	\$ (0.31	)
-----------------------------------	--------	----------	---	----------	---	----------	---

NMI HOLDINGS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

For the three months ended June 30, 2016, 4,049,859 of our common stock equivalents we issued under share-based compensation arrangements and warrants were not included in the calculation of diluted earnings (loss) per share because they were anti-dilutive. Non-vested shares of 725,286 were included in our weighted average number of common shares outstanding for the three months ended June 30, 2016.

As a result of our net losses for the six months ended June 30, 2016 and the three and six months ended June 30, 2015, 6,614,605 and 6,835,296, respectively, of our common stock equivalents we issued under share-based compensation arrangements and warrants were not included in the calculation of diluted earnings (loss) per share as of such dates because they were anti-dilutive.

7. Warrants

We issued 992,000 warrants in connection with our Private Placement. Each warrant gives the holder thereof the right to purchase one share of common stock at an exercise price equal to \$10.00. The warrants were issued with an aggregate fair value of \$5.1 million.

Upon exercise of these warrants, the amounts will be treated as additional paid-in capital. During the first quarter of 2014, 7,790 warrants were exercised, and we issued 1,115 Class A common shares via a cashless exercise. Upon exercise we recognized a gain of approximately \$37 thousand. No warrants were exercised during the six months ended June 30, 2016 and 2015.

We account for these warrants to purchase our common shares in accordance with ASC 470-20, Debt with Conversion and Other Options and ASC 815-40, Derivatives and Hedging - Contracts in Entity's Own Equity.

8. Income Taxes

We are a U.S. taxpayer and are subject to a statutory U.S. federal corporate income tax rate of 35%. Our holding company files a consolidated U.S. federal and various state income tax returns on behalf of itself and its subsidiaries. We currently pay no federal income tax, and we had a federal net operating loss carryforward as of December 31, 2015 of \$139.4 million. Our effective income tax rate on our pre-tax income was 0.0% for the three months ended June 30, 2016, compared to (2.4)% for the comparable 2015 period. Our effective income tax rate on our pre-tax loss was 0.0% for the six months ended June 30, 2016 and 0.0% for the comparable 2015 period. During those periods, the benefits from income taxes were eliminated or reduced by the recognition of a full valuation allowance which was recorded to reflect the amount of the deferred taxes that may not be realized.

9. Statutory Information

Our insurance subsidiaries, NMIC and Re One, file financial statements in conformity with statutory basis accounting principles (SAP) prescribed or permitted by the Wisconsin Office of the Commissioner of Insurance (Wisconsin OCI), NMIC's principal regulator. Prescribed SAP includes state laws, regulations and general administrative rules, as well as a variety of publications of the NAIC. The Wisconsin OCI recognizes only statutory accounting practices prescribed or permitted by the state of Wisconsin for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Wisconsin insurance laws.

NMIC and Re One's combined statutory net loss, statutory surplus, contingency reserve and risk-to-capital (RTC) ratios were as follows:

As of and for the six months and year ended	June 30, 2016	December 31, 2015
	(In Thousands)	
Statutory net loss	\$(21,632)	\$ (52,322)
Statutory surplus	370,167	391,422
Contingency reserve	55,487	32,564
Risk-to-Capital	13.6:1	8.7:1

NMIH is not subject to any limitations on its ability to pay dividends except those generally applicable to corporations that are incorporated in Delaware, such as NMIH. Delaware corporation law provides that dividends are only payable out of a corporation's capital surplus or recent net profits (subject to certain limitations). Since inception, NMIC has not paid any dividends to NMIH. As NMIC had a statutory net loss for the year ended December 31, 2015, NMIC cannot pay any dividends to NMIH through December 31, 2016, without the prior approval of the Wisconsin OCI.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following analysis should be read in conjunction with our unaudited consolidated financial statements and the notes thereto included in this report and our audited financial statements, notes thereto and "Management's Discussion and Analysis of Financial Condition and Results of Operations" included in our 2015 10-K, for a more complete understanding of our financial position and results of operations. In addition, investors should review the "Cautionary Note Regarding Forward-Looking Statements" above and the "Risk Factors" detailed in Part I, Item 1A of our 2015 10-K, as subsequently updated in reports we file with the SEC, for a discussion of those risks and uncertainties that have the potential to affect our business, financial condition, results of operations, cash flows or prospects in a material and adverse manner. Our results of operations for interim periods are not necessarily indicative of results to be expected for a full fiscal year or for any other period.

Overview

We provide MI through our insurance subsidiaries. Our primary insurance subsidiary, NMIC, is a qualified MI provider on loans purchased by Fannie Mae and Freddie Mac and is licensed in all 50 states and D.C. to issue MI. Our reinsurance subsidiary, Re One, solely provides reinsurance to NMIC on certain loans insured by NMIC to meet state statutory coverage limits. Our subsidiary, NMIS, provides outsourced loan review services on a limited basis to mortgage loan originators. Our stock trades on the NASDAQ under the symbol "NMIH."

MI protects mortgage lenders from all or a portion of default-related losses on residential mortgage loans made to home buyers who generally make down payments of less than 20% of a home's purchase price. By protecting lenders and investors from credit losses, we help facilitate the availability of mortgages to prospective, primarily first-time, U.S. home buyers, thus promoting homeownership while protecting lenders and investors against potential losses related to a borrower's default. MI also facilitates the sale of these mortgage loans in the secondary mortgage market, most of which are sold to the GSEs. We are one of seven companies in the U.S. who offer MI. Our business strategy is to continue to gain market share with our principal focus on writing insurance on high quality, low down payment residential mortgages in the U.S. As a result of our continued growth, the Company reported, for the first time, positive net income for the quarter ended June 30, 2016.

We had total insurance-in-force (IIF) of \$27.6 billion and total risk-in-force (RIF) of \$5.8 billion as of June 30, 2016, compared to total IIF of \$19.1 billion and total RIF of \$3.7 billion as of December 31, 2015. Of total IIF as of June 30, 2016, we had \$23.6 billion of primary IIF and \$4.0 billion of pool IIF, compared to \$14.8 billion of primary IIF and \$4.2 billion of pool IIF as of December 31, 2015. As of June 30, 2016, our primary RIF was \$5.7 billion, compared to primary RIF of \$3.6 billion as of December 31, 2015. Pool RIF was \$93.1 million as of June 30, 2016 and December 31, 2015.

