Commission file number: 1-11884

ROYAL CARIBBEAN CRUISES LTD.

(Exact name of registrant as specified in its charter)

Republic of Liberia

98-0081645

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer Identification No.)

1050 Caribbean Way, Miami, Florida 33132

(Address of principal executive offices) (zip code)

(305) 539-6000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
---------------------	----------------------------------------------

Common Stock, par value \$.01 per share	New York Stock Exchange
-----------------------------------------	-------------------------

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company (See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act).

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a

smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No
The aggregate market value of the registrant's common stock at June 30, 2014 (based upon the closing sale price of the common stock on the New York Stock Exchange on June 30, 2014) held by those persons deemed by the registrant to be non-affiliates was approximately \$9.9 billion. Shares of the registrant's common stock held by each executive officer and director and by each entity or person that, to the registrant's knowledge, owned 10% or more of the registrant's outstanding common stock as of June 30, 2014 have been excluded from this number in that these persons may be deemed affiliates of the registrant. This determination of possible affiliate status is not necessarily a conclusive determination for other purposes.

There were 219,620,652 shares of common stock outstanding as of February 12, 2015.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Definitive Proxy Statement relating to its 2015 Annual Meeting of Shareholders are incorporated by reference in Part III, Items 10-14 of this Annual Report on Form 10-K as indicated herein.

PART I

As used in this Annual Report on Form 10-K, the terms “Royal Caribbean,” the “Company,” “we,” “our” and “us” refer to Royal Caribbean Cruises Ltd. and, depending on the context, Royal Caribbean Cruises Ltd.’s consolidated subsidiaries and/or affiliates. The terms “Royal Caribbean International,” “Celebrity Cruises,” “Pullmantur,” “Azamara Club Cruises,” “CDF Croisières de France,” and “TUI Cruises” refer to our cruise brands. However, because TUI Cruises is an unconsolidated investment, our operating results and other disclosures herein do not include TUI Cruises unless otherwise specified. In accordance with cruise vacation industry practice, the term “berths” is determined based on double occupancy per cabin even though many cabins can accommodate three or more passengers.

This Annual Report on Form 10-K also includes trademarks, trade names and service marks of other companies. Use or display by us of other parties’ trademarks, trade names or service marks is not intended to and does not imply a relationship with, or endorsement or sponsorship of us by, these other parties other than as described herein.

Item 1. Business.

General

We are the world’s second largest cruise company. We own Royal Caribbean International, Celebrity Cruises, Pullmantur, Azamara Club Cruises, CDF Croisières de France and a 50% joint venture interest in TUI Cruises. Together, these six brands operate a combined 43 ships in the cruise vacation industry with an aggregate capacity of approximately 105,750 berths as of December 31, 2014.

Our ships operate on a selection of worldwide itineraries that call on approximately 480 destinations on all seven continents. In addition to our headquarters in Miami, Florida, we have offices and a network of international representatives around the world which primarily focus on our global guest sourcing.

We compete principally on the basis of exceptional service provided by our crew, innovation and quality of ships, variety of itineraries, choice of destinations and price. We believe that our commitment to build state-of-the-art ships and to invest in the maintenance and upgrade of our fleet to, among other things, incorporate our latest signature innovations, allows us to continue to attract new and loyal repeat guests.

We believe cruising continues to be a popular vacation choice due to its inherent value, extensive itineraries and variety of shipboard and shoreside activities. In addition, we believe that our products appeal to a large consumer base and are not dependent on a single market or demographic.

Royal Caribbean was founded in 1968 as a partnership. Its corporate structure evolved over the years and the current parent corporation, Royal Caribbean Cruises Ltd., was incorporated on July 23, 1985 in the Republic of Liberia under the Business Corporation Act of Liberia.

Our Brands

Our global brands include Royal Caribbean International, Celebrity Cruises, and Azamara Club Cruises. These brands are complemented by our Pullmantur brand, which has been tailored to serve the cruise markets in Spain, Portugal and Latin America; our CDF Croisières de France brand, which provides us with a tailored product targeted at the French market; and our 50% joint venture, TUI Cruises, which is specifically tailored for the German market.

The operating results of all of our brands are included in our consolidated results of operations, except for TUI Cruises, which is accounted for under the equity method of accounting. See Note 1. General and Note 6. Other Assets to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further details.

We believe our global brands possess the versatility to enter multiple cruise market segments within the cruise vacation industry. Although each of our brands has its own marketing style as well as ships and crews of various sizes, the nature of the products sold and services delivered by our brands share a common base (i.e., the sale and provision of cruise vacations). Our brands also have similar itineraries as well as similar cost and revenue components. In

1

Table of Contents

addition, our brands source passengers from similar markets around the world and operate in similar economic environments with a significant degree of commercial overlap. As a result, we strategically manage our brands as a single business with the ultimate objective of maximizing long-term shareholder value.

Royal Caribbean International

We currently operate 22 ships with an aggregate capacity of approximately 64,150 berths under our Royal Caribbean International brand, offering cruise itineraries that range from two to 18 nights. In October 2014, Royal Caribbean International took delivery of the 4,150 berth Quantum of the Seas, its first newbuild since 2010 and the first of a new generation of cruise ships. In addition, we currently have four ships on order for our Royal Caribbean International brand with an aggregate capacity of approximately 19,200 berths. These include our second Quantum-class ship, which is scheduled to enter service in the second quarter of 2015, our third Oasis-class ship and third Quantum-class ship, each of which is scheduled to enter service in the second quarter of 2016 and our fourth Oasis-class ship, which is scheduled to enter service in the second quarter of 2018. Additionally, we announced that we will redeploy Majesty of the Seas from Royal Caribbean International to Pullmantur in 2016. Royal Caribbean International offers a variety of itineraries to destinations worldwide, including Alaska, Asia, Australia, Bahamas, Bermuda, Canada, the Caribbean, Europe, the Panama Canal, South America and New Zealand.

Royal Caribbean International is positioned at the upper end of the contemporary segment of the cruise vacation industry, generally characterized by cruises that are seven nights or shorter and feature a casual ambiance as well as a variety of activities and entertainment venues. We believe that the quality of the Royal Caribbean International brand also enables it to attract guests from the premium segment, which is generally characterized by cruises that are seven to 14 nights and appeal to the more experienced guest who is usually more affluent. This allows Royal Caribbean International to achieve market coverage that is among the broadest of any of the major cruise brands in the cruise vacation industry. Royal Caribbean International's strategy is to attract an array of vacationing guests by providing a wide variety of itineraries and cruise lengths with multiple innovative options for onboard dining, entertainment and other onboard activities. We believe that the variety and quality of Royal Caribbean International's product offerings represent excellent value to consumers, especially to couples and families traveling with children. Because of the brand's extensive and innovative product offerings, we believe Royal Caribbean International is well positioned to attract new consumers to the cruise vacation industry and to continue to bring loyal repeat guests back for their next vacation.

Royal Caribbean International has a ship upgrade program designed to incorporate certain of the most popular features of our newer ships across the fleet. From 2011 to 2014, a total of 14 ships have been upgraded under this program. An additional four ships are currently undergoing or scheduled for upgrades in 2015.

Celebrity Cruises

We currently operate 11 ships with an aggregate capacity of approximately 24,900 berths under our Celebrity Cruises brand, offering cruise itineraries that range from two to 23 nights. In February 2015, we entered into construction agreements with STX France to build two new ships of a new generation of Celebrity Cruises ships. These 2,900-berth ships, being developed under the name "Project Edge", are expected to enter service in the second half of 2018 and the first half of 2020, respectively. In September 2014, we sold Celebrity Century to a subsidiary of Skysea Holding International Ltd. ("Skysea Holding"). As part of the sale agreement, we agreed to charter the ship from the buyer until April 2015 to fulfill existing passenger commitments. As discussed further below, we acquired a 35% equity stake in Skysea Holding in November 2014. Celebrity Cruises offers a variety of itineraries to popular destinations, including Alaska, Asia, Australia, Bermuda, Canada, the Caribbean, Europe, Hawaii, New Zealand, the Panama Canal and South America.

Celebrity Cruises is positioned within the premium segment of the cruise vacation industry. Celebrity Cruises' strategy is to target experienced cruisers and quality and service oriented new cruisers by delivering a destination-rich experience onboard upscale ships that offer, among other things, luxurious accommodations, a high staff-to-guest ratio, fine dining, personalized service and extensive spa facilities. In 2013, the brand completed a ship upgrade

Table of Contents

program in order to incorporate well-received concepts from its Solstice-class ships.

Azamara Club Cruises

We currently operate two ships with an aggregate capacity of approximately 1,400 berths under our Azamara Club Cruises brand, offering cruise itineraries that range from four to 20 nights. Azamara Club Cruises is designed to serve the up-market segment of the North American, United Kingdom and Australian markets. The up-market segment incorporates elements of the premium segment and the luxury segment which is generally characterized by smaller ships, high standards of accommodation and service, higher prices and exotic itineraries.

Azamara Club Cruises' strategy is to deliver distinctive destination experiences through unique itineraries with more overnights and longer stays as well as comprehensive tours allowing guests to experience the destination in more depth. Azamara Club Cruises' focus is to attract experienced travelers who are looking for more comprehensive destination experiences, and who seek a more intimate onboard experience and a high level of service. In furtherance of this strategy, Azamara Club Cruises includes as part of the base price of the cruise certain complimentary onboard services, amenities and activities which are not normally included in the base price of most other cruise lines. Azamara Club Cruises sails in Asia, Northern and Western Europe, the Mediterranean, South and Central America, the less-traveled islands of the Caribbean and North America.

Pullmantur

We currently operate three ships with an aggregate capacity of approximately 6,200 berths under our Pullmantur brand, offering cruise itineraries that range from two to 17 nights throughout South America, the Caribbean and Europe. Additionally, we announced that Majesty of the Seas will be redeployed from Royal Caribbean International to Pullmantur in 2016. Pullmantur serves the contemporary segment of the Spanish, Portuguese and Latin American cruise markets. Pullmantur's strategy is to attract cruise guests from these target markets by providing a variety of cruising options and onboard activities directed at couples and families traveling with children. Over the last few years, Pullmantur has systematically increased its focus on Latin America and has expanded its presence in that market.

In order to facilitate Pullmantur's ability to focus on its core cruise business, on March 31, 2014, Pullmantur sold the majority of its interest in its non-core businesses. These non-core businesses included Pullmantur's land-based tour operations, travel agency and 49% interest in its air business. In connection with the sale agreement, we retained a 19% interest in each of the non-core businesses as well as 100% ownership of the aircraft which are being dry leased to Pullmantur Air. See Note 1. General and Note 6. Other Assets to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further details.

CDF Croisières de France

We currently operate two ships with an aggregate capacity of approximately 2,800 berths under our CDF Croisières de France brand. CDF Croisières de France offers seasonal itineraries to the Mediterranean, Europe and Caribbean. During the winter season, Zenith is deployed to the Pullmantur brand for sailings in South America. CDF Croisières de France is designed to serve the contemporary segment of the French cruise market by providing a brand tailored for French cruise guests.

TUI Cruises

TUI Cruises is a joint venture owned 50% by us and 50% by TUI AG, a German tourism and shipping company, and is designed to serve the contemporary and premium segments of the German cruise market by offering a product

tailored for German guests. All onboard activities, services, shore excursions and menu offerings are designed to suit the preferences of this target market. TUI Cruises operates three ships, Mein Schiff 1, Mein Schiff 2 and Mein Schiff 3, with an aggregate capacity of approximately 6,300 berths. In addition, TUI Cruises currently has three newbuild ships on order at the Finnish Meyer Turku yard with an aggregate capacity of approximately 7,500 berths: Mein Schiff 4, scheduled for delivery in the second quarter of 2015, Mein Schiff 5, scheduled for delivery in the third quarter of

3

Table of Contents

2016 and Mein Schiff 6, scheduled for delivery in the second quarter of 2017.

Other

In November 2014, we formed a strategic partnership with Ctrip.com International Ltd. ("Ctrip"), a Chinese travel service provider, to operate a new cruise brand known as SkySea Cruises. SkySea Cruises will offer a custom-tailored product for Chinese cruise guests operating the ship purchased from Celebrity Cruises. The new cruise line will begin service in the second quarter of 2015. We and Ctrip each own 35% of the new company, Skysea Holding, with the balance being owned by Skysea Holding management and a private equity fund.

Industry

Cruising is considered a well-established vacation sector in the North American market, a growing sector over the long-term in the European market and a developing but promising sector in several other emerging markets. Industry data indicates that market penetration rates are still low and that a significant portion of cruise guests carried are first-time cruisers. We believe this presents an opportunity for long-term growth and a potential for increased profitability.

The following table details market penetration rates for North America and Europe computed based on the number of annual cruise guests as a percentage of the total population:

Year	North America(1)	Europe(2)
2010	3.1%	1.1%
2011	3.4%	1.1%
2012	3.3%	1.2%
2013	3.4%	1.2%
2014	3.5%	1.3%

Source: Our estimates are based on a combination of data obtained from publicly available sources including the (1)International Monetary Fund and Cruise Lines International Association ("CLIA"). Rates are based on cruise guests carried for at least two consecutive nights. Includes the United States of America and Canada.

(2) Source: Our estimates are based on a combination of data obtained from publicly available sources including the International Monetary Fund and CLIA Europe, formerly European Cruise Council.

We estimate that the global cruise fleet was served by approximately 457,000 berths on approximately 283 ships at the end of 2014. There are approximately 33 ships with an estimated 98,650 berths that are expected to be placed in service in the global cruise market between 2015 and 2019, although it is also possible that ships could be ordered or taken out of service during these periods. We estimate that the global cruise industry carried 22.0 million cruise guests in 2014 compared to 21.3 million cruise guests carried in 2013 and 20.9 million cruise guests carried in 2012.

Table of Contents

The following table details the growth in global weighted average berths and the global, North American and European cruise guests over the past five years:

Year	Weighted-Average Supply of Berths Marketed Globally(1)	Royal Caribbean Cruises Ltd. Total Berths	Global Cruise Guests(1)	North American Cruise Guests(2)	European Cruise Guests (3)
2010	391,000	92,300	18,800,000	10,781,000	5,540,000
2011	412,000	92,650	20,227,000	11,625,000	5,894,000
2012	425,000	98,650	20,898,000	11,640,000	6,139,000
2013	432,000	98,750	21,300,000	11,816,000	6,399,000
2014	448,000	105,750	22,006,063	12,260,238	6,535,365

Source: Our estimates of the number of global cruise guests and the weighted-average supply of berths marketed globally are based on a combination of data that we obtain from various publicly available cruise industry trade information sources including Seatrade Insider, Cruise Industry News and CLIA. In addition, our estimates incorporate our own statistical analysis utilizing the same publicly available cruise industry data as a base.

(1) Source: CLIA based on cruise guests carried for at least two consecutive nights (see number 1 above). Includes the United States of America and Canada.

(2) Source: CLIA Europe, formerly European Cruise Council, (see number 2 above).

North America

The majority of cruise guests are sourced from North America, which represented approximately 55.7% of global cruise guests in 2014. The compound annual growth rate in cruise guests sourced from this market was approximately 3.3% from 2010 to 2014.

Europe

Cruise guests sourced from Europe represented approximately 29.7% of global cruise guests in 2014. The compound annual growth rate in cruise guests sourced from this market was approximately 4.2% from 2010 to 2014.

Asia/Pacific

In addition to expected industry growth in North America and Europe, we expect the Asia/Pacific region to demonstrate an even higher growth rate in the near term, although it will continue to represent a relatively small sector compared to North America and Europe. Based on industry data, cruise guests sourced from the Asia/Pacific region represented approximately 8.5% of global cruise guests in 2014. The compound annual growth rate in cruise guests sourced from this market was approximately 16.4% from 2010 to 2014.

Competition

We compete with a number of cruise lines. Our principal competitors are Carnival Corporation & plc, which owns, among others, Aida Cruises, Carnival Cruise Line, Costa Cruises, Cunard Line, Holland America Line, Iberocruceros, P&O Cruises and Princess Cruises; Disney Cruise Line; MSC Cruises; Norwegian Cruise Line Holdings Ltd, which owns Norwegian Cruise Line, Oceania Cruises and Regent Seven Seas Cruises. Cruise lines compete with other vacation alternatives such as land-based resort hotels and sightseeing destinations for consumers' leisure time. Demand for such activities is influenced by political and general economic conditions. Companies within the vacation market

are dependent on consumer discretionary spending.

5

Table of Contents

Operating Strategies

Our principal operating strategies are to:

• protect the health, safety and security of our guests and employees and protect the environment in which our vessels and organization operate,

• strengthen and support our human capital in order to better serve our global guest base and grow our business,

• further strengthen our consumer engagement in order to enhance our revenues,

• increase the awareness and market penetration of our brands globally,

• focus on cost efficiency, manage our operating expenditures and ensure adequate cash and liquidity, with the overall goal of maximizing our return on invested capital and long-term shareholder value,

• strategically invest in our fleet through the upgrade and maintenance of existing ships and the transfer of key innovations across each brand, while prudently expanding our fleet with new state-of-the-art cruise ships,

• capitalize on the portability and flexibility of our ships by deploying them into those markets and itineraries that provide opportunities to optimize returns, while continuing our focus on existing key markets,

• further enhance our technological capabilities to service customer preferences and expectations in an innovative manner, while supporting our strategic focus on profitability, and

• maintain strong relationships with travel agencies, which continue to be the principal industry distribution channel, while enhancing our consumer outreach programs.

Safety, Environment and Health policies

We are committed to protecting the safety, environment and health of our guests, employees and others working on our behalf. We are also committed to protecting the marine environment and communities in which we operate. As part of this commitment, our Safety, Environment and Health Department oversees our maritime safety, global security, environmental stewardship and medical/public health activities. Our dedication to these areas is guided by a Maritime Advisory Board of experts and overseen by the Safety, Environment and Health Committee of our Board of Directors. We publicly share our safety, environment and health performance along with our social and governance performance through our annual Stewardship Report (calendar years 2008 through 2012) and through its successor, our Sustainability Report, each of which can be accessed on our brand websites. Our most recent report, covering the 2013 year, adopted the Global Reporting Initiative format widely used around the world to help companies better identify and report on the environmental and social aspects that are most significant to the organization and its stakeholders. Our brand websites also provide information about our environmental performance goals and our voluntary reporting of onboard security incidents. The foregoing information contained on our websites is not a part of any of these reports and is not incorporated by reference herein or in any other report or document we file with the Securities and Exchange Commission.

Table of Contents

Human capital

We believe that our employees, both shipboard and shoreside, are a critical success factor for our business. We strive to identify, hire, develop, motivate and retain the best employees, who provide our guests with extraordinary vacations. Attracting, engaging, and retaining key employees has been and will remain critical to our success.

We focus on providing our employees with a competitive compensation structure and development and other personal and professional growth opportunities in order to strengthen and support our human capital. We also select, develop and have strategies to retain high performing leaders to advance the enterprise now and in the future. To that end, we pay special attention to identifying high performing potential leaders and developing deep bench strength so these leaders can assume leadership roles throughout the organization. We strive to maintain a work environment that reinforces collaboration, motivation and innovation, and believe that maintaining our strong employee-focused culture is beneficial to the growth and expansion of our business.

Consumer engagement

We place a strong focus on identifying the needs of our guests and creating product features that our customers value. We are focused on targeting high-value guests by better understanding consumer data and insights and creating communication strategies that best resonate with our target audiences.

We interact with customers across all touch points and seek to identify underlying needs for which guests are willing to pay a premium. We rely on various programs prior to, during and after a cruise vacation aimed at increasing our ticket prices, onboard revenues and occupancy. We have strategically invested in a number of projects onboard our ships, including the implementation of new onboard revenue initiatives that we believe drive profitability and improve the guest experience.

Global awareness and market penetration

We increase brand awareness and market penetration of our cruise brands in various ways, including through the use of communication strategies and marketing campaigns designed to emphasize the unique qualities of each brand and to broaden the awareness of the brand, especially among the brand's target customer groups. Our marketing strategies include the use of traditional media, social media, brand websites and travel agencies. Our brands engage past and potential guests by collaborating with travel partners and through call centers, international offices and international representatives. In addition, Royal Caribbean International, Celebrity Cruises and Azamara Club Cruises target repeat guests with exclusive benefits offered through their respective loyalty programs.

We also increase brand awareness across all of our brands through travel agencies, which generate the majority of our bookings. We are committed to this very important distribution channel by continuing to focus the travel agents on the unique qualities of each of our brands.

We sell and market our global brands, Royal Caribbean International, Celebrity Cruises and Azamara Club Cruises, to guests outside of the United States and Canada through our offices in the United Kingdom, France, Germany, Norway, Italy, Spain, Singapore, China, Brazil, Australia and Mexico. We believe that having a local presence in these markets provides us with the ability to react more quickly to local market conditions and better understand our consumer base in each market. We further extend our geographic reach with a network of 38 independent international representatives located throughout the world covering 115 countries. Historically, our focus has been to primarily source guests for our global brands from North America. We also continue to expand our focus on selling and marketing our cruise brands to guests in countries outside of North America by tailoring itineraries and onboard product offerings to the cultural characteristics and preferences of our international guests. In addition, we explore

opportunities that may arise to acquire or develop brands tailored to specific markets.

7

Table of Contents

Passenger ticket revenues generated by sales originating in countries outside of the United States were approximately 47% of total passenger ticket revenues in 2014 and 48% and 49% in 2013 and 2012, respectively. International guests have grown from approximately 1.8 million in 2010 to approximately 2.2 million in 2014.

Cost efficiency, operating expenditures and adequate cash and liquidity

We continue our commitment to identify and implement cost containment initiatives. Our most recent initiatives relate to realizing economies of scale and improving service delivery to our travel partners and guests by restructuring and consolidating our global sales, marketing, general and administrative structure. We also continue our initiatives to reduce energy consumption and, by extension, fuel costs. These include the design of more fuel-efficient ships as well as the implementation of more efficient hardware, including propulsion and cooling systems incorporating energy efficiencies.

We are focused on maintaining a strong liquidity position, reducing our debt and improving our credit metrics. In addition, we continue to pursue our long-term objective of returning our credit ratings to investment grade. We believe these strategies enhance our ability to achieve our overall goal of maximizing our return on invested capital and long-term shareholder value.

Fleet upgrade, maintenance and expansion

We place a strong focus on product innovation, which we seek to achieve by introducing new concepts on our new ships and continuously making improvements to our fleet. Several of these innovations have become signature elements of our brands, such as the “Royal Promenade” (a boulevard with shopping, dining and entertainment venues) for the Royal Caribbean International brand and enhanced design features found on our Solstice-class ships for the Celebrity Cruises brand.

Our upgrade and maintenance programs enable us to incorporate many of our latest signature innovations throughout the brand fleet and allow us to benefit from economies of scale by leveraging our suppliers. Ensuring consistency across our fleet provides us with the flexibility to redeploy our ships among our brand portfolio.

We are committed to building state-of-the-art ships and our brands, excluding our 50% joint venture TUI Cruises, currently have effective agreements for the construction of four new ships. These consist of two Quantum-class ships, which are scheduled to enter service in the second quarters of 2015 and 2016 and two Oasis-class ships, which are scheduled to enter service in the second quarters of 2016 and 2018, respectively. We also reached conditional agreements with STX France to build two ships of a new generation for Celebrity Cruises, which are scheduled to enter service in the second half of 2018 and the first half of 2020. The addition of these six ships is expected to increase our passenger capacity by approximately 25,000 berths by December 31, 2020, or approximately 25.1%, as compared to our capacity as of December 31, 2014.

TUI Cruises, our 50% joint venture, currently has effective agreements for the construction of three new ships. These ships are scheduled to enter service in the second quarter of 2015, third quarter of 2016 and second quarter of 2017, with an expected total capacity of 7,500 berths.

We continuously evaluate opportunities to order new ships, purchase existing ships or sell ships in our current fleet.

Markets and itineraries

In an effort to penetrate untapped markets, diversify our consumer base and respond to changing economic and geopolitical market conditions, we continue to seek opportunities to optimally deploy ships to new and stronger

markets and itineraries throughout the world. The portability of our ships allows us to readily deploy our ships to meet demand within our existing cruise markets. We make deployment decisions generally 12 to 18 months in advance, with the goal of optimizing the overall profitability of our portfolio. Additionally, the infrastructure investments we

Table of Contents

have made to create a flexible global sourcing model has made our brands relevant in a number of markets around the world, which allows us to be opportunistic and source the highest yielding guests for our itineraries.

Our ships offer a wide selection of itineraries that call on approximately 480 destinations in 113 countries, spanning all seven continents. We are focused on obtaining the best possible long-term shareholder returns by operating in established markets while growing our presence in developing markets. New capacity allows us to expand into new markets and itineraries. Our brands have expanded their mix of itineraries while strengthening our ability to further penetrate the Asian, Australian, Caribbean, and Latin American markets. Additionally, in order to capitalize on the summer season in the Southern Hemisphere and mitigate the impact of the winter weather in the Northern Hemisphere, our brands have focused on deployment in Australia and Latin America during that period.

In an effort to secure desirable berthing facilities for our ships, and to provide new or enhanced cruise destinations for our guests, we actively assist or invest in the development or enhancement of certain port facilities and infrastructure, including mixed-use commercial properties, located in strategic ports of call. Generally, we collaborate with local, private or governmental entities by providing management and/or financial assistance and often enter into long-term port usage arrangements. Our participation in these efforts is generally accomplished via investments with the relevant government authority and/or various other strategic partnerships established to develop and/or operate the port facilities, by providing direct development and management expertise or in certain limited circumstances, by providing direct or indirect financial support. In exchange for our involvement, we generally secure preferential berthing rights for our ships.

Technological capabilities

The need to develop and use innovative technology is increasingly important. Technology is a pervasive part of virtually every business process we use to support our strategic focus and provide a quality experience to our customers before, during and after their cruise. Moreover, as the use of our various websites and social media platforms continue to increase along with the use of technology onboard our ships by both our guests and crew, we continually need to upgrade our systems, infrastructure and technologies to facilitate this growth. As a result, we have launched several new initiatives, which include among other improvements, revamped websites, new vacation packaging capabilities, support of mobile apps and modern high speed bandwidth capabilities onboard our three largest vessels. We also provided a host of new and innovative guest engaging technologies on our newest ship, the Quantum of the Seas.

To support our strategic focus on improving revenue yields, we began to implement new capabilities to improve our revenue management systems and decision support processes. As part of this effort, we have introduced new price optimization tools and continue to further leverage the pricing and promotion management capabilities in our reservations system.

Travel agency support and direct business

Travel agencies continue to be the primary source of ticket sales for our ships. We believe in the value of this distribution channel and invest heavily in maintaining strong relationships with our travel partners. To accomplish this goal, we seek to ensure that our commission rates and incentive structures remain competitive with the marketplace. We provide brand dedicated sales representatives who serve as advisors to our travel partners. We also provide trained customer service representatives, call centers and online training tools.

To support our sales initiatives, we have established a Consumer Outreach department which allows consumers 24-hour access to our vacation planners, group vacation planners and customer service agents in our call centers. In addition, we maintain and invest in our websites, including mobile applications and mobile websites, which allow

guests to directly plan, book and customize their cruise, as well as encourage guests to book their next cruise vacations onboard our ships.

9

Table of Contents

Guest Services

We offer to handle virtually all travel aspects related to guest reservations and transportation, including arranging guest pre- and post-hotel stay arrangements and air transportation.

Royal Caribbean International, Celebrity Cruises and Azamara Club Cruises offer rewards to their guests through their loyalty programs, Crown & Anchor Society, Captain's Club and Le Club Voyage, respectively, to encourage repeat business. Crown & Anchor Society has approximately 8.4 million members worldwide. Captain's Club and Le Club Voyage have 2.9 million members combined worldwide. Members earn increasing membership status by accumulating cruise points or credits, depending on the brand, which may be redeemed on future sailings. Members are awarded points or credits in proportion to the number of cruise days and stateroom category. The loyalty programs provide certain tiers of membership benefits which can be redeemed by guests after accumulating the number of cruise points or credits specified for each tier. In addition, upon achieving a certain level of cruise points or credits, members benefit from reciprocal membership benefits across all of our loyalty programs. Examples of the rewards available under our loyalty programs include, but are not limited to, priority ship embarkation, priority waitlist for shore excursions, complimentary laundry service, complimentary internet, booklets with onboard discount offers, upgraded bathroom amenities, private seating on the pool deck, ship tours and, in the case of our most loyal guests who have achieved the highest levels of cruise points or credits, complimentary cruise days. We regularly work to enhance each of our loyalty programs by adding new features and amenities in order to reward our repeat guests.

Operations

Cruise Ships and Itineraries

As of December 31, 2014, our brands, including our 50% joint venture TUI Cruises, operate 43 ships with a selection of worldwide itineraries ranging from two to 23 nights that call on approximately 480 destinations.

Table of Contents

The following table presents summary information concerning the ships we will operate in 2015 under these six cruise brands and their geographic areas of operation based on current 2015 itineraries (subject to change).

Ship	Year Ship Built	Year Ship Entered Service ⁽¹⁾	Approximate Berths	Primary Areas of Operation
Royal Caribbean International				
Anthem of the Seas	2015	2015	4,150	Europe, Eastern/Western/Southern Caribbean, Bahamas
Quantum of the Seas	2014	2014	4,150	Bahamas, Eastern/Southern Caribbean, Asia
Allure of the Seas	2010	2010	5,400	Eastern/Western Caribbean, Europe
Oasis of the Seas	2009	2009	5,450	Eastern/Western Caribbean
Independence of the Seas	2008	2008	3,600	Eastern/Western Caribbean
Liberty of the Seas	2007	2007	3,600	Eastern/Western Caribbean, Bermuda, Canada
Freedom of the Seas	2006	2006	3,600	Eastern/Western Caribbean

Total			112,450	

(1) The year a ship entered service refers to the year in which the ship commenced cruise revenue operations for the brand.

Celebrity Century was built in 1995. In September 2014, Celebrity Century was sold to Skysea Holdings International Ltd. As part of the sale agreement, we agreed to charter the Celebrity Century from the buyer through April 2015 in order to fulfill existing passenger commitments. After the end of the charter period, the ship will be operated by the brand SkySea Cruises.

Does not include Pullmantur's Ocean Dream as it was delivered to an unrelated third-party in April 2012 as part of a six-year bareboat charter agreement. The charter agreement provides a renewal option exercisable by the unrelated third-party for an additional four years.

(4) Zenith was redeployed from Pullmantur to CDF Croisières de France in January 2014.

Table of Contents

Our brands, including our 50% joint venture, TUI Cruises, have seven ships on order. Two ships on order are being built in Germany by Meyer Werft GmbH, three are being built in Finland by Meyer Turku shipyard and two are being built in France by STX France. The expected dates that our ships on order will enter service and their approximate berths are as follows:

Ship	Expected to Enter Service	Approximate Berths
Royal Caribbean International—		
Quantum-class:		
Anthem of the Seas	2nd Quarter 2015	4,150
Ovation of the Seas	2nd Quarter 2016	4,150
Oasis-class:		
Oasis 3	2nd Quarter 2016	5,450
Oasis 4	2nd Quarter 2018	5,450
TUI Cruises (50% joint venture)—		
Mein Schiff 4	2nd Quarter 2015	2,500
Mein Schiff 5	3rd Quarter 2016	2,500
Mein Schiff 6	2nd Quarter 2017	2,500
Total Berths		26,700

In addition, we reached conditional agreements with STX France to build two ships of a new generation of Celebrity Cruises ships, known as "Project Edge." The agreements are subject to certain conditions to effectiveness expected to occur in the second quarter of 2015. The ships will each have a capacity of approximately 2,900 berths and are expected to enter service in the second half of 2018 and the first half of 2020, respectively.

Seasonality

Our revenues are seasonal based on the demand for cruises. Demand is strongest for cruises during the Northern Hemisphere's summer months and holidays. In order to mitigate the impact of the winter weather in the Northern Hemisphere and to capitalize on the summer season in the Southern Hemisphere, our brands have focused on deployment in Australia and Latin America during that period.

