

DUPONT E I DE NEMOURS & CO
Form 10-K
February 15, 2018

2017

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-K
(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2017

OR
 TRANSITION REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

Commission file number 1-815
E. I. DU PONT DE NEMOURS AND COMPANY
(Exact name of registrant as specified in its charter)
DELAWARE 51-0014090
(State or Other Jurisdiction of Incorporation or Organization) (I.R.S. Employer Identification No.)
974 Centre Road
Wilmington, Delaware 19805
(Address of principal executive offices)
Registrant's telephone number, including area code: 302-774-1000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of exchange on which registered
Preferred Stock \$4.50 Series, no par value, cumulative	New York Stock Exchange
Preferred Stock \$3.50 Series, no par value, cumulative	New York Stock Exchange

No securities are registered pursuant to Section 12(g) of the Act.

Indicate by check mark whether the registrant is a well-known seasoned issuer (as defined in Rule 405 of the Securities Act).

Yes No

Indicate by check mark whether the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes
No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements

Edgar Filing: DUPONT E I DE NEMOURS & CO - Form 10-K

incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer

Non-Accelerated Filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes
No

The aggregate market value of voting stock held by nonaffiliates of the registrant (excludes outstanding shares beneficially owned by directors and officers and treasury shares) as of June 30, 2017, was approximately \$70.0 billion.

As of December 31, 2017, and as of the date of this filing, all of the company's issued and outstanding common stock, comprised of 100 shares, \$0.30 par value per share, is held by DowDuPont Inc.

The Registrant meets the conditions set forth in General Instruction I(1)(a), (b) and (d) of Form 10-K (as modified by a grant of no-action relief dated February 12, 2018) and is therefore filing this form with reduced disclosure format.

E. I. du Pont de Nemours and Company

Part I

ITEM 1. BUSINESS

DuPont was founded in 1802 and was incorporated in Delaware in 1915. Today, DuPont is helping customers find solutions to capitalize on areas of growing global demand — enabling more, safer, nutritious food; creating high-performance, cost-effective and energy efficient materials for a wide range of industries; and increasingly delivering renewably sourced bio-based materials and fuels. Total worldwide employment at December 31, 2017 was about 44,000 people. The company has subsidiaries in about 90 countries worldwide and manufacturing operations in about 50 countries. The percentage of consolidated net sales made to customers outside the United States of America (U.S.) was 70 percent during the period September 1 through December 31, 2017 and 56 percent during the period January 1 through August 31, 2017. See Note 20 to the Consolidated Financial Statements for additional details on the location of the company's sales and property.

DowDuPont Merger of Equals

DowDuPont Inc. ("DowDuPont") was formed on December 9, 2015 to effect an all-stock, merger of equals strategic combination between The Dow Chemical Company ("Dow") and DuPont (the "Merger Transaction"). On August 31, 2017 at 11:59 pm ET, (the "Merger Effectiveness Time") pursuant to the Agreement and Plan of Merger, dated as of December 11, 2015, as amended on March 31, 2017 (the "Merger Agreement"), Dow and DuPont each merged with wholly owned subsidiaries of DowDuPont ("Mergers") and, as a result of the Mergers, Dow and DuPont became subsidiaries of DowDuPont (collectively, the "Merger"). Prior to the Merger, DowDuPont did not conduct any business activities other than those required for its formation and matters contemplated by the Merger Agreement. DowDuPont intends to pursue, subject to the receipt of approval by the Board of Directors of DowDuPont, the separation of the combined company's agriculture business, specialty products business and materials science business through a series of tax-efficient transactions (collectively, the "Intended Business Separations"). DowDuPont anticipates materials science separating by the end of the first quarter of 2019, and expects agriculture and specialty products to separate by June 1, 2019.

Upon completion of the Merger, (i) each share of common stock, par value \$0.30 per share issued and outstanding immediately prior to the Merger Effectiveness Time, of the company (the "DuPont Common Stock") was converted into the right to receive 1.2820 fully paid and non-assessable shares of DowDuPont common stock, par value \$0.01 per share, ("DowDuPont Common Stock"), in addition to cash in lieu of any fractional shares of DowDuPont Common Stock, and (ii) each share of DuPont Preferred Stock—\$4.50 Series and DuPont Preferred Stock—\$3.50 Series (collectively, the "DuPont Preferred Stock") issued and outstanding immediately prior to the Merger Effectiveness Time remains issued and outstanding and was unaffected by the Mergers.

As a condition of the regulatory approval for the Merger Transaction, the company was required to divest certain assets related to its Crop Protection business and research and development ("R&D") organization, specifically the company's Cereal Broadleaf Herbicides and Chewing Insecticides portfolios, including Rynaxypyr®, Cyazypyr®, and Indoxacarb as well as the Crop Protection R&D pipeline and organization, excluding seed treatment, nematocides, and late-stage R&D programs (the "Divested Ag Business"). On March 31, 2017, the company entered into a definitive agreement (the "FMC Transaction Agreement") with FMC Corporation ("FMC"). Under the FMC Transaction Agreement, and effective upon the closing of the transaction on November 1, 2017, FMC acquired the Divested Ag Business that DuPont was required to divest in order to obtain European Commission ("EC") approval for the Merger Transaction, and DuPont acquired certain assets relating to FMC's Health and Nutrition segment, excluding its Omega-3 products (the "H&N Business") (collectively, the "FMC Transactions"). See Note 3 and Note 4 for further information regarding the acquisition and divestiture, respectively. The assets and liabilities related to the Divested Ag Business for all periods are presented as held for sale in the Consolidated Balance Sheets. The sale of the Divested Ag

Business meets the criteria for discontinued operations and as such, earnings are included within income from discontinued operations after income taxes in the Consolidated Statements of Operations for all periods presented.

Basis of Presentation

For purposes of DowDuPont's financial statement presentation, Dow was determined to be the accounting acquirer in the Merger and DuPont's assets and liabilities are reflected at fair value as of the Merger Effectiveness Time. In connection with the Merger and the related accounting determination, DuPont has elected to apply push-down accounting and reflect in its financial statements, the fair value of its assets and liabilities. DuPont's Consolidated Financial Statements for periods following the close of the Merger are labeled "Successor" and reflect DowDuPont's basis in the fair values of the assets and liabilities of DuPont. All periods prior to the closing of the Merger reflect the historical accounting basis in DuPont's assets and liabilities and are labeled "Predecessor." The Consolidated Financial Statements and Footnotes include a black line division between the columns titled "Predecessor" and "Successor" to signify that the amounts shown for the periods prior to and following the Merger are not comparable. See Note 3 for additional information on the Merger.

Part I

ITEM 1. BUSINESS, continued

Tax Reform

On December 22, 2017, the Tax Cuts and Jobs Act (“The Act”) was enacted. The Act reduces the US federal corporate income tax rate from 35 percent to 21 percent, requires companies to pay a one-time transition tax (“transition tax”) on earnings of foreign subsidiaries that were previously tax deferred, creates new provisions related to foreign sourced earnings, eliminates the domestic manufacturing deduction and moves to a territorial system. At December 31, 2017, the company had not completed its accounting for the tax effects of enactment of the Act; however, in the fourth quarter of 2017, the company recorded a net benefit in provision for taxes on continuing operations of \$2,001 million, which consisted of a provisional net benefit of \$2,716 million due to the reduction of the U.S. federal corporate income tax rate, partially offset by a provisional charge of \$715 million due to the transition tax. Additional details related to The Act can be found in Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations, on page 21 of this report and Note 7 to the Consolidated Financial Statements.

DowDuPont Cost Synergy Program

In September and November 2017, DowDuPont and the company approved post-merger restructuring actions to achieve targeted cost synergies under the DowDuPont Cost Synergy Program (the “Synergy Program”), adopted by the DowDuPont Board of Directors. The plan is designed to integrate and optimize the organization following the Merger and in preparation for the Intended Business Separations. Based on all actions approved to date under the Synergy Program, DuPont expects to record total pre-tax restructuring charges of \$430 million to \$600 million, comprised of approximately \$320 million to \$360 million of severance and related benefits costs; \$110 million to \$140 million of costs related to contract terminations; and up to \$100 million of asset related charges. The Synergy Program includes certain asset actions, including strategic decisions regarding the cellulosic biofuel unit reflected in the preliminary fair value measurement of DuPont’s assets as of the merger date. Current estimated total pre-tax restructuring charges could be impacted by future adjustments to the preliminary fair value of DuPont’s assets.

For the period September 1 through December 31, 2017, DuPont recorded a pre-tax charge of \$187 million, consisting of severance and related benefit costs of \$153 million, contract termination costs of \$31 million and asset-related charges of \$3 million. The charge for the period September 1 through December 31, 2017 was recognized in restructuring and asset related charges - net in the company's Consolidated Statements of Operations. Substantially all of the remaining restructuring charges are expected to be incurred in 2018 and the related actions, including employee separations, associated with this plan are expected to be substantially complete by the end of 2019.

Future cash payments related to this program are anticipated to be approximately \$410 million to \$480 million, primarily related to the payment of severance and related benefits and contract termination costs. It is possible that additional charges and future cash payments could occur in relation to the restructuring actions. The company anticipates including savings associated with these actions within DowDuPont's cost synergy commitment of \$3.3 billion associated with the Merger Transaction. Additional details related to this plan can be found in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, on page 21 of this report and Note 5 to the Consolidated Financial Statements.

2017 Restructuring Program

During the first quarter 2017, DuPont committed to take actions to improve plant productivity and better position its product lines for productivity and growth before and after the anticipated closing of the Merger Transaction (the "2017 restructuring program"). In connection with these actions, the company incurred pre-tax charges of \$313 million for the period January 1 through August 31, 2017 ("Predecessor" period) recognized in restructuring and asset related charges - net in the company's Consolidated Statements of Operations. The charge is comprised of \$279 million of asset-related charges and \$34 million in severance and related benefit costs. The charges primarily relate to the second

quarter closure of the safety and construction product line at the Cooper River manufacturing site located near Charleston, South Carolina. The asset-related charges mainly consist of accelerated depreciation associated with the closure. The actions associated with this plan are substantially complete. The company anticipates including savings associated with these actions within the targeted cost synergies associated with the Merger Transaction. Additional details related to this plan can be found in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, on page 22 of this report and Note 5 to the Consolidated Financial Statements.

Part I

ITEM 1. BUSINESS, continued

2016 Global Cost Savings and Restructuring Plan

On December 11, 2015, DuPont announced a 2016 global cost savings and restructuring plan designed to reduce \$730 million in costs in 2016 compared with 2015. As part of the plan, the company committed to take structural actions across all product lines and staff functions globally to operate more efficiently by further consolidating product lines and aligning staff functions more closely with them. In connection with the restructuring actions, the company recorded a pre-tax charge to earnings of \$783 million in the fourth quarter 2015, comprised of \$641 million of severance and related benefit costs, \$109 million of asset related charges, and \$33 million of contract termination costs. The restructuring actions associated with the charge are substantially complete and the plan delivered the target cost reductions in 2016 versus 2015. Additional details related to this plan can be found in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, on page 22 of this report and Note 5 to the Consolidated Financial Statements.

Acquisition of Granular, Inc.

On August 31, 2017, the company acquired Granular, Inc., a leading provider of software and analytics tools that help farms improve efficiency, profitability, and sustainability. The purchase price was approximately \$250 million and was primarily allocated to goodwill, developed technology and customer relationships.

Divestiture of Food Safety Diagnostic Business

In February 2017, the company completed the sale of the global food safety diagnostic business to Hygiena LLC. The sale resulted in a pre-tax gain of \$162 million (\$86 million net of tax). The gain was recorded in sundry income - net in the company's Consolidated Statement of Operations for the period January 1 through August 31, 2017.

Settlement of PFOA MDL

As previously reported, approximately 3,550 lawsuits have been filed in various federal and state courts in Ohio and West Virginia alleging personal injury from exposure to perfluorooctanoic acid and its salts, including the ammonium salt ("PFOA"), in drinking water as a result of the historical manufacture or use of PFOA at the Washington Works' plant outside Parkersburg, West Virginia. The plant operating units involved in the allegations are owned and operated by The Chemours Company ("Chemours"). These personal injury lawsuits were consolidated in multi-district litigation in the United States District Court for the Southern District of Ohio (the "MDL"). In February 2017, DuPont and plaintiffs' counsel agreed to a settlement in principle of the MDL; the parties executed the definitive settlement agreements in March 2017. The total settlement amount is \$670.7 million in cash, half of which was paid by Chemours and half by DuPont. The settlement was entered into solely by way of compromise and is not in any way an admission of liability or fault by DuPont or Chemours. The company recorded a pre-tax charge of \$335 million (\$214 million net of tax) to (loss) income from discontinued operations after income taxes in the company's Consolidated Statement of Operations for the period January 1 through August 31, 2017 for the remainder of the settlement not subject to indemnification by Chemours. See Note 14 to the Consolidated Financial Statements for additional information.

Spin-off of Performance Chemicals

On July 1, 2015, DuPont completed the separation of its Performance Chemicals segment through the spin-off of all of the issued and outstanding stock of The Chemours Company. In connection with the separation, the company and Chemours entered into a Separation Agreement and a Tax Matters Agreement as well as certain ancillary agreements. In accordance with generally accepted accounting principles in the U.S. ("GAAP"), the results of operations of its former Performance Chemicals segment are presented as discontinued operations and, as such, are included within (loss) income from discontinued operations after income taxes in the Consolidated Statements of Operations for all periods presented. Additional details regarding the separation and other related agreements can be found in Note 4 to

the Consolidated Financial Statements.

Segment Information

Effective with the Merger, DuPont's business activities are components of its parent company's business operations. DuPont's business activities, including the assessment of performance and allocation of resources, are reviewed and managed by DowDuPont. Information used by the chief operating decision maker of DuPont relates to the company in its entirety. Accordingly, there are no separate reportable business segments for DuPont under Accounting Standards Codification ("ASC") Topic 280 "Segment Reporting" and DuPont's business results are reported in this Form 10-K as a single operating segment. Prior year's segment information has been made to conform to the current presentation.

Part I

ITEM 1. BUSINESS, continued

Principal Product Information

Subsidiaries and affiliates of DuPont conduct manufacturing, seed production and/or selling activities and some are distributors of products manufactured by the company. The following describes the company's principal product lines including major brands and technologies:

Agriculture

The agriculture product line offers a broad portfolio of products and services that are specifically targeted to achieve gains in crop yields and productivity for the global production agriculture industry. The agriculture product line includes hybrid corn seed and soybean seed varieties, primarily under the Pioneer[®] brand name, as well as canola, sunflower, sorghum, wheat and rice seed, silage inoculants, weed, insect and disease control products, as well as agronomic software. Pioneer seed sales amounted to 15 percent, 34 percent, 29 percent and 29 percent of the company's total consolidated net sales for the period September 1, 2017 through December 31, 2017, for the period January 1, 2017 through August 31, 2017 and for the years ended December 31, 2016 and 2015, respectively.

Packaging and Specialty Plastics

The packaging and specialty plastics product line specializes in resins and films used in packaging and industrial polymer applications, sealants and adhesives and sporting goods. Key brands and technologies include DuPont[™] Surlyn[®] ionomer resins, Bynel[®] coextrudable adhesive resins, Elvax[®] EVA resins, Nucrel[®] Elvaloy[®] polymer modifiers and Elvaloy[®] copolymer resins.

Electronics and Imaging

The electronics and imaging product line supplies differentiated materials and systems for consumer electronics, photovoltaics ("PV"), displays and advanced printing that enable superior performance and lower total cost of ownership for customers. The company targets growth opportunities in circuit and semiconductor fabrication and packaging materials, PV materials, display materials, packaging graphics, and digital printing.

Industrial Biosciences

The industrial biosciences product line offers a broad portfolio of bio-based products, including enzymes that add value and functionality to processes and products across a broad range of markets such as animal nutrition, detergents, food manufacturing, ethanol production and industrial applications. The product line also includes DuPont[™] Sorofa PTT renewably sourced polymer for use in carpet and apparel fibers and clean technologies offerings to help reduce sulfur and other emissions, formulate cleaner fuels, and dispose of liquid waste.

Nutrition and Health

The nutrition and health product line offers a wide range of sustainable, bio-based ingredients, providing innovative solutions including the wide-range of DuPont[™] Danisco[®] food ingredients such as cultures and probiotics, notably Howaru[®], pharmaceutical excipients, emulsifiers, texturants, natural sweeteners such as Xivia[®] and Supro[®] soy-based food ingredients. These ingredients hold leading market positions based on industry leading innovation, knowledge and experience, relevant product portfolios and close-partnering with the world's food manufacturers and pharmaceutical companies. The company has recently expanded the probiotics production capacity in the United States due to the rapidly growing global demand for probiotics.

Safety and Construction

The safety and construction product line offers innovation engineered products and integrated systems for a number of industry verticals including construction, worker safety, energy, oil and gas and transportation. The product line addresses the growing global needs of businesses, governments, and consumers for solutions that make life safer,

healthier and better. Key brands and technologies include DuPont™ Kevlar® fiber, DuPont™ Nomex® fiber and paper, and DuPont™ Tyvek® protective materials, DuPont™ Tychem® protective suits and DuPont™ Corian® solid and quartz surfaces.

Part I

ITEM 1. BUSINESS, continued

Transportation and Advanced Polymers

The transportation and advanced polymers product line offers a broad range of polymer-based materials and expert application development assistance to enhance the performance, reduce the total system cost and optimize the sustainability of their products. The portfolio of high performance renewably-sourced and sustainable polymers includes engineering resins, adhesives, lubricants and parts used by customers to fabricate components for mechanical, chemical and electrical systems. Key brands and technologies include DuPont™ Zytel® long chain nylon polymers, Zytel® HTN nylon resins, Zytel® nylon resins, Crastin® PBT polymer resins, Rynite® PET polymer resins, Delrin® acetal resins, Hytrel® polyester thermoplastic elastomer resins, Vespel® parts and shapes, Vamac® ethylene acrylic elastomer and Kalrez® perfluoroelastomer.

See Note 20 to the Consolidated Financial Statements for net sales by major product line for the periods September 1 through December 31, 2017, the period January 1 through August 31, 2017 and for the years ended December 31, 2016 and 2015.

Sales by geographic region are included within Part II, Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations", "Analysis of Operations".

Principal Markets

The company's principal markets include: agriculture, automotive and transportation, packaging for food and beverages, electrical/electronic components, material handling, healthcare, construction, semiconductor, aerospace/aircraft, dietary supplements, specialty food ingredients, food nutrition, health and safety, industrial, consumer electronics, photovoltaics, displays, consumer, military and law enforcement, aircraft, energy, animal nutrition, detergents, food and beverage, carpet and apparel fiber.

Sources and Availability of Major Raw Materials

The company utilizes numerous suppliers as well as internal sources to supply a wide range of raw materials, energy, supplies, services and equipment. To ensure availability, the company maintains multiple sources for fuels and many raw materials, including hydrocarbon feedstocks. Large volume purchases are generally procured under competitively priced supply contracts.

The following are the company's major commodities, raw materials and supplies:

Corn and soybean seeds, soy white flakes, soybean, adipic acid, hexamethylene diamine, meta-phenylene diamine, terephthaloyl chloride, thermoplastic polyester elastomer and thermoplastic copolyester elastomer.

Competition

As a science and technology based company, DuPont competes on a variety of factors such as product quality and performance or specifications, continuity of supply, price, customer service and breadth of product line, depending on the characteristics of the particular market involved and the product or service provided. The company competes globally with other seed and plant biotechnology companies on the basis of technology and trait leadership, price, quality and cost competitiveness. Key competitors for the company's agriculture product line include BASF, Bayer, Monsanto and Syngenta, as well as regional seed companies.

Distribution

Most products are marketed primarily through the company's sales organization, although in some regions, more emphasis is placed on sales through distributors. The company has a diverse worldwide network which markets and distributes the company's brands to customers globally. This network consists of the company's sales and marketing

organization partnering with distributors, independent retailers and farmers, cooperatives and agents throughout the world. In the corn and soybean markets of the U.S. Corn Belt, the company sells Pioneer® brand products primarily through a specialized force of independent sales representatives. Outside of North America, the company markets Pioneer® brand products primarily through a network of subsidiaries, joint ventures and independent producer-distributors.

Seasonality

Sales of the company's agriculture product line are affected by the seasonality of global agriculture markets and weather patterns. Sales and earnings performance are significantly stronger in the first versus second half of the year, reflecting the northern hemisphere planting season. As a result of this seasonality, the agriculture product line inventory is at its highest level at the end of the calendar year and is sold down in the first and second quarters. Trade receivables for seeds are at a low point at year-end and increase through the northern hemisphere selling season to peak at the end of the second quarter.

Part I

ITEM 1. BUSINESS, continued

Backlog

In general, the company does not manufacture its products against a backlog of orders and does not consider backlog to be a significant indicator of the level of future sales activity. Production and inventory levels are based on the level of incoming orders as well as projections of future demand. Therefore, the company believes that backlog information is not meaningful to understanding its overall business and should not be considered a reliable indicator of the company's ability to achieve any particular level of revenue or financial performance.

Intellectual Property

Trade secrets are an important element of the company's intellectual property. Many of the processes used to make DuPont products are kept as trade secrets which, from time to time, may be licensed to third parties. DuPont vigilantly protects all of its intellectual property including its trade secrets. When the company discovers that its trade secrets have been unlawfully taken, it reports the matter to governmental authorities for investigation and potential criminal action, as appropriate. In addition, the company takes measures to mitigate any potential impact, which may include civil actions seeking redress, restitution and/or damages based on loss to the company and/or unjust enrichment.

Patents & Trademarks: DuPont continually applies for and obtains U.S. and foreign patents and has access to a large patent portfolio, both owned and licensed. DuPont's rights under these patents and licenses, as well as the products made and sold under them, are important to the company in the aggregate. The protection afforded by these patents varies based on country, scope of individual patent coverage, as well as the availability of legal remedies in each country. This significant patent estate may be leveraged to align with the company's strategic priorities within and across product lines. At December 31, 2017, the company owned about 6,500 active U.S. patents and about 9,900 active patents outside of the U.S., which reflects the impact of the FMC Transactions. Information on the importance of intellectual property rights to the company's agriculture product line is included in the Research and Development discussion below.

Remaining life of granted patents owned as of December 31, 2017:

	U.S.	Other Countries
Within 5 years	1,700	2,800
6 to 10 years	1,900	4,400
11 to 16 years	2,400	2,600
16 to 20 years	500	100
Total	6,500	9,900

In addition to its owned patents, the company owns over 7,000 patent applications.

The company owns or licenses many trademarks that have significant recognition at the consumer retail level and/or product line to product line level. Ownership rights in trademarks do not expire if the trademarks are continued in use and properly protected.

Research and Development

DuPont's investment in research and development ("R&D") was \$473 million for the period September 1 through December 31, 2017, \$1,064 million for the period January 1 through August 31, 2017, \$1,502 million in 2016 and \$1,735 million in 2015. DuPont conducts R&D activities to renew its portfolio, create new product lines, and transform markets to deliver results in the short, mid and long term. The company protects its R&D investment through its intellectual property strategy. See discussion under "Intellectual Property" above.

R&D expense related to the agriculture product line accounted for 53 percent and 56 percent of the company's total research and development expense for the periods from January 1 through August 31, 2017 and September 1 through December 31, 2017, respectively. R&D for the agriculture product line requires long-term commitment of resources, extensive regulatory efforts and collaborations, partnerships and business arrangements to successfully bring products to market. To protect its investment, the company employs the use of patents covering germplasm and native and biotechnology traits in accordance with country laws. The company holds multiple long-term biotechnology trait licenses from third parties as a normal course of business. The biotechnology traits licensed by the company from third parties are contained in a variety of Pioneer seeds, including corn hybrids and soybean varieties. The majority of Pioneer's corn hybrids and soybean varieties sold to customers contain biotechnology traits licensed from third parties under these long-term licenses.

ITEM 1. BUSINESS, continued

Environmental Matters

Information related to environmental matters is included in several areas of this report: (1) Environmental Proceedings beginning on page 17, (2) Management's Discussion and Analysis of Financial Condition and Results of Operations beginning on pages 34, 40-42 and (3) Notes 1 and 14 to the Consolidated Financial Statements.

Available Information

The company is subject to the reporting requirements under the Securities Exchange Act of 1934. Consequently, the company is required to file reports and information with the Securities and Exchange Commission ("SEC"), including reports on the following forms: annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934.

The public may read and copy any materials the company files with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet site at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

The company's annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports are also accessible on DowDuPont's website at <http://www.dow-dupont.com/home> by clicking on the section labeled "Investors", then on "DuPont SEC Filings." These reports are made available, without charge, as soon as is reasonably practicable after the company files or furnishes them electronically with the SEC.

Part I

ITEM 1A. RISK FACTORS

The company's operations could be affected by various risks, many of which are beyond its control. Based on current information, the company believes that the following identifies the most significant risk factors that could affect its operations. Past financial performance may not be a reliable indicator of future performance and historical trends should not be used to anticipate results or trends in future periods.

The Benefits of the Merger May Not be Fully Realized. Combining the Businesses of DuPont and Dow May Be More Difficult, Costly or Time-Consuming than Expected, Which May Adversely Affect DuPont's Results.

The success of the Merger depends on, among other things, DowDuPont's ability to combine the DuPont and Dow businesses in a manner that facilitates the intended separation of the combined company's agriculture, materials science and specialty products businesses through one or more tax-efficient transactions (the "Intended Business Separations"), resulting in three independent, publicly traded companies, and realizes anticipated synergies.

DuPont expects to benefit from significant cost synergies at both the product line and corporate levels through the Synergy Program which is designed to integrate and optimize the organization following the Merger and in preparation for the Intended Business Separations, including through the achievement of production cost efficiencies, enhancement of the agricultural supply chain, elimination of duplicative agricultural research and development programs, optimization of the combined company's global footprint across manufacturing, sales and research and development in the materials science business, optimizing manufacturing processes in the electronics space, the reduction of corporate and leveraged services costs, and the realization of significant procurement synergies. In connection with the Synergy Program, DuPont expects to record total pretax restructuring charges of \$430 million to \$600 million, comprised of approximately \$320 million to \$360 million of severance and related benefit costs; \$110 million to \$140 million of costs related to contract terminations; and up to \$100 million of asset related charges.

Management also expects the combined company will achieve growth synergies and other meaningful savings and benefits as a result of the Intended Business Separations.

Combining DuPont and Dow's independent businesses and preparing for the Intended Business Separations are complex, costly and time-consuming processes and the management of DowDuPont may face significant implementation challenges, many of which may be beyond the control of management, including, without limitation:

- ongoing diversion of the attention of management from the operation of the combined company's business as a result of the Intended Business Separations;
- impact of portfolio changes between materials science and specialty products on integration and separation preparation activities;
- difficulties in achieving anticipated cost savings, synergies, business opportunities and growth prospects;
- the possibility of faulty assumptions underlying expectations regarding the integration or separation process, including with respect to the intended tax efficient transactions;
- unanticipated issues in integrating, replicating or separating information technology, communications programs, financial procedures and operations, and other systems, procedures and policies;
- difficulties in managing a larger combined company, addressing differences in business culture and retaining key personnel;
- unanticipated changes in applicable laws and regulations;
- managing tax costs or inefficiencies associated with integrating the operations of the combined company and the intended tax efficient separation transactions; and
- coordinating geographically separate organizations.

Some of these factors will be outside of the control of DowDuPont, DuPont and Dow, and any one of them could result in increased costs and diversion of management's time and energy, as well as decreases in the amount of expected revenue which could materially impact business, financial condition and results of operations. The integration and Intended Businesses Separation processes and other disruptions, including those from divestitures and acquisitions undertaken in connection with securing regulatory approval for the Merger, as well as those from the portfolio changes between the materials science and specialty products businesses, may also adversely affect the combined company's relationships with employees, suppliers, customers, distributors, licensors and others with whom DuPont and Dow have business or other dealings, and difficulties in integrating the businesses or regulatory functions of DuPont and Dow could harm the reputation of DowDuPont, DuPont and Dow.

Part I

ITEM 1A. RISK FACTORS, continued

If DowDuPont is not able to successfully combine the businesses of DuPont and Dow in an efficient, cost-effective and timely manner, the anticipated benefits and cost savings, including from the Synergy Program, of the Merger (including the Intended Business Separations) may not be realized fully, or at all, or may take longer to realize than expected, and the value of DowDuPont common stock, the revenues, levels of expenses and results of operations may be affected adversely. A variety of factors may adversely affect DowDuPont's ability to realize the currently expected synergies, savings and other benefits of the Merger, including failure to successfully optimize the combined company's facilities footprint, the failure to take advantage of the combined company's global supply chain, the failure to identify and eliminate duplicative programs, and the failure to otherwise integrate DuPont's or Dow's respective businesses, including their technology platforms.

DuPont Will Incur Significant Transaction Costs in Connection with the Integration of Dow and DuPont.

There are a large number of processes, policies, procedures, operations, technologies and systems that must be integrated in connection with the Merger and replicated, transferred or separated in connection with the Intended Business Separations. While DuPont has assumed a certain level of expenses, including in connection with the Synergy Program, would be incurred in connection with the Merger and the Intended Business Separations, there are many factors beyond the combined company's control that could affect the total amount of, or the timing of, anticipated expenses with respect to the integration and implementation of the combined businesses.

There may also be additional unanticipated significant costs in connection with the Merger and the Intended Business Separations that DuPont may not recoup. These costs and expenses could reduce the benefits and additional income DuPont expects to achieve from the Merger. Although DuPont expects that these benefits will offset the transaction expenses and implementation costs over time, this net benefit may not be achieved in the near term or at all.

Inability to Access the Debt Capital Markets Could Impair DuPont's Liquidity, Business or Financial Condition.

DowDuPont's primary sources of liquidity are through DuPont and Dow and their respective consolidated subsidiaries, (collectively, the "Subsidiaries"). Each of DuPont and Dow has relied and continues to rely on access to the debt capital markets to finance their day-to-day and long-term operations. In connection with the Merger, DowDuPont has not incurred debt obligations or guaranteed the debt obligations of Dow or DuPont. Any limitation on the part of either DuPont's or Dow's ability to raise money in the debt markets could have a substantial negative effect on their respective liquidity and the liquidity of DowDuPont. Access to the debt capital markets in amounts adequate to finance each company's activities could be impaired as a result of the existence of material nonpublic information about the Intended Business Separations and other potential factors, including factors that are not specific to the companies, such as a severe disruption of the financial markets and interest rate fluctuations.

Prior to the Intended Business Separations, if pursued, the level and quality of the respective earnings, operations, business and management, among other things, of each of DuPont and Dow will impact their respective credit ratings, costs and availability of financing and those of the combined company. A decrease in the ratings assigned to DuPont or Dow by the ratings agencies may negatively impact their access to the debt capital markets and increase the combined company's cost of borrowing. There can be no assurance that DuPont and Dow will maintain their current credit worthiness or prospective credit ratings. Any actual or anticipated changes or downgrades in such credit ratings may have a negative impact on the liquidity, capital position or access to capital markets of DuPont and Dow and, therefore, DowDuPont.

The Costs of Complying with Evolving Regulatory Requirements Could Negatively Impact the Company's Financial Results. Actual or Alleged Violations of Environmental Laws or Permit Requirements Could Result in Restrictions or Prohibitions on Plant Operations, Substantial Civil or Criminal Sanctions, as well as the Assessment of Strict Liability

and/or Joint and Several Liability.

The company is subject to extensive federal, state, local and foreign laws, regulations, rules and ordinances relating to pollution, protection of the environment, greenhouse gas emissions, and the generation, storage, handling, transportation, treatment, disposal and remediation of hazardous substances and waste materials. Costs and capital expenditures relating to environmental, health or safety matters are subject to evolving regulatory requirements and depend on the timing of the promulgation and enforcement of specific standards which impose the requirements. Moreover, changes in environmental regulations could inhibit or interrupt the company's operations, or require modifications to its facilities. Accordingly, environmental, health or safety regulatory matters could result in significant unanticipated costs or liabilities.

Part I

ITEM 1A. RISK FACTORS, continued

Increased Concerns Regarding the Safe Use of Seeds with Biotechnology Traits, Crop Protection Products and Chemicals in General, in Commerce and their Potential Impact on the Environment as well as Perceived Impacts of Biotechnology on Health and the Environment, have Resulted in More Restrictive Regulations and could Lead to New Regulations.

Concerns and claims regarding the safe use of seeds with biotechnology traits, crop protection products, and chemicals in general, their potential impact on health and the environment, and the perceived impacts of biotechnology on health and the environment, reflect a growing trend in societal demands for increasing levels of product safety and environmental protection. These concerns and claims include those that increased use of crop protection products, related drift and volatilization, and of biotechnology traits to address resistance of weeds and pests to control by crop protection products, could increase such resistance and otherwise negatively impact health and the environment. These concerns could manifest themselves in stockholder proposals, preferred purchasing, delays or failures in obtaining or retaining regulatory approvals, delayed product launches, lack of market acceptance, product discontinuation, continued pressure for and adoption of more stringent regulatory intervention and litigation. These concerns could also influence public perceptions, the viability or continued sales of certain of the company's products, the company's reputation and the cost to comply with regulations. These concerns could have a negative impact on the company's results of operations.

In most jurisdictions, the company must test the safety, efficacy and environmental impact of its agricultural products to satisfy regulatory requirements and obtain the necessary approvals. In certain jurisdictions, the company must periodically renew its approvals which may require it to demonstrate compliance with then-current standards. The regulatory environment is lengthy, complex and in some markets unpredictable, with requirements that can vary by product, technology, industry and country. The regulatory environment may be impacted by the activities of non-governmental organizations and special interest groups and stakeholder reaction to actual or perceived impacts of new technology, products or processes on safety, health and the environment. Obtaining and maintaining regulatory approvals requires submitting a significant amount of information and data, which may require participation from technology providers. Regulatory standards and trial procedures are continuously changing. The pace of change together with the lack of regulatory harmony could result in unintended noncompliance.

Responding to these changes and meeting existing and new requirements may involve significant costs or capital expenditures or require changes in business practice that could result in reduced profitability. The failure to receive necessary permits or approvals could have near- and long-term effects on the company's ability to produce and sell some current and future products.

To maintain its right to produce or sell existing products or to commercialize new products containing biotechnology traits, particularly seed products, the company must be able to demonstrate its ability to satisfy the requirements of regulatory agencies. Sales into and use of seeds with biotechnology traits in jurisdictions where cultivation has been approved could be impacted if key import markets have not approved the import of grains, food and food ingredients and other products derived from those seeds. If import of grains, food and food ingredients and other products derived from those seeds containing such biotechnology traits occurs in these markets, it could lead to disruption in trade and potential liability for the company.

In addition, the company's regulatory compliance could be affected by the detection of low level presence of biotechnology traits in conventional seed or products produced from such seed. Furthermore, the detection of biotechnology traits not approved in the country of cultivation may affect the company's ability to supply product and could affect exports of products produced from such seeds and even result in crop destruction or product recalls.

An Impairment of Goodwill or Intangibles Assets could Negatively Impact the company's Financial Results. As a result of the Merger and the related accounting determination, DuPont elected to apply push-down accounting and has reflected the acquisition date fair value of assets and liabilities in its Successor Consolidated Financial Statements, including a significant amount of goodwill and intangible assets. The company assesses both goodwill and indefinite-lived intangible assets for impairment on an annual basis, or more frequently if conditions indicate that an impairment may have occurred. The company has the option to first perform qualitative testing to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If the company chooses not to complete a qualitative assessment for a given reporting unit or if the initial assessment indicates that it is more likely than not that the estimated fair value of a reporting unit is less than its carrying value, additional quantitative testing is required. If quantitative testing indicates that the carrying value of a reporting unit exceeds its fair value, a goodwill impairment is recorded equal to the amount by which the carrying value of the reporting unit exceeds its fair value. Since the company utilizes a discounted cash flow methodology to calculate the fair value of its reporting units, continued weak demand for a specific product line could result in an impairment. As a result of the application of push-down accounting, the carrying value of the company's assets approximates fair value therefore increasing the risk of impairments. Future impairments of goodwill or intangible assets could be recorded in results of operations due to changes in assumptions, estimates or circumstances and there can be no assurance that such impairments would be immaterial to the company.