We discuss below our results of operations for the periods presented, as well as the conditions and trends that have impacted or are expected to impact our business, including customer development, new business writings, the composition of our insurance portfolio and other factors that we expect to impact our results. Our headquarters are located in Emeryville, California and our website is www.nationalmi.com. Our website and the information contained on or accessible through our website are not incorporated by reference into this report.

Conditions and Trends Impacting Our Business

Customer Development

Our sales and marketing strategy is focused on increasing market share from existing customers and attracting new mortgage originator customers in the U.S. that fall into two primary categories, which we refer to as "National Accounts" and "Regional Accounts." Since we started MI operations in April 2013, we have consistently increased our customer base and market share, and we expect to continue to acquire new customers and increase our market share with existing customers. We had 1061 master policy holders as of June 30, 2016, compared to 842 master policy holders as of June 30, 2015. Of those master policy holders, 518 or 49% were generating new insurance written (NIW) in the second quarter of 2016, compared to 340 or 40% generating NIW in the second quarter of 2015.

New Insurance Written, Insurance in Force and Premiums

NMIC's primary insurance may be written on a flow basis, in which loans are insured in individual, loan-by-loan transactions, or on an aggregated basis, in which each loan in a portfolio of loans is individually insured in a single transaction. NMIC has also written pool insurance under an agreement with Fannie Mae, in which it insured a group

of loans (or pool) in one transaction. NMIC's pool insurance has a stated aggregate loss limit and a deductible under which no losses are paid by NMIC until losses on the pool of loans exceed the deductible. See Item 1, "Financial Statements and Supplementary Data - Notes to Consolidated Financial Statements - Note 5, Reserves for Insurance Claims and Claims Expenses," above.

We set premiums at the time a policy is issued based on our expectations regarding likely performance over the term of coverage. We offer borrower-paid (BPMI) and lender-paid (LPMI) mortgage insurance options. Premium rates are based on the risk characteristics of each insured loan and the capital required to support particular products. Capital charges are governed primarily by the GSEs' private mortgage insurer eligibility requirements (PMIERs), as well as by regulatory and economic capital requirements. See "- GSE Oversight" and "- Capital Position of our Insurance Subsidiaries," below.

We offer monthly, single and annual premium payment plans. For monthly policies, premiums are collected and earned each month as coverage is provided. Policies written on a single premium basis are paid through a single, upfront payment, the majority of which is initially deferred as unearned premium and earned over the policy's expected life. Annual policies represent an insignificant amount of our NIW to date.

The tables below show primary and pool IIF, NIW and premiums written and earned. Single NIW and IIF include policies written on an aggregated and flow basis.

Primary and pool IIF and NIW	As of and for the quarter ended				For the six months ended	
	June 30, 2016		June 30, 2015		June 30, 2016	June 30, 2015
	IIF	NIW	IIF	NIW	NIW	
	(In Millions)				(In Millions)	
Monthly	\$12,529	\$3,700	\$3,617	\$1,460	\$6,192	\$2,378
Single	11,095	2,138	3,573	1,089	3,900	1,866
Primary	23,624	5,838	7,190	2,549	10,092	4,244
Pool	3,999	—	4,476	—	—	—
Total	\$27,623	\$5,838	\$11,666	\$2,549	\$10,092	\$4,244

For the quarter ended June 30, 2016, primary NIW increased 129% over the second quarter of 2015 as a result of continued growth in our customer base and primary flow business. In the second quarter of 2016, monthly premium NIW increased 153% over the second quarter of 2015 due to greater lender demand for our monthly premium MI products and the growth of our insurance business.

Primary and pool premiums written and earned	For the quarter ended	
	June 30, 2016	June 30, 2015
	(In Thousands)	
Net premiums written	\$48,862	\$20,347
Net premiums earned	26,041	8,856

For the quarter ended June 30, 2016, we had net premiums written of \$48.9 million and premiums earned of \$26.0 million, compared to net premiums written of \$20.3 million and premiums earned of \$8.9 million for the quarter ended June 30, 2015. Premiums written and earned are generally influenced by NIW, product mix, pricing and persistency. Additionally, premiums earned are influenced by the amortization of earnings on our single premium product over the policies' expected lives in accordance with the expiration of risk for policies covering more than one year. Pool premiums written and earned for the quarter ended June 30, 2016 were \$1.1 million, compared to pool premiums written and earned of \$1.2 million for the quarter ended June 30, 2015.

In our industry, a "book" is a group of loans that an MI company insures in a particular period, normally a calendar year. In general, the majority of any underwriting profit (i.e., the earned premium revenue minus claims and expenses, excluding investment income) that a book generates occurs in the early years of the book, with the largest portion of the underwriting profit for that book realized in the first year. This pattern generally occurs because relatively few of the claims that a book will ultimately experience typically occur in the first few years of the book, when premium revenue is highest, while subsequent years are affected by declining premium revenues, as the number

of insured loans decreases (primarily due to loan prepayments), and by increasing losses. The earnings we record and the cash flow we receive vary based on the type of MI product (e.g., BPMI or LPMI) and premium plan (e.g., single or monthly) our customers select.

The premium rates for our products have changed substantially in response to the PMIERs financial requirements that became effective January 2016. In 2016, based on these requirements, we introduced new rates for monthly premium policies, which historically have represented 70-75% of industry NIW. To target a mid-teens return on PMIERs required assets, we generally increased rates on low FICO/high LTV loans and reduced rates on high FICO/low LTV loans. See, "- GSE Oversight," below for

a discussion of the PMIERS required asset requirements. Most of the industry has since moved to similar rate cards for monthly premium policies.

Single-premium LPMI, which historically has represented 25-30% of industry NIW, has generally seen greater price competition. In January 2016, in response to the required assets provisions of PMIERS, including the additional capital charges applied to LPMI products, we implemented new LPMI single premium rates, which we expect will improve premium yields on our LPMI single premium policies.

