Evangelos J. Pistiolis, President and Chief Executive Officer of TOP Tankers Inc, commented, "As we discussed on the first quarter 2006 conference call, we brought forward our dry-docking schedule into the summer months, in order to take advantage of the anticipated slower charter market. However, the freight market so far has been exceptionally strong and our drydocks have lasted longer than expected, due mostly to significant delays in the Far Eastern shipyards. While TOP TANKERS REPORTS SECOND QUARTER 2006 FINANCIAL RESULTS Page 2-2-2

there remains a degree of uncertainty regarding the exact date of completion for specific vessels, we expect to be able to enjoy the benefit of our full fleet's availability throughout the winter period, which is traditionally the strongest period of the year."

Pistiolis continued, "During the second quarter, we sold 3,053,900 shares of

Edgar Filing: TOP TANKERS INC. - Form 6-K

common stock, in 'at-the-market' offerings at an average price of \$7.30 per share. Such sales, together with continuing positive cash flows from operations, further increased our cash position to more than \$90 million. In addition, our Board of Directors has approved our sale of up to an additional 5,000,000 shares under this program, out of which 453,900 shares were sold during the second quarter. Sales under this program may or may not take place depending on our assessment of the market and other circumstances."

The Company also stated that it has cooperated fully with the U.S. Securities and Exchange Commission related to its previously announced informal inquiry.

Our method of calculating TCE is consistent with industry standards and is determined by dividing net voyage revenue by voyage days for the relevant time period. Net voyage revenues are voyage revenues minus voyage expenses. Voyage expenses primarily consist of port, canal and fuel costs that are unique to a

particular voyage, which would otherwise be paid by the charterer under a time charter contract, as well as commissions.

3 EBITDA represents earnings before interest and finance costs, net, taxes, depreciation and amortization. Interest and finance costs, net include gain or loss from termination of swaps and swap fair value changes. EBITDA is included in this release because we believe it provides investors with an understanding of operating performance over comparative periods. EBITDA should not be considered as a substitute for income from operations, net income or cash flows from operating activities (all as determined in accordance with generally accepted accounting principles) for the purpose of analyzing our operating performance, financial position and cash flows, as EBITDA is not defined by generally accepted accounting principles. We presented EBITDA, however, because it is commonly used by certain investors and analysts to analyze and compare companies on the basis of operating performance and to determine a company's ability to service and/or incur debt.
