This document contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements include estimates and give our current expectations or forecasts of future events. They are based on our historical operating trends, our existing commodity hedging position and our current estimate of proved reserves. Although we believe our forward-looking statements are reasonable, they can be affected by inaccurate assumptions or by known or unknown risks and uncertainties. For example, statements concerning the fair values of derivative contracts and their estimated contribution to our future results of operations are based upon market information as of a specific date. These market prices are subject to significant volatility. Factors that could cause actual operating and financial results to differ materially from expected results include the volatility of oil and gas prices, our substantial indebtedness, our commodity price risk management activities, the cost and availability of drilling and production services, our ability to replace reserves, the availability of capital, uncertainties inherent in evaluating our own reserves and the reserves we acquire, drilling and operating risks and other risk factors described in the company's 2001 annual report on Form 10-K and subsequent filings with the Securities and Exchange Commission.

ITEM 9. REGULATION FD DISCLOSURE

The following was included in the Press Release:

Aubrey K. McClendon, Chairman and Chief Executive Officer, commented, "We are extremely pleased with the results of the shareholder vote and our acquisition of Canaan. We believe Canaan assets fit perfectly with Chesapeake's business strategy of creating value by acquiring and developing low-cost, long-lived natural gas assets in the Mid-Continent region of the U.S. With the estimated 100 billion cubic feet of natural gas equivalent of proved reserves acquired in this transaction and the success of our drilling program during the first half of 2002, we believe Chesapeake's proved reserves have increased to more than two trillion cubic feet of natural gas equivalent, one of the largest inventories of onshore natural gas among independent producers."
