UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D. C. 20549

Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended September 30, 2018

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission File Number: 001-31240

NEWMONT MINING CORPORATION

(Exact name of registrant as specified in its charter)

Delaware (State or Other Jurisdiction of Incorporation or Organization)	84-1611629 (I.R.S. Employer Identification No.)
6363 South Fiddler's Green Circle Greenwood Village, Colorado (Address of Principal Executive Offices)	80111 (Zip Code)

Registrant's telephone number, including area code (303) 863-7414

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12-b2 of the Exchange Act.

Large accelerated filer	Accelerated filer
Non-accelerated filer	Smaller reporting company
	Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12-b2 of the Exchange Act). Yes No

There were 532,660,228 shares of common stock outstanding on October 18, 2018.

Table of Contents

Third Quarter 2018 Highlights

- Net income (loss): Delivered Net income (loss) from continuing operations attributable to Newmont stockholders of \$(161) or \$(0.31) per diluted share, a decrease of \$374 from the prior-year quarter, primarily due to the impairment of exploration and long-lived assets in North America and lower metal prices, partially offset by lower income tax expense.
- Adjusted net income (loss): Delivered Adjusted net income (loss) of \$175 or \$0.33 per diluted share, a 3% decrease from the prior-year quarter (See “Non-GAAP Financial Measures” beginning on page 70).
- Adjusted EBITDA: Generated \$636 in Adjusted EBITDA, a 3% decrease from the prior-year quarter (See “Non-GAAP Financial Measures” beginning on page 70).
- Cash Flow: Reported Net cash provided by (used in) operating activities of continuing operations of \$1,095 for the nine months ended September 30, 2018, a 21% decrease from the prior year, and free cash flow of \$332 (See “Non-GAAP Financial Measures” beginning on page 70).
- Portfolio improvements: Completed the CC&V concentrates project in North America; commissioned the primary crusher at Merian in South America; advanced the Tanami Expansion 2 project to definitive feasibility study in Australia; formed a strategic partnership with Evrim Resources in the Cuale gold project in Mexico; expanded regional exploration activities with an investment in Orosur Mining and an opportunity to participate in Miranda Gold’s Lyra project in Colombia.
- Attributable gold production: Decreased 4.0% to 1.29 million ounces of gold, primarily due to lower mill throughput at Carlin, lower leach production at CC&V, and lower grades at Kalgoorlie. These impacts were partially offset by higher grades at Ahafo, Yanacocha and Tanami.
 - Financial strength: Ended the quarter with \$3.1 billion cash on hand and net debt of \$1.1 billion; an industry-leading balance sheet with investment-grade credit profile; and a quarterly dividend declared of \$0.14 per share, an increase of 87% over the prior-year quarter.

Our global project pipeline

Newmont’s capital-efficient project pipeline supports stable production with improving margins and mine life. Near-term development capital projects are presented below. Funding for Subika Underground, Ahafo Mill Expansion, Quecher Main and Tanami Power projects has been approved and these projects are in execution.

Subika Underground, Africa. This project leverages existing infrastructure and an optimized approach to develop Ahafo’s most promising underground resource. First production was achieved in June 2017 with commercial production expected in the fourth quarter of 2018. The project is expected to have an average annual gold production of between 150,000 and 200,000 ounces per year for the first five years beginning in 2019 with an initial mine life of approximately 11 years. Development capital costs (excluding capitalized interest) since approval were \$154, of which \$24 related to the third quarter of 2018.

Ahafo Mill Expansion, Africa. This project is designed to maximize resource value by improving production margins and accelerating stockpile processing. The project also supports profitable development of Ahafo’s highly prospective underground resources. The expansion is expected to have an average annual gold production of between 75,000 and 100,000 ounces per year for the first five years beginning in 2020. Development capital costs (excluding capitalized interest) since approval were \$102, of which \$19 related to the third quarter of 2018. A tragic construction accident occurred in April which resulted in six fatalities. Construction restarted in August following a four-month stop to put in place additional safety measures agreed upon with the government of Ghana. The delay will shift first gold production into the second half of 2019, while commercial production remains in the second half of 2019.

Quecher Main, South America. This project will add oxide production at Yanacocha, leverage existing infrastructure and enable potential future growth at Yanacocha. First production is expected in late 2018 with commercial production in the second half of 2019. Quecher Main extends the life of the Yanacocha operation to 2027 with average annual gold production of about 200,000 ounces per year (on a consolidated basis) between 2020 and 2025. Development capital costs (excluding capitalized interest) since approval were \$67, of which \$26 related to the third quarter of 2018.

Tanami Power, Australia. This project will lower power costs beginning in 2019, mitigate fuel supply risk and reduce carbon emissions. The project includes a 450 kilometer natural gas pipeline to be constructed connecting the Tanami site to the Amadeus Gas Pipeline, and construction and operation of two on-site power stations. The gas supply, gas transmission and power purchase agreements are for a ten year term with options to extend.

We manage our wider project portfolio to maintain flexibility to address the development risks associated with our projects including permitting, local community and government support, engineering and procurement availability, technical issues, escalating costs and other associated risks that could adversely impact the timing and costs of certain opportunities.

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 1 BASIS OF PRESENTATION

The interim Condensed Consolidated Financial Statements (“interim statements”) of Newmont Mining Corporation and its subsidiaries (collectively, “Newmont” or the “Company”) are unaudited. In the opinion of management, all adjustments (including normal recurring adjustments) and disclosures necessary for a fair presentation of these interim statements have been included. The results reported in these interim statements are not necessarily indicative of the results that may be reported for the entire year. These interim statements should be read in conjunction with Newmont’s Consolidated Financial Statements for the year ended December 31, 2017 filed on February 22, 2018 on Form 10-K and revisions filed April 26, 2018 on Form 8-K. The year-end balance sheet data was derived from the audited financial statements and, in accordance with the instructions to Form 10-Q, certain information and footnote disclosures required by United States (“U.S.”) generally accepted accounting principles (“GAAP”) have been condensed or omitted. References to “A\$” refers to Australian currency and “C\$” refers to Canadian currency.

In July 2018, Newmont purchased a 50% interest in the Galore Creek Partnership (“Galore Creek”) from NovaGold Resources Inc. (“NovaGold”) for \$100 in cash consideration paid on the transaction date; a deferred payment of \$75, payable upon the earlier of three years or the completion of a prefeasibility study; a deferred payment of \$25, payable upon the earlier of five years or the completion of a feasibility study; and a contingent payment of \$75, payable upon the earlier of initiation or approval to construct a mine, mill and all related infrastructure for the Galore Creek project.

The Company accounted for the purchase of Galore Creek as an asset acquisition, as the identifiable assets are primarily concentrated in a single mineral interest. The value of the consideration paid and payable of \$189 was allocated to the acquired assets and assumed liabilities based on their estimated fair values on the acquisition date. At the acquisition date, the Company recorded mineral interests of \$192, other noncurrent assets of \$2, other current liabilities of \$2 and noncurrent reclamation and remediation liabilities of \$3 within the North America segment. Upon becoming probable of payment, the contingent payment of \$75 will be accrued and allocated to the mineral interest. Refer to Note 26 for further details regarding the contingent payment. The Company includes its pro-rata share of operations for Galore Creek in the Consolidated Financial Statements.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Risks and Uncertainties

As a global mining company, the Company’s revenue, profitability and future rate of growth are substantially dependent on prevailing prices for gold and copper. Historically, the commodity markets have been very volatile, and there can be no assurance that commodity prices will not be subject to wide fluctuations in the future. A substantial or extended decline in commodity prices could have a material adverse effect on the Company’s financial position, results of operations, cash flows, access to capital and on the quantities of reserves that the Company can economically produce. The carrying value of the Company’s Property, plant and mine development, net; Inventories; Stockpiles and ore on leach pads and Deferred income tax assets are particularly sensitive to the outlook for commodity prices. A decline in the Company’s price outlook from current levels could result in material impairment charges related to these assets.

In addition to changes in commodity prices, other factors such as changes in mine plans, increases in costs, geotechnical failures, and changes in social, environmental or regulatory requirements can adversely affect the Company's ability to recover its investment in certain assets and result in impairment charges. As discussed in Note 6, the Company recorded impairment charges of \$331 related to exploration properties in North America as a result of changes in exploration plans for the properties and \$35 related to its Emigrant operation as a result of mine plan changes.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the accounting for and recognition and disclosure of assets, liabilities, equity, revenues and expenses. The Company must make these estimates and assumptions because certain information used is dependent on future events, cannot be calculated with a

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

high degree of precision from data available or simply cannot be readily calculated based on generally accepted methodologies. Actual results could differ from these estimates.

Contingently Redeemable Noncontrolling Interest

Certain noncontrolling interests in consolidated entities meet the definition of redeemable financial instruments if the ability to redeem the interest is outside of the control of the consolidating entity. In such cases, these financial instruments are required to be classified outside of permanent equity (referred to as temporary equity).

Revenue Recognition

The Company adopted ASC 606, Revenue from contracts with customers, on January 1, 2018. Changes to the accounting policy as a result of adoption are discussed below.

Newmont generates revenue by selling gold and copper produced from its mining operations. Refer to Note 3 for further information regarding the Company's operating segments.

The majority of the Company's Sales come from the sale of refined gold; however, the end product at the Company's gold operations is generally doré bars. Doré is an alloy consisting primarily of gold but also containing silver and other metals. Doré is sent to refiners to produce bullion that meets the required market standard of 99.95% gold. Under the terms of the Company's refining agreements, the doré bars are refined for a fee, and the Company's share of the refined gold and the separately-recovered silver is credited to its bullion account. Gold from doré bars credited to its bullion account is typically sold to banks or refiners.

A portion of gold sold from Boddington and Kalgoorlie in Australia, Phoenix in Nevada and CC&V in Colorado is sold in the form of concentrate which includes copper and silver. The Company's Sales also come from the sale of copper. Copper sales are generally in the form of concentrate, which is sold to smelters for further treatment and refining, and cathode. Copper sold from Boddington in Australia is sold in concentrate form and copper sold from Phoenix in Nevada is sold in either concentrate or cathode form.

Generally, if a metal expected to be mined represents more than 10 to 20% of the life of mine sales value of all the metal expected to be mined, co-product accounting should apply. When the Company applies co-product accounting at an operation, revenue is recognized for each co-product metal sold, and shared costs applicable to sales are allocated based on the relative sales values of the co-product metals produced. Generally, if metal expected to be mined is less than the 10 to 20% of the life of mine sales value, by-product accounting should apply. Revenues from by-product sales, which are immaterial, are credited to Costs applicable to sales as a by-product credit. Copper is produced as a co-product at Phoenix and Boddington. Copper and silver is produced as a by-product at certain of the Company's other operations.

Gold Sales from Doré Production

The Company recognizes revenue for gold from doré production when it satisfies the performance obligation of transferring gold inventory to the customer, which generally occurs upon transfer of gold bullion credits as this is the

point at which the customer obtains the ability to direct the use and obtain substantially all of the remaining benefits of ownership of the asset.

The Company generally recognizes the sale of gold bullion credits at the prevailing market price when gold bullion credits are delivered to the customer. The transaction price is determined based on the agreed upon market price and the number of ounces delivered. Payment is due upon delivery of gold bullion credits to the customer's account.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Gold and Copper Sales from Concentrate Production

The Company recognizes revenue for gold and copper from concentrate production, net of treatment and refining charges, when it satisfies the performance obligation of transferring control of the concentrate to the customer. This generally occurs as material passes over the vessel's rail at the port of loading based on the date from the bill of lading, as the customer has the ability to direct the use of and obtain substantially all of the remaining benefits from the material and the customer has the risk of loss. Newmont has elected to account for shipping and handling costs for concentrate contracts as fulfillment activities and not as promised goods or services; therefore these activities are not considered separate performance obligations.

The Company generally sells gold and copper concentrate based on the future monthly average market price for a future month, dependent on the relevant contract, following the month in which the delivery to the customer takes place. The amount of revenue recognized for concentrates is initially recorded on a provisional basis based on the forward prices for the estimated month of settlement and the Company's estimated metal quantities based on assay data. The Company's sales based on a provisional price contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the concentrates at the forward price at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through Sales each period prior to final settlement. The Company also adjusts estimated metal quantities used in computing provisional sales using new information and assay data from the smelter as it is received (if any).

A provisional payment is generally due upon delivery of the concentrate to the customer. Final payment is due upon final settlement of price and quantity with the customer.

The principal risks associated with recognition of sales on a provisional basis include metal price fluctuations and updated quantities between the date the sale is recorded and the date of final settlement. If a significant decline in metal prices occurs, or assay data results in a significant change in quantity between the provisional pricing date and the final settlement date, it is reasonably possible that the Company could be required to return a portion of the provisional payment received on the sale.

Copper Sales from Cathode Production

The Company recognizes revenue for copper from cathode production when it transfers control of copper cathode to the customer, which occurs when the material is picked up by the carrier. The Company generally sells copper cathode based on the weekly average market price for the week following production. The transaction price is determined based on this agreed upon price and the number of pounds delivered. Payment is due upon final settlement of price and quantity with the customer.

Recently Adopted Accounting Pronouncements

Revenue Recognition

In May 2014, Accounting Standards Update (“ASU”) No. 2014-09 was issued related to revenue from contracts with customers. This ASU was further amended in August 2015, March 2016, April 2016, May 2016, December 2016 and September 2017 by ASU No. 2015-14, No. 2016-08, No. 2016-10, No. 2016-12, No. 2016-20 and No. 2017-13, respectively. The new standard provides a five-step approach to be applied to all contracts with customers and also requires expanded disclosures about revenue recognition.

The company retrospectively adopted this standard as of January 1, 2018. As there were no contracts outstanding as of December 31, 2017, there was no cumulative effect adjustment required to be recognized at January 1, 2018. The comparative information has not been adjusted and continues to be reported under the accounting standards in effect for those periods.

The adoption of this standard primarily impacts the timing of revenue recognition on certain concentrate contracts based on the Company’s determination of when control is transferred. Revenue related to concentrate shipments is now generally recognized upon

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

completion of loading the material for shipment to the customer and satisfaction of the Company's significant performance obligation. Prior to the adoption of this standard, revenue was recognized for these contracts when the price was determinable, the concentrate had been loaded on a vessel or received by the customer, risk and title had been transferred and collection of the sales price was reasonably assured.

Investments

In January 2016, ASU No. 2016-01 was issued related to financial instruments. This ASU was further amended in February 2018 by ASU No. 2018-03. The new guidance requires entities to measure equity investments that do not result in consolidation and are not accounted for under the equity method at fair value and recognize any changes in fair value in net income. This new guidance also updates certain disclosure requirements for these investments. This update is effective in fiscal years, including interim periods, beginning after December 15, 2017, and upon adoption, an entity should apply the amendments with the cumulative effect of initially applying the guidance recognized at January 1, 2018. The Company adopted this standard as of January 1, 2018. Upon adoption, the Company reclassified \$115 of unrealized holding gains and losses and deferred income taxes related to investments in marketable equity securities from Accumulated other comprehensive income (loss) to Retained earnings in the Consolidated Balance Sheets.

Statement of Cash Flows

In August 2016, ASU No. 2016-15 was issued related to the statement of cash flows. This new guidance addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. This update is effective in fiscal years, including interim periods, beginning after December 15, 2017. The Company adopted the guidance as of January 1, 2018. Upon adoption, the Company reclassified \$196 from Repayment of debt, previously reported as a cash outflow from financing activities, to operating activities on the Consolidated Statements of Cash Flows related to accreted interest from the debt discount on the 2017 convertible notes repaid in July 2017. Additionally, the Company reclassified \$9 for the nine months ended September 30, 2017 of Acquisitions, net previously reported as a cash outflow from investing activities, to operating activities on the Consolidated Statements of Cash Flows related to contingent consideration payments.

Intra-Entity Transfers

In October 2016, ASU No. 2016-16 was issued related to the intra-entity transfers of assets other than inventory. This new guidance requires entities to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs. This update is effective in fiscal years, including interim periods, beginning after December 15, 2017. The Company adopted this guidance as of January 1, 2018, and determined it had no impact on the Consolidated Financial Statements or disclosures.

Restricted Cash

In November 2016, ASU No. 2016-18 was issued related to the inclusion of restricted cash in the statement of cash flows. This new guidance requires that a statement of cash flows present the change during the period in the total of

cash, cash equivalents and amounts generally described as restricted cash or restricted cash equivalents. This update is effective in fiscal years, including interim periods, beginning after December 15, 2017, and early adoption is permitted. The Company retrospectively adopted this guidance as of December 31, 2017. Upon adoption, the Company included a reconciliation of Cash and cash equivalents and restricted cash reported within the Consolidated Balance Sheets to the total shown in the Consolidated Statements of Cash Flows. Additionally, the Company reclassified \$10 for the nine months ended September 30, 2017 from Net cash provided by (used in) financing activities of continuing operations related to restricted movement to the Net change in cash, cash equivalents and restricted cash.

(dollars in millions, except per share, per ounce and per pound amounts)

Employee Benefits

In March 2017, ASU No. 2017-07 was issued related to the presentation of net periodic pension and postretirement cost. The new guidance requires the service cost component of net benefit costs to be classified similar to other compensation costs arising from services rendered by employees. Other components of net benefit costs are required to be classified separately from the service cost and outside income from operations. The Company adopted this guidance as of January 1, 2018. The adoption of this guidance resulted in the recognition of other components of net benefit costs within Other income, net rather than Costs applicable to sales or General and administrative and is no longer included in costs that benefit the inventory or production process. Adoption of this guidance did not have a material impact on the Consolidated Financial Statements or disclosures.