Through 2015, single premium policies had comprised a majority of our NIW, some of which were written at rates below our published rate card. In the first six months of 2016, we have seen reduced volume of LPMI single NIW, as compared with our volume for the last six months of 2015. As a result, during the first six months of 2016, our mix of MI products has shifted to a higher percentage of monthly premium policies. For the six months ended June 30, 2016, 61% of our NIW consisted of monthly premium policies. As our business matures, we expect our product mix to align with industry averages.

Our persistency rate is the percentage of IIF that remains on our books after any 12-month period. Because our insurance premiums are earned over the life of a policy, changes in persistency rates can have a significant impact on our earnings. The persistency rate on our portfolio was 83.3% at June 30, 2016. Persistency rates are sensitive to fluctuations in interest rates. Decreases in interest rates typically increase our portfolio's cancellation rate. When cancellations increase, we experience lower profitability and returns on our monthly premium business, and conversely, higher returns on our single premium business because, rather than amortizing the single premium over the expected life of the policy, upon cancellation, we immediately recognize all unamortized single premium as earned.

Portfolio Statistics

The table below shows primary portfolio trends, by quarter, for the last five quarters.

Primary portfolio trends	As of and for the quarter ended									
	June 30, 2016		March 31, 2016		December 31, 2015		September 30, 2015		June 30, 2015	
	(\$ Values In Millions)

NIW	5,838	2,548	10,092	4,244
Cancellations and other reductions	(778)	(193)	(1,292)	(424)
IIF, end of period	\$23,624	\$7,190	\$23,624	\$7,190

The table below reflects a summary of our primary IIF and RIF by book year as of June 30, 2016 and 2015.

Primary IIF and RIF	As of June 30, 2016		As of June 30, 2015	
	IIF	RIF	IIF	RIF
(In Millions)				
June 30, 2016	\$9,951	\$2,393	\$—	\$—
2015	11,348	2,762	4,191	998
2014	2,266	552	2,916	698
2013	59	14	83	19
Total	\$23,624	\$5,721	\$7,190	\$1,715

We utilize certain risk principles that form the basis of how we underwrite and originate primary NIW. We manage our portfolio credit risk by using several loan eligibility matrices which prescribe the maximum LTV, minimum borrower credit score, maximum loan size, property type, loan type, loan term and occupancy status of loans that we will insure. Our loan eligibility matrices, as well as all of our detailed underwriting guidelines, are contained in our Underwriting Guideline Manual that is publicly available on our website. Our eligibility criteria and underwriting guidelines are designed to mitigate the layered risk inherent in a single insurance policy. "Layered risk" refers to the accumulation of borrower, loan and property risk. For example, we have higher credit score and lower maximum allowed LTV requirements for riskier property types, such as investor properties, compared to owner-occupied properties. We monitor the concentrations of various risk attributes in our insurance portfolio. Generally, insuring loans made to borrowers with higher credit scores tends to result in a lower frequency of claims than with loans made to borrowers with lower credit scores.

The tables below reflect our total primary NIW by FICO, LTV and purchase/refinance mix for the three and six months ended June 30, 2016 and 2015. We calculate the LTV of a loan as the percentage of the original loan amount to the original value of the property securing the loan. In general, the lower the LTV the lower the likelihood of a default, and for loans that default, a lower LTV generally results in lower severity for a resulting claim, as the borrower has more equity in the property.

Total	\$26,127	\$ 23,624		108,853	100,547	79	5					

⁽¹⁾ The ratio of total losses incurred (paid and reserved) divided by cumulative premiums earned.

⁽²⁾ The sum of claims paid ever to date and notices of default as of the end of the period divided by policies ever in force.

Geographic Dispersion

The following table shows the distribution by state of our primary RIF. As of June 30, 2016, our RIF continues to be relatively more concentrated in California, primarily as a result of the location and timing of the acquisition of new customers. The distribution of risk across the states as of June 30, 2016 is not necessarily representative of the geographic distribution we expect in the future. As we add new customers and receive greater allocations of business from our existing customers, we expect we will have increased flexibility to manage our state concentration levels.

Top 10 primary RIF by state as of June 30, 2016		As of	
		June 30, 2016	June 30, 2015
California		13.0%	13.6%
Texas		6.8	7.4
Virginia		6.4	5.3
Florida		5.0	4.8
Colorado		4.1	4.2
Michigan		4.1	3.6
Arizona		3.8	3.7
Pennsylvania		3.5	3.3
Maryland		3.4	3.5
North Carolina		3.4	2.1
Total		53.5%	51.5%

Reserve for Insurance Claims and Claims Expenses

Claims incurred is the expense that is booked within a particular period to reflect actual and estimated claim payments that we believe will ultimately be made as a result of insured loans that are in default. We do not recognize an estimate of claim expense for loans that are not in default. As of June 30, 2016, we have established reserves for insurance claims of \$1.5 million for 79 primary loans in default, compared to a reserve of \$181 thousand for 9 primary loans in default as of June 30, 2015. We also establish reserves for the related claims expenses, which are the estimated costs to adjust and settle claims. We have not established any pool reserves for claims or IBNR to date. For additional

discussion of our reserves, see, Item 1, "Financial Statements and Supplementary Data - Notes to Condensed Consolidated Financial Statements - Note 5. Reserves for Insurance Claims and Claims Expenses."

Claims incurred is affected by a variety of factors, including the state of the economy, declines in housing values, product mix of IIF, the size of loans insured and the percentage of coverage on insured loans. Policies with higher loan amounts and coverage percentages tend to result in higher incurred claim amounts.

We expect that claims incurred will be relatively low in the foreseeable future for the following reasons:

- the typical distribution of claims over the life of a book results in fewer defaults during the first two years after loans are originated, usually peaking in years three through six and declining thereafter;

- under the pool insurance agreement between NMIC and Fannie Mae, NMIC is responsible for claims only to the extent they exceed a deductible; and

- low NIW in our early years of operations.

