SMITH-MIDLAND CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

NOTE 1. – INTERIM FINANCIAL REPORTING

Basis of Presentation

The accompanying condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information, and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, we have condensed or omitted certain information and footnote disclosures that are included in our annual financial statements. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the related notes included in our Annual Report on Form 10-K for the year ended December 31, 2014. The December 31, 2014 balance sheet was derived from audited financial statements included in the Form 10-K.

In the opinion of management, these condensed consolidated financial statements reflect all adjustments (which consist of normal, recurring adjustments) necessary for a fair presentation of the financial position and results of operations and cash flows for the periods presented. The results disclosed in the condensed consolidated statements of operations are not necessarily indicative of the results to be expected in any future periods.

Reclassifications

Certain minor reclassifications have been made in prior year amounts to conform to the current year presentation.

Use of Estimates

The preparation of consolidated financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition

Smith-Midland Corporation (the "Company") primarily recognizes revenue on the sale of its standard precast concrete products at shipment date, including revenue derived from any projects to be completed under short-term contracts. Installation of the Company's standard products is typically performed by the customer; however, in some circumstances, the Company will install certain products which are accomplished at the time of delivery. The installation activities of smaller buildings are usually performed at the Company's site and shipped completed to the customers site. In larger utility building sales, the buildings are erected on the customers site within one or two days, depending on style and size.

Leasing fees are paid at the beginning of the lease agreement and recorded to a deferred revenue account. As the revenue is earned each month during the contract, the amount earned is recorded as lease income and an equivalent amount is debited to deferred revenue.

Royalties are recognized as a percent of sales of the licensed product sold by the licensee on a monthly basis. The Company licenses certain other precast companies to produce its licensed products to our engineering specifications under licensing agreements. The agreements are typically for five year terms and require royalty payments from 4%

to 6% which are paid on a monthly basis.

With respect to certain sales of Soundwall panels, architectural precast panels and Slenderwall™ precast panels, revenue is recognized using the percentage-of-completion method for recording revenues on long term contracts pursuant to ASC 605-35-25. The contracts are executed by both parties and clearly stipulate the requirements for progress payments and a schedule of delivery dates. Provisions for estimated losses on contracts are made in the period in which such losses are determined.

Shipping revenues are recognized in the period the shipping services are provided to the customer.

Smith-Midland products are typically sold pursuant to an implicit warranty as to merchantability only. Warranty claims are reviewed and resolved on a case by case method. Although the Company does incur costs for these types of expense, historically the amount of expense is immaterial.

Adjusting Entry

During the third quarter of 2015, the Company made an adjusting journal entry to record \$240,000 of accounts receivable and revenue which related to the prior year. The entry was recorded in the current period since the effects of the adjusting journal entry was immaterial to both the prior and current periods.

Cash and Cash Equivalents

Cash and cash equivalents includes money market accounts.

Investments

Investments in marketable securities are classified as available-for-sale and are stated at market value with unrealized holding gains and losses excluded from earnings and reported as a separate component of stockholders' equity until realized.

NOTE 2. – NET INCOME (LOSS) PER COMMON SHARE

Basic earnings per common share exclude all dilutive stock options and are computed using the weighted average number of common shares outstanding during the period. The diluted earnings per common share calculation reflect the potential dilutive effect of securities that could share in earnings of an entity. Outstanding options are excluded from the diluted earnings per share calculation where they would have an anti-dilutive effect. There were no excluded options for the three and nine months ended September 30, 2015 and 254,166 for the three and nine months ended September 30, 2014.

	Three Months Ended September 30,

Total weighted average shares outstanding	4,943,985	4,881,548
Diluted income (loss) per share	\$0.18	\$(0.04)

NOTE 3. – NOTES PAYABLE

The Company has a note payable to Summit Community Bank (the “Bank”), with a balance of \$1,635,987 as of September 30, 2015. The note has a term of approximately eight years and a fixed interest rate of 3.99% annually with monthly payments of \$25,642 and is secured by principally all of the assets of the Company. Under the terms of the note, the Bank will permit chattel mortgages on purchased equipment not to exceed \$250,000 for any one individual loan so long as the Company is not in default. Also, the Company is limited to \$1,000,000 for annual capital expenditures. At September 30, 2015, the Company was in compliance with all covenants pursuant to the loan agreement as amended.

