1. ACCOUNTING POLICIES

In the opinion of Titan International, Inc. (Titan or the Company), the accompanying unaudited consolidated condensed financial statements contain all adjustments, which are normal and recurring in nature and necessary to present fairly the Company's financial position as of June 30, 2009, the results of operations for the three and six months ended June 30, 2009 and 2008, and cash flows for the six months ended June 30, 2009 and 2008.

Accounting policies have continued without significant change and are described in the Description of Business and Significant Accounting Policies contained in the Company's 2008 Annual Report on Form 10-K. These interim financial statements have been prepared pursuant to the Securities and Exchange Commission's rules for Form 10-Q's and, therefore, certain information and footnote disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's 2008 Annual Report on Form 10-K. Certain amounts from prior periods have been reclassified to conform to the current period financial presentation.

Stock split

In June 2008, Titan's Board of Directors approved a five-for-four stock split with a record date of July 31, 2008, and a payable date of August 15, 2008. The Company gave five shares for every four shares held as of the record date. Stockholders received one additional share for every four shares owned as of the record date and received cash in lieu of fractional shares. All share and per share data, except shares authorized, have been adjusted to reflect the effect of the stock split for all periods presented.

Fair value of financial instruments

The Company records all financial instruments, including cash and cash equivalents, accounts receivable, notes receivable, accounts payable, other accruals and notes payable at cost, which approximates fair value. Investments in marketable equity securities are recorded at fair value. The senior unsecured notes are the only significant financial instrument of the Company with a fair value different from the recorded value. At June 30, 2009, the fair value of the senior unsecured notes, based on market prices obtained through independent pricing sources, was approximately \$174.7 million, compared to a carrying value of \$193.8 million.

The Company declared cash dividends of \$.005 and \$.010 per share of common stock for the three and six months ended June 30, 2009, and \$.004 and \$.008 per share for the three and six months ended June 30, 2008, respectively. The second quarter 2009 cash dividend of \$.005 per share of common stock was paid July 15, 2009, to stockholders of record on June 30, 2009.

Investment in Titan Europe Plc consisted of the following (in thousands):

	June 30, 2009	December 31, 2008
Investment in Titan Europe Plc	\$ 6,505	\$ 2,649

Titan Europe Plc is publicly traded on the AIM market in London, England. During the first quarter of 2009, the Company purchased \$2.4 million of additional shares in Titan Europe Plc, thereby increasing its investment from 17.2% to a 22.9% ownership percentage. The Company has considered the applicable guidance in APB 18, "The Equity Method of Accounting for Investments in Common Stock," and FIN 35, "Criteria for Applying the Equity Method of Accounting for Investments in Common Stock," and has concluded that the Company's investment in Titan Europe Plc should continue to be accounted for as an available-for-sale security and recorded at fair value in accordance with FAS 115, "Accounting for Certain Investments in Debt and Equity Securities." The Company has determined that the equity method of accounting for this investment is not appropriate after considering all of the facts and circumstances relating to the investment. In particular, the Company has concluded that its inability to obtain the needed quarterly financial information from Titan Europe Plc is an indication that the Company does not have the ability to exercise significant influence over the financial and operating policies of this investee. The investment in Titan Europe Plc is included as a component of other assets on the Consolidated Condensed Balance Sheets. The increased value in the Titan Europe Plc investment at June 30, 2009, was due to a higher publicly quoted Titan Europe Plc market price and additional purchased shares.

17. FAIR VALUE MEASUREMENTS

The adoption of SFAS No. 157 for nonfinancial assets and nonfinancial liabilities, effective January 1, 2009, did not have a material impact on Titan's consolidated financial position, results of operations or cash flows.

SFAS No. 157 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers are defined as:

Level 1 – Quoted prices in active markets for identical instruments;

Level 2 – Inputs other than quoted prices in active markets that are either directly or indirectly observable.

Level 3 – Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and liabilities measured at fair value on a recurring basis consisted of the following (in thousands):

	Fair Value Measurements as of June 30, 2009

18. LITIGATION

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

19. RECENTLY ISSUED ACCOUNTING STANDARDS

Statement of Financial Accounting Standards Number 141 (revised 2007)

In January 2009, the Company adopted SFAS No. 141 (revised 2007), "Business Combinations." This statement requires an acquirer to recognize assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at their fair values on the acquisition date, with goodwill being the excess value over the net identifiable assets acquired. The adoption of SFAS No. 141 (revised 2007) had no material effect on the Company's financial position, results of operations or cash flows.