Hedging

In August 2017, ASU No. 2017-12 was issued related to hedge accounting. The new guidance expands the ability to hedge nonfinancial risk components, eliminates the current requirement to separately measure and report hedge ineffectiveness, and requires the entire change in fair value of a hedging instrument to be presented in the same income statement line as the hedged item, when reclassified from Accumulated other comprehensive income (loss). The guidance also eases certain hedge effectiveness documentation and assessment requirements. This update is effective in fiscal years, including interim periods, beginning after December 15, 2018, and early adoption is permitted. The Company adopted this guidance as of January 1, 2018, and there was no material impact on the Consolidated Financial Statements or disclosures as a result of adoption.

Recently Issued Accounting Pronouncements

Leases

In February 2016, ASU No. 2016-02 was issued related to leases, which was further amended in September 2017 by ASU No. 2017-13, in January 2018 by ASU No. 2018-01 and in July 2018 by ASU No. 2018-10 and ASU No. 2018-11. The new guidance modifies the classification criteria and requires lessees to recognize right-of-use assets and lease liabilities arising from most leases on the balance sheet with additional disclosures about leasing arrangements. This update is effective in fiscal years, including interim periods, beginning after December 15, 2018, and early adoption is permitted. The Company anticipates adopting the new guidance as of January 1, 2019.

The Company is still completing its assessment of the new guidance and the impact it will have on the Consolidated Financial Statements and disclosures, and expects to complete its analysis in 2018. To date, the Company has formed a cross-functional implementation team; performed a completeness assessment over the lease population; established new policies, procedures and internal controls related to the new standard; and reviewed existing contracts that are expected to be outstanding as of the adoption date. Additionally, management continues to evaluate the various practical expedients and policy elections that will be adopted and has elected to review existing contracts to evaluate lease classification for contracts containing leases and to not recast the comparative periods presented when transitioning to the new guidance on January 1, 2019.

Management will continue to perform procedures to assess impacts through the adoption date; however, based on the procedures performed, management has identified certain service contracts that contain embedded leases under the revised guidance. In addition to existing capital leases and other financing obligations, the Company expects that the adoption of the new standard will result in the recognition of additional right-of-use assets and lease liabilities related to operating leases of between \$25 to \$50 and \$30 to \$55, respectively, and finance leases of between \$45 to \$80 and \$55 to \$90, respectively. The Company does not expect there will be a material impact to the Consolidated Statements of Operations or the Consolidated Statements of Cash Flows. The Company is in the process of assessing the required disclosures of the new standard, and expects to provide additional qualitative and quantitative disclosures related to leasing arrangements upon adoption.

Other Comprehensive Income Reclassifications Related to Tax Reform

In February 2018, ASU No. 2018-02 was issued allowing companies the option to reclassify to retained earnings the tax effects related to items in Accumulated other comprehensive income (loss) as a result of the Tax Cuts and Jobs Act (the “Act”) that was enacted on December 22, 2017. This update is effective in fiscal years, including interim periods, beginning after December 15, 2018, and early adoption is permitted. This guidance should be applied either in the period of adoption or retrospectively to each period in which the effects of the change in the U.S. federal income tax rate in the Act is recognized. The Company is still completing its assessment of the impacts but expects to reclassify amounts out of Accumulated other comprehensive income on the balance sheet. The Company anticipates adopting the new guidance as of December 31, 2018.

Fair Value Disclosure Requirements

In August 2018, ASU No. 2018-13 was issued to modify and enhance the disclosure requirements for fair value measurements. This update is effective in fiscal years, including interim periods, beginning after December 15, 2019, and early adoption is permitted. The Company is still completing its assessment of the impacts and anticipated adoption date of this guidance.

Defined Benefit Plan Disclosure Requirements

In August 2018, ASU No. 2018-14 was issued to modify and enhance the required disclosures for defined benefit plans. This update is effective in fiscal years, including interim periods, ending after December 15, 2020, and early adoption is permitted. The Company is still completing its assessment of the impacts and anticipated adoption date of this guidance.

Capitalization of Certain Cloud Computing Implementation Costs

In August 2018, ASU No. 2018-15 was issued which allows for the capitalization for certain implementation costs incurred in a cloud computing arrangement that is considered a service contract. This update is effective in fiscal years, including interim periods, beginning after December 15, 2019, and early adoption is permitted. The Company is still completing its assessment of the impacts and anticipated adoption date of this guidance.

NOTE 3 SEGMENT INFORMATION

The Company has organized its operations into four geographic regions. The geographic regions include North America, South America, Australia and Africa and represent the Company's operating segments. The results of these operating segments are reviewed by the Company's chief operating decision maker to make decisions about resources to be allocated to the segments and assess their performance. As a result, these operating segments represent the Company's reportable segments. Notwithstanding this structure, the Company internally reports information on a mine-by-mine basis for each mining operation and has chosen to disclose this information on the following tables. Income (loss) before income and mining tax and other items from reportable segments does not reflect general corporate expenses, interest (except project-specific interest) or income and mining taxes. Intercompany revenue and expense amounts have been eliminated within each segment in order to report on the basis that management uses internally for evaluating segment performance. Newmont's business activities that are not considered operating segments are included in Corporate and Other. Although they are not required to be included in this footnote, they are provided for reconciliation purposes.

NOTE 5 RECLAMATION AND REMEDIATION

The Company's mining and exploration activities are subject to various domestic and international laws and regulations governing the protection of the environment. These laws and regulations are continually changing and are generally becoming more restrictive. The Company conducts its operations to protect public health and the environment and believes its operations are in compliance with applicable laws and regulations in all material respects. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures. Estimated future reclamation and remediation costs are based principally on current legal and regulatory requirements.

The Company's Reclamation and remediation expense consisted of:

	Three Months Ended		Nine Months Ended	
	September 30,	September 30,	September 30,	September 30,
	2018	2017	2018	2017

Remediation adjustments	3	2	17	9
Remediation accretion	2	2	4	4
Total remediation expense	5	4	21	13
	\$ 31	\$ 26	\$ 96	\$ 98

Reclamation and remediation adjustments. In June 2018, the Company updated assumptions at a historic mine site for future water management costs of \$8. In June 2017, the Company updated reclamation liability assumptions at Minera Yanacocha S.R.L. (“Yanacocha”) regarding water treatment costs on non-operating leach pads of \$15.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The following are reconciliations of Reclamation and remediation liabilities:

	2018	2017
Reclamation balance at January 1,	\$ 2,144	\$ 1,913
Additions, changes in estimates and other	6	16
Payments, net	(22)	(20)
Accretion expense	75	70
Reclamation balance at September 30,	\$ 2,203	\$ 1,979

	2018	2017
Remediation balance at January 1,	\$ 304	\$ 312
Additions, changes in estimates and other	6	3
Payments, net	(29)	(33)
Accretion expense	4	4
Remediation balance at September 30,	\$ 285	\$ 286

The current portion of reclamation liabilities was \$59 and \$60 at September 30, 2018 and December 31, 2017, respectively, and was included in Other current liabilities. The current portion of remediation liabilities was \$44 and \$43 at September 30, 2018 and December 31, 2017, respectively, and was included in Other current liabilities.

At September 30, 2018 and December 31, 2017, \$2,203 and \$2,144, respectively, were accrued for reclamation obligations relating to operating properties.

The Company is also involved in several matters concerning environmental remediation obligations associated with former, primarily historic, mining activities. Generally, these matters concern developing and implementing remediation plans at the various sites involved. At September 30, 2018 and December 31, 2017, \$285 and \$304, respectively, were accrued for such environmental remediation obligations. Depending upon the ultimate resolution of these matters, the Company believes that it is reasonably possible that the liability for these matters could be as much as 44% greater or 0% lower than the amount accrued at September 30, 2018. These amounts are included in Other current liabilities and Reclamation and remediation liabilities. The amounts accrued are reviewed periodically based upon facts and circumstances available at the time. Changes in estimates are recorded in Reclamation and remediation in the period estimates are revised.

Non-current restricted cash held for purposes of settling reclamation and remediation obligations was \$34 and \$38 at September 30, 2018 and December 31, 2017, respectively. Of the amounts at September 30, 2018, \$25 was related to the Ahafo and Akyem mines in Ghana, Africa, \$8 was related to the Con mine in Yellowknife, Northwest Territory, Canada, and \$1 was related to the San Jose Reservoir in Yanacocha, Peru. Of the amount at December 31, 2017, \$25 was related to the Ahafo and Akyem mines, \$6 was related to the Con mine, \$6 was related to the San Jose Reservoir, and \$1 was related to the Midnite mine in Washington state.

Included in Other non-current assets at September 30, 2018 and December 31, 2017, was \$58 and \$64, respectively, of non-current restricted investments, which are legally pledged for purposes of settling reclamation and remediation obligations related to the San Jose Reservoir in Yanacocha, Midnight mine site and for various locations in North America.

Refer to Note 26 for further discussion of reclamation and remediation matters.

NOTE 6 IMPAIRMENT OF LONG-LIVED ASSETS

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
North America	\$ 366	\$ —	\$ 366	\$ —
South America	—	—	—	2
Australia	—	—	—	1
	\$ 366	\$ —	\$ 366	\$ 3

Impairment of long-lived assets totaled \$366 for the three and nine months ended September 30, 2018. The 2018 impairments were primarily related to certain exploration properties of \$331 and Emigrant, within the Carlin complex, of \$35, both reported in the North America segment. The Company determined that an impairment indicator existed at certain North American exploration properties, due to the Company's decision to focus on advancing other projects, and at Emigrant, due to a change in the mine plan that resulted in a significant decrease in mine life. In addition to the impairment of long-lived assets at Emigrant, the Company also recorded an adjustment to the carrying value of the ore on leach pads resulting from the change in mine plan, impacting Costs applicable to sales and Depreciation and amortization by \$22 and \$7, respectively.

As a result of the impairment indicators, recoverability tests were performed and the Company concluded the Property, plant and mine development, net at certain North American exploration properties and Emigrant was impaired. The Company measured the impairment at the North American exploration properties using the market approach. The Company measured the impairment at Emigrant by comparing the total fair value of existing operations using the income approach. Refer to Note 15, Fair Value Accounting, for detail of the assumptions used in the determination of the fair value of the long-lived assets tested for impairment.

The 2017 impairments were primarily related to non-cash write-downs of obsolete assets at Yanacocha and Australia.

NOTE 7 OTHER EXPENSE, NET

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Restructuring and other	\$ 1	\$ 2	\$ 16	\$ 10
Acquisition cost adjustments	—	(3)	—	2

Other	4	2	13	17
	\$ 5	\$ 1	\$ 29	\$ 29

Restructuring and other. Restructuring and other represents certain costs associated with severance, legal and other settlements for all periods presented.

Acquisition cost adjustments. Acquisition cost adjustments represent net adjustments during 2017 to the contingent consideration and related liabilities associated with the acquisition of the final 33.33% interest in Boddington in June 2009.

Other	6	5	17	9
	\$ 37	\$ 10	\$ 197	\$ 32

Gain (loss) on asset and investment sales, net. In June 2018, the Company exchanged certain royalty interests carried at cost for cash consideration, an equity ownership in Maverix Metals Inc. ("Maverix") and warrants in Maverix, resulting in a pre-tax gain of \$100. For additional information regarding this transaction, see Note 17.

In June 2017, the Company exchanged its interest in the Fort á la Corne joint venture for equity ownership in Shore Gold Inc., resulting in a pre-tax gain of \$15.

Foreign currency exchange, net. Although the majority of the Company's balances are denominated in U.S. dollars, foreign currency exchange gains (losses) are recognized on balances to be satisfied in local currencies. These balances primarily relate to the timing of payments for employee-related benefits and other liabilities in Australia, Peru and Suriname.

Insurance proceeds. In September 2018, the Company recorded business interruption insurance proceeds of \$25 associated with the East wall slips at Kalgoorlie in the first half of 2018. In June 2017, the Company recorded business interruption insurance proceeds of \$13 associated with the heavy rainfall at Tanami during the first quarter of 2017.

(dollars in millions, except per share, per ounce and per pound amounts)

The Company expects to record additional updates to the provisional amounts for the impacts of US tax reform during the fourth quarter of 2018 following completion of the 2017 income tax returns and within the 12 month time frame provided under the SEC's Staff Accounting Bulletin 118. There are no new estimates associated with US tax reform in the income tax expense for the three months ended September 30, 2018.

NOTE 10 NET INCOME (LOSS) FROM DISCONTINUED OPERATIONS

The details of Net income (loss) from discontinued operations are set forth below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Holt royalty obligation	\$ 19	\$ (7)	\$ 55	\$ (45)
Batu Hijau contingent consideration (1)	(3)	—	1	—
Net income (loss) from discontinued operations	\$ 16	\$ (7)	\$ 56	\$ (45)

(1) See Note 16 for details on the Batu Hijau contingent consideration.

The Holt Royalty Obligation

At September 30, 2018 and December 31, 2017, the estimated fair value of the Holt royalty obligation was \$165 and \$243, respectively. Changes to the estimated fair value resulting from periodic revaluations are recorded to Net income (loss) from discontinued operations, net of tax. During the three and nine months ended September 30, 2018, the Company recorded a gain (loss) of \$19 and \$55, net of a tax benefit (expense) of \$(6) and \$(15), respectively, related to the Holt royalty obligation. During the three and nine months ended September 30, 2017, the Company recorded a gain (loss) of \$(7) and \$(45), net of tax benefit (expense) of \$4 and \$25, respectively, related to the Holt royalty obligation.

During the nine months ended September 30, 2018 and 2017, the Company paid \$8 and \$9, respectively, related to the Holt royalty obligation. Refer to Note 15 for additional information on the Holt royalty obligation.

NOTE 11 NET INCOME (LOSS) ATTRIBUTABLE TO NONCONTROLLING INTERESTS

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Merian	\$ 14	\$ 17	\$ 42	\$ 43

Yanacocha	7	(24)	(16)	(62)
Other	—	—	—	(1)
	\$ 21	\$ (7)	\$ 26	\$ (20)

Newmont has a 75.0% economic interest in Suriname Gold Project C.V. (“Merian”), with the remaining interests held by Staatsolie Maatschappij Suriname N.V. (“Staatsolie”), a company wholly owned by the Republic of Suriname. Newmont consolidates Merian, through its wholly-owned subsidiary, Newmont Suriname LLC., in its Condensed Consolidated Financial Statements as the primary beneficiary in the variable interest entity.

In December 2017, Yanacocha repurchased a 5% ownership interest from International Finance Corporation, which resulted in Newmont’s ownership in Yanacocha increasing from 51.35% to 54.05%, with the remaining interests held by Buenaventura (which increased from 43.65% to 45.95%). In June 2018, Yanacocha sold a 5% ownership interest to Summit Global Management II VB, a subsidiary of Sumitomo Corporation (“Sumitomo”), in exchange for \$48 in cash, which resulted in Newmont’s and Buenaventura’s ownership returning to 51.35% and 43.65%, respectively.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Under the terms of the transaction, Sumitomo has the option to require Yanacocha to repurchase the interest for \$48 if the Yanacocha Sulfides project does not adequately progress by June 2022 or if the project is approved with an incremental rate of return below a contractually agreed upon rate. Consequently, Sumitomo's interest has been classified outside of permanent equity as Contingently redeemable noncontrolling interest on the Condensed Consolidated Balance Sheets. Under the terms of the sales agreement, the cash paid by Sumitomo at closing has been placed in escrow for repayment in the event the option is exercised. As a result of this transaction, the Company concluded that Newmont will continue to consolidate Yanacocha in its Condensed Consolidated Financial Statements under the voting interest model.

The following summarizes the assets and liabilities of Merian, (including noncontrolling interests):

	At September 30, 2018	At December 31, 2017
Current assets:		
Cash and cash equivalents	\$ 71	\$ 27
Trade receivables	29	—
Inventories	83	79
Stockpiles and ore on leach pads	32	21
Other current assets (1)	2	6
	217	133
Non-current assets:		
Property, plant and mine development, net	768	769
Other non-current assets (2)	3	8
Total assets	\$ 988	\$ 910
Current liabilities:		
Accounts payable	\$ 24	\$ 22
Other current liabilities (3)	27	28
	51	50
Non-current liabilities:		
Reclamation and remediation liabilities	18	18
Other non-current liabilities (4)	1	1
Total liabilities	\$ 70	\$ 69

(1) Other current assets include other accounts receivables, prepaid assets and other current assets.

(2) Other non-current assets include intangibles, stockpiles and ore on leach pads.

(3) Other current liabilities include employee-related benefits and other current liabilities.

(4) Other non-current liabilities include employee-related benefits.

NOTE 12 NET INCOME (LOSS) PER COMMON SHARE

Basic net income (loss) per common share is computed by dividing income available to Newmont common stockholders by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per common share is computed similarly, except that weighted average common shares is increased to reflect all dilutive instruments, including employee stock awards and convertible debt instruments. The dilutive effects of Newmont's dilutive securities are calculated using the treasury stock method and only those instruments that result in a reduction in net income per share are included in the calculation.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Net income (loss) attributable to Newmont stockholders:

	\$ (0.27)	\$ 0.38	\$ 0.63	\$ 0.80

The Company reported a loss from continuing operations attributable to Newmont stockholders for the three months ended September 30, 2018. Therefore, the potentially dilutive effects for the three months ended September 30, 2018 were not included in the computation of diluted loss per common share attributable to Newmont stockholders because their inclusion would have been anti-dilutive to the computation.