The Company also has a \$2,000,000 line of credit, of which none was outstanding at September 30, 2015. The line is evidenced by a commercial revolving promissory note with the Bank, which carries a variable interest rate of prime and matures on September 12, 2016. In addition, the Company has a commitment from the Bank in the amount of \$1,000,000 for an equipment line of credit.

NOTE 3. – STOCK OPTIONS

In accordance with ASC 718, the Company had no stock option expense for the three and nine months ended September 30, 2015 and September 30, 2014. The Company uses the Black-Scholes option-pricing model to measure the fair value of stock options granted to employees. The Company did not issue any stock options for the three and nine months ended September 30, 2015 or for the three and nine months ended September 30, 2014.

The following table summarized options outstanding at September 30, 2015

	Number of Shares	Weighted Average Exercise Price
Balance, December 31, 2014	305,099	\$1.97
Granted	—	—
Forfeited	(81,166) 2.52
Exercised	(12,000) 1.76
Outstanding options at September 30, 2015	211,933	\$1.78
Outstanding exercisable options at September 30, 2015	211,933	\$1.78

The intrinsic value of outstanding and exercisable options at September 30, 2015 was approximately \$164,000.

NOTE 4. – SUBSEQUENT EVENTS

Through the date of the filing of this Form 10-Q, the Company has evaluated events and transactions occurring subsequent to September 30, 2015 and has determined that there have been no significant events or transactions that provide additional evidence about conditions of the Company that existed as of the balance sheet date.

ITEM 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report and related documents include “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act 1934. Forward-looking statements involve known and unknown risks, uncertainties and other factors which could cause the Company’s actual results, performance (financial or operating) or achievements expressed or implied by such forward looking statements not to occur or be realized. Such forward looking statements generally are based upon the Company’s best estimates of future results, performance or achievement, based upon current conditions and the most recent results of operations. Forward-looking statements may be identified by the use of forward-looking terminology such as “may,” “will,” “expect,” “believe,” “estimate,” “anticipate,” “continue,” or similar terms, variations of those terms or the negative of those terms. Potential risks and uncertainties include, among other things, such factors as:

- no assurance of profitable operations; in this respect, while the Company reported net income for the three and nine months ended September 30, 2015, it reported a net loss for the year ended December 31, 2014 and for the six months ended June 30, 2015,

- while our debt level is decreasing, the ability to satisfy the same cannot be assured,

- the continued availability of financing in the amounts, at the times, and on the terms required, to support our future business and capital projects,

- the extent to which we are successful in developing, acquiring, licensing or securing patents for proprietary products,

- changes in economic conditions specific to any one or more of our markets (including the availability of public funds and grants for construction),

- changes in general economic conditions in the Company’s primary service area which has been showing signs of improvement over the past six months,

- adverse weather, which inhibits the demand for our products,

- our compliance with governmental regulations,

- the outcome of future litigation, if any,

- on material construction projects, our ability to produce and install product that conforms to contract specifications and in a time frame that meets the contract requirements,

- the cyclical nature of the construction industry,

- our exposure to increased interest expense payments should interest rates change,

- the Company’s Board of Directors, which is composed of four members, has only one outside, independent director, and

- the other factors and information disclosed and discussed in other sections of this Report, and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

Investors and shareholders should carefully consider such risks, uncertainties and other information, disclosures and discussions which contain cautionary statements identifying important factors that could cause actual results to differ materially from those provided in the forward-looking statements. We undertake no obligation to publicly update or

revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Overview

The Company invents, develops, manufactures, markets, leases, licenses, sells, and installs a broad array of precast concrete products for use primarily in the construction, utilities and farming industries. The Company's customers are primarily general contractors and federal, state, and local transportation authorities located in the Mid-Atlantic, Northeastern, and Midwestern regions of the United States. The Company's operating strategy has involved producing innovative and proprietary products, including Slenderwall™, a patented, lightweight, energy efficient concrete and steel exterior insulated wall panel for use in building construction; J-J Hooks® Highway Safety Barrier, a positive-connected highway safety barrier; Sierra Wall, a sound barrier primarily for roadside use; and Easi-Set® transportable concrete buildings, also patented. In addition, the Company produces custom order precast concrete products with various architectural surfaces, as well as generic highway sound barriers, utility vaults, and farm products such as cattleguards and water and feed troughs.