Part I

ITEM 1A. RISK FACTORS, continued

The Determination to Proceed with the Intended Business Separations is a Decision of the DowDuPont Board of Directors and the Expected Benefits of Such Transactions, if They Occur, Will Be Uncertain.

In the event that the DowDuPont board determines to proceed with the Intended Business Separations, it is currently anticipated that any such Intended Business Separation transaction would be effectuated through two pro-rata spin-off transactions, in which DowDuPont stockholders, at such time, would receive shares of capital stock in the resulting spin-off companies, resulting in three independent, public companies. The DowDuPont board may ultimately determine to abandon one or more of the Intended Business Separation transactions, and such determination could have an adverse impact on DowDuPont, DuPont, and Dow. There are many factors that could, prior to the determination by the DowDuPont board to proceed with the Intended Business Separations, impact the structure or timing of, the anticipated benefits from, or determination to ultimately proceed with, the Intended Business Separations, including, among others, global economic conditions, instability in credit markets, declining consumer and business confidence, fluctuating commodity prices and interest rates, volatile foreign currency exchange rates, tax considerations, and other challenges that could affect the global economy, specific market conditions in one or more of the industries of the businesses proposed to be separated, and changes in the regulatory or legal environment. Such changes could adversely impact the value of one or more of the Intended Business Separation transactions to the combined company's stockholders. Additionally, to the extent the DowDuPont board determines to proceed with the Intended Business Separations, the consummation of such transactions is a complex, costly and time-consuming process, and there can be no guarantee that the intended benefits of such transactions will be achieved. An inability to realize the full extent of the anticipated benefits of the Intended Business Separations, as well as any delays encountered in the process, could have an adverse effect upon the revenues, level of expenses and operating results of the agriculture business, the specialty products business, the materials science business and/or the combined company.

The Company's Operations Outside the United States are Subject to Risks and Restrictions, Which Could Negatively Affect Our Results of Operations, Financial Condition, and Cash Flows.

The company's operations outside the United States are subject to risks and restrictions, including fluctuations in currency values and foreign-currency exchange rates; exchange control regulations; changes in local political or economic conditions; import and trade restrictions; import or export licensing requirements and trade policy and other potentially detrimental domestic and foreign governmental practices or policies affecting U.S. companies doing business abroad. Although DuPont has operations throughout the world, sales outside the U.S. in 2017 were principally to customers in Eurozone countries, China, Brazil, and Japan. Further, the company's largest currency exposures are the European euro, the Chinese yuan, the Brazilian real, and the Japanese yen. Market uncertainty or an economic downturn in these geographic areas could reduce demand for the company's products and result in decreased sales volume, which could have a negative impact on DuPont's results of operations. In addition, changes in exchange rates may affect the company's results from operations, financial condition and cash flows in future periods. The company actively manages currency exposures that are associated with net monetary asset positions, committed currency purchases and sales, foreign currency-denominated revenues and other assets and liabilities created in the normal course of business.

Volatility in Energy and Raw Materials Costs Could Have a Significant Impact on the Company's Sales and Earnings. The company's manufacturing processes consume significant amounts of energy and raw materials, the costs of which are subject to worldwide supply and demand as well as other factors beyond the control of the company. Significant variations in the cost of energy, which primarily reflect market prices for oil, natural gas, and raw materials affect the company's operating results from period to period. Legislation to address climate change by reducing greenhouse gas emissions and establishing a price on carbon could create increases in energy costs and price volatility.

When possible, the company purchases raw materials through negotiated long-term contracts to minimize the impact of price fluctuations. Additionally, the company enters into over-the-counter and exchange traded derivative commodity instruments to hedge its exposure to price fluctuations on certain raw material purchases. The company takes actions to offset the effects of higher energy and raw material costs through selling price increases, productivity improvements and cost reduction programs. Success in offsetting higher raw material costs with price increases is largely influenced by competitive and economic conditions and could vary significantly depending on the market served. If the company is not able to fully offset the effects of higher energy and raw material costs, it could have a significant impact on the company's financial results.

Part I

ITEM 1A. RISK FACTORS, continued

The Company's Results of Operations and Financial Condition Could be Seriously Impacted by Business Disruptions and Security Breaches, Including Cybersecurity Incidents.

Business and/or supply chain disruptions, plant and/or power outages and information technology system and/or network disruptions, regardless of cause including acts of sabotage, employee error or other actions, geo-political activity, weather events and natural disasters could seriously harm the company's operations as well as the operations of its customers and suppliers. In addition, terrorist attacks and natural disasters have increased stakeholder concerns about the security and safety of chemical production and distribution. Failure to effectively prevent, detect and recover from security breaches, including attacks on information technology and infrastructure by hackers; viruses; breaches due to employee error or actions; or other disruptions could result in misuse of the company's assets, business disruptions, loss of property including trade secrets and confidential business information, legal claims or proceedings, reporting errors, processing inefficiencies, negative media attention, loss of sales and interference with regulatory compliance. Like most major corporations, the company is the target of industrial espionage, including cyber-attacks, from time to time. The company has determined that these attacks have resulted, and could result in the future, in unauthorized parties gaining access to at least certain confidential business information. However, to date, the company has not experienced any material financial impact, changes in the competitive environment or business operations that it attributes to these attacks. Although management does not believe that the company has experienced any material losses to date related to security breaches, including cybersecurity incidents, there can be no assurance that it will not suffer such losses in the future. The company actively manages the risks within its control that could lead to business disruptions and security breaches. As these threats continue to evolve, particularly around cybersecurity, the company may be required to expend significant resources to enhance its control environment, processes, practices and other protective measures. Despite these efforts, such events could have a material adverse effect on the company's business, financial condition or results of operations.

Unpredictable Seasonal and Weather Factors Could Impact Sales and Earnings from the Company's Agriculture Product Line.

The agriculture industry is subject to seasonal and weather factors, which can vary unpredictably from period to period. Weather factors can affect the presence of disease and pests on a regional basis and, accordingly, can positively or adversely affect the demand for crop protection products, including the mix of products used. The weather also can affect the quality, volume and cost of seed produced for sale as well as demand and product mix. Seed yields can be higher or lower than planned, which could lead to higher inventory and related write-offs and affect the ability to supply.

Inability to Discover, Develop and Protect New Technologies and Enforce the Company's Intellectual Property Rights, and to Respond to New Technologies Could Adversely Affect the Company's Financial Results.

The company competes with major global companies that have strong intellectual property rights, including rights supporting the use of biotechnology to enhance products, particularly agricultural and bio-based products. Speed in discovering, developing, protecting, and responding to new technologies, including new technology-based distribution channels that could impede the company's ability to engage with customers and end users, and bringing related products to market is a significant competitive advantage. Failure to predict and respond effectively could cause the company's existing or candidate products to become less competitive, adversely affecting sales. Competitors are increasingly challenging intellectual property positions and the outcomes can be highly uncertain. If challenges are resolved adversely, it could negatively impact the company's ability to obtain licenses on competitive terms, commercialize new products and generate sales from existing products.

Intellectual property rights, including patents, plant variety protection, trade secrets, confidential information, trademarks, tradenames and other forms of trade dress, are important to the company's business. The company

endeavors to protect its intellectual property rights in jurisdictions in which its products are produced or used and in jurisdictions into which its products are imported. However, the company may be unable to obtain protection for its intellectual property in key jurisdictions. Further, changes in government policies and regulations, including changes made in reaction to pressure from non-governmental organizations, could impact the extent of intellectual property protection afforded by such jurisdictions.

The majority of the company's corn hybrids and soybean varieties sold to customers contain biotechnology traits that are licensed from third parties under long-term licenses. If the company loses its rights under such licenses, it could negatively impact the company's ability to obtain future licenses on competitive terms, commercialize new products and generate sales from existing products.

Part I

ITEM 1A. RISK FACTORS, continued

The company has designed and implemented internal controls to restrict access to and distribution of its intellectual property. Despite these precautions, the company's intellectual property is vulnerable to unauthorized access through employee error or actions, theft and cybersecurity incidents, and other security breaches. When unauthorized access and use or counterfeit products are discovered, the company reports such situations to governmental authorities for investigation, as appropriate, and takes measures to mitigate any potential impact. Protecting intellectual property related to biotechnology is particularly challenging because theft is difficult to detect and biotechnology can be self-replicating. Accordingly, the impact of such theft can be significant.

Failure to Effectively Manage Acquisitions, Divestitures, Alliances and Other Portfolio Actions Could Adversely Impact Our Future Results.

The company made certain divestitures, primarily related to its agriculture product line, in connection with obtaining regulatory approval for the Merger. In addition, the company had a recent acquisition and from time to time evaluates acquisition candidates that may strategically fit its business and/or growth objectives. If the company is unable to successfully integrate and develop acquired businesses, the company could fail to achieve anticipated synergies and cost savings, including any expected increases in revenues and operating results, which could have a material adverse effect on the company's financial results. The company continually reviews its portfolio of assets for contributions to the company's objectives and alignment with its growth strategy. However, the company may not be successful in separating underperforming or non-strategic assets and gains or losses on the divestiture of, or lost operating income from, such assets may affect the company's earnings. Moreover, the company might incur asset impairment charges related to acquisitions or divestitures that reduce its earnings. In addition, if the execution or implementation of acquisitions, divestitures, alliances, joint ventures and other portfolio actions is not successful, it could adversely impact the company's financial condition, cash flows and results of operations.

The Company's Business, Including its Results of Operations and Reputation, Could be Adversely Affected by Process Safety and Product Stewardship Issues.

Failure to appropriately manage safety, human health, product liability and environmental risks associated with the company's products, product life cycles and production processes could adversely impact employees, communities, stakeholders, the environment, the company's reputation and its results of operations. Public perception of the risks associated with the company's products and production processes could impact product acceptance and influence the regulatory environment in which the company operates. While the company has procedures and controls to manage process safety risks, issues could be created by events outside of its control including natural disasters, severe weather events, acts of sabotage and substandard performance by third parties with which the company collaborates.

DuPont's Results of Operations Could Be Adversely Affected by Environmental, Litigation and Other Commitments and Contingencies.

The company is subject to various laws and regulations around the world governing the environment, including the discharge of pollutants and the management and disposal of hazardous substances. As a result of its operations, including its past operations and operations of divested businesses, the company could incur substantial costs, including remediation and restoration costs. The costs of complying with complex environmental laws and regulations, as well as internal voluntary programs, are significant and will continue to be so for the foreseeable future. The ultimate costs under environmental laws and the timing of these costs are difficult to predict. The company's accruals for such costs and liabilities may not be adequate because the estimates on which the accruals are based depend on a number of factors including the nature of the matter, the complexity of the site, site geology, the nature and extent of contamination, the type of remedy, the outcome of discussions with regulatory agencies and other Potentially Responsible Parties (PRPs) at multi-party sites and the number and financial viability of other PRPs.

At December 31, 2017, the company had accrued obligations of \$433 million for probable environmental remediation and restoration costs, although it is reasonably possible that the ultimate cost could range up to \$920 million above that amount. This includes matters with an aggregate estimated liability range from \$242 up to \$430 million above that amount for which the company is indemnified by Chemours. At December 31, 2017, the company had recognized a liability of \$433 million and an indemnification asset of \$242 million for environmental contingencies. If the company could no longer continue to recognize the related indemnification asset due to potential disputes related to recovery or solvency of Chemours, it could adversely impact DuPont's financial position and results of operations.

Part I

ITEM 1A. RISK FACTORS, continued

The company faces risks arising from various unasserted and asserted litigation matters, including, but not limited to, product liability, patent infringement, antitrust claims, and claims for third party property damage or personal injury stemming from alleged environmental torts. The company has noted a nationwide trend in purported class actions against chemical manufacturers generally seeking relief such as medical monitoring, property damages, off-site remediation and punitive damages arising from alleged environmental torts without claiming present personal injuries. The company also has noted a trend in public and private suits being filed on behalf of states, counties, cities and utilities alleging harm to the general public and the environment, including waterways and watersheds. An adverse outcome in any one or more of these matters could be material to the company's financial results. Various factors or developments can lead to changes in current estimates of liabilities such as a final adverse judgment, significant settlement or changes in applicable law. A future adverse ruling or unfavorable development could result in future charges that could have a material adverse effect on the company.

In the ordinary course of business, the company may make certain commitments, including representations, warranties and indemnities relating to current and past operations, including those related to divested businesses and issue guarantees of third party obligations. If the company were required to make payments as a result, they could exceed the amounts accrued, thereby adversely affecting the company's results of operations.

Pursuant to the Separation Agreement, Chemours indemnifies DuPont against certain litigation, environmental, workers' compensation and other liabilities that arose prior to the distribution. The term of this indemnification is indefinite and includes defense costs and expenses, as well as monetary and non-monetary settlements and judgments. If the company could no longer continue to recognize the related indemnification asset due to potential disputes related to recovery or solvency of Chemours, it could adversely impact DuPont's financial position and results of operations.

See Note 14 to the Consolidated Financial Statements for additional information on environmental, litigation and other commitments and contingencies faced by the company.

Part I

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The company's corporate headquarters are located in Wilmington, Delaware. The company's manufacturing, processing, marketing and research and development facilities, as well as regional purchasing offices and distribution centers are located throughout the world. Additional information with respect to the company's property, plant and equipment and leases is contained in Notes 11, 14 and 20 to the Consolidated Financial Statements.

The company has investments in property, plant and equipment related to global manufacturing operations. The number of principal manufacturing sites by major geographic area around the world at December 31, 2017 is as follows:

	Number of Sites
Asia Pacific	62
EMEA ¹	76
Latin America	37
U.S. & Canada	112
	287

¹. Europe, Middle East, and Africa ("EMEA").

The company's principal sites include facilities which, in the opinion of management, are suitable and adequate for their use and have sufficient capacity for the company's current needs and expected near-term growth. Properties are primarily owned by the company; however, certain properties are leased. No title examination of the properties has been made for the purpose of this report and certain properties are shared with other tenants under long-term leases.

Part I

ITEM 3. LEGAL PROCEEDINGS

The company is subject to various litigation matters, including, but not limited to, product liability, patent infringement, antitrust claims, and claims for third party property damage or personal injury stemming from alleged environmental torts. Information regarding certain of these matters is set forth below and in Note 14 to the Consolidated Financial Statements.

Litigation

PFOA: Environmental and Litigation Proceedings

For purposes of this report, the term PFOA means collectively perfluorooctanoic acid and its salts, including the ammonium salt

and does not distinguish between the two forms. Information related to this matter is included in Note 14 to the Consolidated Financial Statements under the heading PFOA.

Fayetteville Works Facility, Fayetteville, North Carolina

In August 2017, the U.S. Attorney's Office for the Eastern District of North Carolina served the company with a subpoena for testimony and the production of documents to a grand jury. In the fourth quarter of 2017, DuPont was served with additional subpoenas relating to the same issue. Information related to this matter is included in Note 14 to the Consolidated Financial Statements under the heading Fayetteville Works Facility, North Carolina.

La Porte Plant, La Porte, Texas - Crop Protection - Release Incident Investigations

On November 15, 2014, there was a release of methyl mercaptan at the company's La Porte facility. The release occurred at the site's Crop Protection unit resulting in four employee fatalities inside the unit. DuPont continues to cooperate with governmental agencies, including the U.S. Environmental Protection Agency ("EPA"), the Chemical Safety Board and the Department of Justice ("DOJ"), still conducting investigations. These investigations could result in sanctions and civil or criminal penalties against the company.

Environmental Proceedings

The company believes it is remote that the following matters will have a material impact on its financial position, liquidity or results of operations. The descriptions are included per Regulation S-K, Item 103(5)(c) of the Securities Exchange Act of 1934.

La Porte Plant, La Porte, Texas - EPA Multimedia Inspection

The EPA conducted a multimedia inspection at the La Porte facility in January 2008. DuPont, EPA and DOJ began discussions in the Fall 2011 relating to the management of certain materials in the facility's waste water treatment system, hazardous waste management, flare and air emissions. These discussions continue.

Sabine Plant, Orange, Texas - EPA Multimedia Inspection

In June 2012, DuPont began discussions with EPA and DOJ related to a multimedia inspection that EPA conducted at the Sabine facility in March 2009 and December 2015. The discussions involve the management of materials in the facility's waste water treatment system, hazardous waste management, flare and air emissions, including leak detection and repair. These discussions continue.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Part II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market for Registrant's Common Equity and Related Stockholder Matters

Prior to the Merger, shares of DuPont Common Stock were registered pursuant to Section 12(b) of the Securities Exchange Act of 1934, as amended and listed on the New York Stock Exchange (the "NYSE"). As a result of the Merger, on August 31, 2017, the company requested that the NYSE withdraw the shares of DuPont Common Stock from listing on the NYSE and filed a Form 25 with the U.S. Securities and Exchange Commission ("SEC") to report that DuPont Common Stock is no longer listed on the NYSE. The number of record holders of DuPont common stock was approximately 57,000 at August 31, 2017. The closing price of DuPont common stock on the NYSE on August 31, 2017 was \$83.93. DowDuPont is the sole record holder of DuPont Common Stock. DuPont continues to have preferred stock outstanding and it remains listed on the NYSE. DowDuPont Common Stock is listed and trades on the NYSE, ticker symbol DWDP.

Prior to the Merger, holders of the company's common stock were entitled to receive dividends when they were declared by the Board of Directors. Dividends on common stock and preferred stock were historically declared in January, April, July and October. When dividends on common stock were declared, they were usually paid mid-March, June, September and December. The third quarter 2017 dividend on common stock was paid as of September 30, 2017. Preferred dividends are paid on or about the 25th of January, April, July and October. The Stock Transfer Agent and Registrar is Computershare Trust Company, N.A.

The information regarding the dividends per share of DuPont Common Stock based on declaration date for 2017 and 2016 is shown below.

	Per Share Dividend Declared
2017	
Third Quarter (July 1 through August 31, 2017)	\$ 0.38
Second Quarter	0.38
First Quarter	0.38
2016	
Fourth Quarter	\$ 0.38
Third Quarter	0.38
Second Quarter	0.38

ITEM 6. SELECTED FINANCIAL DATA

The Registrant meets the conditions set forth in General Instruction I(1)(a), (b) and (d) of Form 10-K (as modified by a grant of no-action relief dated February 12, 2018) and is therefore filing this form with the reduced disclosure format and has omitted the information called for by this Item pursuant to General Instruction I(2)(c) of Form 10-K.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CAUTIONARY STATEMENTS ABOUT FORWARD-LOOKING STATEMENTS

This communication contains “forward-looking statements” within the meaning of the federal securities laws, including Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. In this context, forward-looking statements often address expected future business and financial performance and financial condition, and often contain words such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “see,” “will,” “would,” “target,” similar expressions, and variations or negatives of these words.

On December 11, 2015, The Dow Chemical Company (“Dow”) and E. I. du Pont de Nemours and Company (“DuPont”) announced entry into an Agreement and Plan of Merger, as amended on March 31, 2017, (the “Merger Agreement”) under which the companies would combine in an all-stock merger of equals transaction (the “Merger”). Effective August 31, 2017, the Merger was completed and each of Dow and DuPont became subsidiaries of DowDuPont Inc. (“DowDuPont”).

Forward-looking statements by their nature address matters that are, to varying degrees, uncertain, including the intended separation, subject to approval of the DowDuPont Board of Directors, of DowDuPont’s agriculture, materials science and specialty products businesses in one or more tax efficient transactions on anticipated terms (the “Intended Business Separations”). Forward-looking statements are not guarantees of future performance and are based on certain assumptions and expectations of future events which may not be realized. Forward-looking statements also involve risks and uncertainties, many of which are beyond the control of DuPont and its parent company. Some of the important factors that could cause DuPont’s actual results to differ materially from those projected in any such forward-looking statements include, but are not limited to: (i) costs to achieve and achieving the successful integration of the respective agriculture, materials science and specialty products businesses of Dow and DuPont, anticipated tax treatment, unforeseen liabilities, future capital expenditures, revenues, expenses, earnings, productivity actions, economic performance, indebtedness, financial condition, losses, future prospects, business and management strategies for the management, expansion and growth of the combined operations; (ii) costs to achieve and achievement of the anticipated synergies by the combined agriculture, materials science and specialty products businesses; (iii) risks associated with the Intended Business Separations, including conditions which could delay, prevent or otherwise adversely affect the proposed transactions, including possible issues or delays in obtaining required regulatory approvals or clearances related to the Intended Business Separations, associated cost, disruptions in the financial markets or other potential barriers; (iv) disruptions or business uncertainty, including from the Intended Business Separations, could adversely impact DuPont’s business or financial performance and its ability to retain and hire key personnel; and (v) risks to DuPont’s business, operations and results of operations from: the availability of and fluctuations in the cost of energy and raw materials; failure to develop and market new products and optimally manage product life cycles; ability, cost and impact on business operations, including the supply chain, of responding to changes in market acceptance, rules, regulations and policies and failure to respond to such changes; delays or failures in obtaining or retaining regulatory approvals, delayed product launches, lack of market acceptance, product discontinuation, changes in the regulatory environment and litigation resulting from concerns and claims regarding the safe use of seeds with biotechnology traits and crop protection products potential impact on health and the environment, and the perceived impacts of biotechnology on health and the environment; impact of unpredictable seasonal and weather factors could impact sales and earnings from agriculture products; outcome of significant litigation, environmental matters and other commitments and contingencies; failure to appropriately manage process safety and product stewardship issues; global economic and capital market conditions, including the continued availability of capital and financing, as well as inflation, interest and currency exchange rates; changes in political conditions, business or supply disruptions; security threats, such as acts of sabotage, terrorism or war, natural disasters

and weather events and patterns which could result in a significant operational event for DuPont, adversely impact demand or production; ability to discover, develop and protect new technologies and to protect and enforce the DuPont's intellectual property rights; failure to effectively manage acquisitions, divestitures, alliances, joint ventures and other portfolio changes; unpredictability and severity of catastrophic events, including, but not limited to, acts of terrorism or outbreak of war or hostilities, as well as management's response to any of the aforementioned factors. While the list of factors presented here is, considered representative, no such list should be considered to be a complete statement of all potential risks and uncertainties. Unlisted factors may present significant additional obstacles to the realization of forward-looking statements. Consequences of material differences in results as compared with those anticipated in the forward-looking statements could include, among other things, business disruption, operational problems, financial loss, legal liability to third parties and similar risks, any of which could have a material adverse effect on DuPont's consolidated financial condition, results of operations, credit rating or liquidity. DuPont does not assume any obligation to publicly provide revisions or updates to any forward-looking statements whether as a result of new information, future developments or otherwise, should circumstances change, except as otherwise required by securities and other applicable laws. A detailed discussion of some of the significant risks and uncertainties which may cause results and events to differ materially from such forward-looking statements is included in the section titled "Risk Factors" (Part I, Item 1A of this Form 10-K).

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Overview

DowDuPont Merger of Equals On August 31, 2017 at 11:59 pm ET, (the "Merger Effectiveness Time") pursuant to the Merger Agreement, Dow and DuPont each merged with wholly owned subsidiaries of DowDuPont (the "Mergers") and, as a result of the Mergers, Dow and DuPont became subsidiaries of DowDuPont (collectively, the "Merger").

DowDuPont intends to pursue, subject to the receipt of approval by the Board of Directors of DowDuPont, the separation of the combined company's agriculture business, specialty products business and materials science business through a series of tax efficient transactions (collectively, the "Intended Business Separations"). DowDuPont anticipates materials science separating by the end of the first quarter of 2019, and expects agriculture and specialty products to separate by June 1, 2019.

During the period September 1 through December 31, 2017 and the period January 1 through August 31, 2017, the company incurred \$314 million and \$581 million, respectively, of costs in connection with the Merger and the Intended Business Separations, including costs relating to integration and separation planning. During the years ended December 31, 2016 and 2015, the company incurred \$386 million and \$10 million, respectively. These costs are recorded within integration and separation costs in the Successor period and the costs are recorded within selling, general and administrative expenses in the Predecessor periods within the company's Consolidated Statements of Operations. These costs have primarily consisted of financial advisory, information technology, legal, accounting, consulting and other professional advisory fees associated with the preparation and execution of activities related to the Merger and Intended Business Separations.

See the discussion of this report entitled DowDuPont Merger of Equals under Part 1, Item 1 Business; Part 1, Item 1A, Risk Factors; and Note 3 to the Consolidated Financial Statements for further details and a discussion of some of the risks related to the transaction.

Results Net sales were \$7.1 billion for the period September 1 through December 31, 2017 and \$17.3 billion for the period January 1 through August 31, 2017, compared to \$23.2 billion for the year ended December 31, 2016. The \$1.1 billion increase was primarily driven by 4 percent higher sales volume as worldwide local price and currency were flat. (Loss) income from continuing operations before taxes was \$(1.6) billion, \$1.8 billion and \$2.7 billion for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017 and for the year ended December 31, 2016, respectively. The period September 1 through December 31, 2017 results include \$1.5 billion of amortization of inventory step-up, increased transaction costs related to the Merger and Intended Business Separations, higher depreciation related to the fair value step up of property, plant and equipment and lower gains from sales of businesses, partially offset by higher sales. Pension and other post employment benefits ("OPEB") (benefits) costs for the period of September 1 through December 31, 2017 and January 1 through August 31, 2017 were \$(83) million and \$373 million, respectively, as compared to \$222 million in 2016. Activity in the Successor period benefited from the absence of the amortization of net losses from accumulated other comprehensive loss ("AOCL"). Pension and OPEB costs for 2016 include a curtailment gain as a result of changes made to the U.S. Pension and OPEB benefits in 2016.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Analysis of Operations

Note on Financial Presentation

In connection with the Merger Transaction, the company applied the acquisition method of accounting as of September 1, 2017 and the financial statements reflect the preliminary related adjustments. As a result, financial information for the period January 1 through August 31, 2017 ("Predecessor") and the period September 1 through December 31, 2017 ("Successor") are not comparable to the financial information for the years ended December 31, 2016 and 2015 ("Predecessor"). In addition, the company has elected to make certain changes in presentation to harmonize its accounting and reporting with that of DowDuPont in the Successor period. See Note 1 for further discussion of these changes and Note 3 for additional information regarding the Merger Transaction.

FMC Transactions

On March 31, 2017, the company and FMC Corporation ("FMC") entered into a definitive agreement (the "FMC Transaction Agreement"). Under the FMC Transaction Agreement, FMC would acquire the crop protection business and R&D assets that DuPont was required to divest in order to obtain EC approval of the Merger Agreement, (the "Divested Ag Business") and DuPont agreed to acquire certain assets relating to FMC's Health and Nutrition segment, excluding its Omega-3 products (the "H&N Business") (collectively, the "FMC Transactions"). The sale of the Divested Ag Business meets the criteria for discontinued operations and as such, earnings are included within (loss) income from discontinued operations after income taxes for all periods presented.

On November 1, 2017, the company completed the FMC Transactions through the disposition of the Divested Ag Business and the acquisition of the H&N Business. The preliminary fair value as determined by the company of the H&N Business is \$1,970 million. The FMC Transactions include a cash consideration payment to DuPont of approximately \$1,200 million, which reflects the difference in value between the Divested Ag Business and the H&N Business, as well as favorable contracts with FMC of \$495 million, subject to adjustments for inventory of the Divested Ag Business and net working capital of the H&N Business. Due to the proximity of the Merger and the closing of the sale, the carrying value of the Divested Ag Business approximates the fair value of the consideration received, thus no resulting gain or loss was recognized on the sale. Refer to Note 3 for further information on the H&N Business.

Tax Reform

On December 22, 2017, the Tax Cuts and Jobs Act ("The Act") was enacted. The Act reduces the U.S. federal corporate income tax rate from 35 percent to 21 percent, requires companies to pay a one-time transition tax ("transition tax") on earnings of foreign subsidiaries that were previously tax deferred, creates new provisions related to foreign sourced earnings, eliminates the domestic manufacturing deduction and moves to a territorial system. At December 31, 2017, the company had not completed its accounting for the tax effects of The Act; however, in the fourth quarter of 2017, the company recorded a net benefit in provision for income taxes on continuing operations of \$2,001 million, which consisted of a provisional net benefit of \$2,716 million due to the reduction of the U.S. federal corporate income tax rate partially offset by a provisional charge of \$715 million due to the transition tax. The company expects that it will have sufficient available foreign tax credits to offset the tax liability associated with the one-time transition tax. See Note 7 for additional information.

DowDuPont Cost Synergy Program

In September and November 2017, DowDuPont and the company approved post-merger restructuring actions to achieve targeted cost synergies under the DowDuPont Cost Synergy Program (the “Synergy Program”), adopted by the DowDuPont Board of Directors. The plan is designed to integrate and optimize the organization following the Merger and in preparation for the Intended Business Separations. Based on all actions approved to date under the Synergy Program, DuPont expects to record total pre-tax restructuring charges of \$430 million to \$600 million. Additional details related to this plan can be found on page 3 of this report and Note 5 to the Consolidated Financial Statements.

On February 1, 2018, DowDuPont announced an increase in its cost synergy commitment from \$3 billion to \$3.3 billion.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

2017 Restructuring Program

During the first quarter 2017, DuPont committed to take actions to improve plant productivity and better position its product lines for productivity and growth before and after the anticipated closing of the Merger Transaction (the "2017 restructuring program"). In connection with these actions, the company incurred pre-tax charges of \$313 million during the period from January 1 through August 31, 2017 recognized in restructuring and asset related charges - net in the company's Consolidated Statements of Operations. The charges primarily relate to the second quarter closure of the safety and construction product line at the Cooper River manufacturing site located near Charleston, South Carolina. The actions associated with this plan are substantially complete as of December 31, 2017. Additional details related to this plan can be found on page 3 of this report and Note 5 to the Consolidated Financial Statements.

2016 Global Cost Savings and Restructuring Plan

On December 11, 2015, DuPont announced a 2016 global cost savings and restructuring plan designed to reduce \$730 million in costs in 2016 compared with 2015. As part of the plan, the company committed to take structural actions across all product lines and staff functions globally to operate more efficiently by further consolidating product lines and aligning staff functions more closely with them. In connection with the restructuring actions, the company recorded a pre-tax charge to earnings of \$783 million in the fourth quarter 2015, comprised of \$641 million of severance and related benefit costs, \$109 million of asset related charges, and \$33 million of contract termination costs. The restructuring actions associated with the charge are substantially complete and the plan delivered the target cost reductions in 2016 versus 2015. Additional details related to this plan can be found on page 4 of this report and Note 5 to the Consolidated Financial Statements.

Impact of 2017 Hurricanes

In 2017 Hurricane Harvey made landfall in Texas and Hurricane Maria made landfall in Puerto Rico, both causing widespread damage. The financial impact related to the hurricanes, including lost sales and repairs and maintenance, is not material to the Predecessor or Successor financial statements.

Separation of Performance Chemicals

In October 2013, DuPont announced its intention to separate its Performance Chemicals segment through a U.S. tax-free spin-off to shareholders, subject to customary closing conditions. In July 2015, DuPont completed the separation of its Performance Chemicals segment through the spin-off of all of the issued and outstanding stock of The Chemours Company (Chemours).

Settlement of PFOA MDL

As previously reported, approximately 3,550 lawsuits have been filed in various federal and state courts in Ohio and West Virginia alleging personal injury from exposure to perfluorooctanoic acid and its salts, including the ammonium salt ("PFOA"), in drinking water as a result of the historical manufacture or use of PFOA at the Washington Works' plant outside Parkersburg, West Virginia. The plant operating units involved in the allegations are owned and operated by The Chemours Company ("Chemours"). These personal injury lawsuits were consolidated in multi-district litigation in the United States District Court for the Southern District of Ohio (the "MDL"). In February 2017, DuPont and plaintiffs' counsel agreed to a settlement in principle of the MDL; the parties executed the definitive settlement agreements in March 2017. The total settlement amount is \$670.7 million in cash, half of which was paid by Chemours and half by DuPont. The settlement was entered into solely by way of compromise and is not in any way an admission of liability or fault by DuPont or Chemours. The company recorded a pre-tax charge of \$335 million (\$214 million net of tax) to (loss) income from discontinued operations after income taxes in the company's

Consolidated Statement of Operations for the period January 1 through August 31, 2017 for the remainder of the settlement not subject to indemnification by Chemours. See Note 14 to the Consolidated Financial Statements for additional information.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Net Sales

2017 versus 2016

Net sales were \$7.1 billion for the period September 1 through December 31, 2017 and \$17.3 billion for the period January 1 through August 31, 2017, compared to \$23.2 billion for the year ended December 31, 2016. The \$1.1 billion increase was primarily driven by 4 percent higher sales volume. In Asia Pacific sales volume increased 10 percent primarily driven by the electronics and imaging product line and the transportation and advanced polymers product line. In EMEA sales volume increased 5 percent driven by the agriculture product line and the safety and construction product line. In U.S. and Canada net sales increased 1 percent, principally reflecting volume growth in the agriculture product line. In Latin America net sales increased 4 percent, driven by a positive currency impact due to stronger Brazilian real, as well as higher volume, partially offset by lower local prices.

In the Consolidated Statement of Operations, royalty income is included within net sales in the Successor Period and is included in sundry income - net in the Predecessor Periods. Royalty income does not have a significant impact on any period presented. See Note 1 for further discussion of the changes in presentation.

2016 versus 2015

Net sales of \$23.2 billion in 2016 were 2 percent below prior year net sales of \$23.7 billion, reflecting a 1 percent reduction due to currency and a 1 percent decrease due to lower local prices. Negative currency impact was primarily due to the weaker European euro, Mexican peso, and Chinese yuan, partly offset by the stronger Japanese yen and Brazilian real. Worldwide lower local prices primarily reflect reductions for the transportation and advanced polymers product line and the electronic and imaging product line, as well as flat prices in the agriculture product line. Worldwide volume was flat.

	Successor For the Period September 1 through December 31, 2017		Predecessor For the Period January 1 through August 31, 2017		For the Year Ended December 31, 2016		For the Year Ended December 31, 2015	
	Net sales	% of Net sales	Net sales	% of Net sales	Net sales	% of Net sales	Net sales	% of Net sales
	(\$ billions)		(\$ billions)		(\$ billions)		(\$ billions)	
Worldwide	\$7.1	100.0	\$17.3	100.0	\$23.2	100.0	\$23.7	100.0
U.S. & Canada	2.2	31.0	8.1	47.0	10.1	43.8	10.5	44.4
Europe, Middle East & Africa (EMEA)	1.7	24.1	3.9	22.8	5.3	22.7	5.5	23.2
Asia Pacific	2.1	29.3	3.9	22.2	5.4	23.3	5.3	22.4
Latin America	1.1	15.6	1.4	8.0	2.4	10.2	2.4	10.0

Cost of Goods Sold ("COGS")

2017 versus 2016

COGS was \$6.2 billion for the period September 1 through December 31, 2017 and \$10.2 billion for the period January 1 through August 31, 2017 compared to \$14.0 billion for the year ended December 31, 2016. The increase was primarily driven by the amortization of the inventory step-up of \$1.5 billion for the period September 1 through

December 31, 2017 as well as higher sales volume, increased expenses due to the elimination of the other operating charges financial statement line item in the Successor period, higher depreciation related to the fair value step up of property, plant and equipment and higher pension and OPEB costs due to the curtailment gains recognized in 2016 as a result of the changes made to the U.S. Pension and OPEB benefits.

COGS as a percentage of net sales was 87 percent, 59 percent, and 60 percent for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017 and for the year ended December 31, 2016, respectively. The amortization of the inventory step-up was 22 percent of net sales in the Successor period. The remaining COGS increase as a percentage of net sales in the Successor period is due to the items discussed above, partially offset with a pension and OPEB benefit as a result of the absence of the amortization of net losses from AOCL. The elimination of the other operating charges financial statement line item would have increased COGS as a percentage of net sales by 2 percent for the period January 1 through August 31, 2017 and for the year ended December 31, 2016.

