ANNUAL REVIEW AND REPORT TO STOCKHOLDERS

Royce Value Trust

Royce Micro-Cap Trust

Royce Focus Trust

www.roycefunds.com

A Few Words on Closed-End Funds

Royce & Associates, LLC manages three closed-end funds: Royce Value Trust, the first small-cap value closed-end fund offering; Royce Micro-Cap Trust, the only micro-cap closed-end fund; and Royce Focus Trust, a closed-end fund that invests in a limited number of primarily small-cap companies.

A closed-end fund is an investment company whose shares are listed and traded on a stock exchange. Like all investment companies, including open-end mutual funds, the assets of a closed-end fund are professionally managed in accordance with the investment objectives and policies approved by the Fund s Board of Directors. A closed-end fund raises cash for investment by issuing a fixed number of shares through initial and other public offerings that may include shelf offerings and periodic rights offerings. Proceeds from the offerings are invested in an actively managed portfolio of securities. Investors wanting to buy or sell shares of a publicly traded closed-end fund after the offerings must do so on a stock exchange, as with any publicly traded stock. This is in contrast to open-end mutual funds, in which the fund sells and redeems its shares on a continuous basis.

A Closed-End Fund Offers Several Distinct Advantages Not Available from an Open-End Fund Structure

Since a closed-end fund does not issue redeemable securities or offer its securities on a continuous basis, it does not need to liquidate securities or hold uninvested assets to meet investor demands for cash redemptions, as an open-end fund must.

In a closed-end fund, not having to meet investor redemption requests or invest at inopportune times is ideal for value managers who attempt to buy stocks when prices are depressed and sell securities when prices are high.

A closed-end fund may invest more freely in less liquid portfolio securities because it is not subject to potential stockholder redemption demands. This is particularly beneficial for Royce-managed closed-end funds, which invest in small- and micro-cap securities.

The fixed capital structure allows permanent leverage to be employed as a means to enhance capital appreciation potential.

Unlike Royce s open-end funds, our closed-end funds are able to distribute capital gains on a quarterly basis. Each of the Funds has adopted a quarterly distribution policy for its common stock. Please see page 16-18 for more details.

We believe that the closed-end fund structure is very suitable for the long-term investor who understands the benefits of a stable pool of capital.

Why Dividend Reinvestment Is Important

A very important component of an investor s total return comes from the reinvestment of distributions. By reinvesting distributions, our investors can maintain an undiluted investment in a Fund. To get a fair idea of the impact of reinvested distributions, please see the charts on pages 11, 13, and 15. For additional information on the Funds Distribution Reinvestment and Cash Purchase Options and the benefits for stockholders, please see page 18 or visit our website at www.roycefunds.com.

Annual Report to Stockholders	<u>9</u>

For 40 years, we have used a value approach to invest in small-cap securities. We focus primarily on the quality of a company s balance sheet, its ability to generate free cash flow, and other measures of profitability or sound financial condition. We then use these factors to assess the company s current worth, basing the assessment on either what we believe a knowledgeable buyer might pay to acquire the entire company or what we think the value of the company should be in the stock market.

Important Performance and Risk Information

All performance information in this Review and Report reflects past performance, is presented on a total return basis, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate, so that shares may be worth more or less than their original cost when sold. Current performance may be higher or lower than performance quoted. Current month-end performance may be obtained at www.roycefunds.com. Certain immaterial adjustments were made to the net assets of Royce Micro-Cap Trust at 12/31/12 for financial reporting purposes, and as a result the net asset value originally calculated on that date and the total return based on that net asset value differs from the adjusted net asset value and total return reported in the Financial Highlights. All indexes referenced are unmanaged and capitalization-weighted. Each indexes s returns include net reinvested dividends and/or interest income. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group. The Russell 2000 Index is an index of domestic small-cap stocks that measures the performance of the 2,000 smallest publicly traded U.S. companies in the Russell 3000 Index. The Russell Microcap Index includes 1,000 of the smallest securities in the small-cap Russell 2000 Index, along with the next smallest eligible securities as determined by Russell. The Russell 2500 Index is an index of the 2,500 smallest publicly traded U.S. companies in the Russell 3000 Index.

Letter to Our Stockholders

Men can do nothing without the make-believe of a beginning.

George Eliot

See a Little Light

When seeing out one year and ushering in another, it is important to remember that the calendar, useful though it may be, provides only one way of tracking time. Some people, for example, choose to look to spring for a new beginning, while others, more habituated to the rhythms of the school year, prefer the arrival of fall. The stock market, in all its caprice and unpredictability, most often eschews 12-month spans in favor of its own irregularly paced seasons. So we find ourselves, as we look back on 2012 and peer ahead to 2013, at one of those curious, familiar junctures when the calendar compels a shift that the market seems to have anticipated months before. From our perspective as active small-cap managers, the recent market cycle change was something of a watershed. In fact, it seems very likely to us that the 2012 small-cap low on June 4 signaled the end of the closely correlated, range-bound cycle of the last few years, a cycle that created ample disappointments for those of us committed to high quality, risk management, and long-term absolute returns. It is not yet clear that this June low will prove as auspicious as it looks to us at this writing. Suffice it to say that major market inflection points seldom do any of us the favor of announcing their arrival.

Charles M. Royce, President

Letter to Our Stockholders

One of the most interesting recent developments in the equity markets, particularly in the small-cap space, has been the persistent disparity in performance between high- and low-quality companies. Over longer periods of time, higher-quality companies have differentiated themselves from a performance standpoint, especially compared to the lower quality segments of the market. While the aftermath of the financial crisis altered this script, there are signs that the dynamic is changing.

Historically, lower-quality companies have tended to demonstrate their most robust outperformance when markets are in the initial recovery phase following a recession or bear market low. However, once economies and markets move from recovery to expansion, the rate of change in these inputs begins to slow while leadership tends to rotate back to higher-quality companies, whose business fundamentals are more compelling.

Continued on page 6...

It is equally important to emphasize that our new-found sanguine attitude is contingent on seeing in 2013 more of what we saw in the second half of 2012, particularly in last year s closing months. During this period, investors were looking more closely at companies that possess sustainable quality in the form of strong balance sheets, high returns on invested capital, steady earnings, and reasonable dividends while paying a bit less attention to high-yield instruments, copiously leveraged stocks, and explosive growth surprises. We want to stress the extremely cautious nature of our optimism. The resurgence of quality off the June low was not decisive and has been thus far short lived. However, in our view, it did mark a subtle and significant shift that grew more pronounced in the fourth quarter, most notably in October and November when share prices went wobbly from the impact of Hurricane Sandy and the aftermath of the elections, which included periods of recurrent anxiety over the then-looming fiscal cliff.

Quality shone through in this more uncertain period. Throughout most of our first 35 years of managing portfolios, this resilience would have been unexceptional, and hardly worth mentioning, because quality companies have historically defended well. However, since the spring of 2010 and even more dramatically since the April 2011 small-cap high little of what worked historically has enjoyed success. This has made the last five years the last three particularly among the most frustrating periods of our 40 years in business. With retrospective clarity, perhaps we should have suspected that something was amiss, or at least historically aberrant, when stocks rebounded so quickly and dynamically from the March 2009 bottom. Considering that the recession which began in 2007 was made far worse by the global financial crisis in the fall of 2008, the market s surge may have been too much too soon, welcome though it was.

In any event, investors soon became more than a little wary, shuffling in and out of stocks with little regard for business fundamentals and too much for macro headlines, nearly all of them negative. Unable to establish any clear direction, the market sputtered as it rose and wheezed as it stumbled. It often seemed as though many of the investors who were frantically shoving money in and pulling it out again weeks, days, or hours later were the same people decrying the mercurial nature of asset prices and questioning whether equities were any longer a viable investment option. Along the way, results for passive investment approaches began to outpace those of an ever-larger number of active managers. So it is with a large measure of relief that we bid a tentative and hopeful good-bye to all that as we look ahead to better, more stable days.

The Wall of Worry

An old adage has it that the market climbs a wall of worry during those times when stocks behave bullishly in the face of negative news or perceptions. It seems clear to us that in 2012, the market scaled just such a wall. Consider the following: For the most part, the bearish second quarter eroded, but did not undo, the gains achieved in the first. The year s final six months found many investors still behaving coolly toward equities and a host of large-scale economic and fiscal issues yet to be fully worked through. As the year closed, a fiscal cliff deal had yet to be reached, various European nations continued to flirt with financial peril, and China was still growing

4 | This page is not part of the 2012 Annual Report to Stockholders

at a slower pace than in previous boom years. In addition, there was a typically contentious presidential election preceded by a disastrous hurricane that swept through the world s financial capital. Yet the market ultimately shrugged off most of these concerns.

Share prices did not skyrocket following the June 4 small-cap low. July, in fact, saw a downturn for most stocks. But August and September were highly rewarding months that enabled equities to rally decisively enough to post impressive third-quarter results. For the quarter, the small-cap Russell 2000 Index gained 5.3% while the large-cap S&P 500 and Russell 1000 Indexes were up 6.4% and 6.3%, respectively, and the more tech-oriented Nasdaq Composite climbed 6.2%. Following the strong third quarter, equities took a bit of breather in October, before rallying again in November and December, which repeated to some degree the third quarter s pattern, though with far more modest or slightly negative results. For the fourth quarter, the Russell 2000 was up 1.9%, the Russell 1000 rose 0.1%, the S&P 500 was off 0.4%, and the Nasdag Composite fell 3.1%.

The end result was a strong calendar year, especially compared to 2011, with each major equity index posting double-digit returns. In 2012, the Russell 2000 gained 16.3%, the S&P 500 rose 16.0%, the Russell 1000 was up 16.4%, and the Nasdaq Composite increased 15.9%. Three-year returns for the major indexes were also strong, with each again posting double-digit average annual total returns. For the three-year period ended December 31, 2012, the Russell 2000 led with a gain of 12.2%. The Russell 2000, Russell 1000, and S&P 500 each finished the year within 2.5% of their respective highs established during 2012 s third quarter, while the Nasdaq Composite remained 40.2% below its peak from March 10, 2000.

Non-U.S. equities also enjoyed a strong second half after starting the year with generally lower gains when stacked against their domestic cousins. The Russell Global ex-U.S. Small Cap Index climbed 8.3% in the third quarter, while the Russell Global ex-U.S. Large Cap Index rose 7.7%. In contrast to the domestic indexes, these strong third-quarter performances were followed by consistently positive results in the fourth quarter. The Russell Global ex-U.S. Small Cap Index was up 4.8% versus a gain of 5.8% for the Russell Global ex-U.S. Large Cap Index. For the full year small-caps were the leaders, with the Russell Global ex-U.S. Small Cap Index gaining 18.8% while the Russell Global ex-U.S. Large Cap Index was up 17.0%. So while the perception persists that non-U.S. markets are a mess a perception based on the uncertain debt and currency situations in Europe and slower-than-desired growth in developing countries the reality is that stocks across the globe finished the year with highly attractive results.

Shifting back stateside finds that micro-cap stocks enjoyed a very strong year. After finishing the first half with an enviable 13.0% return, the Russell Microcap Index climbed 5.9% in the third quarter and was essentially flat in the fourth, up 0.04%, which gave the index a 19.7% increase in 2012. Mid-cap stocks also experienced robust results for the calendar year the Russell Midcap Index was up 17.3% in 2012.

An old adage has it that the market climbs a wall of worry during those times when stocks behave bullishly in the face of negative news or perceptions. It seems clear to us that in 2012 the market scaled just such a wall.

the cost of capital that has accompanied the Fed s bond buying programs. Access to capital has simultaneously improved, allowing weaker companies to stave off potential financing challenges. This is particularly relevant in the smaller company space where financing is often tenuous. Interestingly, companies with large net cash positions have also lagged as that cash has been viewed as unproductive asset that generates little or no return, even though it provides a healthy margin of and is often the result of profitability. Even allowing for strong second-half results, high-quality small-caps highly attractive to us relative to both their lower-quality counterparts and their high-quality peers in the large-cap space. The drop in market volatility back to pre-crisis levels, as measured by the VIX, has contributed to the relative strength of low-quality companies. Investors appetite for riskier assets tends to correlate with sharp moves both up and down in volatility. As the more violent swinas in the market dissipated, investors were increasingly willing to embrace the added risk associated with

However, the four rounds of QE have created an extended

for low-quality companies. Highly levered businesses a low-quality attribute from our standpoint have benefited from the sharp drop in

tailwind

lower quality enterprises.

Continued on page 8...

Letter to Our Stockholders

Good-Bye to All That (We Hope)

Calendar-year results for our closed-end funds fell a bit short of our expectations on a relative basis, even as all three of the portfolios finished the year with both solid second-half performances and more-than-respectable absolute returns. Certainly some holdings drew a benefit from the market s suddenly renewed affection for quality characteristics. Results as a whole therefore left us frustrated yet hopeful, for the reasons outlined above.