The Company was incorporated in Delaware on August 2, 1994. Prior to a corporate reorganization completed in October 1994, the Company conducted its business primarily through Smith-Midland Virginia, which was incorporated in 1960 as Smith Cattleguard Company, a Virginia corporation, and which subsequently changed its name to Smith-Midland Corporation in 1985. The Company's principal offices are located at 5119 Catlett Road, Midland, Virginia 22728 and its telephone number is (540) 439-3266. As used in this report, unless the context otherwise requires, the term the "Company" refers to Smith-Midland Corporation and its subsidiaries.

The Company had a significant increase in net income for the three and nine months ended September 30, 2015. The net income for the three and nine months ended was \$1,152,056 and \$872,544, respectively, and the increase over prior 2015 quarters was due to increased sales in almost all product lines throughout the Company. The increase in sales and net income made this quarter one of the most profitable quarters in recent years. Production, not including special barrier rental revenue, has more than doubled over the first quarter of 2015 and should continue to improve into the fourth quarter of 2015, provided the weather in the fourth quarter is not too severe.

Concrete Safety Systems, our barrier rental subsidiary, was fortunate to be awarded the contract to supply barrier for the Papal visit to both Philadelphia, PA and Washington, DC in September 2015. While the project had a positive impact on our net income, the logistical efforts required for the barrier, equipment and manpower scheduling were enormous.

Results of Operations

Three and nine months ended September 30, 2015 compared to the three and nine months ended September 30, 2014

Revenue By Type

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2015	2014	Change	% of Change	2015	2014	Change	% of Change
Product Sales:

Wall Panel Sales - Wall sales are generally large contracts issued by general contractors for production and delivery of a specific wall panel for a specific construction project. Changes in the mix of wall sales depend on what contracts are being bid and what projects are in production during the period. Overall wall panel sales increased significantly during the three and nine months ended September 30, 2015, compared to the same period in 2014. The following describes the changes by product type:

Soundwall sales remained fairly constant during the three and nine month period ended September 30, 2015 when compared to the same period in 2014. With state highway departments beginning to have more highway funds during the periods, the Company has been able to keep soundwall production high during the last 12 months. In addition, the pricing has increased slightly during the last few quarters. Management expects that soundwall revenue should remain relatively strong during the remainder of the year and into 2016.

Architectural panel sales decreased slightly during the three month period ended September 30, 2015, compared to the same period in 2014. The decrease resulted from having two projects in production during the third quarter of 2014 with those projects ending in the fourth quarter of 2014. The Company began a large architectural project in the first quarter of 2015 that will be in production during the remainder of 2015, which resulted in a significant increase in sales during the first six months of the year, thereby increasing sales when comparing the nine month periods ending September 30, 2015 and 2014. While the construction economy has been trending up for the past 12 months, the volume of architectural projects continues to be less than that of other wall panel projects and also while not as competitive as last year, are still the most competitive bids.

Slenderwall panel sales increased dramatically during the three month period ended September 30, 2015 when compared to the same period in 2014. Two new Slenderwall projects started in the second quarter of 2015 which significantly added to Slenderwall revenues for the three months ended September 30, 2015, while very little was produced during the same period in 2014. The two new Slenderwall projects that started in the second quarter of 2015 resulted in increased revenue for the nine months ended September 30, 2015, when compared to the same period in 2014. Slenderwall sales should remain strong throughout 2015 and into the 2016.

