EASTGROUP PROPERTIES, INC. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(1) BASIS OF PRESENTATION

The accompanying unaudited financial statements of EastGroup Properties, Inc. (“EastGroup” or “the Company”) have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In management’s opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. The financial statements should be read in conjunction with the financial statements contained in the 2013 annual report on Form 10-K and the notes thereto. Certain reclassifications have been made in the 2013 consolidated financial statements to conform to the 2014 presentation.

(2) PRINCIPLES OF CONSOLIDATION

The consolidated financial statements include the accounts of EastGroup Properties, Inc., its wholly owned subsidiaries and its investment in any joint ventures in which the Company has a controlling interest. At September 30, 2014 and December 31, 2013, the Company had a controlling interest in two joint ventures: the 80% owned University Business Center and the 80% owned Castilian Research Center. The Company records 100% of the joint ventures’ assets, liabilities, revenues and expenses with noncontrolling interests provided for in accordance with the joint venture agreements. The equity method of accounting is used for the Company’s 50% undivided tenant-in-common interest in Industry Distribution Center II. All significant intercompany transactions and accounts have been eliminated in consolidation.

(3) USE OF ESTIMATES

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and revenues and expenses during the reporting period and to disclose material contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

(4) REAL ESTATE PROPERTIES

EastGroup has one reportable segment – industrial properties. These properties are concentrated in major Sunbelt markets of the United States, primarily in the states of Florida, Texas, Arizona, California and North Carolina, have similar economic characteristics and also meet the other criteria permitting the properties to be aggregated into one reportable segment.

The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows (including estimated future expenditures necessary to substantially complete the asset) expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset. As of September 30, 2014 and December 31, 2013, the Company determined that no impairment charges on the Company’s real estate properties were necessary.

Depreciation of buildings and other improvements is computed using the straight-line method over estimated useful lives of generally 40 years for buildings and 3 to 15 years for improvements. Building improvements are capitalized, while maintenance and repair expenses are charged to expense as incurred. Significant renovations and improvements that improve or extend the useful life of the assets are capitalized. Depreciation expense for continuing and discontinued operations was \$14,504,000 and \$42,571,000 for the three and nine months ended September 30, 2014, respectively, and \$13,826,000 and \$40,377,000 for the same periods in 2013.

EASTGROUP PROPERTIES, INC. AND SUBSIDIARIES  
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The Company's real estate properties and development at September 30, 2014 and December 31, 2013 were as follows:

	September 30, 2014	December 31, 2013
	(In thousands)	
Real estate properties:		
Land	\$278,642	265,871
Buildings and building improvements	1,274,813	1,210,318
Tenant and other improvements	322,371	302,370
Development	169,623	148,767
	2,045,449	1,927,326
Less accumulated depreciation	(588,059 )	(550,113 )
	\$1,457,390	1,377,213

#### (5) DEVELOPMENT

During the period in which a property is under development, costs associated with development (i.e., land, construction costs, interest expense, property taxes and other direct and indirect costs associated with development) are aggregated into the total capitalized costs of the property. Included in these costs are management's estimates for the portions of internal costs (primarily personnel costs) deemed directly or indirectly related to such development activities. The internal costs are allocated to specific development properties based on construction activity. As the property becomes occupied, depreciation commences on the occupied portion of the building, and costs are capitalized only for the portion of the building that remains vacant. When the property becomes 80% occupied or one year after completion of the shell construction (whichever comes first), capitalization of development costs ceases. The properties are then transferred to real estate properties, and depreciation commences on the entire property (excluding the land).

#### (6) BUSINESS COMBINATIONS AND ACQUIRED INTANGIBLES

Upon acquisition of real estate properties, the Company applies the principles of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 805, Business Combinations, which requires that acquisition-related costs be recognized as expenses in the periods in which the costs are incurred and the services are received. The Codification also provides guidance on how to properly determine the allocation of the purchase price among the individual components of both the tangible and intangible assets based on their respective fair values. Goodwill is recorded when the purchase price exceeds the fair value of the assets and liabilities acquired. Factors considered by management in allocating the cost of the properties acquired include an estimate of carrying costs during the expected lease-up periods considering current market conditions and costs to execute similar leases. The allocation to tangible assets (land, building and improvements) is based upon management's determination of the value of the property as if it were vacant using discounted cash flow models. The Company determines whether any financing assumed is above or below market based upon comparison to similar financing terms for similar properties. The cost of the properties acquired may be adjusted based on indebtedness assumed from the seller that is determined to be above or below market rates.

The purchase price is also allocated among the following categories of intangible assets: the above or below market component of in-place leases, the value of in-place leases, and the value of customer relationships. The value allocable to the above or below market component of an acquired in-place lease is determined based upon the present value (using a discount rate reflecting the risks associated with the acquired leases) of the difference between (i) the contractual amounts to be paid pursuant to the lease over its remaining term, and (ii) management's estimate of the

amounts that would be paid using fair market rates over the remaining term of the lease. The amounts allocated to above and below market leases are included in Other Assets and Other Liabilities, respectively, on the Consolidated Balance Sheets and are amortized to rental income over the remaining terms of the respective leases. The total amount of intangible assets is further allocated to in-place lease values and customer relationship values based upon management's assessment of their respective values. These intangible assets are included in Other Assets on the Consolidated Balance Sheets and are amortized over the remaining term of the existing lease, or the anticipated life of the customer relationship, as applicable.

Amortization expense for in-place lease intangibles for continuing and discontinued operations was \$1,215,000 and \$3,548,000 for the three and nine months ended September 30, 2014, respectively, and \$1,284,000 and \$3,061,000 for the same periods in 2013. Amortization of above and below market leases increased rental income by \$119,000 and \$295,000 for the three and nine months ended September 30, 2014, respectively, and increased rental income by \$99,000 and \$89,000 for the three and nine months ended September 30, 2013, respectively.

EASTGROUP PROPERTIES, INC. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

During the nine months ended September 30, 2014, EastGroup acquired Ridge Creek Distribution Center III in Charlotte, North Carolina, and Colorado Crossing Distribution Center in Austin, Texas. The Company purchased these properties for a total cost of \$41,751,000, of which \$37,964,000 was allocated to real estate properties. The Company allocated \$7,061,000 of the total purchase price to land using third party land valuations for the Charlotte and Austin markets. The market values are considered to be Level 3 inputs as defined by ASC 820, Fair Value Measurements and Disclosures (see Note 17 for additional information on ASC 820). Intangibles associated with the purchase of real estate were allocated as follows: \$4,660,000 to in-place lease intangibles, \$4,000 to above market leases (both included in Other Assets on the Consolidated Balance Sheets), and \$877,000 to below market leases (included in Other Liabilities on the Consolidated Balance Sheets). These costs are amortized over the remaining lives of the associated leases in place at the time of acquisition.

During the year ended December 31, 2013, the Company acquired Northfield Distribution Center in Dallas, Texas, and Interchange Park II in Charlotte, North Carolina. The Company purchased these properties for a total cost of \$72,397,000, of which \$65,387,000 was allocated to real estate properties. The Company allocated \$13,218,000 of the total purchase price to land using third party land valuations for the Dallas and Charlotte markets. Intangibles associated with the purchase of real estate were allocated as follows: \$8,399,000 to in-place lease intangibles, \$158,000 to above market leases, and \$1,547,000 to below market leases.