Until our portfolio matures, we expect our reported loss ratio will be less than 10%, due to loss development being generally insignificant in the early years of a loan cycle combined with strong growth in earned premiums on a year-over-year basis. We expect that the frequency of claims on our initial primary books of business should be between 2% and 3% of mortgages insured over the life of the book. For claims that we may receive, we expect the severity of the claim to be between 85% and 95% of the coverage amount. Based on these expectations, we estimate that the loss ratio over the life of each book will be between 20% and 25% of earned premiums.

We developed our estimates of the expected frequency and severity of claims based on statutory filings by many of our competitors, which contain historical book year performance, as well as an industry dataset which consists of nearly 150 million mortgages and 80 data fields per mortgage, gathered over the past 17 years. As state-regulated entities, mortgage insurers are required to file actuarial justifications for premium rate changes in many states, many of which are publicly available and include historical information on claim frequency and severity. Historical performance data from similar underwriting, house price, and interest rate periods were compared to today to determine a range of expected performance. To date, our loss experience is developing at a slower pace than historical trends have shown, as a result of high quality underwriting and a favorable housing market.

The following table provides a reconciliation of the beginning and ending reserve balances for primary insurance claims and claims expenses.

	For the three months ended June 30, 2016		For the six months ended June 30, 2016	
	2015		2015	
	(In Thousands)			
Beginning balance	\$1,137	\$187	\$679	\$83
Add claims incurred:				
Claims and claim expenses incurred:				
Current year	560	59	1,113	139
Prior years	(90)	(65)	(185)	(41)
Total claims and claims expenses incurred	470	(6)	928	98
Less claims paid:				
Claims and claim expenses paid:				
Current year	—	—	—	—
Prior years	132	—	132	—
Total claims and claim expenses paid	132	—	132	—
Balance, June 30	\$1,475	\$181	\$1,475	\$181

The following table provides a reconciliation of the beginning and ending count of loans in default.

	Three months ended		Six months ended	
	June 30, 2016	June 30, 2015	June 30, 2016	June 30, 2015
Beginning default inventory	55	6	36	4
Plus: new defaults	50	5	89	10
Less: cures	(23)	(2)	(43)	(5)
Less: claims paid	(3)	—	(3)	—
Ending default inventory	79	9	79	9

The increase in the number of defaults at June 30, 2016 compared to June 30, 2015 was primarily due to an increase in the number of policies in force and the increasing maturity of our portfolio.

The following table provides details of our claims paid for the three and six months ended June 30, 2016 and June 30, 2015.

	Three months ended		Six months ended	
	June 30, 2016	June 30, 2015	June 30, 2016	June 30, 2015
(\$ Values In Thousands)				
Number of claims paid	3	—	3	—
Total amount paid for claims	\$ 132	\$ —	\$ 132	\$ —
Average amount paid per claim	\$ 44	\$ —	\$ 44	\$ —
Severity ⁽¹⁾	71 %	— %	71 %	— %

⁽¹⁾Severity represents the total amount of claims paid divided by the related RIF on the loans.

The increase in the number of claims paid for the three and six months ended June 30, 2016 compared to the same periods ended June 30, 2015 was primarily due to an increase in the number of NODs outstanding as well as the increasing age of the delinquencies.

	As of June 30, 2016	As of June 30, 2015
Average reserve per default:		
	(In Thousands)	
Case ⁽¹⁾	\$ 17	\$ 19
IBNR	1	1
Total	\$ 18	\$ 20

⁽¹⁾Defined as the reserve per insured loan in default.

GSE Oversight

The GSEs are the principal purchasers of mortgages insured by MI companies. As a result, the practices of the private MI industry in the U.S. are driven in large part by the requirements and practices of the GSEs.

On December 31, 2015, the GSEs' final updated PMIERS went into effect for existing, GSE-approved private mortgage insurers, i.e., Approved Insurers. (Italicized terms have the same meaning that such terms have in the PMIERS, as described below.) The PMIERS establish operational, business, remedial and financial requirements applicable to Approved Insurers. The new financial requirements prescribe a risk-based capital methodology whereby the amount of capital required to be held against each insured loan is determined based on certain risk characteristics,

such as FICO, vintage (year of origination), performing vs. non-performing (i.e., current vs. delinquent), LTV and other risk features. An asset charge is calculated for each insured loan based on its risk profile. In general, higher quality loans carry lower capital charges.

Under the PMIERS financial requirements, Approved Insurers must maintain available assets that equal or exceed minimum required assets, which is an amount equal to the greater of (i) \$400 million or (ii) a total risk-based required asset amount. The risk-based required asset amount is a function of the risk profile of an Approved Insurer's net RIF, calculated by applying on a loan-by-loan basis certain risk-based factors derived from tables set out in the PMIERS to the net RIF. The risk-based required asset amount for primary insurance is subject to a floor of 5.6% of total, performing, primary RIF, and the risk-based required asset

amount for pool insurance considers both the factors in the tables and the net remaining stop loss for each pool insurance policy. The PMIERS financial requirements also increase the amount of available assets that must be held by an Approved Insurer for loans originated on or after January 1, 2016 that are insured under LPMI policies not subject to automatic termination under the Home Owners Protection Act of 1998.

Beginning in 2016, by April 15th of each year, NMIC must certify it met all PMIERS requirements as of December 31st of the prior year. We certified to the GSEs that NMIC fully complies with the PMIERS as of December 31, 2015. NMIC also has an ongoing obligation to immediately notify the GSEs in writing upon discovery of its failure to meet one or more of the PMIERS requirements. We will continue to monitor our compliance with the PMIERS going forward.

The following table provides a trended comparison of the PMIERS financial requirements as reported by NMIC.

	As of		
	June 30, 2016	March 31, 2016	December 31, 2015
	(In thousands)		
Available Assets	\$432,074	\$434,138	\$431,411
Risk-Based Required Assets	377,468	302,852	249,805

Asset charge % ⁽¹⁾	6.10	% 6.12	% 6.17	%
-------------------------------	------	--------	--------	---

⁽¹⁾Asset charge represents the risk based required asset amount divided by the outstanding RIF on performing primary loans.