During the third quarter of 2015, some of the miscellaneous products were reclassified from Miscellaneous Products to Miscellaneous Wall Panels as it was believed to be better classified under the latter product type. The reclassification was made to the 2014 products so a comparison could be made. Miscellaneous wall panels significantly increased for the three and nine month periods ended September 30, 2015 when compared to the same period in 2014. The Company was awarded four miscellaneous related projects in excess of \$1.5 million which were needed on a very tight schedule. Because of the fast production schedule, our earlier projection of the production span of these related projects into 2016 will be limited to the fourth quarter of 2015. The Company will begin another miscellaneous project in the fourth quarter of 2015 that will run through 2016 in the approximate amount of \$2.5 million.

Barrier Sales - Barrier sales decreased significantly during the three and nine months ended September 30, 2015 compared to the same periods in 2014. There were several large barrier orders produced in 2014 during the three and nine month periods. During the three and nine month periods ended September 30, 2015, we have received several medium size barrier orders which have not shipped as of yet, however, these orders are expected to ship in the fourth quarter of 2015 which should significantly increase barrier sales in the fourth quarter of 2015 over the fourth quarter of 2014.

Easi-Set® and Easi-Span® Building Sales - Building and restroom sales decreased 19% for the three months ended September 30, 2015, compared to the same period in 2014 and 37% for the nine months ended September 30, 2015 compared to the same period in 2014. The decrease in sales was mainly due to a contract with GSA which resulted in a greater quantity of sales in the three and nine month periods in 2014 than in same periods in 2015. Management believes that the Company may see a slight increase in building sales during the fourth quarter of 2015 over the fourth quarter of the prior year based on its current building backlog, but customer installation demands will control when final installation will be made.

Utility and Farm Product Sales - Utility and farm products sales increased significantly during the three and nine month periods ended September 30, 2015, compared to the same periods in 2014. The Company received a large order for manholes on a local highway project for which delivery began in the fourth quarter of 2014 and will continue

production through most of 2015. Utility products are tied closely with infrastructure spending by federal, state and local governments which seems to be improving.

Miscellaneous Product Sales - See reclassification note included in miscellaneous wall panels above. Miscellaneous products are products produced and sold that do not meet the criteria defined for other revenue categories.

Miscellaneous product sales increased slightly for the three months ended September 30, 2015, compared to the same period in 2014. These products decreased significantly for the nine months ended September 30, 2015, compared to the same period in 2014. The decrease for the nine months ended September 30, 2015 compared to the same period in 2014 resulted from a general decrease in in this product line. Management believes that miscellaneous sales will increase slightly during the fourth quarter of 2015 over the fourth quarter of the prior year.

Royalty Income - Royalty revenue increased by 23% for the three months ended September 30, 2015 compared to the same period in 2014. Royalty revenue increased by 6% for the nine months ended September 30, 2015 compared to the same period in 2014. All royalty revenues, including barrier revenue, building revenue, Slenderwall revenue and Softsound revenue were up during the three and nine months ended September 30, 2015 compared to the same periods in 2014. Management believes that royalties will continue to increase moderately over the remainder of 2015 as a result of the continuing improvement in the construction industry.

Barrier Rentals - Barrier rentals increased significantly for the three and nine month periods ended September 30, 2015 compared to the same periods in 2014. The increase resulted primarily from two large rental contracts awarded the Company for two short-term barrier rental projects in Washington DC and Philadelphia, PA for the month of September 30, 2015. These projects were related to the Papal visit, and this type of special event may not be repeated in the near future or in the year 2016. The Company will endeavor to find this type of project in the future, but projects like this one are particularly few and far between. While the increase in revenue for barrier due to the special project was significant, regular barrier rentals excluding the special projects revenue were up significantly for both the three and nine months ended September 30, 2015 when compared to the same periods in 2014. The increase was due to the continued increase in the construction industry and particularly in highway infrastructure spending.