EastGroup did not expense any acquisition-related costs for the three months and expensed \$160,000 for the nine months ended September 30, 2014, and expensed \$16,000 and \$183,000 during the three and nine months ended September 30, 2013, respectively.

The Company periodically reviews the recoverability of goodwill (at least annually) and the recoverability of other intangibles (on a quarterly basis) for possible impairment. In management's opinion, no impairment of goodwill or other intangibles existed at September 30, 2014 and December 31, 2013.

#### (7) REAL ESTATE HELD FOR SALE/DISCONTINUED OPERATIONS

The Company considers a real estate property to be held for sale when it meets the criteria established under ASC 360, Property, Plant and Equipment, including when it is probable that the property will be sold within a year. Real estate properties held for sale are reported at the lower of the carrying amount or fair value less estimated costs to sell and are not depreciated while they are held for sale.

In April 2014, the FASB issued Accounting Standards Update (ASU) 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360), Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity, which amends the requirements for reporting discontinued operations. Under ASU 2014-08, a disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations if the disposal represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results when the component or group of components meets the criteria to be classified as held for sale or when the component or group of components is disposed of by sale or other than by sale. In addition, this ASU requires additional disclosures about both discontinued operations and the disposal of an individually significant component of an entity that does not qualify for discontinued operations presentation in the financial statements. The Company adopted the provisions of ASU 2014-08 beginning with the period ended March 31, 2014, and has applied the provisions prospectively.

Prior to the adoption of ASU 2014-08, the results of operations for the operating properties sold or held for sale during the reported periods were shown under Discontinued Operations on the Consolidated Statements of Income and

Comprehensive Income. Interest expense was not generally allocated to the properties held for sale or whose operations were included under Discontinued Operations unless the mortgage was required to be paid in full upon the sale of the property.

During the first quarter of 2014, EastGroup sold one operating property (58,000 square feet) for \$3,600,000 and recognized a gain of \$95,000. During the third quarter of 2014, the Company sold three operating properties (252,000 square feet) in Tampa and Houston for \$14,093,000, generating gains of \$7,417,000. The results of operations and gains on sales for the properties sold during the periods presented are reported under Income from Continuing Operations on the Consolidated Statements of Income and Comprehensive Income. The gains on these property sales are included in Gains on sales of real estate investments.

During 2013, the Company sold three operating properties (49,000 square feet) for \$3,198,000 and recognized gains of \$798,000. The results of operations for the properties sold during 2013 are reported under Discontinued Operations on the Consolidated Statements of Income and Comprehensive Income.

(12) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risk, including interest rate, liquidity and credit risk primarily by managing the amount, sources and duration of its debt funding and, to a limited extent, the use of derivative instruments.

Specifically, the Company has entered into derivative instruments to manage exposures that arise from business activities that result in the payment of future known and uncertain cash amounts, the value of which are determined by interest rates. The Company's derivative instruments, described below, are used to manage differences in the amount, timing and duration of the Company's known or expected cash payments principally related to certain of the Company's borrowings.

The Company's objective in using interest rate derivatives is to manage exposure to interest rate movements and add stability to interest expense. To accomplish this objective, the Company uses interest rate swaps as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable-rate amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount.

As of September 30, 2014, the Company had four interest rate swaps outstanding, all of which are used to hedge the variable cash flows associated with unsecured loans. The Company executed an \$80,000,000 interest rate swap associated with an \$80,000,000 unsecured loan during the third quarter of 2012. The interest rate swap converts the loan's LIBOR rate component to a fixed interest rate for the entire term of the loan, and the Company has concluded that the hedging relationship is highly effective. During the third quarter of 2013, the Company entered into two forward starting interest rate swaps totaling \$75,000,000 which are hedging an unsecured loan which closed in December 2013; the swaps convert the loan's LIBOR rate component to a fixed interest rate for the entire term of the loan, and the Company has concluded that the hedging relationships are highly effective. During the third quarter of 2014, the Company executed a \$75,000,000 interest rate swap associated with a \$75,000,000 unsecured loan. The interest rate swap converts the loan's LIBOR rate component to a fixed interest rate for the entire term of the loan, and the Company has concluded that the hedging relationship is highly effective.

The effective portion of changes in the fair value of derivatives designated and qualifying as cash flow hedges is recorded in Other Comprehensive Income (Loss) and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The ineffective portion of the change in fair value of the derivatives, which is immaterial for the periods reported, is recognized directly in earnings (included in Other on the Consolidated Statements of Income and Comprehensive Income).

Amounts reported in Other Comprehensive Income (Loss) related to derivatives will be reclassified to Interest Expense as interest payments are made on the Company's variable-rate debt. The Company estimates that an additional \$3,217,000 will be reclassified from Other Comprehensive Income (Loss) as an increase to Interest Expense over the next twelve months.

As of January 1, 2013, the Company changed its valuation methodology for over-the-counter ("OTC") derivatives to discount cash flows based on Overnight Index Swap ("OIS") rates. Uncollateralized or partially-collateralized trades are discounted at OIS, but include appropriate economic adjustments for funding costs (i.e., a LIBOR-OIS basis adjustment to approximate uncollateralized cost of funds) and credit risk. The Company made the changes to better

align its inputs, assumptions, and pricing methodologies with those used in its principal market by most dealers and major market participants. The changes in valuation methodology were applied prospectively as a change in accounting estimate and are immaterial to the Company's financial statements.

As of September 30, 2014 and December 31, 2013, the Company had the following outstanding interest rate derivatives that are designated as cash flow hedges of interest rate risk:

Interest Rate Derivative	Notional Amount as of September 30, 2014	Notional Amount as of December 31, 2013
Interest Rate Swap	\$80,000,000	\$80,000,000

See Note 11 for additional information on the Company's Accumulated Other Comprehensive Income (Loss) resulting from its interest rate swaps.

Derivative financial agreements expose the Company to credit risk in the event of non-performance by the counterparties under the terms of the interest rate hedge agreements. The Company believes it minimizes the credit risk by transacting with major credit-worthy financial institutions.

The Company has an agreement with its derivative counterparty containing a provision stating that the Company could be declared in default on its derivative obligations if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender.

As of September 30, 2014, the fair value of derivatives in an asset position related to these agreements was \$1,361,000, and the fair value of derivatives in a liability position related to these agreements was \$1,601,000. If the Company breached any of the contractual provisions of the derivative contracts, it would be required to settle its obligation under the agreements at the swap termination value. As of September 30, 2014, the swap termination value of derivatives in an asset position was an asset in the amount of \$1,402,000, and the swap termination value of derivatives in a liability position was a liability in the amount of \$1,604,000.

(13) EARNINGS PER SHARE

The Company applies ASC 260, Earnings Per Share, which requires companies to present basic and diluted earnings per share (EPS). Basic EPS represents the amount of earnings for the period attributable to each share of common

stock outstanding during the reporting period. The Company's basic EPS is calculated by dividing Net Income Attributable to EastGroup Properties, Inc. Common Stockholders by the weighted average number of common shares outstanding. The weighted average number of common shares outstanding does not include any potentially dilutive securities or any unvested restricted shares of common stock. These unvested restricted shares, although classified as issued and outstanding, are considered forfeitable until the restrictions lapse and will not be included in the basic earnings per share calculation until the shares are vested.