Passengers and Capacity

Selected statistical information is shown in the following table (see Description of Certain Line Items and Selected Operational and Financial Metrics under Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, for definitions):

	Year Ended December 31,					
	2014	2013	2012	2011	2010	
Passengers Carried	5,149,952	4,884,763	4,852,079	4,850,010	4,585,920	
Passenger Cruise Days	36,710,966	35,561,772	35,197,783	34,818,335	32,251,217	
Available Passenger Cruise Days (APCD)	34,773,915	33,974,852	33,705,584	33,235,508	30,911,073	
Occupancy	105.6	% 104.7	% 104.4	% 104.8	% 104.3	%

Cruise Pricing

Our cruise ticket prices include accommodations and a wide variety of activities and amenities, including meals and entertainment. Prices vary depending on many factors including the destination, cruise length, stateroom category selected and the time of year the cruise takes place. Although we grant credit terms in select markets mainly outside

Table of Contents

of the United States, our payment terms generally require an upfront deposit to confirm a reservation, with the balance due prior to the sailing. During the selling period of a cruise, we continually monitor and adjust our cruise ticket prices for available guest staterooms based on demand, with the objective of maximizing net yields. During 2014, we developed and implemented revenue management tools that enabled us to better understand and react to the current demand and pricing environment. Historically, we have opened cruises for sale at least one year in advance and often as much as two years in advance. Our air transportation program is available in major cities around the world and prices vary by gateway and destination. Generally, air tickets are sold to guests at prices close to cost.

Passenger ticket revenues accounted for approximately 73%, 72% and 73% of total revenues in 2014, 2013 and 2012, respectively.

Onboard Activities and Other Revenues

Our cruise brands offer modern fleets with a wide array of onboard services, amenities and activities which vary by brand and ship. While many onboard activities are included in the base price of a cruise, we realize additional revenues from, among other things, gaming, the sale of alcoholic and other beverages, internet and other telecommunication services, gift shop items, shore excursions, photography, spa/salon and fitness services, art auctions, catalogue gifts for guests and a wide variety of specialty restaurants and dining options. Many of these services are available for pre-booking on the internet prior to embarkation.

In conjunction with our cruise vacations, we offer pre- and post-cruise hotel packages to our Royal Caribbean International, Celebrity Cruises and Azamara Club Cruises guests. During 2014, we continued to expand the markets in which we sell our cruise vacation protection coverage, which provides guests with coverage for trip cancellation, medical protection and baggage protection. Onboard and other revenues accounted for approximately 27%, 28% and 27% of total revenues in 2014, 2013 and 2012, respectively.

Segment Reporting

We operate five wholly-owned cruise brands, Royal Caribbean International, Celebrity Cruises, Azamara Club Cruises, Pullmantur and CDF Croisières de France. In addition, we have a 50% investment in a joint venture with TUI AG which operates the brand TUI Cruises. We believe our global brands possess the versatility to enter multiple cruise market segments within the cruise vacation industry. Although each of our brands has its own marketing style as well as ships and crews of various sizes, the nature of the products sold and services delivered by our brands share a common base (i.e., the sale and provision of cruise vacations). Our brands also have similar itineraries as well as similar cost and revenue components. In addition, our brands source passengers from similar markets around the world and operate in similar economic environments with a significant degree of commercial overlap. As a result, our brands (including TUI Cruises) have been aggregated as a single reportable segment based on the similarity of their economic characteristics, types of consumers, regulatory environment, maintenance requirements, supporting systems and processes as well as products and services provided. Our Chairman and Chief Executive Officer has been identified as the chief operating decision-maker and all significant operating decisions including the allocation of resources are based upon the analyses of the Company as one segment. (For financial information see Item 8. Financial Statements and Supplementary Data.)

Employees

As of December 31, 2014, our brands, excluding our 50% joint venture, TUI Cruises, employed over 64,000 employees, including 58,000 shipboard employees as well as 5,700 full-time and 600 part-time employees in our shoreside operations. As of December 31, 2014, approximately 86% of our shipboard employees were covered by collective bargaining agreements.

Insurance

We maintain insurance on the hull and machinery of our ships, with insured values generally equal to the net

14

Table of Contents

book value of each ship. This coverage is maintained with financially sound insurance underwriters from the British, Scandinavian, French, United States and other reputable international insurance markets.

We maintain protection and indemnity liability insurance, which provides coverage for liabilities, costs and expenses for illness and injury to crew, guest injury, pollution and other third-party claims that arise out of, or are the result of, our cruise operations. Our vessels are insured through either the United Kingdom Mutual Steam Ship Assurance Association (Bermuda) Limited or the Steamship Mutual Underwriting Association (Bermuda) Limited. Our protection and indemnity liability insurance is done on a mutual basis and we are subject to additional premium calls in amounts based on claim records of all members of the mutual protection and indemnity association. We are also subject to additional premium calls based on investment shortfalls experienced by the insurer.

We maintain war risk insurance which covers damage due to acts of war, including invasion, insurrection, terrorism, rebellion, piracy and hijacking, on each ship, through a Norwegian war risk insurance organization. This coverage includes coverage for physical damage to the ship which is not covered under the hull policies as a result of war exclusion clauses in such hull policies. We also maintain protection and indemnity war risk coverage for risks that would be excluded by the rules of the indemnity insurance organizations, subject to certain limitations. Consistent with most marine war risk policies, under the terms of our war risk insurance coverage, underwriters can give seven days notice to us that the policy will be canceled and reinstated at higher premium rates.

Insurance coverage for shoreside property, shipboard inventory, general liability, off-vessel liability, directors & officers and network & privacy risks are maintained with insurance underwriters in the United States and the United Kingdom.

We do not carry business interruption insurance for our ships based on our evaluation of the risks involved and protective measures already in place, as compared to the cost of insurance.

All insurance coverage is subject to certain limitations, exclusions and deductible levels. In addition, in certain circumstances, we either self-insure or co-insure a portion of these risks. Premiums charged by insurance carriers, including carriers in the maritime insurance industry, increase or decrease from time to time and tend to be cyclical in nature. These cycles are impacted both by our own loss experience and by losses incurred in direct and reinsurance markets. We historically have been able to obtain insurance coverage in amounts and at premiums we have deemed to be commercially acceptable. No assurance can be given that affordable and secure insurance markets will be available to us in the future, particularly for war risk insurance.

International regulations, namely the European Union's Passenger Liability Regulations (effective December 31, 2012) and the Athens Convention 2002 Protocol (effective April 2014) require substantial increases to the level of compulsory insurance which must be maintained by passenger ship operators. Maintaining compliance with these regulations has not had a material impact on operating costs.

Trademarks

We own a number of registered trademarks related to the Royal Caribbean International, Celebrity Cruises, Azamara Club Cruises, Pullmantur and CDF Croisières de France cruise brands. The registered trademarks include the name "Royal Caribbean International" and its crown and anchor logo, the name "Celebrity Cruises" and its "X" logo, the name "Azamara Club Cruises" and its globe with an "A" logo, the names "Pullmantur Cruises" and "Pullmantur" and their logos, the name "CDF Croisières de France" and its logo, and the names of various cruise ships, as well as loyalty program names and other marketing programs. We believe our trademarks are widely recognized throughout the world and have considerable value.

Regulation

Our ships are regulated by various international, national, state and local laws, regulations and treaties in force in the jurisdictions in which they operate. In addition, our ships are registered in the Bahamas, Malta or in the case

15

Table of Contents

of Celebrity Xpedition, Ecuador. Each ship is subject to regulations issued by its country of registry, including regulations issued pursuant to international treaties governing the safety of our ships, guests and crew as well as environmental protection. Each country of registry conducts periodic inspections to verify compliance with these regulations as discussed more fully below. Ships operating out of United States ports are subject to inspection by the United States Coast Guard for compliance with international treaties and by the United States Public Health Service for sanitary and health conditions. Our ships are also subject to similar inspections pursuant to the laws and regulations of various other countries our ships visit.

We believe that we are in material compliance with all the regulations applicable to our ships and that we have all licenses necessary to conduct our business. Health, safety, security, environmental and financial responsibility issues are, and we believe will continue to be, an area of focus by the relevant government authorities in the United States and internationally. From time to time, various regulatory and legislative changes may be proposed that could impact our operations and subject us to increasing compliance costs in the future.

Safety and Security Regulations

Our ships are required to comply with international safety standards defined in the International Convention for Safety of Life at Sea (“SOLAS”), which among other things, establishes requirements for ship design, structural features, materials, construction, life saving equipment and safe management and operation of ships to ensure guest and crew safety. The SOLAS standards are revised from time to time and the most recent modifications were phased in through 2010. Compliance with these modified standards did not have a material effect on our operating costs. SOLAS incorporates the International Safety Management Code (“ISM Code”), which provides an international standard for the safe management and operation of ships and for pollution prevention. The ISM Code is mandatory for all vessels, including passenger vessel operators.

All of our operations and ships are regularly audited by various national authorities and maintain the required certificates of compliance with the ISM Code.

Our ships are subject to various security requirements, including the International Ship and Port Facility Security Code (“ISPS Code”), which is part of SOLAS, and the U.S. Maritime Transportation Security Act of 2002 (“MTSA”), which applies to ships that operate in U.S. ports. In order to satisfy these security requirements, we implement security measures, conduct vessel security assessments, and develop security plans. The security plans for all of our ships have been submitted to and approved by the respective countries of registry for our ships in compliance with the ISPS Code and the MTSA.

The Cruise Vessel Security and Safety Act of 2010, which applies to passenger vessels which embark or include port stops within the United States, requires the implementation of certain safety design features as well as the establishment of practices for the reporting of and dealing with allegations of crime. The cruise industry supported this legislation and we believe that our internal standards are generally as strict or stricter than the law requires. A few provisions of the law call for regulations which have not yet been finalized; however, based on proposed regulations issued by the U.S. Coast Guard in January 2015, we do not expect any material costs due to implementing these regulations.

Environmental Regulations

We are subject to various international and national laws and regulations relating to environmental protection. Under such laws and regulations, we are generally prohibited from discharging materials other than food waste into the waterways. We have made, and will continue to make, capital and other expenditures to comply with environmental laws and regulations. From time to time, environmental and other regulators consider more stringent regulations,

which may affect our operations and increase our compliance costs. We believe that the impact of ships on the global environment will continue to be an area of focus by the relevant authorities throughout the world and, accordingly, may subject us to increasing compliance costs in the future, including the items described below.

Table of Contents

Our ships are subject to the International Maritime Organization's ("IMO") regulations under the International Convention for the Prevention of Pollution from Ships (the "MARPOL Regulations"), which includes requirements designed to minimize pollution by oil, sewage, garbage and air emissions. We have obtained the relevant international compliance certificates relating to oil, sewage and air pollution prevention for all of our ships.

The MARPOL Regulations impose global limitations on the sulfur content of fuel used by ships operating worldwide. Permitted sulfur content was reduced from 4.5% to 3.5% on January 1, 2012. This reduction has not had a material effect on our fuel and operating costs.

The MARPOL Regulations also establish special Emission Control Areas ("ECAs") with stringent limitations on sulfur and nitrogen oxide emissions in these areas. As of February 2015, there are four established ECAs: the Baltic Sea, the North Sea/English Channel, certain waters surrounding the North American coast, and the waters surrounding Puerto Rico and the U.S. Virgin Islands.

Since January 1, 2015, ships operating in ECAs have been required to reduce their fuel sulfur content from 1.0% to 0.1%. We have been planning for this additional requirement for the last several years and continue to take steps to mitigate the potential impact on our fuel cost. Both of the ships delivered in 2014 (Quantum of the Seas and Mein Schiff 3) are equipped with advanced emissions purification ("AEP") systems covering all engines. In addition, all of our ships on order will be built with similar capabilities. As these new vessels are delivered, they will provide us with additional operational and deployment flexibility.

In addition, we have been actively developing and testing AEP systems on our existing fleet. We have now received exemptions for 19 of our ships which will apply while they are sailing in the North American and Caribbean ECAs. These exemptions delay the requirement to comply with the additional sulfur content reduction pending our continued development and deployment of AEP systems on these ships. We believe that the learning from our existing endeavors as well as our further efforts with regards to this technology will allow us to execute an effective AEP system retrofit strategy for our fleet.

As a result of these and other mitigating actions, we believe the cost of complying with the 2015 ECA sulfur emission requirement will not be significant to our results of operations in 2015 and the years following.

By January 1, 2020, the MARPOL regulations will require the worldwide limitations on sulfur content of fuel to be further reduced to 0.5%. If such a reduced limitation is implemented worldwide in 2020 and we have not been able to successfully mitigate the impact with evolving technical solutions, our fuel costs could increase significantly.

We have also taken a number of other steps to improve the overall fuel efficiency of our fleet, including our new ships on order, and, accordingly, reduce our fuel costs. We continue to work to improve the efficiency of our existing fleet, including improvements in operations and voyage planning as well as improvements to the propulsion, machinery, HVAC and lighting systems. The overall impact of these efforts has resulted in a 21% improvement in energy efficiency since 2005 and we believe that our energy consumption per guest is currently the lowest in the cruise industry.

In July 2011, new MARPOL Regulations introduced mandatory measures to reduce greenhouse gas emissions. These include the utilization of an energy efficiency design index (EEDI) for new ships as well as the establishment of an energy efficient management plan for all ships. The EEDI is a performance-based mechanism that requires a certain minimum energy efficiency in new ships. These regulations apply to new vessels commissioned after January 1, 2013. Compliance with these regulations has not had nor do we expect it to have a material effect on our operating costs. In June 2013, the European Commission proposed legislation which would require cruise ship operators using ports in the European Union to monitor and report on the vessels' annual carbon dioxide emissions starting in 2018. We expect that compliance with this regulation, if adopted, will not materially impact our results of operations.

Table of Contents

Labor Regulations

The International Labour Organization, an agency of the United Nations that develops worldwide employment standards, has adopted a new Consolidated Maritime Labour Convention (the “Convention”) which became effective in August 2013. The Convention reflects a broad range of standards and conditions governing all aspects of crew management for ships in international commerce, including additional requirements not previously in effect relating to the health, safety, repatriation, entitlements and status of crewmembers and crew recruitment practices. Each of our ships has received its certification of compliance with the requirements of the Convention. We have not incurred and do not expect to incur material costs related to implementation and ongoing compliance with the Convention.

Consumer Financial Responsibility Regulations

We are required to obtain certificates from the United States Federal Maritime Commission relating to our ability to satisfy liability in cases of non-performance of obligations to guests, as well as casualty and personal injury. As a condition to obtaining the required certificates, we arrange through our insurers for the provision of surety for three of our ship-operating companies. The required surety amount is currently \$22.0 million per operator. However, under amendments approved in February 2013, the required amount will increase to \$30.0 million per operator by April 2015 and will be subject to additional consumer price index based adjustments thereafter. We do not anticipate that compliance with the new rules will have a material effect on our costs.

We are also required by the United Kingdom, Norway, Finland, and the Baltics to establish our financial responsibility for any liability resulting from the non-performance of our obligations to guests from these jurisdictions. In the United Kingdom we are currently required by the Association of British Travel Agents to provide performance bonds totaling approximately £31.5 million. The Norwegian Travel Guarantee Fund requires us to maintain performance bonds in varying amounts during the course of the year to cover our financial responsibility in Norway, Finland and the Baltics. These amounts ranged from NOK 33 million to NOK 87 million during 2014. Certain other jurisdictions also require that we establish financial responsibility to our guests resulting from the non-performance of our obligations; however, the related amounts do not have a material effect on our costs.

Regulations Regarding Protection of Disabled Persons

In June 2013, the U.S. Architectural and Transportation Barriers Compliance Board proposed guidelines for the construction and alteration of passenger vessels to ensure that the vessels are readily accessible to and usable by passengers with disabilities. Once finalized, these guidelines will be used by the U.S. Department of Transportation and U.S. Department of Justice to implement mandatory and enforceable standards for passenger vessels covered by the Americans with Disabilities Act. While we believe our vessels have been designed and outfitted to meet the needs of our guests with disabilities, we cannot at this time accurately predict whether we will be required to make material modifications or incur significant additional expenses given the preliminary status of the proposed guidelines.

Taxation of the Company

The following is a summary of our principal taxes, exemptions and special regimes. In addition to or instead of income taxation, virtually all jurisdictions where our ships call impose some tax or fee, or both, based on guest headcount, tonnage or some other measure.

Our consolidated operations are primarily foreign corporations engaged in the owning and operating of passenger cruise ships in international transportation.

United States Income Taxation

The following is a discussion of the application of the United States federal and state income tax laws to us and is based on the current provisions of the United States Internal Revenue Code, Treasury Department regulations,

Table of Contents

administrative rulings, court decisions and the relevant state tax laws, regulations, rulings and court decisions of the states where we have business operations. All of the foregoing is subject to change, and any such change could affect the accuracy of this discussion.

Application of Section 883 of the Internal Revenue Code

We and Celebrity Cruises, Inc. are engaged in a trade or business in the United States, and many of our ship-owning subsidiaries, depending upon the itineraries of their ships, receive income from sources within the United States. Additionally, our United Kingdom tonnage tax company, owned by us and Celebrity Cruises, Inc., is a ship-operating company classified as a partnership for United States federal income tax purposes that may earn United States source income. Under Section 883 of the Internal Revenue Code, certain foreign corporations are not subject to United States federal income or branch profits tax on United States source income derived from or incidental to the international operation of a ship or ships, including income from the leasing of such ships.

A foreign corporation will qualify for the benefits of Section 883 if, in relevant part: (1) the foreign country in which the foreign corporation is organized grants an equivalent exemption to corporations organized in the United States; and (2) the stock of the corporation (or the direct or indirect corporate parent thereof) is “primarily and regularly traded on an established securities market” in the United States or another qualifying country such as Norway. In the opinion of our United States tax counsel, Drinker Biddle & Reath LLP, based on the representations and assumptions set forth in that opinion, we, Celebrity Cruises Inc. and our ship-owning subsidiaries qualify for the benefits of Section 883 because we and each of those subsidiaries are incorporated in Liberia or Malta, which are qualifying countries, and our common stock is primarily and regularly traded on an established securities market in the United States or Norway (i.e., we are a “publicly traded” corporation). If, in the future, (1) Liberia or Malta no longer qualifies as an equivalent exemption jurisdiction, and we do not reincorporate in a jurisdiction that does qualify for the exemption, or (2) we fail to qualify as a publicly traded corporation, we and all of our ship-owning or operating subsidiaries that rely on Section 883 for tax exemption on qualifying income would be subject to United States federal income tax on their United States source shipping income and income from activities incidental thereto.

We believe that most of our income and the income of our ship-owning subsidiaries is derived from or incidental to the international operation of a ship or ships and, therefore, is exempt from taxation under Section 883. Additionally, income earned through a partnership will qualify as income derived from or incidental to the international operation of a ship or ships to the same extent as the income would so qualify if earned directly by the partners. Thus, we believe that United States source income derived from or incidental to the international operation of a ship or ships earned by the United Kingdom tonnage tax company will qualify for exemption under Section 883 to the same extent as if it were earned directly by the owners of the United Kingdom tonnage tax company.

Regulations under Section 883 list activities that are not considered by the Internal Revenue Service to be incidental to the international operation of ships including the sale of air and land transportation, shore excursions and pre- and post-cruise tours. Our income from these activities that is earned from sources within the United States will be subject to United States taxation.

Taxation in the Absence of an Exemption Under Section 883

If we, the operator of our vessels, Celebrity Cruises Inc., or our ship-owning subsidiaries were to fail to meet the requirements of Section 883 of the Internal Revenue Code, or if the provision was repealed, then, as explained below, such companies would be subject to United States income taxation on a portion of their income derived from or incidental to the international operation of our ships.

Because we and Celebrity Cruises Inc. conduct a trade or business in the United States, we and Celebrity Cruises Inc. would be taxable at regular corporate rates on our separate company taxable income (i.e., without regard to the income of our ship-owning subsidiaries) from United States sources. In addition, if any of our earnings and profits effectively connected with our United States trade or business were withdrawn, or were deemed to have been withdrawn, from our United States trade or business, those withdrawn amounts would be subject to a “branch profits” tax at the rate of 30%. We and Celebrity Cruises Inc. would also be potentially subject to tax on portions of certain

Table of Contents

interest paid by us at rates of up to 30%.

If Section 883 were not available to our ship-owning subsidiaries, each such subsidiary would be subject to a special 4% tax on its United States source gross transportation income, if any, each year because it does not have a fixed place of business in the United States and its income is derived from the leasing of a ship.

Other United States Taxation

We and Celebrity Cruises, Inc. earn United States source income from activities not considered incidental to international shipping. The tax on such income is not material to our results of operation for all years presented.

State Taxation

We, Celebrity Cruises Inc. and certain of our subsidiaries are subject to various United States state income taxes which are generally imposed on each state's portion of the United States source income subject to federal income taxes. Additionally, the state of Alaska subjects an allocated portion of the total income of companies doing business in Alaska and certain other affiliated companies to Alaska corporate state income taxes and also imposes a 33% tax on adjusted gross income from onboard gambling activities conducted in Alaska waters. This did not have a material impact to our results of operations for all years presented.

Maltese and Spanish Income Tax

Our Pullmantur ship owner-operator subsidiaries, which include the owner-operator of CDF Croisières de France's ship, qualify as licensed shipping organizations in Malta. No Maltese income tax is charged on the income derived from shipping activities of a licensed shipping organization. Instead, a licensed shipping organization is liable to pay a tonnage tax based on the net tonnage of the ship or ships registered under the relevant provisions of the Merchant Shipping Act. A company qualifies as a shipping organization if it engages in qualifying activities and it obtains a license from the Registrar-General to enable it to carry on such activities. Qualifying activities include, but are not limited to, the ownership, operation (under charter or otherwise), administration and management of a ship or ships registered as a Maltese ship in terms of the Merchant Shipping Act and the carrying on of all ancillary financial, security and commercial activities in connection therewith.

Our Maltese operations that do not qualify as licensed shipping organizations, which are not considered significant, remain subject to normal Maltese corporate income tax.

Pullmantur has sales and marketing functions. These activities are subject to Spanish taxation. The tax from these operations is not considered significant to our operations.

United Kingdom Income Tax

We operate fourteen ships under companies which have elected to be subject to the United Kingdom tonnage tax regime ("U.K. tonnage tax").

Companies subject to U.K. tonnage tax pay a corporate tax on a notional profit determined with reference to the net tonnage of qualifying vessels. Normal United Kingdom corporate income tax is not chargeable on the relevant shipping profits of a qualifying U.K. tonnage tax company. The requirements for a company to qualify for the U.K. tonnage tax regime include being subject to United Kingdom corporate income tax, operating qualifying ships, which are strategically and commercially managed in the United Kingdom, and fulfilling a seafarer training requirement. Failure to meet any of these requirements could cause us to lose the benefit of the tonnage tax regime which will have a material effect on our results of operations.

Relevant shipping profits include income from the operation of qualifying ships and from shipping related

Table of Contents

activities. Our United Kingdom income from non-shipping activities which do not qualify under the U.K. tonnage tax regime and which are not considered significant, remain subject to United Kingdom corporate income tax.

Brazilian Income Tax

Pullmantur and our U.K. tonnage tax company charters certain ships to Brazilian companies for operations in Brazil from November to May. Some of these charters are with unrelated third parties and others are with a Brazilian affiliate. The Brazilian affiliate's earnings are subject to Brazilian taxation which is not considered significant. The charter payments made to the U.K. tonnage tax company and to Pullmantur are exempt from Brazilian income tax under current Brazilian domestic law. Additionally, some remittances of revenue from sales of certain cruises in the Brazilian market benefit from an exemption from withholding taxes which is scheduled to expire at the end of 2015. If the exemption is not extended, this may result in increased taxation for our Brazilian operations.

Chinese Taxation

Our U.K. tonnage tax company operates ships in international transportation in China. The income earned from this operation is exempt from taxation in China under the U.K./China double tax treaty and other circulars addressing indirect taxes. Changes to or failure to qualify for the treaty or circular could cause us to lose the benefits provided which would have a material impact on our results of operations. Our Chinese income from non-shipping activities or from shipping activities not qualifying for treaty or circular protection and which are considered insignificant, remain subject to Chinese taxation.

Other Taxation

We and certain of our subsidiaries are subject to value-added and other indirect taxes most of which are reclaimable, zero-rated or exempt. Changes in the application or interpretation of applicable indirect tax laws or changes in tax legislation could have a material impact on our results of operations.

Website Access to Reports

We make available, free of charge, access to our Annual Reports, all quarterly and current reports and all amendments to those reports, as soon as reasonably practicable after such reports are electronically filed with or furnished to the Securities and Exchange Commission through our website at www.rclinvestor.com. The information contained on our website is not a part of any of these reports and is not incorporated by reference herein.

Table of Contents

Executive Officers of the Company

As of February 23, 2015, our executive officers are:

Name	Age	Position
Richard D. Fain	67	Chairman, Chief Executive Officer and Director
Adam M. Goldstein	55	President and Chief Operating Officer
Michael W. Bayley	56	President and Chief Executive Officer, Royal Caribbean International
Lisa Lutloff-Perlo	57	President and Chief Executive Officer, Celebrity Cruises
Lawrence Pimentel	63	President and Chief Executive Officer, Azamara Club Cruises
Jorge Vilches	41	President and Chief Executive Officer, Pullmantur
Jason T. Liberty	39	Chief Financial Officer
Harri U. Kulovaara	62	Executive Vice President, Maritime
Bradley H. Stein	59	Senior Vice President, General Counsel, Chief Compliance Officer
Henry L. Pujol	47	Senior Vice President, Chief Accounting Officer

Richard D. Fain has served as a director since 1979 and as our Chairman and Chief Executive Officer since 1988. Mr. Fain has been involved in the shipping industry for approximately 40 years.

Adam M. Goldstein has served as President and Chief Operating Officer since April 2014. Prior to this, he served as President of Royal Caribbean International since February 2005 and as its President and Chief Executive Officer since September 2007. Mr. Goldstein has been employed with Royal Caribbean since 1988 in a variety of positions, including Executive Vice President, Brand Operations of Royal Caribbean International, Senior Vice President, Total Guest Satisfaction and Senior Vice President, Marketing. Mr. Goldstein served as National Chair of the United States Travel Association (formerly, Travel Industry Association of America) in 2001. In November 2014, the Board of Directors of Cruise Lines International Association ("CLIA") elected Mr. Goldstein to serve a two-year term as Chairman of CLIA beginning January 1, 2015.

Michael W. Bayley has served as President and Chief Executive Officer of Royal Caribbean International since December 2014. Prior to this, he served as President and Chief Executive Officer of Celebrity Cruises since August 2012. Mr. Bayley has been employed by Royal Caribbean for over 30 years, having started as an Assistant Purser onboard one of the Company's ships. He has served in a number of roles including as Executive Vice President, Operations from February 2012 until August 2012. Other positions Mr. Bayley has held include Executive Vice President, International from May 2010 until February 2012; Senior Vice President, International from December 2007 to May 2010; Senior Vice President, Hotel Operations for Royal Caribbean International; and Chairman and Managing Director of Island Cruises.

Lisa Lutloff-Perlo has served as President and Chief Executive Officer of Celebrity Cruises since December 2014. Prior to this, she served as Executive Vice President, Operations for Royal Caribbean International since September 2012. Ms. Lutloff-Perlo has been employed with the Company since 1985 in a variety of positions within both Celebrity Cruises and Royal Caribbean International. She started at Royal Caribbean International as District Sales Manager for New England and from August 2008 to August 2012, she was responsible for Celebrity Cruises' entire hotel operation. In her role as Executive Vice President of Operations, Ms. Lutloff-Perlo was responsible for all of Royal Caribbean International's hotel, marine and port operations.

Lawrence Pimentel has served as President and Chief Executive Officer of Azamara Club Cruises since July 2009. From 2001 until January 2009, Mr. Pimentel was President, Chief Executive Officer, Director and co-owner of SeaDream Yacht Club, a privately held luxury cruise line located in Miami, Florida with two yacht-style ships that sailed primarily in the Caribbean and Mediterranean. From April 1991 to February 2001, Mr. Pimentel was President and Chief Executive Officer of Carnival Corp.'s Seabourn Cruise Line and from May 1998 to February 2001, he was President and Chief Executive Officer of Carnival Corp.'s Cunard Line.

Table of Contents

Jorge Vilches has served as President and Chief Executive Officer of Pullmantur since July 2014. Mr. Vilches has spent the past 10 years in the travel industry, holding various positions with LATAM Airlines Group S.A., one of the largest airline groups in the world whose shares are traded in Santiago. Most recently, from 2012 to May 2014, he served as Chief Executive Officer of LATAM's long haul business unit, the group's biggest division in terms of capacity and revenue, and, prior to that, as CEO of LAN Peru from 2007 to 2012.

Jason T. Liberty has been employed by the Company since 2005 and has served as Chief Financial Officer since May 2013. Mr. Liberty previously served as Senior Vice President, Strategy and Finance from September 2012 through May 2013, overseeing the Company's Corporate and Strategic Planning, Treasury, Investor Relations and Deployment functions. Prior to this, Mr. Liberty served, from 2010 through 2012, as Vice President of Corporate and Revenue Planning and, from 2008 to 2010, as Vice President of Corporate and Strategic Planning. Before joining Royal Caribbean, Mr. Liberty was a Senior Manager at the international public accounting firm of KPMG LLP.

Harri U. Kulovaara has served as Executive Vice President, Maritime since January 2005. Mr. Kulovaara is responsible for fleet design and newbuild operations. Mr. Kulovaara also chairs our Maritime Safety Advisory Board. Mr. Kulovaara has been employed with Royal Caribbean since 1995 in a variety of positions, including Senior Vice President, Marine Operations, and Senior Vice President, Quality Assurance. Mr. Kulovaara is a naval architect and engineer.

Bradley H. Stein has served as General Counsel of the Company since 2006. He has also served as Senior Vice President and Chief Compliance Officer of the Company since February 2009 and February 2011, respectively. Mr. Stein has been with Royal Caribbean since 1992. Before joining Royal Caribbean, Mr. Stein worked in private practice in New York and Miami.

Henry L. Pujol has served as Senior Vice President, Chief Accounting Officer of the Company since May 2013. Mr. Pujol originally joined Royal Caribbean in 2004 as Assistant Controller and was promoted to Corporate Controller in May 2007. Before joining Royal Caribbean, Mr. Pujol was a Senior Manager at the international public accounting firm of KPMG LLP.

Table of Contents

Item 1A. Risk Factors

The risk factors set forth below and elsewhere in this Annual Report on Form 10-K are important factors that could cause actual results to differ from expected or historical results. It is not possible to predict or identify all such risks. The risks described below are only those known risks relating to our operations and financial condition that we consider material. There may be additional risks that we consider not to be material, or which are not known, and any of these risks could have the effects set forth below. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for a cautionary note regarding forward-looking statements.

Adverse worldwide economic, geopolitical or other conditions could reduce the demand for cruises and adversely impact our operating results, cash flows and financial condition including potentially impairing the value of our ships, goodwill and other assets.

The demand for cruises is affected by international, national and local economic and geopolitical conditions. In recent years, we have been faced with very challenging global economic conditions, which have adversely affected vacationers' discretionary income and consumer confidence. This, in turn, resulted in cruise booking slowdowns, decreased cruise prices and lower onboard revenues for us and for others in the cruise industry as compared to more robust economic times. Although the cruise industry continued to recover in 2014, ongoing economic challenges continue in certain key markets, including Europe. In addition, we cannot predict with any certainty whether demand for cruises will continue to improve in countries that have experienced improved economic conditions or the strength of such improvement. Any significant deterioration of global, national or local economic conditions could result in a prolonged period of booking slowdowns, depressed cruise prices and reduced onboard revenues. Demand for our cruises is also influenced by geopolitical events. Unfavorable conditions, such as cross-border conflicts, civil unrest and governmental changes, especially in regions with popular ports of call, can undermine consumer demand and/or pricing for itineraries featuring these ports.

Continued unrest and economic instability could materially adversely impact our operating results, cash flows and financial condition including potentially impairing the value of our ships, goodwill and other assets. See Critical Accounting Policies for more information.

We may not be able to obtain sufficient financing or capital for our needs or may not be able to do so on terms that are acceptable or consistent with our expectations.

To fund our capital expenditures and scheduled debt payments, we have historically relied on a combination of cash flows provided by operations, drawdowns under available credit facilities, the incurrence of additional indebtedness and the sale of equity or debt securities in private or public securities markets. We also condition the effectiveness of our ship orders on obtaining committed financing arrangements. Any circumstance or event which leads to a decrease in consumer cruise spending, such as worsening global economic conditions or significant incidents impacting the cruise industry, could negatively affect our operating cash flows. See "-Adverse worldwide economic, geopolitical or other conditions..." and "-Incidents or adverse publicity concerning the cruise vacation industry..." for more information. Although we believe we can access sufficient liquidity to fund our operations and obligations as expected, there can be no assurances to that effect. Our ability to access additional funding as and when needed, our ability to timely refinance and/or replace our outstanding debt securities and credit facilities on acceptable terms and our cost of funding will depend upon numerous factors including but not limited to the vibrancy of the financial markets, our financial performance and the performance of our industry in general.