Shipping and Installation - Shipping revenue results from shipping our products to the customers' final destination and is recognized when the shipping services take place. Installation activities include installation of our products at the customers' construction site. Installation revenue results when attaching architectural wall panels to a building, installing an Easi-Set® building at a customers' site or setting any of our other precast products at a site specific to the requirements of the owner. Shipping and installation revenue increased by 15% for the three months ended September 30, 2015, compared to the same period in 2014, and decreased by 26% for the nine months ended September 30, 2015, compared to the same period in 2014. The Company is currently involved in only one large installation project at the current time so that installation revenue for the third quarter of 2015 is slightly above the third quarter revenue of 2014. During the third quarter of 2015 we have started to ship several soundwall projects as well as the miscellaneous wall panel project described above, consequently we are above the shipping revenue for the same quarter of 2014. In November, 2015 we will begin shipping three Slenderwall projects and one architectural project. Shipping and installation revenue for the nine months ended September 30, 2015 is below that of the same period in 2014 due to the low installation and shipping activity early in the year. With the shipping revenue generated by the current projects shipping and the new ones beginning to ship in November, shipping and installation revenue should increase in the fourth quarter of 2015 from the fourth quarter of the prior year. For the full year 2015, the Company will continue to be behind 2014 revenues based on the installation and shipping activities discussed above.

Cost of Goods Sold – Total cost of goods sold for the three months ended September 30, 2015 increased by \$2,825,778, or 63%, from the same period in 2014. Total cost of goods sold, as a percentage of total revenue, not including royalties, was 73% for the three months ended September 30, 2015 and 79% for the same period in 2014. The cost of goods sold was higher for the three month period because of the increase in total revenue in the amount of \$4,428,322, however, because of the increase in revenue, and the resulting absorption of fixed costs over such higher revenue base, the cost of goods sold as a percentage of total revenue, not including royalties, decreased by six percentage points.

Total cost of goods sold for the nine months ended September 30, 2015 increased by \$1,795,591, or 10%, from the same period in 2014. Even as cost of goods sold increased, the total cost of goods sold, as a percentage of total revenue, not including royalties, was 80% for the nine months ended September 30, 2015 and 85% for the same period in 2014. The decrease in cost of goods sold as a percentage of revenue was due mainly to increased efficiencies in production as a part of our lean journey and a slightly increased margins on our special projects discussed above in the barrier rental section above. The Company has encountered some price increases in some raw materials, partially offset by temporary decreases in steel prices. Inflation continues to remain relatively low and management believes inflation will continue to remain relatively low for the remainder of the 2015. The Company anticipates that with our current sales backlog, production will remain high through the remainder of the year and well into 2016.

General and Administrative Expenses – For the three months ended September 30, 2015, the Company's general and administrative expenses increased \$46,309, or 6%, to \$808,216 from \$761,907 during the same period in 2014. The increase for the three month comparative periods was primarily due to an increase in payroll expenses and a reduction

in use tax caused by a reduction in installation revenue. For the nine months ended September 30, 2015, the Company's general and administrative expenses increased \$91,371, or 4%, to \$2,429,280 from 2,337,909 during the same period in 2014. The increase in general and administrative expenses was due an increase in salaries partially offset by a decrease in use tax which was caused by a reduction in installation revenue. General and administrative expense as a percentage of total revenue was 8% and 13% for the three months ended September 30, 2015 and 2014, respectively, and 11% and 13% for the nine months ended September 30, 2015 and 2014, respectively.

Selling Expenses – Selling expenses for the three months ended September 30, 2015 increased to \$558,212 from \$549,134 for the same period in 2014 or 2%. The increase was due mainly to increased payroll expense partially offset by general office expense. Selling expenses for the nine months ended September 30, 2015 decreased to \$1,576,986 from 1,635,503 for the same period in 2014 or 4%. The reduction in selling expenses was due to a planned decrease in advertising expense partially offset by an increase in salaries.

Operating Income Loss – The Company had operating income for the three months ended September 30, 2015 of \$1,769,597 compared to operating income of \$216,772 for the same period in 2014. The Company had an operating income for the nine months ended September 30, 2015 of \$1,353,507 compared to an operating loss of \$223,435 for the same period in 2014. The increase in operating income for the three and nine months ended September 30, 2015 compared to the same period in 2014 was primarily due to an increase in sales of product and special projects revenue and a decrease in the cost of goods sold as a percentage of total revenue, not including royalties.

Interest Expense – Interest expense was slightly lower for the three and six months ended September 30, 2015, compared to the same period in 2014. The decrease for the three and nine months ended September 30, 2015 was due primarily to the payment of notes payable during the comparative periods.