We have previously discussed the reasons for recent performance disappointments, but they are worth recapping for what we would like to think will be the last time, at least for a while. Beginning with 2007 s recession and moving through the global financial crisis into the early days of June 2012, the markets were highly volatile, closely correlated, and frequently disappointing. This pattern could first be seen emerging in the spring of 2010 and was cast in harder material by the small-cap high on April 29, 2011. So while the one- and three-year numbers for the major domestic indexes were strong through the end of 2012, investors continue to be leery of the market, most probably owing to its lack of a sustainable course, bullish or bearish, especially in the roughly 13-month period between the April 2011 high and the 2012 low in early June. More importantly, this cycle of high correlation often proved difficult for our closed-end portfolios.

2012 NAV TOTAL RETURNS FOR THE ROYCE FUNDS VS. RUSSELL 2000, RUSSELL MICROCAP AND THE RUSSELL 2500 as of 12/31/12

Certain immaterial adjustments were made to the net assets of Royce Micro-Cap Trust at 12/31/12 for financial reporting purposes, and as a result the net asset value originally calculated on that date and the total return based on that net asset value differs from the adjusted net asset value and total return reported in the Financial Highlights.

Throughout this time, we remained patient and disciplined, resolutely searching for companies that met our standards for quality and attractive valuation while investors grew more interested in other matters. On the one hand, they sought safety in fixed income instruments, utilities, or high-yielding vehicles such as REITs and MLPs; on the other hand they looked

6 | This page is not part of the 2012 Annual Report to Stockholders

for fast, dramatic growth, which most often came from highly leveraged companies in which we take no interest. For our part, we continued to see many companies across several sector and industry groups that answered to our preferred combination of quality and value. However, many of the largest company, industry and/or sector weightings in some portfolios have fared poorest, including those in the Energy, Materials, and Information Technology sectors. While all of this has been frustrating, none of it has changed the way in which we invest or construct portfolios. As we said in our Semiannual Review and Report, patience and discipline are not virtues to which we pay lip service. Our investment horizon will remain squarely focused on the long term, as it has for 40 years.

New Cycle, New Balance

The recent era of low rates and ample liquidity has not changed our view of the importance of strong balance sheets, high returns on invested capital, cash flow, or dividends. Many small-cap companies that possess any number of these characteristics underperformed the Russell 2000 in 2010, 2011, and the first half of 2012, which definitely hampered the effectiveness of our disciplined approach. This can be seen in the Funds three-, five-year, and in the case of Royce Value Trust, even 10-year, results. We did not enjoy watching certain portfolio favorites languish. But not once did we consider changing our core principles. We knew that we were in a highly anomalous market, one that we may not see again for more than a generation. So we stayed patient and consistent while we waited for the cycle to shift.

Our contention is that quality stocks underperformed through much of the recent cycle of correlation owing to both the zero-interest-rate policies that the Fed has implemented over the last few years and the related rounds of quantitative easing. With interest rates so low, companies were finding it very easy to restructure debt or take on more of it. The price companies were paying to do so was miniscule, so investors acted accordingly by rewarding a number of fast-growing, highly leveraged businesses while often ignoring those with strong balance sheets. In an environment where the cost of debt has been virtually nil, low-debt companies lost their traditional advantage. (Our Sidebar, piece provides some more details.) However, we also suspect that we have reached a stage where this advantage is diminishing because rates have been historically low for a few years now and monetary stimulus no longer has the same dramatic impact it had with the first two or three rounds of quantitative easing. In addition to their stalwart second-half returns, we think this is a good sign for high-quality small-cap stocks.

A Quality Cycle?

As correlation continues to abate, we expect to see more opportunities for quality stocks to flourish. This is ultimately why we were not surprised by the market s strength in the second half, even with ample ongoing uncertainty. We feel confident that the market has entered a cycle

We did not enjoy watching certain portfolio favorites languish. But not once did we consider changing our core principles. We knew that we were in a highly anomalous market, one that we may not see again for more than a generation. So we staved patient and consistent while we waited for the cycle to shift.

The current preference for passive strategies and ETFs at the expense of active management has also played a role. Within small-cap, active managers, especially those with a long-term orientation, tend to a quality bias in their portfolios, while passive index vehicles, especially those meant to replicate the Russell 2000, have no bias other than market cap and therefore have a higher weighting in lower-quality companies. Persistent redemptions of actively managed funds combined with modest inflows to ETFs have further distorted the low quality/high performance differential. The key question, then, is when this change? It is our view that it already have begun. Interest while at historic lows, cannot fall much lower. In fact, each successive round of quantitative easing is exerting less and less pressure rates while at the same time the specter of increased inflation down the road. While liquidity should remain abundant, the rate of change in the cost of capital has clearly peaked. By the same token, the of decline in market volatility has significantly slowed with the VIX back to its long-run averages. And while the global economy continues to grow, GDP statistics are anything but

robust. Low-quality companies
have
had an extended moment in the
sun,
but it is our strong belief that we
are
entering a new era for quality.

Letter to Our Stockholders

in which stock picking matters. Our optimism, cautious as it is, is bolstered by the fact that in the years ahead earnings growth can accelerate for small caps and should be robust as the economy continues to improve. While many companies are hesitant about capital expenditures, those issues have more to do with timing. That is, businesses were not willing to start spending until the President and Congress struck a deal. Yet our meetings with management teams have convinced us that there is no question about their willingness to invest.

In this context, it is worth mentioning that the tax and stimulus deal that was struck early in January still left important matters such as infrastructure spending, entitlements, and the next debt ceiling increase unresolved. So there will be opportunities for political intransigence to potentially affect the markets in 2013, and it will be interesting to see how investors respond to additional rounds of fiscal gridlock. Our thought is that greater levels of attention to business fundamentals will remain high. We believe that equities will continue their positive performance into 2013, that quality-oriented companies and active management approaches, especially within the small-cap universe, will continue their resurgence, and that non-U.S. small-caps will continue to surprise on the upside. We are very happy to say that it looks like a new, more historically typical cycle has begun.

Sincerely

Charles M. Royce

Manager s Discussion

Strong results in the final six months of 2012 helped Royce Value Trust (RVT) to enjoy a strong year on an absolute basis even as it came up a bit short on a relative scale. RVT gained 15.4% on an NAV (net asset value) basis and 16.2% on a market price basis in 2012 compared to gains of 16.3% for both of its unleveraged small-cap benchmarks, the Russell 2000 and S&P SmallCap 600 Indexes.

The Fund enjoyed full participation in the rally that enlivened the year s first quarter, up 13.9% on an NAV basis and 14.7% on a market price basis versus 12.4% for the Russell 2000 and 12.0% for the S&P SmallCap 600. This relative advantage was lost, however, once stock prices began to decline following a small-cap high on March 26. Investors once again shifted from bullish to bearish based on a now-familiar set of macro headlines concerning European debt and the pace of global economic growth, particularly in the U.S. and China. RVT fell hard in the second quarter, down 8.6% on an NAV basis and 8.9% on a market price basis versus respective declines of 3.5% and 3.6% for the Russell 2000 and S&P SmallCap 600.

Small-cap stocks reached their low for the year on June 4, 2012, though it would not be until July and August that the presence of a rally began to be felt. Though not as dynamic as the first quarter s bull run, the third quarter was the year s second shift into an up phase. The Fund once more did well as share prices climbed, gaining 5.1% on an NAV basis and 6.3% based on market price while the Russell 2000 was up 5.3% and the S&P SmallCap 600 rose 5.4%. For stocks as a whole, the fourth quarter was a more mixed period. Investors did their best to make sense of the effects of Hurricane Sandy, the elections, the looming fiscal cliff, and another round of quantitative easing announced by the Fed in mid-December. This muted the performance of RVT s benchmarks the Russell 2000 was up 1.9% in the fourth quarter while the S&P SmallCap 600 rose 2.2%. The Fund handily outpaced each benchmark for the same period, up 5.5% on an NAV basis and 4.6% on a market price basis. This gave the Fund an NAV advantage for the second half and from the 2012 small-cap low on June 4 through the end of December. For this period, RVT gained 17.4% on an NAV basis (+15.6% based on market price) versus respective gains of 16.3% and 15.8% for the Russell 2000 and S&P SmallCap 600.

Longer-term relative results were mixed, with some key pockets of strength. From the small-cap trough on March 9, 2009 through December 31, 2012, RVT was up 187.2% on an NAV basis and 207.0% on a market price basis versus a gain of 160.9% for the Russell 2000 and 174.6% for the S&P SmallCap 600. On an NAV basis, the Fund

outperformed both benchmarks for

All performance information reflects past performance, is presented on a total return basis, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at www.roycefunds.com. The market price of the Fund s shares will fluctuate, so that shares may be worth more or less than their original cost when sold. The Fund invests primarily in securities of small-and micro-cap companies, which may involve considerably more risk than investing in a more diversified portfolio of larger-cap companies. Regarding the two Good Ideas tables shown above, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund s performance for 2012.

10 | The Royce Funds 2012 Annual Report to Stockholders

Performance and Portfolio Review

the 15-, 25-year, and since inception (11/26/86) periods ended December 31, 2012. (The Fund also beat the Russell 2000 on both an NAV and market price basis for the 15-, 20-, 25-year, and since inception periods.) RVT s NAV average annual total return since inception was 10.3%.

Nordson Corporation, part of the machinery group in the top-performing Industrials sector, was the Fund s top contributor in 2012. The company has what we think is a highly attractive niche business making customized systems that apply adhesives, sealants, and coatings to consumer and industrial products during the manufacturing process. The company announced a 20% increase in its fiscal fourth quarter dividend in July, which not only excited investors, but also marked the 49th consecutive year in which it increased its dividend. We trimmed our position in August. The recovery in the housing industry spurred the rapidly rising stock price of Mohawk Industries in 2012, which in turn led us to take gains in February, May, November, and December. This conservatively capitalized company produces floor coverings for the residential and commercial markets. In addition to its robust earnings growth, investors seemed to like its aggressive attempts to capture market share by acquiring smaller competitors.

Shares of PMFG, a business we have owned since 1990, fell nearly 80% between its early February high and its 2012 low in late November, driven in large part by issuing a secondary offering priced at a sizable discount to its stock. As a manufacturer of custom products primarily for the natural gas industry, the company was also adversely affected by declining gas prices, increased expenses, and project delays, all of which hurt earnings. Fond of its growing business and attractive valuation, we increased our stake between February and September. Major Drilling Group International provides contract drilling services for the metals industry. Although the firm continued to operate profitably, revenue and earnings were hurt as precious metals miners pared back development projects. This in turn seemed to spark fears of a possible decrease in demand for its services. We added to our stake in 2012 before reducing it somewhat in early January 2013.

Manager s Discussion

The strong year for micro-cap stocks was reflected in the calendar-year results for Royce Micro-Cap Trust (RMT). The Fund was up 17.3% on an NAV (net asset value) basis and 14.0% on a market price basis in 2012

compared to 16.3% for its unleveraged small-cap benchmark, the Russell 2000 Index, and 19.8% for the unleveraged Russell Microcap Index.

Stocks as a whole took off fast in 2012, building on a rally that began in early October 2011 and making for a pleasant and bullish opening quarter. The Fund gained 11.4% on an NAV basis and 8.8% on a market price basis compared to a 12.4% increase for its benchmark and a gain of 15.3% for the microcap index. The rally lost steam after small-caps reached a first-half high on March 26, derailed for the third straight year by the same three concerns: sovereign debt in Europe and the pace of economic growth in the U.S. and China. These anxieties drove share prices down through most of the second quarter, with May seeing the largest losses. RMT fell 4.4% on an NAV basis and 3.8% based on its market price in the second quarter. That same period saw the Russell 2000 lose 3.5% while the Russell Microcap lost 2.0%.

Although the third quarter saw a resumption of bullish behavior, it was a more moderately paced run than what the market enjoyed during the first quarter. After reaching a 2012 low on June 4, share prices crept upward. For the third quarter, the Fund rose 6.8% on an NAV basis and 7.3% on a market price basis compared to a 5.3% increase for the Russell 2000 and a gain of 5.9% for the unleveraged Russell Microcap. The fourth quarter was a bit more volatile as investors tried to sort out the ramifications of Hurricane Sandy, the aftermath of the elections, the potential effects of the fiscal cliff, and a fourth round of quantitative easing. The Russell 2000 was up 1.9% and the Russell Microcap gained 0.04% while the Fund climbed 3.2% on an NAV basis and 1.4% based on market price for the year s final quarter.