During the three and nine months ended September 30, 2018, the Company repurchased and retired approximately 0.8 million shares and 2.7 million shares of its common stock for \$26 and \$96, respectively, of which approximately 0.7 million shares related to common stock that was held by participants in the Retirement Savings Plan of Newmont and the Retirement Savings Plan for Hourly-Rated Employees of Newmont. During the three and nine months ended September 30, 2018, the Company withheld a nominal amount and 1.0 million shares for payments of employee withholding taxes related to the vesting of stock awards.

When treasury shares are retired, the Company's policy is to allocate the excess of the repurchase price over the par value of shares acquired to both Retained earnings and Additional paid-in capital. The portion allocated to Additional paid-in capital is calculated on a pro-rata basis of the shares to be retired and the total shares issued and outstanding as of the date of the retirement.

NOTE 15 FAIR VALUE ACCOUNTING

Fair value accounting establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are described below:

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 Quoted prices in markets that are not active, quoted prices for similar assets or liabilities in active markets, quoted prices or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability and model-based valuation techniques (e.g. the Black-Scholes model) for which all significant inputs are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The following tables set forth the Company's assets and liabilities measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy. As required by accounting guidance, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement.

	Fair Value at September 30, 2018

(1) Debt, exclusive of capital leases, is carried at amortized cost. The outstanding carrying value was \$4,043 and \$4,040 at September 30, 2018 and December 31, 2017, respectively. The fair value measurement of debt was based on an independent third party pricing source.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The fair values of the derivative instruments in the table above are presented on a net basis. The gross amounts related to the fair value of the derivative instruments above are included in Note 16. All other fair value disclosures in the above table are presented on a gross basis.

The Company's cash and cash equivalents and restricted cash and restricted cash equivalents are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. The cash and cash equivalent instruments and restricted cash are valued based on quoted market prices in active markets and are primarily money market securities and U.S. Treasury securities.

The Company's net trade receivables from provisional gold and copper concentrate sales, which contain an embedded derivative and are subject to final pricing, are valued using quoted market prices based on forward curves for the particular metal. As the contracts themselves are not traded on an exchange, these receivables are classified within Level 2 of the fair value hierarchy.

The Company's derivative instruments are valued using pricing models, and the Company generally uses similar models to value similar instruments. Valuation models require a variety of inputs, including contractual terms, market prices, forward curves, measures of volatility, and correlations of such inputs. The Company's derivatives trade in liquid markets, and as such, model inputs can generally be verified and do not involve significant management judgment. Such instruments are classified within Level 2 of the fair value hierarchy.

The Company's marketable equity securities with readily determinable fair values are valued using quoted market prices in active markets and as such are classified within Level 1 of the fair value hierarchy. The fair value of the marketable equity securities are calculated as the quoted market price of the marketable equity security multiplied by the quantity of shares held by the Company. The Company's marketable equity securities without readily determinable fair values are primarily comprised of warrants in publicly traded companies and are valued using a Black-Scholes model using quoted market prices in active markets of the underlying securities. As the contracts themselves are not traded on the exchange, these equity securities are classified within Level 2 of the fair value hierarchy.

The Company's restricted marketable debt securities are primarily U.S. government issued bonds and international bonds. The Company's South American debt securities are classified within Level 1 of the fair value hierarchy, using published market prices of actively traded securities. The Company's North American debt securities are classified within Level 2 of the fair value hierarchy as they are valued using pricing models which are based on prices of similar, actively traded securities.

The Company's restricted other assets primarily consist of bank issued certificate of deposits that have maturities over 90 days and marketable equity securities. Both are classified within Level 1 of the fair value hierarchy as their fair values are based on quoted prices available in active markets.

The estimated value of the Batu Hijau contingent consideration was determined using (i) a discounted cash flow model, (ii) a Monte Carlo valuation model to simulate future copper prices using the Company's long-term copper price, and (iii) estimated production and/or development dates for Batu Hijau Phase 7 and the Elang projects in Indonesia. The contingent consideration is classified within Level 3 of the fair value hierarchy.

The estimated fair value of the Holt royalty obligation was determined using (i) a discounted cash flow model, (ii) a Monte Carlo valuation model to simulate future gold prices using the Company's long-term gold price, (iii) various gold production scenarios from reserve and resource information and (iv) a weighted average discount rate. The royalty obligation is classified within Level 3 of the fair value hierarchy.

(1) The gain (loss) recognized is included in Net income (loss) from discontinued operations.

(2) The gain (loss) recognized is included in Other income, net.

During the third quarter of 2018, the Company performed a non-recurring fair value measurement (i.e. Level 3 of the fair value hierarchy) in connection with recoverability and impairment tests performed at certain North American exploration properties due to the Company's decision to focus on advancing other projects and at Emigrant due to a change in the mine plan that resulted in a decrease in mine life.

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The estimated fair value of the North American exploration properties was determined using comparable transactions. The estimated fair value of Emigrant's existing operations was determined using (i) a country specific discount rate of 5.2%, (ii) a short-term gold price of \$1,213 based on the third quarter average of the London PM fix, (iii) a long-term gold price of \$1,300, and (iv) updated cash flow information from the Company's business plan. For further information regarding the impairment charges, see Note 6.

NOTE 16 DERIVATIVE INSTRUMENTS

The Company's strategy is to provide shareholders with leverage to changes in gold and copper prices by selling its production at spot market prices. Consequently, the Company does not hedge its gold and copper sales. The Company has and will continue to manage certain risks associated with commodity input costs, interest rates and foreign currencies using the derivative market.

Cash Flow Hedges

The Company uses hedge programs to mitigate the variability of its operating costs primarily related to diesel price fluctuations. Prior to adoption of ASU No. 2017-12, Newmont's hedge portfolio consisted of Nevada diesel swaps and Australian dollar foreign currency forwards. Subsequent to the adoption of this ASU, the Company initiated new diesel hedge programs for all of its Nevada sites in North America, Merian in South America and Boddington, Tanami and Kalgoorlie in Australia.

The following diesel contracts were transacted for risk management purposes and qualify as cash flow hedges. The unrealized changes in market value have been recorded in Accumulated other comprehensive income (loss) and are reclassified to income during the period in which the hedged transaction affects earnings.

The Company had the following diesel derivative contracts outstanding at September 30, 2018:

	Expected Maturity Date				Total/ Average
	2018	2019	2020	2021	
Diesel Fixed Forward Contracts:					
North America					
Diesel gallons (millions)	3	4	4	1	12
Average rate (\$/gallon)	1.68	1.87	2.00	2.07	1.89

South America					
Diesel gallons (millions)	—	—	2	—	2
Average rate (\$/gallon)	—	2.07	1.89	2.03	1.92
Australia					
Diesel barrels (thousands)	—	18	91	29	138
Average rate (\$/barrel)	—	85.96	78.66	82.15	80.34

The hedging instruments consist of a series of financially settled fixed forward contracts, which run through the second quarter of 2021 in South America and the third quarter of 2021 in North America and Australia.

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

Derivative Instrument Fair Values

The Company had the following derivative instruments designated as hedges at September 30, 2018 and December 31, 2017:

Fair Values of Derivative Instruments				
At September 30, 2018				
	Other Current Assets	Other Non-current Assets	Other Current Liabilities	Other Non-current Liabilities
Diesel fixed forwards	\$ 4	\$ 3	\$ —	\$ —

Fair Values of Derivative Instruments				
At December 31, 2017				
	Other Current Assets	Other Non-current Assets	Other Current Liabilities	Other Non-current Liabilities
A\$ operating fixed forwards	\$ —	\$ —	\$ 1	\$ —
Diesel fixed forwards	6	—	—	—
	\$ 6	\$ —	\$ 1	\$ —

As of September 30, 2018 and December 31, 2017, all hedging instruments held by the Company were subject to enforceable master netting arrangements held by various financial institutions. In general, the terms of the Company's agreements provide for offsetting of amounts payable or receivable between it and the counterparty, at the election of both parties, for transactions that occur on the same date and in the same currency. The Company's agreements also provide that in the event of an early termination, the counterparties have the right to offset amounts owed or owing under that and any other agreement with the same counterparty. The Company's accounting policy is to not offset these positions in its accompanying balance sheets. As of September 30, 2018 and December 31, 2017, the potential effect of netting derivative assets against liabilities due to the master netting agreement was not significant.

The following table shows the effect of cash flow hedge accounting in the Company's Condensed Consolidated Statements of Operations.

	(Gain) Loss Recognized from Cash Flow Hedges			
	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Total Costs applicable to sales	\$ 995	\$ 1,053	\$ 2,989	\$ 3,009
	\$ 1	\$ 5	\$ 6	\$ 20

------	------	------	------

Table of Contents

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

The following table shows the location and amount of (gains) losses reported in the Company's Condensed Consolidated Financial Statements related to the Company's hedges.

	Foreign Currency Exchange Contracts		Diesel Fixed Forward Contracts		Interest Rate Contracts	
	2018	2017	2018	2017	2018	2017
For the three months ended September 30,						
Cash flow hedging relationships:						
(Gain) loss recognized in Other comprehensive income (loss)	\$ —	\$ (1)	\$ (3)	\$ (5)	\$ —	\$ —
(Gain) loss reclassified from Accumulated other comprehensive income (loss) into income (loss)	\$ 1	\$ 5	\$ (2)	\$ —	\$ 2	\$ 2
For the nine months ended September 30,						
Cash flow hedging relationships:						
(Gain) loss recognized in Other comprehensive income (loss)	\$ —	\$ (5)	\$ (8)	\$ 1	\$ —	\$ —
(Gain) loss reclassified from Accumulated other comprehensive income (loss) into income (loss)	\$ 6	\$ 20	\$ (6)	\$ 3	\$ 8	\$ 7

Over the next 12 months, the Company expects to reclassify from Accumulated other comprehensive income (loss) to income a loss of approximately \$6, net of tax, related to unrealized hedge losses.

Batu Hijau Contingent Consideration

Consideration received by the Company in conjunction with the sale of PT Newmont Nusa Tenggara included the Contingent Payment and the Elang Development deferred payment deeds, which were determined to be financial instruments that met the definition of a derivative, but do not qualify for hedge accounting, under ASC 815. See Note 15 for additional information. Contingent consideration of \$23 was included in Other non-current assets in the Company's Condensed Consolidated Balance Sheets as of September 30, 2018 and December 31, 2017.

Provisional Gold and Copper Sales

The Company's provisional gold and copper concentrate sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the gold and copper concentrates at the prevailing indices' prices at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through earnings each period prior to final settlement.

The impact to Sales from revenue recognized due to the changes in the final pricing is a (decrease) increase of \$(9) and \$8 for the three months ended September 30, 2018 and 2017, respectively, and a (decrease) increase of \$(17) and

\$18 for the nine months ended September 30, 2018 and 2017, respectively.

At September 30, 2018, Newmont had gold and copper sales of 113,000 ounces and 18 million pounds priced at an average of \$1,190 per ounce and \$2.80 per pound, respectively, subject to final pricing over the next several months.

NOTE 25 CONDENSED CONSOLIDATING FINANCIAL STATEMENTS

The following Condensed Consolidating Financial Statements are presented to satisfy disclosure requirements of Rule 3-10(e) of Regulation S-X resulting from the inclusion of Newmont USA Limited (“Newmont USA”), a wholly-owned subsidiary of Newmont, as a co-registrant with Newmont on debt securities issued under a shelf registration statement on Form S-3 filed under the Securities Act of 1933 under which securities of Newmont (including debt securities guaranteed by Newmont USA) may be issued (the “Shelf Registration Statement”). In accordance with Rule 3-10(e) of Regulation S-X, Newmont USA, as the subsidiary guarantor, is 100% owned by Newmont, the guarantees are full and unconditional, and no other subsidiary of Newmont guaranteed any security issued under the Shelf Registration Statement. There are no restrictions on the ability of Newmont or Newmont USA to obtain funds from its subsidiaries by dividend or loan.

NEWMONT MINING CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

(dollars in millions, except per share, per ounce and per pound amounts)

NOTE 26 COMMITMENTS AND CONTINGENCIES

General

Estimated losses from contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable that a liability could be incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the contingency and estimated range of loss, if determinable, is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

Operating Segments

The Company's operating and reportable segments are identified in Note 3. Except as noted in this paragraph, all of the Company's commitments and contingencies specifically described herein are included in Corporate and Other. The Yanacocha matters relate to the South America reportable segment. The Fronteer matters relate to the North America reportable segment.

Environmental Matters

Refer to Note 5 for further information regarding reclamation and remediation. Details about certain of the more significant matters are discussed below.

Newmont USA Limited - 100% Newmont Owned

Ross-Adams mine site. By letter dated June 5, 2007, the U.S. Forest Service ("USFS") notified Newmont that it had expended approximately \$0.3 in response costs to address environmental conditions at the Ross-Adams mine in Prince of Wales, Alaska, and requested Newmont USA Limited pay those costs and perform an Engineering Evaluation/Cost Analysis ("EE/CA") to assess what future response activities might need to be completed at the site. Newmont agreed to perform the EE/CA pursuant to the requirements of an Administrative Settlement Agreement and Order on Consent ("ASAOC") between the USFS and Newmont. The EE/CA was provided to the USFS in April 2015. During the first quarter of 2016, the USFS confirmed approval of the EE/CA, and Newmont issued written notice to the USFS certifying that all requirements of the ASAOC had been completed. During the third quarter of 2016, Newmont received a notice of completion of work per the ASAOC from the USFS, which finalized the ASAOC. The USFS issued an Action Memorandum in April 2018 to select the preferred Removal Action alternative identified in the EE/CA. Newmont is continuing to negotiate the terms of a future agreement with the USFS for Newmont to implement the approved Removal Action. No assurances can be made at this time with respect to the outcome of such negotiations and Newmont cannot predict the likelihood of additional expenditures related to this matter.

Dawn Mining Company LLC ("Dawn") - 51% Newmont Owned

Midnite mine site and Dawn mill site. Dawn previously leased an open pit uranium mine, currently inactive, on the Spokane Indian Reservation in the State of Washington. The mine site is subject to regulation by agencies of the U.S.

Department of Interior (the Bureau of Indian Affairs and the Bureau of Land Management), as well as the U.S. Environmental Protection Agency ("EPA").

As per the Consent Decree approved by the U.S. District Court for the Eastern District of Washington on January 17, 2012, the following actions were required of Newmont, Dawn, the Department of the Interior and the EPA: (i) Newmont and Dawn would design, construct and implement the cleanup plan selected by the EPA in 2006 for the Midnite mine site; (ii) Newmont and Dawn would reimburse the EPA for its costs associated with overseeing the work; (iii) the Department of the Interior would contribute a lump sum amount toward past EPA costs and future costs related to the cleanup of the Midnite mine site; (iv) Newmont and Dawn

Table of Contents

NEWMONT MINING CORPORATION

(dollars in millions, except per share, per ounce and per pound amounts)

would be responsible for all other EPA oversight costs and Midnite mine site cleanup costs; and (v) Newmont would post a surety bond for work at the site.

During 2012, the Department of Interior contributed its share of past EPA costs and future costs related to the cleanup of the Midnite mine site in a lump sum payment of \$42, which Newmont classified as restricted assets with interest on the Condensed Consolidated Balance Sheets for all periods presented. In 2016, Newmont completed the remedial design process (with the exception of the new water treatment plant (“WTP”) design which was awaiting the approval of the new National Pollutant Discharge Elimination System (“NPDES”) permit). Subsequently, the new NPDES permit was received in 2017 and the WTP design commenced in 2018. Newmont is managing the remediation project to implement Phase 1 remedial actions during the 2018 construction season with a focus on preparations to backfill Pit 4. In June 2018, \$11 was released from the trust account for remedial work completed.

The Dawn mill site is regulated by the Washington Department of Health and is in the process of being closed. Remediation at the Dawn mill site began in 2013. The Tailing Disposal Area 1-4 reclamation earthworks component was completed during 2017 with the embankment erosion protection completed in the second quarter of 2018. The remaining closure activity will consist primarily of addressing groundwater issues.

The remediation liability for the Midnite mine site and Dawn mill site is approximately \$163 at September 30, 2018.

Other Legal Matters

Minera Yanacocha S.R.L. – 51.35% Newmont Owned

Administrative Actions. The Peruvian government agency responsible for environmental evaluation and inspection, Organismo Evaluacion y Fiscalizacion Ambiental (“OEFA”), conducts periodic reviews of the Yanacocha site. In 2011, 2012, 2013, 2015, 2016, 2017 and 2018, OEFA issued notices of alleged violations of OEFA standards to Yanacocha and Conga relating to past inspections. OEFA has resolved some alleged violations with minimal or no findings. In 2015 and 2016, the water authority of Cajamarca issued notices of alleged regulatory violations, and resolved some allegations in 2017 with no findings. The experience with OEFA and the water authority is that in the case of a finding of violation, remedial action is often the outcome rather than a significant fine. The alleged OEFA violations currently range from zero to 46,500 units and the water authority alleged violations range from zero to 59 units, with each unit having a potential fine equivalent to approximately \$.001245 based on current exchange rates (\$0 to \$60). Yanacocha and Conga are responding to all notices of alleged violations, but cannot reasonably predict the outcome of the agency allegations.