Capital Position of Our Insurance Subsidiaries and Financial Strength Ratings

In addition to GSE-imposed capital requirements, NMIC is also subject to state regulatory minimum capital requirements based on its insured RIF. While formulations of this minimum capital may vary in each jurisdiction, the most common measure allows for a maximum permitted RTC ratio of 25:1.

As of June 30, 2016, NMIC's primary gross RIF was approximately \$5.7 billion, representing insurance on a total of 100,547 policies in force, and pool RIF was approximately \$93.1 million, representing insurance on a total of 18,148 loans. Based on NMIC's total statutory surplus of \$395.7 million as of June 30, 2016, NMIC's RTC ratio was 13.2:1. Re One had total statutory capital of \$29.9 million as of June 30, 2016, with a RTC ratio of 19:1. We plan to contribute capital as needed to maintain compliance with state capital requirements.

In July 2015, Standard & Poor's (S&P) Ratings Services assigned its "BBB-" financial strength and long-term counter-party credit ratings for NMIC. At the same time, S&P assigned its "BB-" long-term counter-party credit rating to NMIH. S&P's outlook for both companies is "stable." In November 2015, Moody's Investors Service (Moody's) assigned a financial strength rating of "Ba2" for NMIC. Also at that time, Moody's assigned a B2 rating to the \$150 million Term Loan held by NMIH. Moody's outlook for both companies is "stable."

Competition

The MI industry is highly competitive and currently consists of seven private mortgage insurers, including NMIC, as well as governmental agencies like the FHA and the VA.

Private MI

MI companies compete based on service, customer relationships, underwriting, and other factors including price. In the recent past, lenders have pressured MIs to offer discounted rates, primarily on single premium LPMI. Higher capital requirements imposed by the PMIERS have also had an effect on premium rates. We expect the MI market to remain highly competitive, with pressure for industry participants to grow or maintain their market share in the coming years. Our competitors' respective shares of the private MI market for the quarter ended March 31, 2016 ranged from single percentage points penetration to a high of approximately 20%.

Competition with FHA

Although there has been broad policy consensus toward the need for private capital to play a larger role and government credit risk to be reduced in the U.S. housing finance system, recent action by the current administration has made it difficult to predict whether the market share of governmental agencies such as the FHA and VA will recede to historical levels. In 2015, the FHA reduced some of its single-family annual mortgage insurance premiums. To date, the impact from the FHA's premium reduction has not had a significant impact on our continued growth in the market. We believe our pricing continues to be more attractive than the FHA's pricing for a substantial majority of borrowers with credit and loan characteristics similar to those whose loans we insure. It is difficult to predict whether the FHA will further reduce its premium rates in the future, and if it does, we do not believe that any such reductions would have a material impact on our business. There are factors beyond premium rate that influence a lender's decision to choose private MI over FHA insurance, including among others, the FHA's loan eligibility requirements, loan size limits and the relative ease of use of private MI products compared to FHA products.

(Loss) gain from change in fair value of warrant liability	(59)	(106)	611	1,142
Interest expense	(3,707)	—	(7,339)	—
Income (loss) before income taxes	2,011	(10,112)	(1,896)	(18,173)
Income tax expense	—	241	—	—
Net income (loss)	\$2,011	\$(10,353)	\$(1,896)	\$(18,173)
Loss ratio ⁽¹⁾	2	% —	% 2	% 1
Expense ratio ⁽²⁾	89	% 236	% 100	% 249
Combined ratio	91	% 236	% 102	% 249

⁽¹⁾ Loss ratio is calculated by dividing the provision for insurance claims and claims expenses by net premiums earned.

⁽²⁾ Expense ratio is calculated by dividing other underwriting and operating expenses by net premiums earned.

Revenues

For the three months ended June 30, 2016, we had net premiums written of \$48.9 million and premiums earned of \$26.0 million, compared to net premiums written of \$20.3 million and premiums earned of \$8.9 million for the three months ended June 30, 2015. For the six months ended June 30, 2016, we had net premiums written of \$87.0 million and premiums earned of \$45.8 million, compared to net premiums written of \$33.3 million and premiums earned of \$15.8 million for the six months ended June 30, 2015. The principal drivers of the increases in premiums written and earned for the periods presented were the continued growth of our NIW and IIF, primarily related to our monthly products, and the significant development of our customer base, including higher allocations of business to us from existing customers. Additionally, we had \$5.8 million of earned premiums in the six months ended June 30, 2016 related to cancellations of single premium policies, compared to \$1.4 million for the six months ended June 30, 2015. We believe we will continue to experience higher than expected earnings from cancellations of single premium policies if interest rates remain low and expect single premium policy cancellations to decrease if interest rates rise. Net investment income was higher for the three and six months ended June 30, 2016 compared to the three and six months ended June 30, 2015, as a result of an increase in the size of our consolidated securities portfolio. We realized a loss on investments of \$0.8 million for the six months ended June 30, 2016, compared to a gain of \$1.0 million for the six months ended June 30, 2015.

Expenses

Our expenses have historically been related to business development and operating activities. Although we expect our year-over-year expenses to increase as we continue to grow our business, we ultimately expect that the majority of our operating expenses will be relatively fixed in the long term. Until our business matures, our expense ratio is expected to be significantly higher than the industry given the low levels of premium written compared to our "fixed" costs customary to operating a mortgage insurance company. We expect to see a continued decrease in our expense ratio as our business matures.

Insurance claims and claims expenses increased for the three and six months ended June 30, 2016 compared to the three and six months ended June 30, 2015, as a result of an increase in our NODs, primarily due to an increase in the number of policies in force year-over-year.

Employee compensation represents the majority of our operating expense, which includes both cash and share-based compensation. Our underwriting and operating expenses grew primarily as the result of hiring new employees and expanding our operations and sales activities. Our headcount grew from 209 as of June 30, 2015 to 263 as of June 30, 2016. Underwriting and operating expenses also include costs related to policy acquisition, technology, professional services and facilities.

We incurred interest expense of \$7.3 million for the six months ended June 30, 2016 related to the Term Loan entered into during the fourth quarter of 2015.

We recognized \$241 thousand of income tax expense for the quarter ended June 30, 2015.