Diluted EPS represents the amount of earnings for the period attributable to each share of common stock outstanding during the reporting period and to each share that would have been outstanding assuming the issuance of common shares for all dilutive potential common shares outstanding during the reporting period. The Company calculates diluted EPS by dividing Net Income Attributable to EastGroup Properties, Inc. Common Stockholders by the weighted average number of common shares outstanding plus the dilutive effect of unvested restricted stock and stock options had the options been exercised. The dilutive effect of stock options and their equivalents (such as unvested restricted stock) is determined using the treasury stock method which assumes exercise of the options as of the beginning of the period or when issued, if later, and assumes proceeds from the exercise of options are used to purchase common stock at the average market price during the period.

(14) STOCK-BASED COMPENSATION

The Company follows the provisions of ASC 718, Compensation - Stock Compensation, to account for its stock-based compensation plans. ASC 718 requires that the compensation cost relating to share-based payment transactions be recognized in the financial statements and that the cost be measured on the fair value of the equity or liability instruments issued.

Stock-based compensation cost for employees was \$1,324,000 and \$4,741,000 for the three and nine months ended September 30, 2014, respectively, of which \$267,000 and \$1,099,000 were capitalized as part of the Company's development costs. For the three and nine months ended September 30, 2013, stock-based compensation cost for employees was \$1,066,000 and \$3,905,000, respectively, of which \$294,000 and \$986,000 were capitalized as part of the Company's development costs.

Stock-based compensation expense for directors was \$124,000 and \$363,000 for the three and nine months ended September 30, 2014, respectively, and \$105,000 and \$285,000 for the same periods of 2013.

In the second quarter of 2014, the Company's Board of Directors approved an equity compensation plan for its executive officers based upon certain annual performance measures (primarily funds from operations (FFO) per share and total shareholder return). Any shares issued pursuant to this compensation plan will be determined by the Compensation Committee in its discretion and issued in the first quarter of 2015. The number of shares to be issued on the grant date could range from zero to 44,524. These shares will vest 20% on the date shares are determined and awarded and generally will vest 20% per year on each January 1 for the subsequent four years.

Also in the second quarter of 2014, EastGroup's Board of Directors approved a long-term equity compensation plan for the Company's executive officers. The awards will be based on the results of the Company's total shareholder return, both on an absolute basis for 2014 as well as on a relative basis compared to the NAREIT Equity Index, NAREIT Industrial Index and Russell 2000 Index over the five-year period ending December 31, 2014. Any shares issued pursuant to this equity compensation plan will be determined by the Compensation Committee in its discretion and issued in the first quarter of 2015. The number of shares to be issued on the grant date could range from zero to 46,719. These shares will vest 25% on the date shares are determined and awarded and generally will vest 25% per year on each January 1 for the subsequent three years.

Notwithstanding the foregoing, shares issued to the Company's Chief Executive Officer, David H. Hoster II, and Chief Financial Officer, N. Keith McKey, will become fully vested no later than January 1, 2016 and April 6, 2016, respectively.

Following is a summary of the total restricted shares granted, forfeited and delivered (vested) to participants with the related weighted average grant date fair value share prices. Of the shares that vested in the first nine months of 2014, the Company withheld 31,417 shares to satisfy the tax obligations for those participants who elected this option as permitted under the applicable equity plan. As of the vesting date, the fair value of shares that vested during the first nine months of 2014 was \$5,656,000.

## (15) RISKS AND UNCERTAINTIES

The state of the overall economy can significantly impact the Company's operational performance and thus impact its financial position. Should EastGroup experience a significant decline in operational performance, it may affect the Company's ability to make distributions to its shareholders, service debt, or meet other financial obligations.

## (16) RECENT ACCOUNTING PRONOUNCEMENTS

EastGroup has evaluated all ASUs recently released by the FASB through the date the financial statements were issued and determined that ASU 2014-08 (as discussed in Note 7) and ASU 2014-09 (discussed below) apply to the Company.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for the Company on January 1, 2017. Early adoption is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

## (17) FAIR VALUE OF FINANCIAL INSTRUMENTS

ASC 820, Fair Value Measurements and Disclosures, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC 820 also provides guidance for using fair value to measure financial assets and liabilities. The Codification requires disclosure of the level within the fair value hierarchy in which the fair value measurements fall, including measurements using quoted prices in active markets for identical assets or liabilities (Level 1), quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in markets that are not active (Level 2), and significant valuation assumptions that are not readily observable in the market (Level 3).

The following table presents the carrying amounts and estimated fair values of the Company's financial instruments in accordance with ASC 820 at September 30, 2014 and December 31, 2013.

EASTGROUP PROPERTIES, INC. AND SUBSIDIARIES  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

The following methods and assumptions were used to estimate the fair value of each class of financial instruments:

Cash and cash equivalents: The carrying amounts approximate fair value due to the short maturity of those instruments.

Cash held in escrow for 1031 exchange (included in Other Assets on the Consolidated Balance Sheets): The carrying amounts approximate fair value due to the short maturity of those instruments.

Mortgage loans receivable, net of discount (included in Other Assets on the Consolidated Balance Sheets): The fair value is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities (Level 2 input).

Interest rate swap assets (included in Other Assets on the Consolidated Balance Sheets): The instruments are recorded at fair value based on models using inputs, such as interest rate yield curves, LIBOR swap curves and OIS curves, observable for substantially the full term of the contract (Level 2 input). See Note 12 for additional information on the Company's interest rate swaps.

Secured debt: The fair value of the Company's secured debt is estimated by discounting expected cash flows at the rates currently offered to the Company for debt of the same remaining maturities, as advised by the Company's bankers (Level 2 input).

Unsecured debt: The fair value of the Company's unsecured debt is estimated by discounting expected cash flows at the rates currently offered to the Company for debt of the same remaining maturities, as advised by the Company's bankers (Level 2 input).

Unsecured bank credit facilities: The fair value of the Company's unsecured bank credit facilities is estimated by discounting expected cash flows at current market rates (Level 2 input).

Interest rate swap liabilities (included in Other Liabilities on the Consolidated Balance Sheets): The instruments are recorded at fair value based on models using inputs, such as interest rate yield curves, LIBOR swap curves and OIS curves, observable for substantially the full term of the contract (Level 2 input). See Note 12 for additional information on the Company's interest rate swaps.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

OVERVIEW

EastGroup's goal is to maximize shareholder value by being the leading provider in its markets of functional, flexible and quality business distribution space (primarily in the 5,000 to 50,000 square foot range) for location sensitive tenants. The Company develops, acquires and operates distribution facilities, the majority of which are clustered around major transportation features in supply constrained submarkets in major Sunbelt regions. The Company's core markets are in the states of Florida, Texas, Arizona, California and North Carolina.

The Company believes its current operating cash flows and unsecured bank credit facilities provide the capacity to fund the operations of the Company. The Company also believes it can issue common and/or preferred equity and obtain financing from insurance companies and financial institutions. The continuous common equity program provided net proceeds to the Company of \$59.1 million in the first nine months of 2014, as described in Liquidity and Capital Resources.