See Note 3 for additional information regarding the Merger, including the valuation of inventory and see Note 1 for further discussion of the changes in presentation.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

2016 versus 2015

COGS decreased from \$14.6 billion for the year ended December 31, 2015 to \$14.0 billion for the year ended December 31, 2016. The decrease was primarily driven by lower raw material costs, lower pension and OPEB costs, and the strengthening of the U.S. dollar versus global currencies. COGS as a percentage of net sales decreased 2 percent, from 62 percent to 60 percent, principally due to lower raw material costs and lower pension and OPEB costs.

Other Operating Charges

2017 versus 2016

Other operating charges were \$667 million for the year ended December 31, 2016 and \$504 million for the period January 1 through August 31, 2017. In the Successor period, other operating charges are included primarily in cost of goods sold, as well as selling, general and administrative expenses and amortization of intangibles. See Note 1 for further discussion of the changes in presentation.

2016 versus 2015

Other operating charges increased from \$434 million for the year ended December 31, 2015 to \$667 million for the year ended December 31, 2016. The increase was primarily driven by a \$152 million decrease in Imprelis® herbicide insurance recoveries, and a \$23 million reduction in the estimated liability related to Imprelis® herbicide claims versus a \$130 million accrual reduction in the prior year.

Research and Development Expense ("R&D")

2017 versus 2016

R&D expense was \$473 million for the period September 1 through December 31, 2017, \$1,064 million for the period January 1 through August 31, 2017, and \$1,502 million for the year ended December 31, 2016. The change was primarily driven by an increase in R&D expense related to the agriculture product line and higher pension and OPEB costs due to the curtailment gains recognized in 2016 as a result of the changes made to the U.S. Pension and OPEB benefits in 2016, partially offset with lower costs related to the DowDuPont Cost Synergy Program.

R&D as a percentage of net sales was 7 percent, 6 percent, and 6 percent for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017 and for the year ended December 31, 2016, respectively. R&D as a percentage of net sales is slightly higher in the Successor period, primarily due to an increase in R&D for new product introductions and higher depreciation, partially offset with a pension and OPEB benefit, cost savings, and the absence of amortization expense.

2016 versus 2015

R&D expenses decreased from \$1,735 million for the year ended December 31, 2015 to \$1,502 million for the year ended December 31, 2016. The decrease was primarily due to lower costs related to the 2016 global cost savings and restructuring plan, a decrease in pension and OPEB costs and the strengthening of the U.S. dollar versus global currencies. R&D as a percentage of net sales decreased 1 percent, from 7 percent to 6 percent, principally due to cost savings and lower pension and OPEB costs.

Selling, General and Administrative Expenses ("SG&A")

2017 versus 2016

SG&A expenses were \$1,101 million for the period September 1 through December 31, 2017, \$3,306 million for the period January 1 through August 31, 2017, and \$4,143 million for the year ended December 31, 2016. The change

was primarily driven by higher transaction costs, increased selling expense and commissions, primarily for agriculture products, higher compensation and higher pension and OPEB costs, partially offset with lower costs related to the 2016 global cost savings and restructuring plan and the absence of amortization expense in the Successor period. In the Successor period, integration and separation costs and amortization of intangibles are presented as a line item on the Consolidated Statement of Operations. See Note 1 for further discussion of the changes in presentation. During the year ended December 31, 2016 and the period January 1 through August 31, 2017, the company incurred \$386 million and \$581 million, respectively, of transaction costs in connection with the merger with Dow and the Intended Business Separations.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

SG&A as a percentage of net sales was 16 percent, 19 percent, and 16 percent for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017 and for the year ended December 31, 2016, respectively. Transaction costs were 3 percent and 2 percent of net sales for the period January through August 31, 2017 and for the year ended December 31, 2016. The remaining net sales increase as a percentage of net sales in the Successor period is due to the items discussed above.

2016 versus 2015

SG&A expenses decreased from \$4,428 million for the year ended December 31, 2015 to \$4,143 million for the year ended December 31, 2016. The \$285 million decrease was primarily due to lower costs related to the 2016 global cost savings and restructuring plan, lower selling expense, and a decrease in pension and OPEB costs, partially offset by \$386 million of transaction costs associated with the merger with Dow. SG&A expense as a percent of sales decreased by 1 percent, from 19 percent to 18 percent, primarily due to cost savings from the company's 2016 global cost savings and restructuring plan and a decrease in pension and OPEB costs.

Amortization of Intangibles

Intangible asset amortization was \$389 million for the period September 1 through December 31, 2017. In the Predecessor periods, amortization of intangibles was included within SG&A; other operating charges; R&D; and COGS. See Note 3 for further information regarding the Merger, including the valuation of intangible assets.

Restructuring and Asset Related Charges - Net

2017 versus 2016

Restructuring and asset related charges - net were \$180 million for the period September 1 through December 31, 2017, \$323 million for the period January 1 through August 31, 2017, and \$556 million for the year ended December 31, 2016. The charge for period January 1 through August 31, 2017 is comprised of \$279 million of asset-related charges and \$44 million in severance and related benefit costs. The asset-related charges primarily relate to the second quarter closure of the safety and construction product line at the Cooper River manufacturing site located near Charleston, South Carolina as part of the 2017 restructuring program. For the period September 1 through December 31, 2017, DuPont recorded a pre-tax charge of \$187 million, consisting of severance and related benefit costs of \$153 million, contract termination costs of \$31 million and asset related charges of \$3 million related to the Synergy program described below. This charge was partially offset by a \$7 million benefit related to the 2016 and 2014 restructuring plans for adjustments to recognized severance costs. See Note 5 for additional information.

In September and November 2017, DowDuPont and the company approved post-merger restructuring actions under the DowDuPont Cost Synergy Program (the "Synergy Program"), adopted by the DowDuPont Board of Directors. The plan is designed to integrate and optimize the organization following the Merger. Based on all actions approved to date under the Synergy Program, DuPont expects to record total pre-tax restructuring charges of \$430 million to \$600 million, comprised of approximately \$320 million to \$360 million of severance and related benefits costs; \$110 million to \$140 million of costs related to contract terminations; and up to \$100 million of asset related charges. The Synergy Program includes certain asset actions, including strategic decisions regarding the cellulosic biofuel unit reflected in the preliminary fair value measurement of DuPont's assets as of the merger date. Current estimated total pre-tax restructuring charges could be impacted by future adjustments to the preliminary fair value of DuPont's assets.

Substantially all of the remaining restructuring charges are expected to be incurred in 2018 and the related actions, including employee separations, associated with this plan are expected to be substantially complete by the end of

2019. Future cash payments related to this program are anticipated to be approximately \$410 million to \$480 million, primarily related to the payment of severance and related benefits and contract termination costs. It is possible that additional charges and future cash payments could occur in relation to the restructuring actions.

The \$556 million charge for 2016 consisted of \$593 million of asset related charges (discussed in the “Asset Impairment” section, below) and a \$68 million charge related to the decision to not re-start the company's insecticide manufacturing facility at the La Porte site located in La Porte, Texas. These charges were partially offset by a net \$84 million benefit related to the 2016 restructuring plan, primarily due to a reduction in severance and related benefit costs driven by the elimination of positions at a lower cost than expected, and a \$21 million benefit related to the 2014 restructuring plan for adjustments to the previously recognized severance costs.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

2016 versus 2015

Restructuring and asset related charges - net decreased from \$795 million for the year ended December 31, 2015 to \$556 million for the year ended December 31, 2016. The charges for 2016 are discussed above. The \$795 million in charges recorded during 2015 in restructuring and asset related charges - net consist of a pre-tax charge of \$783 million related to the 2016 restructuring plan, consisting of \$778 million of restructuring and asset related charges - net and \$5 million in sundry income - net. The charges consisted of \$641 million in severance and related benefit costs, \$109 million in asset related charges, and \$33 million in contract termination charges. In addition, the company recognized a \$38 million impairment charge discussed below, partly offset by a \$21 million net benefit related to the 2014 restructuring plan. The \$21 million net benefit was recorded to adjust the estimated costs associated with the 2014 restructuring program due to lower than estimated individual severance costs and workforce reductions achieved through non-severance programs, offset by the identification of additional projects.

Asset Impairments

During 2016, the company recorded an asset impairment charge of \$435 million related to its uncompleted enterprise resource planning (ERP) system. Given the uncertainties related to timing of completion as well as potential developments and changes to technologies in the market place at the time of restart, use of the ERP system can no longer be considered probable. See Note 5 to the Consolidated Financial Statements for additional details related to this charge.

During 2016, the company recorded a \$158 million impairment charge related to indefinite-lived intangible trade names as a result of the realignment of brand marketing strategies and a determination to phase out the use of certain acquired trade names.

During 2015, the company recorded an impairment charge of \$38 million related to an impairment of a cost basis investment.

Integration and Separation Costs

Integration and separation costs were \$314 million for the period September 1 through December 31, 2017. In the Predecessor periods, integration and separation costs were included within SG&A. See Note 1 for further discussion of the changes in presentation.

Sundry Income - Net

2017 versus 2016

Sundry income - net was \$166 million and \$90 million for the period January 1 through August 31, 2017 and for the period September 1 through December 31, 2017, respectively. Sundry income - net was \$707 million for the year ended December 31, 2016. The period September 1 through December 31, 2017, the period January 1 through August 31, 2017 and the year ended December 31, 2016 includes a net exchange gain of \$8 million, a net exchange loss of \$394 million and a net exchange loss of \$106 million, respectively. The period January 1 through August 31, 2017 included a pre-tax gain of \$162 million associated with the sale of the global food safety diagnostic business. The year ended December 31, 2016 included a pre-tax gain of \$369 million associated with the sale of DuPont (Shenzhen) Manufacturing Limited entity.

2016 versus 2015

Sundry income - net increased from \$690 million for the year ended December 31, 2015 to \$707 million for the year ended December 31, 2016. The \$17 million increase was primarily due to gains on sales of businesses and other assets, including a \$369 million gain on the sale of DuPont (Shenzhen) Manufacturing Limited, partially offset by an increase in pre-tax exchange losses and the absence of a \$145 million gain associated with the company's settlement of a legal claim in the prior year. Pre-tax exchange losses increased \$136 million compared to prior year. See Notes 6 and 18 to the Consolidated Financial Statements for further discussion of the company's policy of hedging the foreign currency-denominated monetary assets and liabilities.

See Note 6 to the Consolidated Financial Statements for additional information.

Interest Expense
2017 versus 2016

Interest expense was \$107 million for the period September 1 through December 31, 2017, \$254 million for the period January 1 through August 31, 2017, and \$370 million for the year ended December 31, 2016. The change was primarily driven by amortization of the step-up of debt as a result of push-down accounting, partially offset by higher debt balances.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

2016 versus 2015

Interest expense increased from \$342 million for the year ended December 31, 2015 to \$370 million for the year ended December 31, 2016. The increase was primarily due to lower capitalized interest related to construction projects partially offset by lower interest on borrowings.

Provision for Income Taxes on Continuing Operations

2017 versus 2016

For the period September 1 through December 31, 2017, the company's effective tax rate of 168.5 percent on pre-tax loss from continuing operations of \$1,586 million was favorably impacted by a provisional net benefit of \$2,001 million that the company recognized due to the enactment of the Act, a net benefit of \$261 million related to an internal legal entity restructuring associated with the Intended Business Separations, as well as geographic mix of earnings. Those impacts were partially offset by the non-tax deductible amortization of the fair value step-up in DuPont's inventories as a result of the Merger, certain net exchange losses recognized on the remeasurement of the net monetary asset positions which were not tax deductible in their local jurisdictions, as well as the tax impact of costs associated with the merger with Dow and restructuring and asset related charges.

For the period January 1 through August 31, 2017, the company's effective tax rate was 8.3 percent on pre-tax income from continuing operations of \$1,791 million. For the period January 1 through August 31, 2017, the company's effective tax rate was favorably impacted by geographic mix of earnings, certain net exchange gains recognized on the remeasurement of the net monetary asset positions which were not taxable in their local jurisdictions, net favorable tax consequences of the adoption of Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) No. 2016-09, Compensation - Stock Compensation (Topic 718), Improvements to Employee Share-Based Payment Accounting, tax benefits related to a reduction in the company's unrecognized tax benefits due to the closure of various tax statutes of limitations, as well as tax benefits on costs associated with the merger with Dow and restructuring and asset related charges. Those tax benefits were partially offset by the unfavorable tax consequences of non-deductible goodwill associated with the gain on the sale of global food safety diagnostics in the first quarter 2017.

For the year ended December 31, 2016, the company's effective tax rate of 23.5 percent on pre-tax income from continuing operations of \$2,723 million was impacted by geographic mix of earnings as well as certain net exchange gains recognized on the remeasurement of the net monetary asset positions which were not taxable in their local jurisdictions. Those benefits were partially offset by the tax consequences of the gain on the sale of DuPont (Shenzhen) Manufacturing Limited in the first quarter 2016.

2016 versus 2015

For the year ended December 31, 2015, the company's effective tax rate of 28.4 percent on pre-tax income from continuing operations of \$2,022 million was impacted by the company's policy of hedging the foreign currency-denominated monetary assets and liabilities of its operations as well as increased tax benefits on restructuring and asset related charges.

Corporate Outlook

New products introductions in the agriculture product line are expected to contribute to growth in 2018. The company's 2018 results will be favorably impacted by the acquisition of the H&N Business.

In 2018, the company expects income from continuing operations will be negatively impacted by the amortization of the inventory step-up, incremental amortization and depreciation related to the fair value step up of intangible assets

and property, plant and equipment, as well as transaction costs related to preparation for the Intended Business Separations, partially offset by realized synergy savings. A pension and OPEB benefit is expected in 2018 due to the absence of the amortization of net losses from accumulated other comprehensive loss. The company expects the US federal corporate tax rate reduction, from 35 percent to 21 percent, will have a positive impact on the 2018 effective tax rate.

Recent Accounting Pronouncements

See Note 2 to the Consolidated Financial Statements for a description of recent accounting pronouncements.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Liquidity & Capital Resources

(Dollars in millions)	Successor	Predecessor
	December 31, 2017	December 31, 2016
Cash, cash equivalents and marketable securities	\$ 8,202	\$ 5,910
Total debt	13,070	8,536

The company continually reviews its sources of liquidity and debt portfolio and occasionally may make adjustments to one or both to ensure adequate liquidity and an optimum debt maturity schedule.

The company's credit ratings impact its access to the debt capital markets and cost of capital. The company remains committed to a strong financial position and strong investment-grade rating. The company's long-term and short-term credit ratings are as follows:

	Long-term	Short-term	Outlook
Standard & Poor's	A-	A-2	Stable
Moody's Investors Service	A3	P-2	Negative
Fitch Ratings	A	F1	Rating Watch Negative

The company believes its ability to generate cash from operations and access to capital markets will be adequate to meet anticipated cash requirements to fund its working capital, capital spending, debt maturities as well as distributions and other intercompany transfers to DowDuPont which relies on DuPont and Dow to fund payment of its costs and expenses. DuPont's current strong financial position, liquidity and credit ratings continue to provide access as needed to the capital markets. The company's liquidity needs can be met through a variety of sources, including cash provided by operating activities, cash and cash equivalents, marketable securities, commercial paper, syndicated credit lines, bilateral credit lines, long-term debt markets, bank financing, committed receivable repurchase facilities and asset sales.

The company has access to approximately \$6.7 billion in committed and uncommitted unused credit lines with several major financial institutions including unused commitments of \$3 billion under the Term Loan Facility described below and a \$3 billion revolving credit facility to support its commercial paper program. These unused credit lines provide support to meet the company's short-term liquidity needs and for general corporate purposes which may include funding of discretionary and non-discretionary contributions to certain benefit plans, severance payments, repayment and refinancing of debt, working capital, capital expenditures and repurchases and redemptions of securities.

In May 2017, the company completed an underwritten public offering of \$1.25 billion of the company's 2.20 percent Notes due 2020 and \$750 million of the company's Floating Rate Notes due 2020 (the "May 2017 Debt Offering"). The proceeds of this offering were used to make a discretionary pension contribution to the company's principal U.S. pension plan, as discussed below.

The company's indenture covenants include customary limitations on liens, sale and leaseback transactions, and mergers and consolidations affecting manufacturing plants, mineral producing properties or research facilities located in the U.S. and the consolidated subsidiaries owning such plants, properties and facilities subject to certain limitations. The outstanding long-term debt also contains customary default provisions. In addition, the company will be required

to redeem all of the Notes associated with the May 2017 Debt Offering at a redemption price equal to 100 percent of the aggregate principal amount plus any accrued and unpaid interest upon the announcement of the record date for the separation of either the agriculture or specialty products business, or the entry into an agreement to sell all or substantially all of the assets of either business to a third party.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

In March 2016, the company entered into a credit agreement that provides for a three-year, senior unsecured term loan facility in the aggregate principal amount of \$4.5 billion (the "Term Loan Facility") under which DuPont may make up to seven term loan borrowings and amounts repaid or prepaid are not available for subsequent borrowings. The facility was amended in 2017 to extend the date on which the commitment to lend terminates to July 27, 2018. The proceeds from the borrowings under the Term Loan Facility will be used for the company's general corporate purposes including debt repayment, working capital and funding a portion of DowDuPont's costs and expenses. The Term Loan Facility matures in March 2019, unless extended by mutual agreement, at which time all outstanding borrowings, including accrued but unpaid interest, become immediately due and payable. As of December 31, 2017, the company had made three term loan borrowings in an aggregate principal amount of \$1.5 billion and had unused commitments of \$3 billion under the Term Loan Facility.

The Term Loan Facility and the amended revolving credit facility contain customary representations and warranties, affirmative and negative covenants, and events of default that are typical for companies with similar credit ratings and generally consistent with those applicable to DuPont's long-term public debt. The Term Loan Facility and the amended revolving credit facility contain a financial covenant requiring that the ratio of Total Indebtedness to Total Capitalization for DuPont and its consolidated subsidiaries not exceed 0.6667. At December 31, 2017, the company was in compliance with this financial covenant.

The Term Loan Facility and the amended revolving credit facility impose additional affirmative and negative covenants on DuPont and its subsidiaries after the closing of the Merger, subject to certain limitations, including to:

not sell, lease or otherwise convey to DowDuPont, its shareholders or its non-DuPont subsidiaries, any assets or properties of DuPont or its subsidiaries unless the aggregate amount of revenues attributable to all such assets and properties so conveyed after the merger does not exceed 30 percent of the consolidated revenues of DuPont and its subsidiaries as of December 31, 2015 (the Disposition Limitation); and

not guarantee any indebtedness or other obligations of DowDuPont, Dow or their respective subsidiaries (other than of DuPont and its subsidiaries).

The Term Loan Facility and the amended revolving credit facility will terminate, and the loans and other amounts thereunder would become due and payable, upon the sale, transfer, lease or other disposition of all or substantially all of the assets of the agriculture product line to DowDuPont, its shareholders or any of its non-DuPont subsidiaries.

In January 2017, the company entered into a committed receivable repurchase facility of up to \$1.3 billion (the "2017 Repurchase Facility") which expired on November 30, 2017. Under the facility, the company sold a portfolio of available and eligible outstanding customer notes receivables within the agriculture product line to participating institutions and simultaneously agreed to repurchase at a future date.

In February 2018, the company entered into a new committed receivable repurchase facility of up to \$1.3 billion (the "2018 Repurchase Facility") which expires on December 15, 2018. The 2018 Repurchase Facility has substantially similar terms and conditions as the 2017 Repurchase Facility and includes the 2017 Repurchase Facility change of control language conformed to the Disposition Limitation covenant described above. See further discussion of the 2018 Repurchase Facility in Item 9B, Other Information and Note 22 to the Consolidated Financial Statements.

At the end of 2016, the company anticipated making contributions of approximately \$230 million to its principal U.S. pension plan in 2017. During the period January 1 through August 31, 2017, the company made total contributions of \$2.9 billion to its principal U.S pension plan, an increase of approximately \$2.7 billion reflecting discretionary contributions. The discretionary contribution was funded through the May 2017 Debt Offering, as discussed above; short-term borrowings, including commercial paper issuance; and cash. The \$2.9 billion contribution was taken as a deduction on the company's 2016 federal tax return and resulted in a net operating loss for tax purposes. This loss resulted in an overpayment of taxes paid of approximately \$800 million. A portion of the overpayment will be applied against the current year tax liability. The remainder of the loss generated a refund of approximately \$700 million which was received during the fourth quarter of 2017.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

The company entered into a trust agreement in 2013 (as amended and restated in 2017) that established and requires DuPont to fund a trust (the "Trust") for cash obligations under certain nonqualified benefit and deferred compensation plans upon a change in control event as defined in the Trust agreement. Under the Trust agreement, the consummation of the Merger was a change in control event. As a result, in November 2017, the company contributed \$571 million to the Trust. In the fourth quarter of 2017, \$13 million was distributed to the company according to the Trust agreement and at December 31, 2017, the balance in the Trust was \$558 million.

The company's cash, cash equivalents and marketable securities at December 31, 2017 and 2016 are \$8.2 billion and \$5.9 billion, respectively, of which \$7.9 billion at December 31, 2017 and \$5.7 billion at December 31, 2016 was held by subsidiaries in foreign countries, including United States territories. For each of its foreign subsidiaries, the company makes an assertion regarding the amount of earnings intended for permanent reinvestment, with the balance available to be repatriated to the United States.

The Tax Cuts and Jobs Act requires companies to pay a one-time transition tax on earnings of foreign subsidiaries, a majority of which were previously considered permanently reinvested by the company (see Note 7 for further details of the Tax Cuts and Jobs Act). The cash held by foreign subsidiaries for permanent reinvestment is generally used to finance the subsidiaries' operational activities and future foreign investments. A deferred tax liability has been accrued for the estimated U.S. Federal tax on all unrepatriated earnings as of December 31, 2017 in accordance with the Act. At December 31, 2017, management believed that sufficient liquidity is available in the United States. The company is currently evaluating the impact of the Act on its permanent reinvestment assertion. In the event that additional foreign funds are needed in the United States, the company has the ability to repatriate additional funds. The repatriation could result in an adjustment to the tax liability for foreign withholding taxes, foreign and/or U.S. state income taxes and the impact of foreign currency movements. As such, it is not practicable to calculate the unrecognized deferred tax liability on undistributed foreign earnings.

	Successor	Predecessor		
	For the	For the		
	Period	Period		
	September	January		
	1 through	1 through	2016	2015
	December	August		
	31, 2017	31, 2017		
(Dollars in millions)				
Cash provided by (used for) operating activities	\$ 4,196	\$(3,949)	\$3,357	\$2,422

Cash provided by operating activities was \$4.2 billion for the period September 1 through December 31, 2017, primarily driven by seasonal cash flows related to the agriculture product line and a tax refund related to voluntary pension contributions made in the Predecessor period, partially offset by transaction costs and the PFOA multi-district litigation settlement, which was primarily paid in September. Cash used for operating activities was \$3.9 billion for the period January 1 through August 31, 2017, primarily driven by pension contributions of \$3.0 billion, seasonal cash flows related to the agriculture product line, transaction costs and tax payments, partially offset by earnings. Cash provided by operating activities was \$3.4 billion for the year ended December 31, 2016, primarily due to earnings offset by tax payments, pension contributions and transaction costs.

Cash provided by operating activities increased \$1.0 billion in 2016 compared to 2015 primarily due to a higher earnings contribution of approximately \$0.5 billion, lower year-over-year income tax payments and lower working capital.

(Dollars in millions)	Successor	Predecessor		
	For the Period September 1 through December 31, 2017	For the Period January 1 through August 31, 2017	2016	2015
Cash provided by (used for) investing activities	\$ 2,210	\$(2,382)	\$(1,514)	\$(1,828)

Cash provided by investing activities was \$2.2 billion for the period September 1 through December 31, 2017, primarily driven by \$1.2 billion of cash received for the FMC transactions and net proceeds from investments, partially offset by the funding of the Rabbi Trust and capital expenditures. Cash used for investing activities was \$2.4 billion for the period January 1 through August 31, 2017, primarily due to increased net purchases of investments, capital expenditures, payments for the acquisition of Granular and net payments from foreign currency contracts, partially offset by proceeds from the sale of property and businesses. Cash used for investing activities of \$1.5 billion during the year ended December 31, 2016 was primarily due to \$1.0 billion of capital expenditures, net purchases of investments and net payments from foreign currency contracts, partially offset by proceeds from the sale of property and businesses.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Cash used for investing activities in 2016 increased by \$0.3 billion compared to 2015. The change was primarily due to lower purchases of property, plant and equipment, lower net purchases of marketable securities and higher proceeds from sales of product lines and other assets. This is partially offset by cash outflows relating to foreign currency contract settlements. See Note 18 to the Consolidated Financial Statements for further discussion of marketable securities outstanding at December 31, 2016 and 2015.

Capital expenditures totaled \$0.7 billion and \$0.4 billion for the periods from January 1 through August 31, 2017 and September 1 through December 31, 2017, respectively, \$1.0 billion in 2016, and \$1.6 billion in 2015. The company expects 2018 capital expenditures to be about \$1.7 billion, of which approximately \$0.5 billion is related to the targeted cost synergies associated with the Merger and execution of the Intended Business Separations.

	Successor For the Period September 1 1 through December 31, 2017	Predecessor For the Period January 1 through August 31, 2017	2016	2015
(Dollars in millions)				
Cash (used for) provided by financing activities	\$ (3,227)	\$5,632	\$(2,385)	\$(1,929)

Cash used for financing activities was \$3.2 billion for the period September 1 through December 31, 2017, driven by a decrease in borrowings from commercial paper, distributions to DowDuPont and dividends paid to stockholders, partially offset by increased borrowings under the Term Loan. Cash provided by financing activities was \$5.6 billion for the period January 1 through August 31, 2017, driven by the May 2017 Debt Offering as well as increased borrowings from commercial paper, the Repurchase Facility, and the Term Loan Facility, partially offset by dividends paid to stockholders. Cash used for financing activities of \$2.4 billion during the year ended December 31, 2016 was driven by dividend payments to stockholders, repurchases of common stock, and repayments of long-term debt.

The \$0.5 billion increase in cash used for financing activities in 2016 compared to 2015 was primarily due to lower borrowings as a result of the prior year distribution of approximately \$3.9 billion which Chemours financed through external borrowings and paid to the company prior to its separation. This was partially offset by lower share repurchases and lower dividends paid to stockholders.

Dividend payments to shareholders of DuPont common and preferred stock totaled \$0.3 billion during the period September 1 through December 31, 2017, which includes the third quarter dividend declared for common stockholders of record July 31, 2017 and paid in September 2017. Dividend payments to shareholders of DuPont common and preferred stock totaled \$0.7 billion during the period January 1 through August 31, 2017, \$1.3 billion in 2016, and \$1.5 billion in 2015. Dividends per share of common stock were \$1.14 for the period January 1 through August 31, 2017, \$1.52 in 2016, and \$1.72 in 2015.

In the first quarter 2015, DuPont announced its intention to buy back about \$4 billion of shares of DuPont common stock using the distribution proceeds received from Chemours. During 2015, the company purchased and retired 35 million shares of DuPont common stock through a \$2 billion accelerated share repurchase ("ASR") agreement and in 2016 purchased and retired 13.2 million shares in the open market at a cost of \$916 million.

As of the consummation of the Merger, shares of DuPont common stock held publicly were redeemed and DuPont's common stock is owned solely by its parent company, DowDuPont. DuPont's preferred stock remains issued and outstanding, and DuPont continues to be responsible for dividends on its preferred stock; however, the obligation is not material to the company's liquidity. Dividend payments to shareholders of DuPont preferred stock totaled \$3 million during the period September 1 through December 31, 2017, \$7 million during the period January 1 through August 31, 2017, \$10 million in 2016, and \$10 million in 2015.

DowDuPont relies on distributions and other intercompany transfers from DuPont and Dow to fund payment of its costs and expenses. In November 2017, DowDuPont's Board of Directors declared a fourth quarter dividend per share of DowDuPont common stock payable on December 15, 2017 and authorized an initial \$4 billion share repurchase program to buy back shares of DowDuPont common stock. In the fourth quarter of 2017, DuPont declared and paid distributions in cash and in-kind to DowDuPont of \$829 million, primarily to fund a portion of DowDuPont's fourth quarter share repurchases and dividend payment.

See Note 15 to the Consolidated Financial Statements for additional information relating to the above share buyback plans.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Critical Accounting Estimates

The company's significant accounting policies are more fully described in Note 1 to the Consolidated Financial Statements. Management believes that the application of these policies on a consistent basis enables the company to provide the users of the financial statements with useful and reliable information about the company's operating results and financial condition.

The preparation of the Consolidated Financial Statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts, including, but not limited to, receivable and inventory valuations, impairment of tangible and intangible assets, long-term employee benefit obligations, income taxes, restructuring liabilities, environmental matters and litigation. Management's estimates are based on historical experience, facts and circumstances available at the time and various other assumptions that are believed to be reasonable. The company reviews these matters and reflects changes in estimates as appropriate. Management believes that the following represents some of the more critical judgment areas in the application of the company's accounting policies which could have a material effect on the company's financial position, liquidity or results of operations.

Pension Plans and Other Post Employment Benefits

Accounting for employee benefit plans involves numerous assumptions and estimates. Discount rate and expected return on plan assets are two critical assumptions in measuring the cost and benefit obligation of the company's pension and other post employment benefit ("OPEB") plans. Management reviews these two key assumptions when plans are re-measured. These and other assumptions are updated periodically to reflect the actual experience and expectations on a plan specific basis as appropriate. As permitted by GAAP, actual results that differ from the assumptions are accumulated on a plan by plan basis and to the extent that such differences exceed 10 percent of the greater of the plan's benefit obligation or the applicable plan assets, the excess is amortized over the average remaining service period of active employees.

About 80 percent of the company's benefit obligation for pensions and essentially all of the company's OPEB obligations are attributable to the benefit plans in the U.S. In the U.S. the discount rate is developed by matching the expected cash flow of the benefit plans to a yield curve constructed from a portfolio of high quality fixed-income instruments provided by the plans' actuaries as of the measurement date. Effective in 2016, the company began to measure the service and interest cost components utilizing a full yield curve approach by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows. The company made this change as it believes it is a more precise measurement of service and interest costs by improving the correlation between projected benefit cash flows to the corresponding spot yield curve rates. The company considers this a change in estimate, and, accordingly, has accounted for it on a prospective basis. This change does not affect the measure of the total benefit obligation. Historically, the service and interest cost components were estimated utilizing a single weighted-average discount rate derived from the yield curve and cash flow for measurement of the benefit obligation at the beginning of the period. For non-U.S. benefit plans, the company utilizes prevailing long-term high quality corporate bond indices to determine the discount rate, applicable to each country, at the measurement date.

Within the U.S., the company establishes strategic asset allocation percentage targets and appropriate benchmarks for significant asset classes with the aim of achieving a prudent balance between return and risk. Strategic asset allocations in other countries are selected in accordance with the laws and practices of those countries. Where

appropriate, asset-liability studies are also taken into consideration. The long-term expected return on plan assets in the U.S. is based upon historical real returns (net of inflation) for the asset classes covered by the investment policy, expected performance, and projections of inflation and interest rates over the long-term period during which benefits are payable to plan participants. Consistent with prior years, the long-term expected return on plan assets in the U.S. reflects the asset allocation of the plan and the effect of the company's active management of the plan's assets. In connection with pension contributions of \$2,900 million to its principal U.S. pension plan for the period of January 1, 2017 through August 31, 2017, an investment policy study was completed for the principal U.S. pension plan. The study resulted in new target asset allocations for the U.S. pension plan with resulting changes to the expected return on plan assets. The long-term rate of return on assets decreased from 8.00 percent for the Predecessor period to 6.25 percent for the Successor period in 2017.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

In determining annual expense for the principal U.S. pension plan, the company uses a market-related value of assets rather than its fair value. The market-related value of assets is calculated by averaging market returns over 36 months. Accordingly, there may be a lag in recognition of changes in market valuation. As a result, changes in the fair value of assets are not immediately reflected in the company's calculation of net periodic pension cost. The following table shows the market-related value and fair value of plan assets for the principal U.S. pension plan:

(Dollars in billions)	Successor		Predecessor	
	December 31, 2017 ¹	December 31, 2016	December 31, 2015	December 31, 2015
Market-related value of assets	\$ 16.6	\$ 13.5	\$ 15.1	
Fair value of plan assets	16.7	13.5	14.4	

During the fourth quarter of 2017 and 2016, the plan's trust fund paid approximately \$140 million and \$550 million, ¹ respectively, to a group of separated, vested plan participants who elected a limited-time opportunity to receive a lump sum payout. See further discussion under "Long-term Employee Benefits" beginning on page 38.

For plans other than the principal U.S. pension plan, pension expense is determined using the fair value of assets.

The following table highlights the potential impact on the company's pre-tax earnings due to changes in certain key assumptions with respect to the company's pension and OPEB plans, based on assets and liabilities at December 31, 2017:

Pre-tax Earnings Benefit (Charge)	Successor	
	1/4 Percentage Point Increase	1/4 Percentage Point Decrease
(Dollars in millions)		
Discount rate	\$ (34)	\$ 37
Expected rate of return on plan assets	49	(49)

Additional information with respect to pension and OPEB expenses, liabilities and assumptions is discussed under "Long-term Employee Benefits" beginning on page 38 and in Note 16 to the Consolidated Financial Statements.

Environmental Matters

Accruals for environmental matters are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. At December 31, 2017, the company had accrued obligations of \$433 million for probable environmental remediation and restoration costs, including \$67 million for the remediation of Superfund sites. As remediation activities vary substantially in duration and cost from site to site, it is difficult to develop precise estimates of future site remediation costs. The company's estimates are based on a number of factors, including the complexity of the geology, the nature and extent of contamination, the type of remedy, the outcome of discussions with regulatory agencies and other Potentially Responsible Parties (PRPs) at multi-party sites and the number of and financial viability of other PRPs. Therefore, considerable uncertainty exists with respect to environmental remediation and costs, and, under adverse changes in circumstances, it is reasonably possible that the ultimate cost with respect to these particular matters could range up to \$900 million above that amount. Consequently, it is reasonably possible that environmental remediation and restoration costs in excess of amounts accrued could have a material impact on the company's results of operations, financial condition and cash flows. It is the opinion of the

company's management, however, that the possibility is remote that costs in excess of the range disclosed will have a material impact on the company's results of operations, financial condition or cash flows. For further discussion, see Environmental Matters in Management's Discussion and Analysis of Financial Condition and Results of Operations and Notes 1 and 14 to the Consolidated Financial Statements.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Legal Contingencies

The company's results of operations could be affected by significant litigation adverse to the company, including product liability claims, patent infringement and antitrust claims, and claims for third party property damage or personal injury stemming from alleged environmental torts. The company records accruals for legal matters when the information available indicates that it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Management makes adjustments to these accruals to reflect the impact and status of negotiations, settlements, rulings, advice of counsel and other information and events that may pertain to a particular matter. Predicting the outcome of claims and lawsuits and estimating related costs and exposure involves substantial uncertainties that could cause actual costs to vary materially from estimates. In making determinations of likely outcomes of litigation matters, management considers many factors. These factors include, but are not limited to, the nature of specific claims including unasserted claims, the company's experience with similar types of claims, the jurisdiction in which the matter is filed, input from outside legal counsel, the likelihood of resolving the matter through alternative dispute resolution mechanisms, and the matter's current status. Considerable judgment is required in determining whether to establish a litigation accrual when an adverse judgment is rendered against the company in a court proceeding. In such situations, the company will not recognize a loss if, based upon a thorough review of all relevant facts and information, management believes that it is probable that the pending judgment will be successfully overturned on appeal. A detailed discussion of significant litigation matters is contained in Note 14 to the Consolidated Financial Statements.