Conga Project Constitutional Claim. On October 18, 2012, Marco Antonio Arana Zegarra filed a constitutional claim against the Ministry of Energy and Mines and Yanacocha requesting the Court to order the suspension of the Conga project as well as to declare not applicable the October 27, 2010, directorial resolution approving the Conga project Environmental Impact Assessment (“EIA”). On October 23, 2012, a Cajamarca judge dismissed the claims based on formal grounds finding that: (i) plaintiffs had not exhausted previous administrative proceedings; (ii) the directorial resolution approving the Conga EIA is valid, and was not challenged when issued in the administrative proceedings; (iii) there was inadequate evidence to conclude that the Conga project is a threat to the constitutional right of living in an adequate environment and; (iv) the directorial resolution approving the Conga project EIA does not guarantee that

the Conga project will proceed, so there was no imminent threat to be addressed by the Court. The plaintiffs appealed the dismissal of the case. The Civil Court of the Superior Court of Cajamarca confirmed the above mentioned resolution and the plaintiff presented an appeal. On March 13, 2015, the Constitutional Court published its ruling stating that the case should be sent back to the first court with an order to formally admit the case and start the judicial process in order to review the claim and the proofs presented by the plaintiff. Yanacocha has answered the claim. Neither the Company nor Yanacocha can reasonably predict the outcome of this litigation.

(dollars in millions, except per share, per ounce and per pound amounts)

Yanacocha Tax Dispute. In 2000, Yanacocha paid Buenaventura and Minas Conga S.R.L. a total of \$29 to assume their respective contractual positions in mining concession agreements with Chaupiloma Dos de Cajamarca S.M.R.L. The contractual rights allowed Yanacocha the opportunity to conduct exploration on the concessions, but not a purchase of the concessions. The tax authority alleges that the payments to Buenaventura and Minas Conga S.R.L. were acquisitions of mining concessions requiring the amortization of the amounts under the Peru Mining Law over the life of the mine. Yanacocha expensed the amounts at issue in the initial year since the payments were not for the acquisition of a concession but rather these expenses represent the payment of an intangible and therefore, amortizable in a single year or proportionally for up to ten years according to Income Tax Law. In 2010, the tax court in Peru ruled in favor of Yanacocha and the tax authority appealed the issue to the judiciary. The first appellate court confirmed the ruling of the tax court in favor of Yanacocha. However, in November, 2015, a Superior Court in Peru made an appellate decision overturning the two prior findings in favor of Yanacocha. Yanacocha has appealed the Superior Court ruling to the Peru Supreme Court. The potential liability in this matter is in the form of fines and interest in an amount up to \$83. While the Company has assessed that the likelihood of a ruling against Yanacocha in the Supreme Court as remote, it is not possible to fully predict the outcome of this litigation.

NWG Investments Inc. v. Fronteer Gold Inc.

In April 2011, Newmont acquired Fronteer Gold Inc. ("Fronteer").

Fronteer acquired NewWest Gold Corporation ("NewWest Gold") in September 2007. At the time of that acquisition, NWG Investments Inc. ("NWG") owned approximately 86% of NewWest Gold and an individual named Jacob Safra owned or controlled 100% of NWG. Prior to its acquisition of NewWest Gold, Fronteer entered into a June 2007 lock-up agreement with NWG providing that, among other things, NWG would support Fronteer's acquisition of NewWest Gold. At that time, Fronteer owned approximately 47% of Aurora Energy Resources Inc. ("Aurora"), which, among other things, had a uranium exploration project in Labrador, Canada.

NWG contends that, during the negotiations leading up to the lock-up agreement, Fronteer represented to NWG, among other things, that Aurora would commence uranium mining in Labrador by 2013, that this was a firm date, that Aurora faced no current environmental issues in Labrador and that Aurora's competitors faced delays in commencing uranium mining. NWG further contends that it entered into the lock-up agreement and agreed to support Fronteer's acquisition of NewWest Gold in reliance upon these purported representations. On October 11, 2007, less than three weeks after the Fronteer-NewWest Gold transaction closed, a member of the Nunatsiavut Assembly introduced a motion calling for the adoption of a moratorium on uranium mining in Labrador. On April 8, 2008, the Nunatsiavut Assembly adopted a three-year moratorium on uranium mining in Labrador. NWG contends that Fronteer was aware during the negotiations of the NWG/Fronteer lock-up agreement that the Nunatsiavut Assembly planned on adopting this moratorium and that its adoption would preclude Aurora from commencing uranium mining by 2013, but Fronteer nonetheless fraudulently induced NWG to enter into the lock-up agreement.

On September 24, 2012, NWG served a summons and complaint on the Company, and then amended the complaint to add Newmont Canada Holdings ULC as a defendant. The complaint also named Fronteer Gold Inc. and Mark O'Dea as defendants. The complaint sought rescission of the merger between Fronteer and NewWest Gold and \$750 in damages. In August 2013 the Supreme Court of New York, New York County issued an order granting the defendants' motion to dismiss on forum non conveniens. Subsequently, NWG filed a notice of appeal of the decision and then a

notice of dismissal of the appeal on March 24, 2014.

On February 26, 2014, NWG filed a lawsuit in Ontario Superior Court of Justice against Fronteer Gold Inc., Newmont Mining Corporation, Newmont Canada Holdings ULC, Newmont FH B.V. and Mark O'Dea. The Ontario complaint is based upon substantially the same allegations contained in the New York lawsuit with claims for fraudulent and negligent misrepresentation. NWG seeks disgorgement of profits since the close of the NWG deal on September 24, 2007 and damages in the amount of C\$1.2 billion. Newmont, along with other defendants, served the plaintiff with its statement of defense on October 17, 2014. Newmont intends to vigorously defend this matter, but cannot reasonably predict the outcome.

(dollars in millions, except per share, per ounce and per pound amounts)

Other Commitments and Contingencies

Newmont is from time to time involved in various legal proceedings related to its business. Except in the above described proceedings, management does not believe that adverse decisions in any pending or threatened proceeding or that amounts that may be required to be paid by reason thereof will have a material adverse effect on the Company's financial condition or results of operations.

In connection with our investment in Galore Creek, Newmont will owe NovaGold Resources Inc. \$75 upon the earlier of approval to construct a mine, mill and all related infrastructure for the Galore Creek project or the initiation of construction of a mine, mill or any related infrastructure. The amount due is non-interest bearing. The decision for an approval and commencement of construction is contingent on the results of a prefeasibility and feasibility study, neither of which have occurred. As such, this amount has not been accrued.

Table of Contents**ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS** (dollars in millions, except per share, per ounce and per pound amounts)

The following Management’s Discussion and Analysis (“MD&A”) provides information that management believes is relevant to an assessment and understanding of the consolidated financial condition and results of operations of Newmont Mining Corporation and its subsidiaries (collectively, “Newmont,” the “Company,” “our” and “we”). We use certain non-GAAP financial measures in our MD&A. For a detailed description of each of the non-GAAP measures used in this MD&A, please see the discussion under “Non-GAAP Financial Measures” beginning on page 70. References to “A\$” refers to Australian currency and “C\$” refers to Canadian currency.

This item should be read in conjunction with our interim unaudited Condensed Consolidated Financial Statements and the notes thereto included in this quarterly report. Additionally, the following discussion and analysis should be read in conjunction with Management’s Discussion and Analysis of Consolidated Financial Condition and Results of Operations and the consolidated financial statements included in Part II of our Annual Report on Form 10-K for the year ended December 31, 2017 filed February 22, 2018 and revisions filed April 26, 2018 on Form 8-K.

Overview

Newmont is one of the world’s largest gold producers and is the only gold company included in the S&P 500 Index and Fortune 500. We have been included in the Dow Jones Sustainability Index-World for 12 consecutive years and have adopted the World Gold Council’s Conflict-Free Gold Policy. We are also engaged in the exploration for and acquisition of gold and copper properties. We have significant operations and/or assets in the United States (“U.S.”), Australia, Peru, Ghana and Suriname.

We continue to focus on improving safety and efficiency at our operations, maintaining leading environmental, social and governance practices, and building a stronger portfolio of longer-life, lower cost mines to generate the financial flexibility we need to fund our best projects, reduce debt, and return cash to shareholders.

During the third quarter of 2018, we purchased a 50% interest in the Galore Creek Partnership (“Galore Creek”) from NovaGold Resources Inc. for cash consideration of \$100 as well as deferred payments of \$100 and contingent payments of \$75. Refer to Note 1 of the Condensed Consolidated Financial Statements for further details regarding this transaction. Additionally, in the third quarter of 2018, we purchased interests in Evrim Resources, Orosur Mining and Miranda Gold, totaling \$8, to secure rights to highly prospective properties in Mexico and Colombia.

Consolidated Financial Results

The details of our Net income (loss) from continuing operations attributable to Newmont stockholders are set forth below:

	Three Months Ended		
	September 30, 2018	2017	Increase (decrease)
Net income (loss) from continuing operations attributable to Newmont stockholders	\$ (161)	\$ 213	\$ (374)
Net income (loss) from continuing operations attributable to Newmont stockholders per common share, diluted	\$ (0.31)	\$ 0.39	\$ (0.70)

	Nine Months Ended September 30,		Increase (decrease)
	2018	2017	
Net income (loss) from continuing operations attributable to Newmont stockholders	\$ 283	\$ 473	\$ (190)
Net income (loss) from continuing operations attributable to Newmont stockholders per common share, diluted	\$ 0.53	\$ 0.88	\$ (0.35)

The decreases in Net income (loss) from continuing operations attributable to Newmont stockholders for the three and nine months ended September 30, 2018, compared to the same periods in 2017, are primarily due to the impairment of long-lived assets

Table of Contents

related to certain exploration properties and the Emigrant operation in North America and lower production at various sites, including CC&V, Boddington, Akyem and Carlin, partially offset by lower income tax expense and a gain from the sale of our royalty portfolio in June 2018. The three month comparison was also negatively impacted by lower average realized gold prices. For discussion regarding variations in production volumes and unit cost metrics, see Results of Consolidated Operations below.

The details of our Sales are set forth below. See Note 4 to our Condensed Consolidated Financial Statements for additional information.

	Three Months Ended September 30,		Increase (decrease)	Percent Change	
	2018	2017			
Gold	\$ 1,656	\$ 1,799	\$ (143)	(8)	%
Copper	70	80	(10)	(13)	
	\$ 1,726	\$ 1,879	\$ (153)	(8)	%

	Nine Months Ended September 30,		Increase (decrease)	Percent Change	
	2018	2017			
Gold	\$ 4,976	\$ 5,217	\$ (241)	(5)	%
Copper	229	227	2	1	
	\$ 5,205	\$ 5,444	\$ (239)	(4)	%

The following analysis summarizes consolidated gold sales:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Consolidated gold sales:				
Gross before provisional pricing	\$ 1,668	\$ 1,806	\$ 5,007	\$ 5,232
Provisional pricing mark-to-market	(5)	2	(10)	9
Gross after provisional pricing	1,663	1,808	4,997	5,241
Treatment and refining charges	(7)	(9)	(21)	(24)
Net	\$ 1,656	\$ 1,799	\$ 4,976	\$ 5,217
Consolidated gold ounces sold (thousands)	1,378	1,411	3,914	4,178
Average realized gold price (per ounce)(1):				
Gross before provisional pricing	\$ 1,210	\$ 1,281	\$ 1,279	\$ 1,253
Provisional pricing mark-to-market	(4)	1	(3)	2
Gross after provisional pricing	1,206	1,282	1,276	1,255
Treatment and refining charges	(5)	(6)	(5)	(6)
Net	\$ 1,201	\$ 1,276	\$ 1,271	\$ 1,249

(1) Per ounce measures may not recalculate due to rounding.

The change in consolidated gold sales is due to:

	Three Months Ended September 30, 2018 vs. 2017	Nine Months Ended September 30, 2018 vs. 2017
Change in consolidated ounces sold	\$ (41)	\$ (330)
Change in average realized gold price	(104)	86
Change in treatment and refining charges	2	3
	\$ (143)	\$ (241)

The decrease in gold sales during the three months ended September 30, 2018, compared to the same period in 2017, is primarily due to lower average realized gold prices and lower production at various sites, including Carlin and CC&V. The decrease in gold sales during the nine months ended September 30, 2018, compared to the same period in 2017, is primarily due to lower

Table of Contents

production at various sites, including CC&V, Boddington, Akyem and Carlin, partially offset by higher average realized gold prices. For further discussion regarding changes in volumes, see Results of Consolidated Operations below.

The following analysis summarizes consolidated copper sales:

	Three Months Ended September 30, 2018		Nine Months Ended September 30, 2018	
	2018	2017	2018	2017
Consolidated copper sales:				
Gross before provisional pricing	\$ 78	\$ 77	\$ 246	\$ 228
Provisional pricing mark-to-market	(4)	6	(7)	9
Gross after provisional pricing	74	83	239	237
Treatment and refining charges	(4)	(3)	(10)	(10)
Net	\$ 70	\$ 80	\$ 229	\$ 227
Consolidated copper pounds sold (millions)	28	26	82	84
Average realized copper price (per pound)(1):				
Gross before provisional pricing	\$ 2.77	\$ 2.98	\$ 3.00	\$ 2.73
Provisional pricing mark-to-market	(0.14)	0.20	(0.08)	0.10
Gross after provisional pricing	2.63	3.18	2.92	2.83
Treatment and refining charges	(0.13)	(0.12)	(0.13)	(0.12)
Net	\$ 2.50	\$ 3.06	\$ 2.79	\$ 2.71

(1) Per pound measures may not recalculate due to rounding.

The change in consolidated copper sales is due to:

	Three Months Ended September 30, 2018 vs. 2017	Nine Months Ended September 30, 2018 vs. 2017
Change in consolidated pounds sold	\$ 6	\$ (5)
Change in average realized copper price	(15)	7
Change in treatment and refining charges	(1)	—
	\$ (10)	\$ 2

The decrease in copper sales during the three months ended September 30, 2018, compared to the same period in 2017, is primarily due to lower average realized copper prices. Copper sales remained relatively flat during the nine months ended September 30, 2018, compared to the same period in 2017, as production volumes and average realized copper prices were in line with the prior year. For further discussion regarding changes in volumes, see Results of Consolidated Operations below.

The details of our Costs applicable to sales are set forth below. See Note 3 to our Condensed Consolidated Financial Statements for additional information.

		Three Months Ended		Increase (decrease)	Percent Change	
		September 30, 2018	2017			
Gold	\$	952	\$ 1,017	\$ (65)	(6)	%
Copper		43	36	7	19	
	\$	995	\$ 1,053	\$ (58)	(6)	%

		Nine Months Ended		Increase (decrease)	Percent Change	
		September 30, 2018	2017			
Gold	\$	2,853	\$ 2,890	\$ (37)	(1)	%
Copper		136	119	17	14	
	\$	2,989	\$ 3,009	\$ (20)	(1)	%

Table of Contents

The decrease in Costs applicable to sales for gold during the three months ended September 30, 2018, compared to the same period in 2017, is primarily due to lower production at various sites and a favorable Australian dollar foreign currency exchange rate, partially offset by higher oil prices. Costs applicable to sales for gold during the nine months ended September 30, 2018, remained relatively flat, compared to the same period in 2017, as lower production at various sites was largely offset by higher stockpile and leach pad inventory adjustments and higher oil prices.

The increases in Costs applicable to sales for copper during the three and nine months ended September 30, 2018, compared to the same periods in 2017, are primarily due to a higher co-product allocation of costs to copper based on a higher relative copper sales value.

For discussion regarding variations in operations, see Results of Consolidated Operations below.

The details of our Depreciation and amortization are set forth below. See Note 3 to our Condensed Consolidated Financial Statements for additional information.

	Three Months Ended September 30,		Increase	Percent	
	2018	2017	(decrease)	Change	
Gold	\$ 283	\$ 311	\$ (28)	(9)	%
Copper	9	8	1	13	
Other	7	9	(2)	(22)	
	\$ 299	\$ 328	\$ (29)	(9)	%

	Nine Months Ended September 30,		Increase	Percent	
	2018	2017	(decrease)	Change	
Gold	\$ 827	\$ 886	\$ (59)	(7)	%
Copper	29	27	2	7	
Other	23	25	(2)	(8)	
	\$ 879	\$ 938	\$ (59)	(6)	%

The decreases in Depreciation and amortization for gold during the three and nine months ended September 30, 2018, compared to the same periods in 2017, are primarily due to lower production at various sites. The decrease in the nine-month comparison was partially offset by higher stockpile and leach pad inventory adjustments.

The increases in Depreciation and amortization for copper during the three and nine months ended September 30, 2018, compared to the same periods in 2017, are primarily due to a higher co-product allocation of costs to copper based on a higher relative copper sales value.

For discussion regarding variations in operations, see Results of Consolidated Operations below.

Reclamation and remediation increased by \$5 during the three months ended September 30, 2018, compared to the same period in 2017, primarily due to increased accretion. Reclamation and remediation decreased by \$2

during the nine months ended September 30, 2018, compared to the same period in 2017, primarily due to updated reclamation liability assumptions at Minera Yanacocha S.R.L. (“Yanacocha”) regarding water treatment costs on non-operating leach pads in 2017, partially offset by updated assumptions at a historic mine site for future water management costs along with increased accretion in 2018.

Exploration remained relatively flat during the three months ended September 30, 2018, compared to the same period in 2017, as expenditures were in line with the prior year. Exploration increased by \$7 during the nine months ended September 30, 2018, compared to the same period in 2017, primarily due to increased expenditures at various projects in North America and Australia as we continue to focus on developing future reserves.