Our inability to satisfy the covenants required by our credit facilities could adversely impact our liquidity.

Our debt agreements contain covenants, including covenants restricting our ability to take certain actions and financial covenants. In addition, our ability to make borrowings under our available credit facilities is subject to the absence of material adverse changes in our business. Our ability to maintain our credit facilities may also be impacted by changes in our ownership base. More specifically, we may be required to prepay a majority of our debt facilities if

Table of Contents

(i) any person or entity other than A. Wilhelmsen AS. and Cruise Associates and their respective affiliates (the “Applicable Group”) acquires ownership of more than 33% of our common stock and the Applicable Group owns less of our common stock than such person or (ii) subject to certain exceptions, during any 24-month period, a majority of the Board is no longer comprised of individuals who were members of the Board on the first day of such period. Certain of our outstanding debt securities also contain change of control provisions that would be triggered by the acquisition of greater than 50% of our common stock by a person other than a member of the Applicable Group coupled with a ratings downgrade.

Our failure to comply with the terms of our debt facilities could result in an event of default. Generally, if an event of default under any debt agreement occurs, then pursuant to cross default acceleration clauses, our outstanding debt and derivative contract payables could become due and/or terminated. In addition, in such events, our credit card processors could hold back payments to create a reserve. We cannot provide assurances that we would have sufficient liquidity to repay or the ability to refinance the borrowings under any of the credit facilities or settle other outstanding contracts if such amounts were accelerated upon an event of default.

Incidents or adverse publicity concerning the cruise vacation industry, unusual weather conditions and other natural disasters or disruptions could affect our reputation as well as impact our sales and results of operations.

The ownership and/or operation of cruise ships, airplanes, land tours, port facilities and shore excursions involves the risk of accidents, illnesses, mechanical failures, environmental incidents and other incidents which may bring into question safety, health, security and vacation satisfaction which could negatively impact our reputation. Incidents involving cruise ships, and, in particular the safety and security of guests and crew, media coverage thereof, as well as adverse media publicity concerning the cruise vacation industry have impacted and could in the future impact demand for our cruises and pricing in the industry. The considerable expansion in the use of social media and digital marketing over recent years has compounded the potential scope of the negative publicity that could be generated by those incidents. If any such incident occurs during a time of high seasonal demand, the effect could disproportionately impact our results of operations for the year. In addition, incidents involving cruise ships may result in additional costs to our business, increasing government or other regulatory oversight and, in the case of incidents involving our ships, potential litigation.

Our cruise ships and port facilities may also be adversely impacted by unusual weather patterns or natural disasters or disruptions, such as hurricanes and earthquakes. We are often forced to alter itineraries and occasionally to cancel a cruise or a series of cruises due to these or other factors, which could have an adverse effect on our sales and profitability. In addition, these and any other events which impact the travel industry more generally may negatively impact our ability to deliver guests or crew to our cruises and/or interrupt our ability to obtain services and goods from key vendors in our supply chain. Any of the foregoing could have an adverse impact on our results of operations and on industry performance.

The impact of disruptions in the global financial markets may affect the ability of our counterparties and others to perform their obligations to us.

The financial crisis of 2008, including failures of financial service and insurance companies and the related liquidity crisis, disrupted the capital and credit markets. A recurrence of these or similar disruptions could cause our counterparties and others to breach their obligations to us under our contracts with them. This could include failures of banks or other financial service companies to fund required borrowings under our loan agreements or to pay us amounts that may become due under our derivative contracts for hedging of fuel prices, interest rates and foreign currencies or other agreements. If any of the foregoing occurs it may have a negative impact on our cash flows, including our ability to meet our obligations, our results of operations and our financial condition.

An increase in capacity worldwide or excess capacity in a particular market could adversely impact our cruise sales and/or pricing.

Although our ships can be redeployed, cruise sales and/or pricing may be impacted both by the introduction of new ships into the marketplace and by deployment decisions of ourselves and our competitors. A total of 33 new ships

Table of Contents

with approximately 98,650 berths are on order for delivery through 2019 in the cruise industry. The further growth in capacity from these new ships and future orders, without an increase in the cruise industry's share of the vacation market, could depress cruise prices and impede our ability to achieve yield improvement.

In addition, to the extent that we or our competitors deploy ships to a particular itinerary and the resulting capacity in that region exceeds the demand, we may lower pricing and profitability may be lower than anticipated.

Any of the foregoing could have an adverse impact on our results of operations, cash flows and financial condition including potentially impairing the value of our ships, goodwill and other assets.

If we are unable to appropriately balance our cost management strategies with our goal of satisfying guest expectations, it may adversely impact our business success.

Our goals call for us to provide high quality products and deliver high quality services. There can be no assurances that we can successfully balance these goals with our cost management strategies.

We may lose business to competitors throughout the vacation market.

We operate in the vacation market and cruising is one of many alternatives for people choosing a vacation. We therefore risk losing business not only to other cruise lines, but also to other vacation operators, which provide other leisure options including hotels, resorts and package holidays and tours.

We face significant competition from other cruise lines on the basis of cruise pricing, travel agent preference and also in terms of the nature of ships and services we offer to guests. Our principal competitors within the cruise vacation industry include Carnival Corporation & plc, which owns, among others, Aida Cruises, Carnival Cruise Line, Costa Cruises, Cunard Line, Holland America Line, P&O Cruises and Princess Cruises; Disney Cruise Line; MSC Cruises; Norwegian Cruise Line Holdings Ltd which owns Norwegian Cruise Line, Oceania Cruises and Regent Seven Seas Cruises.

In the event that we do not compete effectively with other vacation alternatives and cruise companies, our results of operations and financial position could be adversely affected.

Fears of terrorist and pirate attacks, war, and other hostilities and the spread of contagious diseases could have a negative impact on our results of operations.

Events such as terrorist and pirate attacks, war, and other hostilities, including the recent escalation of tensions in the Middle East and terrorism incidents in Europe, and the resulting political instability, travel restrictions, the spread of contagious diseases and concerns over safety, health and security aspects of traveling or the fear of any of the foregoing have had, and could have in the future, a significant adverse impact on demand and pricing in the travel and vacation industry. In view of our global operations, we have become susceptible to a wider range of adverse events.

Fluctuations in foreign currency exchange rates, fuel costs and interest rates could affect our financial results.

We are exposed to market risk attributable to changes in foreign currency exchange rates, fuel prices and changes in interest rates. High levels of volatility with respect to any of the foregoing could have a material impact on our financial results, net of the impact of our hedging activities and other natural offsets. See "Item 7A. Quantitative and Qualitative Disclosures About Market Risk" for more information.

Environmental, labor, health and safety, financial responsibility and other maritime regulations could affect operations and increase operating costs.

The United States and various state and foreign government or regulatory agencies have enacted or are considering new environmental regulations or policies, such as requiring the use of low sulfur fuels, increasing fuel efficiency requirements, further restricting emissions, or other initiatives to limit greenhouse gas emissions that could increase our cost for fuel, limit the supply of compliant fuel, cause us to incur significant expenses to purchase and/or develop

Table of Contents

new equipment and adversely impact the cruise vacation industry. While we have taken and expect to continue to take a number of actions to mitigate the potential impact of certain of these regulations, there can be no assurances that these efforts will be successful. Some environmental groups have also lobbied for more stringent regulation of cruise ships and have generated negative publicity about the cruise vacation industry and its environmental impact. See Item 1. Business-Regulation-Environmental Regulations. An increase in fuel prices not only impacts our fuel costs, but also some of our other expenses, such as crew travel, freight and commodity prices.

In addition, we are subject to various international, national, state and local laws, regulations and treaties that govern, among other things, safety standards applicable to our ships, treatment of disabled persons, health and sanitary standards applicable to our guests, security standards on board our ships and at the ship/port interface areas, and financial responsibilities to our guests. These issues are, and we believe will continue to be, an area of focus by the relevant authorities throughout the world. This could result in the enactment of more stringent regulation of cruise ships that could subject us to increasing compliance costs in the future.

Conducting business globally may result in increased costs and other risks.

We operate our business globally. Operating internationally exposes us to a number of risks, including increased exposure to a wider range of regional and local economic conditions, volatile local political conditions, potential changes in duties and taxes, including changing and/or uncertain interpretations of existing tax laws and regulations, required compliance with additional laws and policies affecting cruising, vacation or maritime businesses or governing the operations of foreign-based companies, currency fluctuations, interest rate movements, difficulties in operating under local business environments, port quality and availability in certain regions, U.S. and global anti-bribery laws or regulations, imposition of trade barriers and restrictions on repatriation of earnings. We have recently expanded our presence in China and, accordingly, our exposure to the risks of doing business in the country. China's economy differs from the economies of other developed countries in many respects and, as the legal system in China continues to evolve, there may be greater uncertainty as to the interpretation and enforcement of applicable laws and regulations.

Operating globally also exposes us to numerous and sometimes conflicting legal, regulatory and tax requirements. In many parts of the world, including countries in which we operate, practices in the local business communities might not conform to international business standards. We must adhere to policies designed to promote legal and regulatory compliance as well as applicable laws and regulations. However, we might not be successful in ensuring that our employees, agents, representatives and other third parties with which we associate throughout the world properly adhere to them. Failure by us, our employees or any of these third parties to adhere to our policies or applicable laws or regulations could result in penalties, sanctions, damage to our reputation and related costs which in turn could negatively affect our results of operations and cash flows.

If we are unable to address these risks adequately, our financial position and results of operations could be adversely affected, including potentially impairing the value of our ships, goodwill and other assets.

Our attempts to expand our business into new markets may not be successful.

While our historical focus has been to serve the North American cruise market, we have expanded our focus to increase our international guest sourcing, including sourcing from the Asian, Latin American, and Australian markets. Expansion into new markets requires significant levels of investment. There can be no assurance that these markets will develop as anticipated or that we will have success in these markets, and if we do not, we may be unable to recover our investment, which could adversely impact our business, financial condition and results of operations, including potentially impairing the value of our goodwill.

Ship construction, repair or upgrade delays or mechanical faults may result in cancellation of cruises or unscheduled drydocks and repairs and thus adversely affect our results of operations.

We depend on shipyards to construct, repair and upgrade our cruise ships on a timely basis and in good working order. The sophisticated nature of building a ship involves risks. Delays in ship construction or upgrades or mechanical faults have in the past and may in the future result in delays or cancellation of cruises or necessitate unscheduled

Table of Contents

drydocks and repairs of ships. These events and any related adverse publicity could result in lost revenue, increased operating expenses, or both, and thus adversely affect our results of operations.

Shipyards and their subcontractors may experience financial difficulties or consolidation which could cause or result in delay, ship cancellations, our inability to procure new capacity in a timely fashion or increases in shipbuilding costs that could adversely affect our results of operations.

We rely on shipyards to construct, repair and upgrade our ships. Financial difficulties, liquidations or closures suffered by these shipyards and/or their subcontractors may impact the timely delivery or costs of new ships or the ability of shipyards to repair and upgrade our fleet in accordance with our needs or expectations. In addition, there are a limited number of shipyards with the capability and capacity to build our new ships and, accordingly, consolidation in the cruise shipyard industry could impact our ability to construct new ships when and as planned and/or could result in stronger bargaining power on the part of the shipyards and thus higher prices for our future ship orders. Delivery delays and canceled deliveries can adversely affect our results of operations, as can any constraints on our ability to build, repair and maintain our ships on a timely basis.

Our operating costs could increase due to market forces and economic or geo- political factors beyond our control. Our operating costs, including fuel, food, payroll, airfare, taxes, insurance and security costs are all subject to increases due to market forces and economic or political conditions or other factors beyond our control. Increases in these operating costs could adversely affect our profitability.

Unavailability of ports of call may adversely affect our results of operations.

We believe that port destinations are a major reason why guests choose to go on a particular cruise or on a cruise vacation. The availability of ports is affected by a number of factors, including existing capacity constraints, constraints related to the size of certain ships, security concerns, adverse weather conditions and natural disasters, financial limitations on port development, exclusivity arrangements that ports may have with our competitors, local governmental regulations and local community concerns about port development and other adverse impacts on their communities from additional tourists. In addition, rising fuel costs may adversely impact the destinations on certain of our itineraries. Any limitations on the availability or feasibility of our ports of call or on the availability of shore excursion and other service providers at such ports could adversely affect our results of operations.

Price increases for commercial airline service for our guests or major changes or reduction in commercial airline service and/or availability could adversely impact the demand for cruises and undermine our ability to provide reasonably priced vacation packages to our guests.

Many of our guests depend on scheduled commercial airline services to transport them to or from the ports where our cruises embark or disembark. Increases in the price of airfare would increase the overall price of the cruise vacation to our guests which may adversely impact demand for our cruises. In addition, changes in the availability of commercial airline services could adversely affect our guests' ability to obtain airfare as well as our ability to fly our guests to or from our cruise ships which could adversely affect our results of operations.

Our reliance on travel agencies to sell and market our cruises exposes us to certain risks which, if realized, could adversely impact our business.

Because we rely on travel agencies to generate the majority of bookings for our ships, we must ensure that our commission rates and incentive structures remain competitive. If we fail to offer competitive compensation packages, these agencies may be incentivized to sell cruises offered by our competitors to our detriment, which could adversely impact our operating results. In addition, the travel agent industry is sensitive to economic conditions that impact discretionary income. Significant disruptions, especially disruptions impacting those agencies that sell a high volume of our business, or contractions in the industry could reduce the number of travel agencies available for us to market and sell our cruises, which could have an adverse impact on our financial condition and results of operations.

Table of Contents

Disruptions in our shoreside operations or our information systems may adversely affect our results of operations. Our principal executive office and principal shoreside operations are located at the Port of Miami, Florida and we have shoreside offices throughout the world. Actual or threatened natural disasters (e.g., hurricanes, earthquakes, tornadoes, fires, floods) or similar events in these locations may have a material impact on our business continuity, reputation and results of operations. In addition, substantial or repeated information systems failures, computer viruses or cyber-attacks impacting our shoreside or shipboard operations could adversely impact our business. We do not generally carry business interruption insurance for our shoreside operations or our information systems. As such, any losses or damages incurred by us could have an adverse impact on our results of operations.

Failure to develop the value of our brands and differentiate our products could adversely affect our results of operations.

Our success depends on the strength and continued development of our cruise brands and on the effectiveness of our brand strategies. Failure to protect and differentiate our brands from competitors throughout the vacation market could adversely affect our results of operations.

The loss of key personnel, our inability to recruit or retain qualified personnel, or disruptions among our shipboard personnel due to strained employee relations could adversely affect our results of operations.

Our success depends, in large part, on the skills and contributions of key executives and other employees, and on our ability to recruit and retain high quality personnel in key markets. We must continue to sufficiently recruit, retain, train and motivate our employees to maintain our current business and support our projected global growth.

Furthermore, as of December 31, 2014, 86% of our shipboard employees were covered by collective bargaining agreements. A dispute under our collective bargaining agreements could result in a work stoppage of those employees covered by the agreements. A loss of key employees or disruptions among our personnel could adversely affect our results of operations.

Business activities that involve our co-investment with third parties may subject us to additional risks.

Partnerships, joint ventures, and other business structures involving our co-investment with third parties, such as our joint venture to operate TUI Cruises, our new partnership to operate SkySea Cruises, our investment in Grand Bahama Shipyard and our minority ownership investments in various port development and other projects, generally include some form of shared control over the operations of the business and create additional risks, including the possibility that other investors in such ventures could become bankrupt or otherwise lack the financial resources to meet their obligations, or could have or develop business interests, policies or objectives that are inconsistent with ours. In addition, actions by another investor may present additional risks of operational difficulties or reputational or legal concerns. These or other issues related to our co-investment with third parties could adversely impact our operations.

We rely on third-party providers of various services integral to the operations of our businesses. These third parties may act in ways that could harm our business.

In order to achieve cost and operational efficiencies, we outsource to third-party vendors certain services that are integral to the operations of our global businesses, such as our onboard concessionaires, certain of our call center operations and operation of a large part of our information technology systems. We are subject to the risk that certain decisions are subject to the control of our third-party service providers and that these decisions may adversely affect our activities. A failure to adequately monitor a third-party service provider's compliance with a service level agreement or regulatory or legal requirements could result in significant economic and reputational harm to us. There is also a risk the confidentiality, privacy and/or security of data held by third parties or communicated over third-party networks or platforms could become compromised.

Table of Contents

A failure to keep pace with developments in technology or technological obsolescence could impair our operations or competitive position.

Our business continues to demand the use of sophisticated technology and systems. These technologies and systems must be refined, updated, and/or replaced with more advanced systems in order to continue to meet our customers' demands and expectations. If we are unable to do so in a timely manner or within reasonable cost parameters or if we are unable to appropriately and timely train our employees to operate any of these new systems, our business could suffer. We also may not achieve the benefits that we anticipate from any new technology or system, and a failure to do so could result in higher than anticipated costs or could impair our operating results.

We may be exposed to risks and costs associated with cyber security, including protecting the integrity and security of our guests' and employees' personal information.

We are subject to various risks associated with the collection, handling, storage and transmission of sensitive information, including risks related to compliance with applicable laws and other contractual obligations, as well as the risk that our systems collecting such information could be compromised. In the course of doing business, we collect large volumes of internal and customer data, including personally identifiable information for various business purposes. If we fail to comply with the various applicable data collection and privacy laws, we could be exposed to fines, penalties, restrictions, litigation or other expenses, and our business could be adversely impacted.

In addition, even if we are fully compliant with legal standards and contractual requirements, we still may not be able to prevent security breaches involving sensitive data. Any breach, theft, loss, or fraudulent use of guest, employee or company data could adversely impact our reputation and brand and our ability to retain or attract new customers, and expose us to risks of data loss, business disruption, governmental investigation, litigation and other liability, any of which could adversely affect our business. Significant capital investments and other expenditures could be required to remedy the problem and prevent future breaches, including costs associated with additional security technologies, personnel, experts and credit monitoring services for those whose data has been breached. Additionally, the techniques and sophistication used to conduct cyber-attacks and breaches of information technology systems, as well as the sources and targets of these attacks, change frequently and are often not recognized until such attacks are launched or have been in place for a period of time. Our security measures cannot provide assurance that we will be successful in preventing such breaches.

A change in our tax status under the United States Internal Revenue Code, or other jurisdictions, may have adverse effects on our income.

We and a number of our subsidiaries are foreign corporations that derive income from a United States trade or business and/or from sources within the United States. Drinker Biddle & Reath LLP, our United States tax counsel, has delivered to us an opinion, based on certain representations and assumptions set forth in it, to the effect that this income, to the extent derived from or incidental to the international operation of a ship or ships, is exempt from United States federal income tax pursuant to Section 883 of the Internal Revenue Code. We believe that most of our income (including that of our subsidiaries) is derived from or incidental to the international operation of a ship or ships.

Our ability to rely on Section 883 could change in the future. Provisions of the Internal Revenue Code, including Section 883, are subject to legislative change at any time. Moreover, changes could occur in the future with respect to the identity, residence or holdings of our direct or indirect shareholders, trading volume or trading frequency of our shares, or relevant foreign tax laws of Liberia or Malta such that they no longer qualify as equivalent exemption jurisdictions, that could affect our eligibility for the Section 883 exemption. Accordingly, there can be no assurance that we will continue to be exempt from United States income tax on United States source shipping income in the future. If we were not entitled to the benefit of Section 883, we and our subsidiaries would be subject to United States taxation on a portion of the income derived from or incidental to the international operation of our ships, which would reduce our net income.

Additionally, portions of our business are operated by companies that are within tonnage tax regimes of the U.K. and Malta. Further, some of the operations of these companies are conducted in jurisdictions where we rely on tax

Table of Contents

treaties to provide exemption from taxation. To the extent the tonnage tax laws of these countries change or we do not continue to meet the applicable qualification requirements or if tax treaties are changed or revoked, we may be required to pay higher income tax in these jurisdictions, adversely impacting our results of operations.

As budgetary constraints continue to adversely impact the jurisdictions in which we operate, increases in income tax regulations or tax reform affecting our operations may be imposed.

We are not a United States corporation and our shareholders may be subject to the uncertainties of a foreign legal system in protecting their interests.

Our corporate affairs are governed by our Articles of Incorporation and By-Laws and by the Business Corporation Act of Liberia. The provisions of the Business Corporation Act of Liberia resemble provisions of the corporation laws of a number of states in the United States. However, while most states have a fairly well developed body of case law interpreting their respective corporate statutes, there are very few judicial cases in Liberia interpreting the Business Corporation Act of Liberia. As such, the rights and fiduciary responsibilities of directors under Liberian law are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain United States jurisdictions. For example, the right of shareholders to bring a derivative action in Liberian courts may be more limited than in United States jurisdictions. There may also be practical difficulties for shareholders attempting to bring suit in Liberia and Liberian courts may or may not recognize and enforce foreign judgments. Thus, our public shareholders may have more difficulty in protecting their interests with respect to actions by management, directors or controlling shareholders than would shareholders of a corporation incorporated in a United States jurisdiction.

Litigation, enforcement actions, fines or penalties could adversely impact our financial condition or results of operations and/or damage our reputation.

Our business is subject to various United States and international laws and regulations that could lead to enforcement actions, fines, civil or criminal penalties or the assertion of litigation claims and damages. In addition, improper conduct by our employees, agents or joint venture partners could damage our reputation and/or lead to litigation or legal proceedings that could result in civil or criminal penalties, including substantial monetary fines. In certain circumstances it may not be economical to defend against such matters and/or a legal strategy may not ultimately result in us prevailing in a matter. Such events could lead to an adverse impact on our financial condition or results of operations.

Provisions of our Articles of Incorporation, By-Laws and Liberian law could inhibit others from acquiring us, prevent a change of control, and may prevent efforts by our shareholders to change our management.

Certain provisions of our Articles of Incorporation and By-Laws and Liberian law may inhibit third parties from effectuating a change of control of the Company without Board approval which could result in the entrenchment of current management. These include provisions in our Articles of Incorporation that prevent third parties, other than A. Wilhelmsen AS. and Cruise Associates, from acquiring beneficial ownership of more than 4.9% of our outstanding shares without the consent of our Board of Directors.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Information about our cruise ships, including their size and primary areas of operation, may be found within the Operating Strategies - Fleet upgrade, maintenance and expansion section and the Operations - Cruise Ships and Itineraries section in Item 1. Business. Information regarding our cruise ships under construction, estimated expenditures and financing may be found within the Future Capital Commitments and Funding Needs and Sources sections of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents

Our principal executive office and principal shoreside operations are located at the Port of Miami, Florida where we lease three office buildings totaling approximately 361,800 square feet from Miami-Dade County, Florida, under long-term leases with current terms expiring in 2021. These leases may be extended for an additional ten years under two five year options. We lease one office building in the United Kingdom totaling approximately 24,000 square feet used to conduct our operations in the United Kingdom. We also lease a number of international offices throughout Europe, Asia, Mexico, South America and Australia to administer our brand operations globally.

We lease an office building in Springfield, Oregon totaling approximately 163,000 square feet, which is used as a call center for reservations. In addition, we own one office building totaling approximately 95,000 square feet in Wichita, Kansas, which is used as a call center for reservations and customer service. We lease two buildings in Miramar, Florida totaling approximately 179,000 square feet. One building is used primarily as office space and the other building is used as a call center for reservations. We lease our logistics center in Weston, Florida totaling approximately 267,000 square feet.

We believe that our facilities are adequate for our current needs and that we are capable of obtaining additional facilities as necessary.

We also operate two private destinations which we utilize as a port-of-call on certain of our itineraries: (i) an island we own in the Bahamas which we call CocoCay; and (ii) Labadee, a secluded peninsula we lease on the north coast of Haiti.

Item 3. Legal Proceedings

A class action complaint was filed in June 2011 against Royal Caribbean Cruises Ltd. in the United States District Court for the Southern District of Florida on behalf of a purported class of stateroom attendants employed onboard Royal Caribbean International cruise vessels. The complaint alleged that the stateroom attendants were required to pay other crew members to help with their duties and that certain stateroom attendants were required to work back of house assignments without the ability to earn gratuities, in each case, in violation of the U.S. Seaman's Wage Act. In May 2012, the district court granted our motion to dismiss the complaint on the basis that the applicable collective bargaining agreement requires any such claims to be arbitrated. The United States Court of Appeals, 11th Circuit, affirmed the district court's dismissal and denied the plaintiffs' petition for re-hearing and re-hearing en banc. In October 2014, the United States Supreme Court denied the plaintiffs' request to review the order compelling arbitration. Subsequently, approximately 575 crew members submitted demands for arbitration. The demands make substantially the same allegations as in the federal court complaint and are similarly seeking damages, wage penalties and interest in an indeterminate amount. Unlike the federal court complaint, the demands for arbitration are being brought individually by each of the crew members and not on behalf of a purported class of stateroom attendants. At this time, we are unable to estimate the possible impact of this matter on us. However, we believe the underlying claims made against us are without merit, and we intend to vigorously defend ourselves against them.

We are routinely involved in other claims typical within the cruise vacation industry. The majority of these claims are covered by insurance. We believe the outcome of such claims, net of expected insurance recoveries, will not have a material adverse impact on our financial condition or results of operations and cash flows.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is listed on the New York Stock Exchange ("NYSE") and the Oslo Stock Exchange ("OSE") under the symbol "RCL". The table below sets forth the high and low sales prices of our common stock as reported by the NYSE and the OSE for the two most recent years by quarter:

	NYSE Common Stock		OSE Common Stock ⁽¹⁾	
	High	Low	High	Low
2014				
Fourth Quarter	\$83.90	\$52.32	638.00	347.00
Third Quarter	\$69.31	\$53.66	439.60	332.00
Second Quarter	\$57.38	\$49.65	349.00	300.00
First Quarter	\$54.93	\$45.95	332.60	284.20
2013				
Fourth Quarter	\$47.66	\$35.97	292.60	216.10
Third Quarter	\$40.71	\$33.31	241.80	201.40
Second Quarter	\$38.62	\$31.35	224.90	178.00
First Quarter	\$38.56	\$31.72	213.50	184.10

(1) Denominated in Norwegian kroner, as listed in the price history database available at www.oslobors.no

Holders

As of February 12, 2015 there were 961 record holders of our common stock. Since certain of our shares are held by brokers and other institutions on behalf of shareholders, the foregoing number is not representative of the number of beneficial owners.

Dividends

In 2013, we declared cash dividends on our common stock of \$0.12 per share during the first and second quarters of 2013. We increased the dividend amount to \$0.25 per share for the dividends declared in the third and fourth quarters of 2013 and the first and second quarters of 2014. The dividend amount was increased to \$0.30 per share for the dividends declared in the third and fourth quarters of 2014.

Holders of our common stock have an equal right to share in our profits in the form of dividends when and if declared by our Board of Directors out of funds legally available. Holders of our common stock have no rights to any sinking fund.

There are no exchange control restrictions on remittances of dividends on our common stock since (1) we are and intend to maintain our status as a nonresident Liberian entity under the Liberia Revenue Code of 2000 as Amended and the regulations thereunder, and (2) our ship-owning subsidiaries are not now engaged, and are not in the future expected to engage, in any business in Liberia, including voyages exclusively within the territorial waters of the Republic of Liberia. Under current Liberian law, no Liberian taxes or withholding will be imposed on payments to holders of our securities other than to a holder that is a resident Liberian entity or a resident individual or an individual or entity subject to taxation in Liberia as a result of having a permanent establishment within the meaning of the Liberia Revenue Code of 2000 as Amended in Liberia.

The declaration of dividends shall at all times be subject to the final determination of our Board of Directors that a dividend is prudent at that time in consideration of the needs of the business.

Table of Contents

Stock Repurchases

The following table presents the total number of shares of our common stock that we repurchased during the quarter ended December 31, 2014:

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
November 1, 2014-November 30, 2014 ⁽¹⁾	3,500,000	\$67.45	—	—
Total this quarter	3,500,000	\$67.45	—	—

(1) As previously announced on Form 8-K, in November 2014, we repurchased 3.5 million shares of our common stock directly from our largest shareholder, Awilhelmsen AS, in a private transaction. The closing of the share repurchase was subject to Awilhelmsen AS having completed a sale of an additional 3.5 million shares to a financial institution in a market transaction pursuant to Rule 144 of the Securities Act (the "Secondary Sale"). The price we paid in connection with the share repurchase was equal to the price paid by the financial institution to Awilhelmsen AS in connection with the Secondary Sale.

Performance Graph

The following graph compares the total return, assuming reinvestment of dividends, on an investment in the Company, based on performance of the Company's common stock, with the total return of the Standard & Poor's 500 Composite Stock Index and the Dow Jones United States Travel and Leisure Index for a five year period by measuring the changes in common stock prices from December 31, 2009 to December 31, 2014.

Table of Contents

	12/09	12/10	12/11	12/12	12/13	12/14
Royal Caribbean Cruises Ltd.	100.00	185.92	98.79	137.68	195.65	346.17
S&P 500	100.00	115.06	117.49	136.30	180.44	205.14
Dow Jones US Travel & Leisure	100.00	141.39	150.84	170.95	248.70	289.40

The stock performance graph assumes for comparison that the value of the Company's common stock and of each index was \$100 on December 31, 2009 and that all dividends were reinvested. Past performance is not necessarily an indicator of future results.

Dividends declared per common share	\$1.10	\$0.74	\$0.44	\$0.20	\$—
Balance Sheet Data:					
Total assets	\$20,713,190	\$20,072,947	\$19,827,930	\$19,804,405	\$19,653,829
Total debt, including capital leases	\$8,443,948	\$8,074,804	\$8,489,947	\$8,495,853	\$9,150,116
Common stock	\$2,331	\$2,308	\$2,291	\$2,276	\$2,262
Total shareholders' equity	\$8,284,359	\$8,808,265	\$8,308,749	\$8,407,823	\$7,900,752

Amounts for 2014 include restructuring charges of \$4.3 million. Amounts for 2013 include restructuring charges of \$23.4 million and an impairment charge of \$33.5 million to write down the assets held for sale related to the Pullmantur non-core businesses and certain long-lived assets, consisting of aircraft owned and operated by Pullmantur Air, to their fair value (See Note 16. Restructuring and Related Impairment Charges to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information). Amounts (1) for 2012 include an impairment charge of \$385.4 million to write down Pullmantur's goodwill to its implied fair value and to write down trademarks and trade names and certain long-lived assets, consisting of aircraft owned and operated by Pullmantur Air, to their fair value. (See Valuation of Goodwill, Indefinite-Lived Intangible Assets and Long-Lived Assets under Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for more information regarding the impairment of these assets).

Amounts for 2014 include a \$33.5 million tax benefit related to the reversal of a deferred tax asset valuation allowance due to Spanish tax reform. (See Note 12. Income Taxes to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information). Amounts for 2012 include a \$33.7 million charge to record a 100% valuation allowance related to our deferred tax assets for Pullmantur. In addition, (2) in 2012, we reduced the deferred tax liability related to Pullmantur's trademarks and trade names and recorded a deferred tax benefit of \$5.2 million. These adjustments resulted in a net deferred tax charge of \$28.5 million recorded within Other income (expense). (See Valuation of Goodwill, Indefinite-Lived Intangible Assets and Long-Lived Assets under Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for more information regarding these transactions).

Amounts for 2014 include an aggregate increase to operating income and net income of \$53.2 million due to the (3) change in our voyage proration methodology (See Note 2. Summary of Significant Accounting Policies to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information).

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Note Concerning Forward-Looking Statements

The discussion under this caption "Management's Discussion and Analysis of Financial Condition and Results of Operations" and elsewhere in this document, including, for example, under the "Risk Factors" and "Business" captions, includes "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical fact, including statements regarding guidance (including our expectations for the first quarter and full year of 2015, our earnings and yield estimates for 2015 set forth under the heading "Outlook" below and expectations regarding the timing and results of our Double-Double Program), business and industry prospects or future results of operations or financial position, made in this Annual Report on Form 10-K are forward-looking. Words such as "anticipate," "believe," "could," "estimate," "expect," "goal," "intend," "may," "plan," "project," "seek," "should," "will," and similar expressions are intended to further identify any of these forward-looking statements. Forward-looking statements reflect management's current expectations but they are based on judgments and are inherently uncertain. Furthermore, they are subject to risks, uncertainties and other factors, that could cause our actual results, performance or achievements to differ materially from the future results, performance or achievements expressed or implied in those forward-looking statements. Examples of these risks, uncertainties and other factors include, but are not limited to, those discussed in this Annual Report on Form 10-K and, in particular, the risks discussed under the caption "Risk Factors" in Part I, Item 1A of this report.