The Fund s strong year helped it to build on previous relative advantages over longer-term time frames. From the small-cap trough on March 9, 2009 through December 31, 2012, RMT gained 197.8% on an NAV basis and 214.7% on a market price basis versus a gain of 160.9% for the Russell 2000 and 160.4% for the Russell Microcap. On both an NAV and market price basis, the Fund was ahead of each index for the 10-year period ended December 31, 2012 while it also outperformed the Russell 2000 for the 15-year and since inception (12/14/93) periods as well. (Data for the Russell Microcap only goes back to 2000.) RMT s NAV average annual total return since

RMT s NAV average annual total return since inception was 10.4%.

Eight of the Fund s nine equity sectors made positive contributions in 2012 while net losses for Energy the portfolio s lone detractor were relatively modest. Financials and Industrials led

Important Performance and Risk Information

All performance information reflects past performance, is presented on a total return basis, and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at www.roycefunds.com. Certain immaterial adjustments were made to the net assets of Royce Micro-Cap Trust at 12/31/12 for financial reporting purposes, and as a result the net asset value originally calculated on that date and the total return based on that net asset value differs from the adjusted net asset value and total return reported in the Financial Highlights. The market price of the Fund s shares will fluctuate, so that shares may be worth more or less than their original cost when sold. The Fund normally invests in micro-cap companies, which may involve considerably more risk than investing in a more diversified portfolio of larger-cap companies. Regarding the two Good Ideas tables shown above, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund s performance for 2012.

12 | The Royce Funds 2012 Annual Report to Stockholders

Performance and Portfolio Review

by a sizable margin while Consumer Discretionary, Health Care, and Information Technology also posted notable net gains. In fact, RMT s underweight in Health Care did not stop the sector from making a meaningful positive impact two of the Fund s top three contributors hailed from that sector. Cancer drug developer Celsion Corporation made progress toward FDA approval for its liver cancer treatment ThermoDox, which helped its shares to soar and led us to begin reducing our position in July. During November and December we sold our position in Acadia Pharmaceuticals. Its price shot up late in November after the company announced the success of its drug Pimavanserin in treating psychosis in patients with Parkinson s disease.

We also trimmed our stake in top contributor Integrated Electrical Services in October as its price rose. The company provides electrical contracting and maintenance services to the commercial, industrial, residential, and power line markets and also offers data communication services that include the installation of wiring for computer networks and fiber optic telecommunications systems. Its ongoing progress back to profitability seemed to attract investors, especially in the second half.

The stock price of PMFG, a business we have owned since 1994 in RMT s portfolio, fell nearly 80% between its early February high and its 2012 low in late November, driven in large part by issuing a secondary offering priced at a sizable discount to its stock. As a manufacturer of custom products primarily for the natural gas industry, the company was also affected by declining gas prices, increased expenses, and project delays, all of which hurt earnings. Still believing in its niche business and increasingly attractive valuation, we increased our stake between February and June. Tough times for the energy industry, disappointing earnings, and insider selling back in March all helped to drive investors away from Dawson Geophysical. The company acquires and processes three-dimensional seismic data used to analyze subsurface geological conditions for potential oil and natural gas reserves. Its margins remained solid, and it boasts what we think is a highly attractive niche business, so we were happy to hold our shares throughout 2012.

Manager s Discussion

We were very pleased with the strong second half turned in by Royce Focus Trust (FUND), even if it was not quite strong enough to give the Fund an advantage over its new benchmark for the calendar year. In 2012, FUND rose 11.4% on an NAV (net asset value) basis and 12.1% on a market price basis versus 17.9% for its new unleveraged benchmark, the Russell 2500 Index, and 16.3% for the similarly unleveraged Russell 2000 Index.

The year began on a positive note by extending

the rally that began off the October 3, 2011 small-cap low. In the bullish first quarter of 2012, the Fund rose 11.0% on an NAV basis and 12.0% on a market price basis. While by each measure these were strong absolute showings, the Fund lagged both the Russell 2500, which was up 13.0%, and the Russell 2000, which rose 12.4%. Any hopes that the nearly six-month bull phase might keep running based on the slowly improving U.S. economy were dashed following an early small-cap high on March 26, 2012. Driving investors away from stocks was another round of macro worries, including anxiety over European debt and currency issues and the strength of the U.S. and Chinese economies. The effect on stock prices was predictably negative, hitting many of the Fund s most heavily weighted, economically sensitive sectors hardest. The Fund fell 10.0% on an NAV basis and 8.3% on a market price basis in the second quarter, while for the same period the Russell 2500 lost 4.1% and the Russell 2000 fell 3.5%.

Following the June 4, 2012 small-cap low, the market shook loose of the bear. The Fund s relative results also began to improve substantially. For the third quarter, FUND climbed 10.1% on an NAV basis and 8.4% on a market price basis, in both cases beating the Russell 2500 (+5.6%) and the Russell 2000 (+5.3%). For most small-cap and mid-cap stocks the fourth quarter was slightly rockier, particularly from mid-September through mid-November. The Fund gave up some ground to both indexes in the fourth quarter, gaining 1.3% in NAV and 0.7% in market price while the Russell 2500 rose 3.1% and the Russell 2000 was up 1.9%. Yet FUND outpaced both indexes for the second half of 2012 on both an NAV (+11.5%) and market price (+9.2%) basis. The Russell 2500 was up 8.8% during this same period, while the Russell 2000 increased 7.2%.

During the most recent full market cycle period that ran from the previous small-cap peak on July 13, 2007 through the small-cap peak on April 29, 2011, the Fund increased 10.2% on an NAV basis versus 9.2% for its new benchmark and 6.6% for the Russell 2000. On an NAV and market price basis, FUND beat both indexes for the 10-year, 15-year, and

Performance and Portfolio Review

since inception of Royce s management (11/1/96) periods ended December 31, 2012. The Fund s average annual NAV total return for the since inception of our management period was 10.0%.

Westlake Chemical manufactures basic chemicals, vinyls, polymers, fabricated building products, plastics, and high-end plastic films used to wrap food. Natural gas is a feedstock for much of what it produces, which gave it a huge cost advantage thanks to slumping gas prices. A founder-controlled business with conservative and intelligent management, we think its ongoing prospects remain very strong, especially in light of the fact that it has yet to see much benefit from the reviving housing industry. We did, however, take gains in August as its stock price was climbing. Top holding Western Digital makes hard drives and related products. Its stock was quite volatile in 2012, though it was relatively more stable in the second half. After announcing in April that its disk prices were lower than they had been at the beginning of the year, its shares tumbled. The company bought back shares in the aftermath, which is nearly always a positive sign to us. The firm s earnings then surprised on the upside for the next two quarters, giving a boost to its stock price. Liking its ongoing prospects as a leader in its field, we were happy to hold a large position at the end of 2012.

Major Drilling Group International provides contract drilling services for the metals industry. Although the firm continued to operate profitably, revenue and earnings were hurt as precious metals miners pared back development projects. This in turn seemed to spark fears of a possible decrease in demand for its services. This looked to us like a case of guilt by association, so we built our position in June, August, and September. We have owned shares of steel and scrap metal recycler Schnitzer Steel Industries since 2004. Demand for recycled metals slackened amid the slow pace of growth in the U.S. Excess capacity, lower-than-normal spring scrap flows, and margins compressed from increases in raw materials and transport costs have all driven investors to keep selling while we continued to hold our shares in anticipation of a rebound in global industrial activity that we think will spark demand.

2012	Annual distribution total \$0.80		13.063	714		

¹ The purchase price used for annual distribution totals is a weighted average of the distribution reinvestment prices for the year.

² Other than for initial purchase, values are stated as of December 31 of the year indicated, after reinvestment of distributions.

³ Includes a return of capital.

^{16 |} The Royce Funds 2012 Annual Report to Stockholders

The following table details the share accumulations by an initial investor in the Funds who reinvested all distributions and participated fully in primary subscriptions for each of the rights offerings. Full participation in distribution reinvestments and rights offerings can maximize the returns available to a long-term investor. This table should be read in conjunction with the Performance and Portfolio Reviews of the Funds.

		Amount Purchase				NAV	Market

¹ The purchase price used for annual distribution totals is a weighted average of the distribution reinvestment prices for the year.

The Royce Funds 2012 Annual Report to Stockholders | 17

² Other than for initial purchase, values are stated as of December 31 of the year indicated, after reinvestment of distributions.

³ Includes a return of capital.

Distribution Reinvestment and Cash Purchase Options

Why should I reinvest my distributions?

By reinvesting distributions, a stockholder can maintain an undiluted investment in the Fund. The regular reinvestment of distributions has a significant impact on stockholder returns. In contrast, the stockholder who takes distributions in cash is penalized when shares are issued below net asset value to other stockholders.

How does the reinvestment of distributions from the Royce closed-end funds work?

The Funds automatically issue shares in payment of distributions unless you indicate otherwise. The shares are generally issued at the lower of the market price or net asset value on the valuation date.

How does this apply to registered stockholders?

If your shares are registered directly with a Fund, your distributions are automatically reinvested unless you have otherwise instructed the Funds—transfer agent, Computershare, in writing. A registered stockholder also has the option to receive the distribution in the form of a stock certificate or in cash if Computershare is properly notified.

What if my shares are held by a brokerage firm or a bank?

If your shares are held by a brokerage firm, bank, or other intermediary as the stockholder of record, you should contact your brokerage firm or bank to be certain that it is automatically reinvesting distributions on your behalf. If they are unable to reinvest distributions on your behalf, you should have your shares registered in your name in order to participate.

What other features are available for registered stockholders?

The Distribution Reinvestment and Cash Purchase Plans also allow registered stockholders to make optional cash purchases of shares of a Fund s common stock directly through Computershare on a monthly basis, and to deposit certificates representing your Fund shares with Computershare for safekeeping. The Funds investment adviser is absorbing all commissions on optional cash purchases under the Plans through December 31, 2012.

How do the Plans work for registered stockholders?

Computershare maintains the accounts for registered stockholders in the Plans and sends written confirmation of all transactions in the account. Shares in the account of each participant will be held by Computershare in non-certificated form

in the name of the participant, and each participant will be able to vote those shares at a stockholder meeting or by proxy. A participant may also send other stock certificates held by them to Computershare to be held in non-certificated form. There is no service fee charged to participants for reinvesting distributions. If a participant elects to sell shares from a Plan account, Computershare will deduct a \$2.50 fee plus brokerage commissions from the sale transaction. If a nominee is the registered owner of your shares, the nominee will maintain the accounts on your behalf.

How can I get more information on the Plans?

You can call an Investor Services Representative at (800) 221-4268 or you can request a copy of the Plan for your Fund from Computershare. All correspondence (including notifications) should be directed to: [Name of Fund] Distribution Reinvestment and Cash Purchase Plan, c/o Computershare, PO Box 43010, Providence, RI 02940-3010, telephone (800) 426-5523.

New additions in 2012.

- Non-income producing.
- All or a portion of these securities were pledged as collateral in connection with the revolving credit agreement at December 31, 2012. Total market value of pledged securities at December 31, 2012, was \$343,415,150.
- ³ At December 31, 2012, a portion of these securities were rehypothecated in connection with the Fund s revolving credit agreement in the aggregate amount of \$146,902,041.
- ⁴ These securities are defined as Level 2 securities due to fair value being based on quoted prices for similar securities. See Notes to Financial Statements.
- ⁵ Securities for which market quotations are not readily available represent 0.2% of net assets. These securities have been valued at their fair value under procedures approved by the Fund s Board of Directors. These securities are defined as Level 3 securities due to the use of significant unobservable inputs in the determination of fair value. See Notes to Financial Statements.
- ⁶ At December 31, 2012, the Fund owned 5% or more of the Company s outstanding voting securities thereby making the Company an Affiliated Company as that term is defined in the Investment Company Act of 1940. See Notes to Financial Statements.
- Includes securities first acquired in 2012 and less than 1% of net assets.

Bold indicates the Fund s 20 largest equity holdings in terms of December 31, 2012, market value.

TAX INFORMATION: The cost of total investments for Federal income tax purposes was \$971,980,024. At December 31, 2012, net unrealized appreciation for all securities was \$248,919,122, consisting of aggregate gross unrealized appreciation of \$342,393,387 and aggregate gross unrealized depreciation of \$93,474,265. The primary difference between book and tax basis cost is the timing of the recognition of losses on securities sold.

¹ The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund s Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund s net asset value is used on the purchase and sale dates instead of market value.

THE ACCOMPANYING NOTES ARE AN INTEGRAL PART OF THESE FINANCIAL STATEMENTS. 2012 Annual Report to Stockholders | 29

² The investment advisory fee is calculated based on average net assets over a rolling 60-month basis, while the above ratios of investment advisory fee expenses are based on the average net assets applicable to Common Stockholders over a 12-month basis.

³ Expense ratios based on total average net assets including liquidation value of Preferred Stock were 0.60%, 0.82%, 0.18%, 0.12% and 1.13% for the years ended December 31, 2012, 2011, 2010, 2009 and 2008, respectively.