Advanced projects, research and development decreased by \$4 during the three months ended September 30, 2018, compared to the same period in 2017, primarily due to lower consulting costs associated with full potential opportunities in North America and prior-year costs associated with the Tanami Expansion 2 project. Advanced projects, research and development increased by \$8

Table of Contents

during the nine months ended September 30, 2018, compared to the same period in 2017, primarily due to on-going study costs associated with the Long Canyon Phase 2 project in North America and the Yanacocha Sulfides and Chaquicocha Oxides projects in South America.

General and administrative remained relatively flat during the three months ended September 30, 2018, compared to the same period in 2017, as expenditures were in line with the prior year. General and administrative increased by \$10 during the nine months ended September 30, 2018, compared to the same periods in 2017, primarily due to higher IT project and services costs.

Impairment of long-lived assets increased by \$366 and \$363 during the three and nine months ended September 30, 2018, respectively, compared to the same periods in 2017, primarily due to the impairment of long-lived assets at certain exploration properties and the Emigrant operation in North America, due to the Company's decision to focus on advancing other projects and a change in mine plan resulting in a significant decrease in mine life at Emigrant, respectively. For additional information regarding these impairments, see Note 6 and 15 to our Condensed Consolidated Financial Statements. The 2017 impairments were primarily related to non-cash write-downs of obsolete assets at Yanacocha and Australia.

Other expense, net increased by \$4 during the three months ended September 30, 2018, compared to the same period in 2017, primarily due to prior-year net adjustments to the contingent consideration and related liabilities associated with the acquisition of the final 33.33% interest in Boddington in June 2009 in addition to increased other expenses in Africa and South America in 2018. Other expense, net remained consistent during the nine months ended September 30, 2018, compared to the same period in 2017.

Other income, net increased by \$27 and \$165 during the three and nine months ended September 30, 2018, respectively, compared to the same periods in 2017. For the three month comparison, the increase is primarily due to business interruption insurance proceeds of \$25 recorded in September 2018 associated with the East wall slips at Kalgoorlie in the first half of 2018 and decreases in Australia-denominated liabilities from a weaker Australian dollar, partially offset by unrealized holding losses on marketable equity securities related primarily to Continental Gold Inc. For the nine month comparison, the increase is primarily due to a gain from the exchange of certain royalty interests for cash consideration and an equity ownership and warrants in Maverix Metals Inc. ("Maverix") in June 2018, decreases in Australia-denominated liabilities from a weaker Australian dollar, an increase in interest income, and an increase in business interruption insurance proceeds, partially offset by unrealized holding losses on marketable equity securities related primarily to Continental Gold Inc.

Interest expense, net decreased by \$5 and \$34 during the three and nine months ended September 30, 2018, respectively, compared to the same periods in 2017, primarily due to reduced debt balances as a result of the repayment of the 2017 Convertible Senior Notes in July 2017 and higher capitalized interest related to various development projects in 2018.

Income and mining tax expense (benefit) was \$3 and \$126, and \$73 and \$350 during the three and nine months ended September 30, 2018 and September 30, 2017, respectively. The effective tax rate is driven by a number of factors and the comparability of our income tax expense for the reported periods will be primarily affected by (i) variations in our income before income taxes; (ii) geographic distribution of that income; (iii) impacts of the enactment of tax reform; (iv) the non-recognition of tax assets; (v) percentage depletion; (vi) and the impact of specific transactions and assessments. As a result, the effective tax rate will

Table of Contents

fluctuate, sometimes significantly, year to year. This trend is expected to continue in future periods. See Note 9 for further discussion of income taxes.

Consolidated	\$ (128)	(2) %	\$ 3	\$ 460	27 %	\$ 126	

- (1) The September 30, 2017 information has not been presented as such comparison would not be meaningful as a result of tax restructuring implemented by the Company at December 31, 2017. Due to changes the Tax Cuts and Jobs Act made to certain international tax provisions, it was prudent for the Company to restructure the holding of its non-U.S. operations for U.S. federal income tax purposes. This was accomplished by executing and filing various “check the box” elections with respect to certain non-U.S. subsidiaries of the Company. The elections resulted in the conversions of these subsidiaries from branches and/or foreign partnerships to regarded foreign corporations.
- (2) Represents income (loss) from continuing operations by geographic location before income taxes and equity in affiliates. These amounts will not reconcile to the Segment Information for the reasons stated in Note 3.
- (3) Includes deduction for percentage depletion of \$(7) and \$(26) and mining taxes of \$(11) and \$(1), respectively.
- (4) Includes deduction for percentage depletion of \$(1) and \$(7), respectively.
- (5) Includes valuation allowance of \$13 and \$2, respectively.
- (6) Includes mining taxes of \$24 and \$44 and valuation allowance of \$- and \$(46), respectively.
- (7) Includes valuation allowance of \$(2) and \$8 and mining taxes of \$- and \$3, respectively.
- (8) In accordance with applicable accounting rules, the interim provision for income taxes is adjusted to equal the consolidated tax rate.

We expect to record additional updates to the provisional amounts for the impacts of US tax reform during the fourth quarter of 2018 following completion of the 2017 income tax returns and within the 12 month time frame provided under the SEC’s Staff Accounting Bulletin 118. There are no new estimates associated with US tax reform in the income tax expense for the three months ended September 30, 2018.

Equity income (loss) of affiliates decreased by \$10 and \$21 during the three and nine months ended September 30, 2018, respectively, compared to the same periods in 2017, primarily due to increased losses recognized at TMAC Resources Inc. and Minera La Zanja S.R.L.

Net income (loss) from discontinued operations increased by \$23 and \$101 during the three and nine months ended September 30, 2018, respectively, compared to the same periods in 2017, primarily due to the impacts on the Holt royalty obligation from an increase in discount rate and a decrease in gold price. The nine-month period was also impacted by a decrease in expected production from prior periods. For additional information regarding our discontinued operations, see Note 10 to our Condensed Consolidated Financial Statements.

Net loss (income) attributable to noncontrolling interests from continuing operations changed from a loss of \$7 to income of \$21 during the three months ended September 30, 2018, compared to the same period of 2017, primarily due to income at Yanacocha in the third quarter of 2018 compared to losses in the third quarter of 2017. Net loss (income) attributable to noncontrolling interests from continuing operations changed from a loss of \$20 to income of \$26 during the nine months ended September 30, 2018, compared to the same period of 2017, primarily due to decreased losses at Yanacocha.

- (1) Excludes Depreciation and amortization and Reclamation and remediation.
- (2) All-In Sustaining Costs is a non-GAAP financial measure. See Non-GAAP Financial Measures beginning on page 70.

Three months ended September 30, 2018 compared to 2017

Consolidated gold production decreased 3% primarily due to lower production at Carlin due to lower mill throughput, lower leach production at CC&V in North America and lower ore grade milled at Kalgoorlie in Australia, partially offset by higher ore grade milled at Ahafo in Africa and Yanacocha in South America.

Consolidated copper production decreased 4% primarily due to lower ore grade milled at Boddington in Australia.

Costs applicable to sales per consolidated gold ounce decreased 4% primarily due to a lower co-product allocation of costs to gold based on a lower relative gold sales value and a favorable Australian dollar foreign currency exchange rate, partially offset by lower ounces sold, higher oil prices and higher costs at Phoenix. Costs applicable to sales per consolidated copper pound increased 12% primarily due to a higher co-product allocation of costs to copper based on a higher relative copper sales value.

Table of Contents

Depreciation and amortization per consolidated gold ounce decreased 7% primarily due to lower amortization rates. Depreciation and amortization per consolidated copper pound increased 7% primarily due to a higher co-product allocation of costs to copper based on a higher relative copper sales value.

All-in sustaining costs per consolidated gold ounce were in line with the prior year as lower costs applicable to sales per ounce were offset by higher sustaining capital spend. All-in sustaining costs per consolidated copper pound increased 13% primarily due to higher costs applicable to sales per pound.

Nine months ended September 30, 2018 compared to 2017

Consolidated gold production decreased 7% primarily due to lower ore grade milled and recovery at CC&V and Carlin in North America, in addition to a build up of concentrate inventory at CC&V, lower ore grade milled and recovery at Boddington in Australia and lower mill throughput and ore grade at Akyem in Africa, partially offset by higher mill throughput and ore grade milled at Tanami in Australia and higher ore grade milled at Ahafo in Africa.

Consolidated copper production decreased 5% primarily due to lower ore grade milled at Phoenix in North America.

Costs applicable to sales per consolidated gold ounce increased 5% primarily due to lower ounces sold, higher stockpile and leach pad inventory adjustments and higher oil prices, partially offset by a lower co-product allocation of costs to gold. Costs applicable to sales per consolidated copper pound increased 17% primarily due to a higher co-product allocation of costs to copper.

Depreciation and amortization per consolidated gold ounce was in line with the prior year. Depreciation and amortization per consolidated copper pound increased 9% primarily due to a higher co-product allocation of costs to copper and lower copper pounds sold.

All-in sustaining costs per consolidated gold ounce increased 7% primarily due to higher costs applicable to sales per ounce and higher sustaining capital spend. All-in sustaining costs per consolidated copper pound increased 18% primarily due to higher costs applicable to sales per pound.

(1) Excludes Depreciation and amortization and Reclamation and remediation.

(2) All-In Sustaining Costs is a non-GAAP financial measure. See Non-GAAP Financial Measures beginning on page 70.

(3) All-In Sustaining Costs and Depreciation and amortization include expense for other regional projects.

Three months ended September 30, 2018 compared to 2017

Carlin, USA. Gold production decreased 12% primarily due to lower mill throughput at Mill 6 from unscheduled downtime and ore chemistry, as well as lower leach tons placed. Costs applicable to sales per ounce increased 7% primarily due to lower ounces sold and higher stockpile and leach-pad inventory adjustments. Total stockpile and leach pad inventory adjustments at Carlin include \$22 related to a write-down at Emigrant from a change in mine plan, resulting in a significant decrease in mine life in the third quarter of 2018. Depreciation and amortization per ounce increased 9% primarily due to higher stockpile and leach-pad inventory adjustments mainly at Emigrant and lower ounces sold. All-in sustaining costs per ounce increased 5% primarily due to higher sustaining capital spend.

Phoenix, USA. Gold production decreased 5% primarily due to lower leach production from reduced ore placement and lower grade at Lone Tree, as well as lower mill recovery, partially offset by higher mill throughput. Copper production increased 14% primarily due to higher ore grade milled and throughput. Costs applicable to sales per ounce increased 14% primarily due to lower ounces sold and higher maintenance costs. Costs applicable to sales per pound increased 18% primarily due to a higher co-product allocation of costs to copper. Depreciation and amortization per ounce decreased 6% primarily due to lower amortization rates. Depreciation and amortization per pound increased 16% primarily due to a higher co-product allocation of costs to copper. All-in sustaining costs per ounce increased 26% primarily due to higher costs applicable to sales per ounce and higher sustaining capital spend. All-in sustaining costs per pound increased 41% primarily due to higher costs applicable to sales per pound and higher sustaining capital spend.

Twin Creeks, USA. Gold production increased 13% primarily due to higher mill throughput and leach tons placed, in addition to a draw down of in-circuit inventory as compared to a build up in the prior year. Costs applicable to sales per ounce decreased 15% primarily due to higher ounces sold and lower stockpile and leach pad inventory adjustments. Depreciation and amortization per ounce decreased 22% primarily due to higher ounces sold and lower stockpile and leach pad inventory adjustments. All-in sustaining costs per ounce decreased 14% primarily due to lower costs applicable to sales per ounce.

Long Canyon, USA. Gold production decreased 21% primarily due to lower ore grade mined. Costs applicable to sales per ounce increased 57% primarily due to lower ounces sold and an unfavorable strip ratio. Depreciation and amortization per ounce increased 8% primarily due to lower ounces sold and higher amortization rates. All-in sustaining costs per ounce increased 79% primarily due to higher costs applicable to sales per ounce and higher sustaining capital spend.

CC&V, USA. Gold production decreased 25% primarily due to lower ore grade mined resulting in lower leach production. Costs applicable to sales per ounce increased 21% primarily due to lower ounces sold. Depreciation and amortization per ounce decreased

Table of Contents

18% primarily due to lower amortization rates, driven by reserve life additions, partially offset by lower ounces sold. All-in sustaining costs per ounce increased 20% primarily due to higher costs applicable to sales per ounce.

Nine months ended September 30, 2018 compared to 2017

Carlin, USA. Gold production decreased 7% primarily due to lower leach tons placed and lower leach recovery, as well as lower ore grade milled. Costs applicable to sales per ounce increased 6% primarily due to higher stockpile and leach pad inventory adjustments and lower ounces sold. Total stockpile and leach pad inventory adjustments at Carlin include \$22 related to a write-down at Emigrant from a change in mine plan, resulting in a significant decrease in mine life in the third quarter of 2018. Depreciation and amortization per ounce increased 4% due to higher stockpile and leach pad inventory adjustments related to the write-down at Emigrant and lower ounces sold. All-in sustaining costs per ounce was in line with the prior year.

Phoenix, USA. Gold production was in line with the prior year. Copper production decreased 15% primarily due to lower ore grade milled. Costs applicable to sales per ounce were in line with the prior year as higher maintenance costs were offset by higher ounces sold. Costs applicable to sales per pound increased 14% primarily due to lower copper pounds sold. Depreciation and amortization per ounce decreased 13% primarily due to higher ounces sold and lower amortization rates. Depreciation and amortization per pound increased 16% primarily due to lower copper pounds sold. All-in sustaining costs per ounce were in line with the prior year. All-in sustaining costs per pound increased 21% primarily due to the higher costs applicable to sales per pound and higher sustaining capital spend.

Twin Creeks, USA. Gold production decreased 9% primarily due to lower ore grades mined and milled as a result of mine sequencing. Costs applicable to sales per ounce increased 22% primarily due to lower ounces sold and higher stockpile and leach pad inventory adjustments. Depreciation and amortization per ounce increased 6% primarily due to lower ounces sold. All-in sustaining costs per ounce increased 17% primarily due to higher costs applicable to sales per ounce, partially offset by lower sustaining capital spend.

Long Canyon, USA. Gold production was in line with the prior year as lower ore grade mined were offset by higher leach tons placed. Costs applicable to sales per ounce increased 32% primarily due to lower ore grade mined. Depreciation and amortization per ounce increased 7% primarily due to higher amortization rates. All-in sustaining costs per ounce increased 48% primarily due to higher costs applicable to sales per ounce and higher sustaining capital spend.

CC&V, USA. Gold production decreased 41% primarily due to lower ore grade mined, a build up of concentrate inventory to be shipped and processed in Nevada and lower leach tons placed at Valley Leach Fill 2. Costs applicable to sales per ounce increased 17% primarily due to lower ounces sold. Depreciation and amortization per ounce decreased 10% primarily due to lower amortization rates driven by reserve life additions. All-in sustaining costs per ounce increased 28% primarily due to higher costs applicable to sales per ounce and higher sustaining capital spend.

(1) Excludes Depreciation and amortization and Reclamation and remediation.

(2) All-In Sustaining Costs is a non-GAAP financial measure. See Non-GAAP Financial Measures beginning on page 70.

(3) All-In Sustaining Costs and Depreciation and amortization include expense for other regional projects.

(4) In December 2017, Yanacocha repurchased a 5% interest held by the International Finance Corporation, increasing Newmont's ownership in Yanacocha from 51.35% to 54.05% as of December 31, 2017. In June 2018, Yanacocha sold a 5% ownership interest to a subsidiary of Sumitomo Corporation, reducing Newmont's ownership to 51.35%. See Note 11 to our Condensed Consolidated Financial Statements.

Three months ended September 30, 2018 compared to 2017

Yanacocha, Peru. Gold production increased 8% primarily due to higher ore grade milled, recovery and throughput partially offset by lower leach production. Costs applicable to sales per ounce decreased 32% primarily due to lower stockpile and leach pad inventory adjustments and higher ounces sold. Depreciation and amortization per ounce decreased 30% primarily due to lower stockpile and leach pad inventory adjustments and higher ounces sold. All-in sustaining costs per ounce decreased 28% primarily due to lower costs applicable to sales per ounce partially offset by higher sustaining capital spend.

Merian, Suriname. Gold production was in line with the prior year. Costs applicable to sales per ounce were in line with the prior year. Depreciation and amortization per ounce decreased 4% due to lower amortization rates. All-in sustaining costs per ounce increased 7% primarily due to higher support costs and higher sustaining capital spend.

Nine months ended September 30, 2018 compared to 2017

Yanacocha, Peru. Gold production decreased 7% primarily due to lower leach production. Costs applicable to sales per ounce decreased 14% due to lower stockpile and leach pad inventory adjustments and higher by-product credits from the sale of copper and silver concentrates. Depreciation and amortization per ounce decreased 18% primarily due to lower stockpile and leach pad inventory adjustments and lower amortization rates. All-in sustaining costs per ounce decreased 13% due to lower costs applicable to sales per ounce.

Merian, Suriname. Gold production was in line with the prior year as lower ore grade milled and recovery were offset by higher throughput and a draw down of in-circuit inventory as compared to a build up in the prior year. Costs applicable to sales per ounce increased 10% primarily due to lower ore grade mined. Depreciation and amortization per ounce decreased 8% primarily due to lower amortization rates from reserve life additions. All-in sustaining costs per ounce increased 21% primarily due to higher sustaining capital spend and higher costs applicable to sales per ounce.

(1) Excludes Depreciation and amortization and Reclamation and remediation.

(2) All-In Sustaining Costs is a non-GAAP financial measure. See Non-GAAP Financial Measures beginning on page 70.

(3) All-In Sustaining Costs and Depreciation and amortization include expense for other regional projects.