FASB Staff Position No. FAS 107-1 and APB 28-1

In April 2009, FASB Staff Position (FSP) No. FAS 107-1 and APB 28-1, "Interim Disclosures about Fair Value of Financial Instruments," was issued. This FSP amends FASB Statement No. 107, "Disclosures about Fair Value of Financial Instruments," to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends APB Opinion No. 28, "Interim Financial Reporting," to require disclosures in summarized financial information at interim reporting periods. This FSP was effective for interim reporting periods ending after June 15, 2009. The adoption of this FSP had no material effect on the Company's financial position, results of operations or cash flows.

FASB Staff Position No. FAS 115-2 and FAS 124-2

In April 2009, FSP No. FAS 115-2 and FAS 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments," was issued. This FSP amends the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This FSP was effective for interim reporting periods ending after June 15, 2009. The adoption of this FSP had no material effect on the Company's financial position, results of operations or cash flows.

Statement of Financial Accounting Standards Number 165

In June 2009, the Company adopted SFAS No. 165, "Subsequent Events." The objective of this statement was to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. This statement was effective for interim periods ending after June 15, 2009. The adoption of this standard had no material effect on the Company's financial position, results of operations or cash flows.

Statement of Financial Accounting Standards Number 168

In June 2009, SFAS No. 168, "The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles," was issued. This Statement establishes the FASB Accounting Standards Codification, ("Codification") as the single source of authoritative GAAP to be applied by nongovernmental entities, except for the rules and interpretive releases of the SEC under authority of federal securities laws, which are sources of authoritative GAAP for SEC registrants. This Statement is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of this standard is expected to have no material effect on the Company's financial position, results of operations or cash flows.

Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

Agricultural Market: Titan's agricultural rims, wheels and tires are manufactured for use on various agricultural and forestry equipment, including tractors, combines, skidders, plows, planters and irrigation equipment, and are sold directly to OEMs and to the aftermarket through independent distributors, equipment dealers and Titan's own distribution centers.

Earthmoving/Construction Market: The Company manufactures rims, wheels and tires for various types of off-the-road (OTR) earthmoving, mining, military and construction equipment, including skid steers, aerial lifts, cranes, graders and levelers, scrapers, self-propelled shovel loaders, articulated dump trucks, load transporters, haul trucks and backhoe loaders. The earthmoving/construction market is often referred to as OTR, an acronym for off-the-road.

Consumer Market: Titan builds select products for all-terrain vehicles (ATV), turf, golf and trailer applications. Titan's sales in the consumer market include sales to Goodyear, which are under an off-take/mixing agreement. This agreement includes mixed stock, which is a prepared rubber compound used in tire production. The Company provides wheels/tires and assembles brakes, actuators and components for the domestic boat, recreational and utility trailer markets.

The Company's major OEM customers include large manufacturers of off-highway equipment such as AGCO Corporation, Caterpillar Inc., CNH Global N.V., Deere & Company and Kubota Corporation, in addition to many other off-highway equipment manufacturers. The Company distributes products to OEMs, independent and OEM-affiliated dealers, and through a network of distribution facilities.

The following operating results were primarily related to the lower sales levels. The Company's income from operations was \$12.9 million for the second quarter of 2009, compared to \$24.4 million in 2008. Net income was \$5.9 million for the quarter, compared to \$13.3 million in 2008. Basic earnings per share were \$.17 in 2009, compared to \$.39 in 2008.

CRITICAL ACCOUNTING ESTIMATES

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The Company's application of these policies involves assumptions that require difficult subjective judgments regarding many factors, which, in and of themselves, could materially impact the financial statements and disclosures. A future change in the estimates, assumptions or judgments applied in determining the following matters, among others, could have a material impact on future financial statements and disclosures.

Inventories

Inventories are valued at lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method for approximately 75% of inventories and the last-in, first-out (LIFO) method for approximately 25% of inventories. The major rubber material inventory and related work-in-process and their finished goods are accounted for under the FIFO method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory, as well as inventory carried above market price based on historical experience. Should experience change, adjustments to estimated provisions would be necessary.

Impairment of Goodwill

The Company reviews goodwill to assess recoverability from future operations during the fourth quarter of each annual reporting period, and whenever events and circumstances indicate that the carrying values may not be recoverable. The Company had goodwill of \$11.7 million at June 30, 2009. Significant assumptions relating to future operations must be made when estimating future cash flows in analyzing goodwill for impairment. Should unforeseen events occur or operating trends change significantly, impairment losses could occur.

Income taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and liabilities. The Company assesses the realizability of its deferred tax asset positions in accordance with SFAS No. 109, "Accounting for Income Taxes." The Company recognizes and measures uncertain tax positions in accordance with FIN 48, "Accounting for Uncertainty in Income Taxes."