Notes to Financial Statements

Summary of Significant Accounting Policies:

Royce Value Trust, Inc. (the "Fund"), was incorporated under the laws of the State of Maryland on July 1, 1986, as a diversified closed-end investment company. The Fund commenced operations on November 26, 1986.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdag s Electronic Bulletin Board, are valued at their last reported sales price or Nasdag official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund s Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from quoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund s investments, as noted above. These inputs are summarized in the three broad levels below:

Level 1 quoted prices in active markets for identical securities.

Level 2 other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements). The table below includes all Level 2 securities. Level 2 securities with values based on quoted prices for similar securities are noted in the Schedule of Investments.

Level 3 significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund s investments as of December 31, 2012. For a detailed breakout of common stocks by sector classification, please refer to the Schedule of Investments.

	Level 1	Level 2	Level 3	Total
Common Stocks	\$892,590,687	\$ 251,893,592	\$ 263,067	\$1,144,747,346
Preferred Stocks			1,504,800	1,504,800
Cash Equivalents		74,647,000		74,647,000

For the year ended December 31, 2012, certain securities have transferred in and out of Level 1 and Level 2 measurements as a result of the fair value pricing procedures for international equities. The Fund recognizes transfers between levels as of the end of the reporting period. At December 31, 2012, securities valued at \$1,328,435 were transferred from Level 2 to Level 1 within the fair value hierarchy.

Level 3 Reconciliation:

Realized and Unrealized

	Balance as of 12/31/11	Sales	Gain (Loss) 1	Balance as of 12/31/12
Common Stocks	\$ 1,701,029	\$ 456,781	\$ (981,181)	\$ 263,067
Preferred Stocks	1,278,090		226,710	1,504,800

¹ The net change in unrealized appreciation (depreciation) is included in the accompanying Statement of Operations. Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized. Net realized gain (loss) from investments and foreign currency transactions is included in the accompanying Statement of Operations.

30 | 2012 Annual Report to Stockholders

Notes to Financial Statements (continued)

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund s investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities.

Foreign Currency:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund s books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

Securities Lending:

The Fund loans securities through a lending agent to qualified institutional investors for the purpose of realizing additional income. Collateral for the Fund on all securities loaned is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral maintained is at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund retains the risk of any loss on the securities on loan as well as incurring the potential loss on investments purchased with cash collateral received for securities lending. The Fund is securities lending income consists of the income earned on investing cash collateral, plus any premium payments received for lending certain securities, less any rebates paid to borrowers and lending agent fees associated with the loan. The lending agent is not affiliated with Royce.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption Tax Information .

Distributions:

The Fund pays quarterly distributions on the Fund s Common Stock at the annual rate of 5% of the rolling average of the prior four calendar quarter-end NAVs of the Fund s Common Stock, with the fourth quarter distribution being the greater of 1.25% of the rolling average or the distribution required by IRS regulations. Prior to November 15, 2012, distributions to Preferred Stockholders were accrued daily and paid quarterly. Distributions to Common Stockholders are recorded on ex-dividend date. Distributable capital gains and/or net investment income were first allocated to Preferred Stockholder distributions, with any excess allocable to Common Stockholders. If capital gains and/or net investment income are allocated to both Preferred and Common Stockholders, the tax character of such allocations is proportional. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund s operations,

while expenses applicable to more than one of the Royce Funds are allocated equitably. Certain personnel, occupancy costs and other administrative expenses related to the Royce Funds are allocated by Royce & Associates, LLC (Royce) under an administration agreement and are included in administrative and office facilities and professional fees. The Fund has adopted a deferred fee agreement that allows the Directors to defer the receipt of all or a portion of directors fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

2012 Annual Report to Stockholders | 31

Notes to Financial Statements (continued)

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian s fee is paid indirectly by credits earned on the Fund s cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 2,103,737 and 2,076,969 shares of Common Stock as reinvestment of distributions by Common Stockholders for the years ended December 31, 2012 and December 31, 2011, respectively.

On November 15, 2012, the Fund redeemed all (8,800,000 shares) of its then outstanding 5.90% Cumulative Preferred Stock at the redemption price of \$25.00 per share plus accumulated and unpaid dividends through the redemption date of \$0.217153 per share.

Borrowings:

The Fund entered into a \$150,000,000 revolving credit agreement (the credit agreement) with BNP Paribas Prime Brokerage Inc. (BNPP) on November 14, 2012. The Fund pays a commitment fee of 0.50% per annum on the unused portion of the credit agreement. The credit agreement has a 360-day rolling term that resets daily; however, if the Fund exceeds certain net asset value triggers, the credit agreement may convert to a 60-day rolling term that resets daily. The Fund is required to pledge portfolio securities as collateral in an amount up to two times the loan balance outstanding and has granted a security interest in the securities pledged to, and in favor of, BNPP as security for the loan balance outstanding. If the Fund fails to meet certain requirements, or maintain other financial covenants required under the credit agreement, the Fund may be required to repay immediately, in part or in full, the loan balance outstanding under the credit agreement necessitating the sale of portfolio securities at potentially inopportune times. The credit agreement also permits, subject to certain conditions, BNPP to rehypothecate portfolio securities pledged by the Fund up to the amount of the loan balance outstanding. The Fund continues to receive payments in lieu of dividends and interest on rehypothecated securities. The Fund also has the right under the credit agreement to recall the rehypothecated securities from BNPP on demand. If BNPP fails to deliver the recalled security in a timely manner, the Fund will be compensated by BNPP for any fees or losses related to the failed delivery or, in the event a recalled security will not be returned by BNPP, the Fund, upon notice to BNPP, may reduce the loan balance outstanding by the amount of the recalled security failed to be returned. The Fund will receive a portion of the fees earned by BNPP in connection with the rehypothecation of portfolio securities.

As of December 31, 2012, the Fund has outstanding borrowings of \$150,000,000. During the period ended December 31, 2012, for which borrowings were outstanding, the Fund borrowed an average daily balance of \$150,000,000 at a weighted average borrowing cost of 1.26%. As of December 31, 2012, the aggregate value of rehypothecated securities was \$146,902,041. During the period ended December 31, 2012, the Fund earned \$38,430 in fees from rehypothecated securities.

Investment Advisory Agreement:

As compensation for its services under the Investment Advisory Agreement, Royce receives a fee comprised of a Basic Fee (Basic Fee) and an adjustment to the Basic Fee based on the investment performance of the Fund in relation to the investment record of the S&P SmallCap 600 Index (S&P 600").

The Basic Fee is a monthly fee equal to 1/12 of 1% (1% on an annualized basis) of the average of the Fund s month-end net assets applicable to Common Stockholders, plus the liquidation value of outstanding Preferred Stock, for the rolling 60-month period ending with such month (the "performance period"). The Basic Fee for each month is increased or decreased at the rate of 1/12 of .05% for each percentage point that the investment performance of the Fund exceeds, or is exceeded by, the percentage change in the investment record of the S&P 600 for the performance period by more than two percentage points. The performance period for each such month is a rolling 60-month period ending with such month. The maximum increase or decrease in the Basic Fee for any month may not exceed 1/12 of .5%. Accordingly, for each month, the maximum monthly fee rate as adjusted for performance is 1/12 of 1.5% and is payable if the investment performance of the Fund exceeds the percentage change in the investment record of the S&P 600 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the percentage change in the investment record of the S&P 600 exceeds the investment performance of the Fund by 12 or more percentage points for the performance period.

Notwithstanding the foregoing, Royce is not entitled to receive any fee for any month when the investment performance of the Fund for the rolling 36-month period ending with such month is negative. In the event that the Fund s investment performance for such a performance period is less than zero, Royce will not be required to refund to the Fund any fee earned in respect of any prior performance period.

Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund s Preferred Stock for any month in which the Fund s average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock s dividend rate.

32 | 2012 Annual Report to Stockholders

Notes to Financial Statements (continued)

Investment Advisory Agreement (continued):

For the twelve rolling 60-month periods in 2012, the Fund s investment performance ranged from 12% to 24% below the investment performance of the S&P 600. Accordingly, the net investment advisory fee consisted of a Basic Fee of \$11,677,855 and a net downward adjustment of \$5,838,926 for the performance of the Fund relative to that of the S&P 600. Additionally, Royce voluntarily waived a portion of its investment advisory fee (\$50,000) attributable to issues of the Fund s Preferred Stock for those months in which the Fund s average annual NAV total return failed to exceed the applicable Preferred Stock s dividend rate. For the year ended December 31, 2012, the Fund accrued and paid Royce investment advisory fees totaling \$5,788,929.

Purchases and Sales of Investment Securities:

For the year ended December 31, 2012, the costs of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$291,365,428 and \$391,096,851, respectively.

Distributions to Stockholders:

The tax character of distributions paid to common stockholders

during 2012 and 2011 was as follows:

The tax character of distributions paid to preferred stockholders

during 2012 and 2011 was as follows:

Distributions paid from: 2011 Distributions paid from: 2011 2012 2012 Ordinary income \$17,311,826 \$ 6,285,946 Ordinary income \$ 3,655,160 \$ 2.412.205 Long-term capital gain 37.846.455 27,538,533 Long-term capital gain 7.990.784 10.567.795

Return of capital 18,288,444 \$11,645,944 \$12,980,000

\$55,158,281 \$52,112,923

As of December 31, 2012, the tax basis components of distributable earnings included in stockholders equity were as follows:

Net unrealized appreciation (depreciation) \$248,906,706 Undistributed ordinary income 2,542,673 Undistributed capital gains 10,608,235

\$262,057,614

The difference between book and tax basis unrealized appreciation (depreciation) is attributable primarily to the tax deferral on wash sales, partnership investments and the unrealized gains on Passive Foreign Investment Companies.

For financial reporting purposes, capital accounts and distributions to stockholders are adjusted to reflect the tax character of permanent book/tax differences. These differences are primarily due to differing treatments of income and gains on various investment securities and foreign currency transactions held by the Fund, timing differences and different characterization of distributions made by the Fund. For the year ended December 31, 2012, the Fund recorded the following permanent reclassifications. Results of operations and net assets were not affected by these reclassifications.

Undistributed Net Accumulated Net Paid-in Investment Income \$(2,057,417) \$2,101,976 \$(44,559)

Management has analyzed the Fund s tax positions taken on federal income tax returns for all open tax years (2009-2012) and has concluded that as of December 31, 2012, no provision for income tax is required in the Fund s financial statements.

Transactions in Affiliated Companies:

An Affiliated Company as defined in the Investment Company Act of 1940, is a company in which a fund owns 5% or more of the company s outstanding voting securities at any time during the period. The Fund effected the following transactions in shares of such companies for year ended December 31, 2012:

	Shares	Market Value	Cost of	Cost of	Realized	Dividend	Shares	Market Value
Affiliated Company	12/31/11	12/31/11	Purchases	Sales	Gain (Loss)	Income	12/31/12	12/31/12
Timberland Bancorp	444,200	\$1,710,170					444,200	\$3,082,748
		\$1,710,170						\$3,082,748

2012 Annual Report to Stockholders | 33

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Royce Value Trust, Inc. New York, New York

We have audited the accompanying statement of assets and liabilities of Royce Value Trust, Inc., (Fund) including the schedule of investments, as of December 31, 2012, and the related statement of operations and statement of cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund s management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund s internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2012, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Royce Value Trust, Inc. at December 31, 2012, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

New additions in 2012.

¹ Non-income producing.

² All or a portion of these securities were pledged as collateral in connection with the revolving credit agreement at December 31, 2012. Total market value of pledged securities at December 31, 2012, was \$132,970,059.

³ These securities are defined as Level 2 securities due to fair value being based on quoted prices for similar securities. See Notes to Financial Statements.

⁴ At December 31, 2012, a portion of these securities were rehypothecated in connection with the Fund s revolving credit agreement in the aggregate amount of \$44,527,150.

- ⁵ Securities for which market quotations are not readily available represent 0.1% of net assets. These securities have been valued at their fair value under procedures approved by the Fund s Board of Directors. These securities are defined as Level 3 securities due to the use of significant unobservable inputs in the determination of fair value. See Notes to Financial Statements.
- ⁶ At December 31, 2012, the Fund owned 5% or more of the Company s outstanding voting securities thereby making the Company an Affiliated Company as that term is defined in the Investment Company Act of 1940. See Notes to Financial Statements.
- ⁷ Includes securities first acquired in 2012 and less than 1% of net assets.

Bold indicates the Fund s 20 largest equity holdings in terms of December 31, 2012, market value.

TAX INFORMATION: The cost of total investments for Federal income tax purposes was \$287,897,762. At December 31, 2012, net unrealized appreciation for all securities was \$74,387,342, consisting of aggregate gross unrealized appreciation of \$103,226,024 and aggregate gross unrealized depreciation of \$28,838,682. The primary difference between book and tax basis cost is the timing of the recognition of losses on securities sold.