Indemnification Assets

On July 1, 2015, DuPont completed the separation of its Performance Chemicals segment through the spin-off of all of the issued and outstanding stock of The Chemours Company (the "Separation"). In connection with the Separation, the company and The Chemours Company ("Chemours") entered into a Separation Agreement (the "Separation Agreement"). Pursuant to the Separation Agreement and the Amendment to the Separation Agreement discussed in Note 4 to the Consolidated Financial Statements, the company is indemnified by Chemours against certain litigation, environmental, workers' compensation, and other liabilities that arose prior to the separation. The term of this indemnification is indefinite and includes defense costs and expenses, as well as monetary and non-monetary settlements and judgments. In connection with the recognition of liabilities related to these indemnified matters, the company records an indemnification asset when recovery is deemed probable. In assessing the probability of recovery, the company considers the contractual rights under the Separation Agreement and the Amendment to the Separation Agreement and any potential credit risk. Future events, such as potential disputes related to recovery as well as the solvency of Chemours, could cause the indemnification assets to have a lower value than anticipated and recorded. The company evaluates the recovery of the indemnification assets recorded when events or changes in circumstances indicate the carrying values may not be fully recoverable.

Income Taxes

The breadth of the company's operations and the global complexity of tax regulations require assessments of uncertainties and judgments in estimating taxes the company will ultimately pay. The final taxes paid are dependent upon many factors, including negotiations with taxing authorities in various jurisdictions, outcomes of tax litigation and resolution of disputes arising from federal, state and international tax audits in the normal course of business. The resolution of these uncertainties may result in adjustments to the company's tax assets and tax liabilities. It is reasonably possible that changes to the company's global unrecognized tax benefits could be significant; however, due to the uncertainty regarding the timing of completion of audits and possible outcomes, a current estimate of the range of increases or decreases that may occur within the next twelve months cannot be made.

Deferred income taxes result from differences between the financial and tax basis of the company's assets and liabilities and are adjusted for changes in tax rates and tax laws when changes are enacted. Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized. Significant judgment is required in evaluating the need for and magnitude of appropriate valuation allowances against deferred tax assets. The realization of these assets is dependent on generating future taxable income, as well as successful implementation of various tax planning strategies. For example, changes in facts and circumstances that alter the probability that the company will realize deferred tax assets could result in recording a valuation allowance, thereby reducing the deferred tax asset and generating a deferred tax expense in the relevant period. In some situations these changes could be material.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

On December 22, 2017, the Act was enacted, making significant changes to the U.S. tax law (see Note 7 for further information). The SEC staff issued Staff Accounting Bulletin No. 118 ("SAB 118"), which provides guidance on accounting for the tax effects of the Act for which the accounting under Accounting Standards Codification 740 ("ASC 740") is incomplete. To the extent that a company's accounting for certain income tax effects of the Act is incomplete but it is able to determine a reasonable estimate, it must record a provisional estimate in the financial statements. The provisional amounts, and adjustments identified in the measurement period, are recorded to the provision for income taxes on continuing operations in the period the amounts are determined. In accordance with Staff Accounting Bulletin 118 ("SAB 118"), during the measurement period, income tax effects of the Act may be refined upon obtaining, preparing, or analyzing additional information, and such changes could be material. During the measurement period, provisional amounts may be also be adjusted for the effects, if any, of interpretative guidance issued after December 31, 2017, by U.S. regulatory and standard-setting bodies. SAB 118 provides that the measurement period is complete when a company's accounting is complete and in no circumstances, should the measurement period extend beyond one year from the enactment date. If a company cannot determine a provisional estimate to be included in the financial statements, it should continue to apply ASC 740 on the basis of the provisions of the tax laws that were in effect immediately before enactment of the Act. Refer to Note 7 to the Consolidated Financial Statements for additional details related to the Act.

At December 31, 2017, the company had a net deferred tax liability balance of \$5.4 billion, net of valuation allowance of \$1.4 billion. Realization of deferred tax assets is expected to occur over an extended period of time. As a result, changes in tax laws, assumptions with respect to future taxable income, and tax planning strategies could result in adjustments to deferred tax assets. See Note 7 to the Consolidated Financial Statements for additional details related to the deferred tax liability balance.

Valuation of Assets and Impairment Considerations

The assets and liabilities of acquired businesses are measured at their estimated fair values at the dates of acquisition. The excess of the purchase price over the estimated fair value of the net assets acquired, including identified intangibles, is recorded as goodwill. The determination and allocation of fair value to the assets acquired and liabilities assumed is based on various assumptions and valuation methodologies requiring considerable management judgment, including estimates based on historical information, current market data and future expectations. The principal assumptions utilized in the company's valuation methodologies include revenue growth rates, operating margin estimates, royalty rates, and discount rates. Although the estimates are deemed reasonable by management based on information available at the dates of acquisition, those estimates are inherently uncertain.

Assessment of the potential impairment of goodwill, other intangible assets, property, plant and equipment, investments in nonconsolidated affiliates, and other assets is an integral part of the company's normal ongoing review of operations. Testing for potential impairment of these assets is significantly dependent on numerous assumptions and reflects management's best estimates at a particular point in time. The dynamic economic environments in which the company's diversified product lines operate, and key economic and product line assumptions with respect to projected selling prices, market growth and inflation rates, can significantly affect the outcome of impairment tests. Estimates based on these assumptions may differ significantly from actual results. Changes in factors and assumptions used in assessing potential impairments can have a significant impact on the existence and magnitude of impairments, as well as the time in which such impairments are recognized. In addition, the company continually reviews its diverse portfolio of assets to ensure they are achieving their greatest potential and are aligned with the company's growth strategy. Strategic decisions involving a particular group of assets may trigger an assessment of the recoverability of

the related assets. Such an assessment could result in impairment losses.

The company performs goodwill impairment testing at the reporting unit level which is defined as the operating segment or one level below the operating segment. One level below the operating segment, or component, is a business in which discrete financial information is available and regularly reviewed by management. The company aggregates certain components into reporting units based on economic similarities. Subsequent to the Merger, the company identified nine reporting units.

For purposes of the annual goodwill impairment test, the company has the option to first perform qualitative testing to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. Qualitative factors assessed at the company level include, but are not limited to, GDP growth rates, long-term commodity prices, equity and credit market activity, discount rates, foreign exchange rates, and overall financial performance. Qualitative factors assessed at the reporting unit level include, but are not limited to, changes in industry and market structure, competitive environments, planned capacity and new product launches, cost factors such as raw material prices, and financial performance of the reporting unit. If the company chooses not to complete a qualitative assessment for a given reporting unit or if the initial assessment indicates that it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value, additional quantitative testing is required.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

In the predecessor period, the company completed the annual impairment test on July 1, 2017 when a quantitative assessment was performed on all reporting units that carry goodwill. Based on the results of the company's annual goodwill impairment test in the predecessor period, the company determined that the fair value of each of the reporting units exceeded its carrying value, and therefore there were no indications of impairment. The company's methodology for estimating the fair value of its reporting units is using the income approach based on the present value of future cash flows.

In connection with the Merger Transaction, the company adopted the policy of the parent company and performed its annual goodwill impairment test in the fourth quarter. In the fourth quarter of 2017, a qualitative assessment was performed on all reporting units that carry goodwill. For the qualitative assessments, management considered the factors discussed above at both the company level and the reporting unit level. Based on the qualitative assessment, management concluded it is not more likely than not that the carrying value of the reporting unit exceeds the fair value of the reporting unit. As discussed below, the company's assets and liabilities were measured at fair value as of the date of the Merger, and as a result, any declines in projected cash flows could have a material, negative impact on the carrying value of the company's assets and therefore result in an impairment.

Purchase Accounting

Due to the Merger and the related accounting determination, DuPont has elected to apply the acquisition method of accounting, which requires that all assets and liabilities be remeasured to fair value as of the date of the Merger. Such fair values have been reflected in the company's financial statements following the push-down method of accounting. Estimates of fair value require a complex series of judgments about future events and uncertainties. The estimates and assumptions used to determine the preliminary estimated fair value assigned to each class of assets and liabilities, as well as asset lives, have a material impact to the company's consolidated financial statements, and are based upon assumptions believed to be reasonable but that are inherently uncertain. Third party valuation specialists were engaged to assist in the valuation of certain of these assets and liabilities.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Off-Balance Sheet Arrangements

Certain Guarantee Contracts

Information with respect to the company's guarantees is included in Note 14 to the Consolidated Financial Statements. Historically, the company has not had to make significant payments to satisfy guarantee obligations; however, the company believes it has the financial resources to satisfy these guarantees.

Contractual Obligations

Information related to the company's significant contractual obligations is summarized in the following table:

(Dollars in millions)	Total at December 31, 2017	Payments Due In			
		2018	2019-2020	2021-2022	2023 and beyond
Long-term debt and capital lease obligations ^{1,2}	\$ 11,113	\$ 1,286	\$ 5,010	\$ 1,507	\$ 3,310
Expected cumulative cash requirements for interest payments through maturity	2,669	385	502	275	1,507
Operating leases	1,044	264	327	185	268
Purchase obligations ³					
Information technology infrastructure & services	163	93	64	6	—
Raw material obligations	1,630	530	546	527	27
Utility obligations	105	66	23	11	5
Other	90	70	12	8	—
Total purchase obligations	1,988	759	645	552	32
Other liabilities ^{1,4}					
Pension and other post employment benefits	8,139	456	778	730	6,175
Workers' compensation	78	13	35	15	15
Environmental remediation	433	146	149	71	67
License agreements ⁵	1,173	230	382	316	245
Other ⁶	262	82	45	39	96
Total other long-term liabilities	10,085	927	1,389	1,171	6,598
Total contractual obligations ⁷	\$ 26,899	\$ 3,621	\$ 7,873	\$ 3,690	\$ 11,715

1. Included in the Consolidated Financial Statements.

2. Excludes unamortized debt step-up premium of \$492 million.

3. Represents enforceable and legally binding agreements in excess of \$1 million to purchase goods or services that specify fixed or minimum quantities; fixed, minimum or variable price provisions; and the approximate timing of the agreement.

4. The company's contractual obligations do not reflect an offset for recoveries associated with indemnifications by Chemours in accordance with the Separation Agreement. Refer to Notes 4 and 14 to the Consolidated Financial Statements for additional detail related to the indemnifications.

5. Represents undiscounted remaining payments under DuPont Pioneer license agreements (\$1,079 million on a discounted basis).

6. Primarily represents employee-related benefits other than pensions and other post employment benefits.

7. Due to uncertainty regarding the completion of tax audits and possible outcomes, the timing of certain payments of obligations related to unrecognized tax benefits cannot be made and have been excluded from the table above. See Note 7 to the Consolidated Financial Statements for additional detail.

The company expects to meet its contractual obligations through its normal sources of liquidity and believes it has the financial resources to satisfy these contractual obligations.

37

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Long-term Employee Benefits

The company has various obligations to its employees and retirees. The company maintains retirement-related programs in many countries that have a long-term impact on the company's earnings and cash flows. These plans are typically defined benefit pension plans, as well as medical, dental and life insurance benefits for pensioners and survivors and disability benefits for employees (other post employment benefits or OPEB plans). Approximately 80 percent of the company's worldwide benefit obligation for pensions and essentially all of the company's worldwide OPEB obligations are attributable to the U.S. benefit plans.

Pension coverage for employees of the company's non-U.S. consolidated subsidiaries is provided, to the extent deemed appropriate, through separate plans. The company regularly explores alternative solutions to meet its global pension obligations in the most cost effective manner possible as demographics, life expectancy and country-specific pension funding rules change. Where permitted by applicable law, the company reserves the right to change, modify or discontinue its plans that provide pension, medical, dental, life insurance and disability benefits.

Benefits under defined benefit pension plans are based primarily on years of service and employees' pay near retirement. In November 2016, the company announced changes to the U.S. pension and OPEB plans. The company will freeze the pay and service amounts used to calculate pension benefits for active employees who participate in the U.S. pension plans on November 30, 2018. Therefore, as of November 30, 2018, active employees participating in the U.S. pension plans will not accrue additional benefits for future service and eligible compensation received. In addition to the changes to the U.S. pension plans, OPEB eligible employees who will be under the age of 50 as of November 30, 2018 will not receive post-retirement medical, dental and life insurance benefits. As a result of these changes, the company recognized a pre-tax curtailment gain of \$382 million during the fourth quarter of 2016. The majority of employees hired in the U.S. on or after January 1, 2007 are not eligible to participate in the pension and post-retirement medical, dental and life insurance plans, but receive benefits in the defined contribution plans. In the fourth quarter 2016, about \$550 million of lump-sum payments were made from the principal U.S. pension plan trust fund to a group of separated, vested plan participants who were extended a limited-time opportunity and voluntarily elected to receive their pension benefits in a single lump-sum payment. In the fourth quarter 2017, about \$140 million of lump sum payments were made from the principal U.S. pension plan trust fund under a similar program.

Pension benefits are paid primarily from trust funds established to comply with applicable laws and regulations. Unless required by law, the company does not make contributions that are in excess of tax deductible limits. The actuarial assumptions and procedures utilized are reviewed periodically by the plans' actuaries to provide reasonable assurance that there will be adequate funds for the payment of benefits. The company contributed \$2,900 million to the principal U.S. pension plan for the period January 1, 2017 through August 31, 2017. The company does not expect to make cash contributions to this plan in 2018.

Funding for each pension plan other than the principal U.S. pension plan is governed by the rules of the sovereign country in which it operates. Thus, there is not necessarily a direct correlation between pension funding and pension expense. In general, however, improvements in plans' funded status tends to moderate subsequent funding needs. The company contributed \$34 million, \$67 million, \$121 million and \$164 million to its funded pension plans other than the principal U.S. pension plan for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017, and for the years ended December 31, 2016 and 2015, respectively.

U.S. pension benefits that exceed federal limitations are covered by separate unfunded plans and these benefits are paid to pensioners and survivors from operating cash flows. The company's remaining pension plans with no plan assets are paid from operating cash flows. The company made benefit payments of \$34 million, \$57 million, \$184 million and \$144 million to its unfunded plans for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017, and for the years ended December 31, 2016 and 2015, respectively.

The company's OPEB plans are unfunded and the cost of the approved claims is paid from operating cash flows. Pre-tax cash requirements to cover actual net claims costs and related administrative expenses were \$59 million, \$166 million, \$218 million, and \$237 million for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017, and for the years ended December 31, 2016 and 2015, respectively. Changes in cash requirements reflect the net impact of higher per capita health care costs, demographic changes, plan amendments and changes in participant premiums, co-pays and deductibles.

In 2018, the company expects to contribute approximately \$200 million to its funded pension plans other than the principal U.S. pension plan and its remaining plans with no plan assets, and about \$250 million for its OPEB plans.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

The company's income can be significantly affected by pension and defined contribution benefits as well as OPEB costs. The following table summarizes the extent to which the company's income for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017 and for the years ended December 31, 2016 and 2015 was affected by pre-tax charges related to long-term employee benefits:

(Dollars in millions)	Successor		Predecessor	
	For the Period September 1 through December 31, 2017	For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Long-term employee benefit plan (benefit) charges ¹	\$ (12)	\$ 538	\$ 442	\$ 616

The long-term employee benefit plan (benefit) charges include discontinued operations of \$2 million, \$8 million, \$6 million and (\$233) million for the periods September 1 through December 31, 2017 and January 1 through August 31, 2017 and for the years ended December 31, 2016 and 2015, respectively.

The above (benefit) charges for pension and OPEB are determined as of the beginning of each period. Activity for the period September 1 through December 31, 2017 benefited from the absence of the amortization of net losses from AOCL. Long-term employee benefit expense in 2016 include a \$382 million curtailment gain as a result of changes made to the U.S. Pension and OPEB benefits in 2016 described above. See "Pension Plans and Other Post Employment Benefits" under the Critical Accounting Estimates section beginning on page 32 of this report for additional information on determining annual expense.

For 2018, long term employee benefit expense from continuing operations is expected to decrease by about \$500 million. The decrease is mainly due to the absence of the amortization of net losses and prior service benefit from AOCL, which were \$518 million during the period January 1 through August 31, 2017.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Environmental Matters

The company operates global manufacturing, product handling and distribution facilities that are subject to a broad array of environmental laws and regulations. Such rules are subject to change by the implementing governmental agency, and the company monitors these changes closely. Company policy requires that all operations fully meet or exceed legal and regulatory requirements. In addition, the company implements voluntary programs to reduce air emissions, minimize the generation of hazardous waste, decrease the volume of water use and discharges, increase the efficiency of energy use and reduce the generation of persistent, bioaccumulative and toxic materials. Management has noted a global upward trend in the amount and complexity of proposed chemicals regulation. The costs to comply with complex environmental laws and regulations, as well as internal voluntary programs and goals, are significant and will continue to be significant for the foreseeable future.

Pre-tax environmental expenses charged to income from continuing operations are summarized below:

(Dollars in millions)	Successor		Predecessor	
	For the Period Sep 1 - Dec 31, 2017	For the Period Jan 1 - Aug 31, 2017	Dec 31, 2016	Dec 31, 2015
Environmental operating costs	\$ 85	\$205	\$335	\$346
Environmental remediation costs	8	65	62	66
	\$ 93	\$270	\$397	\$412

About 66 percent of total pre-tax environmental expenses charged to income from continuing operations for the period September 1 through December 31, 2017 and for the period January 1 through August 31, 2017, respectively, resulted from operations in the U.S. Based on existing facts and circumstances, management does not believe that year over year changes, if any, in environmental expenses charged to current operations will have a material impact on the company's financial position, liquidity or results of operations. Annual expenditures in the near term are not expected to vary significantly from the range of such expenditures experienced in the past few years. Longer term, expenditures are subject to considerable uncertainty and may fluctuate significantly.

Environmental Operating Costs

As a result of its operations, the company incurs costs for pollution abatement activities including waste collection and disposal, installation and maintenance of air pollution controls and wastewater treatment, emissions testing and monitoring, and obtaining permits. The company also incurs costs related to environmental related research and development activities including environmental field and treatment studies as well as toxicity and degradation testing to evaluate the environmental impact of products and raw materials.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Remediation Accrual

Changes in the remediation accrual balance are summarized below:

(Dollars in millions)

Balance at December 31, 2015 (Predecessor)	\$492
Remediation payments	(52)
Net increase in remediation accrual ¹	62
Net change, indemnification ²	(45)
Balance at December 31, 2016	\$457
Remediation payments	(53)
Net increase in remediation accrual ¹	65
Net change, indemnification ²	14
Balance at August 31, 2017	\$483

Balance at September 1, 2017 (Successor)	483
Remediation payments	(40)
Net increase in remediation accrual ¹	8
Net change, indemnification ²	(18)
Balance at December 31, 2017	\$433

1. Excludes indemnified remediation obligations.

Net change in indemnified remediation obligations. Pursuant to the Separation Agreement, as discussed below and 2. in Note 4 to the Consolidated Financial Statements, DuPont is indemnified by Chemours for certain environmental matters.

Considerable uncertainty exists with respect to environmental remediation costs, and, under adverse changes in circumstances, the potential liability may range up to \$920 million above the amount accrued as of December 31, 2017. However, based on existing facts and circumstances, management does not believe that any loss, in excess of amounts accrued, related to remediation activities at any individual site will have a material impact on the financial position, liquidity or results of operations of the company.

Pursuant to the Separation Agreement discussed in Note 4 to the Consolidated Financial Statements, the company is indemnified by Chemours for certain environmental matters, included in the liability of \$433 million, that have an estimated liability of \$242 million at December 31, 2017 and a potential exposure that ranges up to approximately \$430 million above the amount accrued. As such, the company has recorded an indemnification asset of \$242 million corresponding to the company's accrual balance related to these matters at December 31, 2017.

As of December 31, 2017, the company has been notified of potential liability under the Comprehensive Environmental Response, Compensation and Liability Act ("Superfund") or similar state laws at about 500 sites around the U.S., including approximately 100 sites for which DuPont does not believe it has liability based on current information. Active remediation is under way at 62 of these sites. In addition, the company has resolved its liability at approximately 200 sites, either by completing remedial actions with other PRPs or by participating in "de minimis buyouts" with other PRPs whose waste, like the company's, represented only a small fraction of the total waste present at a site. The company received notice of potential liability at 3 new sites during 2017 compared with single notices in both 2016 and 2015.

Environmental Capital Expenditures

Capital expenditures for environmental projects, either required by law or necessary to meet the company's internal environmental goals, were \$18 million and \$35 million for the period September 1 through December 31, 2017 and for the period January 1 through August 31, 2017, respectively. The company currently estimates expenditures for environmental-related capital projects to be approximately \$44 million in 2018.

Part II

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, continued

Climate Change

The company believes that climate change is an important global issue that presents risks and opportunities. Expanding upon significant global greenhouse gas (GHG) emissions and other environmental footprint reductions made in the period 1990-2010, in 2015, the company announced its 2020 Sustainability Goals, including a goal to achieve a 7 percent reduction in GHG emissions intensity (2015 baseline) and a 10 percent improvement in energy intensity (2010 baseline). As of 2016, the company achieved reductions of 1.3 percent in GHG emissions intensity against the goal baseline of 2015, and 8 percent since 2010. In addition, the company has achieved a 10.8 percent improvement in energy intensity since 2010. The company continuously evaluates opportunities for existing and new product and service offerings in light of the anticipated demands of a low-carbon economy.

The company is actively engaged in efforts to develop constructive public policies to reduce GHG emissions and encourage lower carbon forms of energy. Such policies may bring higher operating costs as well as greater revenue and margin opportunities. Legislative efforts to control or limit GHG emissions could affect the company's energy source and supply choices as well as increase the cost of energy and raw materials derived from fossil fuels. Such efforts are also anticipated to provide the business community with greater certainty for the regulatory future, help guide investment decisions, and drive growth in demand for low-carbon and energy-efficient products, technologies, and services. Similarly, demand is expected to grow for products that facilitate adaptation to a changing climate. However, the current unsettled policy environment in the U.S., where many company facilities are located, adds an element of uncertainty to business decisions, particularly those relating to long-term capital investments.

In addition, significant differences in regional or national approaches could present challenges in a global marketplace. An effective global climate policy framework will help drive the market changes that are needed to stimulate and efficiently deploy new innovations in science and technology, while maintaining open and competitive global markets.

Part II

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The company's global operations are exposed to financial market risks relating to fluctuations in foreign currency exchange rates, commodity prices, and interest rates. The company has established a variety of programs including the use of derivative instruments and other financial instruments to manage the exposure to financial market risks as to minimize volatility of financial results. In the ordinary course of business, the company enters into derivative instruments to hedge its exposure to foreign currency, interest rate and commodity price risks under established procedures and controls. For additional information on these derivatives and related exposures, see Note 18 to the Consolidated Financial Statements. Decisions regarding whether or not to hedge a given commitment are made on a case-by-case basis, taking into consideration the amount and duration of the exposure, market volatility and economic trends. Foreign currency exchange contracts are also used, from time to time, to manage near-term foreign currency cash requirements.

Foreign Currency Exchange Rate Risks

The company has significant international operations resulting in a large number of currency transactions that result from international sales, purchases, investments and borrowings. The primary currencies for which the company has an exchange rate exposure are the European euro (EUR), Chinese yuan, Brazilian real, and Japanese yen. The company uses forward exchange contracts to offset its net exposures, by currency, related to the foreign currency denominated monetary assets and liabilities of its operations. In addition to the contracts disclosed in Note 18 to the Consolidated Financial Statements, from time to time, the company will enter into foreign currency exchange contracts to establish with certainty the U.S. dollar (USD) amount of future firm commitments denominated in a foreign currency.

The following table illustrates the fair values of outstanding foreign currency contracts at December 31, 2017 and 2016, and the effect on fair values of a hypothetical adverse change in the foreign exchange rates that existed at December 31, 2017 and 2016. The sensitivities for foreign currency contracts are based on a 10 percent adverse change in foreign exchange rates.

	Fair Value (Liability)/Asset		Fair Value Sensitivity	
	Successor	Predecessor	Successor	Predecessor
(Dollars in millions)	2017	2016	2017	2016
Foreign currency contracts	\$ (33)	\$ 61	\$ (863)	\$ (567)

Since the company's risk management programs are highly effective, the potential loss in value for each risk management portfolio described above would be largely offset by changes in the value of the underlying exposure.

Concentration of Credit Risk

The company maintains cash and cash equivalents, marketable securities, derivatives and certain other financial instruments with various financial institutions. These financial institutions are generally highly rated and geographically dispersed and the company has a policy to limit the dollar amount of credit exposure with any one institution.

As part of the company's financial risk management processes, it continuously evaluates the relative credit standing of all of the financial institutions that service DuPont and monitors actual exposures versus established limits. The company has not sustained credit losses from instruments held at financial institutions.

The company's sales are not materially dependent on any single customer. As of December 31, 2017, no one individual customer balance represented more than five percent of the company's total outstanding receivables balance. Credit risk associated with its receivables balance is representative of the geographic, industry and customer diversity associated with the company's global product lines.

The company also maintains strong credit controls in evaluating and granting customer credit. As a result, it may require that customers provide some type of financial guarantee in certain circumstances. Length of terms for customer credit varies by industry and region.

Part II

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements and supplementary data required by this Item are included herein, commencing on page F-1 of this report.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

The company maintains a system of disclosure controls and procedures to give reasonable assurance that information required to be disclosed in the company's reports filed or submitted under the Securities Exchange Act of 1934 (Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. These controls and procedures also give reasonable assurance that information required to be disclosed in such reports is accumulated and communicated to management to allow timely decisions regarding required disclosures.

As of December 31, 2017, the company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), together with management, conducted an evaluation of the effectiveness of the company's disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on that evaluation, the CEO and CFO concluded that these disclosure controls and procedures are effective.

There has been no change in the company's internal control over financial reporting that occurred during the fourth quarter of 2017 that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting. The company has completed its evaluation of its internal controls and has concluded that the company's system of internal controls over financial reporting was effective as of December 31, 2017 (see page F-2).

The company completed its acquisition of the Health and Nutrition Business (the "H&N Business") from FMC Corporation on November 1, 2017. As a result, management has excluded this business from its assessment of internal control over financial reporting as of December 31, 2017. The total assets of the H&N Business that were excluded from the assessment represented less than two percent of the company's total assets as of December 31, 2017. The total net sales of the H&N Business that were excluded from the assessment represented less than two percent of the company's total sales for the period September 1 to December 31, 2017.

ITEM 9B. OTHER INFORMATION

In February 2018, the company entered into a new committed receivable repurchase facility of up to \$1,300 (the "2018 Repurchase Facility") which expires in December 2018. Under the 2018 Repurchase Facility, DuPont may sell a portfolio of available and eligible outstanding customer notes receivables within the agriculture product line to participating institutions and simultaneously agree to repurchase at a future date. The 2018 Repurchase Facility is considered a secured borrowing with the customer notes receivables, inclusive of those that are sold and repurchased, equal to 105 percent of the outstanding amounts borrowed utilized as collateral. Borrowings under the 2018 Repurchase Facility will have an interest rate of LIBOR + 0.75 percent.

Part III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The Registrant meets the conditions set forth in General Instruction I(1)(a), (b) and (d) of Form 10-K (as modified by a grant of no-action relief dated February 12, 2018) and is therefore filing this form with the reduced disclosure format and has omitted the information called for by this Item pursuant to General Instruction I(2)(c) of Form 10-K.

ITEM 11. EXECUTIVE COMPENSATION

The Registrant meets the conditions set forth in General Instruction I(1)(a), (b) and (d) of Form 10-K (as modified by a grant of no-action relief dated February 12, 2018) and is therefore filing this form with the reduced disclosure format and has omitted the information called for by this Item pursuant to General Instruction I(2)(c) of Form 10-K.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The Registrant meets the conditions set forth in General Instruction I(1)(a), (b) and (d) of Form 10-K (as modified by a grant of no-action relief dated February 12, 2018) and is therefore filing this form with the reduced disclosure format and has omitted the information called for by this Item pursuant to General Instruction I(2)(c) of Form 10-K.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The Registrant meets the conditions set forth in General Instruction I(1)(a), (b) and (d) of Form 10-K (as modified by a grant of no-action relief dated February 12, 2018) and is therefore filing this form with the reduced disclosure format and has omitted the information called for by this Item pursuant to General Instruction I(2)(c) of Form 10-K.

Part III

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Independent Public Accountants

PricewaterhouseCoopers LLP ("PwC"), an independent registered public accounting firm, has served as the company's independent accountants continuously since 1954. PwC has issued its reports, included in the company's Form 10-K, on the audited consolidated financial statements of the Company and internal control over financial reporting for the period January 1 through August 31, 2017 (the "Predecessor" period) and the period September 1 through December 31, 2017 (the "Successor" period). The DuPont Audit Committee appointed PwC to be the independent auditor for fiscal year 2017, which was ratified by holders of DuPont Common Stock on May 24, 2017.

To assure that the audit and non-audit services performed by the independent registered public accounting firm do not impair its independence in appearance and/or fact, the committee established policies and procedures requiring its pre-approval of all such services and associated fees. These policies and procedures required the independent registered public accounting firm to submit a report annually regarding the audit, audit-related, tax and other services it expects to render in the following year and the associated, forecasted fees to the committee for its approval. Audit services include the audit of the company's Consolidated Financial Statements, separate audits of its subsidiaries, services associated with regulatory filings and attestation services regarding the effectiveness of the company's internal controls over financial reporting. Audit-related services are assurance services that are reasonably related to the audit of the company's Consolidated Financial Statements or services traditionally provided by the independent registered public accounting firm. Audit-related services include employee benefit plan audits; audits of carve-out financial statements related to divestitures; due diligence services regarding potential acquisitions or dispositions, including tax-related due diligence; and agreed-upon or expanded audit procedures related to regulatory requirements. Tax services include selected non-U.S. tax compliance services, advice and recommendation with respect to issues such as tax audits and appeals, restructurings, mergers and acquisitions, and assistance regarding appropriate handling of items on the returns, required disclosures, elections and filing positions available to the company. Other services include non-financial attestation, assessment and advisory services.

In accordance with its pre-approval policies and procedures, the committee pre-approved all services rendered by and associated fees paid to PwC, including services related to the Merger Transaction and Intended Business Separations, for calendar years 2017 and 2016. These are shown by category in the following table.

(in millions)	2017	2016
Audit Fees ¹	\$26.6	\$14.5
Audit-Related Fees ²	26.2	22.0
Tax Fees	—	0.2
All Other Fees	0.1	—
Total	\$52.9	\$36.7

Audit Fees paid to PwC in 2017 increased versus prior year primarily due to services related to (i) two audits being 1. required in 2017 (Predecessor and Successor), and (ii) the Merger Transaction, including purchase accounting and other merger-related technical issues.

2. Audit-Related Fees paid to PwC in 2017 and 2016 primarily relate to the Intended Business Separations.

Part IV

Management's Reports on Responsibility for Financial Statements and Internal Control over Financial Reporting

Management's Report on Responsibility for Financial Statements

Management is responsible for the Consolidated Financial Statements and the other financial information contained in this Annual Report on Form 10-K. The financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) and are considered by management to present fairly the company's financial position, results of operations and cash flows. The financial statements include some amounts that are based on management's best estimates and judgments. The financial statements have been audited by the company's independent registered public accounting firm, PricewaterhouseCoopers LLP. The purpose of their audit is to express an opinion as to whether the Consolidated Financial Statements included in this Annual Report on Form 10-K present fairly, in all material respects, the company's financial position, results of operations and cash flows in conformity with GAAP. Their reports are presented on the following pages.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP. The company's internal control over financial reporting includes those policies and procedures that:

- i. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
 - provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorization of management and directors of the company; and
- ii. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of the company's assets that could have a material effect on the financial statements.
- iii. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, use or disposition of the company's assets that could have a material effect on the financial statements.

Internal control over financial reporting has certain inherent limitations which may not prevent or detect misstatements. In addition, changes in conditions and business practices may cause variation in the effectiveness of internal controls.

Management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2017, based on criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework (2013). Based on its assessment and those criteria, management concluded that the company maintained effective internal control over financial reporting as of December 31, 2017.

The company completed its acquisition of the Health and Nutrition Business (the "H&N Business") from FMC Corporation on November 1, 2017. As a result, management has excluded this business from its assessment of internal control over financial reporting as of December 31, 2017. The total assets of the H&N Business that were excluded from the assessment represented less than two percent of the company's total assets as of December 31, 2017. The total net sales of the H&N Business that were excluded from the assessment represented less than two percent of the company's total revenues for the period September 1 to December 31, 2017.

PricewaterhouseCoopers LLP, an independent registered public accounting firm, has audited the effectiveness of the company's internal control over financial reporting as of December 31, 2017, as stated in their reports, which are presented on the following pages.

Edward D. Breen Nicholas C. Fanandakis
Chair of the Board and Executive Vice President
Chief Executive Officer and Chief Financial Officer
February 15, 2018

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors of
E.I. du Pont de Nemours and Company

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheet of E.I. du Pont de Nemours and Company and its subsidiaries (Successor) (the "Company") as of December 31, 2017, and the related consolidated statements of operations, comprehensive income, equity and cash flows for the period September 1, 2017 through December 31, 2017, including the related notes and financial statement schedule appearing under Item 15(a)(2) (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2017, and the results of their operations and their cash flows for the period September 1, 2017 through December 31, 2017 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing on page F-2. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audit of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides

a reasonable basis for our opinions.

As described in Management's Report on Internal Control over Financial Reporting, management has excluded the H&N Business from its assessment of internal control over financial reporting as of December 31, 2017 because it was acquired by the Company in a purchase business combination during 2017. We have also excluded the H&N Business from our audit of internal control over financial reporting. The H&N Business is a wholly-owned subsidiary whose total assets and total revenues excluded from management's assessment and our audit of internal control over financial reporting represent less than two percent each of the related consolidated financial statement amounts as of December 31, 2017 and for the period September 1, 2017 through December 31, 2017.

F-3

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We have served as the Company's auditor since 1954.

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors of
E.I. du Pont de Nemours and Company:

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheet of E.I. du Pont de Nemours and Company and its subsidiaries (Predecessor) as of December 31, 2016, and the related consolidated statements of operations, comprehensive income, equity and cash flows for the period January 1, 2017 through August 31, 2017, and for each of the two years in the period ended December 31, 2016, including the related notes and financial statement schedule appearing under Item 15(a)(2) (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2016, and the results of their operations and their cash flows for the period January 1, 2017 through August 31, 2017, and for each of the two years in the period ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these consolidated financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP
Philadelphia, Pennsylvania
February 15, 2018

We have served as the Company's auditor since 1954.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation and Basis of Presentation

The accompanying Consolidated Financial Statements of E. I. du Pont de Nemours and Company ("DuPont" or "the company") were prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The significant accounting policies described below, together with the other notes that follow, are an integral part of the Consolidated Financial Statements.

DowDuPont Inc. ("DowDuPont") was formed on December 9, 2015 to effect an all-stock, merger of equals strategic combination between The Dow Chemical Company ("Dow") and DuPont (the "Merger Transaction"). On August 31, 2017 at 11:59 pm ET, (the "Merger Effectiveness Time") pursuant to the Agreement and Plan of Merger, dated as of December 11, 2015, as amended on March 31, 2017 (the "Merger Agreement"), Dow and DuPont each merged with wholly owned subsidiaries of DowDuPont ("Mergers") and, as a result of the Mergers, Dow and DuPont became subsidiaries of DowDuPont (collectively, the "Merger"). Prior to the Merger, DowDuPont did not conduct any business activities other than those required for its formation and matters contemplated by the Merger Agreement. DowDuPont intends to pursue, subject to the receipt of approval by the Board of Directors of DowDuPont, the separation of the combined company's agriculture business, specialty products business and materials science business through a series of tax-efficient transactions (collectively, the "Intended Business Separations").

