NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(Amounts in thousands, except share, per share and per tonne data)

1.

BASIS OF PRESENTATION

Management has prepared the accompanying unaudited condensed consolidated financial statements for the three-month and six-month periods ended June 30, 2010, and these operating results are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

The condensed consolidated balance sheets at December 31, 2009 has been derived from the audited consolidated financial statements at that date but does not include all the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 20-F for the year ended December 31, 2009.

The consolidated financial statements include the accounts of China Natural Resources, Inc. and those subsidiaries in which the Company has direct and indirect controlling interest (collectively referred to as the Company). The Company's subsidiaries as of December 31, 2009, are as described in the Company's Form 20-F for the year ended December 31, 2009.

As of June 30, 2010, the Company has a working capital deficiency of RMB513,128 (US\$75,661). After adjusting working capital for the current payables to related parties of RMB531,774 (US\$78,412), the Company expects it will have sufficient liquidity to finance its operations for the next twelve months. The related parties have confirmed to the Company that the payables to related parties will not be repayable until the Company is in a position to make the repayment. Therefore, the unaudited condensed consolidated financial statements have been prepared on a going concern basis. The going concern basis assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

For the convenience of readers, amounts in Renminbi (RMB) have been translated into United States dollars (US\$) at the applicable rate of US\$1.00 = RMB6.7818 as quoted by Bloomberg Finance L.P. as of June 30, 2010, except as disclosed otherwise. No representation is made that the RMB amounts could have been, or could be, converted into US\$ at that rate, or at all.

Edgar Filing: CHINA NATURAL RESOURCES INC - Form 6-K

On April 30, 2010, the Company acquired all the issued and outstanding capital stock of Wealthy Year Limited, a BVI company ("Wealthy Year"), and its wholly-owned and partially-owned subsidiaries from the Feishang Group Limited (the "Shareholder"), a company controlled by Mr. Li Feilie, and assumed the outstanding indebtedness owed by Wealthy Year to the Shareholder (the "Indebtedness") on the closing date. The total purchase price for the common shares and Indebtedness was US\$87,000 (RMB596,523). The assets acquired and liabilities assumed by the Company were recorded at their historical carrying values on the books of the Shareholder and the difference between the net assets acquired and the consideration paid was adjusted in equity. In addition, the results of operations of Wealthy Year and its subsidiaries, which principally engage in coal mine development and operations in the PRC, have been included in this condensed interim consolidated financial statements since they were under the control of the Shareholder. The following table summarizes the fair values of Wealthy Year's assets and liabilities attributable to the Shareholder's interests when they were first under the control of the Shareholder on March 18, 2010:

	RMB	US\$
Cash	16,077	2,355

The exchange rate used in the preceding table is US\$1.00 = RMB6.8262, representing the historical exchange rate at the transaction date. The fair values, including the bargain purchase gain disclosed above, are provisional subject to finalization of valuation for the identifiable assets and liabilities.

2.

EARNINGS (LOSS) PER SHARE

Basic earnings per share amounts are calculated using the weighted average number of common shares outstanding during the period. Diluted earnings per share assumes the conversion, exercise or issuance of all potential common stock instruments, such as options or warrants, unless the effect is to reduce a loss or increase earnings per share and is calculated using the treasury stock method. With respect to outstanding warrants, the weighted average number of shares was 126,352 and 271,311 shares for the three-month and six-month periods ended June 30, 2010, and 1,000,000 common shares issuable under outstanding options for the three-month and six-month periods ended June 30, 2010, respectively, were not included in the dilutive calculation for those respective periods, as the effect would be anti-dilutive.