¹ The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund s Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund s net asset value is used on the purchase and sale dates instead of market value.

² The investment advisory fee is calculated based on average net assets over a rolling 36-month basis, while the above ratios of investment advisory fee expenses are based on the average net assets applicable to Common Stockholders over a 12-month basis.

³ Expense ratios based on total average net assets including liquidation value of Preferred Stock were 1.10%, 0.93%, 0.91%, 1.21% and 1.26% for the years ended December 31, 2012, 2011, 2010, 2009 and 2008, respectively.

Notes to Financial Statements

Summary of Significant Accounting Policies:

Royce Micro-Cap Trust, Inc. (the Fund), was incorporated under the laws of the State of Maryland on September 9, 1993, as a diversified closed-end investment company. The Fund commenced operations on December 14, 1993.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdaq s Electronic Bulletin Board, are valued at their last reported sales price or Nasdaq official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund s Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from guoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund s investments, as noted above. These inputs are summarized in the three broad levels below:

Level 1 quoted prices in active markets for identical securities.

Level 2 other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements). The table below includes all Level 2 securities. Level 2 securities with values based on quoted prices for similar securities are noted in the Schedule of Investments.

Level 3 significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund s investments as of December 31, 2012. For a detailed breakout of common stocks by sector classification, please refer to the Schedule of Investments.

	Level 1	Level 2	Level 3	Total
Common Stocks	\$316,082,440	\$ 32,010,777	\$ 197,755	\$348,290,972
Preferred Stocks		1,319,132		1,319,132
Cash Equivalents		12,675,000		12,675,000

For the year ended December 31, 2012, certain securities have transferred in and out of Level 1 and Level 2 measurements as a result of the fair value pricing procedures for international equities. The Fund recognizes transfers between levels as of the end of the reporting period. At December 31, 2012, securities valued at \$2,755,554 were transferred from Level 2 to Level 1 within the fair value hierarchy.

Level 3 Reconciliation:

Realized and Unrealized

	Balance as of 12/31/11	Sales	Gain (Loss)¹	Balance as of 12/31/12	
Common Stocks	\$347,895	\$0	\$(150,140)	\$197,755	

¹The net change in unrealized appreciation (depreciation) is included in the accompanying Statement of Operations. Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized. Net realized gain (loss) from investments and foreign currency transactions is included in the accompanying Statement of Operations.

2012 Annual Report to Stockholders | 45

Notes to Financial Statements (continued)

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund s investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities.

Foreign Currency:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund s books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

Securities Lending:

The Fund loans securities through a lending agent to qualified institutional investors for the purpose of realizing additional income. Collateral for the Fund on all securities loaned is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral maintained is at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund retains the risk of any loss on the securities on loan as well as incurring the potential loss on investments purchased with cash collateral received for securities lending. The Fund is securities lending income consists of the income earned on investing cash collateral, plus any premium payments received for lending certain securities, less any rebates paid to borrowers and lending agent fees associated with the loan. The lending agent is not affiliated with Royce.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption Tax Information .

Distributions:

The Fund pays quarterly distributions on the Fund s Common Stock at the annual rate of 5% of the rolling average of the prior four calendar quarter-end NAVs of the Fund s Common Stock, with the fourth quarter distribution being the greater of 1.25% of the rolling average or the distribution required by IRS regulations. Prior to November 15, 2012, distributions to Preferred Stockholders were accrued daily and paid quarterly. Distributions to Common Stockholders are recorded on ex-dividend date. Distributable capital gains and/or net investment income were first allocated to Preferred Stockholder distributions, with any excess allocable to Common Stockholders. If capital gains and/or net investment income are allocated to both Preferred and Common Stockholders, the tax character of such allocations is proportional. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund s operations,

while expenses applicable to more than one of the Royce Funds are allocated equitably. Certain personnel, occupancy costs and other administrative expenses related to the Royce Funds are allocated by Royce & Associates, LLC (Royce) under an administration agreement and are included in administrative and office facilities and professional fees. The Fund has adopted a deferred fee agreement that allows the Directors to defer the receipt of all or a portion of directors fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

46 | 2012 Annual Report to Stockholders

Notes to Financial Statements (continued)

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian s fee is paid indirectly by credits earned on the Fund s cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 804,089 and 881,817 shares of Common Stock as reinvestment of distributions by Common Stockholders for the years ended December 31, 2012 and December 31, 2011, respectively.

On November 15, 2012, the Fund redeemed all (2,400,000 shares) of its then outstanding 6.00% Cumulative Preferred Stock at the redemption price of \$25.00 per share plus accumulated and unpaid dividends through the redemption date of \$0.220833 per share.

Borrowings:

The Fund entered into a \$45,000,000 revolving credit agreement (the credit agreement) with BNP Paribas Prime Brokerage Inc. (BNPP) on November 14, 2012. The Fund pays a commitment fee of 0.50% per annum on the unused portion of the credit agreement. The credit agreement has a 360-day rolling term that resets daily; however, if the Fund exceeds certain net asset value triggers, the credit agreement may convert to a 60-day rolling term that resets daily. The Fund is required to pledge portfolio securities as collateral in an amount up to two times the loan balance outstanding and has granted a security interest in the securities pledged to, and in favor of, BNPP as security for the loan balance outstanding. If the Fund fails to meet certain requirements, or maintain other financial covenants required under the credit agreement, the Fund may be required to repay immediately, in part or in full, the loan balance outstanding under the credit agreement necessitating the sale of portfolio securities at potentially inopportune times. The credit agreement also permits, subject to certain conditions, BNPP to rehypothecate portfolio securities pledged by the Fund up to the amount of the loan balance outstanding. The Fund continues to receive payments in lieu of dividends and interest on rehypothecated securities. The Fund also has the right under the credit agreement to recall the rehypothecated securities from BNPP on demand. If BNPP fails to deliver the recalled security in a timely manner, the Fund will be compensated by BNPP for any fees or losses related to the failed delivery or, in the event a recalled security will not be returned by BNPP, the Fund, upon notice to BNPP, may reduce the loan balance outstanding by the amount of the recalled security failed to be returned. The Fund will receive a portion of the fees earned by BNPP in connection with the rehypothecation of portfolio securities.

As of December 31, 2012, the Fund has outstanding borrowings of \$45,000,000. During the period ended December 31, 2012, for which borrowings were outstanding, the Fund borrowed an average daily balance of \$45,000,000 at a weighted average borrowing cost of 1.26%. As of December 31, 2012, the aggregate value of rehypothecated securities was \$44,527,150. During the period ended December 31, 2012, the Fund earned \$10,611 in fees from rehypothecated securities.

Investment Advisory Agreement:

As compensation for its services under the Investment Advisory Agreement, Royce receives a fee comprised of a Basic Fee (Basic Fee) and an adjustment to the Basic Fee based on the investment performance of the Fund in relation to the investment record of the Russell 2000.

The Basic Fee is a monthly fee equal to 1/12 of 1% (1% on an annualized basis) of the average of the Fund s month-end net assets applicable to Common Stockholders, plus the liquidation value of outstanding Preferred Stock, for the rolling 36-month period ending with such month (the performance period). The Basic Fee for each month is increased or decreased at the rate of 1/12 of .05% for each percentage point that the investment performance of the Fund exceeds, or is exceeded by, the percentage change in the investment record of the Russell 2000 for the performance period by more than two percentage points. The performance period for each such month is a rolling 36-month period ending with such month. The maximum increase or decrease in the Basic Fee for any month may not exceed 1/12 of .5%. Accordingly, for each month, the maximum monthly fee rate as adjusted for performance is 1/12 of 1.5% and is payable if the investment performance of the Fund exceeds the percentage change in the investment record of the Russell 2000 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the percentage change in the investment record of the Russell 2000 exceeds the investment performance of the Fund by 12 or more percentage points for the performance period.

Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund s Preferred Stock for any month in which the Fund s average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock s dividend rate.

For the twelve rolling 36-month periods in 2012, the Fund s investment performance ranged from 25% above to 9% below the investment performance of the Russell 2000. Accordingly, the net investment advisory fee consisted of a Basic Fee of \$3,352,647

and a net upward adjustment of \$31,055 for the performance of the Fund relative to that of the Russell 2000. Additionally, Royce voluntarily waived a portion of its investment advisory fee (\$51,666) attributable to issues of the Fund s Preferred Stock for those months in which the Fund s average annual NAV total return failed to exceed the applicable Preferred Stock s dividend rate. For the year ended December 31, 2012, the Fund accrued and paid Royce investment advisory fees totaling \$3,332,036.

2012 Annual Report to Stockholders | 47

Notes to Financial Statements (continued)

Purchases and Sales of Investment Securities:

For the year ended December 31, 2012, the costs of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$102,670,073 and \$89,015,662, respectively.

Distributions to Stockholders:

The tax character of distributions paid to common stockholders

during 2012 and 2011 was as follows:

The tax character of distributions paid to preferred stockholders

during 2012 and 2011 was as follows:

Distributions paid from: Distributions paid from: <u>2012</u> 2011 <u> 2012</u> 2011 Ordinary income \$ 6,023,066 \$ 1,505,199 Ordinary income \$1,332,543 660,851 2,939,149 Long-term capital gain 8,576,463 6,694,405 Long-term capital gain 1,897,457

Return of capital 6,511,252 \$3,230,000 \$3,600,000

> \$14,599,529 \$14,710,856

As of December 31, 2012, tax basis components of distributable earnings included in stockholders equity were as follows:

Net unrealized appreciation (depreciation) \$74,374,486 Undistributed ordinary income 3,893,463 Undistributed capital gains 5,998,792

\$84,266,741

The difference between book and tax basis unrealized appreciation (depreciation) is attributable primarily to the tax deferral on wash sales, partnership investments and the unrealized gains on Passive Foreign Investment Companies.

For financial reporting purposes, capital accounts and distributions to stockholders are adjusted to reflect the tax character of permanent book/tax differences. These differences are primarily due to differing treatments of income and gains on various investment securities and foreign currency transactions held by the Fund, timing differences and different characterization of distributions made by the Fund. For the year ended December 31, 2012, the Fund recorded the following permanent reclassifications. Results of operations and net assets were not affected by these reclassifications.

Undistributed Net Accumulated Net Paid-in Investment Income Realized Gain (Loss) Capital \$203,869 \$64,688 \$(268,557)

Management has analyzed the Fund s tax positions taken on federal income tax returns for all open tax years (2009-2012) and has concluded that as of December 31, 2012, no provision for income tax is required in the Fund s financial statements.

Transactions in Affiliated Companies:

An Affiliated Company as defined in the Investment Company Act of 1940, is a company in which a fund owns 5% or more of the company s outstanding voting securities at any time during the period. The Fund effected the following transactions in shares of such companies for the year ended December 31, 2012:

> Shares Market Value Cost of Cost of Realized Dividend Shares **Market Value**

Affiliated Company	12/31/11	12/31/11	Purchases	Sales	Gain (Loss)	Income	12/31/12	12/31/12
Integrated Electrical Services	1,122,500	\$2,155,200		\$42,219	\$86,514		1,099,679	\$5,124,504
		\$2,155,200			\$86,514			\$5,124,504

48 | 2012 Annual Report to Stockholders

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Royce Micro-Cap Trust, Inc. New York, New York

We have audited the accompanying statement of assets and liabilities of Royce Micro-Cap Trust, Inc., (Fund) including the schedule of investments, as of December 31, 2012, and the related statement of operations and statement of cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund s management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund s internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2012, by correspondence with the custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Royce Micro-Cap Trust, Inc. at December 31, 2012, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Liquidation preference per share		\$	25.00	\$	25.00	\$	25.00	\$	2
Average month-end market value per share		\$	25.65	\$	25.38	\$	23.56	\$	2

¹ The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund s Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund s net asset value is used on the purchase and sale dates instead of market value.

THE ACCOMPANYING NOTES ARE AN INTEGRAL PART OF THESE FINANCIAL STATEMENTS. 2012 Annual Report to Stockholders | 55

² Expense ratios based on total average net assets including liquidation value of Preferred Stock were 1.17%, 1.16%, 1.16% and 1.14% for the years ended December 31, 2012, 2011, 2010, 2009 and 2008, respectively.

Royce Focus Trust

Notes to Financial Statements

Summary of Significant Accounting Policies:

Royce Focus Trust, Inc. (the Fund), is a diversified closed-end investment company incorporated under the laws of the State of Maryland. The Fund commenced operations on March 2, 1988, and Royce & Associates, LLC (Royce) assumed investment management responsibility for the Fund on November 1, 1996.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

At December 31, 2012, officers, employees of Royce, Fund directors, the Royce retirement plans and other affiliates owned 25% of the Fund.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdag s Electronic Bulletin Board, are valued at their last reported sales price or Nasdaq official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund s Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from quoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund s investments, as noted above. These inputs are summarized in the three broad levels below:

Level 1 quoted prices in active markets for identical securities.