Net Income

We recognized net income of \$2.0 million for the three months ended June 30, 2016 compared to a net loss of \$10.4 million for the three months ended June 30, 2015. The primary driver of the profitable quarter ended June 30, 2016, compared to the quarter ended June 30, 2015, was the significant increase in premiums earned from our IIF as a result of the addition of new customers and higher allocations of business to us from existing customers, slightly offset by the continued hiring of management and staff personnel and external and professional costs.

Consolidated balance sheets	June 30, December	
	2016	31, 2015
	(In Thousands)	
Total investment portfolio	\$607,318	\$559,235
Cash and cash equivalents	46,827	57,317
Deferred policy acquisition costs, net	25,128	17,530
Software and equipment, net	19,690	15,201
Other assets	17,465	13,168
Total assets	\$716,428	\$662,451
Term loan	\$144,107	\$143,939
Unearned premiums	131,916	90,773
Accounts payable and accrued expenses	15,502	22,725
Reserve for insurance claims and claims expenses	1,475	679
Warrant liability	856	1,467
Deferred tax liability	137	137
Total liabilities	293,993	259,720
Total shareholders' equity	422,435	402,731
Total liabilities and shareholders' equity	\$716,428	\$662,451

As of June 30, 2016, we had approximately \$654.1 million in cash and investments, including \$78.3 million held at NMIH. The increase in cash and investments from year-end 2015 is the result of premiums collected in the first half of 2016.

Our deferred policy acquisition costs asset was \$25.1 million as of June 30, 2016, compared to \$17.5 million at December 31, 2015. The increase was driven by the deferrable costs associated with premiums written during the six months ended June 30, 2016 of \$87.0 million.

Our other assets balance increased from \$13.2 million as of December 31, 2015 to \$17.5 million as of June 30, 2016, primarily as a result of the increase in our premiums receivable balance related to the growth in IIF of our monthly policies.

Our unearned premiums balance increased to \$131.9 million as of June 30, 2016 from \$90.8 million as of December 31, 2015 due to single premiums written in the quarter ended June 30, 2016, offset by cancellations of lender paid single premium policies and earnings of existing unearned premiums in accordance with the expiration of risk in the related policies.

Our accounts payable and accrued expenses decreased to \$15.5 million as of June 30, 2016, from \$22.7 million at December 31, 2015. The decrease reflects the payment of accrued liabilities at year-end, offset by accruals for liabilities related to increased headcount, accrued premium taxes and IT costs.

The following table summarizes our consolidated cash flows from operating, investing and financing activities:

Consolidated cash flows	For the six months ended June 30,	
	2016	2015
Net cash provided by (used in):	(In Thousands)	
Operating activities	\$27,562	\$(1,367)
Investing activities	(37,142)	(36,675)
Financing activities	(910)	(678)
Net decrease in cash and cash equivalents	\$(10,490)	\$(38,720)

Net cash provided by operating activities was \$27.6 million for the six months ended June 30, 2016, compared to net cash used in operating activities in the same period in 2015 of \$1.4 million. Positive cash flow from operating activities for the six months ended June 30, 2016 compared to cash used in operating activities for the same period ended June 30, 2015 was the result of an increase in premiums written, partially offset by increased personnel costs. Cash used in investing activities for the six months ended June 30, 2016 and June 30, 2015 was due to portfolio re-balancing in the first quarters of 2015 and 2016.

Cash used in financing activities for the six months ended June 30, 2016 consisted of taxes paid related to net share settlement of equity awards and payments of principal on the Term Loan. Cash used in financing activities for the six months ended June 30, 2015 consisted primarily of taxes paid related to the net share settlement of equity awards offset by the proceeds from the issuance of common stock.

Holding Company Liquidity and Capital Resources

NMIH serves as the holding company for our insurance subsidiaries and does not have any significant operations of its own. NMIH's principal liquidity demands include funds for: (i) payment of certain corporate expenses and reimbursable expenses of its insurance subsidiaries; (ii) capital support for its subsidiaries; (iii) potential tax payments to the Internal Revenue Service (IRS); (iv) the payment of principal and interest related to the Term Loan; and (v) the payment of dividends, if any, on its common stock. NMIH is not subject to any limitations on its ability to pay dividends except those generally applicable to corporations, such as NMIH, that are incorporated in Delaware. Delaware corporation law provides that dividends are only payable out of a corporation's capital surplus or (subject to certain limitations) recent net profits. As of June 30, 2016, NMIH's shareholders' equity was approximately \$422 million.

As of June 30, 2016, NMIH had \$78 million of cash and investments. NMIH's principal source of operating cash is investment income and could include future dividends from NMIC, if available and permitted under law and by the GSEs.

NMIH's future capital requirements depend on many factors, including NMIC's ability to successfully write new business, establish premium rates at levels sufficient to cover claims and operating costs and meet minimum required asset thresholds under the PMIERS and state capital requirements. We expect NMIH may make additional capital contributions to its insurance subsidiaries to support their applicable capital adequacy requirements from time-to-time. In order to continue to grow our business and to manage our minimum required assets under PMIERS, we entered into a quota share reinsurance agreement with a panel of third-party reinsurance providers (Reinsurance Agreement). Effective September 1, 2016, the Reinsurance Agreement covers the following components of our portfolio, subject to

certain limitations and conditions:

- Approximately 25% of existing policies written as of August 31, 2016;

31

▲ Approximately 100% of our pool agreement with Fannie Mae; and

▲ Approximately 25% of policies written from September 1, 2016 through December 31, 2017.

NMIC will receive a 20% ceding commission for ceded premiums related to this transaction, as well as a profit commission, provided that the loss ratio on the loans covered under the Reinsurance Agreement generally remains below 60%. For risk ceded under the Reinsurance Agreement, the implied after-tax cost of capital is expected to be approximately 3%.