All forward-looking statements made in this Annual Report on Form 10-K speak only as of the date of this document. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

The discussion and analysis of our financial condition and results of operations have been organized to present the following:

- a review of our critical accounting policies and of our financial presentation, including discussion of certain operational and financial metrics we utilize to assist us in managing our business;
- a discussion of our results of operations for the year ended December 31, 2014 compared to the same period in 2013 and the year ended December 31, 2013 compared to the same period in 2012;
- a discussion of our business outlook, including our expectations for selected financial items for the first quarter and full year of 2015; and
- a discussion of our liquidity and capital resources, including our future capital and contractual commitments and potential funding sources.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). (See Note 1. General and Note 2. Summary of Significant Accounting Policies to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data). Certain of our accounting policies are deemed "critical," as they require management's highest degree of judgment, estimates and assumptions. We have discussed these accounting policies and estimates with the audit committee of our board of directors. We believe our most critical accounting policies are as follows:

Ship Accounting

Our ships represent our most significant assets and are stated at cost less accumulated depreciation and amortization. Depreciation of ships is generally computed net of a 15% projected residual value using the straight-line method over the estimated useful life of the asset, which is generally 30 years. The 30-year useful life of our newly constructed ships and 15% associated residual value are both based on the weighted-average of all major components

Table of Contents

of a ship. Our useful life and residual value estimates take into consideration the impact of anticipated technological changes, long-term cruise and vacation market conditions and historical useful lives of similarly-built ships. In addition, we take into consideration our estimates of the weighted-average useful lives of the ships' major component systems, such as hull, superstructure, main electric, engines and cabins. Given the very large and complex nature of our ships, our accounting estimates related to ships and determinations of ship improvement costs to be capitalized require considerable judgment and are inherently uncertain. We do not have cost segregation studies performed to specifically componentize our ship systems. Therefore, we estimate the costs of component systems based principally on general and technical information known about major ship component systems and their lives and our knowledge of the cruise vacation industry. We do not identify and track depreciation by ship component systems, but instead utilize these estimates to determine the net cost basis of assets replaced or refurbished. Improvement costs that we believe add value to our ships are capitalized as additions to the ship and depreciated over the shorter of the improvements' estimated useful lives or that of the associated ship. The estimated cost and accumulated depreciation of replaced or refurbished ship components are written off and any resulting losses are recognized in cruise operating expenses.

We use the deferral method to account for drydocking costs. Under the deferral method, drydocking costs incurred are deferred and charged to expense on a straight-line basis over the period to the next scheduled drydock, which we estimate to be a period of thirty to sixty months based on the vessel's age as required by Class. Deferred drydock costs consist of the costs to drydock the vessel and other costs incurred in connection with the drydock which are necessary to maintain the vessel's Class certification. Class certification is necessary in order for our cruise ships to be flagged in a specific country, obtain liability insurance and legally operate as passenger cruise ships. The activities associated with those drydocking costs cannot be performed while the vessel is in service and, as such, are done during a drydock as a planned major maintenance activity. The significant deferred drydock costs consist of hauling and wharfage services provided by the drydock facility, hull inspection and related activities (e.g., scraping, pressure cleaning, bottom painting), maintenance to steering propulsion, thruster equipment and ballast tanks, port services such as tugs, pilotage and line handling, and freight associated with these items. We perform a detailed analysis of the various activities performed for each drydock and only defer those costs that are directly related to planned major maintenance activities necessary to maintain Class. The costs deferred are related to activities not otherwise routinely periodically performed to maintain a vessel's designed and intended operating capability. Repairs and maintenance activities are charged to expense as incurred.

We use judgment when estimating the period between drydocks, which can result in adjustments to the estimated amortization of drydock costs. If the vessel is disposed of before the next drydock, the remaining balance in deferred drydock is written-off to the gain or loss upon disposal of vessel in the period in which the sale takes place. We also use judgment when identifying costs incurred during a drydock which are necessary to maintain the vessel's Class certification as compared to those costs attributable to repairs and maintenance which are expensed as incurred. We believe we have made reasonable estimates for ship accounting purposes. However, should certain factors or circumstances cause us to revise our estimates of ship useful lives or projected residual values, depreciation expense could be materially higher or lower. If circumstances cause us to change our assumptions in making determinations as to whether ship improvements should be capitalized, the amounts we expense each year as repairs and maintenance costs could increase, partially offset by a decrease in depreciation expense. If we had reduced our estimated average 30-year ship useful life by one year, depreciation expense for 2014 would have increased by approximately \$24.3 million. If our ships were estimated to have no residual value, depreciation expense for 2014 would have increased by approximately \$159.1 million.

Valuation of Goodwill, Indefinite-Lived Intangible Assets and Long-Lived Assets

We review goodwill, trademarks and trade names, which are our most significant indefinite-lived intangible assets, for impairment at the reporting unit level annually or, when events or circumstances dictate, more frequently. The impairment review for goodwill consists of a qualitative assessment of whether it is more-likely-than-not that a reporting unit's fair value is less than its carrying amount, and if necessary, a two-step goodwill impairment test. Factors to consider when performing the qualitative assessment include general economic conditions, limitations on accessing capital, changes in forecasted operating results, changes in fuel prices and fluctuations in foreign exchange

rates. If the qualitative assessment demonstrates that it is more-likely-than-not that the estimated fair value of the reporting unit exceeds its carrying value, it is not necessary to perform the two-step goodwill impairment test. We may elect to

38

Table of Contents

bypass the qualitative assessment and proceed directly to step one, for any reporting unit, in any period. We can resume the qualitative assessment for any reporting unit in any subsequent period.

When performing the two-step goodwill impairment test, the fair value of the reporting unit is determined and compared to the carrying value of the net assets allocated to the reporting unit. We estimate the fair value of our reporting units using a probability-weighted discounted cash flow model. The estimation of fair value utilizing discounted expected future cash flows includes numerous uncertainties which require our significant judgment when making assumptions of expected revenues, operating costs, marketing, selling and administrative expenses, interest rates, ship additions and retirements as well as assumptions regarding the cruise vacation industry's competitive environment and general economic and business conditions, among other factors. The principal assumptions used in the discounted cash flow model are projected operating results, weighted-average cost of capital, and terminal value. The discounted cash flow model uses our 2015 projected operating results as a base. To that base, we add future years' cash flows assuming multiple revenue and expense scenarios that reflect the impact of different global economic environments beyond 2015 on the reporting unit. We discount the projected cash flows using rates specific to the reporting unit based on its weighted-average cost of capital. If the fair value of the reporting unit exceeds its carrying value, no further analysis or write-down of goodwill is required. If the fair value of the reporting unit is less than the carrying value of its net assets, the implied fair value of the reporting unit is allocated to all its underlying assets and liabilities, including both recognized and unrecognized tangible and intangible assets, based on their fair value. If necessary, goodwill is then written down to its implied fair value.

The impairment review for indefinite-life intangible assets consists of a comparison of the fair value of the asset with its carrying amount. We estimate the fair value of our indefinite-life intangible assets, which consist of trademarks and trade names related to Pullmantur, using a discounted cash flow model and the relief-from-royalty method. The royalty rate used is based on comparable royalty agreements in the tourism and hospitality industry. The discount rate used is comparable to the rate used in valuing the Pullmantur reporting unit in our goodwill impairment test. If the carrying amount exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. If the fair value exceeds its carrying amount, the indefinite-life intangible asset is not considered impaired. Other intangible assets assigned finite useful lives are amortized on a straight-line basis over their estimated useful lives.

We review our ships, aircraft and other long-lived assets for impairment whenever events or changes in circumstances indicate, based on estimated undiscounted future cash flows, that the carrying amount of these assets may not be fully recoverable. We evaluate asset impairment at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. The lowest level for which we maintain identifiable cash flows that are independent of the cash flows of other assets and liabilities is at the ship level for our ships and at the aggregated asset group level for our aircraft. If estimated future cash flows are less than the carrying value of an asset, an impairment charge is recognized to the extent its carrying value exceeds fair value.

We estimate fair value based on quoted market prices in active markets, if available. If active markets are not available we base fair value on independent appraisals, sales price negotiations and projected future cash flows discounted at a rate estimated by management to be commensurate with the business risk. Quoted market prices are often not available for individual reporting units and for indefinite-life intangible assets. Accordingly, we estimate the fair value of a reporting unit and an indefinite-life intangible asset using an expected present value technique.

Pullmantur

During the fourth quarter of 2014, we performed our annual impairment review of goodwill for Pullmantur's reporting unit. We did not perform a qualitative assessment but instead proceeded directly to the two-step goodwill impairment test. As a result of the test, we determined the fair value of the Pullmantur reporting unit exceeded its carrying value by approximately 52% resulting in no impairment to Pullmantur's goodwill. We also performed the annual impairment review of Pullmantur's trademarks and trade names using a discounted cash flow model and the relief-from-royalty method to compare the fair value of these indefinite-lived intangible assets to its carrying value. The results of our testing indicated that the fair value of the trademarks and trade names exceeded its carrying value by approximately 4%, resulting in no impairment to Pullmantur's trademarks and tradenames for the year ended December 31, 2014.

Table of Contents

In connection with the December 2013 agreement to sell a majority stake in Pullmantur's non-core businesses, we agreed to retain certain long-lived assets, consisting of the aircraft owned and operated by Pullmantur Air. Due to the anticipated change in the nature of the cash flows to be generated by the Pullmantur aircraft, during the fourth quarter of 2013, we reviewed the aircraft for impairment. We identified that the undiscounted future cash flows of the aircraft were less than their carrying value and recorded an impairment charge of \$48.9 million during the fourth quarter of 2013, which is reported in Restructuring and related impairment charges in our consolidated statements of comprehensive income (loss).

During the fourth quarter of 2012, we performed the annual impairment evaluation of our goodwill and trademarks and trade names and we recognized total impairment related charges of \$413.9 million associated with our Pullmantur brand. Included in this amount was a 100% valuation allowance of our deferred tax assets which resulted in a deferred income tax expense of \$33.7 million recorded during the fourth quarter of 2012. In addition, Pullmantur has a deferred tax liability that was recorded at the time of acquisition. This liability represents the tax effect of the basis difference between the tax and book values of the trademarks and trade names that were acquired at the time of the acquisition. Due to the 2012 impairment charge related to these intangible assets, we reduced the deferred tax liability and recorded a deferred tax benefit of \$5.2 million during the fourth quarter of 2012. The net \$28.5 million impact of these adjustments was recognized in earnings during the fourth quarter of 2012 and was reported within Other income (expense) in our statements of comprehensive income (loss).

Pullmantur is a brand targeted primarily at the Spanish, Portuguese and Latin American markets, with an increasing focus on Latin America. The persistent economic instability in these markets has created significant uncertainties in forecasting operating results and future cash flows used in our impairment analyses. We continue to monitor economic events in these markets for their potential impact on Pullmantur's business and valuation. Further, the estimation of fair value utilizing discounted expected future cash flows includes numerous uncertainties which require our significant judgment when making assumptions of expected revenues, operating costs, marketing, selling and administrative expenses, interest rates, ship additions and retirements as well as assumptions regarding the cruise vacation industry's competitive environment and general economic and business conditions, among other factors.

If there are changes to the projected future cash flows used in the impairment analyses, especially in Net Yields, or if anticipated transfers of vessels from our other cruise brands to the Pullmantur fleet do not take place, it is possible that an impairment charge of Pullmantur's reporting unit's goodwill and trademarks and trade names may be required. Of these factors, the planned transfers of vessels to the Pullmantur fleet is most significant to the projected future cash flows. If the transfers do not occur, we will likely fail step one of the goodwill impairment test and record an impairment loss related to our trademarks and tradenames. As of December 31, 2014, the carrying amounts of our goodwill and trademarks and trade names attributable to our Pullmantur reporting unit was \$133.6 million and \$188.0 million, respectively.

Royal Caribbean International

During the fourth quarter of 2014, we performed a qualitative assessment of the Royal Caribbean International reporting unit. Based on our qualitative assessment, we concluded that it was more-likely-than-not that the estimated fair value of the Royal Caribbean International reporting unit exceeded its carrying value and thus, we did not proceed to the two-step goodwill impairment test. No indicators of impairment exist primarily because the reporting unit's fair value has consistently exceeded its carrying value by a significant margin, its financial performance has been solid in the face of mixed economic environments and forecasts of operating results generated by the reporting unit appear sufficient to support its carrying value. As of December 31, 2014, the carrying amount of goodwill attributable to our Royal Caribbean International reporting unit was \$287.0 million.

Derivative Instruments

We enter into various forward, swap and option contracts to manage our interest rate exposure and to limit our exposure to fluctuations in foreign currency exchange rates and fuel prices. These instruments are recorded on the balance sheet at their fair value and the vast majority are designated as hedges. We also have non-derivative financial instruments designated as hedges of our net investment in our foreign operations and investments. The fuel options we entered into represent economic hedges which were not designated as hedging instruments for accounting purposes and thus, changes in their fair value were immediately recognized in earnings. Although certain of our derivative

Table of Contents

financial instruments do not qualify or are not accounted for under hedge accounting, we do not hold or issue derivative financial instruments for trading or other speculative purposes. We account for derivative financial instruments in accordance with authoritative guidance. Refer to Note 2. Summary of Significant Accounting Policies and Note 14. Fair Value Measurements and Derivative Instruments to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for more information on related authoritative guidance, the Company's hedging programs and derivative financial instruments.

We enter into foreign currency forward contracts and collars, interest rate, cross-currency and fuel swaps and options with third-party institutions in over-the-counter markets. We estimate the fair value of our foreign currency forward contracts and interest rate and cross-currency swaps using expected future cash flows based on the instruments' contract terms and published forward prices for foreign currency exchange and interest rates. We apply present value techniques and LIBOR-based discount rates to convert the expected future cash flows to the current fair value of the instruments.

We estimate the fair value of our foreign currency collars using standard option pricing models with inputs based on the options' contract terms, such as exercise price and maturity, and readily available public market data, such as foreign exchange prices, foreign exchange volatility levels and discount rates.

We estimate the fair value of our fuel swaps using expected future cash flows based on the swaps' contract terms and forward prices. We derive forward prices from forward fuel curves based on pricing inputs provided by third-party institutions that transact in the fuel indices we hedge. We validate these pricing inputs against actual market transactions and published price quotes for similar assets. We apply present value techniques and LIBOR-based discount rates to convert the expected future cash flows to the current fair value of the instruments. We also corroborate our fair value estimates using valuations provided by our counterparties.

We estimate the fair value for our fuel call options based on the prevailing market price for the instruments consisting of published price quotes for similar assets based on recent transactions in an active market.

We adjust the valuation of our derivative financial instruments to incorporate credit risk.

We believe it is unlikely that materially different estimates for the fair value of our foreign currency forward contracts and interest rate, cross-currency and fuel swaps and options would be derived from other appropriate valuation models using similar assumptions, inputs or conditions suggested by actual historical experience.

Contingencies—Litigation

On an ongoing basis, we assess the potential liabilities related to any lawsuits or claims brought against us. While it is typically very difficult to determine the timing and ultimate outcome of such actions, we use our best judgment to determine if it is probable that we will incur an expense related to the settlement or final adjudication of such matters and whether a reasonable estimation of such probable loss, if any, can be made. In assessing probable losses, we take into consideration estimates of the amount of insurance recoveries, if any, which are recorded as assets when recoverability is probable. We accrue a liability when we believe a loss is probable and the amount of loss can be reasonably estimated. Due to the inherent uncertainties related to the eventual outcome of litigation and potential insurance recoveries, it is possible that certain matters may be resolved for amounts materially different from any provisions or disclosures that we have previously made.

Seasonality

Our revenues are seasonal based on demand for cruises. Demand is strongest for cruises during the Northern Hemisphere's summer months and holidays. In order to mitigate the impact of the winter weather in the Northern Hemisphere and to capitalize on the summer season in the Southern Hemisphere, our brands have focused on deployment to Australia and Latin America during that period.

Table of Contents

Financial Presentation

Description of Certain Line Items

Revenues

Our revenues are comprised of the following:

• Passenger ticket revenues, which consist of revenue recognized from the sale of passenger tickets and the sale of air transportation to and from our ships; and

• Onboard and other revenues, which consist primarily of revenues from the sale of goods and/or services onboard our ships not included in passenger ticket prices, cancellation fees, sales of vacation protection insurance and pre- and post-cruise tours. Additionally, revenue related to Pullmantur's travel agency network, land-based tours and air charter business to third parties are included in onboard and other revenues through the date of the sale of Pullmantur's non-core businesses further discussed below. Onboard and other revenues include revenues we receive from independent third-party concessionaires that pay us a percentage of their revenues in exchange for the right to provide selected goods and/or services onboard our ships.

Cruise Operating Expenses

Our cruise operating expenses are comprised of the following:

• Commissions, transportation and other expenses, which consist of those costs directly associated with passenger ticket revenues, including travel agent commissions, air and other transportation expenses, port costs that vary with passenger head counts and related credit card fees;

• Onboard and other expenses, which consist of the direct costs associated with onboard and other revenues, including the costs of products sold onboard our ships, vacation protection insurance premiums, costs associated with pre- and post-cruise tours and related credit card fees as well as the minimal costs associated with concession revenues, as the costs are mostly incurred by third-party concessionaires;

• Payroll and related expenses, which consist of costs for shipboard personnel (costs associated with our shoreside personnel are included in marketing, selling and administrative expenses);

• Food expenses, which include food costs for both guests and crew;

• Fuel expenses, which include fuel and related delivery and storage costs, including the financial impact of fuel swap agreements; and

• Other operating expenses, which consist primarily of operating costs such as repairs and maintenance, port costs that do not vary with passenger head counts, vessel related insurance and entertainment. Additionally, costs associated with Pullmantur's travel agency network, land-based tours and air charter business to third parties are included in other operating expenses through the date of the sale of Pullmantur's non-core businesses further discussed below.

We do not allocate payroll and related expenses, food expenses, fuel expenses or other operating expenses to the expense categories attributable to passenger ticket revenues or onboard and other revenues since they are incurred to provide the total cruise vacation experience.

Table of Contents

Selected Operational and Financial Metrics

We utilize a variety of operational and financial metrics which are defined below to evaluate our performance and financial condition. As discussed in more detail herein, certain of these metrics are non-GAAP financial measures, which we believe provide useful information to investors as a supplement to our consolidated financial statements, which are prepared and presented in accordance with GAAP. The presentation of non-GAAP financial information is not intended to be considered in isolation or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP.

Adjusted Earnings per Share represents Adjusted Net Income divided by weighted average shares outstanding or by diluted weighted average shares outstanding, as applicable. We believe that this non-GAAP measure is meaningful when assessing our performance on a comparative basis.

Adjusted Net Income represents net income excluding certain items that we believe adjusting for is meaningful when assessing our performance on a comparative basis. For the periods presented, these items included restructuring and related impairment charges, other costs related to our profitability initiatives, the estimated impact of the divested Pullmantur non-core businesses, impairment of Pullmantur related assets, the loss recognized on the sale of Celebrity Century, the impact of the change in our voyage proration methodology and the reversal of a deferred tax asset valuation allowance due to Spanish tax reform. The estimated impact of the divested Pullmantur non-core businesses was arrived at by adjusting the net income (loss) of these businesses for the ownership percentage we retained as well as for intercompany transactions that are no longer eliminated in our consolidated statements of comprehensive income (loss) subsequent to the sales transaction. For the full year 2014, the impact of the voyage proration change represents net income that would have been recognized in 2013 had we recognized revenues and cruise operating expenses on a pro-rata basis for all voyages.

Available Passenger Cruise Days ("APCD") is our measurement of capacity and represents double occupancy per cabin multiplied by the number of cruise days for the period. We use this measure to perform capacity and rate analysis to identify our main non-capacity drivers that cause our cruise revenue and expenses to vary.

Gross Cruise Costs represent the sum of total cruise operating expenses plus marketing, selling and administrative expenses.

Gross Yields represent total revenues per APCD.

Net Cruise Costs and Net Cruise Costs Excluding Fuel represent Gross Cruise Costs excluding commissions, transportation and other expenses and onboard and other expenses and, in the case of Net Cruise Costs Excluding Fuel, fuel expenses (each of which is described above under the Description of Certain Line Items heading). In measuring our ability to control costs in a manner that positively impacts net income, we believe changes in Net Cruise Costs and Net Cruise Costs Excluding Fuel to be the most relevant indicators of our performance. A reconciliation of historical Gross Cruise Costs to Net Cruise Costs and Net Cruise Costs Excluding Fuel is provided below under Results of Operations. We have not provided a quantitative reconciliation of projected Gross Cruise Costs to projected Net Cruise Costs and projected Net Cruise Costs Excluding Fuel due to the significant uncertainty in projecting the costs deducted to arrive at these measures. Accordingly, we do not believe that reconciling information for such projected figures would be meaningful. For the periods prior to the sale of the Pullmantur non-core businesses, Net Cruise Costs excludes the estimated impact of these divested businesses. Net Cruise Costs also excludes initiative costs reported within Marketing, selling and administrative expenses, as well as the loss recognized on the sale of Celebrity Century included within Other operating expenses.

Net Debt-to-Capital is a ratio which represents total long-term debt, including the current portion of long-term debt, less cash and cash equivalents ("Net Debt") divided by the sum of Net Debt and total shareholders' equity. We believe Net Debt and Net Debt-to-Capital, along with total long-term debt and shareholders' equity are useful measures of our capital structure. A reconciliation of historical Debt-to-Capital to Net Debt-to-Capital is provided below under Results of Operations.

Net Revenues represent total revenues less commissions, transportation and other expenses and onboard and other expenses (each of which is described above under the Description of Certain Line Items heading). For the periods prior

Table of Contents

to the sale of the Pullmantur non-core businesses, we have presented Net Revenues excluding the estimated impact of these divested businesses in the financial tables under Results of Operations.

Net Yields represent Net Revenues per APCD. We utilize Net Revenues and Net Yields to manage our business on a day-to-day basis as we believe that it is the most relevant measure of our pricing performance because it reflects the cruise revenues earned by us net of our most significant variable costs, which are commissions, transportation and other expenses and onboard and other expenses. A reconciliation of historical Gross Yields to Net Yields is provided below under Results of Operations. We have not provided a quantitative reconciliation of projected Gross Yields to projected Net Yields due to the significant uncertainty in projecting the costs deducted to arrive at this measure. Accordingly, we do not believe that reconciling information for such projected figures would be meaningful. For the periods prior to the sale of the Pullmantur non-core businesses, Net Yields excludes the estimated impact of these divested businesses.

Occupancy, in accordance with cruise vacation industry practice, is calculated by dividing Passenger Cruise Days by APCD. A percentage in excess of 100% indicates that three or more passengers occupied some cabins.

Passenger Cruise Days represent the number of passengers carried for the period multiplied by the number of days of their respective cruises.

We believe Net Yields, Net Cruise Costs and Net Cruise Costs Excluding Fuel are our most relevant non-GAAP financial measures. However, a significant portion of our revenue and expenses are denominated in currencies other than the United States dollar. Because our reporting currency is the United States dollar, the value of these revenues and expenses can be affected by changes in currency exchange rates. Although such changes in local currency prices is just one of many elements impacting our revenues and expenses, it can be an important element. For this reason, we also monitor Net Yields, Net Cruise Costs and Net Cruise Costs Excluding Fuel as if the current periods' currency exchange rates had remained constant with the comparable prior periods' rates, or on a "Constant Currency" basis. It should be emphasized that Constant Currency is primarily used for comparing short-term changes and/or projections. Over the longer term, changes in guest sourcing and shifting the amount of purchases between currencies can significantly change the impact of the purely currency-based fluctuations.

The use of certain significant non-GAAP measures, such as Net Yields, Net Cruise Costs and Net Cruise Costs Excluding Fuel, allows us to perform capacity and rate analysis to separate the impact of known capacity changes from other less predictable changes which affect our business. We believe these non-GAAP measures provide expanded insight to measure revenue and cost performance in addition to the standard United States GAAP based financial measures. There are no specific rules or regulations for determining non-GAAP and Constant Currency measures, and as such, there exists the possibility that they may not be comparable to other companies within the industry.

Executive Overview

Midway through 2014, we announced our Double-Double program, which called for increasing the Company's Return on Invested Capital ("ROIC") to double digits and doubling our 2014 Adjusted Earnings per Share, both by 2017. Our aim, through this program, is to provide shareholders with increased visibility into our long-term financial goals by means of a formalized and measured framework. To achieve these goals, we maintain our focus on three key objectives: growing revenue yields, maintaining cost consciousness and pursuing moderate capacity growth. Our 2014 results were in line with our Double-Double program. Based on our results, we remain confident that we are on the right path for realizing these objectives. We finished 2014 with net income of \$764.1 million, or \$3.43 per diluted share, compared to \$473.7 million, or \$2.14 per diluted share, in 2013. Adjusted Net Income was \$755.7 million, or \$3.39 per share, compared to \$539.2 million, or \$2.44 per share, in 2013. Adjusted Earnings per Share of \$3.39 per share represented approximately a 40% increase in year-over-year EPS growth and established a new record for our Company.

Caribbean capacity for the industry grew by 13% in 2014 and comprised 49% of our total capacity. This considerable growth led to increased levels of promotional activity throughout the industry and depressed our pricing power. Helping offset the Caribbean was the double-digit yield improvement in Europe and China. The European season was the strongest we have seen in several years and China's ability to absorb our capacity growth while driving higher yields continues to impress.

Despite the difficulties in the Caribbean, the Company grew 2014 Net Yields by 2.4% on a Constant Currency basis. Net ticket revenue yield improved 1.4% while onboard revenue yield increased by 3.8% on a Constant Currency basis. Onboard revenue continues to be a bright spot with beverage packages, specialty restaurants and internet packages driving strong growth in the Caribbean and Europe, while gaming and retail are fueling our growth in Asia. This, coupled with our investments in ship revitalizations and technology, has helped continue onboard's strong growth trajectory.

Net cruise costs excluding fuel decreased by 0.6% on a Constant Currency basis. The continued commitment to our profitability improvement plan allowed us to invest strategically in core markets, our product, marketing and technology, while maintaining a lean cost structure.

We continue to see a nice boost in earnings from our equity investments, most notably TUI. As this brand continues to grow through new ship deliveries, we anticipate their contribution to earnings will grow proportionally.

Looking ahead at 2015, we see the challenges in the Caribbean continuing through the first quarter of 2015 but then improving significantly through the summer and beyond as industry capacity declines. The U.S. consumer, bolstered by the stronger dollar and improving economy, appears to be making a comeback while European consumer spending seems to be more restrained.

Quantum of the Seas' arrival in China is approaching, and we feel encouraged by the advance demand that the ship has generated in the market. Our capacity in Asia continues to surge with 53% growth in 2015 on top of 22% growth in 2014. Investments in the region will continue to expand in order to ensure we maintain our position in the market.

In the fourth quarter of 2014, we saw a rapid decline in fuel prices that was coupled with a strengthening in the U.S. dollar. This produced some volatility in our earnings and this trend is persisting in the first quarter of 2015 as fuel prices continue to fluctuate considerably while the U.S. dollar continues to appreciate. Our fuel hedging program and some natural currency offsets within our results of operations will help mitigate the volatility but will not eliminate it completely.

Our commitment to moderate capacity growth continues and our anticipated growth through 2017 remains unchanged since the announcement of our Double-Double program. In 2015, we will take delivery of Quantum of the Seas' sister ship, Anthem of the Seas, followed by Ovation of the Seas and the third Oasis-class vessel in 2016. These ships are materially more energy efficient than our fleet average, and we expect them to generate strong consumer

Table of Contents

demand and propel our earnings growth. In 2014, we announced an order for a new generation of vessels for the Celebrity Cruises brand and have ordered two ships with the first one being delivered in 2018. While we continue to grow our fleet through newbuilds, we also consider opportunities to divest of older tonnage as evidenced with our sale of Celebrity Century to a subsidiary of Skysea Holding in 2014.

Our 2015 will be an important step towards our Double-Double goals. We expect to deliver step-change earnings growth by leveraging our innovative hardware, strong brands, global footprint and exceptional employees.

Table of Contents

Results of Operations

In addition to the items discussed above under "Executive Overview," significant items for 2014 include:

Total revenues increased 1.4% to \$8.1 billion from \$8.0 billion in 2013 primarily due to an increase in overall capacity and ticket prices.

Cruise operating expenses of \$5.3 billion for 2014 remained consistent with 2013.

Interest expense, net of interest capitalized of \$258.3 million decreased 22.3%, or \$74.1 million, for the year ended December 31, 2014 as compared to December 31, 2013. The decrease was primarily due to lower interest rates and, to a lesser extent, a lower average debt level. See Note 7. Long-Term Debt to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information.

During 2014, we took delivery of Quantum of the Seas. To finance the purchase, we borrowed \$791.1 million under a previously committed 12-year unsecured term loan which is 95% guaranteed by Hermes. Refer to Note 7. Long-Term Debt to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information.

In September 2014, we sold Celebrity Century to a subsidiary of Skysea Holding for \$220.0 million in cash. The sale resulted in a loss of \$17.4 million that was recognized within Other operating expenses in our consolidated statements of comprehensive income (loss) for the year ended December 31, 2014. Subsequently, we acquired a 35% equity stake in Skysea Holding in November 2014 to operate a new cruise brand known as SkySea Cruises. Refer to Note 5. Property and Equipment and Note 6. Other Assets to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information.

As of September 30, 2014, we changed our voyage proration methodology and recognized passenger ticket revenues, revenues from onboard and other goods and services and all associated cruise operating costs for all of our uncompleted voyages, including voyages of ten days or less, on a pro-rata basis. The effect of this change was an increase to net income of \$53.2 million for the year ended December 31, 2014. Refer to Note 2. Summary of Significant Accounting Policies to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information.

During the fourth quarter of 2014, Spain adopted tax reform legislation that, among other things, amended the net operating loss carryforward rules. As a result, we reversed a portion of the deferred tax asset valuation allowance recorded in 2012 which resulted in a deferred tax benefit of \$33.5 million. Refer to Note 12. Income Taxes to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further discussion on the transaction.

Other Items

On March 31, 2014, Pullmantur sold the majority of its interest in its non-core businesses. Refer to Note 16.

Restructuring and Related Charges to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further discussion on the sales transaction.

In December 2014, we terminated the leasing of Brilliance of the Seas under the 25-year operating lease originally entered into in July 2002, denominated in British pound sterling. As part of the agreement, we purchased the Brilliance of the Seas for a net settlement purchase price of approximately £175.4 million or \$275.4 million. Refer to Note 5. Property and Equipment to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further discussion on the transaction.

During 2014, we entered into an agreement with STX France S.A. to build the fourth Oasis-class ship for Royal Caribbean International. Refer to Note 15. Commitments and Contingencies to our consolidated financial statements for further information.

Table of Contents

During the fourth quarter of 2014, we repurchased from A. Wilhelmsen AS, our largest shareholder, 3.5 million shares of our common stock. Refer to Note 8. Shareholders' Equity to our consolidated financial statements for further information.

We reported total revenues, operating income, net income, Adjusted Net Income, earnings per share and Adjusted Earnings per Share as shown in the following table (in thousands, except per share data):

	Year Ended December 31,		
	2014	2013	2012
Adjusted Net Income	\$755,729	\$539,224	\$442,873
Net income	764,146	473,692	18,287
Net Adjustments to Net Income (Decrease) Increase	\$(8,417)	\$65,532	\$424,586
Adjustments to Net Income:			
Pullmantur impairment related charges ⁽¹⁾	\$—	\$—	\$413,932
Restructuring and related impairment charges	4,318	56,946	—
Other initiative costs	21,211	—	—
Estimated impact of divested businesses prior to sales transaction	11,013	8,586	10,654
Loss on sale of ship included within other operating expenses	17,401	—	—
Impact of voyage proration change ⁽²⁾	(28,877)	—	—
Reversal of a deferred tax valuation allowance	(33,483)		
Net Adjustments to Net Income (Decrease) Increase	\$(8,417)	\$65,532	\$424,586
Basic:			
Adjusted Earnings per Share	\$3.41	\$2.46	\$2.03
Earnings per Share	\$3.45	\$2.16	\$0.08
Diluted:			
Adjusted Earnings per Share	\$3.39	\$2.44	\$2.02
Earnings per Share	\$3.43	\$2.14	\$0.08
Weighted-Average Shares Outstanding:			
Basic	221,658	219,638	217,930
Diluted	223,044	220,941	219,457

⁽¹⁾ Includes \$28.5 million in net deferred tax expense related to the Pullmantur impairment.