Income Tax Expense (Benefit) – The Company had tax expense of \$610,000, with an effective rate of 35%, for the three months ended September 30, 2015 compared to tax expense of \$75,000 with an effective rate of 40% for the same period in 2014. The Company had tax expense of \$424,000, with an effective rate of 33%, for the nine months ended September 30, 2015 compared to a tax benefit of \$118,000 with an effective rate of 39% for the same period in 2014. The changes in the tax expense (benefit) for the periods correlated to the change in pre-tax income (loss).

Net Income (Loss) – The Company had net income of \$1,152,056 for the three months ended September 30, 2015, compared to net income of \$112,490 for the same period in 2014. The Company had net income of \$872,544 for the nine months ended September 30, 2015, compared to a net loss of \$186,065 for the same period in 2014.

Liquidity and Capital Resources

The Company has financed its capital expenditures and its operating requirements for the first nine months of 2015 primarily from cash balances and notes payable to a bank. The Company had \$2,416,076 of debt obligations at September 30, 2015, of which \$366,894 was scheduled to mature within twelve months. During the nine months ended September 30, 2015, the Company made repayments of outstanding debt in the amount \$275,114.

The Company has a note payable to Summit Community Bank (the “Bank”), with a balance of \$1,635,987 as of September 30, 2015. The note has a term of approximately eight years and a fixed interest rate of 3.99% annually with monthly payments of \$25,642 and is secured by principally all of the assets of the Company. Under the terms of the note, the Bank will permit chattel mortgages on purchased equipment not to exceed \$250,000 for any one individual loan as long as the Company is not in default. Also, the Company is limited to \$1,000,000 for annual capital expenditures. At September 30, 2015, the Company was in compliance with all covenants pursuant to the loan agreement as amended.

The Company also has a \$2,000,000 line of credit, of which none was outstanding at September 30, 2015. The line is evidenced by a commercial revolving promissory note with the Bank, which carries a variable interest rate of prime and matures on September 12, 2016. In addition, the Company has a commitment from the Bank in the amount of \$1,000,000 for an equipment line of credit.

At September 30, 2015, the Company had cash and cash equivalents totaling \$991,143 and \$1,026,793 of investment securities available for sale compared to cash and cash equivalents totaling \$3,572,405 and \$1,013,417 of investment securities available for sale at December 31, 2014. Investment securities available for sale at September 30, 2015 consist of 90,070 shares of USVAX (a Virginia Bond Fund). The decrease in cash is primarily the result of a significantly higher level of accounts receivable at September 30, 2015 than at December 31, 2014, the purchase of capital assets and the repayment of notes payable. The significantly higher accounts receivable are a byproduct of the significant sales generated in the quarter ended September 30, 2015 .

Capital spending totaled \$864,814 for the nine months ended September 30, 2015, as compared to \$398,684 for the same period in 2014. The 2015 expenditures were for land improvements, new construction vehicles and

miscellaneous manufacturing equipment. The Company plans to make additional capital purchases of approximately \$150,000 over the remainder of the year.

The Company's mortgage loan is financed at a fixed rate of 3.99% per annum. This leaves the Company almost impervious to fluctuating interest rates. Increases in such rates will only slightly affect the interest paid by the Company annually. Each 1% increase in the interest rates of the Company's outstanding debt will reduce income by approximately \$2,000 annually.

The Company's cash flow from operations is affected by production schedules set by contractors, which generally provide for payment 35 to 90 days after the products are produced. This payment schedule may result in liquidity problems for the Company because it must bear a portion of the cost of production before it receives payment from its customers. The Company's average days sales outstanding, excluding the effect of unbilled revenue, decreased from 88 days for the year ended December 31, 2014 to 87 days for the nine months ended September 30, 2015. The decrease in days sales outstanding is due to increased efficiency in our collection efforts during 2015. Although no assurances can be given, the Company believes that anticipated cash flow from operations and the availability under the lines of credits will be sufficient to finance the Company's operations for at least the next twelve months.