We expect to receive full capital credit under PMIERS for the risk ceded under the Reinsurance Agreement. With coverage on our future policies written from September 1, 2016 through December 31, 2017, we expect to have capacity to scale up to approximately \$50 billion of IIF. Wisconsin OCI has approved the Reinsurance Agreement; however, it remains subject to approval by each of the GSEs, which we expect to receive shortly. We can provide no assurance that the GSEs will give us full capital credit under PMIERS for the risk ceded under the Reinsurance Agreement. If the GSEs do not grant full credit, we would likely need to seek other sources of capital sooner than we would have expected with full capital credit under PMIERS. Future sources of capital will depend on the cost, availability and terms and conditions that are acceptable to us, our regulators and the GSEs.

NMIH has entered into expense-sharing agreements with its insurance subsidiaries which have been approved by the Wisconsin OCI, but such approval may be changed or revoked at any time. NMIC's ability to pay dividends to NMIH is subject to insurance regulations requiring insurance department approval. In general, dividends in excess of prescribed limits are deemed "extraordinary" and require insurance regulatory approval. Since inception, NMIC has not paid any dividends to NMIH. As NMIC had a statutory net loss for the year ended December 31, 2015, NMIC cannot pay any dividends to NMIH through December 31, 2016 without the prior approval of the Wisconsin OCI. Certain other states in which NMIC is licensed also have statutes or regulations that restrict its ability to pay dividends.

Our MI companies' principal operating sources of liquidity are premiums that we receive from policies and income generated by our investment portfolio. Our MI companies' primary liquidity needs include the payment of claims on our MI policies, operating expenses, investment expenses and other costs of our business. We anticipate that as our IIF grows, the premium revenue we receive will increase. We expect to manage our fixed operating expenses so that they grow at a slower rate than NIW over the coming years.

In the fourth quarter of 2015, NMIH entered into the Credit Agreement for the Term Loan to support the continued growth of its IIF. The Credit Agreement contains various restrictive covenants and required financial ratios and tests that we are required to meet or maintain. These covenants include, but are not limited to the following: a maximum debt-to-total capitalization ratio (as defined) of 35%, maximum RTC ratio of 22.0:1.0, liquidity (as defined) of \$32 million as of June 30, 2016, compliance with PMIERS financial requirements (subject to any GSE-approved waivers), and equity requirements. The Term Loan bears interest at the Eurodollar Rate (1%) plus an annual margin rate of 7.5% (an all-in rate of 8.5% from inception through June 30, 2016), payable quarterly. The Company recorded \$7.3 million of interest expense for the six months ended June 30, 2016. The Term Loan matures on November 10, 2018.

Consolidated Investment Portfolio

Our net investment income for the six months ended June 30, 2016 was \$6.6 million, compared to \$3.3 million for the six months ended June 30, 2015. As of June 30, 2016, our portfolio conforms with our investment guidelines. The principal factors affecting our investment income include the size and credit rating of our portfolio and its net yield. As measured by amortized cost (which excludes changes in fair market value, such as those resulting from changes in interest rates), the size of our investment portfolio is mainly a function of capital raised, cash generated from operations, such as net premiums received, and investment earnings.

The pre-tax book yield on our portfolio as of June 30, 2016 was 2.0%, excluding unrealized gains and losses. The book yield is calculated on our year-to-date net investment income over our average portfolio book value as of June 30, 2016. We believe that the yield on our investment portfolio likely will change over time based on potential changes to the interest rate environment, the duration or mix of our investment portfolio or other factors.

The sectors of our investment portfolio, including cash and cash equivalents appear in the table below:

Percentage of portfolio's fair value	June 30, 2016	December 31, 2015
1. Corporate debt securities	53 %	56 %
2. U.S. treasury securities and obligations of U.S. government agencies	10	14
3. Asset-backed securities	18	17
4. Cash, cash equivalents, and short-term investments	14	10
5. Municipal debt securities	5	3
Total	100 %	100 %

The ratings of our investment portfolio were:

Investment portfolio ratings	June 30, 2016	December 31, 2015
AAA	24 %	25 %
AA	14	11
A	48	51
BBB	14	13
Total	100 %	100 %

The ratings above are provided by one or more of: Moody's, S&P and Fitch Ratings. If three ratings are available, we assign the middle rating for classification purposes, otherwise we assign the lowest rating.

Taxes

We are a U.S. taxpayer and are subject to a statutory U.S. federal corporate income tax rate of 35%. Our holding company files a consolidated U.S. federal and various state income tax returns on behalf of itself and its subsidiaries. We currently pay no federal income tax, and had a federal net operating loss carryforward as of December 31, 2015 of \$139.4 million. Our effective income tax rate on our pre-tax income was 0.0% for the three months ended June 30, 2016 and (2.4)% for the comparable 2015 period. Our effective income tax rate on our pre-tax loss was 0.0% for the six months ended June 30, 2016 and 0.0% for the comparable 2015 period.

Our financial statements reflect a valuation allowance with respect to our net deferred tax assets. We evaluate the realizability of our net deferred tax assets based on all available evidence, both positive and negative. The realization of net deferred tax assets is dependent on the Company's ability to generate sufficient future taxable income during periods prior to the expiration of tax attributes.

We recorded our first profitable quarter for the three months ended June 30, 2016. However, given the cumulative loss in recent years, we currently believe there is not yet sufficient positive evidence to change our judgment regarding the need for a full valuation allowance. The continued trend in operating results and approaching cumulative profit over three years would provide additional positive evidence in determining the need for the valuation allowance and could lead to the reversal of substantially all of the valuation allowance on our deferred tax assets. If we conclude there is sufficient positive evidence to release the valuation allowance associated primarily with the carry forward of federal net operating losses and future tax deductions from share-based compensation, we would recognize a material increase to net income in the period such conclusion is made.

Other Items

Off-Balance Sheet Arrangements and Contractual Obligations

We had no off-balance sheet arrangements as of June 30, 2016. There are no material changes outside the ordinary course of business in the contractual obligations specified in our 2015 10-K.

Critical Accounting Estimates

We use accounting principles and methods that conform to GAAP. Where GAAP specifically excludes mortgage insurance we follow general industry practices. We are required to apply significant judgment and make material estimates in the preparation of our financial statements and with regard to various accounting, reporting and disclosure matters. Assumptions and estimates are required to apply these principles where actual measurement is not possible or practical. On an ongoing basis, we evaluate our estimates and assumptions. Our actual results may differ from these estimates under different assumptions or conditions.

