A message from Charles River CEO to all employees
April 26, 2010
This will be posted on criver.com

Today, we announced plans to acquire WuXi AppTec. The combination of Charles River and WuXi AppTec creates the only global CRO to offer drug development services from molecule creation to first-in-human testing by uniting the global leaders in in vivo biology and chemistry.

Together, we can better serve our customers through an increased global presence and comprehensive portfolio of discovery and early-stage development services. This acquisition brings us closer to clients by enhancing our strategic value and helping to ensure we are on the same side of the table.

This is a good opportunity for Charles River for four reasons:

- o Enables us to better serve our customers
- o Enhances our management team and scientific expertise
 - o Drives profitable revenue growth
- o Gives us a strong presence in China, an emerging research frontier for our clients

WuXi AppTec is a leading drug research and development outsourcing company with expertise in discovery chemistry. The Company was established in 2000 and has steadily grown to more than 4,000 employees, with operations in China and the United States.

This transformational combination brings together two companies that share a goal of accelerating our customers' drug development efforts and a commitment to exceeding our clients' expectations.

Attached is a link to my video message about this game-changing transaction. The video is also available on iConnect in the "Front & Center" spotlight of the Global Page. There is also a Q&A document on iConnect to help address your questions.

Thank you for your continued dedication and commitment.