The Company's primary revenue is rental income; as such, EastGroup's primary challenge is leasing space. During the nine months ended September 30, 2014, leases expired on 3,778,000 square feet (11.3% of EastGroup's total square footage of 33,330,000), and the Company was successful in renewing or re-leasing 84% of the expiring square feet. In addition, EastGroup leased 1,441,000 square feet of other vacant space during this period. During the first nine months of 2014, average rental rates on new and renewal leases increased by 8.0%. Property net operating income (PNOI) from same properties, defined as operating properties owned during the entire current period and prior year reporting period, increased 3.7% for the quarter ended September 30, 2014, as compared to the same quarter in 2013. For the nine months ended September 30, 2014, PNOI from same properties increased 2.1% as compared to the same period last year.

EastGroup's total leased percentage was 96.8% at September 30, 2014, compared to 96.3% at September 30, 2013. Leases scheduled to expire for the remainder of 2014 were 1.7% of the portfolio on a square foot basis at September 30, 2014, and this figure was reduced to 1.4% as of October 17, 2014.

The Company generates new sources of leasing revenue through its development and acquisition programs. During the first nine months of 2014, EastGroup acquired operating properties totaling 535,000 square feet in Charlotte and Austin for \$41.8 million. EastGroup continues to see targeted development as a contributor to the Company's long-term growth. The Company mitigates risks associated with development through a Board-approved maximum level of land held for development and by adjusting development start dates according to leasing activity. During the first nine months of 2014, EastGroup acquired 28.6 acres of development land in Dallas for \$3.0 million. Also during the first nine months of 2014, the Company began construction of 15 development projects containing 1,236,000 square feet in Houston, San Antonio, Charlotte, Orlando and Phoenix. EastGroup also transferred nine properties (849,000 square feet) in Phoenix, Charlotte, Houston and San Antonio from its development program to real estate properties with costs of \$53.5 million at the date of transfer. As of September 30, 2014, EastGroup's development program consisted of 19 projects (1,594,000 square feet) located in Houston, San Antonio, Orlando, Tampa, Charlotte, Phoenix and Denver. The projected total investment for the development projects, which were collectively 33% leased as of October 17, 2014, is \$115.9 million, of which \$34.5 million remained to be invested as of September 30, 2014.

Typically, the Company initially funds its development and acquisition programs through its \$250 million unsecured bank credit facilities (as discussed in Liquidity and Capital Resources). As market conditions permit, EastGroup issues equity and/or employs fixed-rate debt to replace short-term bank borrowings. In March 2014, Moody's Investor Services affirmed the Company's issuer rating of Baa2 with a stable outlook. In October 2014, Fitch Ratings affirmed

EastGroup's issuer rating of BBB with a stable outlook. A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency. Each rating should be evaluated independently of any other rating. The Company intends to obtain primarily unsecured fixed rate debt in the future. The Company may also access the public debt market in the future as a means to raise capital.

EastGroup has one reportable segment – industrial properties. These properties are primarily located in major Sunbelt regions of the United States, have similar economic characteristics and also meet the other criteria permitting the properties to be aggregated into one reportable segment. The Company's chief decision makers use two primary measures of operating results in making decisions: (1) property net operating income (PNOI), defined as Income from real estate operations less Expenses from real estate operations (including market-based internal management fee expense) plus the Company's share of income and property operating expenses from its less-than-wholly-owned real estate investments, and (2) funds from operations attributable to common stockholders (FFO), defined as net income (loss) attributable to common stockholders computed in accordance with U.S. generally accepted accounting principles (GAAP), excluding gains or losses from sales of depreciable real estate property and impairment

-17-

---

losses, plus real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures. The Company calculates FFO based on the National Association of Real Estate Investment Trusts' (NAREIT) definition.

PNOI is a supplemental industry reporting measurement used to evaluate the performance of the Company's real estate investments. The Company believes the exclusion of depreciation and amortization in the industry's calculation of PNOI provides a supplemental indicator of the properties' performance since real estate values have historically risen or fallen with market conditions. PNOI as calculated by the Company may not be comparable to similarly titled but differently calculated measures for other real estate investment trusts (REITs). The major factors influencing PNOI are occupancy levels, acquisitions and sales, development properties that achieve stabilized operations, rental rate increases or decreases, and the recoverability of operating expenses. The Company's success depends largely upon its ability to lease space and to recover from tenants the operating costs associated with those leases.

PNOI is comprised of Income from real estate operations, less Expenses from real estate operations plus the Company's share of income and property operating expenses from its less-than-wholly-owned real estate investments. PNOI was calculated as follows for the three and nine months ended September 30, 2014 and 2013.

Income from real estate operations is comprised of rental income, expense reimbursement pass-through income and other real estate income including lease termination fees. Expenses from real estate operations is comprised of property taxes, insurance, utilities, repair and maintenance expenses, management fees, other operating costs and bad debt expense. Generally, the Company's most significant operating expenses are property taxes and insurance. Tenant leases may be net leases in which the total operating expenses are recoverable, modified gross leases in which some of the operating expenses are recoverable, or gross leases in which no expenses are recoverable (gross leases represent only a small portion of the Company's total leases). Increases in property operating expenses are fully recoverable under net leases and recoverable to a high degree under modified gross leases. Modified gross leases often include base year amounts and expense increases over these amounts are recoverable. The Company's exposure to property operating expenses is primarily due to vacancies and leases for occupied space that limit the amount of expenses that can be recovered.

The Company believes FFO is a meaningful supplemental measure of operating performance for equity REITs. The Company believes excluding depreciation and amortization in the calculation of FFO is appropriate since real estate values have historically increased or decreased based on market conditions. FFO is not considered as an alternative to net income (determined in accordance with GAAP) as an indication of the Company's financial performance, nor is it a measure of the Company's liquidity or indicative of funds available to provide for the Company's cash needs, including its ability to make distributions. In addition, FFO, as reported by the Company, may not be comparable to FFO reported by other REITs that do not define the term in accordance with the current NAREIT definition. The Company's key drivers affecting FFO are changes in PNOI (as discussed above), interest rates, the amount of leverage the Company employs and general and administrative expense. The following table presents reconciliations of Net Income Attributable to EastGroup Properties, Inc. Common Stockholders to FFO Attributable to Common Stockholders for the three and nine months ended September 30, 2014 and 2013.

The Company analyzes the following performance trends in evaluating the progress of the Company:

The FFO change per share represents the increase or decrease in FFO per share from the current period compared to the same period in the prior year. FFO per share for the third quarter of 2014 was \$.89 per share compared with \$.83 per share for the same period of 2013, an increase of 7.2%. For the nine months ended September 30, 2014, FFO was \$2.55 per share compared with \$2.39 per share for the same period of 2013, an increase of 6.7%.

For the three months ended September 30, 2014, PNOI increased by \$3,441,000, or 9.4%, compared to the same period in 2013. PNOI increased \$1,521,000 from newly developed properties, \$1,342,000 from same property operations and \$648,000 from 2013 and 2014 acquisitions.