For purposes of DowDuPont's financial statement presentation, Dow was determined to be the accounting acquirer in the Merger and DuPont's assets and liabilities are reflected at fair value as of the Merger Effectiveness Time. In connection with the Merger and the related accounting determination, DuPont has elected to apply push-down accounting and reflect in its financial statements the fair value of its assets and liabilities. DuPont's Consolidated Financial Statements for periods following the close of the Merger are labeled "Successor" and reflect DowDuPont's basis in the fair values of the assets and liabilities of DuPont. All periods prior to the closing of the Merger reflect the historical accounting basis in DuPont's assets and liabilities and are labeled "Predecessor." The Consolidated Financial Statements and footnotes include a black line division between the columns titled "Predecessor" and "Successor" to signify that the amounts shown for the periods prior to and following the Merger are not comparable. See Note 3 for additional information on the Merger.

Transactions between DowDuPont, DuPont, Dow and their affiliates and other associated companies are reflected in the Successor consolidated financial statements and disclosed as related party transactions when material. Related party transactions with DowDuPont are included in Note 6. Related party transactions with Dow and their affiliates were not material as of December 31, 2017 and for the period September 1 through December 31, 2017.

As a condition of the regulatory approval for the Merger Transaction, the company was required to divest certain assets related to its crop protection business and research and development ("R&D") organization, specifically the company's Cereal Broadleaf Herbicides and Chewing Insecticides portfolios, including Rynaxypyr®, Cyazypyr® and Indoxacarb as well as the crop protection R&D pipeline and organization, excluding seed treatment, nematicides, and late-stage R&D programs. On March 31, 2017, the company entered into a definitive agreement (the "FMC Transaction Agreement") with FMC Corporation ("FMC"). Under the FMC Transaction Agreement, FMC would acquire the crop protection business and R&D assets that DuPont was required to divest in order to obtain European Commission ("EC") approval of the Merger Transaction as described above, (the "Divested Ag Business") and DuPont agreed to acquire certain assets relating to FMC's Health and Nutrition segment, excluding its Omega-3 products (the "H&N Business") (collectively, the "FMC Transactions").

On November 1, 2017, the company completed the FMC Transactions through the disposition of the Divested Ag Business and the acquisition of the H&N Business. The sale of the Divested Ag Business meets the criteria for discontinued operations and as such, results of operations are presented as discontinued operations and have been excluded from continuing operations for all periods presented. The sum of the individual earnings per share amounts from continuing operations and discontinued operations may not equal the total company earnings per share amounts due to rounding. The assets and liabilities related to the Divested Ag Business for all periods are presented as assets and liabilities held for sale in the Consolidated Balance Sheets. The comprehensive income and cash flows related to the Divested Ag Business have not been segregated and are included in the Consolidated Statements of Comprehensive Income and Consolidated Statements of Cash Flows, respectively, for all periods presented. Amounts related to the Divested Ag Business are consistently included or excluded from the Notes to the Consolidated Financial Statements based on the respective financial statement line item. See Note 4 for additional information.

F-13

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

On July 1, 2015, the company completed the separation of its Performance Chemicals segment through the spin-off of all of the issued and outstanding stock of The Chemours Company ("Chemours"). In accordance with GAAP, the results of operations of the Performance Chemicals segment are presented as discontinued operations and, as such, have been excluded from continuing operations in the Consolidated Statements of Operations for all periods presented. See Note 4 for additional information.

Certain reclassifications of prior year's data have been made to conform to current year's presentation. As described in Note 2, effective January 1, 2017, the company adopted the Financial Accounting Standards Board ("FASB") Accounting Standards Update ("ASU") No. 2016-09, Compensation - Stock Compensation (Topic 718), Improvements to Employee Share-Based Payment Accounting. In conjunction with the adoption of this ASU, the company retrospectively reclassified cash flows related to income tax impacts associated with employee share-based payments in the Consolidated Statements of Cash Flows, as described in Note 2.

The Consolidated Financial Statements include the accounts of the company and subsidiaries in which a controlling interest is maintained. For those consolidated subsidiaries in which the company's ownership is less than 100 percent, the outside stockholders' interests are shown as noncontrolling interests. Investments in affiliates over which the company has significant influence but not a controlling interest are accounted for under the equity method.

The company is also involved with certain joint ventures accounted for under the equity method of accounting that are variable interest entities ("VIEs"). The company is not the primary beneficiary, as the nature of the company's involvement with the VIEs does not provide it the power to direct the VIEs significant activities. Future events may require these VIEs to be consolidated if the company becomes the primary beneficiary. At December 31, 2017 and 2016, the maximum exposure to loss related to the nonconsolidated VIEs is not considered material to the Consolidated Financial Statements.

Use of Estimates in Financial Statement Preparation

The preparation of financial statements in accordance with U.S. GAAP requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The company's consolidated financial statements include amounts that are based on management's best estimates and judgments. Actual results could differ from those estimates. In connection with the Merger, DowDuPont has performed a preliminary allocation of the total consideration exchanged for the DuPont assets and liabilities it acquired using preliminary estimates. The estimates are subject to change as discussed in Note 3.

Changes in Accounting and Reporting

Within the Successor period, DuPont made the following changes in accounting and reporting to harmonize its accounting and reporting with DowDuPont.

Within the Successor period of the Consolidated Statements of Operations:

- Included royalty income within net sales. In the Predecessor periods, royalty income is included within sundry income - net.

- Eliminated the other operating charges line item. In the Successor period, a majority of these costs are included within cost of goods sold. These costs are also included in selling, general and administrative expenses and amortization of intangibles in the Successor period.

- Presented amortization of intangibles as a separate line item. In the Predecessor periods, amortization is included within cost of goods sold, selling, general and administrative expenses, other operating charges, and research and development expenses.

Presented integration and separation costs as a separate line item. In the Predecessor periods, these costs are included within selling, general and administrative expenses.

Included interest accrued related to unrecognized tax benefits within the (benefit from) provision for income taxes on continuing operations. In the Predecessor period, interest accrued related to unrecognized tax benefits is included within sundry income - net.

Within the Successor period of the Consolidated Balance Sheets:

Included loans to nonconsolidated affiliates within other assets. In the Predecessor period, loans are included within investment in nonconsolidated affiliates.

Included accrued discounts and rebates within accounts payable. In the Predecessor period, accrued discounts and rebates are included within accrued and other current liabilities.

Included non-current pension liabilities within pension and other post employment benefits - noncurrent. In the Predecessor period, non-current pension liabilities are included within other noncurrent obligations.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Within the Successor period of the Consolidated Statements of Cash Flows:

Included foreign currency exchange contract settlements within cash flows from operating activities, regardless of hedge accounting qualification. In the Predecessor period, DuPont reflected non-qualified hedge programs, specifically forward contracts, options and cash collateral activity, within cash flows from investing activities. In the Predecessor period, DuPont reflected cash flows from qualified programs within the line item it related to (i.e., revenue hedge cash flows presented within changes from accounts receivable).

Aligned the line items within "changes in assets and liabilities, net of effects of acquired and divested companies" to the DowDuPont presentation, including accounts and notes receivable, inventories, accounts payable, and other assets and liabilities. In the Predecessor period, the line item "changes in assets and liabilities, net of effects of acquired and divested companies" includes accounts and notes receivable, inventories and other operating assets, accounts payable and other operating liabilities, and accrued interest and income taxes.

Cash and Cash Equivalents

Cash equivalents represent investments with maturities of three months or less from time of purchase. They are carried at cost plus accrued interest.

Restricted Cash

Restricted cash represents trust assets of \$558 million as of December 31, 2017, and is included within other current assets on the Consolidated Balance Sheets. See Note 6 and Note 16 for further information.

Marketable Securities

Marketable securities represent investments in fixed and floating rate financial instruments with maturities greater than three months and up to twelve months at time of purchase. Investments classified as held-to-maturity are recorded at amortized cost. The carrying value approximates fair value due to the short-term nature of the investments. Investments classified as available-for-sale are carried at estimated fair value with unrealized gains and losses recorded as a component of accumulated other comprehensive income (loss). The cost of investments sold is determined by specific identification.

Fair Value Measurements

Under the accounting guidance for fair value measurements and disclosures, a fair value hierarchy was established that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

The company uses the following valuation techniques to measure fair value for its assets and liabilities:

Level 1—Quoted market prices in active markets for identical assets or liabilities;

Level 2—Significant other observable inputs (e.g. quoted prices for similar items in active markets, quoted prices for identical or similar items in markets that are not active, inputs other than quoted prices that are observable such as interest rate and yield curves, and market-corroborated inputs);

Level 3—Unobservable inputs for the asset or liability, which are valued based on management's estimates of assumptions that market participants would use in pricing the asset or liability.

Foreign Currency Translation

The company's worldwide operations utilize the U.S. dollar (USD) or local currency as the functional currency, where applicable. The company identifies its separate and distinct foreign entities and groups the foreign entities into two categories: 1) extension of the parent or foreign subsidiaries operating in a hyper-inflationary environment (USD functional currency) and 2) self-contained (local functional currency). If a foreign entity does not align with either category, factors are evaluated and a judgment is made to determine the functional currency.

F-15

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

For foreign entities where the USD is the functional currency, all foreign currency-denominated asset and liability amounts are re-measured into USD at end-of-period exchange rates, except for inventories, prepaid expenses, property, plant and equipment, goodwill and other intangible assets, which are re-measured at historical rates. Foreign currency income and expenses are re-measured at average exchange rates in effect during the year, except for expenses related to balance sheet amounts re-measured at historical exchange rates. Exchange gains and losses arising from re-measurement of foreign currency-denominated monetary assets and liabilities are included in income in the period in which they occur.

For foreign entities where the local currency is the functional currency, assets and liabilities denominated in local currencies are translated into USD at end-of-period exchange rates and the resultant translation adjustments are reported, net of their related tax effects, as a component of accumulated other comprehensive loss in equity. Assets and liabilities denominated in other than the local currency are re-measured into the local currency prior to translation into USD and the resultant exchange gains or losses are included in income in the period in which they occur. Income and expenses are translated into USD at average exchange rates in effect during the period.

The company changes the functional currency of its separate and distinct foreign entities only when significant changes in economic facts and circumstances indicate clearly that the functional currency has changed.

Inventories

The company's inventories are valued at the lower of cost or net realizable value. Elements of cost in inventories include raw materials, direct labor and manufacturing overhead. Stores and supplies are valued at cost or net realizable value, whichever is lower; cost is generally determined by the average cost method.

As of December 31, 2017 approximately 60 percent, 30 percent, and 10 percent of the company's inventories were accounted for under the first-in, first-out ("FIFO"), average cost and the last-in, first-out ("LIFO") methods, respectively. As of December 31, 2016 approximately 55 percent, 30 percent, and 15 percent of the company's inventories were accounted for under the FIFO, average cost and LIFO methods, respectively. Inventories accounted for under the FIFO method are primarily comprised of products with shorter shelf lives such as seeds, certain food-ingredients and enzymes.

The company establishes allowances for obsolescence of inventory based upon quality considerations and assumptions about future demand and market conditions.

Property, Plant and Equipment

Property, plant and equipment are carried at cost less accumulated depreciation. In connection with the Merger, the preliminary estimated fair value of property, plant and equipment is determined using a market approach and a replacement cost approach. Refer to Note 3 for further information. Depreciation is based on the estimated service lives of depreciable assets and is calculated using the straight-line method. Fully depreciated assets are retained in property and accumulated depreciation accounts until they are removed from service. When assets are surrendered, retired, sold, or otherwise disposed of, their gross carrying values and related accumulated depreciation are removed from the Consolidated Balance Sheets and included in determining gain or loss on such disposals.

Goodwill and Other Intangible Assets

The company records goodwill when the purchase price of a business acquisition exceeds the estimated fair value of net identified tangible and intangible assets acquired. Goodwill is tested for impairment at the reporting unit level annually, or more frequently when events or changes in circumstances indicate that the fair value of a reporting unit has more likely than not declined below its carrying value. In connection with the Merger Transaction, the company

adopted the policy of DowDuPont and performed an annual goodwill impairment test in the fourth quarter of 2017. In the Predecessor periods, the annual impairment test was performed in the third quarter.

When testing goodwill for impairment, the company has the option to first perform qualitative testing to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If the company chooses not to complete a qualitative assessment for a given reporting unit or if the initial assessment indicates that it is more likely than not that the carrying value of a reporting unit exceeds its estimated fair value, additional quantitative testing is required. The company's fair value methodology is primarily based on discounted cash flow techniques. See Note 12 for further information on goodwill.

Indefinite-lived intangible assets are tested for impairment at least annually; however, these tests are performed more frequently when events or changes in circumstances indicate that the asset may be impaired. Impairment exists when carrying value exceeds fair value. The company's fair value methodology is primarily based on discounted cash flow techniques.

F-16

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Definite-lived intangible assets are amortized over their estimated useful lives, generally on a straight-line basis for periods ranging primarily from 1 to 23 years. The company continually evaluates the reasonableness of the useful lives of these assets. Once these assets are fully amortized, they are removed from the Consolidated Balance Sheets.

Impairment of Long-Lived Assets

The company evaluates the carrying value of long-lived assets to be held and used when events or changes in circumstances indicate the carrying value may not be recoverable. The carrying value of a long-lived asset group is considered impaired when the total projected undiscounted cash flows from the assets are separately identifiable and are less than its carrying value. In that event, a loss is recognized based on the amount by which the carrying value exceeds the fair value of the long-lived asset. The company's fair value methodology is an estimate of fair market value which is made based on prices of similar assets or other valuation methodologies including present value techniques. Long-lived assets to be disposed of by sale, if material, are classified as held for sale and reported at the lower of carrying amount or fair value less cost to sell, and depreciation is ceased. Long-lived assets to be disposed of other than by sale are classified as held and used until they are disposed of and reported at the lower of carrying amount or fair value. Depreciation is recognized over the remaining useful life of the assets.

Derivative Instruments

Derivative instruments are reported in the Consolidated Balance Sheets at their fair values. The company utilizes derivatives to manage exposures to foreign currency exchange rates and commodity prices. Changes in the fair values of derivative instruments that are not designated as hedges are recorded in current period earnings. For derivative instruments designated as cash flow hedges, the effective portion of any hedge is reported in accumulated other comprehensive loss until it is cleared to earnings during the same period in which the hedged item affects earnings. The ineffective portion of all hedges is recognized in current period earnings.

In the event that a derivative designated as a hedge of a firm commitment or an anticipated transaction is terminated prior to the maturation of the hedged transaction, gains or losses realized at termination are deferred and included in the measurement of the hedged transaction. If a hedged transaction matures, or is sold, extinguished, or terminated prior to the maturity of a derivative designated as a hedge of such transaction, gains or losses associated with the derivative through the date the transaction matured are included in the measurement of the hedged transaction and the derivative is reclassified as for trading purposes. Derivatives designated as hedges of anticipated transactions are reclassified as for trading purposes if the anticipated transaction is no longer probable.

In the Predecessor period, the company reflected non-qualified hedge programs, specifically forward contracts, options and cash collateral activity, within cash flows from investing activities. In the Predecessor period, the company reflected cash flows from qualified programs within the line item it related to (i.e., revenue hedge cash flows presented within changes from accounts receivable). In the Successor period, the company included foreign currency exchange contract settlements within cash flows from operating activities, regardless of hedge accounting qualification. See Note 18 for additional discussion regarding the company's objectives and strategies for derivative instruments.

Environmental Matters

Accruals for environmental matters are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. These accruals are adjusted periodically as assessment and remediation efforts progress or as additional technical or legal information becomes available. Accruals for environmental liabilities are included in the Consolidated Balance Sheets in accrued and other current liabilities and other noncurrent obligations at undiscounted amounts. Accruals for related insurance or other third-party recoveries for environmental

liabilities are recorded when it is probable that a recovery will be realized and are included in the consolidated balance sheets as accounts and notes receivable - net.

Environmental costs are capitalized if the costs extend the life of the property, increase its capacity, and/or mitigate or prevent contamination from future operations. Environmental costs are also capitalized in recognition of legal asset retirement obligations resulting from the acquisition, construction and/or normal operation of a long-lived asset. Costs related to environmental contamination treatment and cleanup are charged to expense. Estimated future incremental operations, maintenance and management costs directly related to remediation are accrued when such costs are probable and reasonably estimable.

F-17

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Revenue Recognition

The company recognizes revenue when it is realized or realizable, and the earnings process is complete. The company's revenues are from the sale of a wide range of products to a diversified base of customers around the world. Revenue for product sales is recognized when title and risk of loss have been transferred, collectability is reasonably assured and pricing is fixed or determinable. A majority of product sales are sold FOB (free on board) shipping point or, with respect to non-United States of America (U.S.) customers, an equivalent basis. Accruals are made for sales returns and other allowances based on the company's experience. The company accounts for cash sales incentives as a reduction in sales and noncash sales incentives as a charge to cost of goods sold or selling expense, depending on the nature of the incentive. Amounts billed to customers for shipping and handling fees are included in net sales and costs incurred by the company for the delivery of goods are classified as cost of goods sold in the Consolidated Statements of Operations. Taxes on revenue-producing transactions are excluded from net sales.

The company periodically enters into prepayment contracts with the agriculture product line's customers and receives advance payments for product to be delivered in future periods. These advance payments are recorded as deferred revenue (classified as accrued and other current liabilities) or debt, depending on the nature of the program. Revenue associated with advance payments is recognized as shipments are made and title, ownership and risk of loss pass to the customer.

Licensing and royalty income is recognized in accordance with agreed upon terms, when performance obligations are satisfied, the amount is fixed or determinable and collectability is reasonably assured.

Royalty Expense

The company's agriculture product line currently has certain third party biotechnology trait license agreements, which require up-front and variable payments subject to the licensor meeting certain conditions. These payments are reflected as other current assets and other assets and are amortized to cost of goods sold as seeds containing the respective trait technology are utilized over the life of the license. The company evaluates the carrying value of the prepaid royalties when events or changes in circumstances indicate the carrying value may not be recoverable.

Cost of Goods Sold

Successor periods - Cost of goods sold primarily includes the cost of manufacture and delivery, ingredients or raw materials, direct salaries, wages and benefits and overhead, non-capitalizable costs associated with capital projects and other operational expenses. No amortization of intangibles is included within costs of goods sold.

Predecessor periods - Cost of goods sold primarily includes the cost of manufacture and delivery, ingredients or raw materials, direct salaries, wages and benefits and overhead.

Other Operating Charges

Predecessor periods - Other operating charges includes product claim charges and recoveries, non-capitalizable costs associated with capital projects and other operational expenses.

Research and Development

Research and development costs are expensed as incurred. Research and development expense includes costs (primarily consisting of employee costs, materials, contract services, research agreements, and other external spend) relating to the discovery and development of new products, enhancement of existing products and regulatory approval of new and existing products.

Selling, General and Administrative Expenses

Successor periods - Selling, general and administrative expenses primarily include selling and marketing expenses, commissions, functional costs, and business management expenses.

Predecessor periods - Selling, general and administrative expenses primarily include selling and marketing expenses, commissions, functional costs, business management expenses and integration and separation costs.

Integration and Separation Costs

Successor periods - Integration and separation costs includes costs incurred to prepare for and close the Merger, post-Merger integration expenses and costs incurred to prepare for the Intended Business Separations. These costs primarily consist of financial advisory, information technology, legal, accounting, consulting and other professional advisory fees associated with preparation and execution of these activities.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Litigation

Accruals for legal matters are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated. Legal costs, such as outside counsel fees and expenses, are charged to expense in the period incurred.

Severance Costs

Severance benefits are provided to employees under the company's ongoing benefit arrangements. Severance costs are accrued when management commits to a plan of termination and it becomes probable that employees will be entitled to benefits at amounts that can be reasonably estimated.

Insurance/Self-Insurance

The company self-insures certain risks where permitted by law or regulation, including workers' compensation, vehicle liability and employee related benefits. Liabilities associated with these risks are estimated in part by considering historical claims experience, demographic factors and other actuarial assumptions. For other risks, the company uses a combination of insurance and self-insurance, reflecting comprehensive reviews of relevant risks. A receivable for an insurance recovery is generally recognized when the loss has occurred and collection is considered probable.

Income Taxes

The company accounts for income taxes using the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying amounts and tax bases of assets and liabilities using enacted tax rates. The effect of a change in tax rates on deferred tax assets or liabilities is recognized in income in the period that includes the enactment date (see Note 7 for further information relating to the enactment of the Tax Cuts and Job Act).

The company recognizes the financial statement effects of an uncertain income tax position when it is more likely than not, based on the technical merits, that the position will be sustained upon examination. The company accrues for other tax contingencies when it is probable that a liability to a taxing authority has been incurred and the amount of the contingency can be reasonably estimated. The current portion of uncertain income tax positions is included in income taxes payable and the long-term portion is included in other noncurrent obligations in the Consolidated Balance Sheets.

Provision is made for taxes on undistributed earnings of foreign subsidiaries and related companies to the extent that such earnings are not deemed to be permanently invested. Income tax related penalties are included in the provision for income taxes in the Consolidated Statements of Operations. Interest accrued related to unrecognized tax benefits is included within the (benefit from) provision for income taxes from continuing operations in the Consolidated Statements of Operations in the Successor period. In the Predecessor period, interest accrued related to unrecognized tax benefits is included within sundry income - net in the Consolidated Statements of Operations.

Segments

Effective with the Merger, DuPont's business activities are components of its parent company's business operations. DuPont's business activities, including the assessment of performance and allocation of resources, are reviewed and managed by DowDuPont. Information used by the chief operating decision maker of DuPont relates to the company in its entirety. Accordingly, there are no separate reportable business segments for DuPont under Accounting Standards Codification ("ASC") Topic 280 "Segment Reporting" and DuPont's business results are reported in this Form 10-K as a single operating segment. Prior year's segment information has been made to conform to the current presentation.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

NOTE 2 - RECENT ACCOUNTING GUIDANCE

Recently Adopted Accounting Guidance

In March 2016, the FASB issued ASU No. 2016-09, Compensation - Stock Compensation (Topic 718), Improvements to Employee Share-Based Payment Accounting, which modifies the accounting for certain aspects of share-based payments to employees. The new guidance requires excess tax benefits and tax deficiencies to be recorded in the income statement when stock awards vest or are settled. In addition, cash flows related to excess tax benefits will no longer be separately classified as a financing activity apart from other income tax cash flows. The standard also allows the company to repurchase more of an employee's vested shares for tax withholding purposes without triggering liability accounting, and clarifies that all cash payments made to tax authorities on an employee's behalf for withheld shares should be presented as a financing activity on the statement of cash flows. The company adopted this standard as of January 1, 2017.

The primary impact of adoption was the recognition of excess tax benefits in the company's provision for income taxes rather than additional paid-in capital, which is applied prospectively in accordance with the guidance. Adoption of the new standard resulted in the recognition of \$2 million and \$30 million of excess tax benefits in the company's provision for income taxes rather than additional paid-in capital for the period September 1 through December 31, 2017 and the period January 1 through August 31, 2017, respectively.

The company elected to apply the presentation requirements for cash flows related to excess tax benefits retrospectively to all periods presented, which resulted in an increase to both net cash provided by operating activities and net cash used for financing activities of \$27 million and \$74 million for the years ended December 31, 2016 and 2015, respectively. The presentation requirements for cash flows related to employee taxes paid for withheld shares resulted in an increase to both net cash provided by operating activities and net cash used for financing activities of \$30 million and \$32 million for the years ended December 31, 2016 and 2015, respectively.

The remaining updates required by this standard did not have a material impact to the company's Consolidated Financial Statements.

In January 2017, the FASB issued ASU No. 2017-04, Intangibles - Goodwill and Other (Topic 350), Simplifying the Test for Goodwill Impairment. The new guidance eliminates the requirement to determine the fair value of individual assets and liabilities of a reporting unit to measure goodwill impairment. Under the amendments in the new ASU, goodwill impairment testing will be performed by comparing the fair value of the reporting unit with its carrying amount and recognizing an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value. The new standard is effective for annual and interim goodwill impairment tests in fiscal years beginning after December 15, 2019, and should be applied on a prospective basis. Early adoption is permitted for annual or interim goodwill impairment testing performed after January 1, 2017. In connection with the Merger Transaction, the company adopted the policy of the parent company and performed its annual goodwill impairment test in the fourth quarter. Previously, the annual impairment test was performed in the third quarter. The company early adopted the new guidance for the annual goodwill impairment test that was performed in the fourth quarter of 2017. See Note 12 for additional information.

Accounting Guidance Issued But Not Adopted as of December 31, 2017

In August 2017, the FASB issued ASU No. 2017-12, Derivatives and Hedging (Topic 815), Targeted Improvements to Accounting for Hedging Activities. The new guidance expands and refines hedge accounting for both nonfinancial and financial risk components and aligns the recognition and presentation of the effects of the hedging instrument and the hedged items in the financial statements. For cash flow and net investment hedges existing as of the date of adoption, an entity should apply a cumulative-effect adjustment related to eliminating the separate measurement of ineffectiveness to accumulated other comprehensive income with a corresponding adjustment to the opening balance

of retained earnings as of the beginning of the fiscal year in which an entity adopts. Presentation and disclosure guidance is required to be adopted prospectively. The new standard is effective for fiscal years beginning after December 15, 2018 and interim periods within those fiscal years. Early adoption is permitted in any interim period. All transition requirements and elections should be applied to hedging relationships existing (that is, hedging relationships in which the hedging instrument has not expired, been sold, terminated, or exercised or the entity has not removed the designation of the hedging relationship) on the date of adoption. The effect of adoption should be reflected as of the beginning of the fiscal year of adoption. The company is currently evaluating the impact this guidance will have on the Consolidated Financial Statements and related disclosures.

F-20

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

In March 2017, the FASB issued ASU No. 2017-07, Compensation - Retirement Benefits (Topic 715), Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. The new guidance requires registrants to present the service cost component of net periodic benefit cost in the same income statement line item or items as other employee compensation costs arising from services rendered during the period. In addition, only the service cost component will be eligible for capitalization in assets. Registrants will present the other components of net periodic benefit cost separately from the service cost component; and, the line item or items used in the income statement to present the other components of net periodic benefit cost must be disclosed. The guidance is effective for annual reporting periods beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted as of the beginning of an annual period. The new standard must be adopted retrospectively for the presentation of the service cost component and the other components of net periodic benefit cost in the income statement, and prospectively for the capitalization of the service cost component of net periodic benefit cost in assets. The company plans to adopt this guidance in the first quarter of 2018 and is currently evaluating the impact on the Consolidated Financial Statements and related disclosures. The company anticipates approximately half the costs will be reclassified from cost of goods sold, with the remainder reclassified from selling, general and administrative expenses and research and development expense, to sundry income - net in the Consolidated Statements of Operations. See Note 16 for the components of net periodic benefit cost.

In January 2017, the FASB issued ASU No. 2017-01, Business Combinations (Topic 805), Clarifying the Definition of a Business. The new guidance narrows the existing definition of a business and provides a framework for evaluating whether a transaction should be accounted for as an acquisition (or disposal) of assets or a business. The guidance requires an entity to evaluate if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or a group of similar identifiable assets; if so, the set of transferred assets and activities (collectively, the "set") is not a business. To be considered a business, the set would need to include an input and a substantive process that together significantly contribute to the ability to create outputs, as defined by the ASU. The guidance is effective for annual reporting periods beginning after December 15, 2017, including interim periods within those annual reporting periods, and should be applied prospectively. Early adoption is permitted. The company adopted this standard on January 1, 2018 and will apply it prospectively to all applicable transactions after the adoption date.

In November 2016, the FASB issued ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash (a consensus of the FASB Emerging Issues Task Force), which clarifies how entities should present restricted cash and restricted cash equivalents in the statement of cash flows, and, as a result, entities will no longer present transfers between cash and cash equivalents and restricted cash and restricted cash equivalents in the statement of cash flows. An entity with a material balance of restricted cash and restricted cash equivalents must disclose information about the nature of the restrictions. The new standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Early adoption is permitted and the new guidance must be applied retrospectively to all periods presented. The new guidance will change the presentation of restricted cash in the Consolidated Statements of Cash Flows and will be applied retrospectively in the first quarter of 2018.

In October 2016, the FASB issued ASU No. 2016-16, Income Taxes (Topic 740), Intra-Entity Transfers of Assets Other Than Inventory. The new guidance requires that entities recognize the income tax consequences of an intra-entity transfer of an asset other than inventory when the transfer occurs, rather than when the asset is sold to an outside party. The guidance is effective for annual reporting periods beginning after December 15, 2017, including interim periods within those annual reporting periods. Early adoption is permitted as of the beginning of an annual reporting period. The new guidance requires adoption on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. The company plans to adopt this guidance in the first quarter of 2018 with the expectation that this guidance will have an immaterial impact on the

Consolidated Financial Statements and related disclosures.

In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230), Classification of Certain Cash Receipts and Cash Payments. The new guidance makes eight targeted changes to how cash receipts and cash payments are presented and classified in the statement of cash flows. The guidance is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The new guidance requires adoption on a retrospective basis unless it is impracticable to apply, in which case the company would be required to apply the amendments prospectively as of the earliest date practicable. The company is currently evaluating the impact this guidance will have on the Consolidated Financial Statements and related disclosures, but does not expect there to be a significant impact.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842). The amendments under the new guidance will require lessees to recognize almost all leases on their balance sheet as a right-of-use asset and a lease liability, other than leases that meet the definition of a short-term lease. For income statement purposes, the FASB retained a dual model, requiring leases to be classified as either operating or finance. Classification will be based on criteria that are largely similar to those applied in current lease accounting. Lessor accounting is similar to the current model, but updated to align with certain changes to the lessee model and the new revenue recognition standard. The new leasing standard will be effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. Early adoption is permitted. The new standard must be adopted using a modified retrospective transition, requiring application at the beginning of the earliest comparative period presented. The company is currently evaluating the impact of adopting this guidance on the Consolidated Financial Statements and related disclosures. The company is the lessee under various agreements for facilities and equipment that are currently accounted for as operating leases. A discussion of these leases is included in Note 14, "Commitments and Contingent Liabilities."

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which was further updated in March, April, May and December 2016, as well as September and November 2017. The new guidance clarifies the principles for recognizing revenue and develops a common revenue standard for GAAP. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The new standard also will result in additional disclosure requirements to describe the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. In July 2015, the FASB approved a deferral of the ASU effective date from annual and interim periods beginning after December 15, 2016 to annual and interim periods beginning after December 15, 2017. The standard permits the use of either the retrospective or modified retrospective (cumulative-effect) transition method of adoption. The company will adopt the standard in the first quarter of 2018 under the modified retrospective transition method. The company has substantially completed its evaluation of the impact of the new standard on the Consolidated Financial Statements and has determined that the transition adjustment to be recorded upon adoption is not material and the company does not expect material changes in the timing of revenue recognition. The company continues to evaluate the impact of the new standard on its disclosures.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Note 3 - BUSINESS COMBINATIONS

Acquisition of Granular, Inc.

On August 31, 2017, the company acquired Granular, Inc., a leading provider of software and analytics tools that help farms improve efficiency, profitability, and sustainability. The purchase price was approximately \$250 million and was primarily allocated to goodwill, developed technology, and customer relationships. The fair value of the acquired assets related to Granular, Inc. are included in the fair value measurement of DuPont's assets and liabilities, discussed below.

Merger with Dow

Upon completion of the Merger, (i) each share of common stock, par value \$0.30 per share, of the company (the "DuPont Common Stock") was converted into the right to receive 1.2820 fully paid and non-assessable shares of DowDuPont common stock, par value \$0.01 per share, ("DowDuPont Common Stock"), in addition to cash in lieu of any fractional shares of DowDuPont Common Stock, and (ii) each share of DuPont Preferred Stock— \$4.50 Series and DuPont Preferred Stock— \$3.50 Series (collectively "DuPont Preferred Stock") issued and outstanding immediately prior to the Merger Effectiveness Time remains issued and outstanding and was unaffected by the Merger.

As provided in the Merger Agreement, at the Merger Effectiveness Time, all options relating to shares of DuPont Common Stock that were outstanding immediately prior to the effective time of the Merger were generally automatically converted into options relating to shares of DowDuPont Common Stock and all restricted stock units and performance based restricted stock units relating to shares of DuPont Common Stock that were outstanding immediately prior to the effective time of the Mergers were generally automatically converted into restricted stock units relating to shares of DowDuPont Common Stock, in each case, after giving effect to appropriate adjustments to reflect the Mergers and otherwise generally on the same terms and conditions as applied under the applicable plans and award agreements immediately prior to the Merger Effectiveness Time. See Note 17 for further discussion.

Prior to the Merger, shares of DuPont Common Stock were registered pursuant to Section 12(b) of the Securities Exchange Act of 1934, as amended and listed on the New York Stock Exchange (the "NYSE"). As a result of the Merger, on August 31, 2017, the company requested that the NYSE withdraw the shares of DuPont Common Stock from listing on the NYSE and filed a Form 25 with the U.S. Securities and Exchange Commission ("SEC") to report that DuPont Common Stock is no longer listed on the NYSE. DuPont continues to have preferred stock outstanding and it remains listed on the NYSE. DowDuPont Common Stock is listed and trades on the NYSE, ticker symbol DWDP.

As a condition of the regulatory approval of the Merger, DuPont was required to divest a portion of its crop protection product line, including certain research and development capabilities. See Note 4 for additional information.

DuPont and Dow intend to pursue, subject to the receipt of approval by the Board of Directors of DowDuPont, the separation of the combined company's agriculture, specialty products and materials science businesses through a series of tax-efficient transactions (collectively, the "Intended Business Separations").

Preliminary Allocation of Purchase Price

Based on an evaluation of the provisions of ASC 805, "Business Combinations," ("ASC 805") Dow was determined to be the accounting acquirer in the Merger. DowDuPont has applied the acquisition method of accounting with respect to the assets and liabilities of DuPont, which have been measured at fair value as of the date of the Merger. In connection with the Merger and the related accounting determination, DuPont has elected to apply push-down accounting and reflect in its financial statements the fair value of assets and liabilities. Such fair values have been

reflected in the Successor Consolidated Financial Statements.

DuPont's assets and liabilities were measured at estimated fair values as of the Merger Effectiveness Time, primarily using Level 3 inputs. Estimates of fair value represent management's best estimate which require a complex series of judgments about future events and uncertainties. Third-party valuation specialists were engaged to assist in the valuation of these assets and liabilities.

The total fair value of consideration transferred for the Merger was \$74,680 million. Total consideration is comprised of the equity value of the DowDuPont shares as of the Merger Effectiveness Time that were issued in exchange for DuPont shares, the cash value for fractional shares, and the portion of DuPont's share awards and share options earned as of the Merger Effectiveness Time. Share awards and share options converted to DowDuPont equity instruments, but not vested, were \$144 million as of August 31, 2017, which will be expensed over the remaining future vesting period.

F-23

E. I. du Pont de Nemours and Company

Notes to the Consolidated Financial Statements (continued)

The following table summarizes the fair value of consideration exchanged as a result of the Merger:

(In millions, except exchange ratio)

DuPont Common Stock outstanding as of the Merger Effectiveness Time	868.3
DuPont exchange ratio	1.2820
DowDuPont Common Stock issued in exchange for DuPont Common Stock	1,113.2
Fair value of DowDuPont Common Stock issued ¹	\$74,195
Fair value of DowDuPont equity awards issued in exchange for outstanding DuPont equity awards ²	485
Total consideration	\$74,680

1. Amount was determined based on the price per share of Dow Common Stock of \$66.65 on August 31, 2017.

Represents the fair value of replacement awards issued for DuPont's equity awards outstanding immediately before 2. the Merger and attributable to the service periods prior to the Merger. The previous DuPont equity awards were converted into the right to receive 1.2820 shares of DowDuPont Common Stock.