Three months ended September 30, 2018 compared to 2017

Boddington, Australia. Gold production decreased 5% primarily due to lower ore grade milled in addition to a lower draw down of in-circuit inventory. Copper production decreased 10% primarily due to lower ore grade milled. Costs applicable to sales per ounce increased 7% primarily due to higher oil prices and higher mill maintenance costs,

partially offset by a lower co-product allocation of costs to gold and a favorable Australian dollar foreign currency exchange rate. Costs applicable to sales per pound increased 11% primarily due to higher oil prices, higher mill maintenance costs and a higher co-product allocation of costs to copper, partially offset by a favorable Australian dollar foreign currency exchange rate. Depreciation and amortization per ounce decreased 4% primarily due to a lower co-product allocation of costs to gold. Depreciation and amortization per pound increased 4% primarily due to a higher co-product allocation of costs to copper. All-in sustaining costs per ounce increased 4% primarily due to higher costs applicable to sales per ounce, partially offset by lower sustaining capital spend. All-in sustaining costs per pound increased 6% primarily due to higher costs applicable to sales per pound.

Tanami, Australia. Gold production increased 8% primarily due to higher ore grade milled and a draw down of in-circuit inventory as compared to a build up in the prior year partially offset by lower mill throughput. Costs applicable to sales per ounce decreased 7% primarily due to higher ounces sold and a favorable Australian dollar foreign currency exchange rate, partially offset by higher mine maintenance costs, higher paste-fill activity and higher oil prices. Depreciation and amortization per ounce was in line with the prior year. All-in sustaining costs per ounce decreased 9% primarily due to lower costs applicable to sales per ounce and lower sustaining capital spend.

Table of Contents

Kalgoorlie, Australia. Gold production decreased 21% primarily due to lower ore grades milled and a lower draw down of in-circuit inventory, partially offset by higher mill throughput. The lower ore grade milled was a result of reduced ore tons mined from the pit due to a failure in the East wall of the pit, leading to the processing of lower-grade stockpiles. Costs applicable to sales per ounce increased 9% primarily due to lower ounces sold, higher mining costs per ton as a result of the failure in the East wall of the pit, higher site support costs and higher oil prices partially offset by a favorable Australian dollar foreign currency exchange rate. Depreciation and amortization per ounce increased 45% primarily due to lower ounces sold, asset additions and higher amortization rates. All-in sustaining costs per ounce increased 7% primarily due to higher costs applicable to sales per ounce.

Nine months ended September 30, 2018 compared to 2017

Boddington, Australia. Gold production decreased 10% primarily due to lower ore grade milled and recovery, partially offset by higher mill throughput. Copper production was in line with the prior year. Costs applicable to sales per ounce increased 10% primarily due to lower ounces sold and higher oil prices partially offset by a lower co-product allocation of costs to gold. Costs applicable to sales per pound increased 21% primarily due to higher oil prices and a higher co-product allocation of costs to copper. Depreciation and amortization per ounce decreased 4% due to a lower co-product allocation of costs to gold, partially offset by lower ounces sold. Depreciation and amortization per pound increased 12% primarily due to a higher co-product allocation of costs to copper. All-in sustaining costs per ounce increased 9% primarily due to higher costs applicable to sales per ounce. All-in sustaining costs per pound increased 18% primarily due to higher costs applicable to sales per pound.

Tanami, Australia. Gold production increased 19% primarily due to higher mill throughput, ore grade milled and recovery. Throughput was higher primarily due to the Tanami Expansion project achieving commercial production in the third quarter of 2017, coupled with the mill being placed into care and maintenance for 21 days in early 2017 following record high rainfall that blocked transport routes, limiting access to fuel and other resources. Costs applicable to sales per ounce was in line with the prior year. Depreciation and amortization per ounce decreased 8% primarily due to higher ounces sold. All-in sustaining costs per ounce were in line with the prior year.

Kalgoorlie, Australia. Gold production decreased 6% primarily due to lower ore grade milled and a build up of in-circuit inventory compared to a draw down in the prior year partially offset by higher mill throughput and recovery. The lower ore grade milled was a result of reduced ore tons mined from the pit due to a failure in the East wall of the pit, leading to the processing of lower-grade stockpiles. Costs applicable to sales per ounce increased 9% primarily due to lower ounces sold, higher mining costs per ton as a result of the failure in the East wall of the pit, higher site support costs and higher oil prices. Depreciation and amortization per ounce increased 35% primarily due to lower ounces sold, asset additions and higher amortization rates. All-in sustaining costs per ounce increased 12% primarily due to higher costs applicable to sales per ounce and higher sustaining capital spend.

Table of Contents

Three months ended September 30, 2018 compared to 2017

Ahafo, Ghana. Gold production increased 35% primarily due to higher ore grade milled from the ramp up of mining at Subika Underground and higher mill recovery, partially offset by lower mill throughput. Costs applicable to sales per ounce decreased 17% primarily due to higher ounces sold and lower power costs, partially offset by higher oil prices. Depreciation and amortization per ounce increased 18% primarily due to higher amortization rates from asset additions. All-in sustaining costs per ounce decreased 14% primarily due to lower costs applicable to sales per ounce, partially offset by higher sustaining capital spend.

Akyem, Ghana. Gold production decreased 5% primarily due to lower mill throughput and recovery partially offset by higher ore grade milled. Costs applicable to sales per ounce decreased 31% primarily due to stockpile inventory adjustments in the prior year and lower power costs, partially offset by higher oil prices. Depreciation and amortization per ounce decreased 16% primarily due to stockpile inventory adjustments in the prior year. All-in sustaining costs per ounce decreased 17% primarily due to lower costs applicable to sales per ounce partially offset by higher sustaining capital spend.

Nine months ended September 30, 2018 compared to 2017

Ahafo, Ghana. Gold production increased 18% primarily due to higher ore grade milled and recovery, as well as a draw down of in-circuit inventory as compared to a build up in the prior year, partially offset by lower mill throughput. Costs applicable to sales per ounce increased 7% primarily due to higher stockpile inventory adjustments and higher oil prices partially offset by higher ounces sold and lower power costs. Depreciation and amortization per ounce increased 26% primarily due to higher stockpile inventory adjustments and higher amortization rates. All-in sustaining costs per ounce were in line with the prior year.

Akyem, Ghana. Gold production decreased 16% primarily due to lower mill throughput, ore grade and recovery. Costs applicable to sales per ounce were in line with the prior year as lower ounces sold, higher stockpile inventory adjustments and higher oil prices were offset by lower power costs and a favorable strip ratio. Depreciation and amortization per ounce increased 20% primarily due to lower ounces sold and higher stockpile inventory adjustments. All-in sustaining costs per ounce increased 15% primarily due to higher sustaining capital spend.

Foreign Currency Exchange Rates

Our foreign operations sell their gold and copper production based on U.S. dollar metal prices. Fluctuations in foreign currency exchange rates do not have a material impact on our revenue since gold and copper are sold throughout the world in U.S. dollars. Despite selling gold in London, we have no exposure to the euro or the British pound.

Foreign currency exchange rates can increase or decrease profits to the extent costs are paid in foreign currencies, including the Australian dollar, the Peruvian sol and the Surinamese dollar. Approximately 33% and 31% of Costs applicable to sales for our foreign operations were paid in currencies other than the U.S. dollar during the three months ended September 30, 2018 and 2017, respectively, including approximately 28% denominated in the Australian dollar in the current year. Approximately 34% and 32% of Costs applicable to sales for our foreign operations were paid in currencies other than the U.S. dollar during the nine months ended September 30, 2018 and 2017, respectively, including approximately 29% denominated in the Australian dollar in the current year. Variations in the local currency exchange rates in relation to the U.S. dollar at our foreign mining operations decreased Costs applicable to sales by \$13 per ounce, net of hedging losses, during the three months ended September 30, 2018, compared to the same period in 2017, primarily in Australia. Variations in the local currency exchange rates in relation to the U.S. dollar at our foreign mining operations decreased Costs applicable to sales by \$4 per ounce, net of hedging losses, during the nine months ended September 30, 2018, compared to the same periods in 2017, primarily in

Australia.

Our Merian mine is located in the country of Suriname, which has been considered a hyperinflationary environment in recent years with a cumulative inflation rate of over 100% for the last three years. Although we have balances denominated in Surinamese dollars that relate to labor and payroll liabilities, substantially all of Merian's activity is denominated in U.S. dollars. As a result, our exposure to fluctuations in the Surinamese dollar exchange rate is not significant to Newmont's financial statements.

Table of Contents

Liquidity and Capital Resources

Liquidity Overview

We have a disciplined cash management strategy of maintaining financial flexibility to execute our capital priorities and provide long-term value to our shareholders. Consistent with that strategy, we aim to self-fund development projects and make strategic partnerships focused on profitable growth, while reducing our debt and returning cash to stockholders through dividends.

At September 30, 2018, the Company had \$3,068 in Cash and cash equivalents, of which \$871 was held in foreign subsidiaries and is primarily held in U.S. dollar denominated accounts with the remainder in foreign currencies readily convertible to U.S. dollars. At September 30, 2018, \$364 of the consolidated cash and cash equivalents was attributable to noncontrolling interests primarily related to our Peru and Suriname operations, which is being held to fund those operations. At September 30, 2018, \$748 in consolidated cash and cash equivalents (\$403 attributable to Newmont) was held at certain foreign subsidiaries that, if repatriated, may be subject to withholding taxes. We expect that there would be no additional tax burden upon repatriation after considering the cash cost associated with the withholding taxes. We believe that our liquidity and capital resources from U.S. operations are adequate to fund our U.S. operations and corporate activities.

We believe our existing consolidated cash and cash equivalents, available capacity on our revolving credit facility, and cash generated from continuing operations will be adequate to satisfy working capital needs, fund future growth, meet debt obligations, pay dividends and meet other liquidity requirements for the foreseeable future. At September 30, 2018, no borrowings were outstanding under our revolving credit facility.

Our financial position was as follows:

	At September 30, 2018	At December 31, 2017
Cash and cash equivalents	\$ 3,068	\$ 3,259
Debt	4,043	4,040
Leases and other financing obligations	147	25
Net Debt	\$ 1,122	\$ 806
Borrowing capacity on revolving credit facility expiring May 2022	\$ 2,914	\$ 2,920

Cash Flows

Our Condensed Consolidated Statements of Cash Flows are summarized as follows:

	September 30, 2018	2017
Net cash provided by (used in) operating activities of continuing operations	\$ 1,095	\$ 1,391
Net cash provided by (used in) operating activities of discontinued operations	(8)	(12)
Net cash provided by (used in) operating activities	\$ 1,087	\$ 1,379
Net cash provided by (used in) investing activities	\$ (884)	\$ (618)

Net cash provided by (used in) financing activities	\$ (346)	\$ (542)
---	----------	----------

Net cash provided by (used in) operating activities of continuing operations was \$1,095 during the nine months ended September 30, 2018, a decrease of \$296 from the nine months ended September 30, 2017, primarily due to lower sales and slightly higher costs, coupled with unfavorable working capital changes including an increase in accounts receivable, increase in stockpiles and ore on leach pads, timing of payments on accounts payable and increased tax payments, partially offset by \$196 attributable to interest on our Convertible Senior Notes repayment in 2017 and higher realized metal prices.

Net cash provided by (used in) investing activities was \$(884) during the nine months ended September 30, 2018, an increase in cash used of \$266 from the nine months ended September 30, 2017, primarily due to higher Additions to property, plant and mine

Table of Contents

development in 2018 driven by higher capital expenditures on development projects, and mineral interest acquisitions of \$138, including our investment in Galore Creek of \$100, partially offset by higher Purchases of investments in 2017.

Net cash provided by (used in) financing activities was \$(346) during the nine months ended September 30, 2018, a decrease in cash used of \$196 from the nine months ended September 30, 2017, primarily due to higher debt repayment related to the Convertible Senior Notes in 2017, Proceeds from the sale of noncontrolling interests of \$48 and lower net distributions to noncontrolling interests in 2018. This was partially offset by higher dividends paid of \$226, Repurchase of common stock for \$96 and higher Payments for withholding of employee taxes related to stock-based compensation of \$39.

Capital Expenditures

Cash generated from operations is used to execute our capital priorities, which include sustaining and developing our global portfolio of long-lived assets. We consider sustaining capital as those capital expenditures that are necessary to maintain current production and execute the current mine plan. Capital expenditures to develop new operations, or related to projects at existing operations where these projects will enhance production or reserves, are considered non-sustaining or development capital.

For the nine months ended September 30, 2018 and 2017, we had Additions to property, plant and mine development as follows:

	Nine Months Ended September 30, 2018			2017		
	Development Projects	Sustaining Capital	Total	Development Projects	Sustaining Capital	Total
North America	\$ 36	\$ 207	\$ 243	\$ 14	\$ 190	\$ 204
South America	80	64	144	52	47	99
Australia	24	104	128	40	99	139
Africa	170	58	228	76	45	121
Corporate and other	1	8	9	1	4	5
Accrual basis	\$ 311	\$ 441	\$ 752	\$ 183	\$ 385	\$ 568
Decrease (increase) in non-cash adjustments			11			(11)
Cash basis			\$ 763			\$ 557

For the nine months ended September 30, 2018, development projects included Twin Creeks Underground in North America; Merian and Quecher Main in South America; the Tanami Expansion 2 project in Australia; and, Subika Underground, Ahafo Mill Expansion and Ahafo North in Africa. For the nine months ended September 30, 2017, development projects included Merian in South America, the Tanami Expansion project in Australia and Subika Underground and the Ahafo Mill Expansion in Africa.

For the nine months ended September 30, 2018 and 2017, sustaining capital included the following:

.

North America. Capital expenditures primarily related to surface and underground mine development, tailings facility construction and capitalized component purchases;

- South America. Capital expenditures primarily related to a tailings facility expansion, capitalized component purchases and infrastructure improvements.
- Australia. Capital expenditures primarily related to equipment and capitalized component purchases, underground mine development and tailings and support facilities.
- Africa. Capital expenditures primarily related to water treatment plant construction, a tailings facility expansion, Awonsu Phase 3 and 4 layback and capitalized component purchases.

Additionally, in December 2017, the Company began the early phases of the Tanami Power project in Australia which includes the construction of a gas pipeline to the Tanami site, and construction and operation of two on-site power stations under agreements that qualify for build-to-suit lease accounting. As of September 30, 2018, the financing obligations under the build-to-suit arrangements were \$140.

Refer to our global project pipeline discussion above for additional details. Refer to Note 3 to our Condensed Consolidated Financial Statements and Part I, Item 2 Non-GAAP Financial Measures All-In Sustaining Costs for further information.

Table of Contents

Contractual Obligations

There have been no material changes in our contractual obligations since December 31, 2017, except as discussed in Note 1 of our Condensed Consolidated Financial Statements. Refer to Part II, Item 7 in our annual report on Form 10-K, and revisions filed April 26, 2018 on Form 8-K, for the year ended December 31, 2017, for information regarding our contractual obligations.

Off-Balance Sheet Arrangements

There have been no material changes in our off-balance sheet arrangements since December 31, 2017. Refer to Part II, Item 7 in our annual report on Form 10-K, and revisions filed April 26, 2018 on Form 8-K, for the year ended December 31, 2017, for information regarding our off-balance sheet arrangements.

Environmental

Our mining and exploration activities are subject to various federal and state laws and regulations governing the protection of the environment. We have made, and expect to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures. We perform a comprehensive review of our reclamation and remediation liabilities annually and review changes in facts and circumstances associated with these obligations at least quarterly. As of September 30, 2018, with the exception of an adjustment of \$8 to a historical mine site obligation for future water management costs, there have been no material changes to our reclamation and remediation obligation since December 31, 2017.

For a complete discussion of the factors that influence our reclamation obligations and the associated risks, refer to Part II, Item 7, Managements' Discussion and Analysis of Consolidated Financial Condition and Results of Operations under the headings "Environmental" and "Critical Accounting Policies" and refer to Part I, Item 1A, Risk Factors under the heading "Mine closure, reclamation and remediation costs for environmental liabilities may exceed the provisions we have made" for the year ended December 31, 2017, filed February 22, 2018 on Form 10-K, and revisions filed April 26, 2018 on Form 8-K.

For more information on the Company's reclamation and remediation liabilities, see Notes 5 and 26 to the Condensed Consolidated Financial Statements.

Accounting Developments

For a discussion of Recently Adopted and Recently Issued Accounting Pronouncements, see Note 2 to the Condensed Consolidated Financial Statements.

Non-GAAP Financial Measures

Non-GAAP financial measures are intended to provide additional information only and do not have any standard meaning prescribed by U.S. generally accepted accounting principles ("GAAP"). These measures should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. Unless otherwise noted, we present the Non-GAAP financial measures of our continuing operations in the tables below. For additional information regarding our discontinued operations, see Note 10 to the Condensed Consolidated Financial Statements.