For the nine months ended September 30, 2014, PNOI increased by \$9,534,000, or 9.0%, compared to the same period in 2013. PNOI increased \$4,737,000 from newly developed properties, \$2,844,000 from 2013 and 2014 acquisitions and \$2,113,000 from same property operations.

The same property net operating income change represents the PNOI increase or decrease for the same operating properties owned during the entire current period and prior year reporting period. PNOI from same properties increased 3.7% for the three months ended September 30, 2014, and increased 2.1% for the nine months compared to the same periods in 2013.

Same property average occupancy represents the average month-end percentage of leased square footage for which the lease term has commenced as compared to the total leasable square footage for the same operating properties owned during the entire current period and prior year reporting period. Same property average occupancy for the three months ended September 30, 2014, was 95.6% compared to 94.9% for the same period of 2013. Same property average occupancy for the nine months ended September 30, 2014, was 95.2% compared to 94.2% for the same period of 2013.

The same property average rental rate represents the average annual rental rates of leases in place for the same operating properties owned during the entire current period and prior year reporting period. The same property average rental rate was \$5.22 per square foot for the three months ended September 30, 2014, compared to \$5.11 per square foot for the same period of 2013. The same property average rental rate was \$5.15 per square foot for the nine months ended September 30, 2014, compared to \$5.07 per square foot for the same period of 2013.

Occupancy is the percentage of leased square footage for which the lease term has commenced as compared to the total leasable square footage as of the close of the reporting period. Occupancy at September 30, 2014, was 96.2%. Quarter-end occupancy ranged from 95.0% to 95.7% over the period from September 30, 2013 to June 30, 2014.

Rental rate change represents the rental rate increase or decrease on new and renewal leases compared to the prior leases on the same space. Rental rate increases on new and renewal leases (6.2% of total square footage) averaged 6.9% for the third quarter of 2014. For the nine months ended September 30, 2014, rental rate increases on new and renewal leases (13.8% of total square footage) averaged 8.0%.

Lease termination fee income for the three and nine months ended September 30, 2014 was \$634,000 and \$772,000, respectively, compared to \$3,000 and \$430,000 for the same periods in 2013. The Company recorded net bad debt recoveries of \$82,000 and \$89,000 for the three and nine months ended September 30, 2014, respectively. Bad debt expense for the same periods in 2013 was \$58,000 and \$154,000, respectively.

## CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company's management considers the following accounting policies and estimates to be critical to the reported operations of the Company.

### Real Estate Properties

The Company allocates the purchase price of acquired properties to net tangible and identified intangible assets based on their respective fair values. Goodwill is recorded when the purchase price exceeds the fair value of the assets and liabilities acquired. Factors considered by management in allocating the cost of the properties acquired include an estimate of carrying costs during the expected lease-up periods considering current market conditions and costs to execute similar leases. The allocation to tangible assets (land, building and improvements) is based upon management's determination of the value of the property as if it were vacant using discounted cash flow models. The purchase price is also allocated among the following categories of intangible assets: the above or below market component of in-place leases, the value of in-place leases, and the value of customer relationships. The value allocable to the above or below market component of an acquired in-place lease is determined based upon the present value (using a discount rate reflecting the risks associated with the acquired leases) of the difference between (i) the contractual amounts to be paid pursuant to the lease over its remaining term and (ii) management's estimate of the amounts that would be paid using fair market rates over the remaining term of the lease. The amounts allocated to above and below market leases are included in Other Assets and Other Liabilities, respectively, on the Consolidated Balance Sheets and are amortized to rental income over the remaining terms of the respective leases. The total amount of intangible assets is further allocated to in-place lease values and customer relationship values based upon management's assessment of their respective values. These intangible assets are included in Other Assets on the Consolidated Balance Sheets and are amortized over the remaining term of the existing lease or the anticipated life of the customer relationship, as applicable.

During the period in which a property is under development, costs associated with development (i.e., land, construction costs, interest expense, property taxes and other direct and indirect costs associated with development) are aggregated into the total capitalized costs of the property. Included in these costs are management's estimates for the portions of internal costs (primarily personnel costs) deemed directly or indirectly related to such development activities. The internal costs are allocated to specific development properties based on construction activity.

The Company reviews its real estate investments for impairment of value whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If any real estate investment is considered permanently impaired, a loss is recorded to reduce the carrying value of the property to its estimated fair value. Real estate assets to be sold are reported at the lower of the carrying amount or fair value less selling costs. The evaluation of real estate investments involves many subjective assumptions dependent upon future economic events that affect the ultimate value of the property. Currently, the Company's management knows of no impairment issues nor has it experienced any impairment issues in recent years. EastGroup currently has the intent and ability to hold its real estate investments and to hold its land inventory for future development. In the event of impairment, the property's basis would be reduced, and the impairment would be recognized as a current period charge on the Consolidated Statements of Income and Comprehensive Income.

### Valuation of Receivables

The Company is subject to tenant defaults and bankruptcies that could affect the collection of outstanding receivables. In order to mitigate these risks, the Company performs credit reviews and analyses on prospective tenants before significant leases are executed and on existing tenants before properties are acquired. On a quarterly basis, the Company evaluates outstanding receivables and estimates the allowance for doubtful accounts. Management specifically analyzes aged receivables, customer credit-worthiness, historical bad debts and current economic trends when evaluating the adequacy of the allowance for doubtful accounts. The Company

believes its allowance for doubtful accounts is adequate for its outstanding receivables for the periods presented. In the event the allowance for doubtful accounts is insufficient for an account that is subsequently written off, additional bad debt expense would be recognized as a current period charge on the Consolidated Statements of Income and Comprehensive Income.

#### Tax Status

EastGroup, a Maryland corporation, has qualified as a real estate investment trust under Sections 856-860 of the Internal Revenue Code and intends to continue to qualify as such. To maintain its status as a REIT, the Company is required to distribute at least 90% of its ordinary taxable income to its stockholders. If the Company has a capital gain, it has the option of (i) deferring recognition of the capital gain through a tax-deferred exchange, (ii) declaring and paying a capital gain dividend on any recognized net capital gain resulting in no corporate level tax, or (iii) retaining and paying corporate income tax on its net long-term capital gain, with shareholders reporting their proportional share of the undistributed long-term capital gain and receiving a credit or refund of their share of the tax paid by the Company. The Company distributed all of its 2013 taxable income to its stockholders and expects to distribute all of its taxable income in 2014. Accordingly, no significant provision for income taxes was necessary in 2013, nor is any significant income tax provision expected to be necessary for 2014.

## FINANCIAL CONDITION

EastGroup's assets were \$1,562,977,000 at September 30, 2014, an increase of \$89,565,000 from December 31, 2013. Liabilities increased \$45,816,000 to \$1,000,523,000, and equity increased \$43,749,000 to \$562,454,000 during the same period. The paragraphs that follow explain these changes in detail.

## Assets

## Real Estate Properties

Real Estate Properties increased \$97,267,000 during the nine months ended September 30, 2014, primarily due to property acquisitions (535,000 square feet), capital improvements at the Company's properties and the transfer of nine properties from Development, as detailed under Development below. These increases were offset by the sale of four operating properties (310,000 square feet) for \$17,693,000 and the sale of 0.1 acres of land through an eminent domain settlement in Orlando for \$141,000.