The acquisition method of accounting requires, among other things, that identifiable assets acquired and liabilities assumed be recognized on the balance sheet at the fair values as of the acquisition date. In determining the fair value, DowDuPont utilized various forms of the income, cost and market approaches depending on the asset or liability being fair valued. The estimation of fair value required significant judgments related to future net cash flows (including net sales, cost of products sold, selling and marketing costs, and working capital/contributory asset charges), discount rates reflecting the risk inherent in each cash flow stream, competitive trends, market comparables and other factors. Inputs were generally determined by taking into account historical data, supplemented by current and anticipated market conditions, and growth rates.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The table below presents the preliminary fair value that was allocated to DuPont's assets and liabilities based upon fair values as determined by DowDuPont. The valuation process to determine the fair values is not yet complete. DuPont estimated the preliminary fair value of acquired assets and liabilities as of the date of acquisition based on information currently available and continues to adjust those estimates upon refinement of market participant assumptions for integrating businesses, finalization of tax returns in the pre-merger period and application of push-down accounting at the subsidiary level. The preliminary fair values are substantially complete with the exception of identifiable intangible assets, property, plant, and equipment, income taxes and goodwill. As DuPont finalizes the fair value of assets acquired and liabilities assumed, additional purchase price adjustments may be recorded during the measurement period, but no later than one year from the date of the acquisition. DuPont will reflect measurement period adjustments, if any, in the period in which the adjustments are recognized. Final determination of the fair values may result in further adjustments to the values presented in the following table.

(In millions)	Estimated fair value as previously reported ¹	Measurement period adjustments ²	Estimated fair value adjusted
Fair Value of Assets as of the Merger Effectiveness Time			
Cash and cash equivalents	\$ 4,005	\$ —	\$ 4,005
Marketable securities	2,849	—	2,849
Accounts and notes receivable	7,851	—	7,851

Pension and other post employment benefits - noncurrent	8,092	(36)	8,056
Other noncurrent obligations	2,028	—	2,028
Total Liabilities	\$ 41,769	\$ (965)	\$ 40,804
Noncontrolling interests	162	16	178
Preferred stock	239	—	239
Fair Value of Net Assets (Consideration for the Merger)	\$ 74,680	\$ —	\$ 74,680

1. As previously reported in the company's Quarterly Report on Form 10-Q for the period ended September 30, 2017.

2.

DuPont recorded measurement period adjustments in the fourth quarter of 2017 to reflect facts and circumstances in existence as of the Merger Effectiveness Time. These measurement period adjustments primarily related to changes in preliminary valuation assumptions, including market participant estimates of cash flows and estimates of asset useful lives, as well as other initial estimates. All measurement period adjustments were offset against goodwill.

3. See Note 12 for additional information.

F-25

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The significant fair value adjustments included in the preliminary allocation of purchase price are discussed below.

Inventories

Inventory is primarily comprised of finished products of \$4,929 million, semi-finished products of \$3,055 million and raw materials and stores and supplies of \$823 million. The fair value of finished goods was calculated as the estimated selling price, adjusted for costs of the selling effort and a reasonable profit allowance relating to the selling effort. The fair value of semi-finished inventory was primarily calculated as the estimated selling price, adjusted for estimated costs to complete the manufacturing, estimated costs of the selling effort, as well as a reasonable profit margin on the remaining manufacturing and selling effort. The fair value of raw materials and stores and supplies was determined to approximate the historical carrying value. For inventory accounted for under the FIFO method and average cost method, the preliminary fair value step-up of inventory will be recognized in costs of goods sold as the inventory is sold. For inventory accounted for under the LIFO method, the preliminary fair value of inventory becomes the LIFO base layer inventory. The pre-tax amount of inventory step-up recognized for the period September 1 through December 31, 2017, was \$1,538 million, of which \$1,434 million was reflected in costs of goods sold within loss from continuing operations before income taxes and \$104 million is reflected in loss from discontinued operations after income taxes in the Consolidated Statements of Operations.

Property, Plant & Equipment

Property, plant and equipment is comprised of machinery and equipment of \$7,466 million, buildings of \$2,583 million, construction in progress of \$980 million and land and land improvements of \$912 million. The preliminary estimated fair value of property and equipment was primarily determined using a market approach for land and certain types of equipment, and a replacement cost approach for other property and equipment. The market approach for certain types of equipment represents a sales comparison that measures the value of an asset through an analysis of sales and offerings of comparable assets. The replacement cost approach used for all other depreciable property and equipment measures the value of an asset by estimating the cost to acquire or construct comparable assets and adjusts for age and condition of the asset.

Goodwill

The excess of the consideration for the Merger over the preliminary net fair value of assets and liabilities was recorded as goodwill. The Merger resulted in the recognition of \$45,105 million of goodwill, none of which is deductible. Goodwill largely consists of expected cost synergies resulting from the Merger and the Intended Business Separations, the assembled workforce of DuPont, and future technology and customers.

Other Intangible Assets

Other intangible assets primarily consist of acquired customer related assets, developed technology, trademarks and tradenames, and germplasm. The preliminary customer-related value was determined using the excess earnings method while the preliminary developed technology, trademarks and trade names, and germplasm values were primarily determined utilizing the relief from royalty method. Both the excess earnings and relief from royalty methods are forms of the income approach. Refer to Note 12 for further information on other intangible assets.

Deferred Income Tax Assets and Liabilities

The deferred income tax assets and liabilities include the expected future federal, state, and foreign tax consequences associated with temporary differences between the preliminary fair values of the assets acquired and liabilities assumed and the respective tax bases. Tax rates utilized in calculating deferred income taxes generally represent the enacted statutory tax rates at the Merger Effectiveness Time in the jurisdictions in which legal title of the underlying asset or liability resides. Refer to Note 7 for further information related to the remeasurement of deferred income tax

assets and liabilities as a result of the enactment of the U.S. Tax Cuts and Jobs Act in December 2017.

The preliminary fair value of deferred income tax assets includes a \$172 million adjustment to derecognize a valuation allowance for certain historical net operating losses that will not be fully realized as a result of the Merger. Included in the fair value adjustment related to deferred income tax liabilities is a \$546 million adjustment reflecting a change in determination as to the reinvestment strategy of certain foreign operations of the company.

F-26

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Integration and Separation Costs

Integration and separation costs have been and are expected to be significant. These costs to date primarily have consisted of financial advisory, information technology, legal, accounting, consulting, and other professional advisory fees associated with the preparation and execution of activities related to the Merger and the Intended Business Separations. These costs are recorded within integration and separation costs in the Successor period and the costs are recorded within selling, general and administrative expenses in the Predecessor periods within the Consolidated Statements of Operations.

(In millions)	Successor	Predecessor	
	For the Period September 1 through December 31, 2017	For the Period For the Year Ended December 31, 2017	For the Year Ended December 31, 2015
Integration and separation costs	\$ 314		
Selling, general and administrative expenses		\$581	\$ 386
			\$ 10

H&N Business

On November 1, 2017, the company completed the FMC Transactions through the acquisition of the H&N Business and the disposition of the Divested Ag Business. The acquisition will be integrated into the nutrition and health product line to enhance DuPont's position as a leading provider of sustainable, bio-based food ingredients and allow for expanded capabilities in the pharma excipients space. The company accounted for the acquisition in accordance with ASC 805, which requires the assets acquired and liabilities assumed to be recognized on the balance sheet at their fair values as of the acquisition date.

The following table summarizes the fair value of consideration exchanged as a result of the FMC Transactions:
(In millions)

Fair Value of Divested Ag Business ¹	\$3,665
Less: Cash received ²	1,200
Less: Favorable contracts ³	495
Fair Value of H&N Business	\$1,970

1. Refer to Note 4 for additional information.

2. The FMC Transactions include a cash consideration payment to DuPont of approximately \$1,200 million, which reflects the difference in value between the Divested Ag Business and the H&N Business, subject to certain customary inventory and net working capital adjustments.

3. Upon closing and pursuant to the terms of the FMC Transaction Agreement, DuPont entered into favorable supply contracts with FMC. DuPont recorded these contracts as intangible assets recognized at the fair value of off-market contracts. Refer to Notes 4 and 12 for additional information.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The table below presents the preliminary fair value that was allocated to the assets acquired and liabilities assumed. The purchase accounting and purchase price allocation for the H&N Business are substantially complete. However, the company continues to refine the preliminary valuation of certain acquired assets, such as inventories, intangibles, deferred income taxes, and property plant and equipment, which could impact the amount of residual goodwill recorded. The company will finalize the amounts recognized as it obtains the information necessary to complete the analysis, but no later than one year from the date of the acquisition. Final determination of the fair values may result in further adjustments to the values presented in the following table.

(In millions)	Successor November 1, 2017
Fair Value of Assets	
Cash and cash equivalents	\$ 16
Accounts and notes receivable	144
Inventories	314
Property, plant and equipment	505
Goodwill	718
Other intangible assets	435
Other current and non-current assets	16
Total Assets	\$ 2,148
Fair Value of Liabilities	
Accounts payable and other accrued liabilities	\$ 70
Deferred income tax liabilities	108
Total Liabilities	\$ 178
Fair Value of Net Assets (Consideration for the H&N Business)	\$ 1,970

The significant fair value adjustments included in the preliminary allocation of purchase price are discussed below.

Inventories

Acquired inventory is comprised of finished goods of \$153 million, semi-finished products of \$85 million and raw materials and stores and supplies of \$76 million. Fair value of inventory was calculated using a net realizable value approach for finished goods and semi-finished products and a replacement cost approach for raw materials and stores and supplies. The preliminary fair value step-up of inventory of \$100 million will be recognized in costs of goods sold as the inventory is sold. The pre-tax amount recognized during the period ending November 1 through December 31, 2017, was \$35 million, which was reflected in cost of goods sold within loss from continuing operations before income taxes in the Consolidated Statements of Operations.

Property, Plant & Equipment

Property, plant and equipment is comprised of machinery and equipment of \$372 million, buildings of \$63 million, land and land improvements of \$39 million, and construction in progress of \$31 million. The preliminary estimated fair values were determined using a combination of a market approach and replacement cost approach.

Goodwill

The excess of the consideration for the H&N Business over the preliminary net fair value of assets acquired and liabilities assumed resulted in the recognition of \$718 million of goodwill, of which \$208 million is tax-deductible. Goodwill is attributable to the H&N Business's workforce and expected cost synergies in procurement, production and market access.

Other Intangible Assets

Other intangible assets includes customer-related intangible assets of \$268 million, developed technology of \$130 million, and trademarks and tradenames of \$37 million. The preliminary customer-related fair value was determined using the excess earnings method while the preliminary developed technology, trademarks and tradenames fair values were primarily determined utilizing the relief from royalty method.

F-28

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Results of Operations

The following table provides net sales and (loss) income from continuing operations before income taxes of the H&N Business included in the company's results since the acquisition.

	Successor
	For the Period November 1 through December 31, 2017
(In millions)	
Net sales	\$ 102
Loss from continuing operations before income taxes	\$ (12)

The H&N Business results include \$35 million that was recognized in cost of goods sold as inventory was sold related to the fair value step-up of inventories in the Consolidated Statements of Operations, for the period of November 1 through December 31, 2017.

The company evaluated the disclosure requirements under ASC 805 and determined the H&N Business was not considered a material business combination for purposes of disclosing supplemental pro forma information.

NOTE 4 - DIVESTITURES AND OTHER TRANSACTIONS

Merger Remedy - Divested Ag Business

On March 31, 2017, the company and FMC entered into the FMC Transaction Agreement. Under the FMC Transaction Agreement, FMC acquired the Divested Ag Business that DuPont was required to divest in order to obtain EC approval of the Merger Transaction as described in Note 1 and DuPont agreed to acquire the H&N Business. The sale of the Divested Ag Business meets the criteria for discontinued operations and as such, earnings are included within "(Loss) Income from discontinued operations after income taxes" for all periods presented.

On November 1, 2017, the company completed the FMC Transactions through the disposition of the Divested Ag Business and the acquisition of the H&N Business. The preliminary fair value as determined by the company of the H&N Business is \$1,970 million. The FMC Transactions include a cash consideration payment to DuPont of approximately \$1,200 million, which reflects the difference in value between the Divested Ag Business and the H&N Business, as well as favorable contracts with FMC of \$495 million, subject to adjustments for inventory of the Divested Ag Business and net working capital of the H&N Business. Due to the proximity of the Merger and the closing of the sale, the carrying value of the Divested Ag Business approximated the fair value of the consideration received, thus no resulting gain or loss was recognized on the sale. Refer to Note 3 for further information on the H&N Business.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The results of operations of the Divested Ag Business are presented as discontinued operations as summarized below:

(In millions)	Successor	Predecessor		
	For the Period September 1 through December 31, 2017 ¹	For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Net sales	\$ 199	\$1,068	\$ 1,385	\$ 1,473
Cost of goods sold	194	412	514	521
Other operating charges		17	19	25
Research and development expenses	30	95	139	163
Selling, general and administrative expenses ²	102	146	176	187

Deferred income tax liabilities	6
Other noncurrent obligations	29
Liabilities held for sale	\$ 74

F-30

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Upon closing and pursuant to the terms of the FMC Transaction Agreement, DuPont and FMC entered into favorable supply agreements and certain ancillary agreements, including manufacturing service agreements and transition service agreements. Under the terms of the favorable supply agreements, FMC will supply product to DuPont at cost for a period of up to five years and, as a result, DuPont recorded an intangible asset of \$495 million upon closing that will amortize over a period of five years.

Food Safety Diagnostic Sale

In February 2017, the company completed the sale of global food safety diagnostics to Hygiena LLC. The sale resulted in a pre-tax gain of \$162 million (\$86 million net of tax). The gain was recorded in sundry income - net in the company's Consolidated Statement of Operations for the period January 1 through August 31, 2017.

DuPont (Shenzhen) Manufacturing Limited

In March 2016, the company recognized the sale of its 100 percent ownership interest in DuPont (Shenzhen) Manufacturing Limited to the Feixiang Group. The sale of the entity, which held certain buildings and other assets, resulted in a pre-tax gain of \$369 million (\$214 million net of tax). The gain was recorded in sundry income - net in the company's Consolidated Statement of Operations for the year ended December 31, 2016.

Performance Chemicals

On July 1, 2015, DuPont completed the separation of its Performance Chemicals segment through the spin-off of all of the issued and outstanding stock of The Chemours Company (the "Separation"). In connection with the Separation, the company and The Chemours Company ("Chemours") entered into a Separation Agreement (the "Separation Agreement"), discussed below, and a Tax Matters Agreement and certain ancillary agreements, including an employee matters agreement, agreements related to transition and site services, and intellectual property cross licensing arrangements. In addition, the companies have entered into certain supply agreements.

Separation Agreement

The company and Chemours entered into a Separation Agreement that sets forth, among other things, the agreements between the company and Chemours regarding the principal transactions necessary to effect the Separation and also sets forth ancillary agreements that govern certain aspects of the company's relationship with Chemours after the separation. Among other matters, the Separation Agreement and the ancillary agreements provide for the allocation between DuPont and Chemours of assets, employees, liabilities and obligations (including investments, property and employee benefits and tax-related assets and liabilities) attributable to periods prior to, at and after the completion of the Separation.

Pursuant to the Separation Agreement and the Amendment to the Separation Agreement, as discussed below, Chemours indemnifies DuPont against certain litigation, environmental, workers' compensation and other liabilities that arose prior to the distribution. The term of this indemnification is generally indefinite and includes defense costs and expenses, as well as monetary and non-monetary settlements and judgments. In 2017, DuPont and Chemours amended the Separation Agreement to provide for a limited sharing of potential future PFOA liabilities for a period of five years beginning July 6, 2017. In connection with the recognition of liabilities related to these matters, the company records an indemnification asset when recovery is deemed probable. At December 31, 2017, the indemnified assets are \$80 million within accounts and notes receivable - net and \$340 million within other assets along with the corresponding liabilities of \$80 million within accrued and other current liabilities and \$340 million within other noncurrent obligations on the Condensed Consolidated Balance Sheet. See Note 14 for further discussion of the amendment to the Separation Agreement and certain litigation and environmental matters indemnified by Chemours.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The results of operations of the Performance Chemicals segment are presented as discontinued operations as summarized below:

(In millions)	Predecessor		
	For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Net sales	\$—	\$ —	\$ 2,810
Cost of goods sold	—	—	2,215
Other operating charges	335	36	386
Research and development expense	—	—	40
Selling, general and administrative expenses	—	—	(87)
Restructuring and asset related charges - net	—	—	59
Sundry income - net	3	3	27
Interest expense	—	—	32
(Loss) income from discontinued operations before income taxes	(332)	(33)	192
(Benefit from) provision for income taxes	(125)	(28)	106
(Loss) income from discontinued operations after income taxes	\$(207)\$	\$(5)	\$ 86

Income (loss) from discontinued operations after income taxes for the period January 1 through August 31, 2017 includes a charge of \$335 million (\$214 million net of tax) in connection with the perfluorooctanoic acid (“PFOA”) multi-district litigation settlement.

During the years ended December 31, 2016 and 2015, the company incurred \$35 million and \$306 million of costs, respectively, in connection with the separation primarily related to professional fees associated with preparation of regulatory filings and separation activities within finance, tax, legal, and information system functions. (Loss) income from discontinued operations during the years ended December 31, 2016 and 2015, includes \$35 million and \$260 million of these costs, respectively. Income from continuing operations during the year ended December 31, 2015 includes \$26 million of these costs, recorded in other operating charges in the company's Consolidated Statements of Operations. Income from continuing operations during the year ended December 31, 2015 also included \$20 million of transaction costs incurred for a premium associated with the early retirement of DuPont debt. The company exchanged notes received from Chemours in May 2015 (as part of a dividend payment) for DuPont debt that it then retired. These costs were reported in interest expense in the company's Consolidated Statements of Operations.

In connection with the separation, income from discontinued operations during the year ended December 31, 2015 included pension and other post employment benefit plan curtailment gain of \$281 million. In addition, income from discontinued operations during the year ended December 31, 2015, included a restructuring charge of \$59 million, consisting of severance and related benefit costs associated with the Performance Chemicals segment to achieve fixed cost and operational productivity improvements for Chemours post-spin.

In connection with the spin-off, the company received a dividend from Chemours in May 2015 of \$3,923 million comprised of a cash distribution of \$3,416 million and a distribution in-kind of \$507 million of 7 percent senior unsecured notes due 2025 (Chemours Notes Received). Chemours financed the dividend payment through issuance of

approximately \$4,000 million of debt, including the Chemours Notes Received (Chemours' Debt). Net assets of \$431 million were transferred to Chemours on July 1, 2015, including the \$4,000 million of Chemours' Debt.

The following table presents the depreciation, amortization and purchases of property, plant and equipment of the discontinued operations related to Performance Chemicals:

(In millions)	Predecessor
For the year ended December 31, 2015	
Depreciation	\$ 126
Amortization of intangible assets	2
Capital Expenditures	235

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

NOTE 5 - RESTRUCTURING AND ASSET RELATED CHARGES - NET

DowDuPont Cost Synergy Program

In September and November 2017, DowDuPont and the company approved post-merger restructuring actions under the DowDuPont Cost Synergy Program (the "Synergy Program"), adopted by the DowDuPont Board of Directors. The plan is designed to integrate and optimize the organization following the Merger and in preparation for the Intended Business Separations. Based on all actions approved to date under the Synergy Program, DuPont expects to record total pre-tax restructuring charges of \$430 million to \$600 million, comprised of approximately \$320 million to \$360 million of severance and related benefits costs; \$110 million to \$140 million of costs related to contract terminations; and up to \$100 million of asset related charges. The Synergy Program includes certain asset actions, including strategic decisions regarding the cellulosic biofuel unit reflected in the preliminary fair value measurement of DuPont's assets as of the merger date. Current estimated total pre-tax restructuring charges could be impacted by future adjustments to the preliminary fair value of DuPont's assets.

For the period September 1 through December 31, 2017, DuPont recorded a pre-tax charge of \$187 million, consisting of severance and related benefit costs of \$153 million, contract termination costs of \$31 million and asset-related charges of \$3 million. The charge for the period September 1 through December 31, 2017 was recognized in restructuring and asset related charges - net in the company's Consolidated Statements of Operations. Substantially all of the remaining restructuring charges are expected to be incurred in 2018 and the related actions, including employee separations, associated with this plan are expected to be substantially complete by the end of 2019.

DuPont account balances and activity for the DowDuPont Cost Synergy Program are summarized below:

(In millions)	Severance and Related Benefit Costs	Other Non-Personnel Charges ¹	Asset-Related Charges	Total
Charges to income from continuing operations for the period September 1 through December 31, 2017 (Successor)	\$ 153	\$ 31	\$ 3	\$ 187
Payments	(13)	(3)	—	(16)

2017 Restructuring Program

During the first quarter 2017, DuPont committed to take actions to improve plant productivity and better position its product lines for productivity and growth before and after the anticipated closing of the Merger Transaction (the "2017 restructuring program"). In connection with these actions, the company incurred pre-tax charges of \$313 million during the period from January 1 through August 31, 2017 ("Predecessor" period) recognized in restructuring and asset related charges - net in the company's Consolidated Statements of Operations. The charge is comprised of \$279 million of asset-related charges and \$34 million in severance and related benefit costs. The charges primarily relate to the second quarter closure of the safety and construction product line at the Cooper River manufacturing site located near Charleston, South Carolina. The asset-related charges mainly consist of accelerated depreciation associated with the closure. The actions associated with this plan are substantially complete as of December 31, 2017.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Account balances and activity for the 2017 restructuring program are summarized below:

(In millions)	Severance and Related Benefit Costs	Asset Related Charges ¹	Total
Charges to income from continuing operations for the period January 1 through August 31, 2017 (Predecessor)	\$ 34	\$ 279	\$313
Payments	(8)	—	(8)
Asset write-offs	—	(279)	\$(279)
Balance as of August 31, 2017	\$ 26	\$ —	\$26
Charges to income from continuing operations for the period September 1 through December 31, 2017 (Successor)	\$ —	\$ —	\$—
Payments	(7)	—	(7)
Balance as of December 31, 2017	\$ 19	\$ —	\$19

¹ Includes accelerated depreciation related to site closure. Charge for accelerated depreciation represents the difference between the depreciation expense to be recognized over the revised useful life of the site, based upon the anticipated date the site will be closed and depreciation expense as determined utilizing the useful life prior to the restructuring action.

La Porte Plant, La Porte, Texas

In March 2016, DuPont announced its decision to not re-start its insecticide manufacturing facility at the La Porte site located in La Porte, Texas. The facility manufactured Lannate[®] and Vydate[®] insecticides and has been shut down since November 2014. As a result of this decision, during the year ended December 31, 2016, a pre-tax charge of \$68 million was recorded in restructuring and asset related charges - net in the company's Consolidated Statement of Operations which included \$41 million of asset related charges, \$16 million of employee severance and related benefit costs, and \$11 million of contract termination costs.

2016 Global Cost Savings and Restructuring Plan

In December 2015, DuPont committed to take structural actions across all product lines and staff functions globally to operate more efficiently by further consolidating product lines and aligning staff functions more closely with them as part of a 2016 global cost savings and restructuring plan. As a result, during the year ended December 31, 2015, a pre-tax charge of \$783 million was recorded, consisting of \$778 million of restructuring and asset related charges - net and \$5 million in sundry income - net in the company's Consolidated Statement of Operations. The charges consisted of \$641 million in severance and related benefit costs, \$109 million in asset related charges, and \$33 million in contract termination charges.

During the year ended December 31, 2016, in connection with the restructuring actions, the company recorded a net pre-tax benefit to earnings of \$(81) million, consisting of \$(84) million in restructuring and asset related charges - net and \$3 million in sundry income - net in the company's Consolidated Statement of Operations. The net benefit was comprised of a reduction of \$(150) million in severance and related benefit costs, offset by \$53 million of asset related charges, and \$16 million of contract termination costs. This was primarily due to a reduction in severance and related benefit costs partially offset by the identification of additional projects. The reduction in severance and related benefit costs was driven by elimination of positions at a lower cost than expected as a result of redeployments and attrition as

well as lower than estimated individual severance costs.

The company incurred pre-tax charges of \$10 million during the period January 1 through August 31, 2017, recognized in restructuring and asset related charges - net in the company's Consolidated Statement of Operations. This was due to additional severance payments owed to previously terminated executives that became probable during the period. The company incurred a pre-tax benefit of \$(5) million for the period from September 1 through December 31, 2017. The reduction in severance and related benefit costs was driven by the elimination of positions at a lower cost than expected.

Balance as of December 31, 2017	\$ 13	\$ 9	\$ 22

1. Other non-personnel charges consist of contractual obligation costs.

2014 Restructuring Program

In June 2014, DuPont announced its global, multi-year initiative to redesign its global organization and operating model to reduce costs and improve productivity and agility across all product lines and functions. During the period from September 1 through December 31, 2017, and the years ended December 31, 2016 and 2015, benefits of \$(2) million, \$(21) million and \$(21) million were recorded, respectively, in restructuring and asset related charges - net in the company's Consolidated Statements of Operations to reduce the accrual for severance costs associated with this program.

Asset Impairment

In the fourth quarter 2015, the company elected to defer further testing and deployment of a multi-year, phased implementation of an enterprise resource planning (ERP) system; which had not been placed in service as of year-end. At December 31, 2016, the company had capitalized costs associated with the ERP system of \$435 million. In connection with IT strategy reviews conducted during the fourth quarter of 2016, the company reviewed considerations around the timing of restarting testing and deployment of the ERP system. As a result, the company concluded it intended to complete and place in service the ERP system, however, given the uncertainties related to implementation timing as well as potential developments and changes to technologies in the market place at the time of restart, use of this ERP system could no longer be considered probable. As a result, due to the specificity of the design related to the ERP system, the company determined that the uncompleted ERP system had a fair value of zero and recorded a pre-tax charge of \$435 million in restructuring and asset related charges - net in the company's Consolidated Statement of Operations during the year ended December 31, 2016.

The company recognized a \$158 million pre-tax impairment charge in restructuring and asset related charges - net in the company's Consolidated Statement of Operations during the year ended December 31, 2016 related to indefinite-lived intangible trade names. In connection with the company's strategy reviews and brand realignment conducted during the third quarter 2016, the company decided to phase out the use of certain acquired trade names resulting in a change from an indefinite life to a finite useful life for these assets. As a result of these changes, the carrying value of the trade name assets exceeded the fair value.

The basis of the fair value for the charges was calculated utilizing an income approach (relief from royalty method) using Level 3 inputs within the fair value hierarchy, as described in Note 1. The key assumptions used in the calculation included projected revenue, royalty rates and discount rates. These key assumptions involve management judgment and estimates relating to future operating performance and economic conditions that may differ from actual cash flows. After the recognition of the impairment charge, the remaining net book value of the trade names was \$28 million, which represented fair value.

During the first quarter 2015, a \$38 million pre-tax impairment charge was recorded in restructuring and asset related charges - net in the company's Consolidated Statement of Operations. The majority relates to a cost basis investment in which the assessment resulted from the venture's revised operating plan reflecting underperformance of its European wheat based ethanol facility and deteriorating European ethanol market conditions. One of the primary investors communicated that they would not fund the revised operating plan of the investee. As a result, the carrying value of DuPont's 6 percent cost basis investment in this venture exceeds its fair value by \$37 million, such that an impairment charge was recorded.

Sundry income - net	\$ 90	\$166	\$ 707	\$ 690

1. In the Successor period, royalty income of \$60 million is included in Net Sales.

2. Includes a pre-tax gain of \$162 million (\$86 million net of tax) for the period January 1 through August 31, 2017 related to the sale of global food safety diagnostics. See Note 4 for additional information.

3. Includes a pre-tax gain of \$369 million (\$214 million net of tax) for the year ended December 31, 2016 related to the sale of DuPont (Shenzhen) Manufacturing Limited. See Note 4 for additional information.

4. Miscellaneous income and expenses - net, includes interest items (in the Predecessor period only), gains (losses) on available for sale securities, gains related to litigation settlements, licensing income, gains on purchases, and other items.

The following table summarizes the impacts of the company's foreign currency hedging program on the company's results of operations. The company routinely uses foreign currency exchange contracts to offset its net exposures, by currency, related to the foreign currency-denominated monetary assets and liabilities. The objective of this program is to maintain an approximately balanced position in foreign currencies in order to minimize, on an after-tax basis, the effects of exchange rate changes on net monetary asset positions. The hedging program gains (losses) are largely taxable (tax deductible) in the United States (U.S.), whereas the offsetting exchange gains (losses) on the remeasurement of the net monetary asset positions are often not taxable (tax deductible) in their local jurisdictions. The net pre-tax exchange gains (losses) are recorded in sundry income - net and the related tax impact is recorded in provision for income taxes on continuing operations in the Consolidated Statements of Operations.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Accrued and other current liabilities

Accrued and other current liabilities were \$4,384 million at December 31, 2017 and \$4,650 million at December 31, 2016. Deferred revenue and compensation and other employee-related costs, which are components of accrued and other current liabilities, were \$2,014 million and \$857 million at December 31, 2017, respectively and \$2,217 million and \$807 million at December 31, 2016, respectively. No other components of accrued and other current liabilities were more than 5 percent of total current liabilities.

Other noncurrent obligations

Other noncurrent obligations were \$1,975 million at December 31, 2017 and \$12,304 million at December 31, 2016. Accrued pension benefit costs and accrued other post employment benefit costs, which are components of other noncurrent obligations in the Predecessor period, were \$8,092 million and \$2,554 million at December 31, 2016, respectively. In the Successor period, accrued pension benefit costs and accrued other post employment benefit costs are included in the line item, pension and other post employment benefits - noncurrent in the Consolidated Balance Sheets. See Note 1 for discussion of reclassification adjustments. No other components of other noncurrent obligations were more than 5 percent of total liabilities.

Related Parties

Transactions with DowDuPont

DowDuPont relies on distributions and other intercompany transfers from DuPont and Dow to fund payment of its costs and expenses. In November 2017, DowDuPont's Board of Directors declared a fourth quarter dividend per share of DowDuPont common stock payable on December 15, 2017 and authorized an initial \$4,000 million share repurchase program to buy back shares of DowDuPont common stock. In the fourth quarter of 2017, DuPont declared and paid distributions in cash and in-kind to DowDuPont of \$829 million, primarily to fund a portion of DowDuPont's fourth quarter share repurchases and dividend payment.

In addition, at December 31, 2017, DuPont had a payable to DowDuPont of \$354 million, included in accounts payable in the Consolidated Balance Sheets related to its estimated 2017 tax liability. See Note 7 for additional information.

NOTE 7 - INCOME TAXES

On December 22, 2017, the Tax Cuts and Jobs Act ("The Act") was enacted. The Act reduces the U.S. federal corporate income tax rate from 35 percent to 21 percent, requires companies to pay a one-time transition tax ("transition tax") on earnings of foreign subsidiaries that were previously tax deferred, creates new provisions related to foreign sourced earnings, eliminates the domestic manufacturing deduction and moves to a territorial system. At December 31, 2017, the company had not completed its accounting for the tax effects of The Act; however, as described below, the company has made a reasonable estimate of the effects on its existing deferred tax balances and the one-time transition tax. In accordance with Staff Accounting Bulletin 118 ("SAB 118"), during the measurement period, income tax effects of the Act may be refined upon obtaining, preparing, or analyzing additional information, and such changes could be material. During the measurement period, provisional amounts may be also be adjusted for the effects, if any, of interpretative guidance issued after December 31, 2017, by U.S. regulatory and standard-setting bodies.

As a result of The Act, the company remeasured its U.S. federal deferred income tax assets and liabilities based on the rates at which they are expected to reverse in the future, which is generally 21 percent. However, the company is still analyzing certain aspects of The Act and refining its calculations, which could potentially affect the measurement of these balances or potentially give rise to new deferred tax amounts. The provisional amount recorded related to the

remeasurement of the company's deferred income tax balance was \$(2,716) million and was recorded as a benefit to the provision for income taxes on continuing operations.

The Act requires a mandatory deemed repatriation of post-1986 undistributed foreign earnings and profits ("E&P"), which results in a one-time transition tax. As a result, the company has recorded a provisional amount for the transition tax liability for its foreign subsidiaries of \$715 million, recorded as a charge to the provision for income taxes on continuing operations. The company has not yet completed its calculation of the total post-1986 foreign E&P for its foreign subsidiaries as E&P will not be finalized until the Federal income tax return is filed. Further, the transition tax is based in part on the amount of those earnings held in cash and other specified assets which is a defined term under The Act.

F-37

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

For tax years beginning after December 31, 2017, The Act introduces new provisions for U.S. taxation of certain global intangible low-taxed income (“GILTI”). Due to its complexity and a current lack of guidance as to how to calculate the tax, the company is not yet able to determine a reasonable estimate for the impact of the incremental tax liability. When additional guidance is available, the company will make a policy election on whether the additional liability will be recorded in the period in which it is incurred or recognized for the basis differences that would be expected to reverse in future years.

Geographic Allocation of Income and Provision for Income Taxes	Successor For the Period September 1 through December 31, 2017	Predecessor For the Period January Year Year		
		1 through August 31, 2017	Ended 2016	Ended 2015

(Loss) Income from continuing operations before income taxes				
Domestic	\$ (811)	\$409	\$1,415	\$1,301
Foreign	(775)	1,382	1,308	721
(Loss) Income from continuing operations before income taxes	\$ (1,586)	\$1,791	\$2,723	\$2,022
Current tax expense (benefit)				
Federal	\$ 216	\$(563)	\$4	\$155
State and local	22	(11)	9	2
Foreign	187	282	539	420
Total current tax expense (benefit)	\$ 425	\$(292)	\$552	\$577
Deferred tax (benefit) expense				
Federal	\$ (2,790)	\$476	\$22	\$135
State and local	(48)	(8)	(29)	4
Foreign	(260)	(27)	96	(141)
Total deferred tax (benefit) expense	\$ (3,098)	\$441	\$89	\$(2)
(Benefit from) Provision for income taxes on continuing operations	(2,673)	149	641	575
Net Income from continuing operations	\$ 1,087	\$1,642	\$2,082	\$1,447

International pre-tax (loss) earnings from continuing operations was \$(775) million, \$1,382 million, \$1,308 million, and \$721 million for the period September 1 through December 31, 2017, the period January 1 through August 31, 2017, and the years ended December 31, 2016 and 2015, respectively. In connection with the Merger, pre-tax earnings from continuing operations for the period September 1 through December 31, 2017 includes depreciation and amortization associated with the fair value that was allocated to the company’s tangible and intangible assets as well as costs of \$1,469 million recognized in cost of goods sold related to the fair value step-up of inventories (See Note 3 and 10 for further information).

The U.S. pre-tax earnings from continuing operations for the period January 1 through August 31, 2017 includes transaction costs associated with the Merger and restructuring and asset related charges (which are mostly incurred in the US). These decreases were partially offset by the gain on the sale of the company's food safety diagnostics business in the first quarter 2017.

The increase in pre-tax earnings from continuing operations from 2015 to 2016 is primarily driven by the gain on the sale of DuPont (Shenzhen) Manufacturing Limited in 2016 in addition to the absence of 2015 restructuring and asset related charges - net.

Each year the company files hundreds of tax returns in the various national, state and local income taxing jurisdictions in which it operates. These tax returns are subject to examination and possible challenge by the tax authorities. Positions challenged by the tax authorities may be settled or appealed by the company. As a result, there is an uncertainty in income taxes recognized in the company's financial statements in accordance with accounting for income taxes and accounting for uncertainty in income taxes. It is reasonably possible that changes to the company's global unrecognized tax benefits could be significant; however, due to the uncertainty regarding the timing of completion of audits and possible outcomes, a current estimate of the range of increases or decreases that may occur within the next twelve months cannot be made.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Tax years that remain subject to examination for the company's major tax jurisdictions are shown below:

Tax Years Subject to Examination by Major Tax Jurisdiction at Dec 31, Jurisdiction	Earliest Open Year
Brazil	2012
Canada	2011
China	2014
Denmark	2003
Germany	2006
India	2001
The Netherlands	2014
Switzerland	2012
United States:	
Federal income tax	2012
State and local income tax	2004

Undistributed earnings of foreign subsidiaries and related companies that are deemed to be permanently invested amounted to \$15,408 million at December 31, 2017, \$17,380 million at December 31, 2016 and \$16,053 million at December 31, 2015. The Act imposed U.S. tax on all foreign unrepatriated earnings. These undistributed earnings are still subject to certain taxes upon repatriation, primarily foreign withholding taxes. It is not practicable to calculate the unrecognized deferred tax liability on undistributed earnings.