⁽²⁾ Represents the net income amount that would have been recognized in 2013 had we recognized revenues and cruise operating expenses on a pro-rata basis for all voyages.

Table of Contents

The following table presents operating results as a percentage of total revenues for the last three years:

	Year Ended December 31,			
	2014	2013	2012	
Passenger ticket revenues	73.0	% 71.9	% 72.8	%
Onboard and other revenues	27.0	28.1	27.2	
Total revenues	100.0	100.0	100.0	
Cruise operating expenses:				
Commissions, transportation and other	17.0	16.5	16.8	
Onboard and other	7.2	7.1	6.9	
Payroll and related	10.5	10.6	10.8	
Food	5.9	5.9	5.8

Outlook

On January 29, 2015, we announced the following initial first quarter and full year 2015 guidance:

Full Year 2015

	As Reported	Constant Currency
Net Yields	(0.5%) to 1.5%	2.5% to 4.5%
Net Cruise Costs per APCD	(4.5%) to (5.5%)	(3.0%) to (4.0%)
Net Cruise Costs per APCD, excluding Fuel	(1.5%) to (0.5%)	1% or better
Capacity Increase	5.5%	
Depreciation and Amortization	\$840 to \$850 million	
Interest Expense, net	\$260 to \$270 million	
Fuel Consumption (metric tons)	1,400,000	
Fuel Expenses	\$806 million	
Percent Hedged (fwd consumption)	52%	
Impact of 10% change in fuel prices	\$25 million	
Adjusted Earnings per Share — Diluted	\$4.65 to \$4.85	

First quarter 2015

	As Reported	Constant Currency
Net Yields	Approx. (5.0%)	(1.5%) to (2.0%)
Net Cruise Costs per APCD	(3.5%) to (4.0%)	Approx. (2.0%)
Net Cruise Costs per APCD, excluding Fuel	Flat to up 1%	2.0% to 3.0%
Capacity Increase	3.8%	
Depreciation and Amortization	\$195 to \$205 million	
Interest Expense, net	\$60 to \$70 million	
Fuel Consumption (metric tons)	353,000	
Fuel Expenses	\$207 million	
Percent Hedged (fwd consumption)	54%	
Impact of 10% change in fuel prices	\$7 million	
Adjusted Earnings per Share — Diluted	\$0.10 to \$0.15	

Since our earnings release on January 29, 2015, bookings have remained encouraging and consistent with our previous expectations. Accordingly, our forecast has remained essentially unchanged.

Year Ended December 31, 2014 Compared to Year Ended December 31, 2013

In this section, references to 2014 refer to the year ended December 31, 2014 and references to 2013 refer to the year ended December 31, 2013.

Revenues

Total revenues for 2014 increased \$114.0 million, or 1.4%, to \$8.1 billion from \$8.0 billion in 2013.

Table of Contents

Passenger ticket revenues comprised 73.0% of our 2014 total revenues. Passenger ticket revenues increased by \$171.1 million, or 3.0%, to \$5.9 billion in 2014 from \$5.7 billion in 2013. The increase was primarily due to:

a 2.4% increase in capacity, which increased Passenger ticket revenues by \$134.6 million. The increase in capacity was primarily due to the addition of Quantum of the Seas which entered service in October 2014 and the transfer of Monarch of the Seas to Pullmantur in April 2013 reducing capacity in 2013 due to the two-month lag further discussed in Note 1. General to our consolidated financial statements. Passenger ticket revenues also includes the impact of the change in our voyage proration methodology; and

an increase in ticket prices driven by greater demand for close-in European and Asian sailings, which was partially offset by a decrease in ticket prices for Caribbean sailings, all of which contributed to a \$99.1 million increase in Passenger ticket revenues.

The increase in passenger ticket revenues was partially offset by the unfavorable effect of changes in foreign currency exchange rates related to our revenue transactions denominated in currencies other than the United States dollar of approximately \$62.5 million.

The remaining 27.0% of 2014 total revenues was comprised of onboard and other revenues, which decreased \$57.2 million, or 2.6%. The decrease in onboard and other revenues was primarily due to a \$177.2 million decrease in revenues related to Pullmantur's non-core businesses that were sold in 2014 as noted above. The decrease was partially offset by:

a \$45.5 million increase in onboard revenue attributable to higher spending on a per passenger basis primarily due to our ship upgrade programs and other revenue enhancing initiatives, including various beverage initiatives, the addition and promotion of specialty restaurants, the increased revenue associated with internet and other telecommunication services and other onboard activities;

a \$46.0 million increase attributable to the 2.4% increase in capacity noted above, which includes the impact of the change in our voyage proration; and

a \$28.7 million increase in other revenue of which the largest driver is attributable to an out-of-period adjustment of approximately \$13.9 million that was recorded in 2013 to correct the calculation of our liability for our credit card rewards program.

Onboard and other revenues included concession revenues of \$324.3 million in 2014 and \$316.3 million in 2013.

Cruise Operating Expenses

Total cruise operating expenses for 2014 increased \$1.0 million. The increase was primarily due to:

a \$119.4 million increase attributable to the 2.4% increase in capacity noted above, which includes the impact of the change in our voyage proration methodology;

a \$37.8 million increase in head taxes mainly attributable to itinerary changes;

the loss recognized on the sale of Celebrity Century of \$17.4 million; and

a \$12.5 million increase primarily attributable to vessel maintenance due to the timing of scheduled drydocks.

The increase was offset by:

a \$138.0 million decrease in expenses related to Pullmantur's non-core businesses that were sold in 2014 as noted above;

53

Table of Contents

- \$16.3 million decrease in commissions expense attributable to shifts in our distribution channels; and
- \$15.0 million decrease in shore excursion expense attributable to itinerary changes and lower costs incurred.

Marketing, Selling and Administrative Expenses

Marketing, selling and administrative expenses for 2014 increased \$4.1 million, or 0.4%. The increase was primarily due to an increase in other costs associated with our restructuring activities. Refer to Note 16. Restructuring and Related Impairment Charges to our consolidated financial statements for further information on our restructuring activities.

Depreciation and Amortization Expenses

Depreciation and amortization expenses for 2014 increased \$17.7 million or 2.3% to \$772.4 million from \$754.7 million in 2013. The increase was primarily driven by new shipboard additions associated with our ship upgrade programs, the addition of our new reservations pricing engine in December of 2013 and the addition of Quantum of the Seas which entered service in October 2014.

Restructuring and related impairment charges

We incurred restructuring and related impairment charges of approximately \$4.3 million in 2014 compared to \$56.9 million in 2013. In 2013, we recognized an impairment charge of \$33.5 million to write down the assets held for sale related to the Pullmantur businesses and to write down certain long-lived assets, consisting of three aircraft owned and operated by Pullmantur Air, to their fair value which did not recur in 2014. Refer to Note 16. Restructuring and Related Impairment Charges to our consolidated financial statements for further information on our restructuring activities.

Other Income (Expense)

Interest expense, net of interest capitalized, decreased \$74.1 million, or 22.3%, to \$258.3 million in 2014 from \$332.4 million in 2013. The decrease was due to lower interest rates and, to a lesser extent, a lower average debt level.

Other income in 2014 was \$70.2 million compared to Other expense of \$1.7 million in 2013. The increase in income of \$72.0 million was primarily due to a \$33.5 million tax benefit related to the reversal of a deferred tax asset valuation allowance resulting from Spanish tax reform, ineffectiveness gains of \$11.5 million from our interest rate swap agreements compared to ineffectiveness losses of \$7.3 million in 2013 and to income of \$51.6 million from our equity method investments in 2014 compared to income of \$32.0 million in 2013.

Extinguishment of unsecured senior notes decreased \$4.2 million in 2014 compared to the same period in 2013 as we did not repurchase any unsecured notes in 2014.

Net Yields

Net Yields increased 1.4% in 2014 compared to 2013 primarily due to the increase in passenger ticket revenues noted above. Net Yields increased 2.4% in 2014 compared to 2013 on a Constant Currency basis.

Net Cruise Costs

Net Cruise Costs increased 1.7% in 2014 compared to 2013 primarily due to the increase in capacity noted above. Net Cruise Costs per APCD and Net Cruise Costs per APCD on a Constant Currency basis remained consistent compared to 2013.

Net Cruise Costs Excluding Fuel

Net Cruise Costs Excluding Fuel per APCD decreased 0.8% in 2014 compared to 2013. Net Cruise Costs Excluding Fuel per APCD on a Constant Currency basis for 2014 remained consistent compared to 2013.

Table of Contents

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012

In this section, references to 2013 refer to the year ended December 31, 2013 and references to 2012 refer to the year ended December 31, 2012.

Revenues

Total revenues for 2013 increased \$271.9 million, or 3.5%, to \$8.0 billion from \$7.7 billion in 2012.

Passenger ticket revenues comprised 71.9% of our 2013 total revenues. Passenger ticket revenues increased by \$128.1 million, or 2.3%, to \$5.7 billion in 2013 from \$5.6 billion in 2012. The increase was primarily due to:

an increase in ticket prices for European sailings and certain deployment initiatives, including but not limited to increased deployment in Australia and Asia, all of which contributed to a \$117.6 million increase in Passenger ticket revenues; and

a 0.8% increase in capacity, which increased Passenger ticket revenues by \$44.6 million. The increase in capacity was primarily due to the addition of Celebrity Reflection which entered service in October 2012. This increase was partially offset by the transfer of Ocean Dream to an unrelated third-party in April 2012 as part of a six year bareboat charter agreement and the transfer of Monarch of the Seas to Pullmantur in April 2013 reducing capacity due to the two-month lag further discussed in Note 1. General.

The increase in passenger ticket revenues was partially offset by the unfavorable effect of changes in foreign currency exchange rates related to our revenue transactions denominated in currencies other than the United States dollar of approximately \$34.1 million.

The remaining 28.1% of 2013 total revenues was comprised of Onboard and other revenues, which increased \$143.7 million, or 6.9%, to \$2.2 billion in 2013 from \$2.1 billion in 2012.

The increase was primarily due to:

a \$101.7 million increase in onboard revenue primarily due to higher spending on a per passenger basis due to revenue enhancing initiatives as a result of our ship upgrade programs and an increase in shore excursion revenues attributable to certain deployment initiatives particularly in Australia. Onboard and other revenues included concession revenues of \$316.3 million in 2013 and \$288.6 million in 2012;

a \$28.3 million increase in revenues related to Pullmantur's travel agency network and air charter business due to the addition of new tour packages; and

a \$14.8 million increase attributable to the 0.8% increase in capacity noted above.

Cruise Operating Expenses

Total cruise operating expenses increased \$147.8 million, or 2.9%, to \$5.3 billion from \$5.2 billion in 2012. The increase was primarily due to:

a \$39.6 million increase attributable to the 0.8% increase in capacity noted above;

a \$22.6 million increase in crew expenses related to higher medical expenses and, to a lesser extent, an increase in crew movement related to deployment changes;

a \$21.1 million increase in expenses related to Pullmantur's travel agency network and air charter business noted above;

Table of Contents

a \$16.4 million increase in food expenses due to higher costs on a per passenger basis related to our new culinary initiatives and itinerary changes;

a \$12.1 million increase in expenses attributable to the impact of the unscheduled drydocks for Celebrity Millennium and Grandeur of the Seas and the 2012 gain from the sale of Oceanic which did not recur in 2013; and

an \$8.6 million increase in shore excursion expenses attributable to itinerary changes noted above.

Marketing, Selling and Administrative Expenses

Marketing, selling and administrative expenses of \$1.0 billion for 2013 remained consistent with 2012.

Depreciation and Amortization Expenses

Depreciation and amortization expenses for 2013 increased \$24.2 million or 3.4% to \$754.7 million from \$730.5 million in 2012. The increase was primarily due to the addition of Celebrity Reflection which entered service in October 2012. The increase was partially offset by the favorable effect of changes made in the first quarter of 2013 to the estimated useful lives and associated residual values for five ships of approximately \$11.0 million.

Restructuring and related impairment charges

During 2013, we incurred restructuring charges of approximately \$23.4 million as a result of global restructuring actions and the pending sale of Pullmantur's non-core businesses. In addition, we recognized an impairment charge of \$33.5 million to write down the assets held for sale related to the businesses to be sold and to write down certain long-lived assets, consisting of three aircraft owned and operated by Pullmantur Air, to their fair value. These impairment charges were due to the Pullmantur restructuring initiative. (See Valuation of Goodwill, Indefinite-Lived Intangible Assets and Long-Lived Assets above for more information regarding the impairment of these assets).

Other Income (Expense)

Interest expense, net of interest capitalized, decreased \$23.4 million, or 6.6%, to \$332.4 million in 2013 from \$355.8 million in 2012. The decrease was due to lower interest rates and a lower average debt level.

Extinguishment of unsecured senior notes, decreased \$3.3 million, or 44.0%, to \$4.2 million in 2013 compared to \$7.5 million in 2012. The decrease is due to a lower amount of notes repurchased during 2013 partially offset by a higher premium paid in connection with the 2013 repurchases.

Other expense decreased \$41.1 million, or 96.0%, to \$1.7 million in 2013 compared to \$42.9 million for the same period in 2012. This change was primarily due to:

a \$29.8 decrease in deferred income tax expense as a result of a 100% valuation allowance recorded in connection with Pullmantur's deferred tax assets in 2012 partially offset by a reduction in Pullmantur's deferred tax liability and resulting tax benefit related to a 2013 impairment of Pullmantur's long-lived assets and a 2012 impairment charge of Pullmantur's trademarks and trade names; and

income of \$32.0 million from our equity method investments in 2013 as compared to income of \$23.8 million in 2012.

Net Yields

Net Yields increased 2.7% in 2013 compared to 2012 primarily due to an increase in ticket prices, onboard revenue and Pullmantur's travel agency network and air charter business noted above. Net Yields increased 3.2% in 2013 compared to 2012 on a Constant Currency basis.

Table of Contents

Net Cruise Costs

Net Cruise Costs increased 2.7% in 2013 compared to 2012 primarily due to the increase in crew expenses, food expenses, indirect operating expenses and expenses related to Pullmantur's travel agency network and air charter business, noted above. Net Cruise Costs per APCD increased 1.9% in 2013 compared to 2012. Net Cruise Costs per APCD on a Constant Currency basis increased 1.7% in 2013 compared to 2012.

Net Cruise Costs Excluding Fuel

Net Cruise Costs Excluding Fuel per APCD increased 2.1% in 2013 compared to 2012. Net Cruise Costs Excluding Fuel per APCD on a Constant Currency basis increased 1.8% in 2013 compared to 2012.

Future Application of Accounting Standards

Refer to Note 2. Summary of Significant Accounting Policies to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information on Recent Accounting Pronouncements.

Liquidity and Capital Resources

Sources and Uses of Cash

Cash flow generated from operations provides us with a significant source of liquidity. Net cash provided by operating activities increased \$331.7 million to \$1.7 billion for 2014 compared to \$1.4 billion for 2013. The increase was primarily due to a decrease in interest paid in 2014 compared to 2013 and the timing of proceeds from accounts receivable and payments to vendors in 2014. Net cash provided by operating activities in 2013 remained consistent compared to 2012.

Net cash used in investing activities was \$1.8 billion for 2014 compared to \$824.5 million for 2013. The increase was primarily attributable to an increase in capital expenditures of \$1.0 billion in 2014 compared to 2013 primarily due to the delivery of Quantum of the Seas and the purchase of Brilliance of the Seas in 2014. Additionally, there was an increase in investments in and loans to unconsolidated affiliates of \$118.0 million and an increase in cash paid on the settlement of derivative financial instruments of \$50.8 million. These cash outlays were partially offset by cash received of \$220.0 million in 2014 for the sale of Celebrity Century which did not occur in 2013 and a \$52.8 million increase in cash received from repayments of a loan to an unconsolidated affiliate in 2014 compared to 2013.

Net cash used in investing activities was \$824.5 million for 2013 compared to \$1.3 billion for 2012. The decrease in 2013 compared to 2012 is primarily due to a decrease in capital expenditures of \$527.7 million attributable to the delivery of a ship, Celebrity Reflection, in 2012 which did not recur in 2013, partially offset by a higher level of ships under construction in 2013 compared to 2012. The decrease in capital expenditures was partially offset by investments of \$70.6 million to our unconsolidated affiliates during 2013.

Net cash provided by financing activities was \$17.5 million for 2014 compared to net cash used in financing activities of \$576.6 million for 2013. This change was primarily due to a \$1.7 billion increase in debt proceeds and a \$40.8 million increase in the proceeds from the exercise of common stock options, partially offset by the repurchase of treasury stock of \$236.1 million, an increase of \$867.7 million in repayments of debt and an increase of dividends paid of \$55.3 million. The increase in repayments of debt and proceeds from issuance of debt was primarily due to proceeds received from an unsecured term loan of \$791.1 million due to the delivery of Quantum of the Seas in 2014, a higher level of bond maturities and higher drawings and repayments on our revolving credit facilities.

Net cash used in financing activities was \$576.6 million for 2013 compared to \$179.6 million for 2012. This change was primarily due to an increase of \$295.2 million in repayments of debt and an increase of \$25.9 million paid in dividends, partially offset by a decrease of \$109.0 million in debt proceeds.

Future Capital Commitments

Table of Contents

Our future capital commitments consist primarily of new ship orders. As of December 31, 2014, we had two Quantum-class ships and two Oasis-class ships on order for our Royal Caribbean International brand with an aggregate capacity of approximately 19,200 berths. Additionally, we have two "Project Edge" ships on order for our Celebrity Cruises brand with an aggregate capacity of approximately 5,800 berths, which are expected to become effective in the second quarter of 2015.

As of December 31, 2014, the aggregate cost of our ships on order, not including the "Project Edge" ships, was approximately \$5.0 billion, of which we had deposited \$394.4 million as of such date. Approximately 28.8% of the aggregate cost was exposed to fluctuations in the Euro exchange rate at December 31, 2014. (See Note 14. Fair Value Measurements and Derivative Instruments and Note 15. Commitments and Contingencies to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data).

As of December 31, 2014, anticipated overall capital expenditures, based on our existing ships on order, are approximately \$1.6 billion for 2015, \$2.3 billion for 2016, \$0.4 billion for 2017 and \$2.2 billion for 2018.

Contractual Obligations

As of December 31, 2014, our contractual obligations were as follows (in thousands):

	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating Activities:					
Operating lease obligations ⁽¹⁾	\$ 189,519	\$ 18,154	\$ 28,750	\$ 17,618	\$ 124,997
Interest on long-term debt ⁽²⁾	1,150,946	245,162	344,430	214,598	346,756
Other ⁽³⁾	843,262	214,817	303,590	197,012	127,843
Investing Activities:					
Ship purchase obligations ⁽⁴⁾	3,673,286	946,752	1,770,213	956,321	—
Other ⁽⁵⁾	58,811	58,811	—	—	—
Financing Activities:					
Long-term debt obligations ⁽⁶⁾	8,391,302	790,920	2,765,464	2,307,677	2,527,241
Capital lease obligations ⁽⁷⁾	52,646	8,710	11,525	6,603	25,808
Other ⁽⁸⁾	88,610	25,652	37,375	19,099	6,484
Total	\$ 14,448,382	\$ 2,308,978	\$ 5,261,347	\$ 3,718,928	\$ 3,159,129

(1) We are obligated under noncancelable operating leases primarily for offices, warehouses and motor vehicles. Amounts represent contractual obligations with initial terms in excess of one year.

(2) Long-term debt obligations mature at various dates through fiscal year 2027 and bear interest at fixed and variable rates. Interest on variable-rate debt is calculated based on forecasted debt balances, including interest swapped using the applicable rate at December 31, 2014. Debt denominated in other currencies is calculated based on the applicable exchange rate at December 31, 2014.

(3) Amounts primarily represent future commitments with remaining terms in excess of one year to pay for our usage of certain port facilities, marine consumables, services and maintenance contracts.

(4) Amounts do not include potential obligations which remain subject to cancellation at our sole discretion.

(5) Amount represents unused commitment on loan to unconsolidated affiliate.

(6) Amounts represent debt obligations with initial terms in excess of one year.

(7) Amounts represent capital lease obligations with initial terms in excess of one year.

(8) Amounts represent fees payable to sovereign guarantors in connection with certain of our export credit debt facilities and facility fees on our revolving credit facilities.

Please refer to Funding Needs and Sources for discussion on the planned funding of the above contractual obligations.

Table of Contents

As a normal part of our business, depending on market conditions, pricing and our overall growth strategy, we continuously consider opportunities to enter into contracts for the building of additional ships. We may also consider the sale of ships or the purchase of existing ships. We continuously consider potential acquisitions and strategic alliances. If any of these were to occur, they would be financed through the incurrence of additional indebtedness, the issuance of additional shares of equity securities or through cash flows from operations.

Off-Balance Sheet Arrangements

In connection with the sale of Celebrity Mercury in February 2011, we and TUI AG each guaranteed repayment of 50% of a €180.0 million amortizing bank loan provided to TUI Cruises which is due 2016. As of December 31, 2014, €117.0 million, or approximately \$141.6 million based on the exchange rate at December 31, 2014, remains outstanding. Based on current facts and circumstances, we do not believe potential obligations under this guarantee are probable.

TUI Cruises has entered into construction agreements with Meyer Turku shipyard that includes certain restrictions on each of our and TUI AG's ability to reduce our current ownership interest in TUI Cruises below 37.5% through 2019. Some of the contracts that we enter into include indemnification provisions that obligate us to make payments to the counterparty if certain events occur. These contingencies generally relate to changes in taxes, increased lender capital costs and other similar costs. The indemnification clauses are often standard contractual terms and are entered into in the normal course of business. There are no stated or notional amounts included in the indemnification clauses and we are not able to estimate the maximum potential amount of future payments, if any, under these indemnification clauses. We have not been required to make any payments under such indemnification clauses in the past and, under current circumstances, we do not believe an indemnification obligation is probable.

Other than the items described above, we are not party to any other off-balance sheet arrangements, including guarantee contracts, retained or contingent interest, certain derivative instruments and variable interest entities, that either have, or are reasonably likely to have, a current or future material effect on our financial position.

Funding Needs and Sources

We have significant contractual obligations of which our debt service obligations and the capital expenditures associated with our ship purchases represent our largest funding needs. As of December 31, 2014, we have approximately \$2.3 billion in contractual obligations due through December 31, 2015 of which approximately \$790.9 million relates to debt maturities, \$946.8 million relates to the acquisition of Anthem of the Seas along with progress payments on our other ship purchases and \$245.2 million relates to interest on long-term debt. We have historically relied on a combination of cash flows provided by operations, drawdowns under our available credit facilities, the incurrence of additional debt and/or the refinancing of our existing debt and the issuance of additional shares of equity securities to fund these obligations.

We had a working capital deficit of \$3.0 billion as of December 31, 2014 as compared to a working capital deficit of \$3.3 billion as of December 31, 2013. Included within our working capital deficit is \$799.6 million and \$1.6 billion of current portion of long-term debt, including capital leases, as of December 31, 2014 and December 31, 2013, respectively. The decrease in working capital deficit was primarily due to the decrease in current maturities of long-term debt. Similar to others in our industry, we operate with a substantial working capital deficit. This deficit is mainly attributable to the fact that, under our business model, a vast majority of our passenger ticket receipts are collected in advance of the applicable sailing date. These advance passenger receipts remain a current liability until the sailing date. The cash generated from these advance receipts is used interchangeably with cash on hand from other sources, such as our revolving credit facilities and other cash from operations. The cash received as advanced receipts can be used to fund operating expenses for the applicable future sailing or otherwise, pay down our revolving credit facilities, invest in long term investments or any other use of cash. In addition, we have a relatively low-level of accounts receivable and rapid turnover results in a limited investment in inventories. We generate substantial cash flows from operations and our business model, along with our unsecured revolving credit facilities, has historically allowed us to

Table of Contents

maintain this working capital deficit and still meet our operating, investing and financing needs. We expect that we will continue to have working capital deficits in the future.

As of December 31, 2014, we have on order two Quantum-class ships and two Oasis-class ships each of which has committed unsecured bank financing arrangements which include sovereign financing guarantees. Refer to Note 15. Commitments and Contingencies to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information.

During 2014, we repaid our €745.0 million 5.625% unsecured senior notes with proceeds from our \$380.0 million unsecured term loan facility and our revolving credit facilities and we amended and restated our €365.0 million unsecured term loan due July 2017 primarily to reduce the margin on the facility. Additionally, in March 2014, we amended our unsecured term loans for Oasis of the Seas and Allure of the Seas primarily to reduce the margins on those facilities and eliminate the lenders' option to exit those facilities in 2015 and 2017, respectively.

During 2014, we increased the capacity of our unsecured revolving credit facility due August 2018 by \$300 million by utilizing the accordion feature, bringing our total capacity under this facility to \$1.2 billion as of December 31, 2014. We purchased the Brilliance of the Seas for a net settlement purchase price of approximately £175.4 million or \$275.4 million using proceeds from this facility. Refer to Note 7. Long-Term Debt to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further information.

As of December 31, 2014, we had liquidity of \$1.0 billion, consisting of approximately \$189.2 million in cash and cash equivalents and \$800.9 million available under our unsecured credit facilities. We anticipate that our cash flows from operations and our current financing arrangements, as described above, will be adequate to meet our capital expenditures and debt repayments over the next twelve-month period.

We implemented a broad profitability improvement program with initiatives aimed at improving our returns on invested capital. One of those initiatives, commenced in the third quarter of 2013, relates to realizing economies of scale and improving service delivery to our travel partners and guests by restructuring and consolidating our global sales, marketing and general and administrative structure. A second initiative, commenced in the fourth quarter of 2013, relates to Pullmantur's focus on its cruise business and expansion in Latin America. During 2014, we incurred approximately \$30 million in cash outlays to implement these initiatives and we do not expect any further cash outlays to be significant.

We also continue to implement a number of initiatives to reduce energy consumption and, by extension, fuel costs. These include the design of more fuel efficient ships and the implementation of other hardware and energy efficiencies.

If (i) any person other than A. Wilhelmsen AS. and Cruise Associates and their respective affiliates (the "Applicable Group") acquires ownership of more than 33% of our common stock and the Applicable Group owns less of our common stock than such person, or (ii) subject to certain exceptions, during any 24-month period, a majority of the Board is no longer comprised of individuals who were members of the Board on the first day of such period, we may be obligated to prepay indebtedness outstanding under the majority of our credit facilities, which we may be unable to replace on similar terms. Certain of our outstanding debt securities also contain change of control provisions that would be triggered by the acquisition of greater than 50% of our common stock by a person other than a member of the Applicable Group coupled with a ratings downgrade. If this were to occur, it would have an adverse impact on our liquidity and operations.

Debt Covenants

Certain of our financing agreements contain financial covenants that require us, among other things, to maintain minimum net worth of at least \$6.2 billion, a fixed charge coverage ratio of at least 1.25x and limit our net debt-to-capital ratio to no more than 62.5%. The fixed charge coverage ratio is calculated by dividing net cash from operations for the past four quarters by the sum of dividend payments plus scheduled principal debt payments in

excess of any new financings for the past four quarters. Our minimum net worth and maximum net debt-to-capital calculations

60

Table of Contents

exclude the impact of Accumulated other comprehensive (loss) income on Total shareholders' equity. We are well in excess of all financial covenant requirements as of December 31, 2014. The specific covenants and related definitions can be found in the applicable debt agreements, the majority of which have been previously filed with the Securities and Exchange Commission.

Dividends

In December 2014, we declared a cash dividend on our common stock of \$0.30 per share which was paid in the first quarter of 2015. We declared a cash dividend on our common stock of \$0.30 per share during the third quarter of 2014 which was paid in the fourth quarter of 2014. During the first and second quarters of 2014, we declared and paid a cash dividend on our common stock of \$0.25 per share. During the first quarter of 2014, we also paid a cash dividend on our common stock of \$0.25 per share which was declared during the fourth quarter of 2013.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk
Financial Instruments and Other

General

We are exposed to market risk attributable to changes in interest rates, foreign currency exchange rates and fuel prices. We manage these risks through a combination of our normal operating and financing activities and through the use of derivative financial instruments pursuant to our hedging practices and policies. The financial impact of these hedging instruments is primarily offset by corresponding changes in the underlying exposures being hedged. We achieve this by closely matching the amount, term and conditions of the derivative instrument with the underlying risk being hedged. Although certain of our derivative financial instruments do not qualify or are not accounted for under hedge accounting, we do not hold or issue derivative financial instruments for trading or other speculative purposes. We monitor our derivative positions using techniques including market valuations and sensitivity analyses. (See Note 14. Fair Value Measurements and Derivative Instruments to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data.)

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates to our long-term debt obligations including future interest payments. At December 31, 2014, approximately 28.5% of our long-term debt was effectively fixed as compared to 34.6% as of December 31, 2013. We use interest rate swap agreements to modify our exposure to interest rate movements and to manage our interest expense.

Market risk associated with our long-term fixed-rate debt is the potential increase in fair value resulting from a decrease in interest rates. We use interest rate swap agreements that effectively convert a portion of our fixed-rate debt to a floating-rate basis to manage this risk. At December 31, 2014 and December 31, 2013, we maintained interest rate swap agreements on the \$420.0 million fixed-rate portion of our Oasis of the Seas unsecured amortizing term loan and on the \$650.0 million unsecured senior notes due 2022. The interest rate swap agreements on Oasis of the Seas debt effectively changed the interest rate on the balance of the unsecured term loan, which was \$245.0 million as of December 31, 2014, from a fixed rate of 5.41% to a LIBOR-based floating rate equal to LIBOR plus 3.87%, currently approximately 4.20%. The interest rate swap agreements on the \$650.0 million unsecured senior notes effectively changed the interest rate of the unsecured senior notes from a fixed rate of 5.25% to a LIBOR-based floating rate equal to LIBOR plus 3.63%, currently approximately 3.86%. These interest rate swap agreements are accounted for as fair value hedges.

The estimated fair value of our long-term fixed-rate debt at December 31, 2014 was \$2.1 billion, using quoted market prices, where available, or using the present value of expected future cash flows which incorporates risk profile. The fair value of our fixed to floating interest rate swap agreements was estimated to be a liability of \$22.3 million as of December 31, 2014, based on the present value of expected future cash flows. A hypothetical one percentage point decrease in interest rates at December 31, 2014 would increase the fair value of our hedged and unhedged long-term fixed-rate debt by approximately \$96.4 million and would increase the fair value of our fixed to floating interest rate swap agreements by \$55.5 million.

Market risk associated with our long-term floating-rate debt is the potential increase in interest expense from an increase in interest rates. We use interest rate swap agreements that effectively convert a portion of our floating-rate debt to a fixed-rate basis to manage this risk. A hypothetical one percentage point increase in interest rates would increase our forecasted 2015 interest expense by approximately \$48.4 million, assuming no change in foreign currency exchange rates.

At December 31, 2014 and December 31, 2013, we maintained forward-starting interest rate swap agreements that hedge the anticipated unsecured amortizing term loan that will finance our purchase of Anthem of the Seas. Forward-starting interest rate swaps hedging the Anthem of the Seas loan will effectively convert the interest rate for \$725.0 million of the anticipated loan balance from LIBOR plus 1.30% to a fixed rate of 3.86% (inclusive of margin) beginning

62

Table of Contents

in April 2015. The fair value of our floating to fixed interest rate swap agreements was estimated to be a liability of \$47.5 million as of December 31, 2014 based on the present value of expected future cash flows. These interest rate swap agreements are accounted for as cash flow hedges.

In addition, at December 31, 2014 and December 31, 2013, we maintained interest rate swap agreements on our Celebrity Reflection term loan. Our interest rate swap agreements effectively converted the interest rate on a portion of the Celebrity Reflection unsecured amortizing term loan balance of approximately \$545.4 million from LIBOR plus 0.40% to a fixed rate (including applicable margin) of 2.85% through the term of the loan. Furthermore, at December 31, 2014, we maintained interest rate swap agreements on our Quantum of the Seas term loan. Our interest rate swap agreements effectively converted the interest rate on a portion of the Quantum of the Seas unsecured amortizing term loan balance of approximately \$735.0 million from LIBOR plus 1.30% to a fixed rate of 3.74% (inclusive of margin) through the term of the loan. These interest rate swap agreements are accounted for as cash flow hedges.

Foreign Currency Exchange Rate Risk

Our primary exposure to foreign currency exchange rate risk relates to our ship construction contracts denominated in Euros, our foreign currency denominated debt and our international business operations. We enter into foreign currency forward contracts, collar options and cross-currency swap agreements to manage portions of the exposure to movements in foreign currency exchange rates.