Level 2 other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements). The table below includes all Level 2 securities. Any Level 2 securities with values based on quoted prices for similar securities would be noted in the Schedule of Investments.

Level 3 significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund s investments as of December 31, 2012. For a detailed breakout of common stocks by sector classification, please refer to the Schedule of Investments.

	Level 1	Level 2	Level 3	Total
Common Stocks	\$ 126,674,540	\$ 33,868,929	\$	\$160,543,469
Cash Equivalents	1,293,175	3.054.000		4,347,175

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund s investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and

maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities.

56 | 2012 Annual Report to Stockholders

Royce Focus Trust

Notes to Financial Statements (continued)

Foreign Currency:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund s books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

Securities Lending:

The Fund loans securities through a lending agent to qualified institutional investors for the purpose of realizing additional income. Collateral for the Fund on all securities loaned is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral maintained is at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund retains the risk of any loss on the securities on loan as well as incurring the potential loss on investments purchased with cash collateral received for securities lending. The Fund is securities lending income consists of the income earned on investing cash collateral, plus any premium payments received for lending certain securities, less any rebates paid to borrowers and lending agent fees associated with the loan. The lending agent is not affiliated with Royce.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption Tax Information .

Distributions:

The Fund pays quarterly distributions on the Fund s Common Stock at the annual rate of 5% of the rolling average of the prior four calendar quarter-end NAVs of the Fund s Common Stock, with the fourth quarter distribution being the greater of 1.25% of the rolling average or the distribution required by IRS regulations. Prior to November 15, 2012, distributions to Preferred Stockholders were accrued daily and paid quarterly. Distributions to Common Stockholders are recorded on ex-dividend date. Distributable capital gains and/or net investment income were first allocated to Preferred Stockholder distributions, with any excess allocable to Common Stockholders. If capital gains and/or net investment income are allocated to both Preferred and Common Stockholders, the tax character of such allocations is proportional. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund s operations, while expenses applicable to more than one of the Royce Funds are allocated equitably. Certain personnel, occupancy costs and other administrative expenses related to the Royce Funds are allocated by Royce under an administration agreement and are included in administrative and office facilities and professional fees. The Fund has adopted a deferred fee agreement that allows the Directors to defer the receipt of all or a portion of directors fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian s fee is paid indirectly by credits

earned on the Fund s cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 869,648 and 735,388 shares of Common Stock as reinvestment of distributions by Common Stockholders for the years ended December 31, 2012 and December 31, 2011, respectively.

On November 15, 2012, the Fund redeemed all (1,000,000 shares) of its then outstanding 6.00% Cumulative Preferred Stock at the redemption price of \$25.00 per share plus accumulated and unpaid dividends through the redemption date of \$0.220833 per share.

2012 Annual Report to Stockholders | 57

Royce Focus Trust

Notes to Financial Statements (continued)

Investment Advisory Agreement:

The Investment Advisory Agreement between Royce and the Fund provides for fees to be paid at an annual rate of 1.0% of the Fund s average daily net assets applicable to Common Stockholders plus the liquidation value of Preferred Stock. Prior to November 15, 2012, Royce had voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund s Preferred Stock for any month in which the Fund s average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock s dividend rate. For the year ended December 31, 2012, the Fund accrued and paid Royce investment advisory fees totaling \$1,806,797.

Purchases and Sales of Investment Securities:

For the year ended December 31, 2012, the costs of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$25,145,991 and \$36,025,011, respectively.

Distributions to Stockholders:

Return of capital

The tax character of distributions paid to common stockholders

during 2012 and 2011 was as follows:

The tax character of distributions paid to preferred stockholders

\$1,345,843

\$1,500,000

during 2012 and 2011 was as follows:

Distributions paid from: Distributions paid from: 2012 2012 2011 2011 146.380 Ordinary income \$1,960,249 561.089 Ordinary income 275.745 Long-term capital gain 7.607.559 5.188.567 Long-term capital gain 1.070.098 1.353.620

·

\$ 9,567,808 \$ 8,206,552

As of December 31, 2012, the tax basis components of distributable earnings included in stockholders equity were as follows:

Net unrealized appreciation (depreciation) \$ 25,728,039
Post October loss* (42
Undistributed ordinary income 104,482
Undistributed capital gains 413,256

\$26,245,735

2,456,896

The difference between book and tax basis unrealized appreciation (depreciation) is attributable primarily to partnership investments.

For financial reporting purposes, capital accounts and distributions to stockholders are adjusted to reflect the tax character of permanent book/tax differences. These differences are primarily due to differing treatments of income and gains on various investment securities and foreign currency transactions held by the Fund, timing differences and different characterization of distributions made by the Fund. For the year ended December 31, 2012, the Fund recorded the following permanent reclassifications. Results of operations and net assets were not affected by these reclassifications.

Undistributed Net Investment Income \$(3,082)

Accumulated Net Realized Gain (Loss) \$3.082

^{*} Under the current tax law, capital losses, foreign currency losses and losses realized on Passive Foreign Investment Companies after October 31 may be deferred and treated as occurring on the first day of the following fiscal year. As of December 31, 2012, the Fund had \$42 of post October currency losses.

Management has analyzed the Fund s tax positions taken on federal income tax returns for all open tax years (2009-2012) and has concluded that as of December 31, 2012, no provision for income tax is required in the Fund s financial statements.

58 | 2012 Annual Report to Stockholders

Royce Focus Trust

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Royce Focus Trust, Inc. New York, New York

We have audited the accompanying statement of assets and liabilities of Royce Focus Trust, Inc., (Fund) including the schedule of investments, as of December 31, 2012, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund s management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund s internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2012, by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Royce Focus Trust, Inc. at December 31, 2012, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

The Russell 2000 Index is an index of domestic small-cap stocks. It measures the performance of the 2,000 smallest publicly traded U.S. companies in the Russell 3000 Index. The Russell 2500 is an index of 2,500 smallest publicly traded U.S. companies in the Russell Microcap Index includes 1,000 of the smallest securities in the Russell 2000 Index along with the next smallest eligible securities as determined by Russell. The Russell 1000 Index is an index of domestic large-cap stocks. It measures the performance of the 1,000 largest publicly traded companies in the Russell 3000 Index. The Russell Midcap Index measures the performance of the midcap segment of the U.S. equity universe. It includes approximately 800 of the smallest securities in the Russell 1000 Index. The Russell Global ex-U.S. Large Cap Index is an index of global large-cap stocks, excluding the United States. The Russell Global ex-U.S. Small Cap Index is an index of global small-cap stocks, excluding the United States. The S&P 500 and SmallCap 600 are indexes of U.S. large- and small-cap stocks, respectively, selected by Standard & Poor s based on market size, liquidity, and industry grouping, among other factors. The Nasdaq Composite is an index of the more than 3,000 common equities listed on the Nasdaq stock exchange. Returns for the market indexes used in this report were based on information supplied to Royce by Russell Investments.

Forward-Looking Statements

This material contains forward-looking statements within the meaning of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve risks and uncertainties, including, among others, statements as to:

the Funds future operating results

the prospects of the Funds portfolio companies

the impact of investments that the Funds have made or may make

the dependence of the Funds future success on the general economy and its impact on the companies and industries in which the Funds invest, and

the ability of the Funds portfolio companies to achieve their objectives.

This Review and Report uses words such as anticipates, believes, expects, future, intends, and similar expressions to ide forward-looking statements. Actual results may differ materially from those projected in the forward-looking statements for any reason.

The Royce Funds have based the forward-looking statements included in this *Review and Report* on information available to us on the date of the report, and we assume no obligation to update any such forward-looking statements. Although The Royce Funds undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make through future stockholder communications or reports.

Authorized Share Transactions

Royce Value Trust, Royce Micro-Cap Trust and Royce Focus Trust may each repurchase up to 5% of the issued and outstanding shares of its respective common stock during the year ending December 31, 2013. Any such repurchases would take place at then prevailing prices in the open market or in other transactions. Common stock repurchases would be effected at a price per share that is less than the share s then current net asset value.

Royce Value Trust, Royce Micro-Cap Trust and Royce Focus Trust are also authorized to offer their common stockholders an opportunity to subscribe for additional shares of their common stock through rights offerings at a price per share that may be less than the share s then current net asset value. The timing and terms of any such offerings are within each Board s discretion.

Annual Certifications

As required, the Funds have submitted to the New York Stock Exchange (NYSE) for Royce Value Trust and Royce Micro-Cap

Trust and to Nasdaq for Royce Focus Trust, respectively, the annual certification of the Funds Chief Executive Officer that he is not aware of any violation of the NYSE s or Nasdaq s Corporate Governance listing standards. The Funds also have included the certification of the Funds Chief Executive Officer and Chief Financial Officer required by section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to the Funds form N-CSR for the period ended December 31, 2012, filed with the Securities and Exchange Commission.

Proxy Voting

A copy of the policies and procedures that The Royce Funds use to determine how to vote proxies relating to portfolio securities and information regarding how each of The Royce Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available, without charge, on The Royce Funds website at www.roycefunds.com, by calling (800) 221-4268 (toll-free) and on the website of the Securities and Exchange Commission (SEC), at www.sec.gov.

Form N-Q Filing

The Funds file their complete schedules of investments with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Funds Forms N-Q are available on the SEC s website at www.sec.gov. The Royce Funds holdings are also on the Funds website approximately 15 to 20 days after each calendar quarter end and remain available until the next quarter s holdings are posted. The Funds Forms N-Q may also be reviewed and copied at the SEC s Public Reference Room in Washington, D.C. To find out more about this public service, call the SEC at (800) 732-0330. The Funds complete schedules of investments are updated quarterly, and are available at www.roycefunds.com.

^{62 |} The Royce Funds 2012 Annual Report to Stockholders

2012: In Quotes

History has shown that lousy economic conditions, or even dismal corporate results, don t necessarily lead to disappointing stock market returns in any given year or decade, for that matter.

Paul J. Lim, nytimes.com, December 15, 2012

Points To Ponder

Bonds are thought to be lower-risk investments; we believe that, at today s prices, long-term bonds are very risky. Bill Nygren, Oakmark Funds, *Morningstar Advisor*, October 12, 2012

Our national wealth didn t come from politicians of any ilk, level, office or ideology. It came from the long-term, much defiled 1% of the population and their dedicated followers via the marvelous magic of capitalism.

Ken Fisher, Forbes. November 19, 2012

Profit margins are probably the most mean-reverting series in finance, and if profit margins do not mean-revert, then something has gone badly wrong with capitalism. If high profits do not attract competition, there is something wrong with the system and it is not functioning properly.

Jeremy Grantham

Individual and institutional investors are insuring that they will lose money on Treasuries [after inflation] over the next 10 years when they by-pass the chance to make money in equities.

Noah Blackstein, Barron s, July 14, 2012

It is important to recognize that results in the short term reflect a lot of randomness. Even skillful managers will slump, and unskillful managers will shine. But over the long haul, good process wins.

Michael Mauboussin, Daily News & Analysis, June 4, 2012

The market always does what it s supposed to do only never when it s supposed to do it.

Arnold Van De Berg

Do not trust financial market risk models. Despite the predilection of some analysts to model the financial markets using sophisticated mathematics, the markets are governed by behavioral science, not physical science.

Seth Klarman

In Absolute Agreement

Whenever you find yourself on the side of the majority, it is time to pause and reflect.

Mark Twain

To preserve independence, we must not let our rulers load us with perpetual debt. We must make our election between economy and liberty, or profusion and servitude.

Thomas Jefferson

It s never as good as you think it is when it s great, and never as bad as you think it is when it s bad.

Preston Athey, Barron s, June 16, 2012

Leverage reduces the investor s critical asset: patience.

Jeremy Grantham, GMO Letter, February 2012

We don t have to be smarter than the rest. We have to be more disciplined than the rest.

Warren Buffett, 2002

Cocktail Conversation

A decade ago, jewelry accounted for more than 90% of global gold demand...Jewelry accounted for just 43% of global demand in the 2012 first half.

The Wall Street Journal, November 12, 2012

The one who follows the crowd will usually get no further than the crowd. The one who walks alone is likely to find himself in places no one has ever been.

Albert Einstein

Timeless Tidbits

The key to happiness is good health and a bad memory.

Ingrid Bergman

The things that will destroy America are prosperity at any price, peace at any price, safety first instead of duty first and love of soft living and the get-rich-quick theory of life.

Theodore Roosevelt

You can t live a perfect day without doing something for someone who will never be able to repay you. John Wooden

The Lessons of 40 Years

November 2012 marked the 40th anniversary of Chuck Royce s management of Royce Pennsylvania Mutual Fund. Forty years is a long time to do anything, of course, so this happy and momentous event has naturally focused our attention on what we have learned from managing portfolios with a small-cap value orientation. More precisely, we thought about what the most significant lessons have been over four full decades in the mutual fund business. Ultimately, three ideas made it to the top of our list.