Earnings before interest, taxes and depreciation and amortization and Adjusted earnings before interest, taxes and depreciation and amortization

Management uses Earnings before interest, taxes and depreciation and amortization (“EBITDA”) and EBITDA adjusted for non-core or certain items that have a disproportionate impact on our results for a particular period (“Adjusted EBITDA”) as non-GAAP measures to evaluate the Company’s operating performance. EBITDA and Adjusted EBITDA do not represent, and should not be considered an alternative to, net income (loss), operating income (loss), or cash flow from operations as those terms are defined by GAAP, and do not necessarily indicate whether cash flows will be sufficient to fund cash needs. Although Adjusted EBITDA and similar measures are frequently used as measures of operations and the ability to meet debt service requirements by other companies, our calculation of Adjusted EBITDA is not necessarily comparable to such other similarly titled captions of other companies. The Company believes that Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our

Table of Contents

operating results in the same manner as our management and Board of Directors. Management's determination of the components of Adjusted EBITDA are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to EBITDA and Adjusted EBITDA as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Net income (loss) attributable to Newmont stockholders	\$ (145)	\$ 206	\$ 339	\$ 428
Net income (loss) attributable to noncontrolling interests	21	(7)	26	(20)
Net loss (income) from discontinued operations (1)	(16)	7	(56)	45
Equity loss (income) of affiliates	9	(1)	25	4
Income and mining tax expense (benefit)	3	73	126	350
Depreciation and amortization	299	328	879	938
Interest expense, net	51	56	153	187
EBITDA	\$ 222	\$ 662	\$ 1,492	\$ 1,932
Adjustments:				
Impairment of long-lived assets (2)	\$ 366	\$ —	\$ 366	\$ 3
Loss (gain) on asset and investment sales (3)	(1)	(5)	(100)	(21)
Emigrant leach pad write-down (4)	22	—	22	—
Change in fair value of marketable equity securities (5)	26	—	21	—
Restructuring and other (6)	1	2	16	10
Reclamation and remediation charges (7)	—	—	8	3
Acquisition cost adjustments (8)	—	(3)	—	2
Adjusted EBITDA	\$ 636	\$ 656	\$ 1,825	\$ 1,929

- (1) Net loss (income) from discontinued operations relates to (i) adjustments in our Holt royalty obligation, presented net of tax expense (benefit) of \$6, \$(4), \$15 and \$(25), respectively, and (ii) adjustments to our Batu Hijau Contingent Consideration, presented net of tax expense (benefit) of \$(1), \$-, \$-, and \$-, respectively. For additional information regarding our discontinued operations, see Note 10 to our Condensed Consolidated Financial Statements.
- (2) Impairment of long-lived assets, included in Impairment of long-lived assets, represents non-cash write-downs of long-lived assets. The 2018 impairments include \$366 related to long-lived assets in North America in the third quarter of 2018. See Note 6 to our Condensed Consolidated Financial Statements for further information.
- (3) Loss (gain) on asset and investment sales, included in Other income, net, primarily represents a gain from the exchange of certain royalty interests for cash consideration and an equity ownership and warrants in Maverix in June 2018, and a gain from the exchange of our interest in the Fort á la Corne joint venture for equity ownership in Shore Gold Inc. ("Shore Gold") in June 2017.
- (4) The Emigrant leach pad write-down, included in Costs applicable to sales, represents a write-down to reduce the carrying value of the leach pad to net realizable value at Emigrant due to a change in mine plan resulting in a significant decrease in mine life in the third quarter of 2018.
- (5) Change in fair value of marketable equity securities, included in Other income, net, primarily represents unrealized holding gains and losses on marketable equity securities related primarily to Continental Gold Inc.
- (6) Restructuring and other, included in Other expense, net, represents certain costs associated with severance, legal and other settlements.
- (7) Reclamation and remediation charges, included in Reclamation and remediation, represent revisions to remediation plans at the Company's former historic mining operations.
- (8)

Acquisition cost adjustments, included in Other expense, net, represent net adjustments to the contingent consideration and related liabilities associated with the acquisition of the final 33.33% interest in Boddington in June 2009.

Table of Contents

Adjusted net income (loss)

Management uses Adjusted net income (loss) to evaluate the Company's operating performance and for planning and forecasting future business operations. The Company believes the use of Adjusted net income (loss) allows investors and analysts to understand the results of the continuing operations of the Company and its direct and indirect subsidiaries relating to the sale of products, by excluding certain items that have a disproportionate impact on our results for a particular period. Adjustments to continuing operations are presented before tax and net of our partners' noncontrolling interests, when applicable. The tax effect of adjustments is presented in the Tax effect of adjustments line and is calculated using the applicable regional tax rate. Management's determination of the components of Adjusted net income (loss) are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts. Net income (loss) attributable to Newmont stockholders is reconciled to Adjusted net income (loss) as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Net income (loss) attributable to Newmont stockholders	\$ (145)	\$ 206	\$ 339	\$ 428
Net loss (income) attributable to Newmont stockholders from discontinued operations (1)	(16)	7	(56)	45
Net income (loss) attributable to Newmont stockholders from continuing operations	(161)	213	283	473
Impairment of long-lived assets, net (2)	366	—	366	2
Loss (gain) on asset and investment sales, net (3)	(1)	(5)	(100)	(21)
Emigrant leach pad write-down (4)	29	—	29	—
Change in fair value of marketable equity securities (5)	26	—	21	—
Restructuring and other, net (6)	1	1	13	8
Reclamation and remediation charges (7)	—	—	8	3
Acquisition cost adjustments (8)	—	(3)	—	2

- (1) Net loss (income) attributable to Newmont stockholders from discontinued operations relates to (i) adjustments in our Holt royalty obligation, presented net of tax expense (benefit) of \$6, \$(4), \$15 and \$(25), respectively, and (ii) adjustments to our Batu Hijau Contingent Consideration, presented net of tax expense (benefit) of \$(1), \$-, \$- and \$- respectively. For additional information regarding our discontinued operations, see Note 10 to our Condensed Consolidated Financial Statements.
- (2) Impairment of long-lived assets, included in Impairment of long-lived assets, represents non-cash write-downs of long-lived assets. The 2018 impairments include \$366 related to long-lived assets in North America in the third quarter of 2018. See Note 6 to our Condensed Consolidated Financial Statements for further information. Amounts are presented net of income (loss) attributable to noncontrolling interests of \$-, \$-, \$- and \$(1), respectively.
- (3) Loss (gain) on asset and investment sales, included in Other income, net, primarily represents a gain from the exchange of certain royalty interests for cash consideration and an equity ownership and warrants in Maverix in June 2018, and a gain from the exchange of our interest in the Fort á la Corne joint venture for equity ownership in Shore Gold in June 2017.
- (4) The Emigrant leach pad write-down, included in Costs applicable to sales and Depreciation and amortization, represents a write-down to reduce the carrying value of the leach pad to net realizable value at Emigrant due to a change in mine plan resulting in a significant decrease in mine life in the third quarter of 2018.
- (5) Change in fair value of marketable equity securities, included in Other income, net, represents unrealized holding gains and losses on marketable equity securities related primarily to Continental Gold Inc.
- (6) Restructuring and other, included in Other expense, net, primarily represents certain costs associated with severance, legal and other settlements. Amounts are presented net of income (loss) attributable to noncontrolling interests of \$-, \$(1), \$(3) and \$(2), respectively.
- (7)

Reclamation and remediation charges, included in Reclamation and remediation, represent revisions to remediation plans at the Company's former historic mining operations.

- (8) Acquisition cost adjustments, included in Other expense, net, represent net adjustments to the contingent consideration and related liabilities associated with the acquisition of the final 33.33% interest in Boddington in June 2009.
- (9) The tax effect of adjustments, included in Income and mining tax benefit (expense), represents the tax effect of adjustments in footnotes (2) through (8), as described above, and are calculated using the applicable regional tax rate.
- (10) Valuation allowance and other tax adjustments, included in Income and mining tax benefit (expense), is recorded for items such as foreign tax credits, alternative minimum tax credits, capital losses and disallowed foreign losses. The adjustment in the three and nine months ended September 30, 2018 is due to increases to net operating losses, tax credit carryovers and other deferred tax assets of \$13 and \$32 respectively, and other tax adjustments of \$5 and \$4, respectively. The adjustment in the nine months ended September 30, 2018 is also due to a second quarter reduction to the provisional expense for the Tax Cuts and Jobs Act of \$(45) and a release of valuation allowance on capital losses of \$(15). Amounts are presented net of income (loss) attributable to noncontrolling interests of \$1, \$-, \$(4), and \$-, respectively. The adjustment in the three and nine months ended September 30, 2017 is due to increases in tax credit carryovers of \$(39) and \$100, respectively, partially offset by other tax adjustments of \$13 and \$(2), respectively.
- (11) Per share measures may not recalculate due to rounding.

Table of Contents

Free Cash Flow

Management uses Free Cash Flow as a non-GAAP measure to analyze cash flows generated from operations. Free Cash Flow is Net cash provided by (used in) operating activities less Net cash provided by (used in) operating activities of discontinued operations less Additions to property, plant and mine development as presented on the Condensed Consolidated Statements of Cash Flows. The Company believes Free Cash Flow is also useful as one of the bases for comparing the Company's performance with its competitors. Although Free Cash Flow and similar measures are frequently used as measures of cash flows generated from operations by other companies, the Company's calculation of Free Cash Flow is not necessarily comparable to such other similarly titled captions of other companies.

The presentation of non-GAAP Free Cash Flow is not meant to be considered in isolation or as an alternative to net income as an indicator of the Company's performance, or as an alternative to cash flows from operating activities as a measure of liquidity as those terms are defined by GAAP, and does not necessarily indicate whether cash flows will be sufficient to fund cash needs. The Company's definition of Free Cash Flow is limited in that it does not represent residual cash flows available for discretionary expenditures due to the fact that the measure does not deduct the payments required for debt service and other contractual obligations or payments made for business acquisitions. Therefore, the Company believes it is important to view Free Cash Flow as a measure that provides supplemental information to the Company's Condensed Consolidated Statements of Cash Flows.

The following table sets forth a reconciliation of Free Cash Flow, a non-GAAP financial measure, to Net cash provided by (used in) operating activities, which the Company believes to be the GAAP financial measure most directly comparable to Free Cash Flow, as well as information regarding Net cash provided by (used in) investing activities and Net cash provided by (used in) financing activities.

	Nine Months Ended September 30,	
	2018	2017
Net cash provided by (used in) operating activities	\$ 1,087	\$ 1,379
Less: Net cash used in (provided by) operating activities of discontinued operations	8	12
Net cash provided by (used in) operating activities of continuing operations	1,095	1,391
Less: Additions to property, plant and mine development	(763)	(557)
Free Cash Flow	\$ 332	\$ 834
Net cash provided by (used in) investing activities (1)	\$ (884)	\$ (618)
Net cash provided by (used in) financing activities	\$ (346)	\$ (542)

(1) Net cash provided by (used in) investing activities includes Additions to property, plant and mine development, which is included in the Company's computation of Free Cash Flow.

Costs applicable to sales per ounce/pound

Costs applicable to sales per ounce/pound are non-GAAP financial measures. These measures are calculated by dividing the costs applicable to sales of gold and copper by gold ounces or copper pounds sold, respectively. These measures are calculated for the periods presented on a consolidated basis. Costs applicable to sales per ounce/pound statistics are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations

as determined under GAAP. Other companies may calculate these measures differently.

Table of Contents

The following tables reconcile these non-GAAP measures to the most directly comparable GAAP measures.

Costs applicable to sales per ounce

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Costs applicable to sales (1)	\$ 952	\$ 1,017	\$ 2,853	\$ 2,890
Gold sold (thousand ounces)	1,378	1,411	3,914	4,178
Costs applicable to sales per ounce (2)	\$ 691	\$ 721	\$ 729	\$ 692

(1) Includes by-product credits of \$10 and \$41 during the three and nine months ended September 30, 2018, respectively, and \$16 and \$42 during the three and nine months ended September 30, 2017, respectively.

(2) Per ounce measures may not recalculate due to rounding.

Costs applicable to sales per pound

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2018	2017	2018	2017
Costs applicable to sales (1)	\$ 43	\$ 36	\$ 136	\$ 119
Copper sold (million pounds)	28	26	82	84
Costs applicable to sales per pound (2)	\$ 1.54	\$ 1.38	\$ 1.66	\$ 1.42

(1) Includes by-product credits of \$1 and \$3 during the three and nine months ended September 30, 2018, respectively, and \$- and \$3 during the three and nine months ended September 30, 2017, respectively.

(2) Per pound measures may not recalculate due to rounding.

All-In Sustaining Costs

Newmont has worked to develop a metric that expands on GAAP measures, such as cost of goods sold, and non-GAAP measures, such as Costs applicable to sales per ounce, to provide visibility into the economics of our mining operations related to expenditures, operating performance and the ability to generate cash flow from our continuing operations.

Current GAAP measures used in the mining industry, such as cost of goods sold, do not capture all of the expenditures incurred to discover, develop and sustain production. Therefore, we believe that all-in sustaining costs is a non-GAAP measure that provides additional information to management, investors and analysts that aid in the understanding of the economics of our operations and performance compared to other producers and in the investor's visibility by better defining the total costs associated with production.

All-in sustaining cost ("AISC") amounts are intended to provide additional information only and do not have any standardized meaning prescribed by GAAP and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP. The measures are not necessarily indicative of operating profit or cash flow from operations as determined under GAAP. Other companies may calculate these measures differently as a result of differences in the underlying accounting principles, policies applied and in accounting frameworks such as in International Financial Reporting Standards ("IFRS"), or by reflecting the benefit from selling non-gold metals as a reduction to AISC. Differences may also arise related to definitional differences of sustaining versus development

capital activities based upon each company's internal policies.

The following disclosure provides information regarding the adjustments made in determining the all-in sustaining costs measure:

Costs applicable to sales. Includes all direct and indirect costs related to current production incurred to execute the current mine plan. We exclude certain exceptional or unusual amounts from Costs applicable to sales ("CAS"), such as significant revisions to recovery amounts. CAS includes by-product credits from certain metals obtained during the process of extracting and processing the primary ore-body. CAS is accounted for on an accrual basis and excludes Depreciation and amortization and Reclamation and remediation, which is consistent with our presentation of CAS on the Condensed Consolidated Statements of Operations. In determining AISC, only the CAS associated with producing and selling an ounce of gold is included in the measure. Therefore, the amount of gold CAS included in AISC is derived from the CAS presented in the Company's Condensed Consolidated Statements of

Table of Contents

Operations less the amount of CAS attributable to the production of copper at our Phoenix and Boddington mines. The copper CAS at those mine sites is disclosed in Note 3 to the Condensed Consolidated Financial Statements. The allocation of CAS between gold and copper at the Phoenix and Boddington mines is based upon the relative sales value of gold and copper produced during the period.

Reclamation costs. Includes accretion expense related to Reclamation liabilities and the amortization of the related Asset Retirement Cost ("ARC") for the Company's operating properties. Accretion related to the Reclamation liabilities and the amortization of the ARC assets for reclamation does not reflect annual cash outflows but are calculated in accordance with GAAP. The accretion and amortization reflect the periodic costs of reclamation associated with current production and are therefore included in the measure. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix and Boddington mines.

Advanced projects, research and development and exploration. Includes incurred expenses related to projects that are designed to increase or enhance current production and exploration. We note that as current resources are depleted, exploration and advanced projects are necessary for us to replace the depleting reserves or enhance the recovery and processing of the current reserves. As this relates to sustaining our production, and is considered a continuing cost of a mining company, these costs are included in the AISC measure. These costs are derived from the Advanced projects, research and development and Exploration amounts presented in the Condensed Consolidated Statements of Operations less the amount attributable to the production of copper at our Phoenix and Boddington mines. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix and Boddington mines.

General and administrative. Includes costs related to administrative tasks not directly related to current production, but rather related to support our corporate structure and fulfill our obligations to operate as a public company. Including these expenses in the AISC metric provides visibility of the impact that general and administrative activities have on current operations and profitability on a per ounce basis.

Other expense, net. We exclude certain exceptional or unusual expenses from Other expense, net, such as restructuring, as these are not indicative to sustaining our current operations. Furthermore, this adjustment to Other expense, net is also consistent with the nature of the adjustments made to Net income (loss) attributable to Newmont stockholders as disclosed in the Company's non-GAAP financial measure Adjusted net income (loss). The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix and Boddington mines.

Treatment and refining costs. Includes costs paid to smelters for treatment and refining of our concentrates to produce the salable metal. These costs are presented net as a reduction of Sales on our Condensed Consolidated Statements of Operations.

Sustaining capital. We determined sustaining capital as those capital expenditures that are necessary to maintain current production and execute the current mine plan. Capital expenditures to develop new operations, or related to projects at existing operations where these projects will enhance production or reserves, are generally considered non-sustaining or development capital. We determined the classification of sustaining and development capital projects based on a systematic review of our project portfolio in light of the nature of each project. Sustaining capital costs are relevant to the AISC metric as these are needed to maintain the Company's current operations and provide improved transparency related to our ability to finance these expenditures from current operations. The allocation of these costs to gold and copper is determined using the same allocation used in the allocation of CAS between gold and copper at the Phoenix and Boddington mines.

Total Copper	\$ 136	\$ 2	\$ —	\$ —	\$ —	\$ 10	\$ 16	\$ 164	82	\$ 2.00
Consolidated	\$ 2,967	\$ 90	\$ 249	\$ 181	\$ 13	\$ 31	\$ 441	\$ 3,972		

(1) Excludes Depreciation and amortization and Reclamation and remediation.