The estimated fair value, as of December 31, 2014, of our Euro-denominated forward contracts associated with our ship construction contracts was a liability of \$182.2 million, based on the present value of expected future cash flows. As of December 31, 2014, the aggregate cost of our ships on order was approximately \$5.0 billion, of which we had deposited \$394.4 million as of such date. Approximately 28.8% and 36.3% of the aggregate cost of the ships under construction was exposed to fluctuations in the Euro exchange rate at December 31, 2014 and December 31, 2013, respectively. A hypothetical 10% strengthening of the Euro as of December 31, 2014, assuming no changes in comparative interest rates, would result in a \$188.4 million increase in the United States dollar cost of the foreign currency denominated ship construction contracts exposed to fluctuations in the Euro exchange rate. The majority of our foreign currency forward contracts, collar options and cross-currency swap agreements are accounted for as cash flow, fair value or net investment hedges depending on the designation of the related hedge.

During 2012, we entered into foreign currency collar options to hedge a portion of our foreign currency exposure on the construction contract price for Anthem of the Seas. These options mature in April 2015 and their fair value was estimated to be a liability of \$21.9 million at December 31, 2014.

Our international business operations subject us to foreign currency exchange risk. We transact business in many different foreign currencies and maintain investments in foreign operations which may expose us to financial market risk resulting from fluctuations in foreign currency exchange rates. Movements in foreign currency exchange rates may affect the translated value of our earnings and cash flows. We manage most of this exposure on a consolidated basis, which allows us to take advantage of any natural offsets. Therefore, weakness in one particular currency might be offset by strengths in other currencies over time.

We consider our investments in our foreign operations to be denominated in relatively stable currencies and of a long-term nature. We partially mitigate the exposure of our investments in foreign operations by denominating a portion of our debt in our subsidiaries' and investments' functional currencies and designating it as a hedge of these subsidiaries and investments. We designated debt as a hedge of our net investments in Pullmantur and TUI Cruises of approximately €139.4 million and €544.9 million, or approximately \$168.7 million and \$750.8 million, through December 31, 2014 and December 31, 2013, respectively. A hypothetical 10% increase or decrease in the December 31, 2014 Euro exchange rate would increase or decrease the fair value of our assigned debt by \$16.9 million, which would be offset by a corresponding decrease or increase in the United States dollar value of our net

investment. Furthermore, during 2014, we entered into foreign currency forward contracts and designated them as hedges of a portion of our net investments in Pullmantur and TUI Cruises of €415.6 million or approximately \$502.9 million, based on the exchange rate at December 31, 2014. These forward currency contracts mature in April 2016 and their estimated fair value was an asset of \$64.0 million as of December 31, 2014. Accordingly, we have included approximately \$45.0 million and

63

Table of Contents

(\$44.4) million of foreign-currency transaction gains (losses) and of changes in the fair value of derivatives in the foreign currency translation adjustment component of Accumulated other comprehensive (loss) income at December 31, 2014 and December 31, 2013, respectively.

Lastly, on a regular basis, we enter into foreign currency forward contracts and, from time to time, we have utilized cross-currency swap agreements to minimize volatility resulting from the remeasurement of net monetary assets and liabilities denominated in a currency other than our functional currency or the functional currencies of our foreign subsidiaries. During 2014, we maintained an average of approximately \$474.0 million of these foreign currency forward contracts. These instruments are not designated as hedging instruments. In 2014, 2013 and 2012 changes in the fair value of the foreign currency forward contracts were (losses) gains of approximately (\$48.6) million, (\$19.3) million and \$7.7 million, respectively, which offset gains (losses) arising from the remeasurement of monetary assets and liabilities denominated in foreign currencies in those same years of \$49.5 million, \$13.4 million and (\$11.8) million, respectively. These changes were recognized in earnings within Other income (expense) in our consolidated statements of comprehensive income (loss).

Fuel Price Risk

Our exposure to market risk for changes in fuel prices relates primarily to the consumption of fuel on our ships. Fuel cost (net of the financial impact of fuel swap agreements), as a percentage of our total revenues, was approximately 11.7% in 2014, 11.6% in 2013 and 11.8% in 2012. We use fuel swap agreements to mitigate the financial impact of fluctuations in fuel prices.

As of December 31, 2014, we had fuel swap agreements to pay fixed prices for fuel with an aggregate notional amount of approximately \$1.4 billion, maturing through 2018. The fuel swap agreements represented 58% of our projected 2015 fuel requirements, 55% of our projected 2016 fuel requirements, 35% of our projected 2017 fuel requirements and 15% of our projected 2018 fuel requirements. These fuel swap agreements are accounted for as cash flow hedges. The estimated fair value of these contracts at December 31, 2014 was estimated to be a liability of \$497.8 million. We estimate that a hypothetical 10% increase in our weighted-average fuel price from that experienced during the year ended December 31, 2014 would increase our forecasted 2015 fuel cost by approximately \$22.7 million, net of the impact of fuel swap agreements.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chairman and Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures, as such term is defined in Exchange Act Rule 13a-15(e), as of the end of the period covered by this report. Based upon such evaluation, our Chairman and Chief Executive Officer and Chief Financial Officer concluded that those controls and procedures are effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to management, including our Chairman and Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure and are effective to provide reasonable assurance that such information is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our management, with the participation of our Chairman and Chief Executive Officer and our Chief Financial Officer, conducted an evaluation of the effectiveness of our internal control over financial reporting based on the Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission. Based on this evaluation, management concluded that our internal control over financial reporting was effective as of December 31, 2014. The effectiveness of our internal control over financial reporting as of December 31, 2014 has been audited by PricewaterhouseCoopers LLP, the independent registered certified public accounting firm that audited our consolidated financial statements included in this Annual Report on Form 10-K, as stated in its report, which is included herein on page F-2.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Exchange Act Rule 13a-15 during the quarter ended December 31, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls

It should be noted that any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system will be met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there is only reasonable assurance that our controls will succeed in achieving their goals under all potential future conditions.

INDEX TO EXHIBITS

Exhibits 10.17 through 10.38 represent management compensatory plans or arrangements.

Exhibit	Description
3.1	— Restated Articles of Incorporation of the Company, as amended (composite) (incorporated by reference to Exhibit 3.1 to the Company’s Registration Statement on Form S-3, File No. 333-158161, filed with the Securities and Exchange Commission (the “Commission”)) on March 23, 2009.
3.2	— Amended and Restated By-Laws of the Company (incorporated by reference to Exhibit 3.1 to the Company’s Current Report on Form 8-K filed with the Commission on September 11, 2013).
4.1	— Indenture dated as of July 15, 1994 between the Company, as issuer, and The Bank of New York Trust Company, N.A., successor to NationsBank of Georgia, National Association, as Trustee (incorporated by reference to Exhibit 2.4 to the Company’s 1994 Annual Report on Form 20-F, File No. 1-11884).
4.2	— Sixth Supplemental Indenture dated as of October 14, 1997 to Indenture dated as of July 15, 1994 between the Company, as issuer, and The Bank of New York Trust Company, N.A., as Trustee (incorporated by reference to Exhibit 2.11 to the Company’s 1997 Annual Report on Form 20-F, File No. 1-11884).
4.3	— Eighth Supplemental Indenture dated as of March 16, 1998 to Indenture dated as of July 15, 1994 between the Company, as issuer, and The Bank of New York Trust Company, N.A., as Trustee (incorporated by reference to Exhibit 2.13 to the Company’s 1997 Annual Report on Form 20-F, File No. 1-11884).
4.4	— Fifteenth Supplemental Indenture dated as of June 12, 2006 to Indenture dated as of July 15, 1994 between the Company, as issuer, and The Bank of New York Trust Company, N.A., as Trustee (incorporated by reference to Exhibit 4.14 to the Company’s 2006 Annual Report on Form 10-K).
4.5	— Form of Indenture dated as of July 31, 2006 between the Company, as issuer, and The Bank of New York Trust Company, N.A., as Trustee (incorporated by reference to Exhibit 4.1 to the Company’s Registration Statement on Form S-3 (No. 333-136186) filed with the Commission on July 31, 2006).
4.6	— First Supplemental Indenture dated as of July 6, 2009 between the Company, as issuer, and The Bank of New York Mellon Trust Company, N.A. (incorporated by reference to Exhibit 4.1 to the Company’s Current Report on Form 8-K filed with the Commission on July 2, 2009).
4.7	— Second Supplemental Indenture dated as of November 7, 2012 between the Company, as issuer, and The Bank of New York Mellon Trust Company, N.A. (incorporated by reference to Exhibit 4.1 to the Company’s Current Report on Form 8-K filed with the Commission on November 7, 2012).
10.1	— Amended and Restated Registration Rights Agreement dated as of July 30, 1997 among the Company, A. Wilhelmsen AS., Cruise Associates, Monument Capital Corporation, Archinav Holdings, Ltd. and Overseas Cruiseship, Inc. (incorporated by reference to Exhibit 2.20 to the Company’s 1997 Annual Report on Form 20-F, File No. 1-11884).
10.2	— Assignment and Amendment to the US\$875,000,000 Amended and Restated Credit Agreement dated as of July 15, 2011 among the Company, the various financial institutions party thereto and Citibank, N.A., as administrative agent (incorporated by reference to Exhibit 10.1 to the Company’s Current Report on Form 8-K filed on July 19, 2011).

- 10.3 — Assignment and Amendment to the Credit Agreement, dated as of August 23, 2013, among the Company, the various financial institutions as are or shall become parties thereto and Nordea Bank Finland plc, New York Branch, as administrative agent for the lender parties (incorporated by reference to Exhibit 10.1 to the Company's Current Report on Form 8-K filed on August 26, 2013).
- 10.4 — Assignment and Amendment Deed to Hull No. 691 Credit Agreement, dated as of February 17, 2012, among Celebrity Solstice V Inc., the Company and KfW IPEX-BANK GMBH, in its capacity as agent for Hermes, administrative agent and lender (incorporated by reference to Exhibit 10.6 to the Company's 2011 Annual Report on Form 10-K).
- 10.5 — Amendment No. 1 to Amended and Restated Credit Agreement dated March 7, 2014 among the Company, the various financial institutions as are parties to the Credit Agreement and BNP PARIBAS FORTIS S.A./N.V., as administrative agent for the lenders (incorporated by reference to Exhibit 10.1 to the Company's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2014).
- 10.6 — Amendment No. 1 to Amended and Restated Credit Agreement dated March 7, 2014 among the Company, the various financial institutions as are parties to the Credit Agreement and SKANDINAVISKA ENSKILDA BANKEN AB, as administrative agent for the lenders (incorporated by reference to Exhibit 10.2 to the Company's Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2014).

Report of Independent Registered Certified Public Accounting Firm
To the Board of Directors and Shareholders
of Royal Caribbean Cruises Ltd.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of comprehensive income (loss), cash flows and shareholders' equity present fairly, in all material respects, the financial position of Royal Caribbean Cruises Ltd. and its subsidiaries at December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Note 1. General

Description of Business

We are a global cruise company. We own Royal Caribbean International, Celebrity Cruises, Pullmantur, Azamara Club Cruises, CDF Croisières de France and a 50% joint venture interest in TUI Cruises. Together, these six brands operate a combined 43 ships as of December 31, 2014. Our ships operate on a selection of worldwide itineraries that call on approximately 480 destinations on all seven continents.

Basis for Preparation of Consolidated Financial Statements

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). Estimates are required for the preparation of financial statements in accordance with these principles. Actual results could differ from these estimates. See Note 2. Summary of Significant Accounting Policies for a discussion of our significant accounting policies.

All significant intercompany accounts and transactions are eliminated in consolidation. We consolidate entities over which we have control, usually evidenced by a direct ownership interest of greater than 50%, and variable interest entities where we are determined to be the primary beneficiary. See Note 6. Other Assets for further information regarding our variable interest entities. For affiliates we do not control but over which we have significant influence on financial and operating policies, usually evidenced by a direct ownership interest from 20% to 50%, the investment is accounted for using the equity method. We consolidate the operating results of Pullmantur and CDF Croisières de France on a two-month lag to allow for more timely preparation of our consolidated financial statements. On March 31, 2014, Pullmantur sold the majority of its interest in its non-core businesses. These non-core businesses included Pullmantur's land-based tour operations, travel agency and 49% interest in its air business. See Note 16. Restructuring Charges and Related Impairment Charges for further discussion on the Pullmantur sales transaction. No material events or transactions affecting Pullmantur or CDF Croisières de France have occurred during the two-month lag period of November and December 2014 that would require disclosure or adjustment to our consolidated financial statements as of December 31, 2014.

Note 2. Summary of Significant Accounting Policies

Revenues and Expenses

Deposits received on sales of passenger cruises are initially recorded as customer deposit liabilities on our balance sheet. Customer deposits are subsequently recognized as passenger ticket revenues, together with revenues from onboard and other goods and services and all associated cruise operating expenses of a voyage.

Historically, we recognized revenues and cruise operating expenses for our shorter voyages (voyages of ten days or less) upon voyage completion while we recognized revenues and cruise operating expenses for voyages in excess of ten days on a pro-rata basis. We followed this completed voyage recognition approach on our shorter voyages because the difference between prorating revenue from such voyages and recognizing such revenue at the completion of the voyage was immaterial to our consolidated financial statements. As of September 30, 2014, we changed our methodology and recognized passenger ticket revenues, revenues from onboard and other goods and services and all associated cruise operating expenses for all of our uncompleted voyages on a pro-rata basis. We believe that recognizing revenues and cruise operating expenses on a pro-rata basis for all voyages is preferable as revenues and expenses are recorded in the period in which the revenue generating activities are performed.

The effect of this change was an increase to Passenger ticket revenues and Onboard and other revenues, as well as an increase to our Cruise operating expenses. The change was not individually material to our revenues or any of our cruise operating expenses, and resulted in an aggregate increase to operating income and net income of \$53.2 million, or \$0.24 per diluted share, for the year ended December 31, 2014. In addition, the change has not been

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

retrospectively applied to prior periods, as the impact of prorating all voyages was immaterial to the respective periods presented.

Revenues and expenses include port costs that vary with guest head counts. The amounts of such port costs included in Passenger ticket revenues on a gross basis were \$546.6 million, \$494.2 million and \$459.8 million for the years 2014, 2013 and 2012, respectively.

Cash and Cash Equivalents

Cash and cash equivalents include cash and marketable securities with original maturities of less than 90 days.

Inventories

Inventories consist of provisions, supplies and fuel carried at the lower of cost (weighted-average) or market.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization. We capitalize interest as part of the cost of acquiring certain assets. Improvement costs that we believe add value to our ships are capitalized as additions to the ship and depreciated over the shorter of the improvements' estimated useful lives or that of the associated ship. The estimated cost and accumulated depreciation of replaced or refurbished ship components are written off and any resulting losses are recognized in Cruise operating expenses. Liquidated damages received from shipyards as a result of the late delivery of a new ship are recorded as reductions to the cost basis of the ship.

Depreciation of property and equipment is computed using the straight-line method over the estimated useful life of the asset. The useful lives of our ships are generally 30 years, net of a 15% projected residual value. The 30-year useful life of our newly constructed ships and 15% associated residual value are both based on the weighted-average of all major components of a ship. Our useful life and residual value estimates take into consideration the impact of anticipated technological changes, long-term cruise and vacation market conditions and historical useful lives of similarly-built ships. In addition, we take into consideration our estimates of the weighted-average useful lives of the ships' major component systems, such as hull, superstructure, main electric, engines and cabins. Depreciation for assets under capital leases is computed using the shorter of the lease term or related asset life.

Depreciation of property and equipment is computed utilizing the following useful lives:

	Years
Ships	generally 30
Ship improvements	3-20
Buildings and improvements	10-40
Computer hardware and software	3-5
Transportation equipment and other	3-30
Leasehold improvements	Shorter of remaining lease term or useful life 3-30

Effective January 1, 2013, we revised the estimated useful lives of five ships from 30 years with a 15% associated residual value, to 35 years with a 10% associated residual value. The change in the estimated useful lives and associated residual value was accounted for prospectively as a change in accounting estimate. The 35-year useful life with a 10% associated residual value is based on revised estimates of the weighted-average useful life of all major ship components for these ships. The change in estimate is consistent with our recent investments in and future plans to continue to invest in the upgrade of these ships and the use of certain ship components longer than originally estimated. The change allows us to better match depreciation expense with the periods these assets are expected to be in use. For the full year 2013, this change increased operating income and net income by approximately \$11.0 million and increased earnings per share by \$0.05 per share on a basic and diluted basis.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

We review long-lived assets for impairment whenever events or changes in circumstances indicate, based on estimated undiscounted future cash flows, that the carrying amount of these assets may not be fully recoverable. For purposes of recognition and measurement of an impairment loss, long-lived assets are grouped with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. The lowest level for which we maintain identifiable cash flows that are independent of the cash flows of other assets and liabilities is at the ship level for our ships and at the aggregated asset group level for our aircraft. If estimated future cash flows are less than the carrying value of an asset, an impairment charge is recognized to the extent its carrying value exceeds fair value.

We use the deferral method to account for drydocking costs. Under the deferral method, drydocking costs incurred are deferred and charged to expense on a straight-line basis over the period to the next scheduled drydock, which we estimate to be a period of thirty to sixty months based on the vessel's age as required by Class. Deferred drydock costs consist of the costs to drydock the vessel and other costs incurred in connection with the drydock which are necessary to maintain the vessel's Class certification. Class certification is necessary in order for our cruise ships to be flagged in a specific country, obtain liability insurance and legally operate as passenger cruise ships. The activities associated with those drydocking costs cannot be performed while the vessel is in service and, as such, are done during a drydock as a planned major maintenance activity. The significant deferred drydock costs consist of hauling and wharfage services provided by the drydock facility, hull inspection and related activities (e.g., scraping, pressure cleaning, bottom painting), maintenance to steering propulsion, thruster equipment and ballast tanks, port services such as tugs, pilotage and line handling, and freight associated with these items. We perform a detailed analysis of the various activities performed for each drydock and only defer those costs that are directly related to planned major maintenance activities necessary to maintain Class. The costs deferred are not otherwise routinely periodically performed to maintain a vessel's designed and intended operating capability. Repairs and maintenance activities are charged to expense as incurred.

Goodwill

Goodwill represents the excess of cost over the fair value of net tangible and identifiable intangible assets acquired. We review goodwill for impairment at the reporting unit level annually or, when events or circumstances dictate, more frequently. The impairment review for goodwill consists of a qualitative assessment of whether it is more-likely-than-not that a reporting unit's fair value is less than its carrying amount, and if necessary, a two-step goodwill impairment test. Factors to consider when performing the qualitative assessment include general economic conditions, limitations on accessing capital, changes in forecasted operating results, changes in fuel prices and fluctuations in foreign exchange rates. If the qualitative assessment demonstrates that it is more-likely-than-not that the estimated fair value of the reporting unit exceeds its carrying value, it is not necessary to perform the two-step goodwill impairment test. We may elect to bypass the qualitative assessment and proceed directly to step one, for any reporting unit, in any period. We can resume the qualitative assessment for any reporting unit in any subsequent period. When performing the two-step goodwill impairment test, the fair value of the reporting unit is determined and compared to the carrying value of the net assets allocated to the reporting unit. If the fair value of the reporting unit exceeds its carrying value, no further analysis or write-down of goodwill is required. If the fair value of the reporting unit is less than the carrying value of its net assets, the implied fair value of the reporting unit is allocated to all its underlying assets and liabilities, including both recognized and unrecognized tangible and intangible assets, based on their fair value. If necessary, goodwill is then written down to its implied fair value.

Intangible Assets

In connection with our acquisitions, we have acquired certain intangible assets to which value has been assigned based on our estimates. Intangible assets that are deemed to have an indefinite life are not amortized, but are subject to an annual impairment test, or when events or circumstances dictate, more frequently. The indefinite-life intangible asset impairment test consists of a comparison of the fair value of the indefinite-life intangible asset with its carrying amount. If the carrying amount exceeds its fair value, an impairment loss is recognized in an amount equal to that excess. If the fair value exceeds its carrying amount, the indefinite-life intangible asset is not considered impaired.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Other intangible assets assigned finite useful lives are amortized on a straight-line basis over their estimated useful lives.

Contingencies —Litigation

On an ongoing basis, we assess the potential liabilities related to any lawsuits or claims brought against us. While it is typically very difficult to determine the timing and ultimate outcome of such actions, we use our best judgment to determine if it is probable that we will incur an expense related to the settlement or final adjudication of such matters and whether a reasonable estimation of such probable loss, if any, can be made. In assessing probable losses, we take into consideration estimates of the amount of insurance recoveries, if any, which are recorded as assets when recoverability is probable. We accrue a liability when we believe a loss is probable and the amount of loss can be reasonably estimated. Due to the inherent uncertainties related to the eventual outcome of litigation and potential insurance recoveries, it is possible that certain matters may be resolved for amounts materially different from any provisions or disclosures that we have previously made.

Advertising Costs

Advertising costs are expensed as incurred except those costs which result in tangible assets, such as brochures, which are treated as prepaid expenses and charged to expense as consumed. Advertising costs consist of media advertising as well as brochure, production and direct mail costs.

Media advertising was \$205.2 million, \$205.8 million and \$200.9 million, and brochure, production and direct mail costs were \$136.7 million, \$137.1 million and \$130.4 million for the years 2014, 2013 and 2012, respectively.

Derivative Instruments

We enter into various forward, swap and option contracts to manage our interest rate exposure and to limit our exposure to fluctuations in foreign currency exchange rates and fuel prices. These instruments are recorded on the balance sheet at their fair value and the vast majority are designated as hedges. We also have non-derivative financial instruments designated as hedges of our net investment in our foreign operations and investments. Although certain of our derivative financial instruments do not qualify or are not accounted for under hedge accounting, we do not hold or issue derivative financial instruments for trading or other speculative purposes.

At inception of the hedge relationship, a derivative instrument that hedges the exposure to changes in the fair value of a firm commitment or a recognized asset or liability is designated as a fair value hedge. A derivative instrument that hedges a forecasted transaction or the variability of cash flows related to a recognized asset or liability is designated as a cash flow hedge.

Changes in the fair value of derivatives that are designated as fair value hedges are offset against changes in the fair value of the underlying hedged assets, liabilities or firm commitments. Gains and losses on derivatives that are designated as cash flow hedges are recorded as a component of Accumulated other comprehensive (loss) income until the underlying hedged transactions are recognized in earnings. The foreign currency transaction gain or loss of our non-derivative financial instruments designated as hedges of our net investment in foreign operations and investments are recognized as a component of Accumulated other comprehensive (loss) income along with the associated foreign currency translation adjustment of the foreign operation.

On an ongoing basis, we assess whether derivatives used in hedging transactions are "highly effective" in offsetting changes in the fair value or cash flow of hedged items. We use the long-haul method to assess hedge effectiveness using regression analysis for each hedge relationship under our interest rate, foreign currency and fuel hedging programs. We apply the same methodology on a consistent basis for assessing hedge effectiveness to all hedges within each hedging program (i.e., interest rate, foreign currency and fuel). We perform regression analyses over an observation period of up to three years, utilizing market data relevant to the hedge horizon of each hedge relationship. High effectiveness is achieved when a statistically valid relationship reflects a high degree of offset and correlation between the changes in the fair values of the derivative instrument and the hedged item. The determination of ineffectiveness is based on the amount of dollar offset between the change in fair value of the derivative instrument and the change in

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

fair value of the hedged item at the end of the reporting period. If it is determined that a derivative is not highly effective as a hedge or hedge accounting is discontinued, any change in fair value of the derivative since the last date at which it was determined to be effective is recognized in earnings. In addition, the ineffective portion of our highly effective hedges is immediately recognized in earnings and reported in Other income (expense) in our consolidated statements of comprehensive income (loss).

Cash flows from derivative instruments that are designated as fair value or cash flow hedges are classified in the same category as the cash flows from the underlying hedged items. In the event that hedge accounting is discontinued, cash flows subsequent to the date of discontinuance are classified within investing activities. Cash flows from derivative instruments not designated as hedging instruments are classified as investing activities.

We consider the classification of the underlying hedged item's cash flows in determining the classification for the designated derivative instrument's cash flows. We classify derivative instrument cash flows from hedges of benchmark interest rate or hedges of fuel expense as operating activities due to the nature of the hedged item. Likewise, we classify derivative instrument cash flows from hedges of foreign currency risk on our newbuild ship payments as investing activities and derivative instrument cash flows from hedges of foreign currency risk on debt payments as financing activities.

Foreign Currency Translations and Transactions

We translate assets and liabilities of our foreign subsidiaries whose functional currency is the local currency, at exchange rates in effect at the balance sheet date. We translate revenues and expenses at weighted-average exchange rates for the period. Equity is translated at historical rates and the resulting foreign currency translation adjustments are included as a component of Accumulated other comprehensive (loss) income, which is reflected as a separate component of Shareholders' equity. Exchange gains or losses arising from the remeasurement of monetary assets and liabilities denominated in a currency other than the functional currency of the entity involved are immediately included in our earnings, except for certain liabilities that have been designated to act as a hedge of a net investment in a foreign operation or investment. Exchange gains (losses) were \$49.5 million, \$13.4 million and \$(11.8) million for the years 2014, 2013 and 2012, respectively, and were recorded within Other income (expense). The majority of our transactions are settled in United States dollars. Gains or losses resulting from transactions denominated in other currencies are recognized in income at each balance sheet date.

Concentrations of Credit Risk

We monitor our credit risk associated with financial and other institutions with which we conduct significant business and, to minimize these risks, we select counterparties with credit risks acceptable to us and we seek to limit our exposure to an individual counterparty. Credit risk, including but not limited to counterparty nonperformance under derivative instruments, our credit facilities and new ship progress payment guarantees, is not considered significant, as we primarily conduct business with large, well-established financial institutions, insurance companies and export credit agencies many of which we have long-term relationships with and which have credit risks acceptable to us or where the credit risk is spread out among a large number of counterparties. As of December 31, 2014, we did not have any counterparty credit risk exposure under our derivative instruments. As of December 31, 2013, we had counterparty credit risk exposure under our derivative instruments of approximately \$92.5 million, which was limited to the cost of replacing the contracts in the event of non-performance by the counterparties to the contracts, all of which are currently our lending banks. We do not anticipate nonperformance by any of our significant counterparties. In addition, we have established guidelines we follow regarding credit ratings and instrument maturities to maintain safety and liquidity. We do not normally require collateral or other security to support credit relationships; however, in certain circumstances this option is available to us.

Earnings Per Share

Basic earnings per share is computed by dividing net income by the weighted-average number of shares of common stock outstanding during each period. Diluted earnings per share incorporates the incremental shares issuable upon the assumed exercise of stock options and conversion of potentially dilutive securities.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock-Based Employee Compensation

We measure and recognize compensation expense at the estimated fair value of employee stock awards. Compensation expense for awards and the related tax effects are recognized as they vest. We use the estimated amount of expected forfeitures to calculate compensation costs for all outstanding awards.

Segment Reporting

We operate five wholly-owned cruise brands, Royal Caribbean International, Celebrity Cruises, Azamara Club Cruises, Pullmantur and CDF Croisières de France. In addition, we have a 50% investment in a joint venture with TUI AG which operates the brand TUI Cruises. We believe our global brands possess the versatility to enter multiple cruise market segments within the cruise vacation industry. Although each of our brands has its own marketing style as well as ships and crews of various sizes, the nature of the products sold and services delivered by our brands share a common base (i.e., the sale and provision of cruise vacations). Our brands also have similar itineraries as well as similar cost and revenue components. In addition, our brands source passengers from similar markets around the world and operate in similar economic environments with a significant degree of commercial overlap. As a result, our brands (including TUI Cruises) have been aggregated as a single reportable segment based on the similarity of their economic characteristics, types of consumers, regulatory environment, maintenance requirements, supporting systems and processes as well as products and services provided. Our Chairman and Chief Executive Officer has been identified as the chief operating decision-maker and all significant operating decisions including the allocation of resources are based upon the analyses of the Company as one segment.

Information by geographic area is shown in the table below. Passenger ticket revenues are attributed to geographic areas based on where the reservation originates.

	2014	2013	2012
Passenger ticket revenues:			
United States	53%	52%	51%
All other countries	47%	48%	49%

Recent Accounting Pronouncements

In January 2014, amended guidance was issued regarding the accounting for service concession arrangements. The new guidance defines a service concession as an arrangement between a public-sector entity grantor and an operating entity under which the operating entity operates and maintains the grantor's infrastructure for a specified period of time and in return receives payments from the grantor and or third-party user for use of the infrastructure. The guidance prohibits the operating entity from accounting for a service concession arrangement as a lease and from recording the infrastructure used in the arrangement within property, plant and equipment. This guidance must be applied using a modified retrospective approach and will be effective for our interim and annual reporting periods beginning after December 15, 2014. Early adoption is permitted. The adoption of this newly issued guidance is not expected to have a material impact to our consolidated financial statements.

In April 2014, amended guidance was issued changing the requirements for reporting discontinued operations and enhancing the disclosures in this area. The new guidance requires a disposal of a component of an entity or a group of components of an entity to be reported in discontinued operations if the disposal represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results. The guidance will be effective prospectively for our interim and annual reporting periods beginning after December 15, 2014. The guidance will impact the reporting and disclosures of future disposals, if any.

In May 2014, amended guidance was issued to clarify the principles used to recognize revenue for all entities. The guidance is based on the principle that revenue should be recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

those goods or services. The standard also requires more detailed disclosures and provides additional guidance for transactions that were not comprehensively addressed in the prior accounting guidance. This guidance must be applied using one of two retrospective application methods and will be effective for our interim and annual reporting periods beginning after December 15, 2016. Early adoption is not permitted. We are currently evaluating the impact of the adoption of this newly issued guidance to our consolidated financial statements.

In August 2014, guidance was issued requiring management to evaluate, at each annual and interim reporting period, whether there are conditions or events that raise substantial doubt about the entity's ability to continue as a going concern within one year after the date the financial statements are issued and provide related disclosures. This guidance will be effective for our annual reporting period ending after December 15, 2016, and for annual periods and interim periods thereafter. Early adoption is permitted. The adoption of this newly issued guidance is not expected to have an impact to our consolidated financial statements.

In January 2015, amended guidance was issued changing the requirements for reporting extraordinary and unusual items in the income statement. The update eliminates the concept of extraordinary items. The presentation and disclosure guidance for items that are unusual in nature or occur infrequently will be retained and will be expanded to include items that are both unusual in nature and infrequently occurring. A reporting entity may apply the amendments prospectively or retrospectively to all periods presented in the financial statements. The guidance will be effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The adoption of this newly issued guidance is not expected to have an impact to our consolidated financial statements.

In February 2015, amended guidance was issued affecting current consolidation guidance. The guidance changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. This guidance must be applied using one of two retrospective application methods and will be effective for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in any interim period. We are currently evaluating the impact, if any, of the adoption of this newly issued guidance to our consolidated financial statements.

Reclassifications

As of December 31, 2013, \$24.3 million has been reclassified in the consolidated balance sheet from Accrued expenses and other liabilities to Derivative financial instruments within Total current liabilities in order to conform to the current year presentation.

For the years ended December 31, 2013 and December 31, 2012, a net deferred income tax benefit (expense) of \$1.8 million and \$(0.5) million, respectively, have been reclassified in the consolidated statements of cash flows from Other, net to Net deferred income tax (benefit) expense within Net cash provided by operating activities in order to conform to the current year presentation.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3. Goodwill

The carrying amount of goodwill attributable to our Royal Caribbean International and Pullmantur reporting units was as follows (in thousands):

	Royal Caribbean International	Pullmantur	Total
Balance at December 31, 2012	\$287,436	\$145,539	\$432,975
Foreign currency translation adjustment	(312)) 6,568	6,256
Balance at December 31, 2013	\$287,124	\$152,107	\$439,231
Foreign currency translation adjustment	(166)) (18,523)) (18,689)
Balance at December 31, 2014	\$286,958	\$133,584	\$420,542

In 2012, we determined the implied fair value of goodwill for the Pullmantur reporting unit was \$145.5 million and recognized an impairment charge of \$319.2 million based on a probability-weighted discounted cash flow model further discussed below. This impairment charge was recognized in earnings during the fourth quarter of 2012 and is reported within Impairment of Pullmantur related assets within our consolidated statements of comprehensive income (loss).