The first is the importance of managing risk. Chuck s formative years running the Fund coincided with the severe bear market of 1973-4, precipitated by the fall of the Nifty Fifty, a group of well known large-cap stocks that had previously been thought to be almost impervious to major market corrections (it would not be the last time a group of stocks earned and lost that kind of lofty reputation). Chuck s portfolio shed value as dramatically as most others. The bear market recalled to him one of the central lessons of value investing, one that became integral to his own burgeoning approach capital preservation is as critical to building strong returns as capital appreciation.

As the Fund began to recover from the bear market near the end of 1974, Chuck began to concentrate his efforts on finding what he thought were well-managed companies with the financial strength to withstand adversity. A set of criteria soon emerged that he wanted in each portfolio holding. This list included a strong balance sheet, high returns on capital, and the ability to generate free cash flow. He reasoned that companies with these attributes had what it took to better hold their value during difficult periods for the company, its industry, or the economy as a whole.

The second lesson in some ways grew out of the first. Chuck saw that small-caps, especially in the first two-and-a-half decades of his history with the Fund, were often vulnerable and volatile. Yet within the large and diverse small-cap universe were many conservatively capitalized, effectively managed businesses that performed very well, notably over full market cycle periods. These lengthier spans tended to smooth out some of the inherent volatility to which nearly every company in the asset class was subject to some degree. There was also a benefit to be drawn from seeing how a company performed in both up and down markets, an observation he quickly extended to his own approach. Many styles did well in up markets; others held up in downturns. Chuck wanted an approach that could potentially excel through both up and down phases through full market cycles, in other words. He decided that an approach that did better in down phases while remaining competitive on the upside would work best in trying to meet that objective. This is how the firm s emphasis on long-term returns became crucial.

From this came the importance of patience and absolute returns. Stressing long-term results has often meant that our Funds were out of sync with their benchmarks over short- and/or intermediate-term periods. It also meant that, even when the Funds outpaced their respective benchmarks over market cycle and other long-term performance periods, we still care most about absolute returns. We thoroughly enjoy outperforming our small-cap benchmarks, but we learned early in our tenure that one cannot eat from the table of relative results. Given the choice, we would much prefer doubling our investors—and our own money every five to seven years or so to the occasional victory over a small-cap index.

Anniversaries nearly always lead to a look behind, a gaze through life s rear-view mirror. As we engage in a review of what has mattered over the years, what pleases us most about our long-term record are the lives that our investments have helped to make better. Close behind is the realization that so much of what was important then remains important now because it still works.

The thoughts in this essay concerning the stock market are solely those of Royce & Associates and, of course, there can be no assurance with regard to future market movements.

About The Royce Funds

Wealth Of Experience

With approximately \$35 billion in total assets under management, Royce & Associates is committed to the same small-company investing principles that have served us well for 40 years. Charles M. Royce, our President and Co-Chief Investment Officer, enjoys one of the longest tenures of any active mutual fund manager. Royce s investment staff also includes Co-Chief Investment Officer W. Whitney George, 18 Portfolio Managers, four assistant portfolio managers and analysts, and eight traders.

Multiple Funds, Common Focus

Our goal is to offer both individual and institutional investors the best available smaller-cap portfolios. Unlike a lot of mutual fund groups with broad product offerings, we have chosen to concentrate on smaller-company investing by providing investors with a range of funds that take full advantage of this large and diverse sector.

Consistent Discipline

Our approach emphasizes paying close attention to risk and maintaining the same discipline, regardless of market movements and trends. The price we pay for a security must be significantly below our appraisal of its current worth. This requires a thorough analysis of the financial and business dynamics of an enterprise, as though we were purchasing the entire company.

Co-Ownership Of Funds

It is important that our employees and shareholders share a common financial goal; our officers, employees and their families currently have approximately \$147 million invested in *The Royce Funds*.

Item 2. Code(s) of Ethics. As of the end of the period covered by this report, the Registrant had adopted a code of ethics, as defined in Item 2 of Form N-CSR, applicable to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. A copy of this code of ethics is filed as an exhibit to this Form N-CSR. No substantive amendments were approved or waivers were granted to this code of ethics during the period covered by this report.

Item 3. Audit Committee Financial Expert.

- (a)(1) The Board of Directors of the Registrant has determined that it has an audit committee financial expert.
- (a)(2) Arthur S. Mehlman and Patricia W. Chadwick were designated by the Board of Directors as the Registrant s Audit Committee Financial Experts, effective April 15, 2004 and April 8, 2010, respectively. Mr. Mehlman and Ms. Chadwick are independent as defined under Item 3 of Form N-CSR.

Item 4. Principal Accountant Fees and Services.

(a) Audit Fees:

Year ended December 31, 2012 - \$29,000 Year ended December 31, 2011 - \$27,500

(b) Audit-Related Fees:

Year ended December 31, 2012 - \$1,500 Not Applicable

Year ended December 31, 2011 - \$1,500 Preparation of reports to rating agency for Preferred Stock

(c) Tax Fees:

Year ended December 31, 2012 - \$7,100 - Preparation of tax returns Year ended December 31, 2011 - \$6,900 - Preparation of tax returns

(d) All Other Fees:

Year ended December 31, 2012 - \$0 Year ended December 31, 2011 - \$0

(e)(1) Annual Pre-Approval: On an annual basis, the Registrant s independent auditor submits to the Audit Committee a schedule of proposed audit, audit-related, tax and other non-audit services to be rendered to the Registrant and/or investment adviser(s) for the following year that require pre-approval by the Audit Committee. This schedule provides a description of each type of service that is expected to require pre-approval and the maximum fees that can be paid for each such service without further Audit Committee approval. The Audit Committee then reviews and determines whether to approve the types of scheduled services and the projected fees for them. Any subsequent revision to already pre-approved services or fees (including fee increases) are presented for consideration at the next regularly scheduled Audit Committee meeting, as needed.

If subsequent to the annual pre-approval of services and fees by the Audit Committee, the Registrant or one of its affiliates determines that it would like to engage the Registrant s independent auditor to perform a service not already pre-approved, the request is to be submitted to the Registrant s Chief Financial Officer, and if he or she determines that the service fits within the independence guidelines (e.g., it is not a prohibited service), he or she will then arrange for a discussion of the proposed service and fee to be included on the agenda for the next regularly scheduled Audit Committee meeting so that pre-approval can be considered.

Interim Pre-Approval: If, in the judgment of the Registrant s Chief Financial Officer, a proposed engagement needs to commence before the next regularly scheduled Audit Committee meeting, he or she shall submit a written summary of the proposed engagement to all members of the Audit Committee, outlining the services, the estimated maximum cost, the category of the services (e.g., audit, audit-related, tax or other) and the rationale for engaging the Registrant s independent auditor to perform the services. To the extent the proposed engagement involves audit, audit-related or tax services, any individual member of the Audit Committee who is an independent Board member is authorized to pre-approve the engagement. To the extent the proposed engagement

involves non-audit services other than audit-related or tax, the Chairman of the Audit Committee is authorized to pre-approve the engagement. The Registrant s Chief Financial Officer will arrange for this interim review and coordinate with the appropriate member(s) of the Committee. The independent auditor may not commence the engagement under consideration until the Registrant s Chief Financial Officer has informed the auditor in writing that pre-approval has been obtained from the Audit Committee or an individual member who is an independent Board member. The member of the Audit Committee who pre-approves any engagements in between regularly scheduled Audit Committee meetings is to report, for informational purposes only, any pre-approval decisions to the Audit Committee at its next regularly scheduled meeting.

- (e)(2) Not Applicable
- (f) Not Applicable
- (g) Year ended December 31, 2012 \$7,100 Year ended December 31, 2011 - \$8,400
- (h) No such services were rendered during 2012 or 2011.

Item 5. Audit Committee of Listed Registrants. The Registrant has a separately designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. Patricia W. Chadwick, Richard M. Galkin, Stephen L. Isaacs, William L. Koke, Arthur S. Mehlman, David L. Meister and G. Peter O Brien are members of the Registrant s audit committee.

Item 6. Investments.

- (a) See Item 1.
- (b) Not applicable.

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

June 5, 2003, as amended through October 22, 2009

Royce & Associates Proxy Voting Guidelines and Procedures

These procedures apply to Royce & Associates, LLC (Royce) and all funds and other client accounts for which it is responsible for voting proxies, including all open and closed-end registered investment companies (The Royce Funds), limited partnerships, limited liability companies, separate accounts, other accounts for which it acts as investment adviser and any accounts for which it acts as sub-adviser that have delegated proxy voting authority to Royce. Such authority is determined at the inception of each client account and generally: (i) is specifically authorized in the applicable investment management agreement or other written instrument or (ii) where not specifically authorized, is granted to Royce where general investment discretion is given to it in the applicable investment management agreement. The Boards of Trustees/Directors of The Royce Funds (the Boards) have delegated all proxy voting decisions to Royce subject to these policies and procedures. Notwithstanding the above, from time to time the Boards may reserve voting authority for specific securities.

Receipt of Proxy Material. Under the continuous oversight of the Head of Administration, an Administrative Assistant designated by him is responsible for monitoring receipt of all proxies and ensuring that proxies are received for all securities for which Royce has proxy voting responsibility. All proxy materials are logged in upon receipt by Royce s Librarian.

<u>Voting of Proxies</u>. Once proxy material has been logged in by Royce s Librarian, it is then promptly reviewed by the designated Administrative Assistant to evaluate the issues presented. Regularly recurring matters are usually voted as recommended by the issuer s board of directors or management. The Head of Administration or his designee, in consultation with the Chief Investment Officer, develops and updates a list of matters Royce treats as

regularly recurring and is responsible for ensuring that the designated Administrative Assistant has an up-to-date list of these matters at all times, including instructions from Royce s Chief Investment Officer on how to vote on those matters on behalf of Royce clients. Examples of regularly recurring matters include non-contested elections of directors and non-contested approval of independent auditors. Non- regularly recurring matters are brought to the attention of the portfolio manager(s) for the account(s) involved by the designated Administrative Assistant, and, after giving some consideration to advisories from Glass Lewis & Co., an independent third party research firm, the portfolio manager directs that such matters be voted in a way that he or she believes should better protect or enhance the value of the investment. If the portfolio manager determines that information concerning any proxy requires analysis, is missing or incomplete, he or she then gives the proxy to an analyst or another portfolio manager for review and analysis.

- a. From time to time, it is possible that one Royce portfolio manager will decide (i) to vote shares held in client accounts he or she manages differently from the vote of another Royce portfolio manager whose client accounts hold the same security or (ii) to abstain from voting on behalf of client accounts he or she manages when another Royce portfolio manager is casting votes on behalf of other Royce client accounts.
 - The designated Administrative Assistant reviews all proxy votes collected from Royce s portfolio managers prior to such votes being cast. If any difference exists among the voting instructions given by Royce s portfolio managers, as described above, the designated Administrative Assistant then presents these proposed votes to the Head of Administration, or his designee, and the Chief Investment Officer. The Chief Investment Officer, after consulting with the relevant portfolio managers, either reconciles the votes or authorizes the casting of differing votes by different portfolio managers. The Head of Administration, or his designee, maintains a log of all votes for which different portfolio managers have cast differing votes, that describes the rationale for allowing such differing votes and contains the initials of both the Chief Investment Officer and Head of Administration, or his designee, allowing such differing votes. The Head of Administration, or his designee, performs a weekly review of all votes cast by Royce to confirm that any conflicting votes were properly handled in accordance with the above-described procedures.
- b. There are many circumstances that might cause Royce to vote against an issuer s board of directors or management proposal. These would include, among others, excessive compensation, unusual management stock options, preferential voting and poison pills. The portfolio managers decide these issues on a case-by-case basis as described above.
- c. A portfolio manager may, on occasion, determine to abstain from voting a proxy or a specific proxy item when he or she concludes that the potential benefit of voting is outweighed by the cost, when it is not in the client account s best interest to vote.
- d. When a client has authorized Royce to vote proxies on its behalf, Royce will generally not accept instructions from the clients regarding how to vote proxies.
- e. If a security is on loan under The Royce Funds Securities Lending Program with State Street Bank and Trust Company (Loaned Securities), the Head of Administration, or his designee, will recall the Loaned Securities and request that they be delivered within the customary settlement period after the notice, to permit the exercise of their voting rights if the number of shares of the security on loan would have a material effect on The Royce Funds voting power at the up-coming stockholder meeting. A material effect is defined as any case where the Loaned Securities are 1% or more of a class of a company s outstanding equity securities. Monthly, the Head of Administration or his designee will review the summary of this activity by State Street. A quarterly report detailing any exceptions that occur in recalling Loaned Securities will be given to the Boards.