The Company's inventory was \$2,168,333 at September 30, 2015 and at December 31, 2014 was \$1,726,544, or an increase of \$441,789. Inventory turnover was 7.3 for the nine months ended September 30, 2015, compared to 8.4 for the same period in 2014.

Critical Accounting Policies and Estimates

The Company's critical accounting policies are more fully described in its Summary of Accounting Policies to the Company's consolidated financial statements on Form 10-K for the year ended December 31, 2014. The preparation of consolidated financial statements in conformity with accounting principles generally accepted within the United States of America requires management to make estimates and assumptions in certain circumstances that affect amounts reported in the accompanying consolidated financial statements and related notes. In preparing these consolidated financial statements, management has made its best estimates and judgments of certain amounts included in the consolidated financial statements, giving due consideration to materiality. The Company does not believe there is a great likelihood that materially different amounts would be reported related to the accounting policies described below, however, application of these accounting policies involves the exercise of judgment and the use of assumptions as to future uncertainties and as a result, actual results could differ from these estimates.

The Company evaluates the adequacy of its allowance for doubtful accounts at the end of each quarter. In performing this evaluation, the Company analyzes the payment history of its significant past due accounts, subsequent cash collections on these accounts and comparative accounts receivable aging statistics. Based on this information, along with other related factors, the Company develops what it considers to be a reasonable estimate of the uncollectible amounts included in accounts receivable. This estimate involves significant judgment by the management of the Company. Actual uncollectible amounts may differ from the Company's estimate.

The Company recognizes revenue on the sale of its standard precast concrete products at shipment date, including revenue derived from any projects to be completed under short-term contracts. Installation services for precast concrete products, leasing and royalties are recognized as revenue as they are earned on an accrual basis. Licensing fees are recognized under the accrual method unless collectability is in doubt, in which event revenue is recognized as cash is received. Certain sales of Soundwall, Slenderwall™, and other architectural concrete products are recognized upon completion of units produced under long-term contracts. When necessary, provisions for estimated losses on these contracts are made in the period in which such losses are determined. Changes in job performance, conditions and contract settlements that affect profit are recognized in the period in which the changes occur. Unbilled trade accounts receivable represents revenue earned on units produced for a specific customer contract and not yet billed.

Seasonality

The Company services the construction industry primarily in areas of the United States where construction activity may be inhibited by adverse weather during the winter. As a result, the Company may experience reduced revenues from December through February and realize a more significant part of its revenues during the other months of the year. The Company may experience lower profits, or losses, during the winter months, and as such, must have sufficient working capital

to fund its operations at a reduced level until the spring construction season. The failure to generate or obtain sufficient working capital during the winter may have a material adverse effect on the Company.

Inflation

Raw material costs for the Company, cement, aggregates and other direct materials used in production, except for steel that has decreased slightly, increased slightly in 2014 and the first nine months of 2015 and the Company anticipates prices will increase only slightly over the remainder of 2015.

Sales Backlog

As of November 12, 2015, the Company's sales backlog was approximately \$14.1 million, as compared to approximately \$12.9 million at the same time in 2014. It is estimated that substantially all of the projects in the sales backlog will be produced within 12 months. The Company also maintains a regularly occurring repeat customer business, which should be considered in addition to the ordered production backlog described above. These orders typically have a quick turn around and represent purchases of a significant portion of the Company's inventoried standard products, such as highway safety barrier, utility and Easi-Set® and Easi-Span® building products. Historically, this regularly occurring repeat customer business has ranged from \$5.0 million to \$7.0 million annually.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

Not Applicable

ITEM 4. Controls and Procedures

(a) Disclosure controls and procedures

The Company carried out our evaluation, under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of our disclosure controls and procedures as of the end of the period covered by this report, pursuant to Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based on this evaluation, the chief executive officer and chief financial officer have concluded that the Company's disclosure controls and procedures were effective at September 30, 2015.

(b) Changes in Internal Control over Financial Reporting

There has been no change in the Company's internal control over financial reporting during the three months ended September 30, 2015 that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

PART II — OTHER INFORMATION

ITEM 1. Legal Proceedings

The Company is not presently involved in any litigation of a material nature.
