ALTEON ANNOUNCES RESIGNATION OF SENIOR VICE PRESIDENT ROBERT C. DEGROOF, PH.D.

PARSIPPANY, N.J., Aug. 12 /PRNewswire-FirstCall/ -- Alteon Inc. today announced the resignation of Robert C. deGroof, Ph.D., Senior Vice President of Scientific Affairs, effective September 9, 2004. Dr. deGroof joined Alteon in 1999 and has been responsible for overseeing the clinical development of Alteon's lead compound, alagebrium. He will continue his relationship with Alteon as a consultant.

## Edgar Filing: ALTEON INC /DE - Form 8-K

"We thank Bob for his important contributions to Alteon as a member of the management team, and look forward to working with him in his new role as a clinical consultant. During Bob's tenure at Alteon, we have completed several important clinical trials of alagebrium and have recently launched more definitive Phase 2 studies," said Kenneth I. Moch, President and CEO. "In addition, Bob has helped put in place a team of senior professionals with deep clinical and regulatory experience who will continue to lead our efforts in the development of alagebrium."

### About Alteon

Alteon is developing several new classes of drugs that reverse or slow down diseases of aging and complications of diabetes. These compounds have an impact on a fundamental pathological process caused by protein-glucose complexes called Advanced Glycation End-products (A.G.E.s). The formation and crosslinking of A.G.E.s lead to a loss of flexibility and function in body tissues, organs and vessels and have been shown to be a causative factor in many age-related diseases and diabetic complications. Alteon has created a library of novel classes of compounds targeting the A.G.E. Pathway. Alteon's lead compound alagebrium chloride (formerly ALT-711), the only A.G.E. Crosslink Breaker in advanced human testing, has demonstrated safety and efficacy in several Phase 2 trials and is actively being developed for systolic hypertension and heart failure. Ongoing clinical trials include SPECTRA (Systolic Pressure Efficacy and Safety Trial of Alagebrium) and PEDESTAL (Patients with Impaired Ejection Fraction and Diastolic Dysfunction: Efficacy and Safety Trial of ALagebrium). For more information on Alteon, visit the company's website at <http://www.alteon.com>.

Any statements contained in this press release that relate to future plans, events or performance are forward-looking statements that involve risks and uncertainties including, but not limited to, those relating to technology and product development (including the possibility that early clinical trial results may not be predictive of results that will be obtained in large-scale testing or that any clinical trials will not demonstrate sufficient safety and efficacy to obtain requisite approvals or will not result in marketable products), regulatory approval processes, intellectual property rights and litigation, competitive products, ability to obtain financing, and other risks identified in Alteon's filings with the Securities and Exchange Commission. The information contained in this press release is accurate as of the date indicated. Actual results, events or performance may differ materially. Alteon undertakes no obligation to publicly release the result of any revision to these forward-looking statements that may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.