During the fourth quarter of 2014, we performed a qualitative assessment of whether it was more-likely-than-not that our Royal Caribbean International reporting unit's fair value was less than its carrying amount before applying the two-step goodwill impairment test. The qualitative analysis included assessing the impact of certain factors such as general economic conditions, limitations on accessing capital, changes in forecasted operating results, changes in fuel prices and fluctuations in foreign exchange rates. Based on our qualitative assessment, we concluded that it was more-likely-than-not that the estimated fair value of the Royal Caribbean International reporting unit exceeded its carrying value and thus, we did not proceed to the two-step goodwill impairment test. No indicators of impairment exist primarily because the reporting unit's fair value has consistently exceeded its carrying value by a significant margin, its financial performance has been solid in the face of mixed economic environments and forecasts of operating results generated by the reporting unit appear sufficient to support its carrying value.

We also performed our annual impairment review of goodwill for Pullmantur's reporting unit during the fourth quarter of 2014. We did not perform a qualitative assessment but instead proceeded directly to the two-step goodwill impairment test. We estimated the fair value of the Pullmantur reporting unit using a probability-weighted discounted cash flow model. The principal assumptions used in the discounted cash flow model are projected operating results, weighted-average cost of capital, and terminal value. Significantly impacting these assumptions are the transfer of vessels from our other cruise brands to Pullmantur. The discounted cash flow model used our 2015 projected operating results as a base. To that base, we added future years' cash flows assuming multiple revenue and expense scenarios that reflect the impact of different global economic environments beyond 2015 on Pullmantur's reporting unit. We assigned a probability to each revenue and expense scenario.

We discounted the projected cash flows using rates specific to Pullmantur's reporting unit based on its weighted-average cost of capital. Based on the probability-weighted discounted cash flows, we determined the fair value of the Pullmantur reporting unit exceeded its carrying value by approximately 52% resulting in no impairment to Pullmantur's goodwill.

Pullmantur is a brand targeted primarily at the Spanish, Portuguese and Latin American markets, with an increasing focus on Latin America. The persistent economic instability in these markets has created significant uncertainties in forecasting operating results and future cash flows used in our impairment analyses. We continue to monitor economic events in these markets for their potential impact on Pullmantur's business and valuation. Further, the estimation of fair value utilizing discounted expected future cash flows includes numerous uncertainties which require our significant judgment when making assumptions of expected revenues, operating costs, marketing, selling and administrative

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

expenses, interest rates, ship additions and retirements as well as assumptions regarding the cruise vacation industry's competitive environment and general economic and business conditions, among other factors.

If there are changes to the projected future cash flows used in the impairment analyses, especially in Net Yields or if certain transfers of vessels from our other cruise brands to the Pullmantur fleet do not take place, it is possible that an impairment charge of Pullmantur's reporting unit's goodwill may be required. Of these factors, the planned transfers of vessels to the Pullmantur fleet is most significant to the projected future cash flows. If the transfers do not occur, we will likely fail step one of the impairment test.

Note 4. Intangible Assets

Intangible assets are reported in Other assets in our consolidated balance sheets and consist of the following (in thousands):

	2014	2013
Indefinite-life intangible asset—Pullmantur trademarks and trade names	\$214,112	\$204,866
Foreign currency translation adjustment	(26,074) 9,246
Total	\$188,038	\$214,112

During the fourth quarter of 2014, 2013 and 2012, we performed the annual impairment review of Pullmantur's trademarks and trade names using a discounted cash flow model and the relief-from-royalty method to compare the fair value of these indefinite-lived intangible assets to its carrying value. The royalty rate used is based on comparable royalty agreements in the tourism and hospitality industry. We used a discount rate comparable to the rate used in valuing the Pullmantur reporting unit in our goodwill impairment test. Based on the results of our testing, we did not record an impairment of Pullmantur's tradenames and trademarks for the year ended December 31, 2014 and December 31, 2013, but for the year ended December 31, 2012, we recorded an impairment of \$17.4 million. During our 2014 annual impairment review, we determined the fair value of the trademarks and trade names exceeded its carrying value by approximately 4% resulting in no impairment to Pullmantur's trademarks and tradenames.

As described in Note 3. Goodwill, the persistent economic instability in Pullmantur's markets has created significant uncertainties in forecasting operating results and future cash flows used in our impairment analysis. We continue to monitor economic events in these markets for their potential impact on Pullmantur's business and valuation. Further, the estimation of fair value utilizing discounted expected future cash flows includes numerous uncertainties which require our significant judgment when making assumptions of expected revenues, operating costs, marketing, selling and administrative expenses, interest rates, ship additions and retirements as well as assumptions regarding the cruise vacation industry's competitive environment and general economic and business conditions, among other factors. If there are changes to the projected future cash flows used in the impairment analysis, especially in Net Yields or if certain transfers of vessels from our other cruise brands to the Pullmantur fleet do not take place, an impairment charge with respect to the Pullmantur reporting unit's trademarks and trade names will likely be required.

Finite-life intangible assets and related accumulated amortization are immaterial to our 2014, 2013, and 2012 consolidated financial statements.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 5. Property and Equipment

Property and equipment consists of the following (in thousands):

	2014	2013
Ships	\$21,620,336	\$20,858,553
Ship improvements	1,904,524	1,683,644
Ships under construction	561,779	563,676
Land, buildings and improvements, including leasehold improvements and port facilities	349,339	394,120
Computer hardware and software, transportation equipment and other	889,579	771,304
Total property and equipment	25,325,557	24,271,297
Less—accumulated depreciation and amortization	(7,089,989)	(6,753,545)
	\$18,235,568	\$17,517,752

Ships under construction include progress payments for the construction of new ships as well as planning, design, interest and other associated costs. We capitalized interest costs of \$28.8 million, \$17.9 million and \$13.3 million for the years 2014, 2013 and 2012, respectively.

In 2014, our conditional agreement with STX France to build the fourth Oasis-class ship for Royal Caribbean International became effective. Refer to Note 15. Commitments and Contingencies for further information.

During 2014, we sold Celebrity Century to a subsidiary of Skysea Holding International Ltd. ("Skysea Holding") for \$220.0 million in cash. We agreed to charter the Celebrity Century from the buyer until April 2015 to fulfill existing passenger commitments. The sale resulted in a loss of \$17.4 million that was recognized in earnings during the third quarter of 2014 and is reported within Other operating expenses in our consolidated statements of comprehensive income (loss). We subsequently acquired a 35% equity stake in Skysea Holding in November 2014. See Note 6. Other Assets for further discussion.

In December 2014, we terminated the leasing of Brilliance of the Seas under the 25 year operating lease originally entered into in July 2002, denominated in British pound sterling. As part of the agreement, we purchased the Brilliance of the Seas for a net settlement purchase price of approximately £175.4 million or \$275.4 million. At the date of purchase, the total carrying amount of the ship, including capital improvements previously accounted for as leasehold improvements, was \$330.5 million which approximated the estimated fair market value of the ship. We funded the purchase using proceeds from our \$1.2 billion unsecured revolving credit facility. See Note 7. Long-Term Debt for further information.

During 2013, the fair value of Pullmantur's aircraft were determined to be less than their carrying value and a restructuring related impairment charge of \$13.5 million was recognized in earnings during the fourth quarter of 2013 and reported within Restructuring and related impairment charges within our consolidated statements of comprehensive income (loss). Furthermore, in 2012, the fair value of Pullmantur's aircraft were determined to be less than their carrying value and an impairment charge of \$48.9 million was recognized in earnings during the fourth quarter of 2012 and reported within Impairment of Pullmantur related assets within our consolidated statements of comprehensive income (loss).

Additionally, Pullmantur's non-core businesses met the accounting criteria to be classified as held for sale during the fourth quarter of 2013 which led to restructuring related impairment charges of \$18.2 million to adjust the carrying value of property and equipment held for sale to its fair value, less cost to sell. The impairment charge was reported in Restructuring and related impairment charges in our consolidated statements of comprehensive income (loss). The remaining long-lived assets held for sale were not material to our December 31, 2013 consolidated financial

statements

F-17

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

and no longer exist as of December 31, 2014. See Note 14. Fair Value Measurements and Derivative Instruments and Note 16. Restructuring and Related Impairment Charges for further discussion.

Note 6. Other Assets

A Variable Interest Entity ("VIE") is an entity in which the equity investors have not provided enough equity to finance the entity's activities or the equity investors (1) cannot directly or indirectly make decisions about the entity's activities through their voting rights or similar rights; (2) do not have the obligation to absorb the expected losses of the entity; (3) do not have the right to receive the expected residual returns of the entity; or (4) have voting rights that are not proportionate to their economic interests and the entity's activities involve or are conducted on behalf of an investor with a disproportionately small voting interest.

We have determined that Grand Bahama Shipyard Ltd. ("Grand Bahama"), a ship repair and maintenance facility in which we have a 40% noncontrolling interest, is a VIE. The facility serves cruise and cargo ships, oil and gas tankers, and offshore units. We utilize this facility, among other ship repair facilities, for our regularly scheduled drydocks and certain emergency repairs as may be required. We have determined that we are not the primary beneficiary of this facility, as we do not have the power to direct the activities that most significantly impact the facility's economic performance. Accordingly, we do not consolidate this entity and we account for this investment under the equity method of accounting. As of December 31, 2014, the net book value of our investment in Grand Bahama was approximately \$53.8 million, consisting of \$7.7 million in equity and \$46.1 million in loans. As of December 31, 2013, the net book value of our investment in Grand Bahama was approximately \$56.1 million, consisting of \$6.4 million in equity and \$49.7 million in loans. These amounts represent our maximum exposure to loss as we are not contractually required to provide any financial or other support to the facility. The majority of our loans to Grand Bahama are in non-accrual status and the majority of this amount was included within Other assets in our consolidated balance sheets. We received approximately \$3.6 million and \$6.2 million in principal and interest payments related to loans that are in accrual status from Grand Bahama in 2014 and 2013, respectively, and recorded income associated with our investment in Grand Bahama. We monitor credit risk associated with these loans through our participation on Grand Bahama's board of directors along with our review of Grand Bahama's financial statements and projected cash flows. Based on this review, we believe the risk of loss associated with these loans was not probable as of December 31, 2014.

On March 31, 2014, as part of Pullmantur's sale of its non-core businesses, Pullmantur sold the majority of its 49% interest in Pullmantur Air S.A. ("Pullmantur Air"), a small aircraft business that operates four aircraft in support of Pullmantur's operations. Post-sale, we retained a 19% interest in Pullmantur Air as well as 100% ownership of the aircraft, which are now being dry leased to Pullmantur Air. We will continue to utilize the services provided by Pullmantur Air. Consistent with our Pullmantur two-month lag reporting period, we reported the impact of the sale in the second quarter of 2014. As of the date of the sale, we determined that Pullmantur Air was no longer a VIE and have accounted for our 19% investment in Pullmantur Air under the cost method of accounting.

Prior to the sale, we determined that Pullmantur Air was a VIE for which we were the primary beneficiary and we consolidated the assets and liabilities of Pullmantur Air in our consolidated balance sheets as of December 31, 2013. We did not separately disclose the assets and liabilities of Pullmantur Air as they were immaterial to our December 31, 2013 consolidated financial statements. See Note 16. Restructuring and Related Impairment Charges for further discussion of the transaction.

Additionally, in connection with the sale of Pullmantur's non-core businesses, Pullmantur sold the majority of its land-based tour operations and travel agency, retaining a 19% noncontrolling interest in both Nautalia Viajes, S.L. ("Nautalia"), a small travel agency network, and Global Tour Operación, S.L. ("Global Tour"), a small tour operations business. We will continue to utilize the services provided by these businesses, in addition to services from other travel agency and tour operations businesses. Consistent with our two-month lag Pullmantur reporting period, we

reported the impact of this sale in our consolidated financial statements in the second quarter of 2014. As of the date of the sale, we determined that Nautalia and Global Tour were VIEs for which we were not the primary beneficiaries as we do not

F-18

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

have the power to direct the activities that most significantly impact the economic performance of these entities. In accordance with authoritative guidance for nonconsolidated VIEs, we have accounted for our 19% investment in these companies under the equity method of accounting. The impact of these entities is not material to our consolidated financial statements.

We have determined that TUI Cruises GmbH, our 50%-owned joint venture which operates the brand TUI Cruises, is a VIE. As of December 31, 2014 and December 31, 2013, our investment in TUI Cruises, including equity and loans, was approximately \$370.1 million and \$354.3 million, respectively. The majority of this amount was included within Other assets in our consolidated balance sheets. In addition, we and TUI AG, our joint venture partner, have each guaranteed the repayment of 50% of a €180.0 million bank loan provided to TUI Cruises due in 2016. Our investment amount and the potential obligations under this guarantee are substantially our maximum exposure to loss. We have determined that we are not the primary beneficiary of TUI Cruises. We believe that the power to direct the activities that most significantly impact TUI Cruises' economic performance are shared between ourselves and TUI AG. All the significant operating and financial decisions of TUI Cruises require the consent of both parties which we believe creates shared power over TUI Cruises. Accordingly, we do not consolidate this entity and account for this investment under the equity method of accounting. As of December 31, 2014, TUI Cruises' bank loan that is guaranteed by the shareholders had a remaining balance of €117.0 million, or approximately \$141.6 million based on the exchange rate at December 31, 2014. This bank loan amortizes quarterly and is secured by first mortgages on both Mein Schiff 1 and Mein Schiff 2. Based on current facts and circumstances, we do not believe potential obligations under our guarantee of this bank loan are probable.

In connection with our sale of Celebrity Mercury to TUI Cruises in 2011, we provided a debt facility to TUI Cruises in the amount of up to €90.0 million and maturing through June 2018. During 2014, we made several amendments to the facility, including increasing the maximum amount of the facility to €125.0 million and providing TUI Cruises with the ability to draw upon the available capacity through December 31, 2015 to fund installment payments for its newbuild ships. Any amounts drawn under the facility to fund newbuild installments mature in March 2016. Interest under the loan accrues at the rate of 5.0% per annum. This facility is 50% guaranteed by TUI AG and is secured by second and third mortgages on Mein Schiff 1 and Mein Schiff 2. The outstanding principal amount of the facility as of December 31, 2014 was €55.7 million, or approximately \$67.4 million based on the exchange rate at December 31, 2014.

TUI Cruises currently has three newbuild ships on order with Meyer Turku shipyard: Mein Schiff 4, scheduled for delivery in the second quarter of 2015, Mein Schiff 5, scheduled for delivery in the third quarter of 2016 and Mein Schiff 6, scheduled for delivery in the second quarter of 2017. TUI Cruises has in place commitments for the financing of up to 80% of the contract price of each ship on order. The remaining portion of the contract price of the ships will be funded through TUI Cruises' cash flows from operations and/or shareholder loans (via the debt facility described above or otherwise) and/or equity contributions from us and TUI AG. The various ship construction and credit agreements include certain restrictions on each of our and TUI AG's ability to reduce our current ownership interest in TUI Cruises below 37.5% through 2019.

During the fourth quarter of 2014, we acquired a 35% noncontrolling interest in Skysea Holding. We have determined that Skysea Holding is a VIE for which we are not the primary beneficiary, as we do not have the power to direct the activities that most significantly impact the entity's economic performance. Accordingly, we do not consolidate this entity and we account for this investment under the equity method of accounting. As of December 31, 2014, our investment balance in Skysea Holding was \$26.3 million. In December 31, 2014, we and Ctrip.com International Ltd, who also owns 35% of Skysea Holding, each provided a debt facility to Exquisite Marine Ltd., one of Skysea Holding's wholly-owned subsidiaries, in the amount of \$80.0 million. Interest under these facilities, which mature in January 2030, initially accrues interest at a rate of 3.0% per annum with an increase of at least 0.5% every two years. The facilities, which are pari passu to each other, are each 100% guaranteed by Skysea Holding and secured by a first priority mortgage on the ship, Celebrity Century, which we sold to Exquisite Marine Ltd. in September 2014. See

Note 5. Property and Equipment for further discussion on the sales transaction. We have determined that Exquisite Marine Ltd. is a VIE and that we are not the primary beneficiary, as we do not have the power to direct the activities

F-19

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

that most significantly impact the entity's economic performance. Accordingly, we do not consolidate this entity. Our investment of \$26.3 million and loan amount of \$80.0 million are our maximum exposure to loss with respect to SkySea Holding and its subsidiaries.

Our share of income from investments accounted for under the equity method of accounting, including the entities discussed above, was \$51.6 million, \$32.0 million and \$23.8 million for the years ended December 31, 2014, 2013 and 2012, respectively, and was recorded within Other income (expense).

Note 7. Long-Term Debt

Long-term debt consists of the following (in thousands):

	2014	2013
\$1.1 billion unsecured revolving credit facility, LIBOR plus 1.75%, currently 1.92% and a facility fee of 0.37%, due 2016	\$713,000	\$435,000
\$1.2 billion unsecured revolving credit facility, LIBOR plus 1.75%, currently 1.91% and a facility fee of 0.37%, due 2018	778,000	295,000
Unsecured senior notes and senior debentures, 5.25% to 11.88%, due 2015, 2016, 2018, 2022 and 2027	1,721,190	1,703,040
€745 million unsecured senior notes, 5.63%, due 2014	—	1,028,126
\$589 million unsecured term loan, 4.47%, due through 2014	—	42,071
\$530 million unsecured term loan, LIBOR plus 0.51%, currently 0.83%, due through 2015	37,857	113,571
\$519 million unsecured term loan, LIBOR plus 0.45%, currently 0.77%, due through 2020	259,573	302,835
\$420 million unsecured term loan, 5.41%, due through 2021	241,827	274,974
\$420 million unsecured term loan, LIBOR plus 1.85%, currently 2.17%, due through 2021	245,000	280,000

\$65.0 million unsecured term loan, LIBOR plus 2.12%, currently 2.29%, due through 2019	51,100	—
\$1.0 million unsecured term loan, 3.00%, due through 2015	750	—
\$380.0 million unsecured term loan, LIBOR plus 2.12%, currently 2.29%, due through 2018	380,000	—
\$791.1 million unsecured term loan, LIBOR plus 1.30%, currently 1.62%, due through 2026	791,108	—
\$290.0 million unsecured term loan, LIBOR plus 2.5%, currently 2.67%, due 2016	290,000	290,000
€365 million unsecured term loan, EURIBOR plus 2.30%, currently 2.32%, due 2017	441,687	502,934
\$7.3 million unsecured term loan, LIBOR plus 2.5%, currently 2.82%, due through 2023	4,915	5,391
\$30.3 million unsecured term loan, LIBOR plus 3.75%, currently 3.99%, due through 2021	13,603	15,073
Capital lease obligations	52,647	54,743
	8,443,948	8,074,804
Less—current portion	(799,630)	(1,563,378)
Long-term portion	\$7,644,318	\$6,511,426

In January 2014, we borrowed \$380.0 million under a previously committed unsecured term loan facility. The loan is due and payable at maturity in August 2018. Interest on the loan accrues at a floating rate based on LIBOR plus the

F-20

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

applicable margin. The applicable margin varies with our debt rating and was 2.12% as of December 31, 2014. The proceeds of this loan were used to repay our €745.0 million 5.625% unsecured senior notes due January 2014.

In January 2014, we amended and restated our €365.0 million unsecured term loan due July 2017. Interest on the amended facility accrues at a floating rate based on EURIBOR plus a margin which varies with our credit rating. The amendment reduced the margin, which at our current credit rating resulted in a decrease from 3.00% to 2.30%. The amendment did not result in the extinguishment of debt.

In March 2014, we amended our unsecured term loans for Oasis of the Seas and Allure of the Seas primarily to reduce the margins on those facilities and eliminate the lenders option to exit those facilities in 2015 and 2017, respectively. The interest rate on the \$420.0 million floating rate tranche of the Oasis of the Seas term loan was reduced from LIBOR plus 2.10% to LIBOR plus 1.85%. The interest rate on the entire \$1.1 billion Allure of the Seas term loan was reduced from LIBOR plus 2.10% to LIBOR plus 1.85%. These amendments did not result in the extinguishment of debt.

During 2014, we took delivery of Quantum of the Seas. To finance the purchase, we borrowed \$791.1 million under a previously committed unsecured term loan which is 95% guaranteed by Hermes. The loan amortizes semi-annually over 12 years and bears interest at LIBOR plus a margin of 1.30%, currently 1.62%. In addition, during 2012, we entered into forward-starting interest rate swap agreements which effectively converted the floating rate available to us per the credit agreement to a fixed rate, including the applicable margin, of 3.74% effective October 2014 through the remaining term of the loan. See Note 14. Fair Value Measurements and Derivative Instruments for further information regarding these agreements.

During 2014, we increased the capacity of our unsecured revolving credit facility due August 2018 by \$300 million by utilizing the accordion feature, bringing our total capacity under this facility to \$1.2 billion as of December 31, 2014. We also have a revolving credit facility due July 2016 with capacity of \$1.1 billion as of December 31, 2014, giving us an aggregate revolving borrowing capacity of \$2.3 billion.

Certain of our unsecured ship financing term loans are guaranteed by the export credit agency in the respective country in which the ship is constructed. In consideration for these guarantees, depending on the financing arrangement, we pay to the applicable export credit agency fees that range from either (1) 0.88% to 1.48% per annum based on the outstanding loan balance semi-annually over the term of the loan (subject to adjustment under certain of our facilities based upon our credit ratings) or (2) an upfront fee of approximately 2.3% to 2.37% of the maximum loan amount. We amortize the fees that are paid upfront over the life of the loan and those that are paid semi-annually over each respective payment period. We classify these fees within Debt issuance costs in our consolidated statements of cash flows and within Other assets in our consolidated balance sheets.

Under certain of our agreements, the contractual interest rate, facility fee and/or export credit agency fee vary with our debt rating.

The unsecured senior notes and senior debentures are not redeemable prior to maturity, except that certain series may be redeemed upon the payment of a make-whole premium.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Following is a schedule of annual maturities on long-term debt including capital leases as of December 31, 2014 for each of the next five years (in thousands):

Year	
2015	\$799,630
2016	1,856,302
2017	920,687
2018	1,785,083
2019	529,197
Thereafter	2,553,049
	\$8,443,948

Note 8. Shareholders' Equity

During the fourth quarter of 2014, we repurchased from A. Wilhelmsen AS, our largest shareholder, 3.5 million shares of our common stock directly from them in a private transaction at \$67.45 per share, which was equal to the price paid by a third-party financial institution for the simultaneous purchase of an additional 3.5 million shares from A. Wilhelmsen AS. Total consideration paid to repurchase such shares was approximately \$236.1 million and was recorded in shareholders' equity as a component of treasury stock.

In December 2014, we declared a cash dividend on our common stock of \$0.30 per share which was paid in the first quarter of 2015. We declared a cash dividend on our common stock of \$0.30 per share during the third quarter of 2014 which was paid in the fourth quarter of 2014. We declared and paid a cash dividend on our common stock of \$0.25 per share during the first and second quarters of 2014.

During the fourth quarter of 2013, we declared a cash dividend on our common stock of \$0.25 per share which was paid in the first quarter of 2014. We declared a cash dividend on our common stock of \$0.25 per share during the third quarter of 2013 which was paid in the fourth quarter of 2013. We declared and paid a cash dividend on our common stock of \$0.12 per share during the first and second quarters of 2013. During the first quarter of 2013, we also paid a cash dividend on our common stock of \$0.12 per share which was declared during the fourth quarter of 2012.

Note 9. Stock-Based Employee Compensation

We currently have awards outstanding under two stock-based compensation plans, which provide for awards to our officers, directors and key employees. The plans consist of a 2000 Stock Award Plan and a 2008 Equity Plan. Our ability to issue new awards under the 2000 Stock Award Plan terminated in accordance with the terms of the plan in September 2009. The 2008 Equity Plan, as amended, provides for the issuance of up to 11,000,000 shares of our common stock pursuant to grants of (i) incentive and non-qualified stock options, (ii) stock appreciation rights, (iii) restricted stock, (iv) restricted stock units and (v) performance shares. During any calendar year, no one individual shall be granted awards of more than 500,000 shares. Options and restricted stock units outstanding as of December 31, 2014 generally vest in equal installments over four years from the date of grant. In addition, performance shares generally vest in three years. With certain limited exceptions, options, restricted stock units and performance shares are forfeited if the recipient ceases to be a director or employee before the shares vest. Options are granted at a price not less than the fair value of the shares on the date of grant and expire not later than ten years after the date of grant.

Prior to 2012, our officers received a combination of stock options and restricted stock units. Beginning in 2012, our officers instead receive their long-term incentive awards through a combination of performance shares and restricted stock units. Each performance share award is expressed as a target number of performance shares based upon the fair market value of our common stock on the date the award is issued. The actual number of shares underlying each award (not to exceed 200% of the target number of performance shares) will be determined based upon the Company's

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

achievement of a specified performance target range. For the grants awarded in 2014, the performance target is return on invested capital ("ROIC") for the year ended December 31, 2014, as adjusted by the Compensation Committee of our Board of Directors for events that are outside of management's control. In 2014, we issued a target number of 233,831 performance shares which will vest on the third anniversary of the award issue date. In February 2015, the Compensation Committee of our Board of Directors set the actual payout level at 119% of target for the performance shares issued in 2014.

We also provide an Employee Stock Purchase Plan ("ESPP") to facilitate the purchase by employees of up to 1,300,000 shares of common stock in the aggregate. Offerings to employees are made on a quarterly basis. Subject to certain limitations, the purchase price for each share of common stock is equal to 85.0% of the average of the market prices of the common stock as reported on the New York Stock Exchange on the first business day of the purchase period and the last business day of each month of the purchase period. During 2014, 2013 and 2012, 26,921, 27,036 and 35,927 shares of our common stock were issued under the ESPP at a weighted-average price of \$52.08, \$33.16 and \$25.58, respectively.

In 1994, we granted to our Chairman and Chief Executive Officer an award of common stock, issuable in quarterly installments of 10,086 shares until the earlier of the termination of his employment or June 2014. In furtherance of this grant, we issued an aggregate of 40,344 shares of common stock in each of 2012 and 2013 and an aggregate of 20,172 shares of common stock in 2014.

Total compensation expense recognized for employee stock-based compensation for the years ended December 31, 2014, 2013 and 2012 was as follows:

Classification of expense (In thousands)	Employee Stock-Based Compensation		
	2014	2013	2012
Marketing, selling and administrative expenses	\$26,116	\$21,178	\$24,153
Total compensation expense	\$26,116	\$21,178	\$24,153

The fair value of each stock option grant is estimated on the date of grant using the Black-Scholes option pricing model. The estimated fair value of stock options, less estimated forfeitures, is amortized over the vesting period using the graded-vesting method. We did not issue any stock options in 2014 and 2013. The assumptions used in the Black-Scholes option-pricing model are as follows:

	2012
Dividend yield	1.5%
Expected stock price volatility	46.0%
Risk-free interest rate	1.1%
Expected option life	6 years

Expected volatility was based on a combination of historical and implied volatilities. The risk-free interest rate was based on United States Treasury zero coupon issues with a remaining term equal to the expected option life assumed at the date of grant. The expected term was calculated based on historical experience and represents the time period options actually remain outstanding. We estimate forfeitures based on historical pre-vesting forfeiture rates and revise those estimates as appropriate to reflect actual experience.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock option activity and information about stock options outstanding are summarized in the following table:

Stock Option Activity	Number of Options	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value ⁽¹⁾ (in thousands)
Outstanding at January 1, 2014	2,694,872	\$36.30	3.83	\$30,080
Granted	—	\$—	—	—
Exercised	(1,941,365)	\$36.22	—	—
Canceled	(47,456)	\$43.02	—	—
Outstanding at December 31, 2014	706,051	\$36.03	3.64	\$33,182
Vested and expected to vest at December 31, 2014	704,796	\$36.02	3.63	\$33,130
Options Exercisable at December 31, 2014	622,168	\$34.85	3.31	\$29,970

⁽¹⁾ The intrinsic value represents the amount by which the fair value of stock exceeds the option exercise price as of December 31, 2014.

The weighted-average estimated fair value of stock options granted was \$9.90 during the year ended December 31, 2012. The total intrinsic value of stock options exercised during the years ended December 31, 2014, 2013 and 2012 was \$35.9 million, \$17.5 million and \$15.3 million, respectively. As of December 31, 2014, there was approximately \$0.1 million of total unrecognized compensation cost, net of estimated forfeitures, related to stock options granted under our stock incentive plans which is expected to be recognized over a weighted-average period of 0.14 years. Restricted stock units are converted into shares of common stock upon vesting or, if applicable, settle on a one-for-one basis. The cost of these awards is determined using the fair value of our common stock on the date of the grant, and compensation expense is recognized over the vesting period. Restricted stock activity is summarized in the following table:

Restricted Stock Activity	Number of Awards	Weighted-Average Grant Date Fair Value
Non-vested share units at January 1, 2014	989,005	\$9.26
Granted	472,150	\$54.60
Vested	(405,001)	\$51.24
Canceled	(74,601)	\$55.30
Non-vested share units expected to vest as of December 31, 2014	981,553	\$10.25

The weighted-average estimated fair value of restricted stock units granted during the year ended December 31, 2013, and 2012 were \$36.07 and \$30.03, respectively. The total fair value of shares released on the vesting of restricted stock units during the years ended December 31, 2014, 2013 and 2012 was \$20.7 million, \$19.2 million and \$18.8 million, respectively. As of December 31, 2014, we had \$14.6 million of total unrecognized compensation expense, net of estimated forfeitures, related to restricted stock unit grants, which will be recognized over the weighted-average period of 1.27 years.

Performance share awards are converted into shares of common stock upon vesting on a one-for-one basis. We estimate the fair value of each performance share when the grant is authorized and the related service period has commenced. We remeasure the fair value of our performance shares in each subsequent reporting period until the grant date has occurred, which is the date when the performance conditions are satisfied. We recognize compensation cost over the vesting period based on the probability of the service and performance conditions being achieved adjusted for each subsequent fair value measurement until the grant date. If the specified service and performance

conditions

F-24

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

are not met, compensation expense will not be recognized and any previously recognized compensation expense will be reversed. Performance stock activity is summarized in the following table:

Performance Stock Activity	Number of Awards	Weighted-Average Grant Date Fair Value
Non-vested share units at January 1, 2014	459,929	\$32.36
Granted	233,831	\$56.72
Vested	(7,301)) \$53.81
Canceled	(27,573)) \$54.11
Non-vested share units expected to vest as of December 31, 2014	658,886	\$39.86

As of December 31, 2014, we had \$12.9 million of total unrecognized compensation expense, net of estimated forfeitures, related to performance share unit grants, which will be recognized over the weighted-average period of 0.89 years.

Note 10. Earnings Per Share

A reconciliation between basic and diluted earnings per share is as follows (in thousands, except per share data):

	Year Ended December 31,		
	2014	2013	2012
Net income for basic and diluted earnings per share	\$764,146	\$473,692	\$18,287
Weighted-average common shares outstanding	221,658	219,638	217,930
Dilutive effect of stock options, performance share awards and restricted stock awards	1,386	1,303	1,527
Diluted weighted-average shares outstanding	223,044	220,941	219,457
Basic earnings per share:			
Net income	\$3.45	\$2.16	\$0.08
Diluted earnings per share:			
Net income	\$3.43	\$2.14	\$0.08

Diluted earnings per share did not reflect options to purchase an aggregate of 1.9 million and 3.1 million shares for each of the years ended December 31, 2013 and 2012, respectively, because the effect of including them would have been antidilutive. There were no antidilutive shares for the year ended December 31, 2014.

Note 11. Retirement Plan

We maintain a defined contribution pension plan covering full-time shoreside employees who have completed the minimum period of continuous service. Annual contributions to the plan are discretionary and are based on fixed percentages of participants' salaries and years of service, not to exceed certain maximums. Pension expenses were \$15.4 million, \$13.0 million and \$15.2 million for the years ended December 31, 2014, 2013 and 2012, respectively.

Note 12. Income Taxes

We are subject to corporate income taxes in countries where we have operations or subsidiaries. We and the majority of our ship-operating and vessel-owning subsidiaries are currently exempt from United States corporate tax on United States source income from the international operation of ships pursuant to Section 883 of the Internal Revenue Code. Regulations under Section 883 have limited the activities that are considered the international operation of a

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

ship or incidental thereto. Accordingly, our provision for United States federal and state income taxes includes taxes on certain activities not considered incidental to the international operation of our ships.