SALES AND GROSS PROFIT

Sales for the six months ended June 30, 2010 totaled RMB33.62 million (US\$4.96 million), a 91.44% increase over the same period of 2009. The increase was mainly comprised of (i) anthracite sales amounting to RMB16.37 million (US\$2.41 million) by the newly acquired Wealthy Year's business; (ii) an increase in the average selling price per tonne of zinc concentrates from RMB5,666 (US\$835) in the first half of 2009 to RMB10,112 (US\$1,491) for the same period of 2010, as well as approximately 30% higher production volume; and (iii) an increase in the average selling price per tonne of iron concentrates to RMB928 (US\$137) during the period, from RMB616 (US\$91) over the same period of 2009, partly offset by the decrease in sales volume of iron concentrates.

Sales for the second quarter of 2010 totaled RMB24.85 million (US\$3.66 million), a 91.17% rise over the same period last year. This increase was mainly caused by (i) the anthracite sales from the newly acquired Wealthy Year's business; and (ii) an increase in the average selling price of zinc concentrates and iron concentrates, as well as approximately 22% higher zinc production volume, partly offset by the decrease in sales volume of iron concentrates.

The overall gross profit margin increased from 7.37% for the six months ended June 30, 2009 to 35.38% for the same period of 2010. This increase mainly arose from (i) a 37.44% in the gross profit margin from anthracite sales by Wealthy Year; and (ii) the rise in the average selling price of zinc concentrates and iron concentrates by Wuhu Feishang.

The increase in gross profit margin for the second quarter of 2010, from 4.83% to 36.71%, was driven by the same factors.

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES

Selling, general and administrative expenses increased by RMB11.99 million (US\$1.77 million) or 45.41% to RMB38.40 million (US\$5.66 million) for the six months ended June 30, 2010 from RMB26.41 million (US\$3.89 million) for the same period of 2009. Selling, general and administrative expenses increased by RMB12.24 million (US\$1.80 million) or 95.11% to RMB25.11 million (US\$3.70 million) for the second quarter of 2010 from RMB12.87 million (US\$1.90 million) for the same quarter of 2009. This increase was caused by the interest of RMB83,000 (US\$13,000) incurred on a new, short-term bank loan, and accrued interest of RMB353,000 (US\$51,000) on royalties payable for mining rights to three operating anthracite mines by Wealthy Year, namely Baiping Mine, Dayuan Coal and Xinsong Coal.

This increase was contributed by the increase of average bank balance. The same factor contributed to the increase of interest income for the second quarter of 2010 by RMB228,000 (US\$34,000) or 350.17%, to RMB293,000 (US\$44,000) from RMB65,000 (US\$10,000) for the same quarter in 2009.

The increase was mainly contributed by the provisional bargain purchase gain amounting to RMB624.15 million (US\$91.43 million at the historical exchange rate of US\$1.00=RMB6.8262) on the acquisition of Guizhou Puxin, and a gain amounting to RMB7.27 million (US\$1.07 million) from the disposal of a 45% equity interest in Guangdong Longchuan.

Other expense for the three months ended June 30, 2010 increased to a net amount of RMB1.83 million (US\$0.27 million) from nil for the same period in 2009. This increase was mainly due to penalty and compensation expense relating to a mine accident in the second quarter of 2010.

The increase was mainly attributable to (i) a provisional bargain purchase gain amounting to RMB624.15 million (US\$91.43 million at the historical exchange rate of US\$1.00=RMB6.8262) on the acquisition of Guzhou Puxin; (ii) the gross profit increase of Wuhu Feishang amounting to RMB5.77 million (US\$0.85 million) caused by the increase in the average selling price of zinc concentrates and iron concentrates; (iii) the RMB7.27 million (US\$1.07 million) gain on the disposal of Guangdong Longchuan in February 2010; and (iv) the disposal of the loss position for the six months ended June 30, 2009, amounting to RMB9.03 million (US\$1.33 million) relating to the discontinued copper smelting operation, partly offset by a RMB8.79 million (US\$1.30 million) loss arising from the newly acquired operations of Wealthy Year. If so, we could be required to adjust our expenditures for the remainder of 2010 and for 2011 to conserve working capital, or raise additional capital, possibly including debt or equity financing, to fund operations and our growth strategy.