DuPont and its subsidiaries are included in DowDuPont's consolidated federal income tax group and consolidated tax return. Generally, the consolidated tax liability of the DowDuPont U.S. tax group for each year will be apportioned among the members of the consolidated group based on each member's separate taxable income. DuPont and Dow intend that to the extent Federal and/or State corporate income tax liabilities are reduced through the utilization of tax attributes of the other, settlement of any receivable and payable generated from the use of the other party's sub-group attributes will be in accordance with a tax sharing agreement and/or tax matters agreement.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

NOTE 8 - EARNINGS PER SHARE OF COMMON STOCK

Upon completion of the Merger, each share of DuPont Common Stock was converted into the right to receive 1.2820 fully paid and non-assessable shares of DowDuPont Common Stock, in addition to cash in lieu of any fractional shares of DowDuPont Common Stock issued and therefore earnings per share of common stock information is not presented for the Successor period.

Set forth below is a reconciliation of the numerator and denominator for basic and diluted earnings per share calculations for the Predecessor periods indicated below:

Notes to the Consolidated Financial Statements (continued)

NOTE 9 - ACCOUNTS AND NOTES RECEIVABLE, NET

(In millions)	Successor December 31, 2017	Predecessor December 31, 2016
Accounts receivable – trade	\$ 3,777	\$ 3,601
Notes receivable – trade	199	206
Other ³	1,263	1,152
Total accounts and notes receivable - net	\$ 5,239	\$ 4,959

1. Accounts receivable – trade is net of allowances of \$10 million at December 31, 2017 and \$287 million at December 31, 2016. Allowances are equal to the estimated uncollectible amounts. That estimate is based on historical collection experience, current economic and market conditions, and review of the current status of customers' accounts.

2. Notes receivable – trade primarily consists of receivables within the agriculture product line for deferred payment loan programs for the sale of seed products to customers. These loans have terms of one year or less and are primarily concentrated in North America. The company maintains a rigid pre-approval process for extending credit to customers in order to manage overall risk and exposure associated with credit losses. As of December 31, 2017 and 2016, there were no significant past due notes receivable, nor were there any significant impairments related to current loan agreements.

3. Other includes receivables in relation to fair value of derivative instruments, indemnification assets, value added tax, general sales tax and other taxes. No individual group represents more than ten percent of total receivables.

Accounts and notes receivable are carried at amounts that approximate fair value.

NOTE 10 - INVENTORIES

(In millions)	Successor December 31, 2017	Predecessor December 31, 2016
Finished products	\$ 4,500	\$ 2,961
Semi-finished products	2,769	1,877
Raw materials	371	292
Stores and supplies	447	398
Total	\$ 8,087	\$ 5,528
Adjustment of inventories to a LIFO basis	546	(178)
Total inventories	\$ 8,633	\$ 5,350

As a result of the Merger, a fair value step-up of \$3,842 million was recorded for inventories. Of this amount, \$1,434 million has been recognized in costs of goods sold within loss from continuing operations for the period September 1, 2017 through December 31, 2017. See Note 3 for additional information regarding the Merger.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

NOTE 11 - PROPERTY, PLANT AND EQUIPMENT

(In millions)	Successor Predecessor	
	December 31, 2017	December 31, 2016
Land and land improvements	\$ 913	\$ 501
Buildings	2,747	4,224
Machinery and equipment	8,104	16,909
Construction in progress	1,114	1,381
Total property, plant and equipment	12,878	23,015
Accumulated depreciation	(443)	(14,164)
Total property, plant and equipment - net	\$ 12,435	\$ 8,851

As a result of the Merger, a fair value step-up of \$3,200 million was recorded for property, plant and equipment. See Note 3 for additional information regarding the Merger.

Buildings, machinery and equipment and land improvements are depreciated over useful lives on a straight-line basis ranging from 1 to 25 years. Capitalizable costs associated with computer software for internal use are amortized on a straight-line basis over 1 to 8 years.

(In millions)	Successor	Predecessor		
	For the Period September 1 through December 31, 2017	For the the Period January 1 through December 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Depreciation expense	\$ 426	\$ 589	\$ 907	\$ 948

NOTE 12 - GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

The following table summarizes changes in the carrying amount of goodwill for the period September 1 through December 31, 2017, the period January 1 through August 31, 2017, and the year ended December 31, 2016:

(In millions)	
Balance as of December 31, 2015 (Predecessor)	\$4,238
Currency Translation Adjustment	(68)
Other Goodwill Adjustments and Acquisitions	(1)
Balance as of December 31, 2016 (Predecessor)	4,169
Currency Translation Adjustment	176
Other Goodwill Adjustments and Acquisitions	198
Balance as of August 31, 2017 (Predecessor)	\$4,543
Balance at September 1, 2017 (Successor)	\$45,105

Currency Translation Adjustment	(234)
Goodwill Recognized for H&N Acquisition	718
Balance as of December 31, 2017 (Successor)	\$45,589

In 2017 and 2016, the company performed impairment tests for goodwill and determined that no goodwill impairments existed.

Total	\$28,115	\$ (389)	\$27,726	\$5,185	\$ (1,521)	\$3,664

Upon closing and pursuant to the terms of the FMC Transaction Agreement, DuPont entered into favorable supply contracts with FMC. DuPont recorded these contracts as intangible assets recognized at the fair value of off-market contracts. Refer to Notes 3 and 4 for additional information.

Microbial cell factories, derived from natural microbes, are used to sustainably produce enzymes, peptides and chemicals using natural metabolic processes. The company recognized the microbial cell factories as intangible assets upon the acquisition of Danisco. As a result of the valuation as part of the Merger, it was determined that this intangible asset now has a definite life and therefore it has been moved from indefinite-lived to definite-lived as of September 1, 2017.

Primarily consists of sales and farmer networks, marketing and manufacturing alliances and noncompetition agreements.

Pioneer germplasm is the pool of genetic source material and body of knowledge gained from the development and delivery stage of plant breeding. The company recognized germplasm as an intangible asset upon the acquisition of Pioneer. This intangible asset is expected to contribute to cash flows beyond the foreseeable future and there are no legal, regulatory, contractual, or other factors which limit its useful life.

In connection with the Merger, the company recorded \$27,221 million of intangible assets, as shown in the table below, representing the preliminary fair values at the Merger date. See Note 3 for additional information regarding the Merger.

(In millions)	Gross	
	Carrying Amount	Weighted-average Amortization Period (years)
Intangible Assets with finite lives:		
Customer-related	\$9,264	17

Trademarks/trade names	4,862	
Total intangible assets	\$ 27,221	

F-45

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The aggregate pre-tax amortization expense from continuing operations for definite-lived intangible assets was \$389 million for the period September 1 through December 31, 2017 and \$139 million for the period January 1 through August 31, 2017. The aggregate pre-tax amortization expense from continuing operations for definite-lived intangible assets was \$319 million and \$362 million for 2016 and 2015, respectively.

Total estimated amortization expense for the next five fiscal years is as follows:

(In millions)

2018	\$ 1,266
2019	\$ 1,254
2020	\$ 1,244
2021	\$ 1,228
2022	\$ 1,221

NOTE 13 - SHORT-TERM BORROWINGS, LONG-TERM DEBT AND AVAILABLE CREDIT FACILITIES

The following tables summarize the company's short-term borrowings and capital lease obligations and long-term debt:

Short-term borrowings and capital lease obligations (In millions)	Successor	Predecessor
	December 31, 2017	December 31, 2016
Commercial paper	\$ 1,436	\$ 386
Other loans - various currencies	28	39
Long-term debt payable within one year	1,315	4
Total short-term borrowings and capital lease obligations	\$ 2,779	\$ 429

The estimated fair value of the company's short-term borrowings, including interest rate financial instruments, was determined using Level 2 inputs within the fair value hierarchy, as described in Note 1 and Note 19. Based on quoted market prices for the same or similar issues, or on current rates offered to the company for debt of the same remaining maturities, the fair value of the company's short-term borrowings and capital lease obligations was \$2,780 million and \$430 million at December 31, 2017 and 2016, respectively.

The weighted-average interest rate on short-term borrowings outstanding at December 31, 2017 and 2016 was 1.8 percent and 2.2 percent, respectively. The decrease in the interest rate for 2017 was primarily due to lower effective interest on long-term debt payable within one year.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Long Term Debt (In millions)	Successor ¹			Predecessor
	December 31, 2017	Weighted Amount Average Rate		December 31, 2016
Promissory notes and debentures:				
Final maturity 2018	\$1,280	1.59	%	\$ 1,290
Final maturity 2019	521	2.23	%	500
Final maturity 2020	3,070	1.79	%	999
Final maturity 2021	1,580	2.07	%	1,498
Final maturity 2023 and thereafter	3,492	3.32	%	3,188
Other facilities:				
Term loan due 2019	1,500	2.35	%	500
Other loans	18	4.32	%	22
Foreign currency loans, various rates and maturities	30	2.85	%	29
Medium-term notes, varying maturities through 2043	110	1.22	%	111
Capital lease obligations	5			9
Less: Unamortized debt discount and issuance costs	—			35
Less: Long-term debt due within one year	1,315			4
Total	\$10,291			\$ 8,107

1. The Successor period includes the reflection of debt at fair value at the date of the Merger. See Note 3 for additional information regarding the Merger.

Principal payments of long-term debt for the next five years are as follows:

Maturities of Long-Term Debt For Next Five Years¹

(In millions)	
2018	\$1,286
2019	\$2,005
2020	\$3,005
2021	\$1,505
2022	\$2

1. Excludes unamortized debt step-up premium.

The estimated fair value of the company's long-term borrowings, was determined using Level 2 inputs within the fair value hierarchy, as described in Note 1 and Note 19. Based on quoted market prices for the same or similar issues, or on current rates offered to the company for debt of the same remaining maturities, the fair value of the company's long-term borrowings, not including long-term debt due within one year, was \$10,250 million and \$8,460 million at December 31, 2017 and 2016, respectively.

Available Committed Credit Facilities

The following table summarizes the company's credit facilities:

Committed and Available Credit Facilities at December 31, 2017 (Successor)

(In millions)	Effective Date	Committed Credit		Maturity Date	Interest
		Credit	Available		
Revolving Credit Facility	March 2016	\$ 3,000	\$ 2,950	May 2019	Floating Rate
Term Loan Facility	March 2016	4,500	3,000	March 2019	Floating Rate

Total Committed and Available Credit Facilities	\$ 7,500	\$ 5,950
---	----------	----------

F-47

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Debt Offering

In May 2017, the company completed an underwritten public offering of \$1,250 million of the company's 2.20 percent Notes due 2020 and \$750 million of the company's Floating Rate Notes due 2020 (the "May 2017 Debt Offering"). The proceeds of this offering were used to make a discretionary pension contribution to the company's principal U.S. pension plan. See Note 16 for further discussion regarding this contribution.

Term Loan Facility

In March 2016, the company entered into a credit agreement that provides for a three-year, senior unsecured term loan facility in the aggregate principal amount of \$4,500 million (the "Term Loan Facility") under which DuPont may make up to seven term loan borrowings and amounts repaid or prepaid are not available for subsequent borrowings. The facility was amended in 2017 to extend the date on which the commitment to lend terminates to July 27, 2018. The proceeds from the borrowings under the Term Loan Facility will be used for the company's general corporate purposes including debt repayment, working capital and funding a portion of DowDuPont's costs and expenses. The Term Loan Facility matures in March 2019 at which time all outstanding borrowings, including accrued but unpaid interest, become immediately due and payable. As of December 31, 2017, the company had made three term loan borrowings in an aggregate principal amount of \$1,500 million and had unused commitments of \$3,000 million under the Term Loan Facility.

Uncommitted Credit Facilities and Outstanding Letters of Credit

Unused bank credit lines on uncommitted credit facilities were approximately \$731 million at December 31, 2017. These lines are available to support short-term liquidity needs and general corporate purposes including letters of credit. Outstanding letters of credit were \$177 million at December 31, 2017. These letters of credit support commitments made in the ordinary course of business.

NOTE 14 - COMMITMENTS AND CONTINGENT LIABILITIES

Guarantees

Indemnifications

In connection with acquisitions and divestitures as of December 31, 2017, the company has indemnified respective parties against certain liabilities that may arise in connection with these transactions and business activities prior to the completion of the transactions. The term of these indemnifications, which typically pertain to environmental, tax and product liabilities, is generally indefinite. In addition, the company indemnifies its duly elected or appointed directors and officers to the fullest extent permitted by Delaware law, against liabilities incurred as a result of their activities for the company, such as adverse judgments relating to litigation matters. If the indemnified party were to incur a liability or have a liability increase as a result of a successful claim, pursuant to the terms of the indemnification, the company would be required to reimburse the indemnified party. The maximum amount of potential future payments is generally unlimited.

Obligations for Equity Affiliates & Others

The company has directly guaranteed various debt obligations under agreements with third parties related to equity affiliates, customers and suppliers. At December 31, 2017 and December 31, 2016, the company had directly guaranteed \$297 million and \$388 million, respectively, of such obligations. These amounts represent the maximum potential amount of future (undiscounted) payments that the company could be required to make under the guarantees. The company would be required to perform on these guarantees in the event of default by the guaranteed party.

The company assesses the payment/performance risk by assigning default rates based on the duration of the guarantees. These default rates are assigned based on the external credit rating of the counterparty or through internal

credit analysis and historical default history for counterparties that do not have published credit ratings. For counterparties without an external rating or available credit history, a cumulative average default rate is used.

In certain cases, the company has recourse to assets held as collateral, as well as personal guarantees from customers and suppliers. Assuming liquidation, these assets are estimated to cover approximately 23 percent of the \$89 million of guaranteed obligations of customers and suppliers. Set forth below are the company's guaranteed obligations at December 31, 2017.

F-48

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The following tables provide a summary of the final expiration and maximum future payments for each type of guarantee:

Guarantees at December 31, 2017 (Successor)	Final Expiration	Maximum Future Payments
(In millions)		
Obligations for customers and suppliers ¹ :		
Bank borrowings	2022	\$ 89
Obligations for non-consolidated affiliates ² :		
Bank borrowings	2018	161
Obligations for Chemours ³ :		
Chemours' purchase obligations	2018	10
Residual value guarantees ⁴	2029	37
Total guarantees		\$ 297

1. Existing guarantees for customers and suppliers, as part of contractual agreements.

2. Existing guarantees for non-consolidated affiliates' liquidity needs in normal operations.

3. Guarantee for Chemours' raw material purchase obligations under agreement with third party supplier.

4. The company provides guarantees related to leased assets specifying the residual value that will be available to the lessor at lease termination through sale of the assets to the lessee or third parties.

Operating Leases

The company uses various leased facilities and equipment in its operations. The terms for these leased assets vary depending on the lease agreement.

Future minimum lease payments (including residual value guarantee amounts) under non-cancelable operating leases are \$264 million, \$190 million, \$137 million, \$104 million and \$81 million for the years 2018, 2019, 2020, 2021 and 2022, respectively, and \$268 million for subsequent years and are not reduced by non-cancelable minimum sublease rentals due in the future in the amount of \$3 million. Net rental expense under operating leases was \$105 million, \$179 million, \$242 million and \$266 million for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017, and for the years ended December 31, 2016 and 2015, respectively.

Litigation

The company is subject to various legal proceedings arising out of the normal course of its current and former business operations, including product liability, intellectual property, commercial, environmental and antitrust lawsuits. It is not possible to predict the outcome of these various proceedings. Although considerable uncertainty exists, management does not anticipate that the ultimate disposition of these matters will have a material adverse effect on the company's results of operations, consolidated financial position or liquidity. However, the ultimate liabilities could be material to results of operations in the period recognized.

PFOA

DuPont used PFOA (collectively, perfluorooctanoic acids and its salts, including the ammonium salt), as a processing aid to manufacture some fluoropolymer resins at various sites around the world including its Washington Works' plant in West Virginia. Pursuant to the Separation Agreement discussed in Note 4, the company is indemnified by Chemours for the PFOA matters discussed below and has recorded a total indemnification asset of \$15 million.

U.S. Environmental Protection Agency ("EPA") and New Jersey department of Environmental Protection ("NJDEP") DuPont is obligated under agreements with EPA, including a 2009 consent decree to which Chemours was added in 2017, and has made voluntary commitments to NJDEP. These obligations and voluntary commitments include

surveying, sampling and testing drinking water in and around certain company sites and offering treatment or an alternative supply of drinking water if tests indicate the presence of PFOA in drinking water at or greater than the national health advisory level established from time to time by the EPA. At December 31, 2017, the company had an accrual of \$15 million related to these obligations and voluntary commitments. The company recorded an indemnification asset corresponding to the accrual balance at December 31, 2017.

F-49

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Leach v. DuPont

In August 2001, a class action, captioned Leach v. DuPont, was filed in West Virginia state court alleging that residents living near the Washington Works facility had suffered, or may suffer, deleterious health effects from exposure to PFOA in drinking water. A settlement was reached in 2004 that binds approximately 80,000 residents, (the "Leach Settlement".) In addition to paying \$23 million to plaintiff's attorneys for fees and expenses and \$70 million to fund a community health project, the company is obligated to fund up to \$235 million for a medical monitoring program for eligible class members and to pay administrative costs and fees associated with the program. In January 2012, the company put \$1 million into an escrow account to fund medical monitoring as required by the settlement agreement. As of December 31, 2017, less than \$1 million has been disbursed from the account. The company also must continue to provide water treatment designed to reduce the level of PFOA in water to six area water districts, including the Little Hocking Water Association, and private well users. While it is probable that the company will incur liabilities related to funding the medical monitoring program and providing water treatment, the company does not expect any such liabilities to be material.

Under the Leach Settlement, the company funded a series of health studies which were completed in October 2012 by an independent science panel of experts (the "C8 Science Panel".) The C8 Science Panel found probable links, as defined in the Leach Settlement, between exposure to PFOA and pregnancy-induced hypertension, including preeclampsia; kidney cancer; testicular cancer; thyroid disease; ulcerative colitis; and diagnosed high cholesterol.

Multi-District Litigation

Leach class members may pursue personal injury claims against DuPont only for the six human diseases for which the C8 Science Panel determined a probable link exists. Following the Leach Settlement, approximately 3,550 lawsuits alleging personal injury claims were filed in various federal and state courts in Ohio and West Virginia. These lawsuits are consolidated in multi-district litigation ("MDL") in the U.S. District Court for the Southern District of Ohio.

In the first quarter of 2017, the MDL was settled for \$670.7 million in cash (the "MDL Settlement"), half of which was to be paid by Chemours and half paid by DuPont. At December 31, 2017, all payments under the settlement agreement have been made by both companies. DuPont's payment is not subject to indemnification or reimbursement by Chemours. In exchange for that payment, DuPont and Chemours receive releases of all claims by the settling plaintiffs. The MDL Settlement was entered into solely by way of compromise and settlement and is not in any way an admission of liability or fault by DuPont or Chemours. All of the MDL plaintiffs participated and resolved their claims within the MDL Settlement.

New Items

At December 31, 2017, five lawsuits had been filed against the company in West Virginia and four in Ohio alleging personal injury from exposure to PFOA in drinking water.

In addition, three lawsuits are pending in federal court in New York on behalf of five individuals who are residents of Hoosick Falls, New York. The plaintiffs claim personal injuries, including kidney cancer, thyroid disease and ulcerative colitis, from alleged exposure to PFOA discharged into the air and water from nearby manufacturing facilities owned and operated by defendant third parties. Plaintiffs claim that PFOA used at the facilities was purchased from or manufactured by the company and co-defendant, 3M Company. An action is pending in Alabama state court filed by a municipal water utility. The plaintiff alleges contamination from wastewater from defendant carpet manufacturers' operations using perfluorinated chemicals and compounds, including PFOA, ("PFCs"). Plaintiff alleges that the PFCs used in defendant manufacturers' operations were supplied by the company and co-defendant 3M Company.

While it is reasonably possible that the company could incur liabilities related to these actions, it does not expect any such liabilities would be material. Chemours is defending and indemnifying the company in these matters in accordance with the amendment to the Separation Agreement discussed below.

F-50

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Amendment to Separation Agreement

Concurrent with the MDL Settlement, DuPont and Chemours amended the Separation Agreement to provide for a limited sharing of potential future PFOA liabilities (i.e., indemnifiable losses, as defined in the Separation Agreement) for a period of five years beginning July 6, 2017. During that five-year period, Chemours will annually pay future PFOA liabilities up to \$25 million and, if such amount is exceeded, DuPont would pay any excess amount up to the next \$25 million (which payment will not be subject to indemnification by Chemours), with Chemours annually bearing any further excess liabilities. After the five-year period, this limited sharing agreement will expire, and Chemours' indemnification obligations under the Separation Agreement will continue unchanged. There have been no charges incurred by DuPont under this arrangement through December 31, 2017. Chemours has also agreed that it will not contest its liability to DuPont under the Separation Agreement for PFOA liabilities on the basis of ostensible defenses generally applicable to the indemnification provisions under the Separation Agreement, including defenses relating to punitive damages, fines or penalties or attorneys' fees, and waives any such defenses with respect to PFOA liabilities. Chemours has, however, retained defenses as to whether any particular PFOA claim is within the scope of the indemnification provisions of the Separation Agreement.

It is possible that new lawsuits could be filed against DuPont related to PFOA that may not be within the scope of the MDL Settlement. Any such new litigation would be subject to indemnification by Chemours under the Separation Agreement, as amended.

Fayetteville Works Facility, North Carolina

Prior to the separation of Chemours, the company introduced GenX as a polymerization processing aid and a replacement for PFOA at the Fayetteville Works facility. The facility is now owned and operated by Chemours which continues to manufacture and use GenX. Chemours is responding to ongoing inquiries and investigations from federal, state and local investigators, regulators and other governmental authorities as well as inquiries from the media and local community stakeholders. These inquiries and investigations involve the discharge of GenX and certain similar compounds from the Chemours' facility at Fayetteville Works into the Cape Fear River in Bladen County, North Carolina.

In August 2017, the U.S. Attorney's Office for the Eastern District of North Carolina served the company with a subpoena for testimony and the production of documents to a grand jury. In the fourth quarter 2017, DuPont was served with additional subpoenas relating to the same issue. The subpoenas seek documents and testimony related to alleged discharges of PFOA and/or GenX from the Fayetteville Works facility into the Cape Fear River. It is possible that these ongoing inquiries and investigations, including the grand jury subpoena, could result in penalties or sanctions, or that additional litigation will be instituted against Chemours and/or the company.

At December 31, 2017, several actions, filed on behalf of putative classes of property owners and residents in areas near or who draw drinking water from the Cape Fear River, are pending in federal court against Chemours, the company and one also names DowDuPont. These actions relate to the alleged discharge of certain perflourinated chemicals into the river from the operations and wastewater treatment at the Fayetteville Works facility. The three purported class actions, filed in the fourth quarter 2017 and now consolidated into a single purported class action, seek various relief including medical monitoring, property damages and injunctive relief. Separate actions pending at December 31, 2017 were filed by the Cape Fear Public Utility Authority and Brunswick County, NC seeking actual and punitive damages as well as injunctive relief. These actions have since been consolidated and two additional North Carolina water authorities have joined the action. Management believes the probability of loss with respect to these actions is remote.

The company has an indemnification claim against Chemours with respect to current and future inquiries and claims, including lawsuits, related to the foregoing. At December 31, 2017, Chemours is defending and indemnifying the company in the pending civil actions.

F-51

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Environmental

Accruals for environmental matters are recorded when it is probable that a liability has been incurred and the amount of the liability can be reasonably estimated based on current law and existing technologies. At December 31, 2017, the company had accrued obligations of \$433 million for probable environmental remediation and restoration costs, including \$67 million for the remediation of Superfund sites. These obligations are included in "Accrued and other current liabilities" and "Other noncurrent obligations" in the Consolidated Balance Sheets. This is management's best estimate of the costs for remediation and restoration with respect to environmental matters for which the company has accrued liabilities, although it is reasonably possible that the ultimate cost with respect to these particular matters could range up to \$920 million above the amount accrued at December 31, 2017. Consequently, it is reasonably possible that environmental remediation and restoration costs in excess of amounts accrued could have a material impact on the company's results of operations, financial condition and cash flows. It is the opinion of the company's management, however, that the possibility is remote that costs in excess of the range disclosed will have a material impact on the company's results of operations, financial condition or cash flows. Inherent uncertainties exist in these estimates primarily due to unknown conditions, changing governmental regulations and legal standards regarding liability, and emerging remediation technologies for handling site remediation and restoration. At December 31, 2016, the company had accrued obligations of \$457 million for probable environmental remediation and restoration costs, including \$50 million for the remediation of Superfund sites.

Pursuant to the DuPont and Chemours Separation Agreement, the company is indemnified by Chemours for certain environmental matters, included in the liability of \$433 million, that have an estimated liability of \$242 million as of December 31, 2017, and a potential exposure that ranges up to approximately \$430 million above the amount accrued. As such, the company has recorded an indemnification asset of \$242 million corresponding to the company's accrual balance related to these matters at December 31, 2017, including \$47 million related to the Superfund sites.

NOTE 15 - STOCKHOLDERS' EQUITY

Share Repurchase Program

2015 Share Buyback Plan

In the first quarter 2015, DuPont announced its intention to buy back shares of about \$4,000 million using the distribution proceeds received from Chemours. In connection with the completion of the spin-off of Chemours, the Board of Directors authorized the use of the distribution proceeds to buy back shares of the company's common stock as follows: \$2,000 million to be purchased and retired by December 31, 2015, which was completed during 2015, with the remainder to be purchased and retired by December 31, 2016. There were no share repurchases under this plan in the first and second quarters of 2016. The company had limited opportunity to repurchase shares in 2016, primarily due to the planned merger with Dow. However, during the second half of 2016, the company purchased and retired 13.2 million shares in the open market for a total cost of \$916 million. As of December 31, 2016, in aggregate, the company paid \$2,916 million and received and retired 48.2 million shares. The authorization under this buyback program expired as of January 1, 2017.

2014 Share Buyback Plan

In January 2014, the company's Board of Directors authorized a \$5,000 million share buyback plan that replaced the 2011 plan. During 2015, the company repurchased and retired 4.6 million shares in the open market for a total cost of \$353 million. There were no share repurchases under this plan during 2016 and 2017. The authorization under this buyback program expired upon Merger. As of August 31, 2017, in aggregate, the company purchased 34.7 million shares at a total cost of \$2,353 million under the plan.

Treasury Stock

Immediately prior to the closing of the Merger Transaction, all 87 million shares of DuPont common stock that were held in treasury were automatically canceled and retired for no consideration. Common stock held in treasury was recorded at cost. When retired, the excess of the cost of treasury stock over its par value was allocated between retained earnings (\$5,657 million) and additional paid-in capital (\$1,044 million).

Other comprehensive income (loss) before reclassifications	(454)	(2)	128	(53)	—	(381)
Amounts reclassified from accumulated other comprehensive income (loss)	—	—	—	—	—	—
Net other comprehensive (loss) income	(454)	(2)	128	(53)	—	(381)
Balance December 31, 2017 (Successor)	\$ (454)	\$ (2)	\$ 128	\$(53)	\$ —	\$(381)

The cumulative translation adjustment loss for the period September 1 through December 31, 2017 is primarily driven by the strengthening of the U.S dollar (USD) against the European Euro (EUR) and the Brazilian real (BRL).

The cumulative translation adjustment gain for the period January 1 through August 31, 2017 is primarily driven by the weakening of the USD against the EUR. The currency translation loss for the year ended December 31, 2016 is primarily driven by the strengthening of the USD against the EUR partially offset by the weakening of the USD against the BRL. The currency translation loss for the year ended December 31, 2015 is driven by the strengthening USD against primarily the EUR and BRL.

² The Pension Benefit Plans loss recognized in other comprehensive (loss) income during the year ended December 31, 2016 includes the impact of the remeasurement of the principal U.S. pension plan as of June 30, 2016. See Note

16 for additional information.

In connection with the Merger, balances in accumulated other comprehensive loss at Merger Effectiveness Time³ were eliminated as a result of reflecting the balance sheet at fair value as of the date of the Merger. See Note 3 and 16 for further information regarding the Merger and pension and OPEB plans, respectively.

1. Cost of goods sold.
2. Provision for income taxes from continuing operations.
3. These accumulated other comprehensive loss components are included in the computation of net periodic benefit cost of the company's pension and other benefit plans. See Note 16 for additional information.
4. Sundry income - net.

F-55

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The tax benefit (expense) recorded in Stockholders' Equity was \$33 million and \$(138) million for the years ended December 31, 2016 and 2015, respectively. Included in these amounts were tax benefits of \$21 million and \$37 million for the years ended December 31, 2016 and 2015, respectively, associated with stock compensation programs. The remainder consists of amounts recorded within other comprehensive loss as shown in the table above.

NOTE 16 - PENSION PLANS AND OTHER POST EMPLOYMENT BENEFITS

The company offers various long-term benefits to its employees. Where permitted by applicable law, the company reserves the right to change, modify or discontinue the plans.

As a result of the Merger, the company re-measured its pension and OPEB plans. The remeasurement of the company's pension and OPEB plans are included in the fair value measurement of DuPont's assets and liabilities as a result of the application of purchase accounting in connection with the Merger. In addition, net losses and prior service benefits recognized in accumulated other comprehensive loss were eliminated. Dow and DuPont did not merge their pension plans and other post employment benefit plans as a result of the Merger. See Note 3 for details on the Merger.

Defined Benefit Pension Plans

The company has both funded and unfunded noncontributory defined benefit pension plans covering a majority of the U.S. employees and a number of other countries. The principal U.S. pension plan is the largest pension plan held by DuPont. Most employees hired on or after January 1, 2007 are not eligible to participate in the U.S. defined benefit pension plans. The benefits under these plans are based primarily on years of service and employees' pay near retirement. In November 2016, the company announced that it will freeze the pay and service amounts used to calculate pension benefits for active employees who participate in the U.S. pension plans on November 30, 2018. Therefore, as of November 30, 2018, active employees participating in the U.S. pension plans will not accrue additional benefits for future service and eligible compensation received. These changes resulted in a \$527 million decline in the projected benefit obligation, which is reflected in actuarial loss (gain) in the change in projected benefit obligations table on page F-60, and recognition of a \$25 million pre-tax curtailment gain during the fourth quarter of 2016. The decline in the projected benefit obligation is primarily due to the decrease in expected future compensation.

The company's funding policy is consistent with the funding requirements of federal laws and regulations. Pension coverage for employees of the company's non-U.S. consolidated subsidiaries is provided, to the extent deemed appropriate, through separate plans. Obligations under such plans are funded by depositing funds with trustees, covered by insurance contracts, or remain unfunded. The company did not make any contributions to its principal U.S. pension plan for the period September 1 through December 31, 2017. During the period January 1 through August 31, 2017, the company made total contributions of \$2,900 million to its principal U.S. pension plan funded through the May 2017 Debt Offering; short-term borrowings, including commercial paper issuance; and cash flow from operations. See Note 13 for further discussion related to the May 2017 Debt Offering. The company contributed \$230 million to the principal U.S. pension plan in 2016. No contributions were made to its principal U.S. pension plan in 2015. The company does not expect to make cash contributions to this plan in 2018.

The company made total contributions of \$34 million, \$67 million, \$121 million and \$164 million to its funded pension plans other than the principal U.S. pension plan for the periods September 1 through December 31, 2017 and January 1 through August 31, 2017 and the years ended December 31, 2016 and 2015, respectively. Additionally, the company made total contributions of \$34 million, \$57 million, \$184 million and \$144 million to its remaining plans with no plan assets for the periods September 1 through December 31, 2017 and January 1 through August 31, 2017 and the years ended December 31, 2016 and 2015, respectively. DuPont expects to contribute approximately \$200

million to its funded pension plans other than the principal U.S. pension plan and its remaining plans with no plan assets in 2018.

The company's remeasurement of its pension plans at the Merger Effectiveness Time resulted in an increase in the underfunded status of \$560 million. In connection with the remeasurement, the company updated the weighted average discount rate to 3.42 percent at August 31, 2017 from 3.80 percent as of December 31, 2016.

The workforce reductions in 2016 related to a 2016 global cost savings and restructuring plan triggered curtailments for certain of the company's pension plans, including the principal U.S. pension plan. For the principal U.S. pension plan, the company recorded curtailment losses of \$63 million during the year ended December 31, 2016. The curtailment losses were driven by the changes in the benefit obligation based on the demographics of the terminated positions partially offset by accelerated recognition of a portion of the prior service benefit.

F-56

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

In the fourth quarter 2016, about \$550 million of lump-sum payments were made from the principal U.S. pension plan trust fund to a group of separated, vested plan participants who were extended a limited-time opportunity and voluntarily elected to receive their pension benefits in a single lump-sum payment. In the fourth quarter 2017, about \$140 million of lump-sum payments were made from the principal U.S. pension plan trust fund under a similar program. Since the company recognizes pension settlements only when the lump-sum payments exceed the sum of the plan's service and interest cost components of net periodic pension cost for the year, these lump-sum payments did not result in the recognition of a pension settlement charge.

The weighted-average assumptions used to determine pension plan obligations for all pension plans are summarized in the table below:

Weighted-Average Assumptions used to Determine Benefit Obligations	Successor		Predecessor	
	December 31, 2017		December 31, 2016	
Discount rate	3.37	%	3.80	%
Rate of increase in future compensation levels ¹	4.04	%	3.80	%

¹ The rate of compensation increase represents the single annual effective salary increase that an average plan participant would receive during the participant's entire career at the company.

The weighted-average assumptions used to determine net periodic benefit costs for all pension plans are summarized in the two tables below:

Weighted-Average Assumptions used to Determine Net Periodic Benefit Cost	Successor		Predecessor	
	For the Period September 1 through December 31, 2017	For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Discount rate	3.42	%	3.80	%
Rate of increase in future compensation levels	3.80	%	3.80	%
Expected long-term rate of return on plan assets	6.24	%	7.66	%

The weighted-average assumptions used to determine net periodic benefit costs for U.S. plans are summarized in the table below:

Weighted- Average Assumptions used to Determine Net Periodic Benefit Cost	Successor		Predecessor	
	For the Period September 1 through December 31, 2017	For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Discount rate	3.73	%	4.16	%
Rate of increase in future compensation levels	3.95	%	3.95	%
Expected long-term rate of return on	6.25	%	8.00	%

plan assets

Other Post Employment Benefits

The company provides medical, dental and life insurance benefits to certain pensioners and survivors. The associated plans for retiree benefits are unfunded and the cost of the approved claims is paid from company funds. Essentially all of the cost and liabilities for these retiree benefit plans are attributable to the U.S. benefit plans. The non-Medicare eligible retiree medical plan is contributory with pensioners and survivors' contributions adjusted annually to achieve a 50/50 target for sharing of cost increases between the company and pensioners and survivors. In addition, limits are applied to DuPont's portion of the retiree medical cost coverage. For Medicare eligible pensioners and survivors, DuPont provides a company-funded Health Reimbursement Arrangement (HRA). In November 2016, the company announced that eligible employees who will be under the age of 50 as of November 30, 2018 will not receive post-retirement medical, dental and life insurance benefits. As a result of these changes, the company recognized a pre-tax curtailment gain of \$357 million during the fourth quarter of 2016. Beginning January 1, 2015, eligible employees who retire on and after that date will receive the same life insurance benefit payment, regardless of employee's age or pay. The majority of U.S. employees hired on or after January 1, 2007 are not eligible to participate in the post-retirement medical, dental and life insurance plans.

The company also provides disability benefits to employees. Employee disability benefit plans are insured in many countries. However, primarily in the U.S., such plans are generally self-insured. Obligations and expenses for self-insured plans are reflected in the change in projected benefit obligations table on page F-60.