REAL ESTATE PROPERTIES ACQUIRED IN 2014	Location	Size (Square feet)	Date Acquired	Cost <sup>(1)</sup> (In thousands)
Ridge Creek Distribution Center III	Charlotte, NC	270,000	05/12/2014	\$ 13,606
Colorado Crossing Distribution Center	Austin, TX	265,000	06/11/2014	24,358
Total Acquisitions		535,000		\$37,964

Total cost of the properties acquired was \$41,751,000, of which \$37,964,000 was allocated to Real Estate Properties as indicated above. Intangibles associated with the purchases of real estate were allocated as follows: \$4,660,000 to in-place lease intangibles, \$4,000 to above market leases (both included in Other Assets on the Consolidated Balance Sheets) and \$877,000 to below market leases (included in Other Liabilities on the Consolidated Balance Sheets). All of these costs are amortized over the remaining lives of the associated leases in place at the time of acquisition.

During the nine months ended September 30, 2014, the Company made capital improvements of \$13,041,000 on existing and acquired properties (included in the Capital Expenditures table under Results of Operations). Also, the Company incurred costs of \$6,372,000 on development properties subsequent to transfer to Real Estate Properties; the Company records these expenditures as development costs on the Consolidated Statements of Cash Flows.

## Development

EastGroup's investment in development at September 30, 2014 consisted of properties in lease-up and under construction of \$81,431,000 and prospective development (primarily land) of \$88,192,000. The Company's total investment in development at September 30, 2014 was \$169,623,000 compared to \$148,767,000 at December 31, 2013. Total capital invested for development during the first nine months of 2014 was \$80,748,000, which consisted of costs of \$58,021,000 and \$16,355,000 as detailed in the development activity table below and costs of \$6,372,000 on development properties subsequent to transfer to Real Estate Properties. The capitalized costs incurred on development properties subsequent to transfer to Real Estate Properties include capital improvements at the properties and do not include other capitalized costs associated with development (i.e., interest expense, property taxes and internal personnel costs).

The Company capitalized internal development costs of \$897,000 and \$3,077,000 for the three and nine months ended September 30, 2014, respectively, compared to \$1,028,000 and \$2,873,000 in the same periods of 2013.

During the first nine months of 2014, EastGroup purchased 28.6 acres of development land in Dallas for \$3,022,000. Costs associated with development land acquisitions are included in the development activity table. The Company transferred nine development properties to Real Estate Properties during the first nine months of 2014 with a total investment of \$53,520,000 as of the date of transfer.

## Liabilities

Edgar Filing: EASTGROUP PROPERTIES INC - Form 10-Q

Secured Debt decreased \$43,282,000 during the nine months ended September 30, 2014. The decrease resulted from the repayment of two mortgage loans with a balance of \$26,576,000, regularly scheduled principal payments of \$16,692,000 and mortgage loan premium amortization of \$14,000.

Unsecured Debt increased \$75,000,000 during the nine months ended September 30, 2014 as a result of the closing of a \$75 million unsecured term loan in July 2014.

Unsecured Bank Credit Facilities decreased \$4,432,000 during the nine months ended September 30, 2014; the Company's credit facilities are described in greater detail under Liquidity and Capital Resources.

#### Equity

Additional Paid-In Capital increased \$62,663,000 during the nine months ended September 30, 2014. The increase primarily resulted from the issuance of 944,548 shares of common stock under EastGroup's continuous common equity program with net proceeds to the Company of \$59,110,000. See Note 14 in the Notes to Consolidated Financial Statements for information related to the changes in Additional Paid-In Capital on common shares resulting from stock-based compensation.

For the nine months ended September 30, 2014, Distributions in Excess of Earnings increased \$17,033,000 as a result of dividends on common stock of \$52,252,000 exceeding Net Income Attributable to EastGroup Properties, Inc. Common Stockholders of \$35,219,000.

Accumulated Other Comprehensive Income (Loss) decreased \$1,714,000 during the nine months ended September 30, 2014. The decrease resulted from the change in fair value of the Company's interest rate swaps which are further discussed in Note 12 in the Notes to Consolidated Financial Statements.

## RESULTS OF OPERATIONS

(Comments are for the three and nine months ended September 30, 2014, compared to the three and nine months ended September 30, 2013.)

Net Income Attributable to EastGroup Properties, Inc. Common Stockholders for the three and nine months ended September 30, 2014, was \$17,729,000 (\$0.56 per basic and diluted share) and \$35,219,000 (\$1.13 per basic and diluted share), respectively, compared to \$8,363,000 (\$0.28 per basic and diluted share) and \$23,160,000 (\$0.77 per basic and diluted share) for the same periods in 2013.

(1) Includes interest on the Company's unsecured debt with fixed interest rates per the debt agreements or effectively fixed interest rates due to interest rate swaps, as discussed in Note 12 in the Notes to Consolidated Financial Statements.

EastGroup's variable rate interest expense decreased by \$145,000 and \$178,000 for the three and nine months ended September 30, 2014, as compared to the same periods in 2013 primarily due to decreases in average unsecured bank credit facilities borrowings in 2014 as compared to the same periods last year.

The Company's fixed rate interest expense increased by \$146,000 and \$501,000 for the three and nine months ended September 30, 2014, as compared to the same periods in 2013. These increases were primarily due to increases in unsecured debt interest resulting from the Company's unsecured debt described below.

A summary of Unsecured Debt follows:

UNSECURED DEBT	Interest Rate	Date Obtained	Maturity Date	September 30,	December 31,

The interest rate on this unsecured term loan is comprised of LIBOR plus 175 basis points subject to a pricing grid for changes in the Company's coverage ratings. The Company entered into an interest rate swap to convert the (1) loan's LIBOR rate to a fixed interest rate, providing the Company an effective interest rate on the term loan of 2.770% as of September 30, 2014. See Note 12 in the Notes to Consolidated Financial Statements for additional information on the interest rate swap.

The interest rate on this unsecured term loan is comprised of LIBOR plus 115 basis points subject to a pricing grid for changes in the Company's coverage ratings. The Company entered into an interest rate swap to convert the (2) loan's LIBOR rate to a fixed interest rate, providing the Company a weighted average effective interest rate on the term loan of 2.846% as of September 30, 2014. See Note 12 in the Notes to Consolidated Financial Statements for additional information on the interest rate swaps.

The interest rate on this unsecured term loan is comprised of LIBOR plus 140 basis points subject to a pricing grid for changes in the Company's coverage ratings. The Company entered into two interest rate swaps to convert the (3) loan's LIBOR rate to a fixed interest rate, providing the Company a weighted average effective interest rate on the term loan of 3.752% as of September 30, 2014. See Note 12 in the Notes to Consolidated Financial Statements for additional information on the interest rate swaps.

(4) Principal payments due on the \$100 million senior unsecured notes are as follows: \$30 million on August 28, 2020, \$50 million on August 28, 2023, and \$20 million on August 28, 2025.

