SUMMARY PROSPECTUS
MAY 1, 2014

MOOSUM

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.vaneck.com/library/etfs/>. You can also get this information at no cost by calling 888.MKT.VCTR, or by sending an email request to info@vaneck.com. The Fund's prospectus and statement of additional information, both dated May 1, 2014, are incorporated by reference into this summary prospectus.

INVESTMENT OBJECTIVE

Market Vectors Agribusiness ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Market Vectors® Global Agribusiness Index (the Agribusiness Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50 %
Other Expenses	0.05 %
Total Annual Fund Operating Expenses ^(a)	0.55 %
Fee Waivers and Expense Reimbursement ^(a)	0.00 %
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.55 %

^(a) Van Eck
Associates
Corporation

(the Adviser)
has agreed to
waive fees
and/or pay
Fund
expenses to
the extent
necessary to
prevent the
operating
expenses of
the Fund
(excluding
acquired fund
fees and
expenses,
interest
expense,
offering costs,
trading
expenses,
taxes and
extraordinary
expenses)
from
exceeding
0.56% of the
Fund s
average daily
net assets per
year until at
least May 1,
2015. During
such time, the
expense
limitation is
expected to
continue until
the Fund s
Board of
Trustees acts
to discontinue
all or a
portion of
such expense
limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR	EXPENSES
1	\$ 56
3	\$ 176
5	\$ 307
10	\$ 689

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund

Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 33% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Agribusiness Index is comprised of equity securities of companies that generate at least 50% of their revenues from (or, in certain circumstances, have at least 50% of their assets related to): (i) agri-chemicals, animal health and fertilizers, seeds and traits, (ii) farm/irrigation equipment and farm machinery and/or (iii) agricultural products (including grain, tobacco, meat, poultry and sugar), aquaculture and fishing, livestock, plantations and trading of agricultural products. Such companies may include small- and medium-capitalization companies and foreign and emerging market issuers. As of December 31, 2013, the Agribusiness Index included 49 securities of companies with a market capitalization range of between approximately \$502 million and \$61.2 billion and a weighted average market capitalization of \$21.8 billion. These amounts are subject to change. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Agribusiness Index by investing in a portfolio of securities that generally replicates the Agribusiness Index. The Adviser expects that, over time, the correlation between the Fund's performance before fees and expenses and that of the Agribusiness Index will be 95% or better. A figure of 100% would indicate perfect correlation.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Agribusiness Index concentrates in an industry or group of industries. As of December 31, 2013, the Agribusiness Index was concentrated in each of the basic materials and consumer staples sectors, and the industrials sector represented a significant portion of the Agribusiness Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund.

Risk of Investing in Agriculture Investments. Economic forces, including forces affecting the agricultural commodity, energy and financial markets, as well as government policies and regulations affecting the agricultural sector and related industries, could adversely affect the Fund's portfolio companies and, thus, the Fund's financial situation and profitability. Agricultural production and trade flows are significantly affected by government policies and regulations. In addition, the Fund's portfolio companies must comply with a broad range of environmental and food safety laws and regulations which could adversely affect the Fund. Additional or more stringent environmental and food safety laws and regulations may be enacted in the future and such changes could have a material adverse effect on the business of the Fund's portfolio companies.

Risk of Investing in the Basic Materials Sector. Because the Agribusiness Index was concentrated in the basic materials sector as of December 31, 2013, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the basic materials sector. Companies engaged in the production and distribution of basic materials may be adversely affected by changes in world events, political and economic conditions, energy conservation, environmental policies, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

Risk of Investing in the Consumer Staples Sector. Because the Agribusiness Index was concentrated in the consumer staples sector as of December 31, 2013, the Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the consumer staples sector. These companies may be adversely affected by changes in the worldwide economy, consumer spending, competition, demographics and consumer preferences, exploration and production spending.

Risk of Investing in the Industrials Sector. Because as the industrials sector represented a significant portion of the Agribusiness Index as of December 31, 2013, the Fund will be sensitive to changes in, and its performance may depend on to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.

Risk of Investing in Foreign Securities. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of

investing in emerging market countries are greater than risks associated with investments in foreign developed countries. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities.

Risk of Investing in Emerging Market Issuers. Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

Risk of Investing in Depositary Receipts. Depositary receipts in which the Fund may invest are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market and, if not included in the Agribusiness Index, may negatively affect the Fund's ability to replicate the performance of the Agribusiness Index.

Risk of Investing in Small- and Medium-Capitalization Companies. Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. Returns on investments in securities of small- and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Risk of Cash Transactions. Unlike most exchange-traded funds (ETFs), the Fund expects to effect its creations and redemptions partially for cash, rather than in-kind securities. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Market Risk. The prices of the securities in the Fund are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Index Tracking Risk. The Fund's return may not match the return of the Agribusiness Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Agribusiness Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Agribusiness Index. Because the Fund bears the costs and risks associated with buying and selling securities while such costs and risks are not factored into the return of the Agribusiness Index, the Fund's return may deviate significantly from the return of the Agribusiness Index. In addition, the Fund may not be able to invest in certain securities included in the Agribusiness Index, or invest in them in the exact proportions they represent of the Agribusiness Index, due to legal restrictions or limitations imposed by the governments of certain countries, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. The Fund is expected to value certain of its investments based on fair value prices. To the

extent the Fund calculates its net asset value (NAV) based on fair value prices and the value of the Agribusiness Index is based on securities closing prices on local foreign markets (*i.e.*, the value of the Agribusiness Index is not based on fair value prices), the Fund's ability to track the Agribusiness Index may be adversely affected.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Agribusiness Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Premium/Discount Risk. Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

Non-Diversified Risk. The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Agribusiness Index concentrates in a particular sector or sectors or industry or group of industries. Based on the composition of the Agribusiness Index as of December 31, 2013, the Fund's assets were concentrated in the basic materials and consumer staples sectors; therefore, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on those sectors will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by comparing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year, five year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after income taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.marketvectorsetfs.com.

Annual Total Returns(%) Calendar Years

Best Quarter: 26.43% 3Q 10

Worst Quarter: -40.15% 3Q 08

Average Annual Total Returns for the Periods Ended December 31, 2013

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Past Five Years	Since Inception (8/31/2007)
Market Vectors Agribusiness ETF (return before taxes)	4.60 %	15.78 %	5.74 %
Market Vectors Agribusiness ETF (return after taxes on distributions)	3.83 %	15.29 %	5.32 %
Market Vectors Agribusiness ETF (return after taxes on distributions and sale of Fund Shares)	2.60 %	12.55 %	4.33 %
Market Vectors® Global Agribusiness Index (reflects no deduction for fees, expenses or taxes)*	6.42 %	16.68 %	6.30 %

S&P 500® Index (reflects no deduction for fees, expenses or taxes)	32.39 %	17.94 %	5.94 %
--	---------	---------	--------

* Prior to March 18, 2013, the Fund sought to replicate an index called the DAXglobal® Agribusiness Index. Therefore index data prior to March 18, 2013, reflects that of the DAXglobal® Agribusiness Index. From March 18, 2013 forward, the index data reflects that of the Market Vectors® Global Agribusiness Index. All index history reflects a blend of the performance of the aforementioned indexes.

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	August 2007
George Cao	Portfolio Manager	December 2007

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems Shares at NAV only in a large specified number of Shares, each called a Creation Unit, or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are listed on NYSE Arca Inc. (NYSE Arca) and because Shares trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

TAX INFORMATION

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.