F-57

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The company's remeasurement of its OPEB plans at the Merger Effectiveness Time resulted in an increase in the benefit obligation of \$41 million. In connection with the remeasurement, the company lowered the weighted average discount rate to 3.62 percent as of August 31, 2017 from 4.03 percent as of December 31, 2016.

As a result of the workforce reductions related to a 2016 global cost savings and restructuring plan, a curtailment was triggered for the company's other post employment benefit plans. The company recorded curtailment gains of \$35 million during the year ended December 31, 2016. The curtailment gains were driven by accelerated recognition of a portion of the prior service benefit partially offset by the change in the benefit obligation based on the demographics of the terminated positions.

The company's OPEB plans are unfunded and the cost of the approved claims is paid from operating cash flows. Pre-tax cash requirements to cover actual net claims costs and related administrative expenses were \$59 million, \$166 million, \$218 million, and \$237 million for the periods September 1 through December 31, 2017 and January 1 through August 31, 2017 and for the years ended December 31, 2016 and 2015, respectively. Changes in cash requirements reflect the net impact of higher per capita health care costs, demographic changes, plan amendments and changes in participant premiums, co-pays and deductibles. In 2018, the company expects to contribute about \$250 million for its OPEB plans.

The weighted-average assumptions used to determine benefit obligations for OPEB plans are summarized in the table below:

Weighted-Average Assumptions used to Determine Benefit Obligations	Successor		Predecessor	
	December 31, 2017		December 31, 2016	
Discount rate	3.56	%	4.03	%

The weighted-average assumptions used to determine net periodic benefit costs for the OPEB plans are summarized in the two tables below:

Weighted-Average Assumptions used to Determine Net Periodic Benefit Cost	Successor		Predecessor		
	For the Period September 1 through December 31, 2017		For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Discount rate	3.62	%	4.03	%	3.87 % 4.13 %

Assumed Health Care Cost Trend Rates	Successor		Predecessor	
	December 31, 2017		December 31, 2016	
Health care cost trend rate assumed for next year	6.40	%	7.00	%

Rate to which the cost trend rate is assumed to decline (the ultimate health care trend rate)	5.00	%	5.00	%
Year that the rate reached the ultimate health care cost trend rate	2023		2023	

Assumed health care cost trend rates have a modest effect on the amounts reported for the health care plans. A one percentage point change in assumed health care cost trend rates would have an immaterial impact on service and interest cost and the postretirement benefit obligation.

Assumptions

Within the U.S., the company determines the expected long-term rate of return on plan assets by performing a detailed analysis of key economic and market factors driving historical returns for each asset class and formulating a projected return based on factors in the current environment. Factors considered include, but are not limited to, inflation, real economic growth, interest rate yield, interest rate spreads, and other valuation measures and market metrics. The expected long-term rate of return for each asset class is then weighted based on the strategic asset allocation approved by the governing body for each plan. The company's historical experience with the pension fund asset performance is also considered. For non-U.S. plans, assumptions reflect economic assumptions applicable to each country.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Effective 2016, DuPont elected to adopt a spot rate approach to determine the discount rate utilized to measure the service cost and interest cost components of net periodic pension and other post employment benefit costs for its U.S. plans. Under the spot rate approach, the company calculates service costs and interest costs by applying individual spot rates from a yield curve (based on high-quality corporate bond yields) to the separate expected cash flows components of service cost and interest cost. Service cost and interest cost for all other plans are determined on the basis of the single equivalent discount rates derived in determining those plan obligations. The company changed to the new method to provide a more precise measure of interest and service costs for certain plans by improving the correlation between projected benefit cash flows and the discrete spot yield curves. The company has accounted for this change as a change in accounting estimate and it was applied prospectively starting in 2016. For non-U.S. benefit plans, the company utilizes prevailing long-term high quality corporate bond indices to determine the discount rate applicable to each country at the measurement date.

The discount rates utilized to measure the pension and other post employment obligations are based on the yield on high-quality corporate fixed income investments at the measurement date. Future expected actuarially determined cash flows are individually discounted at the spot rates under Aon Hewitt AA_Above Median yield curve (based on high-quality corporate bond yields) to arrive at the plan's obligations as of the measurement date. For non-U.S. benefit plans, the company utilizes prevailing long-term high quality corporate bond indices to determine the discount rate applicable to each country at the measurement date.

In October 2014, the U.S. Society of Actuaries ("SOA") released final reports of new mortality tables and a mortality improvement scale for measurement of retirement program obligations in the U.S. The SOA publishes updated mortality improvement scales on an annual basis. The company has adopted the 2016 and 2017 SOA mortality improvement scale in measuring its U.S. pension and other postretirement obligations for the years ended December 31, 2016 and 2017, respectively. The effect of these adoptions is amortized into net periodic benefit cost for the years following the adoption.

E. I. du Pont de Nemours and Company

Notes to the Consolidated Financial Statements (continued)

Summarized information on the company's pension and other post employment benefit plans is as follows:

Change in Projected Benefit Obligations, Plan Assets and Funded Status

(In millions)	Defined Benefit Pension Plans			Other Post Employment Benefits		
	Successor		Predecessor	Successor		Predecessor
	For the Period September 1 through December 31, 2017	For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016	For the Period September 1 through December 31, 2017	For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016
Change in benefit obligations:

¹ The benefit obligation and the fair value of plan assets at the beginning of the period September 1 through December 31, 2017, reflects the remeasurement of the plans at the Merger Effectiveness Time.

² In the fourth quarter of 2016, about \$550 million of lump-sum payments were made from the principal U.S. pension plan trust fund to a group of separated, vested plan participants who were extended a limited-time opportunity and voluntarily elected to receive their pension benefits in a single lump-sum payment. In the fourth quarter of 2017,

about \$140 million of lump-sum payments were made from the principal U.S. pension plan trust fund under a similar program.

3. As of December 31, 2017, \$389 million of the benefit obligations are supported by funding under the Trust agreement, defined in the "Trust Assets" section below.

4. Includes pension plans maintained around the world where funding is not customary.

Years 2023-2027	7,533	906
Total	15,538	2,080

Plan Assets

All pension plan assets in the U.S. are invested through a single master trust fund. The strategic asset allocation for this trust fund is approved by management. The general principles guiding U.S. pension asset investment policies are those embodied in the Employee Retirement Income Security Act of 1974 (ERISA). These principles include discharging DuPont's investment responsibilities for the exclusive benefit of plan participants and in accordance with the "prudent expert" standard and other ERISA rules and regulations. DuPont establishes strategic asset allocation percentage targets and appropriate benchmarks for significant asset classes with the aim of achieving a prudent balance between return and risk. Strategic asset allocations in other countries are selected in accordance with the laws and practices of those countries. Where appropriate, asset liability studies are utilized in this process. U.S. plan assets and a portion of non-U.S. plan assets are managed by investment professionals employed by DuPont. The remaining assets are managed by professional investment firms unrelated to the company. DuPont's pension investment professionals have discretion to manage the assets within established asset allocation ranges approved by management of the company. Additionally, pension trust funds are permitted to enter into certain contractual arrangements generally described as "derivatives". Derivatives are primarily used to reduce specific market risks, hedge currency and adjust portfolio duration and asset allocation in a cost-effective manner.

In connection with pension contributions of \$2,900 million to its principal U.S. pension plan during the period of January 1, 2017 through August 31, 2017, an investment policy study was completed for the principal U.S. pension plan. The study resulted in new target asset allocations being approved for the U.S. pension plan with resulting changes to the expected return on plan assets. The long-term rate of return on assets decreased from 8 percent to 6.25 percent.

The weighted-average target allocation for plan assets of the company's pension plans is summarized as follows:

Asset Category	Target Allocation for Plan Assets		Successor		Predecessor	
	December 31, 2017	%	December 31, 2016	%	December 31, 2016	%
U.S. equity securities	17	%	27	%		
Non-U.S. equity securities	18		24			
Fixed income securities	50		33			
Hedge funds	2		2			
Private market securities	8		8			
Real estate	3		4			

Cash and cash equivalents	2		2	
Total	100	%	100	%

Global equity securities include varying market capitalization levels. U.S. equity investments are primarily large-cap companies. Global fixed income investments include corporate-issued, government-issued and asset-backed securities. Corporate debt investments include a range of credit risk and industry diversification. U.S. fixed income investments are weighted heavier than non-U.S. fixed income securities. Other investments include cash and cash equivalents, hedge funds, real estate and private market securities such as interests in private equity and venture capital partnerships.

F-63

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Fair value calculations may not be indicative of net realizable value or reflective of future fair values. Furthermore, although the company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

For pension plan assets classified as Level 1 measurements (measured using quoted prices in active markets), total fair value is either the price of the most recent trade at the time of the market close or the official close price, as defined by the exchange on which the asset is most actively traded on the last trading day of the period, multiplied by the number of units held without consideration of transaction costs.

For pension or other post employment benefit plan assets classified as Level 2 measurements, where the security is frequently traded in less active markets, fair value is based on the closing price at the end of the period; where the security is less frequently traded, fair value is based on the price a dealer would pay for the security or similar securities, adjusted for any terms specific to that asset or liability. Market inputs are obtained from well-established and recognized vendors of market data and subjected to tolerance and quality checks. For derivative assets and liabilities, standard industry models are used to calculate the fair value of the various financial instruments based on significant observable market inputs, such as foreign exchange rates, commodity prices, swap rates, interest rates and implied volatilities obtained from various market sources.

For pension plan assets classified as Level 3 measurements, total fair value is based on significant unobservable inputs including assumptions where there is little, if any, market activity for the investment. Investment managers or fund managers provide valuations of the investment on a monthly or quarterly basis. These valuations are reviewed for reasonableness based on applicable sector, benchmark and company performance. Adjustments to valuations are made where appropriate. Where available, audited financial statements are obtained and reviewed for the investments as support for the manager's investment valuation.

The tables below present the fair values of the company's pension assets by level within the fair value hierarchy, as described in Note 1:

Basis of Fair Value Measurements

For the year ended December 31, 2017 (Successor)

Balance at December 31, 2017	\$ 17	\$ 3	\$ 27	\$ 2	\$ 2	\$ 14	\$ 96	\$ 161

The following table presents additional information about the pension plan assets valued using net asset value as a practical expedient:

(In millions)	Successor		Predecessor		Redemption Frequency	Redemption Notice Period	Range
	Fair Value	Unfunded Commitments	Fair Value	Unfunded Commitments			
Hedge funds ¹	747	—	434	—	Monthly, Quarterly	Ranges from 15-45 days monthly, 10-185 days quarterly	
Private market securities ²	1,383	797	1,416	693	Not applicable	Not applicable	
Real estate funds ²	437	371	444	244	Not applicable	Not applicable	
Total	\$ 2,567	\$ 1,168	\$ 2,294	\$ 937			

¹ Less than 5 percent of hedge funds have gates in place at the investor level for year-end redemptions. Hedge funds also contain either no lock up or a lock up period of less than 1 year.

² The remaining life of private market securities and real estate funds is an average of 15 years per investment.

F-66

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Trust Assets

DuPont entered into a trust agreement in 2013 (as amended and restated in 2017) that established and requires DuPont to fund a trust (the "Trust") for cash obligations under certain non-qualified benefit and deferred compensation plans upon a change in control event as defined in the Trust agreement. Under the Trust agreement, the consummation of the Merger was a change in control event. As a result, in November 2017, DuPont contributed \$571 million to the Trust. In the fourth quarter of 2017, \$13 million was distributed to DuPont according to the Trust agreement and at December 31, 2017, the balance in the Trust was \$558 million.

Defined Contribution Plans

DuPont provides defined contribution benefits to its employees. The most significant is the U.S. Retirement Savings Plan ("the Plan"), which covers all U.S. full-service employees. This Plan includes a non-leveraged Employee Stock Ownership Plan ("ESOP"). Employees are not required to participate in the ESOP and those who do are free to diversify out of the ESOP. The purpose of the Plan is to provide retirement savings benefits for employees and to provide employees an opportunity to become stockholders of the company. The Plan is a tax qualified contributory profit sharing plan, with cash or deferred arrangement and any eligible employee of DuPont may participate. Currently, DuPont contributes 100 percent of the first 6 percent of the employee's contribution election and also contributes 3 percent of each eligible employee's eligible compensation regardless of the employee's contribution.

DuPont's contributions to the Plan were \$53 million, \$129 million, \$187 million and \$219 million for the periods September 1 through December 31, 2017 and January 1 through August 31, 2017 and the years ended December 31, 2016 and 2015, respectively. DuPont's matching contributions vest immediately upon contribution. The 3 percent nonmatching company contribution vests after employees complete three years of service. In addition, DuPont made contributions to other defined contribution plans of \$17 million, \$33 million, \$33 million and \$57 million for the periods September 1 through December 31, 2017 and January 1 through August 31, 2017 and the years ended December 31, 2016 and 2015, respectively. Included in DuPont's contributions are amounts related to discontinued operations of \$1 million, \$5 million, \$6 million and \$39 million for the periods September 1 through December 31, 2017 and January 1 through August 31, 2017 and the years ended December 31, 2016 and 2015, respectively.

NOTE 17 - STOCK-BASED COMPENSATION

The company's Equity Incentive Plan ("EIP"), as amended and restated effective August 31, 2017, provides for equity-based and cash incentive awards to certain employees, directors, and consultants. All outstanding DuPont equity awards as of the Merger date were converted into equity awards with respect to DowDuPont Common Stock. The previous DuPont equity awards were converted into the right to receive 1.2820 shares of DowDuPont Common Stock and had a fair value of approximately \$629 million at the Merger closing date, which was included in the total consideration exchanged. The converted DuPont equity awards were measured at their fair value and included \$485 million as consideration exchanged and \$144 million (includes \$23 million of incremental expense as a result of the conversion) that will be amortized to stock compensation expense over the remaining vesting period of the awards. The fair values of the converted awards were based on valuation assumptions developed by management and other information including, but not limited to, historical volatility and dividend yield of DuPont and Dow. DuPont and Dow did not merge their equity and incentive plans as a result of the Merger.

Under the amended EIP, the maximum number of shares reserved for the grant or settlement of awards is 110 million shares, provided that each share in excess of 30 million that is issued with respect to any award that is not an option or stock appreciation right will be counted against the 110 million share limit as four and one-half shares. At December 31, 2017, approximately 34 million shares were authorized for future grants under the EIP. The company satisfies stock option exercises and vesting of time-vested restricted stock units ("RSUs") and performance-based

restricted stock units ("PSUs") with newly issued shares of DowDuPont Common Stock.

The total stock-based compensation cost included in continuing operations within the Consolidated Statement of Operations was \$33 million, \$85 million, \$118 million and \$127 million for the period September 1 through December 31, 2017, the period January 1 through August 31, 2017, and the years ended December 31, 2016 and 2015, respectively. The income tax benefits related to stock-based compensation arrangements were \$11 million, \$29 million, \$39 million and \$42 million for the period September 1 through December 31, 2017, the period January 1 through August 31, 2017, and the years ended December 31, 2016 and 2015, respectively.

The compensation committee determines the long-term incentive mix, including stock options, RSUs and PSUs and may authorize new grants annually. The company estimates expected forfeitures.

F-67

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Stock Options

The exercise price of shares subject to option is equal to the market price of DowDuPont's stock on the date of grant. All options vest serially over a three-year period. Stock option awards granted between 2010 and 2015 expire seven years after the grant date and options granted in 2016 and 2017 expire ten years after the grant date. The plan allows retirement-eligible employees to retain any granted awards upon retirement provided the employee has rendered at least six months of service following grant date.

The weighted-average grant-date fair value of options granted in the period September 1 through December 31, 2017, the period January 1 through August 31, 2017, and the years ended December 31, 2016 and 2015 was \$28.56, \$16.65, \$13.40, and \$11.57, respectively.

To measure the fair value of the awards on the date of grant, the company used the Black-Scholes option pricing model and the following assumptions:

Weighted-Average Assumptions	Successor		Predecessor	
	For the Period September 1 1 through December 31, 2017	For the Period January 1 through August 31, 2017	For the Year Ended December 31, 2016	For the Year Ended December 31, 2015
Dividend yield	2.2	% 2.0	% 2.6	% 2.5
Expected volatility	23.59	% 23.21	% 28.27	% 22.52
Risk-free interest rate	2.1	% 2.3	% 1.8	% 1.4
Expected life of stock options granted during period (years)	7.2	7.2	7.2	5.3

In the Successor period, the company determined the dividend yield by dividing the annualized dividend on DowDuPont's Common Stock by the option exercise price. In the Predecessor periods, the company determined the dividend yield by dividing the annual dividend on DuPont's stock by the option exercise price. A historical daily measurement of volatility is determined based on the expected life of the option granted. In the Successor period, the measurement of volatility used DowDuPont stock information after the Merger date, and a weighted average of Dow and DuPont stock information prior to Merger date. In the Predecessor periods, the measurement of volatility used DuPont stock information.

The risk-free interest rate is determined by reference to the yield on an outstanding U.S. Treasury note with a term equal to the expected life of the option granted. Expected life is determined by reference to the company's historical experience.

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The following table summarizes stock option activity for 2017 under the EIP:

Stock Options	2017			Aggregate Intrinsic Value (in thousands)
	Number of Shares (in thousands)	Weighted Average Exercise Price (per share)	Weighted Average Remaining Contractual Term (years)	
Outstanding at January 1, 2017 (Predecessor)	15,696	\$ 58.11		
Granted	1,626	76.18		
Exercised	(4,356)	54.52		
Forfeited/Expired	(136)	60.93		
Outstanding at August 31, 2017 ¹	12,830	\$ 61.84	4.71	\$ 283,365
Exercisable at August 31, 2017	8,441	\$ 57.78	3.37	\$ 220,716
Outstanding at September 1, 2017 (Successor) ¹	16,447	\$ 48.24		
Granted	174	45.29		
Exercised	(702)	43.07		
Forfeited/Expired	(30)	54.83		
Outstanding at December 31, 2017	15,889	\$ 48.43	3.74	\$ 362,088
Exercisable at December 31, 2017	10,881	\$ 45.75	3.06	\$ 277,163

As a result of the Merger, all previous DuPont equity awards were converted into the right to receive 1.2820 shares¹ of DowDuPont Common Stock, as discussed above. As a result, the number of shares outstanding at September 1, 2017 represents the shares as of August 31, 2017 multiplied by the conversion factor.

The aggregate intrinsic values in the table above represent the total pre-tax intrinsic value (the difference between the closing stock price on the last trading day of the period and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their in-the-money options at period end. Total intrinsic value of options exercised for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017, and for the years ended December 31, 2016 and 2015 were \$19 million, \$108 million, \$86 million and \$160 million, respectively. For the period September 1 through December 31, 2017 and for the period January 1 through August 31, 2017, the company realized tax benefits from options exercised of \$6 million and \$36 million, respectively.

As of December 31, 2017, \$24 million of total unrecognized pre-tax compensation expense related to non-vested stock options is expected to be recognized over a weighted-average period of 1.86 years.

Restricted Stock Units and Performance Deferred Stock

The company issues non-vested RSUs that serially vest over a three-year period and, upon vesting, convert one-for-one to DowDuPont Common Stock. A retirement-eligible employee retains any granted awards upon retirement provided the employee has rendered at least six months of service following the grant date. Additional RSUs are also granted periodically to key senior management employees. These RSUs generally vest over periods ranging from two to five years. The fair value of all stock-settled RSUs is based upon the market price of the underlying common stock as of the grant date. The awards have the same terms and conditions as were applicable to such equity awards immediately prior to the Merger closing date.

The company grants PSUs to senior leadership. As a result of the Merger, the EIP provisions required PSUs to be converted into RSUs based on the number of PSUs that would vest by assuming that target levels of performance are achieved. Service requirements for vesting in the RSUs replicate those inherent in the exchanged PSUs.

F-69

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Vesting for PSUs granted in 2016 and for the period January 1, 2017 through August 31, 2017 is based upon total shareholder return ("TSR") relative to peer companies. Vesting for PSUs granted in 2015 is equally based upon change in operating net income relative to target and TSR relative to peer companies. Operating net income is net income attributable to DuPont excluding income from discontinued operations after taxes, significant after tax benefits (charges), and non-operating pension and OPEB costs. Non-operating pension and OPEB costs includes all of the components of net periodic benefit cost from continuing operations with the exception of the service cost component. Performance and payouts are determined independently for each metric. The actual award, delivered as DowDuPont Common Stock, can range from zero percent to 200 percent of the original grant. The weighted-average grant-date fair value of PSUs granted for the period January 1 through August 31, 2017, subject to the TSR metric, was \$91.56, and estimated using a Monte Carlo simulation. The weighted-average grant-date fair value of the PSUs, subject to the revenue metric, was based upon the market price of the underlying common stock as of the grant date.

In accordance with the Merger Agreement, PSUs converted to RSUs based on an assessment of the underlying market conditions in the PSUs at the greater of target or actual performance levels as of the closing date. As the actual performance levels were not in excess of target as of the closing date, all PSUs converted to RSUs based on target and there was no incremental benefit from the Merger Agreement when compared to DuPont's EIP.

In November 2017, DowDuPont granted PSUs to senior leadership that vest partially based on the realization of cost savings in connection with DowDuPont Cost Synergy Program, as well as DowDuPont's ability to complete the Intended Business Separations. Performance and payouts are determined independently for each metric. The actual award, delivered in DowDuPont Common Stock, can range from zero percent to 200 percent of the original grant. The weighted-average grant date fair value of the PSUs granted in November 2017 of \$71.16 was based upon the market price of the underlying common stock as of the grant date.

Nonvested awards of RSUs and PSUs are shown below.

	2017	
	Number of Shares (in thousand)	Weighted Average Grant Date Fair Value (per share)
Nonvested at December 31, 2016 (Predecessor)	3,390	\$ 63.11
Granted	1,124	76.41
Vested	(1,332)	63.08
Forfeited	(104)	70.69
Nonvested at August 31, 2017 ¹	3,078	\$ 67.53
Nonvested at September 1, 2017 (Successor) ¹	3,948	\$ 67.06
Granted	412	70.02
Vested	(139)	67.67
Forfeited	(23)	66.65
Nonvested at December 31, 2017	4,198	\$ 68.28

As a result of the Merger, all previous DuPont equity awards were converted into the right to receive 1.2820 shares¹ of DowDuPont Common Stock, as discussed above. As a result, the number of shares outstanding at September 1, 2017 represents the shares as of August 31, 2017 multiplied by the conversion factor.

The total fair value of stock units vested during for the period September 1 through December 31, 2017, the period January 1 through August 31, 2017, and the years ended December 31, 2016 and 2015 was \$9 million, \$84 million, \$83 million and \$64 million, respectively. The weighted-average grant-date fair value of stock units granted for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017, and for the years ended December 31, 2016 and 2015 was \$70.02, \$76.41, \$59.50, and \$71.66, respectively.

As of December 31, 2017, \$113 million of total unrecognized pre-tax compensation expense related to RSUs and PSUs is expected to be recognized over a weighted average period of 1.73 years.

Other Cash-based Awards

Other cash-based awards resulted in compensation expense of \$83 million, \$264 million, \$295 million and \$179 million for the period September 1 through December 31, 2017, for the period January 1 through August 31, 2017, and for the years ended December 31, 2016 and 2015, respectively, included in income from continuing operations within the Consolidated Statement of Operations.

F-70

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

NOTE 18 - FINANCIAL INSTRUMENTS

At December 31, 2017, the company had \$5,205 million (\$2,713 million at December 31, 2016) of held-to-maturity securities (primarily time deposits and money market funds) classified as cash equivalents, as these securities had maturities of three months or less at the time of purchase; and \$952 million (\$1,362 million at December 31, 2016) of held-to-maturity securities (primarily time deposits) classified as marketable securities as these securities had maturities of more than three months to less than 1 year at the time of purchase. The company's investments in held-to-maturity securities are held at amortized cost, which approximates fair value. These securities are included in cash and cash equivalents, marketable securities, and other current assets in the consolidated balance sheets.

Available-for-sale securities are reported at estimated fair value with unrealized gains and losses reported as a component of accumulated other comprehensive loss. There were no sales of available-for-sale securities for the period September 1 through December 31, 2017 or for the period January 1 through August 31, 2017. The proceeds from the sale of available-for-sale securities for the year ended December 31, 2016 were \$788 million.

Derivative Instruments

Objectives and Strategies for Holding Derivative Instruments

In the ordinary course of business, the company enters into contractual arrangements (derivatives) to reduce its exposure to foreign currency, interest rate and commodity price risks. The company has established a variety of derivative programs to be utilized for financial risk management. These programs reflect varying levels of exposure coverage and time horizons based on an assessment of risk.

Derivative programs have procedures and controls and are approved by the Corporate Financial Risk Management Committee, consistent with the company's financial risk management policies and guidelines. Derivative instruments used are forwards, options, futures and swaps. The company has not designated any nonderivatives as hedging instruments.

The company's financial risk management procedures also address counterparty credit approval, limits and routine exposure monitoring and reporting. The counterparties to these contractual arrangements are major financial institutions and major commodity exchanges. The company is exposed to credit loss in the event of nonperformance by these counterparties. The company utilizes collateral support annex agreements with certain counterparties to limit its exposure to credit losses. The company anticipates performance by counterparties to these contracts and therefore no material loss is expected. Market and counterparty credit risks associated with these instruments are regularly reported to management.

The notional amounts of the company's derivative instruments were as follows:

Notional Amounts (In millions)	Successor Predecessor	
	December 31, 2017	December 31, 2016
Derivatives designated as hedging instruments:		
Commodity contracts	\$ 587	\$ 422
Derivatives not designated as hedging instruments:		
Foreign currency contracts	10,454	9,896
Commodity contracts	6	7

Foreign Currency Risk

The company's objective in managing exposure to foreign currency fluctuations is to reduce earnings and cash flow volatility associated with foreign currency rate changes. Accordingly, the company enters into various contracts that change in value as foreign exchange rates change to protect the value of its existing foreign currency-denominated assets, liabilities, commitments and cash flows.

F-71

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

The company routinely uses forward exchange contracts to offset its net exposures, by currency, related to the foreign currency denominated monetary assets and liabilities of its operations. The primary business objective of this hedging program is to maintain an approximately balanced position in foreign currencies so that exchange gains and losses resulting from exchange rate changes, net of related tax effects, are minimized. The company also uses foreign currency exchange contracts to offset a portion of the company's exposure to certain foreign currency-denominated revenues so that gains and losses on these contracts offset changes in the USD value of the related foreign currency-denominated revenues. The objective of the hedge program is to reduce earnings and cash flow volatility related to changes in foreign currency exchange rates.

Commodity Price Risk

Commodity price risk management programs serve to reduce exposure to price fluctuations on purchases of inventory such as corn, soybeans, soybean oil and soybean meal. The company enters into over-the-counter and exchange-traded derivative commodity instruments to hedge the commodity price risk associated with agricultural commodity exposures.

Derivatives Designated as Cash Flow Hedges

Foreign Currency Contracts

The company uses foreign currency exchange instruments such as forwards and options to offset a portion of the company's exposure to certain foreign currency-denominated revenues so that gains and losses on these contracts offset changes in the USD value of the related foreign currency-denominated revenues. In addition, the company occasionally uses forward exchange contracts to offset a portion of the company's exposure to certain foreign currency-denominated transactions such as capital expenditures.

Commodity Contracts

The company enters into over-the-counter and exchange-traded derivative commodity instruments, including options, futures and swaps, to hedge the commodity price risk associated with agriculture commodity exposures.

While each risk management program has a different time maturity period, most programs currently do not extend beyond the next two-year period. Cash flow hedge results are reclassified into earnings during the same period in which the related exposure impacts earnings. Reclassifications are made sooner if it appears that a forecasted transaction is not probable of occurring.

The following table summarizes the after-tax effect of cash flow hedges on accumulated other comprehensive loss:

(In millions)	Successor For the Period September 1 - December 31, 2017	Predecessor For the Period Jan. 1 - August 31, 2017	Year Ended December 31, 2016
Beginning balance	\$ —	\$ 7	\$ (24)
Additions and revaluations of derivatives designated as cash flow hedges	(2)	3	20
Clearance of hedge results to earnings	—	(13)	11

Ending balance \$ (2) \$ (3) \$ 7

At December 31, 2017, an after-tax net loss of \$(6) million is expected to be reclassified from accumulated other comprehensive loss into earnings over the next twelve months.

Derivatives not Designated in Hedging Relationships

Foreign Currency Contracts

The company routinely uses forward exchange contracts to reduce its net exposure, by currency, related to foreign currency-denominated monetary assets and liabilities of its operations so that exchange gains and losses resulting from exchange rate changes are minimized. The netting of such exposures precludes the use of hedge accounting; however, the required revaluation of the forward contracts and the associated foreign currency-denominated monetary assets and liabilities intends to achieve a minimal earnings impact, after taxes. The company also uses foreign currency exchange contracts to offset a portion of the company's exposure to certain foreign currency-denominated revenues so that gains and losses on the contracts offset changes in the USD value of the related foreign currency-denominated revenues.

F-72

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

Commodity Contracts

The company utilizes options, futures and swaps that are not designated as hedging instruments to reduce exposure to commodity price fluctuations on purchases of inventory such as corn, soybeans, soybean oil and soybean meal.

Fair Value of Derivative Instruments

During the Predecessor period, the company's derivative assets and liabilities are reported on a gross basis in the Consolidated Balance Sheets. During the Successor period, to conform with DowDuPont's presentation post-merger, asset and liability derivatives subject to an enforceable master netting arrangement with the same counterparty are presented on a net basis in the Consolidated Balance Sheets. The presentation of the company's derivative assets and liabilities is as follows:

(In millions)	Balance Sheet Location	Successor December 31, 2017	Net Amounts Included in the Condensed Consolidated Balance Sheet
		Gross and Cash Collateral Netting ¹	
Asset derivatives:			
Derivatives not designated as hedging instruments:			
Foreign currency contracts	Other current assets	\$46\$ (37)	\$ 9
Total asset derivatives		\$46\$ (37)	\$ 9
Liability derivatives:			
Derivatives not designated as hedging instruments:			
Foreign currency contracts	Accrued and other current liabilities	\$79\$ (32)	\$ 47
Total liability derivatives		\$79\$ (32)	\$ 47

Counterparty and cash collateral amounts represent the estimated net settlement amount when applying netting and set-off rights included in master netting arrangements between the company and its counterparties and the payable or receivable for cash collateral held or placed with the same counterparty. The company held cash collateral of \$5 million as of December 31, 2017.

(In millions)	Balance Sheet Location	Predecessor December 31, 2016
Asset derivatives:		
Derivatives not designated as hedging instruments:		
Foreign currency contracts ¹	Accounts and notes receivable - net	\$ 182

Notes to the Consolidated Financial Statements (continued)

NOTE 19 - FAIR VALUE MEASUREMENTS

The following tables summarize the bases used to measure certain assets and liabilities at fair value on a recurring basis:

December 31, 2017 (Successor) Significant
Other
Observable
(In millions) Inputs
(Level 2)

Assets at fair value:

Cash equivalents¹ \$ 5,205

Marketable securities \$ 952

Derivatives relating to:²

Foreign currency 46

Total assets at fair value \$ 6,203

Liabilities at fair value:

Long-term debt³ \$ 11,560Derivatives relating to:²

Foreign currency 79

Total liabilities at fair value \$ 11,639

Time deposits included in "Cash and cash equivalents" and money market funds included in "Other current assets" in the consolidated balance sheets are held at amortized cost, which approximates fair value.

2. See Note 18 for the classification of derivatives in the consolidated balance sheets.

3. See Note 13 for information on fair value measurements of long-term debt.

December 31, 2016 (Predecessor) Significant
Other
Observable
(In millions) Inputs
(Level 2)

Assets at fair value:

Cash equivalents¹ \$ 2,713

Marketable securities \$ 1,362

Derivatives relating to:²

Foreign currency 182

Total assets at fair value \$ 4,257

Liabilities at fair value:

Long-term debt³ \$ 8,464Derivatives relating to:²

Foreign currency 121

Total liabilities at fair value \$ 8,585

Time deposits included in "Cash and cash equivalents" and money market funds included in "Other current assets" in the consolidated balance sheets are held at amortized cost, which approximates fair value.

2. See Note 18 for the classification of derivatives in the consolidated balance sheets.

3. See Note 13 for information on fair value measurements of long-term debt.

For assets and liabilities classified as Level 1 measurements (measured using quoted prices in active markets), total fair value is either the price of the most recent trade at the time of the market close or the official close price, as defined by the exchange on which the asset is most actively traded on the last trading day of the period, multiplied by the number of units held without consideration of transaction costs.

For assets and liabilities classified as Level 2 measurements, where the security is frequently traded in less active markets, fair value is based on the closing price at the end of the period; where the security is less frequently traded, fair value is based on the price a dealer would pay for the security or similar securities, adjusted for any terms specific to that asset or liability, or by using observable market data points of similar, more liquid securities to imply the price. For time deposits classified as held-to-maturity investments and reported at amortized cost, fair value is based on an observable interest rate for similar securities. Market inputs are obtained from well-established and recognized vendors of market data and subjected to tolerance and quality checks.

F-75

E. I. du Pont de Nemours and Company
Notes to the Consolidated Financial Statements (continued)

For derivative assets and liabilities, standard industry models are used to calculate the fair value of the various financial instruments based on significant observable market inputs, such as foreign exchange rates, commodity prices, swap rates, interest rates and implied volatilities obtained from various market sources. Market inputs are obtained from well-established and recognized vendors of market data and subjected to tolerance/quality checks.

For all other assets and liabilities for which observable inputs are used, fair value is derived through the use of fair value models, such as a discounted cash flow model or other standard pricing models. See Note 18 for further information on the types of instruments used by the company for risk management.

There were no transfers between Levels 1 and 2 during the years ended December 31, 2017 and December 31, 2016.

For assets classified as Level 3 measurements, the fair value is based on significant unobservable inputs including assumptions where there is little, if any, market activity. The fair value of the company's interests held in trade receivable conduits is determined by calculating the expected amount of cash to be received using the key input of anticipated credit losses in the portfolio of receivables sold that have not yet been collected. Given the short-term nature of the underlying receivables, discount rate and prepayments are not factors in determining the fair value of the interests.

NOTE 20 - GEOGRAPHIC AND PRODUCT LINE INFORMATION

Sales are attributed to geographic areas based on customer location; long-lived assets are attributed to geographic areas based on asset location.

Net Sales by Principal Product Line

Effective with the Merger, DuPont's business activities are components of its parent company's business operations. DuPont's business activities, including the assessment of performance and allocation of resources, are reviewed and managed by DowDuPont. Information used by the chief operating decision maker of DuPont relates to the company in its entirety. Accordingly, there are no separate reportable business segments for DuPont under ASC Topic 280 "Segment Reporting" and DuPont's business results are reported in this Form 10-K as a single operating segment. Prior year's segment information has been made to conform to the current presentation.

The company has one reportable segment with the following principal product lines: agriculture, packaging and specialty plastics, electronics and imaging, nutrition and health, industrial biosciences, transportation and advanced polymers and safety and construction. Net sales by principal product line are included below:

additional information.

9. Due to quarterly changes in the share count and the allocation of income to participating securities, the sum of the four quarters may not equal the earnings per share amount calculated for the year.

NOTE 22 - SUBSEQUENT EVENTS

In February 2018, the company entered into a new committed receivable repurchase facility of up to \$1,300 million (the 2018 Repurchase Facility) which expires in December 2018. Under the 2018 Repurchase Facility, DuPont may sell a portfolio of available and eligible outstanding customer notes receivables within the agriculture product line to participating institutions and simultaneously agree to repurchase at a future date. The 2018 Repurchase Facility is considered a secured borrowing with the customer notes receivables inclusive of those that are sold and repurchased, equal to 105 percent of the outstanding amounts borrowed utilized as collateral. Borrowings under the 2018 Repurchase Facility will have an interest rate of LIBOR + 0.75 percent.