Additionally, some of our ship-operating subsidiaries are subject to income tax under the tonnage tax regimes of Malta or the United Kingdom. Under these regimes, income from qualifying activities is not subject to corporate income tax. Instead, these subsidiaries are subject to a tonnage tax computed by reference to the tonnage of the ship or ships registered under the relevant provisions of the tax regimes. Income from activities not considered qualifying activities, which we do not consider significant, remains subject to Maltese or United Kingdom corporate income tax. Income tax (benefit) expense for items not qualifying under Section 883, tonnage taxes and income taxes for the remainder of our subsidiaries was approximately \$(20.9) million, \$24.9 million and \$55.5 million and was recorded within Other income (expense) for the years ended December 31, 2014, 2013 and 2012, respectively. In addition, all interest expense and penalties related to income tax liabilities are classified as income tax expense within Other income (expense).

We do not expect to incur income taxes on future distributions of undistributed earnings of foreign subsidiaries. Consequently, no deferred income taxes have been provided for the distribution of these earnings.

Net deferred tax assets and deferred tax liabilities and corresponding valuation allowances related to our operations were not material as of December 31, 2014 and 2013.

We regularly review deferred tax assets for recoverability based on our history of earnings, expectations of future earnings, and tax planning strategies. Realization of deferred tax assets ultimately depends on the existence of sufficient taxable income to support the amount of deferred taxes. A valuation allowance is recorded in those circumstances in which we conclude it is not more-likely-than-not we will recover the deferred tax assets prior to their expiration. During 2012, we determined that a 100% valuation allowance of our deferred tax assets was required resulting in a deferred income tax expense of \$33.7 million. In addition, Pullmantur has a deferred tax liability that was recorded at the time of acquisition. This liability represents the tax effect of the basis difference between the tax and book values of the trademarks and trade names that were acquired at the time of the acquisition. Due to the impairment charge related to these intangible assets, we reduced the deferred tax liability and recorded a deferred tax benefit of \$5.2 million. The net \$28.5 million impact of these adjustments was recognized in earnings during the fourth quarter of 2012 and was reported within Other income (expense) in our statements of comprehensive income (loss).

During the fourth quarter of 2014, Spain adopted tax reform legislation, which included among other things, a reduction of the corporate income tax rate from 30% to 28% in 2015 and a further reduction to 25% in 2016. As a result, we adjusted our deferred tax assets and deferred tax liabilities in Spain to reflect the new tax rate at which we believe they will be realized. This change resulted in a net deferred income tax benefit of \$10.0 million. The tax reform also amended the net operating loss carryforward rules by changing the carryforward period from 18 years to unlimited and by changing the annual utilization limitation from 25% of taxable income to 70% of taxable income for certain taxpayers, including Pullmantur. As a result of the change of the net operating loss carryforward period, we reversed a portion of the valuation allowance recorded in 2012 to the extent of 70% of the rate-adjusted deferred tax liability recorded for the basis difference between the tax and book values of the trademarks and trade names recorded at the time of the Pullmantur acquisition and other indefinite lived assets recorded. The amount of the valuation allowance reversed in the fourth quarter was \$33.5 million which was recorded as a deferred tax benefit. These deferred tax adjustments were reported within Other income (expense) in our statements of comprehensive income (loss).

Total Liabilities	\$ 8,391,301	\$ 8,761,414	\$ 1,859,361	\$ 6,902,053	\$—	\$ 8,431,220	\$ 2,888,255	\$ 5,542,965	\$—

(1) Inputs based on quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to access. Valuation of these items does not entail a significant amount of judgment.

Inputs other than quoted prices included within Level 1 that are observable for the liability, either directly or indirectly. For unsecured revolving credit facilities and unsecured term loans, fair value is determined utilizing the income valuation approach. This valuation model takes into account the contract terms of our debt such as the debt maturity and the interest rate on the debt. The valuation model also takes into account the creditworthiness of the Company.

(2) Inputs that are unobservable. The Company did not use any Level 3 inputs as of December 31, 2014 and December 31, 2013.

(3) Consists of cash and marketable securities with original maturities of less than 90 days.

(4) Consists of unsecured revolving credit facilities, senior notes, senior debentures and term loans. Does not include our capital lease obligations.

Total Liabilities	\$767,635	\$—	\$767,635	\$—	\$100,260	\$—	\$100,260	\$—

(1) Inputs based on quoted prices (unadjusted) in active markets for identical assets or liabilities that we have the ability to access. Valuation of these items does not entail a significant amount of judgment.

Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. For foreign currency forward contracts, interest rate swaps, cross currency swaps and fuel swaps, fair value is derived using valuation models that utilize the income valuation approach. These valuation models take into account the contract terms, such as maturity as well as other inputs, such as foreign exchange rates and curves,

(2) fuel types, fuel curves and interest rate yield curves. Fair value for foreign currency collar options is determined by using standard option pricing models with inputs based on the options' contract terms, such as exercise price and maturity, and readily available public market data, such as foreign exchange curves, foreign exchange volatility levels and discount rates. All derivative instrument fair values take into account the creditworthiness of the counterparty and the Company.

(3) Inputs that are unobservable. The Company did not use any Level 3 inputs as of December 31, 2014 and December 31, 2013.

(4) Consists of foreign currency forward contracts, foreign currency collar options, interest rate swaps and fuel swaps.

(5) Please refer to the "Fair Value of Derivative Instruments" table for breakdown by instrument type.

(6) Consists of exchange-traded equity securities and mutual funds.

(7) Consists of interest rate swaps, fuel swaps, foreign currency forward contracts and foreign currency collar options.

(8) Please refer to the "Fair Value of Derivative Instruments" table for breakdown by instrument type.

The reported fair values are based on a variety of factors and assumptions. Accordingly, the fair values may not represent actual values of the financial instruments that could have been realized as of December 31, 2014 or December 31, 2013, or that will be realized in the future, and do not include expenses that could be incurred in an actual sale or settlement.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table presents information about the Company's long-lived assets for our Pullmantur reporting unit and assets held for sale recorded at fair value on a nonrecurring basis (in thousands):

Description	Fair Value Measurements at December 31, 2013 Using			
	Total Carrying Amount	Total Fair Value	Level 3	Total Impairment
Long-lived assets — Pullmantur aircraft	\$49,507	\$49,507	\$49,507	\$13,529
Assets held for sale ⁽²⁾	\$—	\$—	\$—	\$19,985

For 2013, we estimated the fair value of our long-lived assets using an undiscounted cash flow model. A significant assumption in performing the undiscounted cash flow test was the number of years during which we expect to use these aircraft. Additionally, as of December 31, 2013, the expected operating use of the aircraft modified the expected cash flows.

For 2013, we estimated the fair value of assets held for sale related to the sale of Pullmantur's non-core businesses. This resulted in an impairment of \$20.0 million mostly consisting of \$18.2 million for property and equipment. See Note 16. Restructuring and Related Impairment Charges for further discussion.

The assets related to Pullmantur's non-core businesses that met the criteria for held for sale classification as of December 31, 2013 were adjusted to the lower of their carrying amount or fair value less cost to sell. At December 31, 2013, the fair value of certain assets held for sale was lower than the carrying amount, resulting in a loss of \$20.0 million which was recognized during the fourth quarter of 2013 and is reported within Restructuring and related impairment charges in our consolidated statements of comprehensive income (loss). See Note 16. Restructuring and Related Impairment Charges for further discussion.

In 2013, long-lived assets with a carrying amount of \$63.0 million were written down to their fair value of \$49.5 million, resulting in losses of \$13.5 million, which were recognized during the fourth quarter of 2013 and were reported within Restructuring and related impairment charges in our consolidated statements of comprehensive income (loss). Long-lived assets are reported within Property and equipment, net in our consolidated balance sheets. We have master International Swaps and Derivatives Association ("ISDA") agreements in place with our derivative instrument counterparties. These ISDA agreements provide for final close out netting with our counterparties for all positions in the case of default or termination of the ISDA agreement. We have determined that our ISDA agreements provide us with rights of setoff on the fair value of derivative instruments in a gain position and those in a loss position with the same counterparty. We have elected not to offset such derivative instrument fair values in our consolidated balance sheets.

As of December 31, 2014 and December 31, 2013, no cash collateral was received or pledged under our ISDA agreements. See Credit Related Contingent Features for further discussion on contingent collateral requirements for our derivative instruments.

The following table presents information about the Company's offsetting of financial assets under master netting agreements with derivative counterparties:

Derivative Instruments

We are exposed to market risk attributable to changes in interest rates, foreign currency exchange rates and fuel prices. We manage these risks through a combination of our normal operating and financing activities and through the use of derivative financial instruments pursuant to our hedging practices and policies. The financial impact of these hedging

instruments is primarily offset by corresponding changes in the underlying exposures being hedged. We achieve this by closely matching the amount, term and conditions of the derivative instrument with the underlying risk being hedged. Although certain of our derivative financial instruments do not qualify or are not accounted for under hedge accounting, we do not hold or issue derivative financial instruments for trading or other speculative purposes. We monitor our derivative positions using techniques including market valuations and sensitivity analyses. We enter into various forward, swap and option contracts to manage our interest rate exposure and to limit our exposure to fluctuations in foreign currency exchange rates and fuel prices. These instruments are recorded on the balance sheet at their fair value and the vast majority are designated as hedges. We also have non-derivative financial instruments designated as hedges of our net investment in our foreign operations and investments.

F-31

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

At inception of the hedge relationship, a derivative instrument that hedges the exposure to changes in the fair value of a firm commitment or a recognized asset or liability is designated as a fair value hedge. A derivative instrument that hedges a forecasted transaction or the variability of cash flows related to a recognized asset or liability is designated as a cash flow hedge.

Changes in the fair value of derivatives that are designated as fair value hedges are offset against changes in the fair value of the underlying hedged assets, liabilities or firm commitments. Gains and losses on derivatives that are designated as cash flow hedges are recorded as a component of Accumulated other comprehensive (loss) income until the underlying hedged transactions are recognized in earnings. The foreign currency transaction gain or loss of our non-derivative financial instruments and the changes in the fair value of derivatives designated as hedges of our net investment in foreign operations and investments are recognized as a component of Accumulated other comprehensive (loss) income along with the associated foreign currency translation adjustment of the foreign operation.

On an ongoing basis, we assess whether derivatives used in hedging transactions are "highly effective" in offsetting changes in the fair value or cash flow of hedged items. We use the long-haul method to assess hedge effectiveness using regression analysis for each hedge relationship under our interest rate, foreign currency and fuel hedging programs. We apply the same methodology on a consistent basis for assessing hedge effectiveness to all hedges within each hedging program (i.e., interest rate, foreign currency and fuel). We perform regression analyses over an observation period of up to three years, utilizing market data relevant to the hedge horizon of each hedge relationship. High effectiveness is achieved when a statistically valid relationship reflects a high degree of offset and correlation between the changes in the fair values of the derivative instrument and the hedged item. The determination of ineffectiveness is based on the amount of dollar offset between the change in fair value of the derivative instrument and the change in fair value of the hedged item at the end of the reporting period. If it is determined that a derivative is not highly effective as a hedge or hedge accounting is discontinued, any change in fair value of the derivative since the last date at which it was determined to be effective is recognized in earnings. In addition, the ineffective portion of our highly effective hedges is immediately recognized in earnings and reported in Other income (expense) in our consolidated statements of comprehensive income (loss).

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash flows from derivative instruments that are designated as fair value or cash flow hedges are classified in the same category as the cash flows from the underlying hedged items. In the event that hedge accounting is discontinued, cash flows subsequent to the date of discontinuance are classified within investing activities. Cash flows from derivative instruments not designated as hedging instruments are classified as investing activities.

We consider the classification of the underlying hedged item's cash flows in determining the classification for the designated derivative instrument's cash flows. We classify derivative instrument cash flows from hedges of benchmark interest rate or hedges of fuel expense as operating activities due to the nature of the hedged item. Likewise, we classify derivative instrument cash flows from hedges of foreign currency risk on our newbuild ship payments as investing activities and derivative instrument cash flows from hedges of foreign currency risk on debt payments as financing activities.

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates to our long-term debt obligations including future interest payments. At December 31, 2014, approximately 28.5% of our long-term debt was effectively fixed as compared to 34.6% as of December 31, 2013. We use interest rate swap agreements to modify our exposure to interest rate movements and to manage our interest expense.

Market risk associated with our long-term fixed rate debt is the potential increase in fair value resulting from a decrease in interest rates. We use interest rate swap agreements that effectively convert a portion of our fixed-rate debt to a floating-rate basis to manage this risk. At December 31, 2014 and 2013, we maintained interest rate swap agreements on the \$420.0 million fixed rate portion of our Oasis of the Seas unsecured amortizing term loan and on the \$650.0 million unsecured senior notes due 2022. The interest rate swap agreements on Oasis of the Seas debt effectively changed the interest rate on the balance of the unsecured term loan, which was \$245.0 million as of December 31, 2014, from a fixed rate of 5.41% to a LIBOR-based floating rate equal to LIBOR plus 3.87%, currently approximately 4.20%. The interest rate swap agreements on the \$650.0 million unsecured senior notes effectively changed the interest rate of the unsecured senior notes from a fixed rate of 5.25% to a LIBOR-based floating rate equal to LIBOR plus 3.63%, currently approximately 3.86%. These interest rate swap agreements are accounted for as fair value hedges.

Market risk associated with our long-term floating rate debt is the potential increase in interest expense from an increase in interest rates. We use interest rate swap agreements that effectively convert a portion of our floating-rate debt to a fixed-rate basis to manage this risk. At December 31, 2014 and 2013, we maintained forward-starting interest rate swap agreements that hedge the anticipated unsecured amortizing term loans that will finance our purchase of Anthem of the Seas. Forward-starting interest rate swaps hedging the Anthem of the Seas loan will effectively convert the interest rate for \$725.0 million of the anticipated loan balance from LIBOR plus 1.30% to a fixed rate of 3.86% (inclusive of margin) beginning in April 2015. These interest rate swap agreements are accounted for as cash flow hedges.

In addition, at December 31, 2014 and December 31, 2013, we maintained interest rate swap agreements on our Celebrity Reflection term loan. Our interest rate swap agreements effectively converted the interest rate on a portion of the Celebrity Reflection unsecured amortizing term loan balance of approximately \$545.4 million from LIBOR plus 0.40% to a fixed rate (including applicable margin) of 2.85% through the term of the loan. Furthermore, at December 31, 2014, we maintained interest rate swap agreements on our Quantum of the Seas term loan. Our interest rate swap agreements effectively converted the interest rate on a portion of the Quantum of the Seas unsecured amortizing term loan balance of approximately \$735.0 million from LIBOR plus 1.30% to a fixed rate of 3.74% (inclusive of margin) through the term of the loan. These interest rate swap agreements are accounted for as cash flow hedges.

The notional amount of interest rate swap agreements related to outstanding debt and on our current unfunded financing arrangements as of December 31, 2014 and 2013 was \$2.9 billion and \$3.0 billion, respectively.

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Foreign Currency Exchange Rate Risk

Derivative Instruments

Our primary exposure to foreign currency exchange rate risk relates to our ship construction contracts denominated in Euros, our foreign currency denominated debt and our international business operations. We enter into foreign currency forward contracts, collar options and cross currency swap agreements to manage portions of the exposure to movements in foreign currency exchange rates. As of December 31, 2014, the aggregate cost of our ships on order was approximately \$5.0 billion, of which we had deposited \$394.4 million as of such date. Approximately 28.8% and 36.3% of the aggregate cost of the ships under construction was exposed to fluctuations in the Euro exchange rate at December 31, 2014 and 2013, respectively. The majority of our foreign currency forward contracts, collar options and cross currency swap agreements are accounted for as cash flow, fair value or net investment hedges depending on the designation of the related hedge.

During 2013, we entered into foreign currency forward contracts to hedge €365.0 million of our €745.0 million 5.625% unsecured senior notes due January 2014. These foreign currency forward contracts were accounted for as cash flow hedges and matured January 2014.

On a regular basis, we enter into foreign currency forward contracts and, from time to time, we utilize cross-currency swap agreements to minimize the volatility resulting from the remeasurement of net monetary assets and liabilities denominated in a currency other than our functional currency or the functional currencies of our foreign subsidiaries. During 2014, we maintained an average of approximately \$474.0 million of these foreign currency forward contracts. These instruments are not designated as hedging instruments. In 2014, 2013 and 2012 changes in the fair value of the foreign currency forward contracts were (losses) gains of approximately \$(48.6) million, \$(19.3) million and \$7.7 million, respectively, which offset gains (losses) arising from the remeasurement of monetary assets and liabilities denominated in foreign currencies in those same years of \$49.5 million, \$13.4 million and \$(11.8) million, respectively. These changes were recognized in earnings within Other income (expense) in our consolidated statements of comprehensive income (loss).

We consider our investments in our foreign operations to be denominated in relatively stable currencies and of a long-term nature. In January 2014, we entered into foreign currency forward contracts and designated them as hedges of a portion of our net investments in Pullmantur and TUI Cruises of €415.6 million, or approximately \$502.9 million, based on the exchange rate at December 31, 2014. These forward currency contracts mature in April 2016.

The notional amount of outstanding foreign exchange contracts, including our forward contracts and collar options, as of December 31, 2014 and 2013 was \$3.0 billion and \$2.5 billion, respectively.

Non-Derivative Instruments

We also address the exposure of our investments in foreign operations by denominating a portion of our debt in our subsidiaries' and investments' functional currencies and designating it as a hedge of these subsidiaries and investments. We designated debt as a hedge of our net investments in Pullmantur and TUI Cruises of approximately €139.4 million and €544.9 million, or approximately \$168.7 million and \$750.8 million, through December 31, 2014 and 2013, respectively.

Fuel Price Risk

Our exposure to market risk for changes in fuel prices relates primarily to the consumption of fuel on our ships. We use fuel swap agreements and fuel call options to mitigate the financial impact of fluctuations in fuel prices.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our fuel swap agreements are accounted for as cash flow hedges. At December 31, 2014, we have hedged the variability in future cash flows for certain forecasted fuel transactions occurring through 2018. As of December 31, 2014 and 2013, we had the following outstanding fuel swap agreements:

	Fuel Swap Agreements		
	As of December 31, 2014	As of December 31, 2013	
	(metric tons)		
2014	—	762,000	
2015	806,000	665,000	
2016	802,000	372,000	
2017	525,000	74,000	
2018	226,000	—	
	Fuel Swap Agreements		
	As of December 31, 2014	As of December 31, 2013	
	(% hedged)		
Projected fuel purchases for year:			
2014	—	57	%
2015	58	% 45	%
2016	55	% 25	%
2017	35	% 5	%
2018	15	% —	%

At December 31, 2014 and 2013, \$(223.1) million and \$9.5 million, respectively, of estimated unrealized net (loss) gain associated with our cash flow hedges pertaining to fuel swap agreements were expected to be reclassified to earnings from Accumulated other comprehensive (loss) income within the next twelve months. Reclassification is expected to occur as the result of fuel consumption associated with our hedged forecasted fuel purchases.

Credit Related Contingent Features

Our current interest rate derivative instruments may require us to post collateral if our Standard & Poor's and Moody's credit ratings remain below specified levels. Specifically, if on the fifth anniversary of entering into a derivative transaction or on any succeeding fifth-year anniversary our credit ratings for our senior unsecured debt were to be below BBB- by Standard & Poor's and Baa3 by Moody's, then each counterparty to such derivative transaction with whom we are in a net liability position that exceeds the applicable minimum call amount may demand that we post collateral in an amount equal to the net liability position. The amount of collateral required to be posted following such event will change each time our net liability position increases or decreases by more than the applicable minimum call amount. If our credit rating for our senior unsecured debt is subsequently equal to, or above BBB- by Standard & Poor's or Baa3 by Moody's, then any collateral posted at such time will be released to us and we will no longer be required to post collateral unless we meet the collateral trigger requirement at the next fifth-year anniversary. Currently, our senior unsecured debt credit rating is BB with a positive outlook by Standard & Poor's and Ba1 with a stable outlook by Moody's. We currently have five interest rate derivative hedges that have a term of at least five years. The aggregate fair values of all derivative instruments with such credit-related contingent features in net liability positions as of December 31, 2014 and December 31, 2013 were \$65.8 million and \$66.9 million, respectively, which do not include the impact of any such derivatives in net asset positions. The earliest that any of the five interest rate derivative hedges will reach their fifth anniversary is November 2016. Therefore, as of December 31, 2014, we were not required to post collateral for any of our derivative transactions.

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 15. Commitments and Contingencies

Capital Expenditures

Our future capital commitments consist primarily of new ship orders. As of December 31, 2014, we had two Quantum-class ships and two Oasis-class ships on order for our Royal Caribbean International brand with an aggregate capacity of approximately 19,200 berths.

In February 2015, we reached conditional agreements with STX France to build two ships of a new generation of Celebrity Cruises ships, known as "Project Edge." The agreement is subject to certain conditions to effectiveness expected to occur in the second quarter of 2015. The ships will each have a capacity of approximately 2,900 berths and are expected to enter service in the second half of 2018 and the first half of 2020.

During 2014, our conditional agreement with STX France to build the fourth Oasis-class ship for Royal Caribbean International became effective. We received commitments for the unsecured financing of the ship for up to 80% of the ship's contract price through a facility to be guaranteed 100% by COFACE, the official export credit agency of France. The ship will have a capacity of approximately 5,450 berths and is expected to enter service in the second quarter of 2018. In January 2015, we entered into a credit agreement for the US dollar financing of the fourth Oasis-class ship. The credit agreement makes available to us an unsecured term loan in an amount up to the US Dollar equivalent of €931.2 million, or approximately \$1.1 billion, based on the exchange rate as of the transaction date. The loan amortizes semi-annually and will mature 12 years following delivery of the ship. At our election, prior to the ship delivery, interest on the loan will accrue either (1) at a fixed rate of 3.82% (inclusive of the applicable margin) or (2) at a floating rate equal to LIBOR plus 1.10%.

In 2014, we entered into a credit agreement for the US dollar financing of a portion of the third Oasis-class ship. The credit agreement makes available to us an unsecured term loan in an amount up to the US dollar equivalent of €178.4 million, or approximately \$215.9 million, based on the exchange rate at December 31, 2014. The loan amortizes semi-annually and will mature 12 years following delivery of the ship. At our election, prior to the ship delivery, interest on the loan will accrue either (1) at a fixed rate of 2.53% (inclusive of the applicable margin) or (2) at a floating rate equal to LIBOR plus 1.20%. In connection with this credit agreement, we amended the €892.2 million credit agreement, originally entered into in 2013 to finance the ship, reducing the maximum facility amount to approximately €713.8 million. Both of the facilities are 100% guaranteed by COFACE.

As of December 31, 2014, the aggregate cost of our ships on order, not including those subject to closing conditions, was approximately \$5.0 billion, of which we had deposited \$394.4 million as of such date. Approximately 28.8% of the aggregate cost was exposed to fluctuations in the Euro exchange rate at December 31, 2014. (See Note 14. Fair Value Measurements and Derivative Instruments).

Litigation

A class action complaint was filed in June 2011 against Royal Caribbean Cruises Ltd. in the United States District Court for the Southern District of Florida on behalf of a purported class of stateroom attendants employed onboard Royal Caribbean International cruise vessels. The complaint alleged that the stateroom attendants were required to pay other crew members to help with their duties and that certain stateroom attendants were required to work back of house assignments without the ability to earn gratuities, in each case in violation of the U.S. Seaman's Wage Act. In May 2012, the district court granted our motion to dismiss the complaint on the basis that the applicable collective bargaining agreement requires any such claims to be arbitrated. The United States Court of Appeals, 11th Circuit, affirmed the district court's dismissal and denied the plaintiffs' petition for re-hearing and re-hearing en banc. In October 2014, the United States Supreme Court denied the plaintiffs' request to review the order compelling arbitration. Subsequently, approximately 575 crew members submitted demands for arbitration. The demands make substantially the same allegations as in the federal court complaint and are similarly seeking damages, wage penalties and interest in an indeterminate amount. Unlike the federal court complaint, the demands for arbitration are being brought individually by each of the crew members and not on behalf of a purported class of stateroom attendants. At

this time, we are unable

F-39

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

to estimate the possible impact of this matter on us. However, we believe the underlying claims made against us are without merit, and we intend to vigorously defend ourselves against them.

We are routinely involved in other claims typical within the cruise vacation industry. The majority of these claims are covered by insurance. We believe the outcome of such claims, net of expected insurance recoveries, will not have a material adverse impact on our financial condition or results of operations and cash flows.

Operating Leases

In July 2002, we entered into an operating lease denominated in British pound sterling for the Brilliance of the Seas. In December 2014, we terminated the leasing of Brilliance of the Seas and, as part of the agreement, purchased the ship for a net settlement purchase price of approximately £175.4 million or \$275.4 million. Refer to Note 5. Property and Equipment for further discussion on the transaction. Prior to the purchase, the lease payments varied based on sterling LIBOR and were included in Other operating expenses in our consolidated statements of comprehensive income (loss). Brilliance of the Seas lease expense amounts were approximately £11.7 million, £12.3 million and £14.6 million, or approximately \$19.3 million, \$19.1 million and \$23.3 million for the years ended December 31, 2014, 2013 and 2012, respectively.

We are obligated under other noncancelable operating leases primarily for offices, warehouses and motor vehicles. As of December 31, 2014, future minimum lease payments under noncancelable operating leases were as follows (in thousands):

Year	
2015	\$18,154
2016	16,279
2017	12,471
2018	9,919
2019	7,699
Thereafter	124,997
	\$189,519

Total expense for all operating leases amounted to \$52.0 million, \$57.5 million and \$61.6 million for the years 2014, 2013 and 2012, respectively.

Other

Some of the contracts that we enter into include indemnification provisions that obligate us to make payments to the counterparty if certain events occur. These contingencies generally relate to changes in taxes, increased lender capital costs and other similar costs. The indemnification clauses are often standard contractual terms and are entered into in the normal course of business. There are no stated or notional amounts included in the indemnification clauses and we are not able to estimate the maximum potential amount of future payments, if any, under these indemnification clauses. We have not been required to make any payments under such indemnification clauses in the past and, under current circumstances, we do not believe an indemnification in any material amount is probable.

If (i) any person other than A. Wilhelmsen AS. and Cruise Associates and their respective affiliates (the "Applicable Group") acquires ownership of more than 33% of our common stock and the Applicable Group owns less of our common stock than such person, or (ii) subject to certain exceptions, during any 24-month period, a majority of the Board is no longer comprised of individuals who were members of the Board on the first day of such period, we may be obligated to prepay indebtedness outstanding under the majority of our credit facilities, which we may be unable to replace on similar terms. Certain of our outstanding debt securities also contain change of control provisions that would be triggered by the acquisition of greater than 50% of our common stock by a person other than a member of

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the Applicable Group coupled with a ratings downgrade. If this were to occur, it would have an adverse impact on our liquidity and operations.

At December 31, 2014, we have future commitments to pay for our usage of certain port facilities, marine consumables, services and maintenance contracts as follows (in thousands):

Year	
2015	\$214,817
2016	149,336
2017	154,253
2018	82,010
2019	115,002
Thereafter	127,843
	\$843,261

Note 16. Restructuring and Related Impairment Charges

For the years ended December 31, 2014 and December 31, 2013, we incurred the following restructuring and related impairment charges in connection with our profitability initiatives (in thousands):

	2014	2013
Restructuring exit costs	\$4,318	\$23,432
Impairment charges	—	33,514
Restructuring and related impairment charges	\$4,318	\$56,946

The following are the profitability initiatives:

Consolidation of Global Sales, Marketing, General and Administrative Structure

One of our profitability initiatives relates to restructuring and consolidation of our global sales, marketing and general and administrative structure. Activities related to this initiative include the consolidation of most of our call centers located outside of the United States and the establishment of brand dedicated sales, marketing and revenue management teams in key priority markets. This resulted in the elimination of approximately 500 shore-side positions in 2013, primarily from our international markets, resulting in recognition of a liability for one-time termination benefits during the year ended December 31, 2013. Additionally, we incurred contract termination costs and other related costs consisting of legal and consulting fees to implement this initiative.

As a result of these actions, we incurred restructuring exit costs of \$1.1 million and \$18.2 million for the years ended December 31, 2014 and December 31, 2013, respectively, which are reported in Restructuring and related impairment charges in our consolidated statements of comprehensive income (loss). The costs incurred in 2014 are mainly related to discretionary bonus payments paid to persons whose positions were eliminated as part of our restructuring activities.

Table of Contents

ROYAL CARIBBEAN CRUISES LTD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table summarizes our restructuring exit costs related to the above initiative (in thousands):

	Beginning Balance January 1, 2013	Accruals	Payments	Beginning Balance January 1, 2014	Accruals	Payments	Ending Balance December 31, 2014	Cumulative Charges Incurred	Expected Additional Expenses to be Incurred
Termination benefits	\$—	\$9,638	\$1,323	\$8,315	\$917	\$8,926	\$306	\$10,555	\$—
Contract termination costs	—	4,142	4,016	126	(58)	68	—	4,084	—
Other related costs	—	4,379	2,982	1,397	234	1,334	297	4,613	—
Total	\$—	\$18,159	\$8,321	\$9,838	\$1,093	\$10,328	\$603	\$19,252	\$—

In connection with this initiative, we incurred approximately \$7.4 million of other costs during 2014 that primarily consisted of call center transition costs and accelerated depreciation on lease hold improvements and were classified within Marketing, selling and administrative expenses and Depreciation and amortization expenses, respectively, in our consolidated statements of comprehensive income (loss). We have completed the restructuring activities related to this initiative and we do not expect to incur any further restructuring exit or other additional costs.

Pullmantur Restructuring

Restructuring Exit Costs

In the fourth quarter of 2013, we moved forward with an initiative related to Pullmantur's focus on its cruise business and its expansion in Latin America. Activities related to this initiative include the sale of Pullmantur's non-core businesses. This resulted in the elimination of approximately 100 Pullmantur shore-side positions and recognition of a liability for one-time termination benefits during the fourth quarter of 2013. In the second quarter of 2014, we elected not to execute the dismissal of approximately 30 of the positions which resulted in a partial reversal of the liability. Additionally, we incurred contract termination costs and other related costs consisting of legal and consulting fees to implement this initiative.

As a result of these actions, we incurred restructuring exit costs of \$3.2 million and \$5.3 million for the year ended December 31, 2014 and December 31, 2013, respectively, which are reported in Restructuring and related impairment charges in our consolidated statements of comprehensive income (loss).

The following table summarizes our restructuring exit costs related to the above initiative (in thousands):

	Beginning Balance January 1, 2013	Accruals	Payments	Beginning Balance January 1, 2014	Accruals	Payments	Ending Balance December 31, 2014	Cumulative Charges Incurred	Expected Additional Expenses to be Incurred(2)
Termination benefits	\$—	\$3,910	\$—	\$3,910	\$3,084	\$4,879	\$2,115	\$6,994	\$—

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In connection with this initiative, we incurred approximately \$8.9 million of other costs during 2014, associated with placing operating management closer to the Latin American market that was classified within Marketing, selling and administrative expenses in our consolidated statements of comprehensive income (loss). We have completed the restructuring activities related to this initiative and we do not expect to incur any further restructuring exit or other additional costs.

Sale of Pullmantur Non-core Businesses

As part of our Pullmantur related initiatives, on March 31, 2014, Pullmantur sold the majority of its interest in its non-core businesses. These non-core businesses included Pullmantur's land-based tour operations, travel agency and 49% interest in its air business. In connection with the sale agreement, we retained a 19% interest in each of the non-core businesses as well as 100% ownership of the aircraft which are being dry leased to Pullmantur Air. Consistent with our Pullmantur two-month lag reporting period, we reported the impact of the sale in the second quarter of 2014. See Note 1. General for information on the basis on which we prepare our consolidated financial statements and Note 6. Other Assets for the accounting of our 19% retained interest.

The sale resulted in a gain of \$0.6 million recognized during the year ended December 31, 2014, inclusive of the release of cumulative translation adjustment losses, which is classified within Other operating expenses in our consolidated statements of comprehensive income (loss). As part of the sale, we agreed to maintain commercial and bank guarantees on behalf of the buyer for a maximum period of twelve months and extended a term loan facility to Nautalia due June 30, 2016. We recorded the fair value of the guarantees and a loss reserve for the loan amount drawn, offsetting the gain recognized by \$5.5 million. See Note 13. Changes in Accumulated Other Comprehensive Income (Loss) for further information on the release of the foreign currency translation losses.

The non-core businesses met the accounting criteria to be classified as held for sale during the fourth quarter of 2013 which resulted in restructuring related impairment charges of \$20.0 million in 2013 to adjust the carrying value of assets held for sale to their fair value, less cost to sell. As of December 31, 2013, assets and liabilities held for sale were not material to our consolidated balance sheet and no longer exist as of December 31, 2014. The businesses did not meet the criteria for discontinued operations reporting as a result of our significant continuing involvement.
