NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some information in this report may contain forward-looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933 and Section 21E of the U.S. Securities Exchange Act of 1934. We have based these forward-looking statements on our current beliefs, expectations and intentions as to facts, actions and events that will or may occur in the future. Such statements generally are identified by forward-looking words such as believe, plan, anticipate, continue, estimate, expect, may, will or other similar words.

A forward-looking statement may include a statement of the assumptions or bases underlying the forward-looking statement. We have chosen these assumptions or bases in good faith. These forward-looking statements are subject to risks, uncertainties and assumptions, some of which are beyond our control. In addition, these forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. Actual results may differ materially from information contained in the forward-looking statements as a result of a number of factors, including, without limitation, the risk factors set forth in Item 3. Key Information Risk Factors in our annual report on Form 20-F for the fiscal year ended December 31, 2009. You should also keep in mind that any forward-looking statement made by us in this report or elsewhere speaks only as at the date on which we made it. New risks and uncertainties come up from time to time, and it is impossible for us to predict these events or how they may affect us. We have no duty to, and do not intend to, update or revise the statements in this report after the date hereof. In light of these risks and uncertainties, you should keep in mind that actual results may differ materially from any forward-looking statement made in this report or elsewhere.

PLDTpressrelease

PLDT completes P2.8-B fiber optic network expansion

MANILA, Philippines, December 2, 2010 Philippine Long Distance Telephone Co. (PLDT) has completed a P2.8-billion expansion of its Domestic Fiber Optic Network (DFON), further extending the reach and strengthening the resiliency of the country's most extensive communications transmission network.

The project, which is part of the company's DFON Resiliency Improvement Program, involved the installation of 1,300 kilometers of new terrestrial and submarine fiber optic cables to carry voice, data and video traffic in Bicol and the Visayas and Mindanao regions.

Our transmission backbone is now much more resilient, thus raising the quality and reliability of our services. We can also provide more communities with both basic and advanced broadband services, unlocking new economic opportunities for central and southern Philippines," said PLDT President and CEO Napoleon L. Nazareno.

In the past, accidental cable cuts have caused slowdowns in bandwidth speeds and even outages for some retail and corporate customers in the affected areas. Natural disasters have also adversely affected the network, hampering vital communications to a certain extent.

This latest DFON expansion greatly reduces the risk of downtimes which will benefit not only large corporations but also small businesses and households," said Rolando G. Peña, PLDT Group Head for Customer Service Assurance.

The project covers the third leg of DFON Loop 4 from Lucena City to Cebu City, passing through 11 provinces. There are 1,070 kilometers of terrestrial fiber optic cables and 230 kilometers of submarine fiber optic cables, with three new DFON nodes or stations in Calauag, Quezon; Naga, Camarines Sur; and Masbate, Masbate.

This expands the coverage of DFON in provinces such as Quezon, Camarines Norte, Camarines Sur, Sorsogon, Masbate, Capiz, Iloilo, Negros Occidental, Negros Oriental and Cebu.

The new facilities are equipped with the latest Automatic Switching Optical Network Sub Network Control Protocol (ASON-SNCP) technology which will facilitate the automatic rerouting of traffic in the event of cable cuts to ensure seamless, uninterrupted telecommunications services.

Among the main beneficiaries of this are the call centers and business process outsourcing (BPO) companies that have high-bandwidth requirements and that need resilient telecommunications networks.

Page 5 of 6

Exhibit 1

The reach and resiliency of our network are our key competitive advantage, said PLDT Senior Vice President and Customer Sales and Marketing Group Head Eric R. Alberto.

By investing in redundant facilities through the loops in DFON and various legs within the loops, we have improved our ability to offer the levels of resiliency that industries like banks, BPOs and call centers require, he added.

The completion of the DFON Loop 4 Third Leg has added 1,300 kilometers of terrestrial and submarine fiber optic cables to PLDT DFON, bringing the total to 10,050 kilometers connecting 68 nodes and equipped with a total network bandwidth capacity of 1.56 Terabytes.

XXX

About PLDT

PLDT is the leading telecommunications service provider in the Philippines. Through its three principal business groups – wireless, fixed line, and information and communications technology – PLDT offers the largest and most diversified range of telecommunications services across the Philippines – most extensive fiber optic backbone and wireless, fixed line and satellite networks.

PLDT is listed on the Philippine Stock Exchange (PSE:TEL) and its American Depositary Shares are listed on the New York Stock Exchange (NYSE:PHI). PLDT has one of the largest market capitalizations among Philippine-listed companies.