The increase in unsecured debt interest was partially offset by decreases in secured debt interest resulting from regularly scheduled principal payments and debt repayments. Regularly scheduled principal payments on secured debt were \$16,692,000 during the nine months ended September 30, 2014. During the year ended December 31, 2013, regularly scheduled principal payments on secured debt were \$24,420,000. The details of the secured debt repaid in 2013 and 2014 are shown in the following table:

SECURED DEBT REPAID IN 2013 AND 2014	Interest Rate	Date Repaid	Payoff Amount

Interest costs incurred during the period of construction of real estate properties are capitalized and offset against interest expense. Capitalized interest increased \$65,000 and decreased \$159,000 for the three and nine months ended

September 30, 2014, as compared to the same periods of 2013.

Depreciation and Amortization expense from continuing operations increased \$858,000 and \$3,317,000 for the three and nine months ended September 30, 2014, as compared to the same periods in 2013 primarily due to the operating properties acquired by the Company and the properties transferred from Development in 2013 and 2014.

## Capital Expenditures

Capital expenditures for EastGroup's operating properties for the three and nine months ended September 30, 2014 and 2013 were as follows:

	Estimated Useful Life	Three Months Ended September 30,		Nine Months Ended September 30,	
		2014	2013	2014	2013

(1) First generation refers only to space that has never been occupied under EastGroup's ownership.

## Capitalized Leasing Costs

The Company's leasing costs (principally commissions) are capitalized and included in Other Assets. The costs are amortized over the terms of the associated leases and are included in Depreciation and Amortization expense. Capitalized leasing costs for the three and nine months ended September 30, 2014 and 2013 were as follows:

	Estimated Useful Life	Three Months Ended September 30,		Nine Months Ended September 30,	
		2014	2013	2014	2013
(In thousands)

(1) First generation refers only to space that has never been occupied under EastGroup's ownership.

(2) Includes discontinued operations.

## Discontinued Operations

In April 2014, the FASB issued Accounting Standards Update (ASU) 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360), Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity, which amends the requirements for reporting discontinued operations. Under ASU 2014-08, a disposal of a component of an entity or a group of components of an entity is required to be reported

in discontinued operations if the disposal represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results when the component or group of components meets the criteria to be classified as held for sale or when the component or group of components is disposed of by sale or other than by sale. In addition, this ASU requires additional disclosures about both discontinued operations and the disposal of an individually significant component of an entity that does not qualify for discontinued operations presentation in the financial statements. The Company adopted the provisions of ASU 2014-08 beginning with the period ended March 31, 2014, and has applied the provisions prospectively.

Prior to the adoption of ASU 2014-08, the results of operations for the operating properties sold or held for sale during the reported periods were shown under Discontinued Operations on the Consolidated Statements of Income and Comprehensive Income. Interest expense was not generally allocated to the properties held for sale or whose operations were included under Discontinued Operations unless the mortgage was required to be paid in full upon the sale of the property.

During the first nine months of 2014, EastGroup sold four operating properties: Northpoint Commerce Center in Oklahoma City, Tampa West Distribution Center VI in Tampa, Clay Campbell Distribution Center in Houston and Kirby Business Center in Houston. The results of operations and gains on sales for the properties sold during the period are reported under Income from Continuing Operations on the Consolidated Statements of Income and Comprehensive Income. The gains on sales are included in Gain on Sales of Real Estate Investments.

During 2013, the Company sold three operating properties: Tampa West Distribution Center V and VII and Tampa East Distribution Center II. The results of operations for the properties sold during 2013 are reported under Discontinued Operations on the Consolidated Statements of Income and Comprehensive Income.

See Note 7 in the Notes to Consolidated Financial Statements for more information related to discontinued operations and gain on sales of real estate investments. The following table presents the components of revenue and expense for the operating properties sold during 2013.

#### RECENT ACCOUNTING PRONOUNCEMENTS

EastGroup has evaluated all ASUs recently released by the FASB through the date the financial statements were issued and determined that the following ASUs apply to the Company.

In April 2014, the FASB issued ASU 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360), Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity, which amends the requirements for reporting discontinued operations. Under ASU 2014-08, a disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations if the disposal represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results when the component or group of components meets the criteria to be classified as held for sale or when the component or group of components is disposed of by sale or other than by sale. In addition, this ASU requires additional disclosures about both discontinued operations and the disposal of an individually significant component of an entity that does not qualify for discontinued operations presentation in the financial statements. The Company adopted the provisions of ASU 2014-08 beginning with the period ended March 31, 2014, and has applied the

provisions prospectively.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for the Company on January 1, 2017. Early adoption is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

## LIQUIDITY AND CAPITAL RESOURCES

Net cash provided by operating activities was \$94,915,000 for the nine months ended September 30, 2014. The primary other sources of cash were from borrowings on unsecured bank credit facilities, proceeds from unsecured debt, proceeds from common stock offerings and proceeds from the sales of land and real estate investments. The Company distributed \$52,231,000 in common stock dividends during the nine months ended September 30, 2014. Other primary uses of cash were for repayments on unsecured bank credit facilities, the construction and development of properties, secured debt repayments, purchases of real estate and capital improvements at various properties.

Total debt at September 30, 2014 and December 31, 2013 is detailed below. The Company's unsecured bank credit facilities and unsecured term loans have certain restrictive covenants, such as maintaining debt service coverage and leverage ratios and maintaining insurance coverage, and the Company was in compliance with all of its debt covenants at September 30, 2014 and December 31, 2013.

	September 30, 2014	December 31, 2013
	(In thousands)	
Secured debt	\$456,511	499,793
Unsecured debt	380,000	305,000
Unsecured bank credit facilities	84,520	88,952
Total debt	\$921,031	893,745

EastGroup has a \$225 million unsecured revolving credit facility with a group of nine banks that matures in January 2017. The credit facility contains options for a one-year extension and a \$100 million expansion. The interest rate on each tranche is usually reset on a monthly basis and as of September 30, 2014, was LIBOR plus 117.5 basis points with an annual facility fee of 22.5 basis points. The margin and facility fee are subject to changes in the Company's credit ratings. At September 30, 2014, the weighted average interest rate was 1.330% on a balance of \$78,000,000.

The Company also has a \$25 million unsecured revolving credit facility with PNC Bank, N.A. that matures in January 2017. This credit facility automatically extends for one year if the extension option in the \$225 million revolving credit facility is exercised. The interest rate is reset on a daily basis and as of September 30, 2014, was LIBOR plus 117.5 basis points with an annual facility fee of 22.5 basis points. The margin and facility fee are subject to changes in the Company's credit ratings. At September 30, 2014, the interest rate was 1.332% on a balance of \$6,520,000.

As market conditions permit, EastGroup issues equity and/or employs fixed-rate debt to replace the short-term bank borrowings. The Company believes its current operating cash flow and unsecured bank credit facilities provide the capacity to fund the operations of the Company. The Company also believes it can obtain financing from insurance companies and financial institutions and issue common and/or preferred equity. The Company intends to obtain primarily unsecured fixed rate debt in the future. The Company may also access the public debt market in the future as a means to raise capital.