- (2) Includes by-product credits of \$44 and excludes co-product copper revenues of \$229.
- (3) Includes stockpile and leach pad inventory adjustments of \$64 at Carlin, \$30 at Twin Creeks, \$5 at CC&V, \$29 at Yanacocha, \$33 at Ahafo and \$28 at Akyem. Total stockpile and leach pad inventory adjustments at Carlin of \$86 were adjusted above by \$22 related to the write-down at Emigrant due to a change in mine plan, resulting in a significant decrease in mine life in the third quarter of 2018.
- (4) Reclamation costs include operating accretion and amortization of asset retirement costs of \$47 and \$43, respectively, and exclude non-operating accretion and reclamation and remediation adjustments of \$32 and \$17, respectively.
- (5) Advanced projects, research and development and Exploration of \$7 at Carlin, \$19 at Long Canyon, \$14 at Yanacocha, \$2 at Tanami, \$5 at Ahafo and \$10 at Akyem are recorded in "Other" of the respective region for development projects.
- (6) Other expense, net is adjusted for restructuring and other costs of \$16.
- (7) Excludes development capital expenditures, capitalized interest and changes in accrued capital, totaling \$322. The following are major development projects: Twin Creeks Underground, Quecher Main, Merian, Tanami Expansion 2, Ahafo North, Subika Underground and Ahafo Mill Expansion.
- (8) Per ounce and per pound measures may not recalculate due to rounding.

- (7) Excludes development capital expenditures, capitalized interest and changes in accrued capital, totaling \$172. The following are major development projects: Merian, Long Canyon, Tanami Expansion, Subika Underground and Ahafo Mill Expansion.
- (8) Per ounce and per pound measures may not recalculate due to rounding.

Safe Harbor Statement

Certain statements contained in this report (including information incorporated by reference herein) are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and are intended to be covered by the safe harbor provided for under these sections. Words such as “expect(s)”, “feel(s)”, “believe(s)”, “will”, “may”, “anticipate(s)”, “estimate(s)”, “should”, “intend(s)” and similar expressions are intended to identify forward-looking statements. Our forward-looking statements may include, without limitation:

- estimates regarding future earnings and the sensitivity of earnings to gold, copper and other metal prices;
- estimates of future mineral production and sales;
- estimates of future production costs, other expenses and taxes for specific operations and on a consolidated basis;
- estimates of future cash flows and the sensitivity of cash flows to gold and other metal prices;

Table of Contents

- estimates of future capital expenditures, construction, production or closure activities and other cash needs, for specific operations and on a consolidated basis, and expectations as to the funding or timing thereof;
- estimates as to the projected development of certain ore deposits, including the timing of such development, the costs of such development and other capital costs, financing plans for these deposits and expected production commencement dates;
- estimates of reserves and statements regarding future exploration results and reserve replacement and the sensitivity of reserves to metal price changes;
- statements regarding the availability of, and terms and costs related to, future borrowing or financing and expectations regarding future debt repayments or debt tender transactions;
 - estimates regarding future exploration expenditures, results and reserves;
- statements regarding fluctuations in financial and currency markets;
- estimates regarding potential cost savings, productivity, operating performance and ownership and cost structures;
- expectations regarding statements regarding future transactions, including, without limitation, statements related to future acquisitions and projected benefits, synergies and costs associated with acquisitions and related matters;
- expectations regarding the start-up time, design, mine life, production and costs applicable to sales and exploration potential of our projects;
- statements regarding future hedge and derivative positions or modifications thereto;
- statements regarding political, economic or governmental conditions and environments;
- statements regarding the impacts of changes in the legal and regulatory environment in which we operate;
- estimates of future costs, accruals for reclamation costs and other liabilities for certain environmental matters, including without limitation with respect to our Yanacocha operation;
- estimates of income taxes and expectations relating to tax contingencies or tax audits; and
- estimates of pension and other post-retirement costs.

Where we express an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, our forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by those forward-looking statements. Such risks include, but are not limited to:

- the price of gold, copper and other metal prices and commodities;
- the cost of operations;
- currency fluctuations;
- geological and metallurgical assumptions;
- operating performance of equipment, processes and facilities;
- labor relations;
- timing of receipt of necessary governmental permits or approvals;
- domestic and foreign laws or regulations, particularly relating to the environment, mining and processing;
- changes in tax laws;
- domestic and international economic and political conditions;
- our ability to obtain or maintain necessary financing; and
- other risks and hazards associated with mining operations.

More detailed information regarding these factors is included in the section titled Item 1, Business; Item 1A, Risk Factors in the Annual Report on Form 10-K for the year ended December 31, 2017 filed February 22, 2018 and elsewhere throughout this report. Many of these factors are beyond our ability to control or predict. Given these uncertainties, readers are cautioned not to place undue reliance on our forward-looking statements.

All subsequent written and oral forward-looking statements attributable to Newmont or to persons acting on its behalf are expressly qualified in their entirety by these cautionary statements. We disclaim any intention or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required under applicable securities laws.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (dollars in millions, except per ounce and per pound amounts).

Metal Prices

Changes in the market price of gold significantly affect our profitability and cash flow. Gold prices can fluctuate widely due to numerous factors, such as demand; forward selling by producers; central bank sales, purchases and lending; investor sentiment; the strength of the U.S. dollar; inflation, deflation, or other general price instability and global mine production levels. Changes in the market price of copper also affect our profitability and cash flow. Copper is traded on established international exchanges and copper prices generally reflect market supply and demand, but can also be influenced by speculative trading in the commodity or by currency exchange rates.

Decreases in the market price of gold and copper can also significantly affect the value of our product inventory, stockpiles and leach pads, and it may be necessary to record a write-down to the net realizable value. Net realizable value represents the estimated future sales price based on short-term and long-term metals prices, less estimated costs to complete production and bring the product to sale. The primary factors that influence the need to record write-downs of our stockpiles, leach pads and product inventory include short-term and long-term metals prices and costs for production inputs such as labor, fuel and energy, materials and supplies as well as realized ore grades and recovery rates. The significant assumptions in determining the stockpile, leach pad and product inventory adjustments for each mine site reporting unit at September 30, 2018 included production cost and capitalized expenditure assumptions unique to each operation, a short-term and long-term gold price of \$1,213 and \$1,300 per ounce, respectively, a short-term and long-term copper price of \$2.77 and \$3.00 per pound, respectively, and a short-term and long-term U.S. to Australian dollar exchange rate of \$0.73 and \$0.80, respectively.

The net realizable value measurement involves the use of estimates and assumptions unique to each mining operation regarding current and future operating and capital costs, metal recoveries, production levels, commodity prices, proven and probable reserve quantities, engineering data and other factors. A high degree of judgment is involved in determining such assumptions and estimates and no assurance can be given that actual results will not differ significantly from those estimates and assumptions.

Hedging

Our strategy is to provide shareholders with leverage to changes in gold and copper prices by selling our production at spot market prices. Consequently, we do not hedge our gold and copper sales. We have and may continue to manage certain risks associated with commodity input costs, interest rates and foreign currencies using the derivative market.

By using hedges, we are affected by credit risk, market risk and market liquidity risk. Credit risk is the risk that a third party might fail to fulfill its performance obligations under the terms of a financial instrument. We mitigate credit risk by entering into derivatives with high credit quality counterparties, limiting the amount of exposure to each counterparty and monitoring the financial condition of the counterparties. Market risk is the risk that the fair value of a derivative might be adversely affected by a change in underlying commodity prices, interest rates or currency exchange rates, and that this in turn affects our financial condition. We manage market risk by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken. We mitigate this potential risk to our financial condition by establishing trading agreements with counterparties under which we are not required to post any collateral or be subject to any margin calls on our derivatives. Our counterparties cannot require settlement solely because of an adverse change in the fair value of a derivative. Market liquidity risk is the risk that a derivative cannot be eliminated quickly, by either liquidating it or by establishing an offsetting position. Under the terms of our trading agreements, counterparties cannot require us to immediately settle outstanding derivatives, except upon the occurrence of customary events of default such as covenant breaches, including financial covenants,

insolvency or bankruptcy. We further mitigate market liquidity risk by spreading out the maturity of our derivatives over time.

Cash Flow Hedges

The diesel derivative and foreign currency contracts are designated as cash flow hedges, and as such, the unrealized changes in market value have been recorded in Accumulated other comprehensive income (loss) and are reclassified to income during the period in which the hedged transaction affects earnings.

Table of Contents

Diesel Price Risk

We had the following diesel derivative contracts outstanding at September 30, 2018:

	Expected Maturity Date				Total/ Average
	2018	2019	2020	2021	
Diesel Fixed Forward Contracts:					
North America					
Diesel gallons (millions)	3	4	4	1	12
Average rate (\$/gallon)	1.68	1.87	2.00	2.07	1.89
South America					
Diesel gallons (millions)	—	—	2	—	2
Average rate (\$/gallon)	—	2.07	1.89	2.03	1.92
Australia					
Diesel barrels (thousands)	—	18	91	29	138
Average rate (\$/barrel)	—	85.96	78.66	82.15	80.34

The fair value of the diesel derivative contracts was a net asset position of \$7 at September 30, 2018 and \$6 at December 31, 2017.

Foreign Currency Exchange Risk

The fair value of A\$ foreign currency derivative contracts was a net liability position of \$1 at December 31, 2017.

Commodity Price Exposure

Our provisional gold and copper sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of the gold and copper concentrates at the prevailing indices' prices at the time of sale. The embedded derivative, which does not qualify for hedge accounting, is marked to market through earnings each period prior to final settlement.

At September 30, 2018, Newmont had gold sales of 113,000 ounces priced at an average of \$1,190 per ounce, subject to final pricing over the next several months. Each \$25 change in the price for provisionally priced gold sales would have an approximate \$2 effect on our Net income (loss) attributable to Newmont stockholders. The London Bullion Market Association P.M. closing settlement price at September 30, 2018 for gold was \$1,187 per ounce.

At September 30, 2018, Newmont had copper sales of 18 million pounds priced at an average of \$2.80 per pound, subject to final pricing over the next several months. Each \$0.10 change in the price for provisionally priced copper sales would have an approximate \$1 effect on our Net income (loss) attributable to Newmont stockholders. The LME closing settlement price at September 30, 2018 for copper was \$2.80 per pound.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

During the fiscal period covered by this report, the Company's management, with the participation of the Chief Executive Officer and Chief Financial Officer of the Company, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the required time periods and are designed to ensure that information required to be disclosed in its reports is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in the Company's internal control over financial reporting that occurred during the three months ended September 30, 2018, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II—OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

Information regarding legal proceedings is contained in Note 26 to the Condensed Consolidated Financial Statements contained in this Report and is incorporated herein by reference.

ITEM 1A. RISK FACTORS.

There were no material changes to the risk factors disclosed in Item 1, Business; Item 1A in our Annual Report on Form 10-K for the year ended December 31, 2017, as filed with the SEC on February 22, 2018.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

	(a)	(b)	(c)	(d)
	Total		Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(3)	Maximum Number (or Approximate Dollar Value) of Shares that may yet be Purchased under the Plans or Programs(3)
Period	Purchased(1)(2)	Average Price Paid		
July 1, 2018 through July 31, 2018	2,313	\$ 37.45	—	\$ 19,691,707
August 1, 2018 through August 31, 2018	788,014	\$ 33.21	33,383	\$ 18,520,502
September 1, 2018 through September 30, 2018	—	\$ —	—	\$ 18,520,502

(1) The total number of shares purchased (and the average price paid per share) reflects: (i) shares purchased pursuant to the repurchase program described in (3) below; and (ii) represents shares delivered to the Company from stock awards held by employees upon vesting for the purpose of covering the recipients' tax withholding obligations, totaling 2,313 shares, 14,653 shares and 0 shares for the fiscal months of July, August and September 2018, respectively.

(2) In August 2018, the Company repurchased and retired approximately 739,978 shares of its common stock that were held by participants in the Retirement Savings Plan of Newmont and the Retirement Savings Plan for Hourly-Rated Employees of Newmont for \$25 million.

(3) On February 20, 2018, the Company's Board of Directors authorized a stock repurchase program, under which the Company was authorized to repurchase shares of outstanding common stock to offset the dilutive impact of employee stock award vesting in the current year, provided that the aggregate value of shares of common stock repurchased does not exceed \$90 million, and no shares of common stock may be repurchased under the program after December 31, 2018. The Company repurchased 33,383 shares in the third quarter under the repurchase program, representing an aggregate value of \$1 million, and such shares were then retired. To the extent additional employee stock award vesting occurs later in the year in connection with retirements, terminations or previously

scheduled vestings, the Company intends to use the repurchase program exclusively to offset dilution, subject to the limitations set forth above. The repurchase program may be discontinued at any time, and the program does not obligate the Company to acquire any specific number of shares of its common stock. The extent to which the Company repurchases its shares, and the timing of such repurchases, will depend upon a variety of factors, including trading volume, market conditions, legal requirements, business conditions and other factors.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. MINE SAFETY DISCLOSURES.

At Newmont, safety is a core value. No work-related fatalities occurred at any Newmont site or facility during the third quarter. However, a tragic event occurred in April 2018, which resulted in the death of six contractors who were working on the construction of a structure at the Ahafo Mill Expansion project in Ghana. We deeply grieve these losses along with families, friends, colleagues and the entire Newmont family. Newmont Ghana has fully cooperated with the Government of Ghana's Minerals Commission to support their investigation of the accident. We are committed to honoring our obligations and working closely with the Minerals Commission to develop detailed action plans to address their investigation report's findings and to integrate lessons across its business. This tragic accident stands as a sobering reminder that we must forever remain vigilant in continually improving our safety culture. It is with great humility and resolve that we renew our commitment to making sure our people go home safe every day.

Table of Contents

Our health and safety management system, which includes detailed standards and procedures for safe production, addresses topics such as employee training, risk management, workplace inspection, emergency response, accident investigation and program auditing. In addition to strong leadership and involvement from all levels of the organization, these programs and procedures form the cornerstone of safety at Newmont, ensuring that employees are provided a safe and healthy environment and are intended to reduce workplace accidents, incidents and losses, comply with all mining-related regulations and provide support for both regulators and the industry to improve mine safety.

In addition, we have established our “Rapid Response” process to mitigate and prevent the escalation of adverse consequences if existing risk management controls fail, particularly if an incident may have the potential to seriously impact the safety of employees, the community or the environment. This process provides appropriate support to an affected site to complement their technical response to an incident, so as to reduce the impact by considering the environmental, strategic, legal, financial and public image aspects of the incident, to ensure communications are being carried out in accordance with legal and ethical requirements and to identify actions in addition to those addressing the immediate hazards.

The operation of our U.S. based mines is subject to regulation by the Federal Mine Safety and Health Administration (“MSHA”) under the Federal Mine Safety and Health Act of 1977 (the “Mine Act”). MSHA inspects our mines on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act. Following passage of The Mine Improvement and New Emergency Response Act of 2006, MSHA significantly increased the numbers of citations and orders charged against mining operations. The dollar penalties assessed for citations issued has also increased in recent years.

Newmont is required to report certain mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K, and that required information is included in Exhibit 95 and is incorporated by reference into this Quarterly Report. The fatalities in Ghana are not represented in Exhibit 95 due to the fact that our operations in Ghana are not regulated by MSHA.

ITEM 5. OTHER INFORMATION.

Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

On October 23, 2018, Newmont Mining Corporation appointed Tom Palmer, age 51, President and Chief Operating Officer, effective as of November 1, 2018, which is an expansion of his current role with the Company as Executive Vice President and Chief Operating Officer and is subject to no fixed term. In this role, he will continue leading the Company’s global operations, projects, and health, safety and security teams. Mr. Palmer served as Executive Vice President and Chief Operating Officer since May 2016. Previously, Mr. Palmer served as Senior Vice President, Asia Pacific beginning in February 2015 after serving as Senior Vice President, Indonesia since March 2014. Prior to joining Newmont, he was the Chief Operating Officer, Pilbara Mines at Rio Tinto Iron Ore. During his extensive career, Mr. Palmer also worked in a variety of roles across a number of commodities, including General Manager, Technology for the Bauxite and Alumina business; General Manager, Operations at Hail Creek coal mine; and General Manager, Asset Management at Palabora Mining Company in South Africa. Mr. Palmer has extensive experience leading teams and delivering production and projects while implementing safety culture programs and improving diversity.

There is no arrangement or understanding between Mr. Palmer and any other persons pursuant to which he was appointed as President and Chief Operating Officer. Mr. Palmer does not have a family relationship with any member of the Board of Directors or any executive officer of the Company, and Mr. Palmer has not been a participant or had any interest in any transaction with the Company that is reportable under Item 404(a) of Regulation S-K. In the

President and Chief Operating Officer position with the Company, Mr. Palmer will have a base salary of \$850,000. Mr. Palmer's cash bonus and long-term equity incentives shall be delivered according to the Company's incentive programs as described in the Company's 2018 Proxy Statement.

Amendments to By-Laws

On October 24, 2018, in connection with the separation of the role of Chief Executive Officer and President, Newmont's Board of Directors approved amendments to its By-Laws to clarify the respective roles of the Chief Executive Officer (principal executive officer) and the President (principal administrative officer) (Article I, Sections 2 and 8; Article II, Section 3; Article IV, Sections 1, 4, 5, 8, 10 and 12; and Article V, Section 1). The amended By-Laws also include language defining the role of the Chief Financial Officer (principal financial officer) (Article IV, Sections 1 and 7) and clarifying the roles of the Controller (principal accounting

Table of Contents

officer) and the Treasurer (Article IV, Sections 8 and 10). Additionally, the listing of officers has been re-ordered throughout Article IV. The amendments were adopted to avoid technical overlaps in duties and better reflect the current organization of the Company and became effective immediately upon approval by the Board of Directors. The foregoing description of the amendments to the By-Laws is qualified in its entirety by reference to the complete text of the By-Laws, as amended and restated effective as of October 24, 2018, filed as Exhibit 3.1 to this Form 10-Q and incorporated herein by reference.