Retirement Benefit Obligations

Pension benefit obligations are based on various assumptions used by third-party actuaries in calculating these amounts. These assumptions include discount rates, expected return on plan assets, mortality rates and other factors. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and obligations. The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. Titan expects to contribute approximately \$0.1 million to these frozen defined pension plans during the remainder of 2009. For more information concerning these costs and obligations, see the discussion of the "Pensions" and Note 21 to the Company's financial statements on Form 10-K for the fiscal year ended December 31, 2008.

The Company's recorded liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined by the Company with the assistance of outside actuaries. Assumptions are based on past experience and anticipated future trends. These assumptions are reviewed on a regular basis and revised when appropriate. Revisions in assumptions

and actual results that differ from the assumptions affect future expenses, cash funding requirements and the carrying value of the related obligations. Titan expects to contribute approximately \$0.1 million to these frozen defined pension plans during the remainder of 2009.

Depreciation and amortization	16,289	14,392	1,897
Deferred income tax provision	0	7,379	(7,379)
Accounts receivable	21,808	(41,044)	62,852

Other operating activities	7,904	3,909	3,995
Cash provided by operating activities	\$22,020	\$43,024	\$(21,004)

In the first six months of 2009, operating activities provided cash of \$22.0 million. This cash was primarily provided by net income of \$13.0 million and a lower accounts receivable balance of \$21.8 million due to a decrease in sales. Included in net income were noncash charges of \$16.3 million of depreciation and amortization. Positive cash flows were offset by a decrease in the accounts payable balance of \$34.2 million due to reduced purchases resulting from the lower sales levels.

In the first six months of 2008, operating activities provided cash of \$43.0 million. This cash was primarily provided by net income of \$21.4 million and a higher accounts payable balance of \$27.0 million due to elevated expenses. Included in net income were noncash charges of \$14.4 million of depreciation and amortization and a \$7.4 million deferred income tax provision. Positive cash flows were offset by an increase in the accounts receivable balance of \$41.0 million due to record sales levels.

Operating cash flows decreased \$21.0 million when comparing the six months ended June 30, 2009, to the six months ended June 30, 2008. The net income in the first six months of 2009 was an \$8.5 million decrease from the first six months of 2008. When comparing the first six months of 2009 to the first six months of 2008, cash flows from accounts receivable increased by \$62.9 million and cash flows from accounts payable decreased \$61.2 million. These large changes are the result of increased sales in the first six months of 2008 with corresponding increases in accounts receivable and accounts payable, while the first six months of 2009 were a period of decreased sales with corresponding decreases in accounts receivable and accounts payable. When comparing the first six months of 2009 to the first six months of 2008, cash flows from inventories decreased by \$12.7 million primarily due to inventory

reductions in 2008 given the Company's record sales levels in that period.

Debt Covenants

The Company's revolving credit facility contains various covenants and restrictions. The financial covenants in this agreement require that:

- Collateral coverage be equal to or greater than 1.2 times the outstanding revolver balance.
- If the 30-day average of the outstanding revolver balance exceeds \$125 million, the fixed charge coverage ratio be equal to or greater than a 1.0 to 1.0 ratio.

Restrictions include:

- Limits on payments of dividends and repurchases of the Company's stock.
- Restrictions on the ability of the Company to make additional borrowings, or to consolidate, merge or otherwise fundamentally change the ownership of the Company.
- Limitations on investments, dispositions of assets and guarantees of indebtedness.
- Other customary affirmative and negative covenants.

These covenants and restrictions could limit the Company's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure by Titan to meet these covenants could result in the Company ultimately being in default on these loan agreements.

The Company is in compliance with these covenants and restrictions as of June 30, 2009. The collateral coverage was calculated to be approximately 82 times the outstanding revolver balance at June 30, 2009.

The fixed charge coverage ratio did not apply for the quarter ended June 30, 2009. The credit facility usage was \$5.0 million at June 30, 2009, consisting exclusively of letters of credit of \$5.0 million with no cash borrowings.

Other Issues

The Company's business is subject to seasonal variations in sales that affect inventory levels and accounts receivable balances. Historically, Titan tends to experience higher sales demand in the first and second quarters.

Liquidity Outlook

At June 30, 2009, the Company had \$20.7 million of cash and cash equivalents and \$145.0 million of unused availability under the terms of its credit facility. The availability under the Company's \$150 million credit facility was reduced by \$5.0 million for letters of credit.