We believe that the assumptions and estimates associated with revenue recognition, fair value measurements, our investment portfolio, deferred policy acquisition costs, premium deficiency reserves, income taxes, reserves for insurance claims and claims expenses, warrants and share-based compensation have the greatest potential impact on our consolidated financial statements. Therefore, we consider these to be our critical accounting estimates. There have been no material changes to our critical accounting policies and estimates as compared to the critical accounting policies and estimates described in our 2015 10-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We own and manage a large portfolio of various holdings, types and maturities. NMIH's principal source of operating cash is investment income. The assets within the investment portfolio are exposed to the same factors that affect overall financial market performance.

We manage market risk via a defined investment policy implemented by our treasury function with oversight from our Board of Director's Risk Committee. Important drivers of our market risk exposure monitored and managed by us include but are not limited to:

Changes to the level of interest rates. Increasing interest rates may reduce the value of certain fixed-rate bonds held in the investment portfolio. Higher rates may cause variable rate assets to generate additional income. Decreasing rates will have the reverse impact. Significant changes in interest rates can also affect persistency and claim rates of our insurance portfolio, and as a result we may determine that our investment portfolio needs to be restructured to better align it with future liabilities and claim payments. Such restructuring may cause investments to be liquidated when market conditions are adverse. Additionally, the changes in Eurodollar based interest rates affect the interest expense related to the Company's debt.

Changes to the term structure of interest rates. Rising or falling rates typically change by different amounts along the yield curve. These changes may have unforeseen impacts on the value of certain assets.

Market volatility/changes in the real or perceived credit quality of investments. Deterioration in the quality of investments, identified through changes to our own or third party (e.g., rating agency) assessments, will reduce the value and potentially the liquidity of investments.

Concentration Risk. If the investment portfolio is highly concentrated in one asset, or in multiple assets whose values are highly correlated, the value of the total portfolio may be greatly affected by the change in value of just one asset or a group of highly correlated assets.

Prepayment Risk. Bonds may have call provisions that permit debtors to repay prior to maturity when it is to their advantage. This typically occurs when rates fall below the interest rate of the debt.

The carrying value of our investment portfolio as of June 30, 2016 and December 31, 2015 was \$607 million and \$559 million, respectively, of which 100% was invested in fixed maturity securities. The primary market risk to our investment portfolio is interest rate risk associated with investments in fixed maturity securities. We mitigate the market risk associated with our fixed maturity securities portfolio by matching the duration of our fixed maturity securities with the expected duration of the liabilities that those securities are intended to support.

As of June 30, 2016, the duration of our fixed income portfolio, including cash and cash equivalents, was 3.85 years, which means that an instantaneous parallel shift (movement up or down) in the yield curve of 100 basis points would result in a change of 3.85% in fair value of our fixed income portfolio. Excluding cash, our fixed income portfolio duration was 4.28 years, which means that an instantaneous parallel shift (movement up or down) in the yield curve of 100 basis points would result in a change of 4.28% in fair value of our fixed income portfolio.

We are also subject to market risk related to our Term Loan. As discussed in Item 1, "Financial Statements and Supplementary Data - Notes to Consolidated Financial Statements - Note 4, Term Loan," the Term Loan bears interest at a variable rate and, as a result, increases in market interest rates would generally result in increased interest expense on our outstanding principal.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) as of June 30, 2016, pursuant to Rule 13a-15(e) under the Exchange Act. Management applied its judgment in assessing the costs and benefits of such controls and procedures, which by their nature, can provide only reasonable assurance regarding management's control objectives. Management does not expect that our disclosure controls and procedures will prevent or detect all errors and fraud. A control system, irrespective of how well it is designed and operated, can only provide reasonable assurance and cannot guarantee that it will succeed in its stated objectives.

Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2016, our disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms.

Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II

Item 1. Legal Proceedings

Certain lawsuits and claims arising in the ordinary course of business may be filed or pending against us or our affiliates from time to time. In accordance with applicable accounting guidance, we establish accruals for all lawsuits, claims and expected settlements when we believe it is probable that a loss has been incurred and the amount of the loss is reasonably estimable. When a loss contingency is not both probable and estimable, we do not establish an accrual. Any such loss estimates are inherently uncertain, based on currently available information and are subject to management's judgment and various assumptions. Due to the inherent subjectivity of these estimates and unpredictability of outcomes of legal proceedings, any amounts accrued may not represent the ultimate resolution of such matters.

To the extent we believe any potential loss relating to such lawsuits and claims may have a material impact on our liquidity, consolidated financial position, results of operations, and/or our business as a whole and is reasonably possible but not probable, we disclose information relating to any such potential loss, whether in excess of any established accruals or where there is no established accrual. We also disclose information relating to any material potential loss that is probable but not reasonably estimable. Where reasonably practicable, we will provide an estimate of loss or range of potential loss. No disclosures are generally made for any loss contingencies that are deemed to be remote.

Based upon information available to us and our review of lawsuits and claims filed or pending against us to date, we have not recognized a material accrual liability for these matters, nor do we currently expect it is reasonably possible that these matters will result in a material liability to the Company. However, the outcome of litigation and other legal and regulatory matters is inherently uncertain, and it is possible that one or more of such matters currently pending or threatened could have an unanticipated material adverse effect on our liquidity, consolidated financial position, results of operations, and/or our business as a whole, in the future.

Item 1A. Risk Factors

Risk factors that affect our business and financial results are discussed in Part I, Item 1A of our 2015 10-K. You should carefully consider the risks and uncertainties described herein and in the above referenced filing, which have the potential to affect our business, financial condition, results of operations, cash flows or prospects in a material and adverse manner. The risks described herein and in the above referenced filing are not the only risks we face, as there are additional risks and uncertainties not currently known to us or that we currently deem to be immaterial which may in the future adversely affect our business, financial condition and/or operating results. As of the date of this report, we are not aware of any material changes in the risk factors set forth in our 2015 10-K.

Item 6. Exhibits

An index to exhibits has been filed as part of this report and is incorporated herein by reference.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