Custodian banks are authorized to release all proxy ballots held for Royce client account portfolios to Glass Lewis & Co. for voting, utilizing the Viewpoint proxy voting platform. Substantially all portfolio companies utilize Broadridge to collect their proxy votes.

Under the continuous oversight of the Head of Administration, or his designee, the designated Administrative Assistant is responsible for voting all proxies in a timely manner. Votes are returned to Broadridge using Viewpoint as ballots are received, generally two weeks before the scheduled meeting date. The issuer can thus see that the shares were voted, but the actual vote cast is not released to the company until 4:00 pm on the day before the meeting. If proxies must be mailed, they go out at least ten business days before the meeting date.

Conflicts of Interest. The designated Administrative Assistant reviews reports generated by Royce's portfolio management system (Quest PMS) that set forth by record date, any security held in a Royce client account which is issued by a (i) public company that is, or a known affiliate of which is, a separate account client of Royce (including sub-advisory relationships), (ii) public company, or a known affiliate of a public company, that has invested in a privately-offered pooled vehicle managed by Royce or (iii) public company, or a known affiliate of a public company, by which the spouse of a Royce employee or an immediate family member of a Royce employee living in the household of such employee is employed, for the purpose of identifying any potential proxy votes that could present a conflict of interest for Royce. The Head of Administration, or his designee, develops and updates the list of such public companies or their known affiliates which is used by Quest PMS to generate these daily reports. This list also contains information regarding the source of any potential conflict relating to such companies. Potential conflicts identified on the conflicts reports are brought to the attention of the Head of Administration or his designee by the designated Administrative Assistant. An R&A Compliance Officer then reviews them to determine if business or personal relationships exist between Royce, its officers, managers or employees and the company that could present a material conflict of interest. Any such identified material conflicts are voted by Royce in accordance with the recommendation given by an independent third party research firm (Glass Lewis & Co.). The Head of Administration or his designee maintains a log of all such conflicts identified, the analysis of the conflict and the vote ultimately cast. Each entry in this log is signed by the Chief Investment Officer before the relevant votes are cast.

Recordkeeping. A record of the issues and how they are voted is stored in the Viewpoint system. Copies of all physically executed proxy cards, all proxy statements (with it being permissible to rely on proxy statements filed and available on Edgar) and any other documents created or reviewed that are material to making a decision on how to vote proxies are retained in the Company File maintained by Royce's Librarian in an easily accessible place for a period of not less than six years from the end of the fiscal year during which the last entry was made on such record, the first two years at Royce's office. In addition, copies of each written client request for information on how Royce voted proxies on behalf of that client, and a copy of any written response by Royce to any (written or oral) client request for information on how Royce voted proxies on behalf of that client will be maintained by Royce's Head of Administration and/or Royce's Director of Alternative Investments, or their designee (depending on who received such request) for a period of not less than six years from the end of the fiscal year during which the last entry was made on such record, the first two years at Royce's office. Royce's Compliance Department shall maintain a copy of any proxy voting policies and procedures in effect at any time within the last five years.

<u>Disclosure.</u> Royce s proxy voting procedures will be disclosed to clients upon commencement of a client account. Thereafter, proxy voting records and procedures are generally disclosed to those clients for which Royce has authority to vote proxies as set forth below:

- The Royce Funds proxy voting records are disclosed annually on Form N-PX (with such voting records also available at www.roycefunds.com). Proxy voting procedures are available in the Statement of Additional Information for the open-end funds, in the annual report on Form N-CSR for the closed-end funds and at www.roycefunds.com.
- Limited Liability Company and Limited Partnership Accounts proxy voting records are disclosed to members/partners upon request and proxy voting procedures (along with a summary thereof) are provided to members/partners annually (and are available at www.roycefunds.com).
- Separate Accounts proxy voting records and procedures are disclosed to separate account clients annually.

Item 8. Portfolio Managers of Closed-End Management Investment Companies.

(a)(1) Portfolio Managers of Closed-End Management Investment Companies (information as of December 31, 2012)

<u>Name</u>	<u>Title</u>	Length of Service	Principal Occupation(s) During Past 5 Years
W. Whitney George	Vice President and Portfolio Manager of the Registrant	Since July 2002	Co-Chief Investment Officer, Managing Director and Vice President of Royce & Associates, LLC (Royce), investment adviser to the Registrant; Vice President of the Registrant, Royce Value Trust, Inc., Royce Micro-Cap Trust, Inc., Royce Focus Trust, Inc., The Royce Fund and Royce Capital Fund (collectively, The Royce Funds).

(a)(2) Other Accounts Managed by Portfolio Manager and Potential Conflicts of Interest (information as of December 31, 2012)

Other Accounts

Type of Account	Number of Accounts Managed	Total Assets Managed	Number of Accounts Managed for which Advisory Fee is Performance-Based	Value of Managed Accounts for which Advisory Fee is Performance Based
Registered investment companies	11	\$14,544,212,176	-	-
Private pooled investment vehicles	5	\$1,116,163,365	1	\$104,617,204
Other accounts*	2	\$39,529,545	-	-

^{*}Other accounts include all other accounts managed by the Portfolio Manager in either a professional or personal capacity except for personal accounts subject to pre-approval and reporting requirements under the Registrant s Rule 17j-1 Code of Ethics.

Conflicts of Interest

The fact that the Portfolio Manager has day-to-day management responsibility for more than one client account may create actual, potential or only apparent conflicts of interest. For example, the Portfolio Manager may have an opportunity to purchase securities of limited availability. In this circumstance, the Portfolio Manager is expected to review each account s investment guidelines, restrictions, tax considerations, cash balances, liquidity needs and other factors to determine the suitability of the investment for each account and to ensure that his managed accounts are treated equitably. The Portfolio Manager may also decide to purchase or sell the same security for multiple managed accounts at approximately the same time. To address any conflicts that this situation may create, the Portfolio Manager will generally combine managed account orders (i.e., enter a bunched order) in an effort to obtain best execution or a more favorable commission rate. In addition, if orders to buy or sell a security for multiple accounts managed by common Portfolio Managers on the same day are executed at different prices or commission rates, the transactions will generally be allocated by Royce & Associates, LLC (Royce) to each of such managed accounts at the weighted average execution price and commission. In circumstances where a pre-allocated bunched order is not completely filled, each account will normally receive a pro-rated portion of the securities based upon the account s level of participation in the order. Royce may under certain circumstances allocate securities in a manner other than pro-rata if it determines that the allocation is fair and equitable under the circumstances and does not discriminate against any account.

As described below, there is a revenue-based component of the Portfolio Manager s Performance-Related Variable Compensation and the Portfolio Manager also receives Firm-Related Variable Compensation based on revenues (adjusted for certain imputed expenses) generated by Royce. In addition, the Portfolio Manager receives variable compensation based on Royce s retained pre-tax profits from operations. As a result, the Portfolio Manager may receive a greater relative benefit from activities that increase the value to Royce of The Royce Funds and/or other Royce client accounts, including, but not limited to, increases in sales of the Registrant s shares and assets under management.

Also, as described above, the Portfolio Manager generally manages more than one client account, including, among others, registered investment company accounts, separate accounts and private pooled accounts managed on behalf of institutions (e.g., pension funds, endowments and foundations) and for high-net-worth individuals. The appearance of a conflict of interest may arise where Royce has an incentive, such as a performance-based management fee (or any other variation in the level of fees payable by The Royce Funds or other Royce client accounts to Royce), which relates to the management of one or more of The Royce Funds or accounts with respect to which the Portfolio Manager has day-to-day management responsibilities. One registered investment company

account, Royce Global Select Fund, for which the Portfolio Manager serves as Assistant Portfolio Manager, pays Royce a performance-based fee.

Finally, conflicts of interest may arise when the Portfolio Manager personally buys, holds or sells securities held or to be purchased or sold for the Registrant or other Royce client account or personally buys, holds or sells the shares of one or more of The Royce Funds. To address this, Royce has adopted a written Code of Ethics designed to prevent and detect personal trading activities that may interfere or conflict with client interests (including Registrant's stockholders' interests). Royce generally does not permit its Portfolio Managers to purchase small- or micro-cap securities in their personal investment portfolios.

Royce and The Royce Funds have adopted certain compliance procedures which are designed to address the above-described types of conflicts. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.

(a)(3) Description of Portfolio Manager Compensation Structure (information as of December 31, 2012)

Royce seeks to maintain a compensation program that is competitively positioned to attract and retain high-caliber investment professionals. The Portfolio Manager, receives from Royce a base salary, Performance-Related Variable Compensation, Firm-Related Variable Compensation based primarily on registered investment company and other client account revenues generated by Royce and a benefits package. Portfolio Manager compensation is reviewed and may be modified from time to time as appropriate to reflect changes in the market, as well as to adjust the factors used to determine variable compensation. Except as described below, the Portfolio Manager s compensation consists of the following elements:

- BASE SALARY. The Portfolio Manager is paid a base salary. In setting the base salary, Royce seeks to be competitive in light of the Portfolio Manager s experience and responsibilities.
- PERFORMANCE-RELATED VARIABLE COMPENSATION. The Portfolio Manager receives quarterly Performance-Related Variable Compensation that is either asset-based, or revenue-based and therefore in part based on the value of the net assets of the account for which he is being compensated, determined with reference to each of the registered investment company and other client accounts he is managing. The Performance-Related Variable Compensation applicable to the registered investment company accounts managed by the Portfolio Manager is subject to downward adjustment or elimination based on a combination of 3-year, 5-year and 10-year risk-adjusted pre-tax returns of such accounts relative to all small-cap objective funds with three years of history tracked by Morningstar (as of December 31, 2012 there were 374 such Funds tracked by Morningstar), 5-year absolute returns of such accounts relative to 5-year U.S. Treasury Notes and absolute returns over the prior full market cycle and current cycle to date vs. the accounts benchmark. The Performance-Related Variable Compensation applicable to non-registered investment company accounts managed by the Portfolio Manager is not subject to performance-related adjustment.

Payment of the Performance-Related Variable Compensation may be deferred, and any amounts deferred are forfeitable, if the Portfolio Manager is terminated by Royce with or without cause or resigns. The amount of the deferred Performance-Related Variable Compensation will appreciate or depreciate during the deferral period, based on the total return performance of one or more Royce-managed registered investment company accounts selected by the Portfolio Manager at the beginning of the deferral period. The amount deferred will depend on the Portfolio Manager s total direct, indirect beneficial and deferred unvested investments in the Royce registered investment company account for which he or she is receiving portfolio management compensation.

- FIRM-RELATED VARIABLE COMPENSATION. The Portfolio Manager receives quarterly variable compensation based on Royce s net revenues.
- BENEFIT PACKAGE. The Portfolio Manager also receives benefits standard for all Royce employees, including health care and other insurance benefits, and participation in Royce s 401(k) Plan and Money

Purchase Pension Plan. From time to time, on a purely discretionary basis, the Portfolio Manager may also receive options to acquire stock in Royce s parent company, Legg Mason, Inc. Those options typically represent a relatively small portion of the Portfolio Managers overall compensation.

The Portfolio Manager, in addition to the above-described compensation, also receives variable compensation based on Royce s retained pre-tax operating profit. This variable compensation, along with the Performance-Related Variable Compensation and Firm-Related Variable Compensation, generally represents the most significant element of the Portfolio Manager s compensation.

(a)(4) Dollar Range of Equity Securities in Registrant Beneficially Owned by Portfolio Manager (information as of December 31, 2012)

The following table shows the dollar range of the Registrant s shares owned beneficially and of record by the Portfolio Manager, including investments by his immediately family members sharing the same household and amounts invested through retirement and deferred compensation plans.

Dollar Range of Registrant s Shares Beneficially Owned

Over \$1,000,000

(b) Not Applicable.

Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers. Not Applicable.

Item 10. Submission of Matters to a Vote of Security Holders. Not Applicable.

Item 11. Controls and Procedures.

- (a) Disclosure Controls and Procedures. The Principal Executive and Financial Officers concluded that the Registrant s Disclosure Controls and Procedures are effective based on their evaluation of the Disclosure Controls and Procedures as of a date within 90 days of the filing date of this report.
- (b) Internal Control over Financial Reporting. There were no significant changes in Registrant s internal control over financial reporting or in other factors that could significantly affect this control subsequent to the date of the evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses during the second fiscal quarter of the period covered by this report.

Item 12. Exhibits. Attached hereto.

- (a)(1) The Registrant s code of ethics pursuant to Item 2 of Form N-CSR.
- (a)(2) Separate certifications by the Registrant s Principal Executive Officer and Principal Financial Officer as required by Rule 30a-2(a) under the Investment Company Act of 1940.
- (a)(3) Not Applicable
- (b) Separate certifications by the Registrant s Principal Executive Officer and Principal Financial Officer, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and required by Rule 30a-2(b) under the Investment Company Act of 1940.

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