The Company estimates that current commitments related to the Giant OTR Project at this time are approximately \$105 million, of which approximately \$103 million was disbursed from inception of the Giant OTR Project through June 30, 2009. Additional capital expenditure commitments may be incurred through 2009 as the Giant OTR Project moves to completion. The final cost of these additional OTR capital items have not been finalized at this time.

The Company currently anticipates that cash on hand and anticipated internal cash flows from operations will allow the Company sufficient funds for completion of the Giant OTR Project. In addition to the Giant OTR Project, Titan estimates approximately \$6 million of capital expenditures for other projects for the remainder of the 2009 year.

Cash on hand, anticipated internal cash flows from operations and utilization of remaining available borrowings are expected to provide sufficient liquidity for working capital needs and capital expenditures. If the Company were to exhaust all currently available working capital sources or not meet the financial covenants and conditions of its loan agreements, the Company's ability to secure additional funding may be negatively impacted.

MARKET CONDITIONS AND OUTLOOK

In the first half of 2009, Titan experienced market decline across the board. The magnitude and duration of this worldwide recession and economic crisis makes it extremely difficult to forecast future sales levels. Titan expects to continue to experience sales declines in each of the Company's markets for the remainder of 2009.

Energy, raw material and petroleum-based product costs have been exceptionally volatile and may negatively impact the Company's margins. Many of Titan's overhead expenses are fixed; therefore, lower seasonal trends may cause negative fluctuations in quarterly profit margins and affect the financial condition of the Company.

AGRICULTURAL MARKET OUTLOOK

Agricultural market sales are forecasted to be lower in the second half of 2009 when compared to the record sales levels in 2008. Commodity prices have declined from last year's highs, but remain above the long-term average. The gradual increase in the use of biofuels may help sustain future production. However, the magnitude and duration of the worldwide economic crisis makes it extremely difficult to forecast future sales levels. Many variables, including weather, grain prices, export markets and future government policies and payments can greatly influence the overall health of the agricultural economy. For the remainder of 2009, the Company expects challenging conditions for the agricultural market.

EARTHMOVING/CONSTRUCTION MARKET OUTLOOK

Sales for the earthmoving/construction market are expected to be significantly lower in 2009 as a result of the worldwide economic crisis. The magnitude and duration of this crisis makes it extremely difficult to forecast future sales levels. Metals, oil and gas prices have retreated from last year's highs as a result of the economic crisis. In the long-term, these prices are expected to return to levels that are attractive for continued investment, which should help support future earthmoving and mining sales. However, many producers are currently delaying new investments which are affecting current year sales. The significant decline in the United States housing market continues to cause a major reduction in demand for equipment used for construction. The earthmoving/construction segment is affected by many variables, including commodity prices, road construction, infrastructure, government appropriations, housing starts and the current banking and credit crisis. For the remainder of 2009, the Company expects difficult conditions for the earthmoving/construction market.

CONSUMER MARKET OUTLOOK

Consumer discretionary spending has experienced a major contraction as a result of the worldwide recession, housing market decline, and high unemployment rates. Many of the Company's consumer market sales are ultimately used in items which fall into the discretionary spending category. There is no clear consensus among economists as to when consumer spending will rebound. Many factors continue to affect the consumer market including weather, competitive pricing, energy prices and consumer attitude. For the remainder of 2009, the Company expects continued weakness in consumer spending related to Titan's consumer market.

This FSP amends the other-than-temporary impairment guidance in U.S. GAAP for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. This FSP was effective for interim reporting periods ending after June 15, 2009. Statement of Financial Accounting Standards Number 165

In June 2009, the Company adopted SFAS No. 165, "Subsequent Events." The objective of this statement was to establish general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued. This statement was effective for interim periods ending after June 15, 2009. The adoption of this standard had no material effect on the Company's financial position, results of operations or cash flows.

Statement of Financial Accounting Standards Number 168

In June 2009, SFAS No. 168, "The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles," was issued. This Statement establishes the FASB Accounting Standards Codification, ("Codification") as the single source of authoritative GAAP to be applied by nongovernmental entities, except for the rules and interpretive releases of the SEC under authority of federal securities laws, which are sources of authoritative GAAP for SEC registrants. This Statement is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The adoption of this standard is expected to have no material effect on the Company's financial position, results of operations or cash flows.

Evaluation of Disclosure Controls and Procedures

The Company's principal executive officer and principal financial officer have concluded the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) are effective as of the end of the period covered by this Form 10-Q based on an evaluation of the effectiveness of disclosure controls and procedures.

Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements. Also, projections of any evaluations of the effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company is a party to routine legal proceedings arising out of the normal course of business. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.