On February 19, 2014, EastGroup entered into Sales Agency Financing Agreements with BNY Mellon Capital Markets, LLC, Raymond James & Associates, Inc., and Merrill Lynch, Pierce, Fenner & Smith Incorporated pursuant to which it may issue and sell up to 10,000,000 shares of its common stock from time to time. During the nine months ended September 30, 2014, the Company issued and sold 944,548 shares of common stock under its continuous equity program at an average price of \$63.52 per share with gross proceeds to the Company of \$59,993,000. The Company incurred offering-related costs of \$883,000 during the nine months, resulting in net proceeds to the Company of \$59,110,000. As of October 20, 2014, the Company has 9,055,452 shares of common stock remaining to sell under the

program.

On July 10, 2014, EastGroup repaid a mortgage loan with a balance of \$26.6 million, an interest rate of 5.68%, and a maturity date of October 10, 2014.

On July 31, 2014, EastGroup closed on a \$75 million unsecured term loan with a five year term and interest only payments. It will bear interest at the annual rate of LIBOR plus an applicable margin (currently 1.15% ) based on the Company's senior unsecured long-term debt rating. Also in July, the Company entered into an interest rate swap agreement to convert the loan's LIBOR rate component to a fixed interest rate for the entire term of the loan providing a total effective fixed interest rate of 2.846%.

-31-

---

EastGroup has a 50% undivided tenant-in-common interest in Industry Distribution Center II; this investment is accounted for under the equity method of accounting. EastGroup and the property co-owner have a non-recourse first mortgage loan secured by the property. The loan, which has an interest rate of 5.31%, was scheduled to mature in 2030; however, the lender exercised its option to call the note on June 30, 2015. EastGroup's share of the mortgage was \$5,126,000 at September 30, 2014; the Company's share of the mortgage is expected to be \$4,967,000 on the maturity date of June 30, 2015. The Company can now prepay the loan with no penalty.

The Company anticipates that its current cash balance, operating cash flows, borrowings under its unsecured bank credit facilities, proceeds from new secured and unsecured debt and/or proceeds from the issuance of equity instruments will be adequate for (i) operating and administrative expenses, (ii) normal repair and maintenance expenses at its properties, (iii) debt service obligations, (iv) maintaining compliance with its debt covenants, (v) distributions to stockholders, (vi) capital improvements, (vii) purchases of properties, (viii) development, and (ix) any other normal business activities of the Company, both in the short-term and long-term.

#### Contractual Obligations

EastGroup's fixed, non-cancelable obligations as of December 31, 2013, did not materially change during the nine months ended September 30, 2014, except for the increase in Unsecured Bank Credit Facilities and the decrease in Secured Debt discussed above.

#### INFLATION AND OTHER ECONOMIC CONSIDERATIONS

Most of the Company's leases include scheduled rent increases. Additionally, most of the Company's leases require the tenants to pay their pro rata share of operating expenses, including real estate taxes, insurance and common area maintenance, thereby reducing the Company's exposure to increases in operating expenses resulting from inflation. In the event inflation causes increases in the Company's general and administrative expenses or the level of interest rates, such increased costs would not be passed through to tenants and could adversely affect the Company's results of operations.

EastGroup's financial results are affected by general economic conditions in the markets in which the Company's properties are located. The state of the economy, or other adverse changes in general or local economic conditions, could result in the inability of some of the Company's existing tenants to make lease payments and may therefore increase bad debt expense. It may also impact the Company's ability to (i) renew leases or re-lease space as leases expire, or (ii) lease development space. In addition, an economic downturn or recession could also lead to an increase in overall vacancy rates or a decline in rents the Company can charge to re-lease properties upon expiration of current leases. In all of these cases, EastGroup's cash flows would be adversely affected.

## ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The Company is exposed to interest rate changes primarily as a result of its unsecured bank credit facilities and long-term debt maturities. This debt is used to maintain liquidity and fund capital expenditures and expansion of the Company's real estate investment portfolio and operations. The Company's objective for interest rate risk management is to limit the impact of interest rate changes on earnings and cash flows and to lower its overall borrowing costs. To achieve its objectives, the Company borrows at fixed rates but also has two variable rate unsecured bank credit facilities as discussed under Liquidity and Capital Resources. In addition, the Company uses interest rate swaps (as discussed in Note 12 in the Notes to Consolidated Financial Statements) as part of its interest rate risk management strategy. The table below presents the principal payments due and weighted average interest rates for both the fixed rate and variable rate debt as of September 30, 2014.

(1) The fair value of the Company's fixed rate debt is estimated by discounting expected cash flows at the rates currently offered to the Company for debt of the same remaining maturities, as advised by the Company's bankers.

The variable rate debt matures in January 2017 and is comprised of two unsecured bank credit facilities with (2) balances of \$78,000,000 on the \$225 million unsecured bank credit facility and \$6,520,000 on the \$25 million unsecured bank credit facility as of September 30, 2014.

(3) The fair value of the Company's variable rate debt is estimated by discounting expected cash flows at current market rates.

(4) Represents the weighted average interest rate as of September 30, 2014.

As the table above incorporates only those exposures that existed as of September 30, 2014, it does not consider those exposures or positions that could arise after that date. If the weighted average interest rate on the variable rate unsecured bank credit facilities as shown above changes by 10% or approximately 13 basis points, interest expense and cash flows would increase or decrease by approximately \$112,000 annually.

## FORWARD-LOOKING STATEMENTS

Certain statements contained in this report may be deemed "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "will," "anticipates," "expects," "believes," "intends," "plans," "seeks," "estimates," variations of such words and similar expressions are intended to identify such forward-looking statements, which generally are not historical in nature. All statements that address operating performance, events or

developments that the Company expects or anticipates will occur in the future, including statements relating to rent and occupancy growth, development activity, the acquisition or sale of properties, general conditions in the geographic areas where the Company operates and the availability of capital, are forward-looking statements. Forward-looking statements are inherently subject to known and unknown risks and uncertainties, many of which the Company cannot predict, including, without limitation: changes in general economic conditions; the extent of tenant defaults or of any early lease terminations; the Company's ability to lease or re-lease space at current or anticipated rents; the availability of financing; the failure to maintain credit ratings with rating agencies; changes in the supply of and demand for industrial/warehouse properties; increases in interest rate levels; increases in operating costs; natural disasters, terrorism, riots and acts of war, and the Company's ability to obtain adequate insurance; changes in governmental regulation, tax rates and similar matters; and other risks associated with the development and acquisition of properties, including risks that development projects may not be completed on schedule, development or operating costs may be greater than anticipated or acquisitions may not close as scheduled, and those additional factors discussed under "Item 1A. Risk Factors" in Part II of this report and in the Company's Annual Report on Form 10-K. Although the Company believes the expectations reflected in the forward-looking statements are based upon reasonable assumptions at the time made, the Company can give no assurance that such expectations will be achieved. The Company assumes no obligation whatsoever to publicly update or revise any forward-looking statements. See also the information contained in the Company's reports filed or to be filed from time to time with the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934, as amended (the "Exchange Act").

ITEM 4. CONTROLS AND PROCEDURES.

(i) Disclosure Controls and Procedures.

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of September 30, 2014, the Company's disclosure controls and procedures were effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings.

(ii) Changes in Internal Control Over Financial Reporting.

There was no change in the Company's internal control over financial reporting during the Company's third fiscal quarter ended September 30, 2014, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION.
